Federal Acquisition Regulation

50.205–1

SAFETY Act Considerations.

(a) SAFETY Act applicability. Requiring activities should review requirements to identify potential technologies that prevent, detect, identify, or deter acts of terrorism or limit the harm such acts might cause, and may be appropriate for SAFETY Act protections. In questionable cases, the agency shall consult with DHS. For acquisitions involving such technologies, the requiring activity should ascertain through discussions with DHS whether a block designation or block certification exists for the technology being acquired.

(1) If one does exist, the requiring activity should request that the contracting officer notify offerors.

(2) If one does not exist, see 50.205–2, Pre-qualification designation notice.

(b) Early consideration of the SAFETY Act. Acquisition officials shall consider SAFETY Act issues as early in the acquisition cycle as possible (see 7.105(b)(20)(v)). Normally, this would be at the point where the required capabilities or performance characteristics are addressed. This is important because the processing times for issuing determinations on all types of SAFETY Act applications vary depending on many factors, including the influx of applications to DHS and the technical complexity of individual applications.

(c) Industry outreach. When applicable, acquisition officials should include SAFETY Act considerations in all industry outreach efforts including, but
50.205–2 Pre-qualification designation notice.

(a) Requiring activity responsibilities. (1) If the requiring activity determines that the technology to be acquired may qualify for SAFETY Act protection, the requiring activity is responsible for requesting a pre-qualification designation notice from DHS. Such a request for a pre-qualification designation notice should be made once the requiring activity has determined that the technology specifications or statement of work are established and are unlikely to undergo substantive modification. DHS will then determine whether the technology identified in the request either affirmatively or presumptively satisfies the technical criteria for SAFETY Act designation. An affirmative determination means the technology described in the pre-qualification designation notice satisfies the technical criteria for SAFETY Act designation as a QATT. In either case, the notice will authorize offerors to—

(i) Submit a streamlined application for SAFETY Act designation; and

(ii) Receive expedited review of their application for SAFETY Act designation.

(2) The requiring activity shall make requests using the procurement pre-qualification request form available at http://www.SAFETYAct.gov. The website includes instructions for completing and submitting the form.

(3) The requiring activity shall provide a copy of the request, as well as a copy of the resulting pre-qualification designation notice or DHS denial, to the contracting officer.

(b) Contracting officer responsibilities.

(1) Include in any pre-solicitation notice (Subpart 5.2) that a pre-qualification designation notice has been—

(i) Requested and is under review by DHS;

(ii) Denied by DHS; or

(iii) Issued and a copy will be included with the solicitation; and

(2) Incorporate the pre-qualification designation notice into the solicitation.

50.205–3 Authorization of offers contingent upon SAFETY Act designation or certification before contract award.

(a) Contracting officers may authorize such contingent offers, only if—

(1) DHS has issued—

(i) For offers contingent upon SAFETY Act designation, a pre-qualification designation notice or a block designation;

(ii) For offers contingent upon SAFETY Act certification, a block certification;

(2) To the contracting officer’s knowledge, the Government has not provided advance notice so that potential offerors could have obtained SAFETY Act designations/ certifications for their offered technologies before release of any solicitation; and

(3) Market research shows that there will be insufficient competition without SAFETY Act protections or the subject technology would be sold to the Government only with SAFETY Act protections.

(b) Contracting officers shall not authorize offers contingent upon obtaining a SAFETY Act certification (as opposed to a SAFETY Act designation), unless a block certification applies to the class of technology to be acquired under the solicitation.

50.205–4 Authorization of awards made presuming SAFETY Act designation or certification after contract award.

(a) When necessary to award a contract prior to DHS issuing SAFETY
