Example. In County X the real property tax becomes a lien on property and is assessed on November 30 for the current calendar year, which is also the real property tax year. There is no personal liability for the real property tax imposed by County X. A owns, on January 1, 1955, real property in County X. A uses an accrual method of accounting and has not made any election under section 461(c) to accrue ratably real property taxes. A sells real property on June 30, 1955. By reason of A's method of accounting, he could not deduct any part of the real property tax for 1955 on the real property since he sold the real property prior to November 30, 1955, the accrual date. Under section 164(d)(1), 180/365 (January 1–June 29, 1955) of the real property tax for the 1955 real property tax year is treated as imposed on A, and under section 164(d)(2)(D) that portion is treated as having accrued on June 30, 1955, and may be deducted by A for his taxable year in which such date falls. B, the purchaser from A, who uses an accrual method of accounting, has likewise not made an election under section 461(c) to accrue real property taxes ratably. Under section 164(d)(1), 185/365 of the real property taxes may be accrued by B on November 30, 1955, and deducted for his taxable year in which such date falls.

(7) *Cross references.* For determination of amount realized on a sale of real property, see section 1001(b) and the regulations thereunder. For determination of basis of real property acquired by purchase, see section 1012 and the regulations thereunder.

(8) *Effective dates.* Section 164(d) applies to taxable years ending after December 31, 1953, but only in the case of sales made after December 31, 1953. However, section 164(d) does not apply to any real property tax to the extent that such tax was allowable as a deduction under the Internal Revenue Code of 1939 to the seller for any taxable year which ended before January 1, 1954.

§ 1.164–7 Taxes of shareholder paid by corporation.

Banks and other corporations paying taxes assessed against their shareholders on account of their ownership of the shares of stock issued by such corporations without reimbursement from such shareholders may deduct the amount of taxes so paid. In such cases no deduction shall be allowed to the shareholders for such taxes. The amount so paid should not be included in the gross income of the shareholder.

§ 1.164–8 Payments for municipal services in atomic energy communities.

(a) *General.* For taxable years beginning after December 31, 1957, amounts paid or accrued by any owner of real property within any community (as defined in section 21b of the Atomic Energy Community Act of 1955 (42 U.S.C. 2304)) to compensate the Atomic Energy Commission for municipal-type services (or any agent or contractor authorized by the Atomic Energy Commission to charge for such services) shall be treated as State real property taxes paid or accrued for purposes of section 164. Such amounts shall be deductible as taxes to the extent provided in section 164, §§ 1.164–1 through 1.164–7, and this section. See paragraph (b) of this section for definition of the term ''Atomic Energy Commission''; paragraph (c) of this section for the definition of the term ''municipal-type services''; and paragraph (d) of this section for the definition of the term ''owner''.

(b) *Atomic Energy Commission.* For purposes of paragraph (a) of this section, the term ''Atomic Energy Commission'' shall mean—

(1) The Atomic Energy Commission, and

(2) Any other agency of the United States Government to which the duties and responsibilities of providing municipal-type services are delegated under the authority of section 101 of the Atomic Energy Community Act of 1955 (42 U.S.C. 2313).

(c) *Municipal-type services.* For purposes of paragraph (a) of this section, the term ''municipal-type services'' includes services usually rendered by a municipality and usually paid for by taxes. Examples of municipal-type services are police protection, fire protection, public recreational facilities, public libraries, public schools, public health, public welfare, and the maintenance of roads and streets. The term shall include sewage and refuse disposal which are maintained out of revenues derived from a general charge for municipal-type services; however, the term shall not include sewage and refuse disposal if a separate charge for such services is made. Charges assessed against local benefits of a kind tending to increase the value of the property assessed are not charges for municipal-type services. See section 164(c)(1) and §1.164–4.

(d) *Owner*. For purposes of paragraph (a) of this section, the term ''owner'' includes a person who holds the real property under a leasehold of 40 or more years from the Atomic Energy Commission (or any agency of the United States Government to which the duties and responsibilities of leasing real property are delegated under section 101 of the Atomic Energy Community Act of 1955), and a person who has entered into a contract to purchase under section 61 of the Atomic Energy Community Act of 1955 (42 U.S.C. 2361). An assignee (either immediate or more remote) of a lessee referred to in the preceding sentence will also qualify as an owner for purposes of paragraph (a) of this section.

(e) *Nonapplication of section 164(d)*. Section 164(d) and §1.164–6, relating to apportionment of taxes on real property between seller and purchaser, do not apply to a sale by the United States or any of its agencies of real property to which section 164(f) and this section apply. Thus, amounts paid or accrued which qualify under paragraph (a) of this section will continue to be deductible as taxes to the extent provided in this section, even in the taxable year in which the owner actually purchases the real property from the United States or any of its agencies. However, the provisions of section 164(d) and §1.164–6 shall apply to a sale of real property to which section 164(f) and this section apply, if the seller is other than the United States or any of its agencies.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6789, 29 FR 18147, Dec. 22, 1964]

§ 1.165–1 Losses.

(a) *Allowance of deduction*. Section 165(a) provides that, in computing taxable income under section 63, any loss actually sustained during the taxable year and not made good by insurance or some other form of compensation shall be allowed as a deduction subject to any provision of the internal revenue laws which prohibits or limits the amount of the deduction. This deduction for losses sustained shall be taken in accordance with section 165 and the regulations thereunder. For the disallowance of deductions for worthless securities issued by a political party, see §1.271–1.

(b) *Nature of loss allowable*. To be allowable as a deduction under section 165(a), a loss must be evidenced by closed and completed transactions, fixed by identifiable events, and, except as otherwise provided in section 165(h) and §1.165–11, relating to disaster losses, actually sustained during the taxable year. Only a bona fide loss is allowable. Substance and not mere form shall govern in determining a deductible loss.

(c) *Amount deductible*. (1) The amount of loss allowable as a deduction under section 165(a) shall not exceed the amount prescribed by §1.1011–1 as the adjusted basis for determining the loss from the sale or other disposition of the property involved. In the case of each such deduction claimed, therefore, the basis of the property must be properly adjusted as prescribed by §1.1011–1 for such items as expenditures, receipts, or losses, properly chargeable to capital account, and for such items as depreciation, obsolescence, amortization, and depletion, in order to determine the amount of loss allowable as a deduction. To determine the allowable loss in the case of property acquired before March 1, 1913, see also paragraph (b) of §1.1053–1.

(2) The amount of loss recognized upon the sale or exchange of property shall be determined for purposes of section 165(a) in accordance with §1.1002–1.

(3) A loss from the sale or exchange of a capital asset shall be allowed as a deduction under section 165(a) but only to the extent allowed in section 1211 (relating to limitation on capital losses) and section 1212 (relating to capital loss carrybacks and carryovers), and in the regulations under those sections.

(4) In determining the amount of loss actually sustained for purposes of section 165(a), proper adjustment shall be made for any salvage value and for any insurance or other compensation received.

(d) *Year of deduction.* (1) A loss shall be allowed as a deduction under section 165(a) only for the taxable year in which the loss is sustained. For this purpose, a loss shall be treated as sustained during the taxable year in which the loss occurs as evidenced by closed and completed transactions and as fixed by identifiable events occurring in such taxable year. For provisions relating to situations where a loss attributable to a disaster will be treated as sustained in the taxable year immediately preceding the taxable year in which the disaster actually occurred, see section 165(h) and §1.165–11.

(2)(i) If a casualty or other event occurs which may result in a loss and, in the year of such casualty or event, there exists a claim for reimbursement with respect to which there is a reasonable prospect of recovery, no portion of the loss with respect to which reimbursement may be received is sustained, for purposes of section 165, until it can be ascertained with reasonable certainty whether or not such reimbursement will be received. Whether a reasonable prospect of recovery exists with respect to a claim for reimbursement of a loss is a question of fact to be determined upon an examination of all facts and circumstances. Whether or not such reimbursement will be received may be ascertained with reasonable certainty, for example, by a settlement of the claim, by an adjudication of the claim, or by an abandonment of the claim. When a taxpayer claims that the taxable year in which a loss is sustained is fixed by his abandonment of the claim for reimbursement, he must be able to produce objective evidence of his having abandoned the claim, such as the execution of a release.

(ii) If in the year of the casualty or other event a portion of the loss is not covered by a claim for reimbursement with respect to which there is a reasonable prospect of recovery, then such portion of the loss is sustained during the taxable year in which the casualty or other event occurs. For example, if property having an adjusted basis of $10,000 is completely destroyed by fire in 1961, and if the taxpayer's only claim for reimbursement consists of an insurance claim for $8,000 which is settled in 1962, the taxpayer sustains a loss of $2,000 in 1961. However, if the taxpayer's automobile is completely destroyed in 1961 as a result of the negligence of another person and there exists a reasonable prospect of recovery on a claim for the full value of the automobile against such person, the taxpayer does not sustain any loss until the taxable year in which the claim is adjudicated or otherwise settled. If the automobile had an adjusted basis of $5,000 and the taxpayer secures a judgment of $4,000 in 1962, $1,000 is deductible for the taxable year 1962. If in 1963 it becomes reasonably certain that only $3,500 can ever be collected on such judgment, $500 is deductible for the taxable year 1963.

(iii) If the taxpayer deducted a loss in accordance with the provisions of this paragraph and in a subsequent taxable year receives reimbursement for such loss, he does not recompute the tax for the taxable year in which the deduction was taken but includes the amount of such reimbursement in his gross income for the taxable year in which received, subject to the provisions of section 111, relating to recovery of amounts previously deducted.

(3) Any loss arising from theft shall be treated as sustained during the taxable year in which the taxpayer discovers the loss (see §1.165–8, relating to theft losses). However, if in the year of discovery there exists a claim for reimbursement with respect to which there is a reasonable prospect of recovery, no portion of the loss with respect to which reimbursement may be received is sustained, for purposes of section 165, until the taxable year in which it can

be ascertained with reasonable certainty whether or not such reimbursement will be received.

(4) The rules of this paragraph are applicable with respect to a casualty or other event which may result in a loss and which occurs after January 16, 1960. If the casualty or other event occurs on or before such date, a taxpayer may treat any loss resulting therefrom in accordance with the rules then applicable, or, if he so desires, in accordance with the provisions of this paragraph; but no provision of this paragraph shall be construed to permit a deduction of the same loss or any part thereof in more than one taxable year or to extend the period of limitations within which a claim for credit or refund may be filed under section 6511.

(e) *Limitation on losses of individuals.* In the case of an individual, the deduction for losses granted by section 165(a) shall, subject to the provisions of section 165(c) and paragraph (a) of this section, be limited to:

(1) Losses incurred in a trade or business;

(2) Losses incurred in any transaction entered into for profit, though not connected with a trade or business; and

(3) Losses of property not connected with a trade or business and not incurred in any transaction entered into for profit, if such losses arise from fire, storm, shipwreck, or other causalty, or from theft, and if the loss involved has not been allowed for estate tax purposes in the estate tax return. For additional provisions pertaining to the allowance of casualty and theft losses, see §§ 1.165–7 and 1.165–8, respectively.

For special rules relating to an election by a taxpayer to deduct disaster losses in the taxable year immediately preceding the taxable year in which the disaster occurred, see section 165(h) and § 1.165–11.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6735, 29 FR 6493, May 19, 1964; T.D. 6996, 34 FR 835, Jan. 18, 1969; T.D. 7301, 39 FR 963, Jan. 4, 1974; T.D. 7522, 42 FR 63411, Dec. 16, 1977]

§ 1.165–2 Obsolescence of nondepreciable property.

(a) *Allowance of deduction.* A loss incurred in a business or in a transaction entered into for profit and arising from the sudden termination of the usefulness in such business or transaction of any nondepreciable property, in a case where such business or transaction is discontinued or where such property is permanently discarded from use therein, shall be allowed as a deduction under section 165(a) for the taxable year in which the loss is actually sustained. For this purpose, the taxable year in which the loss is sustained is not necessarily the taxable year in which the overt act of abandonment, or the loss of title to the property, occurs.

(b) *Exceptions.* This section does not apply to losses sustained upon the sale or exchange of property, losses sustained upon the obsolescence or worthlessness of depreciable property, casualty losses, or losses reflected in inventories required to be taken under section 471. The limitations contained in sections 1211 and 1212 upon losses from the sale or exchange of capital assets do not apply to losses allowable under this section.

(c) *Cross references.* [Reserved] For further guidance, see § 1.165–2T(c).

(d) *Effective/applicability date.* [Reserved] For further guidance, see § 1.165–2T(d).

(e) *Expiration date.* [Reserved] For further guidance, see § 1.165–2T(e).

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960, as amended by T.D. 9564, 76 FR 81084, Dec. 27, 2011]

§ 1.165–2T Obsolescence of nondepreciable property (temporary).

(a) and (b) [Reserved] For further guidance, see § 1.165–2(a) and (b).

(c) *Cross references.* For the allowance under section 165(a) of losses arising from the permanent withdrawal of depreciable property from use in the trade or business or in the production of income, see § 1.167(a)–8T, § 1.168(i)–1T, or § 1.168(i)–8T, as applicable. For provisions respecting the obsolescence of depreciable property for which depreciation is determined under section 167 (but not under section 168, section 1400I, section 1400L(c), section 168 prior to its amendment by the Tax Reform Act of 1986 (100 Stat. 2121), or under an additional first year depreciation deduction provision of the Internal Revenue Code (for example, section 168(k) through (n), 1400L(b), or 1400N(d))), see §1.167(a)–9. For the allowance of casualty losses, see §1.165–7.

(d) *Effective/applicability date*—(1) *In general*. This section applies to taxable years beginning on or after January 1, 2014. Section 1.165–2 as contained in 26 CFR part 1 edition revised as of April 1, 2011, applies to taxable years beginning before January 1, 2014.

(2) *Optional early application*. A taxpayer may choose to apply this section to taxable years beginning on or after January 1, 2012.

(e) *Expiration date*. The applicability of this section expires on December 23, 2014.

[T.D. 9564, 76 FR 81084, Dec. 27, 2011, as amended at 77 FR 74584, Dec. 17, 2012]

§ 1.165–3 Demolition of buildings.

(a) *Intent to demolish formed at time of purchase*. (1) Except as provided in subparagraph (2) of this paragraph, the following rule shall apply when, in the course of a trade or business or in a transaction entered into for profit, real property is purchased with the intention of demolishing either immediately or subsequently the buildings situated thereon: No deduction shall be allowed under section 165(a) on account of the demolition of the old buildings even though any demolition originally planned is subsequently deferred or abandoned. The entire basis of the property so purchased shall, notwithstanding the provisions of §1.167(a)–5, be allocated to the land only. Such basis shall be increased by the net cost of demolition or decreased by the net proceeds from demolition.

(2)(i) If the property is purchased with the intention of demolishing the buildings and the buildings are used in a trade or business or held for the production of income before their demolition, a portion of the basis of the property may be allocated to such buildings and depreciated over the period during which they are so used or held. The fact that the taxpayer intends to demolish the buildings shall be taken into account in making the apportionment of basis between the land and buildings under §1.167(a)–5. In any event, the portion of the purchase price which may be allocated to the buildings shall not exceed the present value of the right to receive rentals from the buildings over the period of their intended use. The present value of such right shall be determined at the time that the buildings are first used in the trade or business or first held for the production of income. If the taxpayer does not rent the buildings, but uses them in his own trade or business or in the production of his income, the present value of such right shall be determined by reference to the rentals which could be realized during such period of intended use. The fact that the taxpayer intends to rent or use the buildings for a limited period before their demolition shall also be taken into account in computing the useful life in accordance with paragraph (b) of §1.167(a)–1.

(ii) Any portion of the purchase price which is allocated to the buildings in accordance with this subparagraph shall not be included in the basis of the land computed under subparagraph (1) of this paragraph, and any portion of the basis of the buildings which has not been recovered through depreciation or otherwise at the time of the demolition of the buildings is allowable as a deduction under section 165.

(iii) The application of this subparagraph may be illustrated by the following example:

Example. In January 1958, A purchased land and a building for $60,000 with the intention of demolishing the building. In the following April, A concludes that he will be unable to commence the construction of a proposed new building for a period of more than 3 years. Accordingly, on June 1, 1958, he leased the building for a period of 3 years at an annual rental of $1,200. A intends to demolish the building upon expiration of the lease. A may allocate a portion of the $60,000 basis of the property to the building to be depreciated over the 3-year period. That portion is equal to the present value of the right to receive $3,600 (3 times $1,200). Assuming that the present value of that right determined as of June 1, 1958, is $2,850, A may allocate that amount to the building and, if A files his return on the basis of a taxable year ending May 31, 1959, A may take a depreciation deduction with respect to such building of $950 for such taxable year. The basis of the land to A as determined under subparagraph (1) of this paragraph is reduced by $2,850. If on June 1, 1960, A ceases to rent the building and demolishes it, the balance of the undepreciated portion allocated to the buildings, $950, may be deducted from gross income under section 165.

(3) The basis of any building acquired in replacement of the old buildings shall not include any part of the basis of the property originally purchased even though such part was, at the time of purchase, allocated to the buildings to be demolished for purposes of determining allowable depreciation for the period before demolition.

(b) *Intent to demolish formed subsequent to the time of acquisition.* (1) Except as provided in subparagraph (2) of this paragraph, the loss incurred in a trade or business or in a transaction entered into for profit and arising from a demolition of old buildings shall be allowed as a deduction under section 165(a) if the demolition occurs as a result of a plan formed subsequent to the acquisition of the buildings demolished. The amount of the loss shall be the adjusted basis of the buildings demolished increased by the net cost of demolition or decreased by the net proceeds from demolition. See paragraph (c) of § 1.165–1 relating to amount deductible under section 165. The basis of any building acquired in replacement of the old buildings shall not include any part of the basis of the property demolished.

(2) If a lessor or lessee of real property demolishes the buildings situated thereon pursuant to a lease or an agreement which resulted in a lease, under which either the lessor was required or the lessee was required or permitted to demolish such buildings, no deduction shall be allowed to the lessor under section 165(a) on account of the demolition of the old buildings. However, the adjusted basis of the demolished buildings, increased by the net cost of demolition or decreased by the net proceeds from demolition, shall be considered as a part of the cost of the lease to be amortized over the remaining term thereof.

(c) *Evidence of intention.* (1) Whether real property has been purchased with the intention of demolishing the buildings thereon or whether the demolition of the buildings occurs as a result of a plan formed subsequent to their acquisition is a question of fact, and the answer depends upon an examination of all the surrounding facts and circumstances. The answer to the question does not depend solely upon the statements of the taxpayer at the time he acquired the property or demolished the buildings, but such statements, if made, are relevant and will be considered. Certain other relevant facts and circumstances that exist in some cases and the inferences that might reasonably be drawn from them are described in subparagraphs (2) and (3) of this paragraph. The question as to the taxpayer's intention is not answered by any inference that is drawn from any one fact or circumstance but can be answered only by a consideration of all relevant facts and circumstances and the reasonable inferences to be drawn therefrom.

(2) An intention at the time of acquisition to demolish may be suggested by:

(i) A short delay between the date of acquisition and the date of demolition;

(ii) Evidence of prohibitive remodeling costs determined at the time of acquisition;

(iii) Existence of municipal regulations at the time of acquisition which would prohibit the continued use of the buildings for profit purposes;

(iv) Unsuitability of the buildings for the taxpayer's trade or business at the time of acquisition; or

(v) Inability at the time of acquisition to realize a reasonable income from the buildings.

(3) The fact that the demolition occurred pursuant to a plan formed subsequent to the acquisition of the property may be suggested by:

(i) Substantial improvement of the buildings immediately after their acquisition;

(ii) Prolonged use of the buildings for business purposes after their acquisition;

(iii) Suitability of the buildings for investment purposes at the time of acquisition;

(iv) Substantial change in economic or business conditions after the date of acquisition;

(v) Loss of useful value occurring after the date of acquisition;

(vi) Substantial damage to the buildings occurring after their acquisition;

(vii) Discovery of latent structural defects in the buildings after their acquisition;

(viii) Decline in the taxpayer's business after the date of acquisition;

(ix) Condemnation of the property by municipal authorities after the date of acquisition; or

(x) Inability after acquisition to obtain building material necessary for the improvement of the property.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 74474, 41 FR 55710, Dec. 22, 1976]

§ 1.165–4 Decline in value of stock.

(a) *Deduction disallowed.* No deduction shall be allowed under section 165(a) solely on account of a decline in the value of stock owned by the taxpayer when the decline is due to a fluctuation in the market price of the stock or to other similar cause. A mere shrinkage in the value of stock owned by the taxpayer, even though extensive, does not give rise to a deduction under section 165(a) if the stock has any recognizable value on the date claimed as the date of loss. No loss for a decline in the value of stock owned by the taxpayer shall be allowed as a deduction under section 165(a) except insofar as the loss is recognized under § 1.1002–1 upon the sale or exchange of the stock and except as otherwise provided in § 1.165–5 with respect to stock which becomes worthless during the taxable year.

(b) *Stock owned by banks.* (1) In the regulation of banks and certain other corporations, Federal and State authorities may require that stock owned by such organizations be charged off as worthless or written down to a nominal value. If, in any such case, this requirement is premised upon the worthlessness of the stock, the charging off or writing down will be considered prima facie evidence of worthlessness for purposes of section 165(a); but, if the charging off or writing down is due to a fluctuation in the market price of the stock or if no reasonable attempt to determine the worthlessness of the stock has been made, then no deduction shall be allowed under section 165(a) for the amount so charged off or written down.

(2) This paragraph shall not be construed, however, to permit a deduction under section 165(a) unless the stock owned by the bank or other corporation actually becomes worthless in the taxable year. Such a taxpayer owning stock which becomes worthless during the taxable year is not precluded from deducting the loss under section 165(a) merely because, in obedience to the specific orders or general policy of such supervisory authorities, the value of the stock is written down to a nominal amount instead of being charged off completely.

(c) *Application to inventories.* This section does not apply to a decline in the value of corporate stock reflected in inventories required to be taken by a dealer in securities under section 471. See § 1.471–5.

(d) *Definition.* As used in this section, the term ''stock'' means a share of stock in a corporation or a right to subscribe for, or to receive, a share of stock in a corporation.

§ 1.165–5 Worthless securities.

(a) *Definition of security.* As used in section 165(g) and this section, the term ''security'' means:

(1) A share of stock in a corporation;

(2) A right to subscribe for, or to receive, a share of stock in a corporation; or

(3) A bond, debenture, note, or certificate, or other evidence of indebtedness to pay a fixed or determinable sum of money, which has been issued with interest coupons or in registered form by a domestic or foreign corporation or by any government or political subdivision thereof.

(b) *Ordinary loss.* If any security which is not a capital asset becomes wholly worthless during the taxable year, the loss resulting therefrom may be deducted under section 165(a) as an ordinary loss.

(c) *Capital loss.* If any security which is a capital asset becomes wholly worthless at any time during the taxable year, the loss resulting therefrom may be deducted under section 165(a) but only as though it were a loss from a sale or exchange, on the last day of the taxable year, of a capital asset. See section 165(g)(1). The amount so allowed as a deduction shall be subject to the limitations upon capital losses described in paragraph (c)(3) of § 1.165–1.

(d) *Loss on worthless securities of an affiliated corporation*—(1) *Deductible as an ordinary loss.* If a taxpayer which is a domestic corporation owns any security of a domestic or foreign corporation which is affiliated with the taxpayer within the meaning of subparagraph (2) of this paragraph and such security becomes wholly worthless during the taxable year, the loss resulting therefrom may be deducted under section 165(a) as an ordinary loss in accordance with paragraph (b) of this section. The fact that the security is in fact a capital asset of the taxpayer is immaterial for this purpose, since section 165(g)(3) provides that such security shall be treated as though it were not a capital asset for the purposes of section 165(g)(1). A debt which becomes wholly worthless during the taxable year shall be as an ordinary loss in accordance with the provisions of this subparagraph, to the extent that such debt is a security within the meaning of paragraph (a)(3) of this section.

(2) *Affiliated corporation defined.* For purposes of this paragraph, a corporation shall be treated as affiliated with the taxpayer owning the security if—

(i)(*a*) In the case of a taxable year beginning on or after January 1, 1970, the taxpayer owns directly—

(*1*) Stock possessing at least 80 percent of the voting power of all classes of such corporation's stock, and

(*2*) At least 80 percent of each class of such corporation's nonvoting stock excluding for purposes of this subdivision (i)(*a*) nonvoting stock which is limited and preferred as to dividends (see section 1504(a)), or

(*b*) In the case of a taxable year beginning before January 1, 1970, the taxpayer owns directly at least 95 percent of each class of the stock of such corporation;

(ii) None of the stock of such corporation was acquired by the taxpayer solely for the purpose of converting a capital loss sustained by reason of the worthlessness of any such stock into an ordinary loss under section 165(g)(3), and

(iii) More than 90 percent of the aggregate of the gross receipts of such corporation for all the taxable years during which it has been in existence has been from sources other than royalties, rents (except rents derived from rental of properties to employees of such corporation in the ordinary course of its operating business), dividends, interest (except interest received on the deferred purchase price of operating assets sold), annuities, and gains from sales or exchanges of stocks and securities. For this purpose, the term ''gross receipts'' means total receipts determined without any deduction for cost of goods sold, and gross receipts from sales or exchanges of stocks and securities shall be taken into account only to the extent of gains from such sales or exchanges.

(e) *Bonds issued by an insolvent corporation.* A bond of an insolvent corporation secured only by a mortgage from which nothing is realized for the bondholders on foreclosure shall be regarded as having become worthless not later than the year of the foreclosure sale, and no deduction in respect of the loss shall be allowed under section 165(a) in computing a bondholder's taxable income for a subsequent year. See also paragraph (d) of §1.165–1.

(f) *Decline in market value.* A taxpayer possessing a security to which this section relates shall not be allowed any deduction under section 165(a) on account of mere market fluctuation in the value of such security. See also §1.165–4.

(g) *Application to inventories.* This section does not apply to any loss upon the worthlessness of any security reflected in inventories required to be taken by a dealer in securities under section 471. See §1.471–5.

(h) *Special rules for banks.* For special rules applicable under this section to worthless securities of a bank, including securities issued by an affiliated bank, see §1.582–1.

(i) *Abandonment of securities*—(1) *In general.* For purposes of section 165 and this section, a security that becomes wholly worthless includes a security described in paragraph (a) of this section that is abandoned and otherwise satisfies the requirements for a deductible loss under section 165. If the abandoned security is a capital asset and is not described in section 165(g)(3) and paragraph (d) of this section (concerning worthless securities of certain affiliated corporations), the resulting loss is treated as a loss from the sale or exchange, on the last day of the taxable year, of a capital asset. See section 165(g)(1) and paragraph (c) of this section. To abandon a security, a taxpayer must permanently surrender and relinquish all rights in the security and receive no consideration in exchange for the security. For purposes of this section, all the facts and circumstances determine whether the transaction is properly characterized as an abandonment or other type of transaction, such as an actual sale or exchange, contribution to capital, dividend, or gift.

(2) *Effective/applicability date.* This paragraph (i) applies to any abandonment of stock or other securities after March 12, 2008.

(j) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. (i) X Corporation, a domestic manufacturing corporation which makes its return on the basis of the calendar year, owns 100 percent of each class of the stock of Y Corporation; and, in addition, 19 percent of the common stock (the only class of stock) of Z Corporation, which it acquired in 1948. Y Corporation, a domestic manufacturing corporation which makes its return on the basis of the calendar year, owns 81 percent of the common stock of Z Corporation, which it acquired in 1946. It is established that the stock of Z Corporation, which has from its inception derived all of its gross receipts from manufacturing operations, became worthless during 1971.

(ii) Since the stock of Z Corporation which is owned by X Corporation is a capital asset and since X Corporation does not directly own at least 80 percent of the stock of Z Corporation, any loss sustained by X Corporation upon the worthlessness of such stock shall be deducted under section 165(g)(1) and paragraph (c) of this section as a loss from a sale or exchange on December 31, 1971, of a capital asset. The loss so sustained by X Corporation shall be considered a long-term capital loss under the provisions of section 1222(4), since the stock was held by that corporation for more than 6 months.

(iii) Since Z Corporation is considered to be affiliated with Y Corporation under the provisions of paragraph (d)(2) of this section, any loss sustained by Y Corporation upon the worthlessness of the stock of Z Corporation shall be deducted in 1971 under section 165(g)(3) and paragraph (d)(1) of this section as an ordinary loss.

Example 2. (i) On January 1, 1971, X Corporation, a domestic manufacturing corporation which makes its return on the basis of the calendar year, owns 60 percent of each class of the stock of Y Corporation, a foreign corporation, which it acquired in 1950. Y Corporation has, from the date of its incorporation, derived all of its gross receipts from manufacturing operations. It is established that the stock of Y Corporation became worthless on June 30, 1971. On August 1, 1971, X Corporation acquires the balance of the stock of Y Corporation for the purpose of obtaining the benefit of section 165(g)(3) with respect to the loss it has sustained on the worthlessness of the stock of Y Corporation.

(ii) Since the stock of Y Corporation which is owned by X Corporation is a capital asset and since Y Corporation is not to be treated as affiliated with X Corporation under the provisions of paragraph (d)(2) of this section, notwithstanding the fact that, at the close of 1971, X Corporation owns 100 percent of each class of stock of Y Corporation, any loss sustained by X Corporation upon the worthlessness of such stock shall be deducted under the provisions of section 165(g)(1) and paragraph (c) of this section as a loss from a sale or exchange on December 31, 1971, of a capital asset.

Example 3. (i) X Corporation, a domestic manufacturing corporation which makes its return on the basis of the calendar year, owns 80 percent of each class of the stock of Y Corporation, which from its inception has derived all of its gross receipts from manufacturing operations. As one of its capital assets, X Corporation owns $100,000 in registered bonds issued by Y Corporation payable at maturity on December 31, 1974. It is established that these bonds became worthless during 1971.

(ii) Since Y Corporation is considered to be affiliated with X Corporation under the provisions of paragraph (d)(2) of this section, any loss sustained by X Corporation upon the worthlessness of these bonds may be deducted in 1971 under section 165(g)(3) and paragraph (d)(1) of this section as an ordinary loss. The loss may not be deducted under section 166 as a bad debt. See section 166(e).

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7224, 37 FR 25928, Dec. 6, 1972; T.D. 9386, 73 FR 13124, Mar. 12, 2008]

§ 1.165–6 Farming losses.

(a) *Allowance of losses.* (1) Except as otherwise provided in this section, any loss incurred in the operation of a farm as a trade or business shall be allowed as a deduction under section 165(a) or as a net operating loss deduction in accordance with the provisions of section 172. See § 1.172–1.

(2) If the taxpayer owns and operates a farm for profit in addition to being

engaged in another trade or business, but sustains a loss from the operation of the farming business, then the amount of loss sustained in the operation of the farm may be deducted from gross income, if any, from all other sources.

(3) Loss incurred in the operation of a farm for recreation or pleasure shall not be allowed as a deduction from gross income. See §1.162–12.

(b) *Loss from shrinkage.* If, in the course of the business of farming, farm products are held for a favorable market, no deduction shall be allowed under section 165(a) in respect of such products merely because of shrinkage in weight, decline in value, or deterioration in storage.

(c) *Loss of prospective crop.* The total loss by frost, storm, flood, or fire of a prospective crop being grown in the business of farming shall not be allowed as a deduction under section 165(a).

(d) *Loss of livestock*—(1) *Raised stock.* A taxpayer engaged in the business of raising and selling livestock, such as cattle, sheep, or horses, may not deduct as a loss under section 165(a) the value of animals that perish from among those which were raised on the farm.

(2) *Purchased stock.* The loss sustained upon the death by disease, exposure, or injury of any livestock purchased and used in the trade or business of farming shall be allowed as a deduction under section 165(a). See, also, paragraph (e) of this section.

(e) *Loss due to compliance with orders of governmental authority.* The loss sustained upon the destruction by order of the United States, a State, or any other governmental authority, of any livestock, or other property, purchased and used in the trade or business of farming shall be allowed as a deduction under section 165(a).

(f) *Amount deductible*—(1) *Expenses of operation.* The cost of any feed, pasture, or care which is allowed under section 162 as an expense of operating a farm for profit shall not be included as a part of the cost of livestock for purposes of determining the amount of loss deductible under section 165(a) and this section. For the deduction of farming expenses, see §1.162–12.

(2) *Losses reflected in inventories.* If inventories are taken into account in determining the income from the trade or business of farming, no deduction shall be allowed under this section for losses sustained during the taxable year upon livestock or other products, whether purchased for resale or produced on the farm, to the extent such losses are reflected in the inventory on hand at the close of the taxable year. Nothing in this section shall be construed to disallow the deduction of any loss reflected in the inventories of the taxpayer. For provisions relating to inventories of farmers, see section 471 and the regulations thereunder.

(3) *Other limitations.* For other provisions relating to the amount deductible under this section, see paragraph (c) of §1.165–1, relating to the amount deductible under section 165(a); §1.165–7, relating to casualty losses; and §1.1231–1, relating to gains and losses from the sale or exchange of certain property used in the trade or business.

(g) *Other provisions applicable to farmers.* For other provisions relating to farmers, see §1.61–4, relating to gross income of farmers; paragraph (b) of §1.167(a)–6, relating to depreciation in the case of farmers; and §1.175–1, relating to soil and water conservation expenditures.

§ 1.165–7 Casualty losses.

(a) *In general*—(1) *Allowance of deduction.* Except as otherwise provided in paragraphs (b)(4) and (c) of this section, any loss arising from fire, storm, shipwreck, or other casualty is allowable as a deduction under section 165(a) for the taxable year in which the loss is sustained. However, see §1.165–6, relating to farming losses, and §1.165–11, relating to an election by a taxpayer to deduct disaster losses in the taxable year immediately preceding the taxable year in which the disaster occurred. The manner of determining the amount of a casualty loss allowable as a deduction in computing taxable income under section 63 is the same whether the loss has been incurred in a trade or business or in any transaction entered into for profit, or whether it has been a loss of property not connected with a trade or business and not incurred in any transaction entered into for profit. The amount of a casualty loss shall be determined in accordance with paragraph (b) of this section. For other rules relating to the treatment of deductible casualty losses, see §1.1231–1, relating to the involuntary conversion of property.

(2) *Method of valuation.* (i) In determining the amount of loss deductible under this section, the fair market value of the property immediately before and immediately after the casualty shall generally be ascertained by competent appraisal. This appraisal must recognize the effects of any general market decline affecting undamaged as well as damaged property which may occur simultaneously with the casualty, in order that any deduction under this section shall be limited to the actual loss resulting from damage to the property.

(ii) The cost of repairs to the property damaged is acceptable as evidence of the loss of value if the taxpayer shows that (*a*) the repairs are necessary to restore the property to its condition immediately before the casualty, (*b*) the amount spent for such repairs is not excessive, (*c*) the repairs do not care for more than the damage suffered, and (*d*) the value of the property after the repairs does not as a result of the repairs exceed the value of the property immediately before the casualty.

(3) *Damage to automobiles.* An automobile owned by the taxpayer, whether used for business purposes or maintained for recreation or pleasure, may be the subject of a casualty loss, including those losses specifically referred to in subparagraph (1) of this paragraph. In addition, a casualty loss occurs when an automobile owned by the taxpayer is damaged and when:

(i) The damage results from the faulty driving of the taxpayer or other person operating the automobile but is not due to the willful act or willful negligence of the taxpayer or of one acting in his behalf or

(ii) The damage results from the faulty driving of the operator of the vehicle with which the automobile of the taxpayer collides.

(4) *Application to inventories.* This section does not apply to a casualty loss reflected in the inventories of the taxpayer. For provisions relating to inventories, see section 471 and the regulations thereunder.

(5) *Property converted from personal use.* In the case of property which originally was not used in the trade or business or for income-producing purposes and which is thereafter converted to either of such uses, the fair market value of the property on the date of conversion, if less than the adjusted basis of the property at such time, shall be used, after making proper adjustments in respect of basis, as the basis for determining the amount of loss under paragraph (b)(1) of this section. See paragraph (b) of §1.165–9, and §1.167(g)–1.

(6) *Theft losses.* A loss which arises from theft is not considered a casualty loss for purposes of this section. See §1.165–8, relating to theft losses.

(b) *Amount deductible*—(1) *General rule.* In the case of any casualty loss whether or not incurred in a trade or business or in any transaction entered into for profit, the amount of loss to be taken into account for purposes of section 165(a) shall be the lesser of either—

(i) The amount which is equal to the fair market value of the property immediately before the casualty reduced by the fair market value of the property immediately after the casualty; or

(ii) The amount of the adjusted basis prescribed in §1.1011–1 for determining the loss from the sale or other disposition of the property involved.

However, if property used in a trade or business or held for the production of income is totally destroyed by casualty, and if the fair market value of such property immediately before the casualty is less than the adjusted basis of such property, the amount of the adjusted basis of such property shall be treated as the amount of the loss for purposes of section 165(a).

(2) *Aggregation of property for computing loss.* (i) A loss incurred in a trade or business or in any transaction entered into for profit shall be determined under subparagraph (1) of this paragraph by reference to the single, identifiable property damaged or destroyed. Thus, for example, in determining the fair market value of the property before and after the casualty

in a case where damage by casualty has occurred to a building and ornamental or fruit trees used in a trade or business, the decrease in value shall be measured by taking the building and trees into account separately, and not together as an integral part of the realty, and separate losses shall be determined for such building and trees.

(ii) In determining a casualty loss involving real property and improvements thereon not used in a trade or business or in any transaction entered into for profit, the improvements (such as buildings and ornamental trees and shrubbery) to the property damaged or destroyed shall be considered an integral part of the property, for purposes of subparagraph (1) of this paragraph, and no separate basis need be apportioned to such improvements.

(3) *Examples.* The application of this paragraph may be illustrated by the following examples:

Example 1. In 1956 B purchases for $3,600 an automobile which he uses for nonbusiness purposes. In 1959 the automobile is damaged in an accidental collision with another automobile. The fair market value of B's automobile is $2,000 immediately before the collision and $1,500 immediately after the collision. B receives insurance proceeds of $300 to cover the loss. The amount of the deduction allowable under section 165(a) for the taxable year 1959 is $200, computed as follows:

Value of automobile immediately before casualty	$2,000
Less: Value of automobile immediately after casualty	1,500
Value of property actually destroyed	500
Loss to be taken into account for purposes of section 165(a): Lesser amount of property actually destroyed ($500) or adjusted basis of property ($3,600)	500
Less: Insurance received	300
Deduction allowable	200

Example 2. In 1958 A purchases land containing an office building for the lump sum of $90,000. The purchase price is allocated between the land ($18,000) and the building ($72,000) for purposes of determining basis. After the purchase A planted trees and ornamental shrubs on the grounds surrounding the building. In 1961 the land, building, trees, and shrubs are damaged by hurricane. At the time of the casualty the adjusted basis of the land is $18,000 and the adjusted basis of the building is $66,000. At that time the trees and shrubs have an adjusted basis of $1,200. The fair market value of the land and building immediately before the casualty is $18,000 and $70,000, respectively, and immediately after the casualty is $18,000 and $52,000, respectively. The fair market value of the trees and shrubs immediately before the casualty is $2,000 and immediately after the casualty is $400. In 1961 insurance of $5,000 is received to cover the loss to the building. A has no other gains or losses in 1961 subject to section 1231 and §1.1231–1. The amount of the deduction allowable under section 165(a) with respect to the building for the taxable year 1961 is $13,000, computed as follows:

Value of property immediately before casualty	$70,000
Less: Value of property immediately after casualty	52,000
Value of property actually destroyed	18,000
Less: Insurance received	5,000
Loss to be taken into account for purposes of section 165(a): Lesser amount of property actually destroyed ($18,000) or adjusted basis of property ($66,000)	18,000
Less: Insurance received	5,000
Deduction allowable	13,000

The amount of the deduction allowable under section 165(a) with respect to the trees and shrubs for the taxable year 1961 is $1,200, computed as follows:

Value of property immediately before casualty	$2,000
Less: Value of property immediately after casualty	$400
Value of property actually destroyed	1,600
Loss to be taken into account for purposes of section 165(a): Lesser amount of property actually destroyed ($1,600) or adjusted basis of property ($1,200)	1,200

Example 3. Assume the same facts as in example (2) except that A purchases land containing a house instead of an office building. The house is used as his private residence. Since the property is used for personal purposes, no allocation of the purchase price is necessary for the land and house. Likewise, no individual determination of the fair market values of the land, house, trees, and shrubs is necessary. The amount of the deduction allowable under section 165(a) with respect to the land, house, trees, and shrubs for the taxable year 1961 is $14,600, computed as follows:

Value of property immediately before casualty	$90,000
Less: Value of property immediately after casualty	70,400
Value of property actually destroyed	19,600
Loss to be taken into account for purposes of section 165(a): Lesser amount of property actually destroyed ($19,600) or adjusted basis of property ($91,200)	19,600
Less: Insurance received	5,000
Deduction allowable	14,600

(4) *Limitation on certain losses sustained by individuals after December 31, 1963.* (i) Pursuant to section 165(c)(3), the deduction allowable under section 165(a) in respect of a loss sustained—

(*a*) After December 31, 1963, in a taxable year ending after such date,

(*b*) In respect of property not used in a trade or business or for income producing purposes, and

(*c*) From a single casualty

shall be limited to that portion of the loss which is in excess of $100. The nondeductibility of the first $100 of loss applies to a loss sustained after December 31, 1963, without regard to when the casualty occurred. Thus, if property not used in a trade or business or for income producing purposes is damaged or destroyed by a casualty which occurred prior to January 1, 1964, and loss resulting therefrom is sustained after December 31, 1963, the $100 limitation applies.

(ii) The $100 limitation applies separately in respect of each casualty and applies to the entire loss sustained from each casualty. Thus, if as a result of a particular casualty occurring in 1964, a taxpayer sustains in 1964 a loss of $40 and in 1965 a loss of $250, no deduction is allowable for the loss sustained in 1964 and the loss sustained in 1965 must be reduced by $60 ($100−$40). The determination of whether damage to, or destruction of, property resulted from a single casualty or from two or more separate casualties will be made upon the basis of the particular facts of each case. However, events which are closely related in origin generally give rise to a single casualty. For example, if a storm damages a taxpayer's residence and his automobile parked in his driveway, any loss sustained results from a single casualty. Similarly, if a hurricane causes high waves, all wind and flood damage to a taxpayer's property caused by the hurricane and the waves results from a single casualty.

(iii) Except as otherwise provided in this subdivision, the $100 limitation applies separately to each individual taxpayer who sustains a loss even though the property damaged or destroyed is owned by two or more individuals. Thus, if a house occupied by two sisters and jointly owned by them is damaged or destroyed, the $100 limitation applies separately to each sister in respect of any loss sustained by her. However, for purposes of applying the $100 limitation, a husband and wife who file a joint return for the first taxable year in which the loss is allowable as a deduction are treated as one individual taxpayer. Accordingly, if property jointly owned by a husband and wife, or property separately owned by the husband or by the wife, is damaged or destroyed by a single casualty in 1964, and a loss is sustained in that year by either or both the husband or wife, only one $100 limitation applies if a joint return is filed for 1964. If, however, the husband and wife file separate returns for 1964, the $100 limitation applies separately in respect of any loss sustained by the husband and in respect of any loss sustained by the wife. Where losses from a single casualty are sustained in two or more separate tax years, the husband and wife shall, for purposes of applying the $100 limitation to such losses, be treated as one individual for all such years if they file a joint return for the first year in which a loss is sustained from the casualty; they shall be treated as separate individuals for all such years if they file separate returns for the first such year. If a joint return is filed in the first loss year but separate returns are filed in a subsequent year, any unused portion of the $100 limitation shall be allocated equally between the husband and wife in the latter year.

(iv) If a loss is sustained in respect of property used partially for business and partially for nonbusiness purposes, the $100 limitation applies only to that portion of the loss properly attributable to the nonbusiness use. For example, if a taxpayer sustains a $1,000 loss in respect of an automobile which he uses 60 percent for business and 40 percent for nonbusiness, the loss is allocated 60 percent to business use and 40 percent to nonbusiness use. The $100 limitation applies to the portion of the loss allocable to the nonbusiness loss.

(c) *Loss sustained by an estate.* A casualty loss of property not connected with a trade or business and not incurred in any transaction entered into for profit which is sustained during the settlement of an estate shall be allowed as a deduction under sections 165(a) and 641(b) in computing the taxable income of the estate if the loss has not been allowed under section 2054 in computing the taxable estate of the decedent and if the statement has been filed in accordance with § 1.642(g)–1. See section 165(c)(3).

(d) *Loss treated as though attributable to a trade or business.* For the rule treating a casualty loss not connected with a trade or business as though it were a deduction attributable to a trade or business for purposes of computing a net operating loss, see paragraph (a)(3)(iii) of § 1.172–3.

(e) *Effective date.* The rules of this section are applicable to any taxable year beginning after January 16, 1960. If, for any taxable year beginning on or before such date, a taxpayer computed the amount of any casualty loss in accordance with the rules then applicable, such taxpayer is not required to change the amount of the casualty loss allowable for any such prior taxable year. On the other hand, the taxpayer may, if he so desires, amend his income tax return for such year to compute the amount of a casualty loss in accordance with the provisions of this section, but no provision in this section shall be construed as extending the period of limitations within which a claim for credit or refund may be filed under section 6511.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6712, 29 FR 3652, Mar. 24, 1964; T.D. 6786, 29 FR 18501, Dec. 29, 1964; T.D. 7522, 42 FR 63411, Dec. 16, 1977]

§ 1.165–8 Theft losses.

(a) *Allowance of deduction.* (1) Except as otherwise provided in paragraphs (b) and (c) of this section, any loss arising from theft is allowable as a deduction under section 165(a) for the taxable year in which the loss is sustained. See section 165(c)(3).

(2) A loss arising from theft shall be treated under section 165(a) as sustained during the taxable year in which the taxpayer discovers the loss. See section 165(e). Thus, a theft loss is not deductible under section 165(a) for the taxable year in which the theft actually occurs unless that is also the year in which the taxpayer discovers the loss. However, if in the year of discovery there exists a claim for reimbursement with respect to which there is a reasonable prospect of recovery, see paragraph (d) of § 1.165–1.

(3) The same theft loss shall not be taken into account both in computing a tax under chapter 1, relating to the income tax, or chapter 2, relating to additional income taxes, of the Internal Revenue Code of 1939 and in computing the income tax under the Internal Revenue Code of 1954. See section 7852(c), relating to items not to be twice deducted from income.

(b) *Loss sustained by an estate.* A theft loss of property not connected with a trade or business and not incurred in any transaction entered into for profit which is discovered during the settlement of an estate, even though the theft actually occurred during a taxable year of the decedent, shall be allowed as a deduction under sections 165(a) and 641(b) in computing the taxable income of the estate if the loss has not been allowed under section 2054 in computing the taxable estate of the decedent and if the statement has been filed in accordance with § 1.642(g)–1. See section 165(c)(3). For purposes of determining the year of deduction, see paragraph (a)(2) of this section.

(c) *Amount deductible.* The amount deductible under this section in respect of a theft loss shall be determined consistently with the manner prescribed in § 1.165–7 for determining the amount of casualty loss allowable as a deduction under section 165(a). In applying the provisions of paragraph (b) of § 1.165–7 for this purpose, the fair market value of the property immediately after the theft shall be considered to be zero. In the case of a loss sustained after December 31, 1963, in a taxable year ending after such date, in respect of property not used in a trade or business or for income producing purposes, the amount deductible shall be limited to that portion of the loss which is in excess of $100. For rules applicable in applying the $100 limitation, see paragraph (b)(4) of § 1.165–7. For other rules relating to the treatment of deductible theft losses, see § 1.1231–1, relating to the involuntary conversion of property.

(d) *Definition.* For purposes of this section the term ''theft'' shall be deemed to include, but shall not necessarily be limited to, larceny, embezzlement, and robbery.

(e) *Application to inventories.* This section does not apply to a theft loss reflected in the inventories of the taxpayer. For provisions relating to inventories, see section 471 and the regulations thereunder.

(f) *Example.* The application of this section may be illustrated by the following example:

Example. In 1955 B, who makes her return on the basis of the calendar year, purchases for personal use a diamond brooch costing $4,000. On November 30, 1961, at which time it has a fair market value of $3,500, the brooch is stolen; but B does not discover the loss until January 1962. The brooch was fully insured against theft. A controversy develops with the insurance company over its liability in respect of the loss. However, in 1962, B has a reasonable prospect of recovery of the fair market value of the brooch from the insurance company. The controversy is settled in March 1963, at which time B receives $2,000 in insurance proceeds to cover the loss from theft. No deduction for the loss is allowable for 1961 or 1962; but the amount of the deduction allowable under section 165(a) for the taxable year 1963 is $1,500, computed as follows:

Value of property immediately before theft	$3,500
Less: Value of property immediately after the theft	0
Balance	3,500
Loss to be taken into account for purposes of section 165(a): ($3,500 but not to exceed adjusted basis of $4,000 at time of theft)	$3,500
Less: Insurance received in 1963	2,000
Deduction allowable for 1963	1,500

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6786, 29 FR 18502, Dec. 29, 1964]

§ 1.165–9 Sale of residential property.

(a) *Losses not allowed.* A loss sustained on the sale of residential property purchased or constructed by the taxpayer for use as his personal residence and so used by him up to the time of the sale is not deductible under section 165(a).

(b) *Property converted from personal use.* (1) If property purchased or constructed by the taxpayer for use as his personal residence is, prior to its sale, rented or otherwise appropriated to income-producing purposes and is used for such purposes up to the time of its sale, a loss sustained on the sale of the property shall be allowed as a deduction under section 165(a).

(2) The loss allowed under this paragraph upon the sale of the property shall be the excess of the adjusted basis prescribed in §1.1011–1 for determining loss over the amount realized from the sale. For this purpose, the adjusted basis for determining loss shall be the lesser of either of the following amounts, adjusted as prescribed in §1.1011–1 for the period subsequent to the conversion of the property to income-producing purposes:

(i) The fair market value of the property at the time of conversion, or

(ii) The adjusted basis for loss, at the time of conversion, determined under §1.1011–1 but without reference to the fair market value.

(3) For rules relating to casualty losses of property converted from personal use, see paragraph (a)(5) of §1.165–7. To determine the basis for depreciation in the case of such property, see §1.167(g)–1. For limitations on the loss from the sale of a capital asset, see paragraph (c)(3) of §1.165–1.

(c) *Examples.* The application of paragraph (b) of this section may be illustrated by the following examples:

Example 1. Residential property is purchased by the taxpayer in 1943 for use as his personal residence at a cost of $25,000, of which $15,000 is allocable to the building. The taxpayer uses the property as his personal residence until January 1, 1952, at which time its fair market value is $22,000, of which $12,000 is allocable to the building. The taxpayer rents the property from January 1, 1952, until January 1, 1955, at which time it is sold for $16,000. On January 1, 1952, the building has an estimated useful life of 20 years. It is assumed that the building has no estimated salvage value and that there are no adjustments in respect of basis other than depreciation, which is computed on the straight-line method. The loss to be taken into account for purposes of section 165(a) for the taxable year 1955 is $4,200, computed as follows:

Basis of property at time of conversion for purposes of this section (that is, the lesser of $25,000 cost or $22,000 fair market value)	$22,000
Less: Depreciation allowable from January 1, 1952, to January 1, 1955 (3 years at 5 percent based on $12,000, the value of the building at time of conversion, as prescribed by §1.167(g)–1)	1,800
Adjusted basis prescribed in §1.1011–1 for determining loss on sale of the property	20,200

Less: Amount realized on sale	16,000
Loss to be taken into account for purposes of section 165(a)	4,200

In this example the value of the building at the time of conversion is used as the basis for computing depreciation. See example (2) of this paragraph wherein the adjusted basis of the building is required to be used for such purpose.

Example 2. Residential property is purchased by the taxpayer in 1940 for use as his personal residence at a cost of $23,000, of which $10,000 is allocable to the building. The taxpayer uses the property as his personal residence until January 1, 1953, at which time its fair market value is $20,000, of which $12,000 is allocable to the building. The taxpayer rents the property from January 1, 1953, until January 1, 1957, at which time it is sold for $17,000. On January 1, 1953, the building has an estimated useful life of 20 years. It is assumed that the building has no estimated salvage value and that there are no adjustments in respect of basis other than depreciation, which is computed on the straight-line method. The loss to be taken into account for purposes of section 165(a) for the taxable year 1957 is $1,000, computed as follows:

Basis of property at time of conversion for purposes of this section (that is, the lesser of $23,000 cost or $20,000 fair market value)	$20,000
Less: Depreciation allowable from January 1, 1953, to January 1, 1957 (4 years at 5 percent based on $10,000, the cost of the building, as prescribed by § 1.167(g)–1	2,000
Adjusted basis prescribed in § 1.1011–1 for determining loss on sale of the property	$18,000
Less: Amount realized on sale	17,000
Loss to be taken into account for purposes of section 165(a)	1,000

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6712, 29 FR 3652, Mar. 24, 1964]

§ 1.165–10 Wagering losses.

Losses sustained during the taxable year on wagering transactions shall be allowed as a deduction but only to the extent of the gains during the taxable year from such transactions. In the case of a husband and wife making a joint return for the taxable year, the combined losses of the spouses from wagering transactions shall be allowed to the extent of the combined gains of the spouses from wagering transactions.

§ 1.165–11 Election in respect of losses attributable to a disaster.

(a) *In general.* Section 165(h) provides that a taxpayer who has sustained a disaster loss which is allowable as a deduction under section 165(a) may, under certain circumstances, elect to deduct such loss for the taxable year immediately preceding the taxable year in which the disaster actually occurred.

(b) *Loss subject to election.* The election provided by section 165(h) and paragraph (a) of this section applies only to a loss:

(1) Arising from a disaster resulting in a determination referred to in subparagraph (2) of this paragraph and occurring—

(i) After December 31, 1971, or

(ii) After December 31, 1961, and before January 1, 1972, and during the period following the close of a particular taxable year of the taxpayer and on or before the due date for filing the income tax return for that taxable year (determined without regard to any extension of time granted the taxpayer for filing such return);

(2) Occurring in an area subsequently determined by the President of the United States to warrant assistance by the Federal Government under the Disaster Relief Act of 1974; and

(3) Constituting a loss otherwise allowable as a deduction for the year in which the loss occurred under section 165(a) and the provisions of §§ 1.165–1 through 1.165–10 which are applicable to such losses.

(c) *Amount of loss to which election applies.* The amount of the loss to which section 165(h) and this section apply shall be the amount of the loss sustained during the period specified in paragraph (b)(1) of this section computed in accordance with the provisions of section 165 and those provisions of §§ 1.165–1 through 1.165–10 which are applicable to such losses. However, for purposes of making such computation, the period specified in paragraph (b)(1) of this section shall be deemed to be a taxable year.

(d) *Scope and effect of election.* An election made pursuant to section 165(h) and this section in respect of a loss arising from a particular disaster shall apply to the entire loss sustained by the taxpayer from such disaster during the period specified in paragraph (b)(1) of this section in the area specified in paragraph (b)(2) of this section. If such an election is made, the disaster to which the election relates will be deemed to have occurred in the taxable year immediately preceding the taxable year in which the disaster actually occurred, and the loss to which the election applies will be deemed to have been sustained in such preceding taxable year.

(e) *Time and manner of making election.* An election to claim a deduction with respect to a disaster loss described in paragraph (b) of this section for the taxable year immediately preceding the taxable year in which the disaster actually occurred must be made by filing a return, an amended return, or a claim for refund clearly showing that the election provided by section 165(h) has been made. In general, the return or claim should specify the date or dates of the disaster which gave rise to the loss, and the city, town, county, and State in which the property which was damaged or destroyed was located at the time of the disaster. An election in respect of a loss arising from a particular disaster occurring after December 31, 1971, must be made on or before the later of (1) the due date for filing the income tax return (determined without regard to any extension of time granted the taxpayer for filing such return) for the taxable year in which the disaster actually occurred, or (2) the due date of filing the income tax return (determined with regard to any extension of time granted the taxpayer for filing such return) for the taxable year immediately preceding the taxable year in which the disaster actually occurred. Such election shall be irrevocable after the later of (1) 90 days after the date on which the election was made, or (2) March 6, 1973. No revocation of such election shall be effective unless the amount of any credit or refund which resulted from such election is paid to the Internal Revenue Service within the revocation period described in the preceding sentence. However, in the case of a revocation made before receipt by the taxpayer of a refund claimed pursuant to such election, the revocation shall be effective if the refund is repaid within 30 calendar days after such receipt. An election in respect of a loss arising from a particular disaster occurring after December 31, 1961, and before January 1, 1972, must be made on or before the later of (1) the 15th day of the third month following the month in which falls the date prescribed for the filing of the income tax return (determined without regard to any extension of time granted the taxpayer for filing such return) for the taxable year immediately preceding the taxable year in which the disaster actually occurred, or (2) the due date for filing the income tax return (determined with regard to any extension of time granted the taxpayer for filing such return) for the taxable year immediately preceding the taxable year in which the disaster actually occurred. Such election shall be irrevocable after the date by which it must be made.

[T.D. 6735, 29 FR 6493, May 19, 1964, as amended by T.D. 7224, 37 FR 25928, Dec. 6, 1972; T.D. 7522, 42 FR 63411, Dec. 16, 1977]

§ 1.165–12 Denial of deduction for losses on registration-required obligations not in registered form.

(a) *In general.* Except as provided in paragraph (c) of this section, nothing in section 165(a) and the regulations thereunder, or in any other provision of law, shall be construed to provide a deduction for any loss sustained on any registration-required obligation held after December 31, 1982, unless the obligation is in registered form or the issuance of the obligation was subject to tax under section 4701. The term ''registration-required obligation'' has the meaning given to that term in section 163(f)(2), except that clause (iv) of subparagraph (A) thereof shall not apply. Therefore, although an obligation that is not in registered form is described in §1.163–5(c)(1), the holder of such an obligation shall not be allowed a deduction for any loss sustained on such obligation unless paragraph (c) of this section applies. The term ''holder'' means the person that would be denied a loss deduction under section 165(j)(1) or denied capital gain treatment under section 1287(a). For purposes of this section, the term *United States* means the United States and its possessions within the meaning of § 1.163–5(c)(2)(iv).

(b) *Registered form*—(1) *Obligations issued after September 21, 1984.* With respect to any obligation originally issued after September 21, 1984, the term ''registered form'' has the meaning given that term in section 103(j)(3) and the regulations thereunder. Therefore, an obligation that would otherwise be in registered form is not considered to be in registered form if it can be transferred at that time or at any time until its maturity by any means not described in § 5f.103–1(c). An obligation that, as of a particular time, is not considered to be in registered form because it can be transferred by any means not described in § 5f.103–1(c) is considered to be in registered form at all times during the period beginning with a later time and ending with the maturity of the obligation in which the obligation can be transferred only by a means described in § 5f.103–1(c).

(2) *Obligations issued after December 31, 1982 and on or before September 21, 1984.* With respect to any obligation originally issued after December 31, 1982 and on or before September 21, 1984 or an obligation originally issued after September 21, 1984 pursuant to the exercise of a warrant or the conversion of a convertible obligation, which warrant or obligation (including conversion privilege) was issued after December 31, 1982 and on or before September 21, 1984, that obligation will be considered in registered form if it satisfied § 5f.163–1 or the proposed regulations provided in § 1.163–5(c) and published in the FEDERAL REGISTER on September 2, 1983 (48 FR 39953).

(c) *Registration-required obligations not in registered form which are not subject to section 165(j)(1).* Notwithstanding the fact that an obligation is a registration-required obligation that is not in registered form, the holder will not be subject to section 165(j)(1) if the holder meets the conditions of any one of the following subparagraphs (1), (2), (3), or (4) of this paragraph (c).

(1) *Persons permitted to hold in connection with the conduct of a trade or business.* (i) The holder is an underwriter, broker, dealer, bank, or other financial institution (defined in paragraph (c)(1)(iv)) that holds such obligation in connection with its trade or business conducted outside the United States; or the holder is a broker-dealer (registered under Federal or State law or exempted from registration by the provisions of such law because it is a bank) that holds such obligation for sale to customers in the ordinary course of its trade or business.

(ii) The holder must offer to sell, sell and deliver the obligation in bearer form only outside of the United States except that a holder that is a registered broker-dealer as described in paragraph (c)(1)(i) of this section may offer to sell and sell the obligation in bearer form inside the United States to a financial institution as defined in paragraph (c)(1)(iv) of this section for its own account or for the account of another financial institution or of an exempt organization as defined in section 501(c)(3).

(iii) The holder may deliver an obligation in bearer form that is offered or sold inside the United States only if the holder delivers it to a financial institution that is purchasing for its own account, or for the account of another financial institution or of an exempt organization, and the financial institution or organization that purchases the obligation for its own account or for whose account the obligation is purchased represents that it will comply with the requirements of section 165(j)(3) (A), (B), or (C). Absent actual knowledge that the representation is false, the holder may rely on a written statement provided by the financial institution or exempt organization, including a statement that is delivered in electronic form. The holder may deliver a registration-required obligation in bearer form that is offered and sold outside the United States to a person other than a financial institution only if the holder has evidence in its records that such person is not a U.S. citizen or resident and does not have actual knowledge that such evidence is false. Such evidence may include a written statement by that person, including a statement that is delivered electronically. For purposes of this paragraph (c), the term *deliver* includes a transfer of an obligation evidenced by a book entry including a book entry notation by a clearing organization evidencing transfer of the obligation from one member of the organization to another member. For purposes of this paragraph (c), the term *deliver* does not include a transfer of an obligation to the issuer or its agent for cancellation or extinguishment. The record-retention provisions in §1.1441–1(e)(4)(iii) shall apply to any statement that a holder receives pursuant to this paragraph (c)(1)(iii).

(iv) For purposes of paragraph (c) of this section, the term ''financial institution'' means a person which itself is, or more than 50 percent of the total combined voting power of all classes of whose stock entitled to vote is owned by a person which is—

(A) Engaged in the conduct of a banking, financing, or similar business within the meaning of section 954(c)(3)(B) as in effect before the Tax Reform Act of 1986, and the regulations thereunder;

(B) Engaged in business as a broker or dealer in securities;

(C) An insurance company;

(D) A person that provides pensions or other similar benefits to retired employees;

(E) Primarily engaged in the business of rendering investment advice;

(F) A regulated investment company or other mutual fund; or

(G) A finance corporation a substantial part of the business of which consists of making loans (including the acquisition of obligations under a lease which is entered into primarily as a financing transaction), acquiring accounts receivable, notes or installment obligations arising out of the sale of tangible personal property or the performing of services, or servicing debt obligations.

(2) *Persons permitted to hold obligations for their own investment account.* The holder is a financial institution holding the obligation for its own investment account that satisfies the conditions set forth in subdivisions (i), (ii), (iii), and (iv) of his paragraph (c) (2).

(i) The holder reports on its Federal income tax return for the taxable year any interest payments received (including original issue discount includable in gross income for such taxable year) with respect to such obligation and gain or loss on the sale or other disposition of such obligation;

(ii) The holder indicates on its Federal income tax return that income, gain or loss described in paragraph (c)(2)(i) is attributable to registration-required obligations held in bearer form for its own account;

(iii) The holder of a bearer obligation that resells the obligation inside the United States resells the obligation only to another financial institution for its own account or for the account of another financial institution or exempt organization; and

(iv) The holder delivers such obligation in bearer form to any other person in accordance with paragraph (c)(1) (ii) and (iii) of this section.

(3) *Persons permitted to hold through financial institutions.* The holder is any person that purchases and holds a registration-required obligation in bearer form through a financial institution with which the holder maintains a customer, custodial or nominee relationship and such institution agrees to satisfy, and does in fact satisfy, the conditions set forth in subdivisions (i), (ii), (iii), (iv) and (v) of this paragraph (c)(3).

(i) The financial institution makes a return of information to the Internal Revenue Service with respect to any interest payments received. The financial institution must report original issue discount includable in the holder's gross income for the taxable year on any obligation so held, but only if the obligation appears in an Internal Revenue Service publication of obligations issued at an original issue discount and only in an amount determined in accordance with information contained in that publication. An information return for any interest payment shall be made on a Form 1099 for the calendar year. It shall indicate the aggregate amount of the payment received, the name, address and taxpayer identification number of the holder, and such other information as is required by the form. No return of information is required under this subdivision if the financial institution reports payments under section 6041 or 6049.

(ii) The financial institution makes a return of information on Form 1099B with respect to any disposition by the holder of such obligation. The return shall show the name, address, and taxpayer identification number of the holder of the obligation, Committee on Uniform Security Information Procedures (CUSIP), gross proceeds, sale date, and such other information as may be required by the form. No return of information is required under this subdivision if such financial institution reports with respect to the disposition under section 6045.

(iii) In the case of a bearer obligation offered for resale or resold in the United States, the financial institution may resell the obligation only to another financial institution for its own account or for the account of an exempt organization.

(iv) The financial institution covenants with the holder that the financial institution will deliver the obligation in bearer form in accordance with the requirements set forth in paragraph (c)(1) (ii) and (iii).

(v) The financial institution delivers the obligation in bearer form in accordance with paragraph (c)(1) (ii) and (iv) as if the financial institution delivering the obligation were the holder referred to in such paragraph.

(4) *Conversion of obligations into registered form.* The holder is not a person described in paragraph (c) (1), (2), or (3) of this section, and within thirty days of the date when the seller or other transferor is reasonably able to make the bearer obligation available to the holder, the holder surrenders the obligation to a transfer agent or the issuer for conversion of the obligation into registered form. If such obligation is not registered within such 30 day period, the holder shall be subject to sections 165(j) and 1287(a).

(d) *Effective date.* These regulations apply generally to obligations issued after January 20, 1987. However, a taxpayer may choose to apply the rules of §1.165–12 with respect to an obligation issued after December 31, 1982 and on or before January 20, 1987, which obligation is held after January 20, 1987.

[T.D. 8110, 51 FR 45459, Dec. 19, 1986, as amended by T.D. 8734, 62 FR 53416, Oct. 14, 1997]

§ 1.165–13T Questions and answers relating to the treatment of losses on certain straddle transactions entered into before the effective date of the Economic Recovery Tax Act of 1981, under section 108 of the Tax Reform Act of 1984 (temporary).

The following questions and answers concern the treatment of losses on certain straddle transactions entered into before the effective date of the Economic Recovery Tax Act of 1981, under the Tax Reform Act of 1984 (98 Stat. 494).

Q–1 What is the scope of section 108 of the Tax Reform Act of 1984 (Act)?

A–1 Section 108 of the Act provides that in the case of any disposition of one or more positions, which were entered into before 1982 and form part of a straddle, and to which the provisions of title V of The Economic Recovery Act of 1981 (ERTA) do not apply, any loss from such disposition shall be allowed for the taxable year of the disposition if such position is part of a transaction entered into for profit. For purposes of section 108 of the Act, the term ''straddle'' has the meaning given to such term by section 1092(c) of the Internal Revenue Code of 1954 as in effect on the day after the date of enactment of ERTA; including a straddle all the positions of which are regulated futures contracts (as defined in Q&A–6 of this section). Straddles in certain listed stock options were not covered by ERTA and are not affected by this provision.

Q–2 What transactions are considered entered into for profit?

A–2 A transaction is considered entered into for profit if the transaction is entered into for profit within the meaning of section 165(c)(2) of the Code. In this respect, section 108 of the Act restates existing law applicable to straddle transactions. All the circumstances surrounding the transaction, including the magnitude and timing for entry into, and disposition of, the positions comprising the transaction are relevant in making the determination whether a transaction is considered entered into for profit. Moreover, in order for section 108 of the Act to apply, the transaction must have sufficient substance to be recognized for Federal income tax purposes.

Thus, for example, since a ''sham'' transaction would not be recognized for tax purposes, section 108 of the Act would not apply to such a transaction.

Q–3 If a loss is disallowed in a taxable year (year 1) because the transaction was not entered into for profit, is the entire gain from the straddle occurring in a later taxable year taxed?

A–3 No. Under section 108(c) of the Act the taxpayer is allowed to offset the gain in the subsequent taxable year by the amount of loss (including expenses) disallowed in year 1.

Q–4 In what manner does the for-profit test of Q&A–2 apply to losses from straddle transactions sustained by commodities dealers and persons regularly engaged in investing in regulated futures contracts?

A–4 In general, for a loss to be allowable with respect to positions that form part of a straddle, the for-profit test of Q&A–2 must be satisfied. However, certain positions (see Q&A–6) held by a commodities dealer or person regularly engaged in investing in regulated futures contracts are rebuttably presumed to be part of a transaction entered into for profit. Thus, the for profit test is applied to commodities dealers and persons regularly engaged in investing in regulated futures contracts in light of the factors relating to the applicability and rebuttal of the profit presumption, including, for example, the nature and extent of the taxpayer's trading activities.

Q–5 Under what circumstances is the presumption considered rebutted?

A–5 All the facts and circumstances of each case are to be considered in determining if the presumption is rebutted. The following factors are significant in making this determination: (1) The level of transaction costs; (2) the extent to which the transaction results from trading patterns different from the taxpayer's regular patterns; and (3) the extent of straddle transactions having tax results disproportionate to economic consequences. Factors other than the ones described above may be taken into account in making the determination. Moreover, a determination is not to be made solely on the basis of the number of factors indicating that the presumption is rebutted.

Q–6 Does a commodities dealer or person regularly engaged in investing in regulated futures contracts qualify for the profit presumption for all transactions?

A–6 No. The presumption is only applicable to regulated futures contract transactions in property that is the subject of the person's regular trading activity. For example, a commodities dealer who regularly trades only in agricultural futures will not qualify for the presumption for a silver futures straddle transaction. For purposes of this section, the term ''regulated futures contracts'' has the meaning given to such term by section 1256(b) of the Code as in effect before the enactment of the Tax Reform Act of 1984.

Q–7 Who qualifies as a commodities dealer or as a person regularly engaged in investing in regulated futures contracts for purposes of the profit presumption?

A–7 For purposes of this section, the term ''commodities dealer'' has the meaning given to such term by section 1402(i)(2)(B) of the Code. Section 1402(i)(2)(B) defines a commodities dealer as a person who is actively engaged in trading section 1256 contracts (which includes regulated futures contracts as defined in Q&A–6) and is registered with a domestic board of trade which is designated as a contract market by the Commodity Futures Trading Commission. To determine if a person is regularly engaged in investing in regulated futures contracts all the facts and circumstances should be considered including, but not limited to, the following factors: (1) Regularity of trading at all times throughout the year; (2) the level of transaction costs; (3) substantial volume and economic consequences of trading at all times throughout the year; (4) percentage of time dedicated to commodity trading activities as compared to other activities; and (5) the person's knowledge of the regulated futures contract market.

Q–8 If a commodities dealer or a person regularly engaged in investing in regulated futures contracts participates in a syndicate, as defined in section 1256(e)(3)(B) of the Code, does the rebuttable presumption of ''entered into for profit'' apply to the transactions entered into through the syndicate?

A–8 No. A participant in a syndicate does not qualify for the rebuttable presumption of ''entered into for profit'' with respect to transactions entered into by or for the syndicate. A syndicate is defined in section 1256(e)(3)(B) of the Code as any partnership or other entity (other than a corporation which is not an S corporation) if more than 35 percent of the losses of such entity during the taxable year are allocable to limited partners or limited entrepreneurs (within the meaning of section 464(e)(2)).

Q–9 Will the Service continue to make the closed and completed transaction argument set forth in Rev. Rul. 77–185, 1977–1 C.B. 48, with respect to transactions covered by section 108 of the Act?

A–9 No. The closed and completed transaction argument will not be made regarding transactions subject to section 108 of the Act. In general, losses in such transactions will be allowed for the taxable year of disposition if the transaction is not viewed as a sham and satisfies the ''entered into for profit'' test described in Q&A–2. Nevertheless, for certain positions covered by section 108 of the Act, various Code sections may apply without regard to whether such position constitutes a straddle to disallow or limit the loss otherwise allowable in the year of the disposition. For example, dispositions of certain positions held by a partnership which resulted in a loss to a partner may be limited or disallowed under section 465 of 704(d).

[T.D. 7968, 49 FR 33445, Aug. 23, 1984]

§ 1.166–1 Bad debts.

(a) *Allowance of deduction.* Section 166 provides that, in computing taxable income under section 63, a deduction shall be allowed in respect of bad debts owed to the taxpayer. For this purpose, bad debts shall, subject to the provisions of section 166 and the regulations thereunder, be taken into account either as—

(1) A deduction in respect of debts which become worthless in whole or in part; or as

(2) A deduction for a reasonable addition to a reserve for bad debts.

(b) *Manner of selecting method.* (1) A taxpayer filing a return of income for the first taxable year for which he is entitled to a bad debt deduction may select either of the two methods prescribed by paragraph (a) of this section for treating bad debts, but such selection is subject to the approval of the district director upon examination of the return. If the method so selected is approved, it shall be used in returns for all subsequent taxable years unless the Commissioner grants permission to use the other method. A statement of facts substantiating any deduction claimed under section 166 on account of bad debts shall accompany each return of income.

(2) Taxpayers who have properly selected one of the two methods for treating bad debts under provisions of prior law corresponding to section 166 shall continue to use that method for all subsequent taxable years unless the Commissioner grants permission to use the other method.

(3)(i) For taxable years beginning after December 31, 1959, application for permission to change the method of treating bad debts shall be made in accordance with section 446(e) and paragraph (e)(3) of § 1.446–1.

(ii) For taxable years beginning before January 1, 1960, application for permission to change the method of treating bad debts shall be made at least 30 days before the close of the taxable year for which the change is effective.

(4) Nothwithstanding paragraphs (b) (1), (2), and (3) of this section, a dealer in property currently employing the accrual method of accounting and currently maintaining a reserve for bad debts under section 166(c) (which may have included guaranteed debt obligations described in section 166(f)(1)(A)) may establish a reserve for section 166(f)(1)(A) guaranteed debt obligations for a taxable year ending after October 21, 1965 under section 166(f) and § 1.166–10 by filing on or before April 17, 1986 an amended return indicating that such a reserve has been established. The establishment of such a reserve will not be considered a change in method of accounting for purposes of

section 446(e). However, an election by a taxpayer to establish a reserve for bad debts under section 166(c) shall be treated as a change in method of accounting. See also §1.166–4, relating to reserve for bad debts, and §1.166–10, relating to reserve for guaranteed debt obligations.

(c) *Bona fide debt required.* Only a bona fide debt qualifies for purposes of section 166. A bona fide debt is a debt which arises from a debtor-creditor relationship based upon a valid and enforceable obligation to pay a fixed or determinable sum of money. A debt arising out of the receivables of an accrual method taxpayer is deemed to be an enforceable obligation for purposes of the preceding sentence to the extent that the income such debt represents have been included in the return of income for the year for which the deduction as a bad debt is claimed or for a prior taxable year. For example, a debt arising out of gambling receivables that are unenforceable under state or local law, which an accrual method taxpayer includes in income under section 61, is an enforceable obligation for purposes of this pargarph. A gift or contribution to capital shall not be considered a debt for purposes of section 166. The fact that a bad debt its not due at the time of deduction shall not of itself prevent is allowance under section 166. For the disallowance of deductions for bad debts owed by a political party, see §1.271–1.

(d) *Amount deductible*—(1) *General rule.* Except in the case of a deduction for a reasonable addition to a reserve for bad debts, the basis for determining the amount of deduction under section 166 in respect of a bad debt shall be the same as the adjusted basis prescribed by §1.1011–1 for determining the loss from the sale or other disposition of property. To determine the allowable deduction in the case of obligations acquired before March 1, 1913, see also paragraph (b) of §1.1053–1.

(2) *Specific cases.* Subject to any provision of section 166 and the regulations thereunder which provides to the contrary, the following amounts are deductible as bad debts:

(i) *Notes or accounts receivable.* (*a*) If, in computing taxable income, a taxpayer values his notes or accounts receivable at their fair market value when received, the amount deductible as a bad debt under section 166 in respect of such receivables shall be limited to such fair market value even though it is less than their face value.

(*b*) A purchaser of accounts receivable which become worthless during the taxable year shall be entitled under section 166 to a deduction which is based upon the price he paid for such receivables but not upon their face value.

(ii) *Bankruptcy claim.* Only the difference between the amount received in distribution of the assets of a bankrupt and the amount of the claim may be deducted under section 166 as a bad debt.

(iii) *Claim against decedent's estate.* The excess of the amount of the claim over the amount received by a creditor of a decedent in distribution of the assets of the decedent's estate may be considered a worthless debt under section 166.

(e) *Prior inclusion in income required.* Worthless debts arising from unpaid wages, salaries, fees, rents, and similar items of taxable income shall not be allowed as a deduction under section 166 unless the income such items represent has been included in the return of income for the year for which the deduction as a bad debt is claimed or for a prior taxable year.

(f) *Recovery of bad debts.* Any amount attributable to the recovery during the taxable year of a bad debt, or of a part of a bad debt, which was allowed as a deduction from gross income in a prior taxable year shall be included in gross income for the taxable year of recovery, except to the extent that the recovery is excluded from gross income under the provisions of §1.111–1, relating to the recovery of certain items previously deducted or credited. This paragraph shall not apply, however, to a bad debt which was previously charged against a reserve by a taxpayer on the reserve method of treating bad debts.

(g) *Worthless securities.* (1) Section 166 and the regulations thereunder do not apply to a debt which is evidenced by a bond, debenture, note, or certificate, or other evidence of indebtedness, issued by a corporation or by a government or political subdivision thereof, with interest coupons or in registered form. See section 166(e). For provisions allowing the deduction of a loss resulting from the worthlessness of such a debt, see § 1.165–5.

(2) The provisions of subparagraph (1) of this paragraph do not apply to any loss sustained by a bank and resulting from the worthlessness of a security described in section 165(g)(2)(C). See paragraph (a) of § 1.582–1.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6996, 34 FR 835, Jan. 18, 1969; T.D. 7902, 48 FR 33260, July 21, 1983; T.D. 8071, 51 FR 2479, Jan. 17, 1986]

§ 1.166–2 Evidence of worthlessness.

(a) *General rule.* In determining whether a debt is worthless in whole or in part the district director will consider all pertinent evidence, including the value of the collateral, if any, securing the debt and the financial condition of the debtor.

(b) *Legal action not required.* Where the surrounding circumstances indicate that a debt is worthless and uncollectible and that legal action to enforce payment would in all probability not result in the satisfaction of execution on a judgment, a showing of these facts will be sufficient evidence of the worthlessness of the debt for purposes of the deduction under section 166.

(c) *Bankruptcy*—(1) *General rule.* Bankruptcy is generally an indication of the worthlessness of at least a part of an unsecured and unpreferred debt.

(2) *Year of deduction.* In bankruptcy cases a debt may become worthless before settlement in some instances; and in others, only when a settlement in bankruptcy has been reached. In either case, the mere fact that bankruptcy proceedings instituted against the debtor are terminated in a later year, thereby confirming the conclusion that the debt is worthless, shall not authorize the shifting of the deduction under section 166 to such later year.

(d) *Banks and other regulated corporations*—(1) *Worthlessness presumed in year of charge-off.* If a bank or other corporation which is subject to supervision by Federal authorities, or by State authorities maintaining substantially equivalent standards, charges off a debt in whole or in part, either—

(i) In obedience to the specific orders of such authorities, or

(ii) In accordance with established policies of such authorities, and, upon their first audit of the bank or other corporation subsequent to the charge-off, such authorities confirm in writing that the charge-off would have been subject to such specific orders if the audit had been made on the date of the charge-off,

then the debt shall, to the extent charged off during the taxable year, be conclusively presumed to have become worthless, or worthless only in part, as the case may be, during such taxable year. But no such debt shall be so conclusively presumed to be worthless, or worthless only in part, as the case may be, if the amount so charged off is not claimed as a deduction by the taxpayer at the time of filing the return for the taxable year in which the charge-off takes place.

(2) *Evidence of worthlessness in later taxable year.* If such a bank or other corporation does not claim a deduction for such a totally or partially worthless debt in its return for the taxable year in which the charge-off takes place, but claims the deduction for a later taxable year, then the charge-off in the prior taxable year shall be deemed to have been involuntary and the deduction under section 166 shall be allowed for the taxable year for which claimed, provided that the taxpayer produces sufficient evidence to show that—

(i) The debt became wholly worthless in the later taxable year, or became recoverable only in part subsequent to the taxable year of the involuntary charge-off, as the case may be; and,

(ii) To the extent that the deduction claimed in the later taxable year for a debt partially worthless was not involuntarily charged off in prior taxable years, it was charged off in the later taxable year.

(3) *Conformity election*—(i) *Eligibility for election.* In lieu of applying paragraphs (d)(1) and (2) of this section, a bank (as defined in paragraph (d)(4)(i) of this section) that is subject to supervision by Federal authorities, or by

state authorities maintaining substantially equivalent standards, may elect under this paragraph (d)(3) to use a method of accounting that establishes a conclusive presumption of worthlessness for debts, provided that the bank meets the express determination requirement of paragraph (d)(3)(iii)(D) of this section for the taxable year of the election.

(ii) *Conclusive presumption*—(A) *In general*. If a bank satisfies the express determination requirement of paragraph (d)(3)(iii)(D) of this section and elects to use the method of accounting under this paragraph (d)(3)—

(*1*) Debts charged off, in whole or in part, for regulatory purposes during a taxable year are conclusively presumed to have become worthless, or worthless only in part, as the case may be, during that year, but only if the charge-off results from a specific order of the bank's supervisory authority or corresponds to the bank's classification of the debt, in whole or in part, as a loss asset, as described in paragraph (d)(3)(ii)(C) of this section; and

(*2*) A bad debt deduction for a debt that is subject to regulatory loss classification standards is allowed for a taxable year only to the extent that the debt is conclusively presumed to have become worthless under paragraph (d)(3)(ii)(A)(*1*) of this section during that year.

(B) *Charge-off should have been made in earlier year*. The conclusive presumption that a debt is worthless in the year that it is charged off for regulatory purposes applies even if the bank's supervisory authority determines in a subsequent year that the charge-off should have been made in an earlier year. A pattern of charge-offs in the wrong year, however, may result in revocation of the bank's election by the Commissioner pursuant to paragraph (d)(3)(iv)(D) of this section.

(C) *Loss asset defined*. A debt is classified as a loss asset by a bank if the bank assigns the debt to a class that corresponds to a loss asset classification under the standards set forth in the ''Uniform Agreement on the Classification of Assets and Securities Held by Banks'' (See Attachment to Comptroller of the Currency Banking Circular No. 127, Rev. 4–26–91, Comptroller of the Currency, Communications Department, Washington, DC 20219) or similar guidance issued by the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, the Board of Governors of the Federal Reserve, or the Farm Credit Administration; or for institutions under the supervision of the Office of Thrift Supervision, 12 CFR 563.160(b)(3).

(iii) *Election*—(A) *In general*. An election under this paragraph (d)(3) is to be made on bank-by-bank basis and constitutes either the adoption of or a change in method of accounting, depending on the particular bank's facts. A change in method of accounting that results from the making of an election under this paragraph (d)(3) has the effects described in paragraph (d)(3)(iii)(B) of this section.

(B) *Effect of change in method of accounting*. A change in method of accounting resulting from an election under this paragraph (d)(3) does not require or permit an adjustment under section 481(a). Under this cut-off approach—

(*1*) There is no change in the §1.1011–1 adjusted basis of the bank's existing debts (as determined under the bank's former method of accounting for bad debts) as a result of the change in method of accounting;

(*2*) With respect to debts that are subject to regulatory loss classification standards and are held by the bank at the beginning of the year of change (to the extent that they have not been charged off for regulatory purposes), and with respect to debts subject to regulatory loss classification standards that are originated or acquired subsequent to the beginning of the year of change, bad debt deductions in the year of change and thereafter are determined under the method of accounting for bad debts prescribed by this paragraph (d)(3);

(*3*) With respect to debts that are not subject to regulatory loss classification standards or that have been totally charged off prior to the year of change, bad debt deductions are determined under the general rules of section 166; and

(*4*) If there was any partial charge-off of a debt in a prechange year, any portion of which was not claimed as a deduction, the deduction reflecting that partial charge-off must be taken in the first year in which there is any further charge-off of the debt for regulatory purposes.

(C) *Procedures*—(*1*) *In general.* A new bank adopts the method of accounting under this paragraph (d)(3) for any taxable year ending on or after December 31, 1991 (and for all subsequent taxable years) when it adopts its overall method of accounting for bad debts, by attaching a statement to this effect to its income tax return for that year. Any other bank makes an election for any taxable year ending on or after December 31, 1991 (and for all subsequent taxable years) by filing a completed Form 3115 (Application for Change in Accounting Method) in accordance with the rules of paragraph (d)(3)(iii)(C)(*2*) or (*3*) of this section. The statement or Form 3115 must include the name, address, and taxpayer identification number of the electing bank and contain a declaration that the express determination requirement of paragraph (d)(3)(iii)(D) of this section is satisfied for the taxable year of the election. When a Form 3115 is used, the declaration must be made in the space provided on the form for ''Other changes in method of accounting.'' The words ''ELECTION UNDER §1.166–2(d)(3)'' must be typed or legibly printed at the top of the statement or page 1 of the Form 3115.

(*2*) *First election.* The first time a bank makes this election, the statement or Form 3115 must be attached to the bank's timely filed return (taking into account extensions of time to file) for the first taxable year covered by the election. The consent of the Commissioner to make a change in method of accounting under this paragraph (d)(3) is granted, pursuant to section 446(e), to any bank that makes the election in accordance with this paragraph (d)(3)(iii)(C), provided the bank has not made a prior election under this paragraph (d)(3).

(*3*) *Subsequent elections.* The advance consent of the Commissioner is required to make any election under this paragraph (d)(3) after a previous election has been revoked pursuant to paragraph (d)(3)(iv) of this section. This consent must be requested under the procedures, terms, and conditions prescribed under the authority of section 446(e) and §1.446–1(e) for requesting a change in method of accounting.

(D) *Express determination requirement.* In connection with its most recent examination involving the bank's loan review process, the bank's supervisory authority must have made an express determination (in accordance with any applicable administrative procedure prescribed hereunder) that the bank maintains and applies loan loss classification standards that are consistent with the regulatory standards of that supervisory authority. For purposes of this paragraph (d)(3)(iii)(D), the supervisory authority of a bank is the *appropriate Federal banking agency* for the bank, as that term is defined in 12 U.S.C. 1813(q), or, in the case of an institution in the Farm Credit System, the Farm Credit Administration.

(E) *Transition period election.* For taxable years ending before completion of the first examination of the bank by its supervisory authority (as defined in paragraph (d)(3)(iii)(D) of this section) that is after October 1, 1992, and that involves the bank's loan review process, the statement or Form 3115 filed by the bank must include a declaration that the bank maintains and applies loan loss classification standards that are consistent with the regulatory standards of that supervisory authority. A bank that makes this declaration is deemed to satisfy the express determination requirement of paragraph (d)(3)(iii)(D) of this section for those years, even though an express determination has not yet been made.

(iv) *Revocation of Election*—(A) *In general.* Revocation of an election under this paragraph (d)(3) constitutes a change in method of accounting that has the effects described in paragraph (d)(3)(iv)(B) of this section. If an election under this paragraph (d)(3) has been revoked, a bank may make a subsequent election only under the provisions of paragraph (d)(3)(iii)(C)(*3*) of this section.

(B) *Effect of change in method of accounting.* A change in method of accounting resulting from revocation of an election under this paragraph (d)(3) does not require or permit an adjustment under section 481(a). Under this cut-off approach—

(*1*) There is no change in the §1.1011–1 adjusted basis of the bank's existing debts (as determined under this paragraph (d)(3) method or any other former method of accounting used by the bank with respect to its bad debts) as a result of the change in method of accounting; and

(*2*) Bad debt deductions in the year of change and thereafter with respect to all debts held by the bank, whether in existence at the beginning of the year of change or subsequently originated or acquired, are determined under the new method of accounting.

(C) *Automatic revocation*—(*1*) *In general*—A bank's election under this paragraph (d)(3) is revoked automatically if, in connection with any examination involving the bank's loan review process by the bank's supervisory authority as defined in paragraph (d)(3)(iii)(D) of this section, the bank does not obtain the express determination required by that paragraph.

(*2*) *Year of revocation*. If a bank makes the conformity election under the transition rules of paragraph (d)(3)(iii)(E) of this section and does not obtain the express determination in connection with the first examination involving the bank's loan review process that is after October 1, 1992, the election is revoked as of the beginning of the taxable year of the election or, if later, the earliest taxable year for which tax may be assessed. In other cases in which a bank does not obtain an express determination in connection with an examination of its loan review process, the election is revoked as of the beginning of the taxable year that includes the date as of which the supervisory authority conducts the examination even if the examination is completed in the following taxable year.

(*3*) *Consent granted*. Under the Commissioner's authority in section 446(e) and §1.446–1(e), the bank is directed to and is granted consent to change from this paragraph (3)(1) method as of the year of revocation (year of change) prescribed by paragraph (d)(3)(iv)(C)(*2*) of this section.

(*4*) *Requirements*. A bank changing its method of accounting under the automatic revocation rules of this paragraph (d)(3)(iv)(C) must attach a completed Form 3115 to its income tax return for the year of revocation prescribed by paragraph (d)(3)(iv)(C)(*2*) of this section. The words ''REVOCATION OF §1.166–2(d)(3) ELECTION'' must be typed or legibly printed at the top of page 1 of the Form 3115. If the year of revocation is a year for which the bank has already filed its income tax return, the bank must file an amended return for that year reflecting its change in method of accounting and must attach the completed Form 3115 to that amended return. The bank also must file amended returns reflecting the new method of accounting for all subsequent taxable years for which returns have been filed and tax may be assessed.

(D) *Revocation by Commissioner*. An election under this paragraph (d)(3) may be revoked by the Commissioner as of the beginning of any taxable year for which a bank fails to follow the method of accounting prescribed by this paragraph. In addition, the Commissioner may revoke an election as of the beginning of any taxable year for which the Commissioner determines that a bank has taken charge-offs and deductions that, under all facts and circumstances existing at the time, were substantially in excess of those warranted by the exercise of reasonable business judgment in applying the regulatory standards of the bank's supervisory authority as defined in paragraph (d)(3)(III)(D) of this section.

(E) *Voluntary revocation*. A bank may apply for revocation of its election made under this paragraph (d)(3) by timely filing a completed Form 3115 for the appropriate year and obtaining the consent of the Commissioner in accordance with section 446(e) and §1.446–1(e) (including any applicable administrative procedures prescribed thereunder). The words ''REVOCATION OF §1.166–2(d)(3) ELECTION'' must be typed or legibly printed at the top of page 1 of the Form 3115. If any bank has had its election automatically revoked pursuant to paragraph (d)(3)(iv)(C) of this section and has not changed its method of accounting in accordance with the requirements of that paragraph, the Commissioner will require that any voluntary change in method of accounting under this paragraph (d)(3)(iv)(E) be implemented retroactively pursuant to the same amended return terms and conditions as are prescribed by paragraph (d)(3)(iv)(C) of this section.

(4) *Definitions.* For purposes of this paragraph (d)—

(i) *Bank.* The term *bank* has the meaning assigned to it by section 581. The term *bank* also includes any corporation that would be a bank within the meaning of section 581 except for the fact that it is a foreign corporation, but this paragraph (d) applies only with respect to loans the interest on which is effectively connected with the conduct of a banking business within the United States. In addition, the term *bank* includes a Farm Credit System institution that is subject to supervision by the Farm Credit Administration.

(ii) *Charge-off.* For banks regulated by the Office of Thrift Supervision, the term *charge-off* includes the establishment of specific allowances for loan losses in the amount of 100 percent of the portion of the debt classified as loss.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7254, 38 FR 2418, Jan. 26, 1973; T.D. 8396, 57 FR 6294, Feb. 24, 1992; T.D. 8441, 57 FR 45569, Oct. 2, 1992; T.D. 8492, 58 FR 53658, Oct. 18, 1993]

§ 1.166–3 Partial or total worthlessness.

(a) *Partial worthlessness*—(1) *Applicable to specific debts only.* A deduction under section 166(a)(2) on account of partially worthless debts shall be allowed with respect to specific debts only.

(2) *Charge-off required.* (i) If, from all the surrounding and attending circumstances, the district director is satisfied that a debt is partially worthless, the amount which has become worthless shall be allowed as a deduction under section 166(a)(2) but only to the extent charged off during the taxable year.

(ii) If a taxpayer claims a deduction for a part of a debt for the taxable year within which that part of the debt is charged off and the deduction is disallowed for that taxable year, then, in a case where the debt becomes partially worthless after the close of that taxable year, a deduction under section 166(a)(2) shall be allowed for a subsequent taxable year but not in excess of the amount charged off in the prior taxable year plus any amount charged off in the subsequent taxable year. In such instance, the charge-off in the prior taxable year shall, if consistently maintained as such, be sufficient to that extent to meet the charge-off requirement of section 166(a)(2) with respect to the subsequent taxable year.

(iii) Before a taxpayer may deduct a debt in part, he must be able to demonstrate to the satisfaction of the district director the amount thereof which is worthless and the part thereof which has been charged off.

(3) *Significantly modified debt*—(i) *Deemed charge-off.* If a significant modification of a debt instrument (within the meaning of §1.1001–3) during a taxable year results in the recognition of gain by a taxpayer under §1.1001–1(a), and if the requirements of paragraph (a)(3)(ii) of this section are met, there is a deemed charge-off of the debt during that taxable year in the amount specified in paragraph (a)(3)(iii) of this section.

(ii) *Requirements for deemed charge-off.* A debt is deemed to have been charged off only if—

(A) The taxpayer (or, in the case of a debt that constitutes transferred basis property within the meaning of section 7701(a)(43), a transferor taxpayer) has claimed a deduction for partial worthlessness of the debt in any prior taxable year; and

(B) Each prior charge-off and deduction for partial worthlessness satisfied the requirements of paragraphs (a) (1) and (2) of this section.

(iii) *Amount of deemed charge-off.* The amount of the deemed charge-off, if any, is the amount by which the tax basis of the debt exceeds the greater of the fair market value of the debt or the amount of the debt recorded on the taxpayer's books and records reduced as appropriate for a specific allowance for loan losses. The amount of the deemed charge-off, however, may not exceed the amount of recognized gain described in paragraph (a)(3)(i) of this section.

(iv) *Effective date.* This paragraph (a)(3) applies to significant modifications of debt instruments occurring on or after September 23, 1996.

(b) *Total worthlessness.* If a debt becomes wholly worthless during the taxable year, the amount thereof which has not been allowed as a deduction from gross income for any prior taxable year shall be allowed as a deduction for the current taxable year.

[T.D. 6500, 25 FR 11402, Nov. 29, 1960, as amended by T.D. 8763, 63 FR 4396, Jan. 29, 1998]

§ 1.166–4 Reserve for bad debts.

(a) *Allowance of deduction.* A taxpayer who has established the reserve method of treating bad debts and has maintained proper reserve accounts for bad debts or who, in accordance with paragraph (b) of § 1.166–1, adopts the reserve method of treating bad debts may deduct from gross income a reasonable addition to a reserve for bad debts in lieu of deducting specific bad debt items. This paragraph applies both to bad debts owed to the taxpayer and to bad debts arising out of section 166(f)(1)(A) guaranteed debt obligations. If a reserve is maintained for bad debts arising out of section 166(f)(1)(A) guaranteed debt obligations, then a separate reserve must also be maintained for all other debt obligations of the taxpayer in the same trade or business, if any. A taxpayer may not maintain a reserve for bad debts arising out of section 166(f)(1)(A) guaranteed debt obligations if with respect to direct debt obligations in the same trade or business the taxpayer takes deductions when the debts become worthless in whole or in part rather than maintaining a reserve for such obligations. See § 1.166–10 for rules concerning section 166(f)(1)(A) guaranteed debt obligations.

(b) *Reasonableness of addition to reserve*—(1) *Relevant factors.* What constitutes a reasonable addition to a reserve for bad debts shall be determined in the light of the facts existing at the close of the taxable year of the proposed addition. The reasonableness of the addition will vary as between classes of business and with conditions of business prosperity. It will depend primarily upon the total amount of debts outstanding as of the close of the taxable year, including those arising currently as well as those arising in prior taxable years, and the total amount of the existing reserve.

(2) *Correction of errors in prior estimates.* In the event that subsequent realizations upon outstanding debts prove to be more or less than estimated at the time of the creation of the existing reserve, the amount of the excess or inadequacy in the existing reserve shall be reflected in the determination of the reasonable addition necessary in the current taxable year.

(c) *Statement required.* A taxpayer using the reserve method shall file with his return a statement showing—

(1) The volume of his charge sales or other business transactions for the taxable year and the percentage of the reserve to such amount;

(2) The total amount of notes and accounts receivable at the beginning and close of the taxable year;

(3) The amount of the debts which have become wholly or partially worthless and have been charged against the reserve account; and

(4) The computation of the addition to the reserve for bad debts.

(d) *Special rules applicable to financial institutions.* (1) For special rules for the addition to the bad debt reserves of certain banks, see §§ 1.585–1 through 1.585–3.

(2) For special rules for the addition to the bad debt reserves of small business investment companies and business development corporations, see §§ 1.586–1 and 1.586–2.

(3) For special rules for the addition to the bad debts reserves of certain mutual savings banks, domestic building and loan associations, and cooperative banks, see §§ 1.593–1 through 1.593–11.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6728, 29 FR 5855, May 5, 1964; T.D. 7444, 41 FR 53481, Dec. 7, 1976; T.D. 8071, 51 FR 2479, Jan. 17, 1986]

§ 1.166–5 Nonbusiness debts.

(a) *Allowance of deduction as capital loss.* (1) The loss resulting from any nonbusiness debt's becoming partially or wholly worthless within the taxable year shall not be allowed as a deduction under either section 166(a) or section 166(c) in determining the taxable income of a taxpayer other than a corporation. See section 166(d)(1)(A).

(2) If, in the case of a taxpayer other than a corporation, a nonbusiness debt becomes wholly worthless within the taxable year, the loss resulting therefrom shall be treated as a loss from the sale or exchange, during the taxable year, of a capital asset held for not more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977). Such a loss is subject to the limitations provided in section 1211, relating to the limitation on capital losses, and section 1212, relating to the capital loss carryover, and in the regulations under those sections. A loss on a nonbusiness debt shall be treated as sustained only if and when the debt has become totally worthless, and no deduction shall be allowed for a nonbusiness debt which is recoverable in part during the taxable year.

(b) *Nonbusiness debt defined.* For purposes of section 166 and this section, a nonbusiness debt is any debt other than—

(1) A debt which is created, or acquired, in the course of a trade or business of the taxpayer, determined without regard to the relationship of the debt to a trade or business of the taxpayer at the time when the debt becomes worthless; or

(2) A debt the loss from the worthlessness of which is incurred in the taxpayer's trade or business.

The question whether a debt is a nonbusiness debt is a question of fact in each particular case. The determination of whether the loss on a debt's becoming worthless has been incurred in a trade or business of the taxpayer shall, for this purpose, be made in substantially the same manner for determining whether a loss has been incurred in a trade or business for purposes of section 165(c)(1). For purposes of subparagraph (2) of this paragraph, the character of the debt is to be determined by the relation which the loss resulting from the debt's becoming worthless bears to the trade or business of the taxpayer. If that relation is a proximate one in the conduct of the trade or business in which the taxpayer is engaged at the time the debt becomes worthless, the debt comes within the exception provided by that subparagraph. The use to which the borrowed funds are put by the debtor is of no consequence in making a determination under this paragraph. For purposes of section 166 and this section, a nonbusiness debt does not include a debt described in section 165(g)(2)(C). See § 1.165–5, relating to losses on worthless securities.

(c) *Guaranty of obligations.* For provisions treating a loss sustained by a guarantor of obligations as a loss resulting from the worthlessness of a debt, see §§ 1.166–8 and 1.166–9.

(d) *Examples.* The application of this section may be illustrated by the following examples involving a case where A, an individual who is engaged in the grocery business and who makes his return on the basis of the calendar year, extends credit to B in 1955 on an open account:

Example 1. In 1956 A sells the business but retains the claim against B. The claim becomes worthless in A's hands in 1957. A's loss is not controlled by the nonbusiness debt provisions, since the original consideration has been advanced by A in his trade or business.

Example 2. In 1956 A sells the business to C but sells the claim against B to the taxpayer, D. The claim becomes worthless in D's hands in 1957. During 1956 and 1957, D is not engaged in any trade or business. D's loss is controlled by the nonbusiness debt provisions even though the original consideration has been advanced by A in his trade or business, since the debt has not been created or acquired in connection with a trade or business of D and since in 1957 D is not engaged in a trade or business incident to the conduct of which a loss from the worthlessness of such claim is a proximate result.

Example 3. In 1956 A dies, leaving the business, including the accounts receivable, to his son, C, the taxpayer. The claim against B becomes worthless in C's hands in 1957. C's loss is not controlled by the nonbusiness debt provisions. While C does not advance any consideration for the claim, or create or acquire it in connection with his trade or business, the loss is sustained as a proximate incident to the conduct of the trade or business in which he is engaged at the time the debt becomes worthless.

Example 4. In 1956 A dies, leaving the business to his son, C, but leaving the claim against B to his son, D, the taxpayer. The claim against B becomes worthless in D's hands in 1957. During 1956 and 1957, D is not engaged in any trade or business. D's loss is controlled by the nonbusiness debt provisions even though the original consideration has been advanced by A in his trade or business, since the debt has not been created or acquired in connection with a trade or business of D and since in 1957 D is not engaged in a trade or business incident to the conduct of which a loss from the worthlessness of such claim is a proximate result.

Example 5. In 1956 A dies; and, while his executor, C, is carrying on the business, the claim against B becomes worthless in 1957. The loss sustained by A's estate is not controlled by the nonbusiness debt provisions. While C does not advance any consideration for the claim on behalf of the estate, or create or acquire it in connection with a trade or business in which the estate is engaged, the loss is sustained as a proximate incident to the conduct of the trade or business in which the estate is engaged at the time the debt becomes worthless.

Example 6. In 1956, A, in liquidating the business, attempts to collect the claim against B but finds that it has become worthless. A's loss is not controlled by the nonbusiness debt provisions, since the original consideration has been advanced by A in his trade or business and since a loss incurred in liquidating a trade or business is a proximate incident to the conduct thereof.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 7657, 44 FR 68464, Nov. 29, 1979; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.166–6 Sale of mortgaged or pledged property.

(a) *Deficiency deductible as bad debt*—(1) *Principal amount.* If mortgaged or pledged property is lawfully sold (whether to the creditor or another purchaser) for less than the amount of the debt, and the portion of the indebtedness remaining unsatisfied after the sale is wholly or partially uncollectible, the mortgagee or pledgee may deduct such amount under section 166(a) (to the extent that it constitutes capital or represents an item the income from which has been returned by him) as a bad debt for the taxable year in which it becomes wholly worthless or is charged off as partially worthless. See § 1.166–3.

(2) *Accrued interest.* Accrued interest may be included as part of the deduction allowable under this paragraph, but only if it has previously been returned as income.

(b) *Realization of gain or loss*—(1) *Determination of amount.* If, in the case of a sale described in paragraph (a) of this section, the creditor buys in the mortgaged or pledged property, loss or gain is also realized, measured by the difference between the amount of those obligations of the debtor which are applied to the purchase or bid price of the property (to the extent that such obligations constitute capital or represent an item the income from which has been returned by the creditor) and the fair market value of the property.

(2) *Fair market value defined.* The fair market value of the property for this purpose shall, in the absence of clear and convincing proof to the contrary, be presumed to be the amount for which it is bid in by the taxpayer.

(c) *Basis of property purchased.* If the creditor subsequently sells the property so acquired, the basis for determining gain or loss upon the subsequent sale is the fair market value of the property at the date of its acquisition by the creditor.

(d) *Special rules applicable to certain banking organizations.* For special rules relating to the treatment of mortgaged or pledged property by certain mutual savings banks, domestic building and loan associations, and cooperative banks, see section 595 and the regulations thereunder.

(e) *Special rules applicable to certain reacquisitions of real property.* Notwithstanding this section, special rules apply for taxable years beginning after September 2, 1964 (and for certain taxable years beginning after December 31, 1957), to the gain or loss on certain reacquisitions of real property, to indebtedness remaining unsatisfied as a result of such reacquisitions, and to the basis of the reacquired real property. See §§ 1.1038–1 through 1.1038–3.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6814, 30 FR 4472, Apr. 7, 1965, T.D. 6916, 32 FR 5923, Apr. 13, 1967]

§ 1.166–7 Worthless bonds issued by an individual.

(a) *Allowance of deduction.* A bond or other similar obligation issued by an individual, if it becomes worthless in whole or in part, is subject to the bad debt provisions of section 166. The loss from the worthlessness of any such bond or obligation is deductible in accordance with section 166(a), unless such bond or obligation is a nonbusiness debt as defined in section 166(d)(2). If the bond or obligation is a nonbusiness debt, it is subject to section 166(d) and §1.166–5.

(b) *Decline in market value.* A taxpayer possessing debts evidenced by bonds or other similar obligations issued by an individual shall not be allowed any deduction under section 166 on account of mere market fluctuation in the value of such obligations.

(c) *Worthless bonds issued by corporation.* For provisions allowing the deduction under section 165(a) of the loss sustained upon the worthlessness of any bond or similar obligation issued by a corporation or a government, see §1.165–5.

(d) *Application to inventories.* This section does not apply to any loss upon the worthlessness of any bond or similar obligation reflected in inventories required to be taken by a dealer in securities under section 471. See §1.471–5.

§1.166–8 Losses of guarantors, endorsers, and indemnitors incurred on agreements made before January 1, 1976.

(a) *Noncorporate obligations*—(1) *Deductible as bad debt.* A payment during the taxable year by a taxpayer other than a corporation in discharge of part or all of his obligation as a guarantor, endorser, or indemnitor of an obligation issued by a person other than a corporation shall, for purposes of section 166 and the regulations thereunder, be treated as a debt's becoming worthless within the taxable year, if—

(i) The proceeds of the obligation so issued have been used in the trade or business of the borrower, and

(ii) The borrower's obligation to the person to whom the taxpayer's payment is made is worthless at the time of payment except for the existence of the guaranty, endorsement, or indemnity, whether or not such obligation has in fact become worthless within the taxable year in which payment is made.

(2) *Nonbusiness debt rule not applicable.* If a payment is treated as a loss in accordance with the provisions of subparagraph (1) of this paragraph, section 166(d), relating to the special rule for losses sustained on the worthlessness of a nonbusiness debt, shall not apply. Accordingly, in each instance the loss shall be deducted under section 166(a)(1) as a wholly worthless debt even though there has been a discharge of only a part of the taxpayer's obligation. Thus, if the taxpayer makes a payment during the taxable year in discharge of only part of his obligation as a guarantor, endorser, or indemnitor, he may treat such payment under section 166(a)(1) as a debt's becoming wholly worthless within the taxable year, provided that he can establish that such part of the borrower's obligation to the person to whom the taxpayer's payment is made is worthless at the time of payment and the conditions of subparagraph (1) of this paragraph have otherwise been satisfied.

(3) *Other applicable provisions.* Other provisions of the internal revenue laws relating to bad debts, such as section 111, relating to the recovery of bad debts, shall be deemed to apply to any payment which, under the provisions of this paragraph, is treated as a bad debt. If the requirements of section 166(f) are not met, any loss sustained by a guarantor, endorser, or indemnitor upon the worthlessness of the debtor's obligation shall be treated under the provisions of law applicable thereto. See, for example, paragraph (b) of this section.

(b) *Corporate obligations.* The loss sustained during the taxable year by a taxpayer other than a corporation in discharge of all of his obligation as a guarantor of an obligation issued by a corporation shall be treated, in accordance with section 166(d) and the regulations thereunder, as a loss sustained on the worthlessness of a nonbusiness debt if the debt created in the guarantor's favor as a result of the payment does not come within the exceptions prescribed by section 166(d)(2) (A) or (B). See paragraph (a)(2) of §1.166–5.

(c) *Examples.* The application of this section may be illustrated by the following examples:

Example 1. During 1955, A, an individual who makes his return on the basis of the calendar year, guarantees payment of an obligation of B, an individual, to the X Bank, the proceeds of the obligation being used in B's business. B defaults on his obligation in 1956.

A makes payment to the X Bank during 1957 in discharge of his entire obligation as a guarantor, the obligation of B to the X Bank being wholly worthless. For his taxable year 1957, A is entitled to a deduction under section 166(a)(1) as a result of his payment during that year.

Example 2. During 1955, A, an individual who makes his return on the basis of the calendar year, guarantees payment of an obligation of B, an individual, to the X Bank, the proceeds of the obligation being used in B's business. In 1956, B pays a part of his obligation to the X Bank but defaults on the remaining part. In 1957, A makes payment to the X Bank, in discharge of part of his obligation as a guarantor, of the remaining unpaid part of B's obligation to the bank, such part of B's obligation then being worthless. For his taxable year 1957, A is entitled to a deduction under section 166(a) (1) as a result of his payment of the remaining unpaid part of B's obligation.

Example 3. During 1955, A, an individual who makes his return on the basis of the calendar year, guarantees payment of an obligation of B, an individual, to the X Bank, the proceeds of the obligation being used for B's personal use. B defaults on his obligation in 1956. A makes payment to the X Bank during 1957 in discharge of his entire obligation as a guarantor, the obligation of B to X Bank being wholly worthless. A may not apply the benefit of section 166(f) to his loss, since the proceeds of B's obligation have not been used in B's trade or business.

Example 4. During 1955, A, an individual who makes his return on the basis of the calendar year, guarantees payment of an obligation of Y Corporation to the X Bank, the proceeds of the obligation being used in Y Corporation's business. Y Corporation defaults on its obligation in 1956. A makes payment to the X Bank during 1957 in discharge of his entire obligation as a guarantor, the obligation of Y Corporation to the X Bank being wholly worthless. At no time during 1955 or 1957 is A engaged in a trade or business. For his taxable year 1957, A is entitled to deduct a capital loss in accordance with the provisions of section 166(d) and paragraph (a) (2) of §1.166–5. He may not apply the benefit of section 166(f) to his loss, since his payment is in discharge of an obligation issued by a corporation.

(d) *Effective date.* This section applies only to losses, regardless of the taxable year in which incurred, on agreements made before January 1, 1976.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 7657, 44 FR 68464, Nov. 29, 1979]

§ 1.166–9 Losses of guarantors, endorsers, and indemnitors incurred, on agreements made after December 31, 1975, in taxable years beginning after such date.

(a) *Payment treated as worthless business debt.* This paragraph applies to taxpayers who, after December 31, 1975, enter into an agreement in the course of their trade or business to act as (or in a manner essentially equivalent to) a guarantor, endorser, or indemnitor of (or other secondary obligor upon) a debt obligation. Subject to the provisions of paragraphs (c), (d), and (e) of this section, a payment of principal or interest made during a taxable year beginning after December 31, 1975, by the taxpayer in discharge of part or all of the taxpayer's obligation as a guarantor, endorser, or indemnitor is treated as a business debt becoming worthless in the taxable year in which the payment is made or in the taxable year described in paragraph (e)(2) of this section. Neither section 163 (relating to interest) nor section 165 (relating to losses) shall apply with respect to such a payment.

(b) *Payment treated as worthless nonbusiness debt.* This paragraph applies to taxpayers (other than corporations) who, after December 31, 1975, enter into a transaction for profit, but not in the course of their trade or business, to act as (or in a manner essentially equivalent to) a guarantor, endorser, or indemnitor of (or other secondary obligor upon) a debt obligation. Subject to the provisions of paragraphs (c), (d), and (e) of this section, a payment of principal or interest made during a taxable year beginning after December 31, 1975, by the taxpayer in discharge of part or all of the taxpayer's obligation as a guarantor, endorser, or indemnitor is treated as a worthless nonbusiness debt in the taxable year in which the payment is made or in the taxable year described in paragraph (e)(2) of this section. Neither section 163 nor section 165 shall apply with respect to such a payment.

(c) *Obligations issued by corporations.* No treatment as a worthless debt is allowed with respect to a payment made by the taxpayer in discharge of part or all of the taxpayer's obligation as a guarantor, endorser, or indemnitor of an obligation issued by a corporation if, on the basis of the facts and circumstances at the time the obligation was entered into, the payment constitutes a contribution to capital by a shareholder. The rule of this paragraph (c) applies to payments whenever made (see paragraph (f) of this section).

(d) *Certain payments treated as worthless debts.* A payment in discharge of part or all of taxpayer's agreement to act as guarantor, endorser, or indemnitor of an obligation is to be treated as a worthless debt only if—

(1) The agreement was entered into in the course of the taxpayer's trade or business or a transaction for profit;

(2) There was an enforceable legal duty upon the taxpayer to make the payment (except that legal action need not have been brought against the taxpayer); and

(3) The agreement was entered into before the obligation became worthless (or partially worthless in the case of an agreement entered into in the course of the taxpayer's trade or business). See §§ 1.166–2 and 1.166–3 for rules on worthless and partially worthless debts. For purposes of this paragraph (d)(3), an agreement is considered as entered into before the obligation became worthless (or partially worthless) if there was a reasonable expectation on the part of the taxpayer at the time the agreement was entered into that the taxpayer would not be called upon to pay the debt (subject to such agreement) without full reimbursement from the issuer of the obligation.

