§ 416.969a Exertional and non-exertional limitations.

(a) General. Your impairment(s) and related symptoms, such as pain, may cause limitations of function or restrictions which limit your ability to meet certain demands of jobs. These limitations may be exertional, non-exertional, or a combination of both. Limitations are classified as exertional if they affect your ability to meet the strength demands of jobs. The classification of a limitation as exertional is related to the United States Department of Labor’s classification of jobs by various exertional levels (sedentary, light, medium, heavy, and very heavy) in terms of the strength demands for sitting, standing, walking, lifting, carrying, pushing, and pulling. Sections 416.967 and 416.969 explain how we use the classification of jobs by exertional levels (strength demands) which is contained in the Dictionary of Occupational Titles published by the Department of Labor, to determine the exertional requirements of work which exists in the national economy. Limitations or restrictions which affect your ability to meet the demands of jobs other than the strength demands, that is, demands other than sitting, standing, walking, lifting, carrying, pushing or pulling, are considered non-exertional. When we decide whether you can do your past relevant work (see §§ 416.920(f) and 416.994(b)(5)(vi)), we will compare our assessment of your residual functional capacity with the demands of your past relevant work. If you cannot do your past relevant work, we will use the same residual functional capacity assessment along with your educational and work experience to decide if you can adjust to any other work which exists in the national economy. (See §§ 416.920(g) and 416.994(b)(5)(vi).) Paragraphs (b), (c), and (d) of this section explain how we apply the medical-vocational guidelines in appendix 2 of subpart P of part 404 of this chapter in making this determination, depending on whether the limitations or restrictions imposed by your impairment(s) and related symptoms, such as pain, are exertional, non-exertional, or a combination of both.

(b) Exertional limitations. When the limitations and restrictions imposed by your impairment(s) and related symptoms, such as pain, affect only your ability to meet the strength demands of jobs (sitting, standing, walking, lifting, carrying, pushing, and pulling), we consider that you have only exertional limitations. When your impairment(s) and related symptoms only impose exertional limitations and your specific vocational profile is listed in a rule contained in appendix 2, we will directly apply that rule to decide whether you are disabled.

(c) Nonexertional limitations. (1) When the limitations and restrictions imposed by your impairment(s) and related symptoms, such as pain, affect only your ability to perform the non-exertional aspects of work-related activities, the rules in appendix 2 do not direct factual conclusions of disabled or not disabled. The determination as to whether disability exists will be

Substantial Gainful Activity

§ 416.971 General.

The work, without regard to legality, that you have done during any period in which you believe you are disabled may show that you are able to work at the substantial gainful activity level. If you are able to engage in substantial gainful activity, we will find that you are not disabled. (We explain the rules for persons who are statutorily blind in § 416.984.) Even if the work you have done was not substantial gainful activity, it may show that you are able to do more work than you actually did. We will consider all of the medical and vocational evidence in your file to decide whether or not you have the ability to engage in substantial gainful activity.

§ 416.972 What we mean by substantial gainful activity.

Substantial gainful activity is work activity that is both substantial and gainful:

(a) Substantial work activity. Substantial work activity is work activity that involves doing significant physical or mental activities. Your work may be substantial even if it is done on a part-time basis or if you do less, get paid less, or have less responsibility than when you worked before.

(b) Gainful work activity. Gainful work activity is work activity that you do for pay or profit. Work activity is gainful if it is the kind of work usually done for pay or profit, whether or not a profit is realized.

(c) Some other activities. Generally, we do not consider activities like taking care of yourself, household tasks, hobbies, therapy, school attendance, club activities, or social programs to be substantial gainful activity.

§ 416.973 General information about work activity.

(a) The nature of your work. If your duties require use of your experience, skills, supervision and responsibilities, or contribute substantially to the operation of a business, this tends to show that you have the ability to work at the substantial gainful activity level.

(b) How well you perform. We consider how well you do your work when we determine whether or not you are doing substantial gainful activity. If you do your work satisfactorily, this may show that you are working at the substantial gainful activity level. If you are unable, because of your impairments, to do ordinary or simple tasks satisfactorily without more supervision or assistance than is usually given other people doing similar work, this may show that you are not working at the substantial gainful activity level. If you are doing work that involves minimal duties that make little or no demands on you and that are of little or no use to your employer, or to the operation of a business if you are self-employed, this does not show that you are working at the substantial gainful activity level.

(c) If your work is done under special conditions. The work you are doing may be done under special conditions that take into account your impairment, such as work done in a sheltered workshop or as a patient in a hospital. If your work is done under special conditions, we may find that it does not show that you have the ability to do substantial gainful activity. Also, if
