RBS and RUS, USDA

§ 4279.125 Interest rates.

The interest rate for the guaranteed loan will be negotiated between the lender and the applicant and may be either fixed or variable as long as it is a legal rate. Interest rates will not be more than those rates customarily charged borrowers in similar circumstances in the ordinary course of business and are subject to Agency review and approval. Lenders are encouraged to utilize the secondary market and pass interest-rate savings on to the borrower.

(a) A variable interest rate agreed to by the lender and borrower must be a rate that is tied to a base rate agreed to by the lender and the Agency. The variable interest rate may be adjusted at different intervals during the term of the loan, but the adjustments may not be more often than quarterly and must be specified in the Loan Agreement. The lender must incorporate, within the variable rate Promissory Note at loan closing, the provision for adjustment of payment installments coincident with an interest-rate adjustment. The lender will ensure that the outstanding principal balance is properly amortized within the prescribed loan maturity to eliminate the possibility of a balloon payment at the end of the loan.

(b) Any change in the interest rate between the date of issuance of the

§ 4279.120 Fees and charges.

(a) Routine lender fees. The lender may establish charges and fees for the loan provided they are similar to those normally charged other applicants for the same type of loan in the ordinary course of business.

(b) Professional services. Professional services are those rendered by entities generally licensed or certified by States or accreditation associations, such as architects, engineers, packagers, accountants, attorneys, or appraisers. The borrower may pay fees for professional services needed for planning and developing a project provided that the amounts are reasonable and customary in the area. Professional fees may be included as an eligible use of loan proceeds.

§§ 4279.121–4279.124 [Reserved]
§ 4279.126 Loan terms.

(a) The maximum repayment for loans on real estate will not exceed 30 years; machinery and equipment repayment will not exceed the useful life of the machinery and equipment purchased with loan funds or 15 years, whichever is less; and working capital repayment will not exceed 7 years. The term for a loan that is being refinanced may be based on the collateral the lender will take to secure the loan.

(b) The first installment of principal and interest will, if possible, be scheduled for payment after the project is operational and has begun to generate income. However, the first full installment must be due and payable within 3 years from the date of the Promissory Note and be paid at least annually thereafter. Interest-only payments will be paid at least annually from the date of the note.

(c) Only loans which require a periodic payment schedule which will retire the debt over the term of the loan without a balloon payment will be guaranteed.

(d) A loan’s maturity will take into consideration the use of proceeds, the useful life of assets being financed, and the borrower’s ability to repay the loan. The lender may apply the maximum guidelines specified above only when the loan cannot be repaid over a shorter term.

(e) All loans guaranteed through the B&I program must be sound, with reasonably assured repayment.

§ 4279.127 Credit quality.

The lender is primarily responsible for determining credit quality and must address all of the elements of credit quality in a written credit analysis including adequacy of equity, cash flow, collateral, history, management, and the current status of the industry for which credit is to be extended.

(a) Cash flow. All efforts will be made to structure or restructure debt so that the business has adequate debt coverage and the ability to accommodate expansion.

(b) Collateral. (1) Collateral must have documented value sufficient to protect the interest of the lender and the Agency and, except as set forth in paragraph (b)(2) of this section, the discounted collateral value will be at least equal to the loan amount. Lenders will discount collateral consistent with sound loan-to-value policy.

(2) Some businesses are predominantly cash-flow oriented, and where cash flow and profitability are strong, loan-to-value coverage may be discounted accordingly. A loan primarily based on cash flow must be supported by a successful and documented financial history.

(c) Industry. Current status of the industry will be considered and businesses in areas of decline will be required to provide strong business plans which outline how they differ from the current trends. The regulatory environment surrounding the particular business or industry will be considered.

(d) Equity. (1) A minimum of 10 percent tangible balance sheet equity will be required for existing businesses at loan closing. A minimum of 20 percent tangible balance sheet equity will be required for new businesses at loan closing. For energy projects, the minimum tangible balance sheet equity requirement range will be between 25 percent and 40 percent. Criteria for considering the minimum equity required for an individual application will be based on: existing businesses with successful financial and management history; start-up businesses; personal/corporate guarantees offered; contractual relationships with suppliers and buyers;