(e) *Special rules*—(1) *Reasonable consideration required.* Treatment as a worthless debt of a payment made by a taxpayer in discharge of part or all of the taxpayer's agreement to act as a guarantor, endorser, or indemnitor of an obligation is allowed only if the taxpayer demonstrates that reasonable consideration was received for entering into the agreement. For purposes of this paragraph (e)(1), reasonable consideration is not limited to direct consideration in the form of cash or property. Thus, where a taxpayer can demonstrate that the agreement was given without direct consideration in the form of cash or property but in accordance with normal business practice or for a good faith business purpose, worthless debt treatment is allowed with respect to a payment in discharge of part or all of the agreement if the conditions of this section are met. However, consideration received from a taxpayer's spouse or any individual listed in section 152(a) must be direct consideration in the form of cash or property.

(2) *Right of subrogation.* With respect to a payment made by a taxpayer in discharge of part or all of the taxpayer's agreement to act as a guarantor, endorser, or indemnitor where the agreement provides for a right of subrogation or other similar right against the issuer, treatment as a worthless debt is not allowed until the taxable year in which the right of subrogation or other similar right becomes totally worthless (or partially worthless in the case of an agreement which arose in the course of the taxpayer's trade or business).

(3) *Other applicable provisions.* Unless inconsistent with this section, other Internal Revenue laws concerning worthless debts, such as section 111 relating to the recovery of bad debts, apply to any payment which, under the provisions of this section, is treated as giving rise to a worthless debt.

(4) *Taxpayer defined.* For purposes of this section, except as otherwise provided, the term ''taxpayer'' means any taxpayer and includes individuals, corporations, partnerships, trusts and estates.

(f) *Effective date.* This section applies to losses incurred on agreements made after December 31, 1975, in taxable years beginning after such date. However, paragraph (c) of this section also applies to payments, regardless of the taxable year in which made, under agreements made before January 1, 1976.

[T.D. 7657, 44 FR 68465, Nov. 29, 1979, as amended by T.D. 7920, 48 FR 50712, Nov. 3, 1983]

§ 1.166–10 Reserve for guaranteed debt obligations.

(a) *Definitions.* The following provisions apply for purposes of this section and section 166(f):

(1) *Dealer in property.* A dealer in property is a person who regularly sells

property in the ordinary course of the person's trade or business.

(2) *Guaranteed debt obligation.* A guaranteed debt obligation is a legal duty of one person as a guarantor, endorser or indemnitor of a second person to pay a third person. It does not include duties based solely on moral or good public relations considerations that are not legally binding. A guaranteed debt obligation typically arises where a seller receives in payment for property or services the debt obligation of a purchaser and sells that obligation to a third party with recourse. However, a guaranteed debt obligation also may arise out of a sale in respect of which there is no direct debtor-creditor relationship between the debtor purchaser and the seller. For example, it arises where a purchaser borrows money from a third party to make payment to the seller and the seller guarantees the payment of the purchaser's debt. Generally, debt obligations which are sold without recourse do not result in any obligation of the seller as a guarantor, endorser, or indemnitor. However, there are certain without-recourse transactions which may give rise to a seller's liability as a guarantor or indemnitor. For example, such a liability may arise where a holder of a debt obligation holds money or other property of a seller which the holder may apply, without seeking permission of the seller, against any uncollectible debt obligations transferred to the holder by the seller without recourse, or where the seller is under a legal obligation to reacquire the real or tangible personal property from the holder of the debt obligation who repossessed property in satisfaction of the debt obligations.

(3) *Real or tangible personal property.* Real or tangible personal property generally does not include other forms of property, such as securities. However, if the sale of other property is related to the sale of actual real or tangible personal property, the other property will be considered to be real or tangible personal property. In order for the sale of other property to be related, it must be—

(i) Incidental to the sale of the actual real or tangible personal property; and

(ii) Made under an agreement, entered into at the same time as the sale of actual real or tangible personal property, between the dealer in that property and the customer with respect to that property.

The other property may be charged for as a part of, or in addition to, the sales price of the actual real or tangible personal property. If the value of the other property is not greater than 20 percent of the total sales price, including the value of all related services other than financing services, the sale of the other property is related to the sale of actual real or tangible personal property.

(4) *Related services.* In the case of a sale of both property and services a determination must be made as to whether the services are related to the property. Related services include only those services which are—

(i) Incidental to the sale of the real or tangible personal property; and

(ii) To be performed under an agreement, entered into at the same time as the sale of the property, between the dealer in property and the customer with respect to the property.

Delivery, financing installation. maintenance, repair, or instructional services generally qualify as related services. The services may be charged for as a part of, or in addition to, the sales price of the property. Where the value of all services other than financing services is not greater than 20 percent of the total of the sales price of the property, including the value of all the services other than financing services, all of the services are considered to be incidental to the sale of the property. Where the value of the services is greater than 20 percent, the determination as to whether a service is a related service in a particular case is to be made on the basis of all relevant facts and circumstances.

(5) *Examples.* The following examples apply to paragraph (a)(4) of this section:

Example 1. A. a dealer in television sets sells a television set to B, his customer. If at the time of the sale A, for a separate charge which is added to the sales price of the set and which is not greater than 20 percent of the total sales price, provides a 3-year service contract on only that television set, the service contract is a related service agreement. However, if A does not sell the service contract to B contemporaneously with the sale of the television set, as would be the case if the service agreement were entered into after the sale of the set were completed, or if the service contract includes services for a television set in addition to the one then sold by A to B, the service contract is not an agreement for a related service.

Example 2. C, an automobile dealer, at the time of the sale by C of an automobile to D, agrees to made available to D driving instructions furnished by the M driving school, the cost of which is included in the sale price of the automobile and is not greater than 20 percent of the total sales price. C also agrees to pay M for the driving instructions furnished to D. Since C's agreement with D to make available driving instructions is incidental to the sale of the automobile, is made contemporaneously with the sale, and is charged for as part of the sales price of the automobile, it is an agreement for a related service. In contrast, however, because M's agreement with C is not an agreement between the dealer in property and the customer, M's agreement with C to provide driving instructions to C's customers is not an agreement for a related service.

(b) *Incorporation of section 166(c) rules.* A reserve for section 166(f)(1)(A) guaranteed debt obligations must be established and maintained under the rules applicable to the reserve for bad debts under section 166(c) (with the exception of the statement requirement under § 1.166–4 (c)). For example, the rules in § 1.166–4(b), relating to what constitutes a reasonable addition to a reserve for bad debts and to correction of errors in prior estimates, apply to a reserve for section 166(f)(1)(A) guaranteed debt obligations as well.

(c) *Special requirements.* Any reserve for section 166(f)(1)(A) guaranteed debt obligations must be established and maintained separately from any reserve for other debt obligations. In addition, a taxpayer who charges off direct debts when they become worthless in whole or in part rather than maintaining a reserve for such obligations may not maintain a reserve for section 166(f)(1)(A) guaranteed debt obligations in the same trade or business.

(d) *Requirement of statement.* A taxpayer who uses the reserve method of treating section 166(f)(1)(A) guaranteed debt obligations must attach to his return for each taxable year, returns for which are filed after April 17, 1986, and for each trade or business for which the reserve is maintained a statement showing—

(1) The total amount of these obligations at the beginning of the taxable year;

(2) The total amount of these obligations incurred during the taxable year;

(3) The amount of the initial balance of the suspense account, if any, established with respect to these obligations;

(4) The balance of the suspense account, if any, at the beginning of the taxable year,

(5) The adjustment, if any, to that account;

(6) The adjusted balance, if any, at the close of the taxable year;

(7) The reconciliation of the beginning and closing balances of the reserve for these obligations and the computation of the addition to the reserve; and

(8) The taxable year for which the reserve for these obligations was established.

(e) *Computation of opening balance*—(1) *In general.* The opening balance of a reserve for section 166(f)(1)(A) guaranteed debt obligations established for the first taxable year for which a taxpayer maintains such a reserve shall be determined as if the taxpayer had maintained such a reserve for the taxable years preceding that taxable year. The amount of the opening balance may be determined under the following formula:

$$OB = CG \times \frac{SNL}{SG}$$

where—

OB = the opening balance at the beginning of the first taxable year

CG = the amount of these obligations at the close of the last preceding taxable year

SG = the sum of the amounts of these obligations at the close of the five preceding taxable years

SNL the sum of the amounts of net losses arising from these obligations for the five preceding taxable years

(2) *Example.* The following example applies to paragraph (e)(1) of this section.

Example. For 1977, A, a dealer in automobiles who uses the calendar year as the taxable year, adopts in accordance with this section the reserve method of treating section 166(f)(1)(A) guaranteed debt obligations. A's first year in business as an automobile dealer is 1973. For 1972, 1973, 1974, 1975, and 1976, A's records disclose the following information with respect to these obligations:

Year	Obligations outstanding at close of year	Gross losses from these obligations	Recoveries from these obligations	Net losses from these obligations
1972	$0	$0	$0	$0
1973	780,000	9,700	1,000	8,700
1974	795,000	8,900	1,050	7,850
1975	850,000	8,850	850	8,000
1976	820,000	8,300	1,400	7,900
Total	3,245,000	36,750	4,300	32,450

The opening balance for 1977 of A's reserve for these obligations is $8,200, determined as follows:

$$\$8{,}200 = \$820{,}000 \times \frac{\$32{,}450}{\$3{,}245{,}000}$$

(3) *More appropriate balance.* A taxpayer may select a balance other than the one produced under paragraph (e)(1) of this section if it is more appropriate, based upon the taxpayer's actual experience, and in the event the taxpayer's return is examined, if the balance is approved by the district director.

(4) *No losses in the five preceding taxable years.* If a taxpayer is in the taxpayer's first taxable year of a particular trade or business, or if the taxpayer has no losses arising from section 166(f)(1)(A) guaranteed debt obligations in a particular trade or business for any other reason in the five preceding taxable years, then the taxpayer's opening balance is zero for that particular trade or business.

(5) *Where reserve method was used before October 22, 1965.* If for a taxable year ending before October 22, 1965, the taxpayer maintained a reserve for bad debts under section 166(c) which included guaranteed debt obligations described in section 166(f)(1)(A), and if the taxpayer is allowed a deduction referred to in paragraph (g)(2) of this section on account of those obligations, the amount of the opening balance of the reserve for section 166(f)(1)(A) guaranteed debt obligations for the taxpayer's first taxable year ending after October 21, 1965, shall be an amount equal to that portion of the section 166(c) reserve at the close of the last taxable year which is attributable to those debt obligations. The amount of the balance of the section 166(c) reserve for the taxable year shall be reduced by the amount of the opening balance of the reserve for those guaranteed debt obligations.

(f) *Suspense account*—(1) *Zero opening balance cases.* No suspense account shall be maintained if the opening balance of the reserve for section 166(f)(1)(A) guaranteed debt obligations under section 166(f)(3) is zero

(2) *Example.* The following example applies to section 166(f)(4)(B), relating to adjustments to the suspense account:

Example. In 1977, A, an individual who operates an appliance store and uses the calendar year as the taxable year, adopts the reserve method of treating section 166(f)(1)(A) guaranteed debt obligations. The initial balance of A's suspense account is $8,200. At the close of 1977, 1978, 1979, and 1980, the balance of A's reserve for these obligations is $8,400, $8,250, $8,150, and $8,175, respectively, after making the addition to the reserve for each year. The adjustments under section 166(f)(4)(B) to the suspense account at the close of each of the years involved are as follows:

(1) Taxable year	1977	1978	1979	1980
(2) Closing reserve account balance	$8,400	$8,250	$8,150	$8,175
(3) Opening suspense account balance	8,200	8,200	8,200	8,150
(4) Line (2) less line (3)	200	50	(50	25
(5) Adjustment to suspense account balance	0	0	(50	25
(6) Closing suspense account balance (line 3 plus line 5)	8,200	8,200	8,150	8,175

(g) *Effective date*—(1) *In general.* This section is generally effective for taxable years ending after October 21, 1965.

(2) *Transitional rule.* Section 2(b) of the Act of November 2, 1966 (Pub. L. 89–722, 80 Stat. 1151) allows additions to section 166(c) bad debt reserves in earlier taxable years on account of section 166(f)(1)(A) guaranteed debt obligations to be deducted for those earlier taxable years. Paragraphs (c), (d), (e), and (f) of this section do not apply in determining whether a deduction is allowed under section 2(b) of the Act. See Rev. Rul. 68–313 (1968–1C.B. 75) for rules relating to that deduction.

[T.D. 8071, 51 FR 2479, Jan. 17, 1986; 51 FR 9787, Mar. 21, 1986]

§ 1.167(a)–1 Depreciation in general.

(a) *Reasonable allowance.* Section 167(a) provides that a reasonable allowance for the exhaustion, wear and tear, and obsolescence of property used in the trade or business or of property held by the taxpayer for the production of income shall be allowed as a depreciation deduction. The allowance is that amount which should be set aside for the taxable year in accordance with a reasonably consistent plan (not necessarily at a uniform rate), so that the aggregate of the amounts set aside, plus the salvage value, will, at the end of the estimated useful life of the depreciable property, equal the cost or other basis of the property as provided in section 167(g) and §1.167(g)–1. An asset shall not be depreciated below a reasonable salvage value under any method of computing depreciation. However, see section 167(f) and §1.167(f)–1 for rules which permit a reduction in the amount of salvage value to be taken into account for certain personal property acquired after October 16, 1962. See also paragraph (c) of this section for definition of salvage. The allowance shall not reflect amounts representing a mere reduction in market value. See section 179 and §1.179–1 for a further description of the term ''reasonable allowance.''

(b) *Useful life.* For the purpose of section 167 the estimated useful life of an asset is not necessarily the useful life inherent in the asset but is the period over which the asset may reasonably be expected to be useful to the taxpayer in his trade or business or in the production of his income. This period shall be determined by reference to his experience with similar property taking into account present conditions and probable future developments. Some of the factors to be considered in determining this period are (1) wear and tear and decay or decline from natural causes, (2) the normal progress of the art, economic changes, inventions, and current developments within the industry and the taxpayer's trade or business, (3) the climatic and other local conditions peculiar to the taxpayer's trade or business, and (4) the taxpayer's policy as to repairs, renewals, and replacements. Salvage value is not a factor for the purpose of determining useful life. If the taxpayer's experience is inadequate, the general experience in the industry may be used until such time as the taxpayer's own experience forms an adequate basis for making the determination. The estimated remaining useful life may be subject to modification by reason of conditions known to exist at the end of the taxable year and shall be redetermined when necessary regardless of the method of computing depreciation. However, estimated remaining useful life shall be redetermined only when the change in the useful life is significant and there is a clear and convincing basis for the redetermination. For rules covering agreements with respect to useful life, see section 167(d) and §1.167(d)–1. If a taxpayer claims an investment credit with respect to an asset for a taxable year preceding the taxable year in which the asset is considered as placed in service under §1.167(a)–10(b) or §1.167(a)–11(e), the useful life of the asset under this paragraph shall be the same useful life assigned to the asset under §1.46–3(e).

(c) *Salvage.* (1) Salvage value is the amount (determined at the time of acquisition) which is estimated will be realizable upon sale or other disposition of an asset when it is no longer useful in the taxpayer's trade or business or in the production of his income and is to be retired from service by the taxpayer. Salvage value shall not be changed at any time after the determination made at the time of acquisition merely because of changes in price levels. However, if there is a redetermination of useful life under the rules of paragraph (b) of this section, salvage value may be redetermined based upon facts known at the time of such redetermination of useful life. Salvage, when reduced by the cost of removal, is referred to as net salvage. The time at which an asset is retired from service may vary according to the policy of the taxpayer. If the taxpayer's policy is to dispose of assets which are still in good operating condition, the salvage value may represent a relatively large proportion of the original basis of the asset. However, if the taxpayer customarily uses an asset until its inherent useful life has been substantially exhausted, salvage value may represent no more than junk value. Salvage value must be taken into account in determining the depreciation deduction either by a reduction of the amount subject to depreciation or by a reduction in the rate of depreciation, but in no event shall an asset (or an account) be depreciated below a reasonable salvage value. See, however, paragraph (a) of §1.167(b)–2 for the treatment of salvage under the declining balance method, and §1.179–1 for the treatment of salvage in computing the additional first-year depreciation allowance. The taxpayer may use either salvage or net salvage in determining depreciation allowances but such practice must be consistently followed and the treatment of the costs of removal must be consistent with the practice adopted. For specific treatment of salvage value, see §§1.167(b)–1, 1.167(b)–2, and 1.167(b)–3. When an asset is retired or disposed of, appropriate adjustments shall be made in the asset and depreciation reserve accounts. For example, the amount of the salvage adjusted for the costs of removal may be credited to the depreciation reserve.

(2) For taxable years beginning after December 31, 1961, and ending after October 16, 1962, see section 167(f) and §1.167(f)–1 for rules applicable to the reduction of salvage value taken into account for certain personal property acquired after October 16, 1962.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6712, 29 FR 3653, Mar. 24, 1964; T.D. 7203, 37 FR 17133, Aug. 25, 1972]

§ 1.167(a)–2 Tangible property.

The depreciation allowance in the case of tangible property applies only to that part of the property which is subject to wear and tear, to decay or decline from natural causes, to exhaustion, and to obsolescence. The allowance does not apply to inventories or stock in trade, or to land apart from the improvements or physical development added to it. The allowance does not apply to natural resources which are subject to the allowance for depletion provided in section 611. No deduction for depreciation shall be allowed on automobiles or other vehicles used solely for pleasure, on a building used by the taxpayer solely as his residence, or on furniture or furnishings therein, personal effects, or clothing; but properties and costumes used exclusively in a business, such as a theatrical business, may be depreciated.

§ 1.167(a)–3 Intangibles.

(a) *In general.* If an intangible asset is known from experience or other factors to be of use in the business or in the production of income for only a limited period, the length of which can be estimated with reasonable accuracy, such an intangible asset may be the subject of a depreciation allowance. Examples are patents and copyrights. An intangible asset, the useful life of which is not limited, is not subject to the allowance for depreciation. No allowance will be permitted merely because, in the unsupported opinion of the taxpayer, the intangible asset has a limited useful life. No deduction for depreciation is allowable with respect to goodwill. For rules with respect to organizational expenditures, see section 248 and the regulations thereunder. For rules with respect to trademark and trade name expenditures, see section 177 and the regulations thereunder. See sections 197 and 167(f) and, to the extent applicable, §§1.197–2 and 1.167(a)–14 for amortization of goodwill and certain other intangibles acquired after August 10, 1993, or after July 25, 1991, if a valid retroactive election under §1.197–1T has been made.

(b) *Safe harbor amortization for certain intangible assets*—(1) *Useful life.* Solely for purposes of determining the depreciation allowance referred to in paragraph (a) of this section, a taxpayer may treat an intangible asset as having a useful life equal to 15 years unless—

(i) An amortization period or useful life for the intangible asset is specifically prescribed or prohibited by the Internal Revenue Code, the regulations thereunder (other than by this paragraph (b)), or other published guidance in the Internal Revenue Bulletin (see § 601.601(d)(2) of this chapter);

(ii) The intangible asset is described in § 1.263(a)–4(c) (relating to intangibles acquired from another person) or § 1.263(a)–4(d)(2) (relating to created financial interests);

(iii) The intangible asset has a useful life the length of which can be estimated with reasonable accuracy; or

(iv) The intangible asset is described in § 1.263(a)–4(d)(8) (relating to certain benefits arising from the provision, production, or improvement of real property), in which case the taxpayer may treat the intangible asset as having a useful life equal to 25 years solely for purposes of determining the depreciation allowance referred to in paragraph (a) of this section.

(2) *Applicability to acquisitions of a trade or business, changes in the capital structure of a business entity, and certain other transactions.* The safe harbor useful life provided by paragraph (b)(1) of this section does not apply to an amount required to be capitalized by § 1.263(a)–5 (relating to amounts paid to facilitate an acquisition of a trade or business, a change in the capital structure of a business entity, and certain other transactions).

(3) *Depreciation method.* A taxpayer that determines its depreciation allowance for an intangible asset using the 15-year useful life prescribed by paragraph (b)(1) of this section (or the 25-year useful life in the case of an intangible asset described in § 1.263(a)–4(d)(8)) must determine the allowance by amortizing the basis of the intangible asset (as determined under section 167(c) and without regard to salvage value) ratably over the useful life beginning on the first day of the month in which the intangible asset is placed in service by the taxpayer. The intangible asset is not eligible for amortization in the month of disposition.

(4) *Effective date.* This paragraph (b) applies to intangible assets created on or after December 31, 2003.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960, as amended by T.D. 8867, 65 FR 3825, Jan. 25, 2000; T.D. 9107, 69 FR 444, Jan. 5, 2004]

§ 1.167(a)–4 Leased property.

(a) *In general.* [Reserved] For further guidance, see § 1.167(a)–4T(a).

(b) *Effective/applicability date.* [Reserved] For further guidance, see § 1.167(a)–4T(b).

[T.D. 9564, 76 FR 81085, Dec. 27, 2011]

§ 1.167(a)–4T Leased property (temporary).

(a) *In general.* Capital expenditures made by either a lessee or lessor for the erection of a building or for other permanent improvements on leased property are recovered by the lessee or lessor under the provisions of the Internal Revenue Code applicable to the cost recovery of the building or improvements, if subject to depreciation or amortization, without regard to the period of the lease. For example, if the building or improvement is property to which section 168 applies, the lessee or lessor determines the depreciation deduction for the building or improvement under section 168. *See* section 168(i)(8)(A). If the improvement is property to which section 167 or section 197 applies, the lessee or lessor determines the depreciation or amortization deduction for the improvement under section 167 or section 197, as applicable.

(b) *Effective/applicability date*—(1) *In general.* Except as provided in paragraphs (b)(2) and (b)(3) of this section, this section applies to taxable years beginning on or after January 1, 2014.

(2) *Application of this section to leasehold improvements placed in service after December 31, 1986, in taxable years beginning before January 1, 2014.* For leasehold improvements placed in service after December 31, 1986, in taxable years beginning before January 1, 2014, a taxpayer may—

(i) Apply the provisions of this section; or

(ii) Depreciate any leasehold improvement to which section 168 applies under the provisions of section 168 and depreciate or amortize any leasehold improvement to which section 168 does not apply under the provisions of the Internal Revenue Code that are applicable to the cost recovery of that leasehold improvement, without regard to the period of the lease.

(3) *Application of this section to leasehold improvements placed in service before January 1, 1987.* For leasehold improvements placed in service before January 1, 1987, see §1.167(a)–4 in effect prior to January 1, 2012 (§1.167(a)–4 as contained in 26 CFR part 1 edition revised as of April 1, 2011).

(4) *Change in method of accounting.* Except as provided in §1.446–1(e)(2)(ii)(*d*)(*3*)(*i*), a change to comply with this section for depreciable assets placed in service in a taxable year ending on or after December 30, 2003, is a change in method of accounting to which the provisions of section 446(e) and the regulations under section 446(e) apply. Except as provided in §1.446–1(e)(2)(ii)(*d*)(*3*)(*i*), a taxpayer also may treat a change to comply with this section for depreciable assets placed in service in a taxable year ending before December 30, 2003, as a change in method of accounting to which the provisions of section 446(e) and the regulations under section 446(e) apply.

(5) *Expiration date.* The applicability of this section expires on December 23, 2014.

[T.D. 9564, 76 FR 81085, Dec. 27, 2011, as amended at 77 FR 74584, Dec. 17, 2012]

§ 1.167(a)–5 Apportionment of basis.

In the case of the acquisition on or after March 1, 1913, of a combination of depreciable and nondepreciable property for a lump sum, as for example, buildings and land, the basis for depreciation cannot exceed an amount which bears the same proportion to the lump sum as the value of the depreciable property at the time of acquisition bears to the value of the entire property at that time. In the case of property which is subject to both the allowance for depreciation and amortization, depreciation is allowable only with respect to the portion of the depreciable property which is not subject to the allowance for amortization and may be taken concurrently with the allowance for amortization. After the close of the amortization period or after amortization deductions have been discontinued with respect to any such property, the unrecovered cost or other basis of the depreciable portion of such property will be subject to depreciation. For adjustments to basis, see section 1016 and other applicable provisions of law. For the adjustment to the basis of a structure in the case of a donation of a qualified conservation contribution under section 170(h), see §1.170A–14(h)(3)(iii).

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960, as amended by T.D. 8069, 51 FR 1498, Jan. 14, 1986]

§ 1.167(a)–5T Application of section 1060 to section 167 (temporary).

In the case of an acquisition of a combination of depreciable and nondepreciable property for a lump sum in an applicable asset acquisition to which section 1060 applies, the basis for depreciation of the depreciable property cannot exceed the amount of consideration allocated to that property under section 1060 and §1.1060–1T.

[T.D. 8215, 53 FR 27043, July 18, 1988]

§ 1.167(a)–6 Depreciation in special cases.

(a) *Depreciation of patents or copyrights.* The cost or other basis of a patent or copyright shall be depreciated over its remaining useful life. Its cost to the patentee includes the various Government fees, cost of drawings, models, attorneys' fees, and similar expenditures. For rules applicable to research and experimental expenditures, see sections 174 and 1016 and the regulations thereunder. If a patent or copyright becomes valueless in any year before its expiration the unrecovered cost or other basis may be deducted in that year. See §1.167(a)–14(c)(4) for depreciation of a separately acquired interest in a patent or copyright described in section 167(f)(2) acquired after January 25, 2000. See §1.197–2 for amortization of interests in patents and copyrights that constitute amortizable section 197 intangibles.

(b) *Depreciation in case of farmers.* A reasonable allowance for depreciation may be claimed on farm buildings (except a dwelling occupied by the owner), farm machinery, and other physical property but not including land. Livestock acquired for work, breeding, or dairy purposes may be depreciated unless included in an inventory used to determine profits in accordance with section 61 and the regulations thereunder. Such depreciation should be determined with reference to the cost or other basis, salvage value, and the estimated useful life of the livestock. See also section 162 and the regulations thereunder relating to trade or business expenses, section 165 and the regulations thereunder relating to losses of farmers, and section 175 and the regulations thereunder relating to soil or water conservation expenditures.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960, as amended by T.D. 8867, 65 FR 3825, Jan. 25, 2000]

§ 1.167(a)–7 Accounting for depreciable property.

(a) Depreciable property may be accounted for by treating each individual item as an account, or by combining two or more assets in a single account. Assets may be grouped in an account in a variety of ways. For example, assets similar in kind with approximately the same useful lives may be grouped together. Such an account is commonly known as a group account. Another appropriate grouping might consist of assets segregated according to use without regard to useful life, for example, machinery and equipment, furniture and fixtures, or transportation equipment. Such an account is commonly known as a classified account. A broader grouping, where assets are included in the same account regardless of their character or useful lives, is commonly referred to as a composite account. For example, all the assets used in a business may be included in a single account. Group, classified, or composite accounts may be further broken down on the basis of location, dates of acquisition, cost, character, use, etc.

(b) When group, classified, or composite accounts are used with average useful lives and a normal retirement occurs, the full cost or other basis of the asset retired, unadjusted for depreciation or salvage, shall be removed from the asset account and shall be charged to the depreciation reserve. Amounts representing salvage ordinarily are credited to the depreciation reserve. Where an asset is disposed of for reasons other than normal retirement, the full cost or other basis of the asset shall be removed from the asset account, and the depreciation reserve shall be charged with the depreciation applicable to the retired asset. For rules with respect to losses on normal retirements, see § 1.167 (a)–8.

(c) A taxpayer may establish as many accounts for depreciable property as he desires. Depreciation allowances shall be computed separately for each account. Such depreciation preferably should be recorded in a depreciation reserve account; however, in appropriate cases it may be recorded directly in the asset account. Where depreciation reserves are maintained, a separate reserve account shall be maintained for each asset account. The regular books of account or permanent auxiliary records shall show for each account the basis of the property, including adjustments necessary to conform to the requirements of section 1016 and other provisions of law relating to adjustments to basis, and the depreciation allowances for tax purposes. In the event that reserves for book purposes do not correspond with reserves maintained for tax purposes, permanent auxiliary records shall be maintained with the regular books of accounts reconciling the differences in depreciation for tax and book purposes because of different methods of depreciation, bases, rates, salvage, or other factors. Depreciation schedules filed with the income tax return shall show the accumulated reserves computed in accordance with the allowances for income tax purposes.

(d) In classified or composite accounts, the average useful life and rate shall be redetermined whenever additions, retirements, or replacements substantially alter the relative proportion of types of assets in the accounts. See example (2) in paragraph (b) of § 1.167(b)–1 for method of determining the depreciation rate for a classified or composite account.

(e) *Applicability*. [Reserved] For further guidance, see § 1.167(a)–7T(e).

(f) *Effective/applicability date*. [Reserved] For further guidance, see §1.167(a)–7T(f).

(g) *Expiration date*. [Reserved] For further guidance, see §1.167(a)–7T(g).

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960, as amended by T.D. 9564, 76 FR 81085, Dec. 27, 2011]

§ 1.167(a)–7T Accounting for depreciable property (temporary).

(a) through (d) [Reserved] For further guidance, see §1.167(a)–7(a) through (d).

(e) *Applicability*. Paragraphs (a), (b), and (d) of this section apply to property for which depreciation is determined under section 167 (but not under section 168, section 1400I, section 1400L(c), section 168 prior to its amendment by the Tax Reform Act of 1986 (100 Stat. 2121), or under an additional first year depreciation deduction provision of the Internal Revenue Code (for example, section 168(k) through (n), 1400L(b), or 1400N(d))). Paragraph (c) of this section does not apply to general asset accounts as provided by section 168(i)(4) and §1.168(i)–1T.

(f) *Effective/applicability date*—(1) *In general*. This section applies to taxable years beginning on or after January 1, 2014. Section 1.167(a)–7 as contained in 26 CFR part 1 edition revised as of April 1, 2011, applies to taxable years beginning before January 1, 2014.

(2) *Optional early application*. A taxpayer may choose to apply this section to taxable years beginning on or after January 1, 2012.

(g) *Expiration date*. The applicability of this section expires on December 23, 2014.

[T.D. 9564, 76 FR 81085, Dec. 27, 2011, as amended at 77 FR 74584, Dec. 17, 2012]

§ 1.167(a)–8 Retirements.

(a) *Gains and losses on retirements*. For the purposes of this section the term ''retirement'' means the permanent withdrawal of depreciable property from use in the trade or business or in the production of income. The withdrawal may be made in one of several ways. For example, the withdrawal may be made by selling or exchanging the asset, or by actual abandonment. In addition, the asset may be withdrawn from such productive use without disposition as, for example, by being placed in a supplies or scrap account. The tax consequences of a retirement depend upon the form of the transaction, the reason therefor, the timing of the retirement, the estimated useful life used in computing depreciation, and whether the asset is accounted for in a separate or multiple asset account. Upon the retirement of assets, the rules in this section apply in determining whether gain or loss will be recognized, the amount of such gain or loss, and the basis for determining gain or loss:

(1) Where an asset is retired by sale at arm's length, recognition of gain or loss will be subject to the provisions of sections 1002, 1231, and other applicable provisions of law.

(2) Where an asset is retired by exchange, the recognition of gain or loss will be subject to the provisions of sections 1002, 1031, 1231, and other applicable provisions of law.

(3) Where an asset is permanently retired from use in the trade or business or in the production of income but is not disposed of by the taxpayer or physically abandoned (as, for example, when the asset is transferred to a supplies or scrap account), gain will not be recognized. In such a case loss will be recognized measured by the excess of the adjusted basis of the asset at the time of retirement over the estimated salvage value or over the fair market value at the time of such retirement if greater, but only if—

(i) The retirement is an abnormal retirement, or

(ii) The retirement is a normal retirement from a single asset account (but see paragraph (d) of this section for special rule for item accounts), or

(iii) The retirement is a normal retirement from a multiple asset account in which the depreciation rate was based on the maximum expected life of the longest lived asset contained in the account.

(4) Where an asset is retired by actual physical abandonment (as, for example, in the case of a building condemned as unfit for further occupancy or other use), loss will be recognized measured by the amount of the adjusted basis of the asset abandoned at the time of such abandonment. In order to qualify for the recognition of loss

from physical abandonment, the intent of the taxpayer must be irrevocably to discard the asset so that it will neither be used again by him nor retrieved by him for sale, exchange, or other disposition.

Experience with assets which have attained an exceptional or unusual age shall, with respect to similar assets, be disregarded in determining the maximum expected useful life of the longest lived asset in a multiple asset account. For example, if a manufacturer establishes a proper multiple asset account for 50 assets which are expected to have an average life of 30 years but which will remain useful to him for varying periods between 20 and 40 years, the maximum expected useful life will be 40 years, even though an occasional asset of this kind may last 60 years.

(b) *Definition of normal and abnormal retirements.* For the purpose of this section the determination of whether a retirement is normal or abnormal shall be made in the light of all the facts and circumstances. In general, a retirement shall be considered a normal retirement unless the taxpayer can show that the withdrawal of the asset was due to a cause not contemplated in setting the applicable depreciation rate. For example, a retirement is considered normal if made within the range of years taken into consideration in fixing the depreciation rate and if the asset has reached a condition at which, in the normal course of events, the taxpayer customarily retires similar assets from use in his business. On the other hand, a retirement may be abnormal if the asset is withdrawn at an earlier time or under other circumstances, as, for example, when the asset has been damaged by casualty or has lost its usefulness suddenly as the result of extraordinary obsolescence.

(c) *Basis of assets retired.* The basis of an asset at the time of retirement for computing gain or loss shall be its adjusted basis for determining gain or loss upon a sale or other disposition as determined in accordance with the provisions of section 1011 and the following rules:

(1) In the case of a normal retirement of an asset from a multiple asset account where the depreciation rate is based on average expected useful life, the term ''adjusted basis'' means the salvage value estimated in determining the depreciation deduction in accordance with the provisions in paragraph (c) of §1.167(a)–1.

(2) In the case of a normal retirement of an asset from a multiple asset account on which the depreciation rate was based on the maximum expected life of the longest lived asset in the account, the adjustment for depreciation allowed or allowable shall be made at the rate which would have been proper if the asset had been depreciated in a single asset account (under the method of depreciation used for the multiple asset account) using a rate based upon the maximum expected useful life of that asset, and

(3) In the case of an abnormal retirement from a multiple asset account the adjustment for depreciation allowed or allowable shall be made at the rate which would have been proper had the asset been depreciated in a single asset account (under the method of depreciation used for the multiple asset account) and using a rate based upon either the average expected useful life or the maximum expected useful life of the asset, depending upon the method of determining the rate of depreciation used in connection with the multiple asset account.

(d) *Special rule for item accounts.* (1) As indicated in paragraph (a)(3)(ii) and (iii) of this section, a loss is recognized upon the normal retirement of an asset from a single asset account but a loss on the normal retirement of an asset in a multiple asset account is not allowable where the depreciation rate is based upon the average useful life of the assets in the account. Where a taxpayer with more than one depreciable asset chooses to set up a separate account for each such asset and the depreciation rate is based on the average useful life of such assets (so that he uses the same life for each account), the question arises whether his depreciation deductions in substance are the equivalent of those which would result from the use of multiple asset accounts and, therefore, he should be subject to the rules governing losses on retirements of assets from multiple asset accounts. Where a taxpayer has only a few depreciable assets which he chooses to account for in single asset accounts, particularly where such assets cover a relatively narrow range of lives, it cannot be said in the usual case that the allowance of losses on retirements from such accounts clearly will distort income. This results from the fact that where a taxpayer has only a few depreciable assets it is usually not possible clearly to determine that the depreciation rate is based upon the average useful life of such assets. Accordingly, it cannot be said that the taxpayer is in effect clearly operating with a multiple asset account using an average life rate so that losses should not be allowed on normal retirements. Therefore, losses normally will be allowed upon retirement of assets from single asset accounts where the taxpayer has only a few depreciable assets. On the other hand, when a taxpayer who has only a few depreciable assets chooses to account for them in single asset accounts, using for each account a depreciation rate based on the average useful life of such assets, and the assets cover a wide range of lives, the likelihood that income will be distorted is greater than where the group of assets covers a relatively narrow range of lives. In those cases where the allowance of losses would distort income, the rules with respect to the allowance of losses on normal retirement shall be applied to such assets in the same manner as though the assets had been accounted for in multiple asset accounts using a rate based upon average expected useful life.

(2) Where a taxpayer has a large number of depreciable assets and depreciation is based on the average useful life of such assets, then, whether such assets are similar or dissimilar and regardless of whether they are accounted for in individual asset accounts or multiple asset accounts the allowance of losses on the normal retirement of such assets would distort income. Such distortion would result from the fact that the use of average useful life (and, accordingly, average rate) assumes that while some assets normally will be retired before the expiration of the average life, others normally will be retired after expiration of the average life. Accordingly, if instead of accounting for a large number of similar or dissimilar depreciable assets in multiple asset accounts, the taxpayer chooses to account separately for such assets, using a rate based upon the average life of such assets, the rules with respect to the allowances of losses on normal retirements will be applied to such assets in the same manner as though the assets were accounted for in multiple asset accounts using a rate based upon average expected useful life.

(3) Where a taxpayer who does not have a large number of depreciable assets (and who therefore is not subject to subparagraph (2) of this paragraph) chooses to set up a separate account for each such asset, and has sought to compute an average life for such assets on which to base his depreciation deductions (so that he uses the same life for each account), the allowance of losses on normal retirements from such accounts may in some situations substantially distort income. Such distortion would result from the fact that the use of average useful life (and, accordingly, average rate) assumes that while some assets normally will be retired before expiration of the average life, others normally will be retired after expiration of the average life. Accordingly, where a taxpayer chooses to account separately for such assets instead of accounting for them in multiple asset accounts, and the result is to substantially distort his income, the rules with respect to the allowance of losses on normal retirements shall be applied to such assets in the same manner as though the assets had been accounted for in multiple asset accounts using a rate based upon average expected useful life.

(4) Whenever a taxpayer is treated under this paragraph as though his assets were accounted for in a multiple asset account using an average life rate, and, therefore, he is denied a loss on retirements, the unrecovered cost less salvage of each asset which was accounted for separately may be amortized in accordance with the regulation stated in paragraph (e)(1)(ii) of this section.

(e) *Accounting treatment of asset retirements*. (1) In the case of a normal retirement where under the foregoing rules no loss is recognized and where the asset is retired without disposition or abandonment, (i) if the asset was contained in a multiple asset account, the full cost of such asset, reduced by estimated salvage, shall be charged to the depreciation reserve, or (ii) if the asset was accounted for separately, the unrecovered cost or other basis, less salvage, of the asset may be amortized through annual deductions from gross income in amounts equal to the unrecovered cost or other basis of such asset, divided by the average expected useful life (not the remaining useful life) applicable to the asset at the time of retirement. For example, if an asset is retired after six years of use and at the time of retirement depreciation was being claimed on the basis of an average expected useful life of ten years, the unrecovered cost or other basis less salvage would be amortized through equal annual deductions over a period of ten years from the time of retirement.

(2) Where multiple asset accounts are used and acquisitions and retirements are numerous, if a taxpayer, in order to avoid unnecessarily detailed accounting for individual retirements, consistently follows the practice of charging the reserve with the full cost or other basis of assets retired and of crediting it with all receipts from salvage, the practice may be continued so long as, in the opinion of the Commissioner, it clearly reflects income. Conversely, where the taxpayer customarily follows a practice of reporting all receipts from salvage as ordinary taxable income such practice may be continued so long as, in the opinion of the Commissioner, it clearly reflects income.

(f) *Cross reference*. For special rules in connection with the retirement of the last assets of a given year's acquisitions under the declining balance method, see example (2) in paragraph (b) of § 1.167 (b)–2.

(g) *Applicability*. [Reserved] For further guidance, see § 1.167(a)–8T(g).

(h) *Effective/applicability date*. [Reserved] For further guidance, see § 1.167(a)–8T(h).

(i) [Reserved] For further guidance, see § 1.167(a)–8T(i).

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960, as amended by T.D. 9564, 76 FR 81085, Dec. 27, 2011]

§ 1.167(a)–8T Retirements (temporary).

(a) through (f) [Reserved] For further guidance, see § 1.167(a)–8(a) through (f).

(g) *Applicability*. This section applies to property for which depreciation is determined under section 167 (but not under section 168, section 1400I, section 1400L(c), section 168 prior to its amendment by the Tax Reform Act of 1986 (100 Stat. 2121), or under an additional first year depreciation deduction provision of the Internal Revenue Code (for example, section 168(k) through (n), 1400L(b), or 1400N(d))).

(h) *Effective/applicability date*—(1) *In general*. This section applies to taxable years beginning on or after January 1, 2014. Section 1.167(a)–8 as contained in 26 CFR part 1 edition revised as of April 1, 2011, applies to taxable years beginning before January 1, 2014.

(2) *Optional early application*. A taxpayer may choose to apply this section to taxable years beginning on or after January 1, 2012.

(i) *Expiration date*. The applicability of this section expires on December 23, 2014.

[T.D. 9564, 76 FR 81085, Dec. 27, 2011, as amended at 77 FR 74584, Dec. 17, 2012]

§ 1.167(a)–9 Obsolescence.

The depreciation allowance includes an allowance for normal obsolescence which should be taken into account to the extent that the expected useful life of property will be shortened by reason thereof. Obsolescence may render an asset economically useless to the taxpayer regardless of its physical condition. Obsolescence is attributable to many causes, including technological improvements and reasonably foreseeable economic changes. Among these causes are normal progress of the arts and sciences, supersession or inadequacy brought about by developments in the industry, products, methods, markets, sources of supply, and other like changes, and legislative or regulatory action. In any case in which the taxpayer shows that the estimated useful life previously used should be shortened by reason of obsolescence greater than had been assumed in computing such estimated useful life, a change to a new and shorter estimated useful life computed in accordance with such showing will be permitted. No such change will be permitted merely because in the unsupported opinion of the taxpayer the property may become obsolete. For rules governing the allowance of a loss when the usefulness of depreciable property is suddenly terminated, see §1.167(a)–8. If the estimated useful life and the depreciation rates have been the subject of a previous agreement, see section 167(d) and §1.167(d)–1.

§1.167(a)–10 When depreciation deduction is allowable.

(a) A taxpayer should deduct the proper depreciation allowance each year and may not increase his depreciation allowances in later years by reason of his failure to deduct any depreciation allowance or of his action in deducting an allowance plainly inadequate under the known facts in prior years. The inadequacy of the depreciation allowance for property in prior years shall be determined on the basis of the allowable method of depreciation used by the taxpayer for such property or under the straight line method if no allowance has ever been claimed for such property. The preceding sentence shall not be construed as precluding application of any method provided in section 167(b) if taxpayer's failure to claim any allowance for depreciation was due solely to erroneously treating as a deductible expense an item properly chargeable to capital account. For rules relating to adjustments to basis, see section 1016 and the regulations thereunder.

(b) The period for depreciation of an asset shall begin when the asset is placed in service and shall end when the asset is retired from service. A proportionate part of one year's depreciation is allowable for that part of the first and last year during which the asset was in service. However, in the case of a multiple asset account, the amount of depreciation may be determined by using what is commonly described as an ''averaging convention'', that is, by using an assumed timing of additions and retirements. For example, it might be assumed that all additions and retirements to the asset account occur uniformly throughout the taxable year, in which case depreciation is computed on the average of the beginning and ending balances of the asset account for the taxable year. See example (3) under paragraph (b) of §1.167(b)–1. Among still other averaging conventions which may be used is the one under which it is assumed that all additions and retirements during the first half of a given year were made on the first day of that year and that all additions and retirements during the second half of the year were made on the first day of the following year. Thus, a full year's depreciation would be taken on additions in the first half of the year and no depreciation would be taken on additions in the second half. Moreover, under this convention, no depreciation would be taken on retirements in the first half of the year and a full year's depreciation would be taken on the retirements in the second half. An averaging convention, if used, must be consistently followed as to the account or accounts for which it is adopted, and must be applied to both additions and retirements. In any year in which an averaging convention substantially distorts the depreciation allowance for the taxable year, it may not be used.

§1.167(a)–11 Depreciation based on class lives and asset depreciation ranges for property placed in service after December 31, 1970.

(a) *In general*—(1) *Summary*. This section provides an asset depreciation range and class life system for determining the reasonable allowance for depreciation of designated classes of assets placed in service after December 31, 1970. The system is designed to minimize disputes between taxpayers and the Internal Revenue Service as to the useful life of property, and as to salvage value, repairs, and other matters. The system is optional with the taxpayer. The taxpayer has an annual election. Generally, an election for a taxable year must apply to all additions of eligible property during the taxable year of election, but does not apply to additions of eligible property in any other taxable year. The taxpayer's election, made with the return for the taxable year, may not be revoked or modified for any property included in the election. Generally, the taxpayer must establish vintage accounts for all eligible property included in the election, must determine the allowance for depreciation of such property in the taxable year of election, and in subsequent taxable years, on the basis of the asset depreciation period selected and must apply the first-year convention specified in the election to determine the allowance for depreciation of such property. This section also contains special provisions for the treatment of salvage value, retirements, and the costs of the repair, maintenance, rehabilitation or improvement of property. In general, a taxpayer may not apply any provision of this section unless he makes an election and thereby consents to, and agrees to apply, all the provisions of this section. A taxpayer who elects to apply this section does, however, have certain options as to the application of specified provisions of this section. A taxpayer may elect to apply this section for a taxable year only if for such taxable year he complies with the requirements of paragraph (f)(4) of this section.

(2) *Definitions.* For the meaning of certain terms used in this section, see paragraphs (b)(2) (''eligible property''), (b)(3) (''vintage account'' and ''vintage''), (b)(4) (''asset depreciation range'', ''asset guideline class'', ''asset guideline period'', and ''asset depreciation period''), (b)(5)(iii)(*c*) (''used property''), (b)(6)(i) (''public utility property''), (c)(1)(iv) (''original use''), (c)(1)(v) (''unadjusted basis'' and ''adjusted basis''), (c)(2)(ii) (''modified half-year convention''), (c)(2)(iii) (''half-year convention''), (d)(1)(i) (''gross salvage value''), (d)(1)(ii) (''salvage value''), (d)(2)(iii) (''repair allowance'', ''repair allowance percentage'', and ''repair allowance property''), (d)(2)(vi) (''excluded addition''), (d)(2)(vii) (''property improvement''), (d)(3)(ii) (''ordinary retirement'' and ''extraordinary retirement''), (d)(3)(vi) (''special basis vintage account''), and (e)(1) (''first placed in service'') of this section.

(b) *Reasonable allowance using asset depreciation ranges*—(1) *In general.* The allowance for depreciation of eligible property (as defined in subparagraph (2) of this paragraph) to which the taxpayer elects to apply this section shall be determined as provided in paragraph (c) of this section and shall constitute the reasonable allowance for depreciation of such property under section 167(a).

(2) *Definition of eligible property.* For purposes of this section, the term ''eligible property'' means tangible property which is subject to the allowance for depreciation provided by section 167(a) but only if—

(i) An asset guideline class and asset guideline period are in effect for such property for the taxable year of election (see subparagraph (4) of this paragraph);

(ii) The property is first placed in service (as described in paragraph (e)(1) of this section) by the taxpayer after December 31, 1970 (but see subparagraph (7) of this paragraph for special rule where there is a mere change in the form of conducting a trade or business); and

(iii) The property is either—

(*a*) Section 1245 property as defined in section 1245(a) (3), or

(*b*) Section 1250 property as defined in section 1250(c).

See, however, subparagraph (6) of this paragraph for special rule for certain public utility property as defined in section 167(l)(3)(A). Property which meets the requirements of this subparagraph is eligible property even if depreciation with respect to such property, determined in accordance with this section, is allocated to or otherwise required to be reflected in the cost of a capitalized item. The term ''eligible property'' includes any property which meets the requirements of this subparagraph, whether such property is new property, ''used property'' (as described in subparagraph (5)(iii)(*c*) of this paragraph), a ''property improvement'' (as described in paragraph (d)(2)(vii) of this section), or an ''excluded addition'' (as described in paragraph (d)(2)(vi) of this section). For the treatment of expenditures for the repair, maintenance, rehabilitation or improvement of certain property, see paragraph (d) (2) of this section.

(3) *Requirement of vintage accounts*—(i) *In general.* For purposes of this section, a ''vintage account'' is a closed-end depreciation account containing eligible property to which the taxpayer elects to apply this section, first placed in service by the taxpayer during the taxable year of election. The ''vintage'' of an account refers to the taxable year during which the eligible property in the account is first placed in service by the taxpayer. Such an account will consist of an asset, or a group of assets, within a single asset guideline class established pursuant to subparagraph (4) of this paragraph and may contain only eligible property. Each item of eligible property to which the taxpayer elects to apply this section, first placed in service by the taxpayer during the taxable year of election (determined without regard to a convention described in paragraph (c)(2) of this section) shall be placed in a vintage account of the taxable year of election. For rule regarding ''special basis vintage accounts'' for certain property improvements, see paragraph (d)(2)(viii) and (3)(vi) of this section. Any number of vintage accounts of a taxable year may be established. More than one account of the same vintage may be established for different assets of the same asset guideline class. See paragraph (d)(3)(xi) of this section for special rule for treatment of certain multiple asset and item accounts.

(ii) *Special rule.* Section 1245 property may not be placed in a vintage account with section 1250 property. Property the original use of which does not commence with the taxpayer may not be placed in a vintage account with property the original use of which commences with the taxpayer. Property described in section 167(f)(2) may not be placed in a vintage account with property not described in section 167(f)(2). Property described in section 179(d)(1) for which the taxpayer elects the allowance for the first taxable year in accordance with section 179(c) may not be placed in a vintage account with property not described in section 179(d)(1) or for which the taxpayer does not elect such allowance for the first taxable year. For special rule for property acquired in a transaction to which section 381(a) applies, see paragraph (e)(3)(i) of this section. For additional rules with respect to accounting for eligible property, see paragraph (e) of this section.

(4) *Asset depreciation ranges and periods*—(i) *Selection of asset depreciation period.* The taxpayers books and records must specify for each vintage account of the taxable year of election—

(*a*) In the case of vintage account for property in an asset guideline class for which no asset depreciation range is in effect for the taxable year, the asset depreciation period (which shall be equal to the asset guideline period for the assets in such account), or

(*b*) In the case of a vintage account for property in an asset guideline class for which an asset depreciation range is in effect for the taxable year, the asset depreciation period selected by the taxpayer from the asset depreciation range for the assets in such account.

Unless otherwise expressly provided in the establishment thereof, for purposes of this section, the term ''asset guideline class'' means a category of assets (including ''subsidiary assets'') for which a separate asset guideline period is in effect for the taxable year as provided in subdivision (ii) of this subparagraph. The ''asset depreciation range'' is a period of years which extends from 80 percent of the asset guideline period to 120 percent of such period, determined in each case by rounding any fractional part of a year to the nearer of the nearest whole or half year. Except as provided in paragraph (e)(3)(iv) of this section, in the case of an asset guideline class for which an asset depreciation range is in effect, any period within the asset depreciation range for the assets in a vintage account which is a whole number of years or a whole number of years plus a half year, may be selected. The term ''asset depreciation period'' means the period selected from the asset depreciation range, or if no asset depreciation range is in effect for the class, the asset guideline period. The ''asset guideline period'' is established in accordance with subdivision (ii) of this subparagraph and is the class life under section 167(m). See Revenue Procedure 72–10 for special rules for section 1250 property and property predominately used outside the United States. In general, an asset guideline period, but no asset depreciation range, is in effect for such property.

(ii) *Establishment of asset guideline classes and periods.* The asset guideline classes and the asset guideline periods, and the asset depreciation ranges determined from such periods, in effect for taxable years ending before the effective date of the first supplemental asset guideline classes, asset guideline periods, and asset depreciation ranges, established pursuant to this section are set forth in Revenue Procedure 72–10. Asset guideline classes and periods, and asset depreciation ranges, will from time to time be established, supplemented, and revised with express reference to this section, and will be published in the Internal Revenue Bulletin. The asset guideline classes, the asset guideline periods, and the asset depreciation ranges determined from such periods in effect as of the last day of a taxable year of election shall apply to all vintage accounts of such taxable year, except that neither the asset guideline period nor the lower limit of the asset depreciation range for any such account shall be longer than the asset guideline period or the lower limit of the asset depreciation range, as the case may be, for such account in effect as of the first day of the taxable year (or as of such later time in such year as an asset guideline class first established during such year becomes effective). Generally, the reasonable allowance for depreciation of property for any taxable year in a vintage account shall not be changed to reflect any supplement or revision of the asset guideline classes or periods, and asset depreciation ranges, for the taxable year in which the account is established, which occurs after the end of such taxable year. However, if expressly provided in such a supplement or revision, the taxpayer may, at his option in the manner specified therein, apply the revised or supplemented asset guideline classes or periods and asset depreciation ranges to such property for such taxable year and succeeding taxable years.

(iii) *Applicable guideline classes and periods in special situations.* (*a*) An electric or gas utility which would in accordance with Revenue Procedure 64–21 be entitled to use a composite guideline class basis for applying Revenue Procedure 62–21 may, solely with respect to property for which an asset depreciation range is in effect for the taxable year, elect to apply this section on the basis of a composite asset guideline class and asset guideline period determined by applying the provisions of Revenue Procedure 64–21 to such property. The asset depreciation range for such a composite asset guideline class shall be determined by reference to the composite asset guideline period at the beginning of the first taxable year to which the taxpayer elects to apply this section and shall not be changed until such time as major variations in the asset mix or the asset guideline classes or periods justify some other composite asset guideline period. Except as provided in paragraph (d)(2)(iii) of this section with respect to buildings and other structures, for the purposes of this section, all property in the composite asset guideline class shall be treated as included in a single asset guideline class. If the taxpayer elects to apply this subdivision, the election shall be made on the tax return filed for the first taxable year for which the taxpayer elects to apply this section. An election to apply this subdivision for any taxable year shall apply to all succeeding taxable years to which the taxpayer elects to apply this section, except to the extent the election to apply this subdivision is with the consent of the Commissioner terminated with respect to a succeeding taxable year and all taxable years thereafter.

(*b*) For purposes of this section, property shall be included in the asset guideline class for the activity in which the property is primarily used. See paragraph (e)(3)(iii) of this section for rule for leased property. Property shall be classified according to primary use even though the activity in which such property is primarily used is insubstantial in relation to all the taxpayer's activities. No change in the classification of property shall be made because of a change in primary use after the end of the taxable year in which property is first placed in service, including a change in use which results in section 1250 property becoming section 1245 property.

(*c*) An incorrect classification or characterization by the taxpayer of property for the purposes of this section (such as under (*b*) of this subdivision or under subparagraph (2) or (3)(ii) of this paragraph) shall not cause or permit a revocation of the election to apply this section for the taxable year in which such property was first placed in service. The classification or characterization of such property shall be corrected. All adjustments necessary to the correction shall be made, including adjustments of unadjusted basis, adjusted basis, salvage value, the reserve for depreciation of all vintage accounts affected, and the amount of depreciation allowable for all taxable years for which the period for assessment of tax prescribed in section 6501 has not expired. If because of incorrect classification or characterization property included in an election to apply this section was not placed in a vintage account and no asset depreciation period was selected for the property or the property was placed in a vintage account but an asset depreciation period was selected from an incorrect asset depreciation range, the taxpayer shall place the property in a vintage account and select an asset depreciation period for the account from the correct asset depreciation range.

(*d*) Generally, except as provided in subparagraph (5)(v)(*a*) of this paragraph, a taxpayer may not compute depreciation for eligible property first placed in service during the taxable year under a method of depreciation not described in section 167(b) (1), (2), or (3). (If the taxpayer computes depreciation with respect to such property under section 167(k), or amortizes such property, the property must be excluded from the election to apply this section.) (See subparagraph (5)(v)(*b*) of this paragraph.) However, if the taxpayer establishes to the satisfaction of the Commissioner that a method of depreciation not described in section 167(b) (1), (2), (3), or (k) was adopted for property in the asset guideline class on the basis of a good faith mistake as to the proper asset guideline class for the property, then, unless the requirements of subparagraph (5)(v)(*a*) of this paragraph are met, the taxpayer must terminate (as of the beginning of the taxable year) such method of depreciation with respect to all eligible property in the asset guideline class which was first placed in service during the taxable year. In such event, the taxpayer's election to apply this section shall include eligible property in the asset guideline class without regard to subparagraph (5)(v)(*a*) of this paragraph. The provisions of (*c*) of this subdivision shall apply to the correction in the classification of the property.

(*e*) If the provisions of section 167(j) apply to require a change in the method of depreciation with respect to an item of section 1250 property in a multiple asset vintage account, the asset shall be removed from the account and placed in a separate item vintage account. The unadjusted basis of the asset shall be removed from the unadjusted basis of the vintage account as of the first day of the taxable year in which the change in method of depreciation is required and the depreciation reserve established for the account shall be reduced by the depreciation allowable for the property computed in the manner prescribed in paragraph (c)(1)(v)(*b*) of this section for determination of the adjusted basis of property. See paragraph (d)(3)(vii)(*e*) of this section for treatment of salvage value when property is removed from a vintage account.

(iv) *Examples.* The principles of this subparagraph may be illustrated by the following examples:

Example 1. Corporation X purchases a bulldozer for the use in its construction business. The bulldozer is first placed in service in 1972. Since the bulldozer is tangible property for which an asset guideline class and period have been established, the bulldozer is eligible property. The bulldozer is in asset guideline class 15.1 of Revenue Procedure 72–10, and the asset depreciation range is 4–6 years.

Example 2. In 1972, corporation Y first places in service a factory building. Since the factory building is tangible property for which an asset guideline class and period have been established, it is eligible property.

The factory building is in asset guideline class 65.11 of Revenue Procedure 72–10. Since no asset depreciation range is in effect for the asset guideline class, the asset depreciation period is the asset guideline period of 45 years. (See subparagraph (5)(vi) of this paragraph for election to exclude certain section 1250 property during transition period.)

Example 3. In January of 1971, corporation Y, a calendar year taxpayer, pays or incurs $2,000 for the rehabilitation and improvement of machine A which was first placed in service in 1969. On January 1, 1971, corporation Y first placed in service machines B and C, each with an unadjusted basis of $10,000. Machines B and C are eligible property. Machine A would be eligible property but for the fact it was first placed in service prior to January 1, 1971 (that is, machine A is eligible property determined without regard to subparagraph (2)(ii) of this paragraph). Corporation Y elects to apply this section for the taxable year, and adopts the modified half-year convention described in paragraph (c)(2)(ii) of this section, but does not elect to apply the asset guideline class repair allowance described in paragraph (d)(2)(iii) of this section. Machines A, B, and C are in asset guideline class 24.4 under Revenue Procedure 72–10 for which the asset depreciation range is 8 to 12 years. The $2,000 expended on machine A substantially increases its capacity and is a capital expenditure under sections 162 and 263. The $2,000 is a property improvement (as defined in paragraph (d)(2)(vii)(*b*) of this section) which is eligible property. However, corporation Y by mistake treats the property improvement of $2,000 as a deductible repair. Also by mistake, corporation Y includes machine B in asset guideline class 24.3 under Revenue Procedure 72–10 for which the asset depreciation range is 5 to 7 years. Corporation Y establishes vintage accounts for 1971, and computes depreciation for 1971 and 1972 as follows:

	Dec. 31, 1972, reserve for depreciation	Dec. 31, 1972, adjusted basis
Vintage account for machine B, with an asset depreciation period of 5 years and an unadjusted basis of $10,000 for which corporation Y adopts the straight line method	$4,000	$6,000
Vintage account for machine C, with an asset depreciation period of 8 years and an unadjusted basis of $10,000 for which corporation Y adopts the straight line method	2,500	7,500

After audit in 1973 of corporation Y's taxable years 1971 and 1972, it is determined that the $2,000 paid in 1971 for the rehabilitation and improvement of machine A is a capital expenditure and that machine B is in asset guideline class 24.4. The incorrect classification is corrected. Corporation Y places machine B and the property improvement in a vintage account of 1971 and on its tax return filed for 1973 selects an asset depreciation period of 8 years for that account. Giving effect to the correction in classification of the property in accordance with subdivision (iii)(*c*) of this subparagraph, at the end of 1972 the unadjusted basis, reserve for depreciation, and adjusted basis of the vintage account for machine B and the property improvement with respect to machine A are $12,000, $3,000, and $9,000, respectively. Corporation Y's deduction of the $2,000 property improvement in 1971 as a repair expense under section 162 is disallowed. For 1971 and 1972 depreciation deductions are disallowed in the amount of $500 each year (that is, $750 excess annual depreciation on machine B minus $250 annual depreciation on the property improvement).

Example 4. (a) In 1971, Corporation X, a calendar year taxpayer, first places in service machines A through M, all of which are eligible property. All the machines except machine A are in asset guideline class 24.3 under Revenue Procedure 72–10. Machine A is in asset guideline class 24.4 under Revenue Procedure 72–10. Machine B has an unadjusted basis equal to 80 percent of the total unadjusted basis of machines B through M. By good faith mistake as to proper classification, corporation X includes both machine A and machine B in asset guideline class 24.4. Corporation X consistently uses the machine hour method of depreciation on all property in asset guideline class 24.4, and for 1971 computes depreciation for machines A and B under that method. Corporation X elects to apply this section for 1971 on the assumption that the election includes machines C through M which are in asset guideline class 24.3. In 1973, upon audit of corporation X's taxable years 1971 and 1972, it is determined that machine B is included in asset guideline class 24.3 and that since for 1971 corporation X computed depreciation on machine B under the machine hour method, in accordance with subparagraph (5)(v)(*a*) of this paragraph, all property in asset guideline class 24.3 (machines B through M) is excluded from corporation X's election to apply this section for 1971. Although corporation X has consistently used the machine hour method for asset guideline class 24.4, corporation X has not in the past used the machine hour method for machines of the type and function of machines C through M which are in asset guideline class 24.3. Both machine A and machine B are used in connection with the manufacture of wood products. There is reasonable basis for corporation X having assumed that machine B is in asset guideline class 24.4 along with machine

A to which it is similar. Corporation X establishes to the satisfaction of the Commissioner that it used the machine hour method for machine B on the basis of a good faith mistake as to the proper classification of the machine. Corporation X may, at its option (see subparagraph (5)(v) of this paragraph), terminate the machine hour method of depreciation for machine B as of the beginning of 1971, and in that event corporation X's election to apply this section for 1971 will apply to machines B through M without regard to subparagraph (5)(v)(*a*) of this paragraph. The adjustments provided in subdivision (iii)(*c*) of this subparagraph will be made as a result of the correction in classification of property. If corporation X does not terminate the machine hour method with respect to machine B, machines B through M must be excluded from the election to apply this section (see subparagraph (5)(v) of this paragraph).

(*b*) The facts are the same as in (*a*) of this example except that machine B has an unadjusted basis equal to only 65 percent of the total unadjusted basis of machines B through M.

In this case, corporation X must either terminate the machine hour method of depreciation with respect to asset B (since the provisions of subparagraph (5)(v) of this paragraph do not permit the exclusion of the property from the election to apply this section) or otherwise comply with the provisions of subparagraph (5)(v) of this paragraph. (See paragraph (c)(1)(iv) for limitation on methods which may be adopted for property included in the election to apply this section.)

(5) *Requirements of election*—(i) *In general.* Except as otherwise provided in paragraph (d)(2) of this section dealing with expenditures for the repair, maintenance, rehabilitation or improvement of certain property, no provision of this section shall apply to any property other than eligible property to which the taxpayer elects in accordance with this section, to apply this section. For the time and manner of election, and certain conditions to an election, see paragraph (f) of this section. Except as otherwise provided in subparagraph (4)(iii) of this paragraph, subdivision (v) of this subparagraph and in subparagraph (6)(iii) of this paragraph, a taxpayer's election to apply this section may not be revoked or modified after the last day prescribed for filing the election. Thus, for example, after such day, a taxpayer may not cease to apply this section to property included in the election, establish different vintage accounts for the taxable year of election, select a different period from the asset depreciation range for any such account, or adopt a different first-year convention for any such account.

(ii) *Property required to be included in election.* Except as otherwise provided in subdivision (iii) of this subparagraph dealing with certain ''used property'', in subdivision (iv) of this subparagraph dealing with ''section 38 property'', in subdivision (v) of this subparagraph dealing with property subject to special depreciation or amortization, in subdivision (vi) of this subparagraph dealing with certain section 1250 property, in subdivision (vii) of this subparagraph dealing with certain subsidiary assets, and in paragraph (e)(3) (i) and (iv) of this section dealing with transactions to which section 381(a) applies, if the taxpayer elects to apply this section to any eligible property first placed in service by the taxpayer during the taxable year of election, the election shall apply to all such eligible property, whether placed in service in a trade or business or held for production of income.

(iii) *Special 10 percent used property rule.* (*a*) If (*1*) the unadjusted basis of eligible used section 1245 property (as defined in (*c*) of this subdivision) first placed in service by the taxpayer during the taxable year of election, for which no specific used property asset guideline class (as defined in (*c*) of this subdivision) is in effect for the taxable year, exceeds (*2*) 10 percent of the unadjusted basis of all eligible section 1245 property first placed in service during the taxable year of election, the taxpayer may exclude all (but not less than all) the property described in (*a*)(*1*) of this subdivision from the election to apply this section.

(*b*) If (*1*) the unadjusted basis of eligible used section 1250 property first placed in service by the taxpayer during the taxable year of election, for which no specific used property asset guideline class is in effect for the taxable year, exceeds (*2*) 10 percent of the unadjusted basis of all eligible section 1250 property first placed in service during the taxable year of election, the taxpayer may exclude all (but not less than all) the property described in (*b*)(*1*) of this subdivision from the election to apply this section.

(*c*) For the purposes of this section, the term ''used property'' means property the original use of which does not commence with the taxpayer. Solely for the purpose of determining whether the 10 percent rule of this subdivision is satisfied, (*1*) eligible used property first placed in service during the taxable year and excluded from the election to apply this section pursuant to subdivision (v)(*a*) of this subparagraph and (*2*) eligible property acquired during the taxable year in a transaction to which section 381(a) applies, shall all be treated as used property regardless of whether such property would be treated as new property under section 167(c) and the regulations thereunder. The term ''specific used property asset guideline class'' means a class established in accordance with subparagraph (4) of this paragraph solely for used property primarily used in connection with the activity to which the class relates.

(iv) *Property subject to investment tax credit.* The taxpayer may exclude from an election to apply this section all, or less than all, units of eligible property first placed in service during the taxable year which is—

(*a*) ''Section 38 property'' as defined in section 48(a) which meets the requirements of section 49 and which is not property described in section 50, or

(*b*) Property to which section 47(a)(5)(B) applies which would be section 38 property but for section 49 and which is placed in service to replace section 38 property (other than property described in section 50) disposed of prior to August 15, 1971.

(v) *Property subject to special method of depreciation or authorization.* (*a*) In the case of eligible property first placed in service in a taxable year of election (and not otherwise properly excluded from an election to apply this section) the taxpayer may not compute depreciation for any of such property in the asset guideline class under a method not described in section 167(b) (1), (2), (3), or (k) unless he (*1*) computes depreciation under a method or methods not so described for eligible property first placed in service in the taxable year in the asset guideline class with an unadjusted basis at least equal to 75 percent of the unadjusted basis of all eligible property first placed in service in the taxable year in the asset guideline class and (*2*) agrees to continue to depreciate such property under such method or methods until the consent of the Commissioner is obtained to a change in method. The consent of the Commissioner must be obtained by filing Form 3115 with the Commissioner of Internal Revenue, Washington, D.C. 20224, within the first 180 days of the taxable year for which the change is desired. If for the taxable year of election the taxpayer computes depreciation under any method not described in section 167(b) (1), (2), (3), or (k) for any eligible property (other than property otherwise properly excluded from an election to apply this section) first placed in service during the taxable year, an election to apply this section for the taxable year shall not include such property or any other eligible property in the same asset guideline class as such property. With respect to a taxable year beginning before January 1, 1973, if the taxpayer has adopted a method of depreciation which is not permitted under this subdivision, the taxpayer may under this section adopt a method of depreciation permitted under this subdivision or otherwise comply with the provisions of this subdivision.

(*b*) An election to apply this section shall not include eligible property for which, for the taxable year of election, the taxpayer computes depreciation under section 167(k), or computes amortization under section 169, 184, 185, 187, 188, or paragraph (b) of §1.162–11. If the taxpayer has elected to apply this section to eligible property described in section 167(k), 169, 184, 185, or 187 and the taxpayer thereafter computes depreciation or amortization for such property for any taxable year in accordance with section 167(k), 169, 184, 185, or 187, then the election to apply this section to such property shall terminate as of the beginning of the taxable year for which depreciation or amortization is computed under such section. Application of this section to the property for any period prior to the termination date will not be affected by the termination. The unadjusted basis of the property shall be removed as of the termination date from the unadjusted basis of the vintage account. The depreciation reserve established for the account shall be reduced by the depreciation allowable for the property, computed in the manner prescribed in paragraph (c)(1)(v)(*b*) of this section for determination of the adjusted basis of the property. See paragraph (d)(3)(vii)(*e*) of this section for treatment of salvage value when property is removed from a vintage account.

(vi) *Certain section 1250 property.* (*a*) The taxpayer may exclude from an election to apply this section all, or less than all, items of eligible section 1250 property first placed in service during the taxable year of election provided that—

(*1*) The item is first placed in service before the earlier of the effective date of the first supplemental asset guideline class including such property established in accordance with subparagraph (4)(ii) of this paragraph, or January 1, 1974, and

(*2*) The taxpayer establishes that a useful life shorter than the asset guideline period in effect on January 1, 1971, for such item of property is justified for such taxable year.

A useful life shorter than the asset guideline period in effect on January 1, 1971, will be considered justified only if such life is justified in accordance with the provisions of Revenue Procedure 62–21 (including all modifications, amendments or supplements thereto as of January 1, 1971), determined without application of the minimal adjustment rule in section 4, part II, of Revenue Procedure 65–13. If an item of section 1250 property is excluded from an election to apply this section pursuant to this subdivision, any elevator or escalator which is a part of such item shall also be excluded from the election.

(*b*) If the taxpayer excludes an item of section 1250 property from an election to apply this section in accordance with this subdivision, the useful life justified under Revenue Procedure 62–21 in accordance with this subdivision for the taxable year of exclusion will be treated as justified for such item of section 1250 property for the taxable year of the exclusion and all subsequent taxable years.

(vii) *Subsidiary assets.* The taxpayer may exclude from an election to apply this section all (but not less than all) subsidiary assets first placed in service during the taxable year of election in an asset guideline class, provided that—

(*a*) The unadjusted basis of eligible subsidiary assets first placed in service during the taxable year in the class is as much as 3 percent of the unadjusted basis of all eligible property first placed in service during the taxable year in the class, and

(*b*) Such subsidiary assets are first placed in service by the taxpayer before the earlier of (*1*) the effective date of the first supplemental asset guideline class including such subsidiary assets established in accordance with subparagraph (4)(ii) of this paragraph, or (*2*) January 1, 1974.

For purposes of this subdivision the term ''subsidiary assets'' includes jigs, dies, molds, returnable containers, glassware, silverware, textile mill cam assemblies, and other equipment included in group 1, class 5, of Revenue Procedure 62–21. which is usually and property accounted for separately from other property and under a method of depreciation not expressed in terms of years.

(6) *Special rule for certain public utility property*—(i) *Requirement of normalization in certain cases.* Under section 167(1), in the case of public utility property (as defined in section 167(1)(3)(A)), if the taxpayer—

(*a*) Is entitled to use a method of depreciation other than a ''subsection (1) method'' of depreciation (as defined in section 167(1)(3)(F)) only if it uses the ''normalization method of accounting'' (as defined in section 167(1)(3)(G)) with respect to such property, or

(*b*) Is entitled for the taxable year to use only a ''subsection (1) method'' of depreciation, such property shall be eligible property (as defined in subparagraph (2) of this paragraph) only if the taxpayer normalizes the tax deferral resulting from the election to apply this section.

(ii) *Normalization.* The taxpayer will be considered to normalize the tax deferral resulting from the election to apply this section only if it computes its tax expense for purposes of establishing its cost of service for ratemaking purposes and for reflecting operating results in its regulated books of account using a period for depreciation no less than the lesser of—

(*a*) 100 percent of the asset guideline period in effect in accordance with subparagraph (4)(ii) of this paragraph for the first taxable year to which this section applies, or

(*b*) The period for computing its depreciation expense for ratemaking purposes and for reflecting operating results in its regulated books of account, and makes adjustments to a reserve to reflect the deferral of taxes resulting from the election to apply this section. A determination whether the taxpayer is considered to normalize (within the meaning of the preceding sentence) the tax deferral resulting from the election to apply this section shall be made in a manner consistent with the principles for determining whether a taxpayer is using the ''normalization method of accounting'' (within the meaning of section 167(1)(3)(G)). [Removed] See § 1.167(1)–1(h).

(iii) *Failure to normalize.* If a taxpayer, which has elected to apply this section to any eligible public utility property and is required under subdivision (i) of this subparagraph to normalize the tax deferral resulting from the election to apply this section to such property, fails to normalize such tax deferral, the election to apply this section to such property shall terminate as of the beginning of the taxable year for which the taxpayer fails to normalize such tax deferral. Application of this section to such property for any period prior to the termination date will not be affected by the termination. The unadjusted basis of the property shall be removed as of the termination date from the unadjusted basis of the vintage account. The depreciation reserve established for the account shall be reduced by the depreciation allowable for the property, computed in the manner prescribed in paragraph (c)(1)(v)(*b*) of this section for determination of the adjusted basis of the property. See paragraph (d)(3)(vii)(*e*) of this section for treatment of salvage value when property is removed from a vintage account.

(iv) *Examples.* The principles of this subparagraph may be illustrated by the following examples:

Example 1. Corporation A is a gas pipeline company, subject to the jurisdiction of the Federal Power Commission, which is entitled under section 167(1) to use a method of depreciation other than a ''subsection (1) method'' of depreciation (as defined in section 167(1) (3) (F)) only if it uses the ''normalization method of accounting'' (as defined in section 167(1)(3)(G)). Corporation A elects to apply this section for 1972 with respect to all eligible property. In 1972, corporation A places in service eligible property with an unadjusted basis of $2 million. One hundred percent of the asset guideline period for such property is 22 years and the asset depreciation range is from 17.5 years to 26.5 years. The taxpayer uses the double declining balance method of depreciation, selects an asset depreciation period of 17.5 years and applies the half-year convention (described in paragraph (c)(2)(iii) of this section). The depreciation allowable under this section with respect to such property in 1972 is $114,285. The taxpayer will be considered to normalize the tax deferral resulting from the election to apply this section and to use the ''normalization method of accounting'' (within the meaning of section 167(1)(3)(G)) if it computes its tax expense for purposes of determining its cost of service for rate making purposes and for reflecting operating results in its regulated books of account using a ''subsection (1) method'' of depreciation, such as the straight line method, determined by using a depreciation period of 22 years (that is, 100 percent of the asset guideline period). A depreciation allowance computed in this manner is $45,454. The difference in the amount determined under this section ($114,285) and the amount used in computing its tax expense for purposes of estimating its cost of service for rate making purposes and for reflecting operating results in its regulated books of account ($45,454) is $68,831. Assuming a tax rate of 48 percent, the deferral of taxes resulting from an election to apply this section and using a different method of depreciation for tax purposes from that used for establishing its cost of service for rate making purposes and for reflecting operating results in its regulated books of account is 48 percent of $68,831, or $33,039, which amount should be added to a reserve to reflect the deferral of taxes resulting from the election to apply this section and from the use of a different method of depreciation in computing the allowance for depreciation under section 167 from that used in computing its depreciation expense for purposes of establishing its cost of service for rate making purposes and for reflecting operating results in its regulated books of account.

Example 2. Corporation B, a telephone company subject to the jurisdiction of the Federal Communications Commission used a "flow-through method of accounting" (as defined in section 167(1)(3)(H)) for its "July 1969 accounting period" (as defined in section 167(1)(3)(I)) with respect to all of its pre-1970 public utility property and did not make an election under section 167(1)(4)(A). Thus, corporation B is entitled under section 167(1) to use a method of depreciation other than a "subsection (1) method" with respect to certain property without using the "normalization method of accounting." In 1972, corporation B makes an election to apply this section with respect to all eligible property. Corporation B is not required to normalize the tax deferral resulting from the election to apply this section in the case of property for which it is not required to use the "normalization method of accounting" under section 167(1).

Example 3. Assume the same facts as in example (2) except that corporation B made a timely election under section 167(1)(4)(A) that section 167(1)(2)(C) not apply with respect to property which increases the productive or operational capacity of the taxpayer. Corporation B must normalize the tax deferral resulting from the election to apply this section with respect to such property.

(7) *Mere change in form of conducting a trade or business.* Property which was first placed in service by the transferor before January 1, 1971, shall not be eligible property if such property is first placed in service by the transferee after December 31, 1970, by reason of a mere change in the form of conducting a trade or business in which such property is used. A mere change in the form of conducting a trade or business in which such property is used will be considered to have occurred if—

(i) The transferor (or in a case where the transferor is a partnership, estate, trust, or corporation, the partners, beneficiaries, or shareholders) of such property retains a substantial interest in such trade or business, or

(ii) The basis of such property in the hands of the transferee is determined in whole or in part by reference to the basis of such property in the hands of the transferor.

For purposes of this subparagraph, a transferor (or in a case where the transferor is a partnership, estate, trust, or corporation, the partners, beneficiaries, or shareholders) shall be considered as having retained a substantial interest in the trade or business only if, after the change in form, his (or their) interest in such trade or business is substantial in relation to the total interest of all persons in such trade or business. This subparagraph shall apply to property first placed in service prior to January 1, 1971, held for the production of income (within the meaning of section 167(a)(2)) as well as to property used in a trade or business. The principles of this subdivision may be illustrated by the following examples:

Example 1. Corporation X and corporation Y are includible corporations in an affiliated group as defined in section 1504(a). In 1971 corporation X sells property to corporation Y for cash. The property would meet the requirements of subparagraph (2) of this paragraph for eligible property except that it was first placed in service by corporation X in 1970. After the transfer, the property is first placed in service by corporation Y in 1971. The property is not eligible property because of the mere change in the form of conducting a trade or business.

Example 2. In 1971, in a transaction to which section 351 applies, taxpayer B transfers to corporation W property which would meet the requirements of subparagraph (2) of this paragraph for eligible property except that the property was first placed in service by B in 1969. Corporation W first places the property in service in 1971. The property is not eligible property because of the mere change in the form of conducting a trade or business.

(c) *Manner of determining allowance*—(1) *In general*—(i) *Computation of allowance.* (*a*) The allowance for depreciation of property in a vintage account shall be determined in the manner specified in this paragraph by using the method of depreciation adopted by the taxpayer for the account and a rate based upon the asset depreciation period for the account. (For limitations on methods of depreciation permitted with respect to property, see section 167 (c) and (j) and subdivision (iv) of this subparagraph.) In applying the method of depreciation adopted by the taxpayer, the annual allowance for depreciation of a vintage account shall be determined without adjustment for the salvage value of the property in such account except that no account may be depreciated below the reasonable salvage value of the account. (For rules regarding estimation and treatment of salvage value, see paragraph (d)(1) and (3) (vii) and (viii) of this section.) Regardless of the method of depreciation adopted by the taxpayer, the depreciation allowable for a taxable year with respect to a vintage account may not exceed the amount by which (as of the beginning of the taxable year) the unadjusted basis of the account exceeds (*1*) the reserve for depreciation established for the account plus (*2*) the salvage value of the account. The unadjusted basis of a vintage account is defined in subdivision (v) of this subparagraph. The adjustments to the depreciation reserve are described in subdivision (ii) of this subparagraph.

(*b*) The annual allowance for depreciation of a vintage account using the straight line method of depreciation shall be determined by dividing the unadjusted basis of the vintage account (without reduction for salvage value) by the number of years in the asset depreciation period selected for the account. See subdivision (iii)(*b*) of this subparagraph for the manner of computing the depreciation allowance following a change from the declining balance method or the sum of the years-digits method to the straight line method.

(*c*) In the case of the sum of the years-digits method, the annual allowance for depreciation of a vintage account shall be computed by multiplying the unadjusted basis of the vintage account (without reduction for salvage value) by a fraction, the numerator of which changes each year to a number which corresponds to the years remaining in the asset depreciation period for the account (including the year for which the allowance is being computed) and the denominator of which is the sum of all the year's digits corresponding to the asset depreciation period for the account. See subdivision (iii)(*c*) of this subparagraph for the manner of computing the depreciation allowance following a change from the declining balance method to the sum of the years-digits method.

(*d*) The annual allowance for depreciation of a vintage account using a declining balance method is determined by applying a uniform rate to the excess of the unadjusted basis of the vintage account over the depreciation reserve established for that account. The rate under the declining balance method may not exceed twice the straight line rate based upon the asset depreciation period for the vintage account.

(*e*) The allowance for depreciation under this paragraph shall constitute the amount of depreciation allowable under section 167. See section 179 for additional first-year allowance for certain property.

(ii) *Establishment of depreciation reserve.* The taxpayer must establish a depreciation reserve for each vintage account. The amount of the reserve for a guideline class must be stated on each income tax return on which depreciation with respect to such class is determined under this section. The depreciation reserve for a vintage account consists of the accumulated depreciation allowable under this section with respect to the vintage account, increased by the adjustments for ordinary retirements prescribed by paragraph (d)(3)(iii) of this section, by the adjustments for reduction of the salvage value of a vintage account prescribed by paragraph (d)(3)(vii)(*d*) of this section, and by the adjustments for transfers to supplies or scrap prescribed by paragraph (d)(3)(viii)(*b*) of this section, and decreased by the adjustments for extraordinary retirements and certain special retirements as prescribed by paragraph (d)(3) (iv) and (v) of this section, by the adjustments for the amount of the reserve in excess of the unadjusted basis of a vintage account prescribed by paragraph (d)(3)(ix)(*a*) of this section, and by the adjustments for property removed from a vintage account prescribed by paragraphs (b)(4)(iii)(*e*), (5)(v)(*b*) and (6)(iii) of this section. The adjustments to the depreciation reserve for ordinary retirements during the taxable year shall be made as of the beginning of the taxable year. The adjustments to the depreciation reserve for extraordinary retirements shall be made as of the date the retirement is treated as having occurred in accordance with the first-year convention (described in subparagraph (2) of this paragraph) adopted by the taxpayer for the vintage account. The adjustment to the depreciation reserve for reduction of salvage value and for transfers to supplies or scrap shall, in the case of an ordinary retirement, be made as of the beginning of the taxable year, and in the case of an extraordinary retirement the adjustment for reduction of salvage value shall be made as of the date the retirement is treated as having occurred in accordance with the first-year convention (described in subparagraph (2) of this paragraph) adopted by the taxpayer for the vintage account. The adjustment to the depreciation reserve for property removed from a vintage account in accordance with paragraph (b)(4)(iii)(*e*), (5)(v)(*b*) and (6)(iii) of this section shall be made as of the beginning of the taxable year. The depreciation reserve of a vintage account may not be decreased below zero.

(iii) *Consent to change in method of depreciation.* (*a*) During the asset depreciation period for a vintage account, the taxpayer is permitted to change under this section from a declining balance method of depreciation to the sum of the years-digits method of depreciation and from a declining balance method of depreciation or the sum of the years-digits method of depreciation to the straight line method of depreciation with respect to such account. Except as provided in section 167(j)(2)(1), and paragraph (e)(3)(i) of this section, no other changes in the method of depreciation adopted for a vintage account will be permitted. The provisions of §1.167(e)–1 shall not apply to any change in depreciation method permitted under this section. The change in method applies to all property in the vintage account and must be adhered to for the entire taxable year of the change.

(*b*) When a change is made to the straight line method of depreciation, the annual allowance for depreciation of the vintage account shall be determined by dividing the adjusted basis of the vintage account (without reduction for salvage value) by the number of years remaining (at the time as of which the change is made) in the asset depreciation period selected for the account. However, the depreciation allowable for any taxable year following a change to the straight line method may not exceed an amount determined by dividing the unadjusted basis of the vintage account (without reduction for salvage value) by the number of years in the asset depreciation period selected for the account.

(*c*) When a change is made from the declining balance method of depreciation to the sum of the years-digits method of depreciation, the annual allowance for depreciation of a vintage account shall be determined by multiplying the adjusted basis of the account (without reduction for salvage value) at the time as of which the change is made by a fraction, the numerator of which changes each year to a number which corresponds to the number of years remaining in the asset depreciation period selected for the account (including the year for which the allowance is being computed), and the denominator of which is the sum of all the year's digits corresponding to the number of years remaining in the asset depreciation period at the time as of which the change is made.

(*d*) The number of years remaining in the asset depreciation period selected for an account is equal to the asset depreciation period less the number of years of depreciation previously allowed. For this purpose, regardless of the first year convention adopted by the taxpayer, it will be assumed that depreciation was allowed for one-half of a year in the first year.

(*e*) The taxpayer shall furnish a statement setting forth the vintage accounts for which the change is made with the income tax return filed for the taxable year of the change.

(*f*) The principles of this subdivision may be illustrated by the following examples:

Example 1. A, a calendar year taxpayer, places new section 1245 property in service in a trade or business as follows:

Asset	Placed in service	Unadjusted basis	Estimated salvage
X	Mar. 15, 1971	$400	$20
Y	June 13, 1971	500	50
Z	July 30, 1971	100	0

The property is eligible property and is properly included in a single vintage account. The asset depreciation range for such property is 5 to 7 years and the taxpayer selects an asset depreciation period of 5½ years and adopts the 200-percent declining balance method of depreciation. The taxpayer adopts the half-year convention described in subparagraph (2)(iii) of this paragraph. After 3 years, A changes from the 200-percent declining balance method to the straight line method of depreciation. Depreciation allowances would be as follows:

Year	Unadjusted basis	Rate	Depreciation	Reserve	Adjusted basis
1971	$1,000	0.18182	$181.82	$181.82	$818.18
1972	1,000	.36363	297.52	479.34	520.66
1973	1,000	.36363	189.33	668.67	331.33
1974	1,000	[1] .33333	110.44	779.11	220.89
1975	1,000	.33333	110.44	889.56	110.44
1976	1,000	.33333	[2] 40.44	930.00	70.00

[1] Rate applied to adjusted basis of the account (without reduction by salvage) at the time as of which the change is made to the straight line method.
[2] The allowable depreciation is limited by estimated salvage.

Example 2. The facts are the same as in example (1) except that A elects to use the modified half-year convention described in subparagraph (2)(ii) of this paragraph. The depreciation allowances would be as follows:

Year	Unadjusted basis	Rate	Depreciation	Reserve	Adjusted basis
1971	$1,000	[1] 0.36363	$327.27	$327.27	$672.73
1972	1,000	.36363	244.63	571.90	428.10
1973	1,000	.36363	155.67	727.57	272.43
1974	1,000	.33333	90.81	818.38	181.62
1975	1,000	.33333	90.81	909.19	90.81
1976	1,000	.33333	[2] 20.81	930.00	70.00

[1] Rate applied to $900, the amount of assets placed in service during the first half of the taxable year.
[2] The allowable depreciation is limited by estimated salvage.

Example 3. The facts are the same as in example (1) except that A adopted the sum of the years-digits method of depreciation and does not change to the straight line method of depreciation. The depreciation allowances would be as follows:

Year	Unadjusted basis	Rate	Depreciation	Reserve	Adjusted basis
1971	$1,000	[1] 2.75/18	$152.78	$152.78	$847.22
1972	1,000	5/18	277.78	430.56	569.44
1973	1,000	4/18	222.22	652.78	347.22
1974	1,000	3/18	166.67	819.45	180.55
1975	1,000	2/18	[2] 110.55	930.00	70.00
1976	1,000	1/18	0.00	930.00	70.00
1977	1,000	0.25/18	0.00	930.00	70.00

[1] Rate is equal to one-half of 5.5/18. The denominator is equal to 5.5+4.5+3.5+2.5+1.5+0.5.
[2] The allowable depreciation is limited by estimated salvage.

Example 4. The facts are the same as in example (3) except that A elects to use the modified half-year convention described in subparagraph (2) (ii) of this paragraph. The depreciation allowances would be as follows:

Year	Unadjusted basis	Rate	Depreciation	Reserve	Adjusted basis
1971	$1,000	[1] 5.5/18	$275.00	$275.00	$725.00
1972	1,000	5/18	277.78	552.78	447.22
1973	1,000	4/18	222.22	775.00	225.00
1974	1,000	3/18	[2] 155.00	930.00	70.00
1975	1,000	2/18	0.00	930.00	70.00
1976	1,000	1/18	0.00	930.00	70.00
1977	1,000	0.25/18	0.00	930.00	70.00

[1] Rate applied to $900, the amount of assets placed in service during the first half of the taxable year.
[2] The allowable depreciation is limited by estimated salvage.

Example 5. The facts are the same as in example (2) except that after 2 years A changes from the 200-percent declining balance method to the sum of the years-digits method of depreciation. The depreciation allowances would be as follows:

Year	Unadjusted basis	Rate	Depreciation	Reserve	Adjusted basis
1971	$1,000	0.36363	$327.27	$327.27	$672.73
1972	1,000	.36363	244.63	571.90	428.10
1973	1,000	4/10	171.24	743.14	256.86
1974	1,000	3/10	128.43	871.57	128.43
1975	1,000	2/10	[1] 58.43	930.00	70.00
1976	1,000	1/10	0.00	930.00	70.00

[1] The allowable depreciation is limited by estimated salvage.

(iv) *Limitation on methods.* (*a*) The same method of depreciation must be adopted for all property in a single vintage account. Generally, the method of depreciation which may be adopted is subject to the limitations contained in section 167 (c), (j) and (l).

(*b*) Except as otherwise provided in section 167(j) with respect to certain eligible section 1250 property—

(*1*) In the case of a vintage account for which the taxpayer has selected an asset depreciation period of 3 years or more and which only contains property the original use of which commences with the taxpayer, any method of depreciation described in section 167(b) (1), (2), or (3) may be adopted, but if the vintage account contains property the original use of which does not commence with the taxpayer, or if the asset depreciation period for the account is less than 3 years, a method of depreciation described in section 167(b) (2) or (3) may not be adopted for the account, and

(*2*) The declining balance method using a rate not in excess of 150 percent of the straight line rate based upon the asset depreciation period for the vintage account may be adopted for the account even if the original use of the property does not commence with the taxpayer provided the asset depreciation period for the account is at least 3 years.

(*c*) The term ''original use'' means the first use to which the property is put, whether or not such use corresponds to the use of such property by the taxpayer. (See § 1.167(c)–1).

(v) *Unadjusted and adjusted basis.* (*a*) For purposes of this section, the unadjusted basis of an asset (including an ''excluded addition'' and a ''property improvement'' as described, respectively, in paragraph (d)(2) (vi) and (vii) of this section) is its cost or other basis without any adjustment for depreciation or amortization (other than depreciation under section 179) but with other adjustments required under section 1016 or other applicable provisions of law. The unadjusted basis of a vintage account is the total of the unadjusted bases of all the assets in the account. The unadjusted basis of a ''special basis vintage account'' as described in paragraph (d)(3)(vi) of this section is the amount of the property improvement determined in paragraph (d)(2)(vii)(*a*) of this section.

(*b*) The adjusted basis of a vintage account is the amount by which the unadjusted basis of the account exceeds the reserve for depreciation for the account. The adjusted basis of an asset in a vintage account is the amount by which the unadjusted basis of the asset exceeds the amount of depreciation allowable for the asset under this section computed by using the method of depreciation and the rate applicable to the account. For purposes of this subdivision, the depreciation allowable for an asset shall include, to the extent identifiable, the amount of proceeds previously added to the depreciation reserve in accordance with paragraph (d)(3)(iii) of this section upon the retirement of any portion of such asset. (See paragraph (d)(3)(vi) of this section for election under certain circumstances to allocate adjusted basis of an amount of property improvement determined under paragraph (d)(2)(vii)(*a*) of this section.)

(2) *Conventions applied to additions and retirements*—(i) *In general.* The allowance for depreciation of a vintage account (whether an item account or a

multiple asset account) shall be determined by applying one of the conventions described in subdivisions (ii) and (iii) of this subparagraph. (For the manner of applying a convention in the case of taxable years beginning before and ending after December 31, 1970, see subparagraph (3) of this paragraph.) The same convention must be adopted for all vintage accounts of a taxable year, but the same convention need not be adopted for the vintage accounts of another taxable year. An election to apply this section must specify the convention adopted. (See paragraph (f) of this section for information required in making the election.) The convention adopted by the taxpayer is a method of accounting for purposes of section 446, but the consent of the Commissioner will be deemed granted to make an annual adoption of either of the conventions described in subdivisions (ii) and (iii) of this subparagraph.

(ii) *Modified half-year convention.* The depreciation allowance for a vintage account for which the taxpayer adopts the ''modified half-year convention'' shall be determined by treating: (*a*) All property in such account which is placed in service during the first half of the taxable year as placed in service on the first day of the taxable year; and (*b*) all property in such account which is placed in service during the second half of the taxable year as placed in service on the first day of the succeeding taxable year. The depreciation allowance for a vintage account for a taxable year in which there is an extraordinary retirement (as defined in paragraph (d) (3) (ii) of this section) of property first placed in service during the first half of the taxable year is determined by treating all such retirements from such account during the first half of the taxable year as occurring on the first day of the taxable year and all such retirements from such account during the second half of the taxable year as occurring on the first day of the second half of the taxable year. The depreciation allowance for a vintage account for a taxable year in which there is an extraordinary retirement (as defined in paragraph (d)(3)(ii) of this section) of property first placed in service during the second half of the taxable year is determined by treating all such retirements from such account during the first half of the taxable year as occurring on the first day of the second half of the taxable year and all such retirements in the second half of the taxable year as occurring on the first day of the succeeding taxable year.

(iii) *Half-year convention.* The depreciation allowance for a vintage account for which the taxpayer adopts the ''half-year convention'' shall be determined by treating all property in the account as placed in service on the first day of the second half of the taxable year and by treating all extraordinary retirements (as defined in paragraph (d)(3)(ii) of this section) from the account as occurring on the first day of the second half of the taxable year.

(iv) *Rules of application.* (*a*) The first-year convention adopted for a vintage account must be consistently applied to all additions to and all extraordinary retirements from such account. See paragraph (d)(3) (ii) and (iii) of this section for definition and treatment of ordinary retirements.

(*b*) If the actual number of months in a taxable year is other than 12 full calendar months, depreciation is allowed only for such actual number of months and the term ''taxable year'', for purposes of this subparagraph, shall mean only such number of months. In such event, the first half of such taxable year shall be deemed to expire at the close of the last day of a calendar month which is the closest such last day to the middle of such taxable year and the second half of such taxable year shall be deemed to begin the day after the expiration of the first half of such taxable year. If a taxable year consists of a period which includes only 1 calendar month, the first half of the taxable year shall be deemed to expire on the first day which is nearest to the midpoint of the month, and the second half of the taxable year shall begin the day after the expiration of the first half of the month.

(*c*) For purposes of this subparagraph, for property placed in service after November 14, 1979, other than depreciable property described in paragraph (c)(2)(iv)(*e*) of this section, the taxable year of the person placing such property in service does not include any month before the month in which the person begins engaging in a trade or business or holding depreciable property for the production of income.

(*d*) For purposes of paragraph (c)(2)(iv)(*c*) of this section—

(*1*) For property placed in service after February 21, 1981, an employee is not considered engaged in a trade or business by virtue of employment.

(*2*) If a person engages in a small amount of trade or business activity after February 21, 1981, for the purpose of obtaining a disproportionately large depreciation deduction for assets for the taxable year in which they are placed in service, and placing those assets in service represents a substantial increase in the person's level of business activity, then for purposes of depreciating those assets the person will not be treated as beginning a trade or business until the increased amount of business activity begins. For property held for the production of income, the principle of the preceding sentence applies.

(*3*) A person may elect to apply the rules of §1.167(a)–11 (c)(2)(iv)(*d*) as set forth in T.D. 7763 ("(*d*) rules in T.D. 7763"). This election shall be made by reflecting it under paragraph (f)(4) of this section in the books and records. If necessary, amended returns shall be filed.

(*4*) If an averaging convention was adopted in reliance on or in anticipation of the (*d*) rules in T.D. 7763, that convention may be changed without regard to paragraph (f)(3) of this section. Similarly, if an election is made under paragraph (c)(2)(iv)(*d*)(*3*) of this section to apply to the (*d*) rules in T.D. 7763, the averaging convention adopted for the taxable years for which the election is made may be changed. The change shall be made by filing a timely amended return for the taxable year for which the convention was adopted. Notwithstanding the three preceding sentences, if an averaging convention was adopted in reliance on or in anticipation of the (*d*) rules in T.D. 7763, and if an election is made to apply those rules, the averaging convention adopted cannot be changed except as provided in paragraph (f) of this section.

(*e*) The rules in paragraph (c)(2)(iv)(*c*) of this section do not apply to depreciable property placed in service after November 14, 1979, and the rules in paragraph (c)(2)(iv)(*d*) of this section do not apply to depreciable property placed in service after February 21, 1981, with respect to which substantial expenditures were paid or incurred prior to November 15, 1979. For purposes of the preceding sentence, expenditures will not be considered substantial unless they exceed the lesser of 30 percent of the final cost of the property or $10 million. Expenditures that are not includible in the basis of the depreciable property will be considered expenditures with respect to property if they are directly related to a specific project involving such property. For purposes of determining whether expenditures were paid or incurred prior to November 15, 1979, expenditures made by a person (transferor) other than the person placing the property in service (transferee) will be taken into account only if the basis of the property in the hands of the transferee is determined in whole or in part by reference to the basis in the hands of the transferor. The principle of the preceding sentence also applies if there are multiple transfers.

(v) *Mass assets.* In the case of mass assets, if extraordinary retirements of such assets in a guideline class during the first half of the taxable year are allocated to a particular vintage year for which the taxpayer applied the modified half-year convention, then that portion of the mass assets so allocated which bears the same ratio to the total number of mass assets so allocated as the mass assets in the same vintage and assets guideline class placed in service during the first half of that vintage year bear to the total mass assets in the same vintage and asset guideline class shall be treated as retired on the first day of the taxable year. The remaining mass assets which are subject to extraordinary retirement during the first half of the taxable year and which are allocated to that vintage year and assets guideline class shall be treated as retired on the first days of the second half of the taxable year. If extraordinary retirements of mass assets in a guideline class occur in the second half of the taxable year and are allocated to a particular vintage year for which the taxpayer applied the modified half-year convention, then that portion of the mass assets so allocated which bears the same ratio to the total number of mass assets so allocated as the mass assets in the same vintage and asset guideline class first placed in service during the first half of that vintage year bear to the total mass assets in the same vintage and asset guideline class shall be treated as retired on the first day of the second half of the taxable year. The remaining mass assets which are subject to extraordinary retirements during the second half of the taxable year and which are allocated to that same vintage and asset guideline class shall be treated as retired on the first day of the succeeding taxable year. If the taxpayer has applied the half-year convention for the vintage year to which the extraordinary retirements are allocated, the mass assets shall be treated as retired on the first day of the second half of the taxable year.

(3) *Taxable years beginning before and ending after December 31, 1970.* In the case of a taxable year which begins before January 1, 1971, and ends after December 31, 1970, property first placed in service after December 31, 1970, but treated as first placed in service before January 1, 1971, by application of a convention described in subparagraph (2) of this paragraph shall be treated as provided in this subparagraph. The depreciation allowed (or allowable) for the taxable year shall consist of the depreciation allowed (or allowable) for the period before January 1, 1971, determined without regard to this section plus the amount allowable for the period after December 31, 1970, determined under this section. However, neither the modified half-year convention described in subparagraph (2)(ii) of this paragraph, nor the half-year convention described in subparagraph (2)(iii) of this paragraph may for any such taxable year be applied with respect to property placed in service after December 31, 1970, to allow depreciation for any period prior to January 1, 1971, unless such convention is consistent with the convention applied by the taxpayer with respect to property placed in service in such taxable year prior to January 1, 1971.

(4) *Examples.* The principles of this paragraph may be illustrated by the following examples:

Example 1. Taxpayer A, a calendar year taxpayer, places new property in service in a trade or business as follows:

Asset	Placed in service	Unadjusted basis
W	Apr. 1, 1971	$5,000
X	June 30, 1971	8,000
Y	July 15, 1971	12,000

Taxpayer A adopts the modified half-year convention described in subparagraph (2) (ii) of this paragraph. Assets W, X, and Y are placed in a multiple asset account for which the asset depreciation range is 8 to 12 years. A selects 8 years, the minimum asset depreciation period with respect to such assets, and adopts the declining balance method of depreciation using a rate twice the straight line rate (computed without reduction for salvage). The annual rate under this method using a period of 8 years is 25 percent. The depreciation allowance for assets W and X for 1971 is $3,250, a full year's depreciation under the modified half-year convention (that is, basis of $13,000 (unreduced by salvage) multiplied by 25 percent). The depreciation allowance for asset Y for 1971 is zero under the modified half-year convention.

Example 2. The facts are the same as in example (1), except that the taxpayer adopts the half-year convention described in subparagraph (2) (iii) of this paragraph. The depreciation allowance with respect to asset Y is $1,500 (that is the basis of $12,000 multiplied by 25 percent, then multiplied by ½). Assets W and X are also entitled to a depreciation allowance for only a half year. Thus, the depreciation allowance for assets W and X for 1971 is $1,625 (that is, ½ of the $3,250 allowance computed in example (1)).

Example 3. Asset Z is placed in service by a calendar year taxpayer on December 1, 1971. The taxpayer places asset Z in an item account and adopts the sum of the years-digits method and the half year convention described in subparagraph (2) (iii) of this paragraph. The asset depreciation range for such asset is 4 to 6 years and the taxpayer selects an asset depreciation period of 5 years. The depreciation allowance for asset Z in 1971 is $10,000 (that is, basis of $60,000 (unreduced by salvage) multiplied by 5⁄15, the appropriate fraction using the sum of the years-digits method then multiplied by ½, since only one half year's depreciation is allowable under the convention).

Example 4. A is a calendar year taxpayer. All taxpayer A's assets are placed in service in the first half of 1971. If the taxpayer selects the modified half-year convention described in subparagraph (2) (ii) of this paragraph, a full year's depreciation is allowable for all assets.

Example 5. (i) The taxpayer during his taxable year which begins April 1, 1970, and ends March 31, 1971, places new property in service in a trade or business as follows:

Asset	Placed in service	Unadjusted basis
A	Apr. 30, 1970	$10,000
B	Dec. 15, 1970	10,000
C	Jan. 1, 1971	10,000

The taxpayer adopted a convention under §1.167(a)–10(b) with respect to assets placed in service prior to January 1, 1971, which treats assets placed in service during the first half of the year as placed in service on the first day of such year and assets placed in service in the second half of the year as placed in service on the first day of the following year. If the taxpayer selects the half-year convention described in subparagraph (2) (iii) of this paragraph, one year's depreciation is allowable on asset A determined without regard to this section. No depreciation is allowable for asset B. No depreciation is allowable for asset C for the period prior to January 1, 1971. One-fourth year's depreciation is allowable on asset C determined under this section.

(ii) The facts are the same as in (i) of this example except that the taxpayer adopts the modified half-year convention described in subparagraph (2) (ii) of this paragraph for 1971. No depreciation is allowable for assets B and C which were placed in service in the second half of the taxable year.

Example 6. The taxpayer during his taxable year which begins August 1, 1970, and ends July 31, 1971, places new property in service in a trade or business as follows:

Asset	Placed in service
A	Aug. 1, 1970.
B	Jan. 15, 1971.
C	June 30, 1971.

The taxpayer adopted a convention under §1.167(a)–10(b) with respect to assets placed in service prior to January 1, 1971, which treats all assets as placed in service at the mid-point of the taxable year. If the taxpayer selects the half-year convention described in subparagraph (2) (iii) of this paragraph, one-half year's depreciation is allowable for asset A determined without regard to this section. One-half year's depreciation is allowable for assets B and C determined under this section.

Example 7. X, a calendar year corporation, is incorporated on July 1, 1978, and begins engaging in a trade or business in September 1979. X purchases asset A and places it in service on November 20, 1979. Substantial expenditures were not paid or incurred by X with respect to asset A prior to November 15, 1979. For purposes of applying the conventions under this section to determine depreciation for asset A, the 1979 taxable year is treated as consisting of 4 months. The first half of the taxable year ends on October 31, 1979, and the second half begins on November 1, 1979. X adopts the half-year convention. Asset A is treated as placed in service on November 1, 1979.

Example 8. On January 20, 1982, A, B, and C enter an agreement to form partnership P for the purpose of purchasing and leasing a ship to a third party, Z. P uses the calendar year as its taxable year. On December 15, 1982, P acquires the ship and leases it to Z. For purposes of applying the conventions, P begins its leasing business in December 1982, and its taxable year begins on December 1, 1982. Assuming that P elects to apply this section and adopts the modified half-year convention, P depreciates the ship placed in service in 1982 for the 1-month period beginning December 1, 1982, and ending December 31, 1982.

Example 9. A and B form partnership P on December 15, 1981, to conduct a business of leasing small aircraft. P uses the calendar year as its taxable year. On January 15, 1982, P acquires and places in service a $25,000 aircraft. P begins engaging in business with only one aircraft for the purpose of obtaining a disproportionately large depreciation deduction for aircraft that P plans to acquire at the end of the year. On December 10, 1982, P acquires and places in service 4 aircraft, the total purchase price of which is $250,000. For purposes of applying the conventions to the aircraft acquired in December, P begins its leasing business in December 1982, and P's taxable year begins December 1, 1982, and ends December 31, 1982. Assuming that P elects to apply this section and adopts the modified half-year convention, P depreciates the aircraft placed in service in December 1982, for the 1-month period beginning December 1, 1982, and ending December 31, 1982. P depreciates the aircraft placed in service in January 1982, for the 12-month period beginning January 1, 1982, and ending December 31, 1982.

(d) *Special rules for salvage, repairs and retirements*—(1) *Salvage value*—(i) *Definition of gross salvage value.* ''Gross salvage'' value is the amount which is estimated will be realized upon a sale or other disposition of the property in the vintage account when it is no longer useful in the taxpayer's trade or business or in the production of his income and is to be retired from service, without reduction for the cost of removal, dismantling, demolition or similar operations. If a taxpayer customarily sells or otherwise disposes of property at a time when such property is still in good operating condition, the gross salvage value of such property is the amount expected to be realized upon such sale or disposition, and under certain circumstances, as where such property is customarily sold at a time when it is still relatively new, the gross salvage value may constitute a relatively large proportion of the unadjusted basis of such property.

(ii) *Definition of salvage value.* ''Salvage value'' means gross salvage value less the amount, if any, by which the gross salvage value is reduced by application of section 167(f). Generally, as provided in section 167(f), a taxpayer may reduce the amount of gross salvage value of a vintage account by an amount which does not exceed 10 percent of the unadjusted basis of the personal property (as defined in section 167(f)(2)) in the account. See paragraph (b)(3)(ii) of this section for requirement of separate vintage accounts for personal property described in section 167(f)(2).

(iii) *Estimation of salvage value.* The salvage value of each vintage account of the taxable year shall be estimated by the taxpayer at the time the election to apply this section is made, upon the basis of all the facts and circumstances existing at the close of the taxable year in which the account is established. The taxpayer shall specify the amount, if any, by which gross salvage value taken into account is reduced by application of section 167(f). See paragraph (f)(2) of this section for requirement that the election specify the estimated salvage value for each vintage account of the taxable year of election. The salvage value estimated by the taxpayer will not be redetermined merely as a result of fluctuations in price levels or as a result of other facts and circumstances occurring after the close of the taxable year of election. Salvage value for a vintage account need not be established or increased as a result of a property improvement as described in subparagraph (2) (vii) of this paragraph. The taxpayer shall maintain records reasonably sufficient to determine facts and circumstances taken into account in estimating salvage value.

(iv) *Salvage as limitation on depreciation.* In no case may a vintage account be depreciated below a reasonable salvage value after taking into account any reduction in gross salvage value permitted by section 167(f).

(v) *Limitation on adjustment of reasonable salvage value.* The salvage value established by the taxpayer for a vintage account will not be redetermined if it is reasonable. Since the determination of salvage value is a matter of estimation, minimal adjustments will not be made. The salvage value established by the taxpayer will be deemed to be reasonable unless there is sufficient basis in the facts and circumstances existing at the close of the taxable year in which the account is established for a determination of an amount of salvage value for the account which exceeds the salvage value established by the taxpayer for the account by an amount greater than 10 percent of the unadjusted basis of the account at the close of the taxable year in which the account is established. If the salvage value established by the taxpayer for the account is not within the 10 percent range, or if the taxpayer follows the practice of understating his estimates of gross salvage value to take advantage of this subdivision, and if there is a determination of an amount of salvage value for the account which exceeds the salvage value established by the taxpayer for the account, an adjustment will be made by increasing the salvage value established by the taxpayer for the account by an amount equal to the difference between the salvage value as determined and the salvage value established by the taxpayer for the account. For the purposes of this subdivision, a determination of salvage value shall include all determinations at all levels of audit and appellate proceedings, and as well as all final determinations within the meaning of section 1313(a)(1). This subdivision shall apply to each such determination. (See example (3) of subdivision (vi) of this subparagraph.)

(vi) *Examples.* The principles of this subparagraph may be illustrated by the following examples in which it is assumed that the taxpayer has not followed a practice of understating his estimates of gross salvage value:

Example 1. Taxpayer B elects to apply this section to assets Y and Z, which are placed in a multiple asset vintage account of 1971 for which the taxpayer selects an asset depreciation period of 8 years. The unadjusted basis of asset Y is $50,000 and the unadjusted basis of asset Z is $30,000. B estimates a gross salvage value of $55,000. The property qualifies under section 167(f) (2) and B reduces the amount of salvage taken into account by $8,000 (that is, 10 percent of $80,000 under section 167(f)). Thus, B establishes a salvage value of $47,000 for the account. Assume that there is not sufficient basis for determining a salvage value for the account greater than $52,000 (that is, $60,000 minus the $8,000 reduction under section 167(f)). Since the salvage value of $47,000 established by B for the account is within the 10 percent range, it is reasonable. Salvage value for the account will not be redetermined.

Example 2. The facts are the same as in example (1) except that B estimates a gross salvage value of $50,000 and establishes a salvage value of $42,000 for the account (that is, $50,000 minus the $8,000 reduction under section 167(f)). There is sufficient basis for determining an amount of salvage value greater than $50,000 (that is, $58,000 minus the $8,000 reduction under section 167(f)). The salvage value of $42,000 established by B for the account can be redetermined without regard to the limitation in subdivision (v) of this subparagraph, since it is not within the 10 percent range. Upon audit of B's tax return for a taxable year for which the redetermination would affect the amount of depreciation allowable for the account, salvage value is determined to be $52,000 after taking into account the reduction under section 167(f). Salvage value for the account will be adjusted to $52,000.

Example 3. The facts are the same as in example (1) except that upon audit of B's tax return for a taxable year the examining officer determines the salvage value to be $58,000 (that is, $66,000 minus the $8,000 reduction under section 167(f)), and proposes to adjust salvage value for the vintage account to $58,000 which will result in disallowing an amount of depreciation for the taxable year. B does not agree with the finding of the examining officer. After receipt of a ''30-day letter'', B waives a district conference and initiates proceedings before the Appellate Division. In consideration of the case by the Appellate Division it is concluded that there is not sufficient basis for determining an amount of salvage value for the account in excess of $55,000 (that is $63,000 minus the $8,000 reduction under section 167(f)). Since the salvage of $47,000 established by B for the account is within the 10 percent range, it is reasonable. Salvage value for the account will not be redetermined.

Example 4. Taxpayer C elects to apply this section to factory building X which is placed in an item vintage account of 1971. The unadjusted basis of factory building X is $90,000. C estimates a gross salvage value for the account of $10,000. The property does not qualify under section 167(f)(2). C establishes a salvage value of $10,000 for the account. Assume that there is not sufficient basis for determining a salvage value for the account greater than $18,000. Since the salvage value of $10,000 established by B for the account is within the 10 percent range, it is reasonable. Salvage value for the account will not be redetermined.

(2) *Treatment of repairs*—(i) *In general.* (*a*) Sections 162, 212, and 263 provide general rules for the treatment of certain expenditures for the repair, maintenance, rehabilitation or improvement of property. In general, under those sections, expenditures which substantially prolong the life of an asset, or are made to increase its value or adapt it to a different use are capital expenditures. If an expenditure is treated as a capital expenditure under section 162, 212, or 263, it is subject to the allowance for depreciation. On the other hand, in general, expenditures which do not substantially prolong the life of an asset or materially increase its value or adapt it for a substantially different use may be deducted as an expense in the taxable year in which paid or incurred. Expenditures, or a series of expenditures, may have characteristics both of deductible expenses and capital expenditures. Other expenditures may have the characteristics of capital expenditures, as in the case of an ''excluded addition'' (as defined in subdivision (vi) of this subparagraph). This subparagraph provides a simplified procedure for determining whether expenditures with respect to certain property are to be treated as deductible expenses or capital expenditures.

