§ 63.788(b)(3) (ii)(C), (iii)(C), and (iv)(D).

§ 63.785(c) (1) through (3).

Volatilization of all components within a coating are additive.

A VOC, and the owner or operator shall record and report the Administrator-approved VOHAP test method or certification procedure.

Such coatings are subject to the same limits regardless of weather conditions.

a Affected sources that comply with the cold-weather limits must record and report additional information, as specified in § 63.788(b)(3)(ii)(C), (iii)(C), and (iv)(D).

b Affected sources that detect a violation must record and report additional information, as specified in § 63.788(b)(4).

c OPTION 4: the recordkeeping and reporting requirements of Option 4 are identical to those of Options 1, 2, or 3, depending on whether and how thinners are used. However, when using Option 4, the term "VOC," and the owner or operator shall record and report the Administrator-approved VOHAP test method or certification procedure.

d Affected sources that intend to become area sources by the compliance date may, in lieu of submitting an implementation plan, choose to submit a statement of intent as specified in § 63.787(b)(4).
