Example 1. (i) PRS, a calendar-year partnership, has two equal partners, A, an individual, and XYZ, a partnership. As of January 1, 2009, A and XYZ each have an adjusted basis of $50 in their partnership interests. PRS has a $500 applicable debt instrument outstanding. On June 1, 2009, the creditor agrees to cancel the $500 indebtedness. PRS realizes $500 of COD income as a result of the reacquisition. PRS has no other income or loss items for 2009. PRS makes an election under section 108(i) to defer $200 of the $500 of COD income. PRS allocates the $500 of COD income equally between its partners ($250 each). PRS determines that, for each partner, $100 of the COD income amount is the deferred amount, and $150 is the included amount. For 2009, each of A's and XYZ's share of the decrease in PRS's reacquired applicable debt instrument is $250.

(ii) XYZ has two equal partners, individuals X and Y. X and Y share equally in XYZ's liabilities. XYZ allocates the $250 COD income amount from PRS equally between X and Y ($125 each). XYZ determines that X has a deferred amount of $100 and an included amount of $25. All $125 of Y's COD income amount is Y's included amount. For 2009, each of X's and Y's share of XYZ's $250 decrease in liability with respect to the reacquired applicable debt instrument of PRS is $125.

(iii) Under paragraph (b)(3)(ii) of this section, PRS determines that XYZ has a deferred section 752 amount of $50. Therefore, for 2009, of XYZ's $250 share of the decrease in PRS's reacquired applicable debt instrument, $200 is treated as a deemed distribution under section 752(b) and $50 is the deferred section 752 amount.

(iv) Under paragraph (b)(4)(ii) of this section, none of XYZ's $50 deferred section 752 amount is allocated to Y because Y does not have a deferred amount with respect to the reacquired applicable debt interest. XYZ's entire $50 of deferred section 752 amount is allocated to X. Therefore, of X's $125 share of the XYZ's decrease in liability with respect to the reacquired applicable debt instrument of PRS, $75 is treated as a deemed distribution under section 752(b) and $50 is X's deferred section 752 amount. Y's $125 share of XYZ's decrease in liability with respect to the reacquired applicable debt instrument of PRS is treated as a deemed distribution under section 752(b) and none is a deferred section 752 amount.

Example 2. (i) The facts are the same as in *Example 1*, except for the following: XYZ has three partners, X, Y, and Z. The profits and losses of XYZ are shared 25 percent by X, 25 percent by Y, and 50 percent by Z. XYZ allocates its $250 COD income amount from PRS $62.50 to each of X and Y, and $125 to Z. XYZ determines that X has a deferred amount of $50 and an included amount of $12.50, Y has a deferred amount of $0 and an included amount of $62.50, and Z has a deferred amount of $50 and an included amount of $75 with respect to the applicable debt instrument. X's, Y's, and Z's share of XYZ's decrease in liability with respect to the reacquired applicable debt instrument of PRS is $62.50, $62.50 and $125, respectively.

(ii) Under paragraph (b)(4)(ii) of this section, none of XYZ's $50 deferred section 752 amount is allocated to Y because Y does not have a deferred amount with respect to the reacquired applicable debt instrument. XYZ's $50 deferred section 752 amount is allocated to X and Z in proportion to X's and Z's share of XYZ's deferred amount, or $25 each ($50 × ($50/$100)). Therefore, of X's $62.50 share of XYZ's decrease in liability with respect to the reacquired applicable debt instrument, $37.50 is treated as a deemed distribution under section 752(b) and $25 is X's deferred section 752 amount. All of Y's $62.50 share of XYZ's decrease in liability with respect to the reacquired applicable debt instrument is treated as a deemed distribution under section 752(b). Of Z's $125 share of XYZ's decrease in liability with respect to the reacquired applicable debt instrument, $100 is treated as a deemed distribution under section 752(b) and $25 is Z's deferred section 752 amount.

(5) *S corporation partner*—(i) *In general*. If an S corporation partner has a deferred amount with respect to an applicable debt instrument of an electing partnership, such deferred amount is shared pro rata only among those shareholders that are shareholders of the S corporation partner immediately before the reacquisition of the applicable debt instrument.

(ii) *Basis adjustments*. The adjusted basis of a shareholder's stock in an S corporation partner is not increased under section 1367(a)(1) by the shareholder's share of the S corporation partner's deferred amount in the taxable year of the reacquisition. The adjusted basis of a shareholder's stock in an S corporation partner is not decreased under section 1367(a)(2) by the shareholder's share of the S corporation partner's deferred OID deduction in the taxable year in which the deferred OID accrues. The adjusted basis of a shareholder's stock in an S corporation partner is adjusted under section 1367(a) by the shareholder's share of the S corporation partner's share of the electing partnership's deferred items for the taxable year in which the shareholder takes into account its share of such deferred items under this section.

(iii) *Accumulated adjustments account.* The accumulated adjustments account (AAA), as defined in section 1368(e)(1), of an S corporation partner that has a deferred amount with respect to an applicable debt instrument of an electing partnership is not increased by its deferred amount in the taxable year of the reacquisition. The AAA of an S corporation partner is not decreased by its share of any deferred OID deduction in the taxable year in which the deferred OID accrues. The AAA of an S corporation partner is adjusted under section 1368(e) by a shareholder's share of the S corporation partner's share of the electing partnership's deferred items for the S period (as defined in section 1368(e)(2)) in which the shareholder of the S corporation partner takes into account its share of the deferred items under this section.

(6) *Acceleration of deferred items*—(i) *Electing partnership-level events*—(A) *General rules.* Except as provided in paragraph (b)(6)(iii) of this section, a direct or indirect partner's share of an electing partnership's deferred items is accelerated and must be taken into account by such partner—

(*1*) In the taxable year in which the electing partnership liquidates;

(*2*) In the taxable year in which the electing partnership sells, exchanges, transfers (including contributions and distributions), or gifts substantially all of its assets;

(*3*) In the taxable year in which the electing partnership ceases doing business; or

(*4*) In the taxable year that includes the day before the day on which the electing partnership files a petition in a title 11 or similar case.

(B) *Substantially all requirement.* For purposes of this paragraph (b)(6), substantially all of a partnership's assets means assets representing at least 90 percent of the fair market value of the net assets, and at least 70 percent of the fair market value of the gross assets, held by the partnership immediately prior to the sale, exchange, transfer, or gift. For purposes of applying the rule in paragraph (b)(6)(i)(A)(*2*) of this section, a sale, exchange, transfer, or gift by any direct or indirect lower-tier partnership of the electing partnership (lower-tier partnership) of all or part of its assets is not treated as a sale, exchange, transfer, or gift of the assets of any partnership that holds, directly or indirectly, an interest in such lower-tier partnership. However, for purposes of applying the rule in paragraph (b)(6)(i)(A)(*2*) of this section, a sale, exchange, transfer, or gift of substantially all of the assets of a transferee partnership (as described in paragraph (b)(6)(iii)(A)(*1*) of this section), or of a lower-tier partnership that received assets of the electing partnership from a transferee partnership or another lower-tier partnership in a transaction governed all or in part by section 721, is treated as a sale, exchange, transfer, or gift by the holder of an interest in such transferee partnership or lower-tier partnership of its entire interest in that transferee partnership or lower-tier partnership.

(ii) *Direct or indirect partner-level events*—(A) *General rules.* Except as provided in paragraph (b)(6)(iii) of this section, a direct or indirect partner's share of an electing partnership's deferred items with respect to a separate interest is accelerated and must be taken into account by such partner in the taxable year in which—

(*1*) The partner dies or liquidates;

(*2*) The partner sells, exchanges (including redemptions treated as exchanges under section 302), transfers (including contributions and distributions), or gifts (including transfers treated as gifts under section 1041) all or a portion of its separate interest;

(*3*) The partner's separate interest is redeemed within the meaning of paragraph (b)(6)(ii)(B)(*2*) of this section; or

(*4*) The partner abandons its separate interest.

(B) *Meaning of terms; special rules*—(*1*) *Partial transfers*. For purposes of paragraph (b)(6)(ii)(A)(*2*) of this section, if a partner sells, exchanges (including redemptions treated as exchanges under section 302), transfers (including contributions and distributions), or gifts (including transfers treated as gifts under section 1041) a portion of its separate interest, such partner's share of the electing partnership's deferred items with respect to the separate interest proportionate to the separate interest sold, exchanged, transferred, or gifted is accelerated and must be taken into account by such partner.

(*2*) *Redemptions*. For purposes of paragraph (b)(6)(ii)(A)(*3*) of this section, a partner's separate interest is redeemed if the partner receives a distribution of cash and/or property in complete liquidation of such separate interest.

(*3*) *S corporation partners*. In addition to the rules in paragraphs (b)(6)(i) and (ii) of this section, an S corporation partner's share of the electing partnership's deferred items is accelerated and the shareholders of the S corporation partner must take into account their respective shares of the S corporation partner's share of the electing partnership's deferred items in the taxable year in which the S corporation partner's election under section 1362(a) terminates.

(*4*) *C corporation partners*. In addition to the rules in paragraphs (b)(6)(i), (ii), and (iii) of this section, the acceleration rules in §1.108(i)–1T(b) and the earnings and profits rules in §1.108(i)–1T(d) apply to partners that are electing corporations.

(iii) *Events not constituting acceleration*. Notwithstanding the rules in paragraphs (b)(6)(i) and (ii) of this section, a direct or indirect partner's share of an electing partnership's deferred items with respect to a separate interest is not accelerated by any of the events described in this paragraph (b)(6)(iii).

(A) *Section 721 contributions*—(*1*) *Electing partnership contributions*. A direct or indirect partner's share of an electing partnership's deferred items is not accelerated if the electing partnership contributes all or a portion of its assets in a transaction governed all or in part by section 721(a) to another partnership (transferee partnership) in exchange for an interest in the transferee partnership provided that the electing partnership does not terminate under section 708(b)(1)(A) or transfer its assets and liabilities in a transaction described in section 708(b)(2)(A) or section 708(b)(2)(B). *See* paragraph (b)(6)(iii)(D) of this section for transactions governed by section 708(b)(2)(A). Notwithstanding the rules in this paragraph (b)(6)(iii)(A)(*1*), the rules in paragraphs (b)(6)(i)(A) and (b)(6)(ii)(A) of this section apply to any part of the transaction to which section 721(a) does not apply.

(*2*) *Partner contributions*. A direct or indirect partner's share of an electing partnership's deferred items with respect to a separate interest is not accelerated if the holder of such interest (contributing partner) contributes its entire separate interest (contributed separate interest) in a transaction governed all or in part by section 721(a) to another partnership (transferee partnership) in exchange for an interest in the transferee partnership provided that the partnership in which the separate interest is held does not terminate under section 708(b)(1)(A) or transfer its assets and liabilities in a transaction described in section 708(b)(2)(A) or section 708(b)(2)(B). *See* paragraph (b)(6)(iii)(D) of this section for transactions governed by section 708(b)(2)(A). The transferee partnership becomes subject to section 108(i), including all reporting requirements under this section, with respect to the contributing partner's share of the electing partnership's deferred items associated with the contributed separate interest. The transferee partnership must allocate and report the share of the electing partnership's deferred items that is associated with the contributed separate interest to the contributing partner to the same extent that such share of the electing partnership's deferred items would have been allocated and reported to the contributing partner in the absence of such contribution. Notwithstanding the rules in this paragraph (b)(6)(iii)(A)(*2*), the rules in paragraph (b)(6)(ii)(A) of this section apply to any part of the transaction to which section 721(a) does not apply.

(B) *Section 1031 exchanges.* A direct or indirect partner's share of the electing partnership's deferred items is not accelerated if the electing partnership transfers property held for productive use in a trade or business or for investment in exchange for property of like kind which is to be held either for productive use in a trade or business or for investment in a transaction to which section 1031(a)(1) applies. Notwithstanding the rules in this paragraph (b)(6)(iii)(B), to the extent the electing partnership receives money or other property which does not meet the requirements of section 1031(a) (boot) in the exchange, a proportionate amount of the property transferred by the electing partnership equal to the proportion of the boot to the total consideration received in the exchange shall be treated as sold for purposes of paragraph (b)(6)(i)(A)(*2*) of this section.

(C) *Section 708(b)(1)(B) terminations.* A direct or indirect partner's share of the deferred items of an electing partnership with respect to a separate interest is not accelerated if the electing partnership or a partnership that is a direct or indirect partner of the electing partnership terminates under section 708(b)(1)(B). Notwithstanding the rules in this paragraph (b)(6)(iii)(C), the rules in paragraph (b)(6)(ii)(A) of this section apply to the event that causes the termination under section 708(b)(1)(B) to the extent not otherwise excepted under paragraph (b)(6)(iii) of this section.

(D) *Section 708(b)(2)(A) mergers or consolidations.* A direct or indirect partner's share of the deferred items of an electing partnership with respect to a separate interest is not accelerated if the partnership in which the separate interest is held (the merger transaction partnership) merges into or consolidates with another partnership in a transaction to which section 708(b)(2)(A) applies. The resulting partnership or new partnership, as determined under §1.708–1(c)(1), becomes subject to section 108(i), including all reporting requirements under this section, to the same extent that the merger transaction partnership was so subject prior to the transaction, and must allocate and report any merger transaction partnership's deferred items to the same extent and to the same partners that the merger transaction partnership allocated and reported such items prior to such transaction. Notwithstanding the rules in this paragraph (b)(6)(iii)(D), the rules in paragraphs (b)(6)(i)(A)(*2*) and (b)(6)(ii)(A)(*2*) of this section apply to that portion of the transaction that is treated as a sale, and the rules of (b)(6)(ii)(A)(*3*) apply if, as part of the transaction, the partner's separate interest is redeemed and the partner does not receive an interest in the resulting partnership with respect to such separate interest.

(E) *Certain distributions of separate interests.* If a partnership (upper-tier partnership) that is a direct or indirect partner of an electing partnership distributes its entire separate interest (distributed separate interest) to one or more of its partners (distributee partners) that have a share of the electing partnership's deferred items from upper-tier partnership with respect to the distributed separate interest, the distributee partners' shares of the electing partnership's deferred items with respect to such distributed separate interest are not accelerated. The partnership, the interest in which was distributed, must allocate and report the share of the electing partnership's deferred items associated with the distributed separate interest only to such distributee partners that had a share of the electing partnership's deferred items from the upper-tier partnership with respect to the distributed separate interest prior to the distribution.

(F) *Section 381 transactions.* A C corporation partner's share of an electing partnership's deferred items is not accelerated if, as part of a transaction described in paragraph (b)(6)(ii)(A) of this section, the assets of the C corporation partner are acquired by another C corporation (acquiring C corporation) in a transaction that is treated, under §1.108(i)–1T(b)(2)(ii)(B), as a transaction to which section 381(a) applies. An S corporation partner's share of an electing partnership's deferred items is not accelerated if, as part of a transaction described in paragraph (b)(6)(ii)(A) of this section, the assets of the S corporation partner are acquired by another S corporation (acquiring S corporation) in a transaction to which section 381(a) applies. In such cases, the acquiring C corporation or acquiring S corporation, as the case may be, succeeds to the C corporation partner's or the S corporation partner's remaining share of the electing partnership's deferred items and becomes subject to section 108(i), including all reporting requirements under this section, as if the acquiring C corporation or acquiring S corporation were the C corporation partner or the S corporation partner, respectively. The acquiring S corporation must allocate and report the S corporation partner's deferred items to the same extent and only to those shareholders of the S corporation partner who had a share of the S corporation partner's deferred items from the electing partnership prior to the transaction.

(G) *Intercompany transfers.* A C corporation partner's share of an electing partnership's deferred items is not accelerated if, as part of a transaction described in paragraph (b)(6)(ii)(A) of this section, the C corporation partner transfers its entire separate interest in an intercompany transaction, as described in §1.1502–13(b)(1)(i), and the electing partnership does not terminate under section 708(b)(1)(A) as a result of the intercompany transaction.

(H) *Retirement of a debt instrument. See* §1.108(i)–3T(c)(1) for rules regarding the retirement of a debt instrument that is subject to section 108(i).

(I) *Other non-acceleration events.* A direct or indirect partner's share of an electing partnership's deferred items is not accelerated with respect to any transaction if the Commissioner makes a determination by published guidance that such transaction is not an acceleration event under the rules of this paragraph (b)(6).

(iv) *Related partnerships.* A direct or indirect partner's share of a related partnership's deferred OID deduction (as determined in paragraph (d)(2) of this section) that has not previously been taken into account is accelerated and taken into account by the direct or indirect partner in the taxable year in which, and to the extent that, deferred COD income attributable to the related partnership's deferred OID deduction is taken into account by the electing entity or its owners.

(v) *Examples.* The following examples illustrate the rules under this paragraph (b)(6):

Example 1. Meaning of "separate interest." (i) Electing partnership (EP) has three partners, MT1, MT2, and UT, each of which is a partnership. The partners of MT1 are X and UT. The partners of MT2 are Y, UT, and B. The partners of UT are A, B, and C. In addition to their interests in the partnerships noted, MT1, MT2, and UT own other assets.

(ii) Within the meaning of paragraph (a)(29) of §1.108(i)–0T, A and C each hold one separate interest (their interests in UT), B holds two separate interests (its interests in UT and MT2), UT holds three separate interests (its interests in MT1, MT2, and EP), MT1 and MT2 each hold one separate interest (their interests in EP), and X and Y each hold one separate interest (their interests in MT1 and MT2, respectively) with respect to EP.

Example 2. Distributions of separate interests in an electing partnership. (i) The facts are the same as in *Example 1*, except that A, as a direct partner of UT, has a share of EP's deferred items with respect to UT's interests in MT1 and EP. A does not have a share of EP's deferred items with respect to UT's interest in MT2. B, as a direct partner of UT, has a share of EP's deferred items with respect to UT's interest in MT1 and MT2, but not with respect to UT's interest in EP. B also has a share of EP's deferred items with respect to its separate interest in MT2. C does not have any share of EP's deferred items with respect to UT's interest in MT1, MT2, or EP.

(ii) UT distributes 40 percent of its separate interest in MT1 to A in redemption of A's interest in UT. Under paragraphs (b)(6)(ii)(A)(*2*) and (b)(6)(ii)(B)(*1*) of this section, a portion of UT's interest in MT1 has been transferred and a corresponding portion (40 percent) of UT's share of EP's deferred items from MT1 is accelerated. Thus, 40 percent of A's and B's share of EP's deferred items from UT with respect to UT's interest in MT1 is accelerated. Further, because A's interest in UT is redeemed within the meaning of paragraph (b)(6)(ii)(B)(*2*) of this section, all of A's shares of EP's deferred items from UT are accelerated under paragraph (b)(6)(ii)(A)(*3*) of this section. UT continues to allocate and report to B its remaining share of EP's deferred items from its separate interest in MT1 that was not distributed to A.

(iii) UT distributes its entire separate interest in MT1 to B (other than in redemption of B's interest in UT). Under paragraph (b)(6)(ii)(A)(*2*) of this section, UT's share of EP's deferred items from MT1 would be accelerated. However, because UT distributes its entire separate interest in MT1 to B, B's share of EP's deferred items from UT with respect to UT's separate interest in MT1 is not accelerated under paragraph (b)(6)(iii)(E) of this section. MT1 allocates and reports to B B's share of EP's deferred items from UT's separate interest in MT1 that was distributed to B.

(iv) UT distributes its entire separate interest in MT1 to A and B (other than in redemption of their interests in UT). Under paragraph (b)(6)(iii)(E) of this section, none of A's or B's shares of EP's deferred items from UT with respect to UT's separate interest in MT1 is accelerated, and MT1 allocates and reports to A and B their respective share of EP's deferred items from UT's separate interest in MT1 that was distributed to A and B.

Example 3. Partial sale of interest by an indirect partner. (i) Individual A holds a 50 percent partnership interest in UTP, a partnership that holds a 50 percent interest in EP, a partnership that makes an election to defer COD income under section 108(i). A's share of UTP's deferred amount with respect to EP's election under section 108(i) is $100. During a taxable year within the deferral period, A sells 25 percent of his partnership interest in UTP to an unrelated third party.

(ii) Under paragraphs (b)(6)(ii)(A)(*2*) and (b)(6)(ii)(B)(*1*) of this section, 25 percent of A's $100 deferred amount is accelerated as a result of A's partial sale of his interest in UTP. Thus, A must recognize $25 of his deferred amount in the taxable year of the sale. A's remaining deferred amount is $75.

Example 4. Section 708(b)(1)(B) termination of electing partnership. (i) A and B are equal partners in partnership AB. On January 1, 2009, AB reacquires an applicable debt instrument and makes an election under section 108(i) to defer $400 of COD income. A and B each have a deferred amount with respect to the applicable debt instrument of $200. On January 1, 2010, A sells its entire 50 percent interest in AB to C in a transfer that terminates the partnership under section 708(b)(1)(B).

(ii) Under paragraph (b)(6)(iii)(C) of this section, the technical termination of AB under section 708(b)(1)(B) does not cause A's or B's shares of AB's deferred items to be accelerated. However, A's $200 deferred amount is accelerated under paragraph (b)(6)(ii)(A)(*2*) of this section as a result of the sale.

Example 5. Section 708(b)(2)(A) mergers. (i) A, B, and C are equal partners in partnership X, which has made an election under section 108(i) to defer $150 of COD income. The fair market value of each interest in partnership X is $100. A, B, and C each has a deferred amount of $50 with respect to partnership X's election under section 108(i). E, F, and G are partners in partnership Y. Partnership X and partnership Y merge in a taxable year during the deferral period of partnership X's election under section 108(i). Under section 708(b)(2)(A), the resulting partnership is considered a continuation of partnership Y and partnership X is considered terminated. Under state law, partnerships X and Y undertake the assets-over form of §1.708–1(c)(3)(i) to accomplish the merger. C does not want to become a partner in partnership Y, and partnership X does not have the resources to redeem C's interest before the merger. C, partnership X, and partnership Y enter into a merger agreement that satisfies the requirements of §1.708–1(c)(4) and specifies that partnership Y will purchase C's interest in partnership X for $100 before the merger, and as part of the agreement, C consents to treat the transaction in a manner that is consistent with the agreement. As part of the merger, partnership X receives from partnership Y $100 (which will be distributed to C immediately before the merger), $100 (which will be distributed equally to A and B ($50 each)), and interests in partnership Y with a value of $100 (which will be distributed equally to A and B) in exchange for partnership X's assets and liabilities.

(ii) Under the general rule of paragraph (b)(6)(iii)(D) of this section, and except as provided below, the deferred items of partnership X are not accelerated as a result of the merger with partnership Y. Partnership Y, the resulting partnership that is considered the continuation of partnership X, becomes subject to section 108(i), including all reporting requirements under section 108(i), to the same extent that partnership X was subject to such rules. Under paragraph (b)(6)(iii)(D) of this section, partnership Y must allocate and report partnership X's deferred items to A and B in the same manner as partnership X had prior to the merger transaction.

(iii) Under §1.708–1(c)(4), C is treated as selling its interest in partnership X immediately before the merger. As a result, C's $50 deferred amount is accelerated under paragraph (b)(6)(ii)(A)(*2*) of this section.

(iv) Under section 707(a)(2)(B), partnership X is deemed to have sold a portion of its assets to partnership Y. Because partnership X is not treated as selling substantially all of its assets under paragraph (b)(6)(i)(B) of this section, A's and B's deferred amounts are not accelerated under paragraph (b)(6)(i)(A)(*2*) of this section.

(v) Because A's and B's interests in partnership X are redeemed within the meaning of paragraph (b)(6)(ii)(B)(*2*) of this section, all of their shares of partnership X's deferred items would be accelerated under paragraph (b)(6)(ii)(A)(*3*). However, because they receive an interest in partnership Y in the merger, none of A's and B's share of partnership X's deferred items is accelerated.

(7) *Withholding under section 1446.* See section 1446 regarding withholding by a partnership on a foreign partner's share of income effectively connected with a U.S. trade or business.

(c) *Specific rules applicable to S corporations*—(1) *Deferred COD income.* An electing S corporation's COD income deferred under section 108(i) (an S corporation's deferred COD income) is shared pro rata among those shareholders that are shareholders of the electing S corporation immediately before the reacquisition of the applicable debt instrument. Any COD income deferred under section 108(i) is taken into account under section 1366(a) by those shareholders in the inclusion period, or earlier upon the occurrence of an acceleration event described in paragraph (c)(3) of this section.

(2) *Basis adjustments and accumulated adjustments account*—(i) *Basis adjustments.* The adjusted basis of a shareholder's stock in an electing S corporation is not increased under section 1367(a)(1) by the shareholder's share of the S corporation's deferred COD income in the taxable year of the reacquisition. The adjusted basis of a shareholder's stock in an electing S corporation or a related S corporation is not decreased under section 1367(a)(2) by the shareholder's share of the S corporation's deferred OID deduction in the taxable year in which the deferred OID accrues. The adjusted basis of a shareholder's stock in an electing S corporation or a related S corporation is adjusted under section 1367(a) by the shareholder's share of the S corporation's deferred items for the taxable year in which the shareholder takes into account its share of the deferred items under this section.

(ii) *Accumulated adjustments account.* The AAA of an electing S corporation is not increased by the S corporation's deferred COD income in the taxable year of a reacquisition. The AAA of an electing S corporation or a related S corporation is not decreased by the S corporation's deferred OID deduction in the taxable year in which the deferred OID accrues. The AAA of an electing S corporation or a related S corporation is adjusted under section 1368(e) by a shareholder's share of the S corporation's deferred items for the S period (as defined in section 1368(e)(2)) in which a shareholder of the S corporation takes into account its share of the deferred items under this section.

(3) *Acceleration of deferred items*—(i) *Electing S corporation-level events*—(A) *General rules.* Except as provided in paragraph (c)(3)(iii) of this section, a shareholder's share of an electing S corporation's deferred items is accelerated and must be taken into account by such shareholder—

(*1*) In the taxable year in which the electing S corporation liquidates;

(*2*) In the taxable year in which the electing S corporation sells, exchanges, transfers (including contributions and distributions), or gifts substantially all of its assets;

(*3*) In the taxable year in which the electing S corporation ceases doing business;

(*4*) In the taxable year in which the electing S corporation's election under section 1362(a) terminates; or

(*5*) In the taxable year that includes the day before the day on which the electing S corporation files a petition in a title 11 or similar case.

(B) *Substantially all requirement.* For purposes of this paragraph (c)(3), substantially all of an electing S corporation's or partnership's assets means assets representing at least 90 percent of the fair market value of the net assets, and at least 70 percent of the fair market value of the gross assets, held by the S corporation or partnership immediately prior to the sale, exchange, transfer, or gift. For purposes of applying the rule in paragraph (c)(3)(i)(A)(*2*) of this section, a sale, exchange, transfer, or gift by any direct or indirect lower-tier partnership of the electing S corporation (lower-tier partnership) of all or part of its assets is not treated as a sale, exchange, transfer, or gift of the assets of any person that holds, directly or indirectly, an interest in such lower-tier partnership. However, for purposes of applying the rule in paragraph (c)(3)(i)(A)(*2*) of this section, a sale, exchange, transfer, or gift of substantially all of the assets of a transferee partnership (as described in paragraph (c)(3)(iii)(A) of this section), or of a lower-tier partnership that received assets of the electing S corporation from a transferee partnership of the electing S corporation or another lower-tier partnership in a transaction governed all or in part by section 721, is treated as a sale, exchange, transfer, or gift by the holder of an interest in such transferee partnership or lower-tier partnership of its entire interest in that transferee partnership or lower-tier partnership.

(ii) *Shareholder events*—(A) *General rules*. Except as provided in paragraph (c)(3)(iii) of this section, a shareholder's share of an electing S corporation's deferred items is accelerated and must be taken into account by such shareholder in the taxable year in which—

(*1*) The shareholder dies;

(*2*) The shareholder sells, exchanges (including redemptions treated as exchanges under section 302), transfers (including contributions and distributions), or gifts (including transfers treated as gifts under section 1041) all or a portion of its interest in the electing S corporation; or

(*3*) The shareholder abandons its interest in the electing S corporation.

(B) *Partial transfers*. For purposes of paragraph (c)(3)(ii)(A)(*2*) of this section, if a shareholder of an electing S corporation sells, exchanges (including redemptions treated as exchanges under section 302), transfers, or gifts (including transfers treated as gifts under section 1041) a portion of its interest in the electing S corporation, such shareholder's share of the electing S corporation's deferred items proportionate to the interest that was sold, exchanged, transferred, or gifted is accelerated and must be taken into account by such shareholder.

(iii) *Events not constituting acceleration*. Notwithstanding the rules in paragraphs (c)(3)(i) and (ii) of this section, a shareholder's share of an electing S corporation's deferred items is not accelerated by any of the events described in this paragraph (c)(3)(iii).

(A) *Electing S corporation's contributions*. A shareholder's share of an electing S corporation's deferred items is not accelerated if the electing S corporation contributes all or a portion of its assets in a transaction governed all or in part by section 721(a) to a partnership (transferee partnership) in exchange for an interest in the transferee partnership. Notwithstanding the rules in this paragraph (c)(3)(iii)(A), the rules in paragraph (c)(3)(i)(A) of this section apply to any part of the transaction to which section 721(a) does not apply.

(B) *Section 1031 exchanges*. A shareholder's share of an electing S corporation's deferred items is not accelerated if the electing S corporation transfers property held for productive use in a trade or business or for investment in exchange for property of like kind which is to be held either for productive use in a trade or business or for investment in a transaction to which section 1031(a)(1) applies. Notwithstanding the rules in this paragraph (c)(3)(iii)(B), to the extent the electing S corporation receives money or other property which does not meet the requirements of section 1031(a) (boot) in the exchange, a proportionate amount of the property transferred by the electing S corporation equal to the proportion of the boot to the total consideration received in the exchange shall be treated as sold for purposes of paragraph (c)(3)(i)(A)(*2*) of this section.

(C) *Section 381 transactions*. A shareholder's share of an electing S corporation's deferred items is not accelerated if, as part of a transaction described in paragraph (c)(3)(i)(A) of this section, the electing S corporation's assets are acquired by another S corporation (acquiring S corporation) in a transaction to which section 381(a) applies. In such a case, the acquiring S corporation succeeds to the electing S corporation's remaining deferred items and becomes subject to section 108(i), including all reporting requirements under this section, as if the acquiring S corporation were the electing S corporation. The acquiring S corporation must allocate and report the electing S corporation's deferred items to the same extent and only to those shareholders who had a share of the electing S corporation's deferred items prior to the transaction.

(D) *Retirement of a debt instrument*. *See* §1.108(i)–3T(c)(1) for rules regarding the retirement of a debt instrument that is subject to section 108(i).

(E) *Other non-acceleration events*. A shareholder's share of an electing S corporation's deferred items is not accelerated with respect to any transaction if the Commissioner makes a determination by published guidance that such transaction is not an acceleration event under the rules of this paragraph (c)(3).

(iv) *Related S corporations.* A shareholder's share of a related S corporation's deferred OID deduction (as determined in paragraph (d)(2) of this section) that has not previously been taken into account is accelerated and taken into account by the shareholder in the taxable year in which, and to the extent that, deferred COD income attributable to the related S corporation's deferred OID deduction is taken into account by the electing entity or its owners.

(d) *General rules applicable to partnerships and S corporations*—(1) *Applicable debt instrument (trade or business requirement).* The determination of whether a debt instrument issued by a partnership or an S corporation is treated as a debt instrument issued in connection with the conduct of a trade or business by the partnership or S corporation for purposes of this section is based on all the facts and circumstances. However, a debt instrument issued by a partnership or an S corporation shall be treated as an applicable debt instrument for purposes of this section if the electing partnership or electing S corporation can establish that—

(i) The gross fair market value of the trade or business assets of the partnership or S corporation that issued the debt instrument represented at least 80 percent of the gross fair market value of that partnership's or S corporation's total assets on the date of issuance;

(ii) The trade or business expenditures of the partnership or S corporation that issued the debt instrument represented at least 80 percent of the partnership's or S corporation's total expenditures for the taxable year of issuance;

(iii) At least 95 percent of interest paid or accrued on the debt instrument issued by the partnership or S corporation was allocated to one or more trade or business expenditures under §1.163–8T for the taxable year of issuance;

(iv) At least 95 percent of the proceeds from the debt instrument issued by the partnership or S corporation were used by the partnership or S corporation to acquire one or more trades or businesses within six months from the date of issuance; or

(v) The partnership or S corporation issued the debt instrument to a seller of a trade or business to acquire the trade or business.

(2) *Deferral of OID at entity level*—(i) *In general.* For each taxable year during the deferral period, an issuing entity determines the amount of its deferred OID deduction with respect to a debt instrument, if any. An issuing entity's deferred OID deduction for a taxable year is the lesser of:

(A) The OID that accrues in a current taxable year during the deferral period with respect to the debt instrument (less any of such OID that is allowed as a deduction in the current taxable year as a result of an acceleration event), or

(B) The excess, if any, of the electing entity's deferred COD income (less the aggregate amount of such deferred COD income that has been included in income in the current taxable year and any previous taxable year during the deferral period) over the aggregate amount of OID that accrued in previous taxable years during the deferral period with respect to the debt instrument (less the aggregate amount of such OID that has been allowed as a deduction in the current taxable year and any previous taxable year during the deferral period).

(ii) *Excess deferred OID deduction.* If, as a result of an acceleration event during a taxable year in the deferral period, an issuing entity's aggregate deferred OID deduction for previous taxable years with respect to a debt instrument (less the aggregate amount of such deferred OID deduction that has been allowed as a deduction in a previous taxable year during the deferral period) exceeds the amount of the electing entity's deferred COD income (less the aggregate amount of such deferred COD income that has been included in income in the current taxable year and any previous taxable year during the deferral period), the excess deferred OID deduction shall be allowed as a deduction in the taxable year in which the acceleration event occurs.

(iii) *Examples.* The following examples illustrate the rules under paragraph (d)(2) of this section:

Example 1. Partner joins partnership during deferral period. (i) A and B each hold a 50 percent interest in AB partnership, a calendar-year partnership. On January 1, 2009, AB partnership issues a new debt instrument with OID and uses all of the proceeds to reacquire an outstanding applicable debt instrument of AB partnership, realizing $100 of COD income, and makes an election under section 108(i) to defer $50 of the COD income. During the deferral period, a total of $150 of OID accrues on the new debt instrument issued as part of the reacquisition. A and B each have a deferred amount of $25 with respect to the applicable debt instrument reacquired by AB partnership. For 2009, $28 of OID accrues on the new debt instrument and A and B are each allocated $14 of accrued OID with respect to the new debt instrument. On January 1, 2010, C contributes cash to AB partnership in exchange for a ⅓ partnership interest. For 2010, $29 of OID accrues on the new debt instrument, and A, B, and C are each allocated $9.67 of accrued OID.

(ii) Under paragraph (d)(2) of this section, AB partnership's deferred OID deduction for 2009 is the lesser of: $28 of OID that accrues on the new debt instrument in 2009, or the excess of AB partnership's deferred COD income of $50 over the aggregate amount of OID that accrued on the debt instrument in previous taxable years during the deferral period of $0, or $50. Thus, all $28 of the OID that accrues on the debt instrument in 2009 is deferred under section 108(i).

(iii) Under paragraph (d)(2) of this section, AB partnership's deferred OID deduction for 2010 is the lesser of: $29 of OID that accrues on the new debt instrument in 2010, or the excess of AB partnership's deferred COD income of $50 over the aggregate amount of OID that accrued on the debt instrument in previous taxable years during the deferral period of $28, or $22. Thus, $22 of the $29 of OID that accrues in 2010 is deferred under section 108(i). A, B, and C will each defer $7.33 of the $9.67 of accrued OID that was allocated to each of them.

Example 2. Acceleration of deferred items during deferral period. (i) On January 1, 2009, ABC partnership, a calendar-year partnership with three partners, issues a new debt instrument with OID and uses all of the proceeds to reacquire an outstanding applicable debt instrument of ABC partnership. ABC partnership realizes $150 of COD income and makes an election under section 108(i) to defer the $150 of COD income. A's deferred amount with respect to the applicable debt instrument is $75, while B and C each have a deferred amount of $37.50. In 2009, $28 of OID accrues on the new debt instrument and is allocated $7.00 to A and $10.50 to each of B and C. In 2010, $29 of OID accrues on the new debt instrument and is allocated $7.25 to A and $10.87 to each of B and C. In 2011, $30 of OID accrues on the new debt instrument and is allocated $7.50 to A and $11.25 to each of B and C. In 2012, $31 of OID accrues on the new debt instrument and is allocated $7.75 to A and $11.62 to each of B and C. On December 31, 2012, A's entire share of ABC partnership's deferred items is accelerated under paragraph (b)(6) of this section. For 2012, A includes $75 of COD income in income and is allowed a deduction of $21.75 for A's share of ABC partnership's deferred OID deduction for taxable years 2009 through 2011, and a deduction of $7.75 for A's share of ABC partnership's OID that accrues on the debt instrument in 2012.

(ii) Under paragraph (d)(2) of this section, ABC partnership's deferred OID deduction for 2012 is the lesser of: $23.35 ($31 of OID that accrues on the new debt instrument in 2012 less $7.75 of this OID that is allowed as a deduction to A in 2012) or $9.75 (the excess of $75 (ABC partnership's deferred COD income of $150 less A's share of ABC partnership's deferred COD income that is included in A's income for 2012 of $75) over $65.25 (the aggregate amount of OID that accrued in previous taxable years of $87 less the aggregate amount of such OID that has been allowed as a deduction by A in 2012 of $21.75)). Thus, of the $31 of OID that accrues in 2012, $9.75 is deferred under section 108(i).

(3) *Effect of an election under section 108(i) on recapture amounts under section 465(e)*—(i) *In general.* To the extent that a decrease in a partner's or shareholder's amount at risk (as defined in section 465) in an activity as a result of a reacquisition of an applicable debt instrument would cause a partner with a deferred amount or a shareholder with a share of the S corporation's deferred COD income to have income under section 465(e) in the taxable year of the reacquisition, such decrease (not to exceed the partner's deferred amount or the shareholder's share of the S corporation's deferred COD income with respect to that applicable debt instrument) (deferred section 465 amount) shall not be taken into account for purposes of determining the partner's or shareholder's amount at risk in an activity under section 465 as of the close of the taxable year of the reacquisition. A partner's or shareholder's deferred section 465 amount is treated as a decrease in the partner's or shareholder's amount at risk in an activity at the same time, and to the extent remaining in same amount, as

the partner recognizes its deferred amount or the S corporation shareholder recognizes its share of the S corporation's deferred COD income.

(ii) *Example.* The following example illustrates the rules in paragraph (d)(3) of this section:

Example. (i) PRS is a calendar-year partnership with two equal partners, individuals A and B. PRS is engaged in an activity described in section 465(c) (Activity). PRS has a $500 recourse applicable debt instrument outstanding. Each partner's amount at risk on January 1, 2009 is $50. On June 1, 2009, the creditor agrees to cancel the $500 indebtedness. PRS realizes $500 of COD income as a result of the reacquisition. The partners' share of the liabilities of PRS decreases by $500 under section 752(b), and each partner's amount at risk is decreased by $250. Other than the $500 of COD income, PRS's income and expenses for 2009 are equal. PRS makes an election under section 108(i) to defer $200 of the $500 COD income realized in connection with the reacquisition. PRS allocates the $500 of COD income equally between its partners, A and B. A and B each have a COD income amount of $250 with respect to the applicable debt instrument. PRS determines that, for both partners A and B, $100 of the $250 COD income amount is the deferred amount, and $150 is the included amount. Beginning in each taxable year 2014 through 2018, A and B each include $20 of the deferred amount in gross income.

(ii) Under paragraph (d)(3)(i) of this section, $50 of the $250 decrease in A's and B's amount at risk in Activity is the deferred section 465 amount for each of A and B and is not taken into account for purposes of determining A's and B's amount at risk in Activity at the close of 2009. In taxable year 2014, A's and B's amount at risk in Activity is decreased by $20 (deferred section 465 amount that equals the deferred amount included in A's and B's gross income in 2014). In taxable year 2015, A's and B's amount at risk in Activity is decreased by $20 for the deferred section 465 amount that equals the deferred amount included in A's and B's gross income in 2015. In taxable year 2016, A's and B's amount at risk in Activity is decreased by $10 (the remaining amount of the deferred section 465 amount).

(e) *Election procedures and reporting requirements*—(1) *Partnerships*—(i) *In general.* A partnership makes an election under section 108(i) by following procedures outlined in guidance and applicable forms and instructions issued by the Commissioner. An electing partnership (or its successor) must provide to its partners certain information as required by guidance and applicable forms and instructions issued by the Commissioner.

(ii) *Tiered pass-through entities.* A partnership that is a direct or indirect partner of an electing partnership (or its successor) or a related partnership or an S corporation partner must provide to its partners or shareholders, as the case may be, certain information as required by guidance and applicable forms and instructions issued by the Commissioner.

(iii) *Related partnerships.* A related partnership must provide to its partners certain information as required by guidance and applicable forms and instructions issued by the Commissioner.

(2) *S corporations*—(i) *In general.* An S corporation makes an election under section 108(i) by following procedures outlined in guidance and applicable forms and instructions issued by the Commissioner. An electing S corporation (or its successor) must provide to its shareholders certain information as required by guidance and applicable forms and instructions issued by the Commissioner.

(ii) *Related S corporations.* A related S corporation must provide to its shareholders certain information as required by guidance and applicable forms and instructions issued by the Commissioner.

(f) *Effective/applicability date.* For the applicability dates of this section, *see* § 1.108(i)–0T(b).

(g) *Expiration date.* This section expires on August 9, 2013.

[T.D. 9498, 75 FR 49386, Aug. 13, 2010]

§ 1.108(i)–3T Rules for the deduction of OID (temporary).

(a) *Deemed debt-for-debt exchanges*—(1) *In general.* For purposes of section 108(i)(2) (relating to deferred OID deductions that arise in certain debt-for-debt exchanges involving the reacquisition of an applicable debt instrument), if the proceeds of any debt instrument are used directly or indirectly by the issuer or a person related to the issuer (within the meaning of section 108(i)(5)(A)) to reacquire an applicable debt instrument, the debt instrument shall be treated as issued for the applicable debt instrument being reacquired. Therefore, section 108(i)(2) may apply, for example, to a debt instrument issued by a corporation for cash in which some or all of the proceeds are used directly or indirectly by the corporation's related subsidiary in the reacquisition of the subsidiary's applicable debt instrument.

(2) *Directly or indirectly.* Whether the proceeds of an issuance of a debt instrument are used directly or indirectly to reacquire an applicable debt instrument depends upon all of the facts and circumstances surrounding the issuance and the reacquisition. The proceeds of an issuance of a debt instrument will be treated as being used indirectly to reacquire an applicable debt instrument if—

(i) At the time of the issuance of the debt instrument, the issuer of the debt instrument anticipated that an applicable debt instrument of the issuer or a person related to the issuer would be reacquired by the issuer, and the debt instrument would not have been issued if the issuer had not so anticipated such reacquisition;

(ii) At the time of the issuance of the debt instrument, the issuer of the debt instrument or a person related to the issuer anticipated that an applicable debt instrument would be reacquired by a related person and the related person receives cash or property that it would not have received unless the reacquisition had been so anticipated; or

(iii) At the time of the reacquisition, the issuer or a person related to the issuer foresaw or reasonably should have foreseen that the issuer or a person related to the issuer would be required to issue a debt instrument, which it would not have otherwise been required to issue if the reacquisition had not occurred, in order to meet its future economic needs.

(b) *Proportional rule for accruals of OID.* For purposes of section 108(i)(2), if only a portion of the proceeds from the issuance of a debt instrument are used directly or indirectly to reacquire an applicable debt instrument, the rules of section 108(i)(2)(A) will apply to the portion of OID on the debt instrument that is equal to the portion of the proceeds from such instrument used to reacquire the outstanding applicable debt instrument. Except as provided in the last sentence of section 108(i)(2)(A), the amount of deferred OID deduction that is subject to section 108(i)(2)(A) for a taxable year is equal to the product of the amount of OID that accrues in the taxable year under section 1272 or section 1275 (and the regulations under those sections), whichever section is applicable, and a fraction, the numerator of which is the portion of the total proceeds from the issuance of the debt instrument used directly or indirectly to reacquire the applicable debt instrument and the denominator of which is the total proceeds from the issuance of the debt instrument.

(c) *No acceleration*—(1) *Retirement.* Retirement of a debt instrument subject to section 108(i)(2) does not accelerate deferred OID deductions.

(2) *Cross-reference. See* §1.108(i)–1T and §1.108(i)–2T for rules relating to the acceleration of deferred OID deductions.

(d) *Examples.* The application of this section is illustrated by the following examples. Unless otherwise stated, all taxpayers in the following examples are calendar-year taxpayers, and P and S each file separate returns:

Example 1. (i) *Facts.* P, a domestic corporation, owns all of the stock of S, a domestic corporation. S has a debt instrument outstanding that has an adjusted issue price of $100,000. On January 1, 2010, P issues for $160,000 a four-year debt instrument that has an issue price of $160,000 and a stated redemption price at maturity of $200,000, resulting in $40,000 of OID. In P's discussion with potential lenders/holders, and as described in offering materials provided to potential lenders/holders, P disclosed that it planned to use all or a portion of the proceeds from the issuance of the debt instrument to reacquire outstanding debt of P and its affiliates. Following the issuance, P makes a $70,000 capital contribution to S. S then reacquires its debt instrument from X, a person not related to S within the meaning of section 108(i)(5)(A), for $70,000. At the time of the reacquisition, the adjusted issue price of S's debt instrument is $100,000. Under §1.61–12(c), S realizes $30,000 of COD income. S makes a section 108(i) election for the $30,000 of COD income.

(ii) *Analysis.* Under the facts, at the time of P's issuance of its $160,000 debt instrument, P anticipated that the loan proceeds would be used to reacquire the debt of S, and P's debt instrument would not have been issued for an amount greater than $90,000 if P had not anticipated that S would use the proceeds to reacquire its debt. Pursuant to paragraph (a) of this section, the proceeds from P's issuance of its debt instrument are treated as being used indirectly to reacquire S's applicable debt instrument. Therefore, section 108(i)(2)(B) applies to P's debt instrument and P's OID deductions on its debt instrument are subject to deferral under section 108(i)(2)(A). However, because only a portion of the proceeds from P's debt instrument are used by S to reacquire its applicable debt instrument, only a portion of P's total OID deductions will be deferred under section 108(i)(2)(A). *See* section 108(i)(2)(B). Accordingly, a maximum of $17,500 ($40,000 × $70,000/$160,000) of P's $40,000 total OID deductions is subject to deferral under section 108(i)(2)(A). Under paragraph (b) of this section, the amount of P's deferred OID deduction each taxable year under section 108(i)(2)(A) is equal to the product of the amount of OID that accrues in the taxable year under section 1272 for the debt instrument and a fraction ($70,000/$160,000). As a result, P's deferred OID deductions are the following amounts: $4,015.99 for 2010 ($ 9,179.40 × $70,000/$160,000); $4,246.39 for 2011 ($9,706.04 × $70,000/$160,000); $4,490.01 for 2012 ($10,262.88 × $70,000/$160,000); and $4,747.61 for 2013 ($10,851.68 × $70,000/$160,000).

Example 2. (i) *Facts*. The facts are the same as in *Example 1*, except that S makes a section 108(i) election for only $10,000 of the $30,000 of COD income.

(ii) *Analysis*. The maximum amount of P's deferred OID deductions under section 108(i)(2)(A) is $10,000 rather than $17,500 because S made a section 108(i) election for only $10,000 of the $30,000 of COD income. Under section 108(i)(2)(A), because the amount of OID that accrues prior to 2014 attributable to the portion of the debt instrument issued to indirectly reacquire S's applicable debt instrument under paragraph (b) of this section ($17,500) exceeds the amount of deferred COD income under section 108(i) ($10,000), P's deferred OID deductions are the following amounts: $4,015.99 for 2010; $4,246.39 for 2011; $1,737.62 for 2012; and $0 for 2013.

Example 3. (i) *Facts*. The facts are the same as in *Example 1*, except that P pays $200,000 in cash to the lenders/holders on December 31, 2012, to retire the debt instrument. P did not directly or indirectly obtain the funds to retire the debt instrument from the issuance of another debt instrument with OID.

(ii) *Analysis*. Under paragraph (c)(1) of this section, the retirement of P's debt instrument is not an acceleration event for the deferred OID deductions of $4,015.99 for 2010, $4,246.39 for 2011, and $4,490.01 for 2012. Except as provided in § 1.108(i)–1T(b)(4), these amounts will be taken into account during the inclusion period. P, however, paid a repurchase premium of $10,851.68 in 2012 ($200,000 minus the adjusted issue price of $189,148.32) to retire the debt instrument. If otherwise allowable, P may deduct this amount in 2012 under § 1.163–7(c).

(e) *Effective/applicability dates*. For *effective/applicability dates, see* § 1.108(i)–0T(b).

(f) *Expiration date*. This section expires August 9, 2013.

[T.D. 9497, 75 FR 49406, Aug. 13, 2010]

§ 1.109–1 Exclusion from gross income of lessor of real property of value of improvements erected by lessee.

(a) Income derived by a lessor of real property upon the termination, through forfeiture or otherwise, of the lease of such property and attributable to buildings erected or other improvements made by the lessee upon the leased property is excluded from gross income. However, where the facts disclose that such buildings or improvements represent in whole or in part a liquidation in kind of lease rentals, the exclusion from gross income shall not apply to the extent that such buildings or improvements represent such liquidation. The exclusion applies only with respect to the income realized by the lessor upon the termination of the lease and has no application to income, if any, in the form of rent, which may be derived by a lessor during the period of the lease and attributable to buildings erected or other improvements made by the lessee. It has no application to income which may be realized by the lessor upon the termination of the lease but not attributable to the value of such buildings or improvements. Neither does it apply to income derived by the lessor subsequent to the termination of the lease incident to the ownership of such buildings or improvements.