(*b*) [Reserved]

(ii) *Election of repair allowance.* In the case of an asset guideline class which consists of ''repair allowance property'' as defined in subdivision (iii) of this subparagraph, subject to the provisions of subdivision (v) of this subparagraph, the taxpayer may elect to apply the asset guideline class repair allowance described in subdivision (iii) of this subparagraph for any taxable year ending after December 31, 1970, for which the taxpayer elects to apply this section.

(iii) *Repair allowance for an asset guideline class.* For a taxable year for which the taxpayer elects to apply this section, the ''repair allowance'' for an asset guideline class which consists of ''repair allowance property'' is an amount equal to—

(*a*) The average of (*1*) the unadjusted basis of all ''repair allowance property'' in the asset guideline class at the beginning of the taxable year, less in the case of such property in a vintage account the unadjusted basis of all such property retired in an ordinary retirement (as described in subparagraph (3)(ii) of this paragraph) in prior taxable years, and (*2*) the unadjusted basis of all ''repair allowance property'' in the asset guideline class at the end of the taxable year, less in the case of such property in a vintage account the unadjusted basis of all such property retired in an ordinary retirement (including ordinary retirements during the taxable year), multiplied by—

(*b*) The repair allowance percentage in effect for the asset guideline class for the taxable year.

In applying the assets guideline class repair allowance to buildings which are section 1250 property, for the purpose of this subparagraph each building shall be treated as in a separate asset guideline class. If two or more buildings are in the same asset guideline class determined without regard to the preceding sentence and are operated as an integrated unit (as evidenced by their actual operation, management, financing and accounting), they shall be treated as a single building for this purpose. The ''repair allowance percentages'' in effect for taxable years ending before the effective date of the first supplemental repair allowance percentages established pursuant to this section are set forth in Revenue Procedure 72–10. Repair allowance percentages will from time to time be established, supplemented and revised with express reference to this section. These repair allowance percentages will be published in the Internal Revenue Bulletin. The repair allowance percentages in effect on the last day of the taxable year shall apply for the taxable year, except that the repair allowance percentage for a particular taxable year shall not be less than the repair allowance percentage in effect on the first day of such taxable year (or as of such later time in such year as a repair allowance percentage first established during such year becomes effective). Generally, the repair allowance percentages for a taxable year shall not be changed to reflect any supplement or revision of the repair allowance percentages after the end of such taxable year. However, if expressly provided in such a supplement or revision of the repair allowance percentages, the taxpayer may, at his option in the manner specified therein, apply the revised or supplemented repair allowance percentages for such taxable year and succeeding taxable years. For the purposes of this section, ''repair allowance property'' means eligible property determined without regard to paragraph (b)(2)(ii) of this section (that is, without regard to whether such property was first placed in service by the taxpayer before or after December 31, 1970) in an asset guideline class for which a repair allowance percentage is in effect for the taxable year. The determination whether property is repair allowance property shall be made without regard to whether such property is excluded, under paragraph (b)(5) of this section, from an election to apply this section. Property in an asset guideline class for which the taxpayer elects to apply the asset guideline class repair allowance described in this subdivision, which results from expenditures in the taxable year of election for the repair, maintenance, rehabilitation, or improvement of property in an asset guideline class shall not be ''repair allowance property'' for such taxable year but shall be for each succeeding taxable year provided such property is a property improvement as described in subdivision (vii) (*a*) of this subparagraph and is in an asset guideline class for which a repair allowance percentage is in effect for such succeeding taxable year.

(iv) *Application of asset guideline class repair allowance.* In accordance with the principles of sections 162, 212, and 263, if the taxpayer pays or incurs any expenditures during the taxable year for the repair, maintenance, rehabilitation or improvement of eligible property (determined without regard to paragraph (b)(2)(ii) of this section), the taxpayer must either—

(*a*) If such property is repair allowance property and if the taxpayer elects to apply the repair allowance for the asset guideline class, treat an amount of all such expenditures in such taxable year with respect to all such property in the asset guideline class which does not exceed in total the repair allowance for that asset guideline class as deductible repairs, and treat the excess of all such expenditures with respect to all such property in the asset guideline class in the manner described for a property improvement in subdivision (viii) of this subparagraph, or

(*b*) If such property is not repair allowance property or if the taxpayer does not elect to apply the repair allowance for the asset guideline class, treat each of such expenditures in such taxable year with respect to all such property in the asset guideline class as either a capital expenditure or as a deductible repair in accordance with the principles of sections 162, 212, and 263 (without regard to (*a*) of this subdivision), and treat the expenditures which are required to be capitalized under sections 162, 212, and 263 (without regard to (*a*) of this subdivision) in the manner described for a property improvement in subdivision (viii) of this subparagraph.

For the purposes of (*a*) of this subdivision, expenditures for the repair, maintenance, rehabilitation or improvement of property do not include expenditures for an excluded addition or for which a deduction is allowed under section 167(k). (See subdivision (viii) of this subparagraph for treatment of an excluded addition.) The taxpayer shall elect each taxable year whether to apply the repair allowance and treat expenditures under (*a*) of this subdivision, or to treat expenditures under (*b*) of this subdivision. The treatment of expenditures under this subdivision for a taxable year for all asset guideline classes shall be specified in the books and records of the taxpayer for the taxable year. The taxpayer may treat expenditures under (*a*) of this subdivision with respect to property in one asset guideline class and treat expenditures under (*b*) of this subdivision with respect to property in some other asset guideline class. In addition, the taxpayer may treat expenditures with respect to property in an asset guideline class under (*a*) of this subdivision in one taxable year, and treat expenditures with respect to property in that asset guideline class under (*b*) of this subdivision in another taxable year.

(v) *Special rules for repair allowance.* (*a*) The asset guideline class repair allowance described in subdivision (iii) of this subparagraph shall apply only to expenditures for the repair, maintenance, rehabilitation or improvement of repair allowance property (as described in subdivision (iii) of this subparagraph). The taxpayer may apply the asset guideline class repair allowance for the taxable year only if he maintains books and records reasonably sufficient to determine:

(*1*) The amount of expenditures paid or incurred during the taxable year for the repair, maintenance, rehabilitation or improvement of repair allowance property in the asset guideline class, and

(*2*) The expenditures (and the amount thereof) with respect to such property which are for excluded additions (such as whether the expenditure is for an additional identifiable unit of property, or substantially increases the productivity or capacity of an existing identifiable unit of property or adapts it for a substantially different use).

In general, such books and records shall be sufficient to identify the amount and nature of expenditures with respect to specific items of repair allowance property or groups of similar properties in the same asset guideline class. However, in the case of such expenditures with respect to property, part of which is in one asset guideline class and part in another, or part of which is repair allowance property and part of which is not, and in comparable circumstances involving property in the same asset guideline class, to the extent books and records are not maintained identifying such expenditures with specific items of property or groups of similar properties and it is not practicable to do so, the total amount of such expenditures which is not specifically identified may be allocated by any reasonable method consistently applied. In any case, the cost of repair, maintenance, rehabilitation or improvement of property performed by production personnel may be allocated by any reasonable method consistently applied and if performed incidental to production and not substantial in amount, no allocation to repair, maintenance, rehabilitation or improvement need be made. The types of expenditures for which specific identification would ordinarily be made include: Substantial expenditures such as for major parts or major structural materials for which a work order is or would customarily be written; expenditures for work performed by an outside contractor; or expenditures under a specific down time program. Types of expenditures for which specific identification would ordinarily be impractical include: General maintenance costs of machinery, equipment, and plant in the case of a taxpayer having assets in more than one class (or different types of assets in the same class) which are located together and generally maintained by the same work crew; small supplies which are used with respect to various classes or types of property; labor costs of personnel who work on property in different classes, or different types of property in the same class, if the work is performed on a routine, as needed, basis and the only identification of the property repaired is by the personnel. Factors which will be taken into account in determining the reasonableness of the taxpayer's allocation of expenditures include prior experience of the taxpayer; relative bases of the assets in the guideline class; types of assets involved; and relationship to specifically identified expenditures.

(*b*) If for the taxable year the taxpayer elects to deduct under section 263(e) expenditures with respect to repair allowance property consisting of railroad rolling stock (other than a locomotive) in a particular asset guideline class, the taxpayer may not, for such taxable year, use the asset guideline class repair allowance described in subdivision (iii) of this subparagraph for any property in such asset guideline class.

(*c*)(*1*) If the taxpayer repairs, rehabilitates or improves property for sale or resale to customers, the asset guideline class repair allowance described in subdivision (iii) of this subparagraph shall not apply to expenditures for the repair, maintenance, rehabilitation or improvement of such property, or (*2*) if a taxpayer follows the practice of acquiring for his own use property (in need of repair, rehabilitation or improvement to be suitable for the use intended by the taxpayer) and of making expenditures to repair, rehabilitate or improve such property in order to take advantage of this subparagraph, the asset guideline class repair allowance described in subdivision (iii) of this subparagraph shall not apply to such expenditures. In either event, such property shall not be ''repair allowance property'' as described in subdivision (iii) of this subparagraph.

(vi) *Definition of excluded addition.* The term ''excluded addition'' means—

(*a*) An expenditure which substantially increases the productivity of an existing identifiable unit of property over its productivity when first acquired by the taxpayer;

(*b*) An expenditure which substantially increases the capacity of an existing identifiable unit of property over its capacity when first acquired by the taxpayer;

(*c*) An expenditure which modifies an existing identifiable unit of property for a substantially different use;

(*d*) An expenditure for an identifiable unit of property if (*1*) such expenditure is for an additional identifiable unit of property or (*2*) such expenditure (other than an expenditure described in (*e*) of this subdivision) is for replacement of an identifiable unit of property which was retired;

(*e*) An expenditure for replacement of a part in or a component or portion of an existing identifiable unit of property (whether or not such part, component or portion is also an identifiable unit of property) if such part, component or portion is for replacement of a part, component or portion which was retired in a retirement upon which gain or loss is recognized (or would be recognized but for a special nonrecognition provision of the Code or § 1.1502–13).

(*f*) In the case of a building or other structure (in addition to (*b*), (*c*), (*d*), and (*e*) of this subdivision which also apply to such property), an expenditure for additional cubic or linear space; and

(*g*) In the case of those units of property of pipelines, electric utilities, telephone companies, and telegraph companies consisting of lines, cables and poles (in addition to (*a*) through (*e*) of this subdivision which also apply to such property), an expenditure for replacement of a material portion of the unit of property.

Except as provided in (*d*) and (*e*) of this subdivision, notwithstanding any other provision of this subdivision, the term ''excluded addition'' does not include any expenditure in connection with the repair, maintenance, rehabilitation or improvement of an identifiable unit of property which does not exceed $100. For this purpose all related expenditures with respect to the unit of property shall be treated as a single expenditure. For the purposes of (*a*), and (*b*) of this subdivision, an increase in productivity or capacity is substantial only if the increase is more than 25 percent. An expenditure which merely extends the productive life of an identifiable unit of property is not an increase in productivity within the meaning of (*a*) of this subdivision. Under (*g*) of this subdivision a replacement is material only if the portion replaced exceeds 5 percent of the unit of property with respect to which the replacement is made. For the purposes of this subdivision, a unit of property generally consists of each operating unit (that is, each separate machine or piece of equipment) which performs a discrete function and which the taxpayer customarily acquires for original installation and retires as a unit. The taxpayer's accounting classification of units of property will generally be accepted for purposes of this subdivision provided the classifications are reasonably consistent with the preceding sentence and are consistently applied. In the case of a building the unit of property generally consists of the building as well as its structural components; except that each building service system (such as an elevator, an escalator, the electrical system, or the heating and cooling system) is an identifiable unit for the purpose of (*a*), (*b*), (*c*), and (*d*) of this subdivision. However, both in the case of machinery and equipment and in the case of a building, for the purpose of applying (*d*)(*1*) of this subdivision a unit of property may consist of a part in or a component or portion of a larger unit of property. In the case of property described in (*g*) of this subdivision (such as a pipeline), a unit of property generally consists of each segment which performs a discrete function either as to capacity, service, transmission or distribution between identifiable points. Thus, for example, under this subdivision in the case of a vintage account of five automobiles each automobile is an identifiable unit of property (which is not merely a part in or a component or portion of larger unit of property within the meaning of (*e*) of this subdivision). Accordingly, the replacement of one of the automobiles (which is retired) with another automobile is an excluded addition under (*d*)(*2*) of this subdivision. Also the purchase of a sixth automobile is an expenditure for an additional identifiable unit of property and is an excluded addition under (*d*)(*1*) of this subdivision. An automobile air conditioner is also an identifiable unit of property for the purposes of (*d)(1)* of this subdivision, but not for the purposes of (*d*)(*2*) of this subdivision. Accordingly, the addition of an air conditioner to an automobile is an excluded addition under (*d*)(*1*) of this subdivision, but the replacement of an existing air conditioner in an automobile is not an excluded addition under (*d*)(*2*) of this subdivision (since it is merely the replacement of a part in an existing identifiable unit of property). The replacement of the air conditioner may, however, be an excluded addition under (*e*) of this subdivision, if the air conditioner replaced was retired in a retirement upon which gain or loss was recognized. The principles of this subdivision may be further illustrated by the following examples in which it is assumed (unless otherwise stated) that (*e*) of this subdivision does not apply:

Example 1. For the taxable year, B pays or incurs only the following expenditures: (*1*) $5,000 for general maintenance of repair allowance property (as described in subdivision (iii) of this subparagraph) such as inspection, oiling, machine adjustments, cleaning, and painting; (*2*) $175 for replacement of bearings and gears in an existing lathe; (*3*) $125 for replacement of an electric starter (of the same capacity) and certain electrical wiring in an automatic drill press; (*4*) $300 for modification of a metal fabricating machine (including replacement of certain parts) which substantially increases its capacity; (*5*) $175 for repair of the same metal fabricating machine which does not substantially increase its capacity; (*6*) $800 for the replacement of an existing lathe with a new lathe; and (*7*) $65 for the repair of a drill press. Expenditures (*1*) through (*3*) are expenditures for the repair, maintenance, rehabilitation or improvement of property to which B can elect to apply the asset guideline class repair allowance described in subdivision (iii) of this subparagraph. Expenditure (*4*) is an excluded addition under (*b*) of this subdivision. Expenditure (*5*) is not an excluded addition. Expenditure (*6*) is an excluded addition under (*d*)(*2*) of this subdivision. Without regard to (*a*), (*b*), and (*c*) of this subdivision, expenditure (*7*) is not an excluded addition since the expenditure does not exceed $100.

Example 2. Corporation M operates a steel plant which produces rails, blooms, billets, special bar sections, reinforcing bars, and large diameter line pipe. During the taxable year, corporation M: (*1*) relines an openhearth furnace; (*2*) places in service 20 new ingot molds; (*3*) replaces one reversing roll in the blooming mill; (*4*) overhauls the rail and billet mill with no increase in capacity; (*5*) replaces a roll stand in the 20-inch bar mill; and (*6*) overhauls the 11-inch bar mill and reducing stands increasing billet speed from 1,800 feet per minute to 2,300 feet per minute. Assume that each expenditure exceeds $100. Expenditure (*1*) is not an excluded addition. Expenditure (*2*) is an excluded addition under (*d*)(*1*) of this subdivision. Expenditure (*3*) is not an excluded addition since the expenditure for the reversing roll merely replaces a part in an existing identifiable unit of property. Expenditure (*4*) is not an excluded addition. Expenditure (*5*) is an excluded addition under (*d*)(*2*) of this subdivision since the roll stand is not merely a part of an existing identifiable unit of property. Expenditure (*6*) is an excluded addition under (*a*) of this subdivision since it increases the billet speed by more than 25 percent.

Example 3. For the taxable year, corporation X pays or incurs the following expenditures: (*1*) $1,000 for two new temporary partition walls in the company's offices; (*2*) $1,400 for repainting the exterior of a terminal building; (*3*) $300 for repair of the roof of a warehouse; (*4*) $150 for replacement of two window frames and panes in the warehouse; and (*5*) $100 for plumbing repair. Expenditure (*1*) is an excluded addition under (*d*)(*1*) of this subdivision. None of the other expenditures are excluded additions.

Example 4. For the taxable year, corporation Y pays or incurs the following expenditures: (*1*) $10,000 for expansion of a loading dock from 600 square feet to 750 square feet; (*2*) $600 for replacement of two roof girders in a factory building; and (*3*) $9,500 for replacement of columns and girders supporting the floor of a second story loft storage area within the factory building in order to permit storage of supplies with a gross weight 50 percent greater than the previous capacity of the loft. Expenditure (*1*) is an excluded addition under (*f*) of this subdivision. Expenditure (*2*) is not an excluded addition. Expenditure (*3*) is an excluded addition under (*b*) of this subdivision.

Example 5. Corporation A has an office building with an unadjusted basis of $10 million. The building has 10 elevators, five of which are manually operated and five of which are automatic. During 1971, corporation A:

(*1*) Replaces the five manually operated elevators with highspeed automatic elevators at a cost of $400,000;

(*2*) Replaces the cable in one of the existing automatic elevators at a cost of $1,700. The replacements of the elevators are excluded additions under (*d*)(*2*) of this subdivision. The replacement of the cable is not an excluded addition.

Example 6. Taxpayer W, a cement manufacturer, engages in the following modification and maintenance activities during the taxable year: (*1*) Replaces eccentric-bearing, spindle, and wearing surface in a gyratory crusher; (*2*) places in service a new apron feeder and hammer mill; (*3*) replaces four buckets on a chain bucket elevator; (*4*) relines refractory surface in the burning zone of a rotary kiln; (*5*) installs additional new dust collectors; and (*6*) Replaces two 16-inch × 90-foot belts on his conveyer system. Assume that there is no increase in productivity or capacity and that each expenditure exceeds $100. Expenditure (*1*) is not an excluded addition. Expenditure (*2*) an excluded addition under (*d*)(*1*) of this subdivision. Expenditures (*3*) and (*4*) are not excluded additions. Expenditures (*5*) is an excluded addition under (*d*)(*1*) of this subdivision. Expenditure (*6*) is not an excluded addition.

Example 7. Corporation X, a gas pipeline company, has, in addition to others, the following units of property: (*1*) A gathering pipeline for a field consisting of 25 gas wells; (*2*) the main transmission line between compressor stations (that is, in the case of a 500-mile main transmission line with a compressor station every 100 miles, each one hundred miles section between compressor stations is a separate unit of property); (*3*) a lateral transmission line from the main transmission line to a city border station; (*4*) a medium pressure distribution line to the northern portion of the city; and (*5*) a low pressure distribution line serving a group of approximately 200 residential customers off the medium pressure distribution line. In 1971, corporation X pays or incurs the following expenditures in connection with the repair, maintenance, rehabilitation or improvement of repair allowance property: (*1*) replaces a meter on a gas well; (*2*) in connection with the repair and rehabilitation of a unit of property consisting of a 2-mile gathering pipeline, replaces a 3,000-foot section of the gathering line; (*3*) in connection with the repair of leaks in a unit of property consisting of a 100-mile gas transmission line (that is, the 100 miles between compressor stations), replaces a 2,000-foot section of pipeline at one point; and (*4*) at another point replaces a 7-mile section of the same 100-mile gas transmission line. Assume that none of these expenditures substantially increases capacity and that each expenditure exceeds $100. Expenditure (*1*) is an excluded addition under (*d*) of this subdivision. Expenditure (*2*) is an excluded addition under (*g*) of this subdivision since the portion replaced is more than 5 percent of the unit of property. Expenditure (*3*) is not an excluded addition. Expenditure (*4*) is an excluded addition under (*g*) of this subdivision.

Example 8. Taxpayer Y, an electric utility company, has in addition to others, the following units of property: (*1*) A high voltage transmission circuit from the switching station (at the generating station) to the transmission station; (*2*) a series of 100 poles (fully dressed) supporting the circuit in (*1*); (*3*) a high voltage circuit from the transmission station to the distribution substation; (*4*) a high voltage distribution circuit (either radial or looped) from the distribution substation; (*5*) a transformer on a distribution pole; (*6*) a circuit breaker on a distribution pole; and (*7*) all 220 (and lower) volt circuit (including customer service connections) off the distribution circuit in (*4*). In 1971, taxpayer Y pays or incurs the following expenditures for the repair, maintenance, rehabilitation or improvement of repair allowance property: (*1*) Replaces 25 adjacent poles in a unit of property consisting of the 300 poles supporting a radial distribution circuit from a distribution substation; (*2*) replaces a transformer on one of the poles in (*1*); (*3*) replaces a cross-arm on one of the poles in (*1*); (*4*) replaces a 200-foot section of a 2-mile radial distribution circuit serving 100 residential customers; and (*5*) replaces a 2,000-foot section on a 10-mile high voltage circuit from a transmission station to a distribution substation which was destroyed by a casualty which taxpayer Y treated as an extraordinary retirement under paragraph (d)(3)(ii) of this section. Expenditure (*1*) is an excluded addition under (*g*) of this subdivision. Expenditure (*2*) is an excluded addition under (*d*)(*2*) of this subdivision. Expenditures (*3*) and (*4*) are not excluded additions. Expenditure (*5*) is an excluded addition under (*e*) of this subdivision.

Example 9. Corporation Z, a telephone company, has in addition to others, the following units of property: (*1*) A buried feeder cable 3 miles in length off a local switching station; (*2*) a buried subfeeder cable 1 mile in length off the feeder cable in (*1*); (*3*) all the distribution cable (and customer service drops) off the subfeeder cable in (*2*); (*4*) the 300 poles (fully dressed) supporting the distribution cable in (*3*); (*5*) a 10-mile local trunk cable which interconnects two local tandem switching stations; (*6*) a toll connecting trunk cable from a local tandem switching station to a long distance tandem switching station; (*7*) a toll trunk cable 50 miles in length from the access point at one city to the access point at another city. In 1971, corporation Z pays or incurs the following expenditures in connection with the repair, maintenance, rehabilitation or improvement of repair allowance property: (*1*) replaces 100 feet of distribution cable in a unit of property consisting of 8 miles of local distribution cable (plus customer service drops); (*2*) replaces an amplifier in the distribution system; and (*3*) replaces 10 miles of a unit of property consisting of a toll trunk cable 50 miles in length. Expenditure (*1*) is not an excluded addition. Expenditure (*2*) is an excluded addition under (*d*)(*2*) of this subdivision. Expenditure (*3*) is an excluded addition under (*g*) of this subdivision.

(vii) *Definition of property improvement.* The term ''property improvement'' means—

(*a*) If the taxpayer treats expenditures for the asset guideline class under subdivision (iv) (*a*) of this subparagraph, the amount of all expenditures paid or incurred during the taxable year for the repair, maintenance, rehabilitation or improvement of repair allowance property in the asset guideline class, which exceeds the asset guideline class repair allowance for the taxable year; and

(*b*) If the taxpayer treats expenditures for the asset guideline class under subdivision (iv) (*b*) of this subparagraph, the amount of each expenditure paid or incurred during the taxable year for the repair, maintenance, rehabilitation or improvement of property which is treated under sections 162, 212, and 263 as a capital expenditure.

The term ''property improvement'' does not include any expenditure for an excluded addition.

(viii) *Treatment of property improvements and excluded additions.* If for the taxable year there is a property improvement as described in subdivision (vii) of this subparagraph or an excluded addition as described in subdivision (vi) of this subparagraph, the following rules shall apply—

(*a*) The total amount of any property improvement for the asset guideline class determined under subdivision (vii)(*a*) of this subparagraph shall be capitalized in a single ''special basis vintage account'' of the taxable year in accordance with the taxpayer's election to apply this section for the taxable year (applied without regard to paragraph (b)(5)(v)(*a*) of this section). See subparagraph (3)(vi) of this paragraph for definition and treatment of a ''special basis vintage account''.

(*b*) Each property improvement determined under subdivision (vii)(*b*) of this subparagraph, if it is eligible property, shall be capitalized in a vintage account of the taxable year in accordance with the taxpayer's election to apply this section for the taxable year (applied without regard to paragraph (b)(5)(v)(*a*) of this section).

(*c*) Each excluded addition, if it is eligible property, shall be capitalized in a vintage account of the taxable year in accordance with the taxpayer's election to apply this section for the taxable year.

For rule as to date on which a property improvement or an excluded addition is first placed in service, see paragraph (e)(1) (iii) and (iv) of this section.

(ix) *Examples.* The principles of this subparagraph may be illustrated by the following examples:

Example 1. For the taxable year 1972, B elects to apply this section. B has repair allowance property (as described in subdivision (iii) of this subparagraph) in asset guideline class 20.2 under Revenue Procedure 72–10 with an average unadjusted basis determined as provided in subdivision (iii) (*a*) of this subparagraph of $100,000 and repair allowance property in asset guideline class 24.4 with an average unadjusted basis of $300,000. The repair allowance percentage for asset guideline class 20.2 is 4.5 percent and for asset guideline class 24.4 is 6.5 percent. The two asset guideline class repair allowances for 1972 are $4,500 and $19,500, respectively, determined as follows:

Asset Guideline Class 20.2	
$100,000 average unadjusted basis multiplied by 4.5 percent	$4,500
Asset Guideline Class 24.4	
$300,000 average unadjusted basis multiplied by 6.5 percent	$19,500

Example 2. The facts are the same as in example (1). During the taxable year 1972, B pays or incurs the following expenditures for the repair, maintenance, rehabilitation or improvement of repair allowance property in asset guideline class 20.2

General maintenance (including primarily labor costs)	$3,000
Replacement of parts in several machines (including labor costs of $1,650)	4,000
	7,000

In addition, in connection with the rehabilitation and improvement of two other machines B pays or incurs $6,000 (including labor costs of $2,000) which is treated as an excluded addition because the capacity of the machines was substantially increased. For 1972, B elects to apply this section and to apply the asset guideline class repair allowance to asset guideline class 20.2. Since the asset guideline class repair allowance is $4,500, B can deduct $4,500 in accordance with subdivision (iv) (*a*) of this subparagraph. B must capitalize $2,500 in a special basis vintage account in accordance with subdivisions (vii) (*a*) and (viii) (*a*) of this subparagraph. Since the excluded addition is a capital item and is eligible property, B must also capitalize $6,000 in a vintage account in accordance with subdivision (viii) (*c*) of this subparagraph. B selects from the asset depreciation range an asset depreciation period of 17 years for the special basis vintage account. B includes the excluded addition in a vintage account of 1972 for which he also selects an asset depreciation period of 17 years.

(3) *Treatment of retirements*—(i) *In general.* The rules of this subparagraph specify the treatment of all retirements from vintage accounts. The rules of §1.167(a)–8 shall not apply to any retirement from a vintage account. An asset in a vintage account is retired when such asset is permanently withdrawn from use in a trade or business or in the production of income by the taxpayer. A retirement may occur as a result of a sale or exchange, by other act of the taxpayer amounting to a permanent disposition of an asset, or by physical abandonment of an asset. A retirement may also occur by transfer of an asset to supplies or scrap.

(ii) *Definitions of ordinary and extraordinary retirements.* The term ''ordinary retirement'' means any retirement of section 1245 property from a vintage account which is not treated as an ''extraordinary retirement'' under this subparagraph. The retirement of an asset from a vintage account in a taxable year is an ''extraordinary retirement'' if—

(*a*) The asset is section 1250 property;

(*b*) The asset is section 1245 property which is retired as the direct result of fire, storm, shipwreck, or other casualty and the taxpayer, at his option consistently applied (taking into account type, frequency, and the size of such casualties) treats such retirements as extraordinary; or

(*c*)*(1)* The asset is section 1245 property which is retired (other than by transfer to supplies or scrap) in a taxable year as the direct result of a cessation, termination, curtailment, or disposition of a business, manufacturing, or other income producing process, operation, facility or unit, and (2) the unadjusted basis (determined without regard to subdivision (vi) of this subparagraph) of all such assets so retired in such taxable year from such account as a direct result of the event described in (*c*)*(1)* of this subdivision exceeds 20 percent of the unadjusted basis of such account immediately prior to such event.

For the purposes of (*c*) of this subdivision, all accounts (other than a special basis vintage account as described in subdivision (vi) of this subparagraph) containing section 1245 property of the same vintage in the same asset guideline class, and from which a retirement as a direct result of such event occurs within the taxable year, shall be treated as a single vintage account. See subdivision (xi) of this subparagraph for special rule for item accounts. The principles of this subdivision may be illustrated by the following examples:

Example 1. Taxpayer A is a processor and distributor of dairy products. Part of taxpayer A's operation is a bottle washing facility consisting of machines X, Y, and Z, each of which is in an item vintage account of 1971. Each item vintage account has an unadjusted basis of $1,000. Taxpayer A also has a 1971 multiple asset vintage account consisting of machines E, S, and C. Machines E and S, used in processing butter, each has an unadjusted basis of $10,000. Machine C used in capping bottles has an unadjusted basis of $1,000. In 1975, taxpayer A changes to the use of paper milk cartons and disposes of all bottle washing machines (X, Y, and Z) as well as machine C which was used in capping bottles. The sales of machine C, X, Y, and Z are the direct result of the termination of a manufacturing process. However, since the total unadjusted basis of the eligible section 1245 property retired as a direct result of such event is only $4,000 (which is less than 20 percent of the total unadjusted basis of machines E, S, C, X, Y, and Z, $24,000) the sales are ordinary retirements. All the assets are in the same asset guideline class and are of the same vintage. Accordingly, machines E, S, C, X, Y, and Z are for this purpose treated as being in a single vintage account.

Example 2. The facts are the same as in example (1) except that in 1976, taxpayer A sells six of his 12 milk delivery trucks as a direct result of eliminating home deliveries to customers in the suburbs. Deliveries within the city require only six trucks. Each of the trucks has an unadjusted basis of $3,000. Six of the taxpayer's delivery trucks are in a multiple asset vintage account of 1974 and six are in a multiple asset vintage account of 1972. Neither account contains any other property. Four trucks are retired from the 1972 vintage account and two trucks are retired from the 1974 vintage account. The sales result from the curtailment of taxpayer A's home delivery operation. The unadjusted basis of the four trucks retired from the 1972 vintage exceeds 20 percent of the total unadjusted basis of the affected account. The same is true for the two trucks retired from the 1974 vintage account. The sales of the trucks are extraordinary retirements.

(*d*) The asset is section 1245 property which is retired after December 30, 1980 by a charitable contribution for which a deduction is allowable under section 170.

(iii) *Treatment of ordinary retirements.* No loss shall be recognized upon an ordinary retirement. Gain shall be recognized only to the extent specified in this subparagraph. All proceeds from ordinary retirements shall be added to the depreciation reserve of the vintage account from which the retirement occurs. See subdivision (vi) of this subparagraph for optional allocation of basis in the case of a special basis vintage account. See subdivision (ix) of this subparagraph for recognition of gain when the depreciation reserve exceeds the unadjusted basis of the vintage account. The amount of salvage value for a vintage account shall be reduced (but not below zero) as of the beginning of the taxable year by the excess of (*a*) the depreciation reserve for the account, after adjustment for depreciation allowable for such taxable year and all other adjustments prescribed by this section (other than the adjustment prescribed by subdivision (ix) of this subparagraph), over (*b*) the unadjusted basis of the account less the amount of salvage value for the account before such reduction. Thus, in the case of a vintage account with an unadjusted basis of $1,000 and a salvage value of $100, to the extent that proceeds from ordinary retirements increase the depreciation reserve above $900, the salvage value is reduced. If the proceeds increase the depreciation reserve for the account to $1,000, the salvage value is reduced to zero. The unadjusted basis of the asset retired in an ordinary retirement is not removed from the account and the depreciation reserve for the account is not reduced by the depreciation allowable for the retired asset. The previously unrecovered basis of the retired asset will be recovered through the allowance for depreciation with respect to the vintage account. See subdivision (v)(*a*) of this subparagraph for treatment of retirements on which gain or loss is not recognized in whole or in part. See subdivision (v)(*b*) of this subparagraph for treatment of retirements by disposition to a member of an affiliated group as defined in section 1504(a). See subdivision (v)(*c*) of this subparagraph for treatment of transfers between members of an affiliated group of corporations or other related parties as extraordinary retirements.

(iv) *Treatment of extraordinary retirements*. (*a*) Unless the transaction is governed by a special nonrecognition section of the Code such as 1031 or 337 or is one to which subdivision (v)(*b*) of this subparagraph applies, gain or loss shall be recognized upon an extraordinary retirement in the taxable year in which such retirement occurs subject to section 1231, section 165, and all other applicable provisions of law such as sections 1245 and 1250. If the asset which is retired in an extraordinary retirement is the only or last asset in the account, the account shall terminate and no longer be an account to which this section applies. In all other cases, the unadjusted basis of the retired asset shall be removed from the unadjusted basis of the vintage account, and the depreciation reserve established for the account shall be reduced by the depreciation allowable for the retired asset computed in the manner prescribed in paragraph (c) (1)(v)(*b*) of this section for determination of the adjusted basis of the asset. See subdivision (ix) of this subparagraph for recognition of gain in the case of an account containing section 1245 property when the depreciation reserve exceeds the unadjusted basis of the vintage account. See subdivision (iii) of this subparagraph for reduction of salvage value for such an account when the depreciation reserve exceeds the unadjusted basis of the account minus salvage value. See subdivision (v)(*b*) of this subparagraph for treatment of retirements by disposition to a member of an affiliated group as defined in section 1504(a).

(*b*) The principles of this subdivision may be illustrated by the following examples:

Example 1. Corporation X has a multiple asset vintage account of 1971 consisting of assets K, R, A, and P all of which are section 1245 property. The unadjusted basis of the account is $40,000. The unadjusted basis of asset A is $10,000. When the reserve for depreciation for the account is $20,000, asset A is sold in an extraordinary retirement for $8,000 in cash. The $10,000 unadjusted basis of asset A is removed from the account and the $5,000 depreciation allowable for asset A is removed from the reserve for depreciation. Gain in the amount of $3,000 (to which section 1245 applies) is recognized upon the sale of asset A.

Example 2. Corporation X has an item vintage account of 1972 consisting of residential apartment unit A. Unit A is section 1250 property. It is residential rental property and meets the requirements of section 167(j)(2). Corporation X adopts the declining balance method of depreciation using a rate twice the straight line rate. The asset depreciation period is 40 years. Unit A has an unadjusted basis of $200,000. On June 30, 1974, when the reserve for depreciation for the account is $19,500, unit A is sold for $220,000. Since unit A is section 1250 property, the sale is an extraordinary retirement in accordance with subdivision (ii)(*a*) of this subparagraph (without regard to subdivision (ii)(*b*) or (*c*) of this subparagraph). The adjusted basis of unit A is $180,500. Gain in the amount of $39,500 is recognized. The ''additional depreciation'' (as defined in section 1250(b)) for unit A is $9,500. Accordingly, $9,500 is in accordance with section 1250 treated as gain from the sale or exchange of an asset which is neither a capital asset nor property described in section 1231. The $30,000 balance of the gain from the sale of unit A may be gain to which section 1231 applies.

(v) *Special rule for certain retirements.* (*a*) In the case of an ordinary retirement on which gain or loss is in whole or in part not recognized because of a special nonrecognition section of the Code, such as 1031 or 337, no part of the proceeds from such retirement shall be added to the depreciation reserve of the vintage account in accordance with subdivision (iii) of this subparagraph. Instead, such retirement shall for all purposes of this section be treated as an extraordinary retirement.

(*b*) The provisions of § 1.1502–13 shall apply to a retirement. In the case of an ordinary retirement to which the provisions of § 1.1502–13 apply, no part of the proceeds from such retirement shall be added to the depreciation reserve of the vintage account in accordance with subdivision (iii) of this subparagraph. Instead, such retirement shall for all purposes of this section be treated as an extraordinary retirement.

(*c*) In a case in which property is transferred, in a transaction which would without regard to this subdivision be treated as an ordinary retirement, during the taxable year in which first placed in service to a person who bears a relationship described in section 179(d)(2) (A) or (B), such transfer shall for all purposes of this section be treated as an extraordinary retirement.

(*d*)(*1*) If, in the case of mass assets, it is impracticable for the taxpayer to maintain records from which he can establish the vintage of such assets as retirements occur, and if he adopts other reasonable recordkeeping practices, then the vintage of mass asset retirements may be determined by use of an appropriate mortality dispersion table. Such a mortality dispersion table may be based upon an acceptable sampling of the taxpayer's actual experience or other acceptable statistical or engineering techniques. Alternatively, the taxpayer may use a standard mortality dispersion table prescribed by the Commissioner for this purpose. If the taxpayer uses such standard mortality dispersion table for any taxable year of election, it must be used for all subsequent taxable years of election unless the taxpayer obtains the consent of the Commissioner to change to another dispersion table or to actual identification of retirements. For information requirements regarding mass assets, see paragraph (f)(5) of this section.

(*2*) For purposes of this section, the term ''mass assets'' has the same meaning as when used in paragraph (e)(4) of § 1.47–1.

(*e*) The principles of this subdivision may be illustrated by the following examples:

Example 1. Corporation X has a vintage account of 1971 consisting of machines A, B, and C, each with an unadjusted basis of $1,000. The unadjusted basis of the account is $3,000 and at the end of 1977 the reserve for depreciation is $2,100. On January 1, 1978, machine A is transferred to corporation Y solely for stock in the amount of $1,400 in a transaction to which section 351 applies. Since the adjusted basis of machine A is $300, a gain of $1,100 is realized, but no gain is recognized under section 351. Even though machine A was transferred in an ordinary retirement in accordance with (*a*) of this subdivision the rules for an extraordinary retirement are applied. The proceeds are not added to the reserve for depreciation for the account. Machine A is removed from the account, the unadjusted basis of the account is reduced by $1,000, and the reserve for depreciation for the account is reduced by $700.

Example 2. The facts are the same as in example (1) except that the consideration received for machine A is stock of corporation Y in the amount of $1,200 and cash in the amount of $200. The result is the same as in example (1) except that gain is recognized in the amount of $200 all of which is gain to which section 1245 applies.

Example 3. The facts are the same as in example (1) except that machine A is sold for $1,400 cash in an ordinary retirement and corporation X and corporation Y are includible corporations in an affiliated group as defined in section 1504(a) which files a consolidated return for 1978. Accordingly, (*b*) of this subdivision applies. The retirement is treated as an extraordinary retirement. Machine A is removed from the account, the unadjusted basis of the account is reduced by $1,000, and the reserve for depreciation for the account is reduced by $700. The gain of $1,100 is deferred gain to which §1.1502–13 applies.

(vi) *Treatment of special basis vintage accounts.* A ''special basis vintage account'' is a vintage account for an amount of property improvement determined under subparagraph (2)(vii)(*a*) of this paragraph. In general, reference in this section to a ''vintage account'' shall include a special basis vintage account. The unadjusted basis of a special basis vintage account shall be recovered through the allowance for depreciation in accordance with this section over the asset depreciation period for the account. Except as provided in this subdivision, the unadjusted basis, adjusted basis and reserve for depreciation of such account shall not be allocated to any specific asset in the asset guideline class, and the provisions of this subparagraph shall not apply to such account. However, in the event of a sale, exchange or other disposition of ''repair allowance property'' (as described in subparagraph (2)(iii) of this paragraph) in an extraordinary retirement as described in subdivision (ii) of this subparagraph (or if the asset is not in a vintage account, in an abnormal retirement as described in §1.167(a)–8), the taxpayer may, if consistently applied to all such retirements in the taxable year and adequately identified in the taxpayer's books and records, elect to allocate the adjusted basis (as of the end of the taxable year) of all special basis vintage accounts for the asset guideline class to each such retired asset in the proportion that the adjusted basis of the retired asset (as of the beginning of the taxable year) bears to the adjusted basis of all repair allowance property in the asset guideline class at the beginning of the taxable year. The election to allocate basis in accordance with this subdivision shall be made on the tax return filed for the taxable year. The principles of this subdivision may be illustrated by the following example:

Example. In addition to other property, the taxpayer has machines A, B, and C all in the same asset guideline class and each with an adjusted basis on January 1, 1977, of $10,000. The adjusted basis on January 1, 1977, of all repair allowance property (as described in subparagraph (2)(iii) of this paragraph) in the asset guideline class is $90,000. The machines are sold in an extraordinary retirement in 1977. The taxpayer is entitled to and does elect to allocate basis in accordance with this subdivision. There is also a 1972 special basis vintage account for the asset guideline class, as follows:

	Unadjusted basis	Reserve for depreciation	Dec. 31, 1977, adjusted basis
1972 special basis vintage account, for which the taxpayer selected an asset depreciation period of 10 years, adopted the straight line method, and used the half-year convention	$2,000	$1,100	$900

By application of this subdivision, the adjusted basis of machines A, B, and C is increased to $10,100 each (that is, $10,000÷$90,000×$900 = $100). The unadjusted basis, reserve for depreciation and adjusted basis of the special basis vintage account are reduced, respectively, by one-third (that is, $300÷$900=⅓) in order to reflect the allocation of basis from the special basis vintage account.

(vii) *Reduction in the salvage value of a vintage account.* (*a*) A taxpayer may apply this section without reducing the salvage value for a vintage account in accordance with this subdivision or in accordance with subdivision (viii) of this subparagraph (relating to transfers to supplies or scrap). See subdivision (iii) of this subparagraph for reduction of salvage value in certain circumstances in the amount of proceeds from ordinary retirements.

(*b*) However, the taxpayer may, at his option, follow the consistent practice of reducing, as retirements occur, the salvage value for a vintage account by the amount of salvage value attributable to the retired asset, or the taxpayer may consistently follow the practice of so reducing the salvage value for a vintage account as extraordinary retirements occur while not reducing the salvage value for the account as ordinary retirements occur. If the taxpayer does not reduce the salvage value for a vintage account as ordinary retirements occur, the taxpayer may be entitled to a deduction in the taxable year in which the last asset is retired from the account in accordance with subdivision (ix) (*b*) of this subparagraph.

(*c*) For purposes of this subdivision, the portion of the salvage value for a vintage account attributable to a retired asset may be determined by multiplying the salvage value for the account by a fraction, the numerator of which is the unadjusted basis of the retired asset and the denominator of which is the unadjusted basis of the account, or any other method consistently applied which reasonably reflects that portion of the salvage value for the account originally attributable to the retired asset.

(*d*) In the case of ordinary retirements the taxpayer may—

(*1*) In the case of retirements (other than by transfer to supplies or scrap) follow the consistent practice of reducing the salvage value for the account by the amount of salvage value attributable to the retired asset and not adding the same amount to the depreciation reserve for the account, and

(*2*) In the case of retirements by transfer to supplies or scrap, follow the consistent practice of reducing the salvage value for the account by the amount of salvage value attributable to the retired asset and not adding the same amount to the depreciation reserve for the account (in which case the basis in the supplies or scrap account of the retired asset will be zero) or follow the consistent practice of reducing the salvage value for the account by the amount of salvage value attributable to the retired asset and adding the same amount to the depreciation reserve for the account (up to an amount which does not increase the depreciation reserve to an amount in excess of the unadjusted basis of the account) in which case the basis in the supplies or scrap account of the retired asset will be the amount added to the depreciation reserve for the account.

Thus, for example, in the case of an ordinary retirement by transfer of an asset to supplies or scrap, the basis of the asset in the supplies or scrap account would either be zero or the amount added to the depreciation reserve of the vintage account from which the retirement occurred. When the depreciation reserve for the account equals the unadjusted basis of the account no further adjustment to salvage value for the account will be made. See subdivision (viii) of this subparagraph for special optional rule for reduction of salvage value in the case of an ordinary retirement by transfer of an asset to supplies or scrap.

(*e*) In the event of a removal of property from a vintage account in accordance with paragraph (b)(4)(iii)(*e*), (5)(v)(*b*) or (6)(iii) of this section the salvage value for the account may be reduced by the amount of salvage value attributable to the asset removed determined as provided in (*c*) of this subdivision.

(viii) *Special optional adjustments for transfers to supplies or scrap.* If the taxpayer does not follow the consistent practice of reducing, as ordinary retirements occur, the salvage value for a vintage account in accordance with subdivision (vii) of this subparagraph, the taxpayer may (in lieu of the method described in subdivision (vii) (*c*) and (*d*) of this subparagraph) follow the consistent practice of reducing salvage value as ordinary retirements occur by transfer of assets to supplies or scrap and of determining the basis (in the supplies or scrap account) as assets retired in an ordinary retirement by transfer to supplies or scrap, in the following manner—

(*a*) The taxpayer may determine the value of the asset (not to exceed its unadjusted basis) by any reasonable method consistently applied (such as average cost, conditioned cost, or fair market value) if such method is adequately identified in the taxpayer's books and records.

(*b*) The value attributable to the asset determined in accordance with (*a*) of this subdivision shall be subtracted from the salvage value for the account (to the extent thereof) and the greater of (*1*) the amount subtracted from the salvage value for the vintage account and (*2*) the value of the asset determined in accordance with (*a*) of this subdivision, shall be added to the reserve for depreciation of this vintage account.

(*c*) The amount added to the reserve for depreciation of the vintage account in accordance with (*b*) of this subdivision shall be treated as the basis of the retired asset in the supplies or scrap account.

If the taxpayer makes the adjustments in accordance with this subdivision, the reserve for depreciation of the vintage account may exceed the unadjusted basis of the account, and in that event gain will be recognized in accordance with subdivision (ix) of this subparagraph.

(ix) *Recognition of gain or loss in certain situations.* (*a*) In the case of a vintage account for section 1245 property, if at the end of any taxable year after adjustment for depreciation allowable for such taxable year and all other adjustments prescribed by this section, the depreciation reserve established for such account exceeds the unadjusted basis of the account, the entire amount of such excess shall be recognized as gain in such taxable year. Such gain—

(*1*) Shall constitute gain to which section 1245 applies to the extent that it does not exceed the total amount of depreciation allowances in the depreciation reserve at the end of such taxable year, reduced by gain recognized pursuant to this subdivision with respect to the account previously treated as gain to which section 1245 applies, and

(*2*) May constitute gain to which section 1231 applies to the extent that it exceeds such total amount as so reduced.

In such event, the depreciation reserve shall be reduced by the amount of gain recognized, so that after such reduction the amount of the depreciation reserve is equal to the unadjusted basis of the account.

(*b*) In the case of an account for section 1245 property, if at the time the last asset in the vintage account is retired the unadjusted basis of the account exceeds the depreciation reserve for the account (after all adjustments prescribed by this section), the entire amount of such excess shall be recognized in such taxable year as a loss under section 165 or as a deduction for depreciation under section 167. If the retirement of such asset occurs by sale or exchange on which gain or loss is recognized, the amount of such excess may constitute a loss subject to section 1231. Upon retirement of the last asset in a vintage account, the account shall terminate and no longer be an account to which this section applies. See subdivision (xi) of this subparagraph for treatment of certain multiple asset and item accounts.

(*c*) The principles of this subdivision may be illustrated by the following example:

Example. The taxpayer has a vintage account for section 1245 property with an unadjusted basis of $1,000 and a depreciation reserve of $700 (of which $600 represents depreciation allowances and $100 represents the proceeds of ordinary retirements from the account). If $500 is realized during the taxable year from ordinary retirements of assets from the account, the reserve is increased to $1,200, gain is recognized to the extent of $200 (the amount by which the depreciation reserve before further adjustment exceeds $1,000) and the depreciation reserve is then decreased to $1,000. The $200 of gain constitutes gain to which section 1245 applies. If the amount realized from ordinary retirements during the year had been $1,100 instead of $500, the gain of $800 would have consisted of $600 of gain to which section 1245 applies and $200 of gain to which section 1231 may apply.

(x) *Dismantling cost.* The cost of dismantling, demolishing, or removing an asset in the process of a retirement from the vintage account shall be treated as an expense deductible in the year paid or incurred, and such cost shall not be subtracted from the depreciation reserve for the account.

(xi) *Special rule for treatment of multiple asset and item accounts.* For the purposes of subdivision (ix)(*b*) of this subparagraph, all accounts (other than a special basis vintage account as described in subdivision (vi) of this subparagraph) of the same vintage in the same asset guideline class for which the taxpayer has selected the same asset depreciation period and adopted the same method of depreciation, and which contain only section 1245 property permitted by paragraph (b)(3)(ii) of this section to be included in the same vintage account, shall be treated as a single multiple asset vintage account.

(4) *Examples.* The principles of this paragraph may be illustrated by the following examples:

Example 1. (*a*)Taxpayer A has a multiple asset vintage account for selection 1245 property with an unadjusted basis of $1,000. All the assets were first placed in service by A on January 15, 1971. This account contains all of A's assets in a single asset guideline class. A elects to apply this section for 1971 and adopts the modified half-year convention. A estimates a salvage value for the account of $100 and this estimate is determined to be reasonable. (See subparagraph (1)(v) of this paragraph for limitation on adjustment of reasonable salvage value.) A adopts the straight line method of depreciation with respect to the account and selects a 10-year asset depreciation period. A does not follow a practice of reducing the salvage value for the account in the amount of salvage value attributable to each retired asset in accordance with subparagraph (3)(vii) of this paragraph. The depreciation allowance for each of the first 4 years is $100, that is 1/10 multiplied by the unadjusted basis of $1,000, with reduction for salvage.

(*b*) In the fifth year of the asset depreciation period, three assets are sold in an ordinary retirement for $300. Under paragraph (c)(1)(ii) of this section and subparagraph (3)(iii) of this paragraph, the proceeds of the retirement are added to the depreciation reserve as of the beginning of the fifth year. Accordingly, the reserve as of the beginning of the fifth year is $700, that is, $400 of depreciation as of the beginning of the year plus $300 proceeds from ordinary retirements. The depreciation allowance for the fifth year is $100, that is 1/10 multiplied by the unadjusted basis of $1,000, without reduction for salvage. Accordingly, the depreciation reserve at the end of the fifth year is $800.

(*c*) In the sixth year, asset X is sold in an extraordinary retirement for $30 and gain or loss is recognized. Under the first-year convention used by the taxpayer, the unadjusted basis of X, $300, is removed from the unadjusted basis of the vintage account as of the beginning of the sixth year and the depreciation reserve as of the beginning of such year is reduced to $650 by removing the depreciation applicable to asset X, $150 (see subparagraph (3)(iv) of this paragraph). Since the depreciation reserve ($650) exceeds the unadjusted basis of the account ($700) minus salvage value ($100) by $50, under subparagraph (3)(iii) of this paragraph, salvage value is reduced by $50. No depreciation is allowable for the sixth year.

(*d*) In the seventh year, an asset is sold in an ordinary retirement for $110. This would increase the reserve as of the beginning of the seventh year to $760 and under subparagraph (3)(iii) of this paragraph the salvage value is reduced to zero. Under subparagraph (3)(ix)(*a*) of this paragraph the depreciation reserve is then decreased to $700 (the unadjusted basis of the account) and $60 is reported as gain, without regard to the adjusted basis of the asset. No depreciation is allowable for the seventh year since the depreciation reserve ($700) equals the unadjusted basis of the account ($700).

(*e*)(*1*) In the eighth year, A elects to apply this section and to treat expenditures during the year for repair, maintenance, rehabilitation or improvement under subparagraph (2)(iii) and (iv)(*a*) of this paragraph (the "guideline class repair allowance"). This results in the treatment of $300 as a property improvement for the asset guideline class. (See subparagraph (2)(vii) of this paragraph for definition of a property improvement.) The property improvement is capitalized in a special basis vintage account of the eighth taxable year (see subparagraph (2)(viii)(*a*) of this paragraph). A selects an asset depreciation period of 10 years and adopts the straight line method for the special basis vintage account. A adopts the modified half-year convention for the eighth year.

(*2*) In the eighth year, A sells asset Y in an ordinary retirement for $175. Under paragraph (c)(1)(ii) of this section and subparagraph (3)(iii) of this paragraph, $175 is added to the depreciation reserve for the account as of the beginning of the taxable year. Since the depreciation reserve for the account ($875) exceeds the unadjusted basis of the account ($700) by $175, that amount of gain is recognized under subparagraph (3)(ix) of this paragraph. Upon recognition of gain in the amount of $175, the depreciation reserve for the account is reduced to $700.

(*3*) No depreciation is allowable in the eighth year for the vintage account since the depreciation reserve ($700) equals the unadjusted basis of the account ($700). The depreciation allowable in the eighth year for the special basis vintage account is $15, that is, unadjusted basis of $300, multiplied by 1/10, the asset depreciation period selected for the special basis vintage account, but limited to $15 under the modified half-year convention. (See paragraph (e)(1)(iv) of this section for treatment of $150 of the property improvement as first placed in service in the first half of the taxable year and $150 of the property improvement as first placed in service in the last half of the taxable year.)

Example 2. Taxpayer B has a 1971 multiple asset vintage account for section 1245 property with an unadjusted basis of $100,000. B selects from the asset depreciation range an asset depreciation period of 10 years and adopts the straight line method of depreciation and the modified half-year convention. B establishes a salvage value for the account of $10,000. All the assets in the account are first placed in service on January 15, 1971. B follows the practice of reducing salvage value for the account as ordinary retirements occur in accordance with subparagraph (3)(vii) of this paragraph, but does not follow the optional practice of determining the basis of assets transferred to supplies or scrap in accordance with subparagraph (3)(vii) of this paragraph. No retirements occur during the first five years. The depreciation reserve at the beginning of the sixth year is $50,000. In the sixth year an asset with an unadjusted basis of $20,000 is transferred to supplies in an ordinary retirement. By application of subparagraph (3)(vii) (*c*) and (*d*)(*2*) of this paragraph B determines the reduction in salvage value for the account attributable to such asset to be $2,000 (that is, $\$20,000 \div \$100,000 \times \$10,000 = \$2,000$).

B reduces the salvage value for the account by $2,000 and adds 2,000 to the depreciation reserve for the account. The basis of the retired asset in the supplies account is $2,000. The depreciation allowable for the account for the sixth year is $10,000. The depreciation reserve for the account at the beginning of the seventh year is $62,000. At the mid-point of the seventh year all the remaining assets in the account are sold in an ordinary retirement for $20,000, which is added to the depreciation reserve as of the beginning of the seventh year, thus increasing the reserve to $82,000. The $5,000 depreciation allowable for the account for the seventh year (one-half of a full-year's depreciation of $10,000) increases the depreciation reserve to $87,000. Under subparagraph (3)(ix)(*b*) of this paragraph, a loss of $13,000 subject to section 1231 is realized in the seventh year (that is, the excess of the unadjusted basis of $100,000 over the depreciation reserve of $87,000). No depreciation is allowable for the account after the mid-point of the seventh year since all the assets are retired and the account has terminated.

(e) *Accounting for eligible property*—(1) *Definition of first placed in service*—(i) *In general*. The term ''first placed in service'' refers to the time the property is first placed in service by the taxpayer, not to the first time the property is placed in service. Property is first placed in service when first placed in a condition or state of readiness and availability for a specifically assigned function, whether in a trade or business, in the production of income, in a tax-exempt activity, or in a personal activity. In general, the provisions of paragraph (d)(1)(ii) and (d)(2) of § 1.46–3 shall apply for the purpose of determining the date on which property is placed in service, but see subdivision (ii) of this subparagraph for special rule for certain replacement parts. In the case of a building which is intended to house machinery and equipment and which is constructed, reconstructed, or erected by or for the taxpayer and for the taxpayer's use, the building will ordinarily be placed in service on the date such construction, reconstruction, or erection is substantially complete and the building is in a condition or state of readiness and availability. Thus, for example, in the case of a factory building, such readiness and availability shall be determined without regard to whether the machinery or equipment which the building houses, or is intended to house, has been placed in service. However, in an appropriate case, as for example where the building is essentially an item of machinery or equipment, or the use of the building is so closely related to the use of the machinery or equipment that it clearly can be expected to be replaced or retired when the property it initially houses is replaced or retired, the determination of readiness or availability of the building shall be made by taking into account the readiness and availability of such machinery or equipment. The date on which depreciation begins under a convention used by the taxpayer or under a particular method of depreciation, such as the unit of production method or the retirement method, shall not determine the date on which the property is first placed in service. See paragraph (c)(2) of this section for application of a first-year convention to determine the allowance for depreciation of property in a vintage account.

(ii) *Certain replacement parts*. Property (such as replacement parts) the cost or other basis of which is deducted as a repair expense in accordance with the asset guideline repair allowance described in paragraph (d)(2)(iii) of this section shall not be treated as placed in service.

(iii) *Property improvements and excluded additions*. (*a*) Except as provided in (*b*) of this subdivision, a property improvement determined under paragraph (d)(2)(vii)(*b*) of this section, and an excluded addition (other than an excluded addition referred to in the succeeding sentence) is first placed in service when its cost is paid or incurred. The general rule in subdivision (i) of this subparagraph applies to an excluded addition described in paragraph (d) (2)(vi) (*d*), (*e*), (*f*), or (*g*) of this section.

(*b*) If a property improvement or an excluded addition to which the first sentence of (*a*) of this subdivision applies is paid or incurred in part in one taxable year and in part in the succeeding taxable year (or in part in the first half of a taxable year and in part in the last half of the taxable year) the taxpayer may at his option consistently treat such property improvements and excluded additions under the general rule in subdivision (i) of this subparagraph.

(iv) *Certain property improvements.* In the case of an amount of property improvement determined under paragraph (d)(2)(vii)(*a*) of this section, one-half of such amount is first placed in service in the first half of the taxable year in which the cost is paid or incurred and one-half is first placed in service in the last half of such taxable year.

(v) *Special rules for clearing accounts.* In the case of public utilities which consistently account for certain property through ''clearing accounts,'' the date on which such property is first placed in service shall be determined in accordance with rules to be prescribed by the Commissioner.

(2) *Special rules for transferred property.* If eligible property is first placed in service by the taxpayer during a taxable year of election, and the property is disposed of before the end of the taxable year, the election for such taxable year shall include such property unless such property is excluded in accordance with paragraph (b)(5) (iii), (iv, (v), (vi), or (vii) of this section.

(3) *Special rules in the case of certain transfers*—(i) *Transaction to which section 381(a) applies.* (*a*) In general the acquiring corporation in a transaction to which section 381(a) applies is for the purposes of this section treated as if it were the distributor or transferor corporation.

(*b*) If the distributor or transferor corporation (including any distributor or transferor corporation of any distributor or transferor corporation) has made an election to apply this section to eligible property transferred in a transaction to which section 381(a) applies, the acquiring corporation must segregate such eligible property (to which the distributor or transferor corporation elected to apply this section) into vintage accounts as nearly coextensive as possible with the vintage accounts created by the distributor or transferor corporation identified by reference to the year the property was first placed in service by the distributor or transferor corporation. The asset depreciation period for the vintage account in the hands of the distributor or transferor corporation must be used by the acquiring corporation. The method of depreciation adopted by the distributor or transferor corporation, shall be used by the acquiring corporation unless such corporation obtains the consent of the Commissioner to use another method of depreciation in accordance with paragraph (e) of §1.446–1 or changes the method of depreciation under paragraph (c)(1)(iii) of this section.

(*c*) The acquiring corporation may apply this section to the property so acquired only if the distributor or transferor corporation elected to apply this section to such property.

(*d*) See paragraph (b)(7) of this section for special rule for certain property where there is a mere change in the form of conducting a trade or business.

(ii) *Partnerships, trusts, estates, donees, and corporations.* Except as provided in subdivision (i) of this subparagraph with respect to transactions to which section 381(a) applies and subdivision (iv) of this subparagraph with respect to certain transfers between members of an affiliated group of corporations or other related parties, if eligible property is placed in service by an individual, trust, estate, partnership or corporation, the election to apply this section shall be made by the individual, trust, estate, partnership or corporation placing such property in service. For example, if a partnership places in service property contributed to the partnership by a partner, the partnership may elect to apply this section to such property. If the partnership does not make the election, this section will not apply to such property. See paragraph (b)(7) of this section for special rule for certain property where there is mere change in the form of conducting a trade or business.

(iii) *Leased property.* The asset depreciation range and the asset depreciation period for eligible property subject to a lease shall be determined without regard to the period for which such property is leased, including any extensions or renewals of such period. See paragraph (b)(5)(v) of this section for exclusion of property amortized under paragraph (b) of § 1.162–11 from an election to apply this section. In the case of a lessor of property, unless there is an asset guideline class in effect for lessors of such property, the asset guideline class for such property shall be determined as if the property were owned by the lessee. However, in the case of an asset guideline class based upon the type of property (such as trucks or railroad cars) as distinguished from the activity in which used, the property shall be classified without regard to the activity of the lessee. Notwithstanding the preceding sentence, if a lease with respect to property, which would be includible in an asset guideline class based upon the type of property under the preceding sentence (such as trucks or railroad cars), is entered into after March 12, 1971, and before April 23, 1973, or a written contract to execute such a lease is entered into during such period and such contract is binding on April 23, 1973, and at all times thereafter, and if the rent or rate of return is based on a classification of such property as if it were owned by the lessee, then such property shall be classified as if it were owned by the lessee. However, the preceding sentence shall not apply if pursuant to the terms or conditions of the lease or binding contract the rent or rate of return may be adjusted to take account of a change in the period for depreciation with respect to the property resulting from inclusion of the property in an asset guideline class based upon the type of property rather than in an asset guideline class based upon the activity of the lessee. Similarly, where the terms of such a lease or contract provide that the obligation of the taxpayer to enter into the lease is subject to a condition that the property be included in an asset guideline class based upon the activity of the lessee, the contract or lease will not be considered as binding upon the taxpayer, for purposes of this subdivision. See paragraph (b)(4)(iii)(*b*) of this section for general rule for classification of property according to primary use.

(iv) *Treatment of certain transfers between members of affiliated groups or other related persons.* If section 38 property in an asset guideline class (determined without regard to whether the taxpayer elects to apply this section) is transferred by the taxpayer to a person who bears a relationship described in section 179(d)(2) (A) or (B), such property is in the same asset guideline class in the hands of transferee, and the transfer is neither described in section 381(a) nor treated as a disposition or cessation within the meaning of section 47, then the asset guideline period for such property selected by the taxpayer under this section shall not be shorter than the period used for computing the qualified investment with respect to the property under section 46(c). In a case in which the asset depreciation range for the asset guideline class which includes such property does not include the period for depreciation used by the transferor in computing the qualified investment with respect to such property, the transferee will not be permitted to include such property in an election under this section. However, in such a case, the transferor of the property may recompute the qualified investment for the year the property was placed in service using a period for depreciation which falls within the asset depreciation range.

(f) *Election with respect to eligible property*—(1) *Time and manner of election*—(i) *In general.* An election to apply this section to eligible property shall be made with the income tax return filed for the taxable year in which the property is first placed in service (see paragraph (e)(1) of this section) by the taxpayer. In the case of an affiliated group of corporations (as defined in section 1504(a)) which makes a consolidated return with respect to income tax in accordance with section 1502 and the regulations thereunder, each corporation which joins in the making of such return may elect to apply this section for a taxable year. An election to compute the allowance for depreciation under this section is a method of accounting but the consent of the Commissioner will be deemed granted to make an annual election. For election by a partnership see section 703 (b) and paragraph (e)(3)(ii) of this section. If the taxpayer does not file a timely return (taking into account extensions of the time for filing) for the taxable year in which the property is first placed in service, the election shall be filed at the time the taxpayer files his first return for that year. The election may be made with an amended return filed within the time prescribed by law (including extensions) for filing the original return for the taxable year of election. If an election is not made within the time and in the manner prescribed in this paragraph, no election may be made for such taxable year (by the filing of an amended return or in any other manner) with respect to any eligible property placed in service in the taxable year.

(ii) *Other elections under this section.* All other elections under this section may be made only within the time and in the manner prescribed by subdivision (i) of this subparagraph with respect to an election to apply this section.

(iii) *Effective date.* See paragraph (f)(6) of this section for the effective date of this paragraph.

(2) *Information required.* A taxpayer who elects to apply this section must specify in the election:

(i) That the taxpayer makes such election and consents to and agrees to apply, all the provisions of this section;

(ii) The asset guideline class for each vintage account of the taxable year;

(iii) The first-year convention adopted by the taxpayer for the taxable year of election;

(iv) Whether the special 10 percent used property rule described in paragraph (b)(5)(iii) of this section has been applied to exclude used property from the election;

(v) Whether the taxpayer elects to apply the asset guideline class repair allowance described in paragraph (d)(2)(iii) of this section;

(vi) Whether the taxpayer elects for the taxable year to allocate the adjusted basis of a special basis vintage account in accordance with paragraph (d)(3)(vi) of this section;

(vii) Whether any eligible property for which the taxpayer was not required or permitted to make an election was excluded because of the special rules of paragraph (b)(5)(v) or (6), or paragraph (e)(3)(i) or (iv) of this section;

(viii) Whether any ''section 38 property'' was excluded under paragraph (b)(5)(iv) of this section from the election to apply this section;

(ix) If the taxpayer is an electric or gas utility, whether the taxpayer elects to apply this section on the basis of a composite asset guideline class in accordance with paragraph (b)(4)(iii)(*a*) of this section; and

(x) Such other information as may reasonably be required.

The information required under this subparagraph may be provided in accordance with rules prescribed by the Commissioner for reasonable grouping of assets or accounts. Form 4832 is provided for making an election and for submission of the information required. An election may be made and the information submitted only in accordance with Form 4832. An election to apply this section will not be rendered invalid under this subparagraph so long as there is substantial compliance, in good faith, with the requirements of this subparagraph.

(3) *Irrevocable election.* An election to apply this section to eligible property for any taxable year may not be revoked or changed after the time for filing the election prescribed under subparagraph (1) of this paragraph has expired. No other election under this section may be revoked or changed after such time unless expressly provided for under this section. (See paragraph (b)(5)(v)(*b*) of this section for special rule.)

(4) *Special conditions to election to apply this section*—(i) *Maintenance of books and records.* The taxpayer may not elect to apply this section for a taxable year unless the taxpayer maintains the books and records required under this section. In addition to any other information required under this section, the taxpayer's books and records must specify—

(*a*) The asset depreciation period selected by the taxpayer for each vintage account;

(*b*) If the taxpayer applies the modified half-year convention, the total cost or other basis of all eligible property first placed in service in the first half of the taxable year and the total cost or other basis of all eligible property first placed in service in the last half of the taxable year;

(*c*) The unadjusted basis and salvage value for each vintage account, and the amount, if any, by which gross salvage value was decreased under section 167 (f);

(*d*) Each asset guideline class for which the taxpayer elects to apply the asset guideline class repair allowance described in paragraph (d)(2)(iii) of this section;

(*e*) The amount of property improvement, determined under paragraph (d)(2)(vii)(*a*) of this section, for each asset guideline class for which the taxpayer elects to apply the asset guideline class repair allowance;

(*f*) A reasonable description of property excluded from an election to apply this section and the basis for the exclusion;

(*g*) The total unadjusted basis of all assets retired during the taxable year from each asset guideline class, and the proceeds realized during the taxable year from such retirements; and

(*h*) The vintage (that is, the taxable year in which established) of the assets retired during the year from each asset guideline class.

For purposes of paragraph (f)(4)(i) (*g*) and (*h*) of this section, all accounts of the same vintage and asset guideline class may be treated as a single account. The taxpayer must specify the information required under paragraph (f)(4)(i) (*g*) and (*h*) without regard to the retirement of an asset by transfer to a supplies account for reuse.

(ii) *Response to survey.* Taxpayers who elect to apply this section must respond to infrequent data surveys conducted by the Treasury Department. These periodic surveys, which will be conducted on the basis of scientifically sound sampling methods, are designed to obtain data (including industry asset acquisitions and retirements) used to keep the asset guideline classes and periods up to date.

(iii) *Effect of noncompliance.* An election to apply this section will not be rendered invalid under this subparagraph so long as there is substantial compliance, in good faith, with the requirements of this subparagraph.

(5) *Mass assets.* In the case of mass assets, if the taxpayer assigns retirements to vintage accounts in the manner provided in paragraph (d)(3)(v)(*c*) of this section, the following information must be supplied with form 4832:

(i) Whether the taxpayer used the standard mortality dispersion curve or a curve based upon his own experience, and

(ii) Such other reasonable information as may be required by the Commissioner.

(6) *Effective date.* The rules in this paragraph apply to elections for taxable years ending on or after December 31, 1978. In the case of an election for a taxable year ending before December 31, 1978, the rules in paragraph (f) of this section, in effect before the amendments made by T.D. 7593 approved January 11, 1979, shall apply. See 26 CFR § 1.167(a)–11(f) (1977) for paragraph (f) of this section as it appeared before the amendments made by T.D. 7593.

(g) *Relationship to other provisions*—(1) *Useful life*—(i) *In general.* Except as provided in subdivision (ii) of this subparagraph, an election to apply this section to eligible property constitutes an agreement under section 167(d) and this section to treat the asset depreciation period for each vintage account as the useful life of the property in such account for all purposes of the Code, including sections 46, 47, 48, 57, 163(d), 167(c), 167(f)(2), 179, 312(m), 514(a), and 4940(c). For example, since section 167(c) requires a useful life of at least 3 years and the asset depreciation period selected is treated as the useful life for purposes of section 167(c), the taxpayer may adopt a method of depreciation described in section 167(b) (2) or (3) for an account only if the asset depreciation period selected for the account is at least 3 years.

(ii) *Special rules.* (*a*) For the purposes of paragraph (d) of this section, the anticipated period of use (estimated at the close of the taxable year in which the asset is first placed in service) on the basis of which salvage value is estimated, shall be determined without regard to the asset depreciation period for the property.

(*b*) For the purposes of sections 162 and 263 and the regulations thereunder, whether an expenditure prolongs the life of an asset shall be determined on the basis of the anticipated period of use of the asset (estimated at the close of the taxable year in which the asset is first placed in service) without regard to the asset depreciation period for such asset.

(*c*) The determination whether a transaction with respect to qualified property constitutes a sale or a lease of such property shall be made without regard to the asset depreciation period for the property.

(*d*) The principles of this subdivision may be illustrated by the following example:

Example. Corporation X has assets in asset guideline class 32.3 which are used in the manufacture of stone and clay products. The asset depreciation range for assets in asset guideline class 32.3 is from 12 to 18 years. Assume that corporation X selects 14 years as the asset depreciation period for all assets in asset guideline class 32.3. Under paragraph (d)(1)(i) of this section, corporation X must estimate salvage value on the basis of the anticipated period of use of the property (determined as of the close of the taxable year in which the property is first placed in service). The anticipated period of use must also be used for purposes of sections 162 and 263 in determining whether an expenditure materially prolongs the useful life of an asset. The anticipated period of use of an asset is determined without regard to the asset depreciation period of 14 years. Corporation X has, among other assets in the asset guideline class, machines A, B, and C. Corporation X estimates the anticipated period of use of machines A, B, and C as 8 years, 14 years, and 22 years, respectively. These estimates are reasonable and will be used for estimating salvage value and for purposes of sections 162 and 263.

(2) *Section 167(d) agreements.* If the taxpayer has, prior to January 1, 1971, entered into a section 167(d) agreement which applies to any eligible property, the taxpayer will be permitted to withdraw the eligible property from the agreement provided that an election is made to apply this section to such property. The statement of intent to withdraw eligible property from such an agreement must be made in an election filed for the taxable year in which the property is first placed in service. The withdrawal, in accordance with this subparagraph, of any eligible property from a section 167(d) agreement shall not affect any other property covered by such an agreement.

(3) *Relationship to the straight line method*—(i) *In general.* For purposes of determining the amount of depreciation which would be allowable under the straight line method of depreciation, such amount shall be computed with respect to any property in a vintage account using the straight line method in the manner described in paragraph (c)(1)(i) of this section and a rate based upon the period for the vintage account selected from the asset depreciation range. Thus, for example, section 57(a)(3) requires a taxpayer to compute an amount using the straight line method of depreciation if the taxpayer uses an accelerated method of depreciation. For purposes of section 57(a)(3), the amount for property in a vintage account shall be computed using the asset depreciation period for the vintage account selected from the asset depreciation range. In the case of property to which the taxpayer does not elect to apply this section, such amount computed by using the straight line method shall be determined under §1.167(b)–1 without regard to this section.

(ii) *Examples.* The principles of this subparagraph may be illustrated by the following example:

Example. (*a*) Corporation X places a new asset in service to which it elects to apply this section. The cost of the asset is $200,000 and the estimated salvage value is zero. The taxpayer selects 9 years from the applicable asset depreciation range of 8 to 12 years. Corporation X adopts the double declining balance method of depreciation and thus the rate of depreciation is 22.2 percent (twice the applicable straight line rate). The depreciation allowance in the first year would be $44,400, that is, 22.2 percent of $200,000.

(*b*) Assume that the provisions of section 57(a)(3) apply to the property. The amount of the tax preference would be $22,200, that is, the excess of the depreciation allowed under this section ($44,400) over the depreciation which would have been allowable if the taxpayer had used the period selected from the asset depreciation range and the straight line rate ($22,200).

(Secs. 167(m), 85 Stat. 508 (26 U.S.C. 167(m) and 7805, 68A Stat. 917, (26 U.S.C. 7805))

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting §1.167(a)–11, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.fdsys.gov*.

§ 1.167(a)–12 Depreciation based on class lives for property first placed in service before January 1, 1971.

(a) *In general*—(1) *Summary*. This section provides an elective class life system for determining the reasonable allowance for depreciation of certain classes of assets for taxable years ending after December 31, 1970. The system applies only to assets placed in service before January 1, 1971. Depreciation for such assets during periods prior to January 1, 1971, may have been determined in accordance with Revenue Procedure 62–21. Accordingly, rules are provided which permit taxpayers to apply the system in taxable years ending after December 31, 1970, to such assets without the necessity of changing or regrouping their depreciation accounts other than as previously required by Revenue Procedure 62–21. The system is designed to minimize disputes between taxpayers and the Internal Revenue Service as to the useful life of assets, salvage value, and repairs. See §1.167(a)–11 for a similar system for property placed in service after December 31, 1970. See paragraph (d)(2) of §1.167(a)–11 for treatment of expenditures for the repair, maintenance, rehabilitation or improvement of certain property. The system provided by this section is optional with the taxpayer. An election under this section applies only to qualified property in an asset guideline class for which an election is made and only for the taxable year of election. The taxpayer's election is made with the income tax return for the taxable year. This section also revokes the reserve ratio test for taxable years ending after December 31, 1970, and provides transitional rules for taxpayers who after January 11, 1971, adopt Revenue Procedure 62–21 for a taxable year ending prior to January 1, 1971.

(2) *Revocation of reserve ratio test and other matters*. Except as otherwise expressly provided in this section and in paragraph (b)(5)(vi) of §1.167(a)–11, the provisions of Revenue Procedure 62–21 shall not apply to any property for any taxable year ending after December 31, 1970, whether or not the taxpayer elects to apply this section to any property. See paragraph (f) of this section for rules for the adoption of Revenue Procedure 62–21 for taxable years ending prior to January 1, 1971.

(3) *Definition of qualified property*. The term ''qualified property'' means tangible property which is subject to the allowance for depreciation provided by section 167(a), but only if—

(i) An asset guideline class and asset guideline period are in effect for such property for the taxable year, and

(ii) The property is first placed in service by the taxpayer before January 1, 1971,

(iii) The property is placed in service before January 1, 1971, but first placed in service by the taxpayer after December 31, 1970, and is not includible in an election under §1.167(a)–11 by reason of §1.167(a)–11(b)(7) (property acquired as a result of a mere change in form) or §1.167(a)–11(e)(3)(i) (certain property acquired in a transaction to which section 381(a) applies), or

(iv) The property is acquired and first placed in service by the taxpayer after December 31, 1970, pursuant to a binding written contract entered into prior to January 1, 1971, and is excluded in accordance with paragraph (b)(5)(iv) of §1.167(a)–11 from an election to apply §1.167(a)–11.

The provisions of paragraph (e)(1) of §1.167(a)–11 apply in determining whether property is first placed in service before January 1, 1971. See subparagraph (4)(ii) of this paragraph for special rules for the exclusion of property from the definition of qualified property.

(4) *Requirements of election*—(i) *In general*. An election to apply this section to qualified property must be made within the time and in the manner specified in paragraph (e) of this section. The election must specify that the taxpayer consents to and agrees to apply all the provisions of this section. The election may be made separately

for each asset guideline class. Thus, a taxpayer may for the taxable year elect to apply this section to one, more than one, or all asset guideline classes in which he has qualified property. An election to apply this section for a taxable year must include all qualified property in the asset guideline class for which the election is made.

(ii) *Special rules for exclusion of property from application of this section.* (*a*) If for the taxable year of election, the taxpayer computes depreciation under section 167(k) or computes amortization under sections 169, 185, 187, 188, or paragraph (b) of §1.162–11 with respect to property, such property is not qualified property for such taxable year. If for the taxable year of election, the taxpayer computes depreciation under any method of depreciation (other than a method described in the preceding sentence) not permitted by subparagraph (5)(v) of this paragraph for any property in an asset guideline class (other than subsidiary assets excluded from an election under (*b*) of this subdivision), no property in such asset guideline class is qualified property for such taxable year.

(*b*) The taxpayer may exclude from an election to apply this section all (but not less than all) subsidiary assets. Subsidiary assets so excluded are not qualified property for such taxable year. For purposes of this subdivision the term ''subsidiary assets'' includes jigs, dies, molds, returnable containers, glassware, silverware, textile mill cam assemblies, and other equipment includable in Group One, Class 5, of Revenue Procedure 62–21 which is usually and properly accounted for separately from other property and under a method of depreciation not expressed in terms of years.

(iii) *Special rule for certain public utility property.* (*a*) In the case of public utility property described in section 167(1)(3)(A)(iii) for which no guideline life was prescribed in Revenue Procedure 62–21 (or for which reference was made in Revenue Procedure 62–21 to lives or rates established by governmental regulatory agencies) of a taxpayer which—

(*1*) Is entitled to use a method of depreciation other than a ''subsection (1) method'' of depreciation (as defined in section 167(1)(3)(F)) only if it uses the ''normalization method of accounting'' (as defined in section 167(1)(3)(G)) with respect to such property, or

(*2*) Is entitled for the taxable year to use only a ''subsection (1) method'' of depreciation,

such property shall be qualified property (as defined in subparagraph (3) of this paragraph) only if the taxpayer normalizes the tax deferral resulting from the election to apply this section.

(*b*) The taxpayer will be considered to normalize the tax deferral resulting from the election to apply this section only if it computes its tax expense for purposes of establishing its cost of service for ratemaking purposes and for reflecting operating results in its regulated books of account using a period for depreciation no less than the period used for computing its depreciation expense for ratemaking purposes and for reflecting operating results in its regulated books of account for the taxable year, and the taxpayer makes adjustments to a reserve to reflect the deferral of taxes resulting from the use of a period for depreciation under section 167 in accordance with an election to apply this section different from the period used for computing its depreciation expense for ratemaking purposes and for reflecting operating results in its regulated books of account for the taxable year. A determination whether the taxpayer is considered to normalize under this subdivision the tax deferral resulting from the election to apply this section shall be made in a manner consistent with the principles for determining whether a taxpayer is using the ''normalization method of accounting'' (within the meaning of section 167(1)(3)(G)). See §1.167(l)–1(h).

(*c*) If a taxpayer, which has elected to apply this section to any qualified public utility property and is required under (*a*) of this subdivision to normalize the tax deferral resulting from the election to apply this section to such property, fails to normalize such tax deferral, the election to apply this section to such property shall terminate as of the beginning of the taxable year for which the taxpayer fails to normalize such tax deferral. Application of this section to such property for any period prior to the termination date will not be affected by this termination.

(5) *Determination of reasonable allowance for depreciation*—(i) *In general.* The allowance for depreciation of qualified property to which the taxpayer elects to apply this section shall be determined in accordance with this section. The annual allowance for depreciation is determined by using the method of depreciation adopted by the taxpayer and a rate based upon a life permitted by this section. In the case of the straight-line method of depreciation, the rate of depreciation shall be based upon the class life (or individual life if the taxpayer assigns individual depreciable lives in accordance with subdivision (iii) of this subparagraph) used by the taxpayer with respect to the assets in the asset guideline class. Such rate will be applied to the unadjusted basis of the asset guideline class (individual assets or depreciation accounts if the taxpayer assigns individual depreciable lives). In the case of the sum of the years-digits method of depreciation, the rate of depreciation will be determined based upon the remaining life of the class (or individual remaining lives if the taxpayer assigns such lives in accordance with subdivision (iii) of this subparagraph) and is applied to the adjusted basis of the class (or individual accounts or assets) as of the beginning of the taxable year of election. The remaining life of a depreciation account is determined by dividing the unrecovered cost or other basis of the account, as computed by straight-line depreciation, by the gross cost or unadjusted basis of the account, and multiplying the result by the class life used with respect to the account. In the case of the declining balance method of depreciation, the rate of depreciation for the asset guideline class shall be based upon the class life (or individual life if the taxpayer assigns such lives in accordance with subdivision (iii) of this subparagraph). Such rate is applied to the adjusted basis of the class (or individual accounts or assets) as of the beginning of the taxable year of election.

(ii) *Reasonable allowance by reference to class lives.* The amount of depreciation for all qualified property in an asset guideline class to which the taxpayer elects to apply this section will constitute the reasonable allowance provided by section 167(a) and the depreciation for the asset guideline class will not be adjusted if—

(*a*) The taxpayer's qualified property is accounted for in one or more depreciation accounts which conform to the asset guideline class, and the depreciation for each such account is determined by using a rate based upon a life not less than the class life, or

(*b*) The taxpayer's qualified property is accounted for in one or more depreciation accounts (whether or not conforming to the asset guideline class) for which depreciation is determined at a rate based upon the taxpayer's estimate of the lives of the assets (instead of the class life) and the total amount of depreciation so determined for the asset guideline class for the taxable year of election is not more than would be permitted under (*a*) of this subdivision for such year using the method of depreciation adopted by the taxpayer for the property.

See subdivision (vii) of this subparagraph for determination of reasonable allowance if depreciation exceeds the amount permitted by this subdivision. See paragraph (b) of this section for rules regarding the determination of "class life". For rules for regrouping depreciation accounts to conform to the asset guideline class, see subdivision (iv) of this subparagraph.

(iii) *Consistency when individual lives are used.* If the taxpayer assigns individual depreciable lives to assets in accordance with subdivision (ii)(*b*) of this subparagraph, even though the total amount of depreciation for the asset guideline class will not be adjusted, the lives assigned to the various assets in the asset guideline class must be reasonably in proportion to their relative expected periods of use in the taxpayer's business. Thus, although the taxpayer who uses individual asset lives normally has latitude in thereby allocating the depreciation for the asset guideline class among the assets, if the lives are grossly disproportionate (as where a short life is assigned to one asset and a long life to another even though the expected periods of use are the same), the taxpayer's allocation of depreciation to particular assets or depreciation accounts may be adjusted. For example, the taxpayer's allocation may be adjusted for purposes of determining adjusted basis under section 1016(a) or in allocating depreciation to the 50-percent limitation on percentage depletion provided by section 613(a). See paragraph (d) of this section for rules regarding the use of individual asset lives for purposes of classifying retirements as normal or abnormal.

(iv) *Regrouping depreciation accounts.* Without the consent of the Commissioner, the taxpayer may for any taxable year for which he elects to apply this section to an asset guideline class, regroup his accounts for that and all succeeding taxable years to conform to the asset guideline class. Other changes in accounting, including a change from item accounts to multiple-asset accounting, may be made with the consent of the Commissioner. No depreciation accounts for which the straight line or sum of the years-digits method of depreciation is adopted may be combined under this section which would not be permitted to be combined under part III of Revenue Procedure 65–13, as in effect on January 1, 1971. Accordingly, whether or not the taxpayer adopted the guideline system of Revenue Procedure 62–21 for a taxable year to which part III of Revenue Procedure 65–13 is applicable, the depreciation allowance for any taxable year of election under this section may not exceed that amount which would have been allowed for such year if the taxpayer had used item accounts or year of acquisition accounts. Thus, for example, if a calendar year taxpayer acquired a $90 asset on the first day of each year from 1966 through 1970, placed such assets in a single multiple asset account, adopted the sum of the years-digits method of depreciation and used a 5-year depreciable life for such assets, and in 1971 uses the 5-year class life determined under paragraph (b) of this section, the depreciation allowance for such assets in 1971 under this section may not exceed $60, that is, the amount which would be allowed if the taxpayer had used year of acquisition accounts for the assets for the years 1966 through 1970. For purposes of this subparagraph, a taxpayer's depreciation accounts conform to the asset guideline class if each depreciation account includes only assets of the same asset guideline class.

(v) *Method of depreciation.* The same method of depreciation must be applied to all property in a single depreciation account. The method of depreciation is subject to the limitations of section 167 (c), (j), and (l). Except as otherwise provided in this subdivision, the taxpayer must apply a method of depreciation described in section 167(b) (1), (2), or (3) for qualified property to which the taxpayer elects to apply this section. A method of depreciation permitted under section 167(b)(4) may be used under this section if the method was used by the taxpayer with respect to the property for his last taxable year ending before January 1, 1971, the method is expressed in terms of years, the taxpayer establishes to the satisfaction of the Commissioner that the method is both a reasonable and consistent method, and if the taxpayer applies paragraph (b)(2) of this section (relating to class lives in special situations) to determine a class life, that the method of determining such class life is consistent with the principles of Revenue Procedure 62–21 as applied to such a method. If the taxpayer has applied a method of depreciation with respect to the property which is not described in section 167(b) (1), (2), (3), or (4) (as permitted under the preceding sentence), he must change under this section to a method of depreciation described in section 167(b) (1), (2), or (3) for the first taxable year for which an election is made under this section. Other changes in depreciation method may be made with the consent of the Commissioner (see sec. 446 and the regulations thereunder). (See also sec. 167(e).)

(vi) *Salvage value.* In applying the method of depreciation adopted by the taxpayer, the annual allowance for depreciation is determined without adjustment for the salvage value of the property, except that no depreciation account may be depreciated below a reasonable salvage value for the account. See paragraph (c) of this section for definition and treatment of salvage value.

(vii) *Reasonable allowance when depreciation exceeds amount based on class life.* In the event that the total amount of depreciation claimed by the taxpayer on his income tax return, in a claim for refund, or otherwise, for an asset guideline class with respect to which an election is made under this section for the taxable year, exceeds the maximum amount permitted under subdivision (ii)(*a*) of this subparagraph—

(*a*) If the excess is established to the satisfaction of the Commissioner to be the result of a good faith mistake by the taxpayer in determining the maximum amount permitted under subdivision (ii) (*a*) of this subparagraph, the taxpayer's election to apply this section will be treated as valid and only such excess will be disallowed, and

(*b*) In all other cases, the taxpayer's election to apply this section to the asset guideline class for the taxable year is invalid and the reasonable allowance for depreciation will be determined without regard to this section. (See §1.167(a)–1 (b) for rules regarding the estimated useful life of property.)

(b) *Determination of class lives*—(1) *Class lives in general.* The class life determined under this paragraph (without regard to any range or variance permitted with respect to class lives under §1.167(a)–11) will be applied for purposes of determining whether the allowance for depreciation for qualified property included in an election under this section is subject to adjustment. The taxpayer is not required to use the class life determined under this paragraph for purposes of determining the allowance for depreciation. Except as provided in subparagraph (2) of this paragraph, the class life of qualified property to which the taxpayer elects to apply this section is the shorter of—

(i) The asset guideline period for the asset guideline class as set forth in Revenue Procedure 72–10 as in effect on March 1, 1972 (applied without regard to any special provision therein with respect to property predominantly used outside the United States), or

(ii) The asset guideline period for the asset guideline class as set forth in any supplement or revision of Revenue Procedure 72–10, but only if and to the extent by express reference in such supplement or revision made applicable for the purpose of changing the asset guideline period or classification of qualified property to which this section applies.

See paragraph (e)(3)(iii) of this section for requirement that the election for the taxable year specify the class life for each asset guideline class. Generally, the applicable asset guideline class and asset guideline period for qualified property to which the taxpayer has elected to apply this section will not be changed for the taxable year of election to reflect any supplement or revision thereof after the taxable year. However, if expressly provided in such a supplement or revision, the taxpayer may, at his option in the manner specified therein, apply the revised or supplemented asset guideline classes or periods to such property for such taxable year and succeeding taxable years. The principles of this subparagraph may be illustrated by the following example:

Example. (i) Corporation X, a calendar year taxpayer, has assets in asset guideline class 20.4 of Revenue Procedure 72–10 which were placed in service by corporation X in 1967, 1968, and 1970. Corporation X also has assets in asset guideline class 22.1 of Revenue Procedure 72–10 which were placed in service at various times prior to 1971. Corporation X has no other qualified property. Corporation X elects to apply this section for 1971 to both classes. Assume that the class lives are determined under this subparagraph and not under subparagraph (2) of this paragraph.

(ii) The class lives for asset guideline classes 20.4 and 22.1 are their respective asset guideline periods of 12 years and 9 years in Revenue Procedure 72–10.

(iii) Accordingly, in the election for the taxable year, in accordance with paragraph (e)(3)(iii) of this section, corporation X specifies a class life of 12 years for asset guideline class 20.4 and a class life of 9 years for asset guideline class 22.1

(2) *Class lives in special situations.* Notwithstanding subparagraph (1) of this paragraph, for the purposes of this section the class life for the asset guideline class determined under this subparagraph shall be used if such class life is shorter than the class life determined under subparagraph (1) of this paragraph. If property described in paragraph (a)(2)(iii) of this section in an asset guideline class is acquired by the taxpayer in a transaction to which section 381(a) applies, for purposes of

this subparagraph such property shall be segregated from other property in the class and treated as in a separate asset guideline class, and the class life for that asset guideline class under this subparagraph shall be the shortest class life the transferor was entitled to use under this section for such property on the date of such transfer. In all other cases, the class life for the asset guideline class for purposes of this subparagraph shall be the shortest class life (within the meaning of sec. 4, part II, of Revenue Procedure 62–21) which can be justified by application of secs. 3.02(a), 3.03(a), or 3.05, part II, of Revenue Procedure 62–21 (other than the portion of such sec. 3.05 dealing with justification of a class life by reference to facts and circumstances) for the taxpayer's last taxable year ending prior to January 1, 1971.

A class life justified by application of section 3.03(a), Part II, of Revenue Procedure 62–21 shall not be shorter than can be justified under the Adjustment Table for Class Lives in Part III of such Revenue Procedure. For purposes of this subparagraph and paragraph (f)(1)(iii) of this section, the reserve ratio test is met only if the taxpayer's reserve ratio does not exceed the upper limit of the appropriate reserve ratio range or in the alternative during the transitional period there provided does not exceed the appropriate ''transitional upper limit'' in section 3, Part II, of Revenue Procedure 65–13. References to Revenue Procedure 62–21 include all morifications, amendments, and supplements thereto as of January 1, 1971. The guideline form of the reserve ratio test, as described in Revenue Procedure 65–13, may be applied for purposes of this subparagraph in a manner consistent with the rules contained in section 7, Part II, of Revenue Procedure 65–13 and sections 3.02, 3.03, and 3.05, Part II, of Revenue Procedure 62–21. The principles of this subparagraph may be illustrated by the following examples:

Example 1. Corporation X, a calendar year taxpayer, has all its assets in asset guideline class 20.4 of Revenue Procedure 72–10 which were placed in service by corporation X prior to 1971. Corporation X elects to apply this section for 1971. For taxable years 1967 through 1969, corporation X had used a class life (within the meaning of section 4, Part II, of Revenue Procedure 62–21) for asset guideline class 20.4 of 12 years. The asset guideline period in Revenue Procedure 72–10 in effect for 1971 is also 12 years. Assume that for 1969 corporation X's reserve ratio was below the appropriate reserve ratio lower limit. However, corporation X could not justify a class life shorter than the asset guideline period of 12 years for 1970 since corporation X had not used the 12-year class life for a period at least equal to one-half of 12 years. (See section 3.03(a), Part II, of Revenue Procedure 62–21.) Accordingly, the class life for asset guideline class 20.4 in 1971 is the asset guideline period of 12 years in accordance with subparagraph (1) of this paragraph.

Example 2. The facts are the same as in example (1) except that corporation X had used a class life of 10 years for guideline class 20.4 since 1967. Corporation X had not used the class life of 10 years for a period at least equal to one-half of 10 years. However, in 1968 corporation X's 10-year class life was accepted on audit by the Internal Revenue Service and corporation X met the reserve ratio test in 1970 for guideline class 20.4 using a test life of 10 years. (See section 3.05, Part II, of Revenue Procedure 62–21.) Accordingly, the class life of 10 years is justified for 1970 and the class life for 1971 is 10 years in accordance with this subparagraph. If the taxpayer's class life had not been audited and accepted for 1968, and in the absence of other circumstances, the taxpayer could not justify a class life shorter than the asset guideline period of 12 years since it had not used the 10-year class life for a period at least equal to one-half of 10 years. (See section 3.02, Part II, of Revenue Procedure 62–21.)

Example 3. Corporation Y, a calendar year taxpayer, has all its assets in asset guideline class 13.3 of Revenue Procedure 72–10 which were placed in service from 1960 through 1970. Corporation Y elects to apply this section for 1971. The asset guideline period in Revenue Procedure 72–10 in effect for 1971 is 16 years. Since 1963 corporation Y had used a class life of 16 years for asset guideline 13.3. At the end of 1969 corporation Y's reserve ratio for guideline class 13.3 was 36 percent. With a growth rate of 8 percent and a test life of 16 years the appropriate reserve ratio lower limit was 37 percent. Corporation Y's reserve ratio of 36 percent was below the lower limit of the appropriate reserve ratio range. Corporation Y had used the 16-year class life for at least eight years. A class life of 13.5 years for 1970 was justified by application of section 3.03(a), Part II, of Revenue Procedure 62–21 and the Adjustment Table for Class Lives in Part III, of Revenue Procedure 62–21. The class life for 1971 is 13.5 years in accordance with this subparagraph.

(3) *Classification of property*—(i) *In general.* Property to which this section applies shall be included in the asset guideline class for the activity in which the property is primarily used in the taxable year of election. See paragraph (d)(5) of this section for rule regarding the classification of leased property.

(ii) *Insubstantial activity.* The provisions of Revenue Produce 62–21 with respect to classification of assets used in an activity which is insubstantial may be applied under this section.

(iii) *Special rule for certain public utilities.* An electric or gas utility which in accordance with Revenue Procedure 64–21 used a composite guideline class basis for applying Revenue Procedure 62–21 for its last taxable year prior to January 1, 1971, may apply Revenue Procedure 72–10 and this section on the basis of such composite asset guideline class determined as provided in Revenue Procedure 64–21. For the purposes of this section all property in the composite guideline class shall be treated as included in a single asset guideline class.

(c) *Salvage value*—(1) *In general*—(i) *Definition of gross salvage value.* ''Gross salvage'' value is the amount (determined at or as of the time of acquisition but without regard to the application of Revenue Procedure 62–21) which is estimated will be realized upon a sale or other disposition of qualified property when it is no longer useful in the taxpayer's trade or business or in the production of his income and is to be retired from service, without reduction for the cost of removal, dismantling, demolition, or similar operations. ''Net salvage'' is gross salvage reduced by the cost of removal, dismantling, demolition, or similar operations. If a taxpayer customarily sells or otherwise disposes of property at a time when such property is still in good operating condition, the gross salvage value of such property is the amount expected to be realized upon such sale or disposition, and under certain circumstances, as where such property is customarily sold at a time when it is still relatively new, the gross salvage value may constitute a relatively large proportion of the unadjusted basis of such property.

(ii) *Definition of salvage value.* ''Salvage value'' for purposes of this section means gross or net salvage value less the amount, if any, by which reduced by application of section 167(f). Generally, as provided in section 167(f), a taxpayer may reduce the gross or net salvage value for an account by an amount which does not exceed 10 percent of the unadjusted basis of the personal property (as defined in section 167(f)(2)) in the account.

(2) *Estimation of salvage value*—(i) *In general.* For the first taxable year for which he elects to apply this section, the taxpayer must (in accordance with paragraph (e)(3)(iv)(*c*) of this section) establish salvage value for all qualified property to which the election applies. The taxpayer may (in accordance with subparagraph (1) of this paragraph) determine either gross or net salvage, but an election under this section does not constitute permission to change the manner of estimating salvage. Permission to change the manner of estimating salvage must be obtained by filing form 3115 with the Commissioner of Internal Revenue, Washington, D.C. 20224, within the time otherwise permitted for the taxable year or before September 6, 1973. Salvage value in succeeding taxable years of election will be determined by adjustments of such initial salvage value for the account, as retirements occur. This salvage value established by the taxpayer for the first taxable year of election will not be redetermined merely as a result of fluctuations in price levels or as a result of other circumstances occurring after the close of such taxable year. See paragraph (e)(3)(iv) of this section for requirements that the taxpayer specify in his election the aggregate amount of salvage value for an asset guideline class and that the taxpayer maintain records reasonably sufficient to identify the salvage value established for each depreciation account in the class.

(ii) *Salvage as limitation on depreciation.* In no case may an account be depreciated under this section below a reasonable salvage value, after taking into account any reduction in gross or net salvage value permitted by section 167(f). For example, if the salvage value of an account for 1971 is $75, the unadjusted basis of the account is $500, and the depreciation reserve is $425, no depreciation is allowable for 1971.

(iii) *Special rule for first taxable year.* If for a taxable year ending prior to January 1, 1971, the taxpayer had adopted Revenue Procedure 62–21 prior to January 12, 1971 (see paragraph (f)(2) of this section), no adjustment in the amount of depreciation allowable for any taxable year ending prior to January 1, 1971, shall be made solely by reason of establishing salvage value under this paragraph for any taxable year ending after December 31, 1970. The principles of this subdivision may be illustrated by the following example:

Example. Taxpayer A had adopted Revenue Procedure 62–21 prior to January 12, 1971, for taxable years prior to 1971. Taxpayer A had not taken into account any salvage value for account No. 1 which is one of four depreciation accounts A has in the class. The reserve ratio test has been met for all years prior to 1971 and in accordance with Revenue Procedure 62–21 no adjustments in depreciable lives or salvage values were made. At the end of A's taxable year 1970, the unadjusted basis of account No. 1 was $10,000 and the reserve for depreciation was $9,800. Pursuant to this paragraph, A establishes a salvage value of $400 for account No. 1 (determined at or as of the time of acquisition). This salvage value is determined to be correct. No depreciation is allowable for account No. 1 in 1971. No depreciation is disallowed for any taxable year prior to 1971, solely by reason of establishing salvage value under this paragraph.

(3) *Limitation on adjustment of reasonable salvage value.* The salvage value established by the taxpayer for a depreciation account will not be redetermined if it is reasonable. Since the determination of salvage value is a matter of estimation, minimal adjustments will not be made. The salvage value established by the taxpayer will be deemed to be reasonable unless there is sufficient basis for a determination of an amount of salvage value for the account which exceeds the salvage value established by the taxpayer for the account by an amount greater than 10 percent of the unadjusted basis of the account at the close of such taxable year. If the salvage value established by the taxpayer for the account is not within the 10-percent range or if the taxpayer follows the practice of understating his estimates of salvage to take advantage of this subdivision, and if there is a determination of an amount of salvage value for the account for the taxable year which exceeds the salvage value established by the taxpayer for the account for such taxable year, an adjustment will be made by increasing the salvage value established by the taxpayer for the account by an amount equal to the difference between the salvage value as determined and the salvage value established by the taxpayer for the account. For the purposes of this subdivision, a determination of salvage value shall include all determinations at all levels of audit and appellate proceedings, and as well as all final determinations within the meaning of section 1313(a)(1). This subparagraph shall apply to each such determination.

(4) *Examples.* The principles of this paragraph may be illustrated by the following examples in which it is assumed that the taxpayer has established salvage value in accordance with this paragraph and has not followed a practice of understating his estimates of salvage value:

Example 1. Taxpayer B elects to apply this section for 1971. Assets Y and Z are the only assets in a multiple asset account of 1967, the year in which the assets were acquired. The unadjusted basis of asset Y is $50,000 and the unadjusted basis of asset Z is $30,000. B estimated a gross salvage value of $55,000 at the time of acquisition. The property qualified under section 167(f)(2) and B reduced the amount of salvage taken into account by $8,000 (that is, 10 percent of $80,000, under sec. 167(f)). Thus, in accordance with this paragraph and paragraph (e)(3)(iv)(*c*) of this section, B establishes a salvage value of $47,000 for the account for 1971. Assume that there is not sufficient basis for determining a salvage value for the account greater $52,000 (that is $60,000 minus the $8,000 reduction under sec. 167(f)). Since the salvage value of $47,000 established by B for the account is within the 10 percent range, it is reasonable. Salvage for the account will not be redetermined.

Example 2. The facts are the same as in example (1) except that B estimated a gross salvage value of $50,000 and establishes a salvage value of $42,000 for the account (that is, $50,000 minus the $8,000 reduction under section 167(f)). There is sufficient basis for determining an amount of salvage value greater than $50,000 (that is, $58,000 minus the $8,000 reduction under section 167(f)). The salvage value of $42,000 established by B for the account can be redetermined without regard to the limitation in subparagraph (3) of this paragraph, since it is not within the 10 percent range. Upon audit of B's tax return for 1971 (a year in which the redetermination would affect the amount of depreciation allowable for the account), salvage value is determined to be $52,000 after taking into account the reduction under section 167(f). Salvage value for the account will be adjusted to $52,000.

Example 3. The facts are the same as in example (1) except that upon audit of B's tax return for 1971 the examining officer determines the salvage value to be $58,000 (that is, $66,000 minus the $8,000 reduction under section 167(f)), and proposes to adjust salvage value for the account to $58,000 which will result in disallowing an amount of depreciation for the taxable year. B does not agree with the finding of the examining officer. After receipt of a ''30-day letter,'' B waives a district conference and initiates proceedings before the Appellate Division. In consideration of the case by the Appellate Division it is concluded that there is not sufficient basis for determining an amount of salvage value for the account in excess of $55,000 (that is, $63,000 minus the $8,000 reduction under section 167(f)). Since the salvage value of $47,000 established by B for the account is within the 10 percent range, it is reasonable. Salvage value for the account will not be redetermined.

Example 4. For 1971, taxpayer C elects to apply this section to factory building X which is in an item account of 1965, the year in which the building was acquired. The unadjusted basis of factory building X is $90,000. C estimated a gross salvage value for the account of $10,000. The property did not qualify under section 167(f)(2). Thus, C establishes a salvage value of $10,000 for the account for 1971. Assume that there is not sufficient basis for determining a salvage value for the account greater than $14,000. Since the salvage value of $10,000 established by C for the account is within the 10-percent range, it is reasonable. Salvage value for the account will not be redetermined.

(d) *Accounting for qualified property*—(1) *In general.* Qualified property for which the taxpayer elects to apply this section may be accounted for in any number of item or multiple asset accounts.

(2) *Retirements of qualified property*—(i) *In general.* The provisions of this subparagraph and §1.167(a)–8 apply to retirements of qualified property to which the taxpayer elects to apply this section for the taxable year. See subdivision (iii) of this subparagraph for special rule for normal retirements.

(ii) *Adjusted basis of assets retired.* In the case of a taxpayer who depreciates qualified property in a multiple-asset account conforming to the asset guideline class at a rate based on the class life in accordance with paragraph (a)(5)(ii)(*a*) of this section, §1.167(a)–8(c) (relating to basis of assets retired) shall be applied by assuming that the class life is the average expected useful life of the assets in the account. See §1.167(a)–8, generally, for the basis of assets retired.

(iii) *Definition of normal retirements.* Notwithstanding §1.167(a)– 8(b), the determination whether a retirement of qualified property is normal or abnormal shall be made in light of all the facts and circumstances, primarily with reference to the expected period of use of the asset in the taxpayer's business without regard to paragraph (a)(5)(ii) of this section. A retirement is not abnormal unless the taxpayer can show that the withdrawal of the asset was not due to a cause which would customarily be contemplated (in light of the taxpayer's practice and experience) in setting a depreciation rate for the assets without regard to paragraph (a)(5)(ii) of this section. Thus, for example, a retirement is normal if made within the range of years which would customarily be taken into account in setting such depreciation rate and if the asset has reached a condition at which, in the normal course of events, the taxpayer customarily retires similar assets from use in his business. A retirement may be abnormal if the asset is withdrawn at an earlier time or under other circumstances, as, for example, when the asset has been damaged by casualty or has lost its usefulness suddenly as the result of extraordinary obsolescence.

(3) *Special rules*—(i) *In general.* The provisions of this subparagraph shall apply to qualified property in a taxable year for which an election to apply this section is made.

(ii) *Repairs.* For the purpose of sections 162 and 263 and the regulations thereunder, whether an expenditure prolongs the life of an asset shall be determined by reference to the expected period of use of the asset in the taxpayer's business without regard to paragraph (a)(5)(ii) of this section.

(iii) *Sale and lease.* For the purpose of comparison with the term of a lease of such property, the remaining life of qualified property shall be determined by reference to the expected period of use of the asset in the taxpayer's business without regard to paragraph (a)(5)(ii) of this section.

(4) *Expected period of use.* For the purposes of subparagraphs (2) and (3) of this paragraph, the determination of the expected period of use of an asset shall be made in light of all the facts and circumstances. The expected period of use of a particular asset will not necessarily coincide with the class life used for depreciation (or with the individual asset life for depreciation under the alternative method in paragraph (a)(5)(ii) (*b*) of this section for applying the class life). Thus, for example, if the question is whether an asset has been leased for a period less than, equal to or greater than its remaining life, the determination shall be based on the remaining expected period of use of the individual asset without regard to the fact that the asset is depreciated at a rate based on the class life in accordance with paragraph (a)(5)(ii)(*a*) of this section.

(5) *Leased property.* In the case of a lessor of qualified property, unless there is an asset guideline class in effect for such lessors, the asset guideline class for such property shall be determined by reference to the activity in which such property is primarily used by the lessee. See paragraph (b)(3) of this section for general rule for classification of qualified property according to primary use. However, in the case of an asset guideline class based upon the type of property (such as trucks or railroad cars), as distinguished from the activity in which used, the property shall be classified without regard to the activity of the lessee.

(e) *Election under this section*—(1) *Consent to change in method of accounting.* An election to apply this section for a taxable year ending after December 31, 1970, is a method of accounting but the consent of the Commissioner will be deemed granted to make an annual election.

(2) *Election for taxable years ending after December 31, 1976.* For taxable years ending after December 31, 1976, the election to apply this section for a taxable year shall be made by attaching to the income tax return a statement that an election under this section is being made. If the taxpayer does not file a timely return (taking into account extensions of time for filing) for the taxable year, the election shall be made at the time the taxpayer files his first return for the taxable year. The election may be made with an amended return only if such amended return is filed no later than the time prescribed by law (including extensions thereof) for filing the return for the taxable year. A taxpayer who makes an election under this subparagraph must maintain books and records reflecting the information described in paragraph (e)(3) (ii) and (iii) of this section.

(3) *Election for taxable years ending on or before December 31, 1976.* (i) For taxable years ending on or before December 31, 1976, the election to apply this section for a taxable year may be made by filing Form 5006 with the income tax return for the taxable year. If the taxpayer does not file a timely return (taking into account extensions of time for filing) for the taxable year, the election shall be filed at the time the taxpayer files his first return for the taxable year. The election may be made with an amended return only if such amended return is filed no later than the later of (*a*) the time prescribed by law (including extensions thereof) for filing the return for the taxable year, or (*b*) November 5, 1973.

(ii) The election to apply this section for a taxable year ending on or before December 31, 1976, will be deemed to be made if the tax return (filed within the periods referred to in paragraph (e)(3)(i) of this section) contains information sufficient to establish the following:

(*a*) Each asset guideline class for which the election is intended to apply;

(*b*) The class life for each such asset guideline class and whether the class life is determined under paragraph (b)(1) or (2) of this section;

(*c*) For each asset guideline class, as of the end of the taxable year of election, (*1*) the total unadjusted basis of all qualified property, (*2*) the aggregate of the reserves for depreciation of all accounts in the asset guideline class, and (*3*) the aggregate of the salvage value established for all accounts in the asset guideline class; and

(*d*) Whether the taxpayer is an electric or gas utility using a composite asset guideline class basis in accordance with paragraph (b)(3)(iii) of this section.

If an election is deemed to be made under this subdivision (ii), the taxpayer will be deemed to have consented to apply all the provisions of this section.

(iii) A taxpayer to whom the election applies shall maintain books and records for each asset guideline class reasonably sufficient to identify the unadjusted basis, reserve for depreciation and salvage value established for each depreciation account in such asset guidelines class.

(f) *Depreciation for taxable years ending before January 1, 1971*—(1) *Adoption of Revenue Procedure 62–21*—(i) *In general*. Except as provided in subdivision (ii) of this subparagraph, a taxpayer may elect to be examined under the provisions of Revenue Procedure 62–21 for a taxable year ending before January 1, 1971, only in accordance with the rules of this paragraph. The election must specify:

(*a*) That the taxpayer makes such election and consents to, and agrees to apply, all the provisions of this paragraph;

(*b*) Each guideline class and taxable year for which the taxpayer elects to be examined under Revenue Procedure 62–21;

(*c*) The class life claimed for each such guideline class;

(*d*) The class life and the total amount of the depreciation for the guideline class claimed on the last income tax return for such taxable year filed prior to January 12, 1971 (or in case no income tax return was filed prior to January 12, 1971, on the first income tax return filed for such taxable year);

(*e*) The class life claimed and the total amount of depreciation for the guideline class under the election to apply Revenue Procedure 62–21, in accordance with this paragraph, for the taxable year; and

(*f*) If the class life or total amount of depreciation for the guideline class is different in (*d*) and (*e*) of this subdivision, a reasonable description of the computation of the class life in (*e*) of this subdivision, the amount of difference in tax liability resulting therefrom, and the amount of any refund or reduction in any deficiency in tax. The election shall be made in an amended tax return or claim for refund (or by a supplement to the tax return or claim) for the taxable year, and if the class life or total amount of depreciation for the guideline class is different in accordance with (*f*) of this subdivision, such difference shall be reflected in the amended tax return or claim for refund. Forms may be provided for making the election and submission of the information. In the case of an election made after issuance of such forms and more than 30 days after publication of notice thereof in the Internal Revenue Bulletin, the election may be made and the information submitted only in accordance with such forms. An election will not otherwise be invalid under this paragraph so long as there is substantial compliance, in good faith, with the requirements of this paragraph.

(ii) *Special rule*. The provisions of this subparagraph shall not apply to a guideline class in any taxable year for which the taxpayer has prior to January 12, 1971, adopted Revenue Procedure 62–21 for such class. See subparagraph (2) of this paragraph for determination of adoption of Revenue Procedure 62–21 prior to January 12, 1971.

(iii) *Justification of class life claimed and limitations on refunds*. If the taxpayer elects for a taxable year to be examined under the provisions of Revenue Procedure 62–21 in accordance with subdivision (i) of this subparagraph, any of the provisions of Revenue Procedure 62–21 may be applied to justify a class life claimed on the income tax return filed for such year or to offset an increase in tax liability for such year. Unless it meets the reserve ratio test, no class life will be accepted on audit which (after all other adjustments in tax liability for such year) results in a reduction (or further reduction) in the amount of tax liability shown on the income tax return (specified in subdivision (i)(*d*) of this subparagraph) for such taxable year, or results in an amount of loss carryback or carryover to any taxable year, but if it is justified under Revenue Procedure 62–21 and meets the reserve ratio test, a class life will be accepted on audit without regard to the foregoing limitations and, for example, may produce a refund or credit against tax. For example, if a class life of 9 years is otherwise justified under Revenue Procedure 62–21 for 1969, but the taxpayer does not meet the reserve ratio test for 1969 using a test life of 9 years, a class life of 9 years (or any class life justified under Revenue Procedure 62–21) will be accepted on audit under Revenue Procedure 62–21 pursuant to an election in accordance with this paragraph provided it does not result in the reduction or further reduction in tax liability or in an amount of loss carryback or carryover as described in the preceding sentence. On the other hand, for example, if a class life of 10 years is justified under Revenue Procedure 62–21 for 1969 and the taxpayer meets the reserve ratio test for 1969 using a test life of 10 years, a class life of 10 years will be accepted on audit under Revenue Procedure 62–21 pursuant to an election in accordance with this paragraph even though it results in a reduction or further reduction in tax liability or in an amount of loss carryback or carryover as described above and produces a refund of tax. For purposes of this section, the term ''audit'' includes examination of claims for refund or credit against tax.

(iv) *Definitions.* For purposes of this paragraph, the determination whether the reserve ratio test is met shall be made in accordance with that portion of paragraph (b)(2) of this section which is by express reference therein made applicable to this paragraph. In addition, the guideline form of the reserve ratio test, as described in Revenue Procedure 65–13, may be applied. For purposes of this paragraph, references to Revenue Procedure 62–21 include all modifications, amendments, and supplements thereto as of January 11, 1971. The terms ''class life'' and ''guideline class'' have the same meaning as in Revenue Procedure 62–21.

(2) *Determination whether Revenue Procedure 62–21 adopted prior to January 12, 1971*—(i) *In general.* For the purposes of this paragraph, a taxpayer will be treated as having adopted prior to January 12, 1971, Revenue Procedure 62–21 for a guideline class for a taxable year ending before January 1, 1971, only if—

(*a*) For the guideline class and taxable year, the taxpayer adopted Revenue Procedure 62–21 by expressly so indicating on the income tax return filed for such taxable year prior to January 12, 1971;

(*b*) For the guideline class and taxable year, the taxpayer adopted Revenue Procedure 62–21 prior to January 12, 1971, by expressly so indicating in a proceeding before the Internal Revenue Service (such as upon examination of the income tax return for such taxable year) and there is reasonable evidence to that effect; or

(*c*) There is other reasonable evidence that prior to January 12, 1971, the taxpayer adopted Revenue Procedure 62–21 for the guideline class and taxable year.

If not treated under (*b*) or (*c*) of this subdivision as having done so for the last taxable year ending before January 1, 1971, and if the taxpayer files his first income tax return for such taxable year after January 11, 1971, the taxpayer will be treated as having adopted Revenue Procedure 62–21 prior to January 12, 1971, for a guideline class for such taxable year if he expressly so indicated on that return, or is treated under this subparagraph as having adopted Revenue Procedure 62–21 prior to January 12, 1971, for that guideline class for the immediately preceding taxable year.

(ii) *Examples.* The principles of this subparagraph may be illustrated by the following examples:

Example 1. Taxpayer A, an individual who uses the calendar year as his taxable year, has property in Group Three, Class 16(a), of Revenue Procedure 62–21. On A's income tax return for 1968, filed prior to January 12, 1971, he adopted Revenue Procedure 62–21 for the guideline class by so indicating under ''Summary of Depreciation'' in the appropriate schedule of Form 1040 for 1968. Under subdivision (i) (*a*) of this subparagraph, A is treated as having adopted Revenue Procedure 62–21 for the guideline class for 1968 prior to January 12, 1971.

Example 2. Taxpayer B, an individual who uses the calendar year as his taxable year, has property in Group Two, Class 5, of Revenue Procedure 62–21. B filed timely income tax returns for 1966 through 1968 but did not adopt Revenue Procedures 62–21 on any of such returns. In 1969 upon audit of B's taxable years 1966 through 1968, B exercised his option to be examined under the provisions of Revenue Procedure 62–21. The Revenue Agent's report shows that B was examined under Revenue Procedure 62–21 for taxable years 1966 through 1968. B will be treated under subdivision (ii)(*b*) of this subparagraph as having adopted Revenue Procedure 62–21 for such years prior to January 12, 1971.

Example 3. The facts are the same as in example (2) except that B did not upon examination by the Revenue Agent in 1969 exercise his option to be examined under Revenue Procedure 62–21. B has six accounts in the guideline class, Nos. 1 through 6. The Revenue Agent proposed to lengthen the depreciable lives on accounts Nos. 2 and 3 from 8 years to 12 years. In proceedings before the Appellate Division in 1970, B exercised his option to be examined under the provisions of Revenue Procedure 62–21. This is shown by correspondence between B and the Appellate Conferee as well as by other documents in the case before the Appellate Division. The case was settled on that basis before the Appellate Division without adjustment of the depreciable lives for B's accounts Nos. 2 and 3. B will be treated under subdivision (ii) (*b*) of this subparagraph as having adopted Revenue Procedure 62–21 for taxable years 1966 through 1968 prior to January 12, 1971.

Example 4. Corporation X uses the calendar year as its taxable year and has assets in Group Two, Class 5, of Revenue Procedure 62–21. Beginning in 1964, corporation X used the guideline life of 10 years as the depreciable life for all assets in the guideline class. In 1967, corporation X's taxable years 1964 through 1966 were examined and corporation X exercised its option to be examined under the provisions of Revenue Procedure 62–21. Corporation X did not adopt Revenue Procedure 62–21 on any of its income tax returns, for the years 1964 through 1970. Corporation X has not been examined since 1967, but has continued to use the guideline life of 10 years for all property in the guideline class including additions since 1966. Corporation X will be treated under subdivision (ii) (*c*) and (*d*) of this subparagraph as having adopted Revenue Procedure 62–21 prior to January 12, 1971, for taxable years 1964 through 1970.

Example 5. Corporation Y uses the calendar year as its taxable year and has asset in Group Two, Class 5, of Revenue Procedure 62–21. Since 1964, corporation Y has used various depreciable lives, based on the facts and circumstances, for different accounts in the guideline class. Corporation Y was examined in 1968 for taxable years 1965 through 1967. Corporation Y was also examined in 1970 for taxable years 1968 and 1969. Corporation Y did not exercise its option to be examined under the provisions of Revenue Procedure 62–21. Corporation Y has not adopted Revenue Procedure 62–21 on any income tax return. For taxable years 1964 through 1970, corporation Y's class life (within the meaning of section 4, Part II, of Revenue Procedure 62–21) was between 12 and 14 years. In August of 1971, corporation Y filed amended income tax returns for 1968 and 1969, and an income tax return for 1970, using a depreciable life of 10 years (equal to the guideline life) for all assets in the guideline class. Corporation Y will not be treated as having adopted Revenue Procedure 62–21 prior to January 12, 1971.

Example 6. Corporation Z uses the calendar year as its taxable year and has assets in group 2, class 5, of Revenue Procedure 62–21. Corporation Z adopted Revenue Procedure 62–21 for this guideline class by expressly so indicating on its tax return for 1966, which was filed before January 12, 1971. Corporation Z computed its allowable depreciation for 1966 as if it adopted Revenue Procedure 62–21 for this guideline class for its taxable years 1962 through 1965, although it had earlier filed its tax returns for those years without regard to Revenue Procedure 62–21. The depreciation thus claimed in 1966 was less than what would have been allowable if corporation Z first adopted Revenue Procedure 62–21 in 1966. This was the result of certain accounts becoming fully depreciated through use of Revenue Procedure 62–21 in computing depreciation for 1962 through 1965. In addition, in deferred tax accounting procedures employed before January 12, 1971, for financial reporting purposes, corporation Z calculated its tax deferrals on the basis that it had adopted Revenue Procedure 62–21 for the years 1962 through 1965. Corporation Z will be treated under subdivision (i) (*c*) of this subparagraph as having adopted Revenue Procedure 62–21 for taxable years 1962 through 1965 prior to January 12, 1971.

(Sec. 167(m), 85 Stat. 508 (26 U.S.C. 167))

[T.D. 7278, 38 FR 14923, June 7, 1973, as amended by T.D. 7315, 39 FR 20195, June 7, 1974; T.D. 7517, 42 FR 58934, Nov. 14, 1977]

§ 1.167(a)–13T Certain elections for intangible property (temporary).

For rules applying the elections under section 13261(g) (2) and (3) of the Omnibus Budget Reconciliation Act of 1993 to intangible property described in section 167(f), see §1.197–1T.

[59 FR 11922, Mar. 15, 1994]

§ 1.167(a)–14 Treatment of certain intangible property excluded from section 197.

(a) *Overview.* This section provides rules for the amortization of certain intangibles that are excluded from section 197 (relating to the amortization of goodwill and certain other intangibles). These excluded intangibles are specifically described in §1.197–2(c) (4), (6), (7), (11), and (13) and include certain computer software and certain other separately acquired rights, such as rights to receive tangible property or services, patents and copyrights, certain mortgage servicing rights, and rights of fixed duration or amount. Intangibles for which an amortization amount is determined under section 167(f) and intangibles otherwise excluded from section 197 are amortizable only if they qualify as property subject to the allowance for depreciation under section 167(a).

(b) *Computer software*—(1) *In general*. The amount of the deduction for computer software described in section 167(f)(1) and §1.197–2(c)(4) is determined by amortizing the cost or other basis of the computer software using the straight line method described in §1.167(b)–1 (except that its salvage value is treated as zero) and an amortization period of 36 months beginning on the first day of the month that the computer software is placed in service. Before determining the amortization deduction allowable under this paragraph (b), the cost or other basis of computer software that is section 179 property, as defined in section 179(d)(1)(A)(ii), must be reduced for any portion of the basis the taxpayer properly elects to treat as an expense under section 179. In addition, the cost or other basis of computer software that is qualified property under section 168(k)(2) or §1.168(k)–1, 50-percent bonus depreciation property under section 168(k)(4) or §1.168(k)–1, or qualified New York Liberty Zone property under section 1400L(b) or §1.1400L(b)–1, must be reduced by the amount of the additional first year depreciation deduction allowed or allowable, whichever is greater, under section 168(k) or section 1400L(b) for the computer software. If costs for developing computer software that the taxpayer properly elects to defer under section 174(b) result in the development of property subject to the allowance for depreciation under section 167, the rules of this paragraph (b) will apply to the unrecovered costs. In addition, this paragraph (b) applies to the cost of separately acquired computer software if the cost to acquire the software is separately stated and the cost is required to be capitalized under section 263(a).

(2) *Exceptions*. Paragraph (b)(1) of this section does not apply to the cost of computer software properly and consistently taken into account under §1.162–11. The cost of acquiring an interest in computer software that is included, without being separately stated, in the cost of the hardware or other tangible property is treated as part of the cost of the hardware or other tangible property that is capitalized and depreciated under other applicable sections of the Internal Revenue Code.

(3) *Additional rules*. Rules similar to those in §1.197–2 (f)(1)(iii), (f)(1)(iv), and (f)(2) (relating to the computation of amortization deductions and the treatment of contingent amounts) apply for purposes of this paragraph (b).

(c) *Certain interests or rights not acquired as part of a purchase of a trade or business*—(1) *Certain rights to receive tangible property or services*. The amount of the deduction for a right (other than a right acquired as part of a purchase of a trade or business) to receive tangible property or services under a contract or from a governmental unit (as specified in section 167(f)(2) and §1.197–2(c)(6)) is determined as follows:

(i) *Amortization of fixed amounts*. The basis of a right to receive a fixed amount of tangible property or services is amortized for each taxable year by multiplying the basis of the right by a fraction, the numerator of which is the amount of tangible property or services received during the taxable year and the denominator of which is the total amount of tangible property or services received or to be received under the terms of the contract or governmental grant. For example, if a taxpayer acquires a favorable contract right to receive a fixed amount of raw materials during an unspecified period, the taxpayer must amortize the cost of acquiring the contract right by multiplying the total cost by a fraction, the numerator of which is the amount of raw materials received under the contract during the taxable year and the denominator of which is the total amount of raw materials received or to be received under the contract.

(ii) *Amortization of unspecified amount over fixed period.* The cost or other basis of a right to receive an unspecified amount of tangible property or services over a fixed period is amortized ratably over the period of the right. (See paragraph (c)(3) of this section regarding renewals).

(iii) *Amortization in other cases.* [Reserved]

(2) *Rights of fixed duration or amount.* The amount of the deduction for a right (other than a right acquired as part of a purchase of a trade or business) of fixed duration or amount received under a contract or granted by a governmental unit (specified in section 167(f)(2) and §1.197–2(c)(13)) and not covered by paragraph (c)(1) of this section is determined as follows:

(i) *Rights to a fixed amount.* The basis of a right to a fixed amount is amortized for each taxable year by multiplying the basis by a fraction, the numerator of which is the amount received during the taxable year and the denominator of which is the total amount received or to be received under the terms of the contract or governmental grant.

(ii) *Rights to an unspecified amount over fixed duration of less than 15 years.* The basis of a right to an unspecified amount over a fixed duration of less than 15 years is amortized ratably over the period of the right.

(3) *Application of renewals.* (i) For purposes of paragraphs (c) (1) and (2) of this section, the duration of a right under a contract (or granted by a governmental unit) includes any renewal period if, based on all of the facts and circumstances in existence at any time during the taxable year in which the right is acquired, the facts clearly indicate a reasonable expectancy of renewal.

(ii) The mere fact that a taxpayer will have the opportunity to renew a contract right or other right on the same terms as are available to others, in a competitive auction or similar process that is designed to reflect fair market value and in which the taxpayer is not contractually advantaged, will generally not be taken into account in determining the duration of such right provided that the bidding produces a fair market value price comparable to the price that would be obtained if the rights were purchased immediately after renewal from a person (other than the person granting the renewal) in an arm's-length transaction.

(iii) The cost of a renewal not included in the terms of the contract or governmental grant is treated as the acquisition of a separate intangible asset.

(4) *Patents and copyrights.* If the purchase price of an interest (other than an interest acquired as part of a purchase of a trade or business) in a patent or copyright described in section 167(f)(2) and §1.197–2(c)(7) is payable on at least an annual basis as either a fixed amount per use or a fixed percentage of the revenue derived from the use of the patent or copyright, the depreciation deduction for a taxable year is equal to the amount of the purchase price paid or incurred during the year. Otherwise, the basis of such patent or copyright (or an interest therein) is depreciated either ratably over its remaining useful life or under section 167(g) (income forecast method). If a patent or copyright becomes valueless in any year before its legal expiration, the adjusted basis may be deducted in that year.

(5) *Additional rules.* The period of amortization under paragraphs (c) (1) through (4) of this section begins when the intangible is placed in service, and rules similar to those in §1.197–2(f)(2) apply for purposes of this paragraph (c).

(d) *Mortgage servicing rights*—(1) *In general.* The amount of the deduction for mortgage servicing rights described in section 167(f)(3) and §1.197–2(c)(11) is determined by using the straight line method described in §1.167(b)–1 (except that the salvage value is treated as zero) and an amortization period of 108 months beginning on the first day of the month that the rights are placed in service. Mortgage servicing rights are not depreciable to the extent the rights are stripped coupons under section 1286.

(2) *Treatment of rights acquired as a pool*—(i) *In general.* Except as provided in paragraph (d)(2)(ii) of this section, all mortgage servicing rights acquired in the same transaction or in a series

of related transactions are treated as a single asset (the pool) for purposes of determining the depreciation deduction under this paragraph (d) and any gain or loss from the sale, exchange, or other disposition of the rights. Thus, if some (but not all) of the rights in a pool become worthless as a result of prepayments, no loss is recognized by reason of the prepayment and the adjusted basis of the pool is not affected by the unrecognized loss. Similarly, any amount realized from the sale or exchange of some (but not all) of the mortgage servicing rights is included in income and the adjusted basis of the pool is not affected by the realization.

(ii) *Multiple accounts.* If the taxpayer establishes multiple accounts within a pool at the time of its acquisition, gain or loss is recognized on the sale or exchange of all mortgage servicing rights within any such account.

(3) *Additional rules.* Rules similar to those in §1.197–2(f)(1)(iii), (f)(1)(iv), and (f)(2) (relating to the computation of amortization deductions and the treatment of contingent amounts) apply for purposes of this paragraph (d).

(e) *Effective dates*—(1) *In general.* This section applies to property acquired after January 25, 2000, except that §1.167(a)–14(c)(2) (depreciation of the cost of certain separately acquired rights) and so much of §1.167(a)–14(c)(3) as relates to §1.167(a)–14(c)(2) apply to property acquired after August 10, 1993 (or July 25, 1991, if a valid retroactive election has been made under §1.197–1T).

(2) *Change in method of accounting.* See §1.197–2(l)(4) for rules relating to changes in method of accounting for property to which §1.167(a)–14 applies. However, see §1.168(k)–1(g)(4) or 1.1400L(b)–1(g)(4) for rules relating to changes in method of accounting for computer software to which the third sentence in §1.167(a)–14(b)(1) applies.

(3) *Qualified property, 50-percent bonus depreciation property, qualified New York Liberty Zone property, or section 179 property.* This section also applies to computer software that is qualified property under section 168(k)(2) or qualified New York Liberty Zone property under section 1400L(b) acquired by a taxpayer after September 10, 2001, and to computer software that is 50-percent bonus depreciation property under section 168(k)(4) acquired by a taxpayer after May 5, 2003. This section also applies to computer software that is section 179 property placed in service by a taxpayer in a taxable year beginning after 2002 and before 2010.

[T.D. 8867, 65 FR 3825, Jan. 25, 2000, as amended by T.D. 9091, 68 FR 52990, Sept. 8, 2003; T.D. 9283, 71 FR 51737, Aug. 31, 2006]

§ 1.167(b)–0 Methods of computing depreciation.

(a) *In general.* Any reasonable and consistently applied method of computing depreciation may be used or continued in use under section 167. Regardless of the method used in computing depreciation, deductions for depreciation shall not exceed such amounts as may be necessary to recover the unrecovered cost or other basis less salvage during the remaining useful life of the property. The reasonableness of any claim for depreciation shall be determined upon the basis of conditions known to exist at the end of the period for which the return is made. It is the responsibility of the taxpayer to establish the reasonableness of the deduction for depreciation claimed. Generally, depreciation deductions so claimed will be changed only where there is a clear and convincing basis for a change.

(b) *Certain methods.* Methods previously found adequate to produce a reasonable allowance under the Internal Revenue Code of 1939 or prior revenue laws will, if used consistently by the taxpayer, continue to be acceptable under section 167(a). Examples of such methods which continue to be acceptable are the straight line method, the declining balance method with the rate limited to 150 percent of the applicable straight line rate, and under appropriate circumstances, the unit of production method. The methods described in section 167(b) and §§1.167(b)–1, 1.167(b)–2, 1.167(b)–3, and 1.167(b)–4 shall be deemed to produce a reasonable allowance for depreciation except as limited under section 167(c) and §1.167(c)–1. See also §1.167(e)–1 for rules relating to change in method of computing depreciation.

(c) *Application of methods.* In the case of item accounts, any method which results in a reasonable allowance for depreciation may be selected for each item of property, but such method must thereafter be applied consistently to that particular item. In the case of group, classified, or composite accounts, any method may be selected for each account. Such method must be applied to that particular account consistently thereafter but need not necessarily be applied to acquisitions of similar property in the same or subsequent years, provided such acquisitions are set up in separate accounts. See, however, § 1.167(e)–1 and section 446 and the regulations thereunder, for rules relating to changes in the method of computing depreciation, and § 1.167(c)–1 for restriction on the use of certain methods. See also § 1.167(a)–7 for definition of account.

§ 1.167(b)–1 Straight line method.

(a) *In general.* Under the straight line method the cost or other basis of the property less its estimated salvage value is deductible in equal annual amounts over the period of the estimated useful life of the property. The allowance for depreciation for the taxable year is determined by dividing the adjusted basis of the property at the beginning of the taxable year, less salvage value, by the remaining useful life of the property at such time. For convenience, the allowance so determined may be reduced to a percentage or fraction. The straight line method may be used in determining a reasonable allowance for depreciation for any property which is subject to depreciation under section 167 and it shall be used in all cases where the taxpayer has not adopted a different acceptable method with respect to such property.

(b) *Illustrations.* The straight line method is illustrated by the following examples:

Example 1. Under the straight line method items may be depreciated separately:

Year and item	Cost or other basis less salaries	Useful life (years)	Depreciation allowable		
			1954	1955	1956
1954:					
Asset A	$1,600	4	[1] $200	$400	$400
Asset B	12,000	40	[1] 150	300	300

[1] In this example it is assumed that the assets were placed in service on July 1, 1954.

Example 2. In group, classified, or composite accounting, a number of assets with the same or different useful lives may be combined into one account, and a single rate of depreciation, *i.e.*, the group, classified, or composite rate used for the entire account. In the case of group accounts, *i.e.*, accounts containing assets which are similar in kind and which have approximately the same estimated useful lives, the group rate is determined from the average of the useful lives of the assets. In the case of classified or composite accounts, the classified or composite rate is generally computed by determining the amount of one year's depreciation for each item or each group of similar items, and by dividing the total depreciation thus obtained by the total cost or other basis of the assets. The average rate so obtained is to be used as long as subsequent additions, retirements, or replacements do not substantially alter the relative proportions of different types of assets in the account. An example of the computation of a classified or composite rate follows:

Cost or other basis	Estimated useful life (years)	Annual depreciation
$10,000	5	$2,000
10,000	15	667
20,000		2,667

Average rate is 13.33 percent ($2,667÷$20,000) unadjusted for salvage. Assuming the estimated salvage value is 10 percent of the cost or other basis, the rate adjusted for salvage will be 13.33 percent minus 10 percent of 13.33 percent (13.33% − 1.33%), or 12 percent.

Example 3. The use of the straight line method for group, classified, or composite accounts is illustrated by the following example: A taxpayer filing his returns on a calendar year basis maintains an asset account for which a group rate of 20 percent has been determined, before adjustment for salvage. Estimated salvage is determined to be 6⅔ percent, resulting in an adjusted rate of 18.67 percent. During the years illustrated, the initial investment, additions, retirements, and salvage recoveries, which were determined not to change the composition of the group sufficiently to require a change in rate, were assumed to have been made as follows:

1954—Initial investment of $12,000.

1957—Retirement $2,000, salvage realized $200.

1958—Retirement $2,000, salvage realized $200.

1959—Retirement $4,000, salvage realized $400.

1959—Additions $10,000.

1960—Retirement $2,000, no salvage realized.

1961—Retirement $2,000, no salvage realized.

DEPRECIABLE ASSET ACCOUNT AND DEPRECIATION COMPUTATION ON AVERAGE BALANCES

Year	Asset balance Jan. 1	Current additions	Current retirements	Asset balance Dec. 31	Average balance	Rate (percent)	Allowable depreciation
1954		$12,000		$12,000	$6,000	18.67	$1,120
1955	$12,000			12,000	12,000	18.67	2,240
1956	12,000			12,000	12,000	18.67	2,240
1957	12,000		$2,000	10,000	11,000	18.67	2,054
1958	10,000		2,000	8,000	9,000	18.67	1,680
1959	8,000	10,000	4,000	14,000	11,000	18.67	2,054

1961	4,615	2,054	2,000		4,669

§ 1.167(b)–2 Declining balance method.

(a) *Application of method.* Under the declining balance method a uniform rate is applied each year to the unrecovered cost or other basis of the property. The unrecovered cost or other basis is the basis provided by section 167(g), adjusted for depreciation previously allowed or allowable, and for all other adjustments provided by section 1016 and other applicable provisions of law. The declining balance rate may be determined without resort to formula. Such rate determined under section 167(b)(2) shall not exceed twice the appropriate straight line rate computed without adjustment for salvage. While salvage is not taken into account in determining the annual allowances under this method, in no event shall an asset (or an account) be depreciated below a reasonable salvage value. However, see section 167(f) and § 1.167(f)–1 for rules which permit a reduction in the amount of salvage value to be taken into account for certain personal property acquired after October 16, 1962. Also, see section 167(c) and § 1.167(c)–1 for restrictions on the use of the declining balance method.

(b) *Illustrations.* The declining balance method is illustrated by the following examples:

Example 1. A new asset having an estimated useful life of 20 years was purchased on January 1, 1954, for $1,000. The normal straight line rate (without adjustment for salvage) is 5 percent, and the declining balance rate at twice the normal straight line rate is 10 percent. The annual depreciation allowances for 1954, 1955, and 1956 are as follows:

Year	Basis	Declining balance rate (percent)	Depreciation allowance
1954	$1,000	10	$100
1955	900	10	90
1956	810	10	81

Example 2. A taxpayer filing his returns on a calendar year basis maintains a group account to which a 5 year life and a 40 percent declining balance rate are applicable. Original investment, additions, retirements, and salvage recoveries are the same as those set

forth in example (3) of paragraph (b) of §1.167(b)–1. Although salvage value is not taken into consideration in computing a declining balance rate, it must be recognized and accounted for when assets are retired.

DEPRECIABLE ASSET ACCOUNT AND DEPRECIATION COMPUTATION USING AVERAGE ASSET AND RESERVE BALANCES

Year	Asset balance Jan. 1	Current additions	Current retirements	Asset balance Dec. 31	Average	Average reserve before depreciation	Net depreciable balance	Rate (pct.)	Allowable depreciation
1954	....	$12,000	....	$12,000	$6,000	....	$6,000	40	$2,400
1955	$12,000	....	....	12,000	12,000	$2,400	9,600	40	3,840
1956	12,000	....	....	12,000	12,000	6,240	5,760	40	2,304
1957	12,000	....	$2,000	10,000	11,000	7,644	3,356	40	1,342
1958	10,000	....	2,000	8,000	9,000	7,186	1,814	40	726
1959	8,000	10,000	4,000	14,000	11,000	5,212	5,788	40	2,315
1960	14,000	....	2,000	12,000	13,000	4,727	8,273	40	3,309
1961	12,000	....	2,000	10,000	11,000	6,036	4,964	40	1,986

DEPRECIATION RESERVE

Year	Reserve Jan. 1	Current retirements	Salvage realized	Reserve Dec. 31, before depreciation	Average reserve before depreciation	Allowable depreciation	Reserve Dec. 31, after depreciation
1954	....	....	....	....	....	$2,400	$2,400
1955	$2,400	....	....	$2,400	$2,400	3,840	6,240
1956	6,240	....	....	6,240	6,240	2,304	8,544
1957	8,544	$2,000	$200	6,744	7,644	1,342	8,086
1958	8,086	2,000	200	6,286	7,186	726	7,012
1959	7,012	4,000	400	3,412	5,212	2,315	5,727
1960	5,727	2,000	....	3,727	4,727	3,309	7,036
1961	7,036	2,000	....	5,036	6,036	1,986	7,022

Where separate depreciation accounts are maintained by year of acquisition and there is an unrecovered balance at the time of the last retirement, such unrecovered balance may be deducted as part of the depreciation allowance for the year of such retirement. Thus, if the taxpayer had kept separate depreciation accounts by year of acquisition and all the retirements shown in the example above were from 1954 acquisitions, depreciation would be computed on the 1954 and 1959 acquisitions as follows:

1954 ACQUISITIONS

Year	Asset balance Jan. 1	Acquisitions	Current retirements	Asset balance Dec. 31	Average balance	Avg. reserve before depreciation	Net depreciable balance	Rate (percent)	Allowable depreciation
1954	....	$12,000	....	$12,000	$6,000	....	$6,000	40	$2,400
1955	$12,000	....	....	12,000	12,000	$2,400	9,600	40	3,840
1956	12,000	....	....	12,000	12,000	6,240	5,760	40	2,304
1957	12,000	....	$2,000	10,000	11,000	7,644	3,356	40	1,342
1958	10,000	....	2,000	8,000	9,000	7,186	1,814	40	726
1959	8,000	....	4,000	4,000	6,000	5,212	788	40	315
1960	4,000	....	2,000	2,000	3,000	2,727	273	40	109
1961	2,000	....	2,000	....	1,000	836	164	....	[1] 164

[1] Balance allowable as depreciation in the year of retirement of the last survivor of the 1954 acquisitions.

DEPRECIATION RESERVE FOR 1954 ACQUISITIONS

Year	Reserve Jan. 1	Current retirements	Salvage realized	Reserve Dec. 31, before depreciation	Average reserve before depreciation	Allowable depreciation	Reserve Dec. 31, after depreciation
1954	....	....	....	....	....	$2,400	$2,400

DEPRECIATION RESERVE FOR 1954 ACQUISITIONS—Continued

Year	Reserve Jan. 1	Current retirements	Salvage realized	Reserve Dec. 31, before depreciation	Average reserve before depreciation	Allowable depreciation	Reserve Dec. 31, after depreciation
1955	$2,400			$2,400	$2,400	3,840	6,240
1956	6,240			6,240	6,240	2,304	8,544
1957	8,544	$2,000	$200	6,744	7,644	1,342	8,086
1958	8,086	2,000	200	6,286	7,186	726	7,012
1959	7,012	4,000	400	3,412	5,212	315	3,727
1960	3,727	2,000		1,727	2,727	109	1,836
1961	1,836	2,000		(164)	836	164	

1959 ACQUISITIONS

Year	Asset balance Jan. 1	Acquisition	Asset balance Dec. 31	Avg. balance	Reserve Dec. 31, before depreciation	Net depreciable balance	Rate percent	Allowable depreciation	Reserve Dec. 31, after depreciation
1959		$10,000	$10,000	$5,000	None	$5,000	40	$2,000	$2,000
1960	$10,000		10,000	10,000	$2,000	8,000	40	3,200	5,200
1961	10,000		10,000	10,000	5,200	4,800	40	1,920	7,120

In the above example, the allowable depreciation on the 1954 acquisitions totals $11,200. This amount when increased by salvage realized in the amount of $800, equals the entire cost or other basis of the 1954 acquisitions ($12,000).

(c) *Change in estimated useful life.* In the declining balance method when a change is justified in the useful life estimated for an account, subsequent computations shall be made as though the revised useful life had been originally estimated. For example, assume that an account has an estimated useful life of ten years and that a declining balance rate of 20 percent is applicable. If, at the end of the sixth year, it is determined that the remaining useful life of the account is six years, computations shall be made as though the estimated useful life was originally determined as twelve years. Accordingly, the applicable depreciation rate will be 16⅔ percent. This rate is thereafter applied to the unrecovered cost or other basis.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6712, 29 FR 3653, Mar. 24, 1964]

§ 1.167(b)–3 Sum of the years-digits method.

(a) *Applied to a single asset*—(1) *General rule.* Under the sum of the years-digits method annual allowances for depreciation are computed by applying changing fractions to the cost or other basis of the property reduced by estimated salvage. The numerator of the fraction changes each year to a number which corresponds to the remaining useful life of the asset (including the year for which the allowance is being computed), and the denominator which remains constant is the sum of all the years digits corresponding to the estimated useful life of the asset. See section 167(c) and §1.167(c)–1 for restrictions on the use of the sum of the years-digits method.

(i) *Illustrations.* Computation of depreciation allowances on a single asset under the sum of the years-digits method is illustrated by the following examples:

Example 1. A new asset having an estimated useful life of five years was acquired on January 1, 1954, for $1,750. The estimated salvage is $250. For a taxpayer filing his returns on a calendar year basis, the annual depreciation allowances are as follows:

Year	Cost or other basis less salvage	Fraction[1]	Allowable depreciation	Depreciation reserve
1954	$1,500	$5/15$	$500	$500
1955	1,500	$4/15$	400	900
1956	1,500	$3/15$	300	1,200
1957	1,500	$2/15$	200	1,400
1958	1,500	$1/15$	100	1,500

Year	Cost or other basis less salvage	Fraction[1]	Allowable depreciation	Depreciation reserve
Unrecovered value (salvage)	....	....	....	$250

[1] The denominator of the fraction is the sum of the digits representing the years of useful life, *i.e.*, 5, 4, 3, 2, and 1, or 15.

Example 2. Assume in connection with an asset acquired in 1954 that three-fourths of a year's depreciation is allowable in that year. The following illustrates a reasonable method of allocating depreciation:

	Depreciation for 12 months	Allowable depreciation		
		1954	1955	1956
1st year	$500	(3/4) $375	(1/4) $125	
2d year	400	....	(3/4) 300	(1/4) $100
3d year	300	....	....	(3/4) 225
Total		375	425	325

(ii) *Change in useful life.* Where in the case of a single asset, a change is justified in the useful life, subsequent computations shall be made as though the remaining useful life at the beginning of the taxable year of change were the useful life of a new asset acquired at such time and with a basis equal to the unrecovered cost or other basis of the asset at that time. For example, assume that a new asset with an estimated useful life of ten years is purchased in 1954. At the time of making out his return for 1959, the taxpayer finds that the asset has a remaining useful life of seven years from January 1, 1959. Depreciation for 1959 should then be computed as though 1959 were the first year of the life of an asset estimated to have a useful life of seven years, and the allowance for 1959 would be 7/28 of the unrecovered cost or other basis of the asset after adjustment for salvage.

(2) *Remaining life*—(i) *Application.* Under the sum of the years-digits method, annual allowances for depreciation may also be computed by applying changing fractions to the unrecovered cost or other basis of the asset reduced by estimated salvage. The numerator of the fraction changes each year to a number which corresponds to the remaining useful life of the asset (including the year for which the allowance is being computed), and the denominator changes each year to a number which represents the sum of the digits corresponding to the years of estimated remaining useful life of the asset. For decimal equivalents of such fractions, see Table I of subdivision (ii) of this subparagraph. For example, a new asset with an estimated useful life of 10 years is purchased January 1, 1954, for $6,000. Assuming a salvage value of $500, the depreciation allowance for 1954 is $1,000 ($5,500×0.1818, the applicable rate from Table I). For 1955, the unrecovered balance is $4,500, and the remaining life is 9 years. The depreciation allowance for 1955 would then be $900 ($4,500×0.2000, the applicable rate from Table I).

(ii) *Table I.* This table shows decimal equivalents of sum of the years-digits fractions corresponding to remaining lives from 1 to 100 years.

NOTE: For determination of decimal equivalents of remaining lives falling between those shown in the above table, the taxpayer may use the next longest life shown in the table, interpolate from the table, or use the following formula from which the table was derived.

$D=2R/(W+2F)(W+1)$

where:

D=Decimal equivalent.
R=Remaining life.
W=Whole number of years in remaining life.
F=Fractional part of a year in remaining life.

If the taxpayer desires to carry his calculations of decimal equivalents to a greater number of decimal places than is provided in the table, he may use the formula. The procedure adopted must be consistently followed thereafter.

(b) *Applied to group, classified, or composite accounts*—(1) *General rule.* The sum of the years-digits method may be applied to group, classified, or composite accounts in accordance with the plan described in subparagraph (2) of this paragraph or in accordance with other plans as explained in subparagraph (3) of this paragraph.

(2) *Remaining life plan.* The remaining life plan as applied to a single asset is described in paragraph (a)(2) of this section. This plan may also be applied to group, classified, or composite accounts. Under this plan the allowance for depreciation is computed by applying changing fractions to the unrecovered cost or other basis of the account reduced by estimated salvage. The numerator of the fraction changes each year to a number which corresponds to the remaining useful life of the account (including the year for which the allowance is being computed), and the denominator changes each year to a number which represents the sum of the years digits corresponding to the years of estimated remaining useful life of the account. Decimal equivalents of such fractions can be obtained by use of Table I under paragraph (a)(2)(ii) of this section. The proper application of this method requires that the estimated remaining useful life of the account be determined each year. This determination, of course, may be made each year by analysis, *i.e.*, by determining the remaining lives for each of the components in the account, and averaging them. The estimated remaining life of any account, however, may also be determined arithmetically. For example, it may be computed by dividing the unrecovered cost or other basis of the account, as computed by straight line depreciation, by the gross cost or other basis of the account, and multiplying the result by the average life of the assets in the account. Salvage value is not a factor for the purpose of determining remaining life. Thus, if a group account with an average life of ten years had at January 1, 1958, a gross asset balance of $12,600 and a depreciation reserve computed on the straight line method of $9,450, the remaining life of the account at January 1, 1958, would be computed as follows:

$12,600 − $9,450÷$12,600×10 years equals 2.50 years.

Example. The use of the sum of the years-digits method with group, classified, or composite accounts under the remaining life plan is illustrated by the following example: A calendar year taxpayer maintains a group account to which a five-year life is applicable. Original investment, additions, retirements, and salvage recoveries are the same as those set forth in example (3) of paragraph (b) of § 1.167(b)–1.

DEPRECIATION COMPUTATIONS ON A GROUP ACCOUNT UNDER REMAINING LIFE PLAN

	1	2	3	4	5	6	7	8	9	10	11	12	13	14

[1] ½ year's amount.

[2] F=Rate based on average service life (0.3333 in this example).

(3) *Other plans for application of the sum of the years-digits method.* Taxpayers who wish to use the sum of the years-digits method in computing depreciation for group, classified, or composite accounts in accordance with a sum of the years digits plan other than the remaining life plan described herein may do so only with the consent of the Commissioner. Request for permission to use plans other than that described shall be addressed to the Commissioner of Internal Revenue, Washington, D.C. 20224.

§ 1.167(b)–4 Other methods.

(a) Under section 167(b)(4) a taxpayer may use any consistent method of computing depreciation, such as the sinking fund method, provided depreciation allowances computed in accordance with such method do not result in accumulated allowances at the end of any taxable year greater than the total of the accumulated allowances which could have resulted from the use of the declining balance method described in section 167(b)(2). This limitation applies only during the first two-thirds of the useful life of the property. For example, an asset costing $1,000 having a useful life of six years may be depreciated under the declining balance method in accordance with § 1.167(b)–2, at a rate of 33⅓ percent. During the first four years or ⅔ of its useful life, maximum depreciation allowances under the declining balance method would be as follows:

	Current depreciation	Accumulated depreciation	Balance
Cost of asset	....	....	$1,000
First year	$333	$333	667
Second year	222	555	445
Third year	148	703	297
Fourth year	99	802	198

An annual allowance computed by any other method under section 167(b)(4) could not exceed $333 for the first year, and at the end of the second year the total allowances for the two years could not exceed $555. Likewise, the total allowances for the three years could not exceed $703 and for the four years could not exceed $802. This limitation would not apply in the fifth and sixth years. See section 167(c) and § 1.167(c)–1 for restriction on the use of certain methods.

(b) It shall be the responsibility of the taxpayer to establish to the satisfaction of the Commissioner that a method of depreciation under section 167(b)(4) is both a reasonable and consistent method and that it does not produce depreciation allowances in excess of the amount permitted under the limitations provided in such section.

§ 1.167(c)–1 Limitations on methods of computing depreciation under section 167(b) (2), (3), and (4).

(a) *In general.* (1) Section 167(c) provides limitations on the use of the declining balance method described in section 167(b)(2), the sum of the years-digits method described in section 167(b)(3), and certain other methods authorized by section 167(b)(4). These methods are applicable only to tangible property having a useful life of three years or more. If construction, reconstruction, or erection by the taxpayer began before January 1, 1954, and was completed after December 31, 1953, these methods apply only to that portion of the basis of the property which is properly attributable to such construction, reconstruction, or erection after December 31, 1953. Property is considered as constructed, reconstructed, or erected by the taxpayer if the work is done for him in accordance with his specifications. The portion of the basis of such property attributable to construction, reconstruction, or erection after December 31, 1953, consists of all costs of the property allocable to the period after December 31, 1953, including the cost or other basis of materials entering into such work. It is not necessary that such materials be acquired after December 31, 1953, or that they be new in use. If construction or erection by the taxpayer began after December 31, 1953, the entire cost or other basis of such construction or erection qualifies for these methods of depreciation. In the case of reconstruction of property, these methods do not apply to any part of the adjusted basis of such property on December 31, 1953. For purposes of this section, construction, reconstruction, or erection by the taxpayer begins when physical work is started on such construction, reconstruction, or erection.

(2) If the property was not constructed, reconstructed, or erected by the taxpayer, these methods apply only if it was acquired after December 31, 1953, and if the original use of the property commences with the taxpayer and commences after December 31, 1953. For the purpose of the preceding sentence, property shall be deemed to be acquired when reduced to physical possession, or control. The term ''original use'' means the first use to which the property is put, whether or not such use corresponds to the use of such property by the taxpayer. For example, a reconditioned or rebuilt machine acquired after December 31, 1953, will not be treated as being put to original use by the taxpayer even though it is put to a different use, nor will a horse acquired for breeding purposes be treated as being put to original use by the taxpayer if prior to the purchase the horse was used for racing purposes. See §§1.167(b)–2, 1.167 (b)–3, and 1.167(b)–4 for application of the various methods.

(3) Assets having an estimated average useful life of less than three years shall not be included in a group, classified, or composite account to which the methods described in §§1.167 (b)–2, 1.167(b)–3, and 1.167(b)–4 are applicable. However, an incidental retirement of an asset from such an account prior to the expiration of a useful life of three years will not prevent the application of these methods to such an account.

(4) See section 381(c)(6) and the regulations thereunder for rules covering the use of depreciation methods by acquiring corporations in the case of certain corporate acquisitions.

(5) See §§1.1502–12(g) and 1.1502–13 for provisions dealing with depreciation of property received by a member of an affiliated group from another member of the group during a consolidated return period.

(6) Except in the cases described in subparagraphs (4) and (5) of this paragraph, the methods of depreciation described in §§1.167(b)–2, 1.167(b–(3), and 1.167(b)–4 are not applicable to property in the hands of a distributee, vendee, transferee, donee, or grantee unless the original use of the property begins with such person and the conditions required by section 167(c) and this section are otherwise met. For example, these methods of depreciation may not be used by a corporation with respect to property which it acquires from an individual or partnership in exchange for its stock. Similarly, if an individual or partnership receives property in a distribution upon dissolution of a corporation, these methods of depreciation may not be used with respect to property so acquired by such individual or partnership. As a further example, these methods of depreciation may not be used by a partnership with respect to contributed property, nor by a partner with respect to partnership property distributed to him. Moreover, where a partnership is entitled to use these depreciation methods, and the optional adjustment to basis of partnership property provided by section 743 is applicable, (i) in the case of an increase in the adjusted basis of the partnership property under such section, the transferee partner with respect to whom such adjustment is applicable shall not be entitled to use such methods with respect to such increase, and (ii) in the case of a decrease in the adjusted basis of the partnership property under such section, the transferee partner with respect to whom such adjustment is applicable shall include in his income an amount equal to the portion of the depreciation deducted by the partnership which is attributable to such decrease.

(b) *Illustrations.* (1) The application of these methods to property constructed, reconstructed, or erected by the taxpayer after December 31, 1953, may be illustrated by the following examples:

Example 1. If a building with a total cost of $100,000 is completed after December 31, 1953, and the portion attributable to construction after December 31, 1953, is determined by engineering estimates or by cost accounting records to be $30,000, the methods referred to in paragraph (a)(1) of this section are applicable only to the $30,000 portion of the total.

Example 2. In 1954, a taxpayer has an old machine with an unrecovered cost of $1,000. If he contracts to have it reconditioned, or reconditions it himself, at a cost of an additional $5,000, only the $5,000 may be depreciated under the methods referred to in paragraph (a)(1) of this section, whether or not the materials used for reconditioning are new in use.

Example 3. A taxpayer who acquired a building in 1940 makes major maintenance or repair expenditures in 1954 of a type which must be capitalized. For these expenditures the taxpayer may use a method of depreciation different from that used on the building (for example, the methods referred to in paragraph (a)(1) of this section) only if he accounts for such expenditures separately from the account which contained the original building. In such case, the unadjusted basis on any parts replaced shall be removed from the asset account and shall be charged to the appropriate depreciation reserve account. In the alternative he may capitalize such expenditures by charging them to the depreciation reserve account for the building.

(2) The application of these methods to property which was not constructed, reconstructed, or erected by the taxpayer but which was acquired after December 31, 1953, may be illustrated by the following examples:

Example 1. A taxpayer contracted in 1953 to purchase a new machine which he acquired in 1954 and put into first use in that year. He may use the methods referred to in paragraph (a)(1) of this section, in recovering the cost of the new machine.

Example 2. A taxpayer instead of reconditioning his old machine buys a "factory reconditioned" machine in 1954 to replace it. He cannot apply the methods referred to in paragraph (a)(1) of this section, to any part of the cost of the reconditioned machine since he is not the first user of the machine.

Example 3. In 1954, a taxpayer buys a house for $20,000 which had been used as a personal residence and thus had not been subject to depreciation allowances. He makes a capital addition of $5,000 and rents the property to another. The taxpayer may use the methods referred to in paragraph (a)(1) of this section, only with respect to the $5,000 cost of the addition.

(c) *Election to use methods.* Subject to the limitations set forth in paragraph (a) of this section, the methods of computing the allowance for depreciation specified in section 167(b) (2), (3), and (4) may be adopted without permission and no formal election is required. In order for a taxpayer to elect to use these methods for any property described in paragraph (a) of this section, he need only compute depreciation thereon under any of these methods for any taxable year ending after December 31, 1953, in which the property may first be depreciated by him. The election with respect to any property shall not be binding with respect to acquisitions of similar property in the same year or subsequent year which are set up in separate accounts. If a taxpayer has filed his return for a taxable year ending after December 31, 1953, for which the return is required to be filed on or before September 15, 1956, an election to compute the depreciation allowance under any of the methods specified in section 167 (b) or a change in such an election may be made in an amended return or claim for refund filed on or before September 15, 1956.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7244, 37 FR 28897, Dec. 30, 1972; T.D. 8560, 59 FR 41674, Aug. 15, 1994; T.D. 8597, 60 FR 36679, July 18, 1995]

§ 1.167(d)–1 Agreement as to useful life and rates of depreciation.

After August 16, 1954, a taxpayer may, for taxable years ending after December 31, 1953, enter into an agreement with respect to the estimated useful life, method and rate of depreciation and treatment of salvage of any property which is subject to the allowance for depreciation. An application for such agreement may be made to the district director for the internal revenue district in which the taxpayer's return is required to be filed. Such application shall be filed in quadruplicate and shall contain in such detail as may be practical the following information:

(a) The character and location of the property.

(b) The original cost or other basis and date of acquisition.

(c) Proper adjustments to the basis including depreciation accumulated to the first taxable year to be covered by the agreement.

(d) Estimated useful life and estimated salvage value.

(e) Method and rate of depreciation.

(f) Any other facts and circumstances pertinent to making a reasonable estimate of the useful life of the property and its salvage value.

The agreement must be in writing and must be signed by the taxpayer and by the district director. The agreement must be signed in quadruplicate, and two of the signed copies will be returned to the taxpayer. The agreement shall set forth its effective date, the estimated remaining useful life, the estimated salvage value, and rate and method of depreciation of the property and the facts and circumstances taken into consideration in adoption of the agreement, and shall relate only to depreciation allowances for such property on and after the effective date of the agreement. Such an agreement shall be binding on both parties until such time as facts and circumstances which were not taken into account in making the agreement are shown to exist. The party wishing to modify or change the agreement shall have the responsibility of establishing the existence of such facts and circumstances. Any change in the useful life or rate specified in such agreement shall be effective only prospectively, that is, it shall be effective beginning with the taxable year in which notice of the intention to change, including facts and circumstances warranting the adjustment of useful life and rate, is sent by the party proposing the change to the other party and is sent by registered mail, if such notice is mailed before September 3, 1958, or is sent by certified mail or registered mail, if such notice is mailed after September 2, 1958. A copy of the agreement (and any modification thereof) shall be filed with the taxpayer's return for the first taxable year which is affected by the agreement (or any modification thereof). A signed copy should be retained with the permanent records of the taxpayer. For rules relating to changes in method of depreciation, see §1.167(e)–1 and section 446 and the regulations thereunder.

§ 1.167(e)–1 Change in method.

(a) *In general.* (1) Any change in the method of computing the depreciation allowances with respect to a particular account (other than a change in method permitted or required by reason of the operation of former section 167(j)(2) and §1.167(j)–3(c)) is a change in method of accounting, and such a change will be permitted only with the consent of the Commissioner, except that certain changes to the straight line method of depreciation will be permitted without consent as provided in former section 167(e)(1), (2), and (3). Except as provided in paragraphs (c) and (d) of this section, a change in method of computing depreciation will be permitted only with respect to all the assets contained in a particular account as defined in §1.167(a)–7. Any change in the percentage of the current straight line rate under the declining balance method, for example, from 200 percent of the straight line rate to any other percent of the straight line rate, or any change in the interest factor used in connection with a compound interest or sinking fund method, will constitute a change in method of depreciation. Any request for a change in method of depreciation shall be made in accordance with section 446(e) and the regulations under section 446(e). For rules covering the use of depreciation methods by acquiring corporations in the case of certain corporate acquisitions, see section 381(c)(6) and the regulations under section 381(c)(6).

(2) Paragraphs (b), (c), and (d) of this section apply to property for which depreciation is determined under section 167 (other than under section 168, section 1400I, section 1400L(c), under section 168 prior to its amendment by the Tax Reform Act of 1986 (100 Stat. 2121), or under an additional first year depreciation deduction provision (for example, section 168(k), 1400L(b), or 1400N(d))) of the Internal Revenue Code.

(b) *Declining balance to straight line.* In the case of an account to which the method described in section 167(b)(2) is applicable, a taxpayer may change without the consent of the Commissioner from the declining balance method of depreciation to the straight line method at any time during the useful life of the property under the following conditions. Such a change may not be made if a provision prohibiting such a change is contained in an agreement under section 167(d). When the change is made, the unrecovered cost or other basis (less a reasonable estimate for salvage) shall be recovered through annual allowances over the estimated remaining useful life determined in accordance with the circumstances existing at the time. With respect to any account, this change will be permitted only if applied to all the assets in the account as defined in

§ 1.167(a)–7. If the method of depreciation described in section 167(b)(2) (the declining balance method of depreciation using a rate not exceeding 200 percent of the straight line rate) is an acceptable method of depreciation with respect to a particular account, the taxpayer may elect under this paragraph to change to the straight line method of depreciation even if with respect to that particular account the declining balance method is permitted under a provision other than section 167(b)(2). Thus, for example, in the case of section 1250 property to which section 167(j)(1) is applicable, section 167(b) does not apply, but the declining balance method of depreciation using 150 percent of the straight line rate is an acceptable method of depreciation under section 167(j)(1)(B). Accordingly, the taxpayer may elect under this paragraph to change to the straight line method of depreciation with respect to such property. Similarly, if the taxpayer acquired used property before July 25, 1969, and adopted the 150 percent declining balance method of depreciation permitted with respect to such property under § 1.167(b)–0(b), the taxpayer may elect under this paragraph to change to the straight line method of depreciation with respect to such property. The taxpayer shall furnish a statement with respect to the property which is the subject of the change showing the date of acquisition, cost or other basis, amounts recovered through depreciation and other allowances, the estimated salvage value, the character of the property, the remaining useful life of the property, and such other information as may be required. The statement shall be attached to the taxpayer's return for the taxable year in which the change is made. A change to the straight line method must be adhered to for the entire taxable year of the change and for all subsequent taxable years unless, with the consent of the Commissioner, a change to another method is permitted.

(c) *Change with respect to section 1245 property.* (1) In respect of his first taxable year beginning after December 31, 1962, a taxpayer may elect, without the consent of the Commissioner, to change the method of depreciation of section 1245 property (as defined in section 1245(a)(3)) from any declining balance method or sum of the years-digits method to the straight line method. With respect to any account (as defined in § 1.167(a)–7), this change may be made notwithstanding any provision to the contrary in an agreement under section 167(d), but such change shall constitute (as of the first day of such taxable year) a termination of such agreement as to all property in such account. With respect to any account, this change will be permitted only if applied to all the section 1245 property in the account. The election shall be made by a statement on, or attached to, the return for such taxable year filed on or before the last day prescribed by law, including any extensions thereof, for filing such return.

(2) When an election under this paragraph is made in respect of section 1245 property in an account, the unrecovered cost or other basis (less a reasonable estimate for salvage) of all the section 1245 property in the account shall be recovered through annual allowances over the estimated remaining useful life determined in accordance with the circumstances existing at that time. If there is other property in such account, the other property shall be placed in a separate account and depreciated by using the same method as was used before the change permitted by this paragraph, but the estimated useful life of such property shall be redetermined in accordance with § 1.167(b)–2, or 1.167(b)–3, whichever is applicable. The taxpayer shall maintain records which permit specific identification of the section 1245 property in the account with respect to which the election is made, and any other property in such account. The records shall also show for all the property in the account the date of acquisition, cost or other basis, amounts recovered through depreciation and other allowances, the estimated salvage value, the character of the property, and the remaining useful life of the property. A change to the straight line method under this paragraph must be adhered to for the entire taxable year of the change and for all subsequent taxable years unless, with the consent of the Commissioner, a change to another method is permitted.

(d) *Change with respect to section 1250 property.* (1) In respect of his first taxable year beginning after July 24, 1969, a taxpayer may elect, without the consent of the Commissioner, to change the method of depreciation of section 1250 property (as defined in section 1250(c)) from any declining balance method or sum of the years-digits method to the straight line method. With respect to any account (as defined in §1.167(a)–7) this change may be made notwithstanding any provision to the contrary in an agreement under section 167(d), but such change will constitute (as of the first day of such taxable year) a termination of such agreement as to all property in such account. With respect to any account, this change will be permitted only if applied to all the section 1250 property in the account. The election shall be made by a statement on, or attached to, the return for such taxable year filed on or before the last day prescribed by law, including extensions thereof, for filing such return.

(2) When an election under this paragraph is made in respect of section 1250 property in an account, the unrecovered cost or other basis (less a reasonable estimate for salvage) of all the section 1250 property in the account shall be recovered through annual allowances over the estimated remaining useful life determined in accordance with the circumstances existing at that time. If there is other property in such account, the other property shall be placed in a separate account and depreciated by using the same method as was used before the change permitted by this paragraph, but the estimated useful life of such property shall be redetermined in accordance with §1.167(b)–2 or §1.167(b)–3, whichever is applicable. The taxpayer shall maintain records which permit specific identification of the section 1250 property in the account with respect to which the election is made and any other property in such account. The records shall also show for all the property in the account the date of the acquisition, cost or other basis, amounts recovered through depreciation and other allowances, the estimated salvage value, the character of the property, and the estimated remaining useful life of the property. A change to the straight line method under this paragraph must be adhered to for the entire taxable year of the change and for all subsequent taxable years unless, with the consent of the Commissioner, a change to another method is permitted.

(e) *Effective date.* This section applies on or after December 30, 2003. For the applicability of regulations before December 30, 2003, see §1.167(e)–1 in effect prior to December 30, 2003 (§1.167(e)–1 as contained in 26 CFR part 1 edition revised as of April 1, 2003).

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6832, 30 FR 8573, July 7, 1965; T.D. 7166, 37 FR 5245, Mar. 11, 1972; T.D. 9105, 69 FR 7, Jan. 2, 2004; T.D. 9307, 71 FR 78068, Dec. 28, 2006]

§ 1.167(f)–1 Reduction of salvage value taken into account for certain personal property.

(a) *In general.* For taxable years beginning after December 31, 1961, and ending after October 16, 1962, a taxpayer may reduce the amount taken into account as salvage value in computing the allowance for depreciation under section 167(a) with respect to ''personal property'' as defined in section 167(f)(2) and paragraph (b) of this section. The reduction may be made in an amount which does not exceed 10 percent of the basis of the property for determining depreciation, as of the time as of which salvage value is required to be determined (or when salvage value is redetermined), taking into account all adjustments under section 1016 other than (1) the adjustment under section 1016(a)(2) for depreciation allowed or allowable to the taxpayer, and (2) the adjustment under section 1016(a)(19) for a credit earned by the taxpayer under section 38, to the extent such adjustment is reflected in the basis for depreciation. See paragraph (c) of §1.167(a)–1 for the definition of salvage value, the time for making the determination, the redetermination of salvage value, and the general rules with respect to the treatment of salvage value. See also section 167(g) and §1.167(g)–1 for basis for depreciation. A reduction of the amount taken into account as salvage value with respect to any property shall not be binding with respect to other property. In no event shall an asset (or an account) be depreciated below a reasonable salvage value after taking into account the reduction in salvage value permitted by section 167(f) and this section.

(b) *Definitions and special rules.* The following definitions and special rules apply for purposes of section 167(f) and this section.

(1) *Personal property.* The term ''personal property'' shall include only depreciable—

(i) Tangible personal property (as defined in section 48 and the regulations thereunder) and

(ii) Intangible personal property

which has an estimated useful life (determined at the time of acquisition) of 3 years or more and which is acquired after October 16, 1962. Such term shall not include livestock. The term ''livestock'' includes horses, cattle, hogs, sheep, goats, and mink and other furbearing animals, irrespective of the use to which they are put or the purpose for which they are held. The original use of the property need not commence with the taxpayer so long as he acquired it after October 16, 1962; thus, the property may be new or used. For purposes of determining the estimated useful life, the provisions of paragraph (b) of §1.167(a)–1 shall be applied. For rules determining when property is acquired, see subparagraph (2) of this paragraph. For purposes of determining the types of intangible personal property which are subject to the allowance for depreciation, see §1.167(a)–3.

(2) *Acquired.* In determining whether property is acquired after October 16, 1962, property shall be deemed to be acquired when reduced to physical possession, or control. Property which has not been used in the taxpayer's trade or business or held for the production of income and which is thereafter converted by the taxpayer to such use shall be deemed to be acquired on the date of such conversion. In addition, property shall be deemed to be acquired if constructed, reconstructed, or erected by the taxpayer. If construction, reconstruction, or erection by the taxpayer began before October 17, 1962, and was completed after October 16, 1962, section 167(f) and this section apply only to that portion of the basis of the property which is properly attributable to such construction, reconstruction, or erection after October 16, 1962. Property is considered as constructed, reconstructed, or erected by the taxpayer if the work is done for him in accordance with his specifications. The portion of the basis of such property attributable to construction, reconstruction, or erection after October 16, 1962, consists of all costs of the property allocable to the period after October 16, 1962, including the cost or other basis of materials entering into such work. It is not necessary that such materials be acquired after October 16, 1962, or that they be new in use. If construction or erection by the taxpayer began after October 16, 1962, the entire cost or other basis of such construction or erection qualifies for the reduction provided for by section 167(f) and this section. In the case of reconstruction of property, section 167(f) and this section do not apply to any part of the adjusted basis of such property on October 16, 1962. For purposes of this section, construction, reconstruction, or erection by the taxpayer begins when physical work is started on such construction, reconstruction, or erection.

(c) *Illustrations.* The provisions of paragraphs (a) and (b) of this section may be illustrated by the following examples:

Example 1. Taxpayer A purchases a new asset for use in his business on January 1, 1963, for $10,000. The asset qualifies for the investment credit under section 38 and for the additional first-year depreciation allowance under section 179. A is entitled to an investment credit of $700 (7%×$10,000) and elects to take an additional first-year depreciation allowance of $2,000 (20%×$10,000). The basis for depreciation (determined in accordance with the provisions of section 167(g) and §1.167(g)–1) is computed as follows:

Purchase price		$10,000
Less: Adjustment required for taxable years beginning before Jan. 1, 1964, under section 1016(a)(19), for the investment credit	$700	
Adjustment required under section 1016(a)(2) for the additional first-year depreciation allowance	2,000	
	2,700	
Basis for depreciation for the taxable year 1963		7,300

However, the basis of the property for determining depreciation as of the time as of which salvage value is required to be determined is $10,000, the purchase price of the property. A files his income tax returns on a calendar year basis and uses the straight line method of depreciation. A estimates that he will use the asset in his business for 10 years after which it will have a salvage value of $500, which is less than $1,000 (10%×$10,000, the basis of the property for determining depreciation as of the time as of which salvage value is required to be determined). For the taxable year 1963 A may deduct $730 as the depreciation allowance. As of January 1, 1964, the basis of the asset is increased by $700 in accordance with paragraph (d) of §1.48–7. In computing his total depreciation allowance on the asset, A may reduce the amount taken into account as salvage value to zero and may claim depreciation deductions (including the additional first-year depreciation allowance) totaling $10,000. See paragraph (d) of §1.48–7 for the computation of depreciation for taxable years beginning after December 31, 1963, where there is an increase in basis of property subject to the investment credit.

Example 2. Assume the same facts as in example (1) except that A in a subsequent taxable year redetermines the estimate of the useful life of the asset and at the same time also redetermines the estimate of salvage value. Assume also that at such time the only reductions reflected in the basis are for depreciation allowed or allowable. Accordingly, the reduction under section 167(f) and this section will be computed with regard to the purchase price and not the unrecovered basis for depreciation at the time of the redetermination.

Example 3. Assume the same facts as in example (1) except that A estimates that the asset will have a salvage value of $1,200 at the end of its useful life. In computing his depreciation for the asset, A may reduce the amount to be taken into account as salvage value to $200 ($1,200−$1,000). Accordingly, A may claim depreciation deductions (including the additional first-year depreciation allowance) totaling $9,800, *i.e.*, the purchase price of the property ($10,000) less the amount taken into account as salvage value ($200).

Example 4. Assume the same facts as in example (1) except that the taxpayer had taken into account salvage value of only $200 but that the estimated salvage value had actually been $700. The amount of salvage value taken into account by the taxpayer is permissible since the reduction of salvage value by $500 ($700−$200) would be within the limit provided for in section 167 (f), *i.e.*, $1,000 (10%×$10,000).

Example 5. On January 1, 1963, taxpayer B, a taxicab operator, traded his old taxicab plus cash for a new one, which had an estimated useful life of three years, in a transaction qualifying as a nontaxable exchange. The old taxicab had an adjusted basis of $2,500. B was allowed $3,000 for his old taxicab and paid $1,000 in cash. The basis of the new taxicab for determining depreciation (as determined under section 167(g) and §1.167(g)–1) is the adjusted basis of the old taxicab at the time of trade-in ($2,500) plus the additional cash paid out ($1,000), or $3,500. In computing his depreciation allowance on the new taxicab, B may reduce the amount taken into account as salvage value by $350 (10% of $3,500).

Example 6. Taxpayer C purchases a new asset for use in his business on January 1, 1963, for $10,000. At the time of purchase, the asset has an estimated useful life of 10 years and an estimated salvage value of $1,500. C elects to compute his depreciation allowance for the asset by the declining balance method of depreciation, using a rate of 20% which is twice the normal straight line rate of 10% (without adjustment for salvage value). C files his income tax returns on a calendar year basis. In computing his depreciation allowance for the year 1966, C changes his method of determining the depreciation allowance for the asset from the declining balance method to the straight line method (in which salvage value is accounted for in determining the annual depreciation allowances) in accordance with the provisions of section 167(e) and paragraph (b) of §1.167(e)–1. He also wishes to reduce the amount of salvage value taken into account in accordance with the provisions of section 167(f) and this section. At the close of the year 1966, the only reductions reflected in the basis of the asset are for depreciation allowances. Thus, C may reduce the amount of salvage value taken into account by $1,000 (10%×$10,000, the basis of the asset when it was acquired), and, therefore, will account for salvage value of only $500 in computing his depreciation allowance for the asset in 1966 and subsequent years.

Example 7. Taxpayer D purchases a station wagon for his personal use on January 1, 1962, for $4,500. On January 1, 1963, D converts the use of the station wagon to his business, and at that time it has an estimated useful life of 4 years, an estimated salvage value of $500, and a basis of $3,000 (as determined under section 167 (g) and §1.167 (g)–1). Thus, for purposes of section 167 (f) and this section, D is deemed to have acquired the station wagon on January 1, 1963. D elects the straight line method of depreciation in computing the depreciation allowance for the station wagon and also wishes to reduce the amount of salvage value taken into account in accordance with the provisions of section 167(f) and this section. Accordingly, D may reduce the amount of salvage value taken into account by $300 (10% of $3,000). D files his income tax returns on a calendar year basis. His depreciation allowance for the year 1963 would be computed as follows:

Basis for depreciation		$3,000
Less:		
Salvage value	$500	
Reduction permitted by section 167(f)	300	
		200
Amount to be depreciated over the useful life		2,800

D's depreciation allowance on the station wagon for the year 1963 would be $700 ($2,800 divided by 4, the remaining useful life).

[T.D. 6712, 29 FR 3654, Mar. 24, 1964, as amended by T.D. 6838, 30 FR 9064, July 20, 1965]

§ 1.167(g)–1 Basis for depreciation.

The basis upon which the allowance for depreciation is to be computed with respect to any property shall be the adjusted basis provided in section 1011 for the purpose of determining gain on the sale or other disposition of such property. In the case of property which has not been used in the trade or business or held for the production of income and which is thereafter converted to such use, the fair market value on the date of such conversion, if less than the adjusted basis of the property at that time, is the basis for computing depreciation.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960. Redesignated, T.D. 6712, 29 FR 3653, Mar. 24, 1964]

§ 1.167(h)–1 Life tenants and beneficiaries of trusts and estates.

(a) *Life tenants.* In the case of property held by one person for life with remainder to another person, the deduction for depreciation shall be computed as if the life tenant were the absolute owner of the property so that he will be entitled to the deduction during his life, and thereafter the deduction, if any, shall be allowed to the remainderman.

(b) *Trusts.* If property is held in trust, the allowable deduction is to be apportioned between the income beneficiaries and the trustee on the basis of the trust income allocable to each, unless the governing instrument (or local law) requires or permits the trustee to maintain a reserve for depreciation in any amount. In the latter case, the deduction is first allocated to the trustee to the extent that income is set aside for a depreciation reserve, and any part of the deduction in excess of the income set aside for the reserve shall be apportioned between the income beneficiaries and the trustee on the basis of the trust income (in excess of the income set aside for the reserve) allocable to each. For example:

(1) If under the trust instrument or local law the income of a trust computed without regard to depreciation is to be distributed to a named beneficiary, the beneficiary is entitled to the deduction to the exclusion of the trustee.

(2) If under the trust instrument or local law the income of a trust is to be distributed to a named beneficiary, but the trustee is directed to maintain a reserve for depreciation in any amount, the deduction is allowed to the trustee (except to the extent that income set aside for the reserve is less than the allowable deduction). The same result would follow if the trustee sets aside income for a depreciation reserve pursuant to discretionary authority to do so in the governing instrument.

No effect shall be given to any allocation of the depreciation deduction which gives any beneficiary or the trustee a share of such deduction greater than his pro rata share of the trust income, irrespective of any provisions in the trust instrument except as otherwise provided in this paragraph when the trust instrument or local law requires or permits the trustee to maintain a reserve for depreciation.

(c) *Estates.* In the case of an estate the allowable deduction shall be apportioned between the estate and the heirs legatees, and devisees on the basis of income of the estate which is allocable to each.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960. Redesignated, T.D. 6712, 29 FR 3653, Mar. 24, 1964]

§ 1.167(i)–1 Depreciation of improvements in the case of mines, etc.

Property used in the trade or business or held for the production of income which is subject to the allowance for depreciation provided in section 611 shall be treated for all purposes of the Code as if it were property subject to the allowance for depreciation under section 167. The preceding sentence shall not limit the allowance for depreciation otherwise allowable under section 611.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960. Redesignated, T.D. 6712, 29 FR 3653, Mar. 24, 1964]

§ 1.167(l)–1 Limitations on reasonable allowance in case of property of certain public utilities.

(a) *In general*—(1) *Scope*. Section 167(l) in general provides limitations on the use of certain methods of computing a reasonable allowance for depreciation under section 167(a) with respect to ''public utility property'' (see paragraph (b) of this section) for all taxable years for which a Federal income tax return was not filed before August 1, 1969. The limitations are set forth in paragraph (c) of this section for ''pre-1970 public utility property'' and in paragraph (d) of this section for ''post-1969 public utility property.'' Under section 167(l), a taxpayer may always use a straight line method (or other ''subsection (l) method'' as defined in paragraph (f) of this section). In general, the use of a method of depreciation other than a subsection (l) method is not prohibited by section 167(l) for any taxpayer if the taxpayer uses a ''normalization method of regulated accounting'' (described in paragraph (h) of this section). In certain cases, the use of a method of depreciation other than a subsection (l) method is not prohibited by section 167(l) if the taxpayer used a ''flow-through method of regulated accounting'' described in paragraph (i) of this section) for its ''July 1969 regulated accounting period'' (described in paragraph (g) of this section) whether or not the taxpayer uses either a normalization or a flow-through method of regulated accounting after its July 1969 regulated accounting period. However, in no event may a method of depreciation other than a subsection (l) method be used in the case of pre-1970 public utility property unless such method of depreciation is the ''applicable 1968 method'' (within the meaning of paragraph (e) of this section). The normalization requirements of section 167(l) with respect to public utility property defined in section 167(l)(3)(A) pertain only to the deferral of Federal income tax liability resulting from the use of an accelerated method of depreciation for computing the allowance for depreciation under section 167 and the use of straight line depreciation for computing tax expense and depreciation expense for purposes of establishing cost of services and for reflecting operating results in regulated books of account. Regulations under section 167(l) do not pertain to other book-tax timing differences with respect to State income taxes, F.I.C.A. taxes, construction costs, or any other taxes and items. The rules provided in paragraph (h)(6) of this section are to insure that the same time period is used to determine the deferred tax reserve amount resulting from the use of an accelerated method of depreciation for cost of service purposes and the reserve amount that may be excluded from the rate base or included in no-cost capital in determining such cost of services. The formula provided in paragraph (h)(6)(ii) of this section is to be used in conjunction with the method of accounting for the reserve for deferred taxes (otherwise proper under paragraph (h)(2) of this section) in accordance with the accounting requirements prescribed or approved, if applicable, by the regulatory body having jurisdiction over the taxpayer's regulated books of account. The formula provides a method to determine the period of time during which the taxpayer will be treated as having received amounts credited or charged to the reserve account so that the disallowance of earnings with respect to such amounts through rate base exclusion or treatment as no-cost capital will take into account the factor of time for which such amounts are held by the taxpayer. The formula serves to limit the amount of such disallowance.

(2) *Methods of depreciation*. For purposes of section 167(l), in the case of a declining balance method each different uniform rate applied to the unrecovered cost or other basis of the property is a different method of depreciation. For purposes of section 167(l), a change in a uniform rate of depreciation due to a change in the useful life of the property or a change in the taxpayer's unrecovered cost or other basis for the property is not a change in the method of depreciation. The use of

''guideline lives'' or ''class lives'' for Federal income tax purposes and different lives on the taxpayer's regulated books of account is not treated for purposes of section 167(l) as a different method of depreciation. Further, the use of an unrecovered cost or other basis or salvage value for Federal income tax purposes different from the basis or salvage value used on the taxpayer's regulated books of account is not treated as a different method of depreciation.

(3) *Application of certain other provisions to public utility property.* For rules with respect to application of the investment credit to public utility property, see section 46(e). For rules with respect to the application of the class life asset depreciation range system, including the treatment of the use of ''class lives'' for Federal income tax purposes and different lives on the taxpayer's regulated books of account, see § 1.167(a)–11 and § 1.167(a)–12.

(4) *Effect on agreements under section 167(d).* If the taxpayer has entered into an agreement under section 167(d) as to any public utility property and such agreement requires the use of a method of depreciation prohibited by section 167(l), such agreement shall terminate as to such property. The termination, in accordance with this subparagraph, shall not affect any other property (whether or not public utility property) covered by the agreement.

(5) *Effect of change in method of depreciation.* If, because the method of depreciation used by the taxpayer with respect to public utility property is prohibited by section 167(l), the taxpayer changes to a method of depreciation not prohibited by section 167(l), then when the change is made the unrecovered cost or other basis shall be recovered through annual allowances over the estimated remaining useful life determined in accordance with the circumstances existing at that time.

(b) *Public utility property*—(1) *In general.* Under section 167(l)(3)(A), property is ''public utility property'' during any period in which it is used predominantly in a ''section 167(l) public utility activity''. The term ''section 167(l) public utility activity'' means the trade or business of the furnishing or sale of—

(i) Electrical energy, water, or sewage disposal services,

(ii) Gas or steam through a local distribution system,

(iii) Telephone services,

(iv) Other communication services (whether or not telephone services) if furnished or sold by the Communications Satellite Corporation for purposes authorized by the Communications Satellite Act of 1962 (47 U.S.C. 701), or

(v) Transportation of gas or steam by pipeline,

if the rates for such furnishing or sale, as the case may be, are regulated, *i.e.*, have been established or approved by a regulatory body described in section 167(l)(3)(A). The term ''regulatory body described in section 167(l)(3)(A)'' means a State (including the District of Columbia) or political subdivision thereof, any agency or instrumentality of the United States, or a public service or public utility commission or other body of any State or political subdivision thereof similar to such a commission. The term ''established or approved'' includes the filing of a schedule of rates with a regulatory body which has the power to approve such rates, even though such body has taken no action on the filed schedule or generally leaves undisturbed rates filed by the taxpayer involved.

(2) *Classification of property.* If property is not used solely in a section 167(l) public utility activity, such property shall be public utility property if its predominant use is in a section 167(l) public utility activity. The predominant use of property for any period shall be determined by reference to the proper accounts to which expenditures for such property are chargeable under the system of regulated accounts required to be used for the period for which the determination is made and in accordance with the principles of § 1.46–3(g)(4) (relating to credit for investment in certain depreciable property). Thus, for example, for purposes of determining whether property is used predominantly in the trade or business of the furnishing or sale of transportation of gas by pipeline, or furnishing or sale of gas through a local distribution system, or both, the rules prescribed in § 1.46–3(g)(4) apply,

except that accounts 365 through 371, inclusive (Transmission Plant), shall be added to the accounts enumerated in subdivision (i) of such paragraph (g)(4).

(c) *Pre-1970 public utility property*—(1) *Definition.* (i) Under section 167(l)(3)(B), the term ''pre-1970 public utility property'' means property which was public utility property at any time before January 1, 1970. If a taxpayer acquires pre-1970 public utility property, such property shall be pre-1970 public utility property in the hands of the taxpayer even though such property may have been acquired by the taxpayer in an arm's-length cash sale at fair market value or in a tax-free exchange. Thus, for example, if corporation X which is a member of the same controlled group of corporations (within the meaning of section 1563(a)) as corporation Y sells pre-1970 public utility property to Y, such property is pre-1970 public utility property in the hands of Y. The result would be the same if X and Y were not members of the same controlled group of corporations.

(ii) If the basis of public utility property acquired by the taxpayer in a transaction is determined in whole or in part by reference to the basis of any of the taxpayer's pre-1970 public utility property by reason of the application of any provision of the code, and if immediately after the transaction the adjusted basis of the property acquired is less than 200 percent of the adjusted basis of such pre-1970 public utility property immediately before the transaction, the property acquired is pre-1970 public utility property.

(2) *Methods of depreciation not prohibited.* Under section 167(l)(1), in the case of pre-1970 public utility property, the term ''reasonable allowance'' as used in section 167(a) means, for a taxable year for which a Federal income tax return was not filed before August 1, 1969, and in which such property is public utility property, an allowance (allowable without regard to section 167(l)) computed under—

(i) A subsection (l) method, or

(ii) The applicable 1968 method (other than a subsection (l) method) used by the taxpayer for such property, but only if—

(*a*) The taxpayer uses in respect of such taxable year a normalization method of regulated accounting for such property,

(*b*) The taxpayer used a flow-through method of regulated accounting for such property for its July 1969 regulated accounting period, or

(*c*) The taxpayer's first regulated accounting period with respect to such property is after the taxpayer's July 1969 regulated accounting period and the taxpayer used a flow-through method of regulated accounting for its July 1969 regulated accounting period for public utility property of the same kind (or if there is no property of the same kind, property of the most similar kind) most recently placed in service. See paragraph (e)(5) of this section for determination of same (or similar) kind.

(3) *Flow-through method of regulated accounting in certain cases.* See paragraph (e)(6) of this section for treatment of certain taxpayers with pending applications for change in method of accounting as being deemed to have used a flow-through method of regulated accounting for the July 1969 regulated accounting period.

(4) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. Corporation X, a calendar-year taxpayer subject to the jurisdiction of a regulatory body described in section 167(l)(3)(A), used the straight line method of depreciation (a subsection (l) method) for all of its public utility property for which depreciation was allowable on its Federal income tax return for 1967 (the latest taxable year for which X, prior to August 1, 1969, filed a return). Assume that under paragraph (e) of this section, X's applicable 1968 method is a subsection (l) method with respect to all of its public utility property. Thus, with respect to its pre-1970 public utility property, X may only use a straight line method (or any other subsection (l) method) of depreciation for all taxable years after 1967.

Example 2. Corporation Y, a calendar-year taxpayer subject to the jurisdiction of the Federal Power Commission, is engaged exclusively in the transportation of gas by pipeline. On its Federal income tax return for 1967 (the latest taxable year for which Y, prior to August 1, 1969, filed a return), Y used the declining balance method of depreciation using a rate of 150 percent of the straightline rate for all of its nonsection 1250 public utility property with respect to which depreciation was allowable. Assume that with respect to all of such property, Y's applicable 1968 method under paragraph (e) of this section is such 150 percent declining balance method. Assume that Y used a normalization method of regulated accounting for all relevant regulated accounting periods. If Y continues to use a normalization method of regulated accounting, Y may compute its reasonable allowance for purposes of section 167(a) using such 150 percent declining balance method for its nonsection 1250 pre-1970 public utility property for all taxable years beginning with 1968, provided the use of such method is allowable without regard to section 167(l). Y may also use a subsection (l) method for any of such pre-1970 public utility property for all taxable years beginning after 1967. However, because each different uniform rate applied to the basis of the property is a different method of depreciation, Y may not use a declining balance method of depreciation using a rate of twice the straight line rate for any of such pre-1970 public utility property for any taxable year beginning after 1967.

Example 3. Assume the same facts as in example (2) except that with respect to all of its nonsection 1250 pre-1970 public utility property accounted for in its July 1969 regulated accounting period Y used a flow-through method of regulated accounting for such period. Assume further that such property is the property on the basis of which the applicable 1968 method is established for pre-1970 public utility property of the same kind, but having a first regulated accounting period after the taxpayer's July 1969 regulated accounting period. Beginning with 1968, with respect to such property Y may compute its reasonable allowance for purposes of section 167(a) using the declining balance method of depreciation and a rate of 150 percent of the straight line rate, whether it uses a normalization or flow-through method of regulated accounting after its July 1969 regulated accounting period, provided the use of such method is allowable without regard to section 167(l).

(d) *Post-1969 public utility property*—(1) *In general.* Under section 167(l)(3)(C), the term "post-1969 public utility property" means any public utility property which is not pre-1970 public utility property.

(2) *Methods of depreciation not prohibited.* Under section 167(l)(2), in the case of post-1969 public utility property, the term "reasonable allowance" as used in section 167(a) means, for a taxable year, an allowance (allowable without regard to section 167(l)) computed under—

(i) A subsection (l) method,

(ii) A method of depreciation otherwise allowable under section 167 if, with respect to the property, the taxpayer uses in respect of such taxable year a normalization method of regulated accounting, or

(iii) The taxpayer's applicable 1968 method (other than a subsection (l) method) with respect to the property in question, if the taxpayer used a flow-through method of regulated accounting for its July 1969 regulated accounting period for the property of the same (or similar) kind most recently placed in service, provided that the property in question is not property to which an election under section 167(l)(4)(A) applies. See §1.167(l)(2) for rules with respect to an election under section 167(l)(4)(A). See paragraph (e)(5) of this section for definition of same (or similar) kind.

(3) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. Corporation X is engaged exclusively in the trade or business of the transportation of gas by pipeline and is subject to the jurisdiction of the Federal Power Commission. With respect to all its public utility property, X's applicable 1968 method (as determined under paragraph (e) of this section) is the straight line method of depreciation. X may determine its reasonable allowance for depreciation under section 167(a) with respect to its post-1969 public utility property under a straight line method (or other subsection (l) method) or, if X uses a normalization method of regulated accounting, any other method of depreciation, provided that the use of such other method is allowable under section 167 without regard to section 167(l).

Example 2. Assume the same facts as in example (1) except that with respect to all of X's post-1969 public utility property the applicable 1968 method (as determined under paragraph (e) of this section) is the declining balance method using a rate of 150 percent of the straight line rate. Assume further that all of X's pre-1970 public utility property was accounted for in its July 1969 regulated accounting period, and that X used a flow-through method of regulated accounting for such period. X may determine its reasonable allowance for depreciation under section 167 with respect to its post-1969 public utility property by using the straight line method of depreciation (or any other subsection (l) method), by using any method otherwise allowable under section 167 (such as a declining balance method) if X uses a normalization method of regulated accounting, or, by using the declining balance method using a rate of 150 percent of the straight line rate, whether or not X uses a normalization or a flow-through method of regulated accounting.

(e) *Applicable 1968 method*—(1) *In general*. Under section 167(l)(3)(D), except as provided in subparagraphs (3) and (4) of this paragraph, the term ''applicable 1968 method'' means with respect to any public utility property—

(i) The method of depreciation properly used by the taxpayer in its Federal income tax return with respect to such property for the latest taxable year for which a return was filed before August 1, 1969,

(ii) If subdivision (i) of this subparagraph does not apply, the method of depreciation properly used by the taxpayer in its Federal income tax return for the latest taxable year for which a return was filed before August 1, 1969, with respect to public utility property of the same kind (or if there is no property of the same kind, property of the most similar kind) most recently placed in service before the end of such latest taxable year, or

(iii) If neither subdivision (i) nor (ii) of this subparagraph applies, a subsection (l) method.

If, on or after August 1, 1969, the taxpayer files an amended return for the taxable year referred to in subdivisions (i) and (ii) of this subparagraph, such amended return shall not be taken into consideration in determining the applicable 1968 method. The term ''applicable 1968 method'' if such new method results to any public utility property, for the year of change and subsequent years, a method of depreciation otherwise allowable under section 167 to which the taxpayer changes from an applicable 1968 method if such new method results in a lesser allowance for depreciation for such property under section 167 in the year of change and the taxpayer secures the Commissioner's consent to the change in accordance with the procedures of section 446(e) and §1.446–1.

(2) *Placed in service*. For purposes of this section, property is placed in service on the date on which the period for depreciation begins under section 167. See, for example, §1.167(a)–10(b) and §1.167(a)–11(c)(2). If under an averaging convention property which is placed in service (as defined in §1.46–3(d)(ii)) by the taxpayer on different dates is treated as placed in service on the same date, then for purposes of section 167(l) the property shall be treated as having been placed in service on the date the period for depreciation with respect to such property would begin under section 167 absent such averaging convention. Thus, for example, if, except for the fact that the averaging convention used assumes that all additions and retirements made during the first half of the year were made on the first day of the year, the period of depreciation for two items of public utility property would begin on January 10 and March 15, respectively, then for purposes of determining the property of the same (or similar) kind most recently placed in service, such items of property shall be treated as placed in service on January 10 and March 15, respectively.

(3) *Certain section 1250 property*. If a taxpayer is required under section 167(j) to use a method of depreciation other than its applicable 1968 method with respect to any section 1250 property, the term ''applicable 1968 method'' means the method of depreciation allowable under section 167(j) which is the most nearly comparable method to the applicable 1968 method determined under subparagraph (1) of this paragraph. For example, if the applicable 1968 method on new section 1250 property is the declining balance method using 200 percent of the straight line rate, the most nearly comparable method allowable for new section 1250 property under section 167(j) would be the declining balance method using 150 percent of the straight line rate. If the applicable 1968 method determined under subparagraph (1) of this paragraph is the sum of the years-digits method, the term ''most nearly comparable method'' refers to any method of depreciation allowable under section 167(j).

(4) *Applicable 1968 method in certain cases*. (i)(*a*) Under section 167(l)(3)(E), if the taxpayer evidenced within the time

and manner specified in (*b*) of this subdivision (i) the intent to use a method of depreciation under section 167 (other than its applicable 1968 method as determined under subparagraph (1) or (3) of this paragraph or a subsection (l) method) with respect to any public utility property, such method of depreciation shall be deemed to be the taxpayer's applicable 1968 method with respect to such public utility property and public utility property of the same (or most similar) kind subsequently placed in service.

(*b*) Under this subdivision (i), the intent to use a method of depreciation under section 167 is evidenced—

(*1*) By a timely application for permission for a change in method of accounting filed by the taxpayer before August 1, 1969, or

(*2*) By the use of such method of depreciation in the computation by the taxpayer of its tax expense for purposes of reflecting operating results in its regulated books of account for its July 1969 regulated accounting period, as established in the manner prescribed in paragraph (g)(1) (i), (ii), or (iii) of this section.

(ii)(*a*) If public utility property is acquired in a transaction in which its basis in the hands of the transferee is determined in whole or in part by reference to its basis in the hands of the transferor by reason of the application of any provision of the Code, or in a transfer (including any purchase for cash or in exchange) from a related person, then in the hands of the transferee the applicable 1968 method with respect to such property shall be determined by reference to the treatment in respect of such property in the hands of the transferor.

(*b*) For purposes of this subdivision (ii), the term ''related person'' means a person who is related to another person if either immediately before or after the transfer—

(*1*) The relationship between such persons would result in a disallowance of losses under section 267 (relating to disallowance of losses, etc., between related taxpayers) or section 707(b) (relating to losses disallowed, etc., between partners and controlled partnerships) and the regulations thereunder, or

(*2*) Such persons are members of the same controlled group of corporations, as defined in section 1563(a) (relating to definition of controlled group of corporations), except that ''more than 50 percent'' shall be substituted for ''at least 80 percent'' each place it appears in section 1563(a) and the regulations thereunder.

(5) *Same or similar*. The classification of property as being of the same (or similar) kind shall be made by reference to the function of the public utility to which the primary use of the property relates. Property which performs the identical function in the identical manner shall be treated as property of the same kind. The determination that property is of a similar kind shall be made by reference to the proper account to which expenditures for the property are chargeable under the system of regulated accounts required to be used by the taxpayer for the period in which the property in question was acquired. Property, the expenditure for which is chargeable to the same account, is property of the most similar kind. Property, the expenditure for which is chargeable to an account for property which serves the same general function, is property of a similar kind. Thus, for example, if corporation X, a natural gas company, subject to the jurisdiction of the Federal Power Commission, had property properly chargeable to account 366 (relating to transmission plant structures and improvements) acquired an additional structure properly chargeable to account 366, under the uniform system of accounts prescribed for natural gas companies (class A and class B) by the Federal Power Commission, effective September 1, 1968, the addition would constitute property of the same kind if it performed the identical function in the identical manner. If, however, the addition did not perform the identical function in the identical manner, it would be property of the most similar kind.

(6) *Regulated method of accounting in certain cases.* Under section 167(l)(4)(B), if with respect to any pre-1970 public utility property the taxpayer filed a timely application for change in method of accounting referred to in subparagraph (4)(i)(*b*)(*1*) of this paragraph and

with respect to property of the same (or similar) kind most recently placed in service the taxpayer used a flow-through method of regulated accounting for its July 1969 regulated accounting period, then for purposes of section 167(l)(1)(B) and paragraph (c) of this section the taxpayer shall be deemed to have used a flow-through method of regulated accounting with respect to such pre-1970 public utility property.

(7) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. Corporation X is a calendar-year taxpayer. On its Federal income tax return for 1967 (the latest taxable year for which X, prior to August 1, 1969, filed a return) X used a straight line method of depreciation with respect to certain public utility property placed in service before 1965 and used the declining balance method of depreciation using 200 percent of the straight line rate (double declining balance) with respect to the same kind of public utility property placed in service after 1964. In 1968 and 1970, X placed in service additional public utility property of the same kind. The applicable 1968 method with respect to the above described public utility property is shown in the following chart:

Property held in 1970	Placed in service	Method on 1967 return	Applicable 1968 method
Group 1	Before 1965	Straight line ..	Straight line.
Group 2	After 1964 and before 1968.	Double declining balance.	Double declining balance.
Group 3	After 1967 and before 1969.	....	Do.
Group 4	After 1968	....	Do.

Example 2. Corporation Y is a calendar-year taxpayer engaged exclusively in the trade or business of the furnishing of electrical energy. In 1954, Y placed in service hydroelectric generators and for all purposes Y has taken straight line depreciation with respect to such generators. In 1960, Y placed in service fossil fuel generators and for all purposes since 1960 has used the declining balance method of depreciation using a rate of 150 percent of the straight line rate (computed without reduction for salvage) with respect to such generators. After 1960 and before 1970 Y did not place in service any generators. In 1970, Y placed in service additional hydroelectric generators. The applicable 1968 method with respect to the hydroelectric generators placed in service in 1970 would be the straight line method because it was the method used by Y on its return for the latest taxable year for which Y filed a return before August 1, 1969, with respect to property of the same kind (*i.e.*, hydroelectric generators) most recently placed in service.

Example 3. Assume the same facts as in example (2), except that the generators placed in service in 1970 were nuclear generators. The applicable 1968 method with respect to such generators is the declining balance method using a rate of 150 percent of the straight line rate because, with respect to property of the most similar kind (fossil fuel generators) most recently placed in service, Y used such declining balance method on its return for the latest taxable year for which it filed a return before August 1, 1969.

(f) *Subsection (l) method.* Under section 167(l)(3)(F), the term ''subsection (l) method'' means a reasonable and consistently applied ratable method of computing depreciation which is allowable under section 167(a), such as, for example, the straight line method or a unit of production method or machine-hour method. The term ''subsection (l) method'' does not include any declining balance method (regardless of the uniform rate applied), sum of the years-digits method, or method of depreciation which is allowable solely by reason of section 167(b)(4) or (j)(1)(C).

(g) *July 1969 regulated accounting period*—(1) *In general.* Under section 167(l)(3)(I), the term ''July 1969 regulated accounting period'' means the taxpayer's latest accounting period ending before August 1, 1969, for which the taxpayer regularly computed, before January 1, 1970, its tax expense for purposes of reflecting operating results in its regulated books of account. The computation by the taxpayer of such tax expense may be established by reference to the following:

(i) The most recent periodic report of a period ending before August 1, 1969, required by a regulatory body described in section 167(l)(3)(A) having jurisdiction over the taxpayer's regulated books of account which was filed with such body before January 1, 1970 (whether or not such body has jurisdiction over rates).

(ii) If subdivision (i) of this subparagraph does not apply, the taxpayer's most recent report to its shareholders for a period ending before August 1, 1969, but only if such report was distributed to the shareholders before January 1, 1970, and if the taxpayer's stocks or securities are traded in an established securities market during such period. For purposes of this subdivision, the term ''established securities market'' has the meaning assigned to such term in §1.453–3(d)(4).

(iii) If subdivisions (i) and (ii) of this subparagraph do not apply, entries made to the satisfaction of the district director before January 1, 1970, in its regulated books of account for its most recent accounting period ending before August 1, 1969.

(2) *July 1969 method of regulated accounting in certain acquisitions.* If public utility property is acquired in a transaction in which its basis in the hands of the transferee is determined in whole or in part by reference to its basis in the hands of the transferor by reason of the application of any provision of the Code, or in a transfer (including any purchase for cash or in exchange) from a related person, then in the hands of the transferee the method of regulated accounting for such property's July 1969 regulated accounting period shall be determined by reference to the treatment in respect of such property in the hands of the transferor. See paragraph (e)(4)(ii) of this section for definition of ''related person''.

(3) *Determination date.* For purposes of section 167(l), any reference to a method of depreciation under section 167(a), or a method of regulated accounting, taken into account by the taxpayer in computing its tax expense for its July 1969 regulated accounting period shall be a reference to such tax expense as shown on the periodic report or report to shareholders to which subparagraph (1) (i) or (ii) of this paragraph applies or the entries made on the taxpayer's regulated books of account to which subparagraph (1)(iii) of this paragraph applies. Thus, for example, assume that regulatory body A having jurisdiction over public utility property with respect to X's regulated books of account requires X to reflect its tax expense in such books using the same method of depreciation which regulatory body B uses for determining X's cost of service for ratemaking purposes. If in 1971, in the course of approving a rate change for X, B retroactively determines X's cost of service for ratemaking purposes for X's July 1969 regulated accounting period using a method of depreciation different from the method reflected in X's regulated books of account as of January 1, 1970, the method of depreciation used by X for its July 1969 regulated accounting period would be determined without reference to the method retroactively used by B in 1971.

(h) *Normalization method of accounting*—(1) *In general.* (i) Under section 167(l), a taxpayer uses a normalization method of regulated accounting with respect to public utility property—

(*a*) If the same method of depreciation (whether or not a subsection (l) method) is used to compute both its tax expense and its depreciation expense for purposes of establishing cost of service for ratemaking purposes and for reflecting operating results in its regulated books of account, and

(*b*) If to compute its allowance for depreciation under section 167 it uses a method of depreciation other than the method it used for purposes described in (*a*) of this subdivision, the taxpayer makes adjustments consistent with subparagraph (2) of this paragraph to a reserve to reflect the total amount of the deferral of Federal income tax liability resulting from the use with respect to all of its public utility property of such different methods of depreciation.

(ii) In the case of a taxpayer described in section 167(l) (1) (B) or (2) (C), the reference in subdivision (i) of this subparagraph shall be a reference only to such taxpayer's ''qualified public utility property''. See §1.167(l)–2(b) for definition of ''qualified public utility property''.

(iii) Except as provided in this subparagraph, the amount of Federal income tax liability deferred as a result of the use of different method of depreciation under subdivision (i) of this subparagraph is the excess (computed without regard to credits) of the amount the tax liability would have been had a subsection (l) method been used over the amount of the actual tax liability. Such amount shall be taken into account for the taxable year in which such different methods of depreciation are used. If, however, in respect of any taxable year the use of a method of depreciation other than a subsection (l) method for purposes of determining the taxpayer's reasonable allowance under section 167(a) results in a net operating loss carryover (as determined under section 172) to a year succeeding such taxable year which would not have arisen (or an increase in such carryover which would not have arisen) had the taxpayer determined his reasonable allowance under section 167(a) using a subsection (l) method, then the amount and time of the deferral of tax liability shall be taken into account in such appropriate time and manner as is satisfactory to the district director.

(2) *Adjustments to reserve.* (i) The taxpayer must credit the amount of deferred Federal income tax determined under subparagraph (1)(i) of this paragraph for any taxable year to a reserve for deferred taxes, a depreciation reserve, or other reserve account. The taxpayer need not establish a separate reserve account for such amount but the amount of deferred tax determined under subparagraph (1) (i) of this paragraph must be accounted for in such a manner so as to be readily identifiable. With respect to any account, the aggregate amount allocable to deferred tax under section 167(l) shall not be reduced except to reflect the amount for any taxable year by which Federal income taxes are greater by reason of the prior use of different methods of depreciation under subparagraph (1)(i) of this paragraph. An additional exception is that the aggregate amount allocable to deferred tax under section 167(l) may be properly adjusted to reflect asset retirements or the expiration of the period for depreciation used in determining the allowance for depreciation under section 167(a).

(ii) The provisions of this subparagraph may be illustrated by the following examples:

Example 1. Corporation X is exclusively engaged in the transportation of gas by pipeline subject to the jurisdiction of the Federal Power Commission. With respect to its post-1969 public utility property, X is entitled under section 167(l)(2)(B) to use a method of depreciation other than a subsection (l) method if it uses a normalization method of regulated accounting. With respect to such property, X has not made any election under §1.167(a)–11 (relating to depreciation based on class lives and asset depreciation ranges). In 1972, X places in service public utility property with an unadjusted basis of $2 million, and an estimated useful life of 20 years. X uses the declining balance method of depreciation with a rate twice the straight line rate. If X uses a normalization method of regulated accounting, the amount of depreciation allowable under section 167(a) with respect to such property for 1972 computed under the double declining balance method would be $200,000. X computes its tax expense and depreciation expense for purposes of determining its cost of service for rate-making purposes and for reflecting operating results in its regulated books of account using the straight line method of depreciation (a subsection (l) method). A depreciation allowance computed in this manner is $100,000. The excess of the depreciation allowance determined under the double declining balance method ($200,000) over the depreciation expense computed using the straight line method ($100,000) is $100,000. Thus, assuming a tax rate of 48 percent, X used a normalization method of regulated accounting for 1972 with respect to property placed in service that year if for 1972 it added to a reserve $48,000 as taxes deferred as a result of the use by X of a method of depreciation for Federal income tax purposes different from that used for establishing its cost of service for rate-making purposes and for reflecting operating results in its regulated books of account.

Example 2. Assume the same facts as in example (1), except that X elects to apply §1.167(a)–11 with respect to all eligible property placed in service in 1972. Assume further that all property X placed in service in 1972 is eligible property. One hudnred percent of the asset guideline period for such property is 22 years and the asset depreciation range is from 17.5 years to 26.5 years. X uses the double declining balance method of depreciation, selects an asset depreciation period of 17.5 years, and applies the half-year convention (described in §1.167(a)–11(c)(2)(iii)). In 1972, the depreciation allowable under section 167(a) with respect to property placed in service in 1972 is $114,285 (determined without regard to the normalization requirements in §1.167(a)–11(b)(6) and in section 167(l)). X computes its tax expense for purposes of determining its cost of service for ratemaking purposes and for reflecting operating results in its regulated books of account using the straight line method of depreciation (a subsection (l) method), an estimated useful life of 22 years (that is, 100 percent of the asset guideline period), and the half-year convention. A depreciation allowance computed in this manner is $45,454. Assuming a tax rate of 48 percent, the amount that X must add to a reserve for 1972 with respect to property placed in service that year in order to qualify as using a normalization method of regulated accounting under section 167(l) (3) (G) is $27,429 and the amount in order to satisfy the normalization requirements of §1.167(a)–11(b)(6) is $5,610. X determined such amounts as follows:

(1) Depreciation allowance on tax return (determined without regard to section 167(l) and § 1.167(a)–11(b) (6))	$114,285
(2) Line (1), recomputed using a straight line method	57,142
(3) Difference in depreciation allowance attributable to different methods (line (1) minus line (2))	$57,143
(4) Amount to add to reserve under this paragraph (48 percent of line (3))	27,429
(5) Amount in line (2)	$57,142
(6) Line (5), recomputed by using an estimated useful life of 22 years and the half-year convention	45,454
(7) Difference in depreciation allowance attributable to difference in depreciation periods	$11,688
(8) Amount to add to reserve under § 1.167(a)–11(b) (6) (ii) (48 percent of line (7))	5,610

If, for its depreciation expense for purposes of determining its cost of service for ratemaking purposes and for reflecting operating results in its regulated books of account, X had used a period in excess of the asset guideline period of 22 years, the total amount in lines (4) and (8) in this example would not be changed.

Example 3. Corporation Y, a calendar-year taxpayer which is engaged in furnishing electrical energy, made the election provided by section 167(l) (4) (a) with respect to its ''qualified public utility property'' (as defined in §1.167(l)–2(b)). In 1971, Y placed in service qualified public utility property which had an adjusted basis of $2 million, estimated useful life of 20 years, and no salvage value. With respect to property of the same kind most recently placed in service, Y used a flow-through method of regulated accounting for its July 1969 regulated accounting period and the applicable 1968 method is the declining balance method of depreciation using 200 percent of the straight line rate. The amount of depreciation allowable under the double declining balance method with respect to the qualified public utility property would be $200,000. Y computes its tax expense and depreciation expense for purposes of determining its cost of service for ratemaking purposes and for reflecting operating results in its regulated books of account using the straight line method of depreciation. A depreciation allowance with respect to the qualified public utility property determined in this manner is $100,000. The excess of the depreciation allowance determined under the double declining balance method ($200,000) over the depreciation expense computed using the straight line method ($100,000) is $100,000. Thus, assuming a tax rate of 48 percent, Y used a normalization method of regulated accounting for 1971 if for 1971 it added to a reserve $48,000 as tax deferred as a result of the use by Y of a method of depreciation for Federal income tax purposes with respect to its qualified public utility property which method was different from that used for establishing its cost of service for ratemaking purposes and for reflecting operating results in its regulated books of account for such property.

Example 4. Corporation Z, exclusively engaged in a public utility activity did not use a flow-through method of regulated accounting for its July 1969 regulated accounting period. In 1971, a regulatory body having jurisdiction over all of Z's property issued an order applicable to all years beginning with 1968 which provided, in effect, that Z use an accelerated method of depreciation for purposes of section 167 and for determining its tax expenses for purposes of reflecting operating results in its regulated books of account. The order further provided that Z normalize 50 percent of the tax deferral resulting from the use of the accelerated method of depreciation and that Z flow-through 50 percent of the tax deferral resulting therefrom. Under section 167(l), the method of accounting provided in the order would not be a normalization method of regulated accounting because Z would not be permitted to normalize 100 percent of the tax deferral resulting from the use of an accelerated method of depreciation. Thus, with respect to its public utility property for purposes of section 167, Z may only use a subsection (l) method of depreciation.

Example 5. Assume the same facts as in example (4) except that the order of the regulatory body provided, in effect, that Z normalize 100 percent of the tax deferral with respect to 50 percent of its public utility property and flow-through the tax savings with respect to the other 50 percent of its property. Because the effect of such an order would allow Z to flow-through a portion of the tax savings resulting from the use of an accelerated method of depreciation, Z would not be using a normalization method of regulated accounting with respect to any of its properties. Thus, with respect to its public utility property for purposes of section 167, Z may only use a subsection (l) method of depreciation.

(3) *Establishing compliance with normalization requirements in respect of operating books of account.* The taxpayer may establish compliance with the requirement in subparagraph (1)(i) of this paragraph in respect of reflecting operating results, and adjustments to a reserve, in its operating books of account by reference to the following:

(i) The most recent periodic report for a period beginning before the end of the taxable year, required by a regulatory body described in section 167(l)(3)(A) having jurisdiction over the taxpayer's regulated operating books of account which was filed with such body before the due date (determined with regard to extensions) of the taxpayer's Federal income tax return for such taxable year (whether or not such body has jurisdiction over rates).

(ii) If subdivision (i) of this subparagraph does not apply, the taxpayer's most recent report to its shareholders for the taxable year but only if (*a*) such report was distributed to the shareholders before the due date (determined with regard to extensions) of the taxpayer's Federal income tax return for the taxable year and (*b*) the taxpayer's stocks or securities are traded in an established securities market during such taxable year. For purposes of this subdivision, the term ''established securities market'' has the meaning assigned to such term in §1.453–3(d)(4).

(iii) If neither subdivision (i) nor (ii) of this subparagraph applies, entries made to the satisfaction of the district director before the due date (determined with regard to extensions) of the taxpayer's Federal income tax return for the taxable year in its regulated books of account for its most recent period beginning before the end of such taxable year.

(4) *Establishing compliance with normalization requirements in computing cost of service for ratemaking purposes.* (i) In the case of a taxpayer which used a flow-through method of regulated accounting for its July 1969 regulated accounting period or thereafter, with respect to all or a portion of its pre-1970 public utility property, if a regulatory body having jurisdiction to establish the rates of such taxpayer as to such property (or a court which has jurisdiction over such body) issues an order of general application (or an order of specific application to the taxpayer) which states that such regulatory body (or court) will permit a class of taxpayers of which such taxpayer is a member (or such taxpayer) to use the normalization method of regulated accounting to establish cost of service for ratemaking purposes with respect to all or a portion of its public utility property, the taxpayer will be presumed to be using the same method of depreciation to compute both its tax expense and its depreciation expense for purposes of establishing its cost of service for ratemaking purposes with respect to the public utility property to which such order applies. In the event that such order is in any way conditional, the preceding sentence shall not apply until all of the conditions contained in such order which are applicable to the taxpayer have been fulfilled. The taxpayer shall establish to the satisfaction of the Commissioner or his delegate that such conditions have been fulfilled.

(ii) In the case of a taxpayer which did not use the flow-through method of regulated accounting for its July 1969 regulated accounting period or thereafter (including a taxpayer which used a subsection (l) method of depreciation to compute its allowance for depreciation under section 167(a) and to compute its tax expense for purposes of reflecting operating results in its regulated books of account), with respect to any of its public utility property, it will be presumed that such taxpayer is using the same method of depreciation to compute both its tax expense and its depreciation expense for purposes of establishing its cost of service for ratemaking purposes with respect to its post-1969 public utility property. The presumption described in the preceding sentence shall not apply in any case where there is (*a*) an expression of intent (regardless of the manner in which such expression of intent is indicated) by the regulatory body (or bodies), having jurisdiction to establish the rates of such taxpayer, which indicates that the policy of such regulatory body is in any way inconsistent with the use of the normalization method of regulated accounting by such taxpayer or by a class of taxpayers of which such taxpayer is a member, or (*b*) a decision by a court having jurisdiction over such regulatory body which decision is in any way inconsistent with the use of the normalization method of regulated accounting by such taxpayer or a class of taxpayers of which such taxpayer is a member. The presumption shall be applicable on January 1, 1970, and shall, unless rebutted, be effective until an inconsistent expression of intent is indicated by such regulatory body or by such court. An example of such an inconsistent expression of intent is the case of a regulatory body which has, after the July 1969 regulated accounting period and before January 1, 1970, directed public utilities subject to its ratemaking jurisdiction to use a flow-through method of regulated accounting, or has issued an order of general application which states that such agency will direct a class of public utilities of which the taxpayer is a member to use a flow-through method of regulated accounting. The presumption described in this subdivision may be rebutted by evidence that the flow-through method of regulated accounting is being used by the taxpayer with respect to such property.

(iii) The provisions of this subparagraph may be illustrated by the following examples:

Example 1. Corporation X is a calendar-year taxpayer and its ''applicable 1968 method'' is a straight line method of depreciation. Effective January 1, 1970, X began collecting rates which were based on a sum of the years-digits method of depreciation and a normalization method of regulated accounting which rates had been approved by a regulatory body having jurisdiction over X. On October 1, 1971, a court of proper jurisdiction annulled the rate order prospectively, which annulment was not appealed, on the basis that the regulatory body had abused its discretion by determining the rates on the basis of a normalization method of regulated accounting. As there was no inconsistent expression of intent during 1970 or prior to the due date of X's return for 1970, X's use of the sum of the years-digits method of depreciation for purposes of section 167 on such return was proper. For 1971, the presumption is in effect through September 30. During 1971, X may use the sum of the years-digits method of depreciation for purposes of section 167 from January 1 through September 30, 1971. After September 30, 1971, and for taxable years after 1971, X must use a straight line method of depreciation until the inconsistent court decision is no longer in effect.

Example 2. Assume the same facts as in example (1), except that pursuant to the order of annulment, X was required to refund the portion of the rates attributable to the use of the normalization method of regulated accounting. As there was no inconsistent expression of intent during 1970 or prior to the due date of X's return for 1970, X has the benefit of the presumption with respect to its use of the sum of the years-digits method of depreciation for purposes of section 167, but because of the retroactive nature of the rate order X must file an amended return for 1970 using a straight line method of depreciation. As the inconsistent decision by the court was handed down prior to the due date of X's Federal income tax return for 1971, for 1971 and thereafter the presumption of subdivision (ii) of this subparagraph does not apply. X must file its Federal income tax returns for such years using a straight line method of depreciation.

Example 3. Assume the same facts as in example (2), except that the annulment order was stayed pending appeal of the decision to a court of proper appellate jurisdiction, X has the benefit of the presumption as described in example (2) for the year 1970, but for 1971 and thereafter the presumption of subdivision (ii) of this subparagraph does not apply. Further, X must file an amended return for 1970 using a straight line method of depreciation and for 1971 and thereafter X must file its returns using a straight line method of depreciation unless X and the district director have consented in writing to extend the time for assessment of tax for 1970 and thereafter with respect to the issue of normalization method of regulated accounting for as long as may be necessary to allow for resolution of the appeal with respect to the annulment of the rate order.

(5) *Change in method of regulated accounting.* The taxpayer shall notify the district director of a change in its method of regulated accounting, an order by a regulatory body or court that such method be changed, or an interim or final rate determination by a regulatory body which determination is inconsistent with the method of regulated accounting used by the taxpayer immediately prior to the effective date of such rate determination. Such notification shall be made within 90 days of the date that the change in method, the order, or the determination is effective. In the case of a change in the method of regulated accounting, the taxpayer shall recompute its tax liability for any affected taxable year and such recomputation shall be made in the form of an amended return where necessary unless the taxpayer and the district director have consented in writing to extend the time for assessment of tax with respect to the issue of normalization method of regulated accounting.

(6) *Exclusion of normalization reserve from rate base.* (i) Notwithstanding the provisions of subparagraph (1) of this paragraph, a taxpayer does not use a normalization method of regulated accounting if, for ratemaking purposes,

the amount of the reserve for deferred taxes under section 167(l) which is excluded from the base to which the taxpayer's rate of return is applied, or which is treated as no-cost capital in those rate cases in which the rate of return is based upon the cost of capital, exceeds the amount of such reserve for deferred taxes for the period used in determining the taxpayer's tax expense in computing cost of service in such ratemaking.

(ii) For the purpose of determining the maximum amount of the reserve to be excluded from the rate base (or to be included as no-cost capital) under subdivision (i) of this subparagraph, if solely an historical period is used to determine depreciation for Federal income tax expense for ratemaking purposes, then the amount of the reserve account for the period is the amount of the reserve (determined under subparagraph (2) of this paragraph) at the end of the historical period. If solely a future period is used for such determination, the amount of the reserve account for the period is the amount of the reserve at the beginning of the period and a pro rata portion of the amount of any projected increase to be credited or decrease to be charged to the account during such period. If such determination is made by reference both to an historical portion and to a future portion of a period, the amount of the reserve account for the period is the amount of the reserve at the end of the historical portion of the period and a pro rata portion of the amount of any projected increase to be credited or decrease to be charged to the account during the future portion of the period. The pro rata portion of any increase to be credited or decrease to be charged during a future period (or the future portion of a part-historical and part-future period) shall be determined by multiplying any such increase or decrease by a fraction, the numerator of which is the number of days remaining in the period at the time such increase or decrease is to be accrued, and the denominator of which is the total number of days in the period (or future portion).

(iii) The provisions of subdivision (i) of this subparagraph shall not apply in the case of a final determination of a rate case entered on or before May 31, 1973. For this purpose, a determination is final if all rights to request a review, a rehearing, or a redetermination by the regulatory body which makes such determination have been exhausted or have lapsed. The provisions of subdivision (ii) of this subparagraph shall not apply in the case of a rate case filed prior to June 7, 1974 for which a rate order is entered by a regulatory body having jurisdiction to establish the rates of the taxpayer prior to September 5, 1974, whether or not such order is final, appealable, or subject to further review or reconsideration.

(iv) The provisions of this subparagraph may be illustrated by the following examples:

Example 1. Corporation X is exclusively engaged in the transportation of gas by pipeline subject to the jurisdiction of the Z Power Commission. With respect to its post-1969 public utility property, X is entitled under section 167(l)(2)(B) to use a method of depreciation other than a subsection (l) method if it uses a normalization method of regulated accounting. With respect to X the Z Power Commission for purposes of establishing cost of service uses a recent consecutive 12-month period ending not more than 4 months prior to the date of filing a rate case adjusted for certain known changes occurring within a 9-month period subsequent to the base period. X's rate case is filed on January 1, 1975. The year 1974 is the recorded test period for X's rate case and is the period used in determining X's tax expense in computing cost of service. The rates are contemplated to be in effect for the years 1975, 1976, and 1977. The adjustments for known changes relate only to wages and salaries. X's rate base at the end of 1974 is $145,000,000. The amount of the reserve for deferred taxes under section 167(l) at the end of 1974 is $1,300,000, and the reserve is projected to be $4,400,000 at the end of 1975, $6,500,000 at the end of 1976, and $9,800,000 at the end of 1977. X does not use a normalization method of regulated accounting if the Z Power Commission excludes more than $1,300,000 from the rate base to which X's rate of return is applied. Similarly, X does not use a normalization method of regulated accounting if, instead of the above, the Z Power Commission, in determining X's rate of return which is applied to the rate base, assigns to no-cost capital an amount that represents the reserve account for deferred tax that is greater than $1,300,000.

Example 2. Assume the same facts as in example (1) except that the adjustments for known changes in cost of service made by the Z Power Commission include an additional depreciation expense that reflects the installation of new equipment put into service on January 1, 1975. Assume further that the reserve for deferred taxes under section 167(l) at the end of 1974 is $1,300,000 and that the monthly net increases for the first 9 months of 1975 are projected to be:

January 1–31	$310,000
February 1–28	300,000
March 1–31	300,000
April 1–30	280,000
May 1–31	270,000
June 1–30	260,000
July 1–31	260,000
August 1–31	250,000
September 1–30	240,000
	$2,470,000

For its regulated books of account X accrues such increases as of the last day of the month but as a matter of convenience credits increases or charges decreases to the reserve account on the 15th day of the month following the whole month for which such increase or decrease is accrued. The maximum amount that may be excluded from the rate base is $2,470,879 (the amount in the reserve at the end of the historical portion of the period ($1,300,000) and a pro rata portion of the amount of any projected increase for the future portion of the period to be credited to the reserve ($1,170,879)). Such pro rata portion is computed (without regard to the date such increase will actually be posted to the account) as follows:

$310,000×243/273 =	$275,934
300,000×215/273 =	236,264
300,000×184/273 =	202,198
280,000×154/273 =	157,949
270,000×123/273 =	121,648
260,000×93/273 =	88,571
260,000×62/273 =	59,048
250,000×31/273 =	28,388
240,000×1/273=	879
	$1,170,879

Example 3. Assume the same facts as in example (1) except that for purposes of establishing cost of service the Z Power Commission uses a future test year (1975). The rates are contemplated to be in effect for 1975, 1976, and 1977. Assume further that plant additions, depreciation expense, and taxes are projected to the end of 1975 and that the reserve for deferred taxes under section 167(l) is $1,300,000 for 1974 and is projected to be $4,400,000 at the end of 1975. Assume also that the Z Power Commission applies the rate of return to X's 1974 rate base of $145,000,000. X and the Z Power Commission through negotiation arrive at the level of approved rates. X uses a normalization method of regulated accounting only if the settlement agreement, the rate order, or record of the proceedings of the Z Power Commission indicates that the Z Power Commission did not exclude an amount representing the reserve for deferred taxes from X's rate base ($145,000,000) greater than $1,300,000 plus a pro rata portion of the projected increases and decreases that are to be credited or charged to the reserve account for 1975. Assume that for 1975 quarterly net increases are projected to be:

1st quarter	$910,000
2nd quarter	810,000
3rd quarter	750,000
4th quarter	630,000
Total	$3,100,000

For its regulated books of account X will accrue such increases as of the last day of the quarter but as a matter of convenience will credit increases or charge decreases to the reserve account on the 15th day of the month following the last month of the quarter for which such increase or decrease will be accrued. The maximum amount that may be excluded from the rate base is $2,591,480 (the amount of the reserve at the beginning of the period ($1,300,000) plus a pro rata portion ($1,291,480) of the $3,100,000 projected increase to be credited to the reserve during the period). Such portion is computed (without regard to the date such increase will actually be posted to the account) as follows:

$910,000×276/365=	$688,110
810,000×185/365=	410,548
750,000×93/365=	191,096
630,000×1/365=	1,726
	$1,291,480

(i) *Flow-through method of regulated accounting.* Under section 167(l)(3)(H), a taxpayer uses a flow-through method of regulated accounting with respect to public utility property if it uses the same method of depreciation (other than a subsection (l) method) to compute its allowance for depreciation under section 167 and to compute its tax expense for purposes of reflecting operating results in its regulated books of account unless such method is the same method used by the taxpayer to determine its depreciation expense for purposes of reflecting operating results in its regulated books of account. Except as provided in the preceding sentence, the method of depreciation used by a taxpayer with respect to public utility property for purposes of determining cost of service for ratemaking purposes or rate base for ratemaking purposes shall not be considered in determining whether the taxpayer used a flow-through method of regulated accounting. A taxpayer may establish use of a flow-through method of regulated accounting in the same manner that compliance with normalization requirements in respect of operating books of account may be established under paragraph (h)(4) of this section.

[T.D. 7315, 39 FR 20195, June 7, 1974]

§ 1.167(l)–2 Public utility property; election as to post-1969 property representing growth in capacity.

(a) *In general.* Section 167(l)(2) prescribes the methods of depreciation which may be used by a taxpayer with respect to its post-1969 public utility property. Under section 167(l)(2) (A) and (B) the taxpayer may use a subsection (l) method of depreciation (as defined in section 167(l)(3)(F)) or any other method of depreciation which is otherwise allowable under section 167 if, in conjunction with the use of such other method, such taxpayer uses the normalization method of accounting (as defined in section 167(l)(3)(G)). Paragraph (2)(C) of section 167(l) permits a taxpayer which used the flow-through method of accounting for its July 1969 accounting period (as these terms are defined in section 167(l)(3) (H) and (I), respectively) to use its applicable 1968 method of depreciation with respect to certain property. Section 167(l)(3)(D) describes the term ''applicable 1968 method''. Accordingly, a regulatory agency is not precluded by section 167(l) from requiring such a taxpayer subject to its jurisdiction to continue to use the flow-through method of accounting unless the taxpayer makes the election pursuant to section 167(l)(4)(A) and this section. Whether or not the election is made, if such a regulatory agency permits the taxpayer to change from the flow-through method of accounting, subsection (l)(2) (A) or (B) would apply and such taxpayer could, subject to the provisions of section 167(e) and the regulations thereunder (relating to change in method), use a subsection (l) method of depreciation or, if the taxpayer uses the normalization method of accounting, any other method of depreciation otherwise allowable under section 167.

(1) *Election.* Under subparagraph (A) of section 167(l)(4), if the taxpayer so elects, the provisions of paragraph (2)(C) of section 167(l) shall not apply to its qualified public utility property (as such term is described in paragraph (b) of this section). In such case the taxpayer making the election shall use a method of depreciation prescribed by section 167(l)(2) (A) or (B) with respect to such property.

(2) *Property to which election shall apply.* (i) Except as provided in subdivision (ii) of this subparagraph the election provided by section 167(l)(4)(A) shall apply to all of the qualified public utility property of the taxpayer.

(ii) In the event that the taxpayer wishes the election provided by section 167(l)(4)(A) to apply to only a portion of its qualified public utility property, it must clearly identify the property to be subject to the election in the statement of election described in paragraph (e) of this section. Where all property which performs a certain function is included within the election, the election shall apply to all future acquisitions of qualified public utility property which perform the same function. Where only certain property within a functional group of property is included within the election, the election shall apply only to property which is of the same kind as the included property.

(iii) The provisions of subdivision (ii) of this subparagraph may be illustrated by the following examples:

Example 1. Corporation *A*, an electric utility company, wishes to have the election provided by section 167(l)(4)(A) apply only with respect to its production plant. A statement that the election shall apply only with respect to production plant will be sufficient to include within the election all of the taxpayer's qualified production plant of any kind. All public utility property of the taxpayer other than production plant will not be subject to the election.

Example 2. Corporation *B*, an electric utility company, wishes to have the election provided by section 167(l)(4)(A) apply only with respect to nuclear production plant. A statement which clearly indicates that only nuclear production plant will be included in the election will be sufficient to exclude from the election all public utility property other than nuclear production plant.

(b) *Qualified public utility property*—(1) *Definition.* For purposes of this section the term ''qualified public utility property'' means post-1969 public utility property to which section 167(l)(2)(C) applies, or would apply if the election described in section 167(l)(4)(A) had not been made, to the extent that such property constitutes property which increases the productive or operational capacity of the taxpayer with respect to the goods or services described in section 167(l)(3)(A) and does not represent the replacement of existing capacity. In the event that particular assets which are post-1969 public utility property both replace existing public utility property and increase the productive or operational capacity of the taxpayer, only that portion of each such asset which is properly allocable, pursuant to the provisions of subparagraph (3)(v) of this paragraph or paragraph (c)(2) of this section (as the case may be), to increasing the productive or operational capacity of the taxpayer shall be qualified public utility property.

(2) *Limitation on use of formula method.* A taxpayer which makes the election with respect to all of its post-1969 public utility property may determine the amount of its qualified public utility property by using the formula method described in paragraph (c) of this section or, where the taxpayer so chooses, it may use any other method based on engineering data which is satisfactory to the Commissioner. A taxpayer which chooses to include only a portion of its post-1969 public utility property in the election described in paragraph (a)(1) of this section shall, in a manner satisfactory to the Commissioner and consistent with the provisions of subparagraph (3) of this paragraph, use a method based on engineering data. If a taxpayer uses the formula method described in paragraph (c) of this section, it must continue to use such method with respect to additions made in subsequent taxable years. The taxpayer may change from an engineering method to the formula method described in paragraph (c) of this section by filing a statement described in paragraph (h) of this section if it could have used such formula method for the prior taxable year.

(3) *Measuring capacity under an engineering method in the case of a general election.* (i) The provisions of this subparagraph apply in the case of an election made with respect to all of the post-1969 public utility property of the taxpayer.

(ii) A taxpayer which uses a method based on engineering data to determine the portion of its additions for a taxable year which constitutes qualified public utility property shall make such determination with reference to its ''adjusted capacity'' as of the first day of the taxable year during which such additions are placed in service. For purposes of this subparagraph, the term ''adjusted capacity'' means the taxpayer's capacity as of January 1, 1970, adjusted upward in the manner described in subdivision (iii) of this subparagraph for each taxable year ending after December 31, 1969, and before the first day of the taxable year during which the additions described in the preceding sentence are placed in service.

(iii) The adjustment described in this subdivision for each taxable year shall be equal to the number of units of capacity by which additions for the taxable year of public utility property with respect to which the election had been made exceed the number of units of capacity of retirements for such taxable year of public utility property with respect to which the flow-through method of accounting was being used at the time of their retirement. If for any taxable year the computation in the preceding sentence results in a negative amount, such negative amount shall be taken into account as a reduction in the amount of the adjustment (computed without regard to this sentence) in succeeding taxable years.

(iv) The provisions of this subparagraph may be illustrated by the following table which assumes that the taxpayer's adjusted capacity as of January 1, 1970, was 5,000 units:

1	2	3	4	5	6	7
Year	Additions	Flow-through retirements	Net additions	Adjusted capacity [1]	Actual capacity	Units of qualified additions [1,2]
1970	1000	700	300	5000	5300	300
1971	300	500	(200)	5300	5100	
1972	500	200	300	5300	5400	100

1	2	3	4	5	6	7
Year	Additions	Flow-through retirements	Net additions	Adjusted capacity [1]	Actual capacity	Units of qualified additions [1,2]
1973	400	800	(400)	5400	5000	
1974	600	400	200	5400	5200	
1975	800	300	500	5400	5700	300

[1] Capacity as of Jan. 1, 1970, plus amounts in column 7 for years prior to the year for which determination is being made.
[2] Column 6 minus column 5.

(v) The qualified portion of the basis for depreciation (as defined in section 167(g)) of each asset or group of assets (if group or composite accounting is used by the taxpayer) subject to the election shall be determined using the following ratio:

Qualified portion of basis of asset ÷ Total basis of asset = Units of qualified additions computed in column 7 on chart ÷ Units of capacity of additions computed in column 2 on chart.

(c) *Formula method of determining amount of property subject to election*—(1) *In general*. The following formula method may be used to determine the amount of qualified public utility property:

Step 1. Find the total cost (within the meaning of section 1012) to the taxpayer of additions during the taxable year of all post-1969 public utility property with respect to which section 167(l)(2)(C) would apply if the election had not been made.

Step 2. Aggregate the cost (within the meaning of section 1012) to the taxpayer of all retirements during the taxable year of public utility property with respect to which the flow-through method of accounting was being used at the time of their retirement.

Step 3. Subtract the figure reached in step 2 from the figure reached in step 1.

In the event that the figure reached in step 2 exceeds the figure reached in step 1 such excess shall be carried forward to the next taxable year and shall be aggregated with the cost (within the meaning of section 1012) to the taxpayer of all retirements referred to in step 2 for such next taxable year.

(2) *Allocation of bases*. The amount of qualified public utility property as determined in accordance with the formula method described in subparagraph (1) of this paragraph shall be allocated to the basis for depreciation (as defined in section 167(g)) of each asset or group of assets (if group or composite accounting is used by the taxpayer) subject to the election using the following ratio:

Amount of qualified additions computed in step 3 ÷ Amount of total additions computed in step 1 = Qualified portion of basis of asset ÷ Total basis of asset.

(d) *Examples*. The provisions of this section may be illustrated by the following examples:

Example 1. Corporation *A*, a telephone company subject to the jurisdiction of the Federal Communications Commission, elected, pursuant to the provisions of section 167(l)(4)(A) and this section, with respect to all of its qualified post-1969 public utility property to have the provisions of paragraph (2) (C) of section 167(l) not apply. In 1971 the Corporation added new underground cable with a cost (within the meaning of section 1012) to it of $4 million to its underground cable account. In the same year it retired public utility property with a cost (within the meaning of section 1012) to Corporation *A* of $1.5 million. The flow-through method of accounting was being used with respect to all of the retired property at the time of retirement. Using the formula method described in paragraph (c) of this section, the amount of qualified underground cable would be determined as follows:

	Million
Step 1. Aggregate cost of flow-through additions	$4.0
Step 2. Cost of all flow-through retirements	1.5
Step 3. Figure reached in step 1 less figure reached in step 2	2.5

The amount of qualified public utility property to which section 167(l)(2)(C) will not apply is $2.5 million. Pursuant to the provisions of paragraph (c)(2) of this section, the amount of qualified public utility property would be allocated to the basis for depreciation (as defined in section 167(g)) of an asset with a total basis for depreciation of $2 million as follows:

$2.5 million (figure in step 3)/$4 million (figure in step 1) = Qualified portion of basis of asset/$2 million Qualified portion of basis of asset =$1.25 million.

Example 2. In 1972 Corporation *A* (the corporation described in example (1)) added underground cable with a cost (within the meaning of section 1012) to it of $1 million. In the same year the cost (within the meaning of section 1012) to the corporation of retirements of public utility property with respect to which the flow-through method of accounting was being used was $3 million. There were no other additions or retirements. The amount of qualified public utility property would be determined as follows:

	Million
Step 1. Aggregate cost of flow-through additions	$1.0
Step 2. Cost of all flow-through retirements	3.0
Step 3. Figure reached in step 1 less figure reached in step 2	(2.0)

Since retirements of flow-through public utility property for the year 1972 exceeded additions made during such year, the excess retirements, $2.0 million, must be carried forward to be aggregated with retirements for 1973.

Example 3. Corporation *B*, a gas pipeline company subject to the jurisdiction of the Federal Power Commission, made the election provided by section 167(l)(4)(A) and this section with respect to all of its post-1969 public utility property. Corporation *B* chose to use an engineering data method of determining which property was subject to the election provided by this section. In 1970, the corporation replaced a portion of its pipeline with respect to which the flow-through method of accounting was being used at the time of its retirement which had a peak capacity on January 1, 1970, of 100,000 thousand cubic feet (M c.f.) per day at a pressure of 14.73 pounds per square inch absolute (p.s.i.a.) with pipe with a capacity of 125,000 M c.f. per day at 14.73 p.s.i.a. Assuming that there were no other additions or retirements, using an engineering data method one-fifth of the new pipeline would be property subject to the election of this section effective for its taxable year beginning on January 1, 1971.

Example 4. In 1970 Corporation *C* (with the same characteristics as the corporation described in example (3)) extended its pipeline 5 miles further than it extended on January 1, 1970. Assuming that there were no other additions or retirements, the entire extension would be property subject to the election provided by this section effective for its taxable year beginning on January 1, 1971.

Example 5. As a result of a change of service areas between two corporations, in 1970 Corporation *D* (with the same characteristics as the corporation described in example (3)) retired a pipeline running north and south and replaced it with a pipeline of equal length and capacity running east and west. No part of the pipeline running east and west is property subject to the election.

(e) *Manner of making election.* The election described in paragraph (a) of this section shall be made by filing, in duplicate, with the Commissioner of Internal Revenue, Washington, D.C. 20224, Attention, T:I:E, a statement of such election.

(f) *Content of statement.* The statement described in paragraph (e) of this section shall indicate that an election is being made under section 167(l) of the Internal Revenue Code of 1954, and it shall contain the following information:

(1) The name, address, and taxpayer identification number of the taxpayer,

(2) Whether the taxpayer will use the formula method of determining the amount of its qualified public utility property described in paragraph (c) of this section, or an engineering method, and

(3) Where the taxpayer wishes to include only a portion of its public utility property in the election pursuant to the provisions of paragraph (a)(2) of this section, a description sufficient to clearly identify the property to be included.

(g) *Time for making election.* The election permitted by this section shall be made by filing the statement described in paragraph (e) of this section not later than Monday, June 29, 1970.

(h) *Change of method of determining amount of qualified property.* Where a taxpayer which has elected pursuant to the provisions of section 167(l)(4)(A) wishes to change, pursuant to the provisions of paragraph (b)(2) of this section, from an engineering data method of determining which of its property is qualified public utility property to the formula method described in paragraph (c) of this section, it may do so by filing a statement to that effect at the time that it files its income tax return, with the district director or director of the regional service center, with whom the taxpayer's income tax return is required to be filed.

(i) *Revocability of election.* An election made under section 167(l) shall be irrevocable.

(j) *Effective date.* The election prescribed by section 167(l)(4)(A) and this section shall be effective for taxable years beginning after December 31, 1970.

[T.D. 7045, 35 FR 8933, June 10, 1970. Redesignated by T.D. 7315, 39 FR 20195, June 7, 1974]

§ 1.167(l)–3 Multiple regulation, asset acquisitions, reorganizations, etc.

(a) *Property not entirely subject to jurisdiction of one regulatory body*—(1) *In general*. If a taxpayer which uses a method of depreciation other than a subsection (l) method of depreciation is required by a regulatory body having jurisdiction over less than all of its property to use, or not to use, a method of regulated accounting (*i.e.*, normalization or flow-through), such taxpayer shall be considered as using, or not using, such method of regulated accounting only with respect to property subject to the jurisdiction of such regulatory body. In the case of property which is contained in a multiple asset account, the provisions of §1.167(a)–7(c) and §1.167 (a)–11(c)(1)(iv) apply to prohibit depreciating a single account by two or more different methods.

(2) *Jurisdiction of regulatory body*. For purposes of this paragraph, a regulatory body is considered to have jurisdiction over property of a taxpayer if expenses with respect to the property are included in cost of service as determined by the regulatory body for ratemaking purposes or for reflecting operating results in its regulated books of account. For example, if regulatory body A, having jurisdiction over 60 percent of an item of X corporation's public utility property, required X to use the flow-through method of regulated accounting in circumstances which would bar X from using a method of depreciation under section 167(a) other than a subsection (l) method, and if regulatory body B, having jurisdiction over the remaining 40 percent of such item of property does not so require X to use the flow-through method of regulated accounting (or if the remaining 40 percent is not subject to the jurisdiction of any regulatory body), then with respect to 60 percent of the adjusted basis of the property X is prohibited from using a method of depreciation for purposes of section 167(a) other than a subsection (l) method. If in such example, A, having jurisdiction over 60 percent of X's public utility property, had jurisdiction over 100 percent of a particular generator, then with respect to the generator X would be prohibited from using a method of depreciation other than a subsection (l) method.

(3) *Public utility property subject to more than one regulatory body*. If a regulatory body having jurisdiction over public utility property with respect to the taxpayer's regulated books of account requires the taxpayer to reflect its tax expense in such books in the manner used by the regulatory body having jurisdiction over the public utility property for purposes of determining the taxpayer's cost of service for ratemaking purposes, the rules of subparagraphs (1) and (2) of this paragraph shall apply.

(b) *Leasing transactions*—(1) *Leased property*. Public utility property as defined in paragraph (b) of §1.167(l)–1 includes property which is leased by a taxpayer where the leasing of such property is part of the lessor's section 167(l) public utility activity. Thus, such leased property qualifies as public utility property even though the predominant use of such property by the lessee is in other than a section 167(l) public utility activity. Further, leased property qualifies as public utility property under section 167(l) even though the leasing is not part of the lessor's public utility activity if the predominant use of such property by the lessee or any sublessee is in a section 167(l) public utility activity. However, the limitations of section 167(l) apply to a taxpayer only if such taxpayer is subject to the jurisdiction of a regulatory body described in a section 167(l)(3)(A). For example, if a financial institution purchases property which it then leases to a lessee which uses such property predominantly in a section 167(l) public utility activity, the property qualifies as public utility property. However, because the financial institution's rates for leasing the property are not subject to the jurisdiction of a regulatory body described in section 167(l)(3)(A), the provisions of section 167(l) do not apply to the depreciation deductions taken with respect to the property by the financial institution. For possible application of section 167(l) to the lessee, see subparagraph (2) of this paragraph.

(2) *Certain rental payments.* Under section 167(l)(5), if a taxpayer leases property which is public utility property and the regulatory body having jurisdiction over such property for purposes of determining the taxpayer's operating results in its regulated books of account or for ratemaking purposes allows only an amount of such lessee's expenses with respect to the lease which is less than the amount which the taxpayer deducts for purposes of its Federal income tax liability, then a portion of the difference between such amounts shall not be allowed as a deduction by the taxpayer for purposes of its Federal income tax liability in such manner and time as the Commissioner or his delegate may determine consistent with the principles of §1.167(l)–1 and this section applicable as to when a method of depreciation other than a subsection (1) method may be used for purposes of section 167(a).

(c) *Certain partnership arrangements.* Under section 167(l)(5), if property held by a partnership is not public utility property in the hands of the partnership but would be public utility property if an election was made under section 761 to be excluded from partnership treatment, then section 167(l) shall be applied by treating the partners as directly owning the property in proportion to their partnership interests.

(d) *Cross reference.* See §1.167(l)–1(c)(1) for treatment of certain property as ''pre-1970 public utility property'' and §1.167(l)–1(e)(4)(ii) for applicable 1968 method in the case of property acquired in certain transactions.

[T.D. 7315, 39 FR 20202, June 7, 1974]

§1.167(l)–4 Public utility property; election to use asset depreciation range system.

(a) *Application of section 167(l) to certain property subject to asset depreciation range system.* If the taxpayer elects to compute depreciation under the asset depreciation range system described in §1.167(a)–11 with respect to certain public utility property placed in service after December 31, 1970, see §1.167(a)–11(b) (6).

(Sec. 167 of the Internal Revenue Code of 1954 (26 U.S.C. 167) and sec. 7805 of the Internal Revenue Code of 1954 (26 U.S.C. 7805))

[T.D. 7128, 36 FR 11939, June 23, 1971. Redesignated by T.D. 7315, 39 FR 20203, June 7, 1974]

§1.167(m)–1 Class lives.

(a) For rules regarding the election to use the class life system authorized by section 167(m), see the provisions of §1.167(a)–11.

(Sec. 167(m), 85 Stat. 508 (26 U.S.C. 167))

[T.D. 7272, 38 FR 9986, Apr. 23, 1973]

§1.168–5 Special rules.

(a) *Retirement-replacement-betterment (RRB) property*—(1) *RRB replacement property placed in service before January 1, 1985.* (i) Except as provided in paragraph (a)(1)(ii) of this section, the recovery deduction for the taxable year for retirement-replacement-betterment (RRB) replacement property (as defined in paragraph (a)(3) of this section) placed in service before January 1, 1985, shall be (in lieu of the amount determined under section 168(b)) an amount determined by applying to the unadjusted basis (as defined in section 168(d)(1) and the regulations thereunder) of such property the applicable percentage determined in accordance with the following table:

If the recovery year is:	And the year the property is placed in service is:			
	1981	1982	1983	1984
	The applicable percentage is:			
1	100	50	33	25
2	....	50	45	38
3	....	....	22	25
4	....	....	....	12

(ii) The provisions of paragraph (a)(1)(i) of this section do not apply to any taxpayer who did not use the RRB method of depreciation under section 167 as of December 31, 1980. In such case, RRB replacement property placed in service by the taxpayer after December 31, 1980, shall be treated as other 5-year recovery property under section 168.

(2) *RRB replacement property placed in service after December 31, 1984.* RRB replacement property placed in service

after December 31, 1984, is treated as other 5-year recovery property under section 168.

(3) *RRB replacement property defined.* RRB replacement property, for purposes of section 168, means replacement track material (including rail, ties, other track material, and ballast) installed by a railroad (including a railroad switching or terminal company) if—

(i) The replacement is made pursuant to a scheduled program for replacement.

(ii) The replacement is made pursuant to observations by maintenance-of-way personnel of specific track material needing replacement.

(iii) The replacement is made pursuant to the detection by a rail-test car of specific track material needing replacement, or

(iv) The replacement is made as a result of a casualty.

Replacements made as a result of a casualty shall be RRB replacement property only to the extent that, in the case of each casualty, the replacement cost with respect to the replacement track material exceeds $50,000.

(4) *Recovery of adjusted basis of RRB property as of December 31, 1980.* The taxpayer shall recover the adjusted basis of RRB property (as defined in section 168(g)(6)) as of December 31, 1980, over a period of not less than 5 years and not more than 50 years, using a rate of recovery consistent with any method described in section 167(b), including the method described in section 167(b)(2), switching to the method described in section 167(b)(3) at a time to maximize the deduction. For purposes of determining the recovery allowance under this subparagraph, salvage value shall be disregarded and, in the case of a taxpayer that depreciated RRB property placed in service before January 1, 1981, using the RRB method consistently for all periods after February 28, 1913, the adjusted basis of RRB property is the adjusted basis for purposes of determining the deduction for retirements under the RRB method, with no adjustment for depreciation sustained prior to March 1, 1913.

(5) *RRB property (which is not RRB replacement property) placed in service after December 31, 1980.* Property placed in service by the taxpayer after December 31, 1980, which is not RRB replacement property and which, under the taxpayer's method of depreciation as of December 31, 1980, would have been depreciated by the taxpayer under the RRB method, is treated as other property under section 168.

(b)–(f) [Reserved]

[T.D. 8116, 51 FR 46619, Dec. 24, 1986]

§ 1.168(a)–1 Modified accelerated cost recovery system.

(a) Section 168 determines the depreciation allowance for tangible property that is of a character subject to the allowance for depreciation provided in section 167(a) and that is placed in service after December 31, 1986 (or after July 31, 1986, if the taxpayer made an election under section 203(a)(1)(B) of the Tax Reform Act of 1986; 100 Stat. 2143). Except for property excluded from the application of section 168 as a result of section 168(f) or as a result of a transitional rule, the provisions of section 168 are mandatory for all eligible property. The allowance for depreciation under section 168 constitutes the amount of depreciation allowable under section 167(a). The determination of whether tangible property is property of a character subject to the allowance for depreciation is made under section 167 and the regulations under section 167.

(b) This section is applicable on and after February 27, 2004.

[T.D. 9314, 72 FR 9248, Mar. 1, 2007]

§ 1.168(b)–1 Definitions.

(a) *Definitions.* For purposes of section 168 and the regulations under section 168, the following definitions apply:

(1) *Depreciable property* is property that is of a character subject to the allowance for depreciation as determined under section 167 and the regulations under section 167.

(2) *MACRS property* is tangible, depreciable property that is placed in service after December 31, 1986 (or after July 31, 1986, if the taxpayer made an election under section 203(a)(1)(B) of the Tax Reform Act of 1986; 100 Stat. 2143) and subject to section 168, except

for property excluded from the application of section 168 as a result of section 168(f) or as a result of a transitional rule.

(3) *Unadjusted depreciable basis* is the basis of property for purposes of section 1011 without regard to any adjustments described in section 1016(a)(2) and (3). This basis reflects the reduction in basis for the percentage of the taxpayer's use of property for the taxable year other than in the taxpayer's trade or business (or for the production of income), for any portion of the basis the taxpayer properly elects to treat as an expense under section 179, section 179C, or any similar provision, and for any adjustments to basis provided by other provisions of the Internal Revenue Code and the regulations under the Code (other than section 1016(a)(2) and (3)) (for example, a reduction in basis by the amount of the disabled access credit pursuant to section 44(d)(7)). For property subject to a lease, see section 167(c)(2).

(4) *Adjusted depreciable basis* is the unadjusted depreciable basis of the property, as defined in §1.168(b)–1(a)(3), less the adjustments described in section 1016(a)(2) and (3).

(b) *Effective date*. This section is applicable on or after February 27, 2004.

[T.D. 9314, 72 FR 9248, Mar. 1, 2007]

§ 1.168(d)–0 Table of contents for the applicable convention rules.

This section lists the major paragraphs in §1.168(d)–1.

§1.168(d)–1 Applicable conventions—Half-year and mid-quarter conventions.

[T.D. 8444, 57 FR 48981, Oct. 29, 1992]

§ 1.168(d)–1 Applicable conventions—half-year and mid-quarter conventions.

(a) *In general*. Under section 168(d), the half-year convention applies to depreciable property (other than certain real property described in section 168(d)(2)) placed in service during a taxable year, unless the mid-quarter convention applies to the property. Under section 168(d)(3)(A), the mid-quarter convention applies to depreciable property (other than certain real property described in section 168(d)(2)) placed in service during a taxable year if the aggregate basis of property placed in service during the last three months of the taxable year exceeds 40 percent of the aggregate basis of property placed in service during the taxable year (''the 40-percent test''). Thus, if the depreciable property is placed in service during a taxable year that consists of three months or less, the mid-quarter convention applies to the property. Under section 168(d)(3)(b)(i), the depreciable basis of nonresidential real property, residential rental property, and any railroad grading or tunnel bore is disregarded in applying the 40-percent test. For rules regarding property that is placed in service and disposed of in the same taxable year, see paragraph (b)(3) of this section. For the definition of ''aggregate basis of property,'' see paragraph (b)(4) if this section.

(b) *Additional rules for determining whether the mid-quarter convention applies and for applying the applicable convention*—(1) *Property described in section 168(f)*. In determining whether the 40-percent test is testified for a taxable year, the depreciable basis of property described in section 168(f) (property to which section 168 does not apply) is not taken into account.

(2) *Listed property*. The depreciable basis of listed property (as defined in section 280F(d)(4) and the regulations thereunder) placed in service during a taxable year is taken into account (unless otherwise excluded) in applying the 40-percent test.

(3) *Property placed in service and disposed of in the same taxable year*. (i) Under section 168(d)(3)(B)(ii), the depreciable basis of property placed in service and disposed of in the same taxable

year is not taken into account in determining whether the 40-percent test is satisfied. However, the depreciable basis of property placed in service, disposed of, subsequently reacquired, and again placed in service, by the taxpayer in the same taxable year must be taken into account in applying the 40-percent test, but the basis of the property is only taken into account on the later of the dates that the property is placed in service by the taxpayer during the taxable year. Further, see §§1.168(i)–6(c)(4)(v)(B) and 1.168(i)–6(f) for rules relating to property placed in service and exchanged or involuntarily converted during the same taxable year.

(ii) The applicable convention, as determined under this section, applies to all depreciable property (except nonresidential real property, residential rental property, and any railroad grading or tunnel bore) placed in service by the taxpayer during the taxable year, excluding property placed in service and disposed of in the same taxable year. However, see §§1.168(i)–6(c)(4)(v)(A) and 1.168(i)–6(f) for rules relating to MACRS property that has a basis determined under section 1031(d) or section 1033(b). No depreciation deduction is allowed for property placed in service and disposed of during the same taxable year. However, see §1.168(k)–1(f)(1) for rules relating to qualified property or 50-percent bonus depreciation property, and §1.1400L(b)–1(f)(1) for rules relating to qualified New York Liberty Zone property, that is placed in service by the taxpayer in the same taxable year in which either a partnership is terminated as a result of a technical termination under section 708(b)(1)(B) or the property is transferred in a transaction described in section 168(i)(7).

(4) *Aggregate basis of property.* For purposes of the 40-percent test, the term ''aggregate basis of property'' means the sum of the depreciable bases of all items of depreciable property that are taken into account in applying the 40-percent test. ''Depreciable basis'' means the basis of depreciable property for purposes of determining gain under sections 1011 through 1024. The depreciable basis for the taxable year the property is placed in service reflects the reduction in basis for—

(i) Any portion of the basis the taxpayer properly elects to treat as an expense under section 179;

(ii) Any adjustment to basis under section 48(q); and

(iii) The percentage of the taxpayer's use of the property for the taxable year other than in the taxpayer's trade or business (or for the production of income), but is determined before any reduction for depreciation under section 167(a) for that taxable year.

(5) *Special rules for affiliated groups*—(i) In the case of a consolidated group (as defined in §1.1502–1(h)), all members of the group that are included on the consolidated return are treated as one taxpayer for purposes of applying the 40-percent test. Thus, the depreciable bases of all property placed in service by members of a consolidated group during a consolidated return year are taken into account (unless otherwise excluded) in applying the 40-percent test to determine whether the mid-quarter convention applies to property placed in service by the members during the consolidated return year. The 40-percent test is applied separately to the depreciable bases of property placed in service by any member of an affiliated group that is not included in a consolidated return of the taxable year in which the property is placed in service.

(ii) In the case of a corporation formed by a member or members of a consolidated group and that is itself a member of the consolidated group (''newly-formed subsidiary''), the depreciable bases of property placed in service by the newly-formed subsidiary in the consolidated return year in which it is formed is included with the depreciable bases of property placed in service during the consolidated return year by the other members of the consolidated group in applying the 40-percent test. If depreciable property is placed in service by a newly-formed subsidiary during the consolidated return year in which it was formed, the newly-formed subsidiary is considered as being in existence for the entire consolidated return year for purposes of applying the applicable convention to determine when the recovery period begins.

(iii) The provisions of paragraph (b)(5)(ii) of this section are illustrated by the following example.

Example. Assume a member of a consolidated group that files its return on a calendar-year basis forms a subsidiary on August 1. The subsidiary places depreciable property in service on August 5. If the mid-quarter convention applies to property placed in service by the members of the consolidated group (including the newly-formed subsidiary), the property placed in service by the subsidiary on August 5 is deemed placed in service on the mid-point of the third quarter of the consolidated return year (*i.e.*, August 15). If the mid-quarter convention does not apply, the property is deemed placed in service on the mid-point of the consolidated return year (*i.e.*, July 1).

(iv) In the case of a corporation that joins or leaves a consolidated group, the depreciable bases of property placed in service by the corporation joining or leaving the group during the portion of the consolidated return year that the corporation is a member of the consolidated group is included with the depreciable bases of property placed in service during the consolidated return year by the other members in applying the 40-percent test. The depreciable bases of property placed in service by the joining or leaving member in the taxable year before it joins or after it leaves the consolidated group is not taken into account by the consolidated group in applying the 40-percent test for the consolidated return year. If a corporation leaves a consolidated group and joins another consolidated group, each consolidated group takes into account, in applying the 40-percent test, the depreciable bases of property placed in service by the corporation while a member of the group.

(v) The provisions of paragraph (b)(5)(iv) of this section are illustrated by the following example.

Example. Assume Corporations A and B file a consolidated return on a calendar-year basis. Corporation C, also a calendar-year taxpayer, enters the consolidated group on July 1 and is included on the consolidated return for that taxable year. The depreciable bases of property placed in service by C during the period of July 1 to December 31 is included with the depreciable bases of property placed in service by A and B during the entire consolidated return year in applying the 40-percent test. The depreciable bases of property placed in service by C from January 1 to June 30 is not taken into account by the consolidated group in applying the 40-percent test. If C was a member of another consolidated group during the period from January 1 to June 30, that consolidated group would include the depreciable bases of property placed in service by C during that period.

(vi) A corporation that joins or leaves a consolidated group during a consolidated year is considered as being a member of the consolidated group for the entire consolidated return year for purposes of applying the applicable convention to determine when the recovery period begins for depreciable property placed in service by the corporation during the portion of the consolidated return year that the corporation is a member of the group.

(vii) If depreciable property is placed in service by a corporation in the taxable year ending immediately before it joins a consolidated group or beginning immediately after it leaves a consolidated group, the applicable convention is applied to the property under either the full taxable year rules or the short taxable year rules, as applicable.

(viii) The provisions of paragraphs (d)(5)(vi) and (vii) of this section are illustrated by the following example.

Example. Assume that on July 1, C, a calendar-return corporation, joins a consolidated group that files a return on a calendar-year basis. The short taxable year rules apply to C for the period of January 1 to June 30. However, in applying the applicable convention to determine when the recovery period begins for depreciable property placed in service for the period of July 1 to December 31, C is considered as being a member of the consolidated group for the entire consolidated return year. Thus, if the half-year convention applies to depreciable property placed in service by the consolidated group (taking into account the depreciable bases of property placed in service by C after June 30), the property is deemed placed in service on the mid-point of the consolidated return year (*i.e.*, July 1, if the group did not have a short taxable year).

(ix) In the case of a transfer of depreciable property between members of a consolidated group, the following special rules apply for purposes of applying the 40-percent test. Property that is placed in service by one member of a consolidated group and transferred to another member of the same group is considered as placed in service on the date that it is placed in service by the transferor member, and the date it is placed in service by the transferee member is disregarded. In the case of multiple transfers of property between members of a consolidated group, the property is considered as placed in service on the date that the first member places the property in service, and the dates it is placed in service by other members are disregarded. The depreciable basis of the transferred property that is taken into account in applying the 40-percent test is the depreciable basis of the property in the hands of the transferor member (as determined under paragraph (b)(4) of this section), or, in the case of multiple transfers of property between members, the depreciable basis in the hands of the first member that placed the property in service.

(x) The provisions of paragraph (b)(5)(ix) of this section are illustrated by the following example.

Example. Assume the ABC consolidated group files its return on a calendar-year basis. A, a member of the consolidated group, purchases depreciable property costing $50,000 and places the property in service on January 5, 1991. On December 1, 1991, the property is transferred for $75,000 to B, another member of the consolidated group. In applying the 40-percent test to the members of the consolidated group for 1991, the property is considered as placed in service on January 5, the date that A placed the property in service, and the depreciable basis of the property that is taken into account is $50,000.

(6) *Special rule for partnerships and S corporations.* In the case of property placed in service by a partnership or an S corporation, the 40-percent test is generally applied at the partnership or corporate level. However, if a partnership or an S corporation is formed or availed of for the principal purpose of either avoiding the application of the mid-quarter convention or having the mid-quarter convention apply where it otherwise would not, the 40-percent test is applied at the partner, shareholder, or other appropriate level.

(7) *Certain nonrecognition transaction*—(i) Except as provided in paragraph (b)(6) of this section, if depreciable property is transferred in a transaction described in section 168(i)(7)(B)(i) (other than in a transaction between members of a consolidated group) in the same taxable year that the property is placed in service by the transferor, the 40-percent test is applied by treating the transferred property as placed in service by the transferee on the date of transfer. Thus, if the aggregate basis of property (including the transferred property) placed in service by the transferee during the last three months of its taxable year exceeds 40 percent of the aggregate basis of property (including the transferred property) placed in service by the transferee during the taxable year, the mid-quarter convention applies to the transferee's depreciable property, including the transferred property. The depreciable basis of the transferred property is not taken into account by the transferor in applying the 40-percent test for the taxable year that the transferor placed the property in service.

(ii) In applying the applicable convention to determine when the recovery period for the transferred property begins, the date on which the transferor placed the property in service must be used. Thus, for example, if the mid-quarter convention applies, the recovery period for the transferred property begins on the mid-point of the quarter of the taxable year that the transferor placed the property in service. If the transferor placed the transferred property in service in a short taxable year, then for purposes of applying the applicable convention and allocating the depreciation deduction between the transferor and the transferee, the transferor is treated as having a full 12-month taxable year commencing on the first day of the short taxable year. The depreciation deduction for the transferor's taxable year in which the property was placed in service is allocated between the transferor and the transferee based on the number of months in the transferor's taxable year that each party held the property in service. For purposes of allocating the depreciation deduction, the transferor takes into account the month in which the property was placed in service but does not take into account the month in which the property was transferred. The transferee is allocated the remaining portion of the depreciation deduction for the transferor's taxable year in which the property was transferred. For the remainder of the transferee's current taxable year (if the transferee has a different taxable year than the transferor) and for subsequent taxable years, the depreciation deduction for the transferee is calculated by allocating to the transferee's taxable year the depreciation attributable to each recovery year, or portion thereof, that falls within the transferee's taxable year.

(iii) If the applicable convention for the transferred property has not been determined by the time the transferor files its income tax return for the year of transfer because the transferee's taxable year has not ended, the transferor may use either the mid-quarter or the half-year convention in determining the depreciation deduction for the property. However, the transferor must specify on the depreciation form filed for the taxable year that the applicable convention has not been determined for the property. If the transferee determines that a different convention applies to the transferred property, the transferor should redetermine the depreciation deduction on the property, and, within the period of limitation, should file an amended income tax return for the taxable year and pay any additional tax due plus interest.

(iv) The provisions of the paragraph (b)(7) are illustrated by the following example.

Example. (i) During 1991, C, a calendar-year taxpayer, purchases satellite equipment costing $100,000, and computer equipment costing $15,000. The satellite equipment is placed in service in January, and the computer equipment in February. On October 1, C transfers the computer equipment to Z Partnership in a transaction described in section 721. During 1991, Z, a calendar-year partnership, purchases 30 office desks for a total of $15,000. The desks are placed in service in June. These are the only items of depreciable property placed in service by C and Z during 1991.

(ii) In applying the 40-percent test, because C transferred the computer equipment in a transaction described in section 168(i)(7)(B)(i) in the same taxable year that C placed it in service, the computer equipment is treated as placed in service by the transferee, Z, on the date of transfer, October 1. The 40-percent test is satisfied with respect to Z, because the computer equipment is placed in service during the last three months of Z's taxable year and its basis ($15,000) exceeds 40 percent of the aggregate basis of property placed in service by Z during the taxable year (desks and computer equipment with an aggregate basis of $30,000).

(iii) In applying the mid-quarter convention to determine when the computer equipment is deemed to be placed in service, the date on which C placed the property in service is used. Accordingly, because C placed the computer equipment in service during the first quarter of its taxable year, the computer equipment is deemed placed in service on February 15, 1991, the mid-point of the first quarter of C's taxable year. The depreciation deduction allowable for C's 1991 taxable year, $5,250 ($15,000×40 percent×10.5⁄12), is allocated between C and Z based on the number of months in C's taxable year that C and Z held the property in service. Thus, because the property was in service for 11 months during C's 1991 taxable year and C held it for 8 of those 11 months, C is allocated $3,818 (8⁄11×$5,250). Z is allocated $1,432, the remaining 3⁄11 of the $5,250 depreciation deduction for C's 1991 taxable year. For 1992, Z's depreciation deduction for the computer equipment is $3,900, the sum of the remaining 1.5 months of depreciation deduction for the first recovery year and 10.5 months of depreciation deduction for the second recovery year (($15,000×40 percent×1.5⁄12)+($9,000×40 [percent×10.5⁄12)).

(c) *Disposition of property subject to the half-year or mid-quarter convention*—(1) *In general.* If depreciable property is subject to the half-year (or mid-quarter) convention in the taxable year in which it is placed in service, it also is subject to the half-year (or mid-quarter) convention in the taxable year in which it is disposed of.

(2) *Example.* The provisions of paragraph (c)(1) of this section are illustrated by the following example.

Example. In October 1991, B, a calendar-year taxpayer, purchases and places in service a light general purpose truck costing $10,000. B does not elect to expense any part of the cost of the truck, and this is the only item of depreciable property placed in service by B during 1991. The 40-percent test is satisfied and the mid-quarter convention applies, because the truck is placed in service during the last three months of the taxable year and no other assets are placed in service in that year. In April 1993 (prior to the end of the truck's recovery period), B sells the truck. The mid-quarter convention applies in determining the depreciation deduction for the truck in 1993, the year of disposition.

(d) *Effective dates*—(1) *In general*. This section applies to depreciable property placed in service in taxable years ending after January 30, 1991. For depreciable property placed in service after December 31, 1986, in taxable years ending on or before January 30, 1991, a taxpayer may use a method other than the method provided in this section in applying the 40-percent test and the applicable convention, provided the method is reasonable and is consistently applied to the taxpayer's property.

(2) *Qualified property, 50-percent bonus depreciation property, or qualified New York Liberty Zone property*. This section also applies to qualified property under section 168(k)(2) or qualified New York Liberty Zone property under section 1400L(b) acquired by a taxpayer after September 10, 2001, and to 50-percent bonus depreciation property under section 168(k)(4) acquired by a taxpayer after May 5, 2003.

(3) *Like-kind exchanges and involuntary conversions*. The last sentence in paragraph (b)(3)(i) and the second sentence in paragraph (b)(3)(ii) of this section apply to exchanges to which section 1031 applies, and involuntary conversions to which section 1033 applies, of MACRS property for which the time of disposition and the time of replacement both occur after February 27, 2004.

[T.D. 8444, 57 FR 48981, Oct. 29, 1992, as amended by T.D. 9091, 68 FR 52991, Sept. 8, 2003; T.D. 9115, 69 FR 9533, Mar. 1, 2004; T.D. 9283, 71 FR 51737, Aug. 31, 2006; T.D. 9314, 72 FR 9248, Mar. 1, 2007]

§ 1.168(f)(8)–1T Safe-harbor lease information returns concerning qualified mass commuting vehicles (temporary).

In general. Form 6793, Safe Harbor Lease Information Return, is obsolete for safe harbor lease agreements executed after June 30, 1985. The parties to a safe harbor lease agreement under section 168(f)(8) executed after June 30, 1985 must file with their timely filed (including extensions) Federal income tax returns for the taxable year during which the lease term begins a statement containing the following information:

(a) The name, address, and taxpayer identification number of the lessor and the lessee;

(b) A description of the property with respect to which safe-harbor lease treatment is claimed;

(c) The date on which the lessee places the property in service, the date on which the lease begins, and the term of the lease;

(d) The recovery property class of the leased property under section 168(c)(2) (for example, 5-year);

(e) The terms of the payments between the parties to the lease transaction;

(f) The unadjusted basis of the property as defined in section 168(d)(1) and its adjusted basis as determined under § 5c.168(f)(8)–6(b)(3); and

(g) If the lessor is a partnership or grantor trust, the name, address, and taxpayer identification number of the partners or beneficiaries and the service center at which the income tax return of each partner or beneficiary is filed.

The lessor's failure to file the above-described statement shall void such agreement as a safe-harbor lease under section 168(f)(8) as of the date of the execution of the lease agreement. For rules regarding extensions of time for filing elections, see § 1.9100–1.

[T.D. 8033, 50 FR 27224, July 2, 1985]

§ 1.168(h)–1 Like-kind exchanges involving tax-exempt use property.

(a) *Scope*. (1) This section applies with respect to a direct or indirect transfer of property among related persons, including transfers made through a qualified intermediary (as defined in § 1.1031(k)–1(g)(4)) or other unrelated person, (a transfer) if—

(i) Section 1031 applies to any party to the transfer or to any related transaction; and

(ii) A principal purpose of the transfer or any related transaction is to avoid or limit the application of the alternative depreciation system (within the meaning of section 168(g)).

(2) For purposes of this section, a person is related to another person if they bear a relationship specified in section 267(b) or section 707(b)(1).

(b) *Allowable depreciation deduction for property subject to this section*—(1) *In general.* Property (tainted property) transferred directly or indirectly to a taxpayer by a related person (related party) as part of, or in connection with, a transaction in which the related party receives tax-exempt use property (related tax-exempt use property) will, if the tainted property is subject to an allowance for depreciation, be treated in the same manner as the related tax-exempt use property for purposes of determining the allowable depreciation deduction under section 167(a). Under this paragraph (b), the tainted property is depreciated by the taxpayer over the remaining recovery period of, and using the same depreciation method and convention as that of, the related tax-exempt use property.

(2) *Limitations*—(i) *Taxpayer's basis in related tax-exempt use property.* The rules of this paragraph (b) apply only with respect to so much of the taxpayer's basis in the tainted property as does not exceed the taxpayer's adjusted basis in the related tax-exempt use property prior to the transfer. Any excess of the taxpayer's basis in the tainted property over its adjusted basis in the related tax-exempt use property prior to the transfer is treated as property to which this section does not apply. This paragraph (b)(2)(i) does not apply if the related tax-exempt use property is not acquired from the taxpayer (e.g., if the taxpayer acquires the tainted property for cash but section 1031 nevertheless applies to the related party because the transfer involves a qualified intermediary).

(ii) *Application of section 168(i)(7).* This section does not apply to so much of the taxpayer's basis in the tainted property as is subject to section 168(i)(7).

(c) *Related tax-exempt use property.* (1) For purposes of paragraph (b) of this section, related tax-exempt use property includes—

(i) Property that is tax-exempt use property (as defined in section 168(h)) at the time of the transfer; and

(ii) Property that does not become tax-exempt use property until after the transfer if, at the time of the transfer, it was intended that the property become tax-exempt use property.

(2) For purposes of determining the remaining recovery period of the related tax-exempt use property in the circumstances described in paragraph (c)(1)(ii) of this section, the related tax-exempt use property will be treated as having, prior to the transfer, a lease term equal to the term of any lease that causes such property to become tax-exempt use property.

(d) *Examples.* The following examples illustrate the application of this section. The examples do not address common law doctrines or other authorities that may apply to recharacterize or alter the effects of the transactions described therein. Unless otherwise indicated, parties to the transactions are not related to one another.

Example 1. (i) X owns all of the stock of two subsidiaries, B and Z. X, B and Z do not file a consolidated federal income tax return. On May 5, 1995, B purchases an aircraft (*FA*) for $1 million and leases it to a foreign airline whose income is not subject to United States taxation and which is a tax-exempt entity as defined in section 168(h)(2). On the same date, Z owns an aircraft (*DA*) with a fair market value of $1 million, which has been, and continues to be, leased to an airline that is a United States taxpayer. Z's adjusted basis in DA is $0. The next day, at a time when each aircraft is still worth $1 million, B transfers FA to Z (subject to the lease to the foreign airline) in exchange for DA (subject to the lease to the airline that is a United States taxpayer). Z realizes gain of $1 million on the exchange, but that gain is not recognized pursuant to section 1031(a) because the exchange is of like-kind properties. Assume that a principal purpose of the transfer of DA to B or of FA to Z is to avoid the application of the alternative depreciation system. Following the exchange, Z has a $0 basis in FA pursuant to section 1031(d). B has a $1 million basis in DA.

(ii) B has acquired property from Z, a related person; Z's gain is not recognized pursuant to section 1031(a); Z has received tax-exempt use property as part of the transaction; and a principal purpose of the transfer of DA to B or of FA to Z is to avoid the application of the alternative depreciation system. Accordingly, the transaction is within the scope of this section. Pursuant to paragraph (b) of this section, B must recover its $1 million basis in DA over the remaining recovery period of, and using the same depreciation method and convention as that of, FA, the related tax-exempt use property.

(iii) If FA did not become tax-exempt use property until after the exchange, it would still be related tax-exempt use property and paragraph (b) of this section would apply if, at the time of the exchange, it was intended that FA become tax-exempt use property.

Example 2. (i) X owns all of the stock of two subsidiaries, B and Z. X, B and Z do not file a consolidated federal income tax return. B and Z each own identical aircraft. B's aircraft (*FA*) is leased to a tax-exempt entity as defined in section 168(h)(2) and has a fair market value of $1 million and an adjusted basis of $500,000. Z's aircraft (*DA*) is leased to a United States taxpayer and has a fair market value of $1 million and an adjusted basis of $10,000. On May 1, 1995, B and Z exchange aircraft, subject to their respective leases. B realizes gain of $500,000 and Z realizes gain of $990,000, but neither person recognizes gain because of the operation of section 1031(a). Moreover, assume that a principal purpose of the transfer of DA to B or of FA to Z is to avoid the application of the alternative depreciation system.

(ii) As in *Example 1*, B has acquired property from Z, a related person; Z's gain is not recognized pursuant to section 1031(a); Z has received tax-exempt use property as part of the transaction; and a principal purpose of the transfer of DA to B or of FA to Z is to avoid the application of the alternative depreciation system. Thus, the transaction is within the scope of this section even though B has held tax-exempt use property for a period of time and, during that time, has used the alternative depreciation system with respect to such property. Pursuant to paragraph (b) of this section, B, which has a substituted basis determined pursuant to section 1031(d) of $500,000 in DA, must depreciate the aircraft over the remaining recovery period of FA, using the same depreciation method and convention. Z holds tax-exempt use property with a basis of $10,000, which must be depreciated under the alternative depreciation system.

(iii) Assume the same facts as in paragraph (i) of this *Example 2*, except that B and Z are members of an affiliated group that files a consolidated federal income tax return. Of B's $500,000 basis in DA, $10,000 is subject to section 168(i)(7) and therefore not subject to this section. The remaining $490,000 of basis is subject to this section. But see §1.1502–80(f) making section 1031 inapplicable to intercompany transactions occurring in consolidated return years beginning on or after July 12, 1995.

(e) *Effective date.* This section applies to transfers made on or after April 20, 1995.

[T.D. 8667, 61 FR 18676, Apr. 29, 1996]

§1.168(i)–0 Table of contents for the general asset account rules.

This section lists the major paragraphs contained in §1.168(i)–1.

[T.D. 8566, 59 FR 51371, Oct. 11, 1994, as amended by T.D. 9115, 69 FR 9534, Mar. 1, 2004; T.D. 9132, 69 FR 33842, June 17, 2004; T.D. 9314, 72 FR 9249, Mar. 1, 2007; T.D. 9564, 76 FR 81085, Dec. 27, 2011; 77 FR 75016, Dec. 19, 2012]

§ 1.168(i)–0T Table of contents for the general asset account rules (temporary).

This section lists the major paragraphs contained in §1.168(i)–1T.

§ 1.168(i)–1T General asset accounts (temporary).

[T.D. 9564, 76 FR 81086, Dec. 27, 2011]

§ 1.168(i)–1 General asset accounts.

(a) through (l)(1) [Reserved] For further guidance, see §1.168(i)–1T(a) through (l)(1).

(l)(2) *Time for making election.* The election to apply this section shall be made on the taxpayer's timely filed (including extensions) income tax return for the taxable year in which the assets included in the general asset account are placed in service by the taxpayer.

(3) *Manner of making election.* In the year of election, a taxpayer makes the election under this section by typing or legibly printing at the top of the Form 4562, ''GENERAL ASSET ACCOUNT ELECTION MADE UNDER SECTION 168(i)(4),'' or in the manner provided for on Form 4562 and its instructions. The taxpayer shall maintain records (for example, ''General Asset Account #1—all 1995 additions in asset class 00.11 for Salt Lake City, Utah facility'') that identify the assets included in each general asset account, that establish the unadjusted depreciable basis and depreciation reserve of the general asset account, and that reflect the amount realized during the taxable year upon dispositions from each general asset account. (But see section 179(c) and §1.179–5 for the recordkeeping requirements for section 179

property.) The taxpayer's recordkeeping practices should be consistently applied to the general asset accounts. If Form 4562 is revised or renumbered, any reference in this section to that form shall be treated as a reference to the revised or renumbered form.

(m) [Reserved] For further guidance, see §1.168(i)–1T(m).

[T.D. 8566, 59 FR 51371, Oct. 11, 1994; 59 FR 64849, Dec. 16, 1994, as amended by T.D. 9115, 69 FR 9534, Mar. 1, 2004; T.D. 9132, 69 FR 33842, June 17, 2004; T.D. 9314, 72 FR 9249, Mar. 1, 2007; T.D. 9564, 76 FR 81086, Dec. 27, 2011; 77 FR 75016, Dec. 19, 2012]

§ 1.168(i)–1T General asset accounts (temporary).

(a) *Scope.* This section provides rules for general asset accounts under section 168(i)(4). The provisions of this section apply only to assets for which an election has been made under paragraph (l) of this section.

(b) *Definitions.* For purposes of this section, the following definitions apply:

(1) *Unadjusted depreciable basis* has the same meaning given such term in §1.168(b)–1(a)(3).

(2) *Unadjusted depreciable basis of the general asset account* is the sum of the unadjusted depreciable bases of all assets included in the general asset account.

(3) *Adjusted depreciable basis of the general asset account* is the unadjusted depreciable basis of the general asset account less the adjustments to basis described in section 1016(a)(2) and (3).

(4) *Expensed cost* is the amount of any allowable credit or deduction treated as a deduction allowable for depreciation or amortization for purposes of section 1245 (for example, a credit allowable under section 30 or a deduction allowable under section 179, 179A, or 190). Expensed cost does not include any additional first year depreciation deduction.

(5) *Mass assets* is a mass or group of individual items of depreciable assets—

(i) That are not necessarily homogenous;

(ii) Each of which is minor in value relative to the total value of the mass or group;

(iii) Numerous in quantity;

(iv) Usually accounted for only on a total dollar or quantity basis;

(v) With respect to which separate identification is impracticable; and

(vi) Placed in service in the same taxable year.

(6) *Remaining adjusted depreciable basis of the general asset account* is the unadjusted depreciable basis of the general asset account less the amount of the additional first year depreciation deduction allowed or allowable, whichever is greater, for the general asset account.

(c) *Establishment of general asset accounts*—(1) *Assets eligible for general asset accounts*—(i) *General rules.* Assets that are subject to either the general depreciation system of section 168(a) or the alternative depreciation system of section 168(g) may be accounted for in one or more general asset accounts. An asset is included in a general asset account only to the extent of the asset's unadjusted depreciable basis. However, an asset is not to be included in a general asset account if the asset is used both in a trade or business (or for the production of income) and in a personal activity at any time during the taxable year in which the asset is placed in service by the taxpayer or if the asset is placed in service and disposed of during the same taxable year.

(ii) *Special rules for assets generating foreign source income.* (A) Assets that generate foreign source income, both United States and foreign source income, or combined gross income of a FSC (as defined in former section 922), DISC (as defined in section 992(a)), or possessions corporation (as defined in section 936) and its related supplier, may be included in a general asset account if the requirements of paragraph (c)(2)(i) of this section are satisfied. If, however, the inclusion of these assets in a general asset account results in a substantial distortion of income, the Commissioner may disregard the general asset account election and make any reallocations of income or expense necessary to clearly reflect income.

(B) A general asset account shall be treated as a single asset for purposes of applying the rules in §1.861–9T(g)(3) (relating to allocation and apportionment of interest expense under the asset method). A general asset account that generates income in more than one grouping of income (statutory and residual) is a multiple category asset (as defined in §1.861–9T(g)(3)(ii)), and the income yield from the general asset account must be determined by applying the rules for multiple category assets as if the general asset account were a single asset.

(2) *Grouping assets in general asset accounts*—(i) *General rules.* If a taxpayer makes the election under paragraph (l) of this section, assets that are subject to the election are grouped into one or more general asset accounts. Assets that are eligible to be grouped into a single general asset account may be divided into more than one general asset account. Each general asset account must include only assets that—

(A) Have the same applicable depreciation method;

(B) Have the same applicable recovery period;

(C) Have the same applicable convention; and

(D) Are placed in service by the taxpayer in the same taxable year.

(ii) *Special rules.* In addition to the general rules in paragraph (c)(2)(i) of this section, the following rules apply when establishing general asset accounts—

(A) Assets subject to the mid-quarter convention may only be grouped into a general asset account with assets that are placed in service in the same quarter of the taxable year;

(B) Assets subject to the mid-month convention may only be grouped into a general asset account with assets that are placed in service in the same month of the taxable year;

(C) Passenger automobiles for which the depreciation allowance is limited under section 280F(a) must be grouped into a separate general asset account;

(D) Assets not eligible for any additional first year depreciation deduction (including assets for which the taxpayer elected not to deduct the additional first year depreciation) provided by, for example, section 168(k) through (n), 1400L(b), or 1400N(d), must be grouped into a separate general asset account;

(E) Assets eligible for the additional first year depreciation deduction may only be grouped into a general asset account with assets for which the taxpayer claimed the same percentage of the additional first year depreciation (for example, 30 percent, 50 percent, or 100 percent);

(F) Except for passenger automobiles described in paragraph (c)(2)(ii)(C) of this section, listed property (as defined in section 280F(d)(4)) must be grouped into a separate general asset account;

(G) Assets for which the depreciation allowance for the placed-in-service year is not determined by using an optional depreciation table (for further guidance, see section 8 of Rev. Proc. 87–57, 1987–2 CB 687, 693 (see §601.601(d)(2) of this chapter)) must be grouped into a separate general asset account;

(H) Mass assets that are or will be subject to paragraph (j)(2)(iii) of this section (disposed of or converted mass asset is identified by a mortality dispersion table) must be grouped into a separate general asset account; and

(I) Assets subject to paragraph (h)(3)(iii)(A) of this section (change in use results in a shorter recovery period or a more accelerated depreciation method) for which the depreciation allowance for the year of change (as defined in §1.168(i)–4(a)) is not determined by using an optional depreciation table must be grouped into a separate general asset account.

(3) *Examples.* The following examples illustrate the application of this paragraph (c):

Example 1. In 2012, J, a proprietorship with a calendar year-end, purchases and places in service one item of equipment that costs $550,000. This equipment is section 179 property and also is 5-year property under section 168(e). On its Federal income tax return for 2012, J makes an election under section 179 to expense $500,000 of the equipment's cost and makes an election under paragraph (l) of this section to include the equipment in a general asset account. As a result, the unadjusted depreciable basis of the equipment is $50,000. In accordance with paragraph (c)(1) of this section, J must include only $50,000 of the equipment's cost in the general asset account.

Example 2. The facts are the same as in *Example 1*, except that J also places in service 99 other items of equipment in 2012. On its Federal income tax return for 2012, J does not make an election under section 179 to expense the cost of any of the 100 items of equipment and does make an election under paragraph (l) of this section to include the

100 items of equipment in a general asset account. All of the 100 items of equipment placed in service in 2012 are 5-year property under section 168(e), are not listed property, and are not eligible for any additional first year depreciation deduction. J depreciates its 5-year property placed in service in 2012 using the optional depreciation table that corresponds with the general depreciation system, the 200-percent declining balance method, a 5-year recovery period, and the half-year convention. In accordance with paragraph (c)(2) of this section, J includes all of the 100 items of equipment in one general asset account.

Example 3. The facts are the same as in *Example 2,* except that J decides not to include all of the 100 items of equipment in one general asset account. Instead and in accordance with paragraph (c)(2) of this section, J establishes 100 general asset accounts and includes one item of equipment in each general asset account.

Example 4. K, a calendar-year corporation, is a wholesale distributer. In 2012, K places in service the following properties for use in its wholesale distribution business: computers, automobiles, and forklifts. On its federal income tax return for 2012, K does not make an election under section 179 to expense the cost of any of these items of equipment and does make an election under paragraph (l) of this section to include all of these items of equipment in a general asset account. All of these items are 5-year property under section 168(e) and are not eligible for any additional first year depreciation deduction. The computers are listed property, and the automobiles are listed property and are subject to section 280F(a). K depreciates its 5-year property placed in service in 2012 using the optional depreciation table that corresponds with the general depreciation system, the 200-percent declining balance method, a 5-year recovery period, and the half-year convention. Although the computers, automobiles, and forklifts are 5-year property, K cannot include all of them in one general asset account because the computers and automobiles are listed property. Further, even though the computers and automobiles are listed property, K cannot include them in one general asset account because the automobiles also are subject to section 280F(a). In accordance with paragraph (c)(2) of this section, K establishes three general asset accounts: One for the computers, one for the automobiles, and one for the forklifts.

Example 5. L, a fiscal-year corporation with a taxable year ending June 30, purchases and places in service ten items of new equipment in October 2011, and purchases and places in service five other items of new equipment in February 2012. On its federal income tax return for the taxable year ending June 30, 2012, L does not make an election under section 179 to expense the cost of any of these items of equipment and does make an election under paragraph (l) of this section to include all of these items of equipment in a general asset account. All of these items of equipment are 7-year property under section 168(e), are not listed property, and are not property described in section 168(k)(2)(B) or (C). All of the ten items of equipment placed in service in October 2011 are eligible for the 100-percent additional first year depreciation deduction provided by section 168(k)(5). All of the five items of equipment placed in service in February 2012 are eligible for the 50-percent additional first year depreciation deduction provided by section 168(k)(1). L depreciates its 7-year property placed in service for the taxable year ending June 30, 2012, using the optional depreciation table that corresponds with the general depreciation system, the 200-percent declining balance method, a 7-year recovery period, and the half-year convention. Although the 15 items of equipment are depreciated using the same depreciation method, recovery period, and convention, L cannot include all of them in one general asset account because they are eligible for different percentages of the additional first year depreciation deduction. In accordance with paragraph (c)(2) of this section, L establishes two general asset accounts: one for the ten items of equipment eligible for the 100-percent additional first year depreciation deduction, and one for the five items of equipment eligible for the 50-percent additional first year depreciation deduction.

(d) *Determination of depreciation allowance*—(1) *In general.* Depreciation allowances are determined for each general asset account. The depreciation allowances must be recorded in a depreciation reserve account for each general asset account. The allowance for depreciation under this section constitutes the amount of depreciation allowable under section 167(a).

(2) *Assets in general asset account are eligible for additional first year depreciation deduction.* If all the assets in a general asset account are eligible for the additional first year depreciation deduction, the taxpayer first must determine the allowable additional first year depreciation deduction for the general asset account for the placed-in-service year and then must determine the amount otherwise allowable as a depreciation deduction for the general asset account for the placed-in-service year and any subsequent taxable year. The allowable additional first year depreciation deduction for the general asset account for the placed-in-service

year is determined by multiplying the unadjusted depreciable basis of the general asset account by the additional first year depreciation deduction percentage applicable to the assets in the account (for example, 30 percent, 50 percent, or 100 percent). The remaining adjusted depreciable basis of the general asset account then is depreciated using the applicable depreciation method, recovery period, and convention for the assets in the account.

(3) *No assets in general asset account are eligible for additional first year depreciation deduction.* If none of the assets in a general asset account are eligible for the additional first year depreciation deduction, the taxpayer must determine the allowable depreciation deduction for the general asset account for the placed-in-service year and any subsequent taxable year by using the applicable depreciation method, recovery period, and convention for the assets in the account.

(4) *Special rule for passenger automobiles.* For purposes of applying section 280F(a), the depreciation allowance for a general asset account established for passenger automobiles is limited for each taxable year to the amount prescribed in section 280F(a) multiplied by the excess of the number of automobiles originally included in the account over the number of automobiles disposed of during the taxable year or in any prior taxable year in a transaction described in paragraphs (e)(3)(iii) (disposition of an asset in a qualifying disposition), (e)(3)(iv) (transactions subject to section 168(i)(7)), (e)(3)(v) (transactions subject to section 1031 or 1033), (e)(3)(vi) (technical termination of a partnership), (e)(3)(vii) (anti-abuse rule), (g) (assets subject to recapture), (h)(1) (conversion to personal use), or (h)(2) (business or income-producing use percentage changes) of this section.

(e) *Disposition of an asset from a general asset account*—(1) *Scope.* This paragraph (e) provides rules applicable to dispositions of assets included in a general asset account. For purposes of this paragraph (e), an asset in a general asset account is disposed of when ownership of the asset is transferred or when the asset is permanently withdrawn from use either in the taxpayer's trade or business or in the production of income. A disposition includes the sale, exchange, retirement, physical abandonment, or destruction of an asset. A disposition also occurs when an asset is transferred to a supplies, scrap, or similar account. A disposition also includes the retirement of a structural component (as defined in §1.48–1(e)(2)) of a building (as defined in §1.48–1(e)(1)).

(2) *General rules for a disposition*—(i) *No immediate recovery of basis.* Except as provided in paragraph (e)(3) of this section, immediately before a disposition of any asset in a general asset account, the asset is treated as having an adjusted depreciable basis (as defined in §1.168(b)–1(a)(4)) of zero for purposes of section 1011. Therefore, no loss is realized upon the disposition of an asset from the general asset account. Similarly, where an asset is disposed of by transfer to a supplies, scrap, or similar account, the basis of the asset in the supplies, scrap, or similar account will be zero.

(ii) *Treatment of amount realized.* Any amount realized on a disposition is recognized as ordinary income (notwithstanding any other provision of subtitle A of the Internal Revenue Code) to the extent the sum of the unadjusted depreciable basis of the general asset account and any expensed cost (as defined in paragraph (b)(4) of this section) for assets in the account exceeds any amounts previously recognized as ordinary income upon the disposition of other assets in the account. The recognition and character of any excess amount realized are determined under other applicable provisions of the Internal Revenue Code (other than sections 1245 and 1250 or provisions of the Internal Revenue Code that treat gain on a disposition as subject to section 1245 or 1250).

(iii) *Effect of disposition on a general asset account.* The unadjusted depreciable basis and the depreciation reserve of the general asset account are not affected as a result of a disposition of an asset from the general asset account.

(iv) *Coordination with nonrecognition provisions.* For purposes of determining the basis of an asset acquired in a transaction, other than a transaction described in paragraphs (e)(3)(iv) (pertaining to transactions subject to section 168(i)(7)), (e)(3)(v) (pertaining to transactions subject to section 1031 or 1033), and (e)(3)(vi) (pertaining to technical terminations of partnerships) of this section, to which a nonrecognition section of the Internal Revenue Code applies (determined without regard to this section), the amount of ordinary income recognized under this paragraph (e)(2) is treated as the amount of gain recognized on the disposition.

(v) *Manner of disposition.* The manner of disposition of an asset in a general asset account (for example, normal retirement, abnormal retirement, ordinary retirement, or extraordinary retirement) is not taken into account in determining whether a disposition occurs or gain or loss is recognized.

(vi) *Disposition by transfer to a supplies account.* If a taxpayer made an election under §1.162–3T(d) to treat the cost of any material and supply as a capital expenditure subject to the allowance for depreciation and also made an election under paragraph (l) of this section to include that material and supply in a general asset account, the taxpayer can dispose of the material and supply by transferring it to a supplies account only if the taxpayer has obtained the consent of the Commissioner to revoke the §1.162–3T(d) election. See §1.162–3T(d)(3) for the procedures for revoking a §1.162–3T(d) election.

(vii) *Leasehold improvements.* The rules of paragraph (e) of this section also apply to—

(A) A lessor of leased property that made an improvement to that property for the lessee of the property, has a depreciable basis in the improvement, made an election under paragraph (l) of this section to include the improvement in a general asset account, and disposes of the improvement before or upon the termination of the lease with the lessee. *See* section 168(i)(8)(B); and

(B) A lessee of leased property that made an improvement to that property, has a depreciable basis in the improvement, made an election under paragraph (l) of this section to include the improvement in a general asset account, and disposes of the improvement before or upon the termination of the lease.

(viii) *Determination of asset disposed of*—(A) *In general.* For purposes of applying paragraph (e) of this section to the disposition of an asset in a general asset account (instead of the disposition of the general asset account), the facts and circumstances of each disposition are considered in determining what is the appropriate asset disposed of. Except as provided in paragraph (e)(2)(viii)(B) of this section, the asset cannot be larger than the unit of property as determined under §1.263(a)–3T(e)(2), (e)(3), and (e)(5) or as otherwise determined in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see, for example, Rev. Proc. 2011–38, 2011–18 IRB 743, for units of property for wireless network assets (see §601.601(d)(2)(ii)(*b*) of this chapter)).

(B) *Exceptions.* For purposes of applying paragraph (e) of this section to the disposition of an asset in a general asset account (instead of the disposition of the general asset account):

(*1*) Each building (not including its structural components) is the asset except as provided in §1.1250–1(a)(2)(ii) or in paragraph (e)(2)(viii)(B)(*2*) or (*5*) of this section.

(*2*) If a building has two or more condominium or cooperative units, each condominium or cooperative unit (not including its structural components) is the asset except as provided in §1.1250–1(a)(2)(ii) or in paragraph (e)(2)(viii)(B)(*5*) of this section.

(*3*) Each structural component (including all components thereof) of a building, condominium unit, or cooperative unit is the asset.

(*4*) If a taxpayer properly includes an item in one of the asset classes 00.11 through 00.4 of Rev. Proc. 87–56 (1987–2 CB 674) (see §601.601(d)(2)(ii)(*b*) of this chapter) or properly classifies an item in one of the categories under section 168(e)(3) (except for a category that includes buildings or structural components; for example, retail motor fuels outlet, qualified leasehold improvement property, qualified restaurant property, and qualified retail improvement property), each item is the asset provided it is not larger than the unit of property as determined under §1.263(a)–3T(e)(3) or (e)(5) or as otherwise determined in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see §601.601(d)(2)(ii)(*b*) of this chapter), or provided paragraph (e)(2)(viii)(B)(*5*) of this section does not apply to the item. For example, each desk is the asset, each computer is the asset, and each qualified smart electric meter is the asset (assuming these assets are not larger than the unit of property as determined under §1.263(a)–3T(e)(3) or (e)(5) or as otherwise determined in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see §601.601(d)(2)(ii)(*b*) of this chapter)).

(*5*) If the taxpayer places in service an improvement or addition to an asset after the taxpayer placed the asset in service, the improvement or addition is a separate asset provided it is not larger than the unit of property as determined under §1.263(a)–3T(e)(3) or (e)(5) or as otherwise determined in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see §601.601(d)(2)(ii)(*b*) of this chapter).

(*6*) If an asset is not described in one of the asset classes 00.11 through 00.4 of Rev. Proc. 87–56 (1987–2 CB 674) (see §601.601(d)(2)(ii)(*b*) of this chapter) or in one of the categories under section 168(e)(3), a taxpayer also may use any reasonable, consistent method to treat each of the asset's components as the asset.

(ix) *Examples*. The following examples illustrate the application of this paragraph (e)(2):

Example 1. A, a calendar-year partnership, maintains one general asset account for one office building that cost $10 million. A discovers a leak in the roof of this building and, after consulting with a contractor, decides to replace the entire roof. The retirement of the roof, which is a structural component of the building, is a disposition under paragraph (e)(1) of this section. However, this roof has an unadjusted depreciable basis of zero pursuant to paragraph (e)(2)(i) of this section. Accordingly, A does not recognize any loss upon the retirement of the roof. Instead, the unadjusted depreciable basis of the general asset account for the office building is not affected by the retirement of the roof and, as a result, A continues to depreciate the $10 million cost of this general asset account.

Example 2. B, a calendar-year commercial airline company, maintains one general asset account for five aircrafts that cost a total of $500 million. B replaces the existing engines on one of the aircrafts with new engines and treats each engine of an aircraft as a major component of the aircraft. Assume each aircraft is a unit of property as determined under §1.263(a)–3T(e)(3). However, for disposition purposes of general asset accounts, B consistently treats each major component of an aircraft as the asset. Thus, the retirement of these replaced engines is a disposition under paragraph (e)(1) of this section. However, the engines have an unadjusted depreciable basis of zero pursuant to paragraph (e)(2)(i) of this section. Accordingly, B does not recognize any loss upon the retirement of the engines. Instead, the unadjusted depreciable basis of the general asset account for the five aircrafts is not affected by the retirement of the engines and, as a result, B continues to depreciate the $500 million cost of this general asset account.

Example 3. (i) R, a calendar-year corporation, maintains one general asset account for ten machines. The machines cost a total of $10,000 and are placed in service in June 2012. Of the ten machines, one machine costs $8,200 and nine machines cost a total of $1,800. Assume R depreciates this general asset account using the optional depreciation table that corresponds with the general depreciation system, the 200-percent declining balance method, a 5-year recovery period, and a half-year convention. R does not make a section 179 election for any of the machines, and all of the machines are not eligible for any additional first year depreciation deduction. As of January 1, 2013, the depreciation reserve of the account is $2,000 [$10,000 × 20 percent].

(ii) On February 8, 2013, R sells the machine that cost $8,200 to an unrelated party for $9,000. Under paragraph (e)(2)(i) of this section, this machine has an adjusted depreciable basis of zero.

(iii) On its 2013 tax return, R recognizes the amount realized of $9,000 as ordinary income because such amount does not exceed the unadjusted depreciable basis of the general asset account ($10,000), plus any expensed cost for assets in the account ($0), less amounts previously recognized as ordinary income ($0). Moreover, the unadjusted depreciable basis and depreciation reserve of the account are not affected by the disposition of the machine. Thus, the depreciation allowance for the account in 2013 is $3,200 ($10,000 × 32 percent).

Example 4. (i) The facts are the same as in *Example 3*. In addition, on June 4, 2014, R sells seven machines to an unrelated party for a total of $1,100. In accordance with paragraph (e)(2)(i) of this section, these machines have an adjusted depreciable basis of zero.

(ii) On its 2014 tax return, R recognizes $1,000 as ordinary income (the unadjusted depreciable basis of $10,000, plus the expensed cost of $0, less the amount of $9,000 previously recognized as ordinary income). The recognition and character of the excess amount realized of $100 ($1,100 − $1,000) are determined under applicable provisions of the Internal Revenue Code other than section 1245 (such as section 1231). Moreover, the unadjusted depreciable basis and depreciation reserve of the account are not affected by the disposition of the machines. Thus, the depreciation allowance for the account in 2014 is $1,920 ($10,000 × 19.2 percent).

(3) *Special rules*—(i) *In general*. This paragraph (e)(3) provides the rules for terminating general asset account treatment upon certain dispositions. While the rules under paragraphs (e)(3)(ii) and (iii) of this section are optional rules, the rules under paragraphs (e)(3)(iv), (v), (vi), and (vii) of this section are mandatory rules. A taxpayer elects to apply paragraph (e)(3)(ii) or (iii) of this section by reporting the gain, loss, or other deduction on the taxpayer's timely filed original Federal income tax return (including extensions) for the taxable year in which the disposition occurs. A taxpayer may revoke the election to apply paragraph (e)(3)(ii) or (iii) of this section only by filing a request for a private letter ruling and obtaining the Commissioner's consent to revoke the election. The Commissioner may grant a request to revoke this election if the taxpayer can demonstrate good cause for the revocation. The election to apply paragraph (e)(3)(ii) or (iii) of this section may not be made or revoked through the filing of an application for change in accounting method. For purposes of applying paragraph (e)(3)(iii) through (vii) of this section, see paragraph (j) of this section for identifying an asset disposed of and its unadjusted depreciable basis.

(ii) *Disposition of all assets remaining in a general asset account*—(A) *Optional termination of a general asset account*. Upon the disposition of all of the assets, or the last asset, in a general asset account, a taxpayer may apply this paragraph (e)(3)(ii) to recover the adjusted depreciable basis of the general asset account (rather than having paragraph (e)(2) of this section apply). Under this paragraph (e)(3)(ii), the general asset account terminates and the amount of gain or loss for the general asset account is determined under section 1001(a) by taking into account the adjusted depreciable basis of the general asset account at the time of the disposition (as determined under the applicable convention for the general asset account). The recognition and character of the gain or loss are determined under other applicable provisions of the Internal Revenue Code, except that the amount of gain subject to section 1245 (or section 1250) is limited to the excess of the depreciation allowed or allowable for the general asset account, including any expensed cost (or the excess of the additional depreciation allowed or allowable for the general asset account), over any amounts previously recognized as ordinary income under paragraph (e)(2) of this section.

(B) *Examples*. The following examples illustrate the application of this paragraph (e)(3)(ii):

Example 1. (i) T, a calendar-year corporation, maintains a general asset account for 1,000 calculators. The calculators cost a total of $60,000 and are placed in service in 2012. Assume T depreciates this general asset account using the optional depreciation table that corresponds with the general depreciation system, the 200-percent declining balance method, a 5-year recovery period, and a half-year convention. T does not make a section 179 election for any of the calculators, and all of the calculators are not eligible for any additional first year depreciation deduction. In 2013, T sells 200 of the calculators to an unrelated party for a total of $10,000 and recognizes the $10,000 as ordinary income in accordance with paragraph (e)(2) of this section.

(ii) On March 26, 2014, T sells the remaining calculators in the general asset account to an unrelated party for $35,000. T elects to apply paragraph (e)(3)(ii) of this section. As a result, the account terminates and gain or loss is determined for the account.

(iii) On the date of disposition, the adjusted depreciable basis of the account is $23,040 (unadjusted depreciable basis of $60,000 less the depreciation allowed or allowable of $36,960). Thus, in 2014, T recognizes gain of $11,960 (amount realized of $35,000 less the adjusted depreciable basis of $23,040). The gain of $11,960 is subject to section 1245 to the extent of the depreciation allowed or allowable for the account (plus the expensed cost for assets in the account) less the amounts previously recognized as ordinary income ($36,960 + $0 − $10,000 = $26,960). As a result, the entire gain of $11,960 is subject to section 1245.

Example 2. (i) J, a calendar-year corporation, maintains a general asset account for one item of equipment. This equipment costs $2,000 and is placed in service in 2012. Assume J depreciates this general asset account using the optional depreciation table that corresponds with the general depreciation system, the 200-percent declining balance method, a 5-year recovery period, and a half-year convention. J does not make a section 179 election for the equipment, and it is not eligible for any additional first year depreciation deduction. In June 2014, J sells the equipment to an unrelated party for $1,000. J elects to apply paragraph (e)(3)(ii) of this section. As a result, the account terminates and gain or loss is determined for the account.

(ii) On the date of disposition, the adjusted depreciable basis of the account is $768 (unadjusted depreciable basis of $2,000 less the depreciation allowed or allowable of $1,232). Thus, in 2014, J recognizes gain of $232 (amount realized of $1,000 less the adjusted depreciable basis of $768). The gain of $232 is subject to section 1245 to the extent of the depreciation allowed or allowable for the account (plus the expensed cost for assets in the account) less the amounts previously recognized as ordinary income ($1,232 + $0 − $0 = $1,232). As a result, the entire gain of $232 is subject to section 1245.

(iii) *Disposition of an asset in a qualifying disposition*—(A) *Optional determination of the amount of gain, loss, or other deduction.* In the case of a qualifying disposition of an asset (described in paragraph (e)(3)(iii)(B) of this section), a taxpayer may elect to apply this paragraph (e)(3)(iii) (rather than having paragraph (e)(2) of this section apply). Under this paragraph (e)(3)(iii), general asset account treatment for the asset terminates as of the first day of the taxable year in which the qualifying disposition occurs, and the amount of gain, loss, or other deduction for the asset is determined under §1.168(i)–8T by taking into account the asset's adjusted depreciable basis at the time of the disposition. The adjusted depreciable basis of the asset at the time of the disposition (as determined under the applicable convention for the general asset account in which the asset was included) equals the unadjusted depreciable basis of the asset less the depreciation allowed or allowable for the asset, computed by using the depreciation method, recovery period, and convention applicable to the general asset account in which the asset was included and by including the portion of the additional first year depreciation deduction claimed for the general asset account that is attributable to the asset disposed of. The recognition and character of the gain, loss, or other deduction are determined under other applicable provisions of the Internal Revenue Code, except that the amount of gain subject to section 1245 (or section 1250) is limited to the lesser of—

(*1*) The depreciation allowed or allowable for the asset, including any expensed cost (or the additional depreciation allowed or allowable for the asset); or

(*2*) The excess of—

(*i*) The original unadjusted depreciable basis of the general asset account plus, in the case of section 1245 property originally included in the general asset account, any expensed cost; over

(*ii*) The cumulative amounts of gain previously recognized as ordinary income under either paragraph (e)(2) of this section or section 1245 (or section 1250).

(B) *Qualifying dispositions.* A *qualifying disposition* is a disposition that does not involve all the assets, or the last asset, remaining in a general asset account and that is not described in paragraphs (e)(3)(iv) (pertaining to transactions subject to section 168(i)(7)), (v) (pertaining to transactions subject to section 1031 or 1033), (vi) (pertaining to technical terminations of partnerships), or (vii) (anti-abuse rule) of this section.

(C) *Effect of a qualifying disposition on a general asset account.* If the taxpayer elects to apply this paragraph (e)(3)(iii) to a qualifying disposition of an asset, then—

(*1*) The asset is removed from the general asset account as of the first day of the taxable year in which the qualifying disposition occurs. For that taxable year, the taxpayer accounts for the asset in a single asset account in accordance with the rules under §1.168(i)–7T(b);

(*2*) The unadjusted depreciable basis of the general asset account is reduced by the unadjusted depreciable basis of the asset as of the first day of the taxable year in which the disposition occurs;

(*3*) The depreciation reserve of the general asset account is reduced by the depreciation allowed or allowable for the asset as of the end of the taxable year immediately preceding the year of disposition, computed by using the depreciation method, recovery period, and convention applicable to the general asset account in which the asset was included and by including the portion of the additional first year depreciation deduction claimed for the general asset account that is attributable to the asset disposed of; and

(*4*) For purposes of determining the amount of gain realized on subsequent dispositions that is subject to ordinary income treatment under paragraph (e)(2)(ii) of this section, the amount of any expensed cost with respect to the asset is disregarded.

(D) *Example.* The following example illustrates the application of this paragraph (e)(3)(iii):

Example. (i) Z, a calendar-year corporation, maintains one general asset account for 12 machines. Each machine costs $15,000 and is placed in service in 2012. Of the 12 machines, nine machines that cost a total of $135,000 are used in Z's Kentucky plant, and three machines that cost a total of $45,000 are used in Z's Ohio plant. Assume Z depreciates this general asset account using the optional depreciation table that corresponds with the general depreciation system, the 200-percent declining balance method, a 5-year recovery period, and the half-year convention. Z does not make a section 179 election for any of the machines, and all of the machines are not eligible for any additional first year depreciation deduction. As of January 1, 2014, the depreciation reserve for the account is $93,600.

(ii) On May 27, 2014, Z sells its entire manufacturing plant in Ohio to an unrelated party. The sales proceeds allocated to each of the three machines at the Ohio plant is $5,000. Because this transaction is a qualifying disposition under paragraph (e)(3)(iii)(B) of this section, Z elects to apply paragraph (e)(3)(iii) of this section.

(iii) For Z's 2014 return, the depreciation allowance for the account is computed as follows. As of December 31, 2013, the depreciation allowed or allowable for the three machines at the Ohio plant is $23,400. Thus, as of January 1, 2014, the unadjusted depreciable basis of the account is reduced from $180,000 to $135,000 ($180,000 less the unadjusted depreciable basis of $45,000 for the three machines), and the depreciation reserve of the account is decreased from $93,600 to $70,200 ($93,600 less the depreciation allowed or allowable of $23,400 for the three machines as of December 31, 2013). Consequently, the depreciation allowance for the account in 2014 is $25,920 ($135,000 × 19.2 percent).

(iv) For Z's 2014 return, gain or loss for each of the three machines at the Ohio plant is determined as follows. The depreciation allowed or allowable in 2014 for each machine is $1,440 [($15,000 × 19.2 percent)/2]. Thus, the adjusted depreciable basis of each machine under section 1011 is $5,760 (the adjusted depreciable basis of $7,200 removed from the account less the depreciation allowed or allowable of $1,440 in 2014). As a result, the loss recognized in 2014 for each machine is $760 ($5,000 − $5,760), which is subject to section 1231.

(iv) *Transactions subject to section 168(i)(7)*—(A) *In general.* If a taxpayer transfers one or more assets in a general asset account in a transaction described in section 168(i)(7)(B) (pertaining to treatment of transferees in certain nonrecognition transactions), the taxpayer (the transferor) and the transferee must apply this paragraph (e)(3)(iv) to the asset (instead of applying paragraph (e)(2), (e)(3)(ii), or (e)(3)(iii) of this section). The transferee is bound by the transferor's election under paragraph (l) of this section for the portion of the transferee's basis in the asset that does not exceed the transferor's adjusted depreciable basis of the general asset account or the asset, as applicable (as determined under paragraph (e)(3)(iv)(B)(*2*) or (e)(3)(iv)(C)(*2*) of this section, as applicable).

(B) *All assets remaining in general asset account are transferred.* If a taxpayer transfers all the assets, or the last asset, in a general asset account in a transaction described in section 168(i)(7)(B)—

(*1*) The taxpayer (the transferor) must terminate the general asset account on the date of the transfer. The allowable depreciation deduction for the general asset account for the transferor's taxable year in which the section 168(i)(7)(B) transaction occurs is computed by using the depreciation method, recovery period, and convention applicable to the general asset account. This allowable depreciation deduction is allocated between the transferor and the transferee on a monthly basis. This allocation is made in accordance with the rules in § 1.168(d)–1(b)(7)(ii) for allocating the depreciation deduction between the transferor and the transferee;

(*2*) The transferee must establish a new general asset account for all the assets, or the last asset, in the taxable year in which the section 168(i)(7)(B) transaction occurs for the portion of its basis in the assets that does not exceed the transferor's adjusted depreciable basis of the general asset account in which all the assets, or the last asset, were included. The transferor's adjusted depreciable basis of this general asset account is equal to the adjusted depreciable basis of that account as of the beginning of the transferor's taxable year in which the transaction occurs, decreased by the amount of depreciation allocable to the transferor for the year of the transfer (as determined under paragraph (e)(3)(iv)(B)(*1*) of this section). The transferee is treated as the transferor for purposes of computing the allowable depreciation deduction for the new general asset account under section 168. The new general asset account must be established in accordance with the rules in paragraph (c) of this section, except that the unadjusted depreciable bases of all the assets or the last asset, and the greater of the depreciation allowed or allowable for all the assets or the last asset (including the amount of depreciation for the transferred assets that is allocable to the transferor for the year of the transfer), are included in the newly established general asset account. Consequently, this general asset account in the year of the transfer will have a beginning balance for both the unadjusted depreciable basis and the depreciation reserve of the general asset account; and

(*3*) For purposes of section 168 and this section, the transferee treats the portion of its basis in the assets that exceeds the transferor's adjusted depreciable basis of the general asset account in which all the assets, or the last asset, were included (as determined under paragraph (e)(3)(iv)(B)(*2*) of this section) as a separate asset that the transferee placed in service on the date of the transfer. The transferee accounts for this asset under § 1.168(i)–7T or may make an election under paragraph (l) of this section to include the asset in a general asset account.

(C) *Not all assets remaining in general asset account are transferred.* If a taxpayer transfers an asset in a general asset account in a transaction described in section 168(i)(7)(B) and if paragraph (e)(3)(iv)(B) of this section does not apply to this asset—

(*1*) The taxpayer (the transferor) must remove the transferred asset from the general asset account in which the asset is included, as of the first day of the taxable year in which the section 168(i)(7)(B) transaction occurs. In addition, the adjustments to the general asset account described in paragraph (e)(3)(iii)(C)(*2*) through (*4*) of this section must be made. The allowable depreciation deduction for the asset for the transferor's taxable year in which the section 168(i)(7)(B) transaction occurs is computed by using the depreciation method, recovery period, and convention applicable to the general asset account in which the asset was included. This allowable depreciation deduction is allocated between the transferor and the transferee on a monthly basis. This allocation is made in accordance with the rules in § 1.168(d)–1(b)(7)(ii) for allocating the depreciation deduction between the transferor and the transferee;

(*2*) The transferee must establish a new general asset account for the asset in the taxable year in which the section 168(i)(7)(B) transaction occurs for the portion of its basis in the asset that does not exceed the transferor's adjusted depreciable basis of the asset. The transferor's adjusted depreciable basis of this asset is equal to the adjusted depreciable basis of the asset as of the beginning of the transferor's taxable year in which the transaction occurs, decreased by the amount of depreciation allocable to the transferor for the year of the transfer (as determined under paragraph (e)(3)(iv)(C)(*1*) of this section). The transferee is treated as the transferor for purposes of computing the allowable depreciation deduction for the new general asset account under section 168. The new general asset account must be established in accordance with the rules in paragraph (c) of this section, except that the unadjusted depreciable basis of the asset, and the greater of the depreciation allowed or allowable for the asset (including the amount of depreciation for the transferred asset that is allocable to the transferor for the year of the transfer), are included in the newly established general asset account. Consequently, this general asset account in the year of the transfer will have a beginning balance for both the unadjusted depreciable basis and the depreciation reserve of the general asset account; and

(*3*) For purposes of section 168 and this section, the transferee treats the portion of its basis in the asset that exceeds the transferor's adjusted depreciable basis of the asset (as determined under paragraph (e)(3)(iv)(C)(*2*) of this section) as a separate asset that the transferee placed in service on the date of the transfer. The transferee accounts for this asset under §1.168(i)–7T or may make an election under paragraph (l) of this section to include the asset in a general asset account.

(v) *Transactions subject to section 1031 or section 1033*—(A) *Like-kind exchange or involuntary conversion of all assets remaining in a general asset account.* If all the assets, or the last asset, in a general asset account are transferred by a taxpayer in a like-kind exchange (as defined under §1.168–6(b)(11)) or in an involuntary conversion (as defined under §1.168–6(b)(12)), the taxpayer must apply this paragraph (e)(3)(v)(A) (instead of applying paragraph (e)(2), (e)(3)(ii), or (e)(3)(iii) of this section). Under this paragraph (e)(3)(v)(A), the general asset account terminates as of the first day of the year of disposition (as defined in §1.168(i)–6(b)(5)) and—

(*1*) The amount of gain or loss for the general asset account is determined under section 1001(a) by taking into account the adjusted depreciable basis of the general asset account at the time of disposition (as defined in §1.168(i)–6(b)(3)). The depreciation allowance for the general asset account in the year of disposition is determined in the same manner as the depreciation allowance for the relinquished MACRS property (as defined in §1.168(i)–6(b)(2)) in the year of disposition is determined under §1.168(i)–6. The recognition and character of gain or loss are determined in accordance with paragraph (e)(3)(ii)(A) of this section (notwithstanding that paragraph (e)(3)(ii) of this section is an optional rule); and

(*2*) The adjusted depreciable basis of the general asset account at the time of disposition is treated as the adjusted depreciable basis of the relinquished MACRS property.

(B) *Like-kind exchange or involuntary conversion of less than all assets remaining in a general asset account.* If an asset in a general asset account is transferred by a taxpayer in a like-kind exchange or in an involuntary conversion and if paragraph (e)(3)(v)(A) of this section does not apply to this asset, the taxpayer must apply this paragraph (e)(3)(v)(B) (instead of applying paragraph (e)(2), (e)(3)(ii), or (e)(3)(iii) of this section). Under this paragraph (e)(3)(v)(B), general asset account treatment for the asset terminates as of the first day of the year of disposition (as defined in §1.168(i)–6(b)(5)), and—

(*1*) The amount of gain or loss for the asset is determined by taking into account the asset's adjusted depreciable basis at the time of disposition (as defined in §1.168(i)–6(b)(3)). The adjusted depreciable basis of the asset at the time of disposition equals the unadjusted depreciable basis of the asset less the depreciation allowed or allowable for the asset, computed by using the depreciation method, recovery period, and convention applicable to the general asset account in which the asset was included and by including the portion of the additional first year depreciation deduction claimed for the general asset account that is attributable to the relinquished asset. The depreciation allowance for the asset in the year of disposition is determined in the same manner as the depreciation allowance for the relinquished MACRS property (as defined in §1.168(i)–6(b)(2)) in the year of disposition is determined under §1.168(i)–6. The recognition and character of the gain or loss are determined in accordance with paragraph (e)(3)(iii)(A) of this section (notwithstanding that paragraph (e)(3)(iii) of this section is an optional rule); and

(*2*) As of the first day of the year of disposition, the taxpayer must remove the relinquished asset from the general asset account and make the adjustments to the general asset account described in paragraph (e)(3)(iii)(C)(*2*) through (*4*) of this section.

(vi) *Technical termination of a partnership.* In the case of a technical termination of a partnership under section 708(b)(1)(B), the terminated partnership must apply this paragraph (e)(3)(vi) (instead of applying paragraph (e)(2), (e)(3)(ii), or (e)(3)(iii) of this section). Under this paragraph (e)(3)(vi), all of the terminated partnership's general asset accounts terminate as of the date of its termination under section 708(b)(1)(B). The terminated partnership computes the allowable depreciation deduction for each of its general asset accounts for the taxable year in which the technical termination occurs by using the depreciation method, recovery period, and convention applicable to the general asset account. The new partnership is not bound by the terminated partnership's election under paragraph (l) of this section.

(vii) *Anti-abuse rule*—(A) *In general.* If an asset in a general asset account is disposed of by a taxpayer in a transaction described in paragraph (e)(3)(vii)(B) of this section, general asset account treatment for the asset terminates as of the first day of the taxable year in which the disposition occurs. Consequently, the taxpayer must determine the amount of gain, loss, or other deduction attributable to the disposition in the manner described in paragraph (e)(3)(iii)(A) of this section (notwithstanding that paragraph (e)(3)(iii)(A) of this section is an optional rule) and must make the adjustments to the general asset account described in paragraph (e)(3)(iii)(C)(*1*) through (*4*) of this section.

(B) *Abusive transactions.* A transaction is described in this paragraph (e)(3)(vii)(B) if the transaction is not described in paragraph (e)(3)(iv), (e)(3)(v), or (e)(3)(vi) of this section, and if the transaction is entered into, or made, with a principal purpose of achieving a tax benefit or result that would not be available absent an election under this section. Examples of these types of transactions include—

(*1*) A transaction entered into with a principal purpose of shifting income or deductions among taxpayers in a manner that would not be possible absent an election under this section in order to take advantage of differing effective tax rates among the taxpayers; or

(*2*) An election made under this section with a principal purpose of disposing of an asset from a general asset account in order to utilize an expiring net operating loss or credit if the transaction is not a bona fide disposition. The fact that a taxpayer with a net operating loss carryover or a credit carryover transfers an asset to a related person or transfers an asset pursuant to an arrangement where the asset continues to be used (or is available for use) by the taxpayer pursuant to a lease (or otherwise) indicates, absent strong evidence to the contrary, that the transaction is described in this paragraph (e)(3)(vii)(B).

(f) *Assets generating foreign source income*—(1) *In general.* This paragraph (f) provides the rules for determining the source of any income, gain, or loss recognized, and the appropriate section 904(d) separate limitation category or categories for any foreign source income, gain, or loss recognized on a disposition (within the meaning of paragraph (e)(1) of this section) of an asset in a general asset account that consists of assets generating both United States and foreign source income. These rules apply only to a disposition to which paragraphs (e)(2) (general disposition rules), (e)(3)(ii) (disposition of all assets remaining in a general asset account), (e)(3)(iii) (disposition of an asset in a qualifying disposition), (e)(3)(v) (transactions subject to section 1031 or 1033), or (e)(3)(vii) (anti-abuse rule) of this section applies.

(2) *Source of ordinary income, gain, or loss*—(i) *Source determined by allocation and apportionment of depreciation allowed.* The amount of any ordinary income, gain, or loss that is recognized on the disposition of an asset in a general asset account must be apportioned between United States and foreign

sources based on the allocation and apportionment of the—

(A) Depreciation allowed for the general asset account as of the end of the taxable year in which the disposition occurs if paragraph (e)(2) of this section applies to the disposition;

(B) Depreciation allowed for the general asset account as of the time of disposition if the taxpayer applies paragraph (e)(3)(ii) of this section to the disposition of all assets, or the last asset, in the general asset account, or if all the assets, or the last asset, in the general asset account are disposed of in a transaction described in paragraph (e)(3)(v)(A) of this section; or

(C) Depreciation allowed for the asset disposed of for only the taxable year in which the disposition occurs if the taxpayer applies paragraph (e)(3)(iii) of this section to the disposition of the asset in a qualifying disposition, if the asset is disposed of in a transaction described in paragraph (e)(3)(v)(B) of this section (like-kind exchange or involuntary conversion), or if the asset is disposed of in a transaction described in paragraph (e)(3)(vii) of this section (anti-abuse rule).

(ii) *Formula for determining foreign source income, gain, or loss.* The amount of ordinary income, gain, or loss recognized on the disposition that shall be treated as foreign source income, gain, or loss must be determined under the formula in this paragraph (f)(2)(ii). For purposes of this formula, the allowed depreciation deductions are determined for the applicable time period provided in paragraph (f)(2)(i) of this section. The formula is:

Foreign Source Income, Gain, or Loss from the Disposition of an Asset.	=	Total Ordinary Income, Gain, or Loss from the Disposition of an Asset.	×	Allowed Depreciation Deductions Allocated and Apportioned to Foreign Source Income/Total Allowed Depreciation Deductions for the General Asset Account or for the Asset Disposed of (as applicable).

(3) *Section 904(d) separate categories.* If the assets in the general asset account generate foreign source income in more than one separate category under section 904(d)(1) or another section of the Internal Revenue Code (for example, income treated as foreign source income under section 904(g)(10)), or under a United States income tax treaty that requires the foreign tax credit limitation to be determined separately for specified types of income, the amount of ‘‘foreign source income, gain, or loss from the disposition of an asset’’ (as determined under the formula in paragraph (f)(2)(ii) of this section) must be allocated and apportioned to the applicable separate category or categories under the formula in this paragraph (f)(3). For purposes of this formula, the allowed depreciation deductions are determined for the applicable time period provided in paragraph (f)(2)(i) of this section. The formula is:

Foreign Source Income, Gain, or Loss in a Separate Category.	=	Foreign Source Income, Gain, or Loss from The Disposition of an Asset.	×	Allowed Depreciation Deductions Allocated and Apportioned to a Separate Category Total/Allowed Depreciation Deductions and Apportioned to Foreign Source Income.

(g) *Assets subject to recapture.* If the basis of an asset in a general asset account is increased as a result of the recapture of any allowable credit or deduction (for example, the basis adjustment for the recapture amount under section 30(d)(2), 50(c)(2), 168(l)(7), 168(n)(4), 179(d)(10), 179A(e)(4), or 1400N(d)(5)), general asset account treatment for the asset terminates as of the first day of the taxable year in which the recapture event occurs. Consequently, the taxpayer must remove the asset from the general asset account as of that day and must make the adjustments to the general asset account described in paragraph (e)(3)(iii)(C)(*2*) through (*4*) of this section.

(h) *Changes in use*—(1) *Conversion to personal use.* An asset in a general asset account becomes ineligible for general asset account treatment if a taxpayer uses the asset in a personal activity during a taxable year. Upon a conversion to personal use, the taxpayer must remove the asset from the general asset account as of the first day of the taxable year in which the change in use occurs (the year of change) and must make the adjustments to the general asset account described in paragraph (e)(3)(iii)(C)(*2*) through (*4*) of this section.

(2) *Business or income-producing use percentage changes.* If, after the placed-in-service year, a taxpayer uses an asset in a general asset account both in a trade or business (or for the production of income) and in a personal activity, general asset account treatment for the asset terminates as of the first day of the taxable year in which the business (or income-producing) use percentage decreases. Consequently, the taxpayer must remove the asset from the general asset account as of that day and must make the adjustments to the general asset account described in paragraph (e)(3)(iii)(C)(*2*) through (*4*) of this section.

(3) *Change in use results in a different recovery period or depreciation method*—(i) *No effect on general asset account election.* A change in the use described in §1.168(i)–4(d) (change in use results in a different recovery period or depreciation method) of an asset in a general asset account shall not cause or permit the revocation of the election made under this section.

(ii) *Asset is removed from the general asset account.* Upon a change in the use described in §1.168(i)–4(d), the taxpayer must remove the asset from the general asset account as of the first day of the year of change (as defined in §1.168(i)–4(a)) and must make the adjustments to the general asset account described in paragraphs (e)(3)(iii)(C)(*2*) through (*4*) of this section. If, however, the result of the change in use is described in §1.168(i)–4(d)(3) (change in use results in a shorter recovery period or a more accelerated depreciation method) and the taxpayer elects to treat the asset as though the change in use had not occurred pursuant to §1.168(i)–4(d)(3)(ii), no adjustment is made to the general asset account upon the change in use.

(iii) *New general asset account is established*—(A) *Change in use results in a shorter recovery period or a more accelerated depreciation method.* If the result of the change in use is described in §1.168(i)–4(d)(3) (change in use results in a shorter recovery period or a more accelerated depreciation method) and adjustments to the general asset account are made pursuant to paragraph (h)(3)(ii) of this section, the taxpayer must establish a new general asset account for the asset in the year of change in accordance with the rules in paragraph (c) of this section, except that the adjusted depreciable basis of the asset as of the first day of the year of change is included in the general asset account. For purposes of paragraph (c)(2) of this section, the applicable depreciation method, recovery period, and convention are determined under §1.168(i)–4(d)(3)(i).

(B) *Change in use results in a longer recovery period or a slower depreciation method.* If the result of the change in use is described in §1.168(i)–4(d)(4) (change in use results in a longer recovery period or a slower depreciation method), the taxpayer must establish a separate general asset account for the asset in the year of change in accordance with the rules in paragraph (c) of this section, except that the unadjusted depreciable basis of the asset, and the greater of the depreciation of the asset allowed or allowable in accordance with section 1016(a)(2), as of the first day of the year of change are included in the newly established general asset account. Consequently, this general asset account as of the first day of the year of change will have a beginning balance for both the unadjusted depreciable basis and the depreciation reserve of the general asset account. For purposes of paragraph (c)(2) of this section, the applicable depreciation method, recovery period, and convention are determined under §1.168(i)–4(d)(4)(ii).

(i) *Redetermination of basis.* If, after the placed-in-service year, the unadjusted depreciable basis of an asset in a general asset account is redetermined due to a transaction other than that described in paragraph (g) of this section (for example, due to contingent purchase price or discharge of indebtedness), the taxpayer's election under paragraph (l) of this section for the asset also applies to the increase or decrease in basis resulting from the redetermination. For the taxable year in which the increase or decrease in basis occurs, the taxpayer must establish a new general asset account for the amount of the increase or decrease in basis in accordance with the rules in paragraph (c) of this section. For purposes of paragraph (c)(2) of this section, the applicable recovery period for the increase or decrease in basis is the recovery period of the asset remaining as of the beginning of the taxable year in which the increase or decrease in basis occurs, the applicable depreciation method and applicable convention for the increase or decrease in basis are the same depreciation method and convention applicable to the asset that applies for the taxable year in which the increase or decrease in basis occurs, and the increase or decrease in basis is deemed to be placed in service in the same taxable year as the asset.

(j) *Identification of disposed of or converted asset*—(1) *In general.* The rules of this paragraph (j) apply when an asset in a general asset account is disposed of or converted in a transaction described in paragraphs (e)(3)(iii) (disposition of an asset in a qualifying disposition), (e)(3)(iv)(B) (transactions subject to section 168(i)(7)), (e)(3)(v)(B) (transactions subject to section 1031 or 1033), (e)(3)(vii) (anti-abuse rule), (g) (assets subject to recapture), (h)(1) (conversion to personal use), or (h)(2) (business or income-producing use percentage changes) of this section.

(2) *Identifying which asset is disposed of or converted.* For purposes of identifying which asset in a general asset account is disposed of or converted, a taxpayer must identify the disposed of or converted asset by using—

(i) The specific identification method of accounting. Under this method of accounting, the taxpayer can determine the particular taxable year in which the disposed of or converted asset was placed in service by the taxpayer;

(ii) A first-in, first-out method of accounting if the taxpayer can readily determine from its records the total dispositions of assets with the same recovery period during the taxable year but the taxpayer cannot readily determine from its records the unadjusted depreciable basis of the disposed of or converted asset. Under this method of accounting, the taxpayer identifies the general asset account with the earliest placed-in-service year that has the same recovery period as the disposed of or converted asset and that has assets at the beginning of the taxable year of the disposition or conversion, and the taxpayer treats the disposed of or converted asset as being from that general asset account. To determine which general asset account has assets at the beginning of the taxable year of the disposition or conversion, the taxpayer reduces the number of assets originally included in the account by the number of assets disposed of or converted in any prior taxable year in a transaction to which this paragraph (j) applies;

(iii) A modified first-in, first-out method of accounting if the taxpayer can readily determine from its records the total dispositions of assets with the same recovery period during the taxable year and the unadjusted depreciable basis of the disposed of or converted asset. Under this method of accounting, the taxpayer identifies the general asset account with the earliest placed-in-service year that has the same recovery period as the disposed of or converted asset and that has assets at the beginning of the taxable year of the disposition or conversion with the same unadjusted depreciable basis as the disposed of or converted asset, and the taxpayer treats the disposed of or converted asset as being from that general asset account. To determine which general asset account has assets at the beginning of the taxable year of the disposition or conversion, the taxpayer reduces the number of assets originally included in the account by the number of assets disposed of or converted in any prior taxable year in a transaction to which this paragraph (j) applies;

(iv) A mortality dispersion table if the asset is a mass asset accounted for in a separate general asset account in accordance with paragraph (c)(2)(ii)(H) of this section and if the taxpayer can readily determine from its records the total dispositions of assets with the same recovery period during the taxable year. The mortality dispersion table must be based upon an acceptable sampling of the taxpayer's actual disposition and conversion experience for mass assets or other acceptable statistical or engineering techniques. To use a mortality dispersion table, the taxpayer must adopt recordkeeping practices consistent with the taxpayer's prior practices and consonant with good accounting and engineering practices; or

(v) Any other method as the Secretary may designate by publication in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see § 601.601(d)(2) of this chapter) on or after December 23, 2011. For this purpose, a last-in, first-out method of accounting is not a designated method. Under the last-in, first-out method of accounting, the taxpayer identifies the general asset account with the most recent placed-in-service year that has the same recovery period as the disposed of or converted asset and that has assets at the beginning of the taxable year of the disposition or conversion, and the taxpayer treats the disposed of or converted asset as being from that general asset account. To determine which general asset account has assets at the beginning of the taxable year of the disposition or conversion, the taxpayer reduces the number of assets originally included in the account by the number of assets disposed of or converted in any prior taxable year in a transaction to which this paragraph (j) applies.

(3) *Basis of disposed of or converted asset.* After identifying which asset in a general asset account is disposed of or converted, the taxpayer may use any reasonable method that is consistently applied to all its general asset accounts for purposes of determining the unadjusted depreciable basis of a disposed of or converted asset.

(k) *Effect of adjustments on prior dispositions.* The adjustments to a general asset account under paragraph (e)(3)(iii), (e)(3)(iv), (e)(3)(v), (e)(3)(vii), (g), or (h) of this section have no effect on the recognition and character of prior dispositions subject to paragraph (e)(2) of this section.

(l) *Election*—(1) *Irrevocable election.* If a taxpayer makes an election under this paragraph (l), the taxpayer consents to, and agrees to apply, all of the provisions of this section to the assets included in a general asset account. Except as provided in paragraph (c)(1)(ii)(A), (e)(3), (g), or (h) of this section, an election made under this section is irrevocable and will be binding on the taxpayer for computing taxable income for the taxable year for which the election is made and for all subsequent taxable years. An election under this paragraph (l) is made separately by each person owning an asset to which this section applies (for example, by each member of a consolidated group, at the partnership level (and not by the partner separately), or at the S corporation level (and not by the shareholder separately)).

(2) [Reserved] For further guidance, see § 1.168(i)–1(l)(2).

(3) [Reserved] For further guidance, see § 1.168(i)–1(l)(3).

(m) *Effective/applicability date*—(1) *In general.* This section applies to taxable years beginning on or after January 1, 2014. Section 1.168(i)–1 as contained in 26 CFR part 1 edition revised as of April 1, 2011, applies to taxable years beginning before January 1, 2014.

(2) *Optional early application.* A taxpayer may choose to apply this section to taxable years beginning on or after January 1, 2012.

(3) *Change in method of accounting.* A change to comply with this section for depreciable assets placed in service in a

taxable year ending on or after December 30, 2003, is a change in method of accounting to which the provisions of section 446(e) and the regulations under section 446(e) apply. A taxpayer also may treat a change to comply with this section for depreciable assets placed in service in a taxable year ending before December 30, 2003, as a change in method of accounting to which the provisions of section 446(e) and the regulations under section 446(e) apply. This paragraph (m)(3) does not apply to a change to comply with paragraph (e)(3)(ii), (e)(3)(iii) or paragraph (l) of this section.

(4) The applicability of this section expires on December 23, 2014.

[T.D. 9564, 76 FR 81086, Dec. 27, 2011; 77 FR 18687, Mar. 28, 2012, as amended at 77 FR 74585, Dec. 17, 2012]

§ 1.168(i)–2 Lease term.

(a) *In general.* For purposes of section 168, a lease term is determined under all the facts and circumstances. Paragraph (b) of this section and § 1.168(j)–1T, Q&A 17, describe certain circumstances that will result in a period of time not included in the stated duration of an original lease (additional period) nevertheless being included in the lease term. These rules do not prevent the inclusion of an additional period in the lease term in other circumstances.

(b) *Lessee retains financial obligation*—(1) *In general.* An additional period of time during which a lessee may not continue to be the lessee will nevertheless be included in the lease term if the lessee (or a related person)—

(i) Has agreed that one or both of them will or could be obligated to make a payment of rent or a payment in the nature of rent with respect to such period; or

(ii) Has assumed or retained any risk of loss with respect to the property for such period (including, for example, by holding a note secured by the property).

(2) *Payments in the nature of rent.* For purposes of paragraph (b)(1)(i) of this section, a payment in the nature of rent includes a payment intended to substitute for rent or to fund or supplement the rental payments of another. For example, a payment in the nature of rent includes a payment of any kind (whether denominated as supplemental rent, as liquidated damages, or otherwise) that is required to be made in the event that—

(i) The leased property is not leased for the additional period;

(ii) The leased property is leased for the additional period under terms that do not satisfy specified terms and conditions;

(iii) There is a failure to make a payment of rent with respect to such additional period; or

(iv) Circumstances similar to those described in paragraph (b)(2) (i), (ii), or (iii) of this section occur.

(3) *De minimis rule.* For the purposes of this paragraph (b), obligations to make de minimis payments will be disregarded.

(c) *Multiple leases or subleases.* If property is subject to more than one lease (including any sublease) entered into as part of a single transaction (or a series of related transactions), the lease term includes all periods described in one or more of such leases. For example, if one taxable corporation leases property to another taxable corporation for a 20-year term and, as part of the same transaction, the lessee subleases the property to a tax-exempt entity for a 10-year term, then the lease term of the property for purposes of section 168 is 20 years. During the period of tax-exempt use, the property must be depreciated under the alternative depreciation system using the straight line method over the greater of its class life or 25 years (125 percent of the 20-year lease term).

(d) *Related person.* For purposes of paragraph (b) of this section, a person is related to the lessee if such person is described in section 168(h)(4).

(e) *Changes in status.* Section 168(i)(5) (changes in status) applies if an additional period is included in a lease term under this section and the leased property ceases to be tax-exempt use property for such additional period.

(f) *Example.* The following example illustrates the principles of this section. The example does not address common law doctrines or other authorities that may apply to cause an additional period to be included in the lease term or to recharacterize a lease as a conditional sale or otherwise for federal income tax purposes. Unless otherwise indicated, parties to the transactions are not related to one another.

Example. Financial obligation with respect to an additional period—(i) *Facts.* X, a taxable corporation, and Y, a foreign airline whose income is not subject to United States taxation, enter into a lease agreement under which X agrees to lease an aircraft to Y for a period of 10 years. The lease agreement provides that, at the end of the lease period, Y is obligated to find a subsequent lessee (replacement lessee) to enter into a subsequent lease (replacement lease) of the aircraft from X for an additional 10-year period. The provisions of the lease agreement require that any replacement lessee be unrelated to Y and that it not be a tax-exempt entity as defined in section 168(h)(2). The provisions of the lease agreement also set forth the basic terms and conditions of the replacement lease, including its duration and the required rental payments. In the event Y fails to secure a replacement lease, the lease agreement requires Y to make a payment to X in an amount determined under the lease agreement.

(ii) *Application of this section.* The lease agreement between X and Y obligates Y to make a payment in the event the aircraft is not leased for the period commencing after the initial 10-year lease period and ending on the date the replacement lease is scheduled to end. Accordingly, pursuant to paragraph (b) of this section, the term of the lease between X and Y includes such additional period, and the lease term is 20 years for purposes of section 168.

(iii) *Facts modified.* Assume the same facts as in paragraph (i) of this *Example,* except that Y is required to guarantee the payment of rentals under the 10-year replacement lease and to make a payment to X equal to the present value of any excess of the replacement lease rental payments specified in the lease agreement between X and Y, over the rental payments actually agreed to be paid by the replacement lessee. Pursuant to paragraph (b) of this section, the term of the lease between X and Y includes the additional period, and the lease term is 20 years for purposes of section 168.

