

goods or materials throughout the fiscal year of that person.

[CBP Dec. 05-07, 70 FR 10873, Mar. 7, 2005, as amended by CBP Dec. 06-39, 71 FR 76134, Dec. 20, 2006]

§ 10.458 Accumulation.

(a) Originating goods or materials of Chile or the United States that are incorporated into a good in the territory of the other Party will be considered to originate in the territory of the other Party for purposes of determining the eligibility of the goods or materials for preferential tariff treatment under the US-CFTA.

(b) A good that is produced in the territory of Chile, the United States, or both, by one or more producers, will be considered as an originating good if the good satisfies the applicable requirements of §10.451 and General Note 26, HTSUS.

[CBP Dec. 05-07, 70 FR 10873, Mar. 7, 2005, as amended by CBP Dec. 06-39, 71 FR 76134, Dec. 20, 2006]

§ 10.459 De minimis.

(a) Except as provided in paragraphs (b) and (c) of this section, a good that does not undergo a change in tariff classification pursuant to General Note 26(n), HTSUS, will nonetheless be considered to be an originating good if—

(1) The value of all non-originating materials that are used in the production of the good and do not undergo the applicable change in tariff classification does not exceed 10 percent of the adjusted value of the good;

(2) The value of such non-originating materials is included in calculating the value of non-originating materials for any applicable regional value-content requirement under this note; and

(3) The good meets all other applicable requirements of General Note 26(n), HTSUS.

(b) Paragraph (a) of this section does not apply to:

(1) A non-originating material provided for in Chapter 4 of the Harmonized System, or a non-originating dairy preparation containing over 10 percent by weight of milk solids provided for in subheadings 1901.90 or 2106.90 of the Harmonized System, that is used in the production of a good pro-

vided for in Chapter 4 of the Harmonized System;

(2) A non-originating material provided for in Chapter 4 of the Harmonized System, or non-originating dairy preparations containing over 10 percent by weight of milk solids provided for in subheading 1901.90 of the Harmonized System, that are used in the production of the following goods: infant preparations containing over 10 percent in weight of milk solids provided for in subheading 1901.10 of the Harmonized System; mixes and doughs, containing over 25 percent by weight of butterfat, not put up for retail sale, provided for in subheading 1901.20 of the Harmonized System; dairy preparations containing over 10 percent by weight of milk solids provided for in subheadings 1901.90 or 2106.90 of the Harmonized System; goods provided for in heading 2105 of the Harmonized System; beverages containing milk provided for in subheading 2202.90 of the Harmonized System; or animal feeds containing over 10 percent by weight of milk solids provided for in subheading 2309.90 of the Harmonized System;

(3) A non-originating material provided for in heading 0805 of the Harmonized System or subheadings 2009.11 through 2009.30 of the Harmonized System that is used in the production of a good provided for in subheadings 2009.11 through 2009.30 of the Harmonized System, or in fruit or vegetable juice of any single fruit or vegetable, fortified with minerals or vitamins, concentrated or unconcentrated, provided for in subheadings 2106.90 or 2202.90 of the Harmonized System;

(4) A non-originating material provided for in Chapter 15 of the Harmonized System that is used in the production of a good provided for in headings 1501 through 1508, 1512, 1514, or 1515 of the Harmonized System;

(5) A non-originating material provided for in heading 1701 of the Harmonized System that is used in the production of a good provided for in headings 1701 through 1703 of the Harmonized System;

(6) A non-originating material provided for in Chapter 17 or in heading 1805 of the Harmonized System that is

§ 10.460

used in the production of a good provided for in subheading 1806.10 of the Harmonized System;

(7) A non-originating material provided for in headings 2203 through 2208 of the Harmonized System that is used in the production of a good provided for in heading 2207 or 2208 of the Harmonized System; and

(8) A non-originating material used in the production of a good provided for in Chapters 1 through 21 of the Harmonized System unless the non-originating material is provided for in a different subheading than the good for which origin is being determined under this section.

(c) A textile or apparel good provided for in Chapters 50 through 63 of the Harmonized System that is not an originating good because certain fibers or yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification set out in General Note 26(n), HTSUS, shall nonetheless be considered to be an originating good if the total weight of all such fibers or yarns in that component is not more than seven percent of the total weight of that component. A good containing elastomeric yarns in the component of the good that determines the tariff classification of the good shall be considered to be an originating good only if such yarns are wholly formed in the territory of a Party. For purposes of this paragraph, if a good is a fiber, yarn or fabric, the component of the good that determines the tariff classification of the good is all of the fibers in the yarn, fabric or group of fibers.

§ 10.460 Indirect materials.

An indirect material, as defined in §10.402(o), will be considered to be an originating material without regard to where it is produced.

Example. Chilean Producer C produces good C using non-originating material A. Producer C imports non-originating rubber gloves for use by workers in the production of good C. Good C is subject to a tariff shift requirement. As provided in §10.451(b)(1) and General Note 26(n), each of the non-originating materials in good C must undergo the specified change in tariff classification in order for good C to be considered originating. Although non-originating material A must

19 CFR Ch. I (4–1–13 Edition)

undergo the applicable tariff shift in order for good C to be considered originating, the rubber gloves do not because they are indirect materials and are considered originating without regard to where they are produced.

[CBP Dec. 05–07, 70 FR 10873, Mar. 7, 2005, as amended by CBP Dec. 06–39, 71 FR 76134, Dec. 20, 2006]

§ 10.461 Retail packaging materials and containers.

Packaging materials and containers in which a good is packaged for retail sale, if classified with the good for which preferential tariff treatment under the US-CFTA is claimed, will be disregarded in determining whether all non-originating materials used in the production of the good undergo the applicable change in tariff classification set out in General Note 26(n), HTSUS. If the good is subject to a regional value content requirement, the value of such packaging materials and containers will be taken into account as originating or non-originating materials, as the case may be, in calculating the regional value content of the good.

Example 1. Chilean Producer A of good C imports 100 non-originating blister packages to be used as retail packaging for good C. As provided in §10.455(a)(1), the value of the blister packages is their adjusted value, which in this case is \$10. Good C has a regional value content requirement. The United States importer of good C decides to use the build-down method, $RVC = ((AV - VNM) / AV) \times 100$ (see §10.454(a) of this subpart), in determining whether good C satisfies the regional value content requirement. In applying this method, the non-originating blister packages are taken into account as non-originating. As such, their \$10 adjusted value is included in the VNM, value of non-originating materials, of good C.

Example 2. Same facts as in Example 1, but the blister packages are originating. In this case, the adjusted value of the originating blister packages would not be included as part of the VNM of good C under the build-down method. However, if the United States importer had used the build-up method, $RVC = (VOM / AV) \times 100$ (see §10.454(b)), the adjusted value of the blister packaging would be included as part of the VOM, value of originating material.
