

**§ 929.75 Personal liability.**

No member or alternate member of the committee and no employee or agent of the committee shall be held personally responsible, either individually or jointly with others, in any way whatsoever, to any person for errors in judgment, mistakes, or other acts, either of commission or omission, as such member, alternate, employee, or agent, except for acts of dishonesty, willful misconduct, or gross negligence.

[27 FR 8101, Aug. 15, 1962. Redesignated at 57 FR 38750, Aug. 27, 1992]

**§ 929.76 Separability.**

If any provision of this part is declared invalid or the applicability thereof to any person, circumstance, or thing is held invalid, the validity of the remainder of this part or the applicability thereof to any other person, circumstance, or thing shall not be affected thereby.

[27 FR 8101, Aug. 15, 1962. Redesignated at 57 FR 38750, Aug. 27, 1992]

**Subpart—Rules and Regulations****§ 929.101 Minimum exemption.**

The requirements of § 929.41 *Assessments* and § 929.54 *Withholding* shall not apply to any handler in a fiscal year during which the handler handles not more than a total of 300 barrels of cranberries.

[53 FR 12374, Apr. 14, 1988]

**§ 929.102 Procedure to determine quantity of screened cranberries in unscreened lots.**

The determination pursuant to § 929.54 of the quantity of screened cranberries contained in an unscreened lot shall be made in accordance with the following procedure and on the basis of a sample of representative boxes comprising no less than 2 percent of the cranberries in the lot:

(a) The cranberries in the sample are cleaned to remove chaff, and the boxes of cleaned berries are weighed. The weight of the boxes themselves is then deducted to determine the weight of the cleaned berries. The weight of the cleaned berries is divided by the num-

ber of boxes in the sample to obtain the net weight of cleaned cranberries per box. The net weight is multiplied by the number of boxes in the lot to obtain the net weight of the berries in the unscreened lot.

(b) The cleaned berries are run through a separator, having a  $\frac{3}{32}$  inch screen, and with the bounce boards in the lowest position.

(c) The berries from the lower three bounce boards are rerun through the separator.

(d) The berries from the upper four bounce boards are thoroughly mixed and a random cupful (approximately 1 pint) is used to determine, from a count of the sound and unsound berries, the percentage of sound berries in the lot.

(e) Such percentage is adjusted by increasing it by 5 percentage points but not to exceed a total of 100 percent. (This increase makes the sample comparable to lots of screened cranberries, as such lots generally contain an average of 5 percent unsound berries.)

(f) The net weight, as determined in accordance with paragraph (a) of this section, of the berries in the unscreened lot, is multiplied by the adjusted percentage to obtain the quantity of screened cranberries in the unscreened lot.

[28 FR 11611, Oct. 31, 1963]

**§ 929.103 Inspection procedure.**

(a) Inspection of withheld cranberries shall be limited to any plant, storage facility, or other location, within the production area where facilities suitable to the inspection service are available for sampling, weighing, and inspection of cranberries.

(b) The handler offering any lot of cranberries for inspection shall furnish the necessary labor and pay the costs of moving, weighing, and otherwise making available the sample the inspector chooses for inspection. The size of the sample shall be determined by the inspector. In the case of inspection of a lot of unscreened cranberries, the sample shall be screened by the handler under the supervision of the inspector and the inspection certificate shall show the quantity of cranberries in such lot which meets the requirements
