

Internal Revenue Service, Treasury

§ 1.1471-1, Nt.

to be paid under section 1446. The previous sentence shall apply to partnership taxable years beginning after May 18, 2005, or such earlier time as the regulations under §§1.1446-1 through 1.1446-5 apply by reason of an election under §1.1446-7.

(b) *Effective date.* Unless otherwise provided in this section, this section applies to failures to withhold occurring after December 31, 2000.

[T.D. 8734, 62 FR 53471, Oct. 14, 1997, as amended by T.D. 8804, 63 FR 72188, Dec. 31, 1998; T.D. 8856, 64 FR 73412, Dec. 30, 1999; T.D. 9200, 70 FR 28741, May 18, 2005]

§ 1.1464-1 Refunds or credits.

(a) *In general.* The refund or credit under chapter 65 of the Code of an overpayment of tax which has actually been withheld at the source under chapter 3 of the Code shall be made to the taxpayer from whose income the amount of such tax was in fact withheld. To the extent that the overpayment under chapter 3 was not in fact withheld at the source, but was paid, by the withholding agent the refund or credit under chapter 65 of the overpayment shall be made to the withholding agent. Thus, where a debtor corporation assumes liability pursuant to its tax-free covenant for the tax required to be withheld under chapter 3 upon interest and pays the tax in behalf of its bondholder, and it can be shown that the bondholder is not in fact liable for any tax, the overpayment of tax shall be credited or refunded to the withholding agent in accordance with chapter 65 since the tax was not actually deducted and withheld from the interest paid to the bondholder. In further illustration, where a withholding agent who is required by chapter 3 to withhold \$300 tax from rents paid to a non-resident alien individual mistakenly withholds \$320 and mistakenly pays \$350 as internal revenue tax, the amount of \$30 shall be credited or refunded to the withholding agent in accordance with chapter 65 and the amount of \$20 shall be credited or refunded in accordance with such chapter to the person from whose income such amount has been withheld. With respect to section 1446, this section shall only apply to a publicly traded partnership described in §1.1446-4.

(b) *Tax repaid to payee.* For purposes of this section and §1.6414-1, any amount of tax withheld under chapter 3 of the Code, which, pursuant to paragraph (a)(1) of §1.1461-2, is repaid by the withholding agent to the person from whose income such amount was erroneously withheld shall be considered as tax which, within the meaning of sections 1464 and 6414, was not actually withheld by the withholding agent.

(c) *Effective/Applicability date.* The last sentence in paragraph (a) of this section shall apply to partnership taxable years beginning after April 29, 2008.

[T.D. 6922, 32 FR 8713, June 17, 1967, as amended by T.D. 8804, 63 FR 72188, Dec. 31, 1998; T.D. 9394, 73 FR 23085, Apr. 29, 2008; 74 FR 14932, Apr. 2, 2009]

RULES APPLICABLE TO RECOVERY OF EXCESSIVE PROFITS ON GOVERNMENT CONTRACTS

RECOVERY OF EXCESSIVE PROFITS ON GOVERNMENT CONTRACTS

§ 1.1471-1 Recovery of excessive profits on government contracts.

The inclusion of the statutory provisions of section 1471 in this part does not supersede the provisions of 26 CFR (1939) part 17 (Treasury Decision 4906) and 26 CFR (1939) part 16 (Treasury Decision 4909) as made applicable to section 1471 by Treasury Decision 6091 (19 FR 5167, C.B. 1954-2, 47).

[T.D. 6500, 25 FR 12081, Nov. 26, 1960]

EDITORIAL NOTE: For the convenience of the user, the text of parts 16 and 17 (not entirely superseded) of 26 CFR (1939) referred to above is set forth below:

PART 16—EXCESS PROFITS ON ARMY CONTRACTS FOR AIRCRAFT

REGULATIONS UNDER SECTION 14 OF THE ACT OF APRIL 3, 1939, AND OTHER PROVISIONS

AUTHORITY: Sections 16.1 to 16.18 issued under 52 Stat. 467; 26 U.S.C. 3791. Interpret or apply sec. 3, 48 Stat. 505, as amended, sec. 14, 53 Stat. 560; 34 U.S.C. 496, 10 U.S.C. 311, 312.2206

SOURCE: Sections 16.1 to 16.18 contained in T.D. 4909, 4 FR 2733, July 1, 1939, except as otherwise noted.

§ 16.1 *Definitions.* As used in the regulations in this part the term:

(a) "Act" means the act of April 3, 1939 (53 Stat. 560; 10 U.S.C. 311, 312, 34 U.S.C. 496), together with the applicable provisions of section 3 of the act of March 27, 1934, 48 Stat. 505; 34 U.S.C. 496, as amended by the act of June 25, 1936, 49 Stat. 1926; 34 U.S.C., Sup. IV, 496, and as further amended by the act of April 3, 1939 (53 Stat. 560; 34 U.S.C. 496).

(b) "Person" includes an individual, a corporation, a partnership, a trust or estate, a joint-stock company, an association, or a syndicate, group, pool, joint venture or other unincorporated organization or group, through or by means of which any business, financial operation or venture is carried on.

(c) "Contract" means an agreement made by authority of the Secretary of the Army for the construction or manufacture of any complete aircraft or any portion thereof for the Army.

(d) "Contractor" means a person entering into a direct contract with the Secretary of the Army or his duly authorized representative.

(e) "Subcontract" means an agreement entered into by one person with another person for the construction or manufacture of any complete aircraft or any portion thereof for the Army, the prime contract for such aircraft or portion thereof having been entered into between a contractor and the Secretary of the Army or his duly authorized representative.

(f) "Subcontractor" means any person other than a contractor entering into a subcontract.

(g) "Contracting party" means a contractor or subcontractor as the case may be.

(h) "Contract price" or "total contract price" means the amount or total amount to be received under a contract or subcontract as the case may be.

(i) "Income-taxable year" means the calendar year, the fiscal year ending during such calendar year, or the fractional part of such calendar or fiscal year, upon the basis of which the contracting party's net income is computed and for which its income tax returns are made for Federal income tax purposes.

§16.2 *Contracts and subcontracts under which excess profit liability may be incurred.* Except as otherwise provided with respect to contracts or subcontracts for certain scientific equipment (see §16.3), every contract awarded for an amount exceeding \$10,000 and entered into after the enactment of the act of April 3, 1939 for the construction or manufacture of any complete aircraft or any portion thereof for the Army, is subject to the provisions of the act relating to excess profit liability. Any subcontract made with respect to such a contract and involving an amount in excess of \$10,000 is also within the scope of the act. If a contracting party places orders with another party, aggregating an amount

in excess of \$10,000, for articles or materials which constitute a part of the cost of performing the contract or subcontract, the placing of such orders shall constitute a subcontract within the scope of the act, unless it is clearly shown that each of the orders involving \$10,000 or less is a bona fide separate and distinct subcontract and not a subdivision made for the purpose of evading the provisions of the act.

§16.3 *Contracts or subcontracts for scientific equipment.* No excess profit liability is incurred upon a contract or subcontract entered into after the enactment of the act of April 3, 1939, if at the time or prior to the time such contract or subcontract is made it is designated by the Secretary of the Army as being exempt under the provisions of the act pertaining to scientific equipment used for communication, target detection, navigation, and fire control.

§16.4 *Completion of contract defined.* The date of delivery of the aircraft or portion thereof covered by the contract or subcontract shall be considered the date of completion of the contract or subcontract unless otherwise determined jointly by the Secretary of the Army and the Secretary of the Treasury or their duly authorized representatives. Except as otherwise provided in the preceding sentence, the replacement of defective parts or delivered articles or the performance of other guarantee work in respect of such articles will not operate to extend the date of completion. As to the treatment of the cost of such work as a cost of performing a contract or subcontract, see §16.8(h). As to a refund in case of adjustment due to any subsequently incurred additional costs, see §16.18. If a contract or subcontract is at any time cancelled or terminated, it is completed at the time of the cancellation or termination.

§16.5 *Manner of determining liability.* (a) The first step in the determination of the excess profit to be paid to the United States by a contracting party with respect to contracts and subcontracts completed within an income-taxable year is to ascertain the total contract prices of all contracts and subcontracts completed by the contracting party within the income-taxable year. As to total contract prices, see §16.7.

(b) The second step is to ascertain the cost of performing such contracts and subcontracts and to deduct such cost from the total contract prices of such contracts and subcontracts as computed in the first step. See §16.8. The amount remaining after such subtraction is the amount of net profit or net loss upon the contracts and subcontracts completed within the income-taxable year.

(c) The third step, in case there is a net profit upon such contracts and subcontracts, is to subtract from the amount of such net

Internal Revenue Service, Treasury

§ 1.1471-1, Nt.

profit as computed in the second step the sum of:

(1) An amount equal to 12 percent of the total contract prices of the contracts and subcontracts completed within the income-taxable year;

(2) The amount of any net loss allowable as a credit in determining the excess profit for the income-taxable year (see § 16.9); and

(3) The amount of any deficiency in profit allowable as a credit in determining the excess profit for the income-taxable year (see § 16.9). The amount remaining after such subtraction is the amount of excess profit for the income-taxable year.

(d) The fourth step is to ascertain the amount of credit allowed for Federal income taxes paid or remaining to be paid upon the amount of such excess profit (see § 16.10) and then subtract from the amount of such excess profit the amount of credit for Federal income taxes. The amount remaining after this subtraction is the amount of excess profit to be paid to the United States by the contracting party for the income-taxable year.

[T.D. 4909, 4 FR 2733, July 1, 1939, as amended by T.D. 6511, 25 FR 12442, Dec. 6, 1960]

§ 16.6 *Computation of excess profit liability.* The application of the provisions of § 16.5 may be illustrated by the following example:

Example. On September 1, 1939, the B Corporation, which keeps its books and makes its Federal income tax returns on a calendar year basis, entered into a contract for the construction of Army aircraft coming within the scope of the act, the total contract price of which was \$200,000. On March 10, 1940, the corporation entered into another such contract, the total contract price of which was \$40,000. Both contracts were completed within the calendar year 1940, the first at a cost of \$155,000 and the second at a cost of \$45,000. During the year 1940, the B Corporation also completed at a deficiency in profit of \$2,000 a contract entered into after April 3, 1939, for the construction of naval aircraft coming within the scope of 10 U.S.C. 2382 (formerly section 3 of the Act of March 27, 1934 (48 Stat. 505)). For the year 1939, the B Corporation sustained a net loss of \$1,500 and a deficiency in profit of \$1,000 on all contracts and subcontracts entered into after April 3, 1939, for Army aircraft coming within the scope of the act and completed within the calendar year 1939. For the year 1939, the B Corporation also sustained a net loss of \$1,000 on a contract, entered into after April 3, 1939, and completed within the calendar year 1939, for naval aircraft coming within the scope of 10 U.S.C. 2382 (formerly section 3 of the Act of March 27, 1934 (48 Stat. 505)). For purposes of the Federal income tax, the net income of the B Corporation for the year 1940, on which the tax was paid, amounted to \$96,000, which included the total net profit of \$40,000 upon

the two contracts entered into on September 1, 1939, and March 10, 1940. The excess profit liability is \$4,332, computed as follows:

Total contract prices:		
Contract No. 1	\$200,000	
Contract No. 2	40,000	
		\$240,000
Less: Cost of performing con-		
tracts:		
Contract No. 1	155,000	
Contract No. 2	45,000	
		\$200,000
Net profit on contracts		\$40,000
Less:		
12 percent of total contract		
prices (12 percent of		
\$240,000)	\$28,800	
Deficiency in profit (in		
naval aircraft contracts)		
in 1940	2,000	
Net loss (in Army aircraft		
contracts) from 1939	1,500	
Net loss (in naval aircraft		
contracts) from 1939	1,000	
Deficiency in profit (in		
Army aircraft contracts)		
from 1939	1,000
Excess profit for year 1940		5,700
Less: Credit for Federal income taxes		
(Federal income tax on \$5,700 at rates		
for 1940)	1,368	
		34,300
Amount of excess profit payable to the		
United States		4,332

[T.D. 4909, 4 FR 2733, July 1, 1939, as amended by T.D. 6511, 25 FR 12442, Dec. 6, 1960]

§ 16.7 *Total contract price.* The total contract price of a particular contract or subcontract (see § 16.1) may be received in money or its equivalent. If something other than money is received, only the fair market value of the thing received, at the date of receipt, is to be included in determining the amount received. Bonuses earned for bettering performance and penalties incurred for failure to meet the contract guarantees are to be regarded as adjustments of the original contract price. Trade or other discounts granted by a contracting party in respect of a contract or subcontract performed by such party are also to be deducted in determining the true total contract price of such contract or subcontract.

