

§ 1470.4

resources on land active in agricultural, forestry, or related uses. The term includes the following:

(1) Technical services provided directly to farmers, ranchers, forest producers, and other eligible entities, such as conservation planning, technical consultation, preparation of forest stewardship management plans, and assistance with the design and implementation of conservation activities; and

(2) Technical infrastructure, including processes, tools, and agency functions needed to support delivery of technical services, such as technical standards, resource inventories, training, data, technology, monitoring, and effects analyses.

Technical Service Provider means an individual, private-sector entity, or public agency certified by NRCS to provide technical services to program participants in lieu of, or on behalf of, NRCS as referenced in 7 CFR part 652.

§ 1470.4 Allocation and management.

(a) The Chief will allocate acres and associated funds to State Conservationists:

(1) Primarily on each State's proportion of eligible land to the total amount of eligible land in all States; and

(2) On consideration of:

(i) The extent and magnitude of the conservation needs associated with agricultural production in each State based on natural resource factors that consider national, regional, and State-level priority ecosystem areas,

(ii) The degree to which implementation of the program in the State is, or will be, effective in helping producers address those needs, and

(iii) Other considerations determined by the Chief to achieve equitable geographic distribution of program participation.

(b) The State Conservationist will allocate acres to ranking pools, to the extent practicable, based on the same factors the Chief considers in making allocations to States.

(c) Of the acres made available for each of fiscal years 2009 through 2012 to carry out CSP, NRCS will use, as a minimum:

(1) Five percent to assist beginning farmers or ranchers, and

7 CFR Ch. XIV (1-1-11 Edition)

(2) Five percent to assist socially disadvantaged farmers or ranchers.

(d) In any fiscal year, allocated acres that are not enrolled by a date determined by NRCS may be reallocated with associated funds for use in that fiscal year under CSP. As part of the reallocation process, NRCS will consider several factors, including demand from applicants, national and regional conservation priorities, and prior-year CSP performance in States.

(e) Of the CSP funds and acres made available for each fiscal year:

(1) The Chief will reserve 6 percent of funds and acres to ensure an adequate source of funds and acres for the CCPI. Of the funds and acres reserved, the Chief will allocate:

(i) Ninety percent to projects based on the direction of State Conservationists, with the advice of State Technical Committees; and

(ii) Ten percent to projects based on a national competitive process established by the Chief. In determining funding allocation decisions for these projects, NRCS will consider the extent to which they address national and regional conservation priorities.

(2) Any funds and acres reserved for the CCPI in a fiscal year that are not obligated by April 1 of that fiscal year may be used to carry out other CSP activities during the remainder of that fiscal year.

§ 1470.5 Outreach activities.

(a) NRCS will establish program outreach activities at the national, State, and local levels to ensure that potential applicants who control eligible land are aware and informed that they may be eligible to apply for program assistance.

(b) Special outreach will be made to eligible producers with historically low participation rates, including but not restricted to, beginning farmers or ranchers, limited resource farmers or ranchers, and socially disadvantaged farmers or ranchers.

(c) NRCS will ensure that outreach is provided so as not to limit producer participation because of size or type of operation or production system, including specialty crop and organic production.
