RHS, RBS, RUS, FSA, USDA

Pl. 1940, Subpt. G, Exh. H

(1) A detailed description of the action and its location;
(2) A description of the affected environment within the System and the impacts of the proposed action;
(3) The applicable exception criteria and FmHA or its successor agency under Public Law 103-354’s reasons for believing they apply to this action; and
(4) If a Section 6(a)(6) exception is claimed, FmHA or its successor agency under Public Law 103-354’s reasons for believing the action to be consistent with the purposes of the Act.

Should the Secretary concur in the exception criteria being met, that portion of the environmental assessment relating to compliance with the Act shall be completed and the corresponding documentation attached. Should the Secretary not concur, a final decision on the approval or denial of the action must be made by the Administrator.

EXHIBIT H TO SUBPART G OF PART 1940

(RESERVED)

EXHIBIT G TO SUBPART G OF PART 1940—
ENVIRONMENTAL ASSESSMENT FOR
CLASS II ACTIONS

In completing this assessment, it is important to understand the comprehensive nature of the impacts which must be analyzed. Consideration must be given to all potential impacts associated with the construction of the project, its operation and maintenance, the operation of all identified primary beneficiaries, and the attainment of the project’s major objectives, whether they be an increased housing stock, community improvement, economic development, or greater agricultural productivity. This last category, the attainment of the project’s major objectives, often induces or supports changes in population densities, land uses, community services, transportation systems and resource consumption. The scope of the assessment is broadened even further when there are related activities involved. The impacts of these activities must also be assessed.

The preparer will consult as indicated in §1940.318(b) of this subpart with appropriate experts from Federal, State, and local agencies, universities, and other organizations or groups whose views could be helpful in the assessment of potential impacts. In so doing, each discussion which is utilized in reaching a conclusion with respect to the degree of an impact will be summarized in the assessment and each environmental factor (i.e., water quality) must be taken to the point that a conclusion can be reached and supported concerning the degree of the expected impact with respect to that factor.

For example, a small community center may not require detailed information on air emissions or solid waste management, but an industrial facility would. Similarly, an irrigation project for a farming operation would concentrate on such factors as water quality and fish and wildlife, rather than land use changes. The extension of a water or sewer system or the approval of a subdivision, on the other hand, would have to give close attention to all factors, with potential land use changes being a particularly important one.

I. PROJECT DESCRIPTION AND NEED

Identify the name, project number, location, and specific elements of the project along with their sizes, and, when applicable, their design capacities. Indicate the purpose of the project, FmHA or its successor agency under Public Law 103-354’s position regarding the need for it, and the extent or area of land to be considered as the project site.

II. PRIMARY BENEFICIARIES AND RELATED ACTIVITIES

Identify any existing businesses or major developments that will benefit from the project and those which will expand or locate in the area because of the project. Specify by name, product, service, and operations involved.
