itself is for identification purposes only, and therefore carries no lateral significance.

(b) Racons are also used as bridge marks to mark the best point of passage.

§ 62.54 Ownership identification.
Ownership identification on private or state aids to navigation is permitted so long as it does not change or hinder an understanding of the meaning of the aid to navigation.

[CGD 97–018, 63 FR 33573, June 19, 1998]

Subpart C [Reserved]

Subpart D—Public Participation in the Aids to Navigation System

§ 62.63 Recommendations.
(a) The public may recommend changes to existing aids to navigation, request new aids or the discontinuation of existing aids, and report aids no longer necessary for maritime safety. These recommendations should be sent to the appropriate District Commander.

(b) Recommendations, requests and reports should be documented with as much information as possible to justify the proposed action. Desirable information includes:

1. Nature of the vessels which transit the area(s) in the question, including type, displacement, draft, and number of passengers and crew.

2. Where practicable, the kinds of navigating devices used aboard such vessels (e.g., magnetic or gyro compasses, radio direction finders, radar, loran, and searchlights).

3. A chartlet or sketch describing the actual or proposed location of the aid(s), and a description of the action requested or recommended.

§ 62.65 Procedure for reporting defects and discrepancies.
(a) Mariners should notify the nearest Coast Guard facility immediately of any observed aids to navigation defects or discrepancies.

(b) The Coast Guard cannot monitor the many thousands of aids in the U.S. Aids to Navigation System simultaneously and continuously. As a result, it is not possible to maintain every aid operating properly and on its charted position at all times. Marine safety will be enhanced if persons finding aids missing, sunk, capsized, damaged, off station, or showing characteristics other than those advertised in the Light List, or other publication, promptly inform the Coast Guard. When making the report to the Coast Guard the mariner should consult the Light List to ensure the correct geographical information is used due to the similarity of names and geographical areas.

(c) Procedures for reporting defects and discrepancies:

1. Radio messages should be prefixed “Coast Guard” and transmitted directly to a Government shore radio station listed in Chapter three of Radio Navigation Aids Publication, 117, for relay to the relevant District Commander.

2. Telephone, e-mail, or facsimile messages may also be used to advise the nearest Coast Guard unit of defects or discrepancies in aids to navigation.
