

§ 100.204 Reasonable accommodations.

(a) It shall be unlawful for any person to refuse to make reasonable accommodations in rules, policies, practices, or services, when such accommodations may be necessary to afford a handicapped person equal opportunity to use and enjoy a dwelling unit, including public and common use areas.

(b) The application of this section may be illustrated by the following examples:

Example (1): A blind applicant for rental housing wants live in a dwelling unit with a seeing eye dog. The building has a *no pets* policy. It is a violation of § 100.204 for the owner or manager of the apartment complex to refuse to permit the applicant to live in the apartment with a seeing eye dog because, without the seeing eye dog, the blind person will not have an equal opportunity to use and enjoy a dwelling.

Example (2): Progress Gardens is a 300 unit apartment complex with 450 parking spaces which are available to tenants and guests of Progress Gardens on a *first come first served* basis. John applies for housing in Progress Gardens. John is mobility impaired and is unable to walk more than a short distance and therefore requests that a parking space near his unit be reserved for him so he will not have to walk very far to get to his apartment. It is a violation of § 100.204 for the owner or manager of Progress Gardens to refuse to make this accommodation. Without a reserved space, John might be unable to live in Progress Gardens at all or, when he has to park in a space far from his unit, might have great difficulty getting from his car to his apartment unit. The accommodation therefore is necessary to afford John an equal opportunity to use and enjoy a dwelling. The accommodation is reasonable because it is feasible and practical under the circumstances.

§ 100.205 Design and construction requirements.

(a) Covered multifamily dwellings for first occupancy after March 13, 1991 shall be designed and constructed to have at least one building entrance on an accessible route unless it is impractical to do so because of the terrain or unusual characteristics of the site. For purposes of this section, a covered multifamily dwelling shall be deemed to be designed and constructed for first occupancy on or before March 13, 1991, if the dwelling is occupied by that date, or if the last building permit or renewal thereof for the dwelling is issued by a

State, County or local government on or before June 15, 1990. The burden of establishing impracticality because of terrain or unusual site characteristics is on the person or persons who designed or constructed the housing facility.

(b) The application of paragraph (a) of this section may be illustrated by the following examples:

Example (1): A real estate developer plans to construct six covered multifamily dwelling units on a site with a hilly terrain. Because of the terrain, it will be necessary to climb a long and steep stairway in order to enter the dwellings. Since there is no practical way to provide an accessible route to any of the dwellings, one need not be provided.

Example (2): A real estate developer plans to construct a building consisting of 10 units of multifamily housing on a waterfront site that floods frequently. Because of this unusual characteristic of the site, the builder plans to construct the building on stilts. It is customary for housing in the geographic area where the site is located to be built on stilts. The housing may lawfully be constructed on the proposed site on stilts even though this means that there will be no practical way to provide an accessible route to the building entrance.

Example (3): A real estate developer plans to construct a multifamily housing facility on a particular site. The developer would like the facility to be built on the site to contain as many units as possible. Because of the configuration and terrain of the site, it is possible to construct a building with 105 units on the site provided the site does not have an accessible route leading to the building entrance. It is also possible to construct a building on the site with an accessible route leading to the building entrance. However, such a building would have no more than 100 dwelling units. The building to be constructed on the site must have a building entrance on an accessible route because it is not impractical to provide such an entrance because of the terrain or unusual characteristics of the site.

(c) All covered multifamily dwellings for first occupancy after March 13, 1991 with a building entrance on an accessible route shall be designed and constructed in such a manner that—

(1) The public and common use areas are readily accessible to and usable by handicapped persons;

(2) All the doors designed to allow passage into and within all premises are sufficiently wide to allow passage
