Title 3—The President

practices of contracting officers and debarring officials in response to contractors’ certifications of serious tax delinquencies and to provide me, within 90 days, recommendations on process improvements to ensure these contractors are not awarded new contracts, including a plan to make contractor certifications available in a Government-wide database, as is already being done with other information on contractors.

Executive departments and agencies shall carry out the provisions of this memorandum to the extent permitted by law. This memorandum is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

The Director of the Office of Management and Budget is hereby authorized and directed to publish this memorandum in the Federal Register.

BARACK OBAMA

THE WHITE HOUSE,

Notice of January 20, 2010

Continuation of the National Emergency With Respect to Terrorists Who Threaten To Disrupt the Middle East Peace Process

On January 23, 1995, by Executive Order 12947, the President declared a national emergency pursuant to the International Emergency Economic Powers Act (50 U.S.C. 1701–1706) to deal with the unusual and extraordinary threat to the national security, foreign policy, and economy of the United States constituted by grave acts of violence committed by foreign terrorists who threaten to disrupt the Middle East peace process. On August 20, 1998, by Executive Order 13099, the President modified the Annex to Executive Order 12947 to identify four additional persons, including Usama bin Laden, who threaten to disrupt the Middle East peace process.

Because these terrorist activities continue to threaten the Middle East peace process and to pose an unusual and extraordinary threat to the national security, foreign policy, and economy of the United States, the national emergency declared on January 23, 1995, and the measures adopted on that date and on August 20, 1998, to deal with that emergency must continue in effect beyond January 23, 2010. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing for 1 year the national emergency with respect to foreign terrorists who threaten to disrupt the Middle East peace process.
Memorandum of January 29, 2010

Blue Ribbon Commission on America’s Nuclear Future

Memorandum for the Secretary of Energy

Expanding our Nation’s capacity to generate clean nuclear energy is crucial to our ability to combat climate change, enhance energy security, and increase economic prosperity. My Administration is undertaking substantial steps to expand the safe, secure, and responsible use of nuclear energy. These efforts are critical to accomplishing many of my Administration’s most significant goals.

An important part of a sound, comprehensive, and long-term domestic nuclear energy strategy is a well-considered policy for managing used nuclear fuel and other aspects of the back end of the nuclear fuel cycle. Yet the Nation’s approach, developed more than 20 years ago, to managing materials derived from nuclear activities, including nuclear fuel and nuclear waste, has not proven effective. Fortunately, over the past two decades scientists and engineers in our country and abroad have learned a great deal about effective strategies for managing nuclear material. My Administration is committed to using this advanced knowledge to meet the Government’s obligation to dispose of our Nation’s used nuclear material.

Accordingly, I request that you establish a Blue Ribbon Commission on America’s Nuclear Future (Commission) and appoint its members. Those members should include recognized representatives and experts from a range of disciplines and with a range of perspectives, and may include participation of appropriate Federal officials. The Commission’s business should be conducted in an open and transparent manner.

The Commission should conduct a comprehensive review of policies for managing the back end of the nuclear fuel cycle, including all alternatives for the storage, processing, and disposal of civilian and defense used nuclear fuel and nuclear waste. This review should include an evaluation of advanced fuel cycle technologies that would optimize energy recovery, resource utilization, and the minimization of materials derived from nuclear activities in a manner consistent with U.S. nonproliferation goals.

In performing its functions, the Commission should consider a broad range of technological and policy alternatives, and should analyze the scientific, environmental, budgetary, economic, financial, and management issues, among others, surrounding each alternative it considers. Where appropriate, the Commission may also identify potential statutory changes.

The Commission should provide an interim report to you within 18 months of the date of this memorandum, and that report should be made available for public comment. The Commission should provide a final report to you...
