Food Safety and Inspection Service, USDA

§ 309.7 Livestock affected with anthrax; cleaning and disinfection of infected livestock pens and drive-ways.

(a) Any livestock found on ante-mortem inspection to be affected with anthrax shall be identified as U.S. Suspect for hog cholera, shall, as far as possible, be slaughtered separately and apart from all other livestock passed on ante-mortem inspection.

(b) No other livestock of a lot in which anthrax is found on ante-mortem inspection shall be slaughtered and presented for post-mortem inspection until it has been determined by a
