

the boat used for the transportation of the products or materials covered by this part, and from the portable chutes or other appliances, fixtures or areas used in loading and unloading same, and destroy the litter and other refuse by burning or by other approved methods, and saturate the entire surface of the said decks, compartments, and other parts of the boat with a permitted disinfectant approved for use in this part.

(3) Buildings, sheds, and premises required by this part to be disinfected shall be treated in the following manner: Collect all litter and other refuse therefrom and destroy the same by burning or other approved methods, and saturate the entire surface of the fencing, chutes, floors, walls, and other parts with a permitted disinfectant approved for use in this part.

(c) *Permitted disinfectants.* The disinfectants permitted for use in disinfecting railroad cars, trucks, boats, aircraft and other means of conveyance, equipment or containers, yards, and premises against infection of foot-and-mouth disease and rinderpest are freshly prepared solutions of:

(1) Sodium carbonate (4 percent) in the proportion of 1 pound to 3 gallons of water.

(2) Sodium carbonate (4 percent) plus sodium silicate (0.1 percent) in the proportion of 1 pound of sodium carbonate plus sodium silicate to 3 gallons of water.

(3) Sodium hydroxide (Lye) prepared in a fresh solution in the proportion of not less than 1 pound avoirdupois of sodium hydroxide of not less than 95 percent purity to 6 gallons of water, or one 13½-ounce can to 5 gallons of water.⁵

(d) *Permitted disinfectants against ticks.* The disinfectants permitted for use against tick infestation are liquefied phenol (U. S. P. strength 87 percent phenol) in the proportion of at least 6 fluid ounces to one gallon of

water; or chlorinated lime (U. S. P. strength 30 percent available chlorine) in the proportion of one pound to three gallons of water; or any one of the cresylic disinfectants permitted by the Animal and Plant Health Inspection Service in the proportion of at least four fluid ounces to one gallon of water; or through application of boiling water if the treatment is against rinder-pest or foot-and-mouth disease and tick infestation; or other disinfectants or treatments approved by the Deputy Administrator, Veterinary Services.

[28 FR 5981, June 13, 1963, as amended at 32 FR 19157, Dec. 20, 1967; 74 FR 66226, Dec. 15, 2009]

§ 95.27 Regulations applicable to products from Territorial possessions.

The regulations in this part shall be applicable to all the products and materials specified in this part which are offered for entry into the United States from any place under the jurisdiction of the United States to which the animal-quarantine laws of this country do not apply.

§ 95.28 Hay or straw and similar material from tick-infested areas.

Hay or straw, grass, or similar material from tick-infested pastures, ranges, or premises may disseminate the contagion of splenetic, Southern or Texas fever when imported for animal feed or bedding; therefore, such hay or straw, grass, or similar materials shall not be imported unless such material is first disinfected with a disinfectant specified in § 95.26(d).

§ 95.29 Certification for certain materials.

(a) In addition to meeting any other certification or permit requirements of this chapter, the following articles may be imported into the United States from any region not listed in § 94.18(a) only if they are accompanied by a certificate, as described in paragraph (b) of this section:

(1) Processed animal protein, tankage, offal, and tallow other than tallow derivatives, unless, in the opinion of the Administrator, the tallow cannot

⁵Due to the extreme caustic nature of sodium hydroxide solution, precautionary measures such as the wearing of rubber gloves, boots, raincoat and goggles should be observed. An acid solution such as vinegar shall be kept readily available in case any of the sodium hydroxide solution should come in contact with the body.

§ 95.30

9 CFR Ch. I (1–1–11 Edition)

be used in feed, regardless of the animal species from which the material is derived;

(2) Glands and unprocessed fat tissue derived from ruminants;

(3) Processed fats and oils, and derivatives of processed animal protein, tankage, and offal, regardless of the animal species from which the material is derived;

(4) Derivatives of glands from ruminants; and

(5) Any product containing any of the materials listed in paragraphs (a)(1) through (a)(4) of this section.

(b) The certificate required by paragraph (a) of this section must be an original official certificate, signed by a full-time, salaried veterinarian of the agency responsible for animal health in the exporting region, that states the following:

(1) The animal species from which the material was derived;

(2) The region in which any facility where the material was processed is located;

(3) That the material was derived only from animals that have never been in any region listed in § 94.18(a) of this chapter, with the regions listed in § 94.18(a) specifically named;

(4) That the material did not originate in, and was never stored in, rendered or processed in, or otherwise associated with a facility in a region listed in § 94.18(a); and

(5) The material was never associated with any of the materials listed in paragraph (a) of this section that have been in a region listed in § 94.18(a).

(c) The certification required by paragraph (a) of this section must clearly correspond to the shipment by means of an invoice number, shipping marks, lot number, or other method of identification.

§ 95.30 Restrictions on entry of products and byproducts of poultry, game birds, or other birds from regions where highly pathogenic avian influenza (HPAI) subtype H5N1 exists.

(a) Products or byproducts, including feathers, birds' nests, and bird tro-

phies, of poultry, game birds, or other birds may be imported from a region listed in § 94.6(d) of this subchapter as a region where HPAI subtype H5N1 exists only if the Administrator has determined that the importation can be made under conditions that will prevent the introduction of HPAI subtype H5N1 into the United States. The articles must be accompanied by a permit obtained from APHIS prior to the importation in accordance with paragraph (b) of this section, and they must be moved and handled as specified on the permit to prevent the introduction of HPAI subtype H5N1 into the United States.

(b) To apply for a permit, contact the Animal and Plant Health Inspection Service, Veterinary Services, National Center for Import and Export, 4700 River Road Unit 38, Riverdale, Maryland 20737–1231.

PART 96—RESTRICTION OF IMPORTATIONS OF FOREIGN ANIMAL CASINGS OFFERED FOR ENTRY INTO THE UNITED STATES

Sec.

96.1 Definitions.

96.2 Prohibition of casings due to African swine fever and bovine spongiform encephalopathy.

96.3 Certificate for animal casings.

96.4 Uncertified animal casings; disposition.

96.5 Instructions regarding handling certified animal casings.

96.6 Certified foreign animal casings arriving at seaboard or border port.

96.7 Dried bladders, weasands, and casings.

96.8 Uncertified casings; disinfection at seaboard port.

96.9 Casings admitted on disinfection; sealing; transfer and disinfection.

96.10 Uncertified casings; transportation for disinfection; original shipping containers; disposition of salt.

96.11 Disinfecting plant and equipment for uncertified casings.

96.12 Uncertified casings not disinfected in 30 days; disposition.

96.13 Uncertified casings; disinfection with hydrochloric acid.

96.14 Uncertified casings; disinfection with saturated brine solution.

AUTHORITY: 7 U.S.C. 8301–8317; 21 U.S.C. 136 and 136a; 7 CFR 2.22, 2.80, and 371.4.