§ 16.8 *Cost of performing a contract or subcontract—(a) General rule.* The cost of performing a particular contract or subcontract shall be the sum of (1) the direct costs, including therein expenditures for materials, direct labor and direct expenses, incurred by the contracting party in performing the contract or subcontract; and (2) the proper proportion of any indirect costs (including

therein a reasonable proportion of management expenses) incident to and necessary for the performance of the contract or subcontract.

(b) *Elements of cost.* No definitions of the elements of cost may be stated which are of invariable application to all contractors and subcontractors. In general, the elements of cost may be defined for purposes of the act as follows:

(1) Manufacturing cost, which is the sum of factory cost (see paragraph (c) of this section) and other manufacturing cost (see paragraph (d) of this section);

(2) Miscellaneous direct expenses (see paragraph (e) of this section);

(3) General expenses, which are the sum of indirect engineering expenses, usually termed "engineering overhead" (see paragraph (f) of this section) and expenses of distribution, servicing and administration (see paragraph (g) of this section); and

(4) Guarantee expenses (see paragraph (h) of this section).

(c) *Factory cost.* Factory cost is the sum of the following:

(1) *Direct materials.* Materials, such as those purchased for stock and subsequently issued for contract operations and those acquired under subcontracts, which become a component part of the finished product or which are used directly in fabricating, converting or processing such materials or parts.

(2) *Direct productive labor.* Productive labor, usually termed "shop labor," which is performed on and is properly chargeable directly to the article manufactured or constructed pursuant to the contract or subcontract, but which ordinarily does not include direct engineering labor (see subparagraph (3) of this paragraph).

(3) *Direct engineering labor.* The compensation of professional engineers and other technicians (including reasonable advisory fees), and of draftsmen, properly chargeable directly to the cost of the contract or subcontract.

(4) *Miscellaneous direct factory charges.* Items which are properly chargeable directly to the factory cost of performing the contract or subcontract but which do not come within the classifications in subparagraphs (1), (2), and (3) of this paragraph, as for example, royalties which the contracting party pays to another party and which are properly chargeable to the cost of performing the contract or subcontract (but see paragraph (d) of this section).

(5) *Indirect factory expenses.* Items, usually termed "factory overhead," which are not directly chargeable to the factory cost of performing the contract or subcontract but which are properly incident to and necessary for the performance of the contract or subcontract and consist of the following:

(i) *Labor.* Amounts expended for factory labor, such as supervision and inspection,

clerical labor, timekeeping, packing and shipping, stores supply, services of tool crib attendants, and services in the factory employment bureau, which are not chargeable directly to productive labor of the contract or subcontract.

(ii) *Materials and supplies.* The cost of materials and supplies for general use in the factory in current operations, such as shop fuel, lubricants, heat-treating, plating, cleaning and anodizing supplies, nondurable tools and gauges, stationery (such as time tickets and other forms), and boxing and wrapping materials.

(iii) *Service expenses.* Factory expenses of a general nature, such as those for power, heat and light (whether purchased or produced), ventilation and air-conditioning and operation and maintenance of general plant assets and facilities.

(iv) *Fixed charges and obsolescence.* Recurring charges with respect to property used for manufacturing purposes of the contract or subcontract, such as premiums for fire and elevator insurance, property taxes, rentals and allowances for depreciation of such property, including maintenance and depreciation of reasonable stand-by equipment; and depreciation and obsolescence of special equipment and facilities necessarily acquired primarily for the performance of the contract or subcontract. In making allowances for depreciation, consideration shall be given to the number and length of shifts.

(v) *Miscellaneous indirect factory expenses.* Miscellaneous factory expenses not directly chargeable to the factory cost of performing the contract or subcontract, such as purchasing expenses; ordinary and necessary expenses of rearranging facilities within a department or plant; employees' welfare expenses; premiums or dues on compensation insurance; employers' payments to unemployment, old age and social security Federal and State funds not including payments deducted from or chargeable to employees or officers; pensions and retirement payments to factory employees; factory accident compensation (as to self-insurance, see paragraph (g) of this section); but not including any amounts which are not incident to services, operations, plant, equipment or facilities involved in the performance of the contract or subcontract.

(d) *Other manufacturing cost.* Other manufacturing cost as used in paragraph (b) of this section includes items of manufacturing costs which are not properly or satisfactorily chargeable to factory costs (see paragraph (c) of this section) but which upon a complete showing of all pertinent facts are properly to be included as a cost of performing the contract or subcontract, as for instance, payments of royalties and amortization of the cost of designs purchased and patent rights over their useful life; and "deferred"

or "unliquidated" experimental and development charges. For example, in case experimental and development costs have been properly deferred or capitalized and are amortized in accordance with a reasonably consistent plan, a proper portion of the current charge, determined by a ratable allocation which is reasonable in consideration of the pertinent facts, may be treated as a cost of performing the contract or subcontract. In the case of general experimental and development expenses which may be charged off currently, a reasonable portion thereof may be allocated to the cost of performing the contract or subcontract. If a special experimental or development project is carried on in pursuance of a contract, or in anticipation of a contract which is later entered into, and the expense is not treated as a part of general experimental and development expenses or is not otherwise allowed as a cost of performing the contract, there clearly appearing no reasonable prospect of an additional contract for the type of article involved, the entire cost of such project may be allowed as a part of the cost of performing the contract.

(e) *Miscellaneous direct expenses.* Miscellaneous direct expenses as used in paragraph (b) of this section include:

(1) *Cost of installation and construction.* Cost of installation and construction includes the cost of materials, labor and expenses necessary for the erection and installation prior to the completion of the contract and after the delivery of the product or material manufactured or constructed pursuant to the contract or subcontract.

(2) *Sundry direct expenses.* Items of expense which are properly chargeable directly to the cost of performing a contract or subcontract and which do not constitute guarantee expenses (see paragraph (h) of this section) or direct costs classified as factory cost or other manufacturing cost (see paragraphs (c) and (d) of this section), such as premiums on performance or other bonds required under the contract or subcontract; State sales taxes imposed on the contracting party; freight on outgoing shipments; fees paid for wind tunnel and model basin tests; demonstration and test expenses; crash insurance premiums; traveling expenses. In order for any such item to be allowed as a charge directly to the cost of performing a contract or subcontract, (i) a detailed record shall be kept by the contracting party of all items of a similar character, and (ii) no item of a similar character which is properly a direct charge to other work shall be allowed as a part of any indirect expenses in determining the proper proportion thereof chargeable to the cost of performing the contract or subcontract. As to allowable indirect expenses, see paragraphs (c)(5), (f), (g) and (j) of this section.

(f) *Indirect engineering expenses.* Indirect engineering expenses, usually termed "engi-

neering overhead," which are treated in this section as a part of general expenses in determining the cost of performing a contract or subcontract (see paragraph (b) of this section), comprise the general engineering expenses which are incident to and necessary for the performance of the contract or subcontract, such as the following:

(1) *Labor.* Reasonable fees of engineers employed in a general consulting capacity, and compensation of employees for personal services to the engineering department, such as supervision, which is properly chargeable to the contract or subcontract, but which is not chargeable as direct engineering labor (see paragraph (c)(3) of this section).

(2) *Material.* Supplies for the engineering department, such as paper and ink for drafting and similar supplies.

(3) *Miscellaneous expenses.* Expenses of the engineering department, such as (i) maintenance and repair of engineering equipment, and (ii) services purchased outside of the engineering department for blue printing, drawing, computing, and like purposes.

(g) *Expenses of distribution, servicing and administration.* Expenses of distribution, servicing and administration, which are treated in this section as a part of general expenses in determining the cost of performing a contract or subcontract (see paragraph (b) of this section), comprehend the expenses incident to and necessary for the performance of the contract or subcontract, which are incurred in connection with the distribution and general servicing of the contracting party's products and the general administration of the business, such as:

(1) *Compensation for personal services of employees.* The salaries of the corporate and general executive officers and the salaries and wages of administrative clerical employees and of the office services employees such as telephone operators, janitors, cleaners, watchmen and office equipment repairmen.

(2) *Bidding and general selling expenses.* Bidding and general selling expenses which by reference to all the pertinent facts and circumstances reasonably constitute a part of the cost of performing a contract or subcontract. The treatment of bidding and general selling expenses as a part of general expenses in accordance with this paragraph is in lieu of any direct charges which otherwise might be made for such expenses. The term "bidding expenses" as used in this section includes all expenses in connection with preparing and submitting bids.

(3) *General servicing expenses.* Expenses which by reference to all the pertinent facts and circumstances reasonably constitute a part of the cost of performing a contract or subcontract and which are incident to delivered or installed articles and are due to ordinary adjustments or minor defects; but including no items which are treated as a part of guarantee expenses (see paragraph (h) of

this section) or as a part of direct costs, such as direct materials, direct labor, and other direct expense.

(4) *Other expenses.* Miscellaneous office and administrative expenses, such as stationery and office supplies; postage; repair and depreciation of office equipment; contributions to local charitable or community organizations to the extent constituting ordinary and necessary business expenses; employees' welfare expenses; premiums and dues on compensation insurance; employers' payments to unemployment, old age and social security Federal and State funds not including payments deducted from or chargeable to employees or officers; pensions and retirement payments to administrative office employees and accident compensation to office employees (as to self-insurance, see subdivision (i) of this subparagraph).

(i) Subject to the exception stated in this subdivision, in cases where a contracting party assumes its own insurable risks (usually termed "self-insurance"), losses and payments will be allowed in the cost of performing a contract or subcontract only to the extent of the actual losses suffered or payments incurred during, and in the course of, the performance of the contract or subcontract and properly chargeable to such contract or subcontract. If however, a contracting party assumes its own insurable risks (a) for compensation paid to employees for injuries received in the performance of their duties, or (b) for unemployment risks in States where insurance is required, there may be allowed as a part of the cost of performing a contract or subcontract a reasonable portion of the charges set up for purposes of self-insurance under a system of accounting regularly employed by the contracting party, as determined by the Commissioner of Internal Revenue, at rates not exceeding the lawful or approved rates of insurance companies for such insurance, reduced by amounts representing the acquisition cost in such companies, provided the contracting party adopts and consistently follows this method with respect to self-insurance in connection with all contracts and subcontracts subsequently performed by him.

(ii) Allowances for interest on invested capital are not allowable as costs of performing a contract or subcontract.

