

§ 66.206

42 CFR Ch. I (10–1–12 Edition)

(1) For any award made for an individual's initial twelve months of NRSA postdoctoral research training, the individual has assured the Secretary, in the form and manner the Secretary may prescribe, that he or she will satisfy the requirements of § 66.110 of subpart A of this part;

(2) The individual is a citizen or non-citizen national of the United States or has been lawfully admitted to the United States for permanent residence at the time of the award;

(3) The Award includes a provision for termination in the event the recipient is found by the institution to have materially failed to comply with the terms and conditions of the Award or to carry out the purpose for which it was made; and

(4) The Award is not to be used to support a residency.

(b) No Award shall be made to an individual under such grant which would provide that individual with aggregate support in excess of five years for predoctoral training and three years for postdoctoral training, unless the Secretary for good cause shown as provided in § 66.106(e) of subpart A of this part, waives the application of the limitation with respect to that individual;

(c) The provisions of §§ 66.110 and 66.111 of subpart A of this part constitute terms and conditions of any Award made from a grant under this subpart.

(Approved by the Office of Management and Budget under control number 0925–0022)

[48 FR 24880, June 3, 1983; 48 FR 33710, July 25, 1983, as amended at 66 FR 29501, May 31, 2001]

§ 66.206 Grant awards.

(a) Within the limits of funds available, the Secretary shall award grants to those applicants:

(1) Whose applications have been reviewed and recommended for approval by the appropriate national advisory council or board;

(2) Who have satisfied the requirements of § 66.105; and

(3) Whose proposed programs would, in the judgment of the Secretary, best promote the purposes of section 487(a)(1)(B) of the Act, taking into consideration among other pertinent factors:

(i) The scientific, technical, or educational merit of the proposed program;

(ii) The adequacy of the resources and facilities available to the applicant;

(iii) The qualifications and experience of the program director and principal staff members;

(iv) The degree of the need for personnel in the subject area or areas of the proposed research or training;

(v) The extent to which the applicant, in making Awards, gives special consideration to physicians who agree to undertake a minimum of two years of biomedical research;

(vi) The administrative and management capability of the applicant;

(vii) The reasonableness of the proposed budget in relation to the proposed program; and

(viii) The adequacy of the methods for monitoring and evaluating the performance of individual recipients and the overall program.

(b) The notice of grant award specifies how long HHS intends to support the project without requiring the project to re compete for funds. This period, called the project period, will usually be for 3–5 years.

(c) Generally the grant will initially be for one year and subsequent continuation awards will also be for one year at a time. A grantee must submit a separate application to have the support continued for each subsequent year. Decisions regarding continuation awards and the funding level of such awards will be made after consideration of such factors as the grantee's progress and management practices, and the availability of funds. In all cases, continuation awards require a determination by HHS that continued funding is in the best interest of the government.

(d) Neither the approval of any application nor the award of any grant commits or obligates the United States in any way to make any additional, supplemental, continuation, or other award with respect to any approved application or portion of any approved application.