(iv) *Changes in status.* If, upon the conclusion of the stated duration of the lease between X and Y, the aircraft either is returned to X or leased to a replacement lessee that is not a tax-exempt entity as defined in section 168(h)(2), the subsequent method of depreciation will be determined pursuant to section 168(i)(5).

(g) *Effective date*—(1) *In general.* Except as provided in paragraph (g)(2) of this section, this section applies to leases entered into on or after April 20, 1995.

(2) *Special rules.* Paragraphs (b)(1)(ii) and (c) of this section apply to leases entered into after April 26, 1996.

[T.D. 8667, 61 FR 18677, Apr. 29, 1996]

§ 1.168(i)–3 Treatment of excess deferred income tax reserve upon disposition of deregulated public utility property.

(a) *Scope*—(1) *In general.* This section provides rules for the application of section 203(e) of the Tax Reform Act of 1986, Public Law 99–514 (100 Stat. 2146) to a taxpayer with respect to public utility property (within the meaning of section 168(i)(10)) that ceases, whether by disposition, deregulation, or otherwise, to be public utility property with respect to the taxpayer and that is not described in paragraph (a)(2) of this section (deregulated public utility property).

(2) *Exceptions.* This section does not apply to the following property:

(i) Property that ceases to be public utility property with respect to the taxpayer on account of an ordinary retirement within the meaning of § 1.167(a)–11(d)(3)(ii).

(ii) Property transferred by the taxpayer if after the transfer the property is public utility property of the transferee and the taxpayer's excess tax reserve with respect to the property (within the meaning of section 203(e) of the Tax Reform Act of 1986) is treated as an excess tax reserve of the transferee with respect to the property.

(b) *Amount of reduction.* If public utility property of a taxpayer becomes deregulated public utility property to which this section applies, the reduction in the taxpayer's excess tax reserve permitted under section 203(e) of the Tax Reform Act of 1986 is equal to the amount by which the reserve could be reduced under that provision if all such property had remained public utility property of the taxpayer and the taxpayer had continued use of its normalization method of accounting with respect to such property.

(c) *Cross reference.* See § 1.46–6(k) for rules relating to the treatment of accumulated deferred investment tax credits when utilities dispose of regulated public utility property.

(d) *Effective/applicability dates*—(1) *In general*. Except as provided in paragraph (d)(2) of this section, this section applies to public utility property that becomes deregulated public utility property after December 21, 2005.

(2) *Property that becomes public utility property of the transferee*. This section does not apply to property that becomes deregulated public utility property with respect to a taxpayer on account of a transfer on or before March 20, 2008 if after the transfer the property is public utility property of the transferee.

(3) *Application of regulation project (REG–104385–01)*. A reduction in the taxpayer's excess deferred income tax reserve will be treated as ratable if it is consistent with the proposed rules in regulation project (REG–104385–01) (68 FR 10190) March 4, 2003, and occurs during the period beginning on March 5, 2003, and ending on the earlier of—

(i) The last date on which the utility's rates are determined under the rate order in effect on December 21, 2005; or

(ii) December 21, 2007.

[T.D. 9387, 73 FR 14937, Mar. 20, 2008]

§ 1.168(i)–4 Changes in use.

(a) *Scope*. This section provides the rules for determining the depreciation allowance for MACRS property (as defined in § 1.168(b)–1T(a)(2)) for which the use changes in the hands of the same taxpayer (change in the use). The allowance for depreciation under this section constitutes the amount of depreciation allowable under section 167(a) for the year of change and any subsequent taxable year. For purposes of this section, the year of change is the taxable year in which a change in the use occurs.

(b) *Conversion to business or income-producing use*—(1) *Depreciation deduction allowable*. This paragraph (b) applies to property that is converted from personal use to use in a taxpayer's trade or business, or for the production of income, during a taxable year. This conversion includes property that was previously used by the taxpayer for personal purposes, including real property (other than land) that is acquired before 1987 and converted from personal use to business or income-producing use after 1986, and depreciable property that was previously used by a tax-exempt entity before the entity changed to a taxable entity. Except as otherwise provided by the Internal Revenue Code or regulations under the Internal Revenue Code, upon a conversion to business or income-producing use, the depreciation allowance for the year of change and any subsequent taxable year is determined as though the property is placed in service by the taxpayer on the date on which the conversion occurs. Thus, except as otherwise provided by the Internal Revenue Code or regulations under the Internal Revenue Code, the taxpayer must use any applicable depreciation method, recovery period, and convention prescribed under section 168 for the property in the year of change, consistent with any election made under section 168 by the taxpayer for that year (see, for example, section 168(b)(5)). See §§ 1.168(k)–1T(f)(6)(iii) and 1.1400L(b)–1T(f)(6) for the additional first year depreciation deduction rules applicable to a conversion to business or income-producing use. The depreciable basis of the property for the year of change is the lesser of its fair market value or its adjusted depreciable basis (as defined in § 1.168(b)–1T(a)(4)), as applicable, at the time of the conversion to business or income-producing use.

(2) *Example*. The application of this paragraph (b) is illustrated by the following example:

Example. *A*, a calendar-year taxpayer, purchases a house in 1985 that she occupies as her principal residence. In February 2004, *A* ceases to occupy the house and converts it to residential rental property. At the time of the conversion to residential rental property, the house's fair market value (excluding land) is $130,000 and adjusted depreciable basis attributable to the house (excluding land) is $150,000. Pursuant to this paragraph (b), *A* is considered to have placed in service residential rental property in February 2004 with a depreciable basis of $130,000. *A* depreciates the residential rental property under the general depreciation system by using the straight-line method, a 27.5-year recovery period, and the mid-month convention. Pursuant to §§ 1.168(k)–1T(f)(6)(iii)(B) or 1.1400L(b)–1T(f)(6), this property is not eligible for the additional first year depreciation deduction provided by section 168(k) or section 1400L(b). Thus, the depreciation allowance for the house for 2004 is $4,137, after taking into account the mid-month convention (($130,000 adjusted depreciable basis multiplied by the applicable depreciation rate of 3.636% (1/27.5)) multiplied by the mid-month convention fraction of 10.5/12). The amount of depreciation computed under section 168, however, may be limited under other provisions of the Internal Revenue Code, such as, section 280A.

(c) *Conversion to personal use.* The conversion of MACRS property from business or income-producing use to personal use during a taxable year is treated as a disposition of the property in that taxable year. The depreciation allowance for MACRS property for the year of change in which the property is treated as being disposed of is determined by first multiplying the adjusted depreciable basis of the property as of the first day of the year of change by the applicable depreciation rate for that taxable year (for further guidance, for example, see section 6 of Rev. Proc. 87–57 (1987–2 C. B. 687, 692) (see §601.601(d)(2)(ii)(*b*) of this chapter)). This amount is then multiplied by a fraction, the numerator of which is the number of months (including fractions of months) the property is deemed to be placed in service during the year of change (taking into account the applicable convention) and the denominator of which is 12. No depreciation deduction is allowable for MACRS property placed in service and disposed of in the same taxable year. See §§1.168(k)–1T(f)(6)(ii) and 1.1400L(b)–1T(f)(6) for the additional first year depreciation deduction rules applicable to property placed in service and converted to personal use in the same taxable year. Upon the conversion to personal use, no gain, loss, or depreciation recapture under section 1245 or section 1250 is recognized. However, the provisions of section 1245 or section 1250 apply to any disposition of the converted property by the taxpayer at a later date. For listed property (as defined in section 280F(d)(4)), see section 280F(b)(2) for the recapture of excess depreciation upon the conversion to personal use.

(d) *Change in the use results in a different recovery period and/or depreciation method*—(1) *In general.* This paragraph (d) applies to a change in the use of MACRS property during a taxable year subsequent to the placed-in-service year, if the property continues to be MACRS property owned by the same taxpayer and, as a result of the change in the use, has a different recovery period, a different depreciation method, or both. For example, this paragraph (d) applies to MACRS property that—

(i) Begins or ceases to be used predominantly outside the United States;

(ii) Results in a reclassification of the property under section 168(e) due to a change in the use of the property; or

(iii) Begins or ceases to be tax-exempt use property (as defined in section 168(h)).

(2) *Determination of change in the use*—(i) *In general.* Except as provided in paragraph (d)(2)(ii) of this section, a change in the use of MACRS property occurs when the primary use of the MACRS property in the taxable year is different from its primary use in the immediately preceding taxable year. The primary use of MACRS property may be determined in any reasonable manner that is consistently applied to the taxpayer's MACRS property.

(ii) *Alternative depreciation system property*—(A) *Property used within or outside the United States.* A change in the use of MACRS property occurs when a taxpayer begins or ceases to use MACRS property predominantly outside the United States during the taxable year. The determination of whether MACRS property is used predominantly outside the United States is made in accordance with the test in §1.48–1(g)(1)(i) for determining predominant use.

(B) *Tax-exempt bond financed property.* A change in the use of MACRS property occurs when the property changes to tax-exempt bond financed property, as described in section 168(g)(1)(C) and (g)(5), during the taxable year. For purposes of this paragraph (d), MACRS property changes to tax-exempt bond financed property when a tax-exempt bond is first issued after the MACRS property is placed in service. MACRS property continues to be tax-exempt bond financed property in the hands of the taxpayer even if the tax-exempt bond (including any refunding issue) is no longer outstanding or is redeemed.

(C) *Other mandatory alternative depreciation system property.* A change in the use of MACRS property occurs when the property changes to, or changes from, property described in section 168(g)(1)(B) (tax-exempt use property) or (D) (imported property covered by an Executive order) during the taxable year.

(iii) *Change in the use deemed to occur on first day of the year of change.* If a change in the use of MACRS property occurs under this paragraph (d)(2), the depreciation allowance for that MACRS property for the year of change is determined as though the use of the MACRS property changed on the first day of the year of change.

(3) *Change in the use results in a shorter recovery period and/or a more accelerated depreciation method*—(i) *Treated as placed in service in the year of change*—(A) *In general.* If a change in the use results in the MACRS property changing to a shorter recovery period and/or a depreciation method that is more accelerated than the method used for the MACRS property before the change in the use, the depreciation allowances beginning in the year of change are determined as though the MACRS property is placed in service by the taxpayer in the year of change.

(B) *Computation of depreciation allowance.* The depreciation allowances for the MACRS property for any 12-month taxable year beginning with the year of change are determined by multiplying the adjusted depreciable basis of the MACRS property as of the first day of each taxable year by the applicable depreciation rate for each taxable year. In determining the applicable depreciation rate for the year of change and subsequent taxable years, the taxpayer must use any applicable depreciation method and recovery period prescribed under section 168 for the MACRS property in the year of change, consistent with any election made under section 168 by the taxpayer for that year (see, for example, section 168(b)(5)). If there is a change in the use of MACRS property, the applicable convention that applies to the MACRS property is the same as the convention that applied before the change in the use of the MACRS property. However, the depreciation allowance for the year of change for the MACRS property is determined without applying the applicable convention, unless the MACRS property is disposed of during the year of change. See paragraph (d)(5) of this section for the rules relating to the computation of the depreciation allowance under the optional depreciation tables. If the year of change or any subsequent taxable year is less than 12 months, the depreciation allowance determined under this paragraph (d)(3)(i) must be adjusted for a short taxable year (for further guidance, for example, see Rev. Proc. 89–15 (1989–1 C.B. 816) (see §601.601(d)(2)(ii)(*b*) of this chapter)).

(C) *Special rules.* MACRS property affected by this paragraph (d)(3)(i) is not eligible in the year of change for the election provided under section 168(f)(1), 179, or 1400L(f), or for the additional first year depreciation deduction provided in section 168(k) or 1400L(b). See §§1.168(k)–1T(f)(6)(iv) and 1.1400L(b)–1T(f)(6) for other additional first year depreciation deduction rules applicable to a change in the use of MACRS property subsequent to its placed-in-service year. For purposes of determining whether the mid-quarter convention applies to other MACRS property placed in service during the year of change, the unadjusted depreciable basis (as defined in §1.168(b)–1T(a)(3)) or the adjusted depreciable basis of MACRS property affected by this paragraph (d)(3)(i) is not taken into account.

(ii) *Option to disregard the change in the use.* In lieu of applying paragraph (d)(3)(i) of this section, the taxpayer may elect to determine the depreciation allowance as though the change in the use had not occurred. The taxpayer elects this option by claiming on the taxpayer's timely filed (including extensions) Federal income tax return for the year of change the depreciation allowance for the property as though the change in the use had not occurred. See paragraph (g)(2) of this section for the manner for revoking this election.

(4) *Change in the use results in a longer recovery period and/or a slower depreciation method*—(i) *Treated as originally placed in service with longer recovery period and/or slower depreciation method.* If a change in the use results in a longer recovery period and/or a depreciation method for the MACRS property that is less accelerated than the method

used for the MACRS property before the change in the use, the depreciation allowances beginning with the year of change are determined as though the MACRS property had been originally placed in service by the taxpayer with the longer recovery period and/or the slower depreciation method. MACRS property affected by this paragraph (d)(4) is not eligible in the year of change for the election provided under section 168(f)(1), 179, or 1400L(f), or for the additional first year depreciation deduction provided in section 168(k) or 1400L(b). See §§1.168(k)–1T(f)(6)(iv) and 1.1400L(b)–1T(f)(6) for other additional first year depreciation deduction rules applicable to a change in the use of MACRS property subsequent to its placed-in-service year.

(ii) *Computation of the depreciation allowance.* The depreciation allowances for the MACRS property for any 12-month taxable year beginning with the year of change are determined by multiplying the adjusted depreciable basis of the MACRS property as of the first day of each taxable year by the applicable depreciation rate for each taxable year. If there is a change in the use of MACRS property, the applicable convention that applies to the MACRS property is the same as the convention that applied before the change in the use of the MACRS property. If the year of change or any subsequent taxable year is less than 12 months, the depreciation allowance determined under this paragraph (d)(4)(ii) must be adjusted for a short taxable year (for further guidance, for example, see Rev. Proc. 89–15 (1989–1 C.B. 816) (see §601.601(d)(2)(ii)(*b*) of this chapter)). See paragraph (d)(5) of this section for the rules relating to the computation of the depreciation allowance under the optional depreciation tables. In determining the applicable depreciation rate for the year of change and any subsequent taxable year—

(A) The applicable depreciation method is the depreciation method that would apply in the year of change and any subsequent taxable year for the MACRS property had the taxpayer used the longer recovery period and/or the slower depreciation method in the placed-in-service year of the property. If the 200-or 150-percent declining balance method would have applied in the placed-in-service year but the method would have switched to the straight line method in the year of change or any prior taxable year, the applicable depreciation method beginning with the year of change is the straight line method; and

(B) The applicable recovery period is either—

(*1*) The longer recovery period resulting from the change in the use if the applicable depreciation method is the 200-or 150-percent declining balance method (as determined under paragraph (d)(4)(ii)(A) of this section) unless the recovery period did not change as a result of the change in the use, in which case the applicable recovery period is the same recovery period that applied before the change in the use; or

(*2*) The number of years remaining as of the beginning of each taxable year (taking into account the applicable convention) had the taxpayer used the longer recovery period in the placed-in-service year of the property if the applicable depreciation method is the straight line method (as determined under paragraph (d)(4)(ii)(A) of this section) unless the recovery period did not change as a result of the change in the use, in which case the applicable recovery period is the number of years remaining as of the beginning of each taxable year (taking into account the applicable convention) based on the recovery period that applied before the change in the use.

(5) *Using optional depreciation tables*—(i) *Taxpayer not bound by prior use of table.* If a taxpayer used an optional depreciation table for the MACRS property before a change in the use, the taxpayer is not bound to use the appropriate new table for that MACRS property beginning in the year of change (for further guidance, for example, see section 8 of Rev. Proc. 87–57 (1987–2 C.B. 687, 693) (see §601.601(d)(2)(ii)(*b*) of this chapter)). If a taxpayer did not use an optional depreciation table for MACRS property before a change in the use and the change in the use results in a shorter recovery period and/or a more accelerated depreciation method (as described in paragraph (d)(3)(i) of this section), the taxpayer may use the appropriate new table for that MACRS

property beginning in the year of change. If a taxpayer chooses not to use the optional depreciation table, the depreciation allowances for the MACRS property beginning in the year of change are determined under paragraph (d)(3)(i) or (4) of this section, as applicable.

(ii) *Taxpayer chooses to use optional depreciation table after a change in the use.* If a taxpayer chooses to use an optional depreciation table for the MACRS property after a change in the use, the depreciation allowances for the MACRS property for any 12-month taxable year beginning with the year of change are determined as follows:

(A) *Change in the use results in a shorter recovery period and/or a more accelerated depreciation method.* If a change in the use results in a shorter recovery period and/or a more accelerated depreciation method (as described in paragraph (d)(3)(i) of this section), the depreciation allowances for the MACRS property for any 12-month taxable year beginning with the year of change are determined by multiplying the adjusted depreciable basis of the MACRS property as of the first day of the year of change by the annual depreciation rate for each recovery year (expressed as a decimal equivalent) specified in the appropriate optional depreciation table. The appropriate optional depreciation table for the MACRS property is based on the depreciation system, depreciation method, recovery period, and convention applicable to the MACRS property in the year of change as determined under paragraph (d)(3)(i) of this section. The depreciation allowance for the year of change for the MACRS property is determined by taking into account the applicable convention (which is already factored into the optional depreciation tables). If the year of change or any subsequent taxable year is less than 12 months, the depreciation allowance determined under this paragraph (d)(5)(ii)(A) must be adjusted for a short taxable year (for further guidance, for example, see Rev. Proc. 89–15 (1989–1 C.B. 816) (see § 601.601(d)(2)(ii)(*b*) of this chapter)).

(B) *Change in the use results in a longer recovery period and/or a slower depreciation method*—(*1*) *Determination of the appropriate optional depreciation table.* If a change in the use results in a longer recovery period and/or a slower depreciation method (as described in paragraph (d)(4)(i) of this section), the depreciation allowances for the MACRS property for any 12-month taxable year beginning with the year of change are determined by choosing the optional depreciation table that corresponds to the depreciation system, depreciation method, recovery period, and convention that would have applied to the MACRS property in the placed-in-service year had that property been originally placed in service by the taxpayer with the longer recovery period and/or the slower depreciation method. If there is a change in the use of MACRS property, the applicable convention that applies to the MACRS property is the same as the convention that applied before the change in the use of the MACRS property. If the year of change or any subsequent taxable year is less than 12 months, the depreciation allowance determined under this paragraph (d)(5)(ii)(B) must be adjusted for a short taxable year (for further guidance, for example, see Rev. Proc. 89–15 (1989–1 C.B. 816) (see § 601.601(d)(2)(ii)(*b*) of this chapter)).

(*2*) *Computation of the depreciation allowance.* The depreciation allowances for the MACRS property for any 12-month taxable year beginning with the year of change are computed by first determining the appropriate recovery year in the table identified under paragraph (d)(5)(ii)(B)(*1*) of this section. The appropriate recovery year for the year of change is the year that corresponds to the year of change. For example, if the recovery year for the year of change would have been Year 4 in the table that applied before the change in the use of the MACRS property, then the recovery year for the year of change is Year 4 in the table identified under paragraph (d)(5)(ii)(B)(*1*) of this section. Next, the annual depreciation rate (expressed as a decimal equivalent) for each recovery year is multiplied by a transaction coefficient. The transaction coefficient is the formula $(1 / (1-x))$ where x equals the sum of the annual depreciation rates from the table identified under paragraph (d)(5)(ii)(B)(*1*) of this section (expressed as a decimal equivalent) for the taxable years beginning with the placed-in-service year of the MACRS property through the taxable year immediately prior to the year of change. The product of the annual depreciation rate and the transaction coefficient is multiplied by the adjusted depreciable basis of the MACRS property as of the beginning of the year of change.

(6) *Examples.* The application of this paragraph (d) is illustrated by the following examples:

Example 1. Change in the use results in a shorter recovery period and/or a more accelerated depreciation method and optional depreciation table is not used. (i) *X*, a calendar-year corporation, places in service in 1999 equipment at a cost of $100,000 and uses this equipment from 1999 through 2003 primarily in its *A* business. *X* depreciates the equipment for 1999 through 2003 under the general depreciation system as 7-year property by using the 200-percent declining balance method (which switched to the straight-line method in 2003), a 7-year recovery period, and a half-year convention. Beginning in 2004, *X* primarily uses the equipment in its *B* business. As a result, the classification of the equipment under section 168(e) changes from 7-year property to 5-year property and the recovery period of the equipment under the general depreciation system changes from 7 years to 5 years. The depreciation method does not change. On January 1, 2004, the adjusted depreciable basis of the equipment is $22,311. *X* depreciates its 5-year recovery property placed in service in 2004 under the general depreciation system by using the 200-percent declining balance method and a 5-year recovery period. *X* does not use the optional depreciation tables.

(ii) Under paragraph (d)(3)(i) of this section, *X*'s allowable depreciation deduction for the equipment for 2004 and subsequent taxable years is determined as though *X* placed the equipment in service in 2004 for use primarily in its *B* business. The depreciable basis of the equipment as of January 1, 2004, is $22,311 (the adjusted depreciable basis at January 1, 2004). Because *X* does not use the optional depreciation tables, the depreciation allowance for 2004 (the deemed placed-in-service year) for this equipment only is computed without taking into account the half-year convention. Pursuant to paragraph (d)(3)(i)(C) of this section, this equipment is not eligible for the additional first year depreciation deduction provided by section 168(k) or section 1400L(b). Thus, *X*'s allowable depreciation deduction for the equipment for 2004 is $8,924 ($22,311 adjusted depreciable basis at January 1, 2004, multiplied by the applicable depreciation rate of 40% (200/5)). *X*'s allowable depreciation deduction for the equipment for 2005 is $5,355 ($13,387 adjusted depreciable basis at January 1, 2005, multiplied by the applicable depreciation rate of 40% (200/5)).

(iii) Alternatively, under paragraph (d)(3)(ii) of this section, *X* may elect to disregard the change in the use and, as a result, may continue to treat the equipment as though it is used primarily in its *A* business. If the election is made, *X*'s allowable depreciation deduction for the equipment for 2004 is $8,924 ($22,311 adjusted depreciable basis at January 1, 2004, multiplied by the applicable depreciation rate of 40% (1/2.5 years remaining at January 1, 2004)). *X*'s allowable depreciation deduction for the equipment for 2005 is $8,925 ($13,387 adjusted depreciable basis at January 1, 2005, multiplied by the applicable depreciation rate of 66.67% (1/1.5 years remaining at January 1, 2005)).

Example 2. Change in the use results in a shorter recovery period and/or a more accelerated depreciation method and optional depreciation table is used. (i) Same facts as in *Example 1*, except that *X* used the optional depreciation tables for computing depreciation for 1999 through 2003. Pursuant to paragraph (d)(5) of this section, *X* chooses to continue to use the optional depreciation table for the equipment. *X* does not make the election provided in paragraph (d)(3)(ii) of this section to disregard the change in use.

(ii) In accordance with paragraph (d)(5)(ii)(A) of this section, *X* must first identify the appropriate optional depreciation table for the equipment. This table is table 1 in Rev. Proc. 87–57 because the equipment will be depreciated in the year of change (2004) under the general depreciation system using the 200-percent declining balance method, a 5-year recovery period, and the half-year convention (which is the convention that applied to the equipment in 1999). Pursuant to paragraph (d)(3)(i)(C) of this section, this equipment is not eligible for the additional first year depreciation deduction provided by section 168(k) or section 1400L(b). For 2004, *X* multiplies its adjusted depreciable basis in the equipment as of January 1, 2004, of $22,311, by the annual depreciation rate in table 1 for recovery year 1 for a 5-year recovery period (.20), to determine the depreciation allowance of $4,462. For 2005, *X* multiplies its adjusted depreciable basis in the equipment as of January 1, 2004, of $22,311, by the annual depreciation rate in table 1 for recovery year 2 for a 5-year recovery period (.32), to determine the depreciation allowance of $7,140.

Example 3. Change in the use results in a longer recovery period and/or a slower depreciation method. (i) *Y*, a calendar-year corporation, places in service in January 2002, equipment at a cost of $100,000 and uses this equipment in 2002 and 2003 only within the United States. *Y* elects not to deduct the additional first year depreciation under section 168(k). *Y* depreciates the equipment for 2002 and 2003 under the general depreciation system by using the 200-percent declining balance method, a 5-year recovery period, and a half-year convention. Beginning in 2004, *Y* uses the equipment predominantly outside the United States. As a result of this change in the use, the equipment is subject to the alternative depreciation system beginning in 2004. Under the alternative depreciation system, the equipment is depreciated by using the straight line method and a 9-year recovery period. The adjusted depreciable basis of the equipment at January 1, 2004, is $48,000.

(ii) Pursuant to paragraph (d)(4) of this section, *Y*'s allowable depreciation deduction for 2004 and subsequent taxable years is determined as though the equipment had been placed in service in January 2002, as property used predominantly outside the United States. Further, pursuant to paragraph (d)(4)(i) of this section, the equipment is not eligible in 2004 for the additional first year depreciation deduction provided by section 168(k) or section 1400L(b). In determining the applicable depreciation rate for 2004, the applicable depreciation method is the straight line method and the applicable recovery period is 7.5 years, which is the number of years remaining at January 1, 2004, for property placed in service in 2002 with a 9-year recovery period (taking into account the half-year convention). Thus, the depreciation allowance for 2004 is $6,398 ($48,000 adjusted depreciable basis at January 1, 2004, multiplied by the applicable depreciation rate of 13.33% (1/7.5 years)). The depreciation allowance for 2005 is $6,398 ($41,602 adjusted depreciable basis at January 1, 2005, multiplied by the applicable depreciation rate of 15.38% (1/6.5 years remaining at January 1, 2005)).

Example 4. Change in the use results in a longer recovery period and/or a slower depreciation method and optional depreciation table is used—(i) Same facts as in *Example 3*, except that *Y* used the optional depreciation tables for computing depreciation in 2002 and 2003. Pursuant to paragraph (d)(5) of this section, *Y* chooses to continue to use the optional depreciation table for the equipment. Further, pursuant to paragraph (d)(4)(i) of this section, the equipment is not eligible in 2004 for the additional first year depreciation deduction provided by section 168(k) or section 1400L(b).

(ii) In accordance with paragraph (d)(5)(ii)(B) of this section, *Y* must first determine the appropriate optional depreciation table for the equipment pursuant to paragraph (d)(5)(ii)(B)(*1*) of this section. This table is table 8 in Rev. Proc. 87–57, which corresponds to the alternative depreciation system, the straight line method, a 9-year recovery period, and the half-year convention (because *Y* depreciated 5-year property in 2002 using a half-year convention). Next, *Y* must determine the appropriate recovery year in table 8. Because the year of change is 2004, the depreciation allowance for the equipment for 2004 is determined using recovery year 3 of table 8. For 2004, *Y* multiplies its adjusted depreciable basis in the equipment as of January 1, 2004, of $48,000, by the product of the annual depreciation rate in table 8 for recovery year 3 for a 9-year recovery period (.1111) and the transaction coefficient of 1.200 [1/(1 − (.0556 (table 8 for recovery year 1 for a 9-year recovery period) + .1111 (table 8 for recovery year 2 for a 9-year recovery period)))], to determine the depreciation allowance of $6,399. For 2005, *Y* multiplies its adjusted depreciable basis in the equipment as of January 1, 2004, of $48,000, by the product of the annual depreciation rate in table 8 for recovery year 4 for a 9-year recovery period (.1111) and the transaction coefficient (1.200), to determine the depreciation allowance of $6,399.

(e) *Change in the use of MACRS property during the placed-in-service year*—(1) *In general.* Except as provided in paragraph (e)(2) of this section, if a change in the use of MACRS property occurs during the placed-in-service year and the property continues to be MACRS property owned by the same taxpayer, the depreciation allowance for that property for the placed-in-service year is determined by its primary use during that year. The primary use of MACRS property may be determined in any reasonable manner that is consistently applied to the taxpayer's MACRS property. For purposes of this paragraph (e), the determination of whether the mid-quarter convention applies to any MACRS property placed in service during the year of change is made in accordance with §1.168(d)–1.

(2) *Alternative depreciation system property*—(i) *Property used within and outside the United States.* The depreciation allowance for the placed-in-service year for MACRS property that is used within and outside the United States is determined by its predominant use during that year. The determination of whether MACRS property is used predominantly outside the United States during the placed-in-service year shall be made in accordance with the test in §1.48–1(g)(1)(i) for determining predominant use.

(ii) *Tax-exempt bond financed property.* The depreciation allowance for the placed-in-service year for MACRS property that changes to tax-exempt bond financed property, as described in section 168(g)(1)(C) and (g)(5), during that taxable year is determined under the alternative depreciation system. For purposes of this paragraph (e), MACRS property changes to tax-exempt bond financed property when a tax-exempt bond is first issued after the MACRS property is placed in service. MACRS property continues to be tax-exempt bond financed property in the hands of the taxpayer even if the tax-exempt bond (including any refunding issue) is not outstanding at, or is redeemed by, the end of the placed-in-service year.

(iii) *Other mandatory alternative depreciation system property*. The depreciation allowance for the placed-in-service year for MACRS property that changes to, or changes from, property described in section 168(g)(1)(B) (tax-exempt use property) or (D) (imported property covered by an Executive order) during that taxable year is determined under—

(A) The alternative depreciation system if the MACRS property is described in section 168(g)(1)(B) or (D) at the end of the placed-in-service year; or

(B) The general depreciation system if the MACRS property is not described in section 168(g)(1)(B) or (D) at the end of the placed-in-service year, unless other provisions of the Internal Revenue Code or regulations under the Internal Revenue Code require the depreciation allowance for that MACRS property to be determined under the alternative depreciation system (for example, section 168(g)(7)).

(3) *Examples*. The application of this paragraph (e) is illustrated by the following examples:

Example 1. (i) *Z*, a utility and calendar-year corporation, acquires and places in service on January 1, 2004, equipment at a cost of $100,000. *Z* uses this equipment in its combustion turbine production plant for 4 months and then uses the equipment in its steam production plant for the remainder of 2004. *Z*'s combustion turbine production plant assets are classified as 15-year property and are depreciated by *Z* under the general depreciation system using a 15-year recovery period and the 150-percent declining balance method of depreciation. *Z*'s steam production plant assets are classified as 20-year property and are depreciated by *Z* under the general depreciation system using a 20-year recovery period and the 150-percent declining balance method of depreciation. *Z* uses the optional depreciation tables. The equipment is 50-percent bonus depreciation property for purposes of section 168(k).

(ii) Pursuant to this paragraph (e), *Z* must determine depreciation based on the primary use of the equipment during the placed-in-service year. *Z* has consistently determined the primary use of all of its MACRS properties by comparing the number of full months in the taxable year during which a MACRS property is used in one manner with the number of full months in that taxable year during which that MACRS property is used in another manner. Applying this approach, *Z* determines the depreciation allowance for the equipment for 2004 is based on the equipment being classified as 20-year property because the equipment was used by *Z* in its steam production plant for 8 months in 2004. If the half-year convention applies in 2004, the appropriate optional depreciation table is table 1 in Rev. Proc. 87–57, which is the table for MACRS property subject to the general depreciation system, the 150-percent declining balance method, a 20-year recovery period, and the half-year convention. Thus, the depreciation allowance for the equipment for 2004 is $51,875, which is the total of $50,000 for the 50-percent additional first year depreciation deduction allowable (the unadjusted depreciable basis of $100,000 multiplied by .50), plus $1,875 for the 2004 depreciation allowance on the remaining adjusted depreciable basis of $50,000 [(the unadjusted depreciable basis of $100,000 less the additional first year depreciation deduction of $50,000) multiplied by the annual depreciation rate of .0375 in table 1 for recovery year 1 for a 20-year recovery period].

Example 2. *T*, a calendar year corporation, places in service on January 1, 2004, several computers at a total cost of $100,000. *T* uses these computers within the United States for 3 months in 2004 and then moves and uses the computers outside the United States for the remainder of 2004. Pursuant to §1.48–1(g)(1)(i), the computers are considered as used predominantly outside the United States in 2004. As a result, for 2004, the computers are required to be depreciated under the alternative depreciation system of section 168(g) with a recovery period of 5 years pursuant to section 168(g)(3)(C). *T* uses the optional depreciation tables. If the half-year convention applies in 2004, the appropriate optional depreciation table is table 8 in Rev. Proc. 87–57, which is the table for MACRS property subject to the alternative depreciation system, the straight line method, a 5-year recovery period, and the half-year convention. Thus, the depreciation allowance for the computers for 2004 is $10,000, which is equal to the unadjusted depreciable basis of $100,000 multiplied by the annual depreciation rate of .10 in table 8 for recovery year 1 for a 5-year recovery period. Because the computers are required to be depreciated under the alternative depreciation system in their placed-in-service year, pursuant to section 168(k)(2)(C)(i) and §1.168(k)–1T(b)(2)(ii), the computers are not eligible for the additional first year depreciation deduction provided by section 168(k).

(f) *No change in accounting method.* A change in computing the depreciation allowance in the year of change for property subject to this section is not a change in method of accounting under section 446(e). *See* §1.446–1(e)(2)(ii)(*d*)(*3*)(*ii*).

(g) *Effective dates*—(1) *In general.* This section applies to any change in the use of MACRS property in a taxable year ending on or after June 17, 2004. For any change in the use of MACRS property after December 31, 1986, in a taxable year ending before June 17, 2004, the Internal Revenue Service will allow any reasonable method of depreciating the property under section 168 in the year of change and the subsequent taxable years that is consistently applied to any property for which the use changes in the hands of the same taxpayer or the taxpayer may choose, on a property-by-property basis, to apply the provisions of this section.

(2) *Change in method of accounting*—(i) *In general.* If a taxpayer adopted a method of accounting for depreciation due to a change in the use of MACRS property in a taxable year ending on or after December 30, 2003, and the method adopted is not in accordance with the method of accounting for depreciation provided in this section, a change to the method of accounting for depreciation provided in this section is a change in the method of accounting to which the provisions of sections 446(e) and 481 and the regulations under sections 446(e) and 481 apply. Also, a revocation of the election provided in paragraph (d)(3)(ii) of this section to disregard a change in the use is a change in method of accounting to which the provisions of sections 446(e) and 481 and the regulations under sections 446(e) and 481 apply. However, if a taxpayer adopted a method of accounting for depreciation due to a change in the use of MACRS property after December 31, 1986, in a taxable year ending before December 30, 2003, and the method adopted is not in accordance with the method of accounting for depreciation provided in this section, the taxpayer may treat the change to the method of accounting for depreciation provided in this section as a change in method of accounting to which the provisions of sections 446(e) and 481 and the regulations under sections 446(e) and 481 apply.

(ii) *Automatic consent to change method of accounting.* A taxpayer changing its method of accounting in accordance with this paragraph (g)(2) must follow the applicable administrative procedures issued under §1.446–1(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in method of accounting (for further guidance, for example, *see* Rev. Proc. 2002–9 (2002–1 C.B. 327), (*see* §601.601(d)(2)(ii)(*b*) of this chapter)). Any change in method of accounting made under this paragraph (g)(2) must be made using an adjustment under section 481(a). For purposes of Form 3115, *Application for Change in Accounting Method,* the designated number for the automatic accounting method change authorized by this paragraph (g)(2) is ''88.'' If Form 3115 is revised or renumbered, any reference in this section to that form is treated as a reference to the revised or renumbered form.

[T.D. 9132, 69 FR 33843, June 17, 2004, as amended by T.D. 9307, 71 FR 78068, Dec. 28, 2006]

§ 1.168(i)–5 Table of contents.

This section lists the major paragraphs contained in §1.168(i)–6.

§1.168(i)–6 Like-kind exchanges and involuntary conversions.

[T.D. 9314, 72 FR 9250, Mar. 1, 2007]

§ 1.168(i)–6 Like-kind exchanges and involuntary conversions.

(a) *Scope*. This section provides the rules for determining the depreciation allowance for MACRS property acquired in a like-kind exchange or an involuntary conversion, including a like-kind exchange or an involuntary conversion of MACRS property that is exchanged or replaced with other MACRS property in a transaction between members of the same affiliated group. The allowance for depreciation under this section constitutes the amount of depreciation allowable under section 167(a) for the year of replacement and any subsequent taxable year for the replacement MACRS property and for the year of disposition of the relinquished MACRS property. The provisions of this section apply only to MACRS property to which §1.168(h)–1 (like-kind exchanges of tax-exempt use property) does not apply. Additionally, paragraphs (c) through (f) of this section apply only to MACRS property for which an election under paragraph (i) of this section has not been made.

(b) *Definitions.* For purposes of this section, the following definitions apply:

(1) *Replacement MACRS property* is MACRS property (as defined in §1.168(b)–1(a)(2)) in the hands of the acquiring taxpayer that is acquired for other MACRS property in a like-kind exchange or an involuntary conversion.

(2) *Relinquished MACRS property* is MACRS property that is transferred by the taxpayer in a like-kind exchange, or in an involuntary conversion.

(3) *Time of disposition* is when the disposition of the relinquished MACRS property takes place under the convention, as determined under §1.168(d)–1, that applies to the relinquished MACRS property.

(4) *Time of replacement* is the later of—

(i) When the replacement MACRS property is placed in service under the convention, as determined under this section, that applies to the replacement MACRS property; or

(ii) The time of disposition of the exchanged or involuntarily converted property.

(5) *Year of disposition* is the taxable year that includes the time of disposition.

(6) *Year of replacement* is the taxable year that includes the time of replacement.

(7) *Exchanged basis* is determined after the depreciation deductions for the year of disposition are determined under paragraph (c)(5)(i) of this section and is the lesser of—

(i) The basis in the replacement MACRS property, as determined under section 1031(d) and the regulations under section 1031(d) or section 1033(b) and the regulations under section 1033(b); or

(ii) The adjusted depreciable basis (as defined in §1.168(b)–1(a)(4)) of the relinquished MACRS property.

(8) *Excess basis* is any excess of the basis in the replacement MACRS property, as determined under section 1031(d) and the regulations under section 1031(d) or section 1033(b) and the regulations under section 1033(b), over the exchanged basis as determined under paragraph (b)(7) of this section.

(9) *Depreciable exchanged basis* is the exchanged basis as determined under paragraph (b)(7) of this section reduced by—

(i) The percentage of such basis attributable to the taxpayer's use of property for the taxable year other than in the taxpayer's trade or business (or for the production of income); and

(ii) Any adjustments to basis provided by other provisions of the Internal Revenue Code (Code) and the regulations under the Code (including section 1016(a)(2) and (3), for example, depreciation deductions in the year of replacement allowable under section 168(k) or 1400L(b)).

(10) *Depreciable excess basis* is the excess basis as determined under paragraph (b)(8) of this section reduced by—

(i) The percentage of such basis attributable to the taxpayer's use of property for the taxable year other than in the taxpayer's trade or business (or for the production of income);

(ii) Any portion of the basis the taxpayer properly elects to treat as an expense under section 179; and

(iii) Any adjustments to basis provided by other provisions of the Code and the regulations under the Code (including section 1016(a)(2) and (3), for example, depreciation deductions in the year of replacement allowable under section 168(k) or 1400L(b)).

(11) *Like-kind exchange* is an exchange of property in a transaction to which section 1031(a)(1), (b), or (c) applies.

(12) *Involuntary conversion* is a transaction described in section 1033(a)(1) or (2) that resulted in the nonrecognition of any part of the gain realized as the result of the conversion.

(c) *Determination of depreciation allowance*—(1) *Computation of the depreciation allowance for depreciable exchanged basis beginning in the year of replacement*—(i) *In general.* This paragraph (c) provides rules for determining the applicable recovery period, the applicable depreciation method, and the applicable convention used to determine the depreciation allowances for the depreciable exchanged basis beginning in the year of replacement. See paragraph (c)(5) of this section for rules relating to the computation of the depreciation allowance for the year of disposition and for the year of replacement. See paragraph (d)(1) of this section for rules relating to the computation of the depreciation allowance for depreciable excess basis. See paragraph (d)(4) of this section if the replacement MACRS property is acquired before disposition of the relinquished MACRS property in a transaction to which section 1033 applies. See paragraph (e) of this section for rules relating to the computation of the depreciation allowance using the optional depreciation tables.

(ii) *Applicable recovery period, depreciation method, and convention.* The recovery period, depreciation method, and convention determined under this paragraph (c) are the only permissible methods of accounting for MACRS property within the scope of this section unless the taxpayer makes the election under paragraph (i) of this section not to apply this section.

(2) *Effect of depreciation treatment of the replacement MACRS property by previous owners of the acquired property.* If replacement MACRS property is acquired by a taxpayer in a like-kind exchange or an involuntary conversion, the depreciation treatment of the replacement MACRS property by previous owners has no effect on the determination of depreciation allowances for the replacement MACRS property in the hands of the acquiring taxpayer. For example, a taxpayer exchanging, in a like-kind exchange, MACRS property for property that was depreciated under section 168 of the Internal Revenue Code of 1954 (ACRS) by the previous owner must use this section because the replacement property will become MACRS property in the hands of the acquiring taxpayer. In addition, elections made by previous owners in determining depreciation allowances for the replacement MACRS property have no effect on the acquiring taxpayer. For example, a taxpayer exchanging, in a like-kind exchange, MACRS property that the taxpayer depreciates under the general depreciation system of section 168(a) for other MACRS property that the previous owner elected to depreciate under the alternative depreciation system pursuant to section 168(g)(7) does not have to continue using the alternative depreciation system for the replacement MACRS property.

(3) *Recovery period and/or depreciation method of the properties are the same, or both are not the same*—(i) *In general.* For purposes of paragraphs (c)(3) and (c)(4) of this section in determining whether the recovery period and the depreciation method prescribed under section 168 for the replacement MACRS property are the same as the recovery period and the depreciation method prescribed under section 168 for the relinquished MACRS property, the recovery period and the depreciation method for the replacement MACRS property are considered to be the recovery period and the depreciation method that would have applied under section 168, taking into account any elections made by the acquiring taxpayer under section 168(b)(5) or 168(g)(7), had the replacement MACRS property been placed in service by the acquiring taxpayer at the same time as the relinquished MACRS property.

(ii) *Both the recovery period and the depreciation method are the same.* If both the recovery period and the depreciation method prescribed under section 168 for the replacement MACRS property are the same as the recovery period and the depreciation method prescribed under section 168 for the relinquished MACRS property, the depreciation allowances for the replacement MACRS property beginning in the year of replacement are determined by using the same recovery period and depreciation method that were used for the relinquished MACRS property. Thus, the replacement MACRS property is depreciated over the remaining recovery period (taking into account the applicable convention), and by using the depreciation method, of the relinquished MACRS property. Except as provided in paragraph (c)(5) of this section, the depreciation allowances for the depreciable exchanged basis for any 12-month taxable year beginning with the year of replacement are determined by multiplying the depreciable exchanged basis by the applicable depreciation rate for each taxable year (for further guidance, for example, see section 6 of Rev. Proc. 87–57 (1987–2 CB

687, 692) and §601.601(d)(2)(ii)(*b*) of this chapter).

(iii) *Either the recovery period or the depreciation method is the same, or both are not the same.* If either the recovery period or the depreciation method prescribed under section 168 for the replacement MACRS property is the same as the recovery period or the depreciation method prescribed under section 168 for the relinquished MACRS property, the depreciation allowances for the depreciable exchanged basis beginning in the year of replacement are determined using the recovery period or the depreciation method that is the same as the relinquished MACRS property. See paragraph (c)(4) of this section to determine the depreciation allowances when the recovery period or the depreciation method of the replacement MACRS property is not the same as that of the relinquished MACRS property.

(4) *Recovery period or depreciation method of the properties is not the same.* If the recovery period prescribed under section 168 for the replacement MACRS property (as determined under paragraph (c)(3)(i) of this section) is not the same as the recovery period prescribed under section 168 for the relinquished MACRS property, the depreciation allowances for the depreciable exchanged basis beginning in the year of replacement are determined under this paragraph (c)(4). Similarly, if the depreciation method prescribed under section 168 for the replacement MACRS property (as determined under paragraph (c)(3)(i) of this section) is not the same as the depreciation method prescribed under section 168 for the relinquished MACRS property, the depreciation method used to determine the depreciation allowances for the depreciable exchanged basis beginning in the year of replacement is determined under this paragraph (c)(4).

(i) *Longer recovery period.* If the recovery period prescribed under section 168 for the replacement MACRS property (as determined under paragraph (c)(3)(i) of this section) is longer than that prescribed for the relinquished MACRS property, the depreciation allowances for the depreciable exchanged basis beginning in the year of replacement are determined as though the replacement MACRS property had originally been placed in service by the acquiring taxpayer in the same taxable year the relinquished MACRS property was placed in service by the acquiring taxpayer, but using the longer recovery period of the replacement MACRS property (as determined under paragraph (c)(3)(i) of this section) and the convention determined under paragraph (c)(4)(v) of this section. Thus, the depreciable exchanged basis is depreciated over the remaining recovery period (taking into account the applicable convention) of the replacement MACRS property.

(ii) *Shorter recovery period.* If the recovery period prescribed under section 168 for the replacement MACRS property (as determined under paragraph (c)(3)(i) of this section) is shorter than that of the relinquished MACRS property, the depreciation allowances for the depreciable exchanged basis beginning in the year of replacement are determined using the same recovery period as that of the relinquished MACRS property. Thus, the depreciable exchanged basis is depreciated over the remaining recovery period (taking into account the applicable convention) of the relinquished MACRS property.

(iii) *Less accelerated depreciation method*—(A) If the depreciation method prescribed under section 168 for the replacement MACRS property (as determined under paragraph (c)(3)(i) of this section) is less accelerated than that of the relinquished MACRS property at the time of disposition, the depreciation allowances for the depreciable exchanged basis beginning in the year of replacement are determined as though the replacement MACRS property had originally been placed in service by the acquiring taxpayer at the same time the relinquished MACRS property was placed in service by the acquiring taxpayer, but using the less accelerated depreciation method. Thus, the depreciable exchanged basis is depreciated using the less accelerated depreciation method.

(B) Except as provided in paragraph (c)(5) of this section, the depreciation allowances for the depreciable exchanged basis for any 12-month taxable year beginning in the year of replacement are determined by multiplying the adjusted depreciable basis by the applicable depreciation rate for each taxable year. If, for example, the depreciation method of the replacement MACRS property in the year of replacement is the 150-percent declining balance method and the depreciation method of the relinquished MACRS property in the year of replacement is the 200-percent declining balance method, and neither method had been switched to the straight line method in the year of replacement or any prior taxable year, the applicable depreciation rate for the year of replacement and subsequent taxable years is determined by using the depreciation rate of the replacement MACRS property as if the replacement MACRS property was placed in service by the acquiring taxpayer at the same time the relinquished MACRS property was placed in service by the acquiring taxpayer, until the 150-percent declining balance method has been switched to the straight line method. If, for example, the depreciation method of the replacement MACRS property is the straight line method, the applicable depreciation rate for the year of replacement is determined by using the remaining recovery period at the beginning of the year of disposition (as determined under this paragraph (c)(4) and taking into account the applicable convention).

(iv) *More accelerated depreciation method*—(A) If the depreciation method prescribed under section 168 for the replacement MACRS property (as determined under paragraph (c)(3)(i) of this section) is more accelerated than that of the relinquished MACRS property at the time of disposition, the depreciation allowances for the replacement MACRS property beginning in the year of replacement are determined using the same depreciation method as the relinquished MACRS property.

(B) Except as provided in paragraph (c)(5) of this section, the depreciation allowances for the depreciable exchanged basis for any 12-month taxable year beginning in the year of replacement are determined by multiplying the adjusted depreciable basis by the applicable depreciation rate for each taxable year. If, for example, the depreciation method of the relinquished MACRS property in the year of replacement is the 150-percent declining balance method and the depreciation method of the replacement MACRS property in the year of replacement is the 200-percent declining balance method, and neither method had been switched to the straight line method in the year of replacement or any prior taxable year, the applicable depreciation rate for the year of replacement and subsequent taxable years is the same depreciation rate that applied to the relinquished MACRS property in the year of replacement, until the 150-percent declining balance method has been switched to the straight line method. If, for example, the depreciation method is the straight line method, the applicable depreciation rate for the year of replacement is determined by using the remaining recovery period at the beginning of the year of disposition (as determined under this paragraph (c)(4) and taking into account the applicable convention).

(v) *Convention.* The applicable convention for the exchanged basis is determined under this paragraph (c)(4)(v).

(A) *Either the relinquished MACRS property or the replacement MACRS property is mid-month property.* If either the relinquished MACRS property or the replacement MACRS property is property for which the applicable convention (as determined under section 168(d)) is the mid-month convention, the exchanged basis must be depreciated using the mid-month convention.

(B) *Neither the relinquished MACRS property nor the replacement MACRS property is mid-month property.* If neither the relinquished MACRS property nor the replacement MACRS property is property for which the applicable convention (as determined under section 168(d)) is the mid-month convention, the applicable convention for the exchanged basis is the same convention that applied to the relinquished MACRS property. If the relinquished MACRS property is placed in service in the year of disposition, and the time of replacement is also in the year of disposition, the convention that applies to the relinquished MACRS property is determined under paragraph (f)(1)(i) of this section. If, however, relinquished

MACRS property was placed in service in the year of disposition and the time of replacement is in a taxable year subsequent to the year of disposition, the convention that applies to the exchanged basis is the convention that applies in that subsequent taxable year (see paragraph (f)(1)(ii) of this section).

(5) *Year of disposition and year of replacement.* No depreciation deduction is allowable for MACRS property disposed of by a taxpayer in a like-kind exchange or involuntary conversion in the same taxable year that such property was placed in service by the taxpayer. If replacement MACRS property is disposed of by a taxpayer during the same taxable year that the relinquished MACRS property is placed in service by the taxpayer, no depreciation deduction is allowable for either MACRS property. Otherwise, the depreciation allowances for the year of disposition and for the year of replacement are determined as follows:

(i) *Relinquished MACRS property*—(A) *General rule.* Except as provided in paragraphs (c)(5)(i)(B), (c)(5)(iii), (e), and (i) of this section, the depreciation allowance in the year of disposition for the relinquished MACRS property is computed by multiplying the allowable depreciation deduction for the property for that year by a fraction, the numerator of which is the number of months (including fractions of months) the property is deemed to be placed in service during the year of disposition (taking into account the applicable convention of the relinquished MACRS property), and the denominator of which is 12. In the case of termination under §1.168(i)–1(e)(3)(v) of general asset account treatment of an asset, or of all the assets remaining, in a general asset account, the allowable depreciation deduction in the year of disposition for the asset or assets for which general asset account treatment is terminated is determined using the depreciation method, recovery period, and convention of the general asset account. This allowable depreciation deduction is adjusted to account for the period the asset or assets is deemed to be in service in accordance with this paragraph (c)(5)(i).

(B) *Special rule.* If, at the beginning of the year of disposition, the remaining recovery period of the relinquished MACRS property, taking into account the applicable convention of such property, is less than the period between the beginning of the year of disposition and the time of disposition, the depreciation deduction for the relinquished MACRS property for the year of disposition is equal to the adjusted depreciable basis of the relinquished MACRS property at the beginning of the year of disposition. If this paragraph applies, the exchanged basis is zero and no depreciation is allowable for the exchanged basis in the replacement MACRS property.

(ii) *Replacement MACRS property*—(A) *Remaining recovery period of the replacement MACRS property.* The replacement MACRS property is treated as placed in service at the time of replacement under the convention that applies to the replacement MACRS property as determined under this paragraph (c)(5)(ii). The remaining recovery period of the replacement MACRS property at the time of replacement is the excess of the recovery period for the replacement MACRS property, as determined under paragraph (c) of this section, over the period of time that the replacement MACRS property would have been in service if it had been placed in service when the relinquished MACRS property was placed in service and removed from service at the time of disposition of the relinquished MACRS property. This period is determined by using the convention that applied to the relinquished MACRS property to determine the date that the relinquished MACRS property is deemed to have been placed in service and the date that it is deemed to have been disposed of. The length of time the replacement MACRS property would have been in service is determined by using these dates and the convention that applies to the replacement MACRS property.

(B) *Year of replacement is 12 months.* Except as provided in paragraphs (c)(5)(iii), (e), and (i) of this section, the depreciation allowance in the year of replacement for the depreciable exchanged basis is determined by—

(*1*) Calculating the applicable depreciation rate for the replacement MACRS property as of the beginning of the year of replacement taking into account the depreciation method prescribed for the replacement MACRS property under paragraph (c)(3) of this section and the remaining recovery period of the replacement MACRS property as of the beginning of the year of disposition as determined under this paragraph (c)(5)(ii);

(*2*) Calculating the depreciable exchanged basis of the replacement MACRS property, and adding to that amount the amount determined under paragraph (c)(5)(i) of this section for the year of disposition; and

(*3*) Multiplying the product of the amounts determined under paragraphs (c)(5)(ii)(B)(*1*) and (B)(*2*) of this section by a fraction, the numerator of which is the number of months (including fractions of months) the property is deemed to be in service during the year of replacement (in the year of replacement the replacement MACRS property is deemed to be placed in service by the acquiring taxpayer at the time of replacement under the convention determined under paragraph (c)(4)(v) of this section), and the denominator of which is 12.

(iii) *Year of disposition or year of replacement is less than 12 months.* If the year of disposition or the year of replacement is less than 12 months, the depreciation allowance determined under paragraph (c)(5)(ii)(A) of this section must be adjusted for a short taxable year (for further guidance, for example, see Rev. Proc. 89–15 (1989–1 CB 816) and § 601.601(d)(2)(ii)(*b*) of this chapter).

(iv) *Deferred transactions*—(A) *In general.* If the replacement MACRS property is not acquired until after the disposition of the relinquished MACRS property, taking into account the applicable convention of the relinquished MACRS property and replacement MACRS property, depreciation is not allowable during the period between the disposition of the relinquished MACRS property and the acquisition of the replacement MACRS property. The recovery period for the replacement MACRS property is suspended during this period. For purposes of paragraph (c)(5)(ii) of this section, only the depreciable exchanged basis of the replacement MACRS property is taken into account for calculating the amount in paragraph (c)(5)(ii)(B)(*2*) of this section if the year of replacement is a taxable year subsequent to the year of disposition.

(B) *Allowable depreciation for a qualified intermediary.* [Reserved]

(v) *Remaining recovery period.* The remaining recovery period of the replacement MACRS property is determined as of the beginning of the year of disposition of the relinquished MACRS property. For purposes of determining the remaining recovery period of the replacement MACRS property, the replacement MACRS property is deemed to have been originally placed in service under the convention determined under paragraph (c)(4)(v) of this section, but at the time the relinquished MACRS property was deemed to be placed in service under the convention that applied to it when it was placed in service.

(6) *Examples.* The application of this paragraph (c) is illustrated by the following examples:

Example 1. A1, a calendar-year taxpayer, exchanges Building M, an office building, for Building N, a warehouse in a like-kind exchange. Building M is relinquished in July 2004 and Building N is acquired and placed in service in October 2004. A1 did not make any elections under section 168 for either Building M or Building N. The unadjusted depreciable basis of Building M was $4,680,000 when placed in service in July 1997. Since the recovery period and depreciation method prescribed under section 168 for Building N (39 years, straight line method) are the same as the recovery period and depreciation method prescribed under section 168 for Building M (39 years, straight line method), Building N is depreciated over the remaining recovery period of, and using the same depreciation method and convention as that of, Building M. Applying the applicable convention, Building M is deemed disposed of on July 15, 2004, and Building N is placed in service on October 15, 2004. Thus, Building N will be depreciated using the straight line method over a remaining recovery period of 32 years beginning in October 2004 (the remaining recovery period of 32 years and 6.5 months at the beginning of 2004, less the 6.5 months of depreciation taken prior to the disposition of the exchanged MACRS property (Building M) in 2004). For 2004, the year in which the transaction takes place, the depreciation allowance for Building M is ($120,000)(6.5/12) which equals $65,000. The depreciation allowance for Building N for 2004 is ($120,000)(2.5/

12) which equals $25,000. For 2005 and subsequent years, Building N is depreciated over the remaining recovery period of, and using the same depreciation method and convention as that of, Building M. Thus, the depreciation allowance for Building N is the same as Building M, namely $10,000 per month.

Example 2. B, a calendar-year taxpayer, placed in service Bridge P in January 1998. Bridge P is depreciated using the half-year convention. In January 2004, B exchanges Bridge P for Building Q, an apartment building, in a like-kind exchange. Pursuant to paragraph (k)(2)(i) of this section, B decided to apply §1.168(i)-6 to the exchange of Bridge P for Building Q, the replacement MACRS property. B did not make any elections under section 168 for either Bridge P or Building Q. Since the recovery period prescribed under section 168 for Building Q (27.5 years) is longer than that of Bridge P (15 years), Building Q is depreciated as if it had originally been placed in service in July 1998 and disposed of in July 2004 using a 27.5 year recovery period. Additionally, since the depreciation method prescribed under section 168 for Building Q (straight line method) is less accelerated than that of Bridge P (150-percent declining balance method), then the depreciation allowance for Building Q is computed using the straight line method. Thus, when Building Q is acquired and placed in service in 2004, its basis is depreciated over the remaining 21.5 year recovery period using the straight line method of depreciation and the mid-month convention beginning in July 2004.

Example 3. C, a calendar-year taxpayer, placed in service Building R, a restaurant, in January 1996. In January 2004, C exchanges Building R for Tower S, a radio transmitting tower, in a like-kind exchange. Pursuant to paragraph (k)(2)(i) of this section, C decided to apply §1.168(i)-6 to the exchange of Building R for Tower S, the replacement MACRS property. C did not make any elections under section 168 for either Building R or Tower S. Since the recovery period prescribed under section 168 for Tower S (15 years) is shorter than that of Building R (39 years), Tower S is depreciated over the remaining recovery period of Building R. Additionally, since the depreciation method prescribed under section 168 for Tower S (150% declining balance method) is more accelerated than that of Building R (straight line method), then the depreciation allowance for Tower S is also computed using the same depreciation method as Building R. Thus, Tower S is depreciated over the remaining 31 year recovery period of Building R using the straight line method of depreciation and the mid-month convention. Alternatively, C may elect under paragraph (i) of this section to treat Tower S as though it is placed in service in January 2004. In such case, C uses the applicable recovery period, depreciation method, and convention prescribed under section 168 for Tower S.

Example 4. (i) In February 2002, D, a calendar-year taxpayer and manufacturer of rubber products, acquired for $60,000 and placed in service Asset T (a special tool) and depreciated Asset T using the straight line method election under section 168(b)(5) and the mid-quarter convention over its 3-year recovery period. D elected not to deduct the additional first year depreciation for 3-year property placed in service in 2002. In June 2004, D exchanges Asset T for Asset U (not a special tool) in a like-kind exchange. D elected not to deduct the additional first year depreciation for 7-year property placed in service in 2004. Since the recovery period prescribed under section 168 for Asset U (7 years) is longer than that of Asset T (3 years), Asset U is depreciated as if it had originally been placed in service in February 2002 using a 7-year recovery period. Additionally, since the depreciation method prescribed under section 168 for Asset U (200-percent declining balance method) is more accelerated than that of Asset T (straight line method) at the time of disposition, the depreciation allowance for Asset U is computed using the straight line method. Asset U is depreciated over its remaining recovery period of 4.75 years using the straight line method of depreciation and the mid-quarter convention.

(ii) The 2004 depreciation allowance for Asset T is $7,500 ($20,000 allowable depreciation deduction for 2004) $\times$ 4.5 months $\div$ 12).

(iii) The depreciation rate in 2004 for Asset U is 0.1951 (1 $\div$ 5.125 years (the length of the applicable recovery period remaining as of the beginning of 2004)). Therefore, the depreciation allowance for Asset U in 2004 is $2,744 (0.1951 $\times$ $22,500 (the sum of the $15,000 depreciable exchanged basis of Asset U ($22,500 adjusted depreciable basis at the beginning of 2004 for Asset T, less the $7,500 depreciation allowable for Asset T for 2004) and the $7,500 depreciation allowable for Asset T for 2004) $\times$ 7.5 months $\div$ 12).

Example 5. The facts are the same as in *Example 4* except that D exchanges Asset T for Asset U in June 2005, in a like-kind exchange. Under these facts, the remaining recovery period of Asset T at the beginning of 2005 is 1.5 months and, as a result, is less than the 5-month period between the beginning of 2005 (year of disposition) and June 2005 (time of disposition). Accordingly, pursuant to paragraph (c)(5)(i)(B) of this section, the 2005 depreciation allowance for Asset T is $2,500 ($2,500 adjusted depreciable basis at the beginning of 2005 ($60,000 original basis minus $17,500 depreciation deduction for 2002 minus $20,000 depreciation deduction for 2003 minus $20,000 depreciation deduction for 2004)). Because the exchanged basis of asset U is $0.00, no depreciation is allowable for asset U.

Example 6. On January 1, 2004, E, a calendar-year taxpayer, acquired and placed in service Canopy V, a gas station canopy. The purchase price of Canopy V was $60,000. On August 1, 2004, Canopy V was destroyed in a hurricane and was therefore no longer usable in E's business. On October 1, 2004, as part of the involuntary conversion, E acquired and placed in service new Canopy W with the insurance proceeds E received due to the loss of Canopy V. E elected not to deduct the additional first year depreciation for 5-year property placed in service in 2004. E depreciates both canopies under the general depreciation system of section 168(a) by using the 200-percent declining balance method of depreciation, a 5-year recovery period, and the half-year convention. No depreciation deduction is allowable for Canopy V. The depreciation deduction allowable for Canopy W for 2004 is $12,000 ($60,000 × the annual depreciation rate of .40 × ½ year). For 2005, the depreciation deduction for Canopy W is $19,200 ($48,000 adjusted basis × the annual depreciation rate of .40).

Example 7. The facts are the same as in *Example 6*, except that E did not make the election out of the additional first year depreciation for 5-year property placed in service in 2004. E depreciates both canopies under the general depreciation system of section 168(a) by using the 200-percent declining balance method of depreciation, a 5-year recovery period, and the half-year convention. No depreciation deduction is allowable for Canopy V. For 2004, E is allowed a 50-percent additional first year depreciation deduction of $30,000 for Canopy W (the unadjusted depreciable basis of $60,000 multiplied by .50), and a regular MACRS depreciation deduction of $6,000 for Canopy W (the depreciable exchanged basis of $30,000 multiplied by the annual depreciation rate of .40 × ½ year). For 2005, E is allowed a regular MACRS depreciation deduction of $9,600 for Canopy W (the depreciable exchanged basis of $24,000 ($30,000 minus regular 2003 depreciation of $6,000) multiplied by the annual depreciation rate of .40).

Example 8. In January 2001, F, a calendar-year taxpayer, places in service a paved parking lot, Lot W, and begins depreciating Lot W over its 15-year recovery period. F's unadjusted depreciable basis in Lot W is $1,000x. On April 1, 2004, F disposes of Lot W in a like-kind exchange for Building X, which is nonresidential real property. Lot W is depreciated using the 150 percent declining balance method and the half-year convention. Building X is depreciated using the straight-line method with a 39-year recovery period and using the mid-month convention. Both Lot W and Building X were in service at the time of the exchange. Because Lot W was depreciated using the half-year convention, it is deemed to have been placed in service on July 1, 2001, the first day of the second half of 2001, and to have been disposed of on July 1, 2004, the first day of the second half of 2004. To determine the remaining recovery period of Building X at the time of replacement, Building X is deemed to have been placed in service on July 1, 2001, and removed from service on July 1, 2004. Thus, Building X is deemed to have been in service, at the time of replacement, for 3 years (36 months = 5.5 months in 2001 + 12 months in 2002 + 12 months in 2003 + 6.5 months in 2004) and its remaining recovery period is 36 years (39 − 3). Because Building X is deemed to be placed in service at the time of replacement, July 1, 2004, the first day of the second half of 2004, Building X is depreciated for 5.5 months in 2004. However, at the beginning of the year of replacement the remaining recovery period for Building X is 36 years and 6.5 months (39 years − 2 years and 5.5 months (5.5 months in 2001 + 12 months in 2002 + 12 months in 2003)). The depreciation rate for building X for 2004 is 0.02737 (= 1/(39–2–5.5/12)). For 2005, the depreciation rate for Building X is 0.02814 (= 1/(39–3–5.5/12)).

Example 9. The facts are the same as in *Example 8*. F did not make the election under paragraph (i) of this section for Building Y in the initial exchange. In January 2006, F exchanges Building Y for Building Z, an office building, in a like-kind exchange. F did not make any elections under section 168 for either Building Y or Building Z. Since the recovery period prescribed for Building Y as a result of the initial exchange (39 years) is longer than that of Building Z (27.5 years), Building Z is depreciated over the remaining 33 years of the recovery period of Building Y. The depreciation methods are the same for both Building Y and Building Z so F's exchanged basis in Building Z is depreciated over 33 years, using the straight-line method and the mid-month convention, beginning in January 2006. Alternatively, F could have made the election under paragraph (i) of this section. If F makes such election, Building Z is treated as placed in service by F when acquired in January 2006 and F would recover its exchanged basis in Building Z over 27.5 years, using the straight line method and the mid-month convention, beginning in January 2006.

(d) *Special rules for determining depreciation allowances*—(1) *Excess basis*—(i) *In general.* Any excess basis in the replacement MACRS property is treated as property that is placed in service by the acquiring taxpayer in the year of replacement. Thus, the depreciation allowances for the depreciable excess basis are determined by using the applicable recovery period, depreciation method, and convention prescribed under section 168 for the property at the time of replacement. However, if replacement MACRS property is disposed of during the same taxable year the relinquished MACRS property is placed in service by the acquiring taxpayer, no depreciation deduction is allowable for either MACRS property. See paragraph (g) of this section regarding the application of section 179. See paragraph (h) of this section regarding the application of section 168(k) or 1400L(b).

(ii) *Example*. The application of this paragraph (d)(1) is illustrated by the following example:

Example. In 1989, G placed in service a hospital. On January 16, 2004, G exchanges this hospital plus $2,000,000 cash for an office building in a like-kind exchange. On January 16, 2004, the hospital has an adjusted depreciable basis of $1,500,000. After the exchange, the basis of the office building is $3,500,000. Pursuant to paragraph (k)(2)(i) of this section, G decided to apply §1.168(i)–6 to the exchange of the hospital for the office building, the replacement MACRS property. The depreciable exchanged basis of the office building is depreciated in accordance with paragraph (c) of this section. The depreciable excess basis of $2,000,000 is treated as being placed in service by G in 2004 and, as a result, is depreciated using the applicable depreciation method, recovery period, and convention prescribed for the office building under section 168 at the time of replacement.

(2) *Depreciable and nondepreciable property*—(i) If land or other nondepreciable property is acquired in a like-kind exchange for, or as a result of an involuntary conversion of, depreciable property, the land or other nondepreciable property is not depreciated. If both MACRS and nondepreciable property are acquired in a like-kind exchange for, or as part of an involuntary conversion of, MACRS property, the basis allocated to the nondepreciable property (as determined under section 1031(d) and the regulations under section 1031(d) or section 1033(b) and the regulations under section 1033(b)) is not depreciated and the basis allocated to the replacement MACRS property (as determined under section 1031(d) and the regulations under section 1031(d) or section 1033(b) and the regulations under section 1033(b)) is depreciated in accordance with this section.

(ii) If MACRS property is acquired, or if both MACRS and nondepreciable property are acquired, in a like-kind exchange for, or as part of an involuntary conversion of, land or other nondepreciable property, the basis in the replacement MACRS property that is attributable to the relinquished nondepreciable property is treated as though the replacement MACRS property is placed in service by the acquiring taxpayer in the year of replacement. Thus, the depreciation allowances for the replacement MACRS property are determined by using the applicable recovery period, depreciation method, and convention prescribed under section 168 for the replacement MACRS property at the time of replacement. See paragraph (g) of this section regarding the application of section 179. See paragraph (h) of this section regarding the application of section 168(k) or 1400L(b).

(3) *Depreciation limitations for automobiles*—(i) *In general*. Depreciation allowances under section 179 and section 167 (including allowances under sections 168 and 1400L(b)) for a passenger automobile, as defined in section 280F(d)(5), are subject to the limitations of section 280F(a). The depreciation allowances for a passenger automobile that is replacement MACRS property (replacement MACRS passenger automobile) generally are limited in any taxable year to the replacement automobile section 280F limit for the taxable year. The taxpayer's basis in the replacement MACRS passenger automobile is treated as being comprised of two separate components. The first component is the exchanged basis and the second component is the excess basis, if any. The depreciation allowances for a passenger automobile that is relinquished MACRS property (relinquished MACRS passenger automobile) for the taxable year generally are limited to the relinquished automobile section 280F limit for that taxable year. In the year of disposition the sum of the depreciation deductions for the relinquished MACRS passenger automobile and the replacement MACRS passenger automobile may not exceed the replacement automobile section 280F limit unless the taxpayer makes the election under §1.168(i)–6(i). For purposes of this paragraph (d)(3), the following definitions apply:

(A) *Replacement automobile section 280F limit* is the limit on depreciation deductions under section 280F(a) for the taxable year based on the time of replacement of the replacement MACRS passenger automobile (including the effect of any elections under section 168(k) or section 1400L(b), as applicable).

(B) *Relinquished automobile section 280F limit* is the limit on depreciation deductions under section 280F(a) for the taxable year based on when the relinquished MACRS passenger automobile was placed in service by the taxpayer.

(ii) *Order in which limitations on depreciation under section 280F(a) are applied.* Generally, depreciation deductions allowable under section 280F(a) reduce the basis in the relinquished MACRS passenger automobile and the exchanged basis of the replacement MACRS passenger automobile, before the excess basis of the replacement MACRS passenger automobile is reduced. The depreciation deductions for the relinquished MACRS passenger automobile in the year of disposition and the replacement MACRS passenger automobile in the year of replacement and each subsequent taxable year are allowable in the following order:

(A) The depreciation deduction allowable for the relinquished MACRS passenger automobile as determined under paragraph (c)(5)(i) of this section for the year of disposition to the extent of the smaller of the replacement automobile section 280F limit and the relinquished automobile section 280F limit, if the year of disposition is the year of replacement. If the year of replacement is a taxable year subsequent to the year of disposition, the depreciation deduction allowable for the relinquished MACRS passenger automobile for the year of disposition is limited to the relinquished automobile section 280F limit.

(B) The additional first year depreciation allowable on the remaining exchanged basis (remaining carryover basis as determined under §1.168(k)–1(f)(5) or §1.1400L(b)–1(f)(5), as applicable) of the replacement MACRS passenger automobile, as determined under §1.168(k)–1(f)(5) or §1.1400L(b)–1(f)(5), as applicable, to the extent of the excess of the replacement automobile section 280F limit over the amount allowable under paragraph (d)(3)(ii)(A) of this section.

(C) The depreciation deduction allowable for the taxable year on the depreciable exchanged basis of the replacement MACRS passenger automobile determined under paragraph (c) of this section to the extent of any excess over the sum of the amounts allowable under paragraphs (d)(3)(ii)(A) and (B) of this section of the smaller of the replacement automobile section 280F limit and the relinquished automobile section 280F limit.

(D) Any section 179 deduction allowable in the year of replacement on the excess basis of the replacement MACRS passenger automobile to the extent of the excess of the replacement automobile section 280F limit over the sum of the amounts allowable under paragraphs (d)(3)(ii)(A), (B), and (C) of this section.

(E) The additional first year depreciation allowable on the remaining excess basis of the replacement MACRS passenger automobile, as determined under §1.168(k)–1(f)(5) or §1.1400L(b)–1(f)(5), as applicable, to the extent of the excess of the replacement automobile section 280F limit over the sum of the amounts allowable under paragraphs (d)(3)(ii)(A), (B), (C), and (D) of this section.

(F) The depreciation deduction allowable under paragraph (d) of this section for the depreciable excess basis of the replacement MACRS passenger automobile to the extent of the excess of the replacement automobile section 280F limit over the sum of the amounts allowable under paragraphs (d)(3)(ii)(A), (B), (C), (D), and (E) of this section.

(iii) *Examples.* The application of this paragraph (d)(3) is illustrated by the following examples:

Example 1. H, a calendar-year taxpayer, acquired and placed in service Automobile X in January 2000 for $30,000 to be used solely for H's business. In December 2003, H exchanges, in a like-kind exchange, Automobile X plus $15,000 cash for new Automobile Y that will also be used solely in H's business. Automobile Y is 50-percent bonus depreciation property for purposes of section 168(k)(4). Both automobiles are depreciated using the double declining balance method, the half-year convention, and a 5-year recovery period. Pursuant to §1.168(k)–1(g)(3)(ii) and paragraph (k)(2)(i) of this section, H decided to apply §1.168(i)–6 to the exchange of Automobile X for Automobile Y, the replacement MACRS property. The relinquished automobile section 280F limit for 2003 for Automobile X is $1,775. The replacement automobile section 280F limit for Automobile Y is $10,710. The exchanged basis for Automobile Y is $17,315 ($30,000 less total depreciation allowable of $12,685 (($3,060 for 2000, $4,900 for 2001, $2,950 for 2002, and $1,775 for 2003)). Without taking section 280F into account, the additional first year depreciation deduction for the remaining exchanged basis is $8,658 ($17,315 × 0.5). Because this amount is less than $8,935 ($10,710 (the replacement automobile section 280F limit for 2003 for Automobile Y) − $1,775 (the depreciation allowable for Automobile X for 2003)), the additional first year depreciation deduction for the exchanged basis is $8,658. No depreciation deduction is allowable in 2003 for the depreciable exchanged basis because the depreciation deductions taken for Automobile X and the remaining exchanged basis exceed the exchanged automobile section 280F limit. An additional first year depreciation deduction of $277 is allowable for the excess basis of $15,000 in Automobile Y. Thus, at the end of 2003 the adjusted depreciable basis in Automobile Y is $23,379 comprised of adjusted depreciable exchanged basis of $8,657 ($17,315 (exchanged basis) − $8,658 (additional first year depreciation for exchanged basis)) and of an adjusted depreciable excess basis of $14,723 ($15,000 (excess basis) − $277 (additional first year depreciation for 2003)).

Example 2. The facts are the same as in *Example 1,* except that H used Automobile X only 75 percent for business use. As such, the total allowable depreciation for Automobile X is reduced to reflect that the automobile is only used 75 percent for business. The total allowable depreciation of Automobile X is $9,513.75 ($2,295 for 2000 ($3,060 limit × .75), $3,675 for 2001 ($4,900 limit × .75), $2,212.50 for 2002 ($2,950 limit × .75), and $1,331.25 for 2003 ($1,775 limit × .75). However, under §1.280F–2T(g)(2)(ii)(A), the exchanged basis is reduced by the excess (if any) of the depreciation that would have been allowable if the exchanged automobile had been used solely for business over the depreciation that was allowable in those years. Thus, the exchanged basis, for purposes of computing depreciation, for Automobile Y is $17,315.

Example 3. The facts are the same as in *Example 1,* except that H placed in service Automobile X in January 2002, and H elected not to claim the additional first year depreciation deduction for 5-year property placed in service in 2002 and 2003. The relinquished automobile section 280F limit for Automobile X for 2003 is $4,900. Because the replacement automobile section 280F limit for 2003 for Automobile Y ($3,060) is less than the relinquished automobile section 280F limit for Automobile X for 2003 and is less than $5,388 (($30,000 (cost) − $3,060 (depreciation allowable for 2002)) × 0.4 × 6/12), the depreciation that would be allowable for Automobile X (determined without regard to section 280F) in the year of disposition, the depreciation for Automobile X in the year of disposition is limited to $3,060. For 2003 no depreciation is allowable for the excess basis and the exchanged basis in Automobile Y.

Example 4. AB, a calendar-year taxpayer, purchased and placed in service Automobile X1 in February 2000 for $10,000. X1 is a passenger automobile subject to section 280F(a) and is used solely for AB's business. AB depreciated X1 using a 5-year recovery period, the double declining balance method, and the half-year convention. As of January 1, 2003, the adjusted depreciable basis of X1 was $2,880 ($10,000 original cost minus $2,000 depreciation deduction for 2000, minus $3,200 depreciation deduction for 2001, and $1,920 depreciation deduction for 2002). In November 2003, AB exchanges, in a like-kind exchange, Automobile X1 plus $14,000 cash for new Automobile Y1 that will be used solely in AB's business. Automobile Y1 is 50-percent bonus depreciation property for purposes of section 168(k)(4) and qualifies for the expensing election under section 179. Pursuant to paragraph §1.168(k)–1(g)(3)(ii) and paragraph (k)(2)(i) of this section, AB decided to apply §1.168(i)–6 to the exchange of Automobile X1 for Automobile Y1, the replacement MACRS property. AB also makes the election under section 179 for the excess basis of Automobile Y1. AB depreciates Y1 using a five-year recovery period, the double declining balance method and the half-year convention. For 2003, the relinquished automobile section 280F limit for Automobile X1 is $1,775 and the replacement automobile section 280F limit for 2003 for Automobile Y1 is $10,710.

(i) The 2003 depreciation deduction for Automobile X1 is $576. The depreciation deduction calculated for X1 is $576 (the adjusted depreciable basis of Automobile X1 at the beginning of 2003 of $2,880 × 40% × ½ year), which is less than the relinquished automobile section 280F limit and the replacement automobile section 280F limit.

(ii) The additional first year depreciation deduction for the exchanged basis is $1,152. The additional first year depreciation deduction of $1,152 (remaining exchanged basis of $2,304 ($2,880 adjusted basis of Automobile X1 at the beginning of 2003 minus $576) − 0.5)) is less than the replacement automobile section 280F limit minus $576.

(iii) AB's MACRS depreciation deduction allowable in 2003 for the remaining exchanged basis of $1,152 is $47 (the relinquished automobile section 280F limit of $1,775 less the depreciation deduction of $576 taken for Automobile X1 less the additional first year depreciation deduction of $1,152 taken for the exchanged basis) which is less than the depreciation deduction calculated for the depreciable exchanged basis.

(iv) For 2003, AB takes a $1,400 section 179 deduction for the excess basis of Automobile Y1. AB must reduce the excess basis of $14,000 by the section 179 deduction of $1,400 to determine the remaining excess basis of $12,600.

(v) For 2003, AB is allowed a 50-percent additional first year depreciation deduction of $6,300 (the remaining excess basis of $12,600 multiplied by .50).

(vi) For 2003, AB's depreciation deduction for the depreciable excess basis is limited to $1,235. The depreciation deduction computed without regard to the replacement automobile section 280F limit is $1,260 ($6,300 depreciable excess basis × 0.4 × 6/12). However the depreciation deduction for the depreciable excess basis is limited to $1,235 ($10,710 (replacement automobile section 280F limit) − $576 (depreciation deduction for Automobile X1) − $1,152 (additional first year depreciation deduction for the exchanged basis) − $47 (depreciation deduction for exchanged basis) − 1,400 (section 179 deduction) − $6,300 (additional first year depreciation deduction for remaining excess basis)).

(4) *Involuntary conversion for which the replacement MACRS property is acquired and placed in service before disposition of relinquished MACRS property.* If, in an involuntary conversion, a taxpayer acquires and places in service the replacement MACRS property before the date of disposition of the relinquished MACRS property, the taxpayer depreciates the unadjusted depreciable basis of the replacement MACRS property under section 168 beginning in the taxable year when the replacement MACRS property is placed in service by the taxpayer and by using the applicable depreciation method, recovery period, and convention prescribed under section 168 for the replacement MACRS property at the placed-in-service date. However, at the time of disposition of the relinquished MACRS property, the taxpayer determines the exchanged basis and the excess basis of the replacement MACRS property and begins to depreciate the depreciable exchanged basis of the replacement MACRS property in accordance with paragraph (c) of this section. The depreciable excess basis of the replacement MACRS property continues to be depreciated by the taxpayer in accordance with the first sentence of this paragraph (d)(4). Further, in the year of disposition of the relinquished MACRS property, the taxpayer must include in taxable income the excess of the depreciation deductions allowable on the unadjusted depreciable basis of the replacement MACRS property over the depreciation deductions that would have been allowable to the taxpayer on the depreciable excess basis of the replacement MACRS property from the date the replacement MACRS property was placed in service by the taxpayer (taking into account the applicable convention) to the time of disposition of the relinquished MACRS property. However, see §1.168(k)–1(f)(5)(v) for replacement MACRS property that is qualified property or 50-percent bonus depreciation property and §1.1400L(b)–1(f)(5) for replacement MACRS property that is qualified New York Liberty Zone property.

(e) *Use of optional depreciation tables*—(1) *Taxpayer not bound by prior use of table.* If a taxpayer used an optional depreciation table for the relinquished MACRS property, the taxpayer is not required to use an optional table for the depreciable exchanged basis of the replacement MACRS property. Conversely, if a taxpayer did not use an optional depreciation table for the relinquished MACRS property, the taxpayer may use the appropriate table for the depreciable exchanged basis of the replacement MACRS property. If a taxpayer decides not to use the table for the depreciable exchanged basis of the replacement MACRS property, the depreciation allowance for this property for the year of replacement and subsequent taxable years is determined under paragraph (c) of this section. If a taxpayer decides to use the optional depreciation tables, no depreciation deduction is allowable for MACRS property placed in service by the acquiring taxpayer and subsequently exchanged or involuntarily converted by such taxpayer in the same taxable year, and, if, during the same taxable year, MACRS property is placed in service by the acquiring taxpayer, exchanged or involuntarily converted by such taxpayer, and the replacement MACRS property is disposed of by such taxpayer, no depreciation deduction is allowable for either MACRS property.

(2) *Determination of the depreciation deduction*—(i) *Relinquished MACRS property*. In the year of disposition, the depreciation allowance for the relinquished MACRS property is computed by multiplying the unadjusted depreciable basis (less the amount of the additional first year depreciation deduction allowed or allowable, whichever is greater, under section 168(k) or section 1400L(b), as applicable) of the relinquished MACRS property by the annual depreciation rate (expressed as a decimal equivalent) specified in the appropriate table for the recovery year corresponding to the year of disposition. This product is then multiplied by a fraction, the numerator of which is the number of months (including fractions of months) the property is deemed to be placed in service during the year of the exchange or involuntary conversion (taking into account the applicable convention) and the denominator of which is 12. However, if the year of disposition is less than 12 months, the depreciation allowance determined under this paragraph (e)(2)(i) must be adjusted for a short taxable year (for further guidance, for example, see Rev. Proc. 89–15 (1989–1 CB 816) and §601.601(d)(2)(ii)(*b*) of this chapter).

(ii) *Replacement MACRS property*—(A) *Determination of the appropriate optional depreciation table*. If a taxpayer chooses to use the appropriate optional depreciation table for the depreciable exchanged basis, the depreciation allowances for the depreciable exchanged basis beginning in the year of replacement are determined by choosing the optional depreciation table that corresponds to the recovery period, depreciation method, and convention of the replacement MACRS property determined under paragraph (c) of this section.

(B) *Calculating the depreciation deduction for the replacement MACRS property*. (*1*) The depreciation deduction for the taxable year is computed by first determining the appropriate recovery year in the table identified under paragraph (e)(2)(ii)(A) of this section. The appropriate recovery year for the year of replacement is the same as the recovery year for the year of disposition, regardless of the taxable year in which the replacement property is acquired. For example, if the recovery year for the year of disposition would have been year 4 in the table that applied before the disposition of the relinquished MACRS property, then the recovery year for the year of replacement is Year 4 in the table identified under paragraph (e)(2)(ii)(A) of this section.

(*2*) Next, the annual depreciation rate (expressed as a decimal equivalent) for each recovery year is multiplied by a transaction coefficient. The transaction coefficient is the formula $(1 / (1 - x))$ where x equals the sum of the annual depreciation rates from the table identified under paragraph (e)(2)(ii)(A) of this section (expressed as a decimal equivalent) corresponding to the replacement MACRS property (as determined under paragraph (e)(2)(ii)(A) of this section) for the taxable years beginning with the placed-in-service year of the relinquished MACRS property through the taxable year immediately prior to the year of disposition. The product of the annual depreciation rate and the transaction coefficient is multiplied by the depreciable exchanged basis (taking into account paragraph (e)(2)(i) of this section). In the year of replacement, this product is then multiplied by a fraction, the numerator of which is the number of months (including fractions of months) the property is deemed to be placed in service by the acquiring taxpayer during the year of replacement (taking into account the applicable convention) and the denominator of which is 12. However, if the year of replacement is the year the relinquished MACRS property is placed in service by the acquiring taxpayer, the preceding sentence does not apply. In addition, if the year of replacement is less than 12 months, the depreciation allowance determined under paragraph (e)(2)(ii) of this section must be adjusted for a short taxable year (for further guidance, for example, see Rev. Proc. 89–15 (1989–1 CB 816) and §601.601(d)(2)(ii)(*b*) of this chapter).

(iii) *Unrecovered basis*. If the replacement MACRS property would have unrecovered depreciable basis after the final recovery year (for example, due to a deferred exchange), the unrecovered basis is an allowable depreciation deduction in the taxable year that corresponds to the final recovery year unless the unrecovered basis is subject to a depreciation limitation such as section 280F.

(3) *Excess basis.* As provided in paragraph (d)(1) of this section, any excess basis in the replacement MACRS property is treated as property that is placed in service by the acquiring taxpayer at the time of replacement. Thus, if the taxpayer chooses to use the appropriate optional depreciation table for the depreciable excess basis in the replacement MACRS property, the depreciation allowances for the depreciable excess basis are determined by multiplying the depreciable excess basis by the annual depreciation rate (expressed as a decimal equivalent) specified in the appropriate table for each taxable year. The appropriate table for the depreciable excess basis is based on the depreciation method, recovery period, and convention applicable to the depreciable excess basis under section 168 at the time of replacement. However, If the year of replacement is less than 12 months, the depreciation allowance determined under this paragraph (e)(3) must be adjusted for a short taxable year (for further guidance, for example, see Rev. Proc. 89–15 (1989–1 CB 816) and §601.601(d)(2)(ii)(*b*) of this chapter).

(4) *Examples.* The application of this paragraph (e) is illustrated by the following examples:

Example 1. J, a calendar-year taxpayer, acquired 5-year property for $10,000 and placed it in service in January 2001. J uses the optional tables to depreciate the property. J uses the half-year convention and did not make any elections for the property. In December 2003, J exchanges the 5-year property for used 7-year property in a like-kind exchange. Pursuant to paragraph (k)(2)(i) of this section, J decided to apply §1.168(i)–6 to the exchange of the 5-year property for the 7-year property, the replacement MACRS property. The depreciable exchanged basis of the 7-year property equals the adjusted depreciable basis of the 5-year property at the time of disposition of the relinquished MACRS property, namely $3,840 ($10,000 less $2,000 depreciation in 2001, $3,200 depreciation in 2002, and $960 depreciation in 2003). J must first determine the appropriate optional depreciation table pursuant to paragraph (c) of this section. Since the replacement MACRS property has a longer recovery period and the same depreciation method as the relinquished MACRS property, J uses the optional depreciation table corresponding to a 7-year recovery period, the 200% declining balance method, and the half-year convention (because the 5-year property was depreciated using a half-year convention). Had the replacement MACRS property been placed in service in the same taxable year as the placed-in-service year of the relinquished MACRS property, the depreciation allowance for the replacement MACRS property for the year of replacement would be determined using recovery year 3 of the optional table. The depreciation allowance equals the depreciable exchanged basis ($3,840) multiplied by the annual depreciation rate for the current taxable year (.1749 for recovery year 3) as modified by the transaction coefficient [1 / (1 − (.1429 + .2449))] which equals 1.6335. Thus, J multiplies $3,840, its depreciable exchanged basis in the replacement MACRS property, by the product of .1749 and 1.6335, and then by one-half, to determine the depreciation allowance for 2003, $549. For 2004, J multiples its depreciable exchanged basis in the replacement MACRS property determined at the time of replacement of $3,840 by the product of the modified annual depreciation rate for the current taxable year (.1249 for recovery year 4) and the transaction coefficient (1.6335) to determine its depreciation allowance of $783.

Example 2. K, a calendar-year taxpayer, acquired used Asset V for $100,000 and placed it in service in January 1999. K depreciated Asset V under the general depreciation system of section 168(a) by using a 5-year recovery period, the 200-percent declining balance method of depreciation, and the half-year convention. In December 2003, as part of the involuntary conversion, Asset V is involuntarily converted due to an earthquake. In October 2005, K purchases used Asset W with the insurance proceeds from the destruction of Asset V and places Asset W in service to replace Asset V. Pursuant to paragraph (k)(2)(i) of this section, K decided to apply §1.168(i)–6 to the involuntary conversion of Asset V with the replacement of Asset W, the replacement MACRS property. If Asset W had been placed in service when Asset V was placed in service, it would have been depreciated using a 7-year recovery period, the 200-percent declining balance method, and the half-year convention. K uses the optional depreciation tables to depreciate Asset V and Asset W. For 2003 (recovery year 5 on the optional table), the depreciation deduction for Asset V is $5,760 ((0.1152)($100,000)(1/2)). Thus, the adjusted depreciable basis of Asset V at the time of replacement is $11,520 ($100,000 less $20,000 depreciation in 1999, $32,000 depreciation in 2000, $19,200 depreciation in 2001, $11,520 depreciation in 2002, and $5,760 depreciation in 2003). Under the table that applied to Asset V, the year of disposition was recovery year 5 and the depreciation deduction was determined under the straight line method. The table that applies for Asset W is the table that applies the straight line depreciation method, the half-year convention, and a 7-year recovery period. The appropriate recovery year under this table is recovery year 5. The depreciation deduction for Asset W for 2005 is $1,646 (($11,520)(0.1429)(1/(1−0.5))(1/2)). Thus, the depreciation deduction for Asset W in 2006 (recovery year 6) is $3,290 ($11,520)(0.1428)(1/(1−0.5)). The depreciation deduction for 2007 (recovery year 7) is $3,292 (($11,520)(.1429)(1/(1−.5))). The depreciation deduction for 2008 (recovery year 8) is $3292 ($11,520 less allowable depreciation for Asset W for 2005 through 2007 ($1,646 + $3,290 + $3,292)).

Example 3. L, a calendar-year taxpayer, placed in service used Computer X in January 2002 for $5,000. L depreciated Computer X under the general depreciation system of section 168(a) by using the 200-percent declining balance method of depreciation, a 5-year recovery period, and the half-year convention. Computer X is destroyed in a fire in March 2004. For 2004, the depreciation deduction allowable for Computer X equals $480 ([($5,000)(.1920)] × (1/2)). Thus, the adjusted depreciable basis of Computer X was $1,920 when it was destroyed ($5,000 unadjusted depreciable basis less $1,000 depreciation for 2002, $1,600 depreciation for 2003, and $480 depreciation for 2004). In April 2004, as part of the involuntary conversion, L acquired and placed in service used Computer Y with insurance proceeds received due to the loss of Computer X. Computer Y will be depreciated using the same depreciation method, recovery period, and convention as Computer X. L elected to use the optional depreciation tables to compute the depreciation allowance for Computer X and Computer Y. The depreciation deduction allowable for 2004 for Computer Y equals $384 ([$1,920 × (.1920)(1/(1−.52))] × (1/2)).

(f) *Mid-quarter convention.* For purposes of applying the 40-percent test under section 168(d) and the regulations under section 168(d), the following rules apply:

(1) *Exchanged basis.* If, in a taxable year, MACRS property is placed in service by the acquiring taxpayer (but not as a result of a like-kind exchange or involuntary conversion) and—

(i) In the same taxable year, is disposed of by the acquiring taxpayer in a like-kind exchange or an involuntary conversion and replaced by the acquiring taxpayer with replacement MACRS property, the exchanged basis (determined without any adjustments for depreciation deductions during the taxable year) of the replacement MACRS property is taken into account in the year of replacement in the quarter the relinquished MACRS property was placed in service by the acquiring taxpayer; or

(ii) In the same taxable year, is disposed of by the acquiring taxpayer in a like-kind exchange or an involuntary conversion, and in a subsequent taxable year is replaced by the acquiring taxpayer with replacement MACRS property, the exchanged basis (determined without any adjustments for depreciation deductions during the taxable year) of the replacement MACRS property is taken into account in the year of replacement in the quarter the replacement MACRS property was placed in service by the acquiring taxpayer; or

(iii) In a subsequent taxable year, disposed of by the acquiring taxpayer in a like-kind exchange or involuntary conversion, the exchanged basis of the replacement MACRS property is not taken into account in the year of replacement.

(2) *Excess basis.* Any excess basis is taken into account in the quarter the replacement MACRS property is placed in service by the acquiring taxpayer.

(3) *Depreciable property acquired for nondepreciable property.* Both the exchanged basis and excess basis of the replacement MACRS property described in paragraph (d)(2)(ii) of this section (depreciable property acquired for nondepreciable property), are taken into account for determining whether the mid-quarter convention applies in the year of replacement.

(g) *Section 179 election.* In applying the section 179 election, only the excess basis, if any, in the replacement MACRS property is taken into account. If the replacement MACRS property is described in paragraph (d)(2)(ii) of this section (depreciable property acquired for nondepreciable property), only the excess basis in the replacement MACRS property is taken into account.

(h) *Additional first year depreciation deduction.* See §1.168(k)–1(f)(5) (for qualified property or 50-percent bonus depreciation property) and §1.1400L(b)–

1(f)(5) (for qualified New York Liberty Zone property).

(i) *Elections*—(1) *Election not to apply this section.* A taxpayer may elect not to apply this section for any MACRS property involved in a like-kind exchange or involuntary conversion. An election under this paragraph (i)(1) applies only to the taxpayer making the election and the election applies to both the relinquished MACRS property and the replacement MACRS property. If an election is made under this paragraph (i)(1), the depreciation allowances for the replacement MACRS property beginning in the year of replacement and for the relinquished MACRS property in the year of disposition are not determined under this section (except as otherwise provided in this paragraph). Instead, for depreciation purposes only, the sum of the exchanged basis and excess basis, if any, in the replacement MACRS property is treated as property placed in service by the taxpayer at the time of replacement and the adjusted depreciable basis of the relinquished MACRS property is treated as being disposed of by the taxpayer at the time of disposition. While the relinquished MACRS property is treated as being disposed of at the time of disposition for depreciation purposes, the election not to apply this section does not affect the application of sections 1031 and 1033 (for example, if a taxpayer does not make the election under this paragraph (i)(1) and does not recognize gain or loss under section 1031, this result would not change if the taxpayer chose to make the election under this paragraph (i)(1)). In addition, the election not to apply this section does not affect the application of sections 1245 and 1250 to the relinquished MACRS property. Paragraphs (c)(5)(i) (determination of depreciation for relinquished MACRS property in the year of disposition), (c)(5)(iii) (rules for deferred transactions), (g) (section 179 election), and (h) (additional first year depreciation deduction) of this section apply to property to which this paragraph (i)(1) applies. See paragraph (j) of this section for the time and manner of making the election under this paragraph (i)(1).

(2) *Election to treat certain replacement property as MACRS property.* If the tangible depreciable property acquired by a taxpayer in a like-kind exchange or involuntary conversion (the replacement property) replaces tangible depreciable property for which the taxpayer made a valid election under section 168(f)(1) to exclude it from the application of MACRS (the relinquished property), the taxpayer may elect to treat, for depreciation purposes only, the sum of the exchanged basis and excess basis, if any, of the replacement property as MACRS property that is placed in service by the taxpayer at the time of replacement. An election under this paragraph (i)(2) applies only to the taxpayer making the election and the election applies to both the relinquished property and the replacement property. If an election is made under this paragraph (i)(2), the adjusted depreciable basis of the relinquished property is treated as being disposed of by the taxpayer at the time of disposition. Rules similar to those provided in §§1.168(i)–6(b)(3) and (4) apply for purposes of determining the time of disposition and time of replacement under this paragraph (i)(2). While the relinquished property is treated as being disposed of at the time of disposition for depreciation purposes, the election under this paragraph (i)(2) does not affect the application of sections 1031 and 1033, and the application of sections 1245 and 1250 to the relinquished property. If an election is made under this paragraph (i)(2), rules similar to those provided in paragraphs (c)(5)(iii) (rules for deferred transactions), (g) (section 179 election), and (h) (additional first year depreciation deduction) of this section apply to property. Except as provided in paragraph (k)(3)(ii) of this section, a taxpayer makes the election under this paragraph (i)(2) by claiming the depreciation allowance as determined under MACRS for the replacement property on the taxpayer's timely filed (including extensions) original Federal tax return for the placed-in-service year of the replacement property as determined under this paragraph (i)(2).

(j) *Time and manner of making election under paragraph (i)(1) of this section*—(1) *In general.* The election provided in paragraph (i)(1) of this section is made separately by each person acquiring replacement MACRS property. The election is made for each member of a consolidated group by the common parent of the group, by the partnership (and not by the partners separately) in the case of a partnership, or by the S corporation (and not by the shareholders separately) in the case of an S corporation. A separate election under paragraph (i)(1) of this section is required for each like-kind exchange or involuntary conversion. The election provided in paragraph (i)(1) of this section must be made within the time and manner provided in paragraph (j)(2) and (3) of this section and may not be made by the taxpayer in any other manner (for example, the election cannot be made through a request under section 446(e) to change the taxpayer's method of accounting), except as provided in paragraph (k)(2) of this section.

(2) *Time for making election.* The election provided in paragraph (i)(1) of this section must be made by the due date (including extensions) of the taxpayer's Federal tax return for the year of replacement.

(3) *Manner of making election.* The election provided in paragraph (i)(1) of this section is made in the manner provided for on Form 4562, Depreciation and Amortization, and its instructions. If Form 4562 is revised or renumbered, any reference in this section to that form is treated as a reference to the revised or renumbered form.

(4) *Revocation.* The election provided in paragraph (i)(1) of this section, once made, may be revoked only with the consent of the Commissioner of Internal Revenue. Such consent will be granted only in extraordinary circumstances. Requests for consent are requests for a letter ruling and must be filed with the Commissioner of Internal Revenue, Washington, DC 20224. Requests for consent may not be made in any other manner (for example, through a request under section 446(e) to change the taxpayer's method of accounting).

(k) *Effective date*—(1) *In general.* Except as provided in paragraph (k)(3) of this section, this section applies to a like-kind exchange or an involuntary conversion of MACRS property for which the time of disposition and the time of replacement both occur after February 27, 2004.

(2) *Application to pre-effective date like-kind exchanges and involuntary conversions.* For a like-kind exchange or an involuntary conversion of MACRS property for which the time of disposition, the time of replacement, or both occur on or before February 27, 2004, a taxpayer may—

(i) Apply the provisions of this section. If a taxpayer's applicable Federal tax return has been filed on or before February 27, 2004, and the taxpayer has treated the replacement MACRS property as acquired, and the relinquished MACRS property as disposed of, in a like-kind exchange or an involuntary conversion, the taxpayer changes its method of accounting for depreciation of the replacement MACRS property and relinquished MACRS property in accordance with this paragraph (k)(2)(i) by following the applicable administrative procedures issued under §1.446–1(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in method of accounting (for further guidance, see Rev. Proc. 2002–9 (2002–1 CB 327) and §601.601(d)(2)(ii)(*b*) of this chapter); or

(ii) Rely on prior guidance issued by the Internal Revenue Service for determining the depreciation deductions of replacement MACRS property and relinquished MACRS property (for further guidance, for example, see Notice 2000–4 (2001–1 CB 313) and §601.601(d)(2)(ii)(*b*) of this chapter). In relying on such guidance, a taxpayer may use any reasonable, consistent method of determining depreciation in the year of disposition and the year of replacement. If a taxpayer's applicable Federal tax return has been filed on or before February 27, 2004, and the taxpayer has treated the replacement MACRS property as acquired, and the relinquished MACRS property as disposed of, in a like-kind exchange or an involuntary conversion, the taxpayer changes its method of accounting for depreciation of the replacement MACRS property and relinquished MACRS property in accordance with this paragraph (k)(2)(ii) by following the applicable administrative procedures issued under §1.446–1(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in method of accounting (for further guidance, see Rev. Proc. 2002–9 (2002–1 CB 327) and §601.601(d)(2)(ii)(*b*) of this chapter).

(3) *Like-kind exchanges and involuntary conversions where the taxpayer made the election under section 168(f)(1) for the relinquished property*—(i) *In general.* If the tangible depreciable property acquired by a taxpayer in a like-kind exchange or involuntary conversion (the replacement property) replaces tangible depreciable property for which the taxpayer made a valid election under section 168(f)(1) to exclude it from the application of MACRS (the relinquished property), paragraph (i)(2) of this section applies to such relinquished property and replacement property for which the time of disposition and the time of replacement (both as determined under paragraph (i)(2) of this section) both occur after February 26, 2007.

(ii) *Application of paragraph (i)(2) of this section to pre-February 26, 2007 like-kind exchanges and involuntary conversions.* If the tangible depreciable property acquired by a taxpayer in a like-kind exchange or involuntary conversion (the replacement property) replaces tangible depreciable property for which the taxpayer made a valid election under section 168(f)(1) to exclude it from the application of MACRS (the relinquished property), the taxpayer may apply paragraph (i)(2) of this section to the relinquished property and the replacement property for which the time of disposition, the time of replacement (both as determined under paragraph (i)(2) of this section), or both occur on or before February 26, 2007. If the taxpayer wants to apply paragraph (i)(2) of this section and the taxpayer's applicable Federal tax return has been filed on or before February 26, 2007, the taxpayer must change its method of accounting for depreciation of the replacement property and relinquished property in accordance with this paragraph (k)(3)(ii) by following the applicable administrative procedures issued under §1.446–1(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in method of accounting (for further guidance, see Rev. Proc. 2002–9 (2002–1 CB 327) and §601.601(d)(2)(ii)(b) of this chapter).

[T.D. 9314, 72 FR 9251, Mar. 1, 2007]

§ 1.168(i)–7T Accounting for MACRS property (temporary).

(a) *In general.* A taxpayer may account for MACRS property (as defined in §1.168(b)–1(a)(2)) by treating each individual asset as an account (a ''single asset account'' or an ''item account'') or by combining two or more assets in a single account (a ''multiple asset account'' or a ''pool''). A taxpayer may establish as many accounts for MACRS property as the taxpayer wants. This section does not apply to assets included in general asset accounts. For rules applicable to general asset accounts, see §1.168(i)–1T.

(b) *Required use of single asset accounts.* A taxpayer must account for an asset in a single asset account if the taxpayer uses the asset both in a trade or business (or for the production of income) and in a personal activity, or if the taxpayer places in service and disposes of the asset during the same taxable year. Also, if general asset account treatment for an asset terminates under §1.168(i)–1T(c)(1)(ii)(A), (e)(3)(iii), (e)(3)(vii), (g), or (h)(2), the taxpayer must account for the asset in a single asset account beginning in the taxable year in which the general asset account treatment for the asset terminates. If a taxpayer accounts for an asset in a multiple asset account or pool treatment and the taxpayer disposes of the asset, the taxpayer must account for the asset in a single asset account beginning in the taxable year in which the disposition occurs. *See* §1.168(i)–8T(g)(2)(i). If a taxpayer disposes of a component of a larger asset and the unadjusted depreciable basis of the disposed of component is included in the unadjusted depreciable basis of the larger asset, the taxpayer must account for the component in a single asset account beginning in the taxable year in which the disposition occurs. *See* §1.168(i)–8T(g)(3)(i).

(c) *Establishment of multiple asset accounts or pools*—(1) *Assets eligible for multiple asset accounts or pools.* Except as provided in paragraph (b) of this section, assets that are subject to either the general depreciation system of section 168(a) or the alternative depreciation system of section 168(g) may be accounted for in one or more multiple asset accounts or pools.

(2) *Grouping assets in multiple asset accounts or pools*—(i) *General rules.* Assets that are eligible to be grouped into a single multiple asset account or pool may be divided into more than one multiple asset account or pool. Each multiple asset account or pool must include only assets that—

(A) Have the same applicable depreciation method;

(B) Have the same applicable recovery period;

(C) Have the same applicable convention; and

(D) Are placed in service by the taxpayer in the same taxable year.

(ii) *Special rules.* In addition to the general rules in paragraph (c)(2)(i) of this section, the following rules apply when establishing multiple asset accounts or pools—

(A) Assets subject to the mid-quarter convention may only be grouped into a multiple asset account or pool with assets that are placed in service in the same quarter of the taxable year;

(B) Assets subject to the mid-month convention may only be grouped into a multiple asset account or pool with assets that are placed in service in the same month of the taxable year;

(C) Passenger automobiles for which the depreciation allowance is limited under section 280F(a) must be grouped into a separate multiple asset account or pool;

(D) Assets not eligible for any additional first year depreciation deduction (including assets for which the taxpayer elected not to deduct the additional first year depreciation) provided by, for example, section 168(k) through (n), 1400L(b), or 1400N(d), must be grouped into a separate multiple asset account or pool;

(E) Assets eligible for the additional first year depreciation deduction may only be grouped into a multiple asset account or pool with assets for which the taxpayer claimed the same percentage of the additional first year depreciation (for example, 30 percent, 50 percent, or 100 percent);

(F) Except for passenger automobiles described in paragraph (c)(2)(ii)(C) of this section, listed property (as defined in section 280F(d)(4)) must be grouped into a separate multiple asset account or pool;

(G) Assets for which the depreciation allowance for the placed-in-service year is not determined by using an optional depreciation table (for further guidance, see section 8 of Rev. Proc. 87–57, 1987–2 CB 687, 693 (see §601.601(d)(2) of this chapter) must be grouped into a separate multiple asset account or pool; and

(H) Mass assets (as defined in §1.168(i)–8T(b)(2)) that are or will be subject to §1.168–8T(f)(2)(ii) (disposed of or converted mass asset is identified by a mortality dispersion table) must be grouped into a separate multiple asset account or pool.

(d) *Cross references.* See §1.167(a)–7T(c) for the records to be maintained by a taxpayer for each account. In addition, see §1.168(i)–1T for the records to be maintained by a taxpayer for each general asset account.

(e) *Effective/applicability date*—(1) *In general.* This section applies to taxable years beginning on or after January 1, 2014.

(2) *Optional early application.* A taxpayer may choose to apply this section to taxable years beginning on or after January 1, 2012.

(3) *Change in method of accounting.* A change to comply with this section for depreciable assets placed in service in a taxable year ending on or after December 30, 2003, is a change in method of accounting to which the provisions of section 446(e) and the regulations under section 446(e) apply. A taxpayer also may treat a change to comply with this section for depreciable assets placed in service in a taxable year ending before December 30, 2003, as a change in method of accounting to which the provisions of section 446(e) and the regulations under section 446(e) apply.

(4) *Expiration date.* The applicability of this section expires on December 23, 2014.

[T.D. 9564, 76 FR 81095, Dec. 27, 2011, as amended at 77 FR 74585, Dec. 17, 2012]

§ 1.168(i)–8T Dispositions of MACRS property (temporary).

(a) *Scope.* This section provides rules applicable to dispositions of MACRS property (as defined in § 1.168(b)–1(a)(2)) or to depreciable property (as defined in § 1.168(b)–1(a)(1)) that would be MACRS property but for an election made by the taxpayer either to expense all or some of the property's cost under section 179, 179A, 179B, 179C, 179D, or 1400I(a)(1), or any similar provision, or to amortize all or some of the property's cost under section 1400I(a)(2) or any similar provision. Except as provided in § 1.168(i)–1T(e)(iii), this section does not apply to dispositions of assets included in a general asset account. For rules applicable to dispositions of assets included in a general asset account, see § 1.168(i)–1T(e).

(b) *Definitions.* For purposes of this section—

(1) *Disposition* occurs when ownership of the asset is transferred or when the asset is permanently withdrawn from use either in the taxpayer's trade or business or in the production of income. A disposition includes the sale, exchange, retirement, physical abandonment, or destruction of an asset. A disposition also includes the retirement of a structural component (as defined in § 1.48–1(e)(2)) of a building (as defined in § 1.48–1(e)(1)). A disposition also occurs when an asset is transferred to a supplies, scrap, or similar account.

(2) *Mass assets* is a mass or group of individual items of depreciable assets—

(i) That are not necessarily homogenous;

(ii) Each of which is minor in value relative to the total value of the mass or group;

(iii) Numerous in quantity;

(iv) Usually accounted for only on a total dollar or quantity basis;

(v) With respect to which separate identification is impracticable; and

(vi) Placed in service in the same taxable year.

(3) *Unadjusted depreciable basis of the multiple asset account or pool* is the sum of the unadjusted depreciable bases (as defined in § 1.168(b)–1(a)(3)) of all assets included in the multiple asset account or pool.

(c) *Special rules*—(1) *Manner of disposition.* The manner of disposition (for example, normal retirement, abnormal retirement, ordinary retirement, or extraordinary retirement) is not taken into account in determining whether a disposition occurs or gain or loss is recognized.

(2) *Disposition by transfer to a supplies account.* If a taxpayer made an election under § 1.162–3T(d) to treat the cost of any material and supply as a capital expenditure subject to the allowance for depreciation, the taxpayer can dispose of the material and supply by transferring it to a supplies account only if the taxpayer has obtained the consent of the Commissioner to revoke the § 1.162–3T(d) election. *See* § 1.162–3T(d)(3) for the procedures for revoking a § 1.162–3T(d) election.

(3) *Leasehold improvements.* This section also applies to—

(i) A lessor of leased property that made an improvement to that property for the lessee of the property, has a depreciable basis in the improvement, and disposes of the improvement before or upon the termination of the lease with the lessee. *See* section 168(i)(8)(B); and

(ii) A lessee of leased property that made an improvement to that property, has a depreciable basis in the improvement, and disposes of the improvement before or upon the termination of the lease.

(4) *Determination of asset disposed of*—(i) *In general.* For purposes of applying this section, the facts and circumstances of each disposition are considered in determining what is the appropriate asset disposed of. Except as provided in paragraph (c)(4)(ii) of this section, the asset for disposition purposes cannot be larger than the unit of property as determined under § 1.263(a)-3T(e)(2), (e)(3), and (e)(5) or as otherwise determined in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see, for example, Rev. Proc. 2011–38, 2011–18 IRB 743, for units of property for wireless network assets (see § 601.601(d)(2)(ii)(*b*) of this chapter)).

(ii) *Exceptions.* For purposes of applying this section:

(A) Each building (not including its structural components) is the asset except as provided in §1.1250–1(a)(2)(ii) or in paragraph (c)(4)(ii)(B) or (E) of this section.

(B) If a building has two or more condominium or cooperative units, each condominium or cooperative unit (not including its structural components) is the asset except as provided in §1.1250–1(a)(2)(ii) or in paragraph (c)(4)(ii)(E) of this section.

(C) Each structural component (including all components thereof) of a building, condominium unit, or cooperative unit is the asset.

(D) If a taxpayer properly includes an item in one of the asset classes 00.11 through 00.4 of Rev. Proc. 87–56 (1987–2 CB 674) (see §601.601(d)(2)(ii)(*b*) of this chapter) or properly classifies an item in one of the categories under section 168(e)(3) (except for a category that includes buildings or structural components; for example, retail motor fuels outlet, qualified leasehold improvement property, qualified restaurant property, and qualified retail improvement property), each item is the asset provided it is not larger than the unit of property as determined under §1.263(a)–3T(e)(3) or (e)(5) or as otherwise determined in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see §601.601(d)(2)(ii)(*b*) of this chapter), or provided paragraph (c)(4)(ii)(E) of this section does not apply to the item. For example, each desk is the asset, each computer is the asset, and each qualified smart electric meter is the asset (assuming these assets are not larger than the unit of property as determined under §1.263(a)–3T(e)(3) or (e)(5) or as otherwise determined in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see §601.601(d)(2)(ii)(*b*) of this chapter)).

(E) If the taxpayer places in service an improvement or addition to an asset after the taxpayer placed the asset in service, the improvement or addition is a separate asset provided it is not larger than the unit of property as determined under §1.263(a)-3T(e)(3) or (e)(5) or as otherwise determined in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see §601.601(d)(2)(ii)(*b*) of this chapter).

(F) If an asset is not described in one of the asset classes 00.11 through 00.4 of Rev. Proc. 87–56 (1987–2 CB 674) (see §601.601(d)(2)(ii)(*b*) of this chapter) or in one of the categories under section 168(e)(3), a taxpayer also may use any reasonable, consistent method to treat each of the asset's components as the asset.

(d) *Gain or loss on dispositions*. Except as provided by section 280B and §1.280B–1, the following rules apply when assets within the scope of this section are disposed of during a taxable year:

(1) If an asset is disposed of by sale, exchange, or involuntary conversion, gain or loss must be recognized under the applicable provisions of the Internal Revenue Code.

(2) If an asset is disposed of by physical abandonment, loss must be recognized in the amount of the adjusted depreciable basis (as defined in §1.168(b)-1(a)(4)) of the asset at the time of the abandonment (taking into account the applicable convention). However, if the abandoned asset is subject to nonrecourse indebtedness, paragraph (d)(1) of this section applies to the asset (instead of this paragraph (d)(2)). For a loss from physical abandonment to qualify for recognition under this paragraph (d)(2), the taxpayer must intend to discard the asset irrevocably so that the taxpayer will neither use the asset again nor retrieve it for sale, exchange, or other disposition.

