

Rural Utilities Service, USDA

§ 1794.30

than five acres (2 hectares) of new physical disturbance at a single site; and

(11) Construction of facilities designed for the transfer and storage of ash, scrubber wastes, and other byproducts from coal-fired electric generating stations that will be located beyond the existing facility site boundaries.

(12) Installing a heat recovery steam generator and steam turbine with a rating of more than 200 MW on an existing combustion turbine generation site for the purpose of combined cycle operation. All new associated facilities and related electric power lines shall be covered in the EA.

(13) Construction of a natural gas pipeline to serve an existing gas-fueled generating facility.

[63 FR 68655, Dec. 11, 1998, as amended at 68 FR 45159, Aug. 1, 2003]

§ 1794.24 Proposals normally requiring an EA with scoping.

(a) *General.* Applications for financial assistance for certain proposed actions require the use of a scoping procedure in the development of the EA. These types of actions are subject to the requirements of §§ 1794.50 through 1794.54. RUS has the discretion to modify or waive the requirements listed in § 1794.52 for a proposed action in this category.

(b) *Electric program.* Proposed actions falling within this classification are:

(1) The construction of electric power lines and related facilities designed for and capable of operation at a nominal voltage of 230 kV or more where more than 25 miles (40 kilometers) of power line are involved;

(2) Construction of fuel cell, combustion turbine, combined cycle, and diesel generating facilities of more than 50 MW at a new site or more than 100 MW at an existing site; and the construction of any other type of electric generating facility of more than 20 MW but not more than 50 MW (nameplate rating). All new associated facilities and related electric power lines shall be covered in any EA or EIS that is prepared.

(c) *Telecommunications and water and waste programs.* There are no actions

normally falling within this classification.

[63 FR 68655, Dec. 11, 1998, as amended at 68 FR 45159, Aug. 1, 2003]

§ 1794.25 Proposals normally requiring an EIS.

Applications for financial assistance for certain proposed actions that may significantly affect the quality of the human environment shall require the preparation of an EIS.

(a) *Electric program.* An EIS will normally be required in connection with proposed actions involving the following types of facilities:

(1) New electric generating facilities of more than 50 MW (nameplate rating) other than fuel cell, combustion turbine, combined cycle, or diesel generators. All new associated facilities and related electric power lines shall be covered in the EIS; and

(2) A new mining operation when the applicants have effective control (e.g., dedicated mine or purchase of a substantial portion of the mining equipment).

(b) Proposals listed above are subject to the requirements of §§ 1794.60, 1794.61, 1794.63, and 1794.64. Preparation of a supplemental draft or final EIS in accordance with 40 CFR 1502.9 shall be subject to the requirements of §§ 1794.62 and 1794.64.

(c) *Telecommunications and water and waste programs.* No groups or sets of proposed actions normally require the preparation of an EIS. The environmental review process, as described in this part, shall be used to identify those proposed actions for which the preparation of an EIS is necessary. If an EIS is required, RUS shall proceed directly to its preparation. Prior completion of an EA is not mandatory.

[63 FR 68655, Dec. 11, 1998, as amended at 68 FR 45159, Aug. 1, 2003]

§§ 1794.26–1794.29 [Reserved]

Subpart D—Procedure for Categorical Exclusions

§ 1794.30 General.

The procedures of this subpart which apply to proposed actions classified as CEs in §§ 1794.21 and 1794.22 provide RUS

§ 1794.31

with information necessary to determine if the proposed action meets the criteria for a CE. Where, because of extraordinary circumstances, a normally categorically excluded action may have a significant effect on the quality of the human environment, RUS may require additional environmental documentation.

§ 1794.31 Classification.

(a) *Electric and telecommunications programs.* RUS will normally determine the proper environmental classification of projects based on its evaluation of the project description set forth in the construction work plan or loan design which the applicant is required to submit with its application for financial assistance. Each project must be sufficiently described to ensure its proper classification. RUS may require the applicant to provide additional information on a project where appropriate.

(b) *Water and waste program.* RUS will normally determine the proper environmental classification for projects based on its evaluation of the preliminary planning and design information.

§ 1794.32 Environmental report.

(a) For proposed actions listed in § 1794.21(b) and (c), the applicant is normally not required to submit an ER.

(b) For proposed actions listed in § 1794.22(a) and (b), the applicant shall normally submit an ER. Guidance in preparing the ER for Electric and Telecommunication proposals is contained in RUS Bulletin 1794A-600. Guidance in preparing the ER for Water and Waste proposals is contained in RUS Bulletin 1794A-602. The applicant may be required to publish public notices and provide evidence of such if the proposed action is located in, impacts, or converts important land resources.

§ 1794.33 Agency action.

RUS may act on an application for financial assistance upon determining, based on the review of documents as set forth in § 1794.32 and such additional information as RUS deems necessary, that the project is categorically excluded.

7 CFR Ch. XVII (1-1-12 Edition)

§§ 1794.34-1794.39 [Reserved]

Subpart E—Procedure for Environmental Assessments

§ 1794.40 General.

This subpart applies to proposed actions described in § 1794.23. Where appropriate to carry out the purposes of NEPA, RUS may impose, on a case-by-case basis, additional requirements associated with the preparation of an EA. If at any point in the preparation of an EA, RUS determines that the proposed action will have a significant effect on the quality of the human environment, the preparation of an EIS shall be required and the procedures in subpart G of this part shall be followed.

§ 1794.41 Document requirements.

Applicants will provide an ER in accordance with the appropriate guidance documents referenced in § 1794.7. After RUS has evaluated the ER and has determined the ER adequately addresses all applicable environmental issues, the ER will normally serve as RUS' EA. However, RUS reserves the right to prepare its own EA from the information provided in the ER. RUS will take responsibility for the scope and content of an EA.

§ 1794.42 Notice of availability.

Prior to RUS making a finding in accordance with § 1794.43 and upon RUS authorization and guidance, the applicant shall have a notice published which announces the availability of the EA and solicits public comments on the EA.

§ 1794.43 Agency finding.

If RUS finds, based on an EA that the proposed action will not have a significant effect on the quality of the human environment, RUS will prepare a FONSI. Upon authorization of RUS, the applicant shall have a notice published which informs the public of the RUS finding and the availability of the EA and FONSI. The notice shall be prepared and published in accordance with RUS guidance.
