§ 679.83 Rockfish Program entry level fishery.

(a) Rockfish entry level fishery—(1) General. A rockfish entry level harvester and rockfish entry level processor may participate in the rockfish entry level fishery as follows:

(i) Trawl catcher vessels. Trawl catcher vessels participating in the rockfish entry level fishery may collectively harvest, prior to September 1, an amount not greater than 50 percent of the total allocation to the rockfish entry level fishery as calculated under § 679.81(a)(2). Allocations to trawl catcher vessels shall be made first from the allocation of Pacific ocean perch available to the rockfish entry level fishery. If the amount of Pacific ocean perch available for allocation is less than the total allocation allowable for trawl catcher vessels in the rockfish entry level fishery, then northern rockfish and pelagic shelf rockfish shall be allocated to trawl catcher vessels.

(ii) Longline gear vessels. Longline gear vessels participating in the rockfish entry level fishery may collectively harvest, prior to September 1, an amount not greater than 50 percent of the total allocation to the rockfish entry level fishery as calculated under § 679.81(a)(2). Allocations of Pacific ocean perch, northern rockfish, and pelagic shelf rockfish to longline gear vessels shall be made after the allocation to trawl catcher vessels.

(iii) Secondary species allocations. Secondary species shall not be allocated to the rockfish entry level fishery. Secondary species shall be managed based on a MRA for the target species as described in Table 10 to this part.

(iv) Halibut PSC allocations—trawl vessels. Halibut PSC from trawl vessels in the rockfish entry level fishery shall be accounted against the allocation to the deep water species fishery complex for that seasonal apportionment. If the Halibut PSC allocation in the deep water species fishery complex has been achieved or exceeded for that seasonal apportionment, the rockfish entry level fishery for trawl vessels will be closed until deep water species fishery complex halibut PSC is available.

(v) Halibut PSC allocations—longline gear vessels. Halibut PSC from longline gear vessels in the rockfish entry level fishery shall be accounted against the allocation to the other non-trawl fishery category for that seasonal apportionment. If the Halibut PSC allocation in the other non-trawl fishery category has been reached or exceeded for that seasonal apportionment, the rockfish entry level fishery for longline gear vessels will be closed until deep water species fishery complex halibut PSC is available.

(b) Reallocation among trawl and longline gear vessels. Any allocation of Pacific ocean perch, northern rockfish, or pelagic shelf rockfish that has not been harvested by 1200 hours, A.L.T. on September 1, may be harvested by either trawl or longline gear vessels in the rockfish entry level fishery.

(2) Opening of the rockfish entry level fishery. The Regional Administrator maintains the authority to not open the rockfish entry level fishery if he deems it appropriate for conservation or other management measures. Factors such as the total allocation, anticipated harvest rates, and number of participants will be considered in making any such decision.

[71 FR 67252, Nov. 20, 2006, as amended at 72 FR 37681, July 11, 2007]

§ 679.84 Rockfish Program record-keeping, permits, monitoring, and catch accounting.

(a) Recordkeeping and reporting. See § 679.5(r).

(b) Permits. See § 679.4(n).

(c) Catch monitoring requirements for catcher/processors assigned to a rockfish cooperative or rockfish limited access fishery. The requirements under paragraphs (c)(1) through (8) of this section apply to any catcher/processor vessel participating in a rockfish cooperative or the rockfish limited access fishery, and that is subject to a sideboard limit as described in this section. At all times when a vessel has groundfish onboard that were harvested under a CQ permit that were harvested during a...
§ 679.84  Catch monitoring and control requirements for catcher vessels assigned to the opt-out fishery.

rockfish limited access fishery, or that were harvested by a vessel subject to a sideboard limit as described under § 679.82(d) through (g), as applicable, the vessel owner or operator must ensure that:

(1) Catch weighing. All groundfish are weighed on a NMFS-approved scale in compliance with the scale requirements at § 679.28(b). Each haul must be weighed separately and all catch must be made available for sampling by a NMFS-certified observer.

(2) Observer sampling station. An observer sampling station meeting the requirements at § 679.28(d) is available at all times.

(3) Observer coverage requirements. The vessel is in compliance with the observer coverage requirements described at § 679.50(c)(7)(i).

(4) Operational line. The vessel has no more than one operational line or other conveyance for the mechanized movement of catch between the scale used to weigh total catch and the location where the observer collects species composition samples.

(5) Fish on deck. No fish are allowed to remain on deck unless an observer is present, except for fish inside the codend and fish accidentally spilled from the codend during hauling and dumping. Fish accidentally spilled from the codend must be moved to the fish bin.

(6) Sample storage. The vessel owner or operator provides sufficient space to accommodate a minimum of 10 observer sampling baskets. This space must be within or adjacent to the observer sample station.

(7) Pre-cruise meeting. The Observer Program Office is notified by phone at 1–907–271–1702 at least 24 hours prior to departure when the vessel will be carrying an observer who had not previously been deployed on that vessel within the last 12 months. Subsequent to the vessel’s departure notification, but prior to departure, NMFS may contact the vessel to arrange for a pre-cruise meeting. The pre-cruise meeting must minimally include the vessel operator or manager, and any observers assigned to the vessel.

(8) Belt and flow operations. The vessel operator stops the flow of fish and clear all belts between the bin doors and the area where the observer collects samples of unsorted catch when requested to do so by the observer.

