

prior to the date the filing is expected to become effective, the financial statements shall be updated with a balance sheet or statement of assets and liabilities as of an interim date within 245 days. In addition, the statements of operations, cash flows, and changes in net assets shall be provided for the interim period between the end of the most recent fiscal year for which a balance sheet or statement of assets and liabilities is presented and the date of the most recent interim balance sheet or statement of assets and liabilities filed.

(d) Interim financial statements provided in accordance with these requirements may be unaudited but shall be presented in the same detail as required by §§210.6-01 to 210.6-10. When unaudited financial statements are presented in a registration statement, they shall include the statement required by §210.3-03(d).

[46 FR 36125, July 14, 1981; 46 FR 46795, Sept. 22, 1981, as amended at 47 FR 29837, July 9, 1982; 47 FR 56838, Dec. 21, 1982; 57 FR 45292, Oct. 1, 1992; 76 FR 71875, Nov. 21, 2011]

§ 210.3-19 [Reserved]

§ 210.3-20 Currency for financial statements of foreign private issuers.

(a) A foreign private issuer, as defined in §230.405 of this chapter, shall state amounts in its primary financial statements in the currency which it deems appropriate.

(b) The currency in which amounts in the financial statements are stated shall be disclosed prominently on the face of the financial statements. If dividends on publicly-held equity securities will be declared in a currency other than the reporting currency, a note to the financial statements shall identify that currency. If there are material exchange restrictions or controls relating to the issuer's reporting currency, the currency of the issuer's domicile, or the currency in which the issuer will pay dividends, prominent disclosure of this fact shall be made in the financial statements. If the reporting currency is not the U.S. dollar, dollar-equivalent financial statements or convenience translations shall not be presented, except a translation may be presented of the most recent fiscal year

and any subsequent interim period presented using the exchange rate as of the most recent balance sheet included in the filing, except that a rate as of the most recent practicable date shall be used if materially different.

(c) If the financial statements of a foreign private issuer are stated in a currency of a country that has experienced cumulative inflationary effects exceeding a total of 100 percent over the most recent three year period, and have not been recast or otherwise supplemented to include information on a historical cost/constant currency or current cost basis prescribed or permitted by appropriate authoritative standards, the issuer shall present supplementary information to quantify the effects of changing prices upon its financial position and results of operations.

(d) Notwithstanding the currency selected for reporting purposes, the issuer shall measure separately its own transactions, and those of each of its material operations (e.g., branches, divisions, subsidiaries, joint ventures, and similar entities) that is included in the issuer's consolidated financial statements and not located in a hyperinflationary environment, using the particular currency of the primary economic environment in which the issuer or the operation conducts its business. Assets and liabilities so determined shall be translated into the reporting currency at the exchange rate at the balance sheet date; all revenues, expenses, gains, and losses shall be translated at the exchange rate existing at the time of the transaction or, if appropriate, a weighted average of the exchange rates during the period; and all translation effects of exchange rate changes shall be included as a separate component ("cumulative translation adjustment") of shareholder's equity. For purposes of this paragraph, the currency of an operation's primary economic environment is normally the currency in which cash is primarily generated and expended; a hyperinflationary environment is one that has cumulative inflation of approximately 100% or more over the most recent three year period. Departures from the methodology presented in this paragraph shall be quantified
