

§612.9

(1) A statement of the reason(s) why the submitter's disclosure objections were not sustained;

(2) A description of the business information to be disclosed; and

(3) A specified disclosure date, which will be a reasonable time subsequent to the notice.

(h) *Exceptions to notice requirements.* The notice requirements of paragraphs (d) and (g) of this section will not apply if:

(1) The Foundation determines that the information should not be disclosed (the Foundation protects from disclosure to third parties information about specific unfunded applications, including pending, withdrawn, or declined proposals);

(2) The information lawfully has been published or has been officially made available to the public;

(3) Disclosure of the information is required by statute (other than the FOIA) or by a regulation issued in accordance with the requirements of Executive Order 12600 (3 CFR, 1988 Comp., p. 235); or

(4) The designation made by the submitter under paragraph (c) of this section appears obviously frivolous, in which case the Foundation will, within a reasonable time prior to a specified disclosure date, give the submitter written notice of any final decision to disclose the information.

(i) *Notice of FOIA lawsuit.* Whenever a requester files a lawsuit seeking to compel the disclosure of business information, the Foundation will promptly notify the submitter(s). Whenever a submitter files a lawsuit seeking to prevent the disclosure of business information, the Foundation will notify the requester(s).

§612.9 Appeals.

(a) *Appeals of denials.* You may appeal a denial of your request to the General Counsel, National Science Foundation, 4201 Wilson Boulevard, Suite 1265, Arlington, VA 22230. You must make your appeal in writing and it must be received by the Office of the General Counsel within ten days of the receipt of the denial (weekends, legal holidays, and the date of receipt excluded). Clearly mark your appeal letter and the envelope "Freedom of Information

45 CFR Ch. VI (10-1-12 Edition)

Act Appeal." Your appeal letter must include a copy of your written request and the denial together with any written argument you wish to submit.

(b) *Responses to appeals.* A written decision on your appeal will be made by the General Counsel. A decision affirming an adverse determination in whole or in part will contain a statement of the reason(s) for the affirmation, including any FOIA exemption(s) applied, and will inform you of the FOIA provisions for court review of the decision. If the adverse determination is reversed or modified on appeal, in whole or in part, you will be notified in a written decision and your request will be reprocessed in accordance with that appeal decision.

(c) *When appeal is required.* If you wish to seek review by a court of any denial, you must first appeal it under this section.

§612.10 Fees.

(a) *In general.* NSF will charge for processing requests under the FOIA in accordance with paragraph (c) of this section, except where fees are limited under paragraph (d) of this section or where a waiver or reduction of fees is granted under paragraph (k) of this section. If fees are applicable, NSF will itemize the amounts charged. NSF may collect all applicable fees before sending copies of requested records to a requester. Requesters must pay fees by check or money order made payable to the Treasury of the United States.

(b) *Definitions.* For purposes of this section:

(1) *Commercial use request* means a request from or on behalf of a person who seeks information for a use or purpose that furthers his or her commercial, trade, or profit interests, which can include furthering those interests through litigation. When it appears that the requester will put the records to a commercial use, either because of the nature of the request itself or because NSF has reasonable cause to doubt a requester's stated use, NSF will provide the requester a reasonable opportunity to submit further clarification.

(2) *Direct costs* means those expenses that an agency actually incurs in searching for and duplicating (and, in

National Science Foundation

§ 612.10

the case of commercial use requests, reviewing) records to respond to a FOIA request. Direct costs include, for example, the salary of the employee performing the work (the basic rate of pay for the employee, plus 16 percent of that rate to cover benefits) and the cost of operating duplication machinery. Not included in direct costs are overhead expenses such as the costs of space and heating or lighting of the facility in which the records are kept.

(3) *Duplication* means the making of a copy of a record, or of the information contained in it, necessary to respond to a FOIA request. Copies can take the form of paper, microform, audiovisual materials, or electronic records (for example, magnetic tape or disk) among others. NSF will honor a requester's specified preference of form or format of disclosure if the record is readily reproducible by NSF, with reasonable effort, in the requested form or format.

(4) *Educational institution* means a preschool, a public or private elementary or secondary school, an institution of undergraduate higher education, an institution of graduate higher education, an institution of professional education, or an institution of vocational education, that operates a program of scholarly research. To be in this category, a requester must show that the request is authorized by and made under the auspices of a qualifying institution and that the records are not sought for a commercial use, but are sought to further scholarly research.

(5) *Noncommercial scientific institution* means an institution that is not operated on a "commercial" basis, as that term is defined in paragraph (b) (1) of this section, and that is operated solely for the purpose of conducting scientific research, the results of which are not intended to promote any particular product or industry. To be in this category, a requester must show that the request is authorized by and made under the auspices of a qualifying institution and that the records are not sought for a commercial use or to promote any particular product or industry, but are sought to further scientific research.

(6) *Representative of the news media or news media requester* means any person actively gathering news for an entity

that is organized and operated to publish or broadcast news to the public. The term "news" means information that is about current events or that would be of current interest to the public. Examples of news media entities include television or radio stations broadcasting to the public at large and publishers of periodicals (but only in those instances where they can qualify as disseminators of "news") who make their products available for purchase or subscription by the general public. For "freelance" journalists to be regarded as working for a news organization, they must demonstrate a solid basis for expecting publication through that organization. A publication contract would be the clearest proof, but the Agency or the OIG, as appropriate, shall also look to the past publication record of a requester in making this determination. To be in this category, a requester must not be seeking the requested records for a commercial use. However, a request for records supporting the news-dissemination function of the requester shall not be considered to be for a commercial use.

(7) *Review* means the examination of a record located in response to a request in order to determine whether any portion of it is exempt from disclosure. It also includes processing any record for disclosure, for example, doing all that is necessary to redact it and prepare it for disclosure. Review costs are recoverable even if a record ultimately is not disclosed. Review time includes time spent considering any formal objection to disclosure made by a business submitter under § 612.8, but does not include time spent resolving general legal or policy issues regarding the application of exemptions.

(8) *Search* means the process of looking for and retrieving records or information responsive to a request. It includes page by page or line by line identification of information within records and also includes reasonable efforts to locate and retrieve information from records maintained in electronic form or format. NSF will ensure that searches are done in the most efficient and least expensive manner reasonably possible. For example, NSF will not search line by line where duplicating

an entire document would be quicker and less expensive.

(c) *Fees.* In responding to FOIA requests, NSF will charge the following fees unless a waiver or reduction of fees has been granted under paragraph (k) of this section:

(1) *Search.* (i) Search fees will be charged for all requests—other than requests made by educational institutions, noncommercial scientific institutions, or representatives of the news media—subject to the limitations of paragraph (d) of this section. NSF may charge for time spent searching even if responsive records are not located or are withheld entirely as exempt from disclosure.

(ii) *Manual searches for records.* Whenever feasible, NSF will charge at the salary rate(s) (*i.e.*, basic pay plus 16 percent) of the employee(s) conducting the search. Where a homogeneous class of personnel is used exclusively (*e.g.*, all administrative/clerical or all professional/executive), NSF has established an average rate for the range of grades typically involved. Routine search for records by clerical personnel are charged at \$2.50 for each quarter hour. When a non-routine, non-clerical search by professional personnel is conducted (for example, where the task of determining which records fall within a request requires professional time) the charge is \$7.50 for each quarter hour.

(iii) *Computer searches of records.* NSF will charge at the actual direct cost of conducting the search. This will include the cost of computer operations for that portion of operating time that is directly attributable to searching for records responsive to a FOIA request and operator/programmer salary (*i.e.*, basic pay plus 16 percent) apportionable to the search. When NSF can establish a reasonable agency-wide average rate for computer operating costs and operator/programmer salaries involved in FOIA searches, the Foundation will do so and charge accordingly.

(2) *Duplication.* Duplication fees will be charged to all requesters, subject to the limitations of paragraph (d) of this section. For a paper photocopy of a record (no more than one copy of which need be supplied), the fee will be 25 cents per page. For copies produced by computer, such as tapes or printouts,

NSF will charge the direct costs, including operator time, of producing the copy. For other forms of duplication, NSF will charge the direct costs of that duplication.

(3) *Review.* Review fees will be charged to requesters who make a commercial use request. Review fees will be charged only for the initial record review—in other words, the review done when NSF determines whether an exemption applies to a particular record or record portion at the initial request level. NSF may charge for review even if a record ultimately is not disclosed. No charge will be made for review at the administrative appeal level for an exemption already applied. However, records or record portions withheld under an exemption that is subsequently determined not to apply may be reviewed again to determine whether any other exemption not previously considered applies; the costs of that review are chargeable where it is made necessary by a change of circumstances. Review fees will be charged at the salary rate (basic pay plus 16%) of the employee(s) performing the review.

(d) *Limitations on charging fees.* (1) No search fee will be charged for requests by educational institutions, noncommercial scientific institutions, or representatives of the news media.

(2) Except for requesters seeking records for a commercial use, NSF will provide without charge:

(i) The first 100 pages of duplication (or the cost equivalent); and

(ii) The first two hours of search (or the cost equivalent).

(3) Whenever a total fee calculated under paragraph (c) of this section is \$25.00 or less for any request, no fee will be charged.

