related to accessibility will be reviewed during the physical inspection to determine possible indications of noncompliance with the Fair Housing Act (42 U.S.C. 3601–3619) and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794). A PHA will not be scored on those elements. Any indication of possible noncompliance will be referred to HUD’s Office of Fair Housing and Equal Opportunity.

§ 902.24 Database adjustment.

(a) Adjustments for factors not reflected or inappropriately reflected in physical condition score. Under circumstances described in this section, HUD may determine it is appropriate to review the results of a project’s physical inspection that are unusual or incorrect due to facts and circumstances affecting the PHA’s project that are not reflected in the inspection or that are reflected inappropriately in the inspection.

(1) The circumstances described in this section are not the circumstances that may be addressed by the technical review process described in §902.68. The circumstances addressed in this paragraph (a)(1) of this section may include inconsistencies between local code requirements and the HUD physical inspection protocol; conditions that are permitted by local variance or license or which are preexisting physical features that do not conform to, or are inconsistent with, HUD’s physical condition protocol; or the project or PHA having been scored for elements (e.g., roads, sidewalks, mail boxes, resident-owned appliances, etc.) that it does not own and is not responsible for maintaining. To qualify for an adjustment on this basis, the project or PHA must have notified the proper authorities regarding the deficient element.

(2) An adjustment due to these circumstances may be initiated by a project or PHA’s notification to the applicable HUD field office, and such notification shall include appropriate proof of the reasons for the unusual or incorrect result. Projects and PHAs may submit the request for this adjustment either prior to or after the physical inspection has been concluded. If the request is made after the conclusion of the physical inspection, the request must be made within 45 days of issuance of the project’s or PHA’s physical condition score. Based on the recommendation of the applicable HUD office following its review of the project evidence or documentation submitted by the project or PHA, HUD may determine that a reinspection and/or rescoring of the project or PHA is necessary.

(b) Adjustments for adverse conditions beyond the control of the PHA. Under certain circumstances, HUD may determine that certain deficiencies that adversely and significantly affect the physical condition score of the project were caused by circumstances beyond the control of the PHA. The correction of these conditions, however, remains the responsibility of the PHA.

(1) The circumstances addressed by this paragraph (b)(1) may include, but are not limited to, damage caused by third parties (such as a private entity or public entity undertaking work near a public housing project that results in damage to the project) or natural disasters. The circumstances addressed in this paragraph (b)(1) are not those addressed by the technical review process in §902.68.

(2) To adjust a physical condition score based on circumstances addressed in this paragraph, the PHA must submit a request to the applicable HUD field office requesting a reinspection or rescoring of the PHA’s project(s) dependent on the severity of the deficiency. The request must be submitted within 45 days of the issuance of the physical condition score to the PHA. If the PHA is requesting a reinspection, the request must be accompanied by a certification that all deficiencies identified in the original report have been corrected. Based on the recommendation of the applicable HUD office following its review of the project’s or PHA’s evidence or documentation, HUD may determine that a reinspection and rescoring of the PHA’s project(s) is necessary.

(c) Adjustments for modernization work in progress. HUD may determine that occupied dwelling units or other areas of a PHA’s project, which are subject
to physical inspection under this subpart, and which are undergoing modernization work, require an adjustment to the physical condition score.

(1) An occupied dwelling unit or other areas of a PHA’s project undergoing modernization are subject to physical inspection; the unit(s) and other areas of the PHA’s project that are subject to inspection and are not undergoing modernization at the time of the inspection (even if modernization is planned) will be subject to HUD’s physical inspection protocol without adjustment. For those elements of the unit or of the project that are undergoing modernization, deficiencies will be noted in accordance with HUD’s physical inspection protocol, but the project or PHA may request adjustment of the physical condition score as a result of modernization work in progress.

(2) An adjustment due to modernization work in progress may be initiated by a project’s or PHA’s notification to the applicable HUD field office, and the notification shall include supporting documentation of the modernization work under way at the time of the physical inspection. A project or PHA may submit the request for this adjustment either prior to or after the physical inspection has been concluded. If the request is made after the conclusion of the physical inspection, the request must be made within 45 days of issuance of the physical condition score. Based on the recommendation of the applicable HUD office, HUD may determine that a reinspection and re-scoring of the PHA’s project(s) are necessary.

§ 902.25 Physical condition scoring and thresholds.

(a) Scoring. Under the physical condition indicator, a score will be calculated for individual projects, as well as for the overall condition of a PHA’s public housing portfolio.

(b) Overall PHA physical condition indicator score. The overall physical condition indicator score is a unit-weighted average of project scores. The sum of the unit-weighted values is divided by the total number of units in the PHA’s portfolio to derive the overall physical condition indicator score.

(c) Thresholds. (1) The project or projects’ 100-point physical condition score is converted to a 40-point basis for the overall physical condition indicator score. The project scores on the 100-point basis are multiplied by .40 in order to derive a 40-point equivalent score to compute the overall physical condition score and overall PHAS score.

(2) In order to receive a passing score under the physical condition indicator, the PHA must achieve a score of at least 24 points, or 60 percent.

(3) A PHA that receives fewer than 24 points will be categorized as a substandard physical condition agency.

§ 902.26 Physical Inspection Report.

(a) Following the physical inspection of each project and the computation of the score(s) under this subpart, the PHA receives a Physical Inspection Report. The Physical Inspection Report allows the PHA to see the points lost by inspectable area, and the impact on the score of the H&S and EHS deficiencies.

(1) If EHS items are identified in the report, the PHA shall have the opportunity to correct, remedy, or act to abate all EHS deficiencies and may request a reinspection.

(2) The request for reinspection must be made within 45 days of the PHA’s receipt of the Physical Inspection Report. The request for reinspection must be accompanied by the PHA’s identification of the EHS deficiencies that have been corrected, remedied, or acted upon to abate and by the PHA’s certification that all such deficiencies identified in the report have been corrected, remedied, or acted upon to abate.

(3) If HUD determines that a reinspection is appropriate, it will arrange for a complete reinspection of the project(s) in question, not just the deficiencies previously identified. The reinspection will constitute the final physical inspection for the project, and HUD will issue a new inspection report (the final inspection report).

(4) If any of the previously identified EHS deficiencies that the PHA certified were corrected, remedied, or