(iii) Among the items which shall not be included as a part of the cost of performing a contract or subcontract or considered in determining such cost, are the following: Entertainment expenses; dues and memberships other than of regular trade associations; donations except as otherwise provided above; losses on other contracts; profits or losses from sales or exchanges of capital assets; extraordinary expenses due to strikes or lockouts; fines and penalties; amortization of unrealized appreciation of values of assets;

expenses, maintenance and depreciation of excess facilities (including idle land and building, idle parts of a building, and excess machinery and equipment) vacated or abandoned, or not adaptable for future use in performing contracts or subcontracts; increases in reserve accounts for contingencies, repairs, compensation insurance (except as above provided with respect to self-insurance) and guarantee work; Federal and State income and excess-profits taxes and surtaxes; cash discount earned up to one percent of the amount of the purchase, except that all discounts on subcontracts subject to the act will be considered; interest incurred or earned; bond discount or finance charges; premiums for life insurance on the lives of officers; legal and accounting fees in connection with reorganizations, security issues, capital stock issues and the prosecution of claims against the United State (including income tax matters); taxes and expenses on issues and transfers of capital stock; losses on investments; bad debts; and expenses of collection and exchange.

(iv) In order that the cost of performing a contract or subcontract may be accounted for clearly, the amount of any excess profits repayable to the United States pursuant to the act should not be charged to or included in such cost.

(h) *Guarantee expenses.* Guarantee expenses include the various items of factory cost, other manufacturing cost, cost of installation and construction, indirect engineering expenses and other general expenses (see paragraphs (c) to (g), of this section) which are incurred after delivery or installation of the article manufactured or constructed pursuant to the particular contract or subcontract and which are incident to the correction of defects or deficiencies which the contracting party is required to make under the guarantee provisions of the particular contract or subcontract. If the total amount of such guarantee expenses is not ascertainable at the time of filing the report required to be filed with the district director of internal revenue (see §16.15) and the contracting party includes any estimated amount of such expenses as part of the claimed total cost of performing the contract or subcontract, such estimated amount shall be separately shown on the report and the reasons for claiming such estimated amount shall accompany the report; but only the amount of guarantee expenses actually incurred will be allowed. If the amount of guarantee expenses actually incurred is greater than the amount (if any) claimed on the report and the contracting party has made an overpayment of excess profit, a refund of the overpayment shall be made in accordance with the provisions of §16.18. If the amount of guarantee expenses actually incurred is less than the amount claimed on the report and an additional amount of excess profit is determined to be

due, the additional amount of excess profit shall be assessed and paid in accordance with the provisions of § 16.18.

(i) *Unreasonable compensation.* (1) The salaries and compensation for services which are treated as a part of the cost of performing a contract or subcontract include reasonable payments for salaries, bonuses, or other compensation for services. As a general rule, bonuses paid to employees (and not to officers) in pursuance of a regularly established incentive bonus system may be allowed as a part of the cost of performing a contract or subcontract.

(2) The test of allowability is whether the aggregate compensation paid to each individual is for services actually rendered incident to, and necessary for, the performance of the contract or subcontract, and is reasonable. Excessive or unreasonable payments, whether in cash, stock or other property ostensibly as compensation for services shall not be included in the cost of performing a contract or subcontract.

(j) *Allocation of indirect costs.* No general rule applicable to all cases may be stated for ascertaining the proper proportion of the indirect costs to be allocated to the cost of performing a particular contract or subcontract. Such proper proportion depends upon all the facts and circumstances relating to the performance of the particular contract or subcontract. Subject to a requirement that all items which have no relation to the performance of the contract or subcontract shall be eliminated from the amount to be allocated, the following methods of allocation are outlined as acceptable in a majority of cases:

(1) *Factory indirect expenses.* The allowable indirect factory expenses (see paragraph (c)(5) of this section) shall ordinarily be allocated or "distributed" to the cost of the contract or subcontract on the basis of the proportion which the direct productive labor (see paragraph (c)(2) of this section) attributable to the contract or subcontract bears to the total direct productive labor of the production department or particular section thereof during the period within which the contract or subcontract is performed, except that if the indirect factory expenses are incurred in different amounts and in different proportions by the various producing departments consideration shall be given to such circumstances to the extent necessary to make a fair and reasonable determination of the true profit and excess profit.

(2) *Engineering indirect expenses.* The allowable indirect engineering expenses (see paragraph (f) of this section) shall ordinarily be allocated or "distributed" to the cost of the contract or subcontract on the basis of the proportion which the direct engineering labor attributable to the contract or subcontract (see paragraph (c)(3) of this section) bears to the total direct engineering labor of

the engineering department or particular section thereof during the period within which the contract or subcontract is performed. If the expenses of the engineering department are not sufficient in amount to require the maintenance of separate accounts, the engineering indirect costs may be included in the indirect factory expenses (see paragraph (c)(5) of this section) and allocated or distributed to the cost of performing the contract or subcontract as a part of such expenses, provided the proportion so allocated or distributed is proper under the facts and circumstances relating to the performance of the particular contract or subcontract.

(3) *Administrative expenses (or "overhead").* The allowable expenses of administration (see paragraph (g) of this section) or other general expenses except indirect engineering expenses, bidding and general selling expenses, and general servicing expenses shall ordinarily be allocated or distributed to the cost of performing a contract or subcontract on the basis of the proportion which the sum of the manufacturing cost (see paragraph (b) of this section) and the cost of installation and construction (see paragraph (e) of this section) attributable to the particular contract or subcontract bears to the sum of the total manufacturing cost and the total cost of installation and construction during the period within which the contract or subcontract is performed.

(4) *Bidding, general selling, and general servicing expenses.* The allowable bidding and general selling expenses and general servicing expenses (see paragraph (g) (2) and (3) of this section) shall ordinarily be allocated or distributed to the cost of performing a contract or subcontract on the basis of:

(i) The proportion which the contract price of the particular contract or subcontract bears to the total sales made (including contracts or subcontracts completed) during the period within which the particular contract or subcontracts is performed, or

(ii) The proportion which the sum of the manufacturing cost (see paragraph (b) of this section) and the cost of installation and construction (see paragraph (e) of this section) attributable to the particular contract or subcontract bears to the sum of the total manufacturing cost and the total cost of installation and construction during the period within which the contract or subcontract is performed,

except that special consideration shall be given to the relation which certain classes of such expenses bear to the various classes of articles produced by the contracting party in each case in which such consideration is necessary in order to make a fair and reasonable determination of the true profit and excess profit. See § 16.13.

§ 16.9 *Credit for net loss or for deficiency in profit in computing excess profit.* (a) The term “net loss” as used in the act and as applied to contracts and subcontracts for aircraft or portions thereof coming within the regulations prescribed under the act or under 10 U.S.C. 2382 (formerly section 3 of the Act of March 27, 1934 (48 Stat. 505)) means the amount by which the total cost of performing all such contracts and subcontracts for aircraft entered into after April 3, 1939, and completed by a particular contracting party within the income-taxable year exceeds the total contract prices of such contracts and subcontracts. As to the meaning of income-taxable year, see § 16.1.

(b) The term “deficiency in profit”, as used in the act and as applied to contracts and subcontracts for aircraft or portions thereof coming within the regulations prescribed under the act or under 10 U.S.C. 2882 (formerly section 3 of the Act of March 27, 1934 (48 Stat. 505)), means the amount by which 12 percent of the total contract prices of all such contracts and subcontracts for aircraft entered into after April 3, 1939, and completed by a particular contracting party within the income-taxable year exceeds the net profit upon all such contracts and subcontracts.

(c) A net loss or a deficiency in profit sustained by a contracting party for an income-taxable year is allowable as a credit in computing the contracting party’s excess profit on contracts and subcontracts for aircraft coming within the regulations prescribed under the act or under 10 U.S.C. 2382 (formerly section 3 of the Act of March 27, 1934 (48 Stat. 505)) and completed during the four next succeeding income-taxable years. Credit for such a net loss or deficiency in profit may be claimed in the contracting party’s annual report of profit filed with the district director of internal revenue (see § 16.15), but it shall be supported by separate schedules for each contract or subcontract involved showing total contract prices, costs of performance and pertinent facts relative thereto, together with a summarized computation of the net loss or deficiency in profit. The net loss or deficiency in profit claimed is subject to verification and adjustment. As to preservation of books and records, see § 16.13.

(d) Net loss or deficiency in profit sustained on contracts and subcontracts completed within one income-taxable year may not be considered in computing net loss or deficiency in profit sustained on contracts and subcontracts completed within another income-taxable year.

(e) The provisions of this section may be illustrated by the following example:

Example. For the calendar year 1939, the A Corporation, which keeps its books and makes its Federal income tax returns on a calendar year basis, sustained a net loss of

\$30,000 on the contracts and subcontracts for Army aircraft and portions thereof coming within the scope of the act and completed within that year. During the year 1939, the A Corporation also completed contracts for naval aircraft coming within the scope of 10 U.S.C. 2382 (formerly section 3 of the Act of March 27, 1934 (48 Stat. 505)) at a deficiency in profit of \$10,000. In 1940, the A Corporation completed similar contracts for Army aircraft totaling \$175,000 at a cost of \$155,000, whereby the A Corporation realized a net profit of \$20,000 but sustained a deficiency in profit of \$1,000 (i.e., 12 percent of \$175,000, or \$21,000, less \$20,000. During the year 1940, the A Corporation also completed contracts for naval aircraft coming within the scope of 10 U.S.C. 2382 (formerly section 3 of the Act of March 27, 1934 (48 Stat. 505)) at a net loss of \$2,000. In 1941, the A Corporation completed contracts for Army aircraft coming within the scope of the act totaling \$400,000 at a cost of \$300,000, or at a net profit of \$100,000. After deducting from the net profit of \$100,000 for the year 1941 the amount of \$48,000 (i.e., 12 percent of the total contract price of \$400,000), there remains \$52,000 in excess profit on the contracts completed in the year 1941. The A Corporation may deduct from such \$52,000, in determining the amount of excess profit it must pay for the year 1941 with respect to the contracts completed in such year, the net loss of \$30,000 and the deficiency in profit of \$10,000 sustained in 1939 on Army and naval aircraft contracts, respectively, and the net loss of \$2,000 and the deficiency in profit of \$1,000 sustained in 1940 on naval and Army aircraft contracts, respectively.

[T.D. 4909, 4 FR 2733, July 1, 1939, as amended by T.D. 6511, 25 FR 12442, Dec. 6, 1960]

§ 16.10 *Credit for Federal income taxes.* For the purpose of computing the amount of excess profit to be paid to the United States, a credit is allowable against the excess profit for the amount of Federal income taxes paid or remaining to be paid on the amount of such excess profit. The “Federal income taxes” in respect of which this credit is allowable include the income taxes imposed by Titles I and IA of the Revenue Act of 1938, and Chapter 1 and Subchapter A of Chapter 2 of the Internal Revenue Code, and the excess-profits taxes imposed by section 602 of the Revenue Act of 1938 and Subchapter B of Chapter 2 of the Internal Revenue Code. This credit is allowable for these taxes only to the extent that it is affirmatively shown that they have been finally determined and paid or remain to be paid and that they were imposed upon the excess profit against which the credit is to be made. In case such a credit has been allowed and the amount of Federal income taxes imposed upon the excess profit is redetermined, the credit previously allowed shall be adjusted accordingly.

Internal Revenue Service, Treasury

§ 1.1471-1, Nt.