(3) If an asset is disposed of other than by sale, exchange, involuntary conversion, physical abandonment, or conversion to personal use (as, for example, when the asset is transferred to a supplies or scrap account), gain is not recognized. Loss must be recognized in the amount of the excess of the adjusted depreciable basis of the asset at the time of the disposition (taking into account the applicable convention) over the asset's fair market value at the time of the disposition (taking into account the applicable convention).

(e) *Basis of asset disposed of*—(1) *In general*. The adjusted basis of an asset disposed of for computing gain or loss is its adjusted depreciable basis at the time of the asset's disposition (as determined under the applicable convention for the asset).

(2) *Assets disposed of are in multiple asset accounts or are components.* If the taxpayer accounts for the asset disposed of in a multiple asset account or pool, or the asset disposed of is a component of a larger asset and it is impracticable from the taxpayer's records to determine the unadjusted depreciable basis (as defined in §1.168(b)-1(a)(3)) of the asset disposed of, the taxpayer may use any reasonable method that is consistently applied to the taxpayer's multiple asset accounts or pools or to the taxpayer's larger assets for purposes of determining the unadjusted depreciable basis of assets disposed of. To determine the adjusted depreciable basis of an asset disposed of in a multiple asset account, the depreciation allowed or allowable for the asset disposed of is computed by using the depreciation method, recovery period, and convention applicable to the multiple asset account or pool in which the asset disposed of was included and by including the additional first year depreciation deduction claimed for the asset disposed of. To determine the adjusted depreciable basis of an asset disposed of that is a component of a larger asset, the depreciation allowed or allowable for the asset disposed of is computed by using the depreciation method, recovery period, and convention applicable to the larger asset of which the asset disposed of is a component and by including the portion of the additional first year depreciation deduction claimed for the larger asset that is attributable to the asset disposed of.

(f) *Identification of asset disposed of*—(1) *In general.* Except as provided in paragraph (f)(2) of this section, a taxpayer must use the specific identification method of accounting to identify which asset is disposed of by the taxpayer. Under this method of accounting, the taxpayer can determine the particular taxable year in which the asset disposed of was placed in service by the taxpayer.

(2) *Asset disposed of is in a multiple asset account.* If a taxpayer accounts for the asset disposed of in a multiple asset account or pool and the total dispositions of assets with the same recovery period during the taxable year are readily determined from the taxpayer's records but it is impracticable from the taxpayer's records to determine the particular taxable year in which the asset disposed of was placed in service by the taxpayer, the taxpayer may identify the asset disposed of by using—

(i) A first-in, first-out method of accounting if the unadjusted depreciable basis of the asset disposed of cannot be readily determined from the taxpayer's records. Under this method of accounting, the taxpayer identifies the multiple asset account or pool with the earliest placed-in-service year that has the same recovery period as the asset disposed of and that has assets at the beginning of the taxable year of the disposition, and the taxpayer treats the asset disposed of as being from that multiple asset account or pool;

(ii) A modified first-in, first-out method of accounting if the unadjusted depreciable basis of the asset disposed of can be readily determined from the taxpayer's records. Under this method of accounting, the taxpayer identifies the multiple asset account or pool with the earliest placed-in-service year that has the same recovery period as the asset disposed of and that has assets at the beginning of the taxable year of the disposition with the same unadjusted depreciable basis as the asset disposed of, and the taxpayer treats the asset disposed of as being from that multiple asset account or pool;

(iii) A mortality dispersion table if the asset disposed of is a mass asset. The mortality dispersion table must be based upon an acceptable sampling of the taxpayer's actual disposition experience for mass assets or other acceptable statistical or engineering techniques. To use a mortality dispersion table, the taxpayer must adopt recordkeeping practices consistent with the taxpayer's prior practices and consonant with good accounting and engineering practices; or

(iv) Any other method as the Secretary may designate by publication in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see §601.601(d)(2) of this chapter) on or after December 23, 2011. For this purpose, a last-in, first-out method of accounting is not a designated method. Under the last-in, first-out method of accounting, the taxpayer identifies the multiple asset account or pool with the most recent placed-in-service year that has the same recovery period as the asset disposed of and that has assets at the beginning of the taxable year of the disposition, and the taxpayer treats the asset disposed of as being from that multiple asset account or pool.

(g) *Accounting for asset disposed of*—(1) *Depreciation ends.* Depreciation ends for an asset at the time of the asset's disposition (as determined under the applicable convention for the asset). *See* §1.167(a)–10(b). If the asset disposed of is in a single asset account, the single asset account terminates at the time of the asset's disposition (as determined under the applicable convention for the asset).

(2) *Asset disposed of in a multiple asset account or pool.* If the taxpayer accounts for the asset disposed of in a multiple asset account or pool, then—

(i) As of the first day of the taxable year in which the disposition occurs, the asset disposed of is removed from the multiple asset account or pool and is placed into a single asset account. *See* §1.168(i)–7T(b);

(ii) The unadjusted depreciable basis of the multiple asset account or pool must be reduced by the unadjusted depreciable basis of the asset disposed of as of the first day of the taxable year in which the disposition occurs. See paragraph (e)(2) of this section for determining the unadjusted depreciable basis of the asset disposed of;

(iii) The depreciation reserve of the multiple asset account or pool must be reduced by the depreciation allowed or allowable for the asset disposed of as of the end of the taxable year immediately preceding the year of disposition, computed by using the depreciation method, recovery period, and convention applicable to the multiple asset account or pool in which the asset disposed of was included and by including the additional first year depreciation deduction claimed for the asset disposed of; and

(iv) In determining the adjusted depreciable basis of the asset disposed of at the time of disposition (taking into account the applicable convention), the depreciation allowed or allowable for the asset disposed of is computed by using the depreciation method, recovery period, and convention applicable to the multiple asset account or pool in which the asset disposed of was included and by including the additional first year depreciation deduction claimed for the asset disposed of.

(3) *Disposed of component of a larger asset.* This paragraph (g)(3) applies only to a taxpayer that uses a reasonable, consistent method to treat each of the asset's components as the asset in accordance with paragraph (c)(4)(ii)(F) of this section. If the taxpayer disposes of a component of a larger asset and the unadjusted depreciable basis of the disposed component is included in the unadjusted depreciable basis of the larger asset, then—

(i) As of the first day of the taxable year in which the disposition occurs, the disposed of component is removed from the larger asset and is placed into a single asset account. *See* §1.168(i)–7T(b);

(ii) The unadjusted depreciable basis of the larger asset must be reduced by the unadjusted depreciable basis of the disposed of component as of the first day of the taxable year in which the disposition occurs. See paragraph (e)(2) of this section for determining the unadjusted depreciable basis of the disposed of component;

(iii) The depreciation reserve of the larger asset must be reduced by the depreciation allowed or allowable for the disposed of component as of the end of the taxable year immediately preceding the year of disposition, computed by using the depreciation method, recovery period, and convention applicable to the larger asset in which the disposed of component was included and by including the portion of the additional first year depreciation deduction claimed for the larger asset that is attributable to the disposed of component; and

(iv) In determining the adjusted depreciable basis of the disposed of component at the time of disposition (taking into account the applicable convention), the depreciation allowed or allowable for the asset disposed of is computed by using the depreciation method, recovery period, and convention applicable to the larger asset in which the disposed of component was included and by including the portion of the additional first year depreciation deduction claimed for the larger asset that is attributable to the disposed of component.

(h) *Examples*. The application of this section is illustrated by the following examples:

Example 1. A owns an office building with four elevators. A decides to replace one of the elevators. The retirement of the replaced elevator, which is a structural component of the building, is a disposition. As a result, depreciation for the retired elevator ceases at the time of its retirement (taking into account the applicable convention). A recognizes a loss upon this retirement.

Example 2. B, a calendar-year commercial airline company, owns several aircrafts that are used in the commercial carrying of passengers. B replaces the existing engines on one of the aircrafts with new engines and treats each engine of an aircraft as a major component of the aircraft. Assume each aircraft is a unit of property as determined under §1.263(a)–3T(e)(3). However, for tax disposition purposes, B consistently treats each major component of an aircraft as the asset. Thus, the retirement of the replaced engines is a disposition. As a result, depreciation for the retired engines ceases at the time of their retirement (taking into account the applicable convention). B recognizes a loss upon this retirement.

Example 3. The facts are the same as in *Example 2*, except B treats each aircraft as the asset for tax disposition purposes. Assume each aircraft is a unit of property as determined under §1.263(a)–3T(e)(3). Thus, the replacement of the engines on one of the aircrafts is not a disposition. As a result, depreciation continues for the cost of the aircraft (including the cost of the replaced engines) and B does not recognize a loss upon this replacement.

Example 4. C, a corporation, owns several trucks that are used in its trade or business and described in asset class 00.241 of Rev. Proc. 87–56. C replaces the engine on one of the trucks with a new engine and treats each engine of a truck as a major component of the truck. Assume each truck is a unit of property as determined under §1.263(a)–3T(e)(3). Because the trucks are described in asset class 00.241 of Rev. Proc. 87–56, C must treat each truck as the asset for tax disposition purposes. Thus, the replacement of the engine on the truck is not a disposition. As a result, depreciation continues for the cost of the truck (including the cost of the replaced engine) and C does not recognize a loss upon this replacement.

Example 5. (i) On July 1, 2009, D, a calendar-year taxpayer, purchased and placed in service a multi-story office building that costs $20,000,000. The cost of each structural component of the building was not separately stated. D accounts for the building in its records as a single asset with a cost of $20,000,000. D depreciates the building as nonresidential real property and uses the optional depreciation table that corresponds with the general depreciation system, the straight-line method, a 39-year recovery period, and the mid-month convention. As of January 1, 2012, the depreciation reserve for the building is $1,261,000.

(ii) On June 30, 2012, D replaces one of the building's elevators. Because D cannot identify the cost of the structural components of the office building from its records, D uses a reasonable method that is consistently applied to all of the structural components of the office building to determine the cost of the elevator. Using this reasonable method, D allocates $150,000 of the $20,000,000 purchase price for the building to the retired elevator. Using the optional depreciation table that corresponds with the general depreciation system, the straight-line method, a 39-year recovery period, and the mid-month convention, the depreciation allowed or allowable for the retired elevator as of December 31, 2011, is $9,457.50.

(iii) For D's 2012 Federal income tax return, loss for the retired elevator is determined as follows. The depreciation allowed or allowable for 2012 for the retired elevator is $1,923 ((unadjusted depreciable basis of $150,000 × depreciation rate of 2.564 percent for 2012) × 6/12). Thus, the adjusted depreciable basis of the retired elevator is $138,619.50 (the adjusted depreciable basis of $140,542.50 removed from the building cost less the depreciation allowed or allowable of $1,923 for 2012). As a result, D recognizes a loss of $138,619.50 for the retired elevator in 2012, which is subject to section 1231.

(iv) For D's 2012 Federal income tax return, the depreciation allowance for the building is computed as follows. As of January 1, 2012, the unadjusted depreciable basis of the building is reduced from $20,000,000 to $19,850,000 ($20,000,000 less the unadjusted depreciable basis of $150,000 for the retired elevator), and the depreciation reserve of the building is reduced from $1,261,000 to $1,251,542.50 ($1,261,000 less the depreciation allowed or allowable of $9,457.50 for the retired elevator as of December 31, 2011). Consequently, the depreciation allowance for the building for 2012 is $508,954 ($19,850,000 × depreciation rate of 2.564 percent for 2012).

Example 6. (i) Since 2003, E, a calendar year taxpayer, has accounted for items of MACRS property that are mass assets in pools. Each pool includes only the mass assets that have the same depreciation method, recovery period, and convention, and are placed in service by E in the same taxable year. None of the pools are general asset accounts under section 168(i)(4) and the regulations under section 168(i)(4). E identifies any dispositions of these mass assets by specific identification.

(ii) During 2012, E sells 10 items of mass assets with a 5-year recovery period each for $100. Under the specific identification method, E identifies these mass assets as being from the pool established by E in 2010 for mass assets with a 5-year recovery period. Assume E depreciates this pool using the optional depreciation table that corresponds with the general depreciation system, the 200-percent declining balance method, a 5-year recovery period, and the half-year convention. E elected not to deduct the additional first year depreciation provided by section 168(k) for 5-year property placed in service during 2010. As of January 1, 2012, this pool contains 100 similar items of mass assets with a total cost of $25,000 and a total depreciation reserve of $13,000. Thus, E allocates a cost of $250 ($25,000 × (1/100)) to each disposed of mass asset and depreciation allowed or allowable of $130 ($13,000 × (1/100)) to each disposed of mass asset. The depreciation allowed or allowable in 2012 for each disposed of mass asset is $24 [($250 × 19.2 percent)/2]. As a result, the adjusted depreciable basis of each disposed of mass asset under section 1011 is $96 ($250–$130–$24). Thus, E recognizes a gain of $4 for each disposed of mass asset in 2012, which is subject to section 1245.

(iii) Further, as of January 1, 2012, the unadjusted depreciable basis of the 2010 pool of mass assets with a 5-year recovery period is reduced from $25,000 to $22,500 ($25,000 less the unadjusted depreciable basis of $2,500 for the 10 disposed of items), and the depreciation reserve of this 2010 pool is reduced from $13,000 to $11,700 ($13,000 less the depreciation allowed or allowable of $1,300 for the 10 disposed of items as of December 31, 2011). Consequently, as of January 1, 2012, the 2010 pool of mass assets with a 5-year recovery period has 90 items with a total cost of $22,500 and a depreciation reserve of $11,700. Thus, the depreciation allowance for this pool for 2012 is $4,320 ($22,500 × 19.2 percent).

Example 7. (i) Same facts as in *Example 6*. Because of changes in E's recordkeeping in 2013, it is impracticable for E to continue to identify disposed of mass assets using specific identification and to determine the unadjusted depreciable basis of the disposed of mass assets. As a result, E files a Form 3115, Application for Change in Accounting Method, to change to a first-in, first-out method beginning with the taxable year beginning on January 1, 2013, on a modified cut-off basis. *See* §1.446–1(e)(2)(ii)(*d*)(*2*)(*vii*). Under the first-in, first-out method, the mass assets disposed of in a taxable year are deemed to be from the pool with the earliest placed-in-service year that has assets as of the beginning of the taxable year of the disposition with the same recovery period as the asset disposed of. The Commissioner of Internal Revenue consents to this change in method of accounting.

(ii) During 2013, E sells 20 items of mass assets with a 5-year recovery period each for $50. As of January 1, 2013, the 2006 pool is the pool with the earliest placed-in-service year for mass assets with a 5-year recovery period, and this pool contains 25 items of mass assets with a total cost of $10,000 and a total depreciation reserve of $10,000. Thus, E allocates a cost of $400 ($10,000 × (1/25)) to each disposed of mass asset and depreciation allowed or allowable of $400 to each disposed of mass asset. As a result, the adjusted depreciable basis of each disposed of mass asset is $0. Thus, E recognizes a gain of $50 for each disposed of mass asset in 2013, which is subject to section 1245.

(iii) Further, as of January 1, 2013, the unadjusted depreciable basis of the 2006 pool of mass assets with a 5-year recovery period is reduced from $10,000 to $2,000 ($10,000 less the unadjusted depreciable basis of $8,000 for the 20 disposed of items ($400 × 20)), and the depreciation reserve of this 2006 pool is reduced from $10,000 to $2,000 ($10,000 less the depreciation allowed or allowable of $8,000 for the 20 disposed of items as of December 31, 2012). Consequently, as of January 1, 2013, the 2006 pool of mass assets with a 5-year recovery period has 5 items with a total cost of $2,000 and a depreciation reserve of $2,000.

(i) *Effective/applicability date*—(1) *In general.* This section applies to taxable years beginning on or after January 1, 2014.

(2) *Optional early application.* A taxpayer may choose to apply this section to taxable years beginning on or after January 1, 2012.

(3) *Change in method of accounting.* A change to comply with this section for depreciable assets placed in service in a taxable year ending on or after December 30, 2003, is a change in method of accounting to which the provisions of section 446(e) and the regulations under section 446(e) apply. A taxpayer also may treat a change to comply with this section for depreciable assets placed in service in a taxable year ending before December 30, 2003, as a change in method of accounting to which the provisions of section 446(e) and the regulations under section 446(e) apply.

(4) *Expiration date*. The applicability of this section expires on December 23, 2014.

[T.D. 9564, 76 FR 81096, Dec. 27, 2011; 77 FR 18687, Mar. 28, 2012, as amended at 77 FR 74585, Dec. 17, 2012]

§ 1.168(j)–1T Questions and answers concerning tax-exempt entity leasing rules (temporary).

The following questions and answers concern tax-exempt entity leasing under section 168(j) of the Internal Revenue Code of 1954, as enacted by section 31 of the Tax Reform Act of 1984 (''TRA'') (Pub. L. 98–369):

CONSEQUENCES OF TAX-EXEMPT USE STATUS

Q–1. If recovery property is subject to the tax-exempt entity leasing provisions of section 168(j), how must the taxpayer compute the property's recovery deductions?

A–1. The taxpayer must compute the property's recovery deductions in accordance with section 168(j) (1) and (2); that is, the taxpayer must use the straight line method and the specified recovery period. For property other than 18-year real property, the applicable recovery percentages for the specified recovery period are to be determined with reference to the tables contained in Prop. Treas. Reg. §1.168–2(g)(3)(iv)(A). For 18-year real property for which a 40-year recovery period is required, the applicable recovery percentages are to be determined under the following table:

40-YEAR STRAIGHT LINE METHOD (ASSUMING MID-MONTH CONVENTION)

If the recovery year is—	And the month in the first recovery year the property is placed in service is—											
	1	2	3	4	5	6	7	8	9	10	11	12
	The applicable recovery percentage is—

Q–2. If recovery property that was placed in service after December 31, 1980 by a taxable entity subsequently becomes tax-exempt use property, how are such property's cost recovery deductions under section 168 affected?

A–2. A change to tax-exempt use property, as defined in section 168(j)(3), will cause the cost recovery deductions under the accelerated cost recovery system (ACRS) to be recomputed. The allowable recovery deduction for the taxable year in which the change occurs (and for subsequent taxable years) must be determined as if the property had originally been tax-exempt use property. Proper adjustment must be made under the principles of Prop. Treas. Reg. §1.168–2(j)(3)(i)(B) to account for the difference between the deductions allowable with respect to the property prior to the year of change and those which would have been allowable had the taxpayer used the recovery period and method for tax-exempt use property under section 168(j) (1) and (2). However, no adjustment is made pursuant to the provisions of this A–2 if section 168(j)(2)(C) applies, that is, if the taxpayer had selected a longer recovery period in the year the property was placed in service than the recovery period prescribed for such property under section 168(j)(1).

Example 1. On July 1, 1983, X, a calendar year taxpayer, places in service 5-year recovery property with an unadjusted basis of $100. For 1983, X's allowable deduction is $15 (*i.e.*, .15 × $100). In 1984, the property becomes tax-exempt use property. Under section 168(j), assume the prescribed recovery period is 12 years. For 1984 (and subsequent taxable years), X's allowable deduction is determined as if the property had been tax-exempt use property since 1983, that is, the year it was placed in service. Thus, taxable year 1984 is the property's second recovery year of its 12-year recovery period. Additionally, X must account for the excess allowable recovery deduction of $11 (*i.e.*, the difference between the recovery allowance for 1983 ($15) and the allowance for that year had the property been tax-exempt use property ($4)) in accordance with the principles of Prop. Treas. Reg. §1.168–2(j)(3)(i)(B). Thus, the recovery allowances in 1984 and 1985 are $7.97, determined as follows:

Unadjusted basis multiplied by the applicable recovery percentage for second recovery year ($100×.09	$9.00
Excess allowable recovery deduction multiplied by the applicable recovery percentage for second recovery year divided by the sum of the remaining unused applicable percentages for tax-exempt use property existing as of the taxable year of change (1984) (($11×.09)/.96)	−1.03
Difference—allowable deduction for 1984	$7.97
Unadjusted basis multiplied by the applicable recovery percentage for third recovery year ($100×.09)	$9.00
Excess allowable recovery deduction multiplied by the applicable recovery percentage for third recovery year divided by the sum of the remaining unused applicable percentages for tax-exempt use property existing as of the taxable year of change (1984) (($11×.09)/.96)	−1.03
Difference—allowable deduction for 1985	$7.97

Additionally, X must make a similar adjustment for the taxable years 1986 through 1995, that is, his fourth through thirteenth recovery years.

Example 2. Assume the same facts as in *Example (1)* except that in 1983, X elected under section 168 (b) (3) with respect to the 5-year property to use the optional recovery percentages over a 25-year recovery period. Based on these facts, the provisions of this A–2 do not apply.

DEFINITION OF TAX-EXEMPT USE PROPERTY

Mixed Leases of Real and Personal Property

Q–3. How is a mixed lease of real property and personal property (e.g., a building with furniture) to be treated for purposes of applying the rules of section 168(j)(3) defining which property constitutes tax-exempt use property?

A–3. The general rule is that 18-year real property and property other than 18-year real property are tested separately to determine whether each constitutes tax-exempt use property. However, if a lease of section 1245 class property is incidental to a lease of 18-year real property, and the 18-year real property is not tax-exempt use property, then the section 1245 class property also does not constitute tax-exempt use property. A lease of section 1245 class property will be considered incidental if the adjusted basis of all section 1245 class property leased in the same transaction is 1 percent or less of the adjusted basis of all 18-year real property leased in such transaction.

Buildings Which Are Partially Tax-Exempt Use Property

Q–4. If part of a building is leased to a tax-exempt entity in a disqualified lease and part of the building is leased other than to a tax-exempt entity in a disqualified lease, to what extent do the tax-exempt entity leasing rules apply to such building?

A–4. The taxpaper must determine the amount of the building's unadjusted basis that is properly allocable to the portion of the building that is tax-exempt use property; the section 168(j) rules apply to the allocated amount. Solely for purposes of determining what percentage of the building's basis is subject to the tax-exempt entity leasing rules, no part of the basis is allocated to common areas.

Example. A constructs a 3-story building in 1984 at a cost of $900,000. Each floor consists of 30,000 square feet. The only common area (10,000 square feet) in the building is on the first floor. A leases the first floor (other than the common areas) to a firm that is not a tax-exempt entity. A leases the top two floors to a tax-exempt entity in a 25-year lease. The top two floors constitute tax-exempt use property. Assume that square footage is the appropriate method for allocating basis in this case. Thus, A must allocate $675,000 of the $900,000 basis to the tax-exempt use portion, determined as follows:

$$\frac{\begin{array}{c}\text{square footage of building which is tax-exempt}\\ \text{use property (excluding common areas)}\end{array}}{\begin{array}{c}\text{total square footage in the building}\\ \text{(excluding common areas)}\end{array}} = \frac{60{,}000 \text{ sq. feet}}{80{,}000 \text{ sq. feet}} = 3/4$$

$$3/4 \times \$900{,}000 = \$675{,}000$$

A must compute his recovery deductions on this portion of the basis ($675,000) in accordance with the rules of section 168(j) (1) and (2).

Requirement of a Lease

Q–5. Can the use of property by a party other than a tax-exempt entity result in the property being treated as tax-exempt use property within the meaning of section 168(j)(3)?

A–5. Yes, if based on all the facts and circumstances it is more appropriate to characterize the transaction as a lease to a tax-exempt entity. A transaction can be characterized as a lease to a tax-exempt entity under section 168(j)(6)(A), which provides that ''the term 'lease' includes any grant of a right to use property''; or under the service contract rules of section 7701(e). See Q&A #18 for rules regarding service contracts.

Example. A trust is executed on January 1, 1984, to create a pooled income fund (P) that meets the requirements of section 642(c)(5). A university (U) that is tax-exempt under section 501(c)(3) is the remainderman of the pooled income fund. P's purpose is to construct and operate an athletic center on land adjacent to U's campus. Construction of the athletic center, which has a 50-year useful life, was completed and the center was placed in service on February 1, 1985. The athletic center is managed for a fee by M, an unrelated taxable organization which operates athletic facilities open to the public. Office space at the facility is occupied rent-free by both the U athletic department and M. Scheduling of activities at the center is handled jointly by members of U's athletic department and M. General operating expenses of the athletic center are paid by P. Although the athletic center is open to the public for a membership fee, the majority of members are U's students who pay membership fees as part of their tuition. These fees are remitted by U to P. This arrangement is in substance a grant to U of a right to use the facility, and therefore a lease to U under section 168(j)(6)(A). U, as remainderman, will have obtained title to the entire building when the last pooled income fund donor dies. This arrangement is a disqualified lease because either (1) U has the equivalent of a fixed price purchase option under section 168(j)(3)(B)(ii)(II) (if U receives title as remainderman before the end of the useful life of the building), or (2) the lease has a term in excess of 20 years under section 168(j)(3)(B)(ii)(III) (if U does not receive title as remainderman until 20 years have elapsed), or both. Therefore, the allowable recovery deductions (without regard to salvage value) must be computed in accordance with section 168(j) (1) and (2). In addition, because this arrangement is treated as a lease under section 168(j), the facility is used by U for purposes of section 48(a)(4), and thus no investment tax credit is permitted with respect to any portion of the facility. This arrangement also may be treated as a lease to U for all purposes of chapter 1 of the Internal Revenue Code under section 7701 (e).

''More Than 35 Percent of the Property'' Test

Q–6. How is the percentage of 18-year real property leased to a tax-exempt entity in a disqualified lease to be determined for purposes of the ''more than 35 percent of the property'' test of section 168(j)(3)(B)(iii)?

A–6. The phrase ''more than 35 percent of the property'' means more than 35 percent of the net rentable floor space of the property. The net rentable floor space in a building does not include the common areas of the building, regardless of the terms of the lease. For purposes of the ''more than 35 percent of the property'' rule, two or more buildings will be treated as separate properties unless they are part of the same project, in which case they will be treated as one property. Two or more buildings will be treated as part of the same project if the buildings are constructed, under a common plan, within a reasonable time of each other on the same site and will be used in an integrated manner.

Q–7. Are disqualified leases to different tax-exempt entities (regardless of whether they are related) aggregated in determining whether 18-year real property is tax-exempt use property?

A–7. Yes.

Example. A tax-exempt entity participates in industrial development bond financing for the acquisition of a new building by a taxable entity. The tax-exempt entity leases 60 percent of the net rentable floor space in the building for 5 years. Sixty percent of the building is tax-exempt use property. If the same tax-exempt entity leased only 19 percent of the net rentable floor space in the building for 5 years, no portion of the building would be tax-exempt use property because not more than 35 percent of the property is leased to a tax-exempt entity pursuant to a disqualified lease. If such tax-exempt entity leased only 19 percent of the net rentable floor space in the building for 5 years and another tax-exempt entity leased 20 percent of the net rentable floor space in the building for a term in excess of 20 years (or a related entity leased 20 percent of the building for 5 years), 39 percent of the building would be tax-exempt use property. See A–4 regarding the determination of the amount of the building's unadjusted basis that is properly allocable to the portion of the building that is tax-exempt use property.

''Predominantly Used'' Test

Q–8. What does the term ''predominantly used'' mean for purposes of the section 168(j)(3)(D) exception to the tax-exempt use property rules?

A–8. ''Predominantly used'' means that for more than 50 percent of the time used, as determined for each taxable year, the real or personal property is used in an unrelated trade or business the income of which is subject to tax under section 511 (determined without regard to the debt-financed income rules of section 514). If only a portion of property is predominantly used in an unrelated trade or business, the remainder may nevertheless be tax-exempt use property.

Q–9. How is the ''predominantly used'' test of section 168(j)(3)(D) to be applied to a building?

A–9. The ''predominantly used'' test is to be applied to a building in the following manner:

(i) Identify the discrete portions (excluding common areas) of the building which are leased to a tax-exempt entity in a disqualified lease under section 168(j)(3)(B)(ii). A discrete portion of a building is an area physically separated from other areas. An area is physically separated from other areas if separated by permanent walls or by partitions serving as room dividers if such partitions remain in place throughout the taxable year. A discrete portion can be the entire building, floors, wings, offices, rooms, or a combination thereof. For example, a building whose entire internal space consists of a single large room used as a gymnasium has only one discrete portion. On the other hand, if the building has 3 stories with 10 offices on each floor, each of the 30 offices is a discrete portion.

(ii) Determine whether each discrete portion is predominantly used in an unrelated trade or business subject to tax under section 511. See A–8 for the rules regarding how to make this determination.

(iii) Once the discrete portions of the building that constitute tax-exempt use property have been identified, an appropriate allocation of basis must be made to such discrete portions. See A–4 for rules regarding how to make such allocation.

(iv) The application of these rules is illustrated by the following example:

Example. A building, constructed in 1985, is leased in its entirety to a tax-exempt entity (E) pursuant to a 25-year lease. The building has 25,000 square feet of net rentable floor space and consists of an auditorium (15,000 square feet), a retail shop (10,000 square feet), plus common area of 5,000 square feet. E uses the auditorium 80 percent of the time in its exempt activity and 20 percent of the time in an unrelated trade or business subject to tax under section 511. The retail shop is used 90 percent of the time in an unrelated trade or business subject to tax under section 511 and 10 percent of the time in an exempt activity. Thus, the auditorium is tax-exempt use property; the retail shop is not. An appropriate allocation of basis to the auditorium must be made. See A–4.

DEFINITION OF TAX-EXEMPT ENTITY

Q–10. What elections must be made in order to avoid the ''5-year lookback'' rule of section 168(j)(4)(E)(i)?

A–10. Only organizations which were exempt from tax under section 501(a) as organizations described in section 501(c)(12) (and which are no longer tax-exempt) may avoid the 5-year lookback rule of section 168(j)(4)(E)(i). In order to avoid the 5-year lookback rule with respect to any property, two elections are required. First, the organization must elect not to be exempt from tax under section 501(a) during the tax-exempt use period (as defined in section 168(j)(4)(E)(ii)(II)) with respect to the property. Second, the organization must elect to be taxed on the exempt arbitrage profits as provided in section 31(g)(16) of the Tax Reform Act of 1984. See Temp. Treas. Reg. § 301.9100–6T(a) for the time and manner of making these elections. These elections, once made, are irrevocable.

Q–11. Does the term ''tax-exempt entity'' include tax-exempt plans of deferred compensation and similar arrangements?

A–11. Yes. For purposes of section 168 (j), the term ''tax-exempt entity'' includes trusts or other entities that are tax-qualified under section 401 (a), individual retirement accounts, simplified employee pensions, and other tax-exempt arrangements described in subchapter D of chapter 1 of the Internal Revenue Code.

SPECIAL RULES FOR HIGH TECHNOLOGY EQUIPMENT

Q–12. What effect do the tax-exempt entity leasing provisions have on ''qualified technological equipment''?

A–12. ''Qualified technological equipment'' which is leased to a tax-exempt entity for a term of 5 years or less shall not constitute tax-exempt use property. If ''qualified technological equipment'' which is leased to a tax-exempt entity for a term of more than 5 years constitutes tax-exempt use property (as defined in section 168(j)(3)) and is not used predominantly outside the United States, the rules of section 168(j) (1) and (2) apply except that the recovery period to be used for such equipment shall be 5 years regardless of the length of the lease term. For purposes of section 168(j)(5), ''qualified technological equipment'' means (1) any computer or peripheral equipment, (2) any high technology telephone station equipment installed on the customer's premises, and (3) any high technology medical equipment. For definitions of these terms, see A–13 through A–16.

Q–13. What is a ''computer'' as that term is used in section 168(j)(5)(C)(i)(I)?

A–13. Computers are electronically activated devices that are programmable by the user and that are capable of accepting information, applying prescribed processes to it, and supplying the results of those processes with or without human intervention. Computers consist of a central processing unit containing extensive storage, logic, arithmetic, and control capabilities. A computer does not include any equipment which is an integral part of property that is not a user-programmable device, any video games or other devices used by the user primarily for amusement or entertainment purposes, or any typewriters, calculators, adding or accounting machines, copiers, duplicating equipment, or similar equipment. A computer does not include any equipment that is not tangible personal property.

Q–14. What is ''peripheral equipment'' as that term is used in section 168(j)(5)(C)(i)(I)?

A–14. Peripheral equipment means tangible personal property such as auxiliary machines, whether on-line or off-line, that are designed to be placed under the control of the central processing unit of the computer. Some examples of peripheral equipment are: card readers, card punches, magnetic tape feeds, high speed printers, optical character readers, tape cassettes, mass storage units, paper tape equipment, keypunches, data entry devices, teleprinters, terminals, tape drives, disc drives, disc files, disc packs, visual image projector tubes, card sorters, plotters, and collators. Peripheral equipment does not include equipment not included in Asset Depreciation Range (ADR) 00.12 listed in section 3 of Rev. Proc. 83–35, 1983–1 C.B. 745, 746. Peripheral equipment also does not include any equipment that is an integral part of property that is not a user-programmable device, any video games or other devices used by the user primarily for amusement or entertainment purposes, or any typewriters, calculators, adding or accounting machines, copiers, duplicating equipment, or similar equipment.

Q–15. What does ''high technology telephone station equipment'' mean as that term is used in section 168(j)(5)(C)(i)(II)?

A–15. High technology telephone station equipment includes only tangible personal property described in asset depreciation range (ADR) class 48.13 listed in section 3 of Rev. Proc. 83–35, 1983–1 C.B. 745, 758 that has a high technology content and which, because of such high technology content, can reasonably be expected to become obsolete before the expiration of its physical useful life. For example, telephone booths and telephones which include only a standard dialing feature are not high technology equipment. However, telephones with features such as an abbreviated dialing short program, an automatic callback, or conference call feature may qualify as high technology equipment. High technology telephone station equipment may include terminal equipment including such extra features but not terminal equipment used in conjunction with features offered through central office capacity. There are no current plans to utilize the regulatory authority provided in section 168(j)(5)(C)(iv).

Q–16. What is ''high technology medical equipment'' as that term is used in section 168 (j)(5)(C)(i)(III)?

A–16. High technology medical equipment is any electronic, electromechanical, or computer-based high technology equipment which is tangible personal property used in the screening, monitoring, observation, diagnosis, or treatment of human patients in a laboratory, medical, or hospital environment. High technology medical equipment includes only equipment that has a high technology content and which, because of such high technology content, can reasonably be expected to become obsolete before the expiration of its physical useful life. High technology medical equipment may include computer axial tomography (C.A.T.) scanners, nuclear magnetic resonance equipment, clinical chemistry analyzers, drug monitors, diagnostic ultrasound scanners, nuclear cameras, radiographic and fluoroscopic systems, Holter monitors, and bedside monitors. Incidental use of any such equipment for othe purposes, such as research, will not prevent it from qualifying as high technology medical equipment. There are no current plans to utilize the regulatory authority provided in section 168(j)(5)(C)(iv).

LEASE TERM

Q–17. What is included in determining the length of a lease term?

A–17. (i) The lease term starts when the property is first made available to the lessee under the lease. The lease term includes not only the stated duration, but also any additional period of time which is within the ''realistic contemplation of the parties at the time the property is first put into service. *Hokanson* v. *Commissioner*, 730 F.2d 1245, 1248 (9th Cir. 1984). A subsequent period of time is included in the term of the original lease if the circumstances indicate that the parties, upon entering into the original lease, had informally agreed that there would be an extension of the original lease.

(ii) With respect to personal property, the lease term includes all periods for which the tax-exempt lessee or a related party (as defined under section 168(j)(7)) has a legally enforceable option to renew the lease, or the lessor has a legally enforceable option to compel its renewal by the tax-exempt entity or a related party. This is true regardless of the renewal terms of the lease agreement or whether the lease is in fact renewed.

(iii) With respect to real property, the lease term includes all periods for which the tax-exempt lessee or a related party (as defined under section 168(j)(7)) has a legally enforceable option to renew the lease, or the lessor has a legally enforceable option to compel its renewal by the tax-exempt entity or a related party, unless the option to renew is at fair market value, determined at the time of renewal. The *Hokanson* facts and circumstances test (see (i) above) may cause the term of a fair market value renewal option to be treated as part of the original lease term.

(iv) Successive leases that are part of the same transaction or a series of related transactions concerning the same or substantially similar property shall be treated as one lease. This rule applies if at substantially the same time or as part of one arrangement the parties enter into multiple leases covering the same or substantially similar property, each having a different term. If so, then the original lease term will be treated as running through the term of the lease that has the last expiration date of the multiple leases. The multiple lease rule will not apply merely because the parties enter into a new lease at fair market rental value at the end of the original lease term.

(v) The application of the above rules is illustrated by the following examples:

Example 1. On December 30, 1984, X, a taxable corporation, and Y, a tax-exempt entity, enter into a requirements contract for a period of 3 years. The requirements contract sets the terms and conditions under which X and Y will do business on those occasions when X actually leases items of personal property to Y. The requirements contract imposes no obligation on either party to actually enter into a lease agreement. Pursuant to this requirements contract, on January 1, 1985, X and Y enter into three separate leases. Under the leases, Y obtained the use of three identical items of personal property, each for a term of six months beginning on January 1, 1985. On March 1, 1985, Y entered into a fourth lease for the use of a fourth item of personal property substantially similar to the other three items for a term of 20 months beginning on that date. The mere fact that all 4 leases were entered into pursuant to the same requirements contract and involved the same or substantially similar property does not require aggregation of the terms of such leases under section 168(j)(6)(B).

Example 2. Assume the same facts as in *example* (1) except that, instead of the 4 leases entered into in example (1), on January 1, 1985, pursuant to the requirements contract, X and Y enter into a lease for an item of personal property for one year. On January 10, 1986, after the end of the one-year lease term, X and Y enter into a second lease with respect to the same or substantially similar equipment. Assuming that the requirements contract itself is not a lease and assuming that the parties did not have any informal or implicit understanding (other than the general expectation of doing some business in the future) to enter into the second lease when the first lease was entered into, these two leases are not aggregated. The mere fact that the parties entered into two leases under the requirements contract does not result in the application of the section 168(j)(6)(B) rules for successive leases.

Example 3. The facts are the same as in *example* (2) except that the parties did have an understanding, informal or otherwise, at the time of the first lease that they would enter into a second lease of the same personal property. The terms of the leases are aggregated.

Example 4. The facts are the same as in *example* (2) except that, instead of the leases entered into in example (2), on January 1, 1985, X and Y enter into two separate leases, each for a term of one year. One lease is for the period beginning on January 1, 1985 and ending on December 31, 1985. The other lease is for the period beginning on January 1, 1986 and ending on December 31, 1986. Both leases involve the same or substantially similar personal property. Under the successive lease rule, the terms of both leases are aggregated for purposes of determining the term of either lease under section 168(j)(6)(B). This result occurs because the two leases were entered into as part of the same transaction, and they relate to the same or substantially similar personal property.

SERVICE CONTRACT ISSUES

Q–18. How is the treatment of service contracts affected by the service contract rules set forth in section 7701(e)?

A–18. If a contract which purports to be a service contract is treated as a lease under section 7701(e), such contract is to be treated as a lease for all purposes of Chapter 1 of the Internal Revenue Code (including, for example, section 168(j) and section 48(a) (4) and (5)).

Q–19. Does a contract to provide heating, maintenance, etc. services in low-income housing come within the low-income housing exception in section 7701(e)(5) to the service contract rules set forth in section 7701(e)?

A–19. No. Although certain low-income housing operated by or for an organization described in paragraphs (3) or (4) of section 501(c) is not subject to the service contract rules in section 7701(e), a contract, for instance, to provide heating services to low-income housing units, such as by installing and operating a furnace, does not constitute ''low-income housing'' within the meaning of section 7701(e)(5). Thus, the rules of section 7701(e) apply to such contracts in determining whether they are properly treated as leases.

PARTNERSHIP ISSUES

Q–20. Do the provisions applicable to property leased to partnerships, set forth in section 168(j)(8), and the provisions applicable to property owned by partnerships, set forth in section 168(j)(9), apply to pass-through entities other than partnerships?

A–20. Yes. Rules similar to those provided in paragraphs (8), (9)(A), (9)(B), and (9)(C) of section 168(j) and those provided in Q & A's 21–26 apply to pass-through entities other than partnerships.

Q–21. What rules apply to property owned by a partnership in which one or more partners is a tax-exempt entity?

A–21. If property is owned by a partnership having both taxable and tax-exempt entities as partners, and any allocation to a tax-exempt entity partner is not a ''qualified allocation'' under section 168(j)(9)(B), then such entity's proportionate share of the property is to be treated as tax-exempt use property for all purposes. However, the property will not be tax-exempt use property if it is predominantly used by the partnership in an activity which, with respect to the tax-exempt entity, is an unrelated trade or business. An activity is an unrelated trade or business with respect to a tax-exempt entity if such entity's distributive share of the partnership's gross income from the activity is includible in computing its unrelated business taxable income under section 512(c) (determined without regard to the debt-financed income rules of section 514). A tax-exempt entity partner's proportionate share of property of a partnership equals such partner's share of that item of the partnership's income or gain (excluding income or gain allocated under section 704(c)) in which the tax-exempt entity has the highest share. If the tax-exempt entity partner's share of any item of income or gain (excluding income or gain allocated under section 704(c)) may vary during the period it is a partner, the previous sentence shall be applied with reference to the highest share of any such item that it may receive at any time during such period. The application of these rules is illustrated by the following example:

Example. A partnership (P) operates a factory, which consists of a building and various items of machinery. P has one tax-exempt entity (E) as a partner, and E's proportionate share is 10 percent (*i.e.,* 10 percent is the largest share of any item of income or gain that E may receive during the time E is a partner). Unless P's allocations to E are qualified under section 168(j)(9)(B), 10 percent of each item of partnership property (including the building) is tax-exempt use property, notwithstanding the 35 percent threshold test of section 168(j)(3)(B)(iii) that is otherwise applicable to 18-year real property. However, the property will not be tax-exempt use property if it is predominantly used by the partnership in an activity which, with respect to E, is an unrelated trade or business (determined without regard to the debt-financed income rules of section 514).

Q–22. What consititutes a ''qualified allocation'' under section 168(j)(9)(B)?

A–22. (i) A ''qualified allocation'' means any allocation to a tax-exempt entity which is consistent with such entity's being allocated the same share (*i.e.,* the identical percentage) of each and every item of partnership income, gain, loss, deduction, credit, and basis during the entire period such entity is a partner. Except as provided in A–23, an allocation is not qualified if it does not have substantial economic effect under section 704(b). However, for purposes of the two preceding sentences, items allocated under section 704(c) (relating to contributed property) are not taken into account. An allocation is not a ''qualified allocation'' under section 168(j)(9)(B) if the partnership agreement provides for, or the partners have otherwise formally or informally agreed to, any change (regardless of whether such change is contingent upon the happening of one or more events) in the tax-exempt entity's distributive share of income, gain, loss, deduction, credit, or basis at any time during the entire period the tax-exempt entity is a partner.

(ii) A change in a tax-exempt entity's distributive share of income, gain, loss, deduction, credit, or basis which occurs as a result of a sale or redemption of a partnership interest (or portion thereof) or a contribution of cash or property to the partnership shall be disregarded in determining whether the partnership allocations are qualified, provided that such transaction is based on fair market value at the time of the transaction and that the allocations are qualified after the change. For this purpose, the consideration determined by the parties dealing at arm's length and with adverse interests normally will be deemed to satisfy the fair market value requirement. In addition, a change in a tax-exempt entity's distributive share which occurs as a result of a partner's default (other than a prearranged default) under the terms of the partnership agreement will be disregarded, provided that the allocations are qualified after the change, and that the change does not have the effect of avoiding the restrictions of section 168(j)(9). Any of the above-described transactions between existing partners (and parties related to them) will be closely scrutinized.

Example 1. A, a taxable entity, and B, a tax-exempt entity, form a partnership in 1985. A contributes $800,000 to the partnership; B contributes $200,000. The partnership agreement allocates 95 percent of each item of income, gain, loss, deduction, credit, and basis to A; B's share of each of these items is 5 percent. Liquidation proceeds are, throughout the term of the partnership, to be distributed in accordance with the partner's capital account balances, and any partner with a deficit in his capital account following the distribution of liquidation proceeds is required to restore the amount of such deficit to the partnership. Assuming that these allocations have substantial economic effect within the meaning of section 704(b)(2), they are qualified because B's distributive share of each item of income, gain, loss, deduction, credit, and basis will remain the same during the entire period that B is a partner. The fact that the liquidation proceeds may be distributed in a ratio other than 95 percent/5 percent does not cause the allocations not to be qualified.

Example 2. A, B, and E are members of a partnership formed on July 1, 1984. On that date the partnership places in service a building and section 1245 class property. A and B are taxable entities; E is a tax-exempt entity. The partnership agreement provides that during the first 5 years of the partnership, A and B are each allocated 40 percent of each item of income, gain, loss, deduction, credit, and basis; E is allocated 20 percent. Thereafter, A, B, and E are each allocated 33⅓ percent of each item of income, gain, loss, deduction, credit, and basis. Assume that these allocations meet the substantial economic effect test of section 704(b)(2) and E's distributive share of the partnership's income is not unrelated trade or business income subject to tax under section 511. The allocations to E are not qualified allocations under section 168(j)(9)(B) because E's distributive share of partnership items does not remain the same during the entire period that E is a partner in the partnership. Thus, 33⅓ percent of the building and 33⅓ percent of the section 1245 class property are tax-exempt use property from the time each is placed in service by the partnership and are thus subject to the cost recovery rules of section 168(j) (1) and (2). In addition, no investment tax credit is allowed for 33⅓ percent of the section 1245 class property because of section 48(a)(4).

Q–23. In determining whether allocations constitute qualified allocations, what rules are applied to test allocations that are not governed by the substantial economic effect rules?

A–23. A–22 provides the general rules to be used in determining whether an allocation is a qualified allocation, including the rule that the allocation must have substantial economic effect. However, certain allocations are not governed by the substantial economic effect rules (e.g., an allocation of basis of an oil and gas property is generally governed by section 613A(c)(7)(D), rather than section 704(b)), and other allocations cannot satisfy the substantial economic effect rules (e.g., allocations of credits, allocations of deduction and loss attributable to nonrecourse debt, and allocations of percentage depletion in excess of basis). Since allocations in either of these categories cannot be tested under the substantial economic effect test, these allocations, in order to be qualified, must comply with the relevant Code or regulation section that governs the particular allocation (e.g., in the case of an allocation of basis of an oil and gas property, section 613A(c)(7)(D)).

Q–24. Will the Internal Revenue Service issue letter rulings on the issue of whether an allocation is a ''qualified allocation'' for purposes of section 168(j)(9)?

A–24. The Internal Revenue Service will accept requests for rulings on the question of whether an allocation is a ''qualified allocation'' for purposes of section 168(j)(9). Such requests should be submitted in accordance with the appropriate revenue procedure. One requirement of a qualified allocation is that such allocation must have substantial economic effect under section 704(b)(2). Currently, the Service will not rule on the question of whether an allocation has substantial economic effect under section 704(b)(2). Therefore, unless and until this policy is changed, a ruling request regarding a qualified allocation must contain a representation that the subject allocation has substantial economic effect (or complies with A–23, if applicable).

Q–25. Do priority cash distributions which constitute guaranteed payments under section 707(c) disqualify an otherwise qualified allocation?

A–25. Priority cash distributions to partners which constitute guaranteed payments will not disqualify an otherwise qualified allocation if the priority cash distributions are reasonable in amount (e.g., equal to the Federal short-term rate described in section 1274(d)) and are made in equal priorities to all partners in proportion to their capital in the partnership. Other guaranteed payments will be closely scrutinized and, in appropriate cases, will disqualify an otherwise qualified allocation.

Example. A and B form Partnership AB to operate a manufacturing business. A is a tax-exempt entity; B is a taxable person. A contributes $500,000 to the partnership; B contributes $100,000. The partnership agreement provides that A and B are each entitled to cash distributions each year, in equal priority, in an amount equal to 8 percent of their capital contribution. Assume that these payments are reasonable in amount and constitute guaranteed payments under section 707(c). Without taking into consideration the guaranteed payments, all allocations constitute qualified allocations under section 168(j)(9)(B) and A–22. These guaranteed payments will not disqualify such allocations.

Q–26. Can property be treated as tax-exempt use property under both the general rule of section 168(j)(3) and the partnership provisions of section 168(j)(9)?

A–26. Yes. For example, a tax-exempt entity may be a partner in a partnership that owns a building 60 percent of which is tax-exempt use property because it is leased to an unrelated tax-exempt entity under a 25-year lease. The status of the remaining 40 percent depends on whether or not allocations under the partnership agreement are qualified under section 168(j)(9). If the allocations are not qualified under section 168(j)(9), the tax-exempt entity's proportionate share (as determined under section 168(j)(9)(C)) of the remaining 40 percent will be tax-exempt use property. For example, if the tax-exempt entity's proportionate share is 30 percent, then 12 percent of the remaining 40 percent (*i.e.*, .30 times .40) is tax-exempt use property and a total of 72 percent of the property (60 percent +12 percent) is tax-exempt use property.

EFFECTIVE DATE QUESTIONS

Q–27. Does an amendment to a lease (or sublease) to a tax-exempt entity of property which, pursuant to the effective date provisions of section 31(g) of TRA, is not subject to section 168(j) cause such property to be subject to the provisions of section 168(j)?

A–27. An amendment to such a lease (or sublease) does not cause such property to be subject to the provisions of section 168(j) unless the amendment increases the term of the lease (or sublease). However, if the amendment increases the amount of property subject to the lease, the additional property must be tested independently under the effective date provisions of section 31(g) of TRA. See A–31 for special rules regarding improvements to property.

Example. On May 1, 1983, X, a taxable entity, and E, a tax-exempt entity, enter into a lease whereby X will lease to E the top 4 floors of a ten-story building for a lease term of 25 years. In 1985, the lease is amended to provide that E will lease an additional floor for the balance of the lease term. At that time the annual rent due under the lease is increased. Pursuant to the provisions of section 31(g)(2)(A) of TRA, section 168(j) does not apply to the lease to E of the top 4 floors of the building. Assuming that no other provision of section 31(g) of TRA provides otherwise, the floor added to the lease in 1985 is subject to the provisions of section 168(j).

Q–28. If property which is not subject to section 168(j) by virtue of the effective date provisions of section 31(g) of TRA is sold, subject to the lease to the tax-exempt entity, what are the consequences?

A–28. Property to which section 168(j) does not apply by virtue of the effective date provisions set forth in section 31(g) (2), (3), and (4) of TRA will not become subject to section 168(j) merely by reason of a transfer of the property subject to the lease by the lessor (or a transfer of the contract to acquire, construct, reconstruct, or rehabilitate the property), so long as the lessee (or party obligated to lease) does not change. For purposes of the preceding sentence, the term ''transfer'' includes the sale-leaseback by a taxable lessor of its interest in the property, subject to the underlying lease to the tax-exempt entity. However, if property is transferred to a partnership or other pass-through entity after the effective date of section 168(j)(9) (see section 31(g) of TRA), such property is subject to the provisions of section 168(j)(9).

Q–29. Can property which was leased to a tax-exempt entity after May 23, 1983 and acquired by a partnership before October 22, 1983 be tax-exempt use property?

A–29. Yes. Because the property was leased to a tax-exempt entity after May 23, 1983, it may be tax-exempt use property under section 168(j)(3) and section 31(g)(1) of TRA. However, if the partnership included a tax-exempt entity as a partner, section 168(j)(9) would be inapplicable under section 31(g)(3)(B) of TRA because the partnership acquired the property before October 22, 1983.

Q–30. What is a binding contract for purposes of the transitional rules in section 31(g) of TRA?

A–30. (i) A contract is binding only if it is enforceable under State law against the taxpayer or a predecessor and does not limit damages to a specified amount, as for example, by a liquidated damages provision. A contract that limits damages to an amount equal to at least 5 percent of the total contract price will not be treated as limiting damages for this purpose. In determining whether a contract limits damages, the fact that there may be little or no damages because the contract price does not significantly differ from fair market value will not be taken into account. For example, if a taxpayer entered into an irrevocable contract to purchase an asset for $100 and the contract contained no provision for liquidated damages, the contract is considered binding notwithstanding the fact that the property had a fair market value of $99 and under local law the seller would only recover the difference in the event the purchaser failed to perform. If the contract provided for a refund of the purchase price in lieu of any damages allowable by law in the event of breach or cancellation, the contract is not considered binding.

(ii) A contract is binding even if subject to a condition, so long as the condition is not within the control of either party or a predecessor in interest. A contract will not be treated as ceasing to be binding merely because the parties make insubstantial changes in its terms or because any term is to be determined by a standard beyond the control of either party. A contract which imposes significant obligations on the taxpayer (or a predecessor) will be treated as binding notwithstanding the fact that insubstantial terms remain to be negotiated by the parties to the contract.

(iii) A binding contract to acquire a component part of a larger piece of property will not be treated as a binding contract to acquire the larger piece of property. For example, if a tax-exempt entity entered into a binding contract on May 1, 1983 to acquire a new aircraft engine, there would be a binding contract to acquire only the engine, not the entire aircraft.

Q–31. If an improvement is made to a property that is ''grandfathered'' (*i.e.*, property that is not subject to section 168(j) because of the effective date provisions of section 31(g) of TRA), to what extent will such improvement be grandfathered?

A–31. Section 31(g)(20)(B) provides that a ''substantial improvement'' to property is treated as a separate property for purposes of the effective date provisions of section 31(g) of TRA. As a result, a ''substantial improvement'' will not be grandfathered unless such ''substantial improvement'' is grandfathered under a provision other than section 31(g)(20)(B). A property that is grandfathered will not become subject to section 168(j) merely because an improvement is made to such property, regardless of whether the improvement is a ''substantial improvement''. If an improvement other than a ''substantial improvement'' is made to property (other than land) that is grandfathered, that improvement also will be grandfathered. The determination of whether new construction constitutes an improvement to property or the creation of a new separate property will be based on all facts and circumstances. Furthermore, any improvement to land will be treated as a separate property.

Example. On January 3, 1983, T, a taxable entity, entered into a lease of a parking lot to E, a tax-exempt entity. On January 1, 1985, T begins construction of a building for use by E on the site of the parking lot. The building is completed and placed in service in November 1985. The building is treated as a separate property, and is thus subject to the provisions of section 168(j), unless the building is grandfathered under a provision other than section 31(g)(20)(B) of TRA.

Q–32. What is ''significant official governmental action'' for purposes of the section 31(g)(4) transitional rule of TRA?

A–32. (i) ''Significant official governmental action'' involves three separate requirements. First, the action must be an official action. Second, the action must be specific action with respect to a particular project. Third, the action must be taken by a governmental entity having authority to commit the tax-exempt entity to the project, to provide funds for it, or to approve the project under State or local law.

(ii) The first requirement of official action means that the governing body must adopt a resolution or ordinance, or take similar official action, on or before November 1, 1983. The action qualifies only if it conforms with Federal, State, and local law (as applicable) and is a proper exercise of the powers of the governing body. Moreover, the action must not have been withdrawn. There must be satisfactory written evidence of the action that was in existence on or before November 1, 1983. Satisfactory written evidence includes a formal resolution or ordinance, minutes of meetings, and binding contracts with third parties pursuant to which third parties are to render services in furtherance of the project.

(iii) The second requirement of specific action is directed at the substance of the action taken. The action must be a specific action with respect to a particular project in which the governing body indicates an intent to have the project (or the design work for it) proceed. This requires that a specific project have been formulated and that the significant official action be a step toward consummation of the project. If the action does not relate to a specific project or merely directs that a proposal or recommendation be formulated, it will not qualify. The following set of actions with respect to a particular project constitute specific action: the hiring of bond counsel or bond underwriters necessary to assist in the issuance and sale of bonds to finance a particular project or the adoption of an inducement resolution relating to bonds to be issued for such a project; applying for an Urban Development Action Grant on behalf of the project described in the application, receiving such a grant concerning the project, or the recommendation of a city planning authority to proceed with a project;

the enactment of a State law authorizing the sale, lease, or construction of the property; the appropriation of funds for the property or authorization of a feasibility study or a development services contract with respect to it; the approval of financing arrangements by a regulatory agency; the enactment of a State law designed to provide funding for a project; the certification of a building as a historic structure by a State agency and the Department of the Interior; or the endorsement of the application for a certification of need with respect to a medical facility by a regulatory agency other than the agency empowered to issue such a certificate.

(iv) The third requirement for significant official governmental action is that the action must be taken by a Federal, State, or local governing body having authority to commit the tax-exempt entity to the project, to provide funds for it, or to approve the project under applicable law.

If the chief executive or another representative of a governing body has such authority, action by such representative would satisfy the requirement of this (iv). A governing body may have the authority to commit the tax-exempt entity to a project notwithstanding the fact that the project cannot be consummated without other governmental action being taken. For example, a city council will be treated as having authority to commit a city to do a sale-leaseback of its city hall notwithstanding the fact that State law needs to be amended to permit such a transaction. Similarly, if a local project cannot be completed without Federal approval, either legislative or administrative, the obtaining of such approval satisfies the requirements of this (iv).

(v) Routine governmental action at a local level will not qualify as significant official governmental action. Routine governmental action includes the granting of building permits or zoning changes and the issuance of environmental impact statements.

(vi) In order to qualify under the transitional rule of TRA section 31(g)(4), a sale and leaseback pursuant to a binding contract entered into before January 1, 1985 must be part of the project as to which there was significant official governmental action. Except as provided in the following sentence, where there has been significant official governmental action on or before November 1, 1983 with respect to the construction, reconstruction or rehabilitation of a property, the sale and leaseback of such property pursuant to a binding contract entered into before January 1, 1985 will be treated as part of the project which was the subject of the significant official governmental action. However, if the construction, reconstruction or rehabilitation was substantially completed prior to January 1, 1983, the sale and leaseback of such property will be treated as a separate project, unless the sale and leaseback was contemplated at the time of the significant official governmental action. Nevertheless, where the sale and leaseback is treated as a separate project, section 31(g)(4) may apply if there was significant official governmental action on or before November 1, 1983, with respect to such sale and leaseback. The application of this provision is illustrated by the following example:

Example. In the summer of 1927, the Board of Aldermen of City C passed a resolution authorizing the design and contruction of a new city hall and appropriated the funds necessary for such project. Construction was completed in 1928. At the time of the significant official governmental action, City C had no plan to enter into a sale-leaseback arrangement with respect to the facility. On December 15, 1984, City C entered into a binding sale-leaseback arrangement concerning the city hall. This transaction will not qualify for exclusion from section 168(j) under the section 31(g)(4) of TRA since construction of the facility in question was substantially completed before January 1, 1983. If, however, there had been significant official governmental action on or before November 1, 1983 with respect to the sale-leaseback project, then the transitional rule of section 31(g)(4) of TRA would apply.

[T.D. 8033, 50 FR 27224, July 2, 1985, as amended by T.D. 8435, 57 FR 43896, Sept. 23, 1992]

§ 1.168(k)–0 Table of contents.

This section lists the headings that appear in § 1.168(k)–1.

(2) Definitions.
(b) Qualified property or 50-percent bonus depreciation property.
(1) In general.
(2) Description of qualified property or 50-percent bonus depreciation property.
(i) In general.
(ii) Property not eligible for additional first year depreciation deduction.
(A) Property that is not qualified property.
(B) Property that is not 50-percent bonus depreciation property.
(3) Original use.
(i) In general.
(ii) Conversion to business or income-producing use.
(A) Personal use to business or income-producing use.
(B) Inventory to business or income-producing use.
(iii) Sale-leaseback, syndication, and certain other transactions.
(A) Sale-leaseback transaction.
(B) Syndication transaction and certain other transactions.
(C) Sale-leaseback transaction followed by a syndication transaction and certain other transactions.
(iv) Fractional interests in property.
(v) Examples.
(4) Acquisition of property.
(i) In general.
(A) Qualified property.
(B) 50-percent bonus depreciation property.
(ii) Definition of binding contract.
(A) In general.
(B) Conditions.
(C) Options.
(D) Supply agreements.
(E) Components.
(iii) Self-constructed property.
(A) In general.
(B) When does manufacture, construction, or production begin.
(*1*) In general.
(*2*) Safe harbor.
(C) Components of self-constructed property.
(*1*) Acquired components.
(*2*) Self-constructed components.
(iv) Disqualified transactions.
(A) In general.
(B) Related party defined.
(v) Examples.
(5) Placed-in-service date.
(i) In general.
(ii) Sale-leaseback, syndication, and certain other transactions.
(A) Sale-leaseback transaction.
(B) Syndication transaction and certain other transactions.
(C) Sale-leaseback transaction followed by a syndication transaction and certain other transactions.
(iii) Technical termination of a partnership.
(iv) Section 168(i)(7) transactions.
(v) Example.
(c) Qualified leasehold improvement property.
(1) In general.
(2) Certain improvements not included.
(3) Definitions.
(d) Computation of depreciation deduction for qualified property or 50-percent bonus depreciation property.
(1) Additional first year depreciation deduction.
(i) In general.
(ii) Property having a longer production period.
(iii) Alternative minimum tax.
(2) Otherwise allowable depreciation deduction.
(i) In general.
(ii) Alternative minimum tax.
(3) Examples.
(e) Election not to deduct additional first year depreciation.
(1) In general.
(i) Qualified property.
(ii) 50-percent bonus depreciation property.
(2) Definition of class of property.
(3) Time and manner for making election.
(i) Time for making election.
(ii) Manner of making election.
(4) Special rules for 2000 or 2001 returns.
(5) Failure to make election.
(6) Alternative minimum tax.
(7) Revocation.
(i) In general.
(ii) Automatic 6-month extension.
(f) Special rules.
(1) Property placed in service and disposed of in the same taxable year.
(i) In general.
(ii) Technical termination of a partnership.
(iii) Section 168(i)(7) transactions.
(iv) Examples.
(2) Redetermination of basis.
(i) Increase in basis.
(ii) Decrease in basis.
(iii) Definition.
(iv) Examples.
(3) Section 1245 and 1250 depreciation recapture.
(4) Coordination with section 169.
(5) Like-kind exchanges and involuntary conversions.
(i) Scope.
(ii) Definitions.
(iii) Computation.
(A) In general.
(B) Year of disposition and year of replacement.
(C) Property having a longer production period.
(D) Alternative minimum tax.
(iv) Sale-leasebacks.
(v) Acquired MACRS property or acquired computer software that is acquired and placed in service before disposition of involuntarily converted MACRS property or involuntarily converted computer software.

[T.D. 9091, 68 FR 52991, Sept. 8, 2003. Redesignated and amended by T.D. 9283, 71 FR 51738, Aug. 31, 2006]

§ 1.168(k)–1 Additional first year depreciation deduction.

(a) *Scope and definitions*—(1) *Scope.* This section provides the rules for determining the 30-percent additional first year depreciation deduction allowable under section 168(k)(1) for qualified property and the 50-percent additional first year depreciation deduction allowable under section 168(k)(4) for 50-percent bonus depreciation property.

(2) *Definitions.* For purposes of section 168(k) and this section, the following definitions apply:

(i) *Depreciable property* is property that is of a character subject to the allowance for depreciation as determined under section 167 and the regulations thereunder.

(ii) *MACRS property* is tangible, depreciable property that is placed in service after December 31, 1986 (or after July 31, 1986, if the taxpayer made an election under section 203(a)(1)(B) of the Tax Reform Act of 1986; 100 Stat. 2143) and subject to section 168, except for property excluded from the application of section 168 as a result of section 168(f) or as a result of a transitional rule.

(iii) *Unadjusted depreciable basis* is the basis of property for purposes of section 1011 without regard to any adjustments described in section 1016(a)(2) and (3). This basis reflects the reduction in basis for the percentage of the taxpayer's use of property for the taxable year other than in the taxpayer's trade or business (or for the production of income), for any portion of the basis the taxpayer properly elects to treat as an expense under section 179 or section 179C, and for any adjustments to basis provided by other provisions of the Internal Revenue Code and the regulations thereunder (other than section 1016(a)(2) and (3)) (for example, a reduction in basis by the amount of the disabled access credit pursuant to section 44(d)(7)). For property subject to a lease, see section 167(c)(2).

(iv) *Adjusted depreciable basis* is the unadjusted depreciable basis of the property, as defined in §1.168(k)–1(a)(2)(iii), less the adjustments described in section 1016(a)(2) and (3).

(b) *Qualified property or 50-percent bonus depreciation property*—(1) *In general.* Qualified property or 50-percent bonus depreciation property is depreciable property that meets all the following requirements in the first taxable year in which the property is subject to depreciation by the taxpayer whether or not depreciation deductions for the property are allowable:

(i) The requirements in §1.168(k)–1(b)(2) (description of property);

(ii) The requirements in §1.168(k)–1(b)(3) (original use);

(iii) The requirements in §1.168(k)–1(b)(4) (acquisition of property); and

(iv) The requirements in §1.168(k)–1(b)(5) (placed-in-service date).

(2) *Description of qualified property or 50-percent bonus depreciation property*—(i) *In general.* Depreciable property will meet the requirements of this paragraph (b)(2) if the property is—

(A) MACRS property (as defined in §1.168(k)–1(a)(2)(ii)) that has a recovery period of 20 years or less. For purposes of this paragraph (b)(2)(i)(A) and section 168(k)(2)(B)(i)(II) and 168(k)(4)(C), the recovery period is determined in accordance with section 168(c) regardless of any election made by the taxpayer under section 168(g)(7);

(B) Computer software as defined in, and depreciated under, section 167(f)(1) and the regulations thereunder;

(C) Water utility property as defined in section 168(e)(5) and depreciated under section 168; or

(D) Qualified leasehold improvement property as defined in paragraph (c) of this section and depreciated under section 168.

(ii) *Property not eligible for additional first year depreciation deduction*—(A) *Property that is not qualified property*. For purposes of the 30-percent additional first year depreciation deduction, depreciable property will not meet the requirements of this paragraph (b)(2) if the property is—

(*1*) Described in section 168(f);

(*2*) Required to be depreciated under the alternative depreciation system of section 168(g) pursuant to section 168(g)(1)(A) through (D) or other provisions of the Internal Revenue Code (for example, property described in section 263A(e)(2)(A) if the taxpayer (or any related person as defined in section 263A(e)(2)(B)) has made an election under section 263A(d)(3), or property described in section 280F(b)(1)).

(*3*) Included in any class of property for which the taxpayer elects not to deduct the 30-percent additional first year depreciation (for further guidance, see paragraph (e) of this section); or

(*4*) Qualified New York Liberty Zone leasehold improvement property as defined in section 1400L(c)(2).

(B) *Property that is not 50-percent bonus depreciation property*. For purposes of the 50-percent additional first year depreciation deduction, depreciable property will not meet the requirements of this paragraph (b)(2) if the property is—

(*1*) Described in paragraph (b)(2)(ii)(A)(*1*), (*2*), or (*4*) of this section; or

(*2*) Included in any class of property for which the taxpayer elects the 30-percent, instead of the 50-percent, additional first year depreciation deduction or elects not to deduct any additional first year depreciation (for further guidance, see paragraph (e) of this section).

(3) *Original use*—(i) *In general*. For purposes of the 30-percent additional first year depreciation deduction, depreciable property will meet the requirements of this paragraph (b)(3) if the original use of the property commences with the taxpayer after September 10, 2001. For purposes of the 50-percent additional first year depreciation deduction, depreciable property will meet the requirements of this paragraph (b)(3) if the original use of the property commences with the taxpayer after May 5, 2003. Except as provided in paragraphs (b)(3)(iii) and (iv) of this section, original use means the first use to which the property is put, whether or not that use corresponds to the use of the property by the taxpayer. Thus, additional capital expenditures incurred by a taxpayer to recondition or rebuild property acquired or owned by the taxpayer satisfies the original use requirement. However, the cost of reconditioned or rebuilt property does not satisfy the original use requirement. The question of whether property is reconditioned or rebuilt property is a question of fact. For purposes of this paragraph (b)(3)(i), property that contains used parts will not be treated as reconditioned or rebuilt if the cost of the used parts is not more than 20 percent of the total cost of the property, whether acquired or self-constructed.

(ii) *Conversion to business or income-producing use*—(A) *Personal use to business or income-producing use*. If a taxpayer initially acquires new property for personal use and subsequently uses the property in the taxpayer's trade or business or for the taxpayer's production of income, the taxpayer is considered the original user of the property. If a person initially acquires new property for personal use and a taxpayer subsequently acquires the property from the person for use in the taxpayer's trade or business or for the taxpayer's production of income, the taxpayer is not considered the original user of the property.

(B) *Inventory to business or income-producing use*. If a taxpayer initially acquires new property and holds the property primarily for sale to customers in the ordinary course of the taxpayer's business and subsequently withdraws the property from inventory and uses the property primarily in the taxpayer's trade or business or primarily for the taxpayer's production of income, the taxpayer is considered the original user of the property. If a person initially acquires new property and holds the property primarily for sale to customers in the ordinary course of the person's business and a taxpayer subsequently acquires the property from the person for use primarily in the taxpayer's trade or business or primarily for the taxpayer's production of income, the taxpayer is considered the original user of the property. For purposes of this paragraph (b)(3)(ii)(B), the original use of the property by the taxpayer commences on the date on which the taxpayer uses the property primarily in the taxpayer's trade or business or primarily for the taxpayer's production of income.

(iii) *Sale-leaseback, syndication, and certain other transactions*—(A) *Sale-leaseback transaction.* If new property is originally placed in service by a person after September 10, 2001 (for qualified property), or after May 5, 2003 (for 50-percent bonus depreciation property), and is sold to a taxpayer and leased back to the person by the taxpayer within three months after the date the property was originally placed in service by the person, the taxpayer-lessor is considered the original user of the property.

(B) *Syndication transaction and certain other transactions.* If new property is originally placed in service by a lessor (including by operation of paragraph (b)(5)(ii)(A) of this section) after September 10, 2001 (for qualified property), or after May 5, 2003 (for 50-percent bonus depreciation property), and is sold by the lessor or any subsequent purchaser within three months after the date the property was originally placed in service by the lessor (or, in the case of multiple units of property subject to the same lease, within three months after the date the final unit is placed in service, so long as the period between the time the first unit is placed in service and the time the last unit is placed in service does not exceed 12 months), and the user of the property after the last sale during the three-month period remains the same as when the property was originally placed in service by the lessor, the purchaser of the property in the last sale during the three-month period is considered the original user of the property.

(C) *Sale-leaseback transaction followed by a syndication transaction and certain other transactions.* If a sale-leaseback transaction that satisfies the requirements in paragraph (b)(3)(iii)(A) of this section is followed by a transaction that satisfies the requirements in paragraph (b)(3)(iii)(B) of this section, the original user of the property is determined in accordance with paragraph (b)(3)(iii)(B) of this section.

(iv) *Fractional interests in property.* If, in the ordinary course of its business, a taxpayer sells fractional interests in property to third parties unrelated to the taxpayer, each first fractional owner of the property is considered as the original user of its proportionate share of the property. Furthermore, if the taxpayer uses the property before all of the fractional interests of the property are sold but the property continues to be held primarily for sale by the taxpayer, the original use of any fractional interest sold to a third party unrelated to the taxpayer subsequent to the taxpayer's use of the property begins with the first purchaser of that fractional interest. For purposes of this paragraph (b)(3)(iv), persons are not related if they do not have a relationship described in section 267(b) or 707(b) and the regulations thereunder.

(v) *Examples.* The application of this paragraph (b)(3) is illustrated by the following examples:

Example 1. On August 1, 2002, *A* buys from *B* for $20,000 a machine that has been previously used by *B* in *B*'s trade or business. On March 1, 2003, *A* makes a $5,000 capital expenditure to recondition the machine. The $20,000 purchase price does not qualify for the additional first year depreciation deduction because the original use requirement of this paragraph (b)(3) is not met. However, the $5,000 expenditure satisfies the original use requirement of this paragraph (b)(3) and, assuming all other requirements are met, qualifies for the 30-percent additional first year depreciation deduction, regardless of whether the $5,000 is added to the basis of the machine or is capitalized as a separate asset.

Example 2. C, an automobile dealer, uses some of its automobiles as demonstrators in order to show them to prospective customers. The automobiles that are used as demonstrators by *C* are held by *C* primarily for sale to customers in the ordinary course of its business. On September 1, 2002, *D* buys from *C* an automobile that was previously used as a demonstrator by *C*. *D* will use the automobile solely for business purposes. The use of the automobile by *C* as a demonstrator does not constitute a ''use'' for purposes of the original use requirement and, therefore, *D* will be considered the original user of the automobile for purposes of this paragraph (b)(3). Assuming all other requirements are met, *D*'s purchase price of the automobile qualifies for the 30-percent additional first year depreciation deduction for *D*, subject to any limitation under section 280F.

Example 3. On April 1, 2000, *E* acquires a horse to be used in *E*'s thoroughbred racing business. On October 1, 2003, *F* buys the horse from *E* and will use the horse in *F*'s horse breeding business. The use of the horse by *E* in its racing business prevents the original use of the horse from commencing with *F*. Thus, *F*'s purchase price of the horse does not qualify for the additional first year depreciation deduction.

Example 4. In the ordinary course of its business, *G* sells fractional interests in its aircraft to unrelated parties. *G* holds out for sale eight equal fractional interests in an aircraft. On January 1, 2003, *G* sells five of the eight fractional interests in the aircraft to *H*, an unrelated party, and *H* begins to use its proportionate share of the aircraft immediately upon purchase. On June 1, 2003, G sells to I, an unrelated party to G, the remaining unsold ⅜ fractional interests in the aircraft. *H* is considered the original user as to its ⅝ fractional interest in the aircraft and *I* is considered the original user as to its ⅜ fractional interest in the aircraft. Thus, assuming all other requirements are met, *H*'s purchase price for its ⅝ fractional interest in the aircraft qualifies for the 30-percent additional first year depreciation deduction and I's purchase price for its ⅜ fractional interest in the aircraft qualifies for the 50-percent additional first year depreciation deduction.

Example 5. On September 1, 2001, JJ, an equipment dealer, buys new tractors that are held by JJ primarily for sale to customers in the ordinary course of its business. On October 15, 2001, JJ withdraws the tractors from inventory and begins to use the tractors primarily for producing rental income. The holding of the tractors by JJ as inventory does not constitute a ''use'' for purposes of the original use requirement and, therefore, the original use of the tractors commences with JJ on October 15, 2001, for purposes of paragraph (b)(3) of this section. However, the tractors are not eligible for the additional first year depreciation deduction because JJ acquired the tractors before September 11, 2001.

(4) *Acquisition of property*—(i) *In general*—(A) *Qualified property.* For purposes of the 30-percent additional first year depreciation deduction, depreciable property will meet the requirements of this paragraph (b)(4) if the property is—

(*1*) Acquired by the taxpayer after September 10, 2001, and before January 1, 2005, but only if no written binding contract for the acquisition of the property was in effect before September 11, 2001; or

(*2*) Acquired by the taxpayer pursuant to a written binding contract that was entered into after September 10, 2001, and before January 1, 2005.

(B) *50-percent bonus depreciation property.* For purposes of the 50-percent additional first year depreciation deduction, depreciable property will meet the requirements of this paragraph (b)(4) if the property is—

(*1*) Acquired by the taxpayer after May 5, 2003, and before January 1, 2005, but only if no written binding contract for the acquisition of the property was in effect before May 6, 2003; or

(*2*) Acquired by the taxpayer pursuant to a written binding contract that was entered into after May 5, 2003, and before January 1, 2005.

(ii) *Definition of binding contract*—(A) *In general.* A contract is binding only if it is enforceable under State law against the taxpayer or a predecessor, and does not limit damages to a specified amount (for example, by use of a liquidated damages provision). For this purpose, a contractual provision that limits damages to an amount equal to at least 5 percent of the total contract price will not be treated as limiting damages to a specified amount. In determining whether a contract limits damages, the fact that there may be little or no damages because the contract price does not significantly differ from fair market value will not be taken into account. For example, if a taxpayer entered into an irrevocable written contract to purchase an asset for $100 and the contract contained no provision for liquidated damages, the contract is considered binding notwithstanding the fact that the asset had a fair market value of $99 and under local law the seller would only recover the difference in the event the purchaser failed to perform. If the contract provided for a full refund of the purchase price in lieu of any damages allowable by law in the event of breach or cancellation, the contract is not considered binding.

(B) *Conditions.* A contract is binding even if subject to a condition, as long as the condition is not within the control of either party or a predecessor. A contract will continue to be binding if the parties make insubstantial changes in its terms and conditions or because any term is to be determined by a standard beyond the control of either party. A contract that imposes significant obligations on the taxpayer or a predecessor will be treated as binding notwithstanding the fact that certain terms remain to be negotiated by the parties to the contract.

(C) *Options.* An option to either acquire or sell property is not a binding contract.

(D) *Supply agreements.* A binding contract does not include a supply or similar agreement if the amount and design specifications of the property to be purchased have not been specified. The contract will not be a binding contract for the property to be purchased until both the amount and the design specifications are specified. For example, if the provisions of a supply or similar agreement state the design specifications of the property to be purchased, a purchase order under the agreement for a specific number of assets is treated as a binding contract.

(E) *Components.* A binding contract to acquire one or more components of a larger property will not be treated as a binding contract to acquire the larger property. If a binding contract to acquire the component does not satisfy the requirements of this paragraph (b)(4), the component does not qualify for the 30-percent or 50-percent additional first year depreciation deduction, as applicable.

(iii) *Self-constructed property*—(A) *In general.* If a taxpayer manufactures, constructs, or produces property for use by the taxpayer in its trade or business (or for its production of income), the acquisition rules in paragraph (b)(4)(i) of this section are treated as met for qualified property if the taxpayer begins manufacturing, constructing, or producing the property after September 10, 2001, and before January 1, 2005, and for 50-percent bonus depreciation property if the taxpayer begins manufacturing, constructing, or producing the property after May 5, 2003, and before January 1, 2005. Property that is manufactured, constructed, or produced for the taxpayer by another person under a written binding contract (as defined in paragraph (b)(4)(ii) of this section) that is entered into prior to the manufacture, construction, or production of the property for use by the taxpayer in its trade or business (or for its production of income) is considered to be manufactured, constructed, or produced by the taxpayer. If a taxpayer enters into a written binding contract (as defined in paragraph (b)(4)(ii) of this section) after September 10, 2001, and before January 1, 2005, with another person to manufacture, construct, or produce property described in section 168(k)(2)(B) (longer production period property) or section 168(k)(2)(C) (certain aircraft) and the manufacture, construction, or production of this property begins after December 31, 2004, the acquisition rule in paragraph (b)(4)(i)(A)(*2*) or (b)(4)(i)(B)(*2*) of this section is met.

(B) *When does manufacture, construction, or production begin*—(*1*) *In general.* For purposes of paragraph (b)(4)(iii) of this section, manufacture, construction, or production of property begins when physical work of a significant nature begins. Physical work does not include preliminary activities such as planning or designing, securing financing, exploring, or researching. The determination of when physical work of a significant nature begins depends on the facts and circumstances. For example, if a retail motor fuels outlet or other facility is to be constructed onsite, construction begins when physical work of a significant nature commences at the site; that is, when work begins on the excavation for footings, pouring the pads for the outlet, or the driving of foundation pilings into the ground. Preliminary work, such as clearing a site, test drilling to determine soil condition, or excavation to change the contour of the land (as distinguished from excavation for footings) does not constitute the beginning of construction. However, if a retail motor fuels outlet or other facility is to be assembled on-site from modular units manufactured off-site and delivered to the site where the outlet will be used, manufacturing begins when physical work of a significant nature commences at the off-site location.

(*2*) *Safe harbor*. For purposes of paragraph (b)(4)(iii)(B)(*1*) of this section, a taxpayer may choose to determine when physical work of a significant nature begins in accordance with this paragraph (b)(4)(iii)(B)(*2*). Physical work of a significant nature will not be considered to begin before the taxpayer incurs (in the case of an accrual basis taxpayer) or pays (in the case of a cash basis taxpayer) more than 10 percent of the total cost of the property (excluding the cost of any land and preliminary activities such as planning or designing, securing financing, exploring, or researching). When property is manufactured, constructed, or produced for the taxpayer by another person, this safe harbor test must be satisfied by the taxpayer. For example, if a retail motor fuels outlet or other facility is to be constructed for an accrual basis taxpayer by another person for the total cost of $200,000 (excluding the cost of any land and preliminary activities such as planning or designing, securing financing, exploring, or researching), construction is deemed to begin for purposes of this paragraph (b)(4)(iii)(B)(*2*) when the taxpayer has incurred more than 10 percent (more than $20,000) of the total cost of the property. A taxpayer chooses to apply this paragraph (b)(4)(iii)(B)(*2*) by filing an income tax return for the placed-in-service year of the property that determines when physical work of a significant nature begins consistent with this paragraph (b)(4)(iii)(B)(*2*).

(C) *Components of self-constructed property*—(*1*) *Acquired components*. If a binding contract (as defined in paragraph (b)(4)(ii) of this section) to acquire a component does not satisfy the requirements of paragraph (b)(4)(i) of this section, the component does not qualify for the 30-percent or 50-percent additional first year depreciation deduction, as applicable. A binding contract (as defined in paragraph (b)(4)(ii) of this section) to acquire one or more components of a larger self-constructed property will not preclude the larger self-constructed property from satisfying the acquisition rules in paragraph (b)(4)(iii)(A) of this section. Accordingly, the unadjusted depreciable basis of the larger self-constructed property that is eligible for the 30-percent or 50-percent additional first year depreciation deduction, as applicable (assuming all other requirements are met), must not include the unadjusted depreciable basis of any component that does not satisfy the requirements of paragraph (b)(4)(i) of this section. If the manufacture, construction, or production of the larger self-constructed property begins before September 11, 2001, for qualified property, or before May 6, 2003, for 50-percent bonus depreciation property, the larger self-constructed property and any acquired components related to the larger self-constructed property do not qualify for the 30-percent or 50-percent additional first year depreciation deduction, as applicable. If a binding contract to acquire the component is entered into after September 10, 2001, for qualified property, or after May 5, 2003, for 50-percent bonus depreciation property, and before January 1, 2005, but the manufacture, construction, or production of the larger self-constructed property does not begin before January 1, 2005, the component qualifies for the additional first year depreciation deduction (assuming all other requirements are met) but the larger self-constructed property does not.

(*2*) *Self-constructed components*. If the manufacture, construction, or production of a component does not satisfy the requirements of paragraph (b)(4)(iii)(A) of this section, the component does not qualify for the 30-percent or 50-percent additional first year depreciation deduction, as applicable. However, if the manufacture, construction, or production of a component does not satisfy the requirements of paragraph (b)(4)(iii)(A) of this section, but the manufacture, construction, or production of the larger self-constructed property satisfies the requirements of paragraph (b)(4)(iii)(A) of this section, the larger self-constructed property qualifies for the 30-percent or 50-percent additional first year depreciation deduction, as applicable (assuming all other requirements are met) even though the component does not qualify for the 30-percent or 50-percent additional first year depreciation deduction. Accordingly, the unadjusted depreciable basis of the larger self-constructed property that is eligible for the 30-percent or 50-percent additional first year depreciation deduction, as applicable (assuming all other requirements are met), must not include the unadjusted depreciable basis of any component that does not qualify for the 30-percent or 50-percent additional first year depreciation deduction. If the manufacture, construction, or production of the larger self-constructed property began before September 11, 2001, for qualified property, or before May 6, 2003, for 50-percent bonus depreciation property, the larger self-constructed property and any self-constructed components related to the larger self-constructed property do not qualify for the 30-percent or 50-percent additional first year depreciation deduction, as applicable. If the manufacture, construction, or production of a component begins after September 10, 2001, for qualified property, or after May 5, 2003, for 50-percent bonus depreciation property, and before January 1, 2005, but the manufacture, construction, or production of the larger self-constructed property does not begin before January 1, 2005, the component qualifies for the additional first year depreciation deduction (assuming all other requirements are met) but the larger self-constructed property does not.

(iv) *Disqualified transactions*—(A) *In general*. Property does not satisfy the requirements of this paragraph (b)(4) if the user of the property as of the date on which the property was originally placed in service (including by operation of paragraphs (b)(5)(ii), (iii), and (iv) of this section), or a related party to the user or to the taxpayer, acquired, or had a written binding contract (as defined in paragraph (b)(4)(ii) of this section) in effect for the acquisition of the property at any time before September 11, 2001 (for qualified property), or before May 6, 2003 (for 50-percent bonus depreciation property). In addition, property manufactured, constructed, or produced for the use by the user of the property or by a related party to the user or to the taxpayer does not satisfy the requirements of this paragraph (b)(4) if the manufacture, construction, or production of the property for the user or the related party began at any time before September 11, 2001 (for qualified property), or before May 6, 2003 (for 50-percent bonus depreciation property).

(B) *Related party defined*. For purposes of this paragraph (b)(4)(iv), persons are related if they have a relationship specified in section 267(b) or 707(b) and the regulations thereunder.

(v) *Examples*. The application of this paragraph (b)(4) is illustrated by the following examples:

Example 1. On September 1, 2001, *J*, a corporation, entered into a written agreement with *K*, a manufacturer, to purchase 20 new lamps for $100 each within the next two years. Although the agreement specifies the number of lamps to be purchased, the agreement does not specify the design of the lamps to be purchased. Accordingly, the agreement is not a binding contract pursuant to paragraph (b)(4)(ii)(D) of this section.

Example 2. Same facts as *Example 1*. On December 1, 2001, *J* placed a purchase order with *K* to purchase 20 new model XPC5 lamps for $100 each for a total amount of $2,000. Because the agreement specifies the number of lamps to be purchased and the purchase order specifies the design of the lamps to be purchased, the purchase order placed by *J* with *K* on December 1, 2001, is a binding contract pursuant to paragraph (b)(4)(ii)(D) of this section. Accordingly, the cost of the 20 lamps qualifies for the 30-percent additional first year depreciation deduction.

Example 3. Same facts as *Example 1* except that the written agreement between *J* and *K* is to purchase 100 model XPC5 lamps for $100 each within the next two years. Because this agreement specifies the amount and design of the lamps to be purchased, the agreement is a binding contract pursuant to paragraph (b)(4)(ii)(D) of this section. Accordingly, because the agreement was entered into before September 11, 2001, any lamp acquired by *J* under this contract does not qualify for the additional first year depreciation deduction.

Example 4. On September 1, 2001, *L* began constructing an electric generation power plant for its own use. On November 1, 2002, *L* ceases construction of the power plant prior to its completion. Between September 1, 2001, and November 1, 2002, *L* incurred $3,000,000 for the construction of the power plant. On May 6, 2003, *L* resumed construction of the power plant and completed its construction on August 31, 2003. Between May 6, 2003, and August 31, 2003, *L* incurred another $1,600,000 to complete the construction of the power plant and, on September 1, 2003, *L* placed the power plant in service. None of *L*'s total expenditures of $4,600,000 qualify for the additional first year depreciation deduction because, pursuant to paragraph (b)(4)(iii)(A) of this section, *L* began constructing the power plant before September 11, 2001.

Example 5. Same facts as *Example 4* except that *L* began constructing the electric generation power plant for its own use on October 1, 2001. *L*'s total expenditures of $4,600,000 qualify for the additional first year depreciation deduction because, pursuant to paragraph (b)(4)(iii)(A) of this section, *L* began constructing the power plant after September 10, 2001, and placed the power plant in service before January 1, 2005. Accordingly, the additional first year depreciation deduction for the power plant will be $1,380,000, computed as $4,600,000 multiplied by 30 percent.

Example 6. On August 1, 2001, *M* entered into a written binding contract to acquire a new turbine. The new turbine is a component part of a new electric generation power plant that is being constructed on *M*'s behalf. The construction of the new electric generation power plant commenced in November 2001, and the new electric generation power plant was completed in November 2002. Because *M* entered into a written binding contract to acquire a component part (the new turbine) prior to September 11, 2001, pursuant to paragraph (b)(4)(iii)(C) of this section, the component part does not qualify for the additional first year depreciation deduction. However, pursuant to paragraphs (b)(4)(iii)(A) and (C) of this section, the new plant constructed for *M* will qualify for the 30-percent additional first year depreciation deduction because construction of the new plant began after September 10, 2001, and before May 6, 2003. Accordingly, the unadjusted depreciable basis of the new plant that is eligible for the 30-percent additional first year depreciation deduction must not include the unadjusted depreciable basis of the new turbine.

Example 7. Same facts as *Example 6* except that *M* entered into the written binding contract to acquire the new turbine on September 30, 2002, and construction of the new plant commenced on August 1, 2001. Because *M* began construction of the new plant prior to September 11, 2001, pursuant to paragraphs (b)(4)(iii)(A) and (C) of this section, neither the new plant constructed for *M* nor the turbine will qualify for the additional first year depreciation deduction because self-construction of the new plant began prior to September 11, 2001.

Example 8. On September 1, 2001, *N* began constructing property for its own use. On October 1, 2001, *N* sold its rights to the property to *O*, a related party under section 267(b). Pursuant to paragraph (b)(4)(iv) of this section, the property is not eligible for the additional first year depreciation deduction because *N* and *O* are related parties and construction of the property by *N* began prior to September 11, 2001.

Example 9. On September 1, 2001, *P* entered into a written binding contract to acquire property. On October 1, 2001, *P* sold its rights to the property to *Q*, a related party under section 267(b). Pursuant to paragraph (b)(4)(iv) of this section, the property is not eligible for the additional first year depreciation deduction because *P* and *Q* are related parties and a written binding contract for the acquisition of the property was in effect prior to September 11, 2001.

Example 10. Prior to September 11, 2001, *R* began constructing an electric generation power plant for its own use. On May 1, 2003, prior to the completion of the power plant, *R* transferred the rights to own and use this power plant to *S*, an unrelated party, for $6,000,000. Between May 6, 2003, and June 30, 2003, *S*, a calendar-year taxpayer, began construction, and incurred another $1,200,000 to complete the construction, of the power plant and, on August 1, 2003, *S* placed the power plant in service. Because *R* and *S* are not related parties, the transaction between *R* and *S* will not be a disqualified transaction pursuant to paragraph (b)(4)(iv) of this section. Accordingly, *S*'s total expenditures of $7,200,000 for the power plant qualify for the additional first year depreciation deduction. *S*'s additional first year depreciation deduction for the power plant will be $2,400,000, computed as $6,000,000 multiplied by 30 percent, plus $1,200,000 multiplied by 50 percent. The $6,000,000 portion of the total $7,200,000 unadjusted depreciable basis qualifies for the 30-percent additional first year depreciation deduction because that portion of the total unadjusted depreciable basis was acquired by *S* after September 10, 2001, and before May 6, 2003. However, because *S* began construction to complete the power plant after May 5, 2003, the $1,200,000 portion of the total $7,200,000 unadjusted depreciable basis qualifies for the 50-percent additional first year depreciation deduction.

Example 11. On September 1, 2001, *T* acquired and placed in service equipment. On October 15, 2001, *T* sells the equipment to *U*, an unrelated party, and leases the property back from *U* in a sale-leaseback transaction. Pursuant to paragraph (b)(4)(iv) of this section, the equipment does not qualify for the additional first year depreciation deduction because *T*, the user of the equipment, acquired the equipment prior to September 11,

2001. In addition, the sale-leaseback rules in paragraphs (b)(3)(iii)(A) and (b)(5)(ii)(A) of this section do not apply because the equipment was originally placed in service by *T* before September 11, 2001.

Example 12. On July 1, 2001, KK began constructing property for its own use. KK placed this property in service on September 15, 2001. On October 15, 2001, KK sells the property to LL, an unrelated party, and leases the property back from LL in a sale-leaseback transaction. Pursuant to paragraph (b)(4)(iv) of this section, the property does not qualify for the additional first year depreciation deduction because the property was constructed for KK, the user of the property, and that construction began prior to September 11, 2001.

Example 13. On June 1, 2004, MM decided to construct property described in section 168(k)(2)(B) for its own use. However, one of the component parts of the property had to be manufactured by another person for MM. On August 15, 2004, MM entered into a written binding contract with NN to acquire this component part of the property for $100,000. The manufacture of the component part commenced on September 1, 2004, and MM received the completed component part on February 1, 2005. The cost of this component part is 9 percent of the total cost of the property to be constructed by MM. MM began constructing the property described in section 168(k)(2)(B) on January 15, 2005, and placed this property (including all component parts) in service on November 1, 2005. Pursuant to paragraph (b)(4)(iii)(C)(*2*) of this section, the self-constructed component part of $100,000 manufactured by NN for MM is eligible for the additional first year depreciation deduction (assuming all other requirements are met) because the manufacturing of the component part began after September 10, 2001, and before January 1, 2005, and the property described in section 168(k)(2)(B), the larger self-constructed property, was placed in service by MM before January 1, 2006. However, pursuant to paragraph (b)(4)(iii)(A) of this section, the cost of the property described in section 168(k)(2)(B) (excluding the cost of the self-constructed component part of $100,000 manufactured by NN for MM) is not eligible for the additional first year depreciation deduction because construction of the property began after December 31, 2004.

Example 14. On December 1, 2004, OO entered into a written binding contract (as defined in paragraph (b)(4)(ii) of this section) with PP to manufacture an aircraft described in section 168(k)(2)(C) for use in OO's trade or business. PP begins to manufacture the aircraft on February 1, 2005. OO places the aircraft in service on August 1, 2005. Pursuant to paragraph (b)(4)(iii)(A) of this section, the aircraft meets the requirements of paragraph (b)(4)(i)(B)(*2*) of this section because the aircraft was acquired by OO pursuant to a written binding contract entered into after May 5, 2003, and before January 1, 2005.

(5) *Placed-in-service date*—(i) *In general.* Depreciable property will meet the requirements of this paragraph (b)(5) if the property is placed in service by the taxpayer for use in its trade or business or for production of income before January 1, 2005, or, in the case of property described in section 168(k)(2)(B) or (C), is placed in service by the taxpayer for use in its trade or business or for production of income before January 1, 2006 (or placed in service by the taxpayer for use in its trade or business or for production of income before January 1, 2007, in the case of property described in section 168(k)(2)(B) or (C) to which section 105 of the Gulf Opportunity Zone Act of 2005 (Pub. L. 109–135, 119 Stat. 2577) applies (for further guidance, see Announcement 2006–29 (2006–19 I.R.B. 879) and § 601.601(d)(2)(ii)(*b*) of this chapter)).

(ii) *Sale-leaseback, syndication, and certain other transactions*—(A) *Sale-leaseback transaction.* If qualified property is originally placed in service after September 10, 2001, or 50-percent bonus depreciation property is originally placed in service after May 5, 2003, by a person and sold to a taxpayer and leased back to the person by the taxpayer within three months after the date the property was originally placed in service by the person, the property is treated as originally placed in service by the taxpayer-lessor not earlier than the date on which the property is used by the lessee under the leaseback.

(B) *Syndication transaction and certain other transactions.* If qualified property is originally placed in service after September 10, 2001, or 50-percent bonus depreciation property is originally placed in service after May 5, 2003, by a lessor (including by operation of paragraph (b)(5)(ii)(A) of this section) and is sold by the lessor or any subsequent purchaser within three months after the date the property was originally placed in service by the lessor (or, in the case of multiple units of property subject to the same lease, within three months after the date the final unit is placed in service, so long as the period between the time the first unit is placed in service and the time the last unit is placed in service does not exceed 12 months), and the user of the property after the last sale during this three-month period remains the same as when the property was originally placed in service by the lessor, the property is treated as originally placed in service by the purchaser of the property in the last sale during the three-month period but not earlier than the date of the last sale.

(C) *Sale-leaseback transaction followed by a syndication transaction and certain other transactions.* If a sale-leaseback transaction that satisfies the requirements in paragraph (b)(5)(ii)(A) of this section is followed by a transaction that satisfies the requirements in paragraph (b)(5)(ii)(B) of this section, the placed-in-service date of the property is determined in accordance with paragraph (b)(5)(ii)(B) of this section.

(iii) *Technical termination of a partnership.* For purposes of this paragraph (b)(5), in the case of a technical termination of a partnership under section 708(b)(1)(B), qualified property or 50-percent bonus depreciation property placed in service by the terminated partnership during the taxable year of termination is treated as originally placed in service by the new partnership on the date the qualified property or the 50-percent bonus depreciation property is contributed by the terminated partnership to the new partnership.

(iv) *Section 168(i)(7) transactions.* For purposes of this paragraph (b)(5), if qualified property or 50-percent bonus depreciation property is transferred in a transaction described in section 168(i)(7) in the same taxable year that the qualified property or the 50-percent bonus depreciation property is placed in service by the transferor, the transferred property is treated as originally placed in service on the date the transferor placed in service the qualified property or the 50-percent bonus depreciation property, as applicable. In the case of multiple transfers of qualified property or 50-percent bonus depreciation property in multiple transactions described in section 168(i)(7) in the same taxable year, the placed in service date of the transferred property is deemed to be the date on which the first transferor placed in service the qualified property or the 50-percent bonus depreciation property, as applicable.

(v) *Example.* The application of this paragraph (b)(5) is illustrated by the following example:

Example. On September 15, 2004, QQ acquired and placed in service new equipment. This equipment is not described in section 168(k)(2)(B) or (C). On December 1, 2004, QQ sells the equipment to RR and leases the equipment back from RR in a sale-leaseback transaction. On February 15, 2005, RR sells the equipment to TT subject to the lease with QQ. As of February 15, 2005, QQ is still the user of the equipment. The sale-leaseback transaction of December 1, 2004, between QQ and RR satisfies the requirements of paragraph (b)(5)(ii)(A) of this section. The sale transaction of February 15, 2005, between RR and TT satisfies the requirements of paragraph (b)(5)(ii)(B) of this section. Consequently, pursuant to paragraph (b)(5)(ii)(C) of this section, the equipment is treated as originally placed in service by TT on February 15, 2005. Further, pursuant to paragraph (b)(3)(iii)(C) of this section, TT is considered the original user of the equipment. Accordingly, the equipment is not eligible for the additional first year depreciation deduction.

(c) *Qualified leasehold improvement property*—(1) *In general.* For purposes of section 168(k), qualified leasehold improvement property means any improvement, which is section 1250 property, to an interior portion of a building that is nonresidential real property if—

(i) The improvement is made under or pursuant to a lease by the lessee (or any sublessee) of the interior portion, or by the lessor of that interior portion;

(ii) The interior portion of the building is to be occupied exclusively by the lessee (or any sublessee) of that interior portion; and

(iii) The improvement is placed in service more than 3 years after the date the building was first placed in service by any person.

(2) *Certain improvements not included.* Qualified leasehold improvement property does not include any improvement for which the expenditure is attributable to:

(i) The enlargement of the building;

(ii) Any elevator or escalator;

(iii) Any structural component benefiting a common area; or

(iv) The internal structural framework of the building.

(3) *Definitions.* For purposes of this paragraph (c), the following definitions apply:

(i) *Building* has the same meaning as that term is defined in § 1.48–1(e)(1).

(ii) *Common area* means any portion of a building that is equally available to all users of the building on the same basis for uses that are incidental to the primary use of the building. For example, stairways, hallways, lobbies, common seating areas, interior and exterior pedestrian walkways and pedestrian bridges, loading docks and areas, and rest rooms generally are treated as common areas if they are used by different lessees of a building.

(iii) *Elevator* and *escalator* have the same meanings as those terms are defined in § 1.48–1(m)(2).

(iv) *Enlargement* has the same meaning as that term is defined in § 1.48–12(c)(10).

(v) *Internal structural framework* has the same meaning as that term is defined in § 1.48–12(b)(3)(i)(D)(iii).

(vi) *Lease* has the same meaning as that term is defined in section 168(h)(7). In addition, a commitment to enter into a lease is treated as a lease, and the parties to the commitment are treated as lessor and lessee. However, a lease between related persons is not considered a lease. For purposes of the preceding sentence, related persons are—

(A) Members of an affiliated group (as defined in section 1504 and the regulations thereunder); and

(B) Persons having a relationship described in section 267(b) and the regulations thereunder. For purposes of applying section 267(b), the language ''80 percent or more'' is used instead of ''more than 50 percent.''

(vii) *Nonresidential real property* has the same meaning as that term is defined in section 168(e)(2)(B).

(viii) *Structural component* has the same meaning as that term is defined in § 1.48–1(e)(2).

(d) *Computation of depreciation deduction for qualified property or 50-percent bonus depreciation property*—(1) *Additional first year depreciation deduction*—(i) *In general.* Except as provided in paragraph (f) of this section, the additional first year depreciation deduction is allowable in the first taxable year in which the qualified property or 50-percent bonus depreciation property is placed in service by the taxpayer for use in its trade or business or for the production of income. Except as provided in paragraph (f)(5) of this section, the allowable additional first year depreciation deduction for qualified property is determined by multiplying the unadjusted depreciable basis (as defined in § 1.168(k)–1(a)(2)(iii)) of the qualified property by 30 percent. Except as provided in paragraph (f)(5) of this section, the allowable additional first year depreciation deduction for 50-percent bonus depreciation property is determined by multiplying the unadjusted depreciable basis (as defined in § 1.168(k)–1(a)(2)(iii)) of the 50-percent bonus depreciation property by 50 percent. Except as provided in paragraph (f)(1) of this section, the 30-percent or 50-percent additional first year depreciation deduction is not affected by a taxable year of less than 12 months. See paragraph (f)(1) of this section for qualified property or 50-percent bonus depreciation property placed in service and disposed of in the same taxable year. See paragraph (f)(5) of this section for qualified property or 50-percent bonus depreciation property acquired in a like-kind exchange or as a result of an involuntary conversion.

(ii) *Property having a longer production period.* For purposes of paragraph (d)(1)(i) of this section, the unadjusted depreciable basis (as defined in § 1.168(k)–1(a)(2)(iii)) of qualified property or 50-percent bonus depreciation property described in section 168(k)(2)(B) is limited to the property's unadjusted depreciable basis attributable to the property's manufacture, construction, or production after September 10, 2001 (for qualified property), or May 5, 2003 (for 50-percent bonus depreciation property), and before January 1, 2005.

(iii) *Alternative minimum tax.* The 30-percent or 50-percent additional first year depreciation deduction is allowed for alternative minimum tax purposes for the taxable year in which the qualified property or the 50-percent bonus depreciation property is placed in service by the taxpayer. In general, the 30-percent or 50-percent additional first year depreciation deduction for alternative minimum tax purposes is based on the unadjusted depreciable basis of the property for alternative minimum tax purposes. However, see paragraph (f)(5)(iii)(D) of this section for qualified property or 50-percent bonus depreciation property acquired in a like-kind exchange or as a result of an involuntary conversion.

(2) *Otherwise allowable depreciation deduction*. (i) *In general*. Before determining the amount otherwise allowable as a depreciation deduction for the qualified property or the 50-percent bonus depreciation property for the placed-in-service year and any subsequent taxable year, the taxpayer must determine the remaining adjusted depreciable basis of the qualified property or the 50-percent bonus depreciation property. This remaining adjusted depreciable basis is equal to the unadjusted depreciable basis of the qualified property or the 50-percent bonus depreciation property reduced by the amount of the additional first year depreciation allowed or allowable, whichever is greater. The remaining adjusted depreciable basis of the qualified property or the 50-percent bonus depreciation property is then depreciated using the applicable depreciation provisions under the Internal Revenue Code for the qualified property or the 50-percent bonus depreciation property. The remaining adjusted depreciable basis of the qualified property or the 50-percent bonus depreciation property that is MACRS property is also the basis to which the annual depreciation rates in the optional depreciation tables apply (for further guidance, see section 8 of Rev. Proc. 87–57 (1987–2 C.B. 687) and § 601.601(d)(2)(ii)(*b*) of this chapter). The depreciation deduction allowable for the remaining adjusted depreciable basis of the qualified property or the 50-percent bonus depreciation property is affected by a taxable year of less than 12 months.

(ii) *Alternative minimum tax*. For alternative minimum tax purposes, the depreciation deduction allowable for the remaining adjusted depreciable basis of the qualified property or the 50-percent bonus depreciation property is based on the remaining adjusted depreciable basis for alternative minimum tax purposes. The remaining adjusted depreciable basis of the qualified property or the 50-percent bonus depreciable property for alternative minimum tax purposes is depreciated using the same depreciation method, recovery period (or useful life in the case of computer software), and convention that apply to the qualified property or the 50-percent bonus depreciation property for regular tax purposes.

(3) *Examples*. This paragraph (d) is illustrated by the following examples:

Example 1. On March 1, 2003, *V*, a calendar-year taxpayer, purchased and placed in service qualified property that costs $1 million and is 5-year property under section 168(e). *V* depreciates its 5-year property placed in service in 2003 using the optional depreciation table that corresponds with the general depreciation system, the 200-percent declining balance method, a 5-year recovery period, and the half-year convention. For 2003, *V* is allowed a 30-percent additional first year depreciation deduction of $300,000 (the unadjusted depreciable basis of $1 million multiplied by .30). Next, *V* must reduce the unadjusted depreciable basis of $1 million by the additional first year depreciation deduction of $300,000 to determine the remaining adjusted depreciable basis of $700,000. Then, *V*'s depreciation deduction allowable in 2003 for the remaining adjusted depreciable basis of $700,000 is $140,000 (the remaining adjusted depreciable basis of $700,000 multiplied by the annual depreciation rate of .20 for recovery year 1).

Example 2. On June 1, 2003, *W*, a calendar-year taxpayer, purchased and placed in service 50-percent bonus depreciation property that costs $126,000. The property qualifies for the expensing election under section 179 and is 5-year property under section 168(e). *W* did not purchase any other section 179 property in 2003. *W* makes the election under section 179 for the property and depreciates its 5-year property placed in service in 2003 using the optional depreciation table that corresponds with the general depreciation system, the 200-percent declining balance method, a 5-year recovery period, and the half-year convention. For 2003, *W* is first allowed a $100,000 deduction under section 179. Next, *W* must reduce the cost of $126,000 by the section 179 deduction of $100,000 to determine the unadjusted depreciable basis of $26,000. Then, for 2003, *W* is allowed a 50-percent additional first year depreciation deduction of $13,000 (the unadjusted depreciable basis of $26,000 multiplied by .50). Next, *W* must reduce the unadjusted depreciable basis of

$26,000 by the additional first year depreciation deduction of $13,000 to determine the remaining adjusted depreciable basis of $13,000. Then, *W*'s depreciation deduction allowable in 2003 for the remaining adjusted depreciable basis of $13,000 is $2,600 (the remaining adjusted depreciable basis of $13,000 multiplied by the annual depreciation rate of .20 for recovery year 1).

(e) *Election not to deduct additional first year depreciation*—(1) *In general.* If a taxpayer makes an election under this paragraph (e), the election applies to all qualified property or 50-percent bonus depreciation property, as applicable, that is in the same class of property and placed in service in the same taxable year. The rules of this paragraph (e) apply to the following elections provided under section 168(k):

(i) *Qualified property.* A taxpayer may make an election not to deduct the 30-percent additional first year depreciation for any class of property that is qualified property placed in service during the taxable year. If this election is made, no additional first year depreciation deduction is allowable for the property placed in service during the taxable year in the class of property.

(ii) *50-percent bonus depreciation property.* For any class of property that is 50-percent bonus depreciation property placed in service during the taxable year, a taxpayer may make an election—

(A) To deduct the 30-percent, instead of the 50-percent, additional first year depreciation. If this election is made, the allowable additional first year depreciation deduction is determined as though the class of property is qualified property under section 168(k)(2); or

(B) Not to deduct both the 30-percent and the 50-percent additional first year depreciation. If this election is made, no additional first year depreciation deduction is allowable for the class of property.

(2) *Definition of class of property.* For purposes of this paragraph (e), the term class of property means:

(i) Except for the property described in paragraphs (e)(2)(ii) and (iv) of this section, each class of property described in section 168(e) (for example, 5-year property);

(ii) Water utility property as defined in section 168(e)(5) and depreciated under section 168;

(iii) Computer software as defined in, and depreciated under, section 167(f)(1) and the regulations thereunder; or

(iv) Qualified leasehold improvement property as defined in paragraph (c) of this section and depreciated under section 168.

(3) *Time and manner for making election*—(i) *Time for making election.* Except as provided in paragraph (e)(4) of this section, any election specified in paragraph (e)(1) of this section must be made by the due date (including extensions) of the Federal tax return for the taxable year in which the qualified property or the 50-percent bonus depreciation property, as applicable, is placed in service by the taxpayer.

(ii) *Manner of making election.* Except as provided in paragraph (e)(4) of this section, any election specified in paragraph (e)(1) of this section must be made in the manner prescribed on Form 4562, ''Depreciation and Amortization,'' and its instructions. The election is made separately by each person owning qualified property or 50-percent bonus depreciation property (for example, for each member of a consolidated group by the common parent of the group, by the partnership, or by the S corporation). If Form 4562 is revised or renumbered, any reference in this section to that form shall be treated as a reference to the revised or renumbered form.

(4) *Special rules for 2000 or 2001 returns.* For the election specified in paragraph (e)(1)(i) of this section for qualified property placed in service by the taxpayer during the taxable year that included September 11, 2001, the taxpayer should refer to the guidance provided by the Internal Revenue Service for the time and manner of making this election on the 2000 or 2001 Federal tax return for the taxable year that included September 11, 2001 (for further guidance, *see* sections 3.03(3) and 4 of Rev. Proc. 2002–33 (2002–1 C.B. 963), Rev. Proc. 2003–50 (2003–29 I.R.B. 119), and § 601.601(d)(2)(ii)(*b*) of this chapter).

(5) *Failure to make election.* If a taxpayer does not make the applicable election specified in paragraph (e)(1) of this section within the time and in the manner prescribed in paragraph (e)(3) or (4) of this section, the amount of depreciation allowable for that property

under section 167(f)(1) or under section 168, as applicable, must be determined for the placed-in-service year and for all subsequent taxable years by taking into account the additional first year depreciation deduction. Thus, any election specified in paragraph (e)(1) of this section shall not be made by the taxpayer in any other manner (for example, the election cannot be made through a request under section 446(e) to change the taxpayer's method of accounting).

(6) *Alternative minimum tax.* If a taxpayer makes an election specified in paragraph (e)(1) of this section for a class of property, the depreciation adjustments under section 56 and the regulations under section 56 apply to the property to which that election applies for purposes of computing the taxpayer's alternative minimum taxable income.

(7) *Revocation of election*—(i) *In general.* Except as provided in paragraph (e)(7)(ii) of this section, an election specified in paragraph (e)(1) of this section, once made, may be revoked only with the written consent of the Commissioner of Internal Revenue. To seek the Commissioner's consent, the taxpayer must submit a request for a letter ruling.

(ii) *Automatic 6-month extension.* If a taxpayer made an election specified in paragraph (e)(1) of this section for a class of property, an automatic extension of 6 months from the due date of the taxpayer's Federal tax return (excluding extensions) for the placed-in-service year of the class of property is granted to revoke that election, provided the taxpayer timely filed the taxpayer's Federal tax return for the placed-in-service year of the class of property and, within this 6-month extension period, the taxpayer (and all taxpayers whose tax liability would be affected by the election) files an amended Federal tax return for the placed-in-service year of the class of property in a manner that is consistent with the revocation of the election.

(f) *Special rules*—(1) *Property placed in service and disposed of in the same taxable year*—(i) *In general.* Except as provided in paragraphs (f)(1)(ii) and (iii) of this section, the additional first year depreciation deduction is not allowed for qualified property or 50-percent bonus depreciation property placed in service and disposed of during the same taxable year. Also if qualified property or 50-percent bonus depreciation property is placed in service and disposed of during the same taxable year and then reacquired and again placed in service in a subsequent taxable year, the additional first year depreciation deduction is not allowable for the property in the subsequent taxable year.

(ii) *Technical termination of a partnership.* In the case of a technical termination of a partnership under section 708(b)(1)(B), the additional first year depreciation deduction is allowable for any qualified property or 50-percent bonus depreciation property placed in service by the terminated partnership during the taxable year of termination and contributed by the terminated partnership to the new partnership. The allowable additional first year depreciation deduction for the qualified property or the 50-percent bonus depreciation property shall not be claimed by the terminated partnership but instead shall be claimed by the new partnership for the new partnership's taxable year in which the qualified property or the 50-percent bonus depreciation property was contributed by the terminated partnership to the new partnership. However, if qualified property or 50-percent bonus depreciation property is both placed in service and contributed to a new partnership in a transaction described in section 708(b)(1)(B) by the terminated partnership during the taxable year of termination, and if such property is disposed of by the new partnership in the same taxable year the new partnership received such property from the terminated partnership, then no additional first year depreciation deduction is allowable to either partnership.

(iii) *Section 168(i)(7) transactions.* If any qualified property or 50-percent bonus depreciation property is transferred in a transaction described in section 168(i)(7) in the same taxable year that the qualified property or the 50-percent bonus depreciation property is placed in service by the transferor, the additional first year depreciation deduction is allowable for the qualified property or the 50-percent bonus depreciation property. The allowable additional first year depreciation deduction for the qualified property or the 50-percent bonus depreciation property for the transferor's taxable year in which the property is placed in service is allocated between the transferor and the transferee on a monthly basis. This allocation shall be made in accordance with the rules in §1.168(d)–1(b)(7)(ii) for allocating the depreciation deduction between the transferor and the transferee. However, if qualified property or 50-percent bonus depreciation property is both placed in service and transferred in a transaction described in section 168(i)(7) by the transferor during the same taxable year, and if such property is disposed of by the transferee (other than by a transaction described in section 168(i)(7)) during the same taxable year the transferee received such property from the transferor, then no additional first year depreciation deduction is allowable to either party.

