

when sold to the producer in Peru (\$100), adjusted in accordance with the provisions of Article 8. In this example, it is irrelevant whether material x was initially imported into Peru by the seller (or by anyone else). So long as the producer acquired material x in Peru, it is intended that the value of material x will be determined on the basis of the price actually paid or payable by the producer adjusted in accordance with the provisions of Article 8.

Example 2. Same facts as in Example 1, except that the sale between the seller and the producer is subject to certain restrictions that preclude the application of Article 1. Under Article 2 of the Customs Valuation Agreement, the value is the transaction value of identical goods sold for export to the same country of importation and exported at or about the same time as the goods being valued. In order to permit the application of Article 2 to the domestic acquisition by the producer, it should be modified so that the value is the transaction value of identical goods sold within Peru at or about the same time the goods were sold to the producer in Peru. Thus, if the seller of material x also sold an identical material to another buyer in Peru without restrictions, that other sale would be used to determine the adjusted value of material x.

(c) *Permissible additions to, and deductions from, the value of materials.*

(1) *Additions to originating materials.* For originating materials, the following expenses, if not included under paragraph (a) of this section, may be added to the value of the originating material:

(c) *Textile and apparel goods*—(1) *General.* Except as provided in paragraph (c)(2) of this section, a textile or apparel good that is not an originating good because certain fibers or yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification set out in General Note 32(n), HTSUS, will nevertheless be considered to be an originating good if:

(i) The total weight of all such fibers or yarns in that component is not more than 10 percent of the total weight of that component; or

(1) The accessories, spare parts, or tools are classified with, and not invoiced separately from, the good, regardless of whether they are specified or separately identified in the invoice for the good; and

(2) The quantities and value of the accessories, spare parts, or tools are customary for the good.

(b) *Regional value content.* If the good is subject to a regional value content requirement, the value of the accessories, spare parts, or tools is taken into account as originating or non-originating materials, as the case may be, in calculating the regional value content of the good under §10.915 of this subpart.