(b) The provisions of this section may be illustrated by the following example:

Example. The A Corporation leased in 1945 for a period of 50 years unimproved real property to the B Corporation under a lease providing that the B Corporation erect on the leased premises an office building costing $500,000, in addition to paying the A Corporation a lease rental of $10,000 per annum beginning on the date of completion of the improvements, the sum of $100,000 being placed in escrow for the payment of the rental. The building was completed on January 1, 1950. The lease provided that all improvements made by the lessee on the leased property would become the absolute property of the A Corporation on the termination of the lease by forfeiture or otherwise and that the lessor would become entitled on such termination to the remainder of the sum, if any, remaining in the escrow fund. The B Corporation forfeited its lease on January 1, 1955, when the improvements had a value of $100,000. Under the provisions of section 109, the $100,000 is excluded from gross income. The amount of $50,000 representing the remainder in the escrow fund is forfeited to the A Corporation and is included in the gross income of that taxpayer. As to the basis of the property in the hands of the A Corporation, see §1.1019–1.

§ 1.110–1 Qualified lessee construction allowances.

(a) *Overview.* Amounts provided to a lessee by a lessor for property to be constructed and used by the lessee pursuant to a lease are not includible in the lessee's gross income if the amount is a qualified lessee construction allowance under paragraph (b) of this section.

(b) *Qualified lessee construction allowance*—(1) *In general.* A qualified lessee construction allowance means any amount received in cash (or treated as a rent reduction) by a lessee from a lessor—

(i) Under a short-term lease of retail space;

(ii) For the purpose of constructing or improving qualified long-term real property for use in the lessee's trade or business at that retail space; and

(iii) To the extent the amount is expended by the lessee in the taxable year received on the construction or improvement of qualified long-term real property for use in the lessee's trade or business at that retail space.

(2) *Definitions*—(i) *Qualified long-term real property* is nonresidential real property under section 168(e)(2)(B) that is part of, or otherwise present at, the retail space referred to in paragraph (b)(1)(i) of this section and which reverts to the lessor at the termination of the lease. Thus, qualified long-term real property does not include property qualifying as section 1245 property under section 1245(a)(3).

(ii) *Short-term lease* is a lease (or other agreement for occupancy or use) of retail space for 15 years or less (as determined pursuant to section 168(i)(3)).

(iii) *Retail space* is nonresidential real property under section 168(e)(2)(B) that is leased, occupied, or otherwise used by the lessee in its trade or business of selling tangible personal property or services to the general public. The term *retail space* includes not only the space where the retail sales are made, but also space where activities supporting the retail activity are performed (such as an administrative office, a storage area, and employee lounge). Examples of services typically sold to the general public include services provided by hair stylists, tailors, shoe repairmen, doctors, lawyers, accountants, insurance agents, stock brokers, securities dealers (including dealers who sell securities out of inventory), financial advisors and bankers. For purposes of this paragraph (b)(2)(iii), a taxpayer is selling to the general public if the products or services for sale are made available to the general public, even if the product or service is targeted to certain customers or clients.

(3) *Purpose requirement.* An amount will meet the requirement in paragraph (b)(1)(ii) of this section only to the extent that the lease agreement for the retail space expressly provides that the construction allowance is for the purpose of constructing or improving qualified long-term real property for use in the lessee's trade or business at the retail space. An ancillary agreement between the lessor and the lessee providing for a construction allowance, executed contemporaneously with the lease or during the term of the lease, is considered a provision of the lease agreement for purposes of the preceding sentence, provided the agreement is executed before payment of the construction allowance.

(4) *Expenditure requirement*—(i) *In general.* Expenditures referred to in paragraph (b)(1)(iii) of this section may be treated as being made first from the lessee's construction allowance. Tracing of the construction allowance to the actual lessee expenditures for the construction or improvement of qualified long-term real property is not required. However, the lessee should maintain accurate records of the amount of the qualified lessee construction allowance received and the expenditures made for qualified long-term real property.

(ii) *Time when expenditures deemed made*. For purposes of paragraph (b)(1)(iii) of this section, an amount is deemed to have been expended by a lessee in the taxable year in which the construction allowance was received by the lessee if—

(A) The amount is expended by the lessee within 8½ months after the close of the taxable year in which the amount was received; or

(B) The amount is a reimbursement from the lessor for amounts expended by the lessee in a prior year and for which the lessee has not claimed any depreciation deductions.

(5) *Consistent treatment by lessor*. Qualified long-term real property constructed or improved with any amount excluded from a lessee's gross income by reason of paragraph (a) of this section must be treated as nonresidential real property owned by the lessor (for purposes of depreciation under 168(e)(2)(B) and determining gain or loss under section 168(i)(8)(B)). For purposes of the preceding sentence, the lessor must treat the construction allowance as fully expended in the manner required by paragraph (b)(1)(iii) of this section unless the lessor is notified by the lessee in writing to the contrary. General tax principles apply for purposes of determining when the lessor may begin depreciation of its nonresidential real property. The lessee's exclusion from gross income under paragraph (a) of this section, however, is not dependent upon the lessor's treatment of the property as nonresidential real property.

(c) *Information required to be furnished*—(1) *In general*. The lessor and the lessee described in paragraph (b) of this section who are paying and receiving a qualified lessee construction allowance, respectively, must furnish the information described in paragraph (c)(3) of this section in the time and manner prescribed in paragraph (c)(2) of this section.

(2) *Time and manner for furnishing information*. The requirement to furnish information under paragraph (c)(1) of this section is met by attaching a statement with the information described in paragraph (c)(3) of this section to the lessor's or the lessee's, as applicable, timely filed (including extensions) Federal income tax return for the taxable year in which the construction allowance was paid by the lessor or received by the lessee (either in cash or treated as a rent reduction), as applicable. A lessor or a lessee may report the required information for several qualified lessee construction allowances on a combined statement. However, a lessor's or a lessee's failure to provide information with respect to each lease will be treated as a separate failure to provide information for purposes of paragraph (c)(4) of this section.

(3) *Information required*—(i) *Lessor*. The statement provided by the lessor must contain the lessor's name (and, in the case of a consolidated group, the parent's name), employer identification number, taxable year and the following information for each lease:

(A) The lessee's name (in the case of a consolidated group, the parent's name).

(B) The address of the lessee.

(C) The employer identification number of the lessee.

(D) The location of the retail space (including mall or strip center name, if applicable, and store name).

(E) The amount of the construction allowance.

(F) The amount of the construction allowance treated by the lessor as nonresidential real property owned by the lessor.

(ii) *Lessee*. The statement provided by the lessee must contain the lessee's name (and, in the case of a consolidated group, the parent's name), employer identification number, taxable year and the following information for each lease:

(A) The lessor's name (in the case of a consolidated group, the parent's name).

(B) The address of the lessor.

(C) The employer identification number of the lessor.

(D) The location of the retail space (including mall or strip center name, if applicable, and store name).

(E) The amount of the construction allowance.

(F) The amount of the construction allowance that is a qualified lessee construction allowance under paragraph (b) of this section.

(4) *Failure to furnish information.* A lessor or a lessee that fails to furnish the information required in this paragraph (c) may be subject to a penalty under section 6721.

(d) *Effective date.* This section is applicable to leases entered into on or after October 5, 2000.

[T.D. 8901, 65 FR 53586, Sept. 5, 2000]

§ 1.111–1 Recovery of certain items previously deducted or credited.

(a) *General.* Section 111 provides that income attributable to the recovery during any taxable year of bad debts, prior taxes, and delinquency amounts shall be excluded from gross income to the extent of the ''recovery exclusion'' with respect to such items. The rule of exclusion so prescribed by statute applies equally with respect to all other losses, expenditures and accruals made the basis of deductions from gross income for prior taxable years, including war losses referred to in section 127 of the Internal Revenue Code of 1939, but not including deductions with respect to depreciation, depletion, amortization, or amortizable bond premiums. The term ''recovery exclusion'' as used in this section means an amount equal to the portion of the bad debts, prior taxes, and delinquency amounts (the items specifically referred to in section 111), and of all other items subject to the rule of exclusion which, when deducted or credited for a prior taxable year, did not result in a reduction of any tax of the taxpayer under subtitle A (other than the accumulated earnings tax imposed by section 531 or the personal holding company tax imposed by section 541) of the Internal Revenue Code of 1954 or corresponding provisions of prior income tax laws (other than the World War II excess profits tax imposed under subchapter E, chapter 2 of the Internal Revenue Code of 1939).

(1) *Section 111 items.* The term ''section 111 items'' as used in this section means bad debts, prior taxes, delinquency amounts, and all other items subject to the rule of exclusion, for which a deduction or credit was allowed for a prior taxable year. If a bad debt was previously charged against a reserve by a taxpayer on the reserve method of treating bad debts, it was not deducted, and it is therefore not considered a section 111 item. Bad debts, prior taxes, and delinquency amounts are defined in section 111(b) (1), (2), and (3), respectively. An example of a delinquency amount is interest on delinquent taxes. An example of the other items not expressly referred to in section 111 but nevertheless subject to the rule of exclusion is a loss sustained upon the sale of stock and later recovered, in whole or in part, through an action against the party from whom such stock had been purchased.

(2) *Definition of ''recovery''.* Recoveries result from the receipt of amounts in respect of the previously deducted or credited section 111 items, such as from the collection or sale of a bad debt, refund or credit of taxes paid, or cancellation of taxes accrued. Care should be taken in the case of bad debts which were treated as only partially worthless in prior years to distinguish between the item described in section 111, that is, the part of such debt which was deducted, and the part not previously deducted, which is not a section 111 item and is considered the first part collected. The collection of the part not deducted is not considered a ''recovery''. Furthermore, the term ''recovery'' does not include the gain resulting from the receipt of an amount on account of a section 111 item which, together with previous such receipts, exceeds the deduction or credit previously allowed for such item. For instance, a $100 corporate bond purchased for $40 and later deducted as worthless is subsequently collected to the extent of $50. The $10 gain (excess of $50 collection over $40 cost) is not a recovery of a section 111 item. Such gain is in no case excluded from gross income under section 111, regardless of whether the $40 recovery is or is not excluded.

(3) *Treatment of debt deducted in more than one year by reason of partial worthlessness.* In the case of a bad debt deducted in part for two or more prior years, each such deduction of a part of the debt is considered a separate section 111 item. A recovery with respect to such debt is considered first a recovery of those items (or portions thereof), resulting from such debt, for which there are recovery exclusions. If there

are recovery exclusions for two or more items resulting from the same bad debt, such items are considered recovered in the order of the taxable years for which they were deducted, beginning with the latest. The recovery exclusion for any such item is determined by considering the recovery exclusion with respect to the prior year for which such item was deducted as being first used to offset all other applicable recoveries in the year in which the bad debt is recovered.

(4) *Special provisions as to worthless bonds, etc., which are treated as capital losses.* Certain bad debts arising from the worthlessness of securities and certain nonbusiness bad debts are treated as losses from the sale or exchange of capital assets. See sections 165(g) and 166(d). The amounts of the deductions allowed for any year under section 1211 on account of such losses for such year are considered to be section 111 items. Any part of such losses which, under section 1211, is a deduction for a subsequent year through the capital loss carryover (any later receipt of an amount with respect to such deducted loss is a recovery) is considered a section 111 item for the year in which such loss was sustained.

(b) *Computation of recovery exclusion*—(1) *Amount of recovery exclusion allowable for year of recovery.* For the year of any recovery, the section 111 items which were deducted or credited for one prior year are considered as a group and the recovery thereon is considered separately from recoveries of any items which were deducted or credited for other years. This recovery is excluded from gross income to the extent of the recovery exclusion with respect to this group of items as (i) determined for the original year for which such items were deducted or credited (see subparagraph (2) of this paragraph) and (ii) reduced by the excludable recoveries in intervening years on account of all section 111 items for such original year. A taxpayer claiming a recovery exclusion shall submit, at the time the exclusion is claimed, the computation of the recovery exclusion claimed for the original year for which the items were deducted or credited, and computations showing the amount recovered in intervening years on account of the section 111 items deducted or credited for the original year.

(2) *Determination of recovery exclusion for original year for which items were deducted or credited.* (i) The recovery exclusion for the taxable year for which section 111 items were deducted or credited (that is, the ''original taxable year'') is the portion of the aggregate amount of such deductions and credits which could be disallowed without causing an increase in any tax of the taxpayer imposed under subtitle A (other than the accumulated earnings tax imposed by section 531 or the personal holding company tax imposed by section 541) of the Internal Revenue Code of 1954 or corresponding provisions of prior income tax laws (other than the World War II excess profits tax imposed under subchapter E, chapter 2 of the Internal Revenue Code of 1939). For the purpose of such recovery exclusion, consideration must be given to the effect of net operating loss carryovers and carrybacks or capital loss carryovers.

(ii) This rule shall be applied by determining the recovery exclusion as the aggregate amount of the section 111 items for the original year for which such items were deducted or credited reduced by whichever of the following amounts is the greater:

(*a*) The difference between (*1*) the taxable income for such original year and (*2*) the taxable income computed without regard to the section 111 items for such original year.

(*b*) In the case of a taxpayer subject to any income tax in lieu of normal tax or surtax or both (except the alternative tax on capital gains imposed by section 1201, which is disregarded), the difference between (*1*) the income subject to such tax for such original year and (*2*) the income subject to such tax computed without regard to the section 111 items for such original year.

(Neither the amount determined under (*1*) nor the amount under (*2*) of (*a*) or (*b*) of this subdivision shall in any case be considered less than zero.) For this determination of the recovery exclusion, the aggregate of the section 111 items must be further decreased by the portion thereof which caused a reduction in tax in preceding or succeeding taxable years through any net operating loss carryovers or carrybacks or capital loss carryovers affected by such items. This decrease is the aggregate of the largest amount determined for each of such preceding and succeeding years under (*a*) and (*b*) of this subdivision, the computation of each carryover or carryback to the preceding or succeeding year being made under (*1*) of (*a*) and (*b*) of this subdivision with regard to the section 111 items for the original year and such computation being made under (*2*) of (*a*) and (*b*) of this subdivision without regard to such items. For the purpose of the preceding sentence, the computations under both (*1*) and (*2*) of (*a*) and (*b*) of this subdivision shall be made without regard to any section 111 items for such preceding or succeeding year and the carryovers and carrybacks to such year shall be determined without regard to any section 111 items for years subsequent to the original year.

(iii) The determination of the recovery exclusion for original taxable years subject to the provisions of the Internal Revenue Code of 1939 shall be made under 26 CFR (1939) 39.22(b)(12)–1(b)(2) (Regulations 118).

(3) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. A single individual with no dependents has for his 1954 taxable year the following income and deductions:

	With deduction of section 111 items	Without deduction of section 111 items
Gross income	$25,000	$25,000
Less deductions:		
Depreciation	20,000	20,000
Business bad debts and taxes	6,300	
Personal exemption	600	600
	26,900	20,600
Taxable income or (loss)	(1,900)	4,400
Adjustment under section 172(d)(3)	600	
Net operating loss	(1,300)	....

The full amount of the net operating loss of $1,300 is carried back and allowed as a deduction for 1952. The aggregate of the section 111 items for 1954 is $6,300 (bad debts and taxes). The recovery exclusion on account of section 111 items for 1954 is $600, determined by reducing the $6,300 aggregate of the section 111 items by $5,700, *i.e.*, the sum of (1) the difference between the amount of the taxable income for 1954 computed without regard to the section 111 items ($4,400) and the amount of the taxable income for 1954 (not less than zero) computed by taking such items into account, and (2) the amount of the net operating loss ($1,300) which caused the reduction in tax for 1952 by reason of the carryback provisions. If in 1956 the taxpayer recovers $400 of the bad debts, all of the recovery is excluded from the income by reason of the recovery exclusion of $600 determined for the original year 1954. If in 1957 the taxpayer recovers an additional $300 of the bad debts, only $200 is excluded from gross income. That is, the recovery exclusion of $600 determined for the original year 1954 is reduced by the $400 recovered in 1956, leaving a balance of $200 which is used in 1957. The balance of the amount recovered in 1957, $100 ($300 less $200), is included in gross income for 1957.

(c) *Provisions as to taxes imposed by section 531 (relating to the accumulated earnings tax) and section 541 (relating to the tax on personal holding companies).* A recovery exclusion allowed for purposes of subtitle A (other than section 531 or section 541) of the Internal Revenue Code of 1954 shall also be allowed for the purpose of determining the accumulated earnings tax under section 531 or the personal holding company tax under section 541 regardless of whether or not the section 111 items on which such recovery exclusion is based resulted in a reduction of the tax under section 531 or section 541 of the Internal Revenue Code of 1954 (or corresponding provisions of prior income tax laws) for the prior taxable year. Furthermore, if there is recovery of a section 111 item which was not allowable as a deduction or credit for the prior taxable year for purposes of Subtitle A (not including section 531 or section 541) or corresponding provisions of prior income tax laws (other than Subchapter E, Chapter 2 of the Internal Revenue Code of 1939, relating to World War II excess profits tax), but was allowable for such prior taxable year in determining the tax under section 531 or section 541 (or corresponding provisions of prior income tax laws) then for the purpose of determining the tax under section 531 or section 541 a recovery exclusion shall be allowable with respect to such recovery if the section 111 item did not result in a reduction of the tax under section 531 or section 541 (or corresponding provisions of prior income tax laws).

§ 1.112–1 Combat zone compensation of members of the Armed Forces.

(a) *Combat zone compensation exclusion*—(1) *Amount excluded.* In addition to the exemptions and credits otherwise applicable, section 112 excludes from gross income the following compensation of members of the Armed Forces:

(i) *Enlisted personnel.* Compensation received for active service as a member below the grade of commissioned officer in the Armed Forces of the United States for any month during any part of which the member served in a combat zone or was hospitalized at any place as a result of wounds, disease, or injury incurred while serving in the combat zone.

(ii) *Commissioned officers.* Compensation not exceeding the monthly dollar limit received for active service as a commissioned officer in the Armed Forces of the United States for any month during any part of which the officer served in a combat zone or was hospitalized at any place as a result of wounds, disease, or injury incurred while serving in the combat zone. The monthly dollar limit is the monthly amount excludable from the officer's income under section 112(b) as amended. Beginning in 1966, the monthly dollar limit for periods of active service after 1965 became $500. As of September 10, 1993, the monthly dollar limit continues to be $500.

(2) *Time limits on exclusion during hospitalization.* Compensation received for service for any month of hospitalization that begins more than 2 years after the date specified by the President in an Executive Order as the date of the termination of combatant activities in the combat zone cannot be excluded under section 112. Furthermore, compensation received while hospitalized after January 1978 for wounds, disease, or injury incurred in the Vietnam combat zone designated by Executive Order 11216 cannot be excluded under section 112.

(3) *Special terms.* A commissioned warrant officer is not a *commissioned officer* under section 112(b) and is entitled to the exclusion allowed to enlisted personnel under section 112(a). *Compensation*, for the purpose of section 112, does not include pensions and retirement pay. *Armed Forces of the United States* is defined (and members of the Armed Forces are described) in section 7701(a)(15).

(4) *Military compensation only.* Only compensation paid by the Armed Forces of the United States to members of the Armed Forces can be excluded under section 112, except for compensation paid by an agency or instrumentality of the United States or by an international organization to a member of the Armed Forces whose military active duty status continues during the member's assignment to the agency or instrumentality or organization on official detail. Compensation paid by other employers (whether private enterprises or governmental entities) to members of the Armed Forces cannot be excluded under section 112 even if the payment is made to supplement the member's military compensation or is labeled by the employer as compensation for active service in the Armed Forces of the United States. Compensation paid to civilian employees of the federal government, including civilian employees of the Armed Forces, cannot be excluded under section 112, except as provided in section 112(d)(2) (which extends the exclusion to compensation of civilian employees of the federal government in missing status due to the Vietnam conflict).

(b) *Service in combat zone*—(1) *Active service.* The exclusion under section 112 applies only if active service is performed in a combat zone. A member of the Armed Forces is in active service if the member is actually serving in the Armed Forces of the United States. Periods during which a member of the Armed Forces is absent from duty on account of sickness, wounds, leave, internment by the enemy, or other lawful cause are periods of active service. A member of the Armed Forces in active service in a combat zone who becomes a prisoner of war or missing in action in the combat zone is deemed, for the purpose of section 112, to continue in active service in the combat zone for the period for which the member is treated as a prisoner of war or as missing in action for military pay purposes.

(2) *Combat zone status.* Except as provided in paragraphs (e) and (f) of this section, service is performed in a combat zone only if it is performed in an area which the President of the United States has designated by Executive Order, for the purpose of section 112, as an area in which Armed Forces of the United States are or have been engaged in combat, and only if it is performed on or after the date designated by the President by Executive Order as the date of the commencing of combatant activities in that zone and on or before the date designated by the President by Executive Order as the date of the termination of combatant activities in that zone.

(3) *Partial month service.* If a member of the Armed Forces serves in a combat zone for any part of a month, the member is entitled to the exclusion for that month to the same extent as if the member has served in that zone for the entire month. If a member of the Armed Forces is hospitalized for a part of a month as a result of wounds, disease, or injury incurred while serving in that zone, the member is entitled to the exclusion for the entire month.

(4) *Payment time and place.* The time and place of payment are irrelevant in considering whether compensation is excludable under section 112; rather, the time and place of the entitlement to compensation determine whether the compensation is excludable under section 112. Thus, compensation can be excluded under section 112 whether or not it is received outside a combat zone, or while the recipient is hospitalized, or in a year different from that in which the service was rendered for which the compensation is paid, provided that the member's entitlement to the compensation fully accrued in a month during which the member served in the combat zone or was hospitalized as a result of wounds, disease, or injury incurred while serving in the combat zone. For this purpose, entitlement to compensation fully accrues upon the completion of all actions required of the member to receive the compensation. Compensation received by a member of the Armed Forces for services rendered while in active service can be excluded under section 112 even though payment is received subsequent to discharge or release from active service. Compensation credited to a deceased member's account for a period subsequent to the established date of the member's death and received by the member's estate can be excluded from the gross income of the estate under section 112 to the same extent that it would have been excluded from the gross income of the member had the member lived and received the compensation.

(5) *Examples of combat zone compensation.* The rules of this section are illustrated by the following examples:

Example 1. On January 5, outside of a combat zone, an enlisted member received basic pay for active duty services performed from the preceding December 1 through December 31. On December 4 (and no other date), the member performed services within a combat zone. The member may exclude from income the entire payment received on January 5, although the member served in the combat zone only one day during December, received the payment outside of the combat zone, and received the payment in a year other than the year in which the combat zone services were performed.

Example 2. From March through December, an enlisted member became entitled to 25 days of annual leave while serving in a combat zone. The member used all 25 days of leave in the following year. The member may exclude from income the compensation received for those 25 days, even if the member performs no services in the combat zone in the year the compensation is received.

Example 3. From March through December, a commissioned officer became entitled to 25 days of annual leave while serving in a combat zone. During that period the officer also received basic pay of $1,000 per month from which the officer excluded from income $500 per month (exhausting the monthly dollar limit under section 112 for that period). The officer used all 25 days of leave in the following year. The officer may not exclude from income any compensation received in the following year related to those 25 days of leave, since the officer had already excluded from income the maximum amount of combat zone compensation for the period in which the leave was earned.

Example 4. In November, while serving in a combat zone, an enlisted member competing for a cash award submitted an employee suggestion. After November, the member neither served in a combat zone nor was hospitalized for wounds incurred in the combat zone. In June of the following year, the member's suggestion was selected as the winner of the competition and the award was paid. The award can be excluded from income as combat zone compensation although granted and received outside of the combat zone, since the member completed the necessary action to win the award (submission of the suggestion) in a month during which the member served in the combat zone.

Example 5. In July, while serving in a combat zone, an enlisted member voluntarily reenlisted. After July, the member neither served in a combat zone nor was hospitalized for wounds incurred in the combat zone. In February of the following year, the member received a bonus as a result of the July reenlistment. The reenlistment bonus can be excluded from income as combat zone compensation although received outside of the combat zone, since the member completed the necessary action for entitlement to the reenlistment bonus in a month during which the member served in the combat zone.

Example 6. In July, while serving outside a combat zone, an enlisted member voluntarily reenlisted. In February of the following year, the member, while performing services in a combat zone, received a bonus as a result of the July reenlistment. The reenlistment bonus cannot be excluded from income as combat zone compensation although received while serving in the combat zone, since the member completed the necessary action for entitlement to the reenlistment bonus in a month during which the member had neither served in the combat zone nor was hospitalized for wounds incurred while serving in a combat zone.

(c) *Hospitalization*—(1) *Presumption of combat zone injury.* If an individual is hospitalized for wound, disease, or injury while serving in a combat zone, the wound, disease, or injury will be presumed to have been incurred while serving in a combat zone, unless the contrary clearly appears. In certain cases, however, a wound, disease, or injury may have been incurred while serving in a combat zone even though the individual was not hospitalized for it while so serving. In exceptional cases, a wound, disease, or injury will not have been incurred while serving in a combat zone even though the individual was hospitalized for it while so serving.

(2) *Length of hospitalization.* An individual is hospitalized only until the date the individual is discharged from the hospital.

(3) *Examples of combat zone injury.* The rules of this paragraph (c) are illustrated by the following examples:

Example 1. An individual is hospitalized for a disease in the combat zone where the individual has been serving for three weeks. The incubation period of the disease is two to four weeks. The disease is incurred while serving in the combat zone.

Example 2. The facts are the same as in *Example 1* except that the incubation period of the disease is one year. The disease is not incurred while serving in the combat zone.

Example 3. A member of the Air Force, stationed outside the combat zone, is shot while participating in aerial combat over the combat zone, but is not hospitalized until returning to the home base. The injury is incurred while serving in a combat zone.

Example 4. An individual is hospitalized for a disease three weeks after having departed from a combat zone. The incubation period of the disease is two to four weeks. The disease is incurred while serving in a combat zone.

(d) *Married members.* The exclusion under section 112 applies without regard to the marital status of the recipient of the compensation. If both spouses meet the requirements of the statute, then each spouse is entitled to the benefit of an exclusion. In the case of a husband and wife domiciled in a State recognized for Federal income tax purposes as a community property State, any exclusion from gross income under section 112 operates before apportionment of the gross income of the spouses under community property law. For example, a husband and wife are domiciled in a community property State and the member spouse is entitled, as a commissioned officer, to the benefit of the exclusion under section 112(b) of $500 for each month. The member receives $7,899 as compensation for active service for 3 months in a combat zone. Of that amount, $1,500 is excluded from gross income under section 112(b) and $6,399 is taken into account in determining the gross income of both spouses.

(e) *Service in area outside combat zone*—(1) *Combat zone treatment.* For purposes of section 112, a member of the Armed Forces who performs military service in an area outside the area designated by Executive Order as a combat zone is deemed to serve in that combat zone while the member's service is in direct support of military operations in that zone and qualifies the member for the special pay for duty subject to hostile fire or imminent danger authorized under section 310 of title 37 of the United States Code, as amended (37 U.S.C. 310) (hostile fire/imminent danger pay).

(2) *Examples of combat zone treatment.* The examples in this paragraph (e)(2) are based on the following circumstances: Certain areas, airspace, and adjacent waters are designated as a combat zone for purposes of section 112 as of May 1. Some members of the Armed Forces are stationed in the combat zone; others are stationed in two foreign countries outside the combat zone, named Nearby Country and Destination Country.

Example 1. B is a member of an Armed Forces ground unit stationed in the combat zone. On May 31, B's unit crosses into Nearby Country. B performs military service in Nearby Country in direct support of the military operations in the combat zone from June 1 through June 8 that qualifies B for hostile fire/imminent danger pay. B does not return to the combat zone during June. B is deemed to serve in the combat zone from June 1 through June 8. Accordingly, B is entitled to the exclusion under section 112 for June. Of course, B is also entitled to the exclusion for any month (May, in this example) in which B actually served in the combat zone.

Example 2. B is a member of an Armed Forces ground unit stationed in the combat zone. On May 31, B's unit crosses into Nearby Country. On June 1, B is wounded while performing military service in Nearby Country in direct support of the military operations in the combat zone that qualifies B for hostile fire/imminent danger pay. On June 2, B is transferred for treatment to a hospital in the United States. B is hospitalized from June through October for those wounds. B is deemed to have incurred the wounds while serving in the combat zone on June 1. Accordingly, B is entitled to the exclusion under section 112 for June through October. Of course, B is also entitled to the exclusion for any month (May, in this example) in which B actually served in the combat zone.

Example 3. B is stationed in Nearby Country for the entire month of June as a member of a ground crew servicing combat aircraft operating in the combat zone. B's service in Nearby Country during June does not qualify B for hostile fire/imminent danger pay. Accordingly, B is not deemed to serve in the combat zone during June and is not entitled to the exclusion under section 112 for that month.

Example 4. B is assigned to an air unit stationed in Nearby Country for the entire month of June. In June, members of air units of the Armed Forces stationed in Nearby Country fly combat and supply missions into and over Destination Country in direct support of military operations in the combat zone. B flies combat missions over Destination Country from Nearby Country from June 1 through June 8. B's service qualifies B for hostile fire/imminent danger pay. Accordingly, B is deemed to serve in the combat zone during June and is entitled to the exclusion under section 112. The result would be the same if B were to fly supply missions into Destination Country from Nearby Country in direct support of operations in the combat zone qualifying B for hostile fire/imminent danger pay.

Example 5. Assigned to an air unit stationed in Nearby Country, B was killed in June when B's plane crashed on returning to the airbase in Nearby Country. B was performing military service in direct support of the military operations in the combat zone at the time of B's death. B's service also qualified B for hostile fire/imminent danger pay. B is deemed to have died while serving in the combat zone or to have died as a result of wounds, disease, or injury incurred while serving in the combat zone for purposes of section 692(a) and section 692(b) (providing relief from certain income taxes for members of the Armed Forces dying in a combat zone or as a result of wounds, disease, or injury incurred while serving in a combat zone) and section 2201 (providing relief from certain estate taxes for members of the Armed Forces dying in a combat zone or by reason of combat-zone-incurred wounds). The result would be the same if B's mission had been a supply mission instead of a combat mission.

Example 6. In June, B was killed as a result of an off-duty automobile accident while leaving the airbase in Nearby Country shortly after returning from a mission over Destination Country. At the time of B's death, B was not performing military duty qualifying B for hostile fire/imminent danger pay. B is not deemed to have died while serving in the combat zone or to have died as the result of wounds, disease, or injury incurred while serving in the combat zone. Accordingly, B does not qualify for the benefits of section 692(a), section 692(b), or section 2201.

Example 7. B performs military service in Nearby Country from June 1 through June 8 in direct support of the military operations in the combat zone. Nearby Country is designated as an area in which members of the Armed Forces qualify for hostile fire/imminent danger pay due to imminent danger, even though members in Nearby Country are not subject to hostile fire. B is deemed to serve in the combat zone from June 1 through June 8. Accordingly, B is entitled to the exclusion under section 112 for June.

(f) *Nonqualifying presence in combat zone*—(1) *Inapplicability of exclusion.*

The following members of the Armed Forces are not deemed to serve in a combat zone within the meaning of section 112(a)(1) or section 112(b)(1) or to be hospitalized as a result of wounds, disease, or injury incurred while serving in a combat zone within the meaning of section 112(a)(2) or section 112(b)(2)—

(i) Members present in a combat zone while on leave from a duty station located outside a combat zone;

(ii) Members who pass over or through a combat zone during the course of a trip between two points both of which lie outside a combat zone; or

(iii) Members present in a combat zone solely for their own personal convenience.

(2) *Exceptions for temporary duty or special pay*. Paragraph (f)(1) of this section does not apply to members of the Armed Forces who—

(i) Are assigned on official temporary duty to a combat zone (including official temporary duty to the airspace of a combat zone); or

(ii) Qualify for hostile fire/imminent danger pay.

(3) *Examples of nonqualifying presence and its exceptions*. The examples in this paragraph (f)(3) are based on the following circumstances: Certain areas, airspace, and adjacent waters are designated as a combat zone for purposes of section 112 as of May 1. Some members of the Armed Forces are stationed in the combat zone; others are stationed in two foreign countries outside the combat zone, named Nearby Country and Destination Country.

Example 1. B is a member of the Armed Forces assigned to a unit stationed in Nearby Country. On June 1, B voluntarily visits a city within the combat zone while on leave. B is not deemed to serve in a combat zone since B is present in a combat zone while on leave from a duty station located outside a combat zone.

Example 2. B is a member of the Armed Forces assigned to a unit stationed in Nearby Country. During June, B takes authorized leave and elects to spend the leave period by visiting a city in the combat zone. While on leave in the combat zone, B is subject to hostile fire qualifying B for hostile fire/imminent danger pay. Although B is present in the combat zone while on leave from a duty station outside the combat zone, B qualifies for the exclusion under section 112 because B qualifies for hostile fire/imminent danger pay while in the combat zone.

Example 3. B is a member of the Armed Forces assigned to a ground unit stationed in the combat zone. During June, B takes authorized leave and elects to spend the leave period in the combat zone. B is not on leave from a duty station located outside a combat zone, nor is B present in a combat zone solely for B's own personal convenience. Accordingly, B's combat zone tax benefits continue while B is on leave in the combat zone.

Example 4. B is assigned as a navigator to an air unit stationed in Nearby Country. On June 4, during the course of a flight between B's home base in Nearby Country and another base in Destination Country, the aircraft on which B serves as a navigator flies over the combat zone. B is not on official temporary duty to the airspace of the combat zone and does not qualify for hostile fire/imminent danger pay as a result of the flight. Accordingly, B is not deemed to serve in a combat zone since B passes over the combat zone during the course of a trip between two points both of which lie outside the combat zone without either being on official temporary duty to the combat zone or qualifying for hostile fire/imminent danger pay.

Example 5. B is a member of the Armed Forces assigned to a unit stationed in Nearby Country. B enters the combat zone on a 3-day pass. B is not on official temporary duty and does not qualify for hostile fire/imminent danger pay while present in the combat zone. Accordingly, B is not deemed to serve in a combat zone since B is present in the combat zone solely for B's own personal convenience.

Example 6. B, stationed in Nearby Country, is a military courier assigned on official temporary duty to deliver military pouches in the combat zone and in Destination Country. On June 1, B arrives in the combat zone from Nearby Country, and on June 2, B departs for Destination Country. Although B passes through the combat zone during the course of a trip between two points outside the combat zone, B is nevertheless deemed to serve in a combat zone while in the combat zone because B is assigned to the combat zone on official temporary duty.

Example 7. B is a member of an Armed Forces ground unit stationed in Nearby Country. On June 1, B took authorized leave and elected to spend the leave period by visiting a city in the combat zone. On June 2, while on leave in the combat zone, B was wounded by hostile fire qualifying B for hostile fire/imminent danger pay. On June 3, B was transferred for treatment to a hospital in the United States. B is hospitalized from June through October for those wounds. Although B was present in the combat zone while on leave from a duty station outside the combat zone, B is deemed to have incurred the wounds while serving in the combat zone on June 2, because B qualified for hostile fire/imminent danger pay while in the combat zone. Accordingly, B is entitled to the exclusion under section 112 for June through October.

Example 8. The facts are the same as in *Example 7* except that B dies on September 1 as a result of the wounds incurred in the combat zone. B is deemed to have died as a result of wounds, disease, or injury incurred while serving in the combat zone for purposes of section 692(a) and section 692(b) (providing relief from certain income taxes for members of the Armed Forces dying in a combat zone or as a result of wounds, disease, or injury incurred while serving in a combat zone) and section 2201 (providing relief from certain estate taxes for members of the Armed Forces dying in a combat zone or by reason of combat-zone-incurred wounds).

[T.D. 8489, 58 FR 47640, Sept. 10, 1993]

§ 1.113–1 Mustering-out payments for members of the Armed Forces.

For the purposes of the exclusion from gross income under section 113 of mustering-out payments with respect to service in the Armed Forces, mustering-out payments are payments made to any recipients pursuant to the provisions of 38 U.S.C. 2105 (formerly section 5 of the Mustering-out Payment Act of 1944 and section 505 of the Veterans' Readjustment Assistance Act of 1952).

§ 1.117–1 Exclusion of amounts received as a scholarship or fellowship grant.

(a) *In general.* Any amount received by an individual as a scholarship at an educational institution or as a fellowship grant, including the value of contributed services and accommodations, shall be excluded from the gross income of the recipient, subject to the limitations set forth in section 117(b) and §1.117–2. The exclusion from gross income of an amount which is a scholarship or fellowship grant is controlled solely by section 117. Accordingly, to the extent that a scholarship or a fellowship grant exceeds the limitations of section 117(b) and §1.117–2, it is includible in the gross income of the recipient notwithstanding the provisions of section 102 relating to exclusion from gross income of gifts, or section 74(b) relating to exclusion from gross income of certain prizes and awards. For definitions, see §1.117–3.

(b) *Exclusion of amounts received to cover expenses.* (1) Subject to the limitations provided in subparagraph (2) of this paragraph, any amount received by an individual to cover expenses for travel (including meals and lodging while traveling and an allowance for travel of the individual's family), research, clerical help, or equipment is excludable from gross income provided that such expenses are incident to a scholarship or fellowship grant which is excludable from gross income under section 117(a)(1). If, however, only a portion of a scholarship or fellowship grant is excludable from gross income under section 117(a)(1) because of the part-time employment limitation contained in section 117(b)(1) or because of the expiration of the 36-month period described in section 117(b)(2)(B), only the amount received to cover expenses incident to such excludable portion is excludable from gross income. The requirement that these expenses be incident to the scholarship or the fellowship grant means that the expenses of travel, research, clerical help, or equipment must be incurred by the individual in order to effectuate the purpose for which the scholarship or the fellowship grant was awarded.

(2)(i) In the case of a scholarship or fellowship grant which is awarded after July 28, 1956, the exclusion provided under subparagraph (1) of this paragraph is not applicable unless the amount received by the individual is specifically designated to cover expenses for travel, research, clerical help, or equipment.

(ii) In the case of a scholarship or fellowship grant awarded before July 29, 1956, the exclusion provided under subparagraph (1) of this paragraph is not applicable unless the recipient establishes, by competent evidence, that the amount was received to cover expenses for travel, research, clerical help, or equipment, but such amount need not be specifically designated. The fact that the recipient actually incurred expenses for travel, research, clerical help, or equipment is not sufficient to establish that the amount was received to cover such expenses.

(iii) The exclusion provided under subparagraph (1) of this paragraph is applicable only to the extent that the amount received for travel, research, clerical help, or equipment is actually expended for such expenses by the recipient during the term of the scholarship or fellowship grant and within a reasonable time before and after such term.

(3) The portion of any amount received to cover the expenses described in subparagraph (1) of this paragraph which is not actually expended for such expenses within the exclusion period described in subparagraph (2) of this paragraph shall, if not returned to the grantor within this period, be included in the gross income of the recipient for the taxable year in which such exclusion period expires.

§ 1.117–2 Limitations.

(a) *Individuals who are candidates for degrees*—(1) *In general.* Under the limitations provided by section 117(b)(1) in the case of an individual who is a candidate for a degree at an educational institution, the exclusion from gross income shall not apply (except as otherwise provided in subparagraph (2) of this paragraph) to that portion of any amount received as payment for teaching, research, or other services in the nature of parttime employment required as a condition to receiving the scholarship or fellowship grant. Payments for such part-time employment shall be included in the gross income of the recipient in an amount determined by reference to the rate of compensation ordinarily paid for similar services performed by an individual who is not the recipient of a scholarship or a fellowship grant. A typical example of employment under this subparagraph is the case of an individual who is required, as a condition to receiving the scholarship or the fellowship grant, to perform part-time teaching services. A requirement that the individual shall furnish periodic reports to the grantor of the scholarship or the fellowship grant for the purpose of keeping the grantor informed as to the general progress of the individual shall not be deemed to constitute the performance of services in the nature of part-time employment.

(2) *Exception.* If teaching, research, or other services are required of all candidates (whether or not recipients of scholarships or fellowship grants) for a particular degree as a condition to receiving the degree, such teaching, research, or other services on the part of the recipient of a scholarship or fellowship grant who is a candidate for such degree shall not be regarded as part-time employment within the meaning of this paragraph. Thus, if all candidates for a particular education degree are required, as part of their regular course of study or curriculum, to perform part-time practice teaching services, such services are not to be regarded as part-time employment within the meaning of this paragraph.

(b) *Individuals who are not candidates for degrees*—(1) *Conditions for exclusion.* In the case of an individual who is not a candidate for a degree at an educational institution, the exclusion from gross income of an amount received as a scholarship or a fellowship grant shall apply (to the extent provided in subparagraph (2) of this paragraph) only if the grantor of the scholarship or fellowship grant is—

(i) An organization described in section 501(c)(3) which is exempt from tax under section 501(a),

(ii) The United States or an instrumentality or agency thereof, or a State, a territory, or a possession of the United States, or any political subdivision thereof, or the District of Columbia, or

(iii) For taxable years beginning after December 31, 1961, a foreign government, an international organization, or a binational or multinational educational and cultural foundation or commission created or continued pursuant to section 103 of the Mutual Educational and Cultural Exchange Act of 1961 (22 U.S.C. 2453).

(2) *Extent of exclusion.* (i) In the case of an individual who is not a candidate for a degree, the amount received as a scholarship or a fellowship grant which is excludable from gross income under section 117(a)(1) shall not exceed an amount equal to $300 times the number of months for which the recipient received amounts under the scholarship or fellowship grant during the taxable year. In determining the number of

months during the period for which the recipient received amounts under a scholarship or fellowship grant, computation shall be made on the basis of whole calendar months. A whole calendar month means a period of time terminating with the day of the succeeding month numerically corresponding to the day of the month of its beginning, less one, except that if there be no corresponding day of the succeeding month the period terminates with the last day of the succeeding month. For purposes of this computation a fractional part of a calendar month consisting of a period of time including 15 days or more shall be considered to be a whole calendar month and a fractional part of a calendar month consisting of a period of time including 14 days or less shall be disregarded. For example, if an individual receives a fellowship grant on September 13 which is to expire on June 12 of the following year, the grant shall be considered to have extended for a period of 9 months. If in the preceding example the grant expired on June 27, instead of June 12, the grant shall be considered to have extended for a period of 10 months.

(ii) No exclusion shall be allowed under section 117(a)(1) to an individual who is not a candidate for a degree after the recipient has, as an individual who is not a candidate for a degree, been entitled to an exclusion under that section for a period of 36 months. This limitation applies if the individual has received any amount which was either excluded or excludable from his gross income under section 117(a)(1) for any prior 36 months, whether or not consecutive. For example, if the individual received a fellowship grant of $7,200 for 3 years (which he elected to receive in 36 monthly installments of $200), his exclusion period would be exhausted even though he did not in any of the 36 months make use of the maximum exclusion. Accordingly, such individual would be entitled to no further exclusion from gross income with respect to any additional grants which he may receive as an individual who is not a candidate for a degree.

(iii) If an individual who is not a candidate for a degree receives amounts from more than one scholarship or fellowship grant during the taxable year, the total amounts received in the taxable year shall be aggregated for the purpose of computing the amount which may be excludable from gross income for such taxable year. If amounts are received from more than one scholarship or fellowship grant during the same month or months within the taxable year, such month or months shall be counted only once for the purpose of determining the number of months for which the individual received such amounts under the scholarships or fellowship grants during the taxable year. For example, if an individual receives a fellowship grant from one source for the months of January to June of the taxable year and also receives a fellowship grant from another source for the months of March through December of the same taxable year, he shall be considered to have received amounts for 12 months of the taxable year. See example (4) in subparagraph (3) of this paragraph for further illustration.

(3) *Examples.* The application of this paragraph may be further illustrated by the following examples, it being assumed that in each example the grantor is a grantor who is described in section 117(b)(2)(A) and subparagraph (1) of this paragraph:

Example 1. B, an individual who files his return on the calendar year basis, is awarded a post-doctorate fellowship grant in March 1955. The grant is to commence on September 1, 1955, and is to end on May 31, 1956, so that it will extend over a period of 9 months. The amount of the fellowship grant is $4,500 and B receives this amount in monthly installments of $500 on the first day of each month commencing September 1, 1955. During the taxable year 1955, B receives a total of $2,000 with respect to the 4-month period September through December, inclusive. He may exclude $1,200 from gross income in the taxable year 1955 ($300×4) and must include the remaining $800 in gross income for that year. For the year 1956, he will exclude $1,500 ($300×5) from gross income with respect to the $2,500 which he receives in that year and must include in gross income $1,000.

Example 2. Assume the same facts as in example (1) except that B receives the full amount of the grant ($4,500) on September 1, 1955. Since the amount received in the taxable year 1955 is for the full term of the fellowship grant (9 months), B may exclude

$2,700 ($300×9) from gross income for the taxable year 1955. The remaining $1,800 must be included in gross income for that year.

Example 3. C, an individual who files his return on the calendar year basis, is awarded a post-doctorate fellowship grant in March 1955. The amount of the grant is $4,500 for a period commencing on September 1, 1955, and ending 24 months thereafter. C receives the full amount of the grant on September 1, 1955. C may exclude from gross income for the taxable year 1955, the full amount of the grant ($4,500) since this amount does not exceed an amount equal to $300 times the number of months (24) for which he received the amount of the grant during that taxable year.

Example 4. (i) F, an individual who files his return on the calendar year basis, is awarded a post-doctorate fellowship grant (Grant A) for two years commencing June 1, 1955, in the amount of $4,800. He elects to receive his grant in monthly installments of $200 commencing June 1, 1955. On March 1, 1956, F is awarded another post-doctorate fellowship grant (Grant B) for two years commencing September 1, 1956, in the amount of $7,200. He elects to receive this grant in monthly installments of $300 commencing September 1, 1956.

(ii) For the calendar year 1955, F receives $1,400 from Grant A which he is entitled to exclude from gross income since it does not exceed an amount equal to $300 times the number of months (7) for which he received amounts under the grant in the taxable year.

(iii) For the calendar year 1956, F receives $3,600 as the aggregate of amounts received under fellowship grants ($2,400 from Grant A and $1,200 from Grant B). F will be entitled to exclude the entire amount of $3,600 from gross income for the calendar year 1956 since such amount does not exceed an amount equal to $300 times the number of months (12) for which he received amounts under the grants in the taxable year.

(iv) For the calendar year 1957, F receives $4,600 as the aggregate of amounts received under fellowship grants ($1,000 from Grant A and $3,600 from Grant B). F will be entitled to exclude $3,600 ($300×12) from gross income for the calendar year 1957 and he will have to include $1,000 in gross income.

(v) For the calendar year 1958, F receives $2,400 from Grant B. F is entitled to exclude $1,500 ($300×5) from gross income for the calendar year 1958 and he will have to include $900 in gross income. While F receives amounts under fellowship Grant B for 8 months during the calendar year 1958, he is limited to an amount equal to $300 times 5 (months) because of the fact that he has already been entitled to exclude (and has in fact excluded) amounts received as a fellowship grant for a period of 31 months. Accordingly, he can only exclude amounts received under the fellowship grant for 5 months during the calendar year 1958, because of the 36-month limitation period. The fact that he was entitled to exclude only $1,400 ($200 a month for 7 months) instead of the maximum amount of $2,100 ($300×7) in 1955, is immaterial and the limitation period of 36 months is applicable.

(vi) The following chart illustrates the computation of the number of months for which F received amounts under the fellowship grants during the respective taxable years and the computation of the total amounts received under the fellowship grants during each taxable year:

Period for which received and source	Number of months	Amounts received
1955:		
June 1 to December 31	7	
Grant A	....	$1,400
Grant B	....	None
Aggregate	7	1,400
1956:		
January 1 to August 31	8	
Grant A	....	1,600
Grant B	....	None
September 1 to December 31	4	
Grant A	....	800
Grant B	....	1,200
Aggregate	12	3,600
1957:		
January 1 to May 31	5	
Grant A	....	1,000
Grant B	....	1,500
June 1 to December 31	7	
Grant A	....	None
Grant B	....	2,100
Aggregate	12	4,600
1958:		
January 1 to August 31	8	
Grant A	....	None
Grant B	....	2,400
Aggregate	....	2,400

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6782, 29 FR 18355, Dec. 24, 1964]

§ 1.117–3 Definitions.

(a) *Scholarship.* A scholarship generally means an amount paid or allowed to, or for the benefit of, a student, whether an undergraduate or a graduate, to aid such individual in pursuing his studies. The term includes the value of contributed services and accommodations (see paragraph (d) of this section) and the amount of tuition, matriculation, and other fees which are furnished or remitted to a student to aid him in pursuing his studies. The term also includes any amount received in the nature of a family allowance as a part of a scholarship. However, the term does not include any amount provided by an individual to aid a relative, friend, or other individual in pursuing his studies where the grantor is motivated by family or philanthropic considerations. If an educational institution maintains or participates in a plan whereby the tuition of a child of a faculty member of such institution is remitted by any other participating educational institution attended by such child, the amount of the tuition so remitted shall be considered to be an amount received as a scholarship.

(b) *Educational organization.* For definition of ''educational organization'' paragraphs (a) and (b) of section 117 adopt the definition of that term which is prescribed in section 151(e)(4). Accordingly, for purposes of section 117 the term ''educational organization'' means only an educational organization which normally maintains a regular faculty and curriculum and normally has a regularly organized body of students in attendance at the place where its educational activities are carried on. See section 151(e)(4) and regulations thereunder.

(c) *Fellowship grant.* A fellowship grant generally means an amount paid or allowed to, or for the benefit of, an individual to aid him in the pursuit of study or research. The term includes the value of contributed services and accommodations (see paragraph (d) of this section) and the amount of tuition, matriculation, and other fees which are furnished or remitted to an individual to aid him in the pursuit of study or research. The term also includes any amount received in the nature of a family allowance as a part of a fellowship grant. However, the term does not include any amount provided by an individual to aid a relative, friend, or other individual in the pursuit of study or research where the grantor is motivated by family or philanthropic considerations.

(d) *Contributed services and accommodations.* The term ''contributed services and accommodations'' means such services and accommodations as room, board, laundry service, and similar services or accommodations which are received by an individual as a part of a scholarship or fellowship grant.

(e) *Candidate for a degree.* The term ''candidate for a degree'' means an individual, whether an undergraduate or a graduate, who is pursuing studies or conducting research to meet the requirements for an academic or professional degree conferred by colleges or universities. It is not essential that such study or research be pursued or conducted at an educational institution which confers such degrees if the purpose thereof is to meet the requirements for a degree of a college or university which does confer such degrees. A student who receives a scholarship for study at a secondary school or other educational institution is considered to be a ''candidate for a degree.''

