§ 319.24–4 Notice of arrival of corn by permittee.

Immediately upon the arrival of the corn at the port of entry the permittee shall submit, in duplicate, notice to the Plant Protection and Quarantine Programs, through the United States Collector of Customs, or, in the case of Guam, through the Customs officer of the Government of Guam, on forms provided for that purpose, stating the number of the permit, the number of bags or other containers of corn included in the shipment, the bag or other container numbers or marks, the country and locality where the corn was grown, the name and address of the exporter or foreign shipper, the port of departure, the date of arrival, the name of the ship or vessel, and the designation of the dock where the corn is to be landed.

(Approved by the Office of Management and Budget under control number 0579–0049)

§ 319.24–5 Condition of entry.

The corn shall not be removed from the port of entry, nor shall any bag or other container thereof be broken or opened, except for the purpose of sterilization, until a written notice is given to the United States Collector of Customs, or, in the case of Guam, the Customs officer of the Government of Guam, by an inspector of the Plant Protection and Quarantine Programs, that the corn has been properly sterilized and released for entry without further restrictions so far as the jurisdiction of the Department of Agriculture extends thereto. All apparatus and methods for accomplishing such sterilization must be satisfactory to the Plant Protection and Quarantine Programs. Corn will be delivered to the permittee for sterilization, upon the filing with the appropriate customs official of a bond in the amount of $5,000, or in an amount equal to the invoice value of the corn if such value is less than $5,000, with approved sureties, and conditioned upon sterilization of the corn under the supervision and the satisfaction of an inspector of the Plant Protection and Quarantine Programs; and upon the redelivery of the corn to said customs official within 40 days from the arrival of the corn at the port of entry.

Subpart—Citrus Fruit

NOTE: Citrus nursery stock, except seeds, is prohibited entry from all foreign countries and localities by the citrus nursery stock quarantine No. 19 (§319.19).

The importation from all foreign countries of fruits of citrus and citrus relatives, other than those specified in this subpart, is restricted by the provisions of fruit and vegetable quarantine No. 96 (§§319.96 to 319.96–8).

§ 319.28 Notice of quarantine.

(a)(1) To prevent the introduction into the United States of citrus canker disease *Xanthomonas campestris* pv. *citri* (Hasse) Dye, the importation of all fruits and peel of all genera, species, and varieties of the subfamilies *Aurantioideae*, *Rutioideae*, and *Toddalioideae* of the botanical family *Rutaceae* from eastern and southeastern Asia (including India, Myanmar, Sri Lanka, Thailand, Indochina, and the People’s Republic of China); the Malay Archipelago; the Philippine Islands; Oceania (except Australia and Tasmania); Japan and adjacent islands; the Republic of Korea; Mauritius; Seychelles; Argentina (except for the States of Catamarca, Jujuy, Salta, and Tucuman, which are considered free of citrus canker); Brazil; and Paraguay is prohibited.

(2) To prevent the introduction into the United States of sweet orange scab (*Elsinoe australis* Bitanc. and Jenkins), the importation of fruits and peel of all species and varieties of the genus *Citrus*, including *Citrus aurantifolia* (Christm.) Swingle, *C. aurantium* L., *C. hystrix* DC., *C. limon* (L.) Burm. f., *C. paradisi* Macf., *C. reticulata* Blanco, *C. sinensis* (L.) Osbeck, and *Fortunella margarita* (Lour.) Swingle, from Argentina, Brazil, Paraguay, and Uruguay is prohibited.

(3) To prevent the introduction into the United States of the bacterial disease “Cancrosis B,” the importation of fruits and peel of all species and varieties of the genus *Citrus*, including those indicated in the previous paragraph, is prohibited from Argentina (except for the States of Catamarca,
Jujuy, Salta, and Tucuman, which are considered free of Cancrosis B), Paraguay, and Uruguay.

(4) Seeds and processed peel of fruits designated in this section are excluded from this prohibition. Such seeds, however, are subject to the requirements of §§319.37 through 319.37–27.

(b) Unshu oranges from Japan. The prohibition does not apply to Unshu oranges (Citrus reticulata Blanco var. unshiu, Swingle [Citrus unshiu Marcovitch, Tanaka]), also known as Satsuma mandarin, grown in Japan and imported under permit into any area of the United States except for those areas specified in paragraph (b)(7) of this section: Provided, that each of the following safeguards is fully carried out:

(1) The Unshu oranges must be grown and packed in isolated, canker-free export areas established by the plant protection service of Japan. Only Unshu orange trees may be grown in these areas, which must be kept free of all citrus other than the propagative material of Unshu oranges. The export areas must be inspected and found free of citrus canker and prohibited plant material by qualified plant protection officers of both Japan and the United States. The buffer zones must be kept free of all citrus other than the following 10 varieties: Buntan Hirado (C. grandis); Buntan Vietnam (C. grandis); Hassaku (C. hassaku); Hyuganatsu (C. tamurana); Kinkan (Fortunella spp. non Fortunella hindsii); Kiyomi tangor (hybrid); Orange Hyuga (C. tamarana); Ponkan (C. reticulata); Unshu (C. unshiu Marcovitch, Tanaka [Citrus reticulata Blanco var. unshiu, Swingle]); and Yuzu (C. junos). The buffer zones must be inspected and found free of citrus canker and prohibited plant material by qualified plant protection officers of both Japan and the United States.

(2) In Unshu orange export areas and buffer zones on Kyushu Island, Japan, trapping for the citrus fruit fly (Bactrocera tsuneonis) must be conducted as prescribed by the Japanese Government’s Ministry of Agriculture, Forestry, and Fisheries and the U.S. Department of Agriculture. If fruit flies are detected, then shipping will be suspended from the export area until negative trapping shows the problem has been resolved.