(4) The provisions of paragraphs (d) (2) and (3) of this section work together. This means that noncommercial requesters will be charged no fees unless the cost of search in excess of two hours plus the cost of duplication in excess of 100 pages totals more than \$25.00. Commercial requesters will not be charged unless the costs of search, review, and duplication total more than \$25.00.

National Science Foundation

§ 612.10

(e) *Notice of anticipated fees in excess of \$25.00.* When NSF determines or estimates that the fees to be charged under this section will exceed \$25.00, it will notify the requester of the actual or estimated amount of the fees, unless the requester has indicated a willingness to pay fees as high as those anticipated. If only a portion of the fee can be estimated readily, NSF will advise the requester that the estimated fee may be only a portion of the total fee. In cases in which a requester has been notified that actual or estimated fees exceed \$25.00, the request will not be considered perfected and further work will not be done until the requester agrees to pay the anticipated total fee. Any such agreement should be memorialized in writing. A notice under this paragraph will offer the requester an opportunity to discuss the matter with Foundation personnel in order to reformulate the request to meet the requester's needs at a lower cost, if possible. If a requester fails to respond within 60 days of notice of actual or estimated fees with an agreement to pay those fees, NSF may administratively close the request.

(f) *Charges for other services.* Apart from the other provisions of this section, when NSF chooses as a matter of administrative discretion to provide a requested special service—such as certifying that records are true copies or sending them by other than ordinary mail—the direct costs of providing the service will be charged to the requester.

(g) *Charging interest.* NSF may charge interest on any unpaid bill starting on the 31st day following the date of billing the requester. Interest charges will be assessed at the rate provided in 31 U.S.C. 3717 and will accrue from the date of the billing until payment is received by NSF. NSF will follow the provisions of the Debt Collection Act of 1982 (Pub. L. 97-365, 96 Stat. 1749), as amended, and its administrative procedures, including the use of consumer reporting agencies, collection agencies, and offset.

(h) *Aggregating requests.* Where NSF reasonably believes that a requester or a group of requesters acting together is attempting to divide a request into a series of requests for the purpose of

avoiding fees, the agency may aggregate those requests and charge accordingly. NSF may presume that multiple requests of this type made within a 30-day period have been made in order to avoid fees. Where requests are separated by a longer period, NSF will aggregate them only where there exists a solid basis for determining that aggregation is warranted under all the circumstances involved. Multiple requests involving unrelated matters will not be aggregated.

(i) *Advance payments.* (1) For requests other than those described in paragraphs (i)(2) and (3) of this section, NSF will not require the requester to make an advance payment—in other words, a payment made before work is begun or continued on a request. Payment owed for work already completed (i.e., a prepayment before copies are sent to a requester) is not an advance payment.

(2) Where NSF determines or estimates that a total fee to be charged under this section will be more than \$250.00, it may require the requester to make an advance payment of an amount up to the amount of the entire anticipated fee before beginning to process the request, except where it receives a satisfactory assurance of full payment from a requester that has a history of prompt payment.

(3) Where a requester has previously failed to pay a properly charged fee to any agency within 30 days of the date of billing, NSF may require the requester to pay the full amount due, plus any applicable interest, and to make an advance payment of the full amount of any anticipated fee, before NSF begins to process a new request or continues to process a pending request from that requester.

(4) In cases in which NSF requires advance payment or payment due under paragraph (i)(2) or (3) of this section, the request will not be considered perfected and further work will not be done on it until the required payment is received.

(j) *Other statutes specifically providing for fees.* The fee schedule of this section does not apply to fees charged under any statute that specifically requires an agency to set and collect fees for particular types of records. Where

§ 612.10

45 CFR Ch. VI (10–1–12 Edition)

records responsive to requests are maintained for distribution by agencies operating such statutorily based fee schedule programs, NSF will inform requesters of the steps for obtaining records from those sources so that they may do so most economically.

(k) *Waiver or reduction of fees.* (1) Records responsive to a request will be furnished without charge or at a charge reduced below that established under paragraph (c) of this section where NSF determines, based on all available information, that disclosure of the requested information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester.

(2) To determine whether the first fee waiver requirement is met, NSF will consider the following factors:

(i) The subject of the request: Whether the subject of the requested records concerns “the operations or activities of the government.” The subject of the requested records must concern identifiable operations or activities of the federal government, with a connection that is direct and clear, not remote or attenuated.

(ii) The informative value of the information to be disclosed: Whether disclosure is “likely to contribute” to an understanding of government operations or activities. The disclosable portions of the requested records must be meaningfully informative about government operations or activities in order to be “likely to contribute” to an increased public understanding of those operations or activities. Disclosure of information already in the public domain, in either duplicative or substantially identical form, is unlikely to contribute to such understanding where nothing new would be added to the public’s understanding.