§16.11 *Failure of contractor to require agreement by subcontractor.* (a) Every contract or subcontract coming within the scope of the act and the regulations in this part is required by the act to contain, among other things, an agreement by the contracting party to make no subcontract unless the subcontractor agrees:

(1) To make a report, as described in the act, under oath to the Secretary of War upon the completion of the subcontract;

(2) To pay into the Treasury excess profit, as determined by the Treasury Department, in the manner and amounts specified in the act;

(3) To make no subdivision of the subcontract for the same article or articles for the purpose of evading the provisions of the act;

(4) That the manufacturing spaces and books of its own plant, affiliates, and subdivisions shall at all times be subject to inspection and audit as provided in the act.

(b) If a contracting party enters into a subcontract with a subcontractor who fails to make such agreement, such contracting party shall, in addition to its liability for excess profit determined on contracts or subcontracts performed by it, be liable for any excess profit determined to be due the United States on the subcontract entered into with such subcontractor. In such event, however, the excess profit to be paid to the United States in respect of the subcontract entered into with such subcontractor shall be determined separately from any contracts or subcontracts performed by the contracting party entering into the subcontract with such subcontractor.

§16.12 *Evasion of excess profit.* Section 3 of the act of March 27, 1934, as amended, provides that the contracting party shall agree to make no subdivisions of any contract or subcontract for the same article or articles for the purpose of evading the provisions of the act. If any such subdivision or subcontract is made it shall constitute a violation of the agreement provided for in the act, and the cost of completing a contract or subcontract by a contracting party which violates such agreement shall be determined in a manner necessary clearly to reflect the true excess profit of such contracting party.

§16.13 *Books of account and records.* (a) It is recognized that no uniform method of accounting can be prescribed for all contracting parties subject to the provisions of the act. Each contracting party is required by law to make a report of its true profits and excess profit. Such party must, therefore, maintain such accounting records as will enable it to do so. See §16.8. Among the essentials are the following:

(1) The profit or loss upon a particular contract or subcontract shall be accounted for

and fully explained in the books of account separately on each contract or subcontract.

(2) Any cost accounting methods, however standard they may be and regardless of long continued practice, shall be controlled by, and be in accord with, the objectives and purposes of the act and of any regulations prescribed thereunder.

(3) The accounts shall clearly disclose the nature and amount of the different items of cost of performing a contract or subcontract.

(b) In cases where it has been the custom priorly to use so-called "normal" rates of overhead expense or administrative expenses, or "standard" or "normal" prices of material or labor charges, no objection will be made to the use temporarily during the period of performing the contract or subcontract of such methods in charging the contract or subcontract, if the method of accounting employed is such as clearly to reflect, in the final determination upon the books of account, the actual profit derived from the performance of the contract or subcontract and if the necessary adjusting entries are entered upon the books and they explain in full detail the revisions necessary to accord with the facts. As to the elements of cost, see §16.8.

(c) All books, records, and original evidences of costs (including, among other things, production orders, bills or schedules of materials, purchase requisitions, purchase orders, vouchers, requisitions for materials, standing expense orders, inventories, labor time cards, pay rolls, cost distribution sheets) pertinent to the determination of the true profit, excess profit, deficiency in profit or net loss from the performance of a contract or subcontract shall be kept at all times available for inspection by internal-revenue officers, and shall be carefully preserved and retained so long as the contents thereof may become material in the administration of the act. This provision is not confined to books, records, and original evidences pertaining to items which may be considered to be a part of the cost of performing a contract or subcontract. It is applicable to all books, records, and original evidences of costs of each plant, branch or department involved in the performance of a contract or subcontract or in the allocation or distribution of costs to the contract or subcontract.

§16.14 *Report to Secretary of the Army.* (a) Upon the completion of a contract or subcontract coming within the scope of the act and the regulations in this part, the contracting party is required to make a report, under oath, to the Secretary of the Army. As to the date of completion of a contract or subcontract, see §16.4. Such report shall be in the form prescribed by the Secretary of the Army and shall state the total contract price, the cost of performing the contract,

the net income from such contract, and the per centum such income bears to the contract price. The contracting party shall also include as a part of such report a statement showing:

(1) The manner in which the indirect costs were determined and allocated to the cost of performing the contract or subcontract (see § 16.8);

(2) The name and address of every subcontractor with whom a subcontract was made, the object of such subcontract, the date when completed and the amount thereof; and

(3) The name and address of each affiliate or other organization, trade or business owned or controlled directly or indirectly by the same interests as those who so own or control the contracting party, together with a statement showing in detail all transactions which were made with such affiliate or other organization, trade or business and are pertinent to the determination of the excess profit.

(b) A copy of the report required to be made to the Secretary of the Army is required to be transmitted by the contracting party to the Secretary of the Treasury. Such copy shall not be transmitted directly to the Secretary of the Treasury but shall be filed as a part of the annual report. See § 16.15.

§ 16.15 *Annual reports for income-taxable years*—(a) *General requirements.* Every contracting party completing a contract or subcontract within the contracting party's income-taxable year ending after April 3, 1939 shall file with the district director of internal revenue for the internal revenue district in which the contracting party's Federal income tax returns are required to be filed an annual report on the prescribed form of the profit and excess profit on all contracts and subcontracts coming within the scope of the act and the regulations in this part and completed within the particular income-taxable year. There shall be included as a part of such a report a statement, preferably in columnar form, showing separately for each such contract or subcontract completed by the contracting party within the income-taxable year the total contract price, the cost of performing the contract or subcontract and the resulting profit or loss on each contract or subcontract together with a summary statement showing in detail the computation of the net profit or net loss upon all contracts and subcontracts completed within the income-taxable year and the amount of the excess profit, if any, for the income-taxable year covered by the report. A copy of the report made to the Secretary of the Army (see § 16.14) with respect to each contract or subcontract covered in the annual report, shall be filed as a part of such annual report. In case the income-taxable year of the contracting party is a period of less than twelve months (see § 16.1), the report re-

quired by this section shall be made for such period and not for a full year.

(b) *Time for filing annual reports.* Annual reports of contracts and subcontracts coming within the scope of the act and the regulations in this part completed by a contracting party within an income-taxable year must be filed on or before the 15th day of the ninth month following the close of the contracting party's income-taxable year. It is important that the contracting party render on or before the due date an annual report as nearly complete and final as it is possible for the contracting party to prepare. An extension of time granted the contracting party for filing its Federal income tax return does not serve to extend the time for filing the annual report required by this section. Authority consistent with authorizations for granting extensions of time for filing Federal income tax returns is hereby delegated to the various collectors of internal revenue for granting extensions of time for filing the reports required by this section. Application for extensions of time for filing such reports should be addressed to the district director of internal revenue for the district in which the contracting party files its Federal income tax returns and must contain a full recital of the causes for the delay.

§ 16.16 *Payment of excess profit liability.* The amount of the excess profit liability to be paid to the United States shall be paid on or before the due date for filing the report with the district director of internal revenue. See § 16.15. At the option of the contracting party, the amount of the excess profit liability may be paid in four equal installments instead of in a single payment, in which case the first installment is to be paid on or before the date prescribed for the payment of the excess profit as a single payment, the second installment on or before the 15th day of the third month, the third installment on or before the 15th day of the sixth month, and the fourth installment on or before the 15th day of the ninth month, after such date.

§ 16.17 *Liability of surety.* The surety under contracts entered into with the Secretary of the Army for the construction or manufacture of any complete aircraft or any portion thereof for the Army shall not be liable for payment of excess profit due the United States in respect of such contracts.

§ 16.18 *Determination of liability for excess profit, interest and penalties; assessment, collection, payment, refunds.* (a) The duty of determining the correct amount of excess profit liability on contracts and subcontracts coming within the scope of the act and the regulations in this part is upon the Commissioner of Internal Revenue. Under section 3(b) of the act of March 27, 1934, as last amended, all provisions of law (including the provisions of law relating to interest, penalties and refunds)

Internal Revenue Service, Treasury

§ 1.1471-1, Nt.

applicable with respect to the taxes imposed by Title I of the Revenue Act of 1934 and not inconsistent with section 3 of the act of March 27, 1934, as last amended, are applicable with respect to the assessment, collection, or payment of excess profits on contracts and subcontracts coming within the scope of the act and the regulations in this part and to refunds of overpayments of profits into the Treasury under the act. Claims by a contracting party for the refund of an amount of excess profit, interest, penalties, and additions to such excess profit shall conform to the general requirements prescribed with respect to claims for refund of overpayments of taxes imposed by Title I of the Revenue Act of 1934 and, if filed on account of any additional costs incurred pursuant to guarantee provisions in a contract, shall be supplemented by a statement under oath showing the amount and nature of such costs and all facts pertinent thereto.

(b) Administrative procedure for the determination, assessment and collection of excess profit liability under the act and the regulations in this part and the examination of reports and claims in connection therewith will be prescribed from time to time by the Commissioner of Internal Revenue.

PART 17—EXCESS PROFITS ON NAVY CONTRACTS

REGULATIONS FOR INCOME-TAXABLE YEARS ENDING AFTER APRIL 3, 1939

AUTHORITY: Sections 17.1 to 17.19 issued under 52 Stat. 467; 26 U.S.C. 3791. Interpret or apply sec. 3, 48 Stat. 505, as amended, 53 Stat. 112; 34 U.S.C. 496, 26 U.S.C. 650, 651.

SOURCE: Sections 17.1 to 17.19 contained in T.D. 4906, 4 FR 2492, June 27, 1939, except as otherwise noted.

§17.1 *Definitions.* As used in the regulations in this part the term:

(a) *Act* means the act of March 27, 1934 (48 Stat. 505; 34 U.S.C. 496), as originally enacted, as amended by the act of June 25, 1936 (49 Stat. 1926; 34 U.S.C. 496), and as further amended by the act of April 3, 1939 (53 Stat. 560; 34 U.S.C. 496).

(b) *Person* includes an individual, a corporation, a partnership, a trust or estate, a joint-stock company, an association, or a syndicate, group, pool, joint venture or other unincorporated organization or group, through or by means of which any business, financial operation or venture is carried on.

(c) *Contract* means an agreement made by authority of the Secretary of the Navy for the construction or manufacture of any complete naval vessel or aircraft or any portion thereof.

(d) *Contractor* means a person entering into a direct contract with the Secretary of the Navy or his duly authorized representative.

(e) *Subcontract* means an agreement entered into by one person with another person for the construction or manufacture of a complete naval vessel or aircraft or any portion thereof, the prime contract for such vessel or aircraft or portion thereof having been entered into between a contractor and the Secretary of the Navy or his duly authorized representative.

(f) *Subcontractor* means any person other than a contractor entering into a subcontract.

(g) *Contracting party* means a contractor or subcontractor as the case may be.

(h) *Contract price* or *contract price* means the amount or total amount to be received under a contract or subcontract as the case may be.

(i) *Income-taxable year* means the calendar year, the fiscal year ending during such calendar year or the fractional part of such calendar or fiscal year, upon the basis of which the contracting party's net income is computed and for which its income tax returns are made for Federal income tax purposes.

§17.2 *Scope of this part.* The regulations in this part deal with liability for excess profit on contracts and subcontracts for the construction or manufacture of any complete naval vessel or aircraft or any portion thereof completed within income-taxable years ending after April 3, 1939. As to the date of the completion of a contract or subcontract, see §17.5.

