§ 520.522 Cyclosporine.
(a) Specifications. Each capsule contains 10, 25, 50, or 100 milligrams (mg) cyclosporine.
(b) Sponsor. See No. 058198 in § 510.600(c) of this chapter.
(c) Special considerations. Cythioate is a cholinesterase inhibitor. Do not use this product in animals simultaneously with or within a few days before or after treatment with or exposure to cholinesterase-inhibiting drugs, insecticides, pesticides, or chemicals.
(d) Amount. 30 milligrams cythioate per 20 pounds of body weight every third day or twice a week.
(2) Indications for use. Dogs, for control of fleas.
(3) Limitations. For oral use in dogs only. Do not use in greyhounds or in animals that are pregnant, sick, under stress, or recovering from surgery. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

§ 520.534 Decoquinate.
(a) Specifications. The drug is a powder containing 0.8 percent decoquinate.
(b) Sponsor. See No. 046573 in § 510.600(c) of this chapter.
(c) Related tolerances. See § 556.170 of this chapter.
(d) Amount. Feed 22.7 milligrams per 100 pounds of body weight (0.5 milligram per kilogram) per day.
(2) Indications for use. For the prevention of coccidiosis in ruminating calves, including veal calves, caused by Eimeria bovis and E. zuernii.
(3) Limitations. Feed in whole milk at the rate of 22.7 milligrams per 100 pounds body weight daily (0.5 milligram per kilogram) for at least 28 days.