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960, as amended by T.D. 8032, 50 FR 27232, July 2, 1985]

§ 1.117–4 Items not considered as scholarships or fellowship grants.

The following payments or allowances shall not be considered to be amounts received as a scholarship or a fellowship grant for the purpose of section 117:

(a) *Educational and training allowances to veterans.* Educational and training allowances to a veteran pursuant to section 400 of the Servicemen's Readjustment Act of 1944 (58 Stat. 287) or pursuant to 38 U.S.C. 1631 (formerly section 231 of the Veterans' Readjustment Assistance Act of 1952).

(b) *Allowances to members of the Armed Forces of the United States.* Tuition and subsistence allowances to members of the Armed Forces of the United States who are students at an educational institution operated by the United States or approved by the United States for their education and training, such as the United States Naval Academy and the United States Military Academy.

(c) *Amounts paid as compensation for services or primarily for the benefit of the grantor.* (1) Except as provided in paragraph (a) of §§ 1.117–2 and 1.117–5, any amount paid or allowed to, or on behalf of, an individual to enable him to pursue studies or research, if such amount represents either compensation for past, present, or future employment services or represents payment for services which are subject to the direction or supervision of the grantor.

(2) Any amount paid or allowed to, or on behalf of, an individual to enable him to pursue studies or research primarily for the benefit of the grantor.

However, amounts paid or allowed to, or on behalf of, an individual to enable him to pursue studies or research are considered to be amounts received as a scholarship or fellowship grant for the purpose of section 117 if the primary purpose of the studies or research is to further the education and training of the recipient in his individual capacity and the amount provided by the grantor for such purpose does not represent compensation or payment for the services described in subparagraph (1) of this paragraph. Neither the fact that the recipient is required to furnish reports of his progress to the grantor, nor the fact that the results of his studies or research may be of some incidental benefits to the grantor shall, of itself, be considered to destroy the essential character of such amount as a scholarship or fellowship grant.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960, as amended by T.D. 8032, 50 FR 27232, July 2, 1985]

§ 1.117–5 Federal grants requiring future service as a Federal employee.

(a) *In general.* Under section 117(c), amounts received by an individual under a Federal program as a scholarship or grant for qualified tuition and expenses at an institution of higher education are excluded from the gross income of the recipient even though the recipient is required to perform future service as a Federal employee. See paragraph (c) of this section for the definitions of the terms ''qualified tuition and expenses'' and ''institution of higher education.''

(b) *Exception for uniformed services scholarship programs.* The requirements of this section do not apply to amounts received before 1985 by a member of a uniformed service who entered training before 1981 under the Armed Forces Health Professions Scholarship Program, National Public Health Service Corps Scholarship Training Program, or other substantially similar Federal programs requiring the recipient to work for a uniformed Federal service after completion of studies. These awards are governed by section 4 of Pub. L. 93–483 as amended by Pub. L. 95–171, Pub. L. 95–600 and Pub. L. 96–167. See section 101(3) of title 37, United States Code for the definition of the term ''uniformed service.''

(c) *Definitions*—(1) *Qualified tuition and related expenses.* For purposes of section 117(c) and this section, qualified tuition and related expenses are those amounts which under the terms of the Federal program are required to be used and in fact are used for payment of:

(i) Tuition and fees that are required for the recipient's enrollment or attendance at an institution of higher education; and

(ii) Those amounts used for payment of fees, books, supplies and equipment required for courses of instruction at such an institution.

Incidental expenses are not considered related expenses and thus are not excludable from gross income under section 117(c). Incidental expenses include room and board at an institution of higher education, expenses for travel (including expenses for meals and lodging incurred during travel and allowances for travel of the recipient's family), research, clerical help, equipment and other expenses which are not required for enrollment at the institution or in a course of instruction at such institution.

(2) *Institution of higher education.* To qualify as an institution of higher education under this section, the institution must be a public or other nonprofit institution in any state which—

(i) Admits as regular students only individuals who have a certificate of graduation from a high school or the recognized equivalent of such a certificate;

(ii) Is legally authorized within the state to provide a program of education beyond high school; and

(iii) Provides an education program for which it awards a bachelor's or higher degree or which is acceptable for full credit towards such a degree, or which trains and prepares students for gainful employment in a recognized health profession. For purposes of this section, recognized health professions are those health professions which are supervised or monitored by appropriate state or Federal agencies or governing professional associations and which require members to be currently licensed or certified in order to practice.

(3) *Service as a Federal employee*—(i) *In general*. Except as otherwise provided in paragraph (c)(3)(ii) of this section, service as a Federal employee refers to employment of the recipient by the Federal government to work directly for the Federal government. Thus, Federal grants or scholarships which do not require the recipient to work directly for the Federal government are not governed by the rules of this section.

(ii) *Service in a health manpower shortage area*. For purposes of this section an obligation under a grant for the recipient to serve in a health related field in a health manpower shortage area as designated by the Secretary of Health and Human Services according to the criteria of the Public Health Services Act (42 U.S.C. 254(e)) and the regulations promulgated thereunder (42 CFR 5.1–5.4) will be considered an obligation to serve as a Federal employee.

(d) *Records required for exclusion from gross income*. To exclude amounts received under Federal programs requiring future services as a Federal employee, the recipient must maintain records that establish that the amounts received under such programs were used for qualified tuition and related expenses as defined in paragraph (c)(1) of this section. Qualifying uses may be established by providing to the Service, upon request, copies of relevant bills, receipts, cancelled checks or other convenient documentation or records which clearly reflect the use of the money received under the grant. The recipient must also submit, upon request, documentation establishing receipt of the grant and setting out the terms and requirements of the particular grant.

(e) *Applicability of rules of §§117(a) and 117(b)*. Except where a different rule has been expressly provided in this section, amounts received under Federal grants requiring future service as a Federal employee, and which meet the requirements for exclusion from gross income under this section, are subject to the rules, limitations and definitions specified in §§117 (a) and (b) of the Code and §§1.117–1 through 1.117–4.

(f) *Effective date*. Except as provided in paragraph (b) of this section, this section will apply to amounts received after December 31, 1980 under Federal programs which meet the requirements of this section.

[T.D. 8032, 50 FR 27232, July 2, 1985]

§1.118–1 Contributions to the capital of a corporation.

In the case of a corporation, section 118 provides an exclusion from gross income with respect to any contribution of money or property to the capital of the taxpayer. Thus, if a corporation requires additional funds for conducting its business and obtains such funds through voluntary pro rata payments by its shareholders, the amounts so received being credited to its surplus account or to a special account, such amounts do not constitute income, although there is no increase in the outstanding shares of stock of the corporation. In such a case the payments are in the nature of assessments upon, and represent an additional price paid for, the shares of stock held by the individual shareholders, and will be treated as an addition to and as a part of the operating capital of the company. Section 118 also applies to contributions to capital made by persons other than shareholders. For example, the exclusion applies to the value of land or other property contributed to a corporation by a governmental unit or by a civic group for the purpose of inducing the corporation to locate its business in a particular community, or for the purpose of enabling the corporation to expand its operating facilities. However, the exclusion does not apply to any money or property transferred to the corporation in consideration for goods or services rendered, or to subsidies paid for the purpose of inducing the taxpayer to limit production. See section 362 for the basis of property acquired by a corporation through a contribution to its capital by its stockholders or by nonstockholders.

§ 1.118–2 Contribution in aid of construction.

(a) *Special rule for water and sewerage disposal utilities*—(1) *In general.* For purposes of section 118, the term *contribution to the capital of the taxpayer* includes any amount of money or other property received from any person (whether or not a shareholder) by a regulated public utility that provides water or sewerage disposal services if—

(i) The amount is a contribution in aid of construction under paragraph (b) of this section;

(ii) In the case of a contribution of property other than water or sewerage disposal facilities, the amount satisfies the expenditure rule under paragraph (c) of this section; and

(iii) The amount (or any property acquired or constructed with the amount) is not included in the taxpayer's rate base for ratemaking purposes.

(2) *Definitions*—(i) *Regulated public utility* has the meaning given such term by section 7701(a)(33), except that such term does not include any utility which is not required to provide water or sewerage disposal services to members of the general public in its service area.

(ii) *Water or sewerage disposal facility* is defined as tangible property described in section 1231(b) that is used predominately (80% or more) in the trade or business of furnishing water or sewerage disposal services.

(b) *Contribution in aid of construction*—(1) *In general.* For purposes of section 118(c) and this section, the term *contribution in aid of construction* means any amount of money or other property contributed to a regulated public utility that provides water or sewerage disposal services to the extent that the purpose of the contribution is to provide for the expansion, improvement, or replacement of the utility's water or sewerage disposal facilities.

(2) *Advances.* A contribution in aid of construction may include an amount of money or other property contributed to a regulated public utility for a water or sewerage disposal facility subject to a contingent obligation to repay the amount, in whole or in part, to the contributor (commonly referred to as an advance). For example, an amount received by a utility from a developer to construct a water facility pursuant to an agreement under which the utility will pay the developer a percentage of the receipts from the facility over a fixed period may constitute a contribution in aid of construction. Whether an advance is a contribution or a loan is determined under general principles of federal tax law based on all the facts and circumstances. For the treatment of any amount of a contribution in aid of construction that is repaid by the utility to the contributor, see paragraphs (c)(2)(ii) and (d)(2) of this section.

(3) *Customer connection fee*—(i) *In general.* Except as provided in paragraph (b)(3)(ii) of this section, a customer connection fee is not a contribution in aid of construction under this paragraph (b) and generally is includible in income. The term *customer connection fee* includes any amount of money or other property transferred to the utility representing the cost of installing a connection or service line (including the cost of meters and piping) from the utility's main water or sewer lines to the line owned by the customer or potential customer. A customer connection fee also includes any amount paid as a service charge for starting or stopping service.

(ii) *Exceptions*—(A) *Multiple customers.* Money or other property contributed for a connection or service line from the utility's main line to the customer's or the potential customer's line is not a customer connection fee if the connection or service line serves, or is designed to serve, more than one customer. For example, a contribution for a split service line that is designed to serve two customers is not a customer connection fee. On the other hand, if a water or sewerage disposal utility treats an apartment or office building as one utility customer, then the cost of installing a connection or service line from the utility's main water or sewer lines serving that single customer is a customer connection fee.

(B) *Fire protection services.* Money or other property contributed for public and private fire protection services is not a customer connection fee.

(4) *Reimbursement for a facility previously placed in service*—(i) *In general.* If a water or sewerage disposal facility

is placed in service by the utility before an amount is contributed to the utility, the contribution is not a contribution in aid of construction under this paragraph (b) with respect to the cost of the facility unless, no later than 8½ months after the close of the taxable year in which the facility was placed in service, there is an agreement, binding under local law, that the utility is to receive the amount as reimbursement for the cost of acquiring or constructing the facility. An order or tariff, binding under local law, that is issued or approved by the applicable public utility commission requiring current or prospective utility customers to reimburse the utility for the cost of acquiring or constructing the facility, is a binding agreement for purposes of the preceding sentence. If an agreement exists, the basis of the facility must be reduced by the amount of the expected contributions. Appropriate adjustments must be made if actual contributions differ from expected contributions.

(ii) *Example.* The application of paragraph (b)(4)(i) of this section is illustrated by the following example:

Example. M, a calendar year regulated public utility that provides water services, spent $1,000,000 for the construction of a water facility that can serve 200 customers. M placed the facility in service in 2000. In June 2001, the public utility commission that regulates M approves a tariff requiring new customers to reimburse M for the cost of constructing the facility by paying a service availability charge of $5,000 per lot. Pursuant to the tariff, M expects to receive reimbursements for the cost of the facility of $100,000 per year for the years 2001 through 2010. The reimbursements are contributions in aid of construction under paragraph (b) of this section because no later than 8½ months after the close of the taxable year in which the facility was placed in service there was a tariff, binding under local law, approved by the public utility commission requiring new customers to reimburse the utility for the cost of constructing the facility. The basis of the $1,000,000 facility is zero because the expected contributions equal the cost of the facility.

(5) *Classification by ratemaking authority.* The fact that the applicable ratemaking authority classifies any money or other property received by a utility as a contribution in aid of construction is not conclusive as to its treatment under this paragraph (b).

(c) *Expenditure rule*—(1) *In general.* An amount satisfies the expenditure rule of section 118(c)(2) if the amount is expended for the acquisition or construction of property described in section 118(c)(2)(A), the amount is paid or incurred before the end of the second taxable year after the taxable year in which the amount was received as required by section 118(c)(2)(B), and accurate records are kept of contributions and expenditures as provided in section 118(c)(2)(C).

(2) *Excess amount*—(i) *Includible in the utility's income.* An amount received by a utility as a contribution in aid of construction that is not expended for the acquisition or construction of water or sewerage disposal facilities as required by paragraph (c)(1) of this section (the excess amount) is not a contribution to the capital of the taxpayer under paragraph (a) of this section. Except as provided in paragraph (c)(2)(ii) of this section, such excess amount is includible in the utility's income in the taxable year in which the amount was received.

(ii) *Repayment of excess amount.* If the excess amount described in paragraph (c)(2)(i) of this section is repaid, in whole or in part, either—

(A) Before the end of the time period described in paragraph (c)(1) of this section, the repayment amount is not includible in the utility's income; or

(B) After the end of the time period described in paragraph (c)(1) of this section, the repayment amount may be deducted by the utility in the taxable year in which it is paid or incurred to the extent such amount was included in income.

(3) *Example.* The application of this paragraph (c) is illustrated by the following example:

Example. M, a calendar year regulated public utility that provides water services, received a $1,000,000 contribution in aid of construction in 2000 for the purpose of constructing a water facility. To the extent that the $1,000,000 exceeded the actual cost of the facility, the contribution was subject to being returned. In 2001, M built the facility at a cost of $700,000 and returned $200,000 to the contributor. As of the end of 2002, M had not returned the remaining $100,000. Assuming accurate records are kept, the requirement under section 118(c)(2) is satisfied for $700,000 of the contribution. Because $200,000 of the contribution was returned within the time period during which qualifying expenditures could be made, this amount is not includible in M's income. However, the remaining $100,000 is includible in M's income for its 2000 taxable year (the taxable year in which the amount was received) because the amount was neither spent nor repaid during the prescribed time period. To the extent M repays the remaining $100,000 after year 2002, M would be entitled to a deduction in the year such repayment is paid or incurred.

(d) *Adjusted basis*—(1) *Exclusion from basis*. Except for a repayment described in paragraph (d)(2) of this section, to the extent that a water or sewerage disposal facility is acquired or constructed with an amount received as a contribution to the capital of the taxpayer under paragraph (a) of this section, the basis of the facility is reduced by the amount of the contribution. To the extent the water or sewerage disposal facility is acquired as a contribution to the capital of the taxpayer under paragraph (a) of this section, the basis of the contributed facility is zero.

(2) *Repayment of contribution*. If a contribution to the capital of the taxpayer under paragraph (a) of this section is repaid to the contributor, either in whole or in part, then the repayment amount is a capital expenditure in the taxable year in which it is paid or incurred, resulting in an increase in the property's adjusted basis in such year. Capital expenditures allocated to depreciable property under paragraph (d)(3) of this section may be depreciated over the remaining recovery period for that property.

(3) *Allocation of contributions*. An amount treated as a capital expenditure under this paragraph (d) is to be allocated proportionately to the adjusted basis of each property acquired or constructed with the contribution based on the relative cost of such property.

(4) *Example*. The application of this paragraph (d) is illustrated by the following example:

Example. A, a calendar year regulated public utility that provides water services, received a $1,000,000 contribution in aid of construction in 2000 as an advance from B, a developer, for the purpose of constructing a water facility. To the extent that the $1,000,000 exceeds the actual cost of the facility, the contribution is subject to being returned. Under the terms of the advance, A agrees to pay to B a percentage of the receipts from the facility over a fixed period, but limited to the cost of the facility. In 2001, A builds the facility at a cost of $700,000 and returns $300,000 to B. In 2002, A pays $20,000 to B out of the receipts from the facility. Assuming accurate records are kept, the $700,000 advance is a contribution to the capital of A under paragraph (a) of this section and is excludable from A's income. The basis of the $700,000 facility constructed with this contribution to capital is zero. The $300,000 excess amount is not a contribution to the capital of A under paragraph (a) of this section because it does not meet the expenditure rule described in paragraph (c)(1) of this section. However, this excess amount is not includible in A's income pursuant to paragraph (c)(2)(ii) of this section since the amount is repaid to B within the required time period. The repayment of the $300,000 excess amount to B in 2001 is not treated as a capital expenditure by A. The $20,000 payment to B in 2002 is treated as a capital expenditure by A in 2002 resulting in an increase in the adjusted basis of the water facility from zero to $20,000.

(e) *Statute of limitations*—(1) *Extension of statute of limitations*. Under section 118(d)(1), the statutory period for assessment of any deficiency attributable to a contribution to capital under paragraph (a) of this section does not expire before the expiration of 3 years after the date the taxpayer notifies the Secretary in the time and manner prescribed in paragraph (e)(2) of this section.

(2) *Time and manner of notification*. Notification is made by attaching a statement to the taxpayer's federal income tax return for the taxable year in which any of the reportable items in paragraphs (e)(2)(i) through (iii) of this section occur. The statement must contain the taxpayer's name, address, employer identification number, taxable year, and the following information with respect to contributions of property other than water or sewerage disposal facilities that are subject to the expenditure rule described in paragraph (c) of this section—

(i) The amount of contributions in aid of construction expended during the taxable year for property described in section 118(c)(2)(A) (qualified property) as required under paragraph (c)(1) of this section, identified by taxable year in which the contributions were received;

(ii) The amount of contributions in aid of construction that the taxpayer does not intend to expend for qualified property as required under paragraph (c)(1) of this section, identified by taxable year in which the contributions were received; and

(iii) The amount of contributions in aid of construction that the taxpayer failed to expend for qualified property as required under paragraph (c)(1) of this section, identified by taxable year in which the contributions were received.

(f) *Effective date*. This section is applicable for any money or other property received by a regulated public utility that provides water or sewerage disposal services on or after January 11, 2001.

[T.D. 8936, 66 FR 2254, Jan. 11, 2001]

§ 1.119–1 Meals and lodging furnished for the convenience of the employer.

(a) *Meals*—(1) *In general*. The value of meals furnished to an employee by his employer shall be excluded from the employee's gross income if two tests are met: (i) The meals are furnished on the business premises of the employer, and (ii) the meals are furnished for the convenience of the employer. The question of whether meals are furnished for the convenience of the employer is one of fact to be determined by analysis of all the facts and circumstances in each case. If the tests described in subdivisions (i) and (ii) of this subparagraph are met, the exclusion shall apply irrespective of whether under an employment contract or a statute fixing the terms of employment such meals are furnished as compensation.

(2) *Meals furnished without a charge*. (i) Meals furnished by an employer without charge to the employee will be regarded as furnished for the convenience of the employer if such meals are furnished for a substantial noncompensatory business reason of the employer. If an employer furnishes meals as a means of providing additional compensation to his employee (and not for a substantial noncompensatory business reason of the employer), the meals so furnished will not be regarded as furnished for the convenience of the employer. Conversely, if the employer furnishes meals to his employee for a substantial noncompensatory business reason, the meals so furnished will be regarded as furnished for the convenience of the employer, even though such meals are also furnished for a compensatory reason. In determining the reason of an employer for furnishing meals, the mere declaration that meals are furnished for a noncompensatory business reason is not sufficient to prove that meals are furnished for the convenience of the employer, but such determination will be based upon an examination of all the surrounding facts and circumstances. In subdivision (ii) of this subparagraph, there are set forth some of the substantial noncompensatory business reasons which occur frequently and which justify the conclusion that meals furnished for such a reason are furnished for the convenience of the employer. In subdivision (iii) of this subparagraph, there are set forth some of the business reasons which are considered to be compensatory and which, in the absence of a substantial noncompensatory business reason, justify the conclusion that meals furnished for such a reason are not furnished for the convenience of the employer. Generally, meals furnished before or after the working hours of the employee will not be regarded as furnished for the convenience of the employer, but see subdivision (ii) (*d*) and (*f*) of this subparagraph for some exceptions to this general rule. Meals furnished on nonworking days do not qualify for the exclusion under section 119. If the employee is required to occupy living quarters on the business premises of his employer as a condition of his employment (as defined in paragraph (b) of this section), the exclusion applies to the value of any meal furnished without charge to the employee on such premises.

(ii)(*a*) Meals will be regarded as furnished for a substantial noncompensatory business reason of the employer when the meals are furnished to the employee during his working hours to have the employee available for emergency call during his meal period. In order to demonstrate that meals are furnished to the employee to have the employee available for emergency call during the meal period, it must be shown that emergencies have actually occurred, or can reasonably be expected to occur, in the employer's business which have resulted, or will result, in the employer calling on the employee to perform his job during his meal period.

(*b*) Meals will be regarded as furnished for a substantial noncompensatory business reason of the employer when the meals are furnished to the employee during his working hours because the employer's business is such that the employee must be restricted to a short meal period, such as 30 or 45 minutes, and because the employee could not be expected to eat elsewhere in such a short meal period. For example, meals may qualify under this subdivision when the employer is engaged in a business in which the peak work load occurs during the normal lunch hours. However, meals cannot qualify under this subdivision (*b*) when the reason for restricting the time of the meal period is so that the employee can be let off earlier in the day.

(*c*) Meals will be regarded as furnished for a substantial noncompensatory business reason of the employer when the meals are furnished to the employee during his working hours because the employee could not otherwise secure proper meals within a reasonable meal period. For example, meals may qualify under this subdivision (*c*) when there are insufficient eating facilities in the vicinity of the employer's premises.

(*d*) A meal furnished to a restaurant employee or other food service employee for each meal period in which the employee works will be regarded as furnished for a substantial noncompensatory business reason of the employer, irrespective of whether the meal is furnished during, immediately before, or immediately after the working hours of the employee.

(*e*) If the employer furnishes meals to employees at a place of business and the reason for furnishing the meals to each of substantially all of the employees who are furnished the meals is a substantial noncompensatory business reason of the employer, the meals furnished to each other employee will also be regarded as furnished for a substantial noncompensatory business reason of the employer.

(*f*) If an employer would have furnished a meal to an employee during his working hours for a substantial noncompensatory business reason, a meal furnished to such an employee immediately after his working hours because his duties prevented him from obtaining a meal during his working hours will be regarded as furnished for a substantial noncompensatory business reason.

(iii) Meals will be regarded as furnished for a compensatory business reason of the employer when the meals are furnished to the employee to promote the morale or goodwill of the employee, or to attract prospective employees.

(3) *Meals furnished with a charge.* (i) If an employer provides meals which an employee may or may not purchase, the meals will not be regarded as furnished for the convenience of the employer. Thus, meals for which a charge is made by the employer will not be regarded as furnished for the convenience of the employer if the employee has a choice of accepting the meals and paying for them or of not paying for them and providing his meals in another manner.

(ii) If an employer furnishes an employee meals for which the employee is charged an unvarying amount (for example, by subtraction from his stated compensation) irrespective of whether he accepts the meals, the amount of such flat charge made by the employer for such meals is not, as such, part of the compensation includible in the gross income of the employee; whether the value of the meals so furnished is excludable under section 119 is determined by applying the rules of subparagraph (2) of this paragraph. If meals furnished for an unvarying amount are not furnished for the convenience of the employer in accordance with the rules of subparagraph (2) of this paragraph, the employee shall include in gross income the value of the meals regardless of whether the value exceeds or is less than the amount charged for such meals. In the absence of evidence to the contrary, the value of the meals may be deemed to be equal to the amount charged for them.

(b) *Lodging.* The value of lodging furnished to an employee by the employer shall be excluded from the employee's gross income if three tests are met:

(1) The lodging is furnished on the business premises of the employer,

(2) The lodging is furnished for the convenience of the employer, and

(3) The employee is required to accept such lodging as a condition of his employment.

The requirement of subparagraph (3) of this paragraph that the employee is required to accept such lodging as a condition of his employment means that he be required to accept the lodging in order to enable him properly to perform the duties of his employment. Lodging will be regarded as furnished to enable the employee properly to perform the duties of his employment when, for example, the lodging is furnished because the employee is required to be available for duty at all times or because the employee could not perform the services required of him unless he is furnished such lodging. If the tests described in subparagraphs (1), (2), and (3) of this paragraph are met, the exclusion shall apply irrespective of whether a charge is made, or whether, under an employment contract or statute fixing the terms of employment, such lodging is furnished as compensation. If the employer furnishes the employee lodging for which the employee is charged an unvarying amount irrespective of whether he accepts the lodging, the amount of the charge made by the employer for such lodging is not, as such, part of the compensation includible in the gross income of the employee; whether the value of the lodging is excludable from gross income under section 119 is determined by applying the other rules of this paragraph. If the tests described in subparagraph (1), (2), and (3) of this paragraph are not met, the employee shall include in gross income the value of the lodging regardless of whether it exceeds or is less than the amount charged. In the absence of evidence to the contrary, the value of the lodging may be deemed to be equal to the amount charged.

(c) *Business premises of the employer*—(1) *In general.* For purposes of this section, the term ''business premises of the employer'' generally means the place of employment of the employee. For example, meals and lodging furnished in the employer's home to a domestic servant would constitute meals and lodging furnished on the business premises of the employer. Similarly, meals furnished to cowhands while herding their employer's cattle on leased land would be regarded as furnished on the business premises of the employer.

(2) *Certain camps.* For taxable years beginning after December 31, 1981, in the case of an individual who is furnished lodging by or on behalf of his employer in a camp (as defined in paragraph (d) of this section) in a foreign country (as defined in §1.911–2(h)), the camp shall be considered to be part of the business premises of the employer.

(d) *Camp defined*—(1) *In general.* For the purposes of paragraph (c)(2) of this section, a camp is lodging that is all of the following:

(i) Provided by or on behalf of the employer for the convenience of the employer because the place at which the employee renders services is in a remote area where satisfactory housing is not available to the employee on the open market within a reasonable commuting distance of that place;

(ii) Located, as near as practicable, in the vicinity of the place at which the employee renders services; and

(iii) Furnished in a common area or enclave which is not available to the general public for lodging or accommodations and which normally accommodates ten or more employees.

(2) *Satisfactory housing.* For purposes of paragraph (d)(1)(i) of this section, facts and circumstances that may be relevant in determining whether housing available to the employee is satisfactory include, but are not limited to, the size and condition of living space and the availability and quality of utilities such as water, sewers or other waste disposal facilities, electricity, or heat. The general environment in which housing is located (e.g., climate, prevalence of insects, etc.) does not of itself make housing unsatisfactory. The general environment is relevant,

however, if housing is inadequate to protect the occupants from environmental conditions. The individual employee's income level is not relevant in determining whether housing is satisfactory; it may, however, be relevant in determining whether satisfactory housing is available to the employee (see paragraph (d)(3)(i)(B) of this section).

(3) *Availability of satisfactory housing*—(i) *Facts and circumstances.* For purposes of paragraph (d)(1)(i) of this section, facts and circumstances to be considered in determining whether satisfactory housing is available to the employee on the open market include but are not limited to:

(A) The number of housing units available on the open market in relation to the number of housing units required for the employer's employees;

(B) The cost of housing available on the open market;

(C) The quality of housing available on the open market; and

(D) The presence of warfare or civil insurrection within the area where housing would be available which would subject U.S. citizens to unusual risk of personal harm or property loss.

(ii) *Presumptions.* Satisfactory housing will generally be considered to be unavailable to the employee on the open market if either of the following conditions is satisfied:

(A) The foreign government requires the employer to provide housing for its employees other than housing available on the open market; or

(B) An unrelated person awarding work to the employer requires that the employer's employees occupy housing specified by such unrelated person.

The condition of either paragraph (d)(3)(ii) (A) or (B) of this section is not satisfied if the requirement described therein and imposed either by a foreign government or unrelated person applies primarily to U.S. employers and not to a significant number of third country employers or applies primarily to employers of U.S. employees and not to a significant number of employers of third country employees.

(4) *Reasonable commuting distance.* For purposes of paragraph (d)(1)(i) of this section, in determining whether a commuting distance is reasonable, the accessibility of the place at which the employee renders services due to geographic factors, the quality of the roads, the customarily available transportation, and the usual travel time (at the time of day such travel would be required) to the place at which the employee renders services shall be taken into account.

(5) *Common area or enclave.* A cluster of housing units does not satisfy paragraph (d)(1)(iii) of this section if it is adjacent to or surrounded by substantially similar housing available to the general public. Two or more common areas or enclaves that house employees who work on the same project (for example, a highway project) are considered to be one common area or enclave in determining whether they normally accommodate ten or more employees.

(e) *Rules.* The exclusion provided by section 119 applies only to meals and lodging furnished in kind by or on behalf of an employer to his employee. If the employee has an option to receive additional compensation in lieu of meals or lodging in kind, the value of such meals and lodging is not excludable from gross income under section 119. However, the mere fact that an employee, at his option, may decline to accept meals tendered in kind will not of itself require inclusion of the value thereof in gross income. Cash allowances for meals or lodging received by an employee are includible in gross income to the extent that such allowances constitute compensation.

(f) *Examples.* The provisions of section 119 may be illustrated by the following examples:

Example 1. A waitress who works from 7 a.m. to 4 p.m. is furnished without charge two meals a work day. The employer encourages the waitress to have her breakfast on his business premises before starting work, but does not require her to have breakfast there. She is required, however, to have her lunch on such premises. Since the waitress is a food service employee and works during the normal breakfast and lunch periods, the waitress is permitted to exclude from her gross income both the value of the breakfast and the value of the lunch.

Example 2. The waitress in example (1) is allowed to have meals on the employer's premises without charge on her days off. The waitress is not permitted to exclude the value of such meals from her gross income.

Example 3. A bank teller who works from 9 a.m. to 5 p.m. is furnished his lunch without charge in a cafeteria which the bank maintains on its premises. The bank furnishes the teller such meals in order to limit his lunch period to 30 minutes since the bank's peak work load occurs during the normal lunch period. If the teller had to obtain his lunch elsewhere, it would take him considerably longer than 30 minutes for lunch, and the bank strictly enforces the 30-minute time limit. The bank teller may exclude from his gross income the value of such meals obtained in the bank cafeteria.

Example 4. Assume the same facts as in example (3), except that the bank charges the bank teller an unvarying rate per meal regardless of whether he eats in the cafeteria. The bank teller is not required to include in gross income such flat amount charged as part of his compensation, and he is entitled to exclude from his gross income the value of the meals he receives for such flat charge.

Example 5. A Civil Service employee of a State is employed at an institution and is required by his employer to be available for duty at all times. The employer furnishes the employee with meals and lodging at the institution without charge. Under the applicable State statute, his meals and lodging are regarded as part of the employee's compensation. The employee would nevertheless be entitled to exclude the value of such meals and lodging from his gross income.

Example 6. An employee of an institution is given the choice of residing at the institution free of charge, or of residing elsewhere and receiving a cash allowance in addition to his regular salary. If he elects to reside at the institution, the value to the employee of the lodging furnished by the employer will be includible in the employee's gross income because his residence at the institution is not required in order for him to perform properly the duties of his employment.

Example 7. A construction worker is employed at a construction project at a remote job site in Alaska. Due to the inaccessibility of facilities for the employees who are working at the job site to obtain food and lodging and the prevailing weather conditions, the employer is required to furnish meals and lodging to the employee at the camp site in order to carry on the construction project. The employee is required to pay $40 a week for the meals and lodging. The weekly charge of $40 is not, as such, part of the compensation includible in the gross income of the employee, and under paragraphs (a) and (b) of this section the value of the meals and lodging is excludable from his gross income.

Example 8. A manufacturing company provides a cafeteria on its premises at which its employees can purchase their lunch. There is no other eating facility located near the company's premises, but the employee can furnish his own meal by bringing his lunch. The amount of compensation which any employee is required to include in gross income is not reduced by the amount charged for the meals, and the meals are not considered to be furnished for the convenience of the employer.

Example 9. A hospital maintains a cafeteria on its premises where all of its 230 employees may obtain a meal during their working hours. No charge is made for these meals. The hospital furnishes such meals in order to have each of 210 of the employees available for any emergencies that may occur, and it is shown that each such employee is at times called upon to perform services during his meal period. Although the hospital does not require such employees to remain on the premises during meal periods, they rarely leave the hospital during their meal period. Since the hospital furnishes meals to each of substantially all of its employees in order to have each of them available for emergency call during his meal period, all of the hospital employees who obtain their meals in the hospital cafeteria may exclude from their gross income the value of such meals.

[T.D. 6745, 29 FR 9380, July 9, 1964, as amended by T.D. 8006, 50 FR 2964, Jan. 23, 1985]

§ 1.120–1 Statutory subsistence allowance received by police.

(a) Section 120 excludes from the gross income of an individual employed as a police official by a State, Territory, or possession of the United States, by any of their political subdivisions, or by the District of Columbia, any amount received as a statutory subsistence allowance to the extent that such allowance does not exceed $5 per day. For purposes of this section, the term "statutory subsistence allowance" means an amount which is designated as a subsistence allowance under the laws of a State, a Territory, or a possession of the United States, any political subdivision of any of the foregoing, or the District of Columbia and which is paid to an individual who is employed as a police official of such governmental unit. A subsistence allowance paid to a police official by any of the foregoing governmental units which is not so provided by statute may not be excluded from gross income under the provisions of section 120. The term "police official" includes an employee of any of the foregoing governmental units who has police duties, such as a sheriff, a detective, a policeman, or a State police trooper, however designated.

(b) The exclusion provided by section 120 is to be computed on a daily basis, that is, for each day for which the statutory allowance is paid. If the statute providing the allowance does not specify the daily amount of such allowance, the allowance shall be converted to a daily basis for the purpose of applying the limitation provided herein. For example, if a State statute provides for a weekly subsistence allowance, the daily amount is to be determined by dividing the weekly amount by the number of days for which the allowance is paid. Thus, if a State trooper receives a weekly statutory subsistence allowance of $40 would be $8, that is, $40 divided by 5 for 5 days of the week, the daily amount would be $8, that is, $40 divided by 5. However, for purposes of this section, only $5 per day may be excluded, or $25 on a weekly basis.

(c) Expenses in respect of which the allowance under section 120 is paid may not be deducted under any provision of the income tax laws except to the extent that (1) such expenses exceed the amount of the exclusion, and (2) the excess is otherwise allowable as a deduction. For example, if a State statute provides a subsistence allowance of $3 per day and the taxpayer, a state trooper, incurs expenditures of $4.50 for meals while away from home overnight on official police duties only $3 would be excludable under this section. Expenses relating to such exclusion ($3) may not be deducted under any provision of the income tax laws. However, the remaining $1.50 may be an allowable deduction under section 162 as traveling expenses while away from home in the performance of official duties. See § 1.162–2.

(d) In the case of taxable years ending after September 30, 1958, section 120 and this section do not apply to amounts received as a statutory subsistence allowance for any day after September 30, 1958.

§ 1.120–3 Notice of application for recognition of status of qualified group legal services plan.

(a) *In general.* In order for a plan to be a qualified group legal services plan for purposes of the exclusion from gross income provided by section 120(a), the plan must give notice to the Internal Revenue Service that it is applying for recognition of its status as a qualified plan. Paragraph (b) of this section describes how the notice is to be filed for the plan. Paragraph (c) of this section describes the action that the Internal Revenue Service will take in response to the notice submitted for the plan. Paragraph (d) of this section describes the period of plan qualification.

(b) *Filing of notice*—(1) *In general.* A notice of application for recognition of the status of a qualified group legal services plan must be filed with the key district director of internal revenue as described in § 601.201(n). The notice must be filed on Form 1024, Application for Recognition of Exemption Under section 501(a) or for Determination Under section 120, with the accompanying Schedule L, and must contain the information required by the form and any accompanying instructions. The form may be filed by either the employer adopting the plan or the person administering the plan. No Form 1024 and Schedule L may be filed for a plan before an employer adopts the plan, or proposes to adopt the plan contingent only upon the recognition of the plan as a qualified plan.

(2) *Plans to which more than one employer contributes.* In general, for purposes of section 120 the adoption of a plan by an employer constitutes the adoption of a separate plan to which that employer alone contributes, notwithstanding that, in form, the employer purports to adopt a plan with respect to which the employer is one of two or more contributing employers. Accordingly, a separate Schedule L must be filed pursuant to the instructions accompanying Form 1024 for each employer adopting a plan.

(3) *Certain collectively bargained plans.* Notwithstanding subparagraph (2) of this paragraph, if a plan to which more than one employer contributes is a plan to which this subparagraph (3) applies, the plan is treated as a single plan for purposes of section 120. Accordingly, only one Form 1024 and Schedule L is required to be filed for the plan, regardless of the number of employers originally adopting the plan. In addition, once a Form 1024 and Schedule L is filed, no additional filing

is required with respect to an employer who thereafter adopts the plan. In general, this subparagraph (3) applies to any plan that is maintained pursuant to a collective bargaining agreement between employee representatives and more than one employer who is required by the plan instrument or other agreement to contribute to the plan with respect to employees (or their spouses or dependents) participating in the plan. This subparagraph does not apply, however, if all employers required to contribute to the plan are corporations which are members of a controlled group of corporations within the meaning of section 1563(a), determined without regard to section 1563(e)(3)(C). If all employers required to contribute to the plan are corporations which are members of such a controlled group, the filing requirements described in subparagraph (2) of this paragraph apply, notwithstanding that the plan is maintained pursuant to a collective bargaining agreement.

(c) *Internal Revenue Service action on notice of application for recognition.* The Internal Revenue Service will issue to the person submitting Form 1024 and Schedule L a ruling or determination letter stating that the plan is or is not a qualified group legal services plan. For general procedural rules, see §601.201 (a) through (n), as that section relates to rulings and determination letters.

(d) *Period of plan qualification*—(1) *In general.* In the case of a favorable determination, the plan will be considered a qualified group legal services plan. If a Form 1024 and Schedule L required to be filed by or on behalf of an employer is filed before—

(i) The end of the first plan year (as determined under the plan),

(ii) The end of the plan year within which the employer adopts the plan, or

(iii) July 29, 1980,

the period of plan qualification with respect to the employer will begin on the date the plan is adopted by the employer (or, if later, January 1, 1977). If the form and schedule are not filed before the latest of the dates described in subdivisions (i), (ii) and (iii), the period of plan qualification with respect to the employer will begin on the date of filing. In any case in which either the Form 1024 or Schedule L filed by or on behalf of an employer is incomplete, the date of filing is the date on which the incomplete form or schedule is filed, if the necessary additional information is provided at the request of the Commissioner within the additional time period allowed by the Commissioner. If the additional information is not provided within the additional time period, allowed, the date of filing is the date on which the additional information is filed. If no separate Form 1024 and Schedule L are required to be filed by or on behalf of an employer (see paragraph (b)(3) of this section), the period of plan qualification with respect to the employer will begin on the date the plan is adopted by the employer (or, if later, January 1, 1977). In any case in which a plan is materially modified to conform to the requirements of section 120, either before or after a Form 1024 and Schedule L are filed, the period of plan qualification will not include any period before the effective date of the modification.

(2) *Plans in existence on June 4, 1976.* (i) Notwithstanding paragraph (d)(1) of this section, a written group legal services plan providing for employer contributions which was in existence on June 4, 1976, will be considered a qualified group legal services plan for the period January 1, 1977, through April 2, 1977. However, if the plan is maintained pursuant to one or more agreements which were in effect on October 4, 1976, and which the Secretary of Labor finds to be collective bargaining agreements, the period of deemed qualification will extend beyond April 2, 1977, and end on the date on which the last of the collective bargaining agreements relating to the plan terminates. Extensions of a bargaining agreement which are agreed to after October 4, 1976, are to be disregarded. The period of deemed qualification for a plan maintained pursuant to a collective bargaining agreement will not, however, extend beyond December 31, 1981.

(ii) A written group legal services plan will be considered to have been in existence on June 4, 1976, if on or before that date the plan was reduced to writing and adopted by one or more employers. No amounts need have been contributed under the plan as of June 4, 1976.

(iii) Notwithstanding that a plan is a qualified plan for the period of deemed qualification described in this paragraph (d)(2), the rules of paragraphs (c) and (d)(1) of this section still apply with respect to a Form 1024 and Schedule L filed for the plan. For example, if a Form 1024 and Schedule L filed by or on behalf of an employer are filed before the latest of the 3 dates described in paragraph (d)(1) of this section, in the case of a favorable determination the plan will be a qualified plan from the date the plan is adopted by the employer (or, if later, January 1, 1977), and any period of deemed qualification and the period of qualification based upon the favorable determination will overlap. However, in the case of a plan to which this paragraph (d)(2) applies, if a Form 1024 and Schedule L required to be filed by or on behalf of an employer is not filed before the latest of the 3 dates described in paragraph (d)(1) of this section, the following rules shall apply. In general, if Form 1024 and Schedule L are filed before the end of the plan year following the plan year with or within which the plan's period of deemed qualification expires, in the event of a favorable determination the plan will be a qualified plan with respect to the employer beginning on the earlier of the day following the date on which the period of deemed qualification expires or the date on which the Form 1024 and Schedule L are filed. The period of plan qualification with respect to an employer cannot, however, include any period before the employer adopts the plan. If the Form 1024 and Schedule L are not filed before the end of the plan year following the plan year with or within which the plan's period of deemed qualification expires, in the case of a favorable determination the plan will be a qualified plan with respect to an employer from the later of the date of filing or adoption of the plan by the employer. The rules described in paragraph (d)(1) of this section relating to incomplete filings and plan modifications apply with respect to a filing described in this paragraph (d)(2).

(e) *Effective date.* This section is effective for notices of application for recognition of the status of a qualified group legal services plan filed after May 29, 1980.

(Secs. 120(c)(4) and 7805 of the Internal Revenue Code of 1954, 90 Stat. 1926, 68A Stat. 917; (26 U.S.C. 120(c)(4), 7805))

[T.D. 7696, 45 FR 28320, Apr. 29, 1980]

§ 1.121–1 Exclusion of gain from sale or exchange of a principal residence.

(a) *In general.* Section 121 provides that, under certain circumstances, gross income does not include gain realized on the sale or exchange of property that was owned and used by a taxpayer as the taxpayer's principal residence. Subject to the other provisions of section 121, a taxpayer may exclude gain only if, during the 5-year period ending on the date of the sale or exchange, the taxpayer owned and used the property as the taxpayer's principal residence for periods aggregating 2 years or more.

(b) *Residence*—(1) *In general.* Whether property is used by the taxpayer as the taxpayer's residence depends upon all the facts and circumstances. A property used by the taxpayer as the taxpayer's residence may include a houseboat, a house trailer, or the house or apartment that the taxpayer is entitled to occupy as a tenant-stockholder in a cooperative housing corporation (as those terms are defined in section 216(b)(1) and (2)). Property used by the taxpayer as the taxpayer's residence does not include personal property that is not a fixture under local law.

(2) *Principal residence.* In the case of a taxpayer using more than one property as a residence, whether property is used by the taxpayer as the taxpayer's principal residence depends upon all the facts and circumstances. If a taxpayer alternates between 2 properties, using each as a residence for successive periods of time, the property that the taxpayer uses a majority of the time during the year ordinarily will be considered the taxpayer's principal residence. In addition to the taxpayer's use of the property, relevant factors in determining a taxpayer's principal residence, include, but are not limited to—

(i) The taxpayer's place of employment;

(ii) The principal place of abode of the taxpayer's family members;

(iii) The address listed on the taxpayer's federal and state tax returns, driver's license, automobile registration, and voter registration card;

(iv) The taxpayer's mailing address for bills and correspondence;

(v) The location of the taxpayer's banks; and

(vi) The location of religious organizations and recreational clubs with which the taxpayer is affiliated.

(3) *Vacant land*—(i) *In general.* The sale or exchange of vacant land is not a sale or exchange of the taxpayer's principal residence unless—

(A) The vacant land is adjacent to land containing the dwelling unit of the taxpayer's principal residence;

(B) The taxpayer owned and used the vacant land as part of the taxpayer's principal residence;

(C) The taxpayer sells or exchanges the dwelling unit in a sale or exchange that meets the requirements of section 121 within 2 years before or 2 years after the date of the sale or exchange of the vacant land; and

(D) The requirements of section 121 have otherwise been met with respect to the vacant land.

(ii) *Limitations*—(A) *Maximum limitation amount.* For purposes of section 121(b)(1) and (2) (relating to the maximum limitation amount of the section 121 exclusion), the sale or exchange of the dwelling unit and the vacant land are treated as one sale or exchange. Therefore, only one maximum limitation amount of $250,000 ($500,000 for certain joint returns) applies to the combined sales or exchanges of vacant land and the dwelling unit. In applying the maximum limitation amount to sales or exchanges that occur in different taxable years, gain from the sale or exchange of the dwelling unit, up to the maximum limitation amount under section 121(b)(1) or (2), is excluded first and each spouse is treated as excluding one-half of the gain from a sale or exchange to which section 121(b)(2)(A) and §1.121–2(a)(3)(i) (relating to the limitation for certain joint returns) apply.

(B) *Sale or exchange of more than one principal residence in 2-year period.* If a dwelling unit and vacant land are sold or exchanged in separate transactions that qualify for the section 121 exclusion under this paragraph (b)(3), each of the transactions is disregarded in applying section 121(b)(3) (restricting the application of section 121 to only 1 sale or exchange every 2 years) to the other transactions but is taken into account as a sale or exchange of a principal residence on the date of the transaction in applying section 121(b)(3) to that transaction and the sale or exchange of any other principal residence.

(C) *Sale or exchange of vacant land before dwelling unit.* If the sale or exchange of the dwelling unit occurs in a later taxable year than the sale or exchange of the vacant land and after the date prescribed by law (including extensions) for the filing of the return for the taxable year of the sale or exchange of the vacant land, any gain from the sale or exchange of the vacant land must be treated as taxable on the taxpayer's return for the taxable year of the sale or exchange of the vacant land. If the taxpayer has reported gain from the sale or exchange of the vacant land as taxable, after satisfying the requirements of this paragraph (b)(3) the taxpayer may claim the section 121 exclusion with regard to the sale or exchange of the vacant land (for any period for which the period of limitation under section 6511 has not expired) by filing an amended return.

(4) *Examples.* The provisions of this paragraph (b) are illustrated by the following examples:

Example 1. Taxpayer A owns 2 residences, one in New York and one in Florida. From 1999 through 2004, he lives in the New York residence for 7 months and the Florida residence for 5 months of each year. In the absence of facts and circumstances indicating otherwise, the New York residence is A's principal residence. A would be eligible for the section 121 exclusion of gain from the sale or exchange of the New York residence, but not the Florida residence.

Example 2. Taxpayer B owns 2 residences, one in Virginia and one in Maine. During 1999 and 2000, she lives in the Virginia residence. During 2001 and 2002, she lives in the Maine residence. During 2003, she lives in the Virginia residence. B's principal residence during 1999, 2000, and 2003 is the Virginia residence. B's principal residence during 2001 and 2002 is the Maine residence. B would be eligible for the 121 exclusion of gain from the sale or exchange of either residence (but not both) during 2003.

Example 3. In 1991 Taxpayer C buys property consisting of a house and 10 acres that she uses as her principal residence. In May 2005 C sells 8 acres of the land and realizes a gain of $110,000. C does not sell the dwelling unit before the due date for filing C's 2005 return, therefore C is not eligible to exclude the $110,000 of gain. In March 2007 C sells the house and remaining 2 acres realizing a gain of $180,000 from the sale of the house. C may exclude the $180,000 of gain. Because the sale of the 8 acres occurred within 2 years from the date of the sale of the dwelling unit, the sale of the 8 acres is treated as a sale of the taxpayer's principal residence under paragraph (b)(3) of this section. C may file an amended return for 2005 to claim an exclusion for $70,000 ($250,000–$180,000 gain previously excluded) of the $110,000 gain from the sale of the 8 acres.

Example 4. In 1998 Taxpayer D buys a house and 1 acre that he uses as his principal residence. In 1999 D buys 29 acres adjacent to his house and uses the vacant land as part of his principal residence. In 2003 D sells the house and 1 acre and the 29 acres in 2 separate transactions. D sells the house and 1 acre at a loss of $25,000. D realizes $270,000 of gain from the sale of the 29 acres. D may exclude the $245,000 gain from the 2 sales.

(c) *Ownership and use requirements*—(1) *In general.* The requirements of ownership and use for periods aggregating 2 years or more may be satisfied by establishing ownership and use for 24 full months or for 730 days (365×2). The requirements of ownership and use may be satisfied during nonconcurrent periods if both the ownership and use tests are met during the 5-year period ending on the date of the sale or exchange.

(2) *Use.* (i) In establishing whether a taxpayer has satisfied the 2-year use requirement, occupancy of the residence is required. However, short temporary absences, such as for vacation or other seasonal absence (although accompanied with rental of the residence), are counted as periods of use.

(ii) *Determination of use during periods of out-of-residence care.* If a taxpayer has become physically or mentally incapable of self-care and the taxpayer sells or exchanges property that the taxpayer owned and used as the taxpayer's principal residence for periods aggregating at least 1 year during the 5-year period preceding the sale or exchange, the taxpayer is treated as using the property as the taxpayer's principal residence for any period of time during the 5-year period in which the taxpayer owns the property and resides in any facility (including a nursing home) licensed by a State or political subdivision to care for an individual in the taxpayer's condition.

(3) *Ownership*—(i) *Trusts.* If a residence is owned by a trust, for the period that a taxpayer is treated under sections 671 through 679 (relating to the treatment of grantors and others as substantial owners) as the owner of the trust or the portion of the trust that includes the residence, the taxpayer will be treated as owning the residence for purposes of satisfying the 2-year ownership requirement of section 121, and the sale or exchange by the trust will be treated as if made by the taxpayer.

(ii) *Certain single owner entities.* If a residence is owned by an eligible entity (within the meaning of § 301.7701–3(a) of this chapter) that has a single owner and is disregarded for federal tax purposes as an entity separate from its owner under § 301.7701–3 of this chapter, the owner will be treated as owning the residence for purposes of satisfying the 2-year ownership requirement of section 121, and the sale or exchange by the entity will be treated as if made by the owner.

