not include net operating loss carryforwards to be used within one year of the most recent calendar quarter-end date or the amount of existing temporary differences expected to reverse within that year. Projected future taxable income should include the estimated effect of tax planning strategies that are expected to be implemented to realize tax carryforwards that will otherwise expire during that year. Future taxable income projections for the current fiscal year (adjusted for any significant changes that have occurred or are expected to occur) may be used when applying the capital limit at an interim calendar quarter-end date rather than preparing a new projection each quarter.

(3) Unrealized holding gains and losses on available-for-sale debt securities. The deferred tax effects of any unrealized holding gains and losses on available-for-sale debt securities may be excluded from the determination of the amount of deferred tax assets that are dependent upon future taxable income and the calculation of the maximum allowable amount of such assets. If these deferred tax effects are excluded, this treatment must be followed consistently over time.
