§ 648.204 Possession restrictions.

(a) A vessel must be issued and possess a valid limited access herring permit to fish for, possess, or land Atlantic herring from any herring management area in the EEZ, provided that the area has not been closed due to the attainment of 95 percent of the sub-ACL allocated to the area, as specified in §648.201.

(1) A vessel issued an All Areas Limited Access Herring Permit may fish for, possess, or land Atlantic herring with no possession restriction from any of the herring management areas defined in §648.200(f), provided that the area has not been closed due to the attainment of 95 percent of the sub-ACL allocated to the area, as specified in §648.201.

(2) A vessel issued only an Areas 2 and 3 Limited Access Herring Permit may fish for, possess, or land Atlantic herring with no possession restriction only from Area 2 or Area 3 as defined in §648.200(f), provided that the area has not been closed due to the attainment of 95 percent of the sub-ACL allocated to the area.

Such a vessel may fish in Area 1 only if issued an open access herring permit or a Limited Access Incidental Catch Herring Permit, and only as authorized by the respective permit.

(3) A vessel issued a Limited Access Incidental Catch Herring Permit may fish for, possess, or land up to 55,000 lb (25 mt) of Atlantic herring in any calendar day, and is limited to one landing of herring per calendar day, provided that the area has not been closed due to the attainment of 95 percent of the sub-ACL allocated to the area.

(4) A vessel issued an open access herring permit may fish for, possess, or land up to 6,600 lb (3 mt) of Atlantic herring from any herring management area per trip, and is limited to one landing of herring per calendar day, provided that the area has not been
§ 648.205 VMS requirements.

The owner or operator of any limited access herring vessel with the exception of fixed gear fishermen must install and operate a VMS unit consistent with the requirements of §648.9. The VMS unit must be installed on board, and must be operable before the vessel may begin fishing. Atlantic herring carrier vessels are not required to have VMS. At least 1 hr prior to leaving port, the owner or authorized representative of a herring vessel that is required to use VMS as specified in this section must notify the Regional Administrator by entering the appropriate VMS code that the vessel will be participating in the herring fishery. VMS codes and instructions are available from the Regional Administrator upon request.

§ 648.206 Framework provisions.

(a) Framework adjustment process. In response to the triennial review, or at any other time, the Council may initiate action to add or adjust management measures if it finds that action is necessary to meet or be consistent with the goals and objectives of the Atlantic Herring FMP, or to address gear conflicts as defined under §600.10 of this chapter.

(1) Adjustment process. After a management action has been initiated, the Council shall develop and analyze appropriate management measures over the span of at least two Council meetings. The Council may delegate authority to the Herring Oversight Committee to conduct an initial review of the options being considered. The Oversight Committee shall review the options and relevant information, consider public comment, and make a recommendation to the Council.

(2) After the first framework meeting, the Council may refer the issue back to the Herring Oversight Committee for further consideration, make adjustments to the measures that were proposed, or approve of the measures and begin developing the necessary documents to support the framework adjustments. If the Council approves the proposed framework adjustments, the Council shall identify, at this meeting, a preferred alternative and/or identify the possible alternatives.

(3) A framework document shall be prepared that discusses and shows the impacts of the alternatives. It shall be available to the public prior to the second or final framework meeting.

(4) After developing management actions and receiving public testimony, the Council shall make a recommendation to NMFS. The Council’s recommendation must include supporting rationale and, if changes to the management measures are recommended, an analysis of impacts and a recommendation to NMFS on whether to issue the management measures as a final rule. If the Council recommends that the management measures should be issued as a final rule, the Council must consider at least the following factors and provide support and analysis for each factor considered:

(i) Whether the availability of data on which the recommended management measures are based allows for adequate time to publish a proposed rule, and whether regulations have to be in place for an entire harvest/fishing season.

(ii) Whether there has been adequate notice and opportunity for participation by the public and members of the affected industry in the development of the Council’s recommended management measures.

(iii) Whether there is an immediate need to protect the resource or to impose management measures to resolve gear conflicts.