(4) *Examples.* The provisions of this paragraph (c) are illustrated by the following examples. The examples assume that § 1.121–3 (relating to the reduced maximum exclusion) does not apply to the sale of the property. The examples are as follows:

Example 1. Taxpayer A has owned and used his house as his principal residence since 1986. On January 31, 1998, A moves to another state. A rents his house to tenants from that date until April 18, 2000, when he sells it. A is eligible for the section 121 exclusion because he has owned and used the house as his principal residence for at least 2 of the 5 years preceding the sale.

Example 2. Taxpayer B owns and uses a house as her principal residence from 1986 to the end of 1997. On January 4, 1998, B moves to another state and ceases to use the house. B's son moves into the house in March 1999 and uses the residence until it is sold on July 1, 2001. B may not exclude gain from the sale under section 121 because she did not use the property as her principal residence for at least 2 years out of the 5 years preceding the sale.

Example 3. Taxpayer C lives in a townhouse that he rents from 1993 through 1996. On January 18, 1997, he purchases the townhouse. On February 1, 1998, C moves into his daughter's home. On May 25, 2000, while still living in his daughter's home, C sells his townhouse. The section 121 exclusion will apply to gain from the sale because C owned the townhouse for at least 2 years out of the 5 years preceding the sale (from January 19, 1997 until May 25, 2000) and he used the townhouse as his principal residence for at least 2 years during the 5-year period preceding the sale (from May 25, 1995 until February 1, 1998).

Example 4. Taxpayer D, a college professor, purchases and moves into a house on May 1, 1997. He uses the house as his principal residence continuously until September 1, 1998, when he goes abroad for a 1-year sabbatical leave. On October 1, 1999, 1 month after returning from the leave, D sells the house. Because his leave is not considered to be a short temporary absence under paragraph (c)(2) of this section, the period of the sabbatical leave may not be included in determining whether D used the house for periods aggregating 2 years during the 5-year period ending on the date of the sale. Consequently, D is not entitled to exclude gain under section 121 because he did not use the residence for the requisite period.

Example 5. Taxpayer E purchases a house on February 1, 1998, that he uses as his principal residence. During 1998 and 1999, E leaves his residence for a 2-month summer vacation. E sells the house on March 1, 2000. Although, in the 5-year period preceding the date of sale, the total time E used his residence is less than 2 years (21 months), the section 121 exclusion will apply to gain from the sale of the residence because, under paragraph (c)(2) of this section, the 2-month vacations are short temporary absences and are counted as periods of use in determining whether E used the residence for the requisite period.

(d) *Depreciation taken after May 6, 1997*—(1) *In general.* The section 121 exclusion does not apply to so much of the gain from the sale or exchange of property as does not exceed the portion of the depreciation adjustments (as defined in section 1250(b)(3)) attributable to the property for periods after May 6, 1997. Depreciation adjustments allocable to any portion of the property to which the section 121 exclusion does not apply under paragraph (e) of this section are not taken into account for this purpose.

(2) *Example.* The provisions of this paragraph (d) are illustrated by the following example:

Example. On July 1, 1999, Taxpayer A moves into a house that he owns and had rented to tenants since July 1, 1997. A took depreciation deductions totaling $14,000 for the period that he rented the property. After using the residence as his principal residence for 2 full years, A sells the property on August 1, 2001. A's gain realized from the sale is $40,000. A has no other section 1231 or capital gains or losses for 2001. Only $26,000 ($40,000 gain realized—$14,000 depreciation deductions) may be excluded under section 121. Under section 121(d)(6) and paragraph (d)(1) of this section, A must recognize $14,000 of the gain as unrecaptured section 1250 gain within the meaning of section 1(h).

(e) *Property used in part as a principal residence*—(1) *Allocation required.* Section 121 will not apply to the gain allocable to any portion (separate from the dwelling unit) of property sold or exchanged with respect to which a taxpayer does not satisfy the use requirement. Thus, if a portion of the property was used for residential purposes and a portion of the property (separate from the dwelling unit) was used for non-residential purposes, only the gain allocable to the residential portion is excludable under section 121. No allocation is required if both the residential and non-residential portions of the property are within the same dwelling unit. However, section 121 does not apply to the gain allocable to the residential portion of the property to the extent provided by paragraph (d) of this section.

(2) *Dwelling unit.* For purposes of this paragraph (e), the term *dwelling unit* has the same meaning as in section 280A(f)(1), but does not include appurtenant structures or other property.

(3) *Method of allocation.* For purposes of determining the amount of gain allocable to the residential and non-residential portions of the property, the taxpayer must allocate the basis and the amount realized between the residential and the non-residential portions of the property using the same method of allocation that the taxpayer used to determine depreciation adjustments (as defined in section 1250(b)(3)), if applicable.

(4) *Examples.* The provisions of this paragraph (e) are illustrated by the following examples:

Example 1. Non-residential use of property not within the dwelling unit. (i) Taxpayer A owns a property that consists of a house, a stable and 35 acres. A uses the stable and 28 acres for non-residential purposes for more than 3 years during the 5-year period preceding the sale. A uses the entire house and the remaining 7 acres as his principal residence for at least 2 years during the 5-year period preceding the sale. For periods after May 6, 1997, A claims depreciation deductions of $9,000 for the non-residential use of the stable. A sells the entire property in 2004, realizing a gain of $24,000. A has no other section 1231 or capital gains or losses for 2004.

(ii) Because the stable and the 28 acres used in the business are separate from the dwelling unit, the allocation rules under this paragraph (e) apply and A must allocate the basis and amount realized between the portion of the property that he used as his principal residence and the portion of the property that he used for non-residential purposes. A determines that $14,000 of the gain is allocable to the non-residential-use portion of the property and that $10,000 of the gain is allocable to the portion of the property used as his residence. A must recognize the $14,000 of gain allocable to the non-residential-use portion of the property ($9,000 of which is unrecaptured section 1250 gain within the meaning of section 1(h), and $5,000 of which is adjusted net capital gain). A may exclude $10,000 of the gain from the sale of the property.

Example 2. Non-residential use of property not within the dwelling unit and rental of the entire property. (i) In 1998 Taxpayer B buys a property that includes a house, a barn, and 2 acres. B uses the house and 2 acres as her principal residence and the barn for an antiques business. In 2002, B moves out of the house and rents it to tenants. B sells the property in 2004, realizing a gain of $21,000. Between 1998 and 2004 B claims depreciation deductions of $4,800 attributable to the antiques business. Between 2002 and 2004 B claims depreciation deductions of $3,000 attributable to the house. B has no other section 1231 or capital gains or losses for 2004.

(ii) Because the portion of the property used in the antiques business is separate from the dwelling unit, the allocation rules under this paragraph (e) apply. B must allocate basis and amount realized between the portion of the property that she used as her principal residence and the portion of the property that she used for non-residential purposes. B determines that $4,000 of the gain is allocable to the non-residential portion of the property and that $17,000 of the gain is allocable to the portion of the property that she used as her principal residence.

(iii) B must recognize the $4,000 of gain allocable to the non-residential portion of the property (all of which is unrecaptured section 1250 gain within the meaning of section 1(h)). In addition, the section 121 exclusion does not apply to the gain allocable to the residential portion of the property to the extent of the depreciation adjustments attributable to the residential portion of the property for periods after May 6, 1997 ($3,000). Therefore, B may exclude $14,000 of the gain from the sale of the property.

Example 3. Non-residential use of a separate dwelling unit. (i) In 2002 Taxpayer C buys a 3-story townhouse and converts the basement level, which has a separate entrance, into a separate apartment by installing a kitchen and bathroom and removing the interior stairway that leads from the basement to the upper floors. After the conversion, the property constitutes 2 dwelling units within the meaning of paragraph (e)(2) of this section. C uses the first and second floors of the townhouse as his principal residence and rents the basement level to tenants from 2003 to 2007. C claims depreciation deductions of $2,000 for that period with respect to the basement apartment. C sells the entire property in 2007, realizing gain of $18,000. C has no other section 1231 or capital gains or losses for 2007.

(ii) Because the basement apartment and the upper floors of the townhouse are separate dwelling units, C must allocate the gain between the portion of the property that he used as his principal residence and the portion of the property that he used for non-residential purposes under paragraph (e) of this section. After allocating the basis and the amount realized between the residential and non-residential portions of the property, C determines that $6,000 of the gain is allocable to the non-residential portion of the property and that $12,000 of the gain is allocable to the portion of the property used as his residence. C must recognize the $6,000 of gain allocable to the non-residential portion of the property ($2,000 of which is unrecaptured section 1250 gain within the meaning of section 1(h), and $4,000 of which is adjusted net capital gain). C may exclude $12,000 of the gain from the sale of the property.

Example 4. Separate dwelling unit converted to residential use. The facts are the same as in *Example 3* except that in 2007 C incorporates the basement of the townhouse into his principal residence by eliminating the kitchen and building a new interior stairway to the upper floors. C uses all 3 floors of the townhouse as his principal residence for 2 full years and sells the townhouse in 2010, realizing a gain of $20,000. Under section 121(d)(6) and paragraph (d) of this section, C must recognize $2,000 of the gain as unrecaptured section 1250 gain within the meaning of section 1(h). Because C used the entire 3 floors of the townhouse as his principal residence for 2 of the 5 years preceding the sale of the property, C may exclude the remaining $18,000 of the gain from the sale of the house.

Example 5. Non-residential use within the dwelling unit, property depreciated. Taxpayer D, an attorney, buys a house in 2003. The house constitutes a single dwelling unit but D uses a portion of the house as a law office. D claims depreciation deductions of $2,000 during the period that she owns the house. D sells the house in 2006, realizing a gain of $13,000. D has no other section 1231 or capital gains or losses for 2006. Under section 121(d)(6) and paragraph (d) of this section, D must recognize $2,000 of the gain as unrecaptured section 1250 gain within the meaning of section 1(h). D may exclude the remaining $11,000 of the gain from the sale of her house because, under paragraph (e)(1) of this section, she is not required to allocate gain to the business use within the dwelling unit.

Example 6. Non-residential use within the dwelling unit, property not depreciated. The facts are the same as in Example 5, except that D is not entitled to claim any depreciation deductions with respect to her business use of the house. D may exclude $13,000 of the gain from the sale of her house because, under paragraph (e)(1) of this section, she is not required to allocate gain to the business use within the dwelling unit.

(f) *Effective date.* This section is applicable for sales and exchanges on or after Decmeber 24, 2002. For rules on electing to apply the provisions of this section retroactively, see §1.121–4(j).

[T.D. 9030, 67 FR 78361, Dec. 24, 2002]

§ 1.121–2 Limitations.

(a) *Dollar limitations*—(1) *In general.* A taxpayer may exclude from gross income up to $250,000 of gain from the sale or exchange of the taxpayer's principal residence. A taxpayer is eligible for only one maximum exclusion per principal residence.

(2) *Joint owners.* If taxpayers jointly own a principal residence but file separate returns, each taxpayer may exclude from gross income up to $250,000 of gain that is attributable to each taxpayer's interest in the property, if the requirements of section 121 have otherwise been met.

(3) *Special rules for joint returns*—(i) *In general.* A husband and wife who make a joint return for the year of the sale or exchange of a principal residence may exclude up to $500,000 of gain if—

(A) Either spouse meets the 2-year ownership requirements of §1.121–1(a) and (c);

(B) Both spouses meet the 2-year use requirements of §1.121–1(a) and (c); and

(C) Neither spouse excluded gain from a prior sale or exchange of property under section 121 within the last 2 years (as determined under paragraph (b) of this section).

(ii) *Other joint returns.* For taxpayers filing jointly, if either spouse fails to meet the requirements of paragraph (a)(3)(i) of this section, the maximum limitation amount to be claimed by the couple is the sum of each spouse's limitation amount determined on a separate basis as if they had not been married. For this purpose, each spouse is treated as owning the property during the period that either spouse owned the property.

(4) *Examples.* The provisions of this paragraph (a) are illustrated by the following examples. The examples assume that §1.121–3 (relating to the reduced maximum exclusion) does not apply to the sale of the property. The examples are as follows:

Example 1. Unmarried Taxpayers A and B own a house as joint owners, each owning a 50 percent interest in the house. They sell the house after owning and using it as their principal residence for 2 full years. The gain realized from the sale is $256,000. A and B are each eligible to exclude $128,000 of gain because the amount of realized gain allocable to each of them from the sale does not exceed each taxpayer's available limitation amount of $250,000.

Example 2. The facts are the same as in *Example 1*, except that A and B are married taxpayers who file a joint return for the taxable year of the sale. A and B are eligible to exclude the entire amount of realized gain ($256,000) from gross income because the gain realized from the sale does not exceed the limitation amount of $500,000 available to A and B as taxpayers filing a joint return.

Example 3. During 1999, married Taxpayers H and W each sell a residence that each had separately owned and used as a principal residence before their marriage. Each spouse meets the ownership and use tests for his or her respective residence. Neither spouse meets the use requirement for the other spouse's residence. H and W file a joint return for the year of the sales. The gain realized from the sale of H's residence is $200,000. The gain realized from the sale of W's residence is $300,000. Because the ownership and use requirements are met for each residence by each respective spouse, H and W are each eligible to exclude up to $250,000 of gain from the sale of their individual residences. However, W may not use H's unused exclusion to exclude gain in excess of her limitation amount. Therefore, H and W must recognize $50,000 of the gain realized on the sale of W's residence.

Example 4. Married Taxpayers H and W sell their residence and file a joint return for the year of the sale. W, but not H, satisfies the requirements of section 121. They are eligible to exclude up to $250,000 of the gain from the sale of the residence because that is the sum of each spouse's dollar limitation amount determined on a separate basis as if they had not been married ($0 for H, $250,000 for W).

Example 5. Married Taxpayers H and W have owned and used their principal residence since 1998. On February 16, 2001, H dies. On September 24, 2001, W sells the residence and realizes a gain of $350,000. Pursuant to section 6013(a)(3), W and H's executor make a joint return for 2001. All $350,000 of the gain from the sale of the residence may be excluded.

Example 6. Assume the same facts as *Example 5,* except that W does not sell the residence until January 31, 2002. Because W's filing status for the taxable year of the sale is single, the special rules for joint returns under paragraph (a)(3) of this section do not apply and W may exclude only $250,000 of the gain.

(b) *Application of section 121 to only 1 sale or exchange every 2 years*—(1) *In general.* Except as otherwise provided in §1.121–3 (relating to the reduced maximum exclusion), a taxpayer may not exclude from gross income gain from the sale or exchange of a principal residence if, during the 2-year period ending on the date of the sale or exchange, the taxpayer sold or exchanged other property for which gain was excluded under section 121. For purposes of this paragraph (b)(1), any sale or exchange before May 7, 1997, is disregarded.

(2) *Example.* The following example illustrates the rules of this paragraph (b). The example assumes that §1.121–3 (relating to the reduced maximum exclusion) does not apply to the sale of the property. The example is as follows:

Example. Taxpayer A owns a townhouse that he uses as his principal residence for 2 full years, 1998 and 1999. A buys a house in 2000 that he owns and uses as his principal residence. A sells the townhouse in 2002 and excludes gain realized on its sale under section 121. A sells the house in 2003. Although A meets the 2-year ownership and use requirements of section 121, A is not eligible to exclude gain from the sale of the house because A excluded gain within the last 2 years under section 121 from the sale of the townhouse.

(c) *Effective date.* This section is applicable for sales and exchanges on or after December 24, 2002. For rules on electing to apply the provisions of this section retroactively, see §1.121–4(j).

[T.D. 9030, 67 FR 78361, Dec. 24, 2002]

§ 1.121–3 Reduced maximum exclusion for taxpayers failing to meet certain requirements.

(a) *In general.* In lieu of the limitation under section 121(b) and §1.121–2, a reduced maximum exclusion limitation may be available for a taxpayer who sells or exchanges property used as the taxpayer's principal residence but fails to satisfy the ownership and use requirements described in §1.121–1(a) and (c) or the 2-year limitation described in §1.121–2(b).

(b) *Primary reason for sale or exchange.* In order for a taxpayer to claim a reduced maximum exclusion under section 121(c), the sale or exchange must be by reason of a change in place of employment, health, or unforeseen circumstances. If a safe harbor described in this section applies, a sale or exchange is deemed to be by reason of a change in place of employment, health, or unforeseen circumstances. If a safe harbor described in this section does not apply, a sale or exchange is by reason of a change in place of employment, health, or unforeseen circumstances only if the primary reason for the sale or exchange is a change in place of employment (within the meaning of paragraph (c) of this section), health (within the meaning of paragraph (d) of this section), or unforeseen circumstances (within the meaning of paragraph (e) of this section). Whether the requirements of this section are satisfied depends upon all the facts and circumstances. Factors that may be relevant in determining the taxpayer's primary reason for the sale or exchange include (but are not limited to) the extent to which—

(1) The sale or exchange and the circumstances giving rise to the sale or exchange are proximate in time;

(2) The suitability of the property as the taxpayer's principal residence materially changes;

(3) The taxpayer's financial ability to maintain the property is materially impaired;

(4) The taxpayer uses the property as the taxpayer's residence during the period of the taxpayer's ownership of the property;

(5) The circumstances giving rise to the sale or exchange are not reasonably foreseeable when the taxpayer begins using the property as the taxpayer's principal residence; and

(6) The circumstances giving rise to the sale or exchange occur during the period of the taxpayer's ownership and use of the property as the taxpayer's principal residence.

(c) *Sale or exchange by reason of a change in place of employment*—(1) *In general*. A sale or exchange is by reason of a change in place of employment if, in the case of a qualified individual described in paragraph (f) of this section, the primary reason for the sale or exchange is a change in the location of the individual's employment.

(2) *Distance safe harbor*. A sale or exchange is deemed to be by reason of a change in place of employment (within the meaning of paragraph (c)(1) of this section) if—

(i) The change in place of employment occurs during the period of the taxpayer's ownership and use of the property as the taxpayer's principal residence; and

(ii) The qualified individual's new place of employment is at least 50 miles farther from the residence sold or exchanged than was the former place of employment, or, if there was no former place of employment, the distance between the qualified individual's new place of employment and the residence sold or exchanged is at least 50 miles.

(3) *Employment*. For purposes of this paragraph (c), *employment* includes the commencement of employment with a new employer, the continuation of employment with the same employer, and the commencement or continuation of self-employment.

(4) *Examples*. The following examples illustrate the rules of this paragraph (c):

Example 1. A is unemployed and owns a townhouse that she has owned and used as her principal residence since 2003. In 2004 A obtains a job that is 54 miles from her townhouse, and she sells the townhouse. Because the distance between A's new place of employment and the townhouse is at least 50 miles, the sale is within the safe harbor of paragraph (c)(2) of this section and A is entitled to claim a reduced maximum exclusion under section 121(c)(2).

Example 2. B is an officer in the United States Air Force stationed in Florida. B purchases a house in Florida in 2002. In May 2003 B moves out of his house to take a 3-year assignment in Germany. B sells his house in January 2004. Because B's new place of employment in Germany is at least 50 miles farther from the residence sold than is B's former place of employment in Florida, the sale is within the safe harbor of paragraph (c)(2) of this section and B is entitled to claim a reduced maximum exclusion under section 121(c)(2).

Example 3. C is employed by Employer R at R's Philadelphia office. C purchases a house in February 2002 that is 35 miles from R's Philadelphia office. In May 2003 C begins a temporary assignment at R's Wilmington office that is 72 miles from C's house, and moves out of the house. In June 2005 C is assigned to work in R's London office. C sells her house in August 2005 as a result of the assignment to London. The sale of the house is not within the safe harbor of paragraph (c)(2) of this section by reason of the change in place of employment from Philadelphia to Wilmington because the Wilmington office is not 50 miles farther from C's house than is the Philadelphia office. Furthermore, the sale is not within the safe harbor by reason of the change in place of employment to London because C is not using the house as her principal residence when she moves to London. However, C is entitled to claim a reduced maximum exclusion under section 121(c)(2) because, under the facts and circumstances, the primary reason for the sale is the change in C's place of employment.

Example 4. In July 2003 D, who works as an emergency medicine physician, buys a condominium that is 5 miles from her place of employment and uses it as her principal residence. In February 2004, D obtains a job that is located 51 miles from D's condominium. D may be called in to work unscheduled hours and, when called, must be able to arrive at work quickly. Because of the demands of the new job, D sells her condominium and buys a townhouse that is 4 miles from her new place of employment. Because D's new place of employment is only 46 miles farther from the condominium than is D's former place of employment, the sale is not within the safe harbor of paragraph (c)(2) of this section. However, D is entitled to claim a reduced maximum exclusion under section 121(c)(2) because, under the facts and circumstances, the primary reason for the sale is the change in D's place of employment.

(d) *Sale or exchange by reason of health*—(1) *In general.* A sale or exchange is by reason of health if the primary reason for the sale or exchange is to obtain, provide, or facilitate the diagnosis, cure, mitigation, or treatment of disease, illness, or injury of a qualified individual described in paragraph (f) of this section, or to obtain or provide medical or personal care for a qualified individual suffering from a disease, illness, or injury. A sale or exchange that is merely beneficial to the general health or well-being of an individual is not a sale or exchange by reason of health.

(2) *Physician's recommendation safe harbor.* A sale or exchange is deemed to be by reason of health if a physician (as defined in section 213(d)(4)) recommends a change of residence for reasons of health (as defined in paragraph (d)(1) of this section).

(3) *Examples.* The following examples illustrate the rules of this paragraph (d):

Example 1. In 2003 A buys a house that she uses as her principal residence. A is injured in an accident and is unable to care for herself. A sells her house in 2004 and moves in with her daughter so that the daughter can provide the care that A requires as a result of her injury. Because, under the facts and circumstances, the primary reason for the sale of A's house is A's health, A is entitled to claim a reduced maximum exclusion under section 121(c)(2).

Example 2. H's father has a chronic disease. In 2003 H and W purchase a house that they use as their principal residence. In 2004 H and W sell their house in order to move into the house of H's father so that they can provide the care he requires as a result of his disease. Because, under the facts and circumstances, the primary reason for the sale of their house is the health of H's father, H and W are entitled to claim a reduced maximum exclusion under section 121(c)(2).

Example 3. H and W purchase a house in 2003 that they use as their principal residence. Their son suffers from a chronic illness that requires regular medical care. Later that year their son begins a new treatment that is available at a hospital 100 miles away from their residence. In 2004 H and W sell their house so that they can be closer to the hospital to facilitate their son's treatment. Because, under the facts and circumstances, the primary reason for the sale is to facilitate the treatment of their son's chronic illness, H and W are entitled to claim a reduced maximum exclusion under section 121(c)(2).

Example 4. B, who has chronic asthma, purchases a house in Minnesota in 2003 that he uses as his principal residence. B's doctor tells B that moving to a warm, dry climate would mitigate B's asthma symptoms. In 2004 B sells his house and moves to Arizona to relieve his asthma symptoms. The sale is within the safe harbor of paragraph (d)(2) of this section and B is entitled to claim a reduced maximum exclusion under section 121(c)(2).

Example 5. In 2003 H and W purchase a house in Michigan that they use as their principal residence. H's doctor tells H that he should get more outdoor exercise, but H is not suffering from any disease that can be treated or mitigated by outdoor exercise. In 2004 H and W sell their house and move to Florida so that H can increase his general level of exercise by playing golf year-round. Because the sale of the house is merely beneficial to H's general health, the sale of the house is not by reason of H's health. H and W are not entitled to claim a reduced maximum exclusion under section 121(c)(2).

(e) *Sale or exchange by reason of unforeseen circumstances*—(1) *In general.* A sale or exchange is by reason of unforeseen circumstances if the primary reason for the sale or exchange is the occurrence of an event that the taxpayer could not reasonably have anticipated before purchasing and occupying the residence. A sale or exchange by reason of unforeseen circumstances (other than a sale or exchange deemed to be by reason of unforeseen circumstances under paragraph (e)(2) or (3) of this section) does not qualify for the reduced maximum exclusion if the primary reason for the sale or exchange is a preference for a different residence or an improvement in financial circumstances.

(2) *Specific event safe harbors.* A sale or exchange is deemed to be by reason of unforeseen circumstances (within the meaning of paragraph (e)(1) of this section) if any of the events specified in paragraphs (e)(2)(i) through (iii) of this section occur during the period of the taxpayer's ownership and use of the residence as the taxpayer's principal residence:

(i) The involuntary conversion of the residence.

(ii) Natural or man-made disasters or acts of war or terrorism resulting in a casualty to the residence (without regard to deductibility under section 165(h)).

(iii) In the case of a qualified individual described in paragraph (f) of this section—

(A) Death;

(B) The cessation of employment as a result of which the qualified individual is eligible for unemployment compensation (as defined in section 85(b));

(C) A change in employment or self-employment status that results in the taxpayer's inability to pay housing costs and reasonable basic living expenses for the taxpayer's household (including amounts for food, clothing, medical expenses, taxes, transportation, court-ordered payments, and expenses reasonably necessary to the production of income, but not for the maintenance of an affluent or luxurious standard of living);

(D) Divorce or legal separation under a decree of divorce or separate maintenance; or

(E) Multiple births resulting from the same pregnancy.

(3) *Designation of additional events as unforeseen circumstances.* The Commissioner may designate other events or situations as unforeseen circumstances in published guidance of general applicability and may issue rulings addressed to specific taxpayers identifying other events or situations as unforeseen circumstances with regard to those taxpayers (see §601.601(d)(2) of this chapter).

(4) *Examples.* The following examples illustrate the rules of this paragraph (e):

Example 1. In 2003 A buys a house in California. After A begins to use the house as her principal residence, an earthquake causes damage to A's house. A sells the house in 2004. The sale is within the safe harbor of paragraph (e)(2)(ii) of this section and A is entitled to claim a reduced maximum exclusion under section 121(c)(2).

Example 2. H works as a teacher and W works as a pilot. In 2003 H and W buy a house that they use as their principal residence. Later that year W is furloughed from her job for six months. H and W are unable to pay their mortgage and reasonable basic living expenses for their household during the period W is furloughed. H and W sell their house in 2004. The sale is within the safe harbor of paragraph (e)(2)(iii)(C) of this section and H and W are entitled to claim a reduced maximum exclusion under section 121(c)(2).

Example 3. In 2003 H and W buy a two-bedroom condominium that they use as their principal residence. In 2004 W gives birth to twins and H and W sell their condominium and buy a four-bedroom house. The sale is within the safe harbor of paragraph (e)(2)(iii)(E) of this section, and H and W are entitled to claim a reduced maximum exclusion under section 121(c)(2).

Example 4. In 2003 B buys a condominium in a high-rise building and uses it as his principal residence. B's monthly condominium fee is $X. Three months after B moves into the condominium, the condominium association replaces the building's roof and heating system. Six months later, B's monthly condominium fee doubles in order to pay for the repairs. B sells the condominium in 2004 because he is unable to afford the new condominium fee along with a monthly mortgage payment. The safe harbors of paragraph (e)(2) of this section do not apply. However, under the facts and circumstances, the primary reason for the sale, the doubling of the condominium fee, is an unforeseen circumstance because B could not reasonably have anticipated that the condominium fee would double at the time he purchased and occupied the property. Consequently, the sale of the condominium is by reason of unforeseen circumstances and B is entitled to claim a reduced maximum exclusion under section 121(c)(2).

Example 5. In 2003 C buys a house that he uses as his principal residence. The property is located on a heavily traveled road. C sells the property in 2004 because C is disturbed by the traffic. The safe harbors of paragraph (e)(2) of this section do not apply. Under the facts and circumstances, the primary reason for the sale, the traffic, is not an unforeseen circumstance because C could reasonably have anticipated the traffic at the time he purchased and occupied the house. Consequently, the sale of the house is not by reason of unforeseen circumstances and C is not entitled to claim a reduced maximum exclusion under section 121(c)(2).

Example 6. In 2003 D and her fiance E buy a house and live in it as their principal residence. In 2004 D and E cancel their wedding plans and E moves out of the house. Because D cannot afford to make the monthly mortgage payments alone, D and E sell the house in 2004. The safe harbors of paragraph (e)(2) of this section do not apply. However, under the facts and circumstances, the primary reason for the sale, the broken engagement, is an unforeseen circumstance because D and E could not reasonably have anticipated the broken engagement at the time they purchased and occupied the house. Consequently, the sale is by reason of unforeseen circumstances and D and E are each entitled to claim a reduced maximum exclusion under section 121(c)(2).

Example 7. In 2003 F buys a small condominium that she uses as her principal residence. In 2005 F receives a promotion and a large increase in her salary. F sells the condominium in 2004 and purchases a house because she can now afford the house. The safe harbors of paragraph (e)(2) of this section do not apply. Under the facts and circumstances, the primary reason for the sale of the house, F's salary increase, is an improvement in F's financial circumstances. Under paragraph (e)(1) of this section, an improvement in financial circumstances, even if the result of unforeseen circumstances, does not qualify for the reduced maximum exclusion by reason of unforeseen circumstances under section 121(c)(2).

Example 8. In April 2003 G buys a house that he uses as his principal residence. G sells his house in October 2004 because the house has greatly appreciated in value, mortgage rates have substantially decreased, and G can afford a bigger house. The safe harbors of paragraph (e)(2) of this section do not apply. Under the facts and circumstances, the primary reasons for the sale of the house, the changes in G's house value and in the mortgage rates, are an improvement in G's financial circumstances. Under paragraph (e)(1) of this section, an improvement in financial circumstances, even if the result of unforeseen circumstances, does not qualify for the reduced maximum exclusion by reason of unforeseen circumstances under section 121(c)(2).

Example 9. H works as a police officer for City X. In 2003 H buys a condominium that he uses as his principal residence. In 2004 H is assigned to City X's K–9 unit and is required to care for the police service dog at his home. Because H's condominium association does not permit H to have a dog in his condominium, in 2004 he sells the condominium and buys a house. The safe harbors of paragraph (e)(2) of this section do not apply. However, under the facts and circumstances, the primary reason for the sale, H's assignment to the K–9 unit, is an unforeseen circumstance because H could not reasonably have anticipated his assignment to the K–9 unit at the time he purchased and occupied the condominium. Consequently, the sale of the condominium is by reason of unforeseen circumstances and H is entitled to claim a reduced maximum exclusion under section 121(c)(2).

Example 10. In 2003, J buys a small house that she uses as her principal residence. After J wins the lottery, she sells the small house in 2004 and buys a bigger, more expensive house. The safe harbors of paragraph (e)(2) of this section do not apply. Under the facts and circumstances, the primary reason for the sale of the house, winning the lottery, is an improvement in J's financial circumstances. Under paragraph (e)(1) of this section, an improvement in financial circumstances, even if the result of unforeseen circumstances, does not qualify for the reduced maximum exclusion under section 121(c)(2).

(f) *Qualified individual.* For purposes of this section, *qualified individual* means—

(1) The taxpayer;

(2) The taxpayer's spouse;

(3) A co-owner of the residence;

(4) A person whose principal place of abode is in the same household as the taxpayer; or

(5) For purposes of paragraph (d) of this section, a person bearing a relationship specified in sections 152(a)(1) through 152(a)(8) (without regard to qualification as a dependent) to a qualified individual described in paragraphs (f)(1) through (4) of this section, or a descendant of the taxpayer's grandparent.

(g) *Computation of reduced maximum exclusion.* (1) The reduced maximum exclusion is computed by multiplying the maximum dollar limitation of $250,000 ($500,000 for certain joint filers) by a fraction. The numerator of the fraction is the shortest of the period of time that the taxpayer owned the property during the 5-year period ending on the date of the sale or exchange; the period of time that the taxpayer used the property as the taxpayer's principal residence during the 5-year period ending on the date of the sale or exchange; or the period of time between the date of a prior sale or exchange of property for which the taxpayer excluded gain under section 121 and the date of the current sale or exchange. The numerator of the fraction may be expressed in days or months. The denominator of the fraction is 730 days or 24 months (depending on the measure of time used in the numerator).

(2) *Examples.* The following examples illustrate the rules of this paragraph (g):

Example 1. Taxpayer A purchases a house that she uses as her principal residence. Twelve months after the purchase, A sells the house due to a change in place of her employment. A has not excluded gain under section 121 on a prior sale or exchange of property within the last 2 years. A is eligible to exclude up to $125,000 of the gain from the sale of her house ($12/24 \times \$250{,}000$).

Example 2. (i) Taxpayer H owns a house that he has used as his principal residence since 1996. On January 15, 1999, H and W marry and W begins to use H's house as her principal residence. On January 15, 2000, H sells the house due to a change in W's place of employment. Neither H nor W has excluded gain under section 121 on a prior sale or exchange of property within the last 2 years.

(ii) Because H and W have not each used the house as their principal residence for at least 2 years during the 5-year period preceding its sale, the maximum dollar limitation amount that may be claimed by H and W will not be $500,000, but the sum of each spouse's limitation amount determined on a separate basis as if they had not been married. (*See* §1.121–2(a)(3)(ii).)

(iii) H is eligible to exclude up to $250,000 of gain because he meets the requirements of section 121. W is not eligible to exclude the maximum dollar limitation amount. Instead, because the sale of the house is due to a change in place of employment, W is eligible to claim a reduced maximum exclusion of up to $125,000 of the gain (365/730 × $250,000). Therefore, H and W are eligible to exclude up to $375,000 of gain ($250,000 + $125,000) from the sale of the house.

(h) *Effective dates.* Paragraphs (a) and (g) of this section are applicable for sales and exchanges on or after December 24, 2002. Paragraphs (b) through (f) of this section are applicable for sales and exchanges on or after August 13, 2004.

[T.D. 9030, 67 FR 78361, Dec. 24, 2002, as amended by T.D. 9152, 69 FR 50304, Aug. 16, 2004]

§ 1.121–4 Special rules.

(a) *Property of deceased spouse*—(1) *In general.* For purposes of satisfying the ownership and use requirements of section 121, a taxpayer is treated as owning and using property as the taxpayer's principal residence during any period that the taxpayer's deceased spouse owned and used the property as a principal residence before death if—

(i) The taxpayer's spouse is deceased on the date of the sale or exchange of the property; and

(ii) The taxpayer has not remarried at the time of the sale or exchange of the property.

(2) *Example.* The provisions of this paragraph (a) are illustrated by the following example. The example assumes that §1.121–3 (relating to the reduced maximum exclusion) does not apply to the sale of the property. The example is as follows:

Example. Taxpayer H has owned and used a house as his principal residence since 1987. H and W marry on July 1, 1999 and from that date they use H's house as their principal residence. H dies on August 15, 2000, and W inherits the property. W sells the property on September 1, 2000, at which time she has not remarried. Although W has owned and used the house for less than 2 years, W will be considered to have satisfied the ownership and use requirements of section 121 because W's period of ownership and use includes the period that H owned and used the property before death.

(b) *Property owned by spouse or former spouse*—(1) *Property transferred to individual from spouse or former spouse.* If a taxpayer obtains property from a spouse or former spouse in a transaction described in section 1041(a), the period that the taxpayer owns the property will include the period that the spouse or former spouse owned the property.

(2) *Property used by spouse or former spouse.* A taxpayer is treated as using property as the taxpayer's principal residence for any period that the taxpayer has an ownership interest in the property and the taxpayer's spouse or former spouse is granted use of the property under a divorce or separation instrument (as defined in section 71(b)(2)), provided that the spouse or former spouse uses the property as his or her principal residence.

(c) *Tenant-stockholder in cooperative housing corporation.* A taxpayer who holds stock as a tenant-stockholder in a cooperative housing corporation (as those terms are defined in section 216(b)(1) and (2)) may be eligible to exclude gain under section 121 on the sale or exchange of the stock. In determining whether the taxpayer meets the requirements of section 121, the ownership requirements are applied to the holding of the stock and the use requirements are applied to the house or apartment that the taxpayer is entitled to occupy by reason of the taxpayer's stock ownership.

(d) *Involuntary conversions*—(1) *In general.* For purposes of section 121, the destruction, theft, seizure, requisition, or condemnation of property is treated as a sale of the property.

(2) *Application of section 1033.* In applying section 1033 (relating to involuntary conversions), the amount realized

from the sale or exchange of property used as the taxpayer's principal residence is treated as being the amount determined without regard to section 121, reduced by the amount of gain excluded from the taxpayer's gross income under section 121.

(3) *Property acquired after involuntary conversion.* If the basis of the property acquired as a result of an involuntary conversion is determined (in whole or in part) under section 1033(b) (relating to the basis of property acquired through an involuntary conversion), then for purposes of satisfying the requirements of section 121, the taxpayer will be treated as owning and using the acquired property as the taxpayer's principal residence during any period of time that the taxpayer owned and used the converted property as the taxpayer's principal residence.

(4) *Example.* The provisions of this paragraph (d) are illustrated by the following example:

Example. (i) On February 18, 1999, fire destroys Taxpayer A's house which has an adjusted basis of $80,000. A had owned and used this property as her principal residence for 20 years prior to its destruction. A's insurance company pays A $400,000 for the house. A realizes a gain of $320,000 ($400,000—$80,000). On August 27, 1999, A purchases a new house at a cost of $100,000.

(ii) Because the destruction of the house is treated as a sale for purposes of section 121, A will exclude $250,000 of the realized gain from A's gross income. For purposes of section 1033, the amount realized is then treated as being $150,000 ($400,000—$250,000) and the gain realized is $70,000 ($150,000 amount realized—$80,000 basis). A elects under section 1033 to recognize only $50,000 of the gain ($150,000 amount realized—$100,000 cost of new house). The remaining $20,000 of gain is deferred and A's basis in the new house is $80,000 ($100,000 cost—$20,000 gain not recognized).

(iii) A will be treated as owning and using the new house as A's principal residence during the 20-year period that A owned and used the destroyed house.

(e) *Sales or exchanges of partial interests*—(1) *Partial interests other than remainder interests*—(i) *In general.* Except as provided in paragraph (e)(2) of this section (relating to sales or exchanges of remainder interests), a taxpayer may apply the section 121 exclusion to gain from the sale or exchange of an interest in the taxpayer's principal residence that is less than the taxpayer's entire interest if the interest sold or exchanged includes an interest in the dwelling unit. For rules relating to the sale or exchange of vacant land, *see* § 1.121–1(b)(3).

(ii) *Limitations*—(A) *Maximum limitation amount.* For purposes of section 121(b)(1) and (2) (relating to the maximum limitation amount of the section 121 exclusion), sales or exchanges of partial interests in the same principal residence are treated as one sale or exchange. Therefore, only one maximum limitation amount of $250,000 ($500,000 for certain joint returns) applies to the combined sales or exchanges of the partial interests. In applying the maximum limitation amount to sales or exchanges that occur in different taxable years, a taxpayer may exclude gain from the first sale or exchange of a partial interest up to the taxpayer's full maximum limitation amount and may exclude gain from the sale or exchange of any other partial interest in the same principal residence to the extent of any remaining maximum limitation amount, and each spouse is treated as excluding one-half of the gain from a sale or exchange to which section 121(b)(2)(A) and § 1.121–2(a)(3)(i)(relating to the limitation for certain joint returns) apply.

(B) *Sale or exchange of more than one principal residence in 2-year period.* For purposes of applying section 121(b)(3) (restricting the application of section 121 to only 1 sale or exchange every 2 years), each sale or exchange of a partial interest is disregarded with respect to other sales or exchanges of partial interests in the same principal residence, but is taken into account as of the date of the sale or exchange in applying section 121(b)(3) to that sale or exchange and the sale or exchange of any other principal residence.

(2) *Sales or exchanges of remainder interests*—(i) *In general.* A taxpayer may elect to apply the section 121 exclusion to gain from the sale or exchange of a remainder interest in the taxpayer's principal residence.

(ii) *Limitations*—(A) *Sale or exchange of any other interest.* If a taxpayer elects to exclude gain from the sale or exchange of a remainder interest in the taxpayer's principal residence, the section 121 exclusion will not apply to a sale or exchange of any other interest in the residence that is sold or exchanged separately.

(B) *Sales or exchanges to related parties.* This paragraph (e)(2) will not apply to a sale or exchange to any person that bears a relationship to the taxpayer that is described in section 267(b) or 707(b).

(iii) *Election.* The taxpayer makes the election under this paragraph (e)(2) by filing a return for the taxable year of the sale or exchange that does not include the gain from the sale or exchange of the remainder interest in the taxpayer's gross income. A taxpayer may make or revoke the election at any time before the expiration of a 3-year period beginning on the last date prescribed by law (determined without regard to extensions) for the filing of the return for the taxable year in which the sale or exchange occurred.

(3) *Example.* The provisions of this paragraph (e) are illustrated by the following example:

Example. In 1991 Taxpayer A buys a house that A uses as his principal residence. In 2004 A's friend B moves into A's house and A sells B a 50% interest in the house realizing a gain of $136,000. A may exclude the $136,000 of gain. In 2005 A sells his remaining 50% interest in the home to B realizing a gain of $138,000. A may exclude $114,000 ($250,000—$136,000 gain previously excluded) of the $138,000 gain from the sale of the remaining interest.

(f) *No exclusion for expatriates.* The section 121 exclusion will not apply to any sale or exchange by an individual if the provisions of section 877(a) (relating to the treatment of expatriates) applies to the individual.

(g) *Election to have section not apply.* A taxpayer may elect to have the section 121 exclusion not apply to a sale or exchange of property. The taxpayer makes the election by filing a return for the taxable year of the sale or exchange that includes the gain from the sale or exchange of the taxpayer's principal residence in the taxpayer's gross income. A taxpayer may make an election under this paragraph (g) to have section 121 not apply (or revoke an election to have section 121 not apply) at any time before the expiration of a 3-year period beginning on the last date prescribed by law (determined without regard to extensions) for the filing of the return for the taxable year in which the sale or exchange occurred.

(h) *Residences acquired in rollovers under section 1034.* If a taxpayer acquires property in a transaction that qualifies under section 1034 (section 1034 property) for the nonrecognition of gain realized on the sale or exchange of another property and later sells or exchanges such property, in determining the period of the taxpayer's ownership and use of the property under section 121 the taxpayer may include the periods that the taxpayer owned and used the section 1034 property as the taxpayer's principal residence (and each prior residence taken into account under section 1223(7) in determining the holding period of the section 1034 property).

(i) [Reserved]

(j) *Election to apply regulations retroactively.* Taxpayers who would otherwise qualify under §§1.121–1 through 1.121–4 to exclude gain from a sale or exchange of a principal residence before December 24, 2002 but on or after May 7, 1997, may elect to apply §§1.121–1 through 1.121–4 for any years for which the period of limitation under section 6511 has not expired. The taxpayer makes the election under this paragraph (j) by filing a return for the taxable year of the sale or exchange that does not include the gain from the sale or exchange of the taxpayer's principal residence in the taxpayer's gross income. Taxpayers who have filed a return for the taxable year of the sale or exchange may elect to apply the provisions of these regulations for any years for which the period of limitation under section 6511 has not expired by filing an amended return.

(k) *Audit protection.* The Internal Revenue Service will not challenge a taxpayer's position that a sale or exchange of a principal residence occurring before December 24, 2002 but on or after May 7, 1997, qualifies for the section 121 exclusion if the taxpayer has made a reasonable, good faith effort to comply with the requirements of section 121. Compliance with the provisions of the regulations project under section 121 (REG–105235–99 (2000–2 C.B.

447)) generally will be considered a reasonable, good faith effort to comply with the requirements of section 121.

(l) *Effective date.* This section is applicable for sales and exchanges on or after December 24, 2002. For rules on electing to apply the provisions retroactively, see paragraph (j) of this section.

[T.D. 9030, 67 FR 78361, Dec. 24, 2002; 68 FR 6350, Feb. 7, 2003]

§ 1.121–5 Suspension of 5-year period for certain members of the uniformed services and Foreign Service.

(a) *In general.* Under section 121(d)(9), a taxpayer who is serving (or whose spouse is serving) on qualified official extended duty as a member of the uniformed services or Foreign Service of the United States may elect to suspend the running of the 5-year period of ownership and use during such service but for not more than 10 years. The election does not suspend the running of the 5-year period for any period during which the running of the 5-year period with respect to any other property of the taxpayer is suspended by an election under section 121(d)(9).

(b) *Manner of making election.* The taxpayer makes the election under section 121(d)(9) and this section by filing a return for the taxable year of the sale or exchange of the taxpayer's principal residence that does not include the gain in the taxpayer's gross income.

(c) *Application of election to closed years.* A taxpayer who would otherwise qualify under §§ 1.121–1 through 1.121–4 to exclude gain from a sale or exchange of a principal residence on or after May 7, 1997, may elect to apply section 121(d)(9) and this section for any years for which a claim for refund is barred by operation of any law or rule of law by filing an amended return before November 11, 2004.

(d) *Example.* The provisions of this section are illustrated by the following example:

Example. B purchases a house in Virginia in 2003 that he uses as his principal residence for 3 years. For 8 years, from 2006 through 2014, B serves on qualified official extended duty as a member of the Foreign Service of the United States in Brazil. In 2015 B sells the house. B did not use the house as his principal residence for 2 of the 5 years preceding the sale. Under section 121(d)(9)and this section, however, B may elect to suspend the running of the 5-year period of ownership and use during his 8-year period of service with the Foreign Service in Brazil. If B makes the election, the 8-year period is not counted in determining whether B used the house for 2 of the 5 years preceding the sale. Therefore, B may exclude the gain from the sale of the house under section 121.

(e) *Effective date.* This section is applicable for sales and exchanges on or after May 7, 1997.

[T.D. 9152, 69 FR 50306, Aug. 16, 2004]

§ 1.122–1 Applicable rules relating to certain reduced uniformed services retirement pay.

(a) *Rule applicable prior to January 1, 1966.* In the case of a member or former member of the uniformed services of the United States (as defined in 37 U.S.C. 101(3)) who has made an election under Subchapter I of Chapter 73 of title 10 of the U.S. Code (also referred to in this section as the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431)) to receive a reduced amount of retired or retainer pay, gross income shall include the amount of any reduction made in his retired or retainer pay before January 1, 1966, by reason of such election, unless such reduction, or portion thereof, is otherwise excluded from gross income under Part III of Subchapter B of Chapter 1 of the Internal Revenue Code of 1954 or any other provision of law.

(b) *Rule applicable after December 31, 1965*—(1) In a case of a member or former member of the uniformed services of the United States (as defined in 37 U.S.C. 101(3)), gross income shall not include the amount of any reduction made in his or her retired or retainer pay after December 31, 1965, by reason of—

(i) An election made under the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431), or

(ii) The provisions of Subchapter II of Chapter 73 of title 10 of the U.S. Code (also referred to in this section as the Survivor Benefit Plan (10 U.S.C. 1447)).

(2)(i) In a case where a member or former member of the uniformed services has, pursuant to the election described in paragraph (a) of this section, received before January 1, 1966, a reduced amount of retired or retainer pay, he shall, after December 31, 1965, exclude from gross income under section 122(b) and this subdivision all amounts received as uniformed services retired or retainer pay until there has been so excluded an amount of retired or retainer pay equal to the ''consideration for the contract'' (as described in subdivision (iii) of this subparagraph).

(ii) Upon the death of a member or former member of the uniformed services, where the ''consideration for the contract'' (as described in subdivision (iii) of this subparagraph) has not been excluded in whole or in part from gross income under section 122(b) and subdivision (i) of this subparagraph, the survivor of such member who is receiving an annuity under Chapter 73 of title 10 of the U.S. Code shall, after December 31, 1965, exclude from gross income under section 72(o) and this subdivision such annuity payments received after December 31, 1965, until there has been so excluded annuity payments equalling the portion of the ''consideration for the contract'' not previously excluded under subdivision (i) of this subparagraph.

(iii) The term ''consideration for the contract'' as used in this subparagraph means—

(*a*) The total amount of the reductions, if any, before January 1, 1966, in retired or retainer pay by reason of an election under Subchapter I of Chapter 73 of title 10 of the United States Code, plus

(*b*) The total amount, if any, deposited by the serviceman at any time pursuant to the provisions of sections 1438 or 1452(d) of title 10 of the United States Code, plus

(*c*) The total amount, if any, excludable from income under section 101(b)(2)(D) and paragraph (a)(2) of §1.101–2 with respect to a survivor annuity provided by such retired or retainer pay, minus

(*d*) The total amount, if any, excluded from income before January 1, 1966, pursuant to the provisions of section 72 (b) and (d) with respect to a survivor annuity provided by such retired or retainer pay.

(iv) In determining whether there has been a recovery of the ''consideration for the contract'' under subdivision (i) of this subparagraph, the exclusion of retired pay from income after December 31, 1965, under sections 104(a)(4) and 105(d) shall not be considered as recovery of all or part of the ''consideration for the contract.''

(c) *Special rules.* In any of the following situations, the computation of the excludable portion of disability retired pay received by the member or former member of the uniformed services shall be governed by the following rules:

(1) An exclusion under section 122(a) and paragraph (b)(1) of this section is applicable only in the taxable year in which a reduction in retired pay is made under the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431) or the Survivor Benefit Plan (10 U.S.C. 1447).

(2) Where the member or former member of the uniformed services is entitled to exclude the whole or a portion of his retired pay under the provisions of section 104(a)(4) or section 105(d) and under section 122(a) and paragraph (b)(1) of this section, the exclusion under section 122(a) and paragraph (b)(1) of this section shall be applied prior to the exclusions under sections 104(a)(4) and 105(d).

(3) Where the member or former member of the uniformed services waives a portion of his disability retired pay, or such retired pay reduced under the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431),or the Survivor Benefit Plan (10 U.S.C. 1447) in favor of a nontaxable pension or compensation receivable under laws administered by the Veterans Administration (38 U.S.C. 3105), the waived amount of such disability retired pay, or reduced amount thereof, shall first be subtracted from any amounts which are excludable under the provisions of sections 104(a)(4) or 105(d) so as to reduce the amounts otherwise excludable under those sections.

(4) Where the member or former member of the uniformed services receives (before any forfeiture) disability retired pay (whether or not reduced under the Retired Serviceman's Family

Protection Plan) or the Survivor Benefit Plan which is partially excludable under section 104(a)(4), and also forfeits a portion of such disability retired pay under the Dual Compensation Act of 1964 (5 U.S.C. 5531 or any former corresponding provision of law), the amount of the forfeiture under such Act shall be applied against disability retired pay (before any forfeiture) in the same proportion that the excludable portion of such pay under section 104(a)(4) bears to the total amount of such pay after subtraction of any reduction under the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431) or the Survivor Benefit Plan (10 U.S.C. 1447).

