

§216.11

eligibility. Where eligibility for an annuity is based upon a family relationship to an employee (for example, a widow's annuity), the definition of such family relationship may be found in part 222 of this chapter. Part 225 of this chapter describes the computation of the primary insurance amount.

Subpart B—Current Connection With the Railroad Industry

§216.11 General.

A current connection with the railroad industry is required to qualify for certain types of railroad retirement benefits. The existence of a current connection is clear in most cases where entitlement or death immediately follows continuous years of railroad employment. However, there are cases in which the employee did not work for a railroad employer for a period of time before entitlement or death. In these situations, special tests are applied to determine whether the employee can be considered to have a current connection with the railroad industry for the purpose of determining his or her eligibility for an annuity or other benefits.

§216.12 When current connection is required.

(a) A current connection is required to qualify an individual for the following types of railroad retirement benefits:

- (1) An employee occupational disability annuity as described in subpart D of this part;
- (2) A supplemental annuity as described in subpart E of this part;
- (3) An employee vested dual benefit in certain cases;
- (4) A survivor annuity as described in subparts G, H, and I of this part; and
- (5) A lump-sum death payment as described in part 234 of this chapter.

(b) A current connection which was established when an employee's annuity began is effective for:

- (1) Any annuity under this part for which the employee later becomes eligible; and
- (2) Any survivor annuity under this part or a lump-sum death payment under part 234 of this chapter.

20 CFR Ch. II (4-1-11 Edition)

§216.13 Regular current connection test.

An employee has a current connection with the railroad industry if he or she meets one of the following requirements:

(a) The employee has creditable railroad service in at least 12 of the 30 consecutive months immediately preceding the earlier of:

- (1) The month his or her annuity begins; or
- (2) The month he or she dies.

(b) The employee has creditable railroad service in at least 12 months in a period of 30 consecutive months and does not work in any regular non-railroad employment in the interval between the month the 30-month period ends and the earlier of:

- (1) The month his or her annuity begins; or
- (2) The month he or she dies.

§216.14 Regular non-railroad employment that will not break a current connection.

Regular non-railroad employment will not break an employee's current connection if it is performed during the 30-month period described in §216.13(b), in or after the month the annuity begins, or in the month the employee dies.

§216.15 Special current connection test.

(a) *For survivor annuities.* An employee who does not have a current connection under the regular test has a current connection only to qualify an individual for a survivor annuity if:

(1) The employee would not be fully or currently insured under section 214 of the Social Security Act if his or her railroad compensation after 1936 were treated as social security earnings;

(2) The employee has no quarters of coverage as defined in section 213 of the Social Security Act; or

(3) The employee received a pension or a retirement annuity that began before 1948 based on at least 114 months of service.

(b) *For survivor and supplemental annuities.* An employee who does not have a current connection under the regular test has a current connection in order
