(ii) Beginning in Guayaquil, the road south through El 26, Puerto Inca, Naranjal, and Camilo Ponce to Enriquez;

(iii) Beginning in Guayaquil, the road east through Palestina to Vinces;

(iv) Beginning in Guayaquil, the road west through Piedrahita (Novol) to Pedro Carbo; or

(v) Beginning in Guayaquil, the road west through Progreso, Engunga, Tugaduaja, and Zapotal to El Azucar.

(4) The cantaloupe or watermelon may not be moved into Alabama, American Samoa, Arizona, California, Florida, Georgia, Guam, Hawaii, Louisiana, Mississippi, New Mexico, Puerto Rico, South Carolina, Texas, and the U.S. Virgin Islands. The boxes in which the cantaloupe or watermelon is packed must be stamped with the name of the commodity followed by the words “Not to be distributed in the following States or territories: AL, AS, AZ, CA, FL, GA, GU, HI, LA, MS, NM, PR, SC, TX, VI.”

(b) Cantaloupe, netted melon, vegetable melon, winter melon, and watermelon from Peru. Cantaloupe, netted melon, vegetable melon, and winter melon (Cucumis melo L. subsp. melo) and watermelon may be imported into the United States from Peru only in accordance with §319.56-5 of this subpart:

(1) The fruit may be imported in commercial consignments only.

(2) The fruit must have been grown in an area of Peru considered by APHIS to be free of the South American cucumber fly, must be accompanied by a phytosanitary certificate declaring its origin in such an area, and must be safeguarded and labeled, each in accordance with §319.56-5 of this subpart.

(3) The phytosanitary certificate required under §319.56-5 must also include a declaration by the NPPO of Peru indicating that, upon inspection, the fruit was found free of the gray pineapple mealybug (Dysmicoccus neobrevipes).

(4) All consignments of fruit must be labeled in accordance with §319.56-5(e) of this subpart, and the boxes in which the fruit is packed must be labeled “Not for distribution in HI, PR, VI, or Guam.”

(Approved by the Office of Management and Budget under control number 0579–0236)

§319.56–27 Apples from Japan and the Republic of Korea.

Any variety of Malus domestica apples may be imported into the United States from Japan, and Fuji variety apples may be imported into the United States from the Republic of Korea, only in accordance with this section and all other applicable provisions of this subpart.

(a) Treatment and fumigation. The apples must be cold treated and then fumigated, under the supervision of an APHIS inspector, either in Japan or the Republic of Korea, for the peach fruit moth (Carposina niponensis), the yellow peach moth (Conogethes punctiferalis), and the fruit tree spider mite (Tetranychus viennensis), in accordance with part 305 of this chapter.

(b) APHIS inspection. The apples must be inspected upon completion of the treatments required by paragraph (a) of this section, prior to export from Japan or the Republic of Korea, by an APHIS inspector and an inspector from the national plant protection organization of Japan or the Republic of Korea. The apples shall be subject to further disinfection in the exporting country if plant pests are found prior to export. Imported apples inspected in Japan or the Republic of Korea are also subject to inspection and disinfection at the port of first arrival, as provided in §319.56–3.

(c) Trust fund agreements. The national plant protection organization of the exporting country must enter into a trust fund agreement with APHIS in accordance with §319.56–6 before APHIS will provide the services necessary for apples to be imported into the United States from Japan or the Republic of Korea.

§319.56–28 Tomatoes from certain countries.

(a) Tomatoes (fruit) (Solanum lycopersicum) from Spain. Pink or red tomatoes may be imported into the