(5) The exclusion provided by section 122(b) and paragraph (b)(2)(i) of this section shall be available with respect to repayments made upon removal from the temporary disability retired list even though such repayments were previously excluded from gross income under section 104(a)(4) or 105(d).

However, the exclusion permitted by the prior sentence will apply only to the extent the repaid amount has not been previously excluded under section 122(b) and paragraph (b)(2)(i) of this section.

(d) *Examples with respect to the Retired Serviceman's Family Protection Plan*. The rules discussed in this section relating to the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431) may be illustrated by the following examples:

Example 1. A, a member of the uniformed services, retires on January 1, 1963, and receives nondisability retired pay computed to be 60 percent of his active duty pay of $10,000 per year, or $6,000 per year, based upon 24 years of service. He elects, under the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431), to provide his survivor with an annuity equal to one-fourth of his reduced retired pay. His retired pay of $6,000 is reduced by $600, to $5,400, in order to provide a survivor annuity of $1,350 per year or $112.50 per month. For 1963, 1964, and 1965, A must include in gross income the unreduced amount of retired pay, or $6,000. For 1966 and subsequent years, he may exclude under section 122(a) and paragraph (b)(1) of this section the $600 total annual reductions to provide the survivor annuity, and may, for 1966, further exclude from gross income under section 122(b) and paragraph (b)(2)(i) of this section the $1,800 ''consideration for the contract'' *i.e.*, the total reductions which were made in 1963, 1964, and 1965, to provide the survivor annuity. Accordingly, A will include $3,600 of retired pay in gross income for 1966 ($6,000 minus the sum of $600 and $1,800).

Example 2. Assume the facts in Example (1) except that A retires on disability resulting from active service and his disability is rated at 40 percent. The entire amount of disability retirement pay, prior to and including 1966, is excludable from gross income under sections 104(a)(4) and 105(d), and in 1966, section 122(a). Assume further that A attains retirement age on December 31, 1966, dies on January 1, 1967, and his widow then begins receiving a survivor annuity under the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431). A's widow may exclude from gross income in 1967 and 1968 under section 72(o) and paragraph (b)(2)(ii) of this section, the $1,800 of ''consideration for the contract'' *i.e.*, the reductions in 1963, 1964, and 1965 to provide the survivor annuity. Thus, A's widow will exclude all of the survivor annuity she receives in 1967 ($1,350) and $450 of the $1,350 annuity received in 1968. In addition, if A had not attained retirement age at the time of his death, his widow would, under section 101 and paragraph (a)(2) of §1.101–2, exclude up to $5,000 subject to the limitations of paragraph (b)(2)(ii) of this section.

Example 3. Assume, in the previous example, that A dies on January 1, 1965, and his widow then begins receiving a survivor annuity. Assume further that A's widow is entitled to exclude under section 72(b) $1,000 of the $1,350 she received in 1965. Under section 72(o) and paragraph (b)(2)(ii) of this section, A's widow for 1966 will exclude the $200 remaining consideration for the contract ($1,200 − $1,000) and will include $1,150 of the survivor annuity in gross income.

Example 4. B, a member of the uniformed services, retires on January 1, 1966, after 32 years of active military service, and receives disability retirement pay under section 1401 of title 10, limited to 75 percent of his active duty pay of $15,000 per year, or $11,250. His disability rating is 30 percent. B has not reached retirement age (as defined in §1.79–2(b)(3)). He elects under the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431) to provide his survivor with an annuity equal to one-half of his reduced retired pay and, for that purpose, his retired pay of $11,250 is reduced by $1,250 to provide an annuity of $5,000 per year. B also elects to waive retired pay in the amount of $1,000 in order to receive disability compensation in like amount under laws administered by the Veterans Administration. In addition, B is required to forfeit $4,088 of his retired pay under the Dual Compensation Act of 1964 (5 U.S.C. 5532) ($11,250 − $1,000 = $10,250 less one-half of excess thereof over $2,074) and by reason of his Federal employment is not entitled to an exclusion of his retired pay under section 105(d). B's taxable retired pay for 1966 is $3,002, computed as follows:

Gross retired pay	$11,250
Less: Section 122(a) exclusion	(1,250)
Reduced retired pay	10,000
Less: Retired pay waived to receive V.A. compensation	(1,000)
Adjusted retired pay—	9,000
Less:	
(i) Excludable retired pay computed under section 104(a)(4) as limited by 10 U.S.C. 1403	$4,500
(ii) Less: Retired pay, not to exceed (i), waived to receive V.A. compensation	(1,000)
(iii) Net disability exclusion	(3,500)
Taxable retired pay before adjustment for Dual Compensation forfeiture	5,500
Less:	
Adjustment for Dual Compensation forfeiture of $4,088	
5500÷9000×$4,088 = $2,498 (rounded)	(2,498)
Net taxable retired pay	3,002

Example 5. C, a member of the uniformed services retires on January 1, 1966, and receives disability retirement pay of $11,250 per year, which is reduced by $1,250 to provide a survivor annuity, and $1,000 of which is waived in order to receive disability compensation in like amount under laws administered by the Veterans Administration. C has not reached retirement age for purposes of section 105(d) and is not employed by the Federal Government. C's taxable disability retirement pay for 1966 is $300 computed as follows:

Adjusted retired pay	$9,000	
Less:		
(i) Excludable retired pay under section (a)(4) as limited by 10 U.S.C. 1403	$4,500	
(ii) Excludable retired pay under section 105(d)	5,200	
(iii) Total	9,700	
(iv) Less: Retired pay, not to exceed (iii), waived to receive V.A. compensa- tion "sick pay" exclusion	(1,000)	
(v) Net disability and "sick pay" exclusion		(8,700)
Net taxable retired pay	800	

Example 6. D, a member of the uniformed services, retires for physical disability resulting from active service on January 1, 1966, after 35 years of service and with a disability rated at 20 percent. His active duty pay is $4,000 per year and he attained retirement age prior to retirement. He had an election in effect under the Retired Serviceman's Family Protection Plan to provide his survivor with an annuity and his retired pay is reduced therefor by $500 per year. He waives $1,300 of his retired pay in order to receive compensation from the Veterans Administration in like amount. His taxable retired pay for 1966 is $1,200 computed as follows:

Gross retired pay (75%×$4,000)	$3,000	
Less: Section 122(a) exclusion	(500)	
Reduced retired pay	2,500	
Less: V.A. waiver	(1,300)	
Adjusted retired pay	1,200	
Less:		
(i) Section 104(a)(4) exclusion	$800	
(ii) Less: Retired pay, not to exceed (i), waived to receive V.A. compensation	(800)	
(iii) Net disability exclusion	0	
Net taxable retired pay		1,200

(e) *Principles applicable to the Survivor Benefit Plan*. The principles illustrated by the examples set forth in paragraph (d) of this section apply to an annuity under the Survivor Benefit Plan (10 U.S.C. 1447).

[T.D. 7043, 35 FR 8478, June 2, 1970, as amended by T.D. 7562, 43 FR 38819, Aug. 31, 1978]

§ 1.123–1 Exclusion of insurance proceeds for reimbursement of certain living expenses.

(a) *In general*. (1) Gross income does not include insurance proceeds received by an individual on or after January 1, 1969, pursuant to the terms of an insurance contract for indemnification of the temporary increase in living expenses resulting from the loss of use or occupancy of his principal residence, or a part thereof, due to damage or destruction by fire, storm, or other casualty. The term ''other casualty'' has the same meaning assigned to such term under section 165(c)(3). The exclusion also applies in the case of an individual who is denied access to his principal residence by governmental authorities because of the occurrence (or threat of occurrence) of such a casualty. The amount excludable under this section is subject to the limitation set forth in paragraph (b) of this section.

(2) This exclusion applies to amounts received as reimbursement or compensation for the reasonable and necessary increase in living expenses incurred by the insured and members of his household to maintain their customary standard of living during the loss period.

(3) This exclusion does not apply to an insurance recovery for the loss of rental income. Nor does the exclusion apply to any insurance recovery which compensates for the loss of, or damage to, real or personal property. See section 165(c)(3) relating to casualty losses; section 1231 relating to gain on an involuntary conversion of a capital asset held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977); and section 1033 relating to recognition of gain on an involuntary conversion. In the case of property used by an insured partially as a principal residence and partially for other purposes, the exclusion does not apply to the amount of insurance proceeds which compensates for the portion of increased expenses attributable to the nonresidential use of temporary replacement property during the loss period. In the case of denial of access to a principal residence by governmental authority, the exclusion provided by this section does not apply to an insurance recovery received by an individual as reimbursement for living expenses incurred by reason of a governmental condemnation or order not related to a casualty or the threat of a casualty.

(4)(i) Subject to the limitation set forth in paragraph (b), the amount excludable is the amount which is identified by the insurer as being paid exclusively for increased living expenses resulting from the loss of use or occupancy of the principal residence and pursuant to the terms of the insurance contract.

(ii) When a lump-sum insurance settlement includes, but does not specifically identify, compensation for property damage, loss of rental income, and increased living expenses, the amount of such settlement allocable to living expenses shall, in the case of uncontested claims, be that portion of the settlement which bears the same ratio to the total recovery as the amount of claimed increased living expense bears to the total amount of claimed losses and expenses, to the extent not in excess of the coverage limitations specified in the contract for such losses and expenses.

(iii) In the case of a lump-sum settlement involving contested claims, the insured shall establish the amount reasonably allocable to increased living expenses, consistent with the terms of the contract and other facts of the particular case.

(iv) In no event may the amount of a lump-sum settlement which is allocable to increased living expenses exceed the coverage limitation specified in the contract for increased living expenses. Where, however, a coverage limitation is applicable to the total amount payable for increased living expenses and, for example, loss of rental income, the amount of an unitemized settlement which is allocable to increased living expenses may not exceed the portion of the applicable coverage limitation which bears the same ratio to such limitation as the amount of increased living expenses bears to the sum of the amount of such increased living expenses and the amount, if any, of lost rental income.

(5) The portion of any insurance recovery for increased living expenses which exceeds the limitation set forth in paragraph (b) shall be included in gross income under section 61 of the Code.

(b) *Limitation*—(1) *Amount excludable.* The amount excludable under this section is limited to amounts received which are not in excess of the amount by which (i) total actual living expenses incurred by the insured and members of his household which result from the loss of use or occupancy of their residence exceed (ii) the total normal living expenses which would have been incurred during the loss period but are not incurred as a result of the loss of use or occupancy of the principal residence. Generally, the excludable amount represents such excess expenses actually incurred by reason of a casualty, or threat thereof, for renting suitable housing and for extraordinary expenses for transportation, food, utilities, and miscellaneous services during the period of repair or replacement of the damaged principal residence or denial of access by governmental authority.

(2) *Actual living expenses*. For purposes of this section, actual living expenses are the reasonable and necessary expenses incurred as a result of the loss of use or occupancy of the principal residence to maintain the insured and members of his household in accordance with their customary standard of living. Actual living expenses must be of such a nature as to qualify as a reimbursable expense under the terms of the applicable insurance contract without regard to monetary limitations upon coverage. Generally, actual living expenses include the cost during the loss period of temporary housing, utilities furnished at the place of temporary housing, meals obtained at restaurants which customarily would have been prepared in the residence, transportation, and other miscellaneous services. To the extent that the loss of use or occupancy of the principal residence results merely in an increase in the amount expended for items of living expenses normally incurred, such as food and transportation, only the increase in such costs shall be considered as actual living expenses in computing the limitation.

(3) *Normal living expenses not incurred*. Normal living expenses consist of the same categories of expenses comprising actual living expenses which would have been incurred but are not incurred as a result of the casualty or threat thereof. If the loss of use of the residence results in a decrease in the amount normally expended for a living expense item during the loss period, the item of normal living expense is considered not to have been incurred to the extent of the decrease for purposes of computing the limitation.

(4) *Examples*. The application of this paragraph (b) may be illustrated by the following examples:

Example 1. On March 1, 1970, A's principal residence, a dwelling owned by A no part of which was rented to others or used for nonresidential purposes, was extensively damaged by fire. The damaged residence was under repair during the entire month of March making it necessary for A and his spouse to obtain temporary lodging and to take their meals at a restaurant. A and his spouse incur expenses of $200 for lodging at a motel, $180 for meals which customarily would have been prepared in his residence, and $25 for commercial laundry service which customarily would have been done by A's wife. A makes (directly or through mortgage insurance), or remains liable for, the required March payment of $190 on the mortgage note on his residence. The mortgage payment results from a contractual obligation having no causal relationship to the occurrence of the casualty and is not considered as an actual living expense resulting from the loss of use of the residence. A's customary commuting expense of $40 for bus fares to and from work is decreased by $20 for the month because of the motel's closer proximity to his place of employment. Other transportation expenses remain stable. Since there has been a decrease in the amount of A's customary bus fares, normal transportation expenses are considered not to have been incurred to the extent of the decrease. Finally, A does not incur customary expenses of $150 for food obtained for home preparation, $75 for utilities expenses, and $10 for laundry cleansers. The limitation upon the excludable amount of an insurance recovery for excess living expenses is $150, computed as follows:

LIVING EXPENSES

	Actual resulting from casualty	Normal not incurred	Increase (decrease)
Housing	$200.00		$200.00
Utilities		$75.00	(75.00)
Meals	180.00	150.00	30.00
Transportation		20.00	(20.00)
Laundry	25.00	10.00	150.00
Total	405.00	255.00	15.00

Example 2. Assume the same facts as in example (1) except that the damaged residence is not owned by A but is rented to him for $100 per month and that the risk of loss is upon the lessor. Since A would not have incurred the normal rental of $100 for March, the excludable amount is limited to $50 ($150 as in previous example less $100 normal rent not incurred).

(c) *Principal residence*. Whether or not property is used by the insured taxpayer and members of his household as their principal residence depends upon all the facts and circumstances in each case. For purposes of this section, a principal residence may be a dwelling or an apartment leased to the insured as well as a dwelling or apartment owned by the insured.

[T.D. 7118, 36 FR 10729, June 2, 1971, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.125–3 Effect of the Family and Medical Leave Act (FMLA) on the operation of cafeteria plans.

The following questions and answers provide guidance on the effect of the Family and Medical Leave Act (FMLA), 29 U.S.C. 2601 *et seq.*, on the operation of cafeteria plans:

Q–1: May an employee revoke coverage or cease payment of his or her share of group health plan premiums when taking unpaid FMLA, 29 U.S.C. 2601 *et seq.*, leave?

A–1: Yes. An employer must either allow an employee on unpaid FMLA leave to revoke coverage, or continue coverage but allow the employee to discontinue payment of his or her share of the premium for group health plan coverage (including a health flexible spending arrangement (FSA)) under a cafeteria plan for the period of the FMLA leave. See 29 CFR 825.209(e). FMLA does not require that an employer allow an employee to revoke coverage if the employer pays the employee's share of premiums. As discussed in Q&A–3, if the employer continues coverage during an FMLA leave, the employer may recover the employee's share of the premiums when the employee returns to work. FMLA also provides the employee a right to be reinstated in the group health plan coverage (including a health FSA) provided under a cafeteria plan upon returning from FMLA leave if the employee's group health plan coverage terminated while on FMLA leave (either by revocation or due to nonpayment of premiums). Such an employee is entitled, to the extent required under FMLA, to be reinstated on the same terms as prior to taking FMLA leave (including family or dependent coverage), subject to any changes in benefit levels that may have taken place during the period of FMLA leave as provided in 29 CFR 825.215(d)(1). See 29 CFR 825.209(e) and 825.215(d). In addition, such an employee has the right to revoke or change elections under § 1.125–4 (e.g., because of changes in status or cost or coverage changes as provided under § 1.125–4) under the same terms and conditions as are available to employees participating in the cafeteria plan who are working and not on FMLA leave.

Q–2: Who is responsible for making premium payments under a cafeteria plan when an employee on FMLA leave continues group health plan coverage?

A–2: FMLA provides that an employee is entitled to continue group health plan coverage during FMLA leave whether or not that coverage is provided under a health FSA or other component of a cafeteria plan. See 29 CFR 825.209(b). FMLA permits an employer to require an employee who chooses to continue group health plan coverage while on FMLA leave to be responsible for the share of group health premiums that would be allocable to the employee if the employee were working, and, for this purpose, treats amounts paid pursuant to a pre-tax salary reduction agreement as amounts allocable to the employee. However, FMLA requires the employer to continue to contribute the share of the cost of the employee's coverage that the employer was paying before the employee commenced FMLA leave. See 29 CFR 825.100(b) and 825.210(a).

Q–3: What payment options are required or permitted to be offered under a cafeteria plan to an employee who continues group health plan coverage while on unpaid FMLA leave, and what is the tax treatment of these payments?

A–3: (a) *In general.* Subject to the limitations described in paragraph (b) of this Q&A–3, a cafeteria plan may offer one or more of the following payment options, or a combination of these options, to an employee who continues group health plan coverage (including a health FSA) while on unpaid FMLA leave; provided that the payment options for employees on FMLA leave are offered on terms at least as favorable as those offered to employees not on FMLA leave. These options are referred to in this section as pre-pay, pay-as-you-go, and catch-up. See also the FMLA notice requirements at 29 CFR 825.301(b)(1)(iv).

(1) *Pre-pay.* (i) Under the pre-pay option, a cafeteria plan may permit an employee to pay, prior to commencement of the FMLA leave period, the amounts due for the FMLA leave period. However, FMLA provides that the employer may not mandate that an employee pre-pay the amounts due for

the leave period. See 29 CFR 825.210(c)(3) and (4).

(ii) Contributions under the pre-pay option may be made on a pre-tax salary reduction basis from any taxable compensation (including from unused sick days or vacation days). However, see Q&A–5 of this section regarding additional restrictions on pre-tax salary reduction contributions when an employee's FMLA leave spans two cafeteria plan years.

(iii) Contributions under the pre-pay option may also be made on an after-tax basis.

(2) *Pay-as-you-go.* (i) Under the pay-as-you-go option, employees may pay their share of the premium payments on the same schedule as payments would have been made if the employee were not on leave or under any other payment schedule permitted by the Labor Regulations at 29 CFR 825.210(c) (e.g., on the same schedule as payments are made under section 4980B (relating to coverage under the Consolidated Omnibus Budget Reconciliation Act (COBRA), 26 U.S.C. 4980B), under the employer's existing rules for payment by employees on leave without pay, or under any other system voluntarily agreed to between the employer and the employee that is not inconsistent with this section or with 29 CFR 825.210(c)).

(ii) Contributions under the pay-as-you-go option are generally made by the employee on an after-tax basis. However, contributions may be made on a pre-tax basis to the extent that the contributions are made from taxable compensation (e.g., from unused sick days or vacation days) that is due the employee during the leave period.

(iii) An employer is not required to continue the group health coverage of an employee who fails to make required premium payments while on FMLA leave, provided that the employer follows the notice procedures required under FMLA. See 29 CFR 825.212. However, if the employer chooses to continue the health coverage of an employee who fails to pay his or her share of the premium payments while on FMLA leave, FMLA permits the employer to recoup the premiums (to the extent of the employee's share). See 29 CFR 825.212(b). Such recoupment may be made as set forth in paragraphs (a)(3)(i) and (ii) of this Q&A–3. See also Q&A–6 of this section regarding coverage under a health FSA when an employee fails to make the required premium payments while on FMLA leave.

(3) *Catch-up.* (i) Under the catch-up option, the employer and the employee may agree in advance that the group coverage will continue during the period of unpaid FMLA leave, and that the employee will not pay premiums until the employee returns from the FMLA leave. Where an employee is electing to use the catch-up option, the employer and the employee must agree in advance of the coverage period that: the employee elects to continue health coverage while on unpaid FMLA leave; the employer assumes responsibility for advancing payment of the premiums on the employee's behalf during the FMLA leave; and these advance amounts are to be paid by the employee when the employee returns from FMLA leave.

(ii) When an employee fails to make required premium payments while on FMLA leave, an employer is permitted to utilize the catch-up option to recoup the employee's share of premium payments when the employee returns from FMLA leave. See, e.g., 29 CFR 825.212(b). If the employer chooses to continue group coverage under these circumstances, the prior agreement of the employee, as set forth in paragraph (a)(3)(i) of this Q&A–3, is not required.

(iii) Contributions under the catch-up option may be made on a pre-tax salary reduction basis from any available taxable compensation (including from unused sick days and vacation days) after the employee returns from FMLA leave. The cafeteria plan may provide for the catch-up option to apply on a pre-tax salary reduction basis if premiums have not been paid on any other basis (*i.e.*, have not been paid under the pre-pay or pay-as-you-go options or on a catch-up after-tax basis).

(iv) Contributions under the catch-up option may also be made on an after-tax basis.

(b) *Exceptions.* Whatever payment options are offered to employees on non-FMLA leave must be offered to employees on FMLA leave. In accordance with 29 CFR 825.210(c), cafeteria plans may offer one or more of the payment options described in paragraph (a) of this Q&A–3, with the following exceptions:

(1) FMLA does not permit the prepay option to be the sole option offered to employees on FMLA leave. However, the cafeteria plan may include pre-payment as an option for employees on FMLA leave, even if such option is not offered to employees on non-FMLA leave-without-pay.

(2) FMLA allows the catch-up option to be the sole option offered to employees on FMLA leave if and only if the catch-up option is the sole option offered to employees on non-FMLA leave-without-pay.

(3) If the pay-as-you-go option is offered to employees on non-FMLA leave-without-pay, the option must also be offered to employees on FMLA leave. The employer may also offer employees on FMLA leave the pre-pay option and/or the catch-up option.

(c) *Voluntary waiver of employee payments*. In addition to the foregoing payment options, an employer may voluntarily waive, on a nondiscriminatory basis, the requirement that employees who elect to continue group health coverage while on FMLA leave pay the amounts the employees would otherwise be required to pay for the leave period.

(d) *Example*. The following example illustrates this Q&A–3:

Example. (i) Employer Y allows employees to pay premiums for group health coverage during an FMLA leave on an after-tax basis while the employee is on unpaid FMLA leave. Under the terms of Y's cafeteria plan, if an employee elects to continue health coverage during an unpaid FMLA leave and fails to pay one or more of the after-tax premium payments due for that coverage, the employee's salary after the employee returns from FMLA leave is reduced to cover unpaid premiums (*i.e.* the premiums that were to be paid by the employee on an after-tax basis during the FMLA leave, but were paid by the employer instead).

(ii) In this *Example*, Y's cafeteria plan satisfies the conditions in this Q&A–3. Y's cafeteria plan would also satisfy the conditions in this Q&A–3 if the plan provided for coverage to cease in the event the employee fails to make a premium payment when due during an unpaid FMLA leave.

Q–4: Do the special FMLA requirements concerning payment of premiums by an employee who continues group health plan coverage under a cafeteria plan apply if the employee is on paid FMLA leave?

A–4: No. The Labor Regulations provide that, if an employee's FMLA leave is paid leave as described at 29 CFR 825.207 and the employer mandates that the employee continue group health plan coverage while on FMLA leave, the employee's share of the premiums must be paid by the method normally used during any paid leave (e.g., by pre-tax salary reduction if the employee's share of premiums were paid by pre-tax salary reduction before the FMLA leave began). See 29 CFR 825.210(b).

Q–5: What restrictions apply to contributions when an employee's FMLA leave spans two cafeteria plan years?

A–5: (a) No amount will be included in an employee's gross income due to participation in a cafeteria plan during FMLA leave, provided that the plan complies with other generally applicable cafeteria plan requirements. Among other requirements, a plan may not operate in a manner that enables employees on FMLA leave to defer compensation from one cafeteria plan year to a subsequent cafeteria plan year. See section 125(d)(2).

(b) The following example illustrates this Q&A–5:

Example. (i) Employee A elects group health coverage under a calendar year cafeteria plan maintained by Employer X. Employee A's premium for health coverage is $100 per month throughout the 12-month period of coverage. Employee A takes FMLA leave for 12 weeks beginning on October 31 after making 10 months of premium payments totaling $1,000 (10 months × $100 = $1,000). Employee A elects to continue health coverage while on FMLA leave and utilizes the pre-pay option by applying his or her unused sick days in order to make the required premium payments due while he or she is on FMLA leave.

(ii) Because A cannot defer compensation from one plan year to a subsequent plan year, A may pre-pay the premiums due in November and December (*i.e.*, $100 per month) on a pre-tax basis, but A cannot prepay the premium payment due in January on a pre-tax basis. If A participates in the cafeteria plan in the subsequent plan year, A must either pre-pay for January on an after-tax basis or use another option (e.g., pay-as-you-go, catch-up, reduction in unused sick days, etc.) to make the premium payment due in January.

Q–6: Are there special rules concerning employees taking FMLA leave who participate in health FSAs offered under a cafeteria plan?

A–6: (a) *In general.* (1) A group health plan that is a flexible spending arrangement (FSA) offered under a cafeteria plan must conform to the generally applicable rules in this section concerning employees who take FMLA leave. Thus, to the extent required by FMLA (see 29 CFR 825.209(b)), an employer must—

(i) Permit an employee taking FMLA leave to continue coverage under a health FSA while on FMLA leave; and

(ii) If an employee is on unpaid FMLA leave, either—

(A) Allow the employee to revoke coverage; or

(B) Continue coverage, but allow the employee to discontinue payment of his or her share of the premium for the health FSA under the cafeteria plan during the unpaid FMLA leave period.

(2) Under FMLA, the plan must permit the employee to be reinstated in health coverage upon return from FMLA leave on the same terms as if the employee had been working throughout the leave period, without a break in coverage. See 29 CFR 825.214(a) and 825.215(d)(1) and paragraph (b)(2) of this Q&A–6. In addition, under FMLA, a plan may require an employee to be reinstated in health coverage upon return from a period of unpaid FMLA leave, provided that employees who return from a period of unpaid leave not covered by the FMLA are also required to resume participation upon return from leave.

(b) *Coverage.* (1) Regardless of the payment option selected under Q&A–3 of this section, for so long as the employee continues health FSA coverage (or for so long as the employer continues the health FSA coverage of an employee who fails to make the required contributions as described in Q&A–3(a)(2)(iii) of this section), the full amount of the elected health FSA coverage, less any prior reimbursements, must be available to the employee at all times, including the FMLA leave period.

(2)(i) If an employee's coverage under the health FSA terminates while the employee is on FMLA leave, the employee is not entitled to receive reimbursements for claims incurred during the period when the coverage is terminated. If an employee subsequently elects or the employer requires the employee to be reinstated in the health FSA upon return from FMLA leave for the remainder of the plan year, the employee may not retroactively elect health FSA coverage for claims incurred during the period when the coverage was terminated. Upon reinstatement into a health FSA upon return from FMLA leave (either because the employee elects reinstatement or because the employer requires reinstatement), the employee has the right under FMLA: to resume coverage at the level in effect before the FMLA leave and make up the unpaid premium payments, or to resume coverage at a level that is reduced and resume premium payments at the level in effect before the FMLA leave. If an employee chooses to resume health FSA coverage at a level that is reduced, the coverage is prorated for the period during the FMLA leave for which no premiums were paid. In both cases, the coverage level is reduced by prior reimbursements.

(ii) FMLA requires that an employee on FMLA leave have the right to revoke or change elections (because of events described in §1.125–4) under the same terms and conditions that apply to employees participating in the cafeteria plan who are not on FMLA leave. Thus, for example, if a group health plan offers an annual open enrollment period to active employees, then, under FMLA, an employee on FMLA leave when the open enrollment is offered must be offered the right to make election changes on the same basis as other employees. Similarly, if a group health plan decides to offer a new benefit package option and allows active employees to elect the new option, then, under FMLA, an employee on FMLA leave must be allowed to elect the new option on the same basis as other employees.

(3) The following examples illustrate the rules in this Q&A–6:

Example 1. (i) Employee B elects $1,200 worth of coverage under a calendar year health FSA provided under a cafeteria plan, with an annual premium of $1,200. Employee

B is permitted to pay the $1,200 through pretax salary reduction amounts of $100 per month throughout the 12-month period of coverage. Employee B incurs no medical expenses prior to April 1. On April 1, B takes FMLA leave after making three months of contributions totaling $300 (3 months × $100 = $300). Employee B's coverage ceases during the FMLA leave. Consequently, B makes no premium payments for the months of April, May, and June, and B is not entitled to submit claims or receive reimbursements for expenses incurred during this period. Employee B returns from FMLA leave and elects to be reinstated in the health FSA on July 1.

(ii) Employee B must be given a choice of resuming coverage at the level in effect before the FMLA leave (*i.e.*, $1,200) and making up the unpaid premium payments ($300), or resuming health FSA coverage at a level that is reduced on a prorata basis for the period during the FMLA leave for which no premiums were paid (*i.e.*, reduced for 3 months or ¼ of the plan year) less prior reimbursements (*i.e.*, $0) with premium payments due in the same monthly amount payable before the leave (*i.e.*, $100 per month). Consequently, if B chooses to resume coverage at the level in effect before the FMLA leave, B's coverage for the remainder of the plan year would equal $1,200 and B's monthly premiums would be increased to $150 per month for the remainder of the plan year, to make up the $300 in premiums missed ($100 per month plus $50 per month ($300 divided by the remaining 6 months)). If B chooses prorated coverage, B's coverage for the remainder of the plan year would equal $900, and B would resume making premium payments of $100 per month for the remainder of the plan year.

Example 2. (i) Assume the same facts as *Example 1* except that B incurred medical expenses totaling $200 in February and obtained reimbursement of these expenses.

(ii) The results are the same as in *Example 1*, except that if B chooses to resume coverage at the level in effect before the FMLA leave, B's coverage for the remainder of the year would equal $1,000 ($1,200 reduced by $200) and the monthly payments for the remainder of the year would still equal $150. If instead B chooses prorated coverage, B's coverage for the remainder of the plan year would equal $700 ($1,200 prorated for 3 months, and then reduced by $200) and the monthly payments for the remainder of the year would still equal $100.

Example 3. (i) Assume the same facts as *Example 1* except that, prior to taking FMLA leave, B elects to continue health FSA coverage during the FMLA leave. The plan permits B (and B elects) to use the catch-up payment option described in Q&A–3 of this section, and as further permitted under the plan, B chooses to repay the $300 in missed payments on a ratable basis over the remaining 6-month period of coverage (*i.e.*, $50 per month).

(ii) Thus, B's monthly premium payments for the remainder of the plan year will be $150 ($100 + $50).

Q–7: Are employees entitled to non-health benefits while taking FMLA leave?

A–7: FMLA does not require an employer to maintain an employee's non-health benefits (e.g., life insurance) during FMLA leave. An employee's entitlement to benefits other than group health benefits under a cafeteria plan during a period of FMLA leave is to be determined by the employer's established policy for providing such benefits when the employee is on non-FMLA leave (paid or unpaid). See 29 CFR 825.209(h). Therefore, an employee who takes FMLA leave is entitled to revoke an election of non-health benefits under a cafeteria plan to the same extent as employees taking non-FMLA leave are permitted to revoke elections of non-health benefits under a cafeteria plan. For example, election changes are permitted due to changes of status or upon enrollment for a new plan year. See § 1.125–4. However, FMLA provides that, in certain cases, an employer may continue an employee's non-health benefits under the employer's cafeteria plan while the employee is on FMLA leave in order to ensure that the employer can meet its responsibility to provide equivalent benefits to the employee upon return from unpaid FMLA. If the employer continues an employee's non-health benefits during FMLA leave, the employer is entitled to recoup the costs incurred for paying the employee's share of the premiums during the FMLA leave period. See 29 CFR 825.213(b). Such recoupment may be on a pre-tax basis. A cafeteria plan must, as required by FMLA, permit an employee whose coverage terminated while on FMLA leave (either by revocation or nonpayment of premiums) to be reinstated in the cafeteria plan on return from FMLA leave. See 29 CFR 825.214(a) and 825.215(d).

Q–8: What is the applicability date of the regulations in this section?

A–8: This section is applicable for cafeteria plan years beginning on or after January 1, 2002.

[T.D. 8966, 66 FR 52677, Oct. 17, 2001; 66 FR 63920, Dec. 11, 2001]

§ 1.125–4 Permitted election changes.

(a) *Election changes.* A cafeteria plan may permit an employee to revoke an election during a period of coverage and to make a new election only as provided in paragraphs (b) through (g) of this section. Section 125 does not require a cafeteria plan to permit any of these changes. See paragraph (h) of this section for special provisions relating to qualified cash or deferred arrangements, and paragraph (i) of this section for special definitions used in this section.

(b) *Special enrollment rights*—(1) *In general.* A cafeteria plan may permit an employee to revoke an election for coverage under a group health plan during a period of coverage and make a new election that corresponds with the special enrollment rights provided in section 9801(f).

(2) *Examples.* The following examples illustrate the application of this paragraph (b):

Example 1. (i) Employer *M* provides health coverage for its employees pursuant to a plan that is subject to section 9801(f). Under the plan, employees may elect either employee-only coverage or family coverage. *M* also maintains a calendar year cafeteria plan under which qualified benefits, including health coverage, are funded through salary reduction. *M*'s employee, *A*, is married to *B* and they have a child, *C*. In accordance with *M*'s cafeteria plan, Employee *A* elects employee-only health coverage before the beginning of the calendar year. During the year, *A* and *B* adopt a child, *D*. Within 30 days thereafter, *A* wants to revoke *A*'s election for employee-only health coverage and obtain family health coverage for *A*'s spouse, *C*, and *D* as of the date of *D*'s adoption. Employee *A* satisfies the conditions for special enrollment of an employee with a new dependent under section 9801(f)(2), so that *A* may enroll in family coverage under *M*'s accident or health plan in order to provide coverage effective as of the date of *D*'s adoption.

(ii) *M*'s cafeteria plan may permit *A* to change *A*'s salary reduction election to family coverage for salary not yet currently available. The increased salary reduction is permitted to reflect the cost of family coverage from the date of adoption. (*A*'s adoption of *D* is also a change in status, and the election of family coverage is consistent with that change in status. Thus, under paragraph (c) of this section, *M*'s cafeteria plan could permit *A* to elect family coverage prospectively in order to cover *B*, *C*, and *D* for the remaining portion of the period of coverage.)

Example 2. (i) The employer plans and permissible coverage are the same as in *Example 1*. Before the beginning of the calendar year, Employee *E* elects employee-only health coverage under *M*'s cafeteria plan. Employee *E* marries *F* during the plan year. *F*'s employer, *N*, offers health coverage to *N*'s employees, and, prior to the marriage, *F* had elected employee-only coverage. Employee *E* wants to revoke the election for employee-only coverage under *M*'s cafeteria plan, and is considering electing family health coverage under *M*'s plan or obtaining family health coverage under *N*'s plan.

(ii) *M*'s cafeteria plan may permit *E* to change *E*'s salary reduction election to reflect the change to family coverage under *M*'s accident or health plan because the marriage would result in special enrollment rights under section 9801(f), pursuant to which an election of family coverage under *M*'s accident or health plan would be required to be effective no later than the first day of the first calendar month beginning after the completed request for enrollment is received by the plan. Since no retroactive coverage is required in the event of marriage under section 9801(f), *E*'s salary reduction election may only be changed on a prospective basis. (*E*'s marriage to *F* is also a change in status under paragraph (c) of this section, as illustrated in Example 1 of paragraph (c)(4) of this section.)

(c) *Changes in status*—(1) *Change in status rule.* A cafeteria plan may permit an employee to revoke an election during a period of coverage with respect to a qualified benefits plan (defined in paragraph (i)(8) of this section) to which this paragraph (c) applies and make a new election for the remaining portion of the period (referred to in this section as an election change) if, under the facts and circumstances—

(i) A change in status described in paragraph (c)(2) of this section occurs; and

(ii) The election change satisfies the consistency rule of paragraph (c)(3) of this section.

(2) *Change in status events.* The following events are changes in status for purposes of this paragraph (c):

(i) *Legal marital status.* Events that change an employee's legal marital status, including the following: marriage; death of spouse; divorce; legal separation; and annulment.

(ii) *Number of dependents.* Events that change an employee's number of dependents, including the following: birth; death; adoption; and placement for adoption.

(iii) *Employment status.* Any of the following events that change the employment status of the employee, the employee's spouse, or the employee's dependent: a termination or commencement of employment; a strike or lockout; a commencement of or return from an unpaid leave of absence; and a change in worksite. In addition, if the eligibility conditions of the cafeteria plan or other employee benefit plan of the employer of the employee, spouse, or dependent depend on the employment status of that individual and there is a change in that individual's employment status with the consequence that the individual becomes (or ceases to be) eligible under the plan, then that change constitutes a change in employment under this paragraph (c) (e.g., if a plan only applies to salaried employees and an employee switches from salaried to hourly-paid with the consequence that the employee ceases to be eligible for the plan, then that change constitutes a change in employment status under this paragraph (c)(2)(iii)).

(iv) *Dependent satisfies or ceases to satisfy eligibility requirements.* Events that cause an employee's dependent to satisfy or cease to satisfy eligibility requirements for coverage on account of attainment of age, student status, or any similar circumstance.

(v) *Residence.* A change in the place of residence of the employee, spouse, or dependent.

(vi) *Adoption assistance.* For purposes of adoption assistance provided through a cafeteria plan, the commencement or termination of an adoption proceeding.

(3) *Consistency rule*—(i) *Application to accident or health coverage and group-term life insurance.* An election change satisfies the requirements of this paragraph (c)(3) with respect to accident or health coverage or group-term life insurance only if the election change is on account of and corresponds with a change in status that affects eligibility for coverage under an employer's plan. A change in status that affects eligibility under an employer's plan includes a change in status that results in an increase or decrease in the number of an employee's family members or dependents who may benefit from coverage under the plan.

(ii) *Application to other qualified benefits.* An election change satisfies the requirements of this paragraph (c)(3) with respect to other qualified benefits if the election change is on account of and corresponds with a change in status that affects eligibility for coverage under an employer's plan. An election change also satisfies the requirements of this paragraph (c)(3) if the election change is on account of and corresponds with a change in status that effects expenses described in section 129 (including employment-related expenses as defined in section 21(b)(2)) with respect to dependent care assistance, or expenses described in section 137 (including qualified adoption expenses as defined in section 137(d)) with respect to adoption assistance.

(iii) *Application of consistency rule.* If the change in status is the employee's divorce, annulment or legal separation from a spouse, the death of a spouse or dependent, or a dependent ceasing to satisfy the eligibility requirements for coverage, an employee's election under the cafeteria plan to cancel accident or health insurance coverage for any individual other than the spouse involved in the divorce, annulment or legal separation, the deceased spouse or dependent, or the dependent that ceased to satisfy the eligibility requirements for coverage, respectively, fails to correspond with that change in status. Thus, if a dependent dies or ceases to satisfy the eligibility requirements for coverage, the employee's election to cancel accident or health coverage for any other dependent, for the employee, or for the employee's spouse fails to correspond with that change in status. In addition, if an employee, spouse, or dependent gains eligibility for coverage under a family member plan (as defined in paragraph (i)(5) of this section) as a result of a change in marital status under paragraph (c)(2)(i) of this section or a change in employment status under paragraph (c)(2)(iii) of this section, an employee's election under the cafeteria plan to cease or decrease coverage for that individual under the cafeteria plan corresponds with that change in status only if coverage for that individual becomes applicable or is increased under the family member plan. With respect to group-term life insurance and disability coverage (as defined in paragraph (i)(4) of this section), an election under a cafeteria plan to increase coverage (or an election to decrease coverage) in response to a change in status described in paragraph (c)(2) of this section is deemed to correspond with that change in status as required by paragraph (c)(3)(i) of this section.

(iv) *Exception for COBRA*. If the employee, spouse, or dependent becomes eligible for continuation coverage under the group health plan of the employee's employer as provided in section 4980B or any similar state law, a cafeteria plan may permit the employee to elect to increase payments under the employer's cafeteria plan in order to pay for the continuation coverage.

(4) *Examples*. The following examples illustrate the application of this paragraph (c):

Example 1. (i) Employer *M* provides health coverage (including a health FSA) for its employees through its cafeteria plan. Before the beginning of the calendar year, Employee *A* elects employee-only health coverage under *M*'s cafeteria plan and elects salary reduction contributions to fund coverage under the health FSA. Employee *A* marries *B* during the year. Employee *B*'s employer, *N*, offers health coverage to *N*'s employees (but not including any health FSA), and, prior to the marriage, *B* had elected employee-only coverage. Employee *A* wants to revoke the election for employee-only coverage, and is considering electing family health coverage under *M*'s plan or obtaining family health coverage under *N*'s plan.

(ii) Employee *A*'s marriage to *B* is a change in status under paragraph (c)(2)(i) of this section, pursuant to which *B* has become eligible for coverage under *M*'s health plan under paragraph (c)(3)(i) of this section. Two possible election changes by *A* correspond with the change in status: Employee *A* may elect family health coverage under *M*'s plan to cover *A* and *B*; or *A* may cancel coverage under *M*'s plan, if *B* elects family health coverage under *N*'s plan to cover *A* and *B*. Thus, *M*'s cafeteria plan may permit *A* to make either election change.

(iii) Employee *A* may also increase salary reduction contributions to fund coverage for *B* under the health FSA.

Example 2. (i) Employee *C*, a single parent, elects family health coverage under a calendar year cafeteria plan maintained by Employer *O*. Employee *C* and *C*'s 21-year old child, *D*, are covered under *O*'s health plan. During the year, *D* graduates from college. Under the terms of the health plan, dependents over the age of 19 must be full-time students to receive coverage. Employee *C* wants to revoke *C*'s election for family health coverage and obtain employee-only coverage under *O*'s cafeteria plan.

(ii) *D*'s loss of eligibility for coverage under the terms of the health plan is a change in status under paragraph (c)(2)(iv) of this section. A revocation of *C*'s election for family coverage and new election for employee-only coverage corresponds with the change in status. Thus, *O*'s cafeteria plan may permit *C* to elect employee-only coverage.

Example 3. (i) Employee *E* is married to *F* and they have one child, *G*. Employee *E* is employed by Employer *P*, and *P* maintains a calendar year cafeteria plan that allows employees to elect no health coverage, employee-only coverage, employee-plus-one-dependent coverage, or family coverage. Under the plan, before the beginning of the calendar year, *E* elects family health coverage for *E*, *F*, and *G*. *E* and *F* divorce during the year and *F* loses eligibility for coverage under *P*'s plan. *G* does not lose eligibility for health coverage under *P*'s plan upon the divorce. *E* now wants to revoke *E*'s election under the cafeteria plan and elect no coverage.

(ii) The divorce is a change in status under paragraph (c)(2)(i). A change in the cafeteria plan election to cancel health coverage for *F* is consistent with that change in status. However, an election change to cancel *E*'s or *G*'s health coverage does not satisfy the consistency rule under paragraph (c)(3)(iii) of this section regarding cancellation of coverage for an employee's other dependents in the event of divorce. Therefore, the cafeteria plan may not permit *E* to elect no coverage. However, an election to change to employee-plus-one-dependent health coverage would correspond with the change in status, and thus the cafeteria plan may permit *E* to elect employee-plus-one-dependent health coverage.

(iii) In addition, under paragraph (f)(4) of this section, if *F* makes an election change to cover *G* under *F*'s employer's plan, then *E* may make a corresponding change to elect employee-only coverage under *P*'s cafeteria plan.

Example 4. (i) Employer *R* maintains a calendar year cafeteria plan under which full-time employees may elect coverage under one of three benefit package options provided under an accident or health plan: an indemnity option or either of two HMO options for employees who work in the respective service areas of the two HMOs. Employee *A*, who works in the service area of HMO #1, elects the HMO #1 option. During the year, *A* is transferred to another work location which is outside the HMO #1 service area and inside the HMO #2 service area.

(ii) The transfer is a change in status under paragraph (c)(2)(iii) of this section (relating to a change in worksite), and, under the consistency rule in paragraph (c)(3) of this section, the cafeteria plan may permit *A* to make an election change to elect the indemnity option or HMO #2 or to cancel accident or health coverage.

(iii) The change in work location has no effect on *A*'s eligibility under R's health FSA, so no change in *A's* health FSA is authorized under this paragraph (c).

Example 5. (i) Employer *S* maintains a calendar year cafeteria plan that allows employees to elect coverage under an accident or health plan providing indemnity coverage and coverage under a health FSA. Prior to the beginning of the calendar year, Employee *B* elects employee-only indemnity coverage, and elects salary reduction contributions of $600 during the year to fund coverage under the health FSA for up to $600 of reimbursements for the year. Employee *B*'s spouse, *C*, has employee-only coverage under an accident or health plan maintained by *C*'s employer. During the year, *C* terminates employment and loses coverage under that plan. *B* now wants to elect family coverage under *S*'s accident or health plan and increase *B*'s FSA election.

(ii) *C*'s termination of employment is a change in status under paragraph (c)(2)(iii) of this section, and the election change satisfies the consistency rule of paragraph (c)(3) of this section. Therefore, the cafeteria plan may permit *B* to elect family coverage under *S*'s accident or health plan and to increase *B*'s FSA coverage.

Example 6. (i) Employer *T* provides group-term life insurance coverage as described under section 79. Under *T*'s plan, an employee may elect life insurance coverage in an amount up to $50,000. *T* also maintains a calendar year cafeteria plan under which qualified benefits, including the group-term life insurance coverage, are funded through salary reduction. Employee *D* has a spouse and a child. Before the beginning of the year, *D* elects $10,000 of group-term life insurance coverage. During the year, *D* is divorced.

(ii) The divorce is a change in status under paragraph (c)(2)(i) of this section. Under paragraph (c)(3)(iii) of this section, either an increase or a decrease in coverage is consistent with this change in status. Thus, *T*'s cafeteria plan may permit *D* to increase or to decrease *D*'s group-term life insurance coverage.

Example 7. (i) Employee *E* is married to F and they have one child, *G*. Employee *E*'s employer, *U*, maintains a cafeteria plan under which employees may elect no coverage, employee-only coverage, or family coverage under a group health plan maintained by *U*, and may make a separate vision coverage election under the plan. Before the beginning of the calendar year, *E* elects family health coverage and no vision coverage under *U*'s cafeteria plan. Employee *F*'s employer, *V*, maintains a cafeteria plan under which employees may elect no coverage, employee-only coverage, or family coverage under a group health plan maintained by *V*, and may make a separate vision coverage election under the plan. Before the beginning of the calendar year, *F* elects no health coverage and employee-only vision coverage under *V*'s plan. During the year, *F* terminates employment with *V* and loses vision coverage under *V*'s plan. Employee *E* now wants to elect family vision coverage under *U*'s group health plan.

(ii) *F*'s termination of employment is a change in status under paragraph (c)(2)(iii) of this section, and the election change satisfies the consistency rule of paragraph (c)(3) of this section. Therefore, *U*'s cafeteria plan may permit *E* to elect family vision coverage (covering *E* and *G* as well as *F*) under *U*'s group health plan.

Example 8. (i) Before the beginning of the year, Employee *H* elects to participate in a cafeteria plan maintained by *H*'s employer, *W*. However, in order to change the election during the year so as to cancel coverage, and by prior understanding with *W*, *H* terminates employment and resumes employment one week later.

(ii) In this *Example 8*, under the facts and circumstances, a principal purpose of the termination of employment was to alter the election, and reinstatement of employment was understood at the time of termination. Accordingly, *H* does not have a change in status under paragraph (c)(2)(iii) of this section.

(iii) However, *H*'s termination of employment would constitute a change in status, permitting a cancellation of coverage during the period of unemployment, if *H*'s original cafeteria plan election for the period of coverage was reinstated upon resumption of employment (for example, if *W*'s cafeteria plan contains a provision requiring an employee who resumes employment within 30 days, without any other intervening event that would permit a change in election, to return to the election in effect prior to termination of employment).

(iv) If, instead, *H* terminates employment and cancels coverage during a period of unemployment, and then returns to work more than 30 days following termination of employment, the cafeteria plan may permit *H* the option of returning to the election in effect prior to termination of employment or making a new election under the plan. Alternatively, the cafeteria plan may prohibit *H* from returning to the plan during that plan year.

Example 9. (i) Employee *A* has one child, *B*. Employee *A*'s employer, *X*, maintains a calendar year cafeteria plan that allows employees to elect coverage under a dependent care FSA. Prior to the beginning of the calendar year, *A* elects salary reduction contributions of $4,000 during the year to fund coverage under the dependent care FSA for up to $4,000 of reimbursements for the year. During the year, *B* reaches the age of 13, and *A* wants to cancel coverage under the dependent care FSA.

(ii) When *B* turns 13, *B* ceases to satisfy the definition of qualifying individual under section 21(b)(1) of the Internal Revenue Code. Accordingly, *B*'s attainment of age 13 is a change in status under paragraph (c)(2)(iv) of this section that affects *A*'s employment-related expenses as defined in section 21(b)(2). Therefore, *A* may make a corresponding change under *X*'s cafeteria plan to cancel coverage under the dependent care FSA.

Example 10. (i) Employer *Y* maintains a calendar year cafeteria plan under which full-time employees may elect coverage under either an indemnity option or an HMO. Employee *C* elects the employee-only indemnity option. During the year, *C* marries *D*. *D* has two children from a previous marriage, and has family group health coverage in a cafeteria plan sponsored by *D*'s employer, *Z*. *C* wishes to change from employee-only indemnity coverage to HMO coverage for the family. *D* wishes to cease coverage in *Z*'s group health plan and certifies to *Z* that *D* will have family coverage under *C*'s plan (and *Z* has no reason to believe the certification is incorrect).

(ii) The marriage is a change in status under paragraph (c)(2)(i) of this section. Under the consistency rule in paragraph (c)(3) of this section, *Y*'s cafeteria plan may permit *C* to change his or her salary reduction contributions to reflect the change from employee-only indemnity to HMO family coverage, and *Z* may permit *D* to revoke coverage under *Z*'s cafeteria plan.

(d) *Judgment, decree, or order*—(1) *Conforming election change.* This paragraph (d) applies to a judgment, decree, or order (order) resulting from a divorce, legal separation, annulment, or change in legal custody (including a qualified medical child support order as defined in section 609 of the Employee Retirement Income Security Act of 1974 (Public Law 93–406 (88 Stat. 829))) that requires accident or health coverage for an employee's child or for a foster child who is a dependent of the employee. A cafeteria plan will not fail to satisfy section 125 if it—

(i) Changes the employee's election to provide coverage for the child if the order requires coverage for the child under the employee's plan; or

(ii) Permits the employee to make an election change to cancel coverage for the child if:

(A) The order requires the spouse, former spouse, or other individual to provide coverage for the child; and

(B) That coverage is, in fact, provided.