§17.3 *Contracts and subcontracts under which excess profit liability may be incurred.* Except as otherwise provided with respect to contracts or subcontracts for certain scientific equipment (see §17.4), every contract awarded for an amount exceeding \$10,000 and entered into after the enactment of the act of March 27, 1934 for the construction or manufacture of any complete naval vessel or aircraft, or any portion thereof, is subject to the provisions of the act relating to excess profit liability. Any subcontract made with respect to such a contract and involving an amount in excess of \$10,000 is also within the scope of the act. If a contracting party places orders with another party, aggregating an amount in excess of \$10,000, for articles or materials which constitute a part of the cost of performing the contract or subcontract, the placing of such orders shall constitute a subcontract within the scope of the act, unless it is clearly shown that each of the orders involving \$10,000 or less is a bona fide separate and distinct subcontract and not a subdivision made for the purpose of evading the provisions of the act.

§17.4 *Contracts or subcontracts for scientific equipment.* No excess profit liability is incurred upon a contract or subcontract entered into after the amendment of section 3(b) of the act of June 25, 1936, if at the time

or prior to the time such contract or subcontract is made it is designated by the Secretary of the Navy as being exempt under the provisions of the act pertaining to scientific equipment used for communication, target detection, navigation, or fire control. The exemption of contracts or subcontracts for scientific equipment does not extend to any contract or subcontract entered into prior to the enactment of such amendment of section 3(b) of the act.

§17.5 *Completion of contract defined.* The date of delivery of the vessel, aircraft or portion thereof covered by the contract or subcontract shall be considered the date of completion of the contract or subcontract unless otherwise determined jointly by the Secretary of the Navy and the Secretary of the Treasury or their duly authorized representatives. Except as otherwise provided in the preceding sentence, the replacement of defective parts of delivered articles or the performance of other guarantee work in respect to such articles will not operate to extend the date of completion. As to the treatment of the cost of such work as a cost of performing a contract or subcontract, see §17.9(h). As to a refund in case of adjustment due to any subsequently incurred additional costs, see §17.19. If a contract or subcontract is at any time cancelled or terminated, it is completed at the time of the cancellation or termination.

§17.6 *Manner of determining liability with respect to contracts or subcontracts for complete naval vessels or portions thereof.* If in an income-taxable year ending after April 3, 1939 a contracting party completes one or more contracts or subcontracts coming within the scope of the act and entered into for the construction or manufacture of any complete naval vessel or any portion thereof, the amount of excess profit to be paid to the United States with respect to all such contracts and subcontracts completed within the income-taxable year shall be computed as follows:

(a) The first step is to ascertain the total contract prices of all such contracts and subcontracts completed by the contracting party within the income-taxable year. As to total contract prices, see §§17.1 and 17.8.

(b) The second step is to ascertain the cost of performing such contracts and subcontracts (see §17.9) and to deduct such cost from the total contract prices of such contracts and subcontracts as computed in the first step.

The amount remaining after such subtraction is the amount of net profit or net loss upon such contracts and subcontracts completed within the income-taxable year.

(c) The third step, in case there is a net profit upon such contracts and subcontracts, is to subtract from the amount of such net

profit as computed in the second step the sum of:

(1) An amount equal to 10 percent of the total contract prices of such contracts and subcontracts completed within the income-taxable year; and

(2) The amount of any net loss which was sustained in the preceding income-taxable year with respect to contracts or subcontracts entered into for the construction or manufacture of any complete naval vessel or any portion thereof, and which is allowable as a credit in determining the excess profit for the income-taxable year with respect to contracts and subcontracts entered into for the construction or manufacture of any complete naval vessel or any portion thereof (see §17.10(a)).

The amount remaining after such subtraction is the amount of excess profit for the income-taxable year with respect to contracts and subcontracts entered into for the construction or manufacture of any complete naval vessel or any portion thereof.

(d) The fourth step is to ascertain the amount of credit allowed for Federal income taxes paid or remaining to be paid upon the amount of such excess profit as computed in the third step (see §17.11) and then subtract from the amount of such excess profit the amount of credit for Federal income taxes. The amount remaining after this subtraction is the amount of excess profit to be paid to the United States by the contracting party for the income-taxable year with respect to contracts and subcontracts entered into for the construction or manufacture of any complete naval vessel or any portion thereof and completed within the income-taxable year.

(e) The application of the provisions of this section of the regulations may be illustrated by the following example:

Example: On September 1, 1939 the A Corporation, which keeps its books and makes its Federal income tax returns on a calendar year basis, entered into a contract with the Secretary of the Navy for the construction of portions of a naval vessel coming within the scope of the act, the total contract price of which \$200,000. On March 10, 1940 the A Corporation entered into another such contract, the total contract price of which was \$40,000. Both contracts were completed within the calendar year 1940, the first at a cost of \$155,000 and the second at a cost of \$45,000. During the year 1940 the A Corporation also completed at a loss of \$10,000 two contracts entered into for the construction or manufacture of naval aircraft coming within the scope of the act. For the year 1939 the A Corporation sustained a net loss of \$2,500 on all contracts and subcontracts for any complete naval vessel or any portion thereof coming within the scope of the act and completed within the calendar year 1939. For the year 1939 the A Corporation also sustained a net

Internal Revenue Service, Treasury

§ 1.1471-1, Nt.

loss of \$1,800 on all other contracts and subcontracts coming within the scope of the act which were completed within the calendar year 1939. For purposes of Federal income tax, the net income of the A Corporation for the year 1940 amounted to \$96,000, which amount included the net profit of \$40,000 upon the contracts entered into on September 1, 1939 and March 10, 1940. For the year 1940 the A Corporation paid Federal income taxes amounting to \$19,200. The excess profit liability of the A Corporation for 1940 is payable with respect to the contracts for portions of a naval vessel which were completed in 1940. The loss of \$10,000 on other contracts completed in 1940 and the net loss of \$1,800 for 1939 on contracts and subcontracts for naval aircraft do not enter into the computation of such liability. Accordingly, the excess profit liability of the A Corporation for 1940 is \$10,800 computed as follows:

Total contract prices:		
Contract No. 1	\$200,000	
Contract No. 2	40,000	
		\$240,000
Less cost of performing contracts:		
Contract No. 1	155,000	
Contract No. 2	45,000	
		200,000
Net profit on contracts		40,000
Less:		
10 percent of total contract prices (10 percent of \$240,000)	24,000	
Net loss from 1939	2,500	
		26,500
Excess profit for year 1940	13,500	
Less credit for Federal income taxes (Federal income tax on \$13,500 at rates for 1940)	2,700	
Amount of excess profit payable to the United States		10,800

§ 17.7 Manner of determining liability with respect to contracts or subcontracts for complete naval aircraft or portions thereof. If in an income-taxable year ending after April 3, 1939 a contracting party completes one or more contracts or subcontracts coming within the scope of the act and entered into for the construction or manufacture of any complete naval aircraft or any portion thereof, the amount of excess profit to be paid to the United States with respect to all such contracts and subcontracts completed within the income-taxable year shall be computed as follows:

(a) The first step is to ascertain the total contract prices of all such contracts and subcontracts completed by the contracting party within the income-taxable year. As to total contract prices, see §§ 17.1 and 17.8.

(b) The second step is to ascertain the cost of performing such contracts and subcontracts (see § 17.9) and to deduct such cost from the total contract prices of such contracts and subcontracts as computed in the first step.

The amount remaining after such subtraction is the amount of net profit or net loss upon such contracts and subcontracts completed within the income-taxable year.

(c) The third step, in case there is a net profit upon such contracts and subcontracts, is to subtract from the amount of such net profit as computed in the second step the sum of:

(1) An amount equal to 12 percent of the total contract prices of such contracts and subcontracts completed within the income-taxable year;

(2) The amount of any net loss which was sustained in the same or a prior income-taxable year with respect to contracts or subcontracts for the construction or manufacture of any complete aircraft or any portion thereof, and which is allowable as a credit in determining the excess profit for the income-taxable year with respect to contracts and subcontracts entered into for the construction or manufacture of complete aircraft or any portion thereof (see § 17.10(b)); and

(3) The amount of any deficiency in profit which was sustained in the same or a prior income-taxable year with respect to contracts or subcontracts for the construction or manufacture of any complete aircraft or any portion thereof, and which is allowable as a credit in determining the excess profit for the income-taxable year with respect to contracts and subcontracts entered into for the construction or manufacture of complete aircraft or any portion thereof (see § 17.10(c)).

The amount remaining after such subtraction is the amount of excess profit for the income-taxable year with respect to contracts and subcontracts entered into for the construction or manufacture of complete naval aircraft or any portion thereof.

(d) The fourth step is to ascertain the amount of credit allowed for Federal income taxes paid or remaining to be paid upon the amount of such excess profit as computed in the third step (see § 17.11) and then subtract from the amount of such excess profit the amount of credit for Federal income taxes. The amount remaining after this subtraction is the amount of excess profit to be paid to the United States by the contracting party for the income-taxable year with respect to contracts and subcontracts entered into for the construction or manufacture of complete naval aircraft or any portion thereof and completed within the income-taxable year.

(e) The application of the provisions of this section of the regulations may be illustrated by the following example:

§ 1.1471-1, Nt.

26 CFR Ch. I (4-1-11 Edition)

Example. On September 1, 1939, the B Corporation, which keeps its books and makes its Federal income tax returns on a calendar year basis, entered into a contract with the Secretary of the Navy for the construction of naval aircraft coming within the scope of the act, the total contract price of which was \$200,000. On March 10, 1940, the B Corporation entered into another such contract, the total contract price of which was \$40,000. Both contracts were completed within the calendar year 1940, the first at a cost of \$155,000 and the second at a cost of \$45,000. During the year 1940, the B Corporation also completed at a deficiency in profit of \$2,000 a contract entered into for the construction of Army aircraft coming within the scope of the act. During the year 1940, the B Corporation also completed at a loss of \$10,000 two contracts entered into for the construction or manufacture of portions of a naval vessel coming within the scope of the act. For the year 1939, the B Corporation sustained a net loss of \$2,500 and a deficiency in profit of \$1,000 on all contracts and subcontracts for naval aircraft coming within the scope of the act and completed within the calendar year 1939. For the year 1939, the B Corporation also sustained a net loss of \$1,800 on a contract for the construction of Army aircraft coming within the scope of the act which was completed within the calendar year 1939. For the purposes of the Federal income tax, the net income of the B Corporation for the year 1940, on which the tax was paid, amounted to \$96,000, which included the net profit of \$40,000 upon the contracts entered into on September 1, 1939, and March 10, 1940. The excess profit liability of the B Corporation for 1940 is payable with respect to the contracts for naval aircraft which were completed in 1940. The loss of \$10,000 on the contracts for portions of a naval vessel completed in 1940 does not enter into the computation of such liability. Accordingly, the excess profit liability of the B Corporation for 1940 is \$2,964 computed as follows:

Total contract prices:		
Contract No. 1	\$200,000	
Contract No. 2	40,000	
		\$240,000
Less: Cost of performing contracts:		
Contract No. 1	155,000	
Contract No. 2	45,000	
		200,000
Net profit on contracts		40,000
Less:		
12 percent of total contract prices (12 percent of \$240,000)		28,800
Deficiency in profit (in Army aircraft contracts) in 1940		2,000
Net loss (in naval aircraft contracts) from 1939		2,500

Net loss (in Army aircraft contracts) from 1939	1,800	
Deficiency in profit (in naval aircraft contracts) from 1939	1,000	
		36,100
Excess profit for year 1940		3,900
Less: Credit for Federal income taxes (Federal income tax on \$3,900 at rates for 1940)		936
Amount of excess profit payable to the United States		2,964

[T.D. 4906, 4 FR 2492, June 27, 1939, as amended by T.D. 6512, 25 FR 12443, Dec. 6, 1960]

§17.8 *Total contract price.* The total contract price of a particular contract or subcontract (see §17.1) may be received in money or its equivalent. If something other than money is received, only the fair market value of the thing received, at the date of receipt, is to be included in determining the amount received. Bonuses earned for bettering performance and penalties incurred for failure to meet the contract guarantees are to be regarded as adjustments of the original contract price. Trade or other discounts granted by a contracting party in respect of a contract or subcontract performed by such party are also to be deducted in determining the true total contract price of such contract or subcontract.

