§ 101-25.110 Tire identification/registration program.

The regulations issued by the Department of Transportation in 49 CFR part 574, Tire Identification and Recordkeeping, require that tire manufacturers maintain or have maintained for them the name and address of tire purchasers, the identification number of each tire sold, and the name and address of the tire seller (or other means by which the manufacturer can identify the tire seller). In addition, distributors and dealers are required to furnish such data to manufacturers in connection with purchases made directly from them. GSA provides support to the Federal Government for tires, and therefore has prescribed the following procedures for tires purchased from or through GSA supply sources.

§ 101-25.110-3 Tires accompanying new motor vehicles.

The tire identifications and recordkeeping regulations issued by the Department of Transportation require each motor vehicle manufacturer or his designee to maintain a record of tires on or in each vehicle shipped by him together with the name and address of the first purchaser.

operation of all agencies to ensure that tires subject to a recall program are not to continue in service thereby endangering the lives of the occupants of the vehicle. Therefore, agencies should establish procedures for promptly identifying and locating all tires whether in storage or on vehicles so that advice from GSA, the tire manufacturer, or the vehicle manufacturer may be acted upon expeditiously.

It is the policy of the General Services Administration to appropriately implement the various provisions of these Acts of Congress as fully as statutory authority permits in support of the national policy.

(b) With respect to the procurement, management, and disposal of personal property, the implementation of national environmental policy is provided through amendments to the regulations of GSA, changes to Federal specifications and standards documents, as appropriate, and other actions as may be required when expediency is of prime importance. Further, the Federal regulatory agencies have imposed restrictions applicable to the procurement, use, and disposal of items supplied through the Federal supply system that are known to contain components or possess qualities that have an adverse impact on the environment or that result in creating unsafe or unhealthy working conditions. Each agency, therefore, shall take action as necessary to ensure that the objectives and directives of the National Environmental Policy Act, other environmental statutes, and applicable regulations are met; especially the directive that environmental concerns, effects, and values shall be given appropriate