(2) *Example.* The following example illustrates the application of this paragraph (d):

Example. (i) Employer *M* maintains a calendar year cafeteria plan that allows employees to elect no health coverage, employee-only coverage, employee-plus-one-dependent coverage, or family coverage. *M*'s employee, *A*, is married to *B* and they have one child, *C*. Before the beginning of the year, *A* elects employee-only health coverage. Employee *A* divorces *B* during the year and, pursuant to *A*'s divorce agreement with *B*, *M*'s health plan receives a qualified medical child support order (as defined in section 609 of the Employee Retirement Income Security Act of 1974) during the plan year. The order requires *M*'s health plan to cover *C*.

(ii) Under this paragraph (d), *M*'s cafeteria plan may change *A*'s election from employee-only health coverage to employee-plus-one-dependent coverage in order to cover *C*.

(e) *Entitlement to Medicare or Medicaid.* If an employee, spouse, or dependent who is enrolled in an accident or health plan of the employer becomes entitled to coverage (*i.e.*, becomes enrolled) under Part A or Part B of title XVIII of the Social Security Act (Medicare) (Public Law 89–97 (79 Stat. 291)) or title XIX of the Social Security Act (Medicaid) (Public Law 89–97 (79 Stat. 343)), other than coverage consisting solely of benefits under section 1928 of the Social Security Act (the program for distribution of pediatric vaccines), a cafeteria plan may permit the employee to make a prospective election change to cancel or reduce coverage of that employee, spouse, or dependent under the accident or health plan. In addition, if an employee, spouse, or dependent who has been entitled to such coverage under Medicare or Medicaid loses eligibility for such coverage, the cafeteria plan may permit the employee to make a prospective election to commence or increase coverage of that employee, spouse, or dependent under the accident or health plan.

(f) *Significant cost or coverage changes*—(1) *In general.* Paragraphs (f)(2) through (5) of this section set forth rules for election changes as a result of changes in cost or coverage. This paragraph (f) does not apply to an election change with respect to a health FSA (or on account of a change in cost or coverage under a health FSA).

(2) *Cost changes*—(i) *Automatic changes.* If the cost of a qualified benefits plan increases (or decreases) during a period of coverage and, under the terms of the plan, employees are required to make a corresponding change in their payments, the cafeteria plan may, on a reasonable and consistent basis, automatically make a prospective increase (or decrease) in affected employees' elective contributions for the plan.

(ii) *Significant cost changes.* If the cost charged to an employee for a benefit package option (as defined in paragraph (i)(2) of this section) significantly increases or significantly decreases during a period of coverage, the cafeteria plan may permit the employee to make a corresponding change in election under the cafeteria plan. Changes that may be made include commencing participation in the cafeteria plan for the option with a decrease in cost, or, in the case of an increase in cost, revoking an election for that coverage and, in lieu thereof, either receiving on a prospective basis coverage under another benefit package option providing similar coverage or dropping coverage if no other benefit package option providing similar coverage is available. For example, if the cost of an indemnity option under an accident or health plan significantly increases during a period of coverage, employees who are covered by the indemnity option may make a corresponding prospective increase in their payments or may instead elect to revoke their election for the indemnity option and, in lieu thereof, elect coverage under another benefit package option including an HMO option (or drop coverage under the accident or health plan if no other benefit package option is offered).

(iii) *Application of cost changes.* For purposes of paragraphs (f)(2)(i) and (ii) of this section, a cost increase or decrease refers to an increase or decrease in the amount of the elective contributions under the cafeteria plan, whether that increase or decrease results from an action taken by the employee (such as switching between full-time and part-time status) or from an action taken by an employer (such as reducing the amount of employer contributions for a class of employees).

(iv) *Application to dependent care.* This paragraph (f)(2) applies in the case of a dependent care assistance plan only if the cost change is imposed by a dependent care provider who is not a relative of the employee. For this purpose, a relative is an individual who is related as described in section 152(a)(1) through (8), incorporating the rules of section 152(b)(1) and (2).

(3) *Coverage changes*—(i) *Significant curtailment without loss of coverage.* If an employee (or an employee's spouse or dependent) has a significant curtailment of coverage under a plan during a period of coverage that is not a loss of coverage as described in paragraph (f)(3)(ii) of this section (for example, there is a significant increase in the deductible, the copay, or the out-of-pocket cost sharing limit under an accident or health plan), the cafeteria plan may permit any employee who had been participating in the plan and receiving that coverage to revoke his or her election for that coverage and, in lieu thereof, to elect to receive on a prospective basis coverage under another benefit package option providing similar coverage. Coverage under a plan is significantly curtailed only if there is an overall reduction in coverage provided under the plan so as to constitute reduced coverage generally. Thus, in most cases, the loss of one particular physician in a network does not constitute a significant curtailment.

(ii) *Significant curtailment with loss of coverage.* If an employee (or the employee's spouse or dependent) has a significant curtailment that is a loss of coverage, the plan may permit that employee to revoke his or her election under the cafeteria plan and, in lieu thereof, to elect either to receive on a prospective basis coverage under another benefit package option providing similar coverage or to drop coverage if no similar benefit package option is available. For purposes of this paragraph (f)(3)(ii), a loss of coverage means a complete loss of coverage under the benefit package option or other coverage option (including the elimination of a benefits package option, an HMO ceasing to be available in the area where the individual resides, or the individual losing all coverage under the option by reason of an overall lifetime or annual limitation). In addition, the cafeteria plan may, in its discretion, treat the following as a loss of coverage—

(A) A substantial decrease in the medical care providers available under the option (such as a major hospital ceasing to be a member of a preferred provider network or a substantial decrease in the physicians participating in a preferred provider network or an HMO);

(B) A reduction in the benefits for a specific type of medical condition or treatment with respect to which the employee or the employee's spouse or dependent is currently in a course of treatment; or

(C) Any other similar fundamental loss of coverage.

(iii) *Addition or improvement of a benefit package option.* If a plan adds a new benefit package option or other coverage option, or if coverage under an existing benefit package option or other coverage option is significantly improved during a period of coverage, the cafeteria plan may permit eligible employees (whether or not they have previously made an election under the cafeteria plan or have previously elected the benefit package option) to revoke their election under the cafeteria plan and, in lieu thereof, to make an election on a prospective basis for coverage under the new or improved benefit package option.

(4) *Change in coverage under another employer plan.* A cafeteria plan may permit an employee to make a prospective election change that is on account of and corresponds with a change made under another employer plan (including a plan of the same employer or of another employer) if—

(i) The other cafeteria plan or qualified benefits plan permits participants to make an election change that would be permitted under paragraphs (b) through (g) of this section (disregarding this paragraph (f)(4)); or

(ii) The cafeteria plan permits participants to make an election for a period of coverage that is different from the period of coverage under the other cafeteria plan or qualified benefits plan.

(5) *Loss of coverage under other group health coverage.* A cafeteria plan may permit an employee to make an election on a prospective basis to add coverage under a cafeteria plan for the employee, spouse, or dependent if the employee, spouse, or dependent loses coverage under any group health coverage sponsored by a governmental or educational institution, including the following—

(i) A State's children's health insurance program (SCHIP) under title XXI of the Social Security Act;

(ii) A medical care program of an Indian Tribal government (as defined in section 7701(a)(40)), the Indian Health Service, or a tribal organization;

(iii) A State health benefits risk pool; or

(iv) A Foreign government group health plan.

(6) *Examples.* The following examples illustrate the application of this paragraph (f):

Example 1. (i) A calendar year cafeteria plan is maintained pursuant to a collective bargaining agreement for the benefit of Employer *M*'s employees. The cafeteria plan offers various benefits, including indemnity health insurance and a health FSA. As a result of mid-year negotiations, premiums for the indemnity health insurance are reduced in the middle of the year, insurance co-payments for office visits are reduced under the indemnity plan by an amount which constitutes a significant benefit improvement, and an HMO option is added.

(ii) Under these facts, the reduction in health insurance premiums is a reduction in cost. Accordingly, under paragraph (f)(2)(i) of this section, the cafeteria plan may automatically decrease the amount of salary reduction contributions of affected participants by an amount that corresponds to the premium change. However, the plan may not permit employees to change their health FSA elections to reflect the mid-year change in copayments under the indemnity plan.

(iii) Also, the decrease in co-payments is a significant benefit improvement and the addition of the HMO option is an addition of a benefit package option. Accordingly, under paragraph (f)(3)(ii) of this section, the cafeteria plan may permit eligible employees to make an election change to elect the indemnity plan or the new HMO option. However, the plan may not permit employees to change their health FSA elections to reflect differences in co-payments under the HMO option.

Example 2. (i) Employer *N* sponsors an accident or health plan under which employees may elect either employee-only coverage or family health coverage. The 12-month period of coverage under *N*'s cafeteria plan begins January 1, 2001. *N*'s employee, *A*, is married to *B*. Employee *A* elects employee-only coverage under *N*'s plan. *B*'s employer, *O*, offers health coverage to *O*'s employees under its accident or health plan under which employees may elect either employee-only coverage or family coverage. *O*'s plan has a 12-month period of coverage beginning September 1, 2001. *B* maintains individual coverage under *O*'s plan at the time *A* elects coverage under *N*'s plan, and wants to elect no coverage for the plan year beginning on September 1, 2001, which is the next period of coverage under *O*'s accident or health plan. *A* certifies to *N* that *B* will elect no coverage under *O*'s accident or health plan for the plan year beginning on September 1, 2001 and *N* has no reason to believe that *A*'s certification is incorrect.

(ii) Under paragraph (f)(4)(ii) of this section, *N*'s cafeteria plan may permit *A* to change *A*'s election prospectively to family coverage under that plan effective September 1, 2001.

Example 3. (i) Employer *P* sponsors a calendar year cafeteria plan under which employees may elect either employee-only or family health coverage. Before the beginning of the year, *P*'s employee, *C*, elects family coverage under *P*'s cafeteria plan. *C* also elects coverage under the health FSA for up to $200 of reimbursements for the year to be funded by salary reduction contributions of $200 during the year. *C* is married to *D*, who is employed by Employer *Q*. *Q* does not maintain a cafeteria plan, but does maintain an accident or health plan providing its employees with employee-only coverage. During the calendar year, *Q* adds family coverage as an option under its health plan. *D* elects family coverage under *Q*'s plan, and *C* wants to revoke *C*'s election for health coverage and elect no health coverage under *P*'s cafeteria plan for the remainder of the year.

(ii) *Q*'s addition of family coverage as an option under its health plan constitutes a new coverage option described in paragraph (f)(3)(ii) of this section. Accordingly, pursuant to paragraph (f)(4)(i) of this section, *P*'s cafeteria plan may permit *C* to revoke *C*'s health coverage election if *D* actually elects family health coverage under *Q*'s accident or health plan. Employer *P*'s plan may not permit *C* to change *C*'s health FSA election.

Example 4. (i) Employer *R* maintains a cafeteria plan under which employees may elect accident or health coverage under either an indemnity plan or an HMO. Before the beginning of the year, *R*'s employee, *E* elects coverage under the HMO at a premium cost of $100 per month. During the year, *E* decides to switch to the indemnity plan, which charges a premium of $140 per month.

(ii) *E*'s change from the HMO to indemnity plan is not a change in cost or coverage under this paragraph (f), and none of the other election change rules under paragraphs (b) through (e) of this section apply.

(iii) Although *R*'s health plan may permit *E* to make the change from the HMO to the indemnity plan, *R*'s cafeteria plan may not permit *E* to make an election change to reflect the increased premium. Accordingly, if *E* switches from the HMO to the indemnity plan, *E* may pay the $40 per month additional cost on an after-tax basis.

Example 5. (i) Employee *A* is married to Employee *B* and they have one child, *C*. Employee *A*'s employer, *M*, maintains a calendar year cafeteria plan that allows employees to elect coverage under a dependent care FSA. Child *C* attends *X*'s on site child care center at an annual cost of $3,000. Prior to the beginning of the year, *A* elects salary reduction contributions of $3,000 during the year to fund coverage under the dependent care FSA for up to $3,000 of reimbursements for the year. Employee *A* now wants to revoke *A*'s election of coverage under the dependent care FSA, because *A* has found a new child care provider.

(ii) The availability of dependent care services from the new child care provider (whether the new provider is a household employee or family member of *A* or *B* or a person who is independent of *A* and *B*) is a significant change in coverage similar to a benefit package option becoming available. Because the FSA is a dependent care FSA rather than a health FSA, the coverage rules of this section apply and *M*'s cafeteria plan may permit *A* to elect to revoke *A*'s previous election of coverage under the dependent care FSA, and make a corresponding new election to reflect the cost of the new child care provider.

Example 6. (i) Employee *D* is married to Employee *E* and they have one child, *F*. Employee *D*'s employer, *N*, maintains a calendar year cafeteria plan that allows employees to elect coverage under a dependent care FSA. Child *F* is cared for by *Y*, *D*'s household employee, who provides child care services five days a week from 9 a.m. to 6 p.m. at an annual cost in excess of $5,000. Prior to the beginning of the year, *D* elects salary reduction contributions of $5,000 during the year to fund coverage under the dependent care FSA for up to $5,000 of reimbursements for the year. During the year, *F* begins school and, as a result, *Y*'s regular hours of work are changed to five days a week from 3 p.m. to 6 p.m. Employee *D* now wants to revoke *D*'s election under the dependent care FSA, and make a new election under the dependent care FSA to an annual cost of $4,000 to reflect a reduced cost of child care due to *Y*'s reduced hours.

(ii) The change in the number of hours of work performed by *Y* is a change in coverage. Thus, *N*'s cafeteria plan may permit *D* to reduce *D*'s previous election under the dependent care FSA to $4,000.

Example 7. (i) Employee *G* is married to Employee *H* and they have one child, *J*. Employee *G*'s employer, *O*, maintains a calendar year cafeteria plan that allows employees to elect coverage under a dependent care FSA. Child *J* is cared for by *Z*, *G*'s household employee, who is not a relative of *G* and who provides child care services at an annual cost of $4,000. Prior to the beginning of the year, *G* elects salary reduction contributions of $4,000 during the year to fund coverage under the dependent care FSA for up to $4,000 of reimbursements for the year. During the year, *G* raises *Z*'s salary. Employee *G* now wants to revoke *G*'s election under the dependent care FSA, and make a new election under the dependent care FSA to an annual amount of $4,500 to reflect the raise.

(ii) The raise in *Z*'s salary is a significant increase in cost under paragraph (f)(2)(ii) of this section, and an increase in election to reflect the raise corresponds with that change in status. Thus, *O*'s cafeteria plan may permit *G* to elect to increase *G*'s election under the dependent care FSA.

Example 8. (i) Employer *P* maintains a calendar year cafeteria plan that allows employees to elect employee-only, employee plus one dependent, or family coverage under an indemnity plan. During the middle of the year, Employer *P* gives its employees the option to select employee-only or family coverage from an HMO plan. *P*'s employee, *J*, who had elected employee plus one dependent coverage under the indemnity plan, decides to switch to family coverage under the HMO plan.

(ii) Employer *P*'s midyear addition of the HMO option is an addition of a benefit package option. Under paragraph (f) of this section, Employee *J* may change his or her salary reduction contributions to reflect the change from indemnity to HMO coverage, and also to reflect the change from employee plus one dependent to family coverage (however, an election of employee-only coverage under the new option would not correspond with the addition of a new option). Employer *P* may not permit *J* to change *J*'s health FSA election.

(g) *Special requirements relating to the Family and Medical Leave Act.* An employee taking leave under the Family and Medical Leave Act (FMLA) (Public Law 103–3 (107 Stat. 6)) may revoke an existing election of accident or health plan coverage and make such other election for the remaining portion of the period of coverage as may be provided for under the FMLA. See §1.125–3 for additional rules.

(h) *Elective contributions under a qualified cash or deferred arrangement.* The provisions of this section do not apply with respect to elective contributions under a qualified cash or deferred arrangement (within the meaning of section 401(k)) or employee contributions subject to section 401(m). Thus, a cafeteria plan may permit an employee to modify or revoke elections in accordance with section 401(k) and (m) and the regulations thereunder.

(i) *Definitions.* Unless otherwise provided, the definitions in paragraphs (i)(1) though (8) of this section apply for purposes of this section.

(1) *Accident or health coverage.* Accident or health coverage means coverage under an accident or health plan as defined in regulations under section 105.

(2) *Benefit package option.* A benefit package option means a qualified benefit under section 125(f) that is offered under a cafeteria plan, or an option for coverage under an underlying accident or health plan (such as an indemnity option, an HMO option, or a PPO option under an accident or health plan).

(3) *Dependent.* A dependent means a dependent as defined in section 152, except that, for purposes of accident or health coverage, any child to whom section 152(e) applies is treated as a dependent of both parents, and, for purposes of dependent care assistance provided through a cafeteria plan, a dependent means a qualifying individual (as defined in section 21(b)(1)) with respect to the employee.

(4) *Disability coverage*. Disability coverage means coverage under an accident or health plan that provides benefits due to personal injury or sickness, but does not reimburse expenses incurred for medical care (as defined in section 213(d)) of the employee or the employee's spouse and dependents. For purposes of this section, disability coverage includes payments described in section 105(c).

(5) *Family member plan*. A family member plan means a cafeteria plan or qualified benefit plan sponsored by the employer of the employee's spouse or the employee's dependent.

(6) *FSA, health FSA*. An FSA means a qualified benefits plan that is a flexible spending arrangement as defined in section 106(c)(2) . A health FSA means a health or accident plan that is an FSA.

(7) *Placement for adoption*. Placement for adoption means placement for adoption as defined in regulations under section 9801.

(8) *Qualified benefits plan*. A qualified benefits plan means an employee benefit plan governing the provision of one or more benefits that are qualified benefits under section 125(f). A plan does not fail to be a qualified benefits plan merely because it includes an FSA, assuming that the FSA meets the requirements of section 125 and the regulations thereunder.

(9) *Similar coverage*. Coverage for the same category of benefits for the same individuals (e.g., family to family or single to single). For example, two plans that provide coverage for major medical are considered to be similar coverage. For purposes of this definition, a health FSA is not similar coverage with respect to an accident or health plan that is not a health FSA. A plan may treat coverage by another employer, such as a spouse's or dependent's employer, as similar coverage.

(j) *Effective date*—(1) *General rule*. Except as provided in paragraph (j)(2) of this section, this section is applicable for cafeteria plan years beginning on or after January 1, 2001.

(2) *Delayed effective date for certain provisions*. The following provisions are applicable for cafeteria plan years beginning on or after January 1, 2002: paragraph (c) of this section to the extent applicable to qualified benefits other than an accident or health plan or a group-term life insurance plan; paragraph (d)(1)(ii)(B) of this section (relating to a spouse, former spouse, or other individual obtaining accident or health coverage for an employee's child in response to a judgment, decree, or order); paragraph (f) of this section (rules for election changes as a result of cost or coverage changes); and paragraph (i)(9) of this section (defining similar coverage).

[T.D. 8878, 65 FR 15550, Mar. 23, 2000, as amended by T.D. 8921, 66 FR 1840, Jan. 10, 2001; 66 FR 13013, Mar. 2, 2001; T.D. 8966, 66 FR 52680, Oct. 17, 2001]

§ 1.125–4T Permitted election changes (temporary).

(a) *Election changes*. A cafeteria plan may permit an employee to revoke an election during a period of coverage and to make a new election only as provided in paragraphs (b) through (i) of this section. See paragraph (j) of this section for special provisions relating to qualified cash or deferred arrangements.

(b) *Special enrollment rights*. A cafeteria plan may permit an employee to revoke an election for accident or health coverage during a period of coverage and make a new election that corresponds with the special enrollment rights provided in section 9801(f), whether or not the change in election is permitted under paragraph (c) of this section.

(c) *Changes in status for accident or health coverage and group-term life*—(1) *In general*. A cafeteria plan may permit an employee to revoke an election for accident or health coverage or group-term life insurance coverage during a period of coverage and make a new election for the remaining portion of the period if, under the facts and circumstances—

(i) A change in status occurs; and

(ii) The election change satisfies the consistency requirement in paragraph (c)(3) of this section (consistency rule for accident or health coverage) or (c)(4) of this section (consistency rule for group-term life insurance coverage).

(2) *Change in status events.* The following events are changes in status for purposes of this paragraph (c):

(i) *Legal marital status.* Events that change an employee's legal marital status, including marriage, death of spouse, divorce, legal separation, or annulment;

(ii) *Number of dependents.* Events that change an employee's number of dependents (as defined in section 152), including birth, adoption, placement for adoption (as defined in regulations under section 9801), or death of a dependent;

(iii) *Employment status.* A termination or commencement of employment by the employee, spouse, or dependent;

(iv) *Work schedule.* A reduction or increase in hours of employment by the employee, spouse, or dependent, including a switch between part-time and full-time, a strike or lockout, or commencement or return from an unpaid leave of absence;

(v) *Dependent satisfies or ceases to satisfy the requirements for unmarried dependents.* An event that causes an employee's dependent to satisfy or cease to satisfy the requirements for coverage due to attainment of age, student status, or any similar circumstance as provided in the accident or health plan under which the employee receives coverage; and

(vi) *Residence or Worksite.* A change in the place of residence or work of the employee, spouse, or dependent.

(3) *Consistency rule for accident or health coverage.* (i) *General rule.* (A) An employee's revocation of a cafeteria plan election during a period of coverage and new election for the remaining portion of the period (referred to below as an ''election change'') is consistent with a change in status if, and only if—

(*1*) The change in status results in the employee, spouse, or dependent gaining or losing eligibility for accident or health coverage under either the cafeteria plan or an accident or health plan of the spouse's or dependent's employer; and

(*2*) The election change corresponds with that gain or loss of coverage.

(B) A change in status results in an employee, spouse, or dependent gaining (or losing) eligibility for coverage under a plan only if the individual becomes eligible (or ineligible) to participate in the plan. A cafeteria plan may treat an individual as gaining (or losing) eligibility for coverage if the individual becomes eligible (or ineligible) for a particular benefit package option under a plan (e.g., a change in status results in an individual becoming eligible for a managed care option or an indemnity option). If, as a result of a change in status, the individual gains eligibility for elective coverage under a plan of the spouse's or dependent's employer, the consistency rule of this paragraph (c)(3)(i) is satisfied only if the individual elects the coverage under the spouse's or dependent's employer. See the *Examples* in paragraph (k) of this section for illustrations of the consistency rule.

(ii) *Exception for COBRA.* Notwithstanding paragraph (c)(3)(i) of this section, if the employee, spouse, or dependent becomes eligible for continuation coverage under the employer's group health plan as provided in section 4980B or any similar State law, the employee may elect to increase payments under the employer's cafeteria plan in order to pay for the continuation coverage.

(4) *Consistency rule for group-term life insurance coverage.* Except as provided in this paragraph (c)(4), the provisions of paragraph (c)(3)(i) of this section apply to group-term life insurance coverage. In the case of marriage, birth, adoption, or placement for adoption, a cafeteria plan can allow an election change to increase (but not to reduce) the amount of the employee's life insurance coverage. In the case of divorce, legal separation, annulment, or death of a spouse or dependent, a cafeteria plan may allow an election change to reduce (but not to increase) the amount of the employee's life insurance coverage.

(d) *Judgment, decree, or order.* This paragraph (d) applies to a judgment, decree, or order (''order'') resulting from a divorce, legal separation, annulment, or change in legal custody (including a qualified medical child support order defined in section 609 of the Employee Retirement Income Security Act of 1974) that requires accident or health coverage for an employee's child. Notwithstanding the provisions of paragraph (c) of this section, a cafeteria plan may—

(1) Change the employee's election to provide coverage for the child if the order requires coverage under the employee's plan; or

(2) Permit the employee to make an election change to cancel coverage for the child if the order requires the former spouse to provide coverage.

(e) *Entitlement to Medicare or Medicaid*. If an employee, spouse, or dependent who is enrolled in an accident or health plan of the employer becomes entitled to coverage (*i.e.*, enrolled) under Part A or Part B of title XVIII of the Social Security Act (Medicare) or title XIX of the Social Security Act (Medicaid), other than coverage consisting solely of benefits under section 1928 of the Social Security Act (the program for distribution of pediatric vaccines), a cafeteria plan may permit the employee to make an election change to cancel coverage of that employee, spouse or dependent under the accident or health plan.

(f) *Changes in status for other qualified benefits*. [Reserved]

(g) *Significant coverage or cost changes*. [Reserved]

(1) *Employer's plan*. [Reserved]

(2) *Plan of spouse's or dependent's employer*. [Reserved]

(h) *Cessation of required contributions*. [Reserved]

(i) *Special requirements concerning the Family and Medical Leave Act*. [Reserved]

(j) *Elective contributions under a qualified cash or deferred arrangement*. The provisions of this section do not apply with respect to elective contributions under a qualified cash or deferred arrangement (within the meaning of section 401(k)) or employee contributions subject to section 401(m). Thus, a cafeteria plan may permit an employee to modify or revoke elections in accordance with sections 401(k) and 401(m) and the regulations thereunder.

(k) *Examples*. The following examples illustrate the rules of this section. In each case involving an accident or health plan, assume that the plan is subject to section 9801(f) (providing for special enrollment rights under certain group health plans).

Example 1. (i) Employer M provides health coverage for its employees under which employees may elect either employee-only coverage or family coverage. M also maintains a calendar year cafeteria plan under which qualified benefits, including health coverage, are funded through salary reduction. M's employee, A, elects employee-only health coverage before the beginning of the calendar year. During the year, A adopts a child, C. Within 30 days thereafter, A wants to revoke A's election for employee-only health coverage and obtain family health coverage, as of the date of C's adoption. A satisfies the conditions for special enrollment of an employee with a new dependent under section 9801(f)(2), so that A may enroll in family coverage under M's accident or health plan in order to provide coverage for C, effective as of the date of C's adoption.

(ii) In this *Example 1*, M's cafeteria plan may permit A to change the employee's salary reduction election to family coverage for salary not yet currently available. The increased salary reduction could reflect the cost of family coverage from the date of adoption. (The adoption of C is also a change in status, and the election of family coverage is consistent with that change in status. Thus, under the change in status provisions of paragraph (c) of this section, M's cafeteria plan could permit A to elect family coverage prospectively in order to cover C for the remaining portion of the coverage period.)

Example 2. (i) The employer plans and permissible coverage are the same as in *Example 1*. Before the beginning of the calendar year, Employee A elects employee-only health coverage under M's cafeteria plan. A marries B during the plan year. B's employer, N, offers health coverage to N's employees, and, prior to the marriage, B had elected employee-only coverage. A wants to revoke the election for employee-only coverage, and is considering electing family health coverage under M's plan or obtaining family health coverage under N's plan.

(ii) In this *Example 2*, A's marriage to B is a change in status. Two possible election changes by A would be consistent with the change in status: to cover A and B by electing family health coverage under M's plan, or to cancel coverage under M's plan (with B electing family health coverage under N's plan in order to cover A and B). Thus, M's cafeteria plan may permit A to make either change in election. (M's cafeteria plan could also permit A to change A's salary reduction election to reflect the change to family coverage under M's group health plan in accordance with paragraph (b) of this section because the marriage would also create special enrollment rights under section 9801(f), pursuant to which an election of family coverage under M's plan would be required to be effective no later than the first day of the first calendar month beginning after the completed request for enrollment is received by the plan.)

Example 3. (i) Employee G, a single parent, elects family health coverage under a calendar year cafeteria plan maintained by Employer O. G and G's 21-year old child, H, are covered under O's health plan. During the year, H graduates from college. Under the terms of the health plan, dependents over the age of 19 must be full-time students to receive coverage. G wants to revoke G's election for family health coverage and obtain employee-only coverage under O's cafeteria plan.

(ii) In this *Example 3*, H's loss of eligibility for coverage under the terms of the health plan is a change in status. A revocation of G's election for family coverage and new election of employee-only coverage is consistent with the change in status. Thus, O's cafeteria plan may permit G to elect employee-only coverage.

Example 4. (i) Employee J is married to K and they have one child, S. A calendar year cafeteria plan maintained by Employer P allows employees to elect no health coverage, employee-only coverage, employee-plus-one-dependent coverage, or family coverage. Under the plan, before the beginning of the calendar year, J elects family health coverage for J, K, and S. J and K divorce during the year and, under the terms of P's accident or health plan, K loses eligibility for P's health coverage. S does not lose eligibility for health coverage under P's plan upon the divorce. J now wants to revoke J's election under the cafeteria plan and elect no coverage.

(ii) In this *Example 4*, the divorce is a change in status. A change in the cafeteria plan election to cancel health coverage for K is consistent with that change in status. However, the divorce does not affect J's or S's eligibility for health coverage. Therefore, an election change to cancel J's or S's health coverage is not consistent with the change in status. The cafeteria plan, however, may permit J to elect employee-plus-one-dependent health coverage.

Example 5. (i) The facts are the same as *Example 4*, except that, before the beginning of the year, Employee J elected employee-only health coverage (rather than family coverage). Pursuant to J's divorce agreement with K, P's health plan receives a qualified medical child support order (as defined in section 609 of the Employee Retirement Income Security Act) during the plan year. The order requires P's health plan to cover S.

(ii) In this *Example 5*, P's cafeteria plan may change J's election from employee-only health coverage to employee-plus-one-dependent coverage in order to cover S.

Example 6. (i) Before the beginning of the coverage period, Employee L elects to participate in a cafeteria plan maintained by L's Employer, Q. However, in order to change the election during the coverage period so as to cancel coverage, and by prior understanding with Q, L terminates employment and resumes employment one week later.

(ii) In this *Example 6*, under the facts and circumstances, in which a principal purpose of the termination of employment was to alter the election and reinstatement of employment was understood at the time of termination, L does not have a change in status. However, L's termination of employment would constitute a change in status, permitting a cancellation of coverage during the period of unemployment, if L's original cafeteria plan election was reinstated upon resumption of employment (for example, because of a cafeteria plan provision requiring an employee who resumes employment within 30 days, without any other intervening event that would permit a change in election, to return to the election in effect prior to termination of employment).

Example 7. (i) Employer R maintains a calendar year cafeteria plan under which full-time employees may elect coverage under one of three benefit package options provided under an accident or health plan: an indemnity option or either of two HMO options for employees that work in the respective service areas of the two HMOs. Employee T, who works in the service area of HMO #1, elects the HMO #1 option. During the year, T is transferred to another work location which is outside the HMO #1 service area and inside the HMO #2 service area.

(ii) In this *Example 7*, the transfer is a change in status and, under the consistency rule, the cafeteria plan may permit T to make an election change to either the indemnity option or HMO #2, or to cancel accident or health coverage.

Example 8. (i) A calendar year cafeteria plan maintained by Employer S allows employees to elect coverage under an accident or health plan providing indemnity coverage and under a flexible spending arrangement (FSA). Prior to the beginning of the calendar year, Employee U elects employee-only indemnity coverage, and coverage under the FSA for up to $600 of reimbursements for the year to be funded by salary reduction contributions of $600 during the year. U's spouse, V, has employee-only coverage under an accident or health plan maintained by V's employer. During the year, V terminates employment and loses coverage under that plan. U now wants to elect family coverage under S's accident or health plan and increase U's FSA election.

(ii) In this *Example 8*, V's termination of employment is a change in status. The cafeteria plan may permit U to elect family coverage under S's accident or health plan, and to increase U's FSA coverage.

Example 9. (i) Employer T provides group-term life insurance coverage as described under section 79. Under T's plan, an employee may elect life insurance coverage in an amount up to the lesser of his or her salary or $50,000. T also maintains a calendar year cafeteria plan under which qualified benefits, including the group-term life insurance coverage, are funded through salary reduction. Before the beginning of the calendar year, Employee W elects $10,000 of life insurance coverage, with W's spouse, X, as the beneficiary. During the year, a child is placed for adoption with W and X. W wants to increase W's election for life insurance coverage to $50,000 (without changing the designation of X as the beneficiary).

(ii) In this *Example 9,* the placement of a child for adoption with W is a change in status. The increase in coverage is consistent with the change in status. Thus, W's cafeteria plan may permit W to increase W's life insurance coverage.

(1) *Effective date.* This section is applicable for plan years beginning after December 31, 1998, and on or before November 6, 2000.

[T.D. 8738, 62 FR 60166, Nov. 7, 1997; 63 FR 8528, Feb. 19, 1998; T.D. 8878, 65 FR 15553, Mar. 23, 2000]

§ 1.127–1 Amounts received under a qualified educational assistance program.

(a) *Exclusion from gross income.* The gross income of an employee does not include—

(1) Amounts paid to, or on behalf of the employee under a qualified educational assistance program described in § 1.127–2, or

(2) The value of education provided to the employee under such a program.

(b) *Disallowance of excluded amounts as credit or deduction.* Any amount excluded from the gross income of an employee under paragraph (a) of this section shall not be allowed as a credit or deduction to such employee under any other provision of this part.

(c) *Amounts received under a non-qualified program.* Any amount received under an educational assistance program that is not a ''qualified program'' described in § 1.127–2 will not be excluded from gross income under paragraph (a) of this section. All or part of the amounts received under such a nonqualified program may, however, be excluded under section 117 or deducted under section 162 or section 212 (as the case may be), if the requirements of such section are satisfied.

(d) *Definitions.* For rules relating to the meaning of the terms ''employee'' and ''employer'', see paragraph (h) of § 1.127–2.

(e) *Effective date.* This section is effective for taxable years of the employee beginning after December 31, 1978, and before January 1, 1984.

[T.D. 7898, 48 FR 31017, July 6, 1983]

§ 1.127–2 Qualified educational assistance program.

(a) *In general.* A qualified educational assistance program is a plan established and maintained by an employer under which the employer provides educational assistance to employees. To be a qualified program, the requirements described in paragraphs (b) through (g) of this section must be satisfied. It is not required that a program be funded or that the employer apply to the Internal Revenue Service for a determination that the plan is a qualified program. However, under § 601.201 (relating to rulings and determination letters), an employer may request that the Service determine whether a plan is a qualified program.

(b) *Separate written plan.* The program must be a separate written plan of the employer. This requirement means that the terms of the program must be set forth in a separate document or documents providing only educational assistance within the meaning of paragraph (c) of this section. The requirement for a separate plan does not, however, preclude an educational assistance program from being part of a more comprehensive employer plan that provides a choice of nontaxable benefits to employees.

(c) *Educational assistance*—(1) *In general.* The benefits provided under the program must consist solely of educational assistance. The term ''educational assistance'' means—

(i) The employer's payment of expenses incurred by or on behalf of an employee for education, or

(ii) The employer's provision of education to an employee.

(2) *Alternative benefits.* Benefits will not be considered to consist solely of educational assistance if the program, in form or in actual operation, provides

employees with a choice between educational assistance and other remuneration includible in the employee's gross income.

(3) *Certain benefits not considered educational assistance.* The term ''educational assistance'' does not include the employer's payment for, or provision of—

(i) Tools or supplies (other than textbooks) that the employee may retain after completing a course of instruction,

(ii) Meals, lodging, or transportation, or

(iii) Education involving sports, games, or hobbies, unless such education involves the business of the employer or is required as part of a degree program. The phrase ''sports, games, or hobbies'' does not include education that instructs employees how to maintain and improve health so long as such education does not involve the use of athletic facilities or equipment and is not recreational in nature.

(4) *Education defined.* As used in section 127, §1.127–1, and this section, the term ''education'' includes any form of instruction or training that improves or develops the capabilities of an individual. Education paid for or provided under a qualified program may be furnished directly by the employer, either alone or in conjunction with other employers, or through a third party such as an educational institution. Education is not limited to courses that are job related or part of a degree program.

(d) *Exclusive benefit.* The program may benefit only the employees of the employer, including, at the employer's option, individuals who are employees within the meaning of paragraph (h)(1) of this section. A program that provides benefits to spouses or dependents of employees is not a qualified program within the meaning of this section.

(e) *Prohibited discrimination*—(1) *Eligibility for benefits.* The program must benefit the employer's employees generally. Among those benefited may be employees who are officers, shareholders, self-employed or highly compensated. A program is not for the benefit of employees generally, however, if the program discriminates in favor of employees described in the preceding sentence (or in favor of their spouses and dependents who are themselves employees) in requirements relating to eligibility for benefits. Thus, although a program need not provide benefits for all employees, it must benefit those employees who qualify under a classification of employees that does not discriminate in favor of the employees with respect to whom discrimination is prohibited. The classification of employees to be considered benefited will consist of that group of employees who are actually eligible for educational assistance under the program, taking into account the eligibility requirements set forth in the written plan, the eligibility requirements reflected in the types of educational assistance available under the program, and any other conditions that may affect the availability of benefits under the program. Thus, for example, if an employer's plan provides that all employees are eligible for educational assistance, yet limits that assistance to courses of study leading to postgraduate degrees in fields relating to the employer's business, then only those employees able to pursue such a course of study are considered actually eligible for educational assistance under the program. Whether any classification of employees discriminates in favor of employees with respect to whom discrimination is prohibited will generally be determined by applying the same standards as are applied under section 410(b)(1)(B) (relating to qualified pension, profit-sharing and stock bonus plans), without regard to section 401(a)(5). For purposes of making this determination, there shall be excluded from consideration employees not covered by the program who are included in a unit of employees covered by an agreement which the Secretary of Labor finds to be a collective bargaining agreement between employee representatives and one or more employers, if the Internal Revenue Service finds that educational assistance benefits were the subject of good faith bargaining between the employee representatives and the employer or employers. For purposes of determining whether such bargaining occurred, it is not material that the employees are not covered by another educational assistance program or that the employer's present program was not considered in the bargaining.

(2) *Factors not considered in determining the existence of prohibited discrimination.* A program shall not be considered discriminatory under this paragraph (e) merely because—

(i) Different types of educational assistance available under the program are utilized to a greater degree by employees with respect to whom discrimination is prohibited than by other employees, or

(ii) With respect to a course of study for which benefits are otherwise available, successful completion of the course, attaining a particular course grade, or satisfying a reasonable condition subsequent (such as remaining employed for one year after completing the course) are required or considered in determining the availability of benefits.

(f) *Benefit limitation*—(1) *In general.* Under section 127(b)(3), a program is a qualified program for a program year only if no more than 5% of the amounts paid or incurred by the employer for educational assistance benefits during the year are provided to the limitation class described in subparagraph (2). For purposes of this paragraph (f), the program year must be specified in the written plan as either the calendar year or the taxable year of the employer.

(2) *Limitation class.* The limitation class consists of—

(i) *Shareholders.* Individuals who, on any day of the program year, own more than 5% of the total number of shares of outstanding stock of the employer, or

(ii) *Owners.* In the case of an employer's trade or business which is not incorporated, individuals who, on any day of the program year, own more than 5% of the capital or profits interest in the employer, and

(iii) *Spouses or dependents.* Individuals who are spouses or dependents of shareholders or owners described in subdivision (i) or (ii). For purposes of determining stock ownership, the attribution rules described in paragraph (h)(4) of this section apply. The regulations prescribed under section 414(c) are applicable in determining an individual's interest in the capital or profits of an unincorporated trade or business.

(g) *Notification of employees.* A program is not a qualified program unless employees eligible to participate in the program are given reasonable notice of the terms and availability of the program.

(h) *Definitions.* For purposes of this section and § 1.127–1—

(1) *Employee.* The term ''employee'' includes—

(i) A retired, disabled or laid-off employee,

(ii) A present employee who is on leave, as, for example, in the Armed Forces of the United States, or

(iii) An individual who is self-employed within the meaning of section 401(c)(1).

(2) *Employer.* An individual who owns the entire interest in an unincorporated trade or business shall be treated as his or her own employer. A partnership is treated as the employer of each partner who is an employee within the meaning of section 401(c)(1).

(3) *Officer.* An officer is an individual who is an officer within the meaning of regulations prescribed under section 414(c).

(4) *Shareholder.* The term ''shareholder'' includes an individual who is a shareholder as determined by the attribution rules under section 1563 (d) and (e), without regard to section 1563(e)(3)(C).

(5) *Highly compensated.* The term ''highly compensated'' has the same meaning as it does for purposes of section 410(b)(1)(B).

(i) *Substantiation.* An employee receiving payments under a qualified educational assistance program must be prepared to provide substantiation to the employer such that it is reasonable to believe that payments or reimbursements made under the program constitute educational assistance within the meaning of paragraph (c) of this section.

[T.D. 7898, 48 FR 31017, July 6, 1983]

§ 1.132–0 Outline of regulations under section 132.

The following is an outline of regulations in this section relating to exclusions from gross income for certain fringe benefits:

§ 1.132–0 Outline of regulations under section 132.

§ 1.132–1 Exclusion from gross income for certain fringe benefits.

§ 1.132–1 (a) In general.
§ 1.132–1 (b) Definition of employee.
(1) No-additional-cost services and qualified employee discounts.
(2) Working condition fringes.
(3) On-premises athletic facilities.
(4) De minimis fringes.
(5) Dependent child.
§ 1.132–1 (c) Special rules for employers—Effect of section 414.
§ 1.132–1 (d) Customers not to include employees.
§ 1.132–1 (e) Treatment of on-premises athletic facilities.
(1) In general.
(2) Premises of the employer.
(3) Application of rules to membership in an athletic facility.
(4) Operation by the employer.
(5) Nonapplicability of nondiscrimination rules.
§ 1.132–1 (f) Nonapplicability of section 132 in certain cases.
(1) Tax treatment provided for in another section.
(2) Limited statutory exclusions.
§ 1.132–1 (g) Effective date.
§ 1.132–2 No-additional-cost services.
§ 1.132–2 (a) In general.
(1) Definition.
(2) Excess capacity services.
(3) Cash rebates.
(4) Applicability of nondiscrimination rules.
(5) No substantial additional cost.
(6) Payments for telephone service.
§ 1.132–2 (b) Reciprocal agreements.
§ 1.132–2 (c) Example.
§ 1.132–3 Qualified employee discounts.
§ 1.132–3 (a) In general.
(1) Definition.
(2) Qualified property or services.
(3) No reciprocal agreement exception.
(4) Property of services provided without charge, at a reduced price, or by rebates.
(5) Property or services provided directly by the employer or indirectly through a third party.
(6) Applicability of nondiscrimination rules.
§ 1.132–3 (b) Employee discount.
(1) Definition.
(2) Price to customers.
(3) Damaged, distressed, or returned goods.
§ 1.132–3 (c) Gross profit percentage.
(1) In general.
(2) Line of business.
(3) Generally accepted accounting principles.
§ 1.132–3 (d) Treatment of leased sections of department stores.
(1) In general.
(2) Employees of the leased section.
§ 1.132–3 (e) Excess discounts.
§ 1.132–4 Line of business limitation.
§ 1.132–4 (a) In general.
(1) Applicability.
(2) Definition.
(3) Aggregation of two-digit classifications.
§ 1.132–4 (b) Grandfather rule for certain retail stores.
(1) In general.
(2) Taxable year of affiliated group.
(3) Definition of ''sales''.
(4) Retired and disabled employees.
(5) Increase of employee discount.
§ 1.132–4 (c) Grandfather rule for telephone service provided to pre-divestiture retirees.
§ 1.132–4 (d) Special rule for certain affiliates of commercial airlines.
(1) General rule.
(2) ''Airline affiliated group'' defined.
(3) ''Qualified affiliate'' defined.
§ 1.132–4 (e) Grandfather rule for affiliated groups operating airlines.
§ 1.132–4 (f) Special rule for qualified air transportation organizations.
§ 1.132–4 (g) Relaxation of line of business requirement.
§ 1.132–4 (h) Line of business requirement does not expand benefits eligible for exclusion.
§ 1.132–5 Working condition fringes.
§ 1.132–5 (a) In general.
(1) Definition.
(2) Trade or business of the employee.
§ 1.132–5 (b) Vehicle allocation rules.
(1) In general.
(2) Use of different employer-provided vehicles.
(3) Provision of a vehicle and chauffeur services.
§ 1.132–5 (c) Applicability of substantiation requirements of sections 162 and 274(d).
(1) In general.
(2) Section 274(d) requirements.
§ 1.132–5 (d) Safe harbor substantiation rules.
(1) In general.
(2) Period for use of safe harbor rules.
§ 1.132–5 (e) Safe harbor substantiation rule for vehicles not used for personal purposes.
§ 1.132–5 (f) Safe harbor substantiation rule for vehicles not available to employees for personal use other than commuting.
§ 1.132–5 (g) Safe harbor substantiation rule for vehicles used in connection with the business of farming that are available to employees for personal use.
(1) In general.

[T.D. 8256, 54 FR 28600, July 6, 1989, as amended by T.D. 8457, 57 FR 62196, Dec. 30, 1992]

§ 1.132–1 Exclusion from gross income for certain fringe benefits.

(a) *In general.* Gross income does not include any fringe benefit which qualifies as a—

(1) No-additional-cost service,

(2) Qualified employee discount,

(3) Working condition fringe, or

(4) De minimis fringe.

Special rules apply with respect to certain on-premises gyms and other athletic facilities (§ 1.132–1(e)), demonstration use of employer-provided automobiles by full-time automobile salesmen (§ 1.132–5(o)), parking provided to an employee on or near the business premises of the employer (§ 1.132–5(p)), and on-premises eating facilities (§ 1.132–7).

(b) *Definition of employee*—(1) *No-additional-cost services and qualified employee discounts.* For purposes of section 132(a)(1) (relating to no-additonal-cost services) and section 132(a)(2) (relating to qualified employee discounts), the term ''employee'' (with respect to a line of business of an employer means—

(i) Any individual who is currently employed by the employer in the line of business,

(ii) Any individual who was formerly employed by the employer in the line of business and who separated from service with the employer in the line of business by reason of retirement or disability, and

(iii) Any widow or widower of an individual who died while employed by the employer in the line of business or who separated from service with the employer in the line of business by reason of retirement or disability.

For purposes of this paragraph (b)(1), any partner who performs services for a partnership is considered employed by the partnership. In addition, any use by the spouse or dependent child (as defined in paragraph (b)(5) of this section) of the employee will be treated as use by the employee. For purposes of section 132(a)(1) (relating to no-additional-cost services), any use of air transportation by a parent of an employee (determined without regard to section 132(f)(1)(B) and paragraph (b)(1)(iii) of this section) will be treated as use by the employee.

(2) *Working condition fringes.* For purposes of section 132(a)(3) (relating to working condition fringes), the term ''employee'' means—

(i) Any individual who is currently employed by the employer,

(ii) Any partner who performs services for the partnership,

(iii) Any director of the employer, and

(iv) Any independent contractor who performs services for the employer.

Notwithstanding anything in this paragraph (b)(2) to the contrary, an independent contractor who performs services for the employer cannot exclude the value of parking or the use of consumer goods provided pursuant to a product testing program under § 1.132–5(n); in addition, any director of the employer cannot exclude the value of the use of consumer goods provided pursuant to a product testing program under § 1.132–5(n).

(3) *On-premises athletic facilities.* For purposes of section 132(h)(5) (relating to on-premises athletic facilities), the term ''employee'' means—

(i) Any individual who is currently employed by the employer,

(ii) Any individual who was formerly employed by the employer and who separated from service with the employer by reason of retirement or disability, and

(iii) Any widow or widower of an individual who died while employed by the employer or who separated from service with the employer by reason of retirement or disability.

For purposes of this paragraph (b)(3), any partner who performs services for a partnership is considered employed by the partnership. In addition, any use by the spouse or dependent child (as defined in paragraph (b)(5) of this section) of the employee will be treated as use by the employee.

(4) *De minimis fringes.* For purposes of section 132(a)(4) (relating to de minimis fringes), the term ''employee'' means any recipient of a fringe benefit.

(5) *Dependent child.* The term ''dependent child'' means any son, stepson, daughter, or stepdaughter of the employee who is a dependent of the employee, or both of whose parents are deceased and who has not attained age 25. Any child to whom section 152(e) applies will be treated as the dependent of both parents.

(c) *Special rules for employers—Effect of section 414.* All employees treated as employed by a single employer under section 414 (b), (c), (m), or (o) will be treated as employed by a single employer for purposes of this section. Thus, employees of one corporation that is part of a controlled group of corporations may under certain circumstances be eligible to receive section 132 benefits from the other corporations that comprise the controlled group. However, the aggregation of employers described in this paragraph (c) does not change the other requirements for an exclusion, such as the line of business requirement. Thus, for example, if a controlled group of corporations consists of two corporations that operate in different lines of business, the corporations are not treated as operating in the same line of business even though the corporations are treated as one employer.

(d) *Customers not to include employees.* For purposes of section 132 and the regulations thereunder, the term ''customer'' means any customer who is not an employee. However, the preceding sentence does not apply to section 132(c)(2) (relating to the gross profit percentage for determining a qualified employee discount). Thus, an employer that provides employee discounts cannot exclude sales made to employees in determining the aggregate sales to customers.

(e) *Treatment of on-premises athletic facilities*—(1) *In general.* Gross income does not include the value of any on-premises athletic facility provided by an employer to its employees. For purposes of section 132(h)(5) and this paragraph (e), the term ''on-premises athletic facility'' means any gym or other athletic facility (such as a pool, tennis court, or golf course)—

(i) Which is located on the premises of the employer, (ii) Which is operated by the employer, and (iii) Substantially all of the use of which during the calendar year is by employees of the employer, their spouses, and their dependent children.

For purposes of paragraph (e) (1) (iii) of this section, the term ''dependent children'' has the same meaning as the plural of the term ''dependent child'' in paragraph (b)(5) of this section. The exclusion of this paragraph (e) does not apply to any athletic facility if access to the facility is made available to the general public through the sale of memberships, the rental of the facility, or a similar arrangement.

(2) *Premises of the employer.* The athletic facility need not be located on the employer's business premises. However, the athletic facility must be located on premises of the employer. The exclusion provided in this paragraph (e) applies whether the premises are owned or leased by the employer; in addition, the exclusion is available even if the employer is not a named lessee on the lease so long as the employer pays reasonable rent. The exclusion provided in this paragraph (e) does not apply to any athletic facility that is a facility for residential use. Thus, for example, a resort with accompanying athletic facilities (such as tennis courts, pool, and gym) would not qualify for the exclusion provided in this paragraph (e). An athletic facility is considered to be located on the employer's premises if the facility is located on the premises of a voluntary employees' beneficiary association funded by the employer.