(9) Vessel crew in tanks or bins. The vessel owner or operator must comply with the bin monitoring standards specified in § 679.28(i).

(d) Catch monitoring requirements for catcher/processors assigned to the opt-out fishery. At all times any catcher/processor vessel assigned to the opt-out fishery has groundfish onboard that vessel that were harvested subject to a sideboard limit as described under § 679.82(d) through (h), as applicable, the vessel owner or operator must ensure catch from an individual haul is not mixed with catch from another haul prior to sampling by a NMFS-certified observer, and that the requirements in paragraphs (c)(3), (4), (5), (8), and (9) of this section are met.

(e) Catch monitoring requirements for catcher vessels. The owner or operator of a catcher vessel must ensure the vessel complies with the observer coverage requirements described at § 679.50(c)(7)(i) at all times the vessel is participating in a rockfish cooperative, rockfish limited access fishery, or rockfish sideboard fishery described in this section.

(f) Catch monitoring requirements for shoreside and stationary floating processors—(1) Catch monitoring and control plan (CMCP). The owner or operator of a shoreside or stationary floating processor receiving deliveries from a catcher vessel described at § 679.50(c)(7)(ii) must ensure the shoreside or stationary floating processor complies with the CMCP requirements described at § 679.28(g).

(2) Catch weighing. All groundfish landed by catcher vessels described at § 679.50(c)(7)(ii) must be sorted, weighed on a scale approved by the State of Alaska as described at § 679.28(c), and be made available for sampling by a NMFS-certified observer. The observer must be allowed to test any scale used to weigh groundfish to determine its accuracy.

(3) Notification requirements. The plant manager or plant liaison must notify the observer of the offloading schedule
§ 679.90

Subpart H—Amendment 80 Program

SOURCE: 72 FR 52726, Sept. 14, 2007, unless otherwise noted.

§ 679.90  Allocation, use, and transfer of Amendment 80 QS permits.

Regulations under this subpart were developed by NMFS to implement the Amendment 80 Program. Additional regulations that implement specific portions of the Amendment 80 Program are set out at § 679.2 Definitions, § 679.4 Permits, § 679.5 Recordkeeping and reporting (R&R), § 679.7 Prohibitions, § 679.20 General limitations, § 679.21 Prohibited species bycatch management, § 679.27 Improved Retention/Improved Utilization Program, § 679.28 Equipment and operational requirements, § 679.31 CDQ and PSQ reserves, § 679.50 Groundfish Observer Program applicable through December 31, 2007, and § 679.64 Harvesting sideboard limits in other fisheries.

(a) Issuance of Amendment 80 QS permits—(1) General. NMFS will issue an Amendment 80 QS permit to a person who is eligible to receive Amendment 80 QS units as described in paragraph (a)(2) of this section and based on:

(i) The information contained in an approved application for Amendment 80 QS as described in paragraph (b) of this section;

(ii) The information contained in the Amendment 80 official record as described in paragraph (c) of this section;

(iii) The Amendment 80 QS permit allocation procedures as described in paragraph (d) of this section; and

for each delivery of groundfish harvested in a Rockfish Program fishery at least 1 hour prior to offloading. An observer must be available to monitor each delivery of groundfish harvested in a Rockfish Program fishery. The observer must be available the entire time the delivery is being weighed or sorted.

(g) Catch accounting—(1) Primary rockfish species and secondary species. All primary rockfish species and secondary species harvested by a vessel, including harvests in adjacent waters open by the State of Alaska for which it adopts a Federal fishing season, that is named on an LLP license that is assigned to a rockfish cooperative and fishing under a CQ permit will be debited against the CQ for that rockfish cooperative from May 1:

(i) Until November 15; or

(ii) Until that rockfish cooperative has submitted a rockfish cooperative termination of fishing declaration that has been approved by NMFS.

(2) Rockfish halibut PSC. All rockfish halibut PSC used by a vessel, including halibut PSC used in the adjacent waters open by the State of Alaska for which it adopts a Federal fishing season, that is named on an LLP license that is assigned to a rockfish cooperative and fishing under a CQ permit will be debited against the CQ for that rockfish cooperative from May 1:

(i) Until November 15; or

(ii) Until the designated representative of that rockfish cooperative has submitted a rockfish cooperative termination of fishing declaration that has been approved by NMFS.

(3) Groundfish sideboard limits. All groundfish harvested by a vessel, except groundfish harvested by a vessel fishing under a CQ permit in the Central GOA including groundfish harvested in the adjacent waters open by the State of Alaska for which it adopts a Federal fishing season, that is subject to a sideboard limit for that groundfish species as described under § 679.82(d) through (h), as applicable, from July 1 until July 31 will be debited against the sideboard limit established for that sector or rockfish cooperative, as applicable.

(4) Halibut sideboard limits. All halibut PSC used by a vessel, except halibut PSC used by a vessel fishing under a CQ permit, or in a rockfish limited access fishery including halibut PSC used in the adjacent waters open by the State of Alaska for which it adopts a Federal fishing season, that is subject to a sideboard limit as described under § 679.82(d) through (h), as applicable, from July 1 until July 31 will be debited against the sideboard limit established for that sector or rockfish cooperative, as applicable.
