

the medical-vocational guidelines in appendix 2 of this subpart in making this determination, depending on whether the limitations or restrictions imposed by your impairment(s) and related symptoms, such as pain, are exertional, nonexertional, or a combination of both.

(b) *Exertional limitations.* When the limitations and restrictions imposed by your impairment(s) and related symptoms, such as pain, affect only your ability to meet the strength demands of jobs (sitting, standing, walking, lifting, carrying, pushing, and pulling), we consider that you have only exertional limitations. When your impairment(s) and related symptoms only impose exertional limitations and your specific vocational profile is listed in a rule contained in appendix 2 of this subpart, we will directly apply that rule to decide whether you are disabled.

(c) *Nonexertional limitations.* (1) When the limitations and restrictions imposed by your impairment(s) and related symptoms, such as pain, affect only your ability to meet the demands of jobs other than the strength demands, we consider that you have only nonexertional limitations or restrictions. Some examples of nonexertional limitations or restrictions include the following:

(i) You have difficulty functioning because you are nervous, anxious, or depressed;

(ii) You have difficulty maintaining attention or concentrating;

(iii) You have difficulty understanding or remembering detailed instructions;

(iv) You have difficulty in seeing or hearing;

(v) You have difficulty tolerating some physical feature(s) of certain work settings, e.g., you cannot tolerate dust or fumes; or

(vi) You have difficulty performing the manipulative or postural functions of some work such as reaching, handling, stooping, climbing, crawling, or crouching.

(2) If your impairment(s) and related symptoms, such as pain, only affect your ability to perform the non-exertional aspects of work-related activities, the rules in appendix 2 do not

direct factual conclusions of disabled or not disabled. The determination as to whether disability exists will be based on the principles in the appropriate sections of the regulations, giving consideration to the rules for specific case situations in appendix 2.

(d) *Combined exertional and non-exertional limitations.* When the limitations and restrictions imposed by your impairment(s) and related symptoms, such as pain, affect your ability to meet both the strength and demands of jobs other than the strength demands, we consider that you have a combination of exertional and nonexertional limitations or restrictions. If your impairment(s) and related symptoms, such as pain, affect your ability to meet both the strength and demands of jobs other than the strength demands, we will not directly apply the rules in appendix 2 unless there is a rule that directs a conclusion that you are disabled based upon your strength limitations; otherwise the rules provide a framework to guide our decision.

[56 FR 57943, Nov. 14, 1991, as amended at 68 FR 51163, Aug. 26, 2003]

#### SUBSTANTIAL GAINFUL ACTIVITY

##### § 404.1571 General.

The work, without regard to legality, that you have done during any period in which you believe you are disabled may show that you are able to work at the substantial gainful activity level. If you are able to engage in substantial gainful activity, we will find that you are not disabled. (We explain the rules for persons who are statutorily blind in § 404.1584.) Even if the work you have done was not substantial gainful activity, it may show that you are able to do more work than you actually did. We will consider all of the medical and vocational evidence in your file to decide whether or not you have the ability to engage in substantial gainful activity.

[45 FR 55584, Aug. 20, 1980, as amended at 65 FR 42783, July 11, 2000]

##### § 404.1572 What we mean by substantial gainful activity.

Substantial gainful activity is work activity that is both substantial and gainful:
