§ 73.3110 Chlorophyll-copper complex, oil soluble.

(a) Identity. The color additive is chlorophyll-copper complex, oil soluble. The chlorophyll is obtained by extraction from a mixture of fescue and rye grasses. The chlorophyll is acid-treated to remove chelated magnesium which is replaced with hydrogen, which in turn is replaced with copper. This mixture is diluted to a 5 percent concentration with a mixture of palm oil, peanut oil, and hydrogenated peanut oil.