(3) *Application of rules to membership in an athletic facility.* The exclusion provided in this paragraph (e) does not apply to any membership in an athletic facility (including health clubs or country clubs) unless the facility is owned (or leased) and operated by the employer and substantially all the use of the facility is by employees of the employer, their spouses, and their dependent children. Therefore, membership in a health club or country club not meeting the rules provided in this paragraph (e) would not qualify for the exclusion.

(4) *Operation by the employer.* An employer is considered to operate the athletic facility if the employer operates the facility through its own employees, or if the employer contracts out to another to operate the athletic facility. For example, if an employer hires an independent contractor to operate the athletic facility for the employer's employees, the facility is considered to be operated by the employer. In addition, if an athletic facility is operated by more than one employer, it is considered to be operated by each employer.

For purposes of paragraph (e) (1) (iii) of this section, substantially all of the use of a facility that is operated by more than one employer must be by employees of the various employers, their spouses, and their dependent children. Where the facility is operated by more than one employer, an employer that pays rent either directly to the owner of the premises or to a sublessor of the premises is eligible for the exclusion. If an athletic facility is operated by a voluntary employees' beneficiary association funded by an employer, the employer is considered to operate the facility.

(5) *Nonapplicability of nondiscrimination rules.* The nondiscrimination rules of section 132 and §1.132–8 do not apply to on-premises athletic facilities.

(f) *Nonapplicability of section 132 in certain cases*—(1) Tax treatment provided for in another section. If the tax treatment or a particular fringe benefit is expressly provided for in another section of Chapter 1 of the Internal Revenue Code of 1986, section 132 and the applicable regulations (except for section 132 (e) and the regulations thereunder) do not apply to such fringe benefit. For example, because section 129 provides an exclusion from gross income for amounts paid or incurred by an employer for dependent care assistance for an employee, the exclusions under section 132 and this section do not apply to the provision by an employer to an employee of dependent care assistance. Similarly, because section 117 (d) applies to tuition reductions, the exclusions under section 132 do not apply to free or discounted tuition provided to an employee by an organization operated by the employer, whether the tuition is for study at or below the graduate level. Of course, if the amounts paid by the employer are for education relating to the employee's trade or business of being an employee of the employer so that, if the employee paid for the education, the amount paid could be deducted under section 162, the costs of the education may be eligible for exclusion as a working condition fringe.

(2) *Limited statutory exclusions.* If another section of Chapter 1 of the Internal Revenue Code of 1986 provides an exclusion from gross income based on the cost of the benefit provided to the employee and such exclusion is a limited amount, section 132 and the regulations thereunder may apply to the extent the cost of the benefit exceeds the statutory exclusion.

(g) *Effective date.* Sections 1.132–0, 1.132–1, 1.132–2, 1.132–3, 1.132–4, 1.132–5, 1.132–6, 1.132–7 and 1.132–8 are effective as of January 1, 1989, except that §§1.132–1(b)(1) with respect to the use of air transportation by a parent of an employee and 1.132–4(d) are effective as of January 1, 1985. Furthermore, in §1.132–5, the eleventh sentence of paragraph (m)(1), *Examples 6* and *7* in paragraph (m)(8), and paragraphs (m)(2)(i), (m)(2)(v), (m)(3)(iv), (m)(6), (m)(7), and (r) are effective December 30, 1992; however, taxpayers may treat the rules as applicable to benefits provided on or after January 1, 1989. For the applicable rules relating to employer-provided transportation for security concerns prior to December 30, 1992, see §1.132–5(m) (as contained in 26 CFR part 1 (§§1.61 to 1.169) revised April 1, 1992). See §§1.132–1T, 1.132–2T, 1.132–3T, 1.132–4T, 1.132–5T, 1.132–6T, 1.132–7T and 1.132–8T for rules in effect for benefits received from January 1, 1985, to December 31, 1988.

[T.D. 8256, 54 FR 28601, July 6, 1989, as amended by T.D. 8457, 57 FR 62196, Dec. 30, 1992; 58 FR 7296, Feb. 5, 1993]

§1.132–1T Exclusion from gross income of certain fringe benefits—1985 through 1988 (temporary).

(a) *In general.* Gross income does not include any fringe benefit which qualifies as a—

(1) No-additional-cost service,

(2) Qualified employee discount,

(3) Working condition fringe, or

(4) De minimis fringe.

Special rules apply with respect to certain on-premises gyms and other athletic facilities (§1.132–1T(e)), demonstration use of employer-provided automobiles by full-time automobile salesmen (§1.132–1T(n)), parking provided to an employee on or near the business premises of the employer (§1.132–5T(o)), and on-premises eating facilities (§1.132–7T).

(b) *Definition of employee*—(1) *No-additional-cost services and qualified employee discounts.* For purposes of section

132(a)(1) (relating to no-additional-cost services) and section 132(a)(2) (relating to qualified employee discounts), the term ''employee'' (with respect to a line of business of an employer) means—

(i) Any individual who is currently employed by the employer in the line of business,

(ii) Any individual who was formerly employed by the employer in the line of business and who separated from service with the employer in the line of business by reason of retirement or disability, and

(iii) Any widow or widower of an individual who died while employed by the employer in the line of business or who separated from service with the employer in the line of business by reason of retirement or disability.

For purposes of this paragraph (b)(1), any partner who performs services for a partnership is considered employed by the partnership. In addition, any use by the spouse or dependent child (as defined in this paragraph (b)) of the employee will be treated as use by the employee.

(2) *Working condition fringes.* For purposes of section 132(a)(2) (relating to working condition fringes), the term ''employee'' means—

(i) Any individual who is currently employed by the employer,

(ii) Any partner who performs services for the partnership,

(iii) Any director of the employer, and

(iv) Any independent contractor who performs services for the employer.

Notwithstanding anything in this paragraph (b)(2) to the contrary, any independent contractor who performs services for the employer cannot exclude the value of parking or the use of consumer goods provided pursuant to a product testing program under §1.132–5T (n); in addition, any director of the employer cannot exclude the value of the use of consumer goods provided pursuant to a product testing program under §1.132–5T (n).

(3) *De minimis fringe.* For purpose of section 132(a)(4) (relating to de minimis fringes), the term ''employee'' means any recipient of a fringe benefit.

(4) *Dependent child.* For purposes of this paragraph (b), the term ''dependent child'' means any son, stepson, daughter or stepdaughter of the employee who is a dependent of the employee, or both of whose parents are deceased. Any child to whom section 152(e) applies will be treated as the dependent of both parents.

(c) *Special rules for employers—Effect of section 414.* All employees treated as employed by a single employer under section 414(b), (c) or (m) will be treated as employed by a single employer for purposes of this section. Thus, employees of one corporation that is part of a controlled group of corporations may under certain circumstances be eligible to receive section 132 benefits from the other corporations that comprise the controlled group. However, the aggregation of employers described in this paragraph (c) does not change the other requirements for an exclusion, such as the line of business requirement. Thus, for example, if a controlled group of corporations consists of two corporations that operate in different lines of business, the corporations are not treated as operating in the same line of business even though the corporations are treated as one employer.

(d) *Customers not to include employees.* For purposes of section 132 and the regulations thereunder, the term ''customer'' means customers who are not employees. However, the preceding sentence does not apply to section 132(c)(2) (relating to the gross profit percentage for determining a qualified employee discount). Thus, an employer that provides employee discounts cannot exclude sales made to employees in determining the aggregate sales to customers.

(e) *Treatment of on-premises athletic facilities*—(1) *In general.* Gross income does not include the value of any on-premises athletic facility provided by the employer to its employees. For purposes of section 132 and this paragraph (e), the term ''on-premises athletic facility'' means any gym or other athletic facility (such as a pool, tennis court, or golf course)—

(i) Which is located on the premises of the employer,

(ii) Which is operated by the employer, and

(iii) Where substantially all of the use of which is, during the calendar year, by employees of the employer, their spouses, and their dependent children.

For purposes of this paragraph (e)(1)(iii), the term ''dependent children'' has the same meaning as the plural of the term ''dependent child'' in paragraph (b)(4) of this section. The exclusion of this paragraph (e) does not apply to any athletic facility if access to the facility is made available to the general public through the sale of memberships, the rental of the facility, etc.

(2) *Premises of the employer.* The athletic facility need not be located on the employer's business premises. However, the athletic facility must be located on premises of the employer. The exclusion provided in this paragraph (e) applies whether the premises are owned or leased by the employer; in addition, the exclusion is available even if the employer is not a named lesse on the lease so long as the employer pays reasonable rent. The exclusion provided in this paragraph (e) does not apply to any athletic facility that is a facility for residential use. Thus, for example, a resort with accompanying athletic facilities (such as tennis courts, pool, and gym) would not qualify for the exclusion provided in this paragraph (e).

(3) *Application of rules to membership in an athletic facility.* The exclusion provided in this paragraph (e) does not apply to any membership in an athletic facility (including health clubs or country clubs) unless the facility is owned (or leased) and operated by the employer and substantially all the use of the facility is by employees of the employer, their spouses, and their dependent children. Therefore, membership in health club or country club not meeting the rules provided in this paragraph (e) would not quality for the exclusion.

(4) *Operation by the employer.* An employer is considered to operate the athletic facility if the employer itself operates the facility through its own employees, or if the employer contracts out to another to operate the athletic facility. For example, if an employer hires an independent contractor to operate the athletic facility for the employer's employees, the facility is considered to be operated by the employer. In addition, if an athletic facility is operated by more than one employer, it is considered to be operated by each employer. For purposes of paragraph (e)(1)(iii) of this section, substantially all the use of a facility operated by more than one employer must be by employees of all of the employers, their spouses, and their dependent children. Where the facility is operated by more than one employer, an employer that either pays rent directly to the owner of the premises or pays rent to a named lessor of the premises is eligible for the exclusion.

(5) *Nonapplicability of nondiscrimination rules.* The nondiscrimination rules of section 132 and §1.132–8T do not apply to on-premises athletic facilities.

(f) *Nonapplicability of section 132.* If the tax treatment of a particular fringe benefit is expresely provided for in another section of Chapter 1, section 132 and the applicable regulations (except for section 132 (e) and the regulations thereunder) do not apply to such fringe benefits. For example, since section 129 provides an exclusion from gross income for amounts paid or incurred by the employer for dependent care assistance for an employee, the exclusions under section 132 and this section do not apply to the provision by an employer to an employee of dependent care assistance.

[T.D. 8063, 50 FR 52297, Dec. 23, 1985, as amended by T.D. 8256, 54 FR 28600, July 6, 1989]

§ 1.132–2 No-additional-cost services.

(a) *In general*—(1) *Definition.* Gross income does not include the value of a no-additional-cost service. A ''no-additional-cost service'' is any service provided by an employer to an employee for the employee's personal use if—

(i) The service is offered for sale by the employer to its customers in the ordinary course of the line of business of the employer in which the employee performs substantial services, and

(ii) The employer incurs no substantial additional cost in providing the service to the employee (including foregone revenue and excluding any amount paid by or on behalf of the employee for the service).

For rules relating to the line of business limitation, see §1.132–4. For purposes of this section, a service will not be considered to be offered for sale by the employer to its customers if that service is primarily provided to employees and not to the employer's customers.

(2) *Excess capacity services*. Services that are eligible for treatment as no-additional-cost services include excess capacity services such as hotel accommodations; transportation by aircraft, train, bus, subway, or cruise line; and telephone services. Services that are not eligible for treatment as no-additional-cost services are non-excess capacity services such as the facilitation by a stock brokerage firm of the purchase of stock. Employees who receive non-excess capacity services may, however, be eligible for a qualified employee discount of up to 20 percent of the value of the service provided. See §1.132–3.

(3) *Cash rebates*. The exclusion for a no-additional-cost service applies whether the service is provided at no charge or at a reduced price. The exclusion also applies if the benefit is provided through a partial or total cash rebate of an amount paid for the service.

(4) *Applicability of nondiscrimination rules*. The exclusion for a no-additional-cost service applies to highly compensated employees only if the service is available on substantially the same terms to each member of a group of employees that is defined under a reasonable classification set up by the employer that does not discriminate in favor of highly compensated employees. See §1.132–8.

(5) *No substantial additional cost*—(i) *In general*. The exclusion for a no-additional-cost service applies only if the employer does not incur substantial additional cost in providing the service to the employee. For purposes of the preceding sentence, the term ''cost'' includes revenue that is forgone because the service is provided to an employee rather than a nonemployee. (For purposes of determining whether any revenue is forgone, it is assumed that the employee would not have purchased the service unless it were available to the employee at the actual price charged to the employee.) Whether an employer incurs substantial additional cost must be determined without regard to any amount paid by the employee for the service. Thus, any reimbursement by the employee for the cost of providing the service does not affect the determination of whether the employer incurs substantial additional cost.

(ii) *Labor intensive services*. An employer must include the cost of labor incurred in providing services to employees when determining whether the employer has incurred substantial additional cost. An employer incurs substantial additional cost, whether nonlabor costs are incurred, if a substantial amount of time is spent by the employer or its employees in providing the service to employees. This would be the result whether the time spent by the employer or its employees in providing the services would have been ''idle,'' or if the services were provided outside normal business hours. An employer generally incurs no substantial additional cost, however, if the services provided to the employee are merely incidental to the primary service being provided by the employer. For example, the in-flight services of a flight attendant and the cost of in-flight meals provided to airline employees traveling on a space-available basis are merely incidental to the primary service being provided (*i.e.*, air transportation). Similarly, maid service provided to hotel employees renting hotel rooms on a space-available basis is merely incidental to the primary service being provided (*i.e.*, hotel accommodations).

(6) *Payments for telephone service*. Payment made by an entity subject to the modified final judgment (as defined in section 559(c)(5) of the Tax Reform Act of 1984) of all or part of the cost of local telephone service provided to an employee by a person other than an entity subject to the modified final judgment shall be treated as telephone service provided to the employee by the entity making the payment for purposes of this section. The preceding sentence also applies to a rebate of the amount paid by the employee for the service and a payment to the person providing the service. This paragraph (a)(6) applies only to services and employees

described in § 1.132–4 (c). For a special line of business rule relating to such services and employees, see § 1.132–4 (c).

(b) *Reciprocal agreements.* For purposes of the exclusion from gross income for a no-additional-cost service, an exclusion is available to an employee of one employer for a no-additional-cost service provided by an unrelated employer only if all of the following requirements are satisfied—

(1) The service provided to such employee by the unrelated employer is the same type of service generally provided to nonemployee customers by both the line of business in which the employee works and the line of business in which the service is provided to such employee (so that the employee would be permitted to exclude from gross income the value of the service if such service were provided directly by the employee's employer);

(2) Both employers are parties to a written reciprocal agreement under which a group of employees of each employer, all of whom perform substantial services in the same line of business, may receive no-additional-cost services from the other employer; and

(3) Neither employer incurs any substantial additional cost (including forgone revenue) in providing such service to the employees of the other employer, or pursuant to such agreement. If one employer receives a substantial payment from the other employer with respect to the reciprocal agreement, the paying employer will be considered to have incurred a substantial additional cost pursuant to the agreement, and consequently services performed under the reciprocal agreement will not qualify for exclusion as no-additional-cost services.

(c) *Example.* The rules of this section are illustrated by the following example:

Example. Assume that a commercial airline permits its employees to take personal flights on the airline at no charge and receive reserved seating. Because the employer forgoes potential revenue by permitting the employees to reserve seats, employees receiving such free flights are not eligible for the no-additional-cost exclusion.

[T.D. 8256, 54 FR 28602, July 6, 1989]

§ 1.132–2T No-additional-cost service—1985 through 1988 (temporary).

(a) *In general*—(1) *Definition.* Gross income does not include the value of a no-additional-cost service. The term ''no-additional-cost service'' means any service provided by an employer to an employee for the employee's personal use if—

(i) The service is offered for sale to customers in the ordinary course of the line of business of the employer in which the employee performs substantial services, and

(ii) The employer incurs no substantial additional cost in providing the service to the employee (including forgone revenue and excluding any amount paid by or on behalf of the employee for the service).

For rules relating to the line of business limitation, see § 1.132–4T.

(2) *Examples.* Services that are eligible for treatment as no-additional-cost services are excess capacity services such as hotel accommodations; transportation by aircraft, train, bus, subway, or cruise line; and telephone services. Services that are not eligible for treatment as no-additonal-cost services are non-excess capacity services such as the facilitation by a stock brokerage firm of the purchase of stock. Employees who receive non-excess capacity services may, however, be eligible for a qualified employee discount of up to 20 percent of the value of the service provided. See § 1.132-3T.

(3) *Cash rebates.* The exclusion for a no-additional-cost service applies whether the service is provided at no charge or at a reduced price. The exclusion also applies if the benefit is provided through a partial or total cash rebate of an amount paid for the service.

(4) *Applicability of nondiscrimination rules.* The exclusion for a no-additional-cost service applies to officers, owners, and highly compensated employees only if the service is available on substantially the same terms to each member of a group of employees that is defined under a reasonable classification set up by the employer that does not discriminate in favor of officers, owners, or highly compensated employees. See § 1.132-8T.

(5) *No substantial additional cost*—(i) *In general.* The exclusion for a non-additional-cost service applies only if the employer does not incur substantial additional cost in providing the service to the employee. For purposes of the preceding sentence, the term ''cost'' includes revenue that is forgone because the service is provided to an employee rather than a nonemployee. (For purposes of determining whether any revenue is forgone, it is assumed that the employee would not have purchased the service unless it were available to the employee at the actual price charged to the employee.) Whether an employer incurs substantial additional cost must be determined without regard to any amount paid by the employee for the service. Thus, any reimbursement by the employee for the cost of providing the service does not affect the determination of whether the employer incurs substantial additional cost.

(ii) *Labor intensive services.* An employer must include the cost of labor incurred in providing services to employees when determining whether the employer has incurred substantial additional cost. An employer has incurred substantial additional cost. An employer incurs substantial additional cost, whether or not non-labor costs are incurred, if a substantial amount of time is spent by the employer or its employees in providing the service to employees. This would be the result whether or not the time spent by the employer or its employees in providing the services would have been ''idle'', or if the services were provided outside normal business hours. An employer generally incurs no substantial additional cost, however, if the employee services provided are merely incidental to the primary service being provided by the employer. For example, the in-flight services of a flight attendant provided to airline employees traveling on a space-available basis are merely incidental to the primary service being provided (*i.e.*, air transportation). In addition, the cost of in-flight meals provided to airline employees is not considered substantial in relation to the air transportation being provided.

(b) *Reciprocal agreements.* For purposes of the exclusion for a no-additional-cost service, any service provided by an employer to an employee of another employer shall be treated as provided by the employer of such employee if all of the following requirements are satisfied:

(1) The service is provided pursuant to a written reciprocal agreement between the employers under which a group of employees of each employer, all of whom perform substantial services in the same line of business, may receive no-additional-cost services from the other employer;

(2) The service provided pursuant to the agreement to the employees of both employers is the same type of service provided by the employers to customers both in the line of business in which the employees perform substantial services and the line of business in which the service is provided to customers; and

(3) Neither employer incurs substantial additional cost (including forgone revenue) in providing the service to the employees of the other employer or pursuant to the agreement.

If one employer receives a substantial payment from the other employer with respect to the reciprocal agreement, the paying employer will be considered to have incurred a substantial additional cost pursuant to the agreement.

[T.D. 8063, 50 FR 52298, Dec. 23, 1985, as amended by T.D. 8256, 54 FR 28600, July 6, 1989]

§ 1.132–3 Qualified employee discounts.

(a) *In general*—(1) *Definition.* Gross income does not include the value of a qualified employee discount. A ''qualified employee discount'' is any employee discount with respect to qualified property or services provided by an employer to an employee for use by the employee to the extent the discount does not exceed—

(i) The gross profit percentage multiplied by the price at which the property is offered to customers in the ordinary course of the employer's line of business, for discounts on property, or

(ii) Twenty percent of the price at which the service is offered to customers, for discounts on services.

(2) *Qualified property or services*—(i) *In general.* The term ''qualified property

or services'' means any property or services that are offered for sale to customers in the ordinary course of the line of business of the employer in which the employee performs substantial services. For rules relating to the line of business limitation, see §1.132–4.

(ii) *Exception for certain property*. The term ''qualified property'' does not include real property and it does not include personal property (whether tangible or intangible) of a kind commonly held for investment. Thus, an employee may not exclude from gross income the amount of an employee discount provided on the purchase of securities, commodities, or currency, or of either residential or commercial real estate, whether or not the particular purchase is made for investment purposes.

(iii) *Property and services not offered in ordinary course of business*. The term ''qualified property or services'' does not include any property or services of a kind that is not offered for sale to customers in the ordinary course of the line of business of the employer. For example, employee discounts provided on property or services that are offered for sale primarily to employees and their families (such as merchandise sold at an employee store or through an employer-provided catalog service) may not be excluded from gross income. For rules relating to employer-operated eating facilities, see §1.132–7, and for rules relating to employer-operated on-premises athletic facilities, see §1.132–1(e).

(3) *No reciprocal agreement exception*. The exclusion for a qualified employee discount does not apply to property or services provided by another employer pursuant to a written reciprocal agreement that exists between employers to provide discounts on property and services to employees of the other employer.

(4) *Property or services provided without charge, at a reduced price, or by rebates*. The exclusion for a qualified employee discount applies whether the property or service is provided at no charge (in which case only part of the discount may be excludable as a qualified employee discount) or at a reduced price. The exclusion also applies if the benefit is provided through a partial or total cash rebate of an amount paid for the property or service.

(5) *Property or services provided directly by the employer or indirectly through a third party*. A qualified employee discount may be provided either directly by the employer or indirectly through a third party. For example, an employee of an appliance manufacturer may receive a qualified employee discount on the manufacturer's appliances purchased at a retail store that offers such appliances for sale to customers. The employee may exclude the amount of the qualified employee discount whether the employee is provided the appliance at no charge or purchases it at a reduced price, or whether the employee receives a partial or total cash rebate from either the employer-manufacturer or the retailer. If an employee receives additional rights associated with the property that are not provided by the employee's employer to customers in the ordinary course of the line of business in which the employee performs substantial services (such as the right to return or exchange the property or special warranty rights), the employee may only receive a qualified employee discount with respect to the property and not the additional rights. Receipt of such additional rights may occur, for example, when an employee of a manufacturer purchases property manufactured by the employee's employer at a retail outlet.

(6) *Applicability of nondiscrimination rules*. The exclusion for a qualified employee discount applies to highly compensated employees only if the discount is available on substantially the same terms to each member of a group of employees that is defined under a reasonable classification set up by the employer that does not discriminate in favor of highly compensated employees. See §1.132–8.

(b) *Employee discount*—(1) *Definition*. The term ''employee discount'' means the excess of—

(i) The price at which the property or service is being offered by the employer for sale to customers, over

(ii) The price at which the property or service is provided by the employer to an employee for use by the employee. A transfer of property by an employee without consideration is treated as use by the employee for purposes of this section. Thus, for example, if an employee receives a discount on property offered for sale by his employer to customers and the employee makes a gift of the property to his parent, the property will be considered to be provided for use by the employee; thus, the discount will be eligible for exclusion as a qualified employee discount.

(2) *Price to customers*—(i) *Determined at time of sale.* In determining the amount of an employee discount, the price at which the property or service is being offered to customers at the time of the employee's purchase is controlling. For example, assume that an employer offers a product to customers for $20 during the first six months of a calendar year, but at the time the employee purchases the product at a discount, the price at which the product is being offered to customers is $25. In this case, the price from which the employee discount is measured is $25. Assume instead that, at the time the employee purchases the product at a discount, the price at which the product is being offered to customers is $15 and the price charged the employee is $12. The employee discount is measured from $15, the price at which the product is offered for sale to customers at the time of the employee purchase. Thus, the employee discount is $15 −$12, or $3.

(ii) *Quantity discount not reflected.* The price at which a property or service is being offered to customers cannot reflect any quantity discount unless the employee actually purchases the requisite quantity of the property or service.

(iii) *Price to employer's customers controls.* In determining the amount of an employee discount, the price at which a property or service is offered to customers of the employee's employer is controlling. Thus, the price at which the property is sold to the wholesale customers of a manufacturer will generally be lower than the price at which the same property is sold to the customers of a retailer. However, see paragraph (a)(5) of this section regarding the effect of a wholesaler providing to its employees additional rights not provided to customers of the wholesaler in the ordinary course of its business.

(iv) *Discounts to discrete customer or consumer groups.* Subject to paragraph (2)(ii) of this section, if an employer offers for sale property or services at one or more discounted prices to discrete customer or consumer groups, and sales at all such discounted prices comprise at least 35 percent of the employer's gross sales for a representative period, then in determining the amount of an employee discount, the price at which such property or service is being offered to customers for purposes of this section is a discounted price. The applicable discounted price is the current undiscounted price, reduced by the percentage discount at which the greatest percentage of the employer's discounted gross sales are made for such representative period. If sales at different percentage discounts equal the same percentage of the employer's gross sales, the price at which the property or service is being provided to customers may be reduced by the average of the discounts offered to each of the two groups. For purposes of this section, a representative period is the taxable year of the employer immediately preceding the taxable year in which the property or service is provided to the employee at a discount. If more than one employer would be aggregated under section 414 (b), (c), (m), or (o), and not all of the employers have the same taxable year, the employers required to be aggregated must designate the 12-month period to be used in determining gross sales for a representative period. The 12-month period designated, however, must be used on a consistent basis.

(v) *Examples.* The rules provided in this paragraph (b)(2) are illustrated by the following examples:

Example 1. Assume that a wholesale employer offers property for sale to two discrete customer groups at differing prices. Assume further that during the prior taxable year of the employer, 70 percent of the employer's gross sales are made at a 15 percent discount and 30 percent at no discount. For purposes of this paragraph (b)(2), the current undiscounted price at which the property or service is being offered by the employer for sale to customers may be reduced by the 15 percent discount.

Example 2. Assume that a retail employer offers a 20 percent discount to members of the American Bar Association, a 15 percent discount to members of the American Medical Association, and a ten percent discount to employees of the Federal Government. Assume further that during the prior taxable year of the employer, sales to American Bar Association members equal 15 percent of the employer's gross sales, sales to American Medical Association members equal 20 percent of the employer's gross sales, and sales to Federal Government employees equal 25 percent of the employer's gross sales. For purposes of this paragraph (b)(2), the current undiscounted price at which the property or service is being offered by the employer for sale to customers may be reduced by the ten percent Federal Government discount.

(3) *Damaged, distressed, or returned goods.* If an employee pays at least fair market value for damaged, distressed, or returned property, such employee will not have income attributable to such purchase.

(c) *Gross profit percentage*—(1) *In general*—(i) *General rule.* An exclusion from gross income for an employee discount on qualified property is limited to the price at which the property is being offered to customers in the ordinary course of the employer's line of business, multiplied by the employer's gross profit percentage. The term ''gross profit percentage'' means the excess of the aggregate sales price of the property sold by the employer to customers (including employees) over the employer's aggregate cost of the property, then divided by the aggregate sales price.

(ii) *Calculation of gross profit percentage.* The gross profit percentage must be calculated separately for each line of business based on the aggregate sales price and aggregate cost of property in that line of business for a representative period. For purposes of this section, a representative period is the taxable year of the employer immediately preceding the taxable year in which the discount is available. For example, if the aggregate amount of sales of property in an employer's line of business for the prior taxable year was $800,000, and the aggregate cost of the property for the year was $600,000, the gross profit percentage would be 25 percent ($800,000 minus $600,000, then divided by $800,000). If two or more employers are required to aggregate under section 414 (b), (c), (m), or (o) (aggregated employer), and if all of the aggregated employers do not share the same taxable year, then the aggregated employers must designate the 12-month period to be used in determining the gross profit percentage. The 12-month period designated, however, must be used on a consistent basis. If an employee performs substantial services in more than one line of business, the gross profit percentage of the line of business in which the property is sold determines the amount of the excludable employee discount.

(iii) *Special rule for employers in their first year of existence.* An employer in its first year of existence may estimate the gross profit percentage of a line of business based on its mark-up from cost. Alternatively, an employer in its first year of existence may determine the gross profit percentage by reference to an appropriate industry average.

(iv) *Redetermination of gross profit percentage.* If substantial changes in an employer's business indicate at any time that it is inappropriate for the prior year's gross profit percentage to be used for the current year, the employer must, within a reasonable period, redetermine the gross profit percentage for the remaining portion of the current year as if such portion of the year were the first year of the employer's existence.

(2) *Line of business.* In general, an employer must determine the gross profit percentage on the basis of all property offered to customers (including employees) in each separate line of business. An employer may instead select a classification of property that is narrower than the applicable line of business. However, the classification must be reasonable. For example, if an employer computes gross profit percentage according to the department in which products are sold, such classification is reasonable. Similarly, it is reasonable to compute gross profit percentage on the basis of the type of merchandise sold (such as high mark-up and low mark-up classifications). It is not reasonable, however, for an employer to classify certain low mark-up

products preferred by certain employees (such as highly compensated employees) with high mark-up products or to classify certain high mark-up products preferred by other employees with low mark-up products.

(3) *Generally accepted accounting principles.* In general, the aggregate sales price of property must be determined in accordance with generally accepted accounting principles. An employer must compute the aggregate cost of property in the same manner in which it is computed for the employer's Federal income tax liability; thus, for example, section 263A and the regulations thereunder apply in determining the cost of property.

(d) *Treatment of leased sections of department stores*—(1) *In general*—(i) *General rule.* For purposes of determining whether employees of a leased section of a department store may receive qualified employee discounts at the department store and whether employees of the department store may receive qualified employee discounts at the leased section of the department store, the leased section is treated as part of the line of business of the person operating the department store, and employees of the leased section are treated as employees of the person operating the department store as well as employees of their employer. The term "leased section of a department store" means a section of a department store where substantially all of the gross receipts of the leased section are from over-the-counter sales of property made under a lease, license, or similar arrangement where it appears to the general public that individuals making such sales are employed by the department store. A leased section of a department store which, in connection with the offering of beautician services, customarily makes sales of beauty aids in the ordinary course of business is deemed to derive substantially all of its gross receipts from over-the-counter sales of property.

(ii) *Calculation of gross profit percentage.* For purposes of paragraph (d) of this section, when calculating the gross profit percentage of property and services sold at a department store, sales of property and services sold at the department store, as well as sales of property and services sold at the leased section, are considered. The rule provided in the preceding sentence does not apply, however, if it is more reasonable to calculate the gross profit percentage for the department store and leased section separately, or if it would be inappropriate to combine them (such as where either the department store or the leased section but not both provides employee discounts).

(2) *Employees of the leased section*—(i) *Definition.* For purposes of this paragraph (d), "employees of the leased section" means all employees who perform substantial services at the leased section of the department store regardless of whether the employees engage in over-the-counter sales of property or services. The term "employee" has the same meaning as in section 132(f) and § 1.132–1(b)(1).

(ii) *Discounts offered to either department store employees or employees of the leased section.* If the requrements of this paragraph (d) are satisfied, employees of the leased section may receive qualified employee discounts at the department store whether or not employees of the department store are offered discounts at the leased section. Similarly, employees of the department store may receive a qualified employee discount at the leased section whether or not employees of the leased section are offered discounts at the department store.

(e) *Excess discounts.* Unless excludable under a provision of the Internal Revenue Code of 1986 other than section 132(a)(2), an employee discount provided on property is excludable to the extent of the gross profit percentage multiplied by the price at which the property is being offered for sale to customers. If an employee discount exceeds the gross profit percentage, the excess discount is includible in the employee's income. For example, if the discount on employer-purchased property is 30 percent and the employer's gross profit percentage for the period in the relevant line of business is 25 percent, then 5 percent of the price at which the property is being offered for sale to customers is includible in the empoyee's income. With respect to services, an employee discount of up to

20 percent may be excludable. If an employee discount exceeds 20 percent, the excess discount is includible in the employee's income. For example, assume that a commercial airline provides a pass to each of its employees permitting the employees to obtain a free round-trip coach ticket with a confirmed seat to any destination the airline services. Neither the exclusion of section 132(a)(1) (relating to no-additional-cost services) nor any other statutory exclusion applies to a flight taken primarily for personal purposes by an employee under this program. However, an employee discount of up to 20 percent may be excluded as a qualified employee discount. Thus, if the price charged to customers for the flight taken is $300 (under restrictions comparable to those actually placed on travel associated with the employee airline ticket), $60 is excludible from gross income as a qualified employee discount and $240 is includible in gross income.

[T.D. 8256, 54 FR 28603, July 6, 1989]

§ 1.132–3T Qualified employee discount—1985 through 1988 (temporary).

(a) *In general*—(1) *Definition.* Gross income does not include the value of a qualified employee discount. The term ''qualified employee discount'' means any employee discount with respect to qualified property or services provided by an employer to an employee for the employee's personal use to the extent the discount does not exceed—

(i) The gross profit percentage of the price at which the property is offered to customers, for discounts on property, or

(ii) 20 percent of the price at which the services are offered to customers, for discounts on services.

(2) *Qualified property or services*—(i) *In general.* The term ''qualified property or services'' means any property or services that are offered for sale to customers in the ordinary course of the line of business of the employer in which the employee performs substantial services. For rules relating to the line of business limitation, see § 1.132–4T.

(ii) *Exception for certain property.* The term ''qualified property'' does not include real property and it does not include personal property (whether tangible or intangible) of a kind commonly held for investment. Thus, an employee may not exclude from gross income the amount of an employee discount provided on the purchase of either residential or commercial real estate, securities, commodities, or currency, whether or not the particular purchase is made for investment purposes.

(iii) *Property and services not offered in ordinary course of business.* The term ''qualified property or services'' does not include any property or services of a kind that is not offered for sale to customers in the ordinary course of the line of business of the employer. For example, employee discounts provided on property or services that are offered for sale only to employees and their families (such as merchandise sold at an employee store or through an employer-provided catalog service) may not be excluded from gross income.

(3) *No reciprocal agreement exception.* The exclusion for a qualified employee discount does not apply to property or services provided by another employer pursuant to a written reciprocal agreement that exists between employers to provide discounts on property and services to employees of the other employer.

(4) *Cash or third-party rebates*—(i) *Property or services provided without charge or at a reduced price.* The exclusion for a qualified employee discount applies whether the property or service is provided at no charge (in which case only part of the discount may be excludable as a qualified employee discount) or at a reduced price. The exclusion also applies if the benefit is provided through a partial or total cash rebate of an amount paid for the property or service.

(ii) *Property or services provided directly by the employer or indirectly through a third party.* A qualified employee discount may be provided either directly by the employer or indirectly through a third party. For example, an employee of an appliance manufacturer may receive a qualified employee discount on the manufacturer's appliances purchased at a retail store that offers such appliances for sale to customers.

The employee may exclude the amount of the qualified employee discount whether the employee is provided the appliance at no charge or purchases it at a reduced price, or whether the employee receives a partial or total cash rebate from either the employer-manufacturer or the retailer. If an employee receives additional rights associated with the property that are not provided by the employee's employer to customers in the ordinary course of the line of business in which the employee performs substantial services (such as the right to return or exchange the property or special warranty rights), the employee may only receive a qualified employee discount with respect to the property and not the additional rights. Receipt of such additional rights may occur, for example, when an employee of a manufacturer purchases property manufactured by the employee's employer at a retail outlet.

(5) *Applicability of nondiscrimination rules.* The exclusion for a qualified employee discount applies to officers, owners, and highly compensated employees only if the discount is available on substantially the same terms to each member of a group of employees that is defined under a reasonable classification set up by the employer that does not discriminate in favor of officers, owners, or highly compensated employees. See §1.132–8T.

(b) *Employee discount*—(1) *Definition.* The term ''employee discount'' means the excess of—

(i) The price at which the property or service is being offered by the employer for sale to customers, over

(ii) The price at which the property or service is provided by the employer to an employee for use by the employee.

A transfer of property by an employee without consideration is considered use by the employee for purposes of this section. Thus, for example, if an employee receives a discount on property offered for sale by his employer to customers and the employee makes a gift of the property to his parent, the property will be considered to be provided for use by the employee, thus enabling the discount to be eligible for exclusion as a qualified employee discount.

(2) *Price to customers*—(i) *Determined at time of sale.* In determining the amount of an employee discount, the price at which the property or service is being offered to customers at the time of the employee's purchase is controlling. For example, assume that an employer offers a product to customers for $20 during the first six months of a calendar year, but at the time the employee purchases the product at a discount, the price at which the product is being offered to customers is $25. In this case, the price from which the employee discount is measured is $25.

(ii) *Quantity discount not reflected.* The price referred to in paragraph (b)(2)(i) of this section cannot reflect any quantity discount unless the employee actually purchases the requisite quantity of the property or service.

(iii) *Customers of employee's employer controls.* In determining the amount of an employee discount, the price at which the property or service is offered to customers of the employee's employer is controlling. Thus, the price at which property is sold to the wholesale customers of a manufacturer will generally be lower than the price at which the same property is sold to the customers of a retailer. However, see paragraph (a)(4)(ii) of this section regarding the effect of a wholesaler providing to its employees additional rights not provided to customers of the wholesaler in the ordinary course of its business.

(iv) *Discounts to discrete customer or consumer groups.* In determining the amount of an employee discount, if an employer offers for sale property or services at one or more discounted prices to discrete customer or consumer groups, and sales at all such discounted prices comprise at least 35 percent of the employer's gross sales for a representative period, then the price at which property or service is being offered to customers is a discounted price. The applicable discounted price is the current undiscounted price, reduced by the percentage discount at which the greatest percentage of the employer's gross sales are made for such representative period. If sales at different percentage discounts equal the same percentage of the employer's gross sales, the price at which the property or service is being provided to customers may be reduced by the average of the two group discounts. For purposes of this section, a representative period is the taxable year of the employer immediately preceding the taxable year in which the property or service is provided to the employee at a discount. If more than one employer would be aggregated under section 414 (b), (c), or (m), and all of the employers do not have the same taxable year, the employers required to be aggregated must designate the 12-month period to be used in determining gross sales for a representative period.

(v) *Examples.* The rules provided in this paragraph (b)(2) are illustrated by the following examples:

Example 1. Assume that a wholesale employer offers property for sale to two discrete customer groups at differing prices. Assume further that during the prior taxable year of the employer, 70 percent of the employer's gross sales are made at a 15-percent discount and 30 percent at no discount. The current undiscounted price at which the property or service is being offered by the employer for sale to customers may be reduced by the 15-percent discount.

Example 2. Assume that a retail employer offers a 20 percent discount to members of the American Bar Association, a 15 percent discount to members of the American Medical Association, and a ten percent discount to employees of the Federal Government. Assume further that during the prior taxable year of the employer, sales to American Bar Association members equal 15 percent of the employer's gross sales, sales to American Medical Association members equal 20 percent of the employer's gross sales, and sales to Federal Government employees equal 25 percent of the employer's gross sales. The current undiscounted price at which the property or service is being offered by the employer for sale to customers may be reduced by the ten percent Federal Government discount.

(3) *Damaged, distressed, or returned goods.* If an employee pays at least fair market value for damaged, distressed, or returned property, such employee will not have income attributable to such purchase.

(c) *Gross profit percentage*—(1) *In general*—(i) *General rule.* An exclusion from gross income for an employee discount on qualified property is limited to the price at which the property is being offered to customers in the ordinary course of the employer's line of business, multiplied by the employer's gross profit percentage. The term ''gross profit percentage'' means the excess of the aggregate sales price of the property sold by the employer to customers (including employees) over the employer's aggregate cost of the property, then divided by the aggregate sales price.

(ii) *Calculation of gross profit percentage.* The gross profit percentage must be calculated separately for each line of business based on the aggregate sales price and aggregate cost of property in that line of business for a representative period. For purposes of this section, a representative period is the taxable year of the employer immediately preceding the taxable year in which the discount is available. For example, if the aggregate sales of property in an employer's line of business for the prior taxable year were $800,000, and the aggregate cost of the property for the year were $600,000, the gross profit percentage would be 25 percent ($800,000 minus $600,000, then divided by $800,000). If more than one employer would be aggregated under section 414 (b), (c), or (m), and all of the employers do not have the same taxable year, the employers required to be aggregated must designate the 12-month period to be used in determining the gross profit percentage. If an employee performs substantial services in more than one line of business, the gross profit percentage of the line of business in which the property is sold determines the amount of the excludable employee discount.

(iii) *Special rule for employers in their first year of existence.* An employer in its first year of existence may estimate the gross profit percentage of a line of business based on its mark-up from the cost. Alternatively, an employer in its first year of existence may determine the gross profit percentage by reference to an appropriate industry average.

(iv) *Redetermination of gross profit percentage.* If substantial changes in an employer's business indicate at any time that it is inappropriate for the prior years' gross profit percentage to be used for the current year, the employer must, within a reasonable period, redetermine the gross profit percentage for the remaining portion of the current year as if such portion of the year were the first year of the employer's existence.

(2) *Line of business.* In general, an employer must determine the gross profit percentage on the basis of all property offered to customers (including employees) in each separate line of business. An employer may instead select a classification of property that is narrower than the applicable line of business. However, such classification must be reasonable. For example, if an employer computes gross profit percentage according to the department in which products are sold, such classification is reasonable. Similarly, it is reasonable to compute gross profit percentage on the basis of the type of merchandise sold (such as high mark-up and low mark-up classifications). It is not reasonable, however, for an employer to classify certain low mark-up products preferred by certain employees (such as officers, owners, and highly compensated employees) with high mark-up products or to classify certain high mark-up products preferred by other employees with low mark-up products.

(3) *Generally accepted accounting principles.* In general, the aggregate sales price of property must be determined in accordance with generally accepted accounting principles. An employer must compute the aggregate cost of property in the same manner in which it is computed for the employer's Federal income tax liability, pursuant to the inventory rules in section 471 and the regulations thereunder.

(d) *Treatment of leased sections of department stores*—(1) *In general*—(i) *General rule.* For purposes of determining whether employees of a leased section of a department store may receive qualified employees discounts at the department store and whether employees of the department store may receive qualified employee discounts at the leased section of the department store, the leased section is treated as part of the line of business of the person operating the department store, and employees of the leased section are treated as employees of the person operating the department store as well as employees of their employer. The term ''leased section of a department store'' means a section of a department store where substantially all of the gross receipts of the leased section are over-the-counter sales of property made under a lease, license, or similar arrangement where it appears to the general public that individuals making such sales are employed by the department store. An example of a leased section of a department store is a cosmetics firm that leases floor space from a department store.

(ii) *Calculation of gross profit percentage.* When calculating the gross profit percentage of property and services sold at the department store under paragraph (c) of this section, sales of property and services sold at the department store, as well as sales of property and services sold at the leased section, are considered. The rule provided in the preceding sentence does not apply, however, if it is reasonable to calculate the gross profit percentage for the department store and leased section separately, or if it would be inappropriate to combine them (such as where either the department store or the leased section, but not both, provides employee discounts).

(2) *Employees of the leased section*—(i) *Definition.* For purposes of this paragraph (d), ''employees of the leased section'' means all employees who perform substantial services at the leased section regardless of whether the employees engage in over-the-counter sales of property or services. The term ''employee'' has the same meaning as in section 133(f).

(ii) *Discounts offered to either department store employees or employees of the leased section.* If the requirements of this paragraph (d) are satisfied, employees of the leased section may receive qualified employee discounts at the department store regardless of whether employees of the department store are offered discounts at the leased section. Similarly, regardless of whether employees of the leased section are offered discounts at the department store, employees of the department store may receive qualified employee discounts at the leased section.

(e) *Excess discounts.* Unless excludable under a statutory provision other than section 132(a)(2), an employee discount provided on property is excludable to the extent of the gross profit percentage multiplied by the price at which the property is being offered for sale to customers. If an employee discount exceeds the gross profit percentage, the excess discount is includible in the employee's income. For example, if the discount on property is 30 percent and the employer's gross profit percentage for the period in the relevant line of business is 25 percent, then 5 percent of the price at which the property is being offered for sale to customers is includible in the emloyee's income. With respect to services, an employee discount of up to 20 percent may be excludable. If an employee discount exceeds 20 percent, the excess discount is includible in the employee's income.

[T.D. 8063, 50 FR 52299, Dec. 23, 1985, as amended by T.D. 8256, 54 FR 28600, July 6, 1989]

§ 1.132–4 Line of business limitation.

(a) *In general*—(1) *Applicability*—(i) *General rule.* A no-additional-cost service or a qualified employee discount provided to an employee is only available with respect to property or services that are offered for sale to customers in the ordinary course of the same line of business in which the employee receiving the property or service performs substantial services. Thus, an employee who does not perform substantial services in a particular line of business of the employer may not exclude from income under section 132 (a)(1) or (a)(2) the value of services or employee discounts received on property or services in that line of business. For rules that relax the line of business requirement, see paragraphs (b) through (g) of this section.

(ii) *Property and services sold to employees rather than customers.* Because the property or services must be offered for sale to customers in the ordinary course of the same line of business in which the employee performs substantial services, the line of business limitation is not satisfied if the employer's products or services are sold primarily to employees of the employer, rather than to customers. Thus, for example, an employer in the banking line of business is not considered in the variety store line of business if the employer establishes an employee store that offers variety store items for sale to the employer's employees. See §1.132–7 for rules relating to employer-operated eating facilities, and see §1.132–1(e) for rules relating to employer-operated on-premises athletic facilities.

(iii) *Performance of substantial services in more than one line of business.* An employee who performs services in more than one of the employer's lines of business may only exclude no-additional-cost services and qualified employee discounts in the lines of business in which the employee performs substantial services.

(iv) *Performance of services that directly benefit more than one line of business*—(A) *In general.* An employee who performs substantial services that directly benefit more than one line of business of an employer is treated as performing substantial services in all such line of business. For example, an employee who maintains accounting records for an employer's three lines of business may receive qualified employee discounts in all three lines of business. Similarly, if an employee of a minor line of business of an employer that is significantly interrelated with a major line of business of the employer performs substantial services that directly benefit both the major and the minor lines of business, the employee is treated as performing substantial services for both the major and the minor lines of business.

(B) *Examples.* The rules provided in this paragraph (a)(1)(iv) are illustrated by the following examples:

Example 1. Assume that employees of units of an employer provide repair or financing services, or sell by catalog, with respect to retail merchandise sold by the employer. Such employees may be considered to perform substantial services for the retail merchandise line of business under paragraph (a)(1)(iv)(A) of this section.

Example 2. Assume that an employer operates a hospital and a laundry service. Assume further that some of the gross receipts of the laundry service line of business are from laundry services sold to customers other than the hospital employer. Only the employees of the laundry service who perform substantial services which directly benefit the hospital line of business (through the provision of laundry services to the hospital) will be treated as performing substantial services for the hospital line of business. Other employees of the laundry service line of business will not be treated as employees of the hospital line of business.

Example 3. Assume the same facts as in example (2), except that the employer also operates a chain of dry cleaning stores. Employees who perform substantial services which directly benefit the dry cleaning stores but who do not perform substantial services that directly benefit the hospital line of business will not be treated as performing substantial services for the hospital line of business.

(2) *Definition*—(i) *In general.* An employer's line of business is determined by reference to the Enterprise Standard Industrial Classification Manual (ESIC Manual) prepared by the Statistical Policy Division of the U.S. Office of Management and Budget. An employer is considered to have more than one line of business if the employer offers for sale to customers property or services in more than one two-digit code classification referred to in the ESIC Manual.

(ii) *Examples.* Examples of two-digit classifications are general retail merchandise stores; hotels and other lodging places; auto repair, services, and garages; and food stores.

(3) *Aggregation of two-digit classifications.* If, pursuant to paragraph (a)(2) of this section, an employer has more than one line of business, such lines of business will be treated as a single line of business where and to the extent that one or more of the following aggregation rules apply:

(i) If it is uncommon in the industry of the employer for any of the separate lines of business of the employer to be operated without the others, the separate lines of business are treated as one line of business.

(ii) If it is common for a substantial number of employees (other than those employees who work at the headquarters or main office of the employer) to perform substantial services for more than one line of business of the employer, so that determination of which employees perform substantial services for which line or lines of business would be difficult, then the separate lines of business of the employer in which such employees perform substantial services are treated as one line of business. For example, assume that an employer operates a delicatessen with an attached service counter at which food is sold for consumption on the premises. Assume further that most but not all employees work both at the delicatessen and at the service counter. Under the aggregation rule of this paragraph (a)(3)(ii), the delicatessen and the service counter are treated as one line of business.

(iii) If the retail operations of an employer that are located on the same premises are in separate lines of business but would be considered to be within one line of business under paragraph (a)(2) of this section if the merchandise offered for sale in such lines of business were offered for sale at a department store, then the operations are treated as one line of business. For example, assume that on the same premises an employer sells both women's apparel and jewelry. Because, if sold together at a department store, the operations would be part of the same line of business, the operations are treated as one line of business.

(b) *Grandfather rule for certain retail stores*—(1) *In general.* The line of business limitation may be relaxed under the special grandfather rule of this paragraph (b). Under this special grandfather rule, if—

(i) On October 5, 1983, at least 85 percent of the employees of one member of an affiliated group (as defined in section 1504 without regard to subsections (b)(2) and (b)(4) thereof) (''first member'') were entitled to receive employee discounts at retail department stores operated by another member of the affiliated group (''second member''), and

(ii) More than 50 percent of the previous year's sales of the affiliated group are attributable to the operation of retail department stores, then, for purposes of the exclusion from gross income of a qualified employee discount, the first member is treated as engaged in the same line of business as the second member (the opeator of the retail department stores). Therefore, employees of the first member of the affiliated group may exclude from income qualified employee discounts received at the retail department stores operated by the second member. However, employees of the second member of the affiliated group may not under this paragraph (b)(1) exclude any discounts received on property or services offered for sale to customers by the first member of the affiliated group.

(2) *Taxable year of affiliated group.* If not all of the members of an affiliated group have the same taxable year, the affiliated group must designate the 12-month period to be used in determining the ''previous year's sales'' (as referred to in the grandfather rule of this paragraph (b)). The 12-month period designated, however, must be used on a consistent basis.

