

SCORING PLAN—Continued

Value	Descriptive statement
1	The factor is addressed, but contains deficiencies and/or weaknesses that can be corrected only by major or significant changes to relevant portions of the proposal, or the factor is addressed so minimally or vaguely that there are widespread information gaps. In addition, because of the deficiencies, weaknesses, and/or information gaps, serious concerns exist on the part of the technical evaluation team about the offeror's ability to perform the required work.
2	Information related to the factor is incomplete, unclear, or indicates an inadequate approach to, or understanding of the factor. The technical evaluation team believes there is question as to whether the offeror would be able to perform satisfactorily.
3	The response to the factor is adequate. Overall, it meets the specifications and requirements, such that the technical evaluation team believes that the offeror could perform to meet the Government's minimum requirements.
4	The response to the factor is good with some superior features. Information provided is generally clear, and the demonstrated ability to accomplish the technical requirements is acceptable with the possibility of more than adequate performance.
5	The response to the factor is superior in most features.

1515.305-71 Documentation of proposal evaluation.

In addition to the information required by FAR 15.305(a)(3), the technical evaluation documentation shall include:

(a) Score sheets prepared by each individual team member must be made available upon the contracting officer's request. For contracts valued at \$10,000,000 or less, the technical evaluation may be recorded on the short form technical evaluation format (EPA Form 1900-61) or another form specifically developed for the solicitation; and

(b) A statement that the respective team members are free from actual or potential personal conflicts of interest, and are in compliance with the Office of Government Ethics ethics provisions at 5 CFR part 2635.

(c) Any information which might reveal that an offeror has an actual or potential organizational conflict of interest.

(d) Any documentation related to exchanges with individual offerors.

1515.305-72 Release of cost information.

(a) In accordance with FAR 15.305(a)(4), the contracting officer may release the cost/price proposals to those members of the evaluation team who are evaluating proposals at his/her discretion.

(b) These individuals would then use this information to perform a cost realism analysis as described in FAR 15.404-1(d). Any inconsistencies be-

tween the proposals and the solicitation requirements and/or any inconsistencies between the cost/price and other than cost/price proposals should be identified.

Subpart 1515.4—Contract Pricing

1515.404-4 Profit.

This section implements FAR 15.404-4 and prescribes the EPA structured approach for establishing profit or fee prenegotiation objectives.

1515.404-470 Policy.

(a) The Agency's policy is to utilize profit to attract contractors who possess talents and skills necessary to the accomplishment of the objectives of the Agency, and to stimulate efficient contract performance. In negotiating profit/fee, it is necessary that all relevant factors be considered, and that fair and reasonable amounts be negotiated which give the contractor a profit objective commensurate with the nature of the work to be performed, the contractor's input to the total performance, and the risks assumed by the contractor.

(b) The purpose of EPA's structured approach is:

- (1) To provide a standard method of evaluation;
- (2) To ensure consideration of all relevant factors;
- (3) To provide a basis for documentation and explanation of the profit or fee negotiation objective; and

(4) To allow contractors to earn profits commensurate with the assumption of risk.

(c) The profit-analysis factors prescribed in the EPA structured approach for analyzing profit or fee include those prescribed by FAR 15.404(d)(1), and additional factors authorized by FAR 15.404(d)(2) to foster achievement of program objectives. These profit or fee factors are prescribed in 1515.404-471.

1515.404-471 EPA structured approach for developing profit or fee objectives.

(a) *General.* To properly reflect differences among contracts, and to select an appropriate relative profit/fee in consideration of these differences, weightings have been developed for application by the contracting officer to standard measurement bases representative of the prescribed profit factors cited in FAR 15.404(d) and EPAAR 1515.404-471(b)(1). Each profit factor or subfactor, or its components, has been assigned weights relative to their value to the contract's overall effort, and the range of weights to be applied to each profit factor.

(b)(1) *Profit/fee factors.* The factors set forth in this paragraph, and the weighted ranges listed after each factor, shall be used in all instances where the profit/fee is negotiated.

CONTRACTOR'S INPUT TO TOTAL PERFORMANCE

	Weight Range (Percent)
Direct material	1 to 4.
Professional/technical labor	8 to 15.
Professional/technical overhead	6 to 9.
General labor	5 to 9.
General overhead	4 to 7.
Subcontractors	1 to 4.
Other direct costs	1 to 3.
General and administrative expenses	5 to 8.
Contractor's assumption of contract cost risk	0 to 6.

(2) The contracting officer shall first measure the "Contractor's Input to Total Performance" by the assignment of a profit percentage within the designated weight ranges to each element of contract cost. Such costs are multiplied by the specific percentages to arrive at a specific dollar profit or fee.

(3) The amount calculated for facilities capital cost of money (FCCM) shall not be included as part of the cost base

for computation of profit or fee. The profit or fee objective shall be reduced by an amount equal to the amount of facilities capital cost of money allowed. A complete discussion of the determination of facilities capital cost of money and its application and administration is set forth in FAR 31.205-10, and the appendix to the FAR (see 48 CFR 9904.414).

(4) After computing a total dollar profit or fee for the Contractor's Input to Total Performance, the contracting officer shall calculate the specific profit dollars assigned for cost risk and performance. This is accomplished by multiplying the total Government cost objective, exclusive of any FCCM, by the specific weight assigned to cost risk and performance. The contracting officer shall then determine the profit or fee objective by adding the total profit dollars for the Contractor's Input to Total Performance to the specific dollar profits assigned to cost risk and performance. The contracting officer shall use EPA Form 1900-2 in hardcopy or electronic copy equivalent to facilitate the calculation of the profit or fee objective.

(5) The weight factors discussed in this section are designed for arriving at profit or fee objectives for other than nonprofit and not-for-profit organizations. Nonprofit and not-for-profit organizations are addressed as follows:

(i) Nonprofit and not-for-profit organizations are defined as those business entities organized and operated:

(A) Exclusively for charitable, scientific, or educational purposes;

(B) Where no part of the net earnings inure to the benefit of any private shareholder or individual;

(C) Where no substantial part of the activities is for propaganda or otherwise attempting to influence legislation or participating in any political campaign on behalf of any candidate for public office; and

(D) Which are exempt from Federal income taxation under Section 51 of the Internal Revenue Code. (26 U.S.C.)

(ii) For contracts with nonprofit and not-for-profit organizations where fees are involved, special factor of -3 percent shall be assigned in all cases.

(c) *Assignment of values to specific factors—(1) General.* In making a judgment
