for the unfilled seats. If a passenger with a disability calls 48 hours before the trip is scheduled to leave and requests a seat and the provision of an accessible OTRB, the operator must meet this request, as long as it does not displace another passenger with a reservation.

Example 4. A tour bus trip is nearly sold out three weeks in advance of the trip date. A passenger with a disability calls 48 hours before the trip is scheduled to leave and requests a seat and the provision of an accessible OTRB. The operator need not meet this request if it will have the effect of displacing a passenger with an existing reservation. If other passengers would not be displaced, the operator must meet this request.

§ 37.191 Special provision for small mixed-service operators.

(a) For purposes of this section, a small mixed-service operator is a small operator that provides both fixed-route and demand-responsive service and does not use more than 25 percent of its buses for fixed-route service.

(b) An operator meeting the criteria of paragraph (a) of this section may conduct all its trips, including fixed-route trips, on an advance-reservation basis as provided for demand-responsive trips in §37.189. Such an operator is not required to comply with the accessible bus acquisition/equivalent service obligations of §37.183(b).

§ 37.193 Interim service requirements.

(a) Until 100 percent of the fleet of a large or small operator uses to provide fixed-route service is composed of accessible OTRBs, the operator shall meet the following interim service requirements:

(1) Beginning one year from the date on which the requirements of this subpart begin to apply to the operator, it shall ensure that any individual with a disability that requests service in an accessible OTRB receives such service.

(i) The operator may require up to 48 hours’ advance notice to provide this service.

(ii) If the individual with a disability does not provide the advance notice the operator requires, the operator shall nevertheless provide the service if it can do so by making a reasonable effort.

(iii) If the trip on which the person with a disability wishes to travel is already provided by an accessible bus, the operator has met this requirement.

(2) Before a date one year from the date on which this subpart applies to the operator, an operator which is unable to provide the service specified in paragraph (a) of this section shall comply with the requirements of §37.169.

(3) Interim service under this paragraph (a) is not required to be provided by a small operator who is providing equivalent service to its fixed-route service as provided in §37.183(b)(2).

(b) Some small fixed-route operators may never have a fleet 100 percent of which consists of accessible buses (e.g., a small fixed-route operator who exclusively or primarily purchases or leases used buses). Such an operator must continue to comply with the requirements of this section with respect to any service that is not provided entirely with accessible buses.

(c) Before a date one year from the date on which this subpart applies to an operator providing demand-responsive service, an operator which is unable to provide the service described in §37.189 shall comply with the requirements of §37.169.

EFFECTIVE DATE NOTE: At 76 FR 57936, Sept. 19, 2011, §37.193 was amended by removing paragraph (a)(2), removing and reserving paragraph (c), and redesignating paragraph (a)(3) as (a)(2), effective Oct. 19, 2011.

§ 37.195 Purchase or lease of OTRBs by private entities not primarily in the business of transporting people.

This section applies to all purchases or leases of new vehicles by private entities which are not primarily engaged in the business of transporting people, with respect to buses delivered to them on or after the date on which this subpart begins to apply to them.

(a) Fixed-route systems. If the entity operates a fixed-route system and purchases or leases an OTRB for or in contemplation of use on the system, it shall meet the requirements of §37.183 (a) or (b), as applicable.

(b) Demand-responsive systems. The requirements of §37.189 apply to demand-responsive systems operated by private entities not primarily in the business of transporting people. If such an entity operates a demand-responsive system, and purchases or leases an OTRB
§ 37.197 Remanufactured OTRBs.

(a) This section applies to any private entity operating OTRBs that takes one of the following actions:

(1) On or after the date on which this subpart applies to the entity, it remanufactures an OTRB so as to extend its useful life for five years or more or makes a solicitation for such remanufacturing; or

(2) Purchases or leases an OTRB which has been remanufactured so as to extend its useful life for five years or more, where the purchase or lease occurs after the date on which this subpart applies to the entity and during the period in which the useful life of the vehicle is extended.

(b) In any situation in which this subpart requires an entity purchasing or leasing a new OTRB to purchase or lease an accessible OTRB, OTRBs acquired through the actions listed in paragraph (a) of this section shall, to the maximum extent feasible, be readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(c) For purposes of this section, it shall be considered feasible to remanufacture an OTRB so as to be readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, unless an engineering analysis demonstrates that including accessibility features required by this part would have a significant adverse effect on the structural integrity of the vehicle.

§ 37.199 [Reserved]

§ 37.201 Intermediate and rest stops.

(a) Whenever an OTRB makes an intermediate or rest stop, a passenger with a disability, including an individual using a wheelchair, shall be permitted to leave and return to the bus on the same basis as other passengers. The operator shall ensure that assistance is provided to passengers with disabilities as needed to enable the passenger to get on and off the bus at the stop (e.g., operate the lift and provide assistance with securement; provide other boarding assistance if needed, as in the case of a wheelchair user who has transferred to a vehicle seat because other wheelchair users occupied all securement locations).

(b) If an OTRB operator owns, leases, or controls the facility at which a rest or intermediate stop is made, or if an OTRB operator contracts with the person who owns, leases, or controls such a facility to provide rest stop services, the OTRB operator shall ensure the facility complies fully with applicable requirements of the Americans with Disabilities Act.

(c) If an OTRB equipped with an inaccessible restroom is making an express run of three hours or more without a rest stop, and a passenger with a disability who is unable to use the inaccessible restroom requests an unscheduled rest stop, the operator shall make a good faith effort to accommodate the request. The operator is not required to make the stop. However, if the operator does not make the stop, the operator shall explain to the passenger making the request the reason for its decision not to do so.

§ 37.203 Lift maintenance.

(a) The entity shall establish a system of regular and frequent maintenance checks of lifts sufficient to determine if they are operative.

(b) The entity shall ensure that vehicle operators report to the entity, by the most immediate means available, any failure of a lift to operate in service.

(c) Except as provided in paragraph (d) of this section, when a lift is discovered to be inoperative, the entity shall take the vehicle out of service before the beginning of the vehicle’s next trip and ensure that the lift is repaired before the vehicle returns to service.

(d) If there is no other vehicle available to take the place of an OTRB with an inoperative lift, such that taking the vehicle out of service before its next trip will reduce the transportation service the entity is able to provide, the entity may keep the vehicle in service with an inoperative lift for no more than five days from the day on
