evidence to the Regional Administrator (or to the State, if the State has the authority to issue NPDES permits) that factors relating to the equipment of facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information, the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator or the State shall establish for the discharger effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protection Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

(a) The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this paragraph, which may be discharged from a photographic processing point source subject to the provisions of this paragraph after application of the best practicable control technology currently available:

<table>
<thead>
<tr>
<th>Effluent characteristic</th>
<th>Metric units (kilograms per 1,000 m² of product)</th>
<th>English units (pounds per 1,000 ft² of product)</th>

</table>

1 Within the range 6.0 to 9.0.

Subpart A—Hospital Category

§ 460.10 Applicability; description of the hospital category.

The provisions of this subpart are applicable to discharges resulting from the functional operations of the hospital point source category.

§ 460.11 Specialized definitions.

For the purpose of this subpart:

(a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in part 401 of this chapter shall apply to this subpart.

(b) The term “product” shall mean service resulting from the hospital activity in terms of 1,000 occupied beds.

§ 460.12 Effluent limitations and guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

Except as provided in §§125.30 through 125.32, any existing point source subject to this subpart, shall achieve the following effluent limitations representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available (BPT):
Environmental Protection Agency

(a) The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this paragraph, which may be discharged from the hospital point source subject to the provisions of this paragraph after application of the best practicable control technology currently available:

<table>

Subpart B [Reserved]

PART 461—BATTERY MANUFACTURING POINT SOURCE CATEGORY

GENERAL PROVISIONS

Sec.
461.1 Applicability.
461.2 General definitions.
461.3 Monitoring and reporting requirements.
461.4 Compliance date for PSES.

Subpart A—Cadmium Subcategory

461.10 Applicability; description of the cadmium subcategory.
461.11 Effluent limitations representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available (BPT).
461.12 Effluent limitations representing the degree of effluent reduction attainable by the application of the best available technology economically achievable (BAT).
461.14 Pretreatment standards for existing sources (PSES).
461.15 Pretreatment standards for new sources (PSNS).

Subpart B—Calcium Subcategory

461.20 Applicability; description of the calcium subcategory.
461.21–461.22 [Reserved]
461.23 New source performance standards (NSPS).
461.24 [Reserved]
461.25 Pretreatment standards for new sources (PSNS).

Subpart C—Lead Subcategory

461.30 Applicability; description of the lead subcategory.
461.31 Effluent limitations representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available (BPT).
461.32 Effluent limitations representing the degree of effluent reduction attainable by the application of the best available technology economically achievable (BAT).
461.33 New source performance standards (NSPS).
461.34 Pretreatment standards for existing sources (PSES).
461.35 Pretreatment standards for new sources (PSNS).

Subpart D—Leclanche Subcategory

461.40 Applicability; description of the Leclanche subcategory.
461.41–461.42 [Reserved]
461.43 New source performance standards (NSPS).
461.44 Pretreatment standards for existing sources (PSES).
461.45 Pretreatment standards for new sources (PSNS).

Subpart E—Lithium Subcategory

461.50 Applicability; description of the lithium subcategory.
461.51–461.52 [Reserved]
461.53 New source performance standards (NSPS).
461.54 [Reserved]
461.55 Pretreatment standards for new sources (PSNS).

Subpart F—Magnesium Subcategory

461.60 Applicability; description of the magnesium subcategory.
461.61–461.62 [Reserved]
461.63 New source performance standards (NSPS).
