

other activities proposed in the conversion plan that do not require environmental review (such as certain activities related to the relocation of residents), as long as the buildings in question are adequately secured and maintained.

(c) For purposes of determining operating subsidy eligibility, the submitted conversion plan will be considered the equivalent of a formal request to remove dwelling units from the PHA's inventory and Annual Contributions Contract (ACC). Units that are vacant or are vacated on or after the written notification date will be treated as approved for deprogramming under §990.108(b)(1) of this title, and will also be provided the phase down of subsidy pursuant to §990.114 of this title.

(d) HUD may require that funding for the initial year of tenant-based assistance be provided from the public housing Capital Fund, Operating Fund, or both.

§972.215 Applicability of the Uniform Relocation Act.

To the extent that tenants are displaced as a direct result of the demolition, acquisition, or rehabilitation of federally-assisted property converted under this subpart, the requirements of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601) (URA), and the implementing regulations issued by the Department of Transportation at 49 CFR part 24, apply.

CONVERSION ASSESSMENTS

§972.218 Conversion assessment components.

The conversion assessment contains five elements, as described below:

(a) *Cost analysis.* A PHA must conduct a cost analysis comparing the cost of providing Section 8 tenant-based assistance with the cost of continuing to operate the development as public housing for the remainder of its useful life. The cost methodology necessary to conduct the cost comparisons for voluntary conversions has not yet been finalized. PHAs may not undertake conversions under this subpart until the effective date of the cost methodology, which will be announced in the

FEDERAL REGISTER. Once effective, the cost methodology will be codified as an appendix to this part.

(b) *Analysis of the market value.* (1) A PHA must have an independent appraisal conducted to compare the market value of the development before and after rehabilitation. In both cases, the market value must be based on the use of the development as public housing.

(2) In addition, the appraisal must compare:

(i) The market value of the development before rehabilitation, based on the use of the development as public housing, with the market value of the development after conversion; with

(ii) The market value of the development after rehabilitation, based on the use of the development as public housing, with the market value of the development after conversion.

(3) A copy of the appraisal findings and the analysis of market value of the development in the conversion assessment must be provided in the conversion assessment.

(c) *Analysis of rental market conditions.* (1) A PHA must conduct an analysis of the likely success of using tenant-based assistance for the residents of the public housing development. This analysis must include an assessment of the availability of decent, safe, and sanitary dwelling units rented at or below the applicable Section 8 payment standard established for the jurisdiction or designated part of the FMR area in which the development is located.

(2) In conducting this assessment, a PHA must take into account:

(i) Its overall use of rental certificates or vouchers under lease and the success rates of using Section 8 tenant-based assistance in the community for the appropriate bedroom sizes, including recent success rates for units renting at or below the established payment standard; and

(ii) Any particular characteristics of the specific residents of the public housing which may affect their ability to be housed (such as large household size or the presence of an elderly or disabled family member).

(d) *Impact analysis.* A PHA must describe the likely impact of conversion

§ 972.221

24 CFR Ch. IX (4-1-11 Edition)

of the public housing development on the neighborhood in which the public housing is located. This must include:

(1) The impact on the availability of affordable housing in the neighborhood;

(2) The impact on the concentration of poverty in the neighborhood; and

(3) Other substantial impacts on the neighborhood.

(e) *Conversion implementation.* If a PHA intends to convert the development (or a portion of it) to tenant-based assistance, the conversion assessment must include a description of any actions the PHA plans to take in converting the development. This must include a general description of the planned future uses of the development, and the means and timetable for accomplishing such uses.

§ 972.221. Timing of submission of conversion assessments to HUD.

(a) *Submission with PHA Plan.* A PHA that wishes to convert a public housing development to tenant-based assistance must submit a conversion assessment to HUD with its next PHA Annual Plan.

(b) *Updated conversion assessment.* Where a PHA proposes to convert a development to tenant-based assistance, it must submit an updated conversion assessment if the conversion assessment otherwise would be more than one year older than the conversion plan to be submitted to HUD. To update a conversion assessment, a PHA must ensure that the analysis of rental market conditions is based on the most recently available data, and must include any data that have changed since the initial conversion assessment. A PHA may submit the initial cost analysis and comparison of the market value of the public housing before and after rehabilitation and/or conversion if there is no reason to believe that such information has changed significantly.

§ 972.224. Necessary conditions for HUD approval of conversion.

(a) *Conditions.* In order to convert a public housing development, the PHA must conduct a conversion assessment that demonstrates that the conversion of the development:

(1) Will not be more expensive than continuing to operate the development (or portion of it) as public housing;

(2) Will principally benefit the residents of the public housing development (or portion thereof) to be converted, the PHA, and the community; and

(3) Will not adversely affect the availability of affordable housing in the community.

(b) *Evidence*—(1) *Relative expense.* The relative expense of continuing operation as public housing or conversion to tenant-based assistance may be demonstrated by the cost analysis and market value analysis.

(2) *Benefit to residents, PHA, and the community.* (i) The benefit to residents, the PHA, and the community may be demonstrated in the rental market analysis, the analysis of the impact on the neighborhood, the market value analysis, and the proposed future use of the development. In determining whether a conversion will principally benefit residents, the PHA, and the community, HUD will consider whether the conversion will conflict with any litigation settlement agreements, voluntary compliance agreements, or other remedial agreements signed by the PHA with HUD.

(ii) In making the determination of whether a conversion would principally benefit residents, the PHA, and the community, the PHA must consider such factors as the availability of landlords providing tenant-based assistance, as well as access to schools, jobs, and transportation.

(iii) To determine the benefit to residents, the PHA must hold at least one public meeting with residents of the affected site (including the duly elected Resident Council, if any, that covers the development in question). At the meeting, the PHA must:

(A) Explain the requirements of section 22 of the United States Housing Act of 1937 and these regulations, especially as they apply to residents of affected developments;

(B) Provide draft copies of the conversion assessment to the residents; and