§17.9 *Cost of performing a contract or subcontract—(a) General rule.* The cost of performing a particular contract or subcontract shall be the sum of (1) the direct costs, including therein expenditures for materials, direct labor and direct expenses, incurred by the contracting party in performing the contract or subcontract; and (2) the proper proportion of any indirect costs (including therein a reasonable proportion of management expenses) incident to and necessary for the performance of the contract or subcontract.

(b) *Elements of cost.* No definitions of the elements of cost may be stated which are of invariable application to all contractors and subcontractors. In general, the elements of cost may be defined for purposes of the act as follows:

(1) Manufacturing cost, which is the sum of factory cost (see paragraph (c) of this section) and other manufacturing cost (see paragraph (d) of this section);

(2) Miscellaneous direct expenses (see paragraph (e) of this section);

(3) General expenses, which are the sum of indirect engineering expenses, usually termed "engineering overhead" (see paragraph (f) of this section) and expenses of distribution, servicing and administration (see paragraph (g) of this section); and

(4) Guarantee expenses (see paragraph (h) of this section).

(c) *Factory cost.* Factory cost is the sum of the following:

(1) *Direct materials.* Materials, such as those purchased for stock and subsequently issued for contract operations and those acquired under subcontracts, which become a component part of the finished product or which are used directly in fabricating, converting or processing such materials or parts.

(2) *Direct productive labor.* Productive labor, usually termed "shop labor," which is performed on and is properly chargeable directly to the article manufactured or constructed pursuant to the contract or subcontract, but which ordinarily does not include direct engineering labor (see subparagraph (3) of this paragraph).

(3) *Direct engineering labor.* The compensation of professional engineers and other technicians (including reasonable advisory fees), and of draftsmen, properly chargeable directly to the cost of the contract or subcontract.

(4) *Miscellaneous direct factory charges.* Items which are properly chargeable directly to the factory cost of performing the contract or subcontract but which do not come within the classifications in subparagraphs (1), (2), and (3) of this paragraph, as for example, royalties which the contracting party pays to another party and which are properly chargeable to the cost of performing the contract or subcontract (but see paragraph (d) of this section).

(5) *Indirect factory expenses.* Items, usually termed "factory overhead," which are not directly chargeable to the factory cost of performing the contract or subcontract but which are properly incident to and necessary for the performance of the contract or subcontract and consist of the following:

(i) *Labor.* Amounts expended for factory labor, such as supervision and inspection, clerical labor, timekeeping, packing and shipping, stores supply, services of tool crib attendants, and services in the factory employment bureau, which are not chargeable directly to productive labor of the contract or subcontract.

(ii) *Materials and supplies.* The cost of materials and supplies for general use in the factory in current operations, such as shop fuel, lubricants, heat-treating, plating, cleaning and anodizing supplies, nondurable tools and gauges, stationery (such as time tickets and other forms), and boxing and wrapping materials.

(iii) *Service expenses.* Factory expenses of a general nature, such as those for power, heat and light (whether purchased or produced), ventilation and air conditioning and operation and maintenance of general plant assets and facilities.

(iv) *Fixed charges and obsolescence.* Recurring charges with respect to property used

for manufacturing purposes of the contract or subcontract, such as premiums for fire and elevator insurance, property taxes, rentals and allowances for depreciation of such property, including maintenance and depreciation of reasonable standby equipment; and depreciation and obsolescence of special equipment and facilities necessarily acquired primarily for the performance of the contract or subcontract. In making allowances for depreciation, consideration shall be given to the number and length of shifts.

(v) *Miscellaneous indirect factory expenses.* Miscellaneous factory expenses not directly chargeable to the factory cost of performing the contract or subcontract, such as purchasing expenses; ordinary and necessary expenses of rearranging facilities within a department or plant; employees' welfare expenses; premiums or dues on compensation insurance; employers' payments to unemployment, old age and social security, Federal and State funds not including payments deducted from or chargeable to employees or officers; pensions and retirement payments to factory employees; factory accident compensation (as to self-insurance, see paragraph (g) of this section); but not including any amounts which are not incident to services, operations, plant, equipment or facilities involved in the performance of the contract or subcontract.

(d) *Other manufacturing cost.* Other manufacturing cost as used in paragraph (b) of this section includes items of manufacturing costs which are not properly or satisfactorily chargeable to factory costs (see paragraph (c) of this section) but which upon a complete showing of all pertinent facts are properly to be included as a cost of performing the contract or subcontract, as for instance, payments of royalties and amortization of the cost of designs purchased and patent rights over their useful life; and "deferred" or "unliquidated" experimental and development charges. For example, in case experimental and development costs have been properly deferred or capitalized and are amortized in accordance with a reasonably consistent plan, a proper portion of the current charge, determined by a ratable allocation which is reasonable in consideration of the pertinent facts, may be treated as a cost of performing the contract or subcontract. In the case of general experimental and development expenses which may be charged off currently, a reasonable portion thereof may be allocated to the cost of performing the contract or subcontract. If a special experimental or development project is carried on in pursuance of a contract, or in anticipation of a contract which is later entered into, and the expense is not treated as a part of general experimental and development expenses or is not otherwise allowed as a cost of performing the contract, there clearly appearing no reasonable prospect of an additional

contract for the type of article involved, the entire cost of such project may be allowed as a part of the cost of performing the contract.

(e) *Miscellaneous direct expenses.* Miscellaneous direct expenses as used in paragraph (b) of this section include:

(1) *Cost of installation and construction.* Cost of installation and construction includes the cost of materials, labor and expenses necessary for the erection and installation prior to the completion of the contract and after the delivery of the product or material manufactured or constructed pursuant to the contract or subcontract.

(2) *Sundry direct expenses.* Items of expense which are properly chargeable directly to the cost of performing a contract or subcontract and which do not constitute guarantee expenses (see paragraph (h) of this section) or direct costs classified as factory cost or other manufacturing cost (see paragraphs (c) and (d) of this section), such as premiums on performance or other bonds required under the contract or subcontract; State sales taxes imposed on the contracting party; freight on outgoing shipments; fees paid for wind tunnel and model basin tests; demonstration and test expenses; crash insurance premiums; traveling expenses. In order for any such item to be allowed as a charge directly to the cost of performing a contract or subcontract, (i) a detailed record shall be kept by the contracting party of all items of a similar character, and (ii) no item of a similar character which is properly a direct charge to other work shall be allowed as a part of any indirect expenses in determining the proper proportion thereof chargeable to the cost of performing the contract or subcontract. As to allowable indirect expenses, see paragraphs (c)(5), (f), (g), and (j) of this section.

(f) *Indirect engineering expenses.* Indirect engineering expenses, usually termed "engineering overhead," which are treated in this section as a part of general expenses in determining the cost of performing a contract or subcontract (see paragraph (b) of this section), comprise the general engineering expenses which are incident to and necessary for the performance of the contract or subcontract, such as the following:

(1) *Labor.* Reasonable fees of engineers employed in a general consulting capacity, and compensation of employees for personal services to the engineering department, such as supervision, which is properly chargeable to the contract or subcontract, but which is not chargeable as direct engineering labor (see paragraph (c)(3) of this section).

(2) *Material.* Supplies for the engineering department, such as paper and ink for drafting and similar supplies.

(3) *Miscellaneous expenses.* Expenses of the engineering department, such as (i) maintenance and repair of engineering equipment, and (ii) services purchased outside of the en-

gineering department for blue- printing, drawing, computing, and like purposes.

(g) *Expenses of distribution, servicing and administration.* Expenses of distribution, servicing and administration, which are treated in this section as a part of general expenses in determining the cost of performing a contract or subcontract (see paragraph (b) of this section), comprehend the expenses incident to and necessary for the performance of the contract or subcontract, which are incurred in connection with the distribution and general servicing of the contracting party's products and the general administration of the business, such as:

(1) *Compensation for personal services of employees.* The salaries of the corporate and general executive officers and the salaries and wages of administrative clerical employees and of the office services employees such as telephone operators, janitors, cleaners, watchmen and office equipment repairmen.

(2) *Bidding and general selling expenses.* Bidding and general selling expenses which by reference to all the pertinent facts and circumstances reasonably constitute a part of the cost of performing a contract or subcontract. The treatment of bidding and general selling expenses as a part of general expenses in accordance with this paragraph is in lieu of any direct charges which otherwise might be made for such expenses. The term "bidding expenses" as used in this section includes all expenses in connection with preparing and submitting bids.

(3) *General servicing expenses.* Expenses which by reference to all the pertinent facts and circumstances reasonably constitute a part of the cost of performing a contract or subcontract and which are incident to delivered or installed articles and are due to ordinary adjustments or minor defects; but including no items which are treated as a part of guarantee expenses (see paragraph (h) of this section) or as a part of direct costs, such as direct materials, direct labor, and other direct expense.

(4) *Other expenses.* Miscellaneous office and administrative expenses, such as stationery and office supplies; postage; repair and depreciation of office equipment; contributions to local charitable or community organizations to the extent constituting ordinary and necessary business expenses; employees' welfare expenses; premiums and dues on compensation insurance; employers' payments to unemployment, old age and social security Federal and State funds not including payments deducted from or chargeable to employees or officers; pensions and retirement payments to administrative office employees and accident compensation to office employees (as to self-insurance, see subdivision (i) of this subparagraph).

(i) Subject to the exception stated in this subdivision, in cases where a contracting

Internal Revenue Service, Treasury

§ 1.1471-1, Nt.

party assumes its own insurable risks (usually termed "self-insurance"), losses and payments will be allowed in the cost of performing a contract or subcontract only to the extent of the actual losses suffered or payments incurred during, and in the course of, the performance of the contract or subcontract and properly chargeable to such contract or subcontract. If, however, a contracting party assumes its own insurable risks (a) for compensation paid to employees for injuries received in the performance of their duties, or (b) for unemployment risks in States where insurance is required, there may be allowed as a part of the cost of performing a contract or subcontract a reasonable portion of the charges set up for purposes of self-insurance under a system of accounting regularly employed by the contracting party, as determined by the Commissioner of Internal Revenue, at rates not exceeding the lawful or approved rates of insurance companies for such insurance, reduced by amounts representing the acquisition cost in such companies, provided the contracting party adopts and consistently follows this method with respect to self-insurance in connection with all contracts and subcontracts subsequently performed by him.

(ii) Allowances for interest on invested capital are not allowable as costs of performing a contract or subcontract.

(iii) Among the items which shall not be included as a part of the cost of performing a contract or subcontract or considered in determining such cost, are the following: Entertainment expenses; dues and memberships other than of regular trade associations; donations except as otherwise provided above; losses on other contracts; profits or losses from sales or exchanges of capital assets; extraordinary expenses due to strikes or lockouts; fines and penalties; amortization of unrealized appreciation of values of assets; expenses, maintenance and depreciation of excess facilities (including idle land and building, idle parts of a building, and excess machinery and equipment) vacated or abandoned, or not adaptable for future use in performing contracts or subcontracts; increases in reserve accounts for contingencies, repairs, compensation insurance (except as above provided with respect to self-insurance) and guarantee work; Federal and State income and excess-profits taxes and surtaxes; cash discount earned up to one percent of the amount of the purchase, except that all discounts on subcontracts subject to the act will be considered; interest incurred or earned; bond discount or finance charges; premiums for life insurance on the lives of officers; legal and accounting fees in connection with reorganizations, security issues, capital stock issues and the prosecution of claims against the United States (including income tax matters); taxes and expenses on

issues and transfers of capital stock; losses on investments; bad debts; and expenses of collection and exchange.