(iv) *Examples.* The application of this paragraph (f)(1) is illustrated by the following examples:

Example 1. X and *Y* are equal partners in *Partnership XY,* a general partnership. On February 1, 2002, *Partnership XY* purchased and placed in service new equipment at a cost of $30,000. On March 1, 2002, *X* sells its entire 50 percent interest to *Z* in a transfer that terminates the partnership under section 708(b)(1)(B). As a result, terminated *Partnership XY* is deemed to have contributed the equipment to new *Partnership XY.* Pursuant to paragraph (f)(1)(ii) of this section, new *Partnership XY,* not terminated *Partnership XY,* is eligible to claim the 30-percent additional first year depreciation deduction allowable for the equipment for the taxable year 2002 (assuming all other requirements are met).

Example 2. On January 5, 2002, *BB* purchased and placed in service new office desks for a total amount of $8,000. On August 20, 2002, *BB* transferred the office desks to *Partnership BC* in a transaction described in section 721. *BB* and *Partnership BC* are calendar-year taxpayers. Because the transaction between *BB* and *Partnership BC* is a transaction described in section 168(i)(7), pursuant to paragraph (f)(1)(iii) of this section the 30-percent additional first year depreciation deduction allowable for the desks is allocated between *BB* and *Partnership BC* in accordance with the rules in §1.168(d)–1(b)(7)(ii) for allocating the depreciation deduction between the transferor and the transferee. Accordingly, the 30-percent additional first year depreciation deduction allowable for the desks for 2002 of $2,400 (the unadjusted depreciable basis of $8,000 multiplied by .30) is allocated between *BB* and *Partnership BC* based on the number of months that *BB* and *Partnership BC* held the desks in service. Thus, because the desks were held in service by *BB* for 7 of 12 months, which includes the month in which *BB* placed the desks in service but does not include the month in which the desks were transferred, *BB* is allocated $1,400 ($\frac{7}{12} \times$ $2,400 additional first year depreciation deduction). *Partnership BC* is allocated $1,000, the remaining $\frac{5}{12}$ of the $2,400 additional first year depreciation deduction allowable for the desks.

(2) *Redetermination of basis.* If the unadjusted depreciable basis (as defined in §1.168(k)–1(a)(2)(iii)) of qualified property or 50-percent bonus depreciation property is redetermined (for example, due to contingent purchase price or discharge of indebtedness) before January 1, 2005, or, in the case of property described in section 168(k)(2)(B) or (C), is redetermined before January 1, 2006 (or redetermined before January 1, 2007, in the case of property described in section 168(k)(2)(B) or (C) to which section 105 of the Gulf Opportunity Zone Act of 2005 (Pub. L. 109–135, 119 Stat. 2577) applies (for further guidance, see Announcement 2006–29 (2006–19 I.R.B. 879) and §601.601(d)(2)(ii)(*b*) of this chapter)), the additional first year depreciation deduction allowable for the qualified property or the 50-percent bonus depreciation property is redetermined as follows:

(i) *Increase in basis.* For the taxable year in which an increase in basis of qualified property or 50-percent bonus depreciation property occurs, the taxpayer shall claim an additional first year depreciation deduction for qualified property by multiplying the amount of the increase in basis for this property by 30 percent or, for 50-percent bonus depreciation property, by multiplying the amount of the increase in basis for this property by 50 percent. For purposes of this paragraph (f)(2)(i), the 30-percent additional first year depreciation deduction applies to the increase in basis if the underlying property is qualified property and the 50-percent additional first year depreciation deduction applies to the increase in basis if the underlying property is 50-percent bonus depreciation property. To determine the amount otherwise allowable as a depreciation deduction for the increase in basis of qualified property or 50-percent bonus depreciation property, the amount of the increase in basis of the qualified property or the 50-percent bonus depreciation property must be reduced by the additional first year depreciation deduction allowed or allowable, whichever is greater, for the increase in basis and the remaining increase in basis of—

(A) Qualified property or 50-percent bonus depreciation property (except for computer software described in paragraph (b)(2)(i)(B) of this section) is depreciated over the recovery period of the qualified property or the 50-percent bonus depreciation property, as applicable, remaining as of the beginning of the taxable year in which the increase in basis occurs, and using the same depreciation method and convention applicable to the qualified property or 50-percent bonus depreciation property, as applicable, that applies for the taxable year in which the increase in basis occurs; and

(B) Computer software (as defined in paragraph (b)(2)(i)(B) of this section) that is qualified property or 50-percent bonus depreciation property is depreciated ratably over the remainder of the 36-month period (the useful life under section 167(f)(1)) as of the beginning of the first day of the month in which the increase in basis occurs.

(ii) *Decrease in basis.* For the taxable year in which a decrease in basis of qualified property or 50-percent bonus depreciation property occurs, the taxpayer shall reduce the total amount otherwise allowable as a depreciation deduction for all of the taxpayer's depreciable property by the excess additional first year depreciation deduction previously claimed for the qualified property or the 50-percent bonus depreciation property. If, for such taxable year, the excess additional first year depreciation deduction exceeds the total amount otherwise allowable as a depreciation deduction for all of the taxpayer's depreciable property, the taxpayer shall take into account a negative depreciation deduction in computing taxable income. The excess additional first year depreciation deduction for qualified property is determined by multiplying the amount of the decrease in basis for this property by 30 percent. The excess additional first year depreciation deduction for 50-percent bonus depreciation property is determined by multiplying the amount of the decrease in basis for this property by 50 percent. For purposes of this paragraph (f)(2)(ii), the 30-percent additional first year depreciation deduction applies to the decrease in basis if the underlying property is qualified property and the 50-percent additional first year depreciation deduction applies to the decrease in basis if the underlying property is 50-percent bonus depreciation property. Also, if the taxpayer establishes by adequate records or other sufficient evidence that the taxpayer claimed less than the additional first year depreciation deduction allowable for the qualified property or the 50-percent bonus depreciation property before the decrease in basis or if the taxpayer claimed more than the additional first year depreciation deduction allowable for the qualified property or the 50-percent bonus depreciation property before the decrease in basis, the excess additional first year depreciation deduction is determined by multiplying the amount of the decrease in basis by the additional first year depreciation deduction percentage actually claimed by the taxpayer for the qualified property or the 50-percent bonus depreciation property, as applicable, before the decrease in basis. To determine the amount to reduce the total amount otherwise allowable as a depreciation deduction for all of the taxpayer's depreciable property for the excess depreciation previously claimed (other than the additional first year depreciation deduction) resulting from the decrease in basis of the qualified property or the 50-percent bonus depreciation property, the amount of the decrease in basis of the qualified property or the 50-percent bonus depreciation property must be adjusted by the excess additional first year depreciation deduction that reduced the total amount otherwise allowable as a depreciation deduction (as determined under this paragraph) and the remaining decrease in basis of—

(A) Qualified property or 50-percent bonus depreciation property (except for computer software described in paragraph (b)(2)(i)(B) of this section) reduces the amount otherwise allowable as a depreciation deduction over the recovery period of the qualified property or the 50-percent bonus depreciation property, as applicable, remaining as of the beginning of the taxable year in which the decrease in basis occurs, and using the same depreciation method and convention of the qualified property or 50-percent bonus depreciation property, as applicable, that applies in the taxable year in which the decrease in basis occurs. If, for any taxable year, the reduction to the amount otherwise allowable as a depreciation deduction (as determined under this paragraph (f)(2)(ii)(A)) exceeds the total amount otherwise allowable as a depreciation deduction for all of the taxpayer's depreciable property, the taxpayer shall take into account a negative depreciation deduction in computing taxable income; and

(B) Computer software (as defined in paragraph (b)(2)(i)(B) of this section) that is qualified property or 50-percent bonus depreciation property reduces the amount otherwise allowable as a depreciation deduction over the remainder of the 36-month period (the useful life under section 167(f)(1)) as of the beginning of the first day of the month in which the decrease in basis occurs. If, for any taxable year, the reduction to the amount otherwise allowable as a depreciation deduction (as determined under this paragraph (f)(2)(ii)(B)) exceeds the total amount otherwise allowable as a depreciation deduction for all of the taxpayer's depreciable property, the taxpayer shall take into account a negative depreciation deduction in computing taxable income.

(iii) *Definition*. Except as otherwise expressly provided by the Internal Revenue Code (for example, section 1017(a)), the regulations under the Internal Revenue Code, or other guidance published in the Internal Revenue Bulletin (see §601.601(d)(2)(ii)(*b*) of this chapter), for purposes of this paragraph (f)(2):

(A) An increase in basis occurs in the taxable year an amount is taken into account under section 461; and

(B) A decrease in basis occurs in the taxable year an amount would be taken into account under section 451.

(iv) *Examples*. The application of this paragraph (f)(2) is illustrated by the following examples:

Example 1. (i) On May 15, 2002, *CC*, a cash-basis taxpayer, purchased and placed in service qualified property that is 5-year property at a cost of $200,000. In addition to the $200,000, *CC* agrees to pay the seller 25 percent of the gross profits from the operation of the property in 2002. On May 15, 2003, *CC* paid to the seller an additional $10,000. *CC* depreciates the 5-year property placed in service in 2002 using the optional depreciation table that corresponds with the general depreciation system, the 200-percent declining balance method, a 5-year recovery period, and the half-year convention.

(ii) For 2002, *CC* is allowed a 30-percent additional first year depreciation deduction of $60,000 (the unadjusted depreciable basis of $200,000 multiplied by .30). In addition, *CC*'s depreciation deduction for 2002 for the remaining adjusted depreciable basis of $140,000 (the unadjusted depreciable basis of $200,000 reduced by the additional first year depreciation deduction of $60,000) is $28,000 (the remaining adjusted depreciable basis of $140,000 multiplied by the annual depreciation rate of .20 for recovery year 1).

(iii) For 2003, *CC*'s depreciation deduction for the remaining adjusted depreciable basis of $140,000 is $44,800 (the remaining adjusted depreciable basis of $140,000 multiplied by the annual depreciation rate of .32 for recovery year 2). In addition, pursuant to paragraph (f)(2)(i) of this section, *CC* is allowed an additional first year depreciation deduction for 2003 for the $10,000 increase in basis of the qualified property. Consequently, *CC* is allowed an additional first year depreciation deduction of $3,000 (the increase in basis of $10,000 multiplied by .30). Also, *CC* is allowed a depreciation deduction for 2003 attributable to the remaining increase in basis of $7,000 (the increase in basis of $10,000 reduced by the additional first year depreciation deduction of $3,000). The depreciation deduction allowable for 2003 attributable to the remaining increase in basis of $7,000 is $3,111 (the remaining increase in basis of $7,000 multiplied by .4444, which is equal to 1/remaining recovery period of 4.5 years at January 1, 2003, multiplied by 2). Accordingly, for 2003, *CC*'s total depreciation deduction allowable for the qualified property is $50,911.

Example 2. (i) On May 15, 2002, DD, a calendar-year taxpayer, purchased and placed in service qualified property that is 5-year property at a cost of $400,000. To purchase the property, DD borrowed $250,000 from Bank2. On May 15, 2003, Bank2 forgives $50,000 of the indebtedness. DD makes the election provided in section 108(b)(5) to apply any portion of the reduction under section 1017 to the basis of the depreciable property of the taxpayer. DD depreciates the 5-year property placed in service in 2002 using the optional depreciation table that corresponds with the general depreciation system, the 200-percent declining balance method, a 5-year recovery period, and the half-year convention.

(ii) For 2002, DD is allowed a 30-percent additional first year depreciation deduction of $120,000 (the unadjusted depreciable basis of $400,000 multiplied by .30). In addition, DD's depreciation deduction allowable for 2002 for the remaining adjusted depreciable basis of $280,000 (the unadjusted depreciable basis of $400,000 reduced by the additional first year depreciation deduction of $120,000) is $56,000 (the remaining adjusted depreciable basis of $280,000 multiplied by the annual depreciation rate of .20 for recovery year 1).

(iii) For 2003, DD's deduction for the remaining adjusted depreciable basis of $280,000 is $89,600 (the remaining adjusted depreciable basis of $280,000 multiplied by the annual depreciation rate .32 for recovery year 2). Although Bank2 forgave the indebtedness in 2003, the basis of the property is reduced on January 1, 2004, pursuant to sections 108(b)(5) and 1017(a) under which basis is reduced at the beginning of the taxable year following the taxable year in which the discharge of indebtedness occurs.

(iv) For 2004, DD's deduction for the remaining adjusted depreciable basis of $280,000 is $53,760 (the remaining adjusted depreciable basis of $280,000 multiplied by the annual depreciation rate .192 for recovery year 3). However, pursuant to paragraph (f)(2)(ii) of this section, DD must reduce the amount otherwise allowable as a depreciation deduction for 2004 by the excess depreciation previously claimed for the $50,000 decrease in basis of the qualified property. Consequently, DD must reduce the amount of depreciation otherwise allowable for 2004 by the excess additional first year depreciation of $15,000 (the decrease in basis of $50,000 multiplied by .30). Also, DD must reduce the amount of depreciation otherwise allowable for 2004 by the excess depreciation attributable to the remaining decrease in basis of $35,000 (the decrease in basis of $50,000 reduced by the excess additional first year depreciation of $15,000). The reduction in the amount of depreciation otherwise allowable for 2004 for the remaining decrease in basis of $35,000 is $19,999 (the remaining decrease in basis of $35,000 multiplied by .5714, which is equal to 1/remaining recovery period of 3.5 years at January 1, 2004, multiplied by 2). Accordingly, assuming the qualified property is the only depreciable property owned by DD, for 2004, DD's total depreciation deduction allowable for the qualified property is $18,761 ($53,760 minus $15,000 minus $19,999).

(3) *Section 1245 and 1250 depreciation recapture*. For purposes of section 1245 and the regulations thereunder, the additional first year depreciation deduction is an amount allowed or allowable for depreciation. Further, for purposes of section 1250(b) and the regulations thereunder, the additional first year depreciation deduction is not a straight line method.

(4) *Coordination with section 169*. The additional first year depreciation deduction is allowable in the placed-in-service year of a certified pollution control facility (as defined in §1.169–2(a)) that is qualified property or 50-percent bonus depreciation property, even if the taxpayer makes the election to amortize the certified pollution control facility under section 169 and the regulations thereunder in the certified pollution control facility's placed-in-service year.

(5) *Like-kind exchanges and involuntary conversions*—(i) *Scope*. The rules of this paragraph (f)(5) apply to acquired MACRS property or acquired computer software that is qualified property or 50-percent bonus depreciation property at the time of replacement provided the time of replacement is after September 10, 2001, and before January 1, 2005, or, in the case of acquired MACRS property or acquired computer software that is qualified property, or 50-percent bonus depreciation property, described in section 168(k)(2)(B) or (C), the time of replacement is after September 10, 2001, and before January 1, 2006 (or the time of replacement is after September 10, 2001, and before January 1, 2007, in the case of property described in section 168(k)(2)(B) or (C) to which section 105 of the Gulf Opportunity Zone Act of 2005 (Pub. L. 109–135, 119 Stat. 2577) applies (for further guidance, see Announcement 2006–29 (2006–19 I.R.B. 879) and §601.601(d)(2)(ii)(*b*) of this chapter)).

(ii) *Definitions*. For purposes of this paragraph (f)(5), the following definitions apply:

(A) *Acquired MACRS property* is MACRS property in the hands of the acquiring taxpayer that is acquired in a transaction described in section

1031(a), (b), or (c) for other MACRS property or that is acquired in connection with an involuntary conversion of other MACRS property in a transaction to which section 1033 applies.

(B) *Exchanged or involuntarily converted MACRS property* is MACRS property that is transferred by the taxpayer in a transaction described in section 1031(a), (b), or (c), or that is converted as a result of an involuntary conversion to which section 1033 applies.

(C) *Acquired computer software* is computer software (as defined in paragraph (b)(2)(i)(B) of this section) in the hands of the acquiring taxpayer that is acquired in a like-kind exchange under section 1031 or as a result of an involuntary conversion under section 1033.

(D) *Exchanged or involuntarily converted computer software* is computer software (as defined in paragraph (b)(2)(i)(B) of this section) that is transferred by the taxpayer in a like-kind exchange under section 1031 or that is converted as a result of an involuntary conversion under section 1033.

(E) *Time of disposition* is when the disposition of the exchanged or involuntarily converted MACRS property or the exchanged or involuntarily converted computer software, as applicable, takes place.

(F) Except as provided in paragraph (f)(5)(v) of this section, the *time of replacement* is the later of—

(*1*) When the acquired MACRS property or acquired computer software is placed in service; or

(*2*) The time of disposition of the exchanged or involuntarily converted property.

(G) *Carryover basis* is the lesser of:

(*1*) The basis in the acquired MACRS property or acquired computer software, as applicable and as determined under section 1031(d) or 1033(b) and the regulations thereunder; or

(*2*) The adjusted depreciable basis of the exchanged or involuntarily converted MACRS property or the exchanged or involuntarily converted computer software, as applicable.

(H) *Excess basis* is any excess of the basis in the acquired MACRS property or acquired computer software, as applicable and as determined under section 1031(d) or 1033(b) and the regulations thereunder, over the carryover basis as determined under paragraph (f)(5)(ii)(G) of this section.

(I) *Remaining carryover basis* is the carryover basis as determined under paragraph (f)(5)(ii)(G) of this section reduced by—

(*1*) The percentage of the taxpayer's use of property for the taxable year other than in the taxpayer's trade or business (or for the production of income); and

(*2*) Any adjustments to basis provided by other provisions of the Code and the regulations thereunder (including section 1016(a)(2) and (3)) for periods prior to the disposition of the exchanged or involuntarily converted property.

(J) *Remaining excess basis* is the excess basis as determined under paragraph (f)(5)(ii)(H) of this section reduced by—

(*1*) The percentage of the taxpayer's use of property for the taxable year other than in the taxpayer's trade or business (or for the production of income);

(*2*) Any portion of the basis the taxpayer properly elects to treat as an expense under section 179 or section 179C;

(*3*) Any adjustments to basis provided by other provisions of the Code and the regulations thereunder.

(K) *Year of disposition* is the taxable year that includes the time of disposition.

(L) *Year of replacement* is the taxable year that includes the time of replacement.

(iii) *Computation*—(A) *In general.* Assuming all other requirements of section 168(k) and this section are met, the remaining carryover basis for the year of replacement and the remaining excess basis, if any, for the year of replacement for the acquired MACRS property or the acquired computer software, as applicable, are eligible for the additional first year depreciation deduction. The 30-percent additional first year depreciation deduction applies to the remaining carryover basis and the remaining excess basis, if any, of the acquired MACRS property or the acquired computer software if the time of replacement is after September 10, 2001, and before May 6, 2003, or if the taxpayer made the election provided in paragraph (e)(1)(ii)(A) of this section. The 50-percent additional first year depreciation deduction applies to the remaining carryover basis and the remaining excess basis, if any, of the acquired MACRS property or the acquired computer software if the time of replacement is after May 5, 2003, and before January 1, 2005, or, in the case of acquired MACRS property or acquired computer software that is 50-percent bonus depreciation property described in section 168(k)(2)(B) or (C), the time of replacement is after May 5, 2003, and before January 1, 2006 (or the time of replacement is after May 5, 2003, and before January 1, 2007, in the case of 50-percent bonus depreciation property described in section 168(k)(2)(B) or (C) to which section 105 of the Gulf Opportunity Zone Act of 2005 (Pub. L. 109–135, 119 Stat. 2577) applies (for further guidance, see Announcement 2006–29 (2006–19 I.R.B. 879) and § 601.601(d)(2)(ii)(*b*) of this chapter)). The additional first year depreciation deduction is computed separately for the remaining carryover basis and the remaining excess basis.

(B) *Year of disposition and year of replacement.* The additional first year depreciation deduction is allowable for the acquired MACRS property or acquired computer software in the year of replacement. However, the additional first year depreciation deduction is not allowable for the exchanged or involuntarily converted MACRS property or the exchanged or involuntarily converted computer software if the exchanged or involuntarily converted MACRS property or the exchanged or involuntarily converted computer software, as applicable, is placed in service and disposed of in an exchange or involuntary conversion in the same taxable year.

(C) *Property having a longer production period.* For purposes of paragraph (f)(5)(iii)(A) of this section, the total of the remaining carryover basis and the remaining excess basis, if any, of the acquired MACRS property that is qualified property or 50-percent bonus depreciation property described in section 168(k)(2)(B) is limited to the total of the property's remaining carryover basis and remaining excess basis, if any, attributable to the property's manufacture, construction, or production after September 10, 2001 (for qualified property), or May 5, 2003 (for 50-percent bonus depreciation property), and before January 1, 2005.

(D) *Alternative minimum tax.* The 30-percent or 50-percent additional first year depreciation deduction is allowed for alternative minimum tax purposes for the year of replacement of acquired MACRS property or acquired computer software that is qualified property or 50-percent bonus depreciation property. The 30-percent or 50-percent additional first year depreciation deduction for alternative minimum tax purposes is based on the remaining carryover basis and the remaining excess basis, if any, of the acquired MACRS property or the acquired computer software for alternative minimum tax purposes.

(iv) *Sale-leaseback transaction.* For purposes of this paragraph (f)(5), if MACRS property or computer software is sold to a taxpayer and leased back to a person by the taxpayer within three months after the time of disposition of the MACRS property or computer software, as applicable, the time of replacement for this MACRS property or computer software, as applicable, shall not be earlier than the date on which the MACRS property or computer software, as applicable, is used by the lessee under the leaseback.

(v) *Acquired MACRS property or acquired computer software that is acquired and placed in service before disposition of involuntarily converted MACRS property or involuntarily converted computer software.* If, in an involuntary conversion, a taxpayer acquires and places in service the acquired MACRS property or the acquired computer software before the time of disposition of the involuntarily converted MACRS property or the involuntarily converted computer software and the time of disposition of the involuntarily converted MACRS property or the involuntarily converted computer software is after December 31, 2004, or, in the case of property described in section 168(k)(2)(B) or (C), after December 31, 2005 (or after December 31, 2006, in the case of property described in section 168(k)(2)(B) or (C) to which section 105 of the Gulf Opportunity Zone Act of 2005 (Pub. L. 109–135, 119 Stat. 2577) applies (for further guidance, see Announcement 2006–29

(2006–19 I.R.B. 879) and §601.601(d)(2)(ii)(*b*) of this chapter)), then—

(A) *Time of replacement.* The time of replacement for purposes of this paragraph (f)(5) is when the acquired MACRS property or acquired computer software is placed in service by the taxpayer, provided the threat or imminence of requisition or condemnation of the involuntarily converted MACRS property or involuntarily converted computer software existed before January 1, 2005, or, in the case of property described in section 168(k)(2)(B) or (C), existed before January 1, 2006 (or existed before January 1, 2007, in the case of property described in section 168(k)(2)(B) or (C) to which section 105 of the Gulf Opportunity Zone Act of 2005 (Pub. L. 109–135, 119 Stat. 2577) applies (for further guidance, see Announcement 2006–29 (2006–19 I.R.B. 879) and §601.601(d)(2)(ii)(*b*) of this chapter)); and

(B) *Depreciation of acquired MACRS property or acquired computer software.* The taxpayer depreciates the acquired MACRS property or acquired computer software in accordance with paragraph (d) of this section. However, at the time of disposition of the involuntarily converted MACRS property, the taxpayer determines the exchanged basis (as defined in §1.168(i)–6(b)(7)) and the excess basis (as defined in §1.168(i)–6(b)(8)) of the acquired MACRS property and begins to depreciate the depreciable exchanged basis (as defined in §1.168(i)–6(b)(9) of the acquired MACRS property in accordance with §1.168(i)–6(c). The depreciable excess basis (as defined in §1.168(i)–6(b)(10)) of the acquired MACRS property continues to be depreciated by the taxpayer in accordance with the first sentence of this paragraph (f)(5)(v)(B). Further, in the year of disposition of the involuntarily converted MACRS property, the taxpayer must include in taxable income the excess of the depreciation deductions allowable, including the additional first year depreciation deduction allowable, on the unadjusted depreciable basis of the acquired MACRS property over the additional first year depreciation deduction that would have been allowable to the taxpayer on the remaining carryover basis of the acquired MACRS property at the time of replacement (as defined in paragraph (f)(5)(v)(A) of this section) plus the depreciation deductions that would have been allowable, including the additional first year depreciation deduction allowable, to the taxpayer on the depreciable excess basis of the acquired MACRS property from the date the acquired MACRS property was placed in service by the taxpayer (taking into account the applicable convention) to the time of disposition of the involuntarily converted MACRS property. Similar rules apply to acquired computer software.

(vi) *Examples.* The application of this paragraph (f)(5) is illustrated by the following examples:

Example 1. (i) In December 2002, EE, a calendar-year corporation, acquired for $200,000 and placed in service Canopy V1, a gas station canopy. Canopy V1 is qualified property under section 168(k)(1) and is 5-year property under section 168(e). EE depreciated Canopy V1 under the general depreciation system of section 168(a) by using the 200-percent declining balance method of depreciation, a 5-year recovery period, and the half-year convention. EE elected to use the optional depreciation tables to compute the depreciation allowance for Canopy V1. On January 1, 2003, Canopy V1 was destroyed in a fire and was no longer usable in EE's business. On June 1, 2003, in an involuntary conversion, EE acquired and placed in service new Canopy W1 with all of the $160,000 of insurance proceeds EE received due to the loss of Canopy V1. Canopy W1 is 50-percent bonus depreciation property under section 168(k)(4) and is 5-year property under section 168(e). Pursuant to paragraph (g)(3)(ii) of this section and §1.168(i)–6(k)(2)(i), EE decided to apply §1.168(i)–6 to the involuntary conversion of Canopy V1 with the replacement of Canopy W1, the acquired MACRS property.

(ii) For 2002, EE is allowed a 30-percent additional first year depreciation deduction of $60,000 for Canopy V1 (the unadjusted depreciable basis of $200,000 multiplied by .30), and a regular MACRS depreciation deduction of $28,000 for Canopy V1 (the remaining adjusted depreciable basis of $140,000 multiplied by the annual depreciation rate of .20 for recovery year 1).

(iii) For 2003, EE is allowed a regular MACRS depreciation deduction of $22,400 for Canopy V1 (the remaining adjusted depreciable basis of $140,000 multiplied by the annual depreciation rate of .32 for recovery year $2 \times \frac{1}{2}$ year).

(iv) Pursuant to paragraph (f)(5)(iii)(A) of this section, the additional first year depreciation deduction allowable for Canopy W1 equals $44,800 (.50 of Canopy W1's remaining carryover basis at the time of replacement of $89,600 (Canopy V1's remaining adjusted depreciable basis of $140,000 minus 2002 regular MACRS depreciation deduction of $28,000 minus 2003 regular MACRS depreciation deduction of $22,400)).

Example 2. (i) Same facts as in *Example 1*, except EE elected not to deduct the additional first year depreciation for 5-year property placed in service in 2002. EE deducted the additional first year depreciation for 5-year property placed in service in 2003.

(ii) For 2002, EE is allowed a regular MACRS depreciation deduction of $40,000 for Canopy V1 (the unadjusted depreciable basis of $200,000 multiplied by the annual depreciation rate of .20 for recovery year 1).

(iii) For 2003, EE is allowed a regular MACRS depreciation deduction of $32,000 for Canopy V1 (the unadjusted depreciable basis of $200,000 multiplied by the annual depreciation rate of .32 for recovery year 2 × ½ year).

(iv) Pursuant to paragraph (f)(5)(iii)(A) of this section, the additional first year depreciation deduction allowable for Canopy W1 equals $64,000 (.50 of Canopy W1's remaining carryover basis at the time of replacement of $128,000 (Canopy V1's unadjusted depreciable basis of $200,000 minus 2002 regular MACRS depreciation deduction of $40,000 minus 2003 regular MACRS depreciation deduction of $32,000)).

Example 3. (i) In December 2001, FF, a calendar-year corporation, acquired for $10,000 and placed in service Computer X2. Computer X2 is qualified property under section 168(k)(1) and is 5-year property under section 168(e). FF depreciated Computer X2 under the general depreciation system of section 168(a) by using the 200-percent declining balance method of depreciation, a 5-year recovery period, and the half-year convention. FF elected to use the optional depreciation tables to compute the depreciation allowance for Computer X2. On January 1, 2002, FF acquired new Computer Y2 by exchanging Computer X2 and $1,000 cash in a like-kind exchange. Computer Y2 is qualified property under section 168(k)(1) and is 5-year property under section 168(e). Pursuant to paragraph (g)(3)(ii) of this section and §1.168(i)–6(k)(2)(i), FF decided to apply §1.168(i)–6 to the exchange of Computer X2 for Computer Y2, the acquired MACRS property.

(ii) For 2001, FF is allowed a 30-percent additional first year depreciation deduction of $3,000 for Computer X2 (unadjusted basis of $10,000 multiplied by .30), and a regular MACRS depreciation deduction of $1,400 for Computer X2 (the remaining adjusted depreciable basis of $7,000 multiplied by the annual depreciation rate of .20 for recovery year 1).

(iii) For 2002, FF is allowed a regular MACRS depreciation deduction of $1,120 for Computer X2 (the remaining adjusted depreciable basis of $7,000 multiplied by the annual depreciation rate of .32 for recovery year 2 × ½ year).

(iv) Pursuant to paragraph (f)(5)(iii)(A) of this section, the 30-percent additional first year depreciation deduction for Computer Y2 is allowable for the remaining carryover basis at the time of replacement of $4,480 (Computer X2's unadjusted depreciable basis of $10,000 minus additional first year depreciation deduction allowable of $3,000 minus 2001 regular MACRS depreciation deduction of $1,400 minus 2002 regular MACRS depreciation deduction of $1,120) and for the remaining excess basis at the time of replacement of $1,000 (cash paid for Computer Y2). Thus, the 30-percent additional first year depreciation deduction for the remaining carryover basis at the time of replacement equals $1,344 ($4,480 multiplied by .30) and for the remaining excess basis at the time of replacement equals $300 ($1,000 multiplied by .30), which totals $1,644.

Example 4. (i) In September 2002, GG, a June 30 year-end corporation, acquired for $20,000 and placed in service Equipment X3. Equipment X3 is qualified property under section 168(k)(1) and is 5-year property under section 168(e). GG depreciated Equipment X3 under the general depreciation system of section 168(a) by using the 200-percent declining balance method of depreciation, a 5-year recovery period, and the half-year convention. GG elected to use the optional depreciation tables to compute the depreciation allowance for Equipment X3. In December 2002, GG acquired new Equipment Y3 by exchanging Equipment X3 and $5,000 cash in a like-kind exchange. Equipment Y3 is qualified property under section 168(k)(1) and is 5-year property under section 168(e). Pursuant to paragraph (g)(3)(ii) of this section and §1.168(i)–6(k)(2)(i), GG decided to apply §1.168(i)–6 to the exchange of Equipment X3 for Equipment Y3, the acquired MACRS property.

(ii) Pursuant to paragraph (f)(5)(iii)(B) of this section, no additional first year depreciation deduction is allowable for Equipment X3 and, pursuant to §1.168(d)–1T(b)(3)(ii), no regular depreciation deduction is allowable for Equipment X3, for the taxable year ended June 30, 2003.

(iii) Pursuant to paragraph (f)(5)(iii)(A) of this section, the 30-percent additional first year depreciation deduction for Equipment Y3 is allowable for the remaining carryover basis at the time of replacement of $20,000 (Equipment X3's unadjusted depreciable basis of $20,000) and for the remaining excess basis at the time of replacement of $5,000 (cash paid for Equipment Y3). Thus, the 30-percent additional first year depreciation deduction for the remaining carryover basis at the time of replacement equals $6,000 ($20,000 multiplied by .30) and for the remaining excess basis at the time of replacement equals

$1,500 ($5,000 multiplied by .30), which totals $7,500.

Example 5. (i) Same facts as in *Example 4*. GG depreciated Equipment Y3 under the general depreciation system of section 168(a) by using the 200-percent declining balance method of depreciation, a 5-year recovery period, and the half-year convention. GG elected to use the optional depreciation tables to compute the depreciation allowance for Equipment Y3. On July 1, 2003, GG acquired new Equipment Z1 by exchanging Equipment Y3 in a like-kind exchange. Equipment Z1 is 50-percent bonus depreciation property under section 168(k)(4) and is 5-year property under section 168(e). Pursuant to paragraph (g)(3)(ii) of this section and §1.168(i)–6(k)(2)(i), GG decided to apply §1.168(i)–6 to the exchange of Equipment Y3 for Equipment Z1, the acquired MACRS property.

(ii) For the taxable year ending June 30, 2003, the regular MACRS depreciation deduction allowable for the remaining carryover basis at the time of replacement (after taking into account the additional first year depreciation deduction) of Equipment Y3 is $2,800 (the remaining carryover basis at the time of replacement of $20,000 minus the additional first year depreciation deduction of $6,000, multiplied by the annual depreciation rate of .20 for recovery year 1) and for the remaining excess basis at the time of replacement (after taking into account the additional first year depreciation deduction) of Equipment Y3 is $700 (the remaining excess basis at the time of replacement of $5,000 minus the additional first year depreciation deduction of $1,500, multiplied by the annual depreciation rate of .20 for recovery year 1), which totals $3,500.

(iii) For the taxable year ending June 30, 2004, the regular MACRS depreciation deduction allowable for the remaining carryover basis (after taking into account the additional first year depreciation deduction) of Equipment Y3 is $2,240 (the remaining carryover basis at the time of replacement of $20,000 minus the additional first year depreciation deduction of $6,000, multiplied by the annual depreciation rate of .32 for recovery year 2 × ½ year) and for the remaining excess basis (after taking into account the additional first year depreciation deduction) of Equipment Y3 is $560 (the remaining excess basis at the time of replacement of $5,000 minus the additional first year depreciation deduction of $1,500, multiplied by the annual depreciation rate of .32 for recovery year 2 × ½ year), which totals $2,800.

(iv) For the taxable year ending June 30, 2004, pursuant to paragraph (f)(5)(iii)(A) of this section, the 50-percent additional first year depreciation deduction for Equipment Z1 is allowable for the remaining carryover basis at the time of replacement of $11,200 (Equipment Y3's unadjusted depreciable basis of $25,000 minus the total additional first year depreciation deduction of $7,500 minus the total 2003 regular MACRS depreciation deduction of $3,500 minus the total 2004 regular depreciation deduction (taking into account the half-year convention) of $2,800). Thus, the 50-percent additional first year depreciation deduction for the remaining carryover basis at the time of replacement equals $5,600 ($11,200 multiplied by .50).

Example 6. (i) In April 2004, SS, a calendar year-end corporation, acquired and placed in service Equipment K89. Equipment K89 is 50-percent bonus depreciation property under section 168(k)(4). In November 2004, SS acquired and placed in service used Equipment N78 by exchanging Equipment K89 in a like-kind exchange.

(ii) Pursuant to paragraph (f)(5)(iii)(B) of this section, no additional first year deduction is allowable for Equipment K89 and, pursuant to §1.168(d)–1T(b)(3)(ii), no regular depreciation deduction is allowable for Equipment K89, for the taxable year ended December 31, 2004.

(iii) Equipment N78 is not qualified property under section 168(k)(1) or 50-percent bonus depreciation property under section 168(k)(4) because the original use requirement of paragraph (b)(3) of this section is not met. Accordingly, no additional first year depreciation deduction is allowable for Equipment N78.

(6) *Change in use*—(i) *Change in use of depreciable property*. The determination of whether the use of depreciable property changes is made in accordance with section 168(i)(5) and regulations thereunder.

(ii) *Conversion to personal use*. If qualified property or 50-percent bonus depreciation property is converted from business or income-producing use to personal use in the same taxable year in which the property is placed in service by a taxpayer, the additional first year depreciation deduction is not allowable for the property.

(iii) *Conversion to business or income-producing use*—(A) *During the same taxable year*. If, during the same taxable year, property is acquired by a taxpayer for personal use and is converted by the taxpayer from personal use to business or income-producing use, the additional first year depreciation deduction is allowable for the property in the taxable year the property is converted to business or income-producing use (assuming all of the requirements in paragraph (b) of this section are met). See paragraph (b)(3)(ii) of this section relating to the original use rules for a conversion of property to business or income-producing use.

(B) *Subsequent to the acquisition year*. If property is acquired by a taxpayer for personal use and, during a subsequent taxable year, is converted by the taxpayer from personal use to business or income-producing use, the additional first year depreciation deduction is allowable for the property in the taxable year the property is converted to business or income-producing use (assuming all of the requirements in paragraph (b) of this section are met). For purposes of paragraphs (b)(4) and (5) of this section, the property must be acquired by the taxpayer for personal use after September 10, 2001 (for qualified property), or after May 5, 2003 (for 50-percent bonus depreciation property), and converted by the taxpayer from personal use to business or income-producing use by January 1, 2005. See paragraph (b)(3)(ii) of this section relating to the original use rules for a conversion of property to business or income-producing use.

(iv) *Depreciable property changes use subsequent to the placed-in-service year*—(A) If the use of qualified property or 50-percent bonus depreciation property changes in the hands of the same taxpayer subsequent to the taxable year the qualified property or the 50-percent bonus depreciation property, as applicable, is placed in service and, as a result of the change in use, the property is no longer qualified property or 50-percent bonus depreciation property, as applicable, the additional first year depreciation deduction allowable for the qualified property or the 50-percent bonus depreciation property, as applicable, is not redetermined.

(B) If depreciable property is not qualified property or 50-percent bonus depreciation property in the taxable year the property is placed in service by the taxpayer, the additional first year depreciation deduction is not allowable for the property even if a change in the use of the property subsequent to the taxable year the property is placed in service results in the property being qualified property or 50-percent bonus depreciation property in the taxable year of the change in use.

(v) *Examples*. The application of this paragraph (f)(6) is illustrated by the following examples:

Example 1. (i) On January 1, 2002, HH, a calendar year corporation, purchased and placed in service several new computers at a total cost of $100,000. HH used these computers within the United States for 3 months in 2002 and then moved and used the computers outside the United States for the remainder of 2002. On January 1, 2003, HH permanently returns the computers to the United States for use in its business.

(ii) For 2002, the computers are considered as used predominantly outside the United States in 2002 pursuant to §1.48–1(g)(1)(i). As a result, the computers are required to be depreciated under the alternative depreciation system of section 168(g). Pursuant to paragraph (b)(2)(ii)(A)*2*) of this section, the computers are not qualified property in 2002, the placed-in-service year. Thus, pursuant to (f)(6)(iv)(B) of this section, no additional first year depreciation deduction is allowed for these computers, regardless of the fact that the computers are permanently returned to the United States in 2003.

Example 2. (i) On February 8, 2002, *II*, a calendar year corporation, purchased and placed in service new equipment at a cost of $1,000,000 for use in its California plant. The equipment is 5-year property under section 168(e) and is qualified property under section 168(k). *II* depreciates its 5-year property placed in service in 2002 using the optional depreciation table that corresponds with the general depreciation system, the 200-percent declining balance method, a 5-year recovery period, and the half-year convention. On June 4, 2003, due to changes in *II*'s business circumstances, *II* permanently moves the equipment to its plant in Mexico.

(ii) For 2002, *II* is allowed a 30-percent additional first year depreciation deduction of $300,000 (the adjusted depreciable basis of $1,000,000 multiplied by .30). In addition, *II*'s depreciation deduction allowable in 2002 for the remaining adjusted depreciable basis of $700,000 (the unadjusted depreciable basis of $1,000,000 reduced by the additional first year depreciation deduction of $300,000) is $140,000 (the remaining adjusted depreciable basis of $700,000 multiplied by the annual depreciation rate of .20 for recovery year 1).

(iii) For 2003, the equipment is considered as used predominantly outside the United States pursuant to §1.48–1(g)(1)(i). As a result of this change in use, the adjusted depreciable basis of $560,000 for the equipment is required to be depreciated under the alternative depreciation system of section 168(g) beginning in 2003. However, the additional first year depreciation deduction of $300,000 allowed for the equipment in 2002 is not redetermined.

(7) *Earnings and profits.* The additional first year depreciation deduction is not allowable for purposes of computing earnings and profits.

(8) *Limitation of amount of depreciation for certain passenger automobiles.* For a passenger automobile as defined in section 280F(d)(5), the limitation under section 280F(a)(1)(A)(i) is increased by—

(i) $4,600 for qualified property acquired by a taxpayer after September 10, 2001, and before May 6, 2003; and

(ii) $7,650 for qualified property or 50-percent bonus depreciation property acquired by a taxpayer after May 5, 2003.

(9) *Section 754 election.* In general, for purposes of section 168(k) any increase in basis of qualified property or 50-percent bonus depreciation property due to a section 754 election is not eligible for the additional first year depreciation deduction. However, if qualified property or 50-percent bonus depreciation property is placed in service by a partnership in the taxable year the partnership terminates under section 708(b)(1)(B), any increase in basis of the qualified property or the 50-percent bonus depreciation property due to a section 754 election is eligible for the additional first year depreciation deduction.

(10) *Coordination with section 47*—(i) *In general.* If qualified rehabilitation expenditures (as defined in section 47(c)(2) and §1.48–12(c)) incurred by a taxpayer with respect to a qualified rehabilitated building (as defined in section 47(c)(1) and §1.48–12(b)) are qualified property or 50-percent bonus depreciation property, the taxpayer may claim the rehabilitation credit provided by section 47(a) (provided the requirements of section 47 are met)—

(A) With respect to the portion of the basis of the qualified rehabilitated building that is attributable to the qualified rehabilitation expenditures if the taxpayer makes the applicable election under paragraph (e)(1)(i) or (e)(1)(ii)(B) of this section not to deduct any additional first year depreciation for the class of property that includes the qualified rehabilitation expenditures; or

(B) With respect to the portion of the remaining rehabilitated basis of the qualified rehabilitated building that is attributable to the qualified rehabilitation expenditures if the taxpayer claims the additional first year depreciation deduction on the unadjusted depreciable basis (as defined in paragraph (a)(2)(iii) of this section but before the reduction in basis for the amount of the rehabilitation credit) of the qualified rehabilitation expenditures and the taxpayer depreciates the remaining adjusted depreciable basis (as defined in paragraph (d)(2)(i) of this section) of such expenditures using straight line cost recovery in accordance with section 47(c)(2)(B)(i) and §1.48–12(c)(7)(i). For purposes of this paragraph (f)(10)(i)(B), the remaining rehabilitated basis is equal to the unadjusted depreciable basis (as defined in paragraph (a)(2)(iii) of this section but before the reduction in basis for the amount of the rehabilitation credit) of the qualified rehabilitation expenditures that are qualified property or 50-percent bonus depreciation property reduced by the additional first year depreciation allowed or allowable, whichever is greater.

(ii) *Example.* The application of this paragraph (f)(10) is illustrated by the following example.

Example. (i) Between February 8, 2004, and June 4, 2004, UU, a calendar-year taxpayer, incurred qualified rehabilitation expenditures of $200,000 with respect to a qualified rehabilitated building that is nonresidential real property under section 168(e). These qualified rehabilitation expenditures are 50-percent bonus depreciation property and qualify for the 10-percent rehabilitation credit under section 47(a)(1). UU's basis in the qualified rehabilitated building is zero before incurring the qualified rehabilitation expenditures and UU placed the qualified rehabilitated building in service in July 2004. UU depreciates its nonresidential real property placed in service in 2004 under the general depreciation system of section 168(a) by using the straight line method of depreciation, a 39-year recovery period, and the mid-month convention. UU elected to use the optional depreciation tables to compute the depreciation allowance for its depreciable property placed in service in 2004. Further, for 2004, UU did not make any election under paragraph (e) of this section.

(ii) Because UU did not make any election under paragraph (e) of this section, UU is allowed a 50-percent additional first year depreciation deduction of $100,000 for the qualified rehabilitation expenditures for 2004 (the unadjusted depreciable basis of $200,000 (before reduction in basis for the rehabilitation credit) multiplied by .50). For 2004, UU also is allowed to claim a rehabilitation credit of $10,000 for the remaining rehabilitated basis of $100,000 (the unadjusted depreciable basis (before reduction in basis for the rehabilitation credit) of $200,000 less the additional first year depreciation deduction of $100,000). Further, UU's depreciation deduction for 2004 for the remaining adjusted depreciable basis of $90,000 (the unadjusted depreciable basis (before reduction in basis for the rehabilitation credit) of $200,000 less the additional first year depreciation deduction of $100,000 less the rehabilitation credit of $10,000) is $1,059.30 (the remaining adjusted depreciable basis of $90,000 multiplied by the depreciation rate of .01177 for recovery year 1, placed in service in month 7).

(11) *Coordination with section 514(a)(3).* The additional first year depreciation deduction is not allowable for purposes of section 514(a)(3).

(g) *Effective date*—(1) *In general.* Except as provided in paragraphs (g)(2), (3), and (5) of this section, this section applies to qualified property under section 168(k)(2) acquired by a taxpayer after September 10, 2001, and to 50-percent bonus depreciation property under section 168(k)(4) acquired by a taxpayer after May 5, 2003.

(2) *Technical termination of a partnership or section 168(i)(7) transactions.* If qualified property or 50 percent bonus depreciation property is transferred in a technical termination of a partnership under section 708(b)(1)(B) or in a transaction described in section 168(i)(7) for a taxable year ending on or before September 8, 2003, and the additional first year depreciation deduction allowable for the property was not determined in accordance with paragraph (f)(1)(ii) or (iii) of this section, as applicable, the Internal Revenue Service will allow any reasonable method of determining the additional first year depreciation deduction allowable for the property in the year of the transaction that is consistently applied to the property by all parties to the transaction.

(3)(i) *Like-kind exchanges and involuntary conversions.* If a taxpayer did not claim on a federal tax return for a taxable year ending on or before September 8, 2003, the additional first year depreciation deduction for the remaining carryover basis of qualified property or 50-percent bonus depreciation property acquired in a transaction described in section 1031(a), (b), or (c), or in a transaction to which section 1033 applies and the taxpayer did not make an election not to deduct the additional first year depreciation deduction for the class of property applicable to the remaining carryover basis, the Internal Revenue Service will treat the taxpayer's method of not claiming the additional first year depreciation deduction for the remaining carryover basis as a permissible method of accounting and will treat the amount of the additional first year depreciation deduction allowable for the remaining carryover basis as being equal to zero, provided the taxpayer does not claim the additional first year depreciation deduction for the remaining carryover basis in accordance with paragraph (g)(4)(ii) of this section.

(ii) Paragraphs (f)(5)(ii)(F)(*2*) and (f)(5)(v) of this section apply to a like-kind exchange or an involuntary conversion of MACRS property and computer software for which the time of disposition and the time of replacement both occur after February 27, 2004. For a like-kind exchange or an involuntary conversion of MACRS property for which the time of disposition, the time of replacement, or both occur on or before February 27, 2004, see §1.168(i)–6(k)(2)(ii). For a like-kind exchange or involuntary conversion of computer software for which the time of disposition, the time of replacement, or both occur on or before February 27, 2004, a taxpayer may rely on prior guidance issued by the Internal Revenue Service for determining the depreciation deductions of the acquired computer software and the exchanged or involuntarily converted computer software (for further guidance, see §1.168(k)–1T(f)(5) published in the FEDERAL REGISTER on September 8, 2003 (68 FR 53000)). In relying on such guidance, a taxpayer may use any reasonable, consistent method of determining depreciation in the year of disposition and the year of replacement.

(4) *Change in method of accounting*—(i) *Special rules for 2000 or 2001 returns.* If a taxpayer did not claim on the Federal

tax return for the taxable year that included September 11, 2001, any additional first year depreciation deduction for a class of property that is qualified property and did not make an election not to deduct the additional first year depreciation deduction for that class of property, the taxpayer should refer to the guidance provided by the Internal Revenue Service for the time and manner of claiming the additional first year depreciation deduction for the class of property (for further guidance, *see* section 4 of Rev. Proc. 2002–33 (2002–1 C.B. 963), Rev. Proc. 2003–50 (2003–29 I.R.B. 119), and §601.601(d)(2)(ii)(*b*) of this chapter).

(ii) *Like-kind exchanges and involuntary conversions.* If a taxpayer did not claim on a federal tax return for any taxable year ending on or before September 8, 2003, the additional first year depreciation deduction allowable for the remaining carryover basis of qualified property or 50-percent bonus depreciation property acquired in a transaction described in section 1031(a), (b), or (c), or in a transaction to which section 1033 applies and the taxpayer did not make an election not to deduct the additional first year depreciation deduction for the class of property applicable to the remaining carryover basis, the taxpayer may claim the additional first year depreciation deduction allowable for the remaining carryover basis in accordance with paragraph (f)(5) of this section either:

(A) By filing an amended return (or a qualified amended return, if applicable (for further guidance, *see* Rev. Proc. 94–69 (1994–2 C.B. 804) and §601.601(d)(2)(ii)(*b*) of this chapter)) on or before December 31, 2003, for the year of replacement and any affected subsequent taxable year; or,

(B) By following the applicable administrative procedures issued under §1.446–1(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in method of accounting (for further guidance, *see* Rev. Proc. 2002–9 (2002–1 C.B. 327) and §601.601(d)(2)(ii)(*b*) of this chapter).

(5) *Revision to paragraphs (b)(3)(iii)(B) and (b)(5)(ii)(B) of this section.* The addition of "(or, in the case of multiple units of property subject to the same lease, within three months after the date the final unit is placed in service, so long as the period between the time the first unit is placed in service and the time the last unit is placed in service does not exceed 12 months)" to paragraphs (b)(3)(iii)(B) and (b)(5)(ii)(B) of this section applies to property sold after June 4, 2004.

(6) *Rehabilitation credit.* If a taxpayer did not claim on a Federal tax return for any taxable year ending on or before September 1, 2006, the rehabilitation credit provided by section 47(a) with respect to the portion of the basis of a qualified rehabilitated building that is attributable to qualified rehabilitation expenditures and the qualified rehabilitation expenditures are qualified property or 50-percent bonus depreciation property, and the taxpayer did not make the applicable election specified in paragraph (e)(1)(i) or (e)(1)(ii)(B) of this section for the class of property that includes the qualified rehabilitation expenditures, the taxpayer may claim the rehabilitation credit for the remaining rehabilitated basis (as defined in paragraph (f)(10)(i)(B) of this section) of the qualified rehabilitated building that is attributable to the qualified rehabilitation expenditures (assuming all the requirements of section 47 are met) in accordance with paragraph (f)(10)(i)(B) of this section by filing an amended Federal tax return for the taxable year for which the rehabilitation credit is to be claimed. The amended Federal tax return must include the adjustment to the tax liability for the rehabilitation credit and any collateral adjustments to taxable income or to the tax liability (for example, the amount of depreciation allowed or allowable in that taxable year for the qualified rehabilitated building). Such adjustments must also be made on amended Federal tax returns for any affected succeeding taxable years.

[T.D. 9091, 68 FR 52992, Sept. 8, 2003; 68 FR 63734, Nov. 10, 2003, as amended by T.D. 9115, 69 FR 9546, Mar. 1, 2004; 69 FR 17586, 17587, Apr. 5, 2004. Redesignated and amended by T.D. 9283, 71 FR 51738, Aug. 31, 2006; T.D. 9314, 72 FR 9261, Mar. 1, 2007]

§ 1.168A–1 Amortization of emergency facilities; general rule.

(a) A person (including an estate or trust (see section 642(f) and § 1.642(f)–1) and a partnership (see section 703 and § 1.703–1)) is entitled, by election, to a deduction with respect to the amortization of the adjusted basis (for determining gain) of an emergency facility, such amortization to be based on a period of 60 months. As to the adjusted basis of an emergency facility, see § 1.168A–5. The taxpayer may elect to begin the 60-month amortization period with (1) the month following the month in which such facility was completed or acquired, or (2) the taxable year succeeding that in which such facility was completed or acquired (see § 1.168A–2). The date on which, or the month within which, an emergency facility is completed or acquired is to be determined upon the facts in the particular case. Ordinarily, the taxpayer is in possession of all the facts and, therefore, in a position to ascertain such date. A statement of the date ascertained by the taxpayer, together with a statement of the pertinent facts relied upon, should be filed with the taxpayer's election to take amortization deductions with respect to such facility.

(b) Generally, an amortization deduction will not be allowed with respect to an emergency facility for any taxable year unless such facility has been certified before the date of filing of the taxpayer's income tax return for such taxable year. However, this limitation does not apply in the case of a certificate made after August 22, 1957, for an emergency facility to provide primary processing for uranium ore or uranium concentrate under a program of the Atomic Energy Commission for the development of any sources of uranium ore or uranium concentrate, if application for such certificate was filed either (1) before September 2, 1958, and before the expiration of six months after the beginning of construction, reconstruction, erection, or installation or the date of acquisition of the facility, or (2) after September 1, 1958, and on or before December 2, 1958.

(c) In general, with respect to each month of the 60-month period which falls within the taxable year, the amortization deduction is an amount equal to the adjusted basis of the facility at the end of each month divided by the number of months (including the particular month for which the deduction is computed) remaining in the 60-month period. The adjusted basis at the end of any month shall be computed without regard to the amortization deduction for such month. The total amortization deduction with respect to an emergency facility for a particular taxable year is the sum of the amortization deductions allowable for each month of the 60-month period which falls within such taxable year. The amortization deduction taken for any month is in lieu of the deduction for depreciation which would otherwise be allowable under section 167. See, however, § 1.168A–6, relating to depreciation with respect to any portion of the emergency facility not subject to amortization.

(d) This section may be illustrated by the following examples:

Example 1. On July 1, 1954, the X Corporation, which makes its income tax returns on the calendar year basis, begins the construction of an emergency facility which is completed on September 30, 1954, at a cost of $240,000. The certificate covers the entire construction. The X Corporation elects to take amortization deductions with respect to the facility and to begin the 60-month amortization period with October, the month following its completion. The adjusted basis of the facility at the end of October is $240,000. The allowable amortization deduction with respect to such facility for the taxable year 1954 is $12,000, computed as follows:

Monthly amortization deductions:	
October: $240,000 divided by 60	$4,000
November: $236,000 ($240,000 minus $4,000) divided by 59	4,000
December: $232,000 ($236,000 minus $4,000) divided by 58	4,000
Total amortization deduction for 1954	12,000

Example 2. The Y Corporation, which makes its income tax returns on the basis of a fiscal year ending November 30, purchases an emergency facility (No. 1) on July 29, 1955. On June 15, 1955, it begins the construction of an emergency facility (No. 2) which is completed on August 2, 1955. The entire acquisition and construction of such facilities are covered by the certificate. The Y Corporation elects to take amortization deductions with respect to both facilities and to begin the 60-month amortization period in each case with the month following the month of acquisition or completion. At the end of the first month of the amortization

period the adjusted basis of facility No. 1 is $300,000 and the adjusted basis of facility No. 2 is $54,000. In September 1955, facility No. 1 is damaged by fire, as a result of which its adjusted basis is properly reduced by $25,370. The allowable amortization deduction with respect to such facilities for the taxable year ending November 30, 1955, is $21,410, computed as follows:

Facility No. 1

Monthly amortization deductions:	
August: $300,000 divided by 60	$5,000
September: $269,630 ($300,000 minus $5,000 and $25,370) divided by 59	4,570
October: $265,060 ($269,630 minus $4,570) divided by 58	4,570
November: $260,490 ($265,060 minus $4,570) divided by 57	4,570
Amortization deduction for 1955	18,710

Facility No. 2

Monthly amortization deductions:	
September: $54,000 divided by 60	$900
October: $53,100 divided by 59	900
November: $52,200 divided by 58	900
Amortization deduction for 1955	2,700
Total amortization deduction for 1955	21,410

Example 3. On June 15, 1954, the Z Corporation, which makes its income tax returns on the calendar year basis, completes the construction of an emergency facility at a cost of $110,000. In its income tax return for 1954, filed on March 15, 1955, the Z Corporation elects to take amortization deductions with respect to such facility and to begin the 60-month amortization period with July 1954, the month following its completion. No certificate with respect to such facility is made until April 10, 1955, and therefore no amortization deduction with respect to such facility is allowable for any month in the taxable year 1954. The Z Corporation is entitled, however, to take a deduction for depreciation of such facility for the taxable year 1954, such deduction being assumed, for the purposes of this example, to be $2,000. Accordingly, the adjusted basis of such facility at the end of January 1955 (without regard to the amortization deduction for such month) is $108,000 ($110,000 minus $2,000). For the taxable year 1955, the Z Corporation is, with respect to such facility, entitled to an amortization deduction of $24,000, computed as follows:

Monthly amortization deductions:	
January: $108,000 divided by 54	$2,000
February: $106,000 ($108,000 minus $2,000) divided by 53	2,000
March: $104,000 ($106,000 minus $2,000) divided by 52	2,000
For the remaining nine months (similarly computed)	18,000
Total amortization deduction for 1955	24,000

Since the Z Corporation elected in its return for 1954 to take amortization deductions with respect to such facility and to begin the 60-month amortization period with July 1954, it must compute its amortization deductions for the 12 months in the taxable year 1955 on the basis of the remaining months of the established 60-month amortization period, as indicated in the above computation.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960. Redesignated and amended by T.D. 8116, 51 FR 46618, Dec. 24, 1986]

§ 1.168A–2 Election of amortization.

(a) *General rule.* An election by the taxpayer to take amortization deductions with respect to an emergency facility and to begin the 60-month amortization period either with the month following the month in which such facility was completed or acquired, or with the taxable year succeeding the taxable year in which such facility was completed or acquired, shall be made by a statement to that effect in its return for the taxable year in which falls the first month of the 60-month amortization period so elected. However, if the facility is described in section 168(e)(2)(C) and an application for a certificate is filed within the period prescribed by section 9(c) of the Technical Amendments Act of 1958 (72 Stat. 1609) and paragraph (b) of § 1.168A–1, the election may be made by a statement in an amended income tax return for the taxable year in which falls the first month of the 60-month amortization period so elected. The statement and amended return in such case must be filed not later than 90 days after the date the certificate is made or not later than April 4, 1960, whichever is later. Amended income tax returns or claims for credit or refund should also be filed for other taxable years which are within such amortization period and which precede the taxable year in which the election is made. Nothing in this paragraph should be construed as extending the time specified in section 6511 within which a claim for credit or refund may be filed.

(b) *Election not made, in prescribed manner.* If the statement of election is not made by the taxpayer as prescribed in paragraph (a) of this section, it may, in the discretion of the Commissioner and for good cause shown, be made in such manner and form and within such time as may be approved by the Commissioner.

(c) *Other requirements and considerations.* No method of making such election other than those prescribed in this section and corresponding sections of prior regulations is permitted. Any statement of election should contain a description clearly identifying each emergency facility for which an amortization deduction is claimed. A taxpayer which does not elect, in the manner prescribed in this section or corresponding sections of prior regulations, to take amortization deductions with respect to an emergency facility shall not be entitled to such deductions.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960. Redesignated and amended by T.D. 8116, 51 FR 46618, Dec. 24, 1986]

§ 1.168A–3 Election to discontinue amortization.

(a) If a taxpayer has elected to take amortization deductions with respect to an emergency facility, it may, after such election and prior to the expiration of the 60-month amortization period, discontinue the amortization deductions for the remainder of the 60-month period. An election to discontinue the amortization deductions shall be made by a notice in writing filed with the district director for the internal revenue district in which the return of the taxpayer is required to be filed, specifying the month as of the beginning of which the taxpayer elects to discontinue such deductions. Such notice shall be filed before the beginning of the month specified therein, and shall contain a description clearly identifying the emergency facility with respect to which the taxpayer elects to discontinue the amortization deductions. If the taxpayer so elects to discontinue the amortization deductions, it shall not be entitled to any further amortization deductions with respect to such facility.

(b) A taxpayer which thus elects to discontinue amortization deductions with respect to an emergency facility is entitled, if such facility is depreciable property under section 167 and the regulations thereunder, to a deduction for depreciation with respect to such facility. The deduction for depreciation shall begin with the first month as to which the amortization deduction is not applicable, and shall be computed on the adjusted basis of the property as of the beginning of such month (see section 1011 and the regulations thereunder).

(c) This section may be illustrated by the following example:

Example. On July 1, 1954, the X Corporation, which makes its income tax returns on the calendar year basis, purchases an emergency facility, consisting of land with a building thereon, at a cost of $306,000 of which $60,000 is allocable to the land and $246,000 to the building. The certificate covers the entire acquisition. The corporation elects to take amortization deductions with respect to the facility and to begin the 60-month amortization period with the taxable year 1955. Depreciation of the building in the amount of $6,000 is deducted and allowed for the taxable year 1954. On March 25, 1956, the corporation files notice with the district director of its election to discontinue the amortization deductions beginning with the month of April 1956. The adjusted basis of the facility on January 31, 1955, is $300,000, or the cost of the facility ($306,000) less the depreciation allowed for 1954 ($6,000). The amortization deductions for the taxable year 1955 and the months of January, February, and March 1956, amount to $75,000, or $5,000 per month for 15 months. Since, at the beginning of the amortization period (January 1, 1955), the adjusted basis of the land ($60,000) is one-fifth of the adjusted basis of the entire facility ($300,000) and since there are no adjustments to basis other than on account of amortization during the period, the adjusted basis of the land should be reduced by $15,000, or one-fifth of the entire amortization deduction, and the adjusted basis of the building should be reduced by $60,000, or four-fifths of the entire amortization deduction. Accordingly, the adjusted basis of the facility as of April 1, 1956, is $225,000, of which $180,000 is allocable to the building for the purpose of depreciation deductions under section 167, and $45,000 is allocable to the land.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960. Redesignated by T.D. 8116, 51 FR 46619, Dec. 24, 1986]

§ 1.168A–4 Definitions.

As used in the regulations under section 168, the term—

(a) ''Certifying authority'' means the certifying authority designated by the President by Executive order.

(b) ''Emergency facility'' means any facility, land, building, machinery, or equipment, or any part thereof, the acquisition of which occurred after December 31, 1949, or the construction, reconstruction, erection, or installation of which was completed after such date, and with respect to which a certificate under section 168(e) has been made. In the case of an application for a certificate under section 168(e) which is filed after March 23, 1951, only the part of any such facility which is constructed, reconstructed, erected, or installed by any person not earlier than six months prior to the filing of such application, and which is certified in accordance with section 168(e), shall be deemed to be an emergency facility, notwithstanding that the other part of such facility was constructed, reconstructed, erected, or installed earlier than six months prior to the filing of such application. However, if the facility is one described in section 168(e)(2)(C) and the application was filed after September 1, 1958, and on or before December 2, 1958, the preceding sentence shall not apply. The term ''emergency facility,'' as so defined, may include, among other things, improvements of land, such as the construction of roads, bridges, and airstrips, and the dredging of channels.

(c) ''Emergency period'' means the period beginning on January 1, 1950, and ending on the date on which the President proclaims that the utilization of a substantial portion of the certified emergency facilities is no longer required in the interest of national defense.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960. Redesignated by T.D. 8116, 51 FR 46619, Dec. 24, 1986]

§ 1.168A–5 Adjusted basis of emergency facility.

(a) *In general.* (1) The adjusted basis of an emergency facility for the purpose of computing the amortization deduction may differ from what would otherwise constitute the adjusted basis of such emergency facility in that it shall be the adjusted basis for determining gain (see Part II (section 1011 and following), Subchapter 0, Chapter 1 of the Code) and in that it may be only a portion of what would otherwise constitute the adjusted basis. It will be only a portion of such other adjusted basis if only a portion of the basis (unadjusted) is attributable to certified construction, reconstruction, erection, installation, or acquisition taking place after December 31, 1949. Also, it will be only a portion of what would otherwise constitute the adjusted basis of the emergency facility if only a portion of the basis (unadjusted) is certified as attributable to defense purposes or, in the case of a certification after August 22, 1957, if only a portion of the basis (unadjusted) is certified as attributable to the national defense program. It is therefore necessary first to determine the unadjusted basis of the emergency facility from which the adjusted basis for amortization purposes is derived.

(2) The unadjusted basis for amortization purposes is the same as the unadjusted basis otherwise determined only when the entire construction, reconstruction, erection, installation, or acquisition takes place after December 31, 1949, and is certified in its entirety by the certifying authority.

(3) In cases in which only a portion of the construction, reconstruction, erection, installation, or acquisition takes place after December 31, 1949, and that portion is certified in its entirety by the certifying authority, the unadjusted basis for the purpose of amortization is so much of the entire unadjusted basis as is attributable to the certified construction, reconstruction, erection, installation, or acquisition which takes place after December 31, 1949. For example, the X Corporation begins the construction of a facility on November 15, 1949, and such facility is completed on April 1, 1952, at a cost of $5,000,000, of which $4,600,000 is attributable to construction after December 31, 1949. The entire construction after December 31, 1949, is certified by the certifying authority. The unadjusted basis of the emergency facility for amortization purposes is therefore $4,600,000. For depreciation of the remaining portion ($400,000) of the cost see § 1.168A–6.

(4) If the certifying authority certifies only a portion of the construction, reconstruction, erection, installation, or acquisition of property which takes place after December 31, 1949, the

unadjusted basis for amortization purposes is limited to such portion so certified. Assuming the same facts as in the example in subparagraph (3) of this paragraph, except that only 50 percent of the construction, reconstruction, erection, installation, or acquisition after December 31, 1949, is certified, the unadjusted basis for amortization purposes is 50 percent of $4,600,000, or $2,300,000.

(5) The adjusted basis of an emergency facility for amortization purposes is the unadjusted basis for amortization purposes less the adjustments properly applicable thereto. Such adjustments are those specified in sections 1016 and 1017, except that no adjustments are to be taken into account which increase the adjusted basis. (See paragraph (b) of this section.) If the taxpayer constructs, reconstructs, erects, installs, or acquires an emergency facility pursuant to a cost reimbursement contract with an obligation for reimbursement by the United States of all or a part of the cost of such facility, the unadjusted basis of such facility for amortization purposes shall not include that part of the cost for which the taxpayer is entitled to reimbursement, and the amount received as reimbursement shall be treated as a capital receipt. However, amounts received by a taxpayer which represent in fact compensation by reason of termination of a government contract or payment for articles under such a contract, though denominated reimbursements for all or a part of the cost of an emergency facility, are not to be treated as capital receipts but are to be taken into account in computing income, and are therefore not to be applied in reduction of the basis of such facility.

(6) The following examples will illustrate the computation of the adjusted basis of an emergency facility for amortization purposes:

Example 1. The X Corporation completes an emergency facility on July 1, 1954, the entire unadjusted basis of which is $500,000, and the unadjusted basis of which for the purpose of amortization is $300,000. The X Corporation elects to begin amortization as of January 1, 1955. The only adjustment to basis for the period July 1, 1954, to January 31, 1955, other than depreciation or amortization for January 1955, is $5,000 for depreciation for the last six months of 1954. The adjusted basis for the purpose of amortization is therefore $300,000 less $3,000 (300,000/500,000×$5,000), or $297,000.

Example 2. On July 31, 1956, the Y Corporation has an emergency facility (a building) which was completed on July 1, 1952, the entire basis of which is $500,000 and the unadjusted basis of which for the purpose of amortization is $300,000. The corporation elected to begin amortization as of January 1, 1953, at which time it was entitled to $5,000 depreciation for the last six months of 1952. On July 1, 1956, the facility was damaged by fire, as the result of which its adjusted basis is properly reduced by $200,000. The adjusted basis of the emergency facility as of July 1956 for the purpose of amortization and depreciation, and the adjusted basis for other purposes, are $23,849.18, $49,250.82, and $73,100.00, respectively, computed as follows:

	For amortization	For depreciation	For other purposes
Unadjusted basis	$300,000.00	$200,000.00	$500,000
Less depreciation to Jan. 1, 1953	3,000.00	2,000.00	5,000
Adjusted basis January 1953	297,000.00	198,000.00	495,000
Less amortization for 42 months	207,900.00	....	207,900
Less depreciation for 42 months	....	14,000.00	14,000
Adjusted basis at time of fire	89,100.00	184,000.00	273,100
Less fire loss (apportioned as explained below)	65,250.82	134,749.18	200,000
Adjusted basis after fire loss	23,849.18	49,250.82	73,100

The $200,000 fire loss is applied against the adjusted basis for the purpose of amortization and the adjusted basis for the purpose of depreciation in the proportion that each such adjusted basis at the time of the fire bears to their sum, *i.e.*, 89,100/273,100×$200,000 or $65,250.82, against the amortization basis, and 184,000/273,100×$200,000, or $134,749.18 against the depreciation basis.

(b) *Capital additions.* (1) If, after the completion or acquisition of an emergency facility which has been certified by the certifying authority, further expenditures are made for construction, reconstruction, erection, installation, or acquisition attributable to such facility but not covered by such certification, such expenditures shall not be added to the adjusted basis of the emergency facility for amortization purposes under such certification. If such further expenditures are separately certified in accordance with the provisions of section 168(e) (1) or (2) and this section, they are treated as certified expenditures in connection with a new and separate emergency facility and, if proper election is made, will be taken into account in computing the adjusted basis of such new and separate emergency facility for the purpose of amortization.

(2) The application of subparagraph (1) of this paragraph may be illustrated by the following example:

Example. On March 1, 1954, the certifying authority certifies as an emergency facility a heating plant proposed to be constructed by the Z Corporation. Such facility is completed on July 1, 1954. The Z Corporation, on August 1, 1954, begins the installation in the plant of an additional boiler, which is not included in the certification for the plant but is certified as a new and separate emergency facility. For amortization purposes, the adjusted basis of the heating plant is determined without including the cost of the additional boiler. Such cost is taken into account in computing the adjusted basis of the new and separate emergency facility (the boiler), as to which the taxpayer has a separate election for amortization purposes and a separate amortization period.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960. Redesignated and amended by T.D. 8116, 51 FR 46619, Dec. 24, 1986]

§ 1.168A–6 Depreciation of portion of emergency facility not subject to amortization.

(a) The rule that an amortization deduction with respect to an emergency facility is in lieu of any deduction for depreciation which would otherwise be allowable under section 167 is subject to the exception provided in section 168(f). Under this exception, if the property constituting such facility is depreciable property under section 167 and the regulations thereunder and if the adjusted basis of such facility as computed under section 1011 for purposes other than the amortization deductions is in excess of the adjusted basis computed for the purpose of the amortization deductions, then the excess shall be charged off over the useful life of the facility and recovered through depreciation deductions. Thus, if the construction of an emergency facility is begun on or before December 31, 1949, and completed after such date, no amortization deductions are allowable with respect to the amount attributable to such construction on or before such date (see §1.168A–5). However, if the property constituting such facility is depreciable property under section 167 and the regulations thereunder, then the depreciation deduction provided by such section and regulations is allowable with respect to the amount attributable to such construction on or before December 31, 1949.

(b) Similarly, if only a portion of the construction, reconstruction, erection, installation, or acquisition after December 31, 1949, of an emergency facility has been certified by the certifying authority, and if such facility is depreciable property under section 167 and the regulations thereunder, then the depreciation deduction provided by such section and regulations is allowable with respect to the portion which has not been so certified.

(c) For illustration of the treatment of a depreciable portion of an emergency facility, see example (2) in paragraph (a)(6) of §1.168A–5.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960. Redesignated and amended by T.D. 8116, 51 FR 46619, Dec. 24, 1986]

§ 1.168A–7 Payment by United States of unamortized cost of facility.

(a) Section 168(g) contemplates that certain payments may be made by the United States to a taxpayer as compensation for the unamortized cost of an emergency facility. If any such payment is properly includible in gross income and has been certified, as provided in section 168(g), as having been paid under the circumstances described therein, a taxpayer which is recovering the adjusted basis of an emergency facility through amortization rather than depreciation may elect to take an amount equal to such payment as an amortization deduction with respect to such facility for the month in which such payment is so includible. Such amortization deduction shall be in lieu of the amortization deduction otherwise allowable with respect to such facility for such month, but it shall not in any case exceed the adjusted basis of such facility (see § 1.168A–5) as of the end of such month (computed without regard to any amortization deduction for such month). The election referred to in this paragraph shall be made in the return for the taxable year in which the amount of such payment is includible in gross income.

(b) If a taxpayer is recovering the adjusted basis of an emergency facility through depreciation rather than amortization, the depreciation deduction allowable under section 167 for the month in which the amount of any such payment is includible in gross income shall, at the taxpayer's election, be increased by such amount; but the total deduction with respect to the certified portion of such facility shall not in any case exceed the adjusted basis of such facility (computed as provided in section 168(e) and § 1.168A–5 for amortization purposes) as of the end of such month (computed without regard to any amount allowable for such month under section 167 or 168(g)(2)). The election referred to in this paragraph shall be made in the return for the taxable year in which the amount of such payment is includible in gross income.

(c) This section may be illustrated by the following examples:

Example 1. On January 31, 1954, the X Corporation purchases an emergency facility at a cost of $600,000. The certificate covers the entire acquisition. The X Corporation elects to take amortization deductions with respect to such facility and to begin the 60-month amortization period with February 1954, the month following the month of acquisition. On July 15, 1955, as a result of the cancellation of certain contracts with the X Corporation, the United States makes a payment of $300,000 to the corporation as compensation for the unamortized cost of such facility. The $300,000 payment is includible in the X Corporation's gross income for July 1955. The adjusted basis of such facility for amortization purposes as of the end of July 1955, computed without regard to any amortization deduction for such month, is $430,000. Accordingly, the corporation is entitled to take an amortization deduction of $300,000 for such month, in lieu of the $10,000 amortization deduction which is otherwise allowable.

Example 2. On November 30, 1954, the Y Corporation purchases an emergency facility, consisting of land with a building thereon, at a cost of $500,000, of which $200,000 is allocable to the land and $300,000 to the building. The certificate covers the entire acquisition. The Y Corporation does not elect to take amortization deductions with respect to such facility, but is entitled to a depreciation deduction with respect to the building at the rate of 3 percent per annum, or $750 per month. On August 12, 1956, as a result of cancellation of certain contracts, the United States makes a payment of $400,000 to the corporation as compensation for the unrecovered cost of such facility. The $400,000 is includible in the Y Corporation's gross income for August 1956. The adjusted basis of the facility as of the end of August 1956, computed without regard to depreciation for such month, is $485,000, of which amount $200,000 is allocable to the land and $285,000 to the building. Accordingly, the corporation is entitled to increase the $750 depreciation deduction for August 1956 by the full amount of the $400,000 payment.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960. Redesignated and amended by T.D. 8116, 51 FR 46619, Dec. 24, 1986]

§ 1.169–1 Amortization of pollution control facilities.

(a) *Allowance of deduction*—(1) *In general.* Under section 169(a), every person, at his election, shall be entitled to a deduction with respect to the amortization of the amortizable basis (as defined in § 1.169–3) of any certified pollution control facility (as defined in § 1.169–2), based on a period of 60 months. Under section 169(b) and paragraph (a) of § 1.169–4, the taxpayer may further elect to begin such 60-month period either with the month following the month in which the facility is completed or acquired or with the first month of the taxable year succeeding the taxable year in which such facility is completed or acquired. Under section 169(c), a taxpayer who has elected under section 169(b) to take the amortization deduction provided by section 169(a) may, at any time after making such election and prior to the expiration of the 60-month amortization period, elect to discontinue the amortization deduction for the remainder of the 60-month period in the manner prescribed in paragraph (b)(1) of § 1.169–4. In addition, if on or before May 18, 1971, an election under section 169(a) has been made, consent is hereby given to revoke such election without the consent of the Commissioner in the manner prescribed in (b)(2) of § 1.169–4.

(2) *Amount of deduction.* With respect to each month of such 60-month period which falls within the taxable year, the amortization deduction shall be an amount equal to the amortizable basis of the certified pollution control facility at the end of such month divided by the number of months (including the month for which the deduction is computed) remaining in such 60-month period. The amortizable basis at the end of any month shall be computed without regard to the amortization deduction for such month. The total amortization deduction with respect to a certified pollution control facility for a taxable year is the sum of the amortization deductions allowable for each month of the 60-month period which falls within such taxable year. If a certified pollution control facility is sold or exchanged or otherwise disposed of during 1 month, the amortization deduction (if any) allowable to the original holder in respect of such month shall be that portion of the amount to which such person would be entitled for a full month which the number of days in such month during which the facility was held by such person bears to the total number of days in such month.

(3) *Effect on other deductions.* (i) The amortization deduction provided by section 169 with respect to any month shall be in lieu of the depreciation deduction which would otherwise be allowable under section 167 or a deduction in lieu of depreciation which would otherwise be allowable under paragraph (b) of § 1.162–11 for such month.

(ii) If the adjusted basis of such facility as computed under section 1011 for purposes other than the amortization deduction provided by section 169 is in excess of the amortizable basis, as computed under § 1.169–3, such excess shall be recovered through depreciation deductions under the rules of section 167. See section 169(g).

(iii) See section 179 and paragraph (e)(1)(ii) of § 1.179–1 and paragraph (b)(2) of § 1.169–3 for additional first-year depreciation in respect of a certified pollution control facility.

(4) [Reserved]

(5) *Special rules.* (i) In the case of a certified pollution control facility held by one person for life with the remainder to another person, the amortization deduction under section 169(a) shall be computed as if the life tenant were the absolute owner of the property and shall be allowable to the life tenant during his life.

(ii) If the assets of a corporation which has elected to take the amortization deduction under section 169(a) are acquired by another corporation in a transaction to which section 381 (relating to carryovers in certain corporate acquisitions) applies, the acquiring corporation is to be treated as if it were the distributor or transferor corporation for purposes of this section.

(iii) For the right of estates and trusts to amortize pollution control facilities see section 642(f) and § 1.642 (f)–1. For the allowance of the amortization deduction in the case of pollution control facilities of partnerships, see section 703 and § 1.703–1.

(6) *Depreciation subsequent to discontinuance or in the case of revocation of amortization.* A taxpayer which elects in the manner prescribed under paragraph (b) (1) of § 1.169–4 to discontinue amortization deductions or under paragraph (b) (2) of § 1.169–4 to revoke an election under section 169(a) with respect to a certified pollution control facility is entitled, if such facility is of a character subject to the allowance for depreciation provided in section 167, to a deduction for depreciation (to the extent allowable) with respect to such facility. In the case of an election to discontinue an amortization deduction, the deduction for depreciation shall begin with the first month as to which such amortization deduction is not applicable and shall be computed on the adjusted basis of the property as of the beginning of such month (see section 1011 and the regulations thereunder). Such depreciation deduction shall be based upon the remaining portion of the period authorized under section 167 for the facility as determined, as of the first day of the first month as of which the amortization deduction is not applicable. If the taxpayer so elects to discontinue the amortization deduction

under section 169(a), such taxpayer shall not be entitled to any further amortization deduction under this section and section 169(a) with respect to such pollution control facility. In the case of a revocation of an election under section 169(a), the deduction for depreciation shall begin as of the time such depreciation deduction would have been taken but for the election under section 169(a). See paragraph (b)(2) of §1.169–4 for rules as to filing amended returns for years for which amortization deductions have been taken.

(7) *Definitions.* Except as otherwise provided in §1.169–2, all terms used in section 169 and the regulations thereunder shall have the meaning provided by this section and §§1.169–2 through 1.169–4.

(b) *Examples.* This section may be illustrated by the following examples:

Example 1. On September 30, 1970, the X Corporation, which uses the calendar year as its taxable year, completes the installation of a facility all of which qualifies as a certified pollution control facility within the meaning of paragraph (a) of §1.169–2. The cost of the facility is $120,000 and the period referred to in paragraph (a)(6) of §1.169–2 is 10 years in accordance with the rules set forth in paragraph (a) of §1.169–4, on its income tax return filed for 1970, X elects to take amortization deductions under section 169(a) with respect to the facility and to begin the 60-month amortization period with October 1970, the month following the month in which it was completed. The amortizable basis at the end of October 1970 (determined without regard to the amortization deduction under section 169(a) for that month) is $120,000. The allowable amortization deduction with respect to such facility for the taxable year 1970 is $6,000, computed as follows:

Monthly amortization deductions:	
October: $120,000 divided by 60	$2,000
November: $118,000 (that is, $120,000 minus $2,000) divided by 59	2,000
December: $116,000 (that is, $118,000 minus $2,000) divided by 58	2,000
Total amortization deduction for 1970	6,000

Example 2. Assume the same facts as in example (1). Assume further that on May 20, 1972, X properly files notice of its election to discontinue the amortization deductions with the month of June 1972. The adjusted basis of the facility as of June 1, 1972, is $80,000, computed as follows:

Yearly amortization deductions:	
1970 (as computed in example (1))	$6,000
1971 (computed in accordance with example (1))	24,000
1972 (for the first 5 months of 1972 computed in accordance with example (1))	10,000
Total amortization deductions for 20 months	40,000
Adjusted basis as beginning of amortization period	120,000
Less: Amortization deductions	40,000
Adjusted basis as of June 1, 1972	80,000

Beginning as of June 1, 1972, the deduction for depreciation under section 167 is allowable with respect to the property on its adjusted basis of $80,000.

[T.D. 7116, 36 FR 9012, May 18, 1971; 36 FR 9770, May 28, 1971, as amended by T.D. 7203, 37 FR 17133, Aug. 25, 1972]

§ 1.169–2 Definitions.

(a) *Certified pollution control facility*—(1) *In general.* Under section 169 (d), the term ''certified pollution control facility'' means a facility which—

(i) The Federal certifying authority certifies, in accordance with the rules prescribed in paragraph (c) of this section, is a ''treatment facility'' described in subparagraph (2) of this paragraph, and

(ii) Is ''a new identifiable facility'' (as defined in paragraph (b) of this section).

For profitmaking abatement works limitation, see paragraph (d) of this section.

(2) *Treatment facility.* For purposes of subparagraph (1)(i) of this paragraph, a ''treatment facility'' is a facility which (i) is used to abate or control water or atmospheric pollution or contamination by removing, altering, disposing, or storing of pollutants, contaminants, wastes, or heat and (ii) is used in connection with a plant or other property in operation before January 1, 1969. Determinations under subdivision (i) of this subparagraph shall be made solely by the Federal certifying authority. See subparagraph (3) of this paragraph. For meaning of the phrases ''plant or other property'' and ''in operation before January 1, 1969,'' see subparagraphs (4) and (5), respectively, of this paragraph.

(3) *Facilities performing multiple functions or used in connection with several plants, etc.* (i) If a facility is designed to perform or does perform a function in addition to abating or controlling

water or atmospheric pollution or contamination by removing, altering, disposing or storing pollutants, contaminants, wastes, or heat, such facility shall be a treatment facility only with respect to that part of the cost thereof which is certified by the Federal certifying authority as attributable to abating of controlling water or atmospheric pollution or contamination. For example, if a machine which performs a function in addition to abating water pollution is installed at a cost of $100,000 in, and is used only in connection with, a plant which was in operation before January 1, 1969, and if the Federal certifying authority certifies that $30,000 of the cost of such machine is allocable to its function of abating water pollution, such $30,000 will be deemed to be the adjusted basis for purposes of determining gain for purposes of paragraph (a) of § 1.169–3.

(ii) If a facility is used in connection with more than one plant or other property, and at least one such plant or other property was not in operation before January 1, 1969, such facility shall be a treatment facility only to the extent of that part of the cost thereof certified by the Federal certifying authority as attributable to abating or controlling water or atmospheric pollution in connection with plants or other property in operation before January 1, 1969. For example, if a machine is constructed after December 31, 1968, at a cost of $100,000 and is used in connection with a number of plants only some of which were in operation before January 1, 1969, and if the Federal certifying authority certifies that $20,000 of the cost of such machine is allocable to its function of abating or controlling water pollution in connection with the plants or other property in operation before January 1, 1969, such $20,000 will be deemed to be the adjusted basis for purposes of determining gain for purposes of paragraph (a) of § 1.169–3. In a case in which the Federal certifying authority certifies the percentage of a facility which is used in connection with plants or other property in operation before January 1, 1969, the adjusted basis for the purposes of determining gain for purposes of paragraph (a) of § 1.169–3 of the portion of the facility so used shall be the adjusted basis for determining gain of the entire facility multiplied by such percentage.

(4) *Plant or other property.* As used in subparagraph (2) of this paragraph, the phrase ''plant or other property'' means any tangible property whether or not such property is used in the trade or business or held for the production of income. Such term includes, for example, a papermill, a motor vehicle, or a furnace in an apartment house.

(5) *In operation before January 1, 1969.* (i) For purposes of subparagraph (2) of this paragraph and section 169 (d), a plant or other property will be considered to be in operation before January 1, 1969, if prior to that date such plant or other property was actually performing the function for which it was constructed or acquired. For example, a papermill which is completed in July 1968, but which is not actually used to produce paper until 1969 would not be considered to be in operation before January 1, 1969. The fact that such plant or other property was only operating at partial capacity prior to January 1, 1969, or was being used as a standby facility prior to such date, shall not prevent its being considered to be in operation before such date.

(ii)(*a*) A piece of machinery which replaces one which was in operation prior to January 1, 1969, and which was a part of the manufacturing operation carried on by the plant but which does not substantially increase the capacity of the plant will be considered to be in operation prior to January 1, 1969. However, an additional machine that is added to a plant which was in operation before January 1, 1969, and which represents a substantial increase in the plant's capacity will not be considered to have been in operation before such date. There shall be deemed to be a substantial increase in the capacity of a plant or other property as of the time its capacity exceeds by more than 20 percent its capacity on December 31, 1968.

(*b*) In addition, if the total replacements of equipment in any single taxable year beginning after December 31, 1968, represents the replacement of a substantial portion of a manufacturing plant which had been in operation before such date, such replacement shall be considered to result in a new plant which was not in operation before such date. Thus, if a substantial portion of a plant which was in existence before January 1, 1969, is subsequently destroyed by fire and such substantial portion is replaced in a taxable year beginning after that date, such replacement property shall not be considered to have been in operation before January 1, 1969. The replacement of a substantial portion of a plant or other property shall be deemed to have occurred if, during a single taxable year, the taxpayer replaces manufacturing or production facilities or equipment which comprises such plant or other property and which has an adjusted basis (determined without regard to the adjustments provided in section 1016(a) (2) and (3)) in excess of 20 percent of the adjusted basis (so determined) of such plant or other property determined as of the first day of such taxable year.

(6) *Useful life.* For purposes of section 169 and the regulations thereunder, the terms ''useful life'' and ''actual useful life'' shall mean the shortest period authorized under section 167 and the regulations thereunder if an election were not made under section 169.

(b) *New identifiable facility*—(1) *In general.* For purposes of paragraph (a)(1)(ii) of this section, the term ''new identifiable facility'' includes only tangible property (not including a building and its structural components referred to in subparagraph (2)(i) of this paragraph, other than a building and its structural components which under subparagraph (2)(ii) of this paragraph is exclusively a treatment facility) which—

(i) Is of a character subject to the allowance for depreciation provided in section 167,

(ii)(*a*) Is property the construction, reconstruction, or erection (as defined in subparagraph (2)(iii) of this paragraph) of which is completed by the taxpayer after December 31, 1968, or

(*b*) Is property acquired by the taxpayer after December 31, 1968, if the original use of the property commences with the taxpayer and commences after such date (see subparagraph (2)(iii) of this paragraph), and

(iii) Is placed in service (as defined in subparagraph (2)(v) of this paragraph) prior to January 1, 1975.

(2) *Meaning of terms.* (i) For purposes of subparagraph (1) of this paragraph, the terms ''building'' and ''structural component'' shall be construed in a manner consistent with the principles set forth in paragraph (e) of §1.48–1. Thus, for example, the following rules are applicable:

(*a*) The term ''building'' generally means any structure or edifice enclosing a space within its walls, and usually covered by a roof, the purpose of which is, for example, to provide shelter or housing, or to provide working, office, parking, display, or sales space. The term includes, for example, structures such as apartment houses, factory and office buildings, warehouses, barns, garages, railway or bus stations, and stores. Such term includes any such structure constructed by, or for, a lessee even if such structure must be removed, or ownership of such structure reverts to the lessor, at the termination of the lease. Such term does not include (*1*) a structure which is essentially an item of machinery or equipment, or (*2*) an enclosure which is so closely combined with the machinery or equipment which it supports, houses, or serves that it must be replaced, retired, or abandoned contemporaneously with such machinery or equipment, and which is depreciated over the life of such machinery or equipment. Thus, the term ''building'' does not include such structures as oil and gas storage tanks, grain storage bins, silos, fractioning towers, blast furnaces, coke ovens, brick kilns, and coal tipples.

(*b*) The term ''structural components'' includes, for example, chimneys, and other components relating to the operating or maintenance of a building. However, the term ''structural components'' does not include machinery or a device which serves no function other than the abatement or control of water or atmospheric pollution.

(ii) For purposes of subparagraph (1) of this paragraph, a building and its structural components will be considered to be exclusively a treatment facility if its only function is the abatement or control of air or water pollution. However, the incidental recovery of profits from wastes or otherwise shall not be deemed to be a function other than the abatement or control of air or water pollution. A building and its structural components which serve no function other than the treatment of wastes will be considered to be exclusively a treatment facility even if it contains areas for employees to operate the treatment facility, rest rooms for such workers, and an office for the management of such treatment facility. However, for example, if a portion of a building is used for the treatment of sewage and another portion of the building is used for the manufacture of machinery, the building is not exclusively a treatment facility. The Federal certifying authority will not certify as to what is a building and its structural components within the meaning of subdivision (i) of this subparagraph.

(iii) For purposes of subparagraph (1)(ii) (*a*) and (*b*) of this paragraph (relating to construction, reconstruction, or erection after December 31, 1968, and original use after December 31, 1968) and paragraph (b)(1) of § 1.169–3 (relating to definition of amortizable basis), the principles set forth in paragraph (a) (1) and (2) of § 1.167(c)–1 and in paragraphs (b) and (c) of § 1.48–2 shall be applied. Thus, for example, the following rules are applicable:

(*a*) Property is considered as constructed, reconstructed, or erected by the taxpayer if the work is done for him in accordance with his specifications.

(*b*) The portion of the basis of property attributable to construction, reconstruction, or erection after December 31, 1968, consists of all costs of construction, reconstruction, or erection allocable to the period after December 31, 1968, including the cost or other basis of materials entering into such work (but not including, in the case of reconstruction of property, the adjusted basis of the property as of the time such reconstruction is commenced).

(*c*) It is not necessary that materials entering into construction, reconstruction or erection be acquired after December 31, 1968, or that they be new in use.

(*d*) If construction or erection by the taxpayer began after December 31, 1968, the entire cost or other basis of such construction or erection may be taken into account for purposes of determining the amortizable basis under section 169.

(*e*) Construction, reconstruction, or erection by the taxpayer begins when physical work is started on such construction, reconstruction, or erection.

(*f*) Property shall be deemed to be acquired when reduced to physical possession or control.

(*g*) The term ''original use'' means the first use to which the property is put, whether or not such use corresponds to the use of such property by the taxpayer. For example, a reconditioned or rebuilt machine acquired by the taxpayer after December 31, 1968, for pollution control purposes will not be treated as being put to original use by the taxpayer regardless of whether it was used for purposes other than pollution control by its previous owner. Whether property is reconditioned or rebuilt property is a question of fact. Property will not be treated as reconditioned or rebuilt merely because it contains some used parts.

(iv) For purposes of subparagraph (1)(iii) of this paragraph (relating to property placed in service prior to January 1, 1975), the principles set forth in paragraph (d) of § 1.46–3 are applicable. Thus, property shall be considered placed in service in the earlier of the following taxable years:

(*a*) The taxable year in which, under the taxpayer's depreciation practice, the period for depreciation with respect to such property begins or would have begun; or

(*b*) The taxable year in which the property is placed in a condition or state of readiness and availability for the abatement or control of water or atmospheric pollution.

Thus, if property meets the conditions of (*b*) of this subdivision in a taxable year, it shall be considered placed in service in such year notwithstanding that the period for depreciation with respect to such property begins or would have begun in a succeeding taxable year because, for example, under the taxpayer's depreciation practice such property is or would have been accounted for in a multiple asset account and depreciation is or would have been computed under an ''averaging convention'' (§1.167(a)–10), or depreciation with respect to such property would have been computed under the completed contract method, the unit of production method, or the retirement method. In the case of property acquired by a taxpayer for use in his trade or business (or in the production of income), property shall be considered in a condition or state of readiness and availability for the abatement or control of water or atmospheric pollution if, for example, equipment is acquired for the abatement or control of water or atmospheric pollution and is operational but is undergoing testing to eliminate any defects. However, materials and parts acquired to be used in the construction of an item of equipment shall not be considered in a condition or state of readiness and availability for the abatement or control of water or atmospheric pollution.

(c) *Certification*—(1) *In general.* For purposes of paragraph (a)(1) of this section, a facility is certified in accordance with the rules prescribed in this paragraph if—

(i) The State certifying authority (as defined in subparagraph (2) of this paragraph) having jurisdiction with respect to such facility has certified to the Federal certifying authority (as defined in subparagraph (3) of this paragraph) that the facility was constructed, reconstructed, erected, or acquired in conformity with the State program or requirements for the abatement or control of water or atmospheric pollution or contamination applicable at the time of such certification, and

(ii) The Federal certifying authority has certified such facility to the Secretary or his delegate as (*a*) being in compliance with the applicable regulations of Federal agencies (such as, for example, the Atomic Energy Commission's regulations pertaining to radiological discharge (10 CFR Part 20)) and (*b*) being in furtherance of the general policy of the United States for cooperation with the States in the prevention and abatement of water pollution under the Federal Water Pollution Control Act, as amended (33 U.S.C. 1151–1175) or in the prevention and abatement of atmospheric pollution and contamination under the Clean Air Act, as amended (42 U.S.C. 1857 *et seq.*).

(2) *State certifying authority.* The term ''state certifying authority'' means—

(i) In the case of water pollution, the State water pollution control agency as defined in section 23(a) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1173(a)),

(ii) In the case of air pollution, the air pollution control agency designated pursuant to section 302(b)(1) of the Clean Air Act, as amended (42 U.S.C. 1857h(b)), and

(iii) Any interstate agency authorized to act in place of a certifying authority of a State. See section 23(a) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1173(b)) and section 302(c) of the Clean Air Act, as amended (42 U.S.C. 1857h(c)).

(3) *Federal certifying authority.* The term ''Federal certifying authority'' means the Administrator of the Environmental Protection Agency (see Reorganization Plan No. 3 of 1970, 35 FR 15623).

(d) *Profitmaking abatement works, etc.*—(1) *In general.* Section 169(e) provides that the Federal certifying authority shall not certify any property to the extent it appears that by reason of estimated profits to be derived through the recovery of wastes or otherwise in the operation of such property its costs will be recovered over the period referred to in paragraph (a) (6) of this section for such property. The Federal certifying authority need not certify the amount of estimated profits to be derived from such recovery of wastes or otherwise with respect to such facility. Such estimated profits shall be determined pursuant to subparagraph (2) of this paragraph. However, the Federal certifying authority shall certify—

(i) Whether, in connection with any treatment facility so certified, there is potential cost recovery through the recovery of wastes or otherwise, and

(ii) A specific description of the wastes which will be recovered, or the nature of such cost recovery if otherwise than through the recovery of wastes.

For effect on computation of amortizable basis, see paragraph (c) of §1.169–3.

(2) *Estimated profits.* For purpose of this paragraph, the term ''estimated profits'' means the estimated gross receipts from the sale of recovered wastes reduced by the sum of the (i) estimated average annual maintenance and operating expenses, including utilities and labor, allocable to that portion of the facility which is certified as a treatment facility pursuant to paragraph (a)(1)(i) of this section which produces the recovered waste from which the gross receipts are derived, and (ii) estimated selling expenses. However, in determining expenses to be subtracted neither depreciation nor amortization of the facility is to be taken into account. Estimated profits shall not include any estimated savings to the taxpayer by reason of the taxpayer's reuse or recycling of wastes or other items recovered in connection with the operation of the plant or other property served by the treatment facility.

(3) *Special rules.* The estimates of cost recovery required by subparagraph (2) of this paragraph shall be based on the period referred to in paragraph (a)(6) of this section. Such estimates shall be made at the time the election provided for by section 169 is made and shall also be set out in the application for certification made to the Federal certifying authority. There shall be no redetermination of estimated profits due to unanticipated fluctuations in the market price for wastes or other items, to an unanticipated increase or decrease in the costs of extracting them from the gas or liquid released, or to other unanticipated factors or events occurring after certification.

[T.D. 7116, 36 FR 9013, May 18, 1971; 36 FR 9770, May 28, 1971]

§ 1.169–3 Amortizable basis.

(a) *In general.* The amortizable basis of a certified pollution control facility for the purpose of computing the amortization deduction under section 169 is the adjusted basis of the facility for purposes of determining gain (see part II (section 1011 and following), subchapter O, chapter 1 of the Internal Revenue Code), in conjunction with paragraphs (b), (c), and (d) of this section. The adjusted basis for purposes of determining gain (computed without regard to paragraphs (b), (c), and (d) of this section) of a facility that performs a function in addition to pollution control, or that is used in connection with more than one plant or other property, or both, is determined under §1.169–2(a)(3). For rules as to additions and improvements to such a facility, see paragraph (f) of this section. Before computing the amortization deduction allowable under section 169, the adjusted basis for purposes of determining gain for a facility that is placed in service by a taxpayer after September 10, 2001, and that is qualified property under section 168(k)(2) or §1.168(k)–1, 50-percent bonus depreciation property under section 168(k)(4) or §1.168(k)–1, or qualified New York Liberty Zone property under section 1400L(b) or §1.1400L(b)–1 must be reduced by the amount of the additional first year depreciation deduction allowed or allowable, whichever is greater, under section 168(k) or section 1400L(b), as applicable, for the facility.

(b) *Limitation to post-1968 construction, reconstruction, or erection.* (1) If the construction, reconstruction, or erection was begun before January 1, 1969, there shall be included in the amortizable basis only so much of the adjusted basis of such facility for purposes of determining gain (referred to in paragraph (a) of this section) as is properly attributable under the rules set forth in paragraph (b)(2)(iii) of §1.169–2 to construction, reconstruction, or erection after December 31, 1968. See section 169 (d)(4). For example, assume a certified pollution control facility for which the shortest period authorized under section 167 is 10 years has a cost of $500,000, of which $450,000 is attributable to construction after December 31, 1968. Further, assume such facility does not perform a function in addition to pollution control and is used only in connection with a plant in operation before January 1, 1969. The facility would have an amortizable basis of $450,000 (computed without regard to paragraphs (c) and (d) of this section).

For depreciation of the remaining portion ($50,000) of the cost, see section 169(g) and paragraph (a)(3)(ii) of § 1.169–1. For the definition of the term ''certified pollution control facility'' see paragraph (a) of § 1.169–2.

(2) If the taxpayer elects to begin the 60-month amortization period with the first month of the taxable year succeeding the taxable year in which the facility is completed or acquired and a depreciation deduction is allowable under section 167 (including an additional first-year depreciation allowance under former section 179; for a facility that is acquired by the taxpayer after September 10, 2001, and that is qualified property under section 168(k)(2) or § 1.168(k)–1 or qualified New York Liberty Zone property under section 1400L(b) or § 1.1400L(b)–1, the additional first year depreciation deduction under section 168(k)(1) or 1400L(b), as applicable; and for a facility that is acquired by the taxpayer after May 5, 2003, and that is 50-percent bonus depreciation property under section 168(k)(4) or § 1.168(k)–1, the additional first year depreciation deduction under section 168(k)(4)) with respect to the facility for the taxable year in which it is completed or acquired, the amount determined under paragraph (b)(1) of this section shall be reduced by an amount equal to the amount of the depreciation deduction allowed or allowable, whichever is greater, multiplied by a fraction the numerator of which is the amount determined under paragraph (b)(1) of this section, and the denominator of which is the facility's total cost. The additional first-year allowance for depreciation under former section 179 will be allowable only for the taxable year in which the facility is completed or acquired and only if the taxpayer elects to begin the amortization deduction under section 169 with the taxable year succeeding the taxable year in which such facility is completed or acquired. For a facility that is acquired by a taxpayer after September 10, 2001, and that is qualified property under section 168(k)(2) or § 1.168(k)–1 or qualified New York Liberty Zone property under section 1400L(b) or § 1.1400L(b)–1, see § 1.168(k)–1(f)(4) or § 1.1400L(b)–1(f)(4), as applicable, with respect to when the additional first year depreciation deduction under section 168(k)(1) or 1400L(b) is allowable. For a facility that is acquired by a taxpayer after May 5, 2003, and that is 50-percent bonus depreciation property under section 168(k)(4) or § 1.168(k)–1, see § 1.168(k)–1(f)(4) with respect to when the additional first year depreciation deduction under section 168(k)(4) is allowable.

(c) *Modification for profitmaking abatement works, etc.* If it appears that by reason of estimated profits to be derived through the recovery of wastes or otherwise (as determined by applying the rules prescribed in paragraph (d) of § 1.169–2) a portion or all of the total costs of the certified pollution control facility will be recovered over the period referred to in paragraph (a)(b) of § 1.169–2, its amortizable basis (computed without regard to this paragraph and paragraph (d) of this section) shall be reduced by an amount equal to (1) its amortizable basis (so computed) multiplied by (2) a fraction the numerator of which is such estimated profits and the denominator of which is its adjusted basis for purposes of determining gain. See section 169(e).

(d) *Cases in which the period referred to in paragraph (a)(6) of § 1.169–2 exceeds 15 years.* If as to a certified pollution control facility the period referred to in paragraph (a)(6) of § 1.169–2 exceeds 15 years (determined as of the first day of the first month for which a deduction is allowable under the election made under the section 169(b) and paragraph (a) of § 1.169–4), the amortizable basis of such facility shall be an amount equal to (1) its amortizable basis (computed without regard to this paragraph) multiplied by (2) a fraction the numerator of which is 15 years and the denominator of which is the number of years of such period. See section 169(f) (2)(A).

(e) *Examples.* This section may be illustrated by the following example:

Example 1. The X Corporation, which uses the calendar year as its taxable year, began the installation of a facility on November 1, 1968, and completed the installation on June 30, 1970, at a cost of $400,000. All of the facility qualifies as a certified pollution control facility within the meaning of paragraph (a) of § 1.169–2. $40,000 of such cost is attributable to construction prior to January 1, 1969. The X Corporation elects to take amortization deductions under section 169(a) with respect to the facility and to begin the 60-month amortization period with January 1, 1971. The corporation takes a depreciation deduction under sections 167 and 179 of $10,000 (the amount allowable, of which $2,000 is for additional first year depreciation under section 179) for the last 6 months of 1970. It is estimated that over the period referred to in paragraph (a) (6) of § 1.169–2 (20 years) as to such facility, $80,000 in profits will be realized from the sale of wastes recovered in its operation. The amortizable basis of the facility for purposes of computing the amortization deduction as of January 1, 1971, is $210,600, computed as follows:

(1) Portion of $400,000 cost attributable to post-1968 construction, reconstruction, or erection ...		$360,000
(2) Reduction for portion of depreciation deduction taken for the taxable year in which the facility was completed:		
(a) $10,000 depreciation deduction taken for last 6 months of 1970 including $2,000 for additional first year depreciation under section 179	$10,000	
(b) Multiplied by the amount in line (1) and divided by the total cost of the facility ($360,000/ $400,000)	0.9	$9,000
(3) Subtotal		$351,000
(4) Modification for profitmaking abatement works: Multiply line (3) by estimated profits through waste recovery ($80,000) and divide by the adjusted basis for determining gain of the facility ($400,000).		
(5) Reduction		$70,200
(6) Subtotal		$280,800
(7) Modification for period referred to in paragraph (a)(6) of § 1.169–2 exceeding 15 years: Multiply by 15 years and divide by such period (determined in accordance with paragraph (d) of this section) (20 years)		0.75
(8) Amortizable basis		$210,600

Example 2. Assume the same facts as in example (1) except that the facility is used in connection with a number of separate plants some of which were in operation before January 1, 1969, that the Federal certifying authority certifies that 80 percent of the capacity of the facility is allocable to the plants which were in operation before such date, and that all of the waste recovery is allocable to the portion of the facility used in connection with the plants in operation before January 1, 1969. The amortizable basis of such facility, for purposes of computing the amortization deduction as of January 1, 1971, is $157,950 computed as follows:

(1) Adjusted basis for purposes of determining gain: Multiply percent certified as allocable to plants in operation before January 1, 1969 (80 percent) by cost of entire facility ($400,000)		$320,000
(2) Portion of adjusted basis for determining gain attributable to post-1968 construction, reconstruction, or rection: Multiply line (1) by portion of total cost of facility attributable to post-1968 construction, reconstruction, or erection ($360,000) and divide by the total cost of the facility ($400,000)		$288,000
(3) Reduction for portion of depreciation deduction taken for the taxable year in which the facility was completed:		
(a) $10,000 depreciation deduction taken for last 6 months of 1970 including $2,000 for additional first year depreciation under section 170	$10,000	
(b) Multiplied by the amount in line (2) and divided by the total cost of the facility ($288,000/$400,000)	0.72	$7,200
(4) Subtotal		$280,800
(5) Modification for profitmaking abatement works; Multiply line (4) by estimated profits through waste recovery ($80,000) and divide by the amount in line (1) ($320,000).		
(6) Reduction		$70,200
(7) Subtotal		$210,600
(8) Modification for period referred to in paragraph (a)(6) of § 1.169–2 exceeding 15 years: Multiply by 15 years and divide by such period (determined in accordance with paragraph (d) of this section) (20 years)		0.75
(9) Amortizable basis		$157,950

(f) *Additions or improvements.* (1) If after the completion or acquisition of a certified pollution control facility further expenditures are made for additional construction, reconstruction, or improvements, the cost of such additions or improvements made prior to the beginning of the amortization period shall increase the amortizable basis of such facility, but the cost of additions or improvements made after the amortization period has begun, shall not increase the amortizable basis. See section 169(f)(2)(B).

(2) If expenditures for such additional construction, reconstruction, or improvements result in a facility which is new and is separately certified as a certified pollution control facility as defined in section 169(d)(1) and paragraph (a) of § 1.169–2, and, if proper election is made, such expenditures shall be taken into account in computing under paragraph (a) of this section the amortizable basis of such new and separately certified pollution control facility.

(g) *Effective date for qualified property, 50-percent bonus depreciation property, and qualified New York Liberty Zone property.* This section applies to a certified pollution control facility. This section also applies to a certified pollution control facility that is qualified property under section 168(k)(2) or qualified New York Liberty Zone property under section 1400L(b) acquired by a taxpayer after September 10, 2001, and to a certified pollution control facility that is 50-percent bonus depreciation property under section 168(k)(4) acquired by a taxpayer after May 5, 2003.

[T.D. 7116, 36 FR 9015, May 18, 1971; 36 FR 9770, May 28, 1971, as amended by T.D. 9091, 68 FR 53004, Sept. 8, 2003; T.D. 9283, 71 FR 51746, Aug. 31, 2006]

§ 1.169–4 Time and manner of making elections.

(a) *Election of amortization*—(1) *In general*. Under section 169(b), an election by the taxpayer to take an amortization deduction with respect to a certified pollution control facility and to begin the 60-month amortization period (either with the month following the month in which the facility is completed or acquired, or with the first month of the taxable year succeeding the taxable year in which such facility is completed or acquired) shall be made by a statement to that effect attached to its return for the taxable year in which falls the first month of the 60-month amortization period so elected. Such statement shall include the following information (if not otherwise included in the documents referred to in subdivision (ix) of this subparagraph):

(i) A description clearly identifying each certified pollution control facility for which an amortization deduction is claimed;

(ii) The date on which such facility was completed or acquired (see paragraph (b)(2)(iii) of § 1.169–2);

(iii) The period referred to in paragraph (a)(6) of § 1.169–2 for the facility as of the date the property is placed in service;

(iv) The date as of which the amortization period is to begin;

(v) The date the plant or other property to which the facility is connected began operating (see paragraph (a)(5) of § 1.169–2);

(vi) The total costs and expenditures paid or incurred in the acquisition, construction, and installation of such facility;

(vii) A description of any wastes which the facility will recover during the course of its operation, and a reasonable estimate of the profits which will be realized by the sale of such wastes whether pollutants or otherwise, over the period referred to in paragraph (a)(6) of § 1.169–2 as to the facility. Such estimate shall include a schedule setting forth a detailed computation illustrating how the estimate was arrived at including every element prescribed in the definition of estimated profits in paragraph (d)(2) of § 1.169–2;

(viii) A computation showing the amortizable basis (as defined in § 1.169–3) of the facility as of the first month for which the amortization deduction provided for by section 169(a) is elected; and

(ix)(*a*) A statement that the facility has been certified by the Federal certifying authority, together with a copy of such certification, and a copy of the application for certification which was filed with and approved by the Federal certifying authority or (*b*), if the facility has not been certified by the Federal certifying authority, a statement that application has been made to the proper State certifying authority (see paragraph (c)(2) of § 1.169–2) together with a copy of such application and (except in the case of an election to which subparagraph (4) of this paragraph applies) a copy of the application filed or to be filed with the Federal certifying authority.

If subdivision (ix)(*b*) of this subparagraph applies, within 90 days after receipt by the taxpayer, the certification from the Federal certifying authority shall be filed by the taxpayer with the district director, or with the director of the internal revenue service center, with whom the return referred to in this subparagraph was filed.

(2) *Special rule*. If the return for the taxable year in which falls the first month of the 60-month amortization period to be elected is filed before November 16, 1971, without making the election for such year, then on or before December 31, 1971 (or if there is no State certifying authority in existence on November 16, 1971, on or before the

90th day after such authority is established), the election may be made by a statement attached to an amended income tax return for the taxable year in which falls the first month of the 60-month amortization period so elected. Amended income tax returns or claims for credit or refund must also be filed at this time for other taxable years which are within the amortization period and which are subsequent to the taxable year for which the election is made. Nothing in this paragraph should be construed as extending the time specified in section 6511 within which a claim for credit or refund may be filed.

(3) *Other requirements and considerations.* No method of making the election provided for in section 169(a) other than that prescribed in this section shall be permitted on or after May 18, 1971. A taxpayer which does not elect in the manner prescribed in this section to take amortization deductions with respect to a certified pollution control facility shall not be entitled to such deductions. In the case of a taxpayer which elects prior to May 18, 1971, the statement required by subparagraph (1) of this paragraph shall be attached to its income tax return for either its taxable year in which December 31, 1971, occurs or its taxable year preceding such year.

(4) *Elections filed before February 29, 1972.* If a statement of election required by subparagraph (1) of this paragraph is attached to a return (including an amended return referred to in subparagraph (2) of this paragraph) filed before February 29, 1972, such statement of election need not include a copy of the Federal application to be filed with the Federal certifying authority but a copy of such application must be filed no later than February 29, 1972, by the taxpayer with the district director, or with the director of the internal revenue service center, with whom the return or amended return referred to in this subparagraph was filed.

(b) *Election to discontinue or revoke amortization*—(1) *Election to discontinue.* An election to discontinue the amortization deduction provided by section 169(c) and paragraph (a)(1) of §1.169–1 shall be made by a statement in writing filed with the district director, or with the director of the internal revenue service center, with whom the return of the taxpayer is required to be filed for its taxable year in which falls the first month for which the election terminates. Such statement shall specify the month as of the beginning of which the taxpayer elects to discontinue such deductions. Unless the election to discontinue amortization is one to which subparagraph (2) of this paragraph applies, such statement shall be filed before the beginning of the month specified therein. In addition, such statement shall contain a description clearly identifying the certified pollution control facility with respect to which the taxpayer elects to discontinue the amortization deduction, and, if a certification has previously been issued, a copy of the certification by the Federal certifying authority. If at the time of such election a certification has not been issued (or if one has been issued it has not been filed as provided in paragraph (a)(1) of this section), the taxpayer shall file, with respect to any taxable year or years for which a deduction under section 169 has been taken, a copy of such certification within 90 days after receipt thereof. For purposes of this paragraph, notification to the Secretary or his delegate from the Federal certifying authority that the facility no longer meets the requirements under which certification was originally granted by the State or Federal certifying authority shall have the same effect as a notice from the taxpayer electing to terminate amortization as of the month following the month such facility ceased functioning in accordance with such requirements.

(2) *Revocation of elections made prior to May 18, 1971.* If on or before May 18, 1971, an election under section 169(a) has been made, such election may be revoked (see paragraph (a)(1) of §1.169–1) by filing on or before August 16, 1971, a statement of revocation of an election under section 169(a) in accordance with the requirements in subparagraph (1) of this paragraph for filing a notice to discontinue an election. If such election to revoke is for a period which falls within one or more taxable years for which an income tax return has been filed, amended income tax returns

shall be filed for any such taxable years in which deductions were taken under section 169 on or before August 16, 1971.

[T.D. 7116, 36 FR 9016, May 18, 1971, as amended by T.D. 7135, 36 FR 14183, July 31, 1971; 36 FR 24995, Dec. 28, 1971]
