§ 10.1016 Value of materials.

(a) Calculating the value of materials. Except as provided in §10.1024 of this subpart, for purposes of calculating the regional value content of a good under General Note 33 HTSUS, and for purposes of applying the de minimis (see §10.1018 of this subpart) provisions of General Note 33, HTSUS, the value of a material is:

(1) In the case of a material imported by the producer, the adjusted value of the material;

(2) In the case of a material acquired by the producer in the territory where the good is produced, the value determined in accordance with Articles 1 through 8, Article 15, and the corresponding interpretative notes of the Customs Valuation Agreement, of the material, i.e., in the same manner as for imported goods, with reasonable modifications to the provisions of the Customs Valuation Agreement as may be required due to the absence of an importation by the producer (including, but not limited to, treating a domestic purchase by the producer as if it were a sale for export to the country of importation); or

(3) In the case of a self-produced material, the sum of:

(i) All the costs incurred in the production of the material, including general expenses; and

(ii) An amount for profit equivalent to the profit added in the normal course of trade.

(b) Examples. The following examples illustrate application of the principles set forth in paragraph (a)(2) of this section:

Example 1. A producer in Korea purchases material x from an unrelated seller in Korea for $100. Under the provisions of Article 1 of the Customs Valuation Agreement, transaction value is the price actually paid or payable for the goods when sold for export to the country of importation adjusted in accordance with the provisions of Article 8. In order to apply Article 1 to this domestic purchase by the producer, such purchase is treated as if it were a sale for export to the country of importation. Therefore, for purposes of determining the adjusted value of material x, Article 1 transaction value is the price actually paid or payable for the goods when sold to the producer in Korea ($100), adjusted in accordance with the provisions of Article 8. In this example, it is irrelevant whether material x was initially imported into Korea by the seller (or by anyone else). So long as the producer acquired material x in Korea, it is intended that the value of material x will be determined on the basis of the price actually paid or payable by the producer adjusted in accordance with the provisions of Article 8.

Example 2. Same facts as in Example 1, except that the sale between the seller and the producer is subject to certain restrictions that preclude the application of Article 1. Under Article 2 of the Customs Valuation Agreement, the value is the transaction value of identical goods sold for export to the same country of importation and exported at or about the same time as the goods being valued. In order to permit the application of Article 2 to the domestic acquisition by the producer, it should be modified so that the value is the transaction value of identical goods sold within Korea at or about the same time the goods were sold to the producer in Korea. Thus, if the seller of material x also sold an identical material to another buyer in Korea without restrictions, that other sale would be used to determine the adjusted value of material x.

(c) Permissible additions to, and deductions from, the value of materials. (1) Additions to originating materials. For originating materials, the following expenses, if not included under paragraph (a) of this section, may be added to the value of the originating material:

(i) The costs of freight ("cost of freight") includes the costs of all types of freight, including in-land freight incurred within a Party's territory, regardless of the mode of transportation, insurance, packing, and all other costs incurred in transporting the material within a Party's territory or between the Parties to the location of the producer;

(ii) Duties, taxes, and customs brokerage fees on the material paid in the territory of one or both of the Parties, other than duties and taxes that are waived, refunded, refundable, or otherwise recoverable, including credit against duty or tax paid or payable; and

(iii) The cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or byproducts.

(2) Deductions from non-originating materials. For non-originating materials, if included under paragraph (a) of this section, the following expenses may be
deducted from the value of the non-originating material:

(i) The costs of freight ("cost of freight") includes the costs of all types of freight, including in-land freight incurred within a Party’s territory, regardless of the mode of transportation, insurance, packing, and all other costs incurred in transporting the material within a Party’s territory or between the territories of the Parties to the location of the producer;

(ii) Duties, taxes, and customs brokerage fees on the material paid in the territory of one or both of the Parties, other than duties and taxes that are waived, refunded, refundable, or otherwise recoverable, including credit against duty or tax paid or payable;

(iii) The cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-products;

(iv) The cost of originating materials used in the production of the non-originating material in the territory of a Party.

(d) Accounting method. Any cost or value referenced in General Note 33, HTSUS, and this subpart, must be recorded and maintained in accordance with the Generally Accepted Accounting Principles applicable in the territory of the Party in which the good is produced.

§10.1017 Accumulation.

(a) Originating goods or materials from the territory of one Party, incorporated into a good in the territory of the other Party will be considered to originate in the territory of that other Party.

(b) A good that is produced in the territory of one or both of the Parties by one or more producers is an originating good if the good satisfies the requirements of §10.1014 of this subpart and all other applicable requirements of General Note 33, HTSUS.

§10.1018 De minimis.

(a) General. Except as provided in paragraphs (b) and (c) of this section, a good that does not undergo a change in tariff classification pursuant to General Note 33, HTSUS, is an originating good if:

(1) The value of all non-originating materials used in the production of the good that do not undergo the applicable change in tariff classification does not exceed 10 percent of the adjusted value of the good;

(2) The value of the non-originating materials described in paragraph (a)(1) of this section is included in the value of non-originating materials for any applicable regional value content requirement for the good under General Note 33, HTSUS; and

(3) The good meets all other applicable requirements of General Note 33, HTSUS.

(b) Exceptions. Paragraph (a) of this section does not apply to:

(1) A non-originating material provided for in Chapter 3, HTSUS, that is used in the production of a good classified in that Chapter;

(2) A non-originating material provided for in Chapter 4, HTSUS, or a non-originating dairy preparation containing over 10 percent by weight of milk solids classified under subheadings 1901.90 or 2106.90, HTSUS, that is used in the production of a good provided for in Chapter 4, HTSUS;

(3) A non-originating material provided for in Chapter 4, HTSUS, or a non-originating dairy preparation containing over 10 percent by weight of milk solids provided for in subheading 1901.90, HTSUS, which is used in the production of the following goods:

(i) Infant preparations containing over 10 percent by weight of milk solids provided for in subheading 1901.10, HTSUS;

(ii) Mixes and doughs, containing over 25 percent by weight of butterfat, not put up for retail sale, provided for in subheading 1901.20, HTSUS;

(iii) Dairy preparations containing over 10 percent by weight of milk solids provided for in subheading 1901.90 or 2106.90, HTSUS;

(4) Goods provided for in heading 2105, HTSUS;

(5) Beverages containing milk provided for in subheading 2202.90, HTSUS; or

(vi) Animal feeds containing over 10 percent by weight of milk solids provided for in subheading 2309.90, HTSUS; and

(4) A non-originating material provided for in Chapter 7, HTSUS that is