(iv) In order that the cost of performing a contract or subcontract may be accounted for clearly, the amount of any excess profits repayable to the United States pursuant to the act should not be charged to or included in such cost.

(h) *Guarantee expenses.* Guarantee expenses include the various items of factory, cost, other manufacturing cost, cost of installation and construction, indirect engineering expenses and other general expenses (see paragraphs (c) to (g) of this section) which are incurred after delivery or installation of the article manufactured or constructed pursuant to the particular contract or subcontract and which are incident to the correction of defects or deficiencies which the contracting party is required to make under the guarantee provisions of the particular contract or subcontract. If the total amount of such guarantee expenses is not ascertainable at the time of filing the report required to be filed with the district director of internal revenue (see §17.16) and the contracting party includes any estimated amount of such expenses as part of the claimed total cost of performing the contract or subcontract, such estimated amount shall be separately shown on the report and the reasons for claiming such estimated amount shall accompany the report; but only the amount of guarantee expenses actually incurred will be allowed. If the amount of guarantee expenses actually incurred is greater than the amount (if any) claimed on the report and the contracting party has made an overpayment of excess profit, a refund of the overpayment shall be made, in accordance with the provisions of §17.19. If the amount of guarantee expenses actually incurred is less than the amount claimed on the report and an additional amount of excess profit is determined to be due, the additional amount of excess profit shall be assessed and paid in accordance with the provisions of §17.19.

(1) *Unreasonable compensation.* (1) The salaries and compensation for services which are treated as a part of the cost of performing a contract or subcontract include reasonable payments for salaries, bonuses, or other compensation for services. As a general rule, bonuses paid to employees (and not to officers) in pursuance of a regularly established incentive bonus system may be allowed as a part of the cost of performing a contract or subcontract.

(2) The test of allowability is whether the aggregate compensation paid to each individual is for services actually rendered incident to, and necessary for, the performance of the contract or subcontract, and is reasonable. Excessive or unreasonable payments whether in cash, stock or other property ostensibly as compensation for services shall

not be included in the cost of performing a contract or subcontract.

(j) *Allocation of indirect costs.* No general rule applicable to all cases may be stated for ascertaining the proper proportion of the indirect costs to be allocated to the cost of performing a particular contract or subcontract. Such proper proportion depends upon all the facts and circumstances relating to the performance of the particular contract or subcontract. Subject to a requirement that all items which have no relation to the performance of the contract or subcontract shall be eliminated from the amount to be allocated, the following methods of allocation are outlined as acceptable in a majority of cases:

(1) *Factory indirect expenses.* The allowable indirect factory expenses (see paragraph (c)(5) of this section) shall ordinarily be allocated or “distributed” to the cost of the contract or subcontract on the basis of the proportion which the direct productive labor (see paragraph (c)(2) of this section) attributable to the contract or subcontract bears to the total direct productive labor of the production department or particular section thereof during the period within which the contract or subcontract is performed, except that if the indirect factory expenses are incurred in different amounts and in different proportions by the various producing departments consideration shall be given to such circumstances to the extent necessary to make a fair and reasonable determination of the true profit and excess profit.

(2) *Engineering indirect expenses.* The allowable indirect engineering expenses (see paragraph (f) of this section) shall ordinarily be allocated or “distributed” to the cost of the contract or subcontract on the basis of the proportion which the direct engineering labor attributable to the contract or subcontract (see paragraph (c)(3) of this section) bears to the total direct engineering labor of the engineering department or particular section thereof during the period within which the contract or subcontract is performed. If the expenses of the engineering department are not sufficient in amount to require the maintenance of separate accounts, the engineering indirect costs may be included in the indirect factory expenses (see paragraph (c)(5) of this section) and allocated or distributed to the cost of performing the contract or subcontract as a part of such expenses, provided the proportion so allocated or distributed is proper under the facts and circumstances relating to the performance of the particular contract or subcontract.

(3) *Administrative expenses (or “overhead”).* The allowable expenses of administration (see paragraph (g) of this section) or other general expenses except indirect engineering expenses, bidding and general selling expenses, and general servicing expenses shall

ordinarily be allocated or distributed to the cost of performing a contract or subcontract on the basis of the proportion which the sum of the manufacturing cost (see paragraph (b) of this section) and the cost of installation and construction (see paragraph (e) of this section) attributable to the particular contract or subcontract bears to the sum of the total manufacturing cost and the total cost of installation and construction during the period within which the contract or subcontract is performed.

(4) *Bidding, general selling, and general servicing expenses.* The allowable bidding and general selling expenses and general servicing expenses (see paragraph (g) (2) and (3) of this section) shall ordinarily be allocated or distributed to the cost of performing a contract or subcontract on the basis of:

(i) The proportion which the contract price of the particular contract or subcontract bears to the total sales made (including contracts or subcontracts completed) during the period within which the particular contract or subcontract is performed, or

(ii) The proportion which the sum of the manufacturing cost (see paragraph (b) of this section) and the cost of installation and construction (see paragraph (e) of this section) attributable to the particular contract or subcontract bears to the sum of the total manufacturing cost and the total cost of installation and construction during the period within which the contract or subcontract is performed.

except that special consideration shall be given to the relation which certain classes of such expenses bear to the various classes of article produced by the contracting party in each case in which such consideration is necessary in order to make a fair and reasonable determination of the true profit and excess profit. See §17.14.

§17.10 *Credits for net loss and deficiency in profit in computing excess profit—(a) Net loss on contracts and subcontracts for naval vessels or portions thereof.* In the case of contracts or subcontracts for the construction or manufacture of any complete naval vessel or any portion thereof coming within the scope of the act which are completed within an income-taxable year ending after April 3, 1939, the term “net loss” as used in the act and in this part means the amount by which the total costs of performing all such contracts and subcontracts completed within such income-taxable year exceeds the total contract prices of such contracts and subcontracts. Such net loss sustained by a contracting party for an income-taxable year ending after April 3, 1939, is allowable as a credit in computing the contracting party’s excess profit on contracts and subcontracts for the construction or manufacture of any complete naval vessel or any portion thereof

which are completed within the next succeeding income-taxable year.

(b) *Net loss on contracts and subcontracts for aircraft or portions thereof.* In the case of contracts or subcontracts for the construction or manufacture of any complete aircraft or any portion thereof coming within the scope of the act, which are completed within an income-taxable year ending after April 3, 1939, the term "net loss" as used in the act and in these regulations means the amount by which the total costs of performing all such contracts and subcontracts completed within such income-taxable year exceeds the total contract prices of such contracts and subcontracts. Such net loss sustained by a contracting party for an income-taxable year ending after April 3, 1939, is allowable as a credit in computing the contracting party's excess profit on contracts and subcontracts for the construction or manufacture of any complete aircraft or any portion thereof which are completed within the four next succeeding income-taxable years.

(c) *Deficiency in profit.* The term "deficiency in profit" as used in the act and in this part relates to contracts and subcontracts coming within the scope of the act which are for the construction or manufacture of any complete aircraft or any portion thereof and are completed within an income-taxable year ending after April 3, 1939. As so used, the term "deficiency in profit" means the amount by which 12 percent of the total contract prices of such contracts and subcontracts which are completed by a particular contracting party within the income-taxable year exceeds the net profit upon such contracts and subcontracts. A deficiency in profit sustained by a contracting party with respect to such contracts and subcontracts for the construction or manufacture of complete aircraft or any portion thereof and completed within any income-taxable year ending after April 3, 1939, is allowable as a credit in computing the contracting party's excess profit on contracts and subcontracts for the construction or manufacture of complete aircraft or any portion thereof which are completed within the same or the four next succeeding income-taxable years.

(d) *Claim for credit.* Credit for a deficiency in profit or a net loss may be claimed in the contracting party's annual report of profit filed with the district director of internal revenue (see § 17.16), but it shall be supported by separate schedules for each contract or subcontract involved showing total contract prices, costs of performance and pertinent facts relative thereto, together with a summarized computation of the deficiency in profit or net loss. The deficiency in profit or net loss claimed is subject to verification and adjustment. As to preservation of books and records, see § 17.14. A deficiency in profit or net loss sustained on contracts and subcontracts completed within one income-tax-

able year may not be considered in computing a net loss or deficiency in profit sustained on contracts and subcontracts completed within another income-taxable year.

(e) *Examples.* The provisions of this section of the regulations may be illustrated by the following examples:

Example 1. For the calendar year 1939 the A Corporation, which keeps its books and makes its Federal income tax returns on a calendar year basis, sustained a net loss of \$50,000 upon all contracts and subcontracts coming within the scope of the act which were entered into for the construction or manufacture of any complete naval vessel or any portion thereof and were completed within the calendar year 1939. For the calendar year 1940 the A Corporation had a net profit of \$30,000 upon all such contracts and subcontracts completed within the year 1940. It also had a net profit of \$10,000 upon other contracts completed within that year all such contracts being for naval aircraft coming within the scope of the act. For the calendar year 1941 the corporation had a net profit of \$25,000 upon contracts completed within that year. The net loss of \$50,000 sustained in 1939 may be taken as a credit against the net profit of \$30,000 realized in 1940 upon the contracts for the construction or manufacture of complete naval vessels or portions thereof completed within that year; but the excess of \$20,000 (\$50,000 minus \$30,000) may not be taken as a credit in computing the excess profit realized upon the other contracts completed in 1940 at a net profit of \$10,000 or as a credit in computing the excess profit upon the contracts completed within the year 1941 at a net profit of \$25,000.

Example 2. For the calendar year 1939, the B Corporation, which keeps its books and makes its Federal income tax returns on a calendar year basis, sustained a net loss of \$10,000 and a deficiency in profit of \$35,000 upon all contracts and subcontracts for naval aircraft and portions thereof coming within the scope of the act and completed within that year. During the year 1939, the B Corporation also completed contracts for Army aircraft coming within the scope of the Act at a net profit which was \$15,000 in excess of 12 percent of the total contract prices of such contracts. On all contracts and subcontracts for naval aircraft coming within the scope of the act and completed within the calendar year 1940, the B Corporation realized a net profit which was \$25,000 in excess of 12 percent of the total contract prices of such contracts and subcontracts while sustaining a deficiency in profit of \$10,000 on like contracts and subcontracts for Army aircraft. On all contracts and subcontracts for naval aircraft coming within the scope of the act and completed within the calendar year 1941, the B Corporation realized a net

profit which was \$20,000 in excess of 12 percent of the total contract prices of such contracts. The net loss of \$10,000 and deficiency in profit of \$35,000 (or a total of \$45,000) sustained in 1939 with respect to contracts and subcontracts for naval aircraft completed within that year may be taken as a credit to the extent of \$15,000 in computing the excess profit on the contracts and subcontracts for Army aircraft completed in 1939. The remainder of such net loss and such deficiency in profit (\$45,000 minus \$15,000, or \$30,000) may be combined with the deficiency in profit of \$10,000 sustained in 1940 on contracts for Army aircraft and taken as a credit to the extent of \$25,000 in computing the excess profit on the contracts and subcontracts for aircraft completed during 1940. The sum of such net loss and such deficiency in profit then remaining (\$40,000 minus \$25,000, or \$15,000) may be taken as a credit in computing the excess profit realized on the contracts and subcontracts for aircraft completed in the year 1941.

