Subpart 217.72 [Reserved]

Subpart 217.73—Identification of Sources of Supply

217.7300 Scope.

This subpart implements 10 U.S.C. 2384. It contains policy and procedures for requiring contractors to identify the actual manufacturer of supplies furnished to DoD.

217.7301 Policy.

Contractors shall identify their sources of supply in contracts for sup-plies. Contractor identification of sources of supply enables solicitation, in subsequent acquisitions, of actual manufacturers or other suppliers of items. This enhances competition and potentially avoids payment of addi-tional costs for no significant added value.

217.7302 Procedures.

(a) Whenever practicable, include a requirement for contractor identifica-tion of sources of supply in all con-tracts for the delivery of supplies. The identification shall include—

(1) The item's actual manufacturer or producer, or all the contractor's sources for the item;

(2) The item's national stock number (if there is one);

(3) The item identification number used by—

(i) The actual manufacturer or pro-ducer of the item; or

(ii) Each of the contractor's sources for the item; and

(4) The source of any technical data delivered under the contract.

(b) The requirement in paragraph (a) of this section does not apply to con-tracts that are—

(1) For commercial items; or

(2) Valued at or below the simplified acquisition threshold.
