

Department of the Army, DoD

§ 655.10

Preparers

Personnel from a variety of disciplines who write environmental documentation in clear and analytical prose. They are primarily responsible for the accuracy of the document.

Proponent

Proponent identification depends on the nature and scope of a proposed action as follows:

(1) Any Army structure may be a proponent. For instance, the installation/activity Facility Engineer (FE)/Director of Public Works becomes the proponent of installation-wide Military Construction Army (MCA) and Operations and Maintenance (O&M) Activity; Commanding General, TRADOC becomes the proponent of a change in initial entry training; and the Program Manager becomes the proponent for a major acquisition program. The proponent may or may not be the preparer.

(2) In general, the proponent is the unit, element, or organization that is responsible for initiating and/or carrying out the proposed action. The proponent has the responsibility to prepare and/or secure funding for preparation of the environmental documentation.

Significantly Affecting the Environment

The significance of an action's, program's, or project's effects must be evaluated in light of its context and intensity, as defined in 40 CFR 1508.27.

Section III—Special Abbreviations and Terms

This part uses the following abbreviations, brevity codes or acronyms not contained in AR 310–50. These include use for electronic publishing media and computer terminology, as follows:

WWW World Wide Web.

PARTS 652–654 [RESERVED]

PART 655—RADIATION SOURCES ON ARMY LAND

AUTHORITY: 10 U.S.C. 3013.

SOURCE: 76 FR 6693, Feb. 8, 2011, unless otherwise noted.

§ 655.10 Oversight of radiation sources brought on Army land by non-Army entities (AR 385–10).

(a) As used in this section:

Agreement State has the same meaning as provided in 10 CFR 30.4.

Byproduct material has the same meaning as provided in 10 CFR 20.1003.

Radiation has the same meaning as provided in 10 CFR 20.1003.

Radioactive material includes byproduct material, source material, and special nuclear material.

Source material has the same meaning as provided in 10 CFR 20.1003.

Special nuclear material has the same meaning as provided in 10 CFR 20.1003.

(b) Army radiation permits are required for use, storage, or possession of ionizing radiation sources by non-Army entities (including their civilian contractors) on an Army installation. Such use, storage, or possession of ionizing radiation sources must be in connection with an activity of the Department of Defense or in connection with a service to be performed on the installation for the benefit of the Department of Defense, in accordance with 10 U.S.C. 2692(b)(1). Approval by the garrison commander is required to obtain an Army radiation permit. For the purposes of this section, an ionizing radiation source is:

(1) Radioactive material used, stored, or possessed under the authority of a specific license issued by the Nuclear Regulatory Commission (NRC) or an Agreement State (10 CFR parts 30, 40, and 70 or the equivalent regulations of an Agreement State); or

(2) A machine-produced ionizing radiation source capable of producing an area, accessible to individuals, in which radiation levels could result in an individual receiving a dose equivalent in excess of 0.1 rem (1 mSv) in 1 hour at 30 centimeters from the ionizing radiation source or from any surface that the radiation penetrates.

(c) A permit is not required for non-Army entities (including their civilian contractors) that use Army licensed radioactive material on an Army installation in coordination with the Army NRC licensee. The non-Army entity must obtain permission from the Army NRC licensee to use the radioactive materials and be in compliance with all of the Army NRC license conditions prior to beginning work on Army land.

(d) Other Military Departments are exempt from the requirement of paragraph (b) of this section to obtain an Army radiation permit; however, the garrison Radiation Safety Officer

§ 655.10

32 CFR Ch. V (7-1-11 Edition)

(RSO) must be notified prior to ionizing radiation sources being brought onto the installation.

(e) Applicants will apply for an Army radiation permit by letter with supporting documentation (paragraph (f) of this section) to the garrison commander through the appropriate tenant commander or garrison director. Submit the letter so that the garrison commander receives the application at least 30 calendar days before the requested effective date of the permit.

(f) The Army radiation permit application will include a proposed effective date and duration (not to exceed 12 months) for the Army radiation permit and describe the purposes for which the ionizing radiation source will be used. The application will include: Identification of the trained operating personnel who will be responsible for implementation of the activities authorized by the permit and a summary of their professional qualifications; the applicant's point-of-contact name and phone number; the applicant's radiation safety Standing Operating Procedures (SOPs); storage provisions when the ionizing radiation source is not in use; and procedures for notifying the garrison of reportable incidents/accidents.

(g) The garrison commander may approve the application only if the applicant provides evidence to show that one of the following is true:

(1) The applicant possesses a valid NRC license or Department of Energy (DOE) radiological work permit that allows the applicant to use the ionizing radiation source in the manner requested in the Army radiation permit application;

(2) The applicant possesses a valid Agreement State license that allows the applicant to use the ionizing radiation source in the manner requested in the Army radiation permit application. An applicant operating in areas subject to exclusive Federal jurisdiction (Agreement States Letter SP-96-022) has to file a NRC Form-241, Report of Proposed Activities in Non-Agreement States, with the NRC in accordance with 10 CFR 150.20(b);

(3) For machine-produced ionizing radiation sources, the applicant has an appropriate State authorization that

allows the applicant to use the ionizing radiation source as requested in the Army radiation permit application and has in place a radiation safety program that complies with applicable Army regulations; or

(4) For installations outside of the United States, the applicant has an appropriate host-nation authorization as necessary that allows the applicant to use the ionizing radiation source in the manner requested in the Army radiation permit application and has in place a radiation safety program that complies with applicable Army regulations and host nation laws and regulations.

(h) Applicants and permit holders shall comply with all applicable Federal, state, interstate, and local laws and regulations, status-of-forces agreements (SOFAs), and other international agreements.

(i) Each Army radiation permit will require the permit holder to remove its permitted ionizing radiation sources from Army property prior to the expiration of the permit and restore all real or personal property of the Army that was modified, altered, or otherwise changed as a result of the permit holder's activities to the condition such property was in prior to the effective date of the permit.

(j) An Army radiation permit issued pursuant to this section shall be valid for no more than 12 months.

(k) Disposal of radioactive material by non-Army entities on Army property is prohibited. However, the garrison commander may give written authorization for releases of radioactive material to the atmosphere or to the sanitary sewerage system if such releases are in compliance with all applicable Federal, State, interstate, and local laws and regulations, including but not limited to, the NRC regulations at 10 CFR part 20, Subpart K, or the equivalent requirements of an Agreement State, and regulations issued by the Army or the Department of Defense, to include compliance with any applicable requirement to obtain a permit, license, or other authorization, or to submit any information, notification, or report for such release.
