Each plan submitted under section 503(b)(4) of the Motor Vehicle Information and Cost Savings Act must contain the following information:

(a) For each model year for which relief is sought in the plan and for each model type of automobile sought to be included by the submitter in its domestic fleet under the plan (i.e., those with at least 50 percent but less than 75 percent U.S. or Canadian value added), provide the following information:

1. A description of the model type, including engine type and displacement, transmission class, car line designation, and fuel economy;
2. The projected U.S. sales of the model type;
3. The average total manufacturing cost per vehicle for the model type;
4. The percentage of the cost to the manufacturer attributable to value added in the United States or Canada for the model type;
5. A list and full description of each planned product action (e.g., new model, mix change) which will affect the average fuel economy of the class of automobiles subject to the credit earning plan, for each model year beginning with the current model year and ending with the last year covered by the credit earning plan.
6. The portion of the petitioner’s fleet affected by each product action

(b) A description of the model type, including car line designation, engine displacement and type, transmission type, and average fuel economy;

(c) U.S. sales projected for the model type;

(d) The average percentage of the cost to the manufacturer of the model type which is attributable to value added in the United States or Canada, determined in accordance with 40 CFR 600.511–80, and the total manufacturing cost per vehicle; and
