Coast Guard, DHS

Subpart 39.20—Design and Equipment
39.20–1 Vapor collection system—TB/ALL.
39.20–3 Cargo gauging system—TB/ALL.
39.20–7 Tankship liquid overfill protection—T/ALL.
39.20–9 Tank barge liquid overfill protection—B/ALL.
39.20–11 Vapor overpressure and vacuum protection—TB/ALL.
39.20–13 High and low vapor pressure protection for tankships—T/ALL.

Subpart 39.30—Operations
39.30–1 Operational requirements—TB/ALL.

Subpart 39.40—Lightering and Topping-Off Operations with Vapor Balancing
39.40–1 General requirements for vapor balancing—TB/ALL.
39.40–3 Design and equipment for vapor balancing—TB/ALL.
39.40–5 Operational requirements for vapor balancing—TB/ALL.

Source: CGD 88–102, 55 FR 25446, June 21, 1990, unless otherwise noted.

Subpart 39.10—General
§ 39.10–3 Definitions—TB/ALL.

As used in this part:
Cargo deck area means that part of the weather deck that is directly over the cargo tanks.
Existing vapor collection system means a vapor collection system which was operating prior to July 23, 1990.
Facility vapor connection means the point in a facility’s fixed vapor collection system where it connects with the vapor collection hose or the base of the vapor collection arm.
Independent as applied to two systems means that one system will operate with a failure of any part of the other system except power sources and electrical feeder panels.
Inerted means the oxygen content of the vapor space in a cargo tank is reduced to 8 percent by volume or less in accordance with the inert gas requirements of §32.53 or §153.500 of this chapter.
Lightering or lightering operation means the transfer of a bulk liquid cargo from a tank vessel to a service vessel.
Maximum allowable transfer rate means the maximum volumetric rate at which a vessel may receive cargo or ballast.
New vapor collection system means a vapor collection system which is not an existing vapor collection system.
Service vessel means a vessel which transports bulk liquid cargo between a facility and another vessel.

(d) This part does not apply to the collection of vapors of liquefied flammable gases as defined in §30.10–39 of this subchapter.

§ 39.10–5 Topping-off operation means the transfer of a bulk liquid cargo from a service vessel to another vessel in order to load the receiving vessel to a deeper draft.

Vapor balancing means the transfer of vapor displaced by incoming cargo from the tank of a vessel receiving cargo into a tank of the vessel or facility delivering cargo via a vapor collection system.

Vapor collection system means an arrangement of piping and hoses used to collect vapor emitted from a vessel’s cargo tanks and to transport the vapor to a vapor processing unit.

Vapor control system means an arrangement of piping and equipment used to control vapor emissions collected from a vessel. It includes the vapor collection system and vapor processing unit.

Vapor processing unit means the components of a vapor control system that recovers, destroys, or disperses vapor collected from a vessel.

Vessel vapor connection means the point in a vessel’s fixed vapor collection system where it connects with the vapor collection hose or arm.

§ 39.10–5 Incorporation by reference—TB/ALL.

(a) Certain materials are incorporated by reference into this part with the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a). To enforce any edition other than the one listed in paragraph (b) of this section, notice of change must be published in the Federal Register and the material made available to the public. All approved material is on file at the U.S. Coast Guard, Office of Operating and Environmental Standards (CG–OES), 2100 2nd St. SW., Stop 7126, Washington, DC 20593–7126, or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html. All material is available from the sources indicated in paragraph (b) of this section.

(b) The material approved for incorporation by reference in this part, and the sections affected are:
