Fishery Conservation and Management § 600.508

(i) The consecutive codend number from “SECTION ONE”.
(ii) The receipts of each authorized species or species group and its disposition, either processed for human consumption, used for fishmeal, discarded, or returned to the U.S. fishing vessel, to at least the nearest 0.1 mt round weight.
(iii) The estimated receipts of each prohibited species or species group and its disposition, either discarded or returned to the U.S. vessel where authorized in the fishery in which the U.S. vessel is engaged, to at least the nearest 0.1 mt round weight.
(iv) The species code of each marine mammal received and its condition when released.

(4) “SECTION TWO-CATCH” must contain on a daily basis—
(i) The species codes of all authorized or prohibited species or species groups received.
(ii) The daily disposition, as described in paragraph (g)(3)(ii) of this section, daily total, and cumulative total receipts of each authorized species or species groups.
(iii) The daily disposition, daily total and cumulative total receipts of all authorized species or species groups.
(iv) The daily and cumulative total receipts of prohibited species groups and their disposition as described in paragraph (g)(3)(iii) of this section.

(5) “SECTION THREE—PRODUCTION” must contain, on a daily basis, for each authorized species or species group received and product produced, that information required in paragraph (e)(5) of this section.

(h) Daily log maintenance. The logs required by paragraphs (e) through (g) of this section must be maintained separately for each fishery (see table 2 to §600.502).
(1) The effort section (all of “SECTION ONE”) of the daily logs must be updated within 2 hours of the hauling or receipt time. The catch or receipt by trawl or set (“SECTION TWO”) must be entered within 12 hours of the hauling or receipt time. The daily and cumulative total catch or receipts (“SECTION TWO”) and the production portion (“SECTION THREE”) of the log must be updated within 12 hours of the end of the day on which the catch was taken. The date of catch is the day and time (GMT) the gear is hauled.
(2) Entries for total daily and cumulative catch or receipt weights (disposition “C” or “M”) must be based on the most accurate method available to the vessel, either scale round weights or factory weights converted to round weights. Entries for daily and cumulative weights of discarded or returned fish (disposition “D” or “R”) must be based on the most accurate method available to the vessel, either actual count, scale round weight, or estimated deck weights. Entries for product weights must be based on the number of production units (pans, boxes, blocks, trays, cans, or bags) and the average weight of the production unit, with reasonable allowances for water added. Allowances for water added cannot exceed 5 percent of the unit weight. Product weights cannot be based on the commercial or arbitrary wholesale weight of the product, but must be based on the total actual weight of the product as determined by representative samples.
(3) The owner or operator must make all entries in indelible ink, with corrections to be accomplished by lining out and rewriting, rather than erasure.
(i) Alternative log formats. As an alternative to the use of the specific formats provided, a Nation may submit a proposed log format for FFV’s of that Nation for a general type of fishery operation in a fishery (i.e., joint venture operations) to the appropriate Regional Administrator and the USCG commander (see tables 1 and 2 to §600.502). With the agreement of the USCG commander, the Regional Administrator may authorize the use of that log format for vessels of the requesting Nation.
[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.508 Fishing operations.

(a) Catching. Each FFV authorized for activity code 1 may catch fish. An FFV may retain its catch of any species or species group for which there is an unfilled national allocation. All fish caught will be counted against the national allocation, even if the fish are discarded, unless exempted by the regulations of the fishery in which the
§ 600.509 Prohibited species.
(a) The owner or operator of each FFV must minimize its catch or receipt of prohibited species.
(b) After allowing for sampling by an observer (if any), the owner or operator of each FFV must sort its catch of fish received as soon as possible and return all prohibited species and species parts to the sea immediately with a minimum of injury, regardless of condition, unless a different procedure is specified by the regulations for the fishery in which the FFV is engaged.
(c) All prohibited species must be recorded in the daily fishing log and other fishing logs as specified by the regulations for the fishery in which the FFV is engaged.
(d) It is a rebuttable presumption that any prohibited species or species part found on board an FFV was caught.