(3) Inspection of the Unshu oranges shall be performed jointly by plant protection officers of Japan and the United States in the groves prior to and during harvest, and in the packing-houses during packing operations.

(4) Before packing, such oranges shall be given a surface sterilization as prescribed by the U.S. Department of Agriculture.

(5) To be eligible for importation into Arizona, California, Florida, Hawaii, Louisiana, or Texas, each shipment of oranges grown on Honshu Island or Shikoku Island, Japan, must be fumigated with methyl bromide treated in accordance with part 305 of this chapter after harvest and prior to exportation to the United States. Fumigation will not be required for shipments of oranges grown on Honshu Island or Shikoku Island, Japan, that are to be imported into States other than Arizona, California, Florida, Hawaii, Louisiana, or Texas.

(6) The identity of the fruit shall be maintained in the following manner:

(i) The individual boxes in which the oranges are shipped must be stamped or printed with a statement specifying the States into which the Unshu oranges may be imported, and from which they are prohibited removal under a Federal plant quarantine.

(ii) Each shipment of oranges handled in accordance with these procedures shall be accompanied by a certificate of the plant protection service of Japan certifying that the fruit is apparently free of citrus canker disease.

(7) The Unshu oranges may be imported into the United States only through a port of entry identified in §319.37–14 that is located in an area of the United States into which their importation is authorized. The following importation restrictions apply:

(i) Unshu oranges from Honshu Island or Shikoku Island, Japan, that have been fumigated in accordance with part 305 of this chapter may be imported into any area of the United States except American Samoa, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands.
(ii) Unshu oranges from Honshu Island or Shikoku Island, Japan, and from Kyushu Island, Japan (Prefectures of Fukuoka, Kumamoto, Nagasaki, and Saga only), that have not been fumigated in accordance with part 305 of this chapter except American Samoa, Arizona, California, Florida, Hawaii, Louisiana, the Northern Mariana Islands, Puerto Rico, Texas, and the U.S. Virgin Islands.

(c) Unshu oranges from the Republic of Korea. The prohibition does not apply to Unshu oranges (Citrus reticulata Blanco var. unshu, Swingle [Citrus unshiu Marcovitch, Tanaka]), also known as Satsuma mandarin, grown on Cheju Island, Republic of Korea, and imported under permit into any area of the United States except for those specified in paragraph (c)(4) of this section, Provided, that each of the following safeguards is fully carried out:

(1) Before packing, such oranges shall be given a surface sterilization in accordance with part 305 of this chapter.

(2) The packinghouse in which the surface sterilization treatment is applied and the fruit is packed must be registered with the national plant protection organization of the Republic of Korea.

(3) The Unshu oranges must be accompanied by a phytosanitary certificate issued by the national plant protection organization of the Republic of Korea, which includes an additional declaration stating that the fruit was given a surface sterilization in accordance with 7 CFR part 305 and was inspected and found free of Elsinoe australis.

(4) The Unshu oranges may be imported into any area of the United States except American Samoa, Hawaii, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands.

(d) This prohibition shall not apply to importations for experimental or scientific purposes by the U.S. Department of Agriculture upon such conditions and under such requirements as may be prescribed in permits that may be issued by the Deputy Administrator of the Plant Protection and Quarantine Programs for such importations.

(e) Further, this prohibition shall not apply to importations into Guam of the fruits and peel designated in paragraph (a)(1) of this section.

(f) Importations allowed in paragraphs (b), (c), (d), and (e) of this section shall be subject to the permit and other requirements under the regulations in Subpart-Fruits and Vegetables of this part.

(g) All salary, travel, and subsistence expenses incident to the assignment of personnel of the U.S. Department of Agriculture to such operations in the country of origin of the Unshu oranges shall be paid by those requesting the service of such personnel.

(h) The term United States means the States, District of Columbia, American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, and the Virgin Islands of the United States.

(i) Any permit that has been issued for the importation of Unshu oranges may be withdrawn by an inspector orally or in writing, if he or she determines that the holder of the permit has not complied with any of the conditions in the regulations. The holder of the permit shall be informed orally or in writing of the reasons for the withdrawal. If the withdrawal is oral, the decision and the reasons for the withdrawal will be confirmed in writing as promptly as circumstances allow. Any person whose permit has been withdrawn may appeal the decision in writing to the Deputy Administrator within ten (10) days after receiving the written notification of the withdrawal. The appeal must state all of the facts and reasons upon which the person relies to show that the permit was wrongfully withdrawn. As promptly as circumstances allow, the Deputy Administrator will grant or deny the appeal, in writing, stating the reasons for the decision. A hearing will be held to resolve any conflict as to any material fact. Rules of practice concerning a hearing will be adopted by the Deputy Administrator.

(j) The term inspector means any employee of Plant Protection and Quarantine, Animal and Plant Health Inspection Service, who is authorized by the Deputy Administrator to enforce the regulations in this subpart.

[32 FR 7959, June 2, 1967]
The Plant Protection and Quarantine Program also enforces regulations promulgated under the Endangered Species Act of 1973 (Pub. L. 93–205, as amended) which contain additional prohibitions and restrictions on importation into the United States of articles subject to this subpart (See 50 CFR parts 17 and 23).

One or more common names of articles are given in parentheses after most scientific names (when common names are known) for the purpose of helping to identify the articles represented by such scientific names; however, unless otherwise specified, a reference to a scientific name includes all articles within the category represented by the scientific name regardless of whether the common name or names are as comprehensive in scope as the scientific name.
