## Subpart 204.71—Uniform Contract Line Item Numbering System

### 204.7100 Scope.

This subpart prescribes policies and procedures for assigning contract line item numbers.

### 204.7101 Definitions.

*Accounting classification reference number (ACRN)* means any combination of a two position alpha/numeric code used as a method of relating the ac-

counting classification citation to detailed line item information contained in the schedule.

*Attachment* means any documentation, appended to a contract or incorporated by reference, which does not establish a requirement for deliverables.

*Definitized item*, as used in this subpart, means an item for which a firm price has been established in the basic contract or by modification.

*Exhibit* means a document, referred to in a contract, which is attached and establishes requirements for deliverables. The term shall not be used to refer to any other kind of attachment to a contract. The DD Form 1423, Contract Data Requirements List, is always an exhibit, rather than an attachment.

*Nonseverable deliverable*, as used in this subpart, means a deliverable item that is a single end product or undertaking, entire in nature, that cannot be feasibly subdivided into discrete elements or phases without losing its identity.

*Undefinitized item*, as used in this subpart, means an item for which a price has not been established in the basic contract or by modification.