(iii) The contribution to an understanding of the subject by the public likely to result from disclosure: Whether disclosure of the requested information will contribute to “public understanding.” The disclosure must contribute to the understanding of a reasonably broad audience of persons interested in the subject as opposed to

the individual understanding of the requester. A requester’s expertise in the subject area and ability and intention to effectively convey information to the public will be considered. A representative of the news media as defined in paragraph (b)(6) of this section will normally be presumed to satisfy this consideration.

(iv) The significance of the contribution to public understanding: Whether disclosure is likely to contribute “significantly” to public understanding of government operations or activities. The public’s understanding of the subject in question must be enhanced by the disclosure to a significant extent as compared to the level of public understanding existing prior to the disclosure. NSF will make no value judgments about whether information that would contribute significantly to public understanding of the operations or activities of the government is “important” enough to be made public.

(3) To determine whether the second fee waiver requirement is met, NSF will consider the following factors:

(i) The existence and magnitude of a commercial interest: Whether the requester has a commercial interest that would be furthered by the requested disclosure. NSF will consider any commercial interest of the requester (with reference to the definition of “commercial use” in paragraph (b)(1) of this section), or of any person on whose behalf the requester may be acting, that would be furthered by the requested disclosure. Requesters will be given an opportunity in the administrative process to provide explanatory information regarding this consideration.

(ii) The primary interest in disclosure: Whether any identified commercial interest of the requester is sufficiently large, in comparison with the public interest in disclosure, that disclosure is “primarily in the commercial interest of the requester.” A fee waiver or reduction is justified where the public interest standard is satisfied and that public interest is greater in magnitude than that of any identified commercial interest in disclosure. NSF ordinarily will presume that where a news media requester has satisfied the public interest standard, the public interest will be the interest primarily

National Science Foundation

§ 613.2

served by disclosure to that requester. Disclosure to data brokers or others who merely compile and market government information for direct economic return will not be presumed to primarily serve the public interest.

(4) Where only some of the requested records satisfy the requirements for a waiver of fees, a waiver will be granted for those records.

(5) Requests for the waiver or reduction of fees should address the factors listed in paragraphs (k) (2) and (3) of this section, insofar as they apply to each request.

§ 612.11 Other rights and services.

Nothing in this part will be construed to entitle any person, as of right, to any service or to the disclosure of any record to which such person is not entitled under the FOIA.

PART 613—PRIVACY ACT REGULATIONS

Sec.

613.1 General provisions.

613.2 Requesting access to records.

613.3 Responding to requests for access to records.

613.4 Amendment of records.

613.5 Exemptions.

613.6 Other rights and services.

AUTHORITY: 5 U.S.C. 552a.

SOURCE: 70 FR 43068, July 26, 2005, unless otherwise noted.

§ 613.1 General Provisions.

This part sets forth the National Science Foundation procedures under the Privacy Act of 1974. The rules in this part apply to all records in systems of records maintained by NSF that are retrieved by an individual's name or personal identifier. They describe the procedures by which individuals, as defined in the Privacy Act, may request access to records about themselves and request amendment or correction of those records. All Privacy Act requests for access to records are also processed under the Freedom of Information Act, 5 U.S.C. 552 (as provided in part 612 of this chapter), which gives requesters the benefit of both statutes. Notice of systems of records maintained by the National Science

Foundation are published in the FEDERAL REGISTER.

§ 613.2 Requesting access to records.

(a) *Where to make a request.* You may make a request for access to NSF records about yourself by appearing in person at the National Science Foundation or by making a written request. If you choose to visit the Foundation, you must contact the NSF Security Desk and ask to speak with the Foundation's Privacy Act Officer of the General Counsel. Written requests should be sent to the NSF Privacy Act Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 1265, Arlington, VA 22230. Written requests are recommended, since in many cases it may take several days to determine whether a record exists, and additional time may be required for record(s) retrieval and processing.

(b) *Description of requested records.* You must describe the records that you seek in enough detail to enable NSF personnel to locate the system of records containing them with a reasonable amount of effort. Providing information about the purpose for which the information was collected, applicable time periods, and name or identifying number of each system of records in which you think records about you may be kept, will help speed the processing of your request. NSF publishes notices in the FEDERAL REGISTER that describe the systems of records maintained by the Foundation. The Office of the Federal Register publishes a biennial "Privacy Act compilation" that includes NSF system notices. This compilation is available in many large reference and university libraries, and can be accessed electronically at the Government Printing Office's Web site at www.access.gpo/su_docs/aces/PrivacyAct.shtml.

(c) *Verification of identity.* When requesting access to records about yourself, NSF requires that you verify your identity in an appropriate fashion. Individuals appearing in person should be prepared to show reasonable picture identification such as driver's license, government or other employment identification card, or passport. Written requests must state your full name and
