Coast Guard, DHS

§ 96.250

conditions of paragraph (a), may voluntarily meet the standards of this part and Chapter IX of SOLAS and have their safety management systems certified.

(d) The compliance date for the requirements of this part are—

(1) On or after July 1, 1998, for—

(i) Vessels transporting more than 12 passengers engaged on a foreign voyage; or

(ii) Tankers, bulk freight vessels, or high speed freight vessels of at least 500 gross tons or more, engaged on a foreign voyage.

(2) On or after July 1, 2002, for other freight vessels and self-propelled mobile offshore drilling units (MODUs) of at least 500 gross tons or more, engaged on a foreign voyage.

§ 96.220 What makes up a safety management system?

(a) The safety management system must document the responsible person’s—

(1) Safety and pollution prevention policy;

(2) Functional safety and operational requirements;

(3) Recordkeeping responsibilities; and

(4) Reporting responsibilities.

(b) A safety management system must also be consistent with the functional standards and performance elements of IMO Resolution A.741(18).

§ 96.230 What objectives must a safety management system meet?

The safety management system must:

(a) Provide for safe practices in vessel operation and a safe work environment onboard the type of vessel the system is developed for;

(b) Establish and implement safeguards against all identified risks;

(c) Establish and implement actions to continuously improve safety management skills of personnel ashore and aboard vessels, including preparation for emergencies related to both safety and environmental protection; and

(d) Ensure compliance with mandatory rules and regulations, taking into account relevant national and international regulations, standards, codes and maritime industry guidelines, when developing procedures and policies for the safety management system.

§ 96.240 What functional requirements must a safety management system meet?

The functional requirements of a safety management system must include—

(a) A written statement from the responsible person stating the company’s safety and environmental protection policy;

(b) Instructions and procedures to provide direction for the safe operation of the vessel and protection of the environment in compliance with the applicable U.S. Code of Federal Regulations, and international conventions to which the U.S. is a party (SOLAS, MARPOL, etc.);

(c) Documents showing the levels of authority and lines of communication between shoreside and shipboard personnel;

(d) Procedures for reporting accidents, near accidents, and non-conformities with provisions of the company’s and vessel’s safety management system, and the ISM Code;

(e) Procedures to prepare for and respond to emergency situations by shoreside and shipboard personnel;

(f) Procedures for internal audits on the operation of the company and vessel(s) safety management system; and

(g) Procedures and processes for management review of company internal audit reports and correction of non-conformities that are reported by these or other reports.

§ 96.250 What documents and reports must a safety management system have?

The documents and reports required for a safety management system under §96.330 or §96.340 must include the written documents and reports itemized in Table 96.250. These documents and reports must be available to the company’s shore-based and vessel(s)-based personnel:
