

Commercial Space Transportation, FAA, DOT

§ 414.11

- 414.23 Maintaining the continued accuracy of the safety approval application.
- 414.25 Safety approval records.
- 414.27 Safety approval renewal.
- 414.29 Safety approval transfer.
- 414.31 Monitoring compliance with the terms and conditions of a safety approval.
- 414.33 Modification, suspension, or revocation of a safety approval.
- 414.35 Public notification of the criteria by which a safety approval was issued.

Subpart D—Appeal Procedures

- 414.37 Hearings in safety approval actions.
- 414.39 Submissions; oral presentations in safety approval actions.
- 414.41 Administrative law judge's recommended decision in safety approval actions.

AUTHORITY: 51 U.S.C. 50901–50923.

SOURCE: Docket No. FAA–2005–21332, 71 FR 46853, Aug. 15, 2006, unless otherwise noted.

Subpart A—General

§ 414.1 Scope.

This part establishes procedures for obtaining a safety approval and renewing and transferring an existing safety approval. Safety approvals issued under this part may be used to support the application review for one or more launch or reentry license requests under other parts of this chapter.

§ 414.3 Definitions.

Safety approval. For purposes of this part, a safety approval is an FAA document containing the FAA determination that one or more of the safety elements listed in paragraphs (1) and (2) of this definition, when used or employed within a defined envelope, parameter, or situation, will not jeopardize public health and safety or safety of property. A safety approval may be issued independent of a license, and it does not confer any authority to conduct activities for which a license is required under 14 CFR chapter III. A safety approval does not relieve its holder of the duty to comply with all applicable requirements of law or regulation that may apply to the holder's activities.

(1) Launch vehicle, reentry vehicle, safety system, process, service, or any identified component thereof; or

(2) Qualified and trained personnel, performing a process or function re-

lated to licensed launch activities or vehicles.

Safety element. For purposes of this part, a safety element is any one of the items or persons (personnel) listed in paragraphs (1) and (2) of the definition of “safety approval” in this section.

§ 414.5 Applicability.

This part applies to an applicant that wants to obtain a safety approval for any of the safety elements defined under this part and to persons granted a safety approval under this part. Any person eligible under this part may apply to become the holder of a safety approval.

§ 414.7 Eligibility.

(a) There is no citizenship requirement to obtain a safety approval.

(b) You may be eligible for a safety approval if you are—

(1) A manufacturer or designer of a launch or reentry vehicle or component thereof;

(2) The designer or developer of a safety system or process; or

(3) Personnel who perform safety critical functions in conducting a licensed launch or reentry.

(c) A safety approval applicant must have sufficient knowledge and expertise to show that the design and operation of the safety element for which safety approval is sought qualify for a safety approval.

(d) Only the safety elements defined under this part are eligible for a safety approval.

Subpart B—Application Procedures

§ 414.9 Pre-application consultation.

The applicant must consult with the FAA before submitting an application. Unless the applicant or the FAA requests another form of consultation, consultation is oral discussion with the FAA about the application process and the potential issues relevant to the FAA's safety approval decision.

§ 414.11 Application.

(a) The application must be in writing, in English, and filed in duplicate