[T.D. 4906, 4 FR 2492, June 27, 1939, as amended by T.D. 6512, 25 FR 12444, Dec. 6, 1960]

§17.11 *Credit for Federal income taxes.* For the purpose of computing the amount of excess profit to be paid to the United States, a credit is allowable against the excess profit for the amount of Federal income taxes paid or remaining to be paid on the amount of such excess profit. The "Federal income taxes" in respect of which this credit is allowable include the income taxes imposed by Titles I and IA of the Revenue Act of 1938, and Chapter 1 and Subchapter A of Chapter 2 of the Internal Revenue Code, and the excess-profits taxes imposed by section 602 of the Revenue Act of 1938, and Subchapter B of Chapter 2 of the Internal Revenue Code. This credit is allowable for these taxes only to the extent that it is affirmatively shown that they have been finally determined and paid or remain to be paid and that they were imposed upon the excess profit against which the credit is to be made. In case such a credit has been allowed and the amount of Federal income taxes imposed upon the excess profit is redetermined, the credit previously allowed shall be accordingly adjusted.

§17.12 *Failure of contractor to require agreement by subcontractor.* (a) Every contract or subcontract coming within the scope of the act is required by the act to contain, among other things, an agreement by the contracting party to make no subcontract unless the subcontractor agrees:

(1) To make a report, as described in the act, under oath to the Secretary of the Navy upon the completion of the subcontract;

(2) To pay into the Treasury excess profit, as determined by the Treasury Department, in the manner and amounts specified in the act;

(3) To make no subdivision of the subcontract for the same article or articles for the purpose of evading the provisions of the act;

(4) That the manufacturing spaces and books of its own plant, affiliates, and subdivisions shall at all times be subject to inspection and audit as provided in the act.

(b) If a contracting party enters into a subcontract with a subcontractor who fails to make such agreement, such contracting party shall, in addition to its liability for excess profit determined on contracts or subcontracts performed by it, be liable for any excess profit determined to be due the United States on the subcontract entered into with such subcontractor. In such event, however, the excess profit to be paid to the United States in respect of the subcontract entered into with such subcontractor shall be determined separately from any contracts or subcontracts performed by the contracting party entering into the subcontract with such subcontractor.

§17.13 *Evasion of excess profit.* Section 3 of the act provides that the contracting party shall agree to make no subdivisions of any contract or subcontract for the same article or articles for the purpose of evading the provisions of the act. If any such subdivision or subcontract is made it shall constitute a violation of the agreement provided for in the act, and the cost of completing a contract or subcontract by a contracting party which violates such agreement shall be determined in a manner necessary clearly to reflect the true excess profit of such contracting party.

§17.14 *Books of account and records.* (a) It is recognized that no uniform method of accounting can be prescribed for all contracting parties subject to the provisions of the act. Each contracting party is required by law to make a report of its true profit and excess profit. Such party must, therefore, maintain such accounting records as will enable it to do so. See §17.9. Among the essentials are the following:

(1) The profit or loss upon a particular contract or subcontract shall be accounted for and fully explained in the books of account separately on each contract or subcontract.

(2) Any cost accounting methods, however standard they may be and regardless of long continued practice, shall be controlled by, and be in accord with, the objectives and purposes of the act and of any regulations prescribed thereunder.

(3) The accounts shall clearly disclose the nature and amount of the different items of cost of performing a contract or subcontract.

(b) In cases where it has been the custom priorly to use so-called "normal" rates of overhead expense or administrative expenses, or "standard" or "normal" prices of material or labor charges, no objection will be made to the use temporarily during the

Internal Revenue Service, Treasury

§ 1.1471-1, Nt.

period of performing the contract or subcontract of such methods in charging the contract or subcontract, if the method of accounting employed is such as clearly to reflect, in the final determination upon the books of account, the actual profit derived from the performance of the contract or subcontract and if the necessary adjusting entries are entered upon the books and they explain in full detail the revisions necessary to accord with the facts. As to the elements of cost, see § 17.9.

(c) All books, records, and original evidences of costs (including, for example, production orders, bills or schedules of materials, purchase requisitions, purchase orders, vouchers, requisitions for materials, standing expense orders, inventories, labor time cards, payrolls, cost distribution sheets) pertinent to the determination of the true profit, excess profit, deficiency in profit, or net loss from the performance of a contract or subcontract shall be kept at all times available for inspection by internal revenue officers, and shall be carefully preserved and retained so long as the contents thereof may become material in the administration of the act. This provision is not confined to books, records and original evidences pertaining to items which may be considered to be a part of the cost of performing a contract or subcontract. It is applicable to all books, records and original evidences of costs of each plant, branch or department involved in the performance of a contract or subcontract or in the distribution of costs to the contract or subcontract.

§ 17.15 *Report to Secretary of the Navy.* (a) Upon the completion of a contract or a subcontract coming within the scope of the act and this part, the contracting party is required to make a report, under oath, to the Secretary of the Navy. As to the date of completion of a contract or subcontract, see § 17.5. The act requires that such report shall be in the form prescribed by the Secretary of the Navy and shall state the total contract price, the cost of performing the contract, the net income from such contract, and the per centum such income bears to the contract price. The contracting party shall also include as a part of such report a statement showing:

(1) The manner in which the indirect costs were determined and allocated to the cost of performing the contract or subcontract (see § 17.9);

(2) The name and address of every subcontractor with whom a subcontract was made, the object of such subcontract, the date when completed and the amount thereof; and

(3) The name and address of each affiliate or other organization, trade or business owned or controlled directly or indirectly by the same interests as those who so own or control the contracting party, together with

a statement showing in detail all transactions which were made with such affiliate or other organization, trade or business and are pertinent to the determination of the excess profit.

(b) A copy of the report required to be made to the Secretary of the Navy is required to be transmitted by the contracting party to the Secretary of the Treasury. Such copy shall not be transmitted directly to the Secretary of the Treasury but shall be filed as a part of the annual report. See § 17.16.

§ 17.16 *Annual reports for income-taxable years—(a) General requirements.* Every contracting party completing a contract or subcontract within the contracting party's income-taxable year ending after April 3, 1939 shall file, with the district director of internal revenue for the internal revenue district in which the contracting party's Federal income tax return is required to be filed, annual reports on the prescribed forms of the profit and excess profit on all contracts and subcontracts coming within the scope of the act. If any contracts or subcontracts so completed by the contracting party were entered into for the construction or manufacture of any complete naval vessel or any portion thereof, the profit and excess profit on all such contracts and subcontracts completed within the income-taxable year ending after April 3, 1939 shall be computed in accordance with the provisions of § 17.6. If any contracts or subcontracts so completed by the contracting party were entered into for the construction or manufacture of any complete naval aircraft or any portion thereof, the profit and excess profit on all such contracts and subcontracts completed within the income-taxable year ending after April 3, 1939 shall be computed in accordance with the provisions of § 17.7. There shall be included as a part of the annual report a statement, preferably in columnar form, showing separately for each contract or subcontract completed by the contracting party within the income-taxable year and covered by the report, the total contract price, the cost of performing the contract or subcontract and resulting profit or loss on each contract or subcontract together with a summary statement showing in detail the computation of the net profit or net loss upon each group of contracts and subcontracts covered by the report and the amount of the excess profit, if any, with respect to each group of contracts and subcontracts covered by the report. A copy of the report made to the Secretary of the Navy (see § 17.15) with respect to each contract or subcontract covered in the annual report, shall be filed as a part of such annual report. In case the income-taxable year of the contracting party is a period of less than twelve months (see § 17.1), the reports required by this section shall be made for such period and not for a full year.

(b) *Time for filing annual reports.* Annual reports of contracts and subcontracts completed by a contracting party within an income-taxable year ending after April 3, 1939 shall be filed on or before the 15th day of the ninth month following the close of the contracting party's income-taxable year. It is important that the contracting party render on or before the due date annual reports as nearly complete and final as it is possible for the contracting party to prepare. An extension of time granted the contracting party for filing its Federal income tax return does not serve to extend the time for filing the annual reports required by this section. Authority consistent with authorizations for granting extensions of time for filing Federal income tax returns is hereby delegated to the various district directors of internal revenue for granting extensions of time for filing the reports required by this section. Application for extensions of time for filing such reports should be addressed to the district director of internal revenue for the district in which the contracting party files its Federal income tax returns and must contain a full recital of the causes for the delay.

§17.17 *Payment of excess profit liability.* The amount of the excess profit liability to be paid to the United States shall be paid on or before the due date for filing the report with the district director of internal revenue. See §17.16. At the option of the contracting party, the amount of the excess profit liability may be paid in four equal installments instead of in a single payment, in which case the first installment is to be paid on or before the date prescribed for the payment of the excess profit as a single payment, the second installment on or before the 15th day of the third month, the third installment on or before the 15th day of the sixth month, and the fourth installment on or before the 15th day of the ninth month, after such date.

§17.18 *Liability of surety.* The surety under contracts entered into after the amendment of section 3(b) of the act of June 25, 1936 shall not be liable for payment of excess profit due the United States in respect of such contracts.

§17.19 *Determination of liability for excess profit, interest and penalties; assessment, collection, payment, refunds.* (a) The duty of determining the correct amount of excess profit liability on contracts and subcontracts coming within the scope of the act is upon the Commissioner of Internal Revenue. Under section 3(b) of the act, as amended, and section 651 of the Internal Revenue Code, all provisions of law (including the provisions of law relating to interest, penalties and refunds) applicable with respect to the taxes imposed by Title I of the Revenue Act of 1934 and not inconsistent with section 3 of the act are applicable with respect to the assessment, collec-

tion, or payment of excess profits on contracts and subcontracts coming within the scope of the act and to refunds of overpayments of profits into the Treasury under the act. Claims by a contracting party for the refund of an amount of excess profit, interest, penalties, and additions to such excess profit shall conform to the general requirements prescribed with respect to claims for refund of overpayments of taxes imposed by Title I of the Revenue Act of 1934 and, if filed on account of any additional costs incurred pursuant to guarantee provisions in a contract, shall be supplemented by a statement under oath showing the amount and nature of such costs and all facts pertinent thereto.

(b) Administrative procedure for the determination, assessment and collection of excess profit liability under section 3 of the act, sections 650 and 651 of the Internal Revenue Code, and this part, and the examination of reports and claims in connection therewith will be prescribed from time to time by the Commissioner of Internal Revenue.

MITIGATION OF EFFECT OF RE-NEGOTIATION OF GOVERNMENT CONTRACTS

§ 1.1481-1 [Reserved]

TAX ON TRANSFERS TO AVOID INCOME TAX

§ 1.1491-1 Imposition of tax.

Section 1491 imposes an excise tax upon transfers of stock or securities by a citizen or resident of the United States, or by a domestic corporation or partnership, or by a trust which is not a foreign trust, to a foreign corporation as paid-in surplus or as a contribution to capital, or to a foreign trust, or to a foreign partnership. The tax is in an amount equal to 27½ percent of the excess of (a) the value of the stock or securities so transferred over (b) its adjusted basis, as provided in section 1011, for determining gain in the hands of the transferor.

[T.D. 6500, 25 FR 12082, Nov. 26, 1960]

§ 1.1492-1 Nontaxable transfers.

(a) The tax imposed by section 1491 does not apply:

(1) If the transferee is an organization (other than an organization described in section 401(a) exempt from income tax under the provisions of sections 501 to 504, inclusive; or