(3) *Definition of ''sales.''* For purposes of this paragraph (b), the term ''sales'' means the gross receipts of an affiliated group, based upon the accounting methods used by its members.

(4) *Retired and disabled employees.* For purposes of this paragraph (b), an employee includes any individual who was, or whose spouse was, formerly employed by the first member of an affiliated group and who separated from service with the member by reason of retirement or disability if the second member of the group provided employee discounts to that individual on October 5, 1983.

(5) *Increase of employee discount.* If, after October 5, 1983, the employee discount described in this paragraph (b) is increased, the grandfather rule of this paragraph (b) does not apply to the amount of the increase. For example, if on January 1, 1989, the employee discount is increased from 10 percent to 15 percent, the grandfather rule will not apply to the additional 5 percent discount.

(c) *Grandfather rule for telephone service provided to predivestiture retirees.* All entities subject to the modified final judgment (as defined in section 559(c)(5) of the Tax Reform Act of 1984) shall be treated as a single employer engaged in the same line of business for purposes of determining whether telephone service provided to certain employees is a no-additional-cost service. The preceding sentence applies only in the case of an employee who by reason of retirement or disability separated before January 1, 1984, from the service of an entity subject to the modified final judgment. This paragraph (c) only applies to services provided to such employees as of January 1, 1984. For a special no-additional-cost service rule relating to such employees and such services, see §1.132–2(a)(6).

(d) *Special rule for certain affiliates of commercial airlines*—(1) *General rule.* If a qualified affiliate is a member of an airline affiliated group and employees of the qualified affiliate who are directly engaged in providing airline-related services are entitled to no-additional-cost service with respect to air transportation provided by such other member, then, for purposes of applying §1.132–2 (relating to no-additional-cost services with respect to such air transportation), such qualified affiliate shall be treated as engaged in the same line of business as such other member.

(2) *''Airline affiliated group'' defined.* An ''airline affiliated group'' is an affiliated group (as defined in section 1504 (a)) one of whose members operates a commercial airline that provides air transportation to customers on a per-seat basis.

(3) *''Qualified affiliate'' defined.* A ''qualified affiliate'' is any corporation that is predominantly engaged in providing airline-related services. The term ''airline-related services'' means any of the following services provided in connection with air transportation:

(i) Catering,

(ii) Baggage handling,

(iii) Ticketing and reservations,

(iv) Flight planning and weather analysis, and

(v) Restaurants and gift shops located at an airport.

(e) *Grandfather rule for affiliated groups operating airlines.* The line of business limitation may be relaxed under the special grandfather rule of this paragraph (e). Under this special grandfather rule, if, as of September 12, 1984—

(1) An individual—

(i) Was an employee (within the meaning of §1.132–1 (b)) of one member of an affiliated group (as defined in section 1504(a)) (''first corporation''), and

(ii) Was eligible for no-additional-cost services in the form of air transportation provided by another member of such affiliated group (''second corporation''),

(2) At least 50 percent of the individuals performing services for the first corporation were, or had been employees of, or had previously performed services for, the second corporation, and

(3) The primary business of the affiliated group was air transportation of passengers, then, for purposes of applying sections 132(a) (1) and (2), with respect to no-additional-cost services and qualified employee discounts provided after December 31, 1984, for that individual by the second corporation, the first corporation is treated as engaged in the same air transporation line of business as the second corporation. For purposes of the preceding sentence, an employee of the second corporation who is performing services for the first corporation is also treated as an employee of the first corporation.

(f) *Special rule for qualified air transportation organizations.* A qualified air transportation organization is treated as engaged in the line of business of providing air transportation with respect to any individual who performs services for the organization if those services are peformed primarily for persons engaged in providing air transportation, and are of a kind which (if performed on September 12, 1984) would qualify the individual for no-additional-cost services in the form of air transportation. The term ''qualified air transportation organization'' means any organization—

(1) If such organization (or a predecessor) was in existence on September 12, 1984,

(2) If such organization is—

(i) A tax-exempt organization under section(c)(6) whose membership is limited to entities engaged in the transportation by air of individuals or property for compensation or hire, or

(ii) Is a corporation all the stock of which is owned entirely by entities described in paragraph (f)(2)(i) of this section, and

(3) If such organization is operated in furtherance of the activities of its members or owners.

(g) *Relaxation of line of business requirement.* The line of business requirement may be relaxed under an elective grandfather rule provided in section 4977. For rules relating to the section 4977 election, see §54.4977–1T.

(h) *Line of business requirement does not expand benefits eligible for exclusion.* The line of business requirement limits the benefits eligible for the no-additional-cost service and qualified employee discount exclusions to property or services provided by an employer to its customers in the ordinary course of the line of business of the employer in which the employee performs substantial services. The requirement is intended to ensure that employers do not offer, on a tax-free or reduced basis, property or services to employees that are not offered to the employer's customers, even if the property or services offered to the customers and the employees are within the same line of business (as defined in this section).

[T.D. 8256, 54 FR 28606, July 6, 1989]

§ 1.132–4T Line of business limitation—1985 through 1988 (temporary).

(a) *In general*—(1) *Applicability*—(i) *General rule.* A no-additional-cost service or qualified employee discount provided to an employee must be for property or services that are offered for sale to customers in the ordinary course of the same line of business in which the employee receiving the property or service performs substantial services. Thus, an employee who does not perform substantial services in a particular line of business of the employer may not exclude the value of services or employee discounts received on property or services in that line of business.

(ii) *Property and services sold to employees rather than customers.* Since the property or services must be offered for sale to customers in the ordinary course of the same line of business in which the employee performs substantial services, the line of business limitation is not satisfied if the employer's products or services are sold to employees of the employer, rather than to customers. Thus, for example, an employer in the banking line of business is not considered in the variety store line of business if the employer establishes an employee store that offers variety store items for sale to the employer's employees.

(iii) *Performance of substantial services in more than one line of business.* An employee who performs services in more than one of the employer's lines of business may only exclude no-additional-cost services and qualified employee discounts in the lines of business in which the employee performs substantial services.

(iv) *Performance of services that directly benefit more than one line of business*—(A) *In general.* An employee who performs substantial services that directly benefit more than one line of business of an employer is treated as performing substantial services in all such lines of business. For example, an employee who maintains accounting records for an employer's three lines of business may receive qualified employee discounts in all three lines of business.

(B) *Significantly interrelated minor line of business.* The employees of a minor line of business of an employer that is significantly interrelated with a major line of business of the employer who perform substantial services that directly benefit both the major and the minor lines of business are treated as employees of both the major and the minor lines of business. Employees of the minor line of business who do not perform substantial services which directly benefit the major line of business are not treated as employees of the major line of business. A minor line of business is significantly interrelated with a major line of business when, for example, the activity of the minor line of business is directly related to but is a minor part of the major line of business (such as laundry services provided at a hospital).

(C) *Examples.* The rules provided in this paragraph are illustrated in the following examples:

Example 1. Assume that employees of units of an employer provide repair or financing services, or sell by catalog, with respect to retail merchandise sold by the employer. Such employees may be considered as employees of the retail merchandise line of business under this paragraph (a)(1)(iv).

Example 2. Assume that an employer operates a hospital and a laundry service. Assume further that some of the gross receipts of the laundry service line of business are from laundry services sold to customers other than the hospital employer. Only the employees of the laundry service who perform substantial services which directly benefit the hospital line of business (through the provision of laundry services to the hospital) will be treated as employees of the hospital line of business. Other employees of the laundry service line of business will not be treated as employees of the hospital line of business.

Example 3. Assume the same facts as in example (2), except that the minor line of business also operates a chain of dry cleaning stores. Employees who perform substantial services which directly benefit the dry cleaning stores but who do not perform substantial services that directly benefit the hospital line of business will not be treated as employees of the hospital line of business.

(2) *Definition*—(i) *In general.* An employer's line of business is determined by reference to the Enterprise Standard Industrial Classification Manual (ESIC Manual) prepared by the Statistical Policy Division of the U.S. Office of Management and Budget. An employer is considered to have more than one line of business if the employer offers for sale to customers property or services in more than one two-digit code classification referred to in the ESIC Manual.

(ii) *Examples.* Examples of two-digit classifications are general retail merchandise stores; hotels and other lodging places; auto repair, services, and garages; and food stores.

(3) *Aggregation of two-digit classifications.* If, pursuant to paragraph (a)(2) of this section, an employer has more than one line of business, such lines of business will be treated as a single line of business where and to the extent that one or more of the following aggregation rules apply:

(i) If it is uncommon in the industry of the employer for any of the separate lines of business of the employer to be operated without the others, the separate lines of business are treated as one line of business.

(ii) If it is common for a substantial number of employees (other than those employees who work at the headquarters or main office of the employer) to perform substantial services for more than one line of business of the employer, so that determination of which employees perform substantial services for which line of business would be difficult, then the separate lines of business of the employer in which such employees perform substantial services are treated as one line of business. For example, assume that an employer operates a delicatessen with an attached service counter at which food is sold for consumption on the premises. Assume further that most but not all employees work both at the delicatessen and at the service counter. The delicatessen and the service counter are treated as one line of business.

(iii) If the retail operations of an employer that are located on the same premises are in separate lines of business but would be considered to be within one line of business under paragraph (a)(2) of this section if the merchandise offered for sale in such lines of business were offered for sale at a department store, then the operations are treated as one line of business. For example, assume that on the same premises an employer sells both women's apparel and jewelry. Since, if sold together at a department store, the operations would be part of the same line of business, the operations are treated as one line of business.

(b) *Grandfather rule for certain retail stores*—(1) *In general.* The line of business limitation may be relaxed under a special grandfather rule. If—

(i) On October 5, 1983, 85 percent of the employees of one member of an affiliated group (as defined in section 1504 without regard to subsections (b)(2) and (b)(4) thereof) were entitled to employee discounts at retail department stores operated by another member of the affiliated group, and

(ii) More than 50 percent of the current year's sales of the affiliated group are attributable to the operation of retail department stores,

then for purposes of the exclusion from gross income of a qualified employee discount, the first member is treated as engaged in the same line of business as the second member (the operator of the retail department stores). Therefore, employees of the first member of the affiliated group may exclude qualified employee discounts received at the retail department stores operated by the second member. However, employees of the second member of the affiliated group may not exclude any discounts received on property or services offered for sale to customers by the first member of the affiliated group.

(2) *Taxable year of affiliated group.* If all of the members do not have the same taxable year, the affiliated group must designate the 12-month period to be used in determining the ''current year's sales'' (as referred to in this paragraph (b)). The 12-month period designated, however, must be used consistently.

(3) *Definition of ''sales''.* For purposes of this paragraph (b), the term ''sales'' means the gross receipts of the affiliated group, based upon the accounting methods used by its members.

(4) *Retired and disabled employees.* For purposes of this paragraph (b), an employee includes any individual who was, or whose spouse was, formerly employed by the first member of the affiliated group and who separated from service with the member by reason of retirement or disability if the second member of the group provided employee discounts to such individuals on October 5, 1983.

(5) *Increase of employee discount.* If, after October 5, 1983, the employee discount described in this paragraph (b) is increased, the grandfather rule of this paragraph (b) does not apply to the amount of the increase. For example, if on January 1, 1985, the employee discount is increased from 10 percent to 15 percent, the grandfather rule will not apply to the additional five percent discount.

(c) *Relaxation of line of business requirement.* The line of business requirement may be relaxed under an elective grandfather rule provided in section 4977. For rules relating to the section 4977 election, see §54.4977–1.

[T.D. 8063, 50 FR 52301, Dec. 23, 1985, as amended by T.D. 8256, 54 FR 28600, July 6, 1989]

§ 1.132–5 Working condition fringes.

(a) *In general*—(1) *Definition.* Gross income does not include the value of a working condition fringe. A ''working condition fringe'' is any property or service provided to an employee of an employer to the extent that, if the employee paid for the property or service, the amount paid would be allowable as a deduction under section 162 or 167.

(i) A service or property offered by an employer in connection with a flexible spending account is not excludable from gross income as a working condition fringe. For purposes of the preceding sentence, a flexible spending account is an agreement (whether or not written) entered into between an employer and an employee that makes available to the employee over a time period a certain level of unspecified non-cash benefits with a pre-determined cash value.

(ii) If, under section 274 or any other section, certain substantiation requirements must be met in order for a deduction under section 162 or 167 to be allowable, then those substantiation requirements apply when determining whether a property or service is excludable as a working condition fringe.

(iii) An amount that would be deductible by the employee under a section other than section 162 or 167, such as section 212, is not a working condition fringe.

(iv) A physical examination program provided by the employer is not excludable as a working condition fringe even if the value of such program might be deductible to the employee under section 213. The previous sentence applies without regard to whether the employer makes the program mandatory to some or all employees.

(v) A cash payment made by an employer to an employee will not qualify as a working condition fringe unless the employer requires the employee to—

(A) Use the payment for expenses in connection with a specific or pre-arranged activity or undertaking for which a deduction is allowable under section 162 or 167,

(B) Verify that the payment is actually used for such expenses, and

(C) Return to the employer any part of the payment not so used.

(vi) The limitation of section 67(a) (relating to the two-percent floor on miscellaneous itemized deductions) is not considered when determining the amount of a working condition fringe. For example, assume that an employer provides a $1,000 cash advance to Employee A and that the conditions of paragraph (a)(1)(v) of this section are not satisfied. Even to the extent A uses the allowance for expenses for which a deduction is allowable under section 162 and 167, because such cash payment is not a working condition fringe, section 67(a) applies. The $1,000 payment is includible in A's gross income and subject to income and employment tax withholding. If, however, the conditions of paragraph (a)(1)(v) of this section are satisfied with respect to the payment, then the amount of A's working condition fringe is determined without regard to section 67(a). The $1,000 payment is excludible from A's gross income and not subject to income and employment tax reporting and withholding.

(2) *Trade or business of the employee*—(i) *General*. If the hypothetical payment for a property or service would be allowable as a deduction with respect to a trade or business of an employee other than the employee's trade or business of being an employee of the employer, it cannot be taken into account for purposes of determining the amount, if any, of the working condition fringe.

(ii) *Examples*. The rule of paragraph (a)(2)(i) of this section may be illustrated by the following examples:

Example 1. Assume that, unrelated to company X's trade or business and unrelated to employee A's trade or business of being an employee of company X, A is a member of the board of directors of company Y. Assume further that company X provides A with air transportation to a company Y board of director's meeting. A may not exclude from gross income the value of the air transportation to the meeting as a working condition fringe. A may, however, deduct such amount under section 162 if the section 162 requirements are satisfied. The result would be the same whether the air transportation was provided in the form of a flight on a commercial airline or a seat on a company X airplane.

Example 2. Assume the same facts as in example (1) except that A serves on the board of directors of company Z and company Z regularly purchases a significant amount of goods and services from company X. Because of the relationship between Company Z and A's employer, A's membership on Company Z's board of directors is related to A's trade or business of being an employee of Company X. Thus, A may exclude from gross income the value of air transportation to board meetings as a working condition fringe.

Example 3. Assume the same facts as in example (1) except that A serves on the board of directors of a charitable organization. Assume further that the service by A on the charity's board is substantially related to company X's trade or business. In this case, A may exclude from gross income the value of air transportation to board meetings as a working condition fringe.

Example 4. Assume the same facts as in example (3) except that company X also provides A with the use of a company X conference room which A uses for monthly meetings relating to the charitable organization. Also assume that A uses company X's copy machine and word processor each month in connection with functions of the charitable organization. Because of the substantial business benefit that company X derives from A's service on the board of the charity, A may exclude as a working condition fringe the value of the use of company X property in connection with the charitable organization.

(b) *Vehicle allocation rules*—(1) *In general*—(i) *General rule.* In general, with respect to an employer-provided vehicle, the amount excludable as a working condition fringe is the amount that would be allowable as a deduction under section 162 or 167 if the employee paid for the availability of the vehicle. For example, assume that the value of the availability of an employer-provided vehicle for a full year is $2,000, without regard to any working condition fringe (*i.e.*, assuming all personal use). Assume Further that the employee drives the vehicle 6,000 miles for his employer's business and 2,000 miles for reasons other than the employer's business. In this situation, the value of the working condition fringe is $2,000 multiplied by a fraction, the numerator of which is the business-use mileage (6,000 miles) and the denominator of which is the total mileage (8,000 miles). Thus, the value of the working condition fringe is $1,500. The total amount includible in the employee's gross income on account of the availability of the vehicle is $500 ($2,000 − $1,500). For purposes of this section, the term ''vehicle'' has the meaning given the term in §1.61–21(e)(2). Generally, when determining the amount of an employee's working condition fringe, miles accumulated on the vehicle by all employees of the employer during the period in which the vehicle is available to the employee are considered. For example, assume that during the year in which the vehicle is available to the employee in the above example, other employees accumulate 2,000 additional miles on the vehicle (while the employee is not in the automobile). In this case, the value of the working condition fringe is $2,000 multiplied by a fraction, the numerator of which is the business-use mileage by the employee (including all mileage (business and personal) accumulated by other employees) (8,000 miles) and the denominator of which is the total mileage (including all mileage accumulated by other employees) (10,000 miles). Thus, the value of the working condition fringe is $1,600; the total amount includible in the employee's gross income on account of the availability of the vehicle is $400 ($2,000 − $1,600). If, however, substantially all of the use of the automobile by other employees in the employer's business is limited to a certain period, such as the last three months of the year, the miles driven by the other employees during that period would not be considered when determining the employee's working condition fringe exclusion. Similarly, miles driven by other employees are not considered if the pattern of use of the employer-provided automobiles is designed to reduce Federal taxes. For example, assume that an employer provides employees A and B each with the availability of an employer-provided automobile and that A uses the automobile assigned to him 80 percent for the employer's business and that B uses the automobile assigned to him 30 percent for the employer's business. If A and B alternate the use of their assigned automobiles each week in such a way as to achieve a reduction in federal taxes, then the employer may count only miles placed on the automobile by the employee to whom the automobile is assigned when determining each employee's working condition fringe.

(ii) *Use by an individual other than the employee.* For purposes of this section, if the availability of a vehicle to an individual would be taxed to an employee, use of the vehicle by the individual is included in references to use by the employee.

(iii) *Provision of an expensive vehicle for personal use.* If an employer provides an employee with a vehicle that an employee may use in part for personal purposes, there is no working condition fringe exclusion with respect to the personal miles driven by the employee; if the employee paid for the availability of the vehicle, he would not be entitled to deduct under section 162 or 167 any part of the payment attributable to personal miles. The amount of the inclusion is not affected by the fact that the employee would have chosen the availability of a less expensive vehicle. Moreover, the result is the same even though the decision to provide an expensive rather than an inexpensive vehicle is made by the employer for bona fide noncompensatory business reasons.

(iv) *Total value inclusion.* In lieu of excluding the value of a working condition fringe with respect of an automobile, an employer using the automobile lease valuation rule of §1.61–21(d) may include in an employee's gross income the entire Annual Lease Value of the automobile. Any deduction allowable to the employee under section 162 or 167 with respect to the automobile may be taken on the employee's income tax return. The total inclusion rule of this paragraph (b)(1)(iv) is not available if the employer is valuing the use or availability of a vehicle under general valuation principles or a special valuation rule other than the automobile lease valuation rule. See §§1.162–25 and 1.162–25T for rules relating to the employee's deduction.

(v) *Shared usage.* In calculating the working condition fringe benefit exclusion with respect to a vehicle provided for use by more than one employee, an employer shall compute the working condition fringe in a manner consistent with the allocation of the value of the vehicle under section 1.61–21(c)(2)(ii)(B).

(2) *Use of different employer-provided vehicles.* The working condition fringe exclusion must be applied on a vehicle-by-vehicle basis. For example, assume that automobile Y is available to employee D for 3 days in January and for 5 days in March, and automobile Z is available to D for a week in July. Assume further that the Daily Lease Value, as defined in §1.61–21(d)(4)(ii), of each automobile is $50. For the eight days of availability of Y in January and March, D uses Y 90 percent for business (by mileage). During July, D uses Z 60 percent for business (by mileage). The value of the working condition fringe is determined separately for each automobile. Therefore, the working condition fringe for Y is $360 ($400×.90) leaving an income inclusion of $40. The working condition fringe for Z is $210 ($350×.60), leaving an income inclusion of $140. If the value of the availability of an automobile is determined under the Annual Lease Value rule for one period and Daily Lease Value rule for a second period (see §1.61–21(d)), the working condition fringe exclusion must be calculated separately for the two periods.

(3) *Provision of a vehicle and chauffeur services*—(i) *General rule.* In general, with respect to the value of chauffeur services provided by an employer, the amount excludable as a working condition fringe is the amount that would be allowable as a deduction under section 162 and 167 if the employee paid for the chauffeur services. The working condition fringe with respect to a chauffeur is determined separately from the working condition fringe with respect to the vehicle. An employee may exclude from gross income the excess of the value of the chauffeur services over the value of the chauffeur services for personal purposes (such as commuting) as determined under §1.61–21(b)(5). See §1.61–21(b)(5) for additional rules and examples concerning the valuation of chauffeur services. See §1.132–5(m)(5) for rules relating to an exclusion from gross income for the value of bodyguard/chauffeur services. When determining whether miles placed on the vehicle are for the employer's business, miles placed on the vehicle by a chauffeur between the chauffeur's residence and the place at which the chauffeur picks up (or drops off) the employee are with respect to the employee (but not the chauffeur) considered to be miles placed on the vehicle for the employer's business and thus eligible for the working condition fringe exclusion.

Thus, because miles placed on the vehicle by a chauffeur between the chauffeur's residence and the place at which the chauffeur picks up (or drops off) the employee are not considered business miles with respect to the chauffeur, the value of the availability of the vehicle for commuting is includible in the gross income of the chauffeur. For general and special rules concerning the valuation of the use of employer-provided vehicles, see paragraphs (b) through (f) of §1.61–21.

(ii) *Examples.* The rules of paragraph (b)(3)(i) of this section are illustrated by the following examples:

Example 1. Assume that an employer makes available to an employee an automobile and a chauffeur. Assume further that the value of the chauffeur services determined in accordance with §1.61–21 is $30,000 and that the chauffeur spends 30 percent of each workday driving the employee for personal purposes. There may be excluded from the employee's income 70 percent of $30,000, or $21,000, leaving an income inclusion with respect to the chauffeur services of $9,000.

Example 2. Assume that the value of the availability of an employer-provided vehicle for a year is $4,850 and that the value of employer-provided chauffeur services with respect to the vehicle for the year is $20,000. Assume further that 40 percent of the miles placed on the vehicle are for the employer's business and that 60 percent are for other purposes. In addition, assume that the chauffeur spends 25 percent of each workday driving the employee for personal purposes (*i.e.*, 2 hours). The value of the chauffeur services includible in the employee's income is 25 percent of $20,000, or $5,000. The excess of $20,000 over $5,000 or $15,000 is excluded from the employee's income as a working condition fringe. The amount excludable as a working condition fringe with respect to the vehicle is 40 percent of $4,850, or $1,940 and the amount includible is $4,850 − $1,940, or $2,910.

(c) *Applicability of substantiation requirements of sections 162 and 274*(d)—(1) *In general.* The value of property or services provided to an employee may not be excluded from the employee's gross income as a working condition fringe, by either the employer or the employee, unless the applicable substantiation requirements of either section 274(d) or section 162 (whichever is applicable) and the regulations thereunder are satisfied. The substantiation requirements of section 274(d) apply to an employee even if the requirements of section 274 do not apply to the employee's employer for deduction purposes (such as when the employer is a tax-exempt organization or a governmental unit).

(2) *Section 274(d) requirements.* The substantiation requirements of section 274(d) are satisfied by ''adequate records or sufficient evidence corroborating the [employee's] own statement''. Therefore, such records or evidence provided by the employee, and relied upon by the employer to the extent permitted by the regulations promulgated under section 274(d), will be sufficient to substantiate a working condition fringe exclusion.

(d) *Safe harbor substantiation rules*—(1) *In general.* Section 1.274–6T provides that the substantiation requirements of section 274(d) and the regulations thereunder may be satisfied, in certain circumstances, by using one or more of the safe harbor rules prescribed in §1.274–6T. If the employer uses one of the safe harbor rules prescribed in §1.274–6T during a period with respect to a vehicle (as defined in §1.61–21(e)(2)), that rule must be used by the employer to substantiate a working condition fringe exclusion with respect to that vehicle during the period. An employer that is exempt from Federal income tax may still use one of the safe harbor rules (if the requirements of that section are otherwise met during a period) to substantiate a working condition fringe exclusion with respect to a vehicle during the period. If the employer uses one of the methods prescribed in §1.274–6T during a period with respect to an employer-provided vehicle, that method may be used by an employee to substantiate a working condition fringe exclusion with respect to the same vehicle during the period, as long as the employee includes in gross income the amount allocated to the employee pursuant to §1.274–6T and this section. (See §1.61–21(c)(2) for other rules concerning when an employee must include in income the amount determined by the employer.) If, however, the employer uses the safe harbor rule prescribed in §1.274–6T(a)(2) or (3) and the employee without the employer's knowledge uses the vehicle for purposes other than de minimis personal use (in the case of the rule prescribed in §1.274–6T(a)(2)), or for purposes other than de minimis personal use and commuting (in the case of the rule prescribed in §1.274–6T(a)(3)), then the employees must include an additional amount in income for the unauthorized use of the vehicle.

(2) *Period for use of safe harbor rules.* The rules prescribed in this paragraph (d) assume that the safe harbor rules prescribed in §1.274–6T are used for a one-year period. Accordingly, references to the value of the availability of a vehicle, amounts excluded as a working condition fringe, etc., are based on a one-year period. If the safe harbor rules prescribed in §1.274–6T are used for a period of less than a year, the amounts referred to in the previous sentence must be adjusted accordingly. For purposes of this section, the term ''personal use'' has the same meaning as prescribed in §1.274–6T (e)(5).

(e) *Safe harbor substantiation rule for vehicles not used for personal purposes.* For a vehicle described in §1.274–6T(a)(2) (relating to certain vehicles not used for personal purposes), the working condition fringe exclusion is equal to the value of the availability of the vehicle if the employer uses the method prescribed in §1.274–6T(a)(2).

(f) *Safe harbor substantiation rule for vehicles not available to employees for personal use other than commuting.* For a vehicle described in §1.274–6T(a)(3) (relating to certain vehicles not used for personal purposes other than commuting), the working condition fringe exclusion is equal to the value of the availability of the vehicle for purposes other than commuting if the employer uses the method prescribed in §1.274–6T(a)(3). This rule applies only if the special rule for valuing commuting use, as prescribed in §1.61–21(f), is used and the amount determined under the special rule is either included in the employee's income or reimbursed by the employee.

(g) *Safe harbor substantiation rule for vehicles used in connection with the business of farming that are available to employees for personal use*—(1) *In general.* For a vehicle described in §1.274–6T(b) (relating to certain vehicles used in connection with the business of farming), the working condition fringe exclusion is calculated by multiplying the value of the availability of the vehicle by 75 percent.

(2) *Vehicles available to more than one individual.* If the vehicle is available to more than one individual, the employer must allocate the gross income inclusion attributable to the vehicle (25 percent of the value of the availability of the vehicle) among the employees (and other individuals whose use would not be attributed to an employee) to whom the vehicle was available. This allocation must be done in a reasonable manner to reflect the personal use of the vehicle by the individuals. An amount that would be allocated to a sole proprietor reduces the amounts that may be allocated to employees but is otherwise to be disregarded for purposes of this paragraph (g). For purposes of this paragraph (g), the value of the availability of a vehicle may be calculated as if the vehicle were available to only one employee continuously and without regard to any working condition fringe exclusion.

(3) *Examples.* The following examples illustrate a reasonable allocation of gross income with respect to an employer-provided vehicle between two employees:

Example 1. Assume that two farm employees share the use of a vehicle that for a calendar year is regularly used directly in connection with the business of farming and qualifies for use of the rule in §1.274–6T(b). Employee A uses the vehicle in the morning directly in connection with the business of farming and employee B uses the vehicle in the afternoon directly in connection with the business of farming. Assume further that employee B takes the vehicle home in the evenings and on weekends. The employer should allocate all the income attributable to the availability of the vehicle to employee B.

Example 2. Assume that for a calendar year, farm employees C and D share the use of a vehicle that is regularly used directly in connection with the business of farming and qualifies for use of the rule in §1.2.4–6T(b). Assume further that the employees alternate taking the vehicle home in the evening and alternate the availability of the vehicle for personal purposes on weekends. The employer should allocate the income attributable to the availability of the vehicle for personal use (25 percent of the value of the availability of the vehicle) equally between the two employees.

Example 3. Assume the same facts as in example (2) except that C is the sole proprietor of the farm. Based on these facts, C should allocate the same amount of income to D as was allocated to D in example (2). No other income attributable to the availability of the vehicle for personal use should be allocated.

(h) *Qualified nonpersonal use vehicles*—(1) *In general.* Except as provided in paragraph (h)(2) of this section, 100 percent of the value of the use of a qualified nonpersonal use vehicle (as described in §1.274–5(k)) is excluded from gross income as a working condition fringe, provided that, in the case of a vehicle described in §1.274–5(k)(3) through (8), the use of the vehicle conforms to the requirements of paragraphs (k)(3) through (8).

(2) *Shared usage of qualified nonpersonal use vehicles.* In general, a working condition fringe under this paragraph (h) is available to the driver and all passengers of a qualified nonpersonal use vehicle. However, a working condition fringe under this paragraph (h) is available only with respect to the driver and not with respect to any passengers of a qualified nonpersonal use vehicle described in §1.274–5(k)(2)(ii)(L) or (P).

(i) [Reserved]

(j) *Application of section 280F.* In determining the amount, if any, of an employee's working condition fringe, section 280F and the regulations thereunder do not apply. For example, assume that an employee has available for a calendar year an employer-provided automobile with a fair market value of $28,000. Assume further that the special rule provided in §1.61–21(d) is used yielding an Annual Lease Value, as defined in §1.61–21(d), of $7,750, and that all of the employee's use of the automobile is for the employer's business. The employee would be entitled to exclude as a working condition fringe the entire Annual Lease Value, despite the fact that if the employee paid for the availability of the automobile, an income inclusion would be required under §1.280F–6(d)(1). This paragraph (j) does not affect the applicability of section 280F to the employer with respect to such employer-provided automobile, nor does it affect the applicability of section 274 to either the employer or the employee. For rules concerning substantiation of an employee's working condition fringe, see paragraph (c) of this section.

(k) *Aircraft allocation rule.* In general, with respect to a flight on an employer-provided aircraft, the amount excludable as a working condition fringe is the amount that would be allowable as a deduction under section 162 or 167 if the employee paid for the flight on the aircraft. For example, if employee P and P's spouse fly on P's employer's airplane primarily for business reasons of P's employer so that P could deduct the expenses relating to the trip to the extent of P's payments, the value of the flights is excludable from gross income as a working condition fringe. However, if P's children accompany P on the trip primarily for personal reasons, the value of the flights by P's children are includible in P's gross income. See §1.61–21 (g) for special rules for valuing personal flights on employer-provided aircraft.

(l) [Reserved]

(m) *Employer-provided transportation for security concerns*—(1) *In general.* The amount of a working condition fringe exclusion with respect to employer-provided transportation is the amount that would be allowable as a deduction under section 162 or 167 if the employee paid for the transportation. Generally, if an employee pays for transportation taken for primarily personal purposes, the employee may not deduct any part of the amount paid. Thus, the employee may not generally exclude the value of employer-provided transportation as a working condition fringe if such transportation is primarily personal. If, however, for bona fide business-oriented security concerns, the employee purchases transportation that provides him or her with additional security, the employee may generally deduct the excess of the amount actually paid for the transportation over the amount the employee would have paid for the same mode of transportation absent the bona fide business-oriented security concerns. This is the case whether or not the employee would have taken the same mode of transportation absent the bona fide business-oriented security concerns. With respect to a vehicle, the phrase "the same mode of transportation" means use of the same vehicle without the additional security aspects, such as bulletproof glass. With respect to air transportation, the phrase ''the same mode of transportation'' means comparable air transportation. These same rules apply to the determination of an employee's working condition fringe exclusion. For example, if an employer provides an employee with a vehicle for commuting and, because of bona fide business-oriented security concerns, the vehicle is specially designed for security, then the employee may exclude from gross income the value of the special security design as a working condition fringe. The employee may not exclude the value of the commuting from income as a working condition fringe because commuting is a nondeductible personal expense. However, if an independent security study meeting the requirements of paragraph (m)(2)(v) of this section has been performed with respect to a government employee, the government employee may exclude the value of the personal use (other than commuting) of the employer-provided vehicle that the security study determines to be reasonable and necessary for local transportation. Similarly, if an employee travels on a personal trip in an employer-provided aircraft for bona fide business-oriented security concerns, the employee may exclude the excess, if any, of the value of the flight over the amount the employee would have paid for the same mode of transportation, but for the bona fide business-oriented security concerns. Because personal travel is a nondeductible expense, the employee may not exclude the total value of the trip as a working condition fringe.

(2) *Demonstration of bona fide business-oriented security concerns*—(i) *In general.* For purposes of this paragraph (m), a bona fide business-oriented security concern exists only if the facts and circumstances establish a specific basis for concern regarding the safety of the employee. A generalized concern for an employee's safety is not a bona fide business-oriented security concern. Once a bona fide business-oriented security concern is determined to exist with respect to a particular employee, the employer must periodically evaluate the situation for purposes of determining whether the bona fide business-oriented security concern still exists. Example of factors indicating a specific basis for concern regarding the safety of an employee are—

(A) A threat of death or kidnapping of, or serious bodily harm to, the employee or a similarly situated employee because of either employee's status as an employee of the employer; or

(B) A recent history of violent terrorist activity (such as bombings) in the geographic area in which the transportation is provided, unless that activity is focused on a group of individuals which does not include the employee (or a similarly situated employee of an employer), or occurs to a significant degree only in a location within the geographic area where the employee does not travel.

(ii) *Establishment of overall security program.* Notwithstanding anything in paragraph (m)(2)(i) of this section to the contrary, no bona fide business-oriented security concern will be deemed to exist unless the employee's employer establishes to the satisfaction of the Commissioner that an overall security program has been provided with respect to the employee involved. An overall security program is deemed to exist if the requirements of paragraph (m)(2)(iv) of this section are satisfied (relating to an independent security study).

(iii) *Overall security program*—(A) *Defined.* An overall security program is one in which security is provided to protect the employee on a 24-hour basis. The employee must be protected while at the employee's residence, while commuting to and from the employee's workplace, and while at the employee's workplace. In addition, the employee must be protected while traveling both at home and away from home, whether for business or personal purposes. An overall security program must include the provision of a bodyguard/chauffeur who is trained in evasive driving techniques; an automobile specially equipped for security; guards, metal detectors, alarms, or similar methods of controlling access to the employee's workplace and residence; and, in appropriate cases, flights on the employer's aircraft for business and personal reasons.

(B) *Application.* There is no overall security program when, for example, security is provided at the employee's workplace but not at the employee's residence. In addition, the fact that an employer requires an employee to travel on the employer's aircraft, or in an employer-provided vehicle that contains special security features, does not alone constitute an overall security program. The preceding sentence applies regardless of the existence of a corporate or other resolution requiring the employee to travel in the employer's aircraft or vehicle for personal as well as business reasons.

(iv) *Effect of an independent security study.* An overall security program with respect to an employee is deemed to exist if the conditions of this paragraph (m)(2)(iv) are satisfied:

(A) A security study is performed with respect to the employer and the employee (or a similarly situated employee of the employer) by an independent security consultant;

(B) The security study is based on an objective assessment of all facts and circumstances;

(C) The recommendation of the security study is that an overall security program (as defined in paragraph (m)(2)(iii) of this section) is not necessary and the recommendation is reasonable under the circumstances; and

(D) The employer applies the specific security recommendations contained in the security study to the employee on a consistent basis.

The value of transportation-related security provided pursuant to a security study that meets the requirements of this paragraph (m)(2)(iv) may be excluded from income if the security study conclusions are reasonable and, but for the bona fide business-oriented security concerns, the employee would not have had such security. No exclusion from income applies to security provided by the employer that is not recommended in the security study. Security study conclusions may be reasonable even if, for example, it is recommended that security be limited to certain geographic areas, as in the case in which air travel security is provided only in certain foreign countries.

(v) *Independent security study with respect to government employees.* For purposes of establishing the existence of an overall security program under paragraph (m)(2)(ii) of this section with respect to a particular government employee, a security study conducted by the government employer (including an agency or instrumentality thereof) will be treated as a security study pursuant to paragraph (m)(2)(iv) of this section if, in lieu of the conditions of paragraphs (m)(2)(iv)(A) through (D) of this section, the following conditions are satisfied:

(A) The security study is conducted by a person expressly designated by the government employer as having the responsibility and independent authority to determine both the need for employer-provided security and the appropriate protective services in response to that determination;

(B) The security study is conducted in accordance with written internal procedures that require an independent and objective assessment of the facts and circumstances, such as the nature of the threat to the employee, the appropriate security response to that threat, an estimate of the length of time protective services will be necessary, and the extent to which employer-provided transportation may be necessary during the period of protection;

(C) With respect to employer-provided transportation, the security study evaluates the extent to which personal use, including commuting, by the employee and the employee's spouse and dependents may be necessary during the period of protection and makes a recommendation as to what would be considered reasonable personal use during that period; and

(D) The employer applies the specific security recommendations contained in the study to the employee on a consistent basis.

(3) *Application of security rules to spouses and dependents*—(i) *In general.* If a bona fide business-oriented security concern exists with respect to an employee (because, for example, threats are made on the life of an employee),

the bona fide business-oriented security concern is deemed to exist with respect to the employee's spouse and dependents to the extent provided in this paragraph (m)(3).

(ii) *Certain transportation.* If a working condition fringe exclusion is available under this paragraph (m) for transportation in a vehicle or aircraft provided for a bona fide business-oriented security concern with respect to an employee, the requirements of this paragraph (m) are deemed to be satisfied with respect to transportation in the same vehicle or aircraft provided at the same time to the employee's spouse and dependent children.

(iii) *Other.* Except as provided in paragraph (m)(3)(ii) of this section, a bona fide business oriented security concern is deemed to exist for the spouse and dependent children of the employer only if the requirements of paragraph (m)(2) (iii) or (iv) of this section are applied independently to such spouse and dependent children.

(iv) *Spouses and dependents of government employees.* The security rules of this paragraph (m)(3) apply to the spouse and dependents of a government employee. However, the value of local vehicle transportation provided to the government employee's spouse and dependents for personal purposes, other than commuting, during the period that a bona fide business-oriented security concern exists with respect to the government employee will not be included in the government employee's gross income if the personal use is determined to be reasonable and necessary by the security study described in paragraph (m)(2)(v) of this section.

(4) *Working condition safe harbor for travel on employer-provided aircraft.* Under the safe harbor rule of this paragraph (m)(4), if, for a bona fide business-oriented security concern, the employer requires that an employee travel on an employer-provided aircraft for a personal trip, the employer and the employee may exclude from the employee's gross income, as a working condition fringe, the excess value of the aircraft trip over the safe harbor airfare without having to show what method of transportation the employee would have flown but for the bona fide business-oriented security concern. For purposes of the safe harbor rule of this paragraph (m)(4), the value of the safe harbor airfare is determined under the non-commercial flight valuation rule of §1.61–21(g) (regardless of whether the employer or employee elects to use such valuation rule) by multiplying an aircraft multiple of 200-percent by the applicable cents-per-mile rates and the number of miles in the flight and then adding the applicable terminal charge. The value of the safe harbor airfare determined under this paragraph (m)(4) must be included in the employee's income (to the extent not reimbursed by the employee) regardless of whether the employee or the employer uses the special valuation rule of §1.61–21(g). The excess of the value of the aircraft trip over this amount may be excluded from gross income as a working condition fringe. If, for a bona fide business-oriented security concern, the employer requires that an employee's spouse and dependents travel on an employer-provided aircraft for a personal trip, the special rule of this paragraph (m)(4) is available to exclude the excess value of the aircraft trips over the safe harbor airfares.

(5) *Bodyguard/chauffeur provided for a bona fide business-oriented security concern.* If an employer provides an employee with vehicle transportation and a bodyguard/chauffeur for a bona fide business-oriented security concern, and but for the bona fide business-oriented security concern the employee would not have had a bodyguard or a chauffeur, then the entire value of the services of the bodyguard/chauffeur is excludable from gross income as a working condition fringe. For purposes of this section, a bodyguard/chauffeur must be trained in evasive driving techniques. An individual who performs services as a driver for an employee is not a bodyguard/chauffeur if the individual is not trained in evasive driving techniques. Thus, no part of the value of the services of such an individual is excludable from gross income under this paragraph (m)(5). (See paragraph (b)(3) of this section for rules relating to the determination of the working condition fringe exclusion for chauffeur services.)

(6) *Special valuation rule for government employees.* If transportation is provided to a government employee for commuting during the period that a bona fide business-oriented security concern under § 1.132–5(m) exists, the commuting use may be valued by reference to the values set forth in § 1.61–21(e)(1)(i) or (f)(3) (vehicle cents-per-mile or commuting valuation of $1.50 per one-way commute, respectively) without regard to the additional requirements contained in § 1.61–21 (e) or (f) and is deemed to have met the requirements of § 1.61–21(c).

(7) *Government employer and employee defined.* For purposes of this paragraph (m), ''government employer'' includes any Federal, State, or local government unit, and any agency or instrumentality thereof. A ''government employee'' is any individual who is employed by the government employer.

(8) *Examples.* The provisions of this paragraph (m) may be illustrated by the following examples:

Example 1. Assume that in response to several death threats on the life of A, the president of X a multinational company, X establishes an overall security program for A, including an alarm system at A's home and guards at A's workplace, the use of a vehicle that is specially equipped with alarms, bulletproof glass, and armor plating, and a bodyguard/chauffeur. Assume further that A is driven for both personal and business reasons in the vehicle. Also, assume that but for the bona fide business-oriented security concerns, no part of the overall security program would have been provided to A. With respect to the transportation provided for security reasons, A may exclude as a working condition fringe the value of the special security features of the vehicle and the value attributable to the bodyguard/chauffeur. Thus, if the value of the specially equipped vehicle is $40,000, and the value of the vehicle without the security features is $25,000, A may determine A's inclusion in income attributable to the vehicle as if the vehicle were worth $25,000. A must include in income the value of the availability of the vehicle for personal use.

Example 2. Assume that B is the chief executive officer of Y, a multinational corporation. Assume further that there have been kidnapping attempts and other terrorist activities in the foreign countries in which B performs services and that at least some of such activities have been directed against B or similarly situated employees. In response to these activities, Y provides B with an overall security program, including an alarm system at B's home and bodyguards at B's workplace, a bodyguard/chauffeur, and a vehicle specially designed for security during B's overseas travels. In addition, assume that Y requires B to travel in Y's airplane for business and personal trips taken to, from, and within these foreign countries. Also, assume that but for bona fide business-oriented security concerns, no part of the overall security program would have been provided to B. B may exclude as a working condition fringe the value of the special security features of the automobile and the value attributable to the bodyguards and the bodyguard/chauffeur. B may also exclude the excess, if any, of the value of the flights over the amount A would have paid for the same mode of transportation but for the security concerns. As an alternative to the preceding sentence, B may use the working condition safe harbor described in paragraph (m)(4) of this section and exclude as a working condition fringe the excess, if any, of the value of personal flights in the Y airplane over the safe harbor airfare determined under the method described in paragraph (m)(4) of this section. If this alternative is used, B must include in income the value of the availability of the vehicle for personal use and the value of the safe harbor.

Example 3. Assume the same facts as in example (2) except that Y also requires B to travel in Y's airplane within the United States, and provides B with a chauffeur-driven limousine for business and personal travel in the United States. Assume further that Y also requires B's spouse and dependents to travel in Y's airplane for personal flights in the United States. If no bona fide business-oriented security concern exists with respect to travel in the United States, B may not exclude from income any portion of the value of the availability of the chauffeur or limousine for personal use in the United States. Thus, B must include in income the value of the availability of the vehicle and chauffeur for personal use. In addition, B may not exclude any portion of the value attributable to personal flights by B or B's spouse and dependents on Y's airplane. Thus, B must include in income the value attributable to the personal use of Y's airplane. See § 1.61–21 for rules relating to the valuation of an employer-provided vehicle and chauffeur, and personal flights on employer-provided airplanes.

Example 4. Assume that company Z retains an independent security consultant to perform a security study with respect to its chief executive officer. Assume further that, based on an objective assessment of the facts and circumstances, the security consultant reasonably recommends that 24-hour protection is not necessary but that the employee be provided security at his workplace and for ground transportation, but not for air transportation. If company Z follows the recommendations on a consistent basis, an overall security program will be deemed to exist with respect to the workplace and ground transportation security only.

Example 5. Assume the same facts as in example (4) except that company Z only provides the employee security while commuting to and from work, but not for any other ground transportation. Because the recommendations of the independent security study are not applied on a consistent basis, an overall security program will not be deemed to exist. Thus, the value of commuting to and from work is not excludable from income. However, the value of a bodyguard with professional security training who does not provide chauffeur or other personal services to the employee or any member of the employee's family may be excludable as a working condition fringe if such expense would be otherwise allowable as a deduction by the employee under section 162 or 167.

Example 6. J is a United States District Judge. At the beginning of a 3-month criminal trial in J's court, a member of J's family receives death threats. M, the division (within government agency W) responsible for evaluating threats and providing protective services to the Federal judiciary, directs its threat analysis unit to conduct a security study with respect to J and J's family. The study is conducted pursuant to internal written procedures that require an independent and objective assessment of any threats to members of the Federal judiciary and their families, a statement of the requisite security response, if any, to a particular threat (including the form of transportation to be furnished to the employee as part of the security program), and a description of the circumstances under which local transportation for the employee and the employee's spouse and dependents may be necessary for personal reasons during the time protective services are provided. M's study concludes that a bona fide business-oriented security concern exists with respect to J and J's family and determines that 24-hour protection of J and J's family is not necessary, but that protection is necessary during the course of the criminal trial whenever J or J's family is away from home. Consistent with that recommendation, J is transported every day in a government vehicle for both personal and business reasons and is accompanied by two bodyguard/chauffeurs who have been trained in evasive driving techniques. In addition, J's spouse is driven to and from work and J's children are driven to and from school and occasional school activities. Shortly after the trial is concluded, M's threat analysis unit determines that J and J's family no longer need special protection because the danger posed by the threat no longer exists and, accordingly, vehicle transportation is no longer provided. Because the security study conducted by M complies with the conditions of §1.132–5(m)(2)(v), M has satisfied the requirement for an independent security study and an overall security program with respect to J is deemed to exist. Thus, with respect to the transportation provided for security concerns, J may exclude as a working condition fringe the value of any special security features of the government vehicle and the value attributable to the two bodyguard/chauffeurs. See *Example (1)* of this paragraph (m)(8). The value of vehicle transportation provided to J and J's family for personal reasons, other than commuting, may also be excluded during the period of protection, because its provision was consistent with the recommendation of the security study.

Example 7. Assume the same facts as in *Example (6)* and that J's one-way commute between home and work is 10 miles. Under paragraph (m)(6) of this section, the Federal Government may value transportation provided to J for commuting purposes pursuant to the value set forth in either the vehicle cents-per-mile rule of §1.61–21(e) or the commuting valuation rule of §1.61–21(f). Because the commuting valuation rule yields the least amount of taxable income to J under the circumstances, W values the transportation provided to J for commuting at $1.50 per one-way commute, even though J is a control employee within the meaning of §1.61–21(f)(6).

(n) *Product testing*—(1) *In general.* The fair market value of the use of consumer goods, which are manufactured for sale to nonemployees, for product testing and evaluation by an employee of the manufacturer outside the employer's workplace, is excludible from gross income as a working condition fringe if—

(i) Consumer testing and evaluation of the product is an ordinary and necessary business expense of the employer;

(ii) Business reasons necessitate that the testing and evaluation of the product be performed off the employer's business premises by employees (*i.e.*, the testing and evaluation cannot be carried out adequately in the employer's office or in laboratory testing facilities);

(iii) The product is furnished to the employee for purposes of testing and evaluation;

(iv) The product is made available to the employee for no longer than necessary to test and evaluate its performance and (to the extent not exhausted) must be returned to the employer at completion of the testing and evaluation period;

(v) The employer imposes limits on the employee's use of the product that significantly reduce the value of any personal benefit to the employee; and

(vi) The employee must submit detailed reports to the employer on the testing and evaluation. The length of the testing and evaluation period must be reasonable in relation to the product being tested.

(2) *Employer-imposed limits.* The requirement of paragraph (n)(1)(v) of this section is satisfied if—

(i) The employer places limits on the employee's ability to select among different models or varieties of the consumer product that is furnished for testing and evaluation purposes; and

(ii) The employer generally prohibits use of the product by persons other than the employee and, in appropriate cases, requires the employee, to purchase or lease at the employee's own expense the same type of product as that being tested (so that personal use by the employee's family will be limited). In addition, any charge by the employer for the personal use by an employee of a product being tested shall be taken into account in determining whether the requirement of paragraph (n)(1)(v) of this section is satisfied.

(3) *Discriminating classifications.* If an employer furnishes products under a testing and evaluation program only, or presumably, to certain classes of employees (such as highly compensated employees, as defined in §1.132–8(g)), this fact may be relevant when determining whether the products are furnished for testing and evaluation purposes or for compensation purposes, unless the employer can show a business reason for the classification of employees to whom the products are furnished (e.g., that automobiles are furnished for testing and evaluation by an automobile manufacturer to its design engineers and supervisory mechanics).

(4) *Factors that negate the existence of a product testing program.* If an employer fails to tabulate and examine the results of the detailed reports submitted by employees within a reasonable period of time after expiration of the testing period, the program will not be considered a product testing program for purposes of the exclusion of this paragraph (n). Existence of one or more of the following factors may also establish that the program is not a bona fide product testing program for purposes of the exclusion of this paragraph (n):

(i) The program is in essence a leasing program under which employees lease the consumer goods from the employer for a fee;

(ii) The nature of the product and other considerations are insufficient to justify the testing program; or

(iii) The expense of the program outweighs the benefits to be gained from testing and evaluation.

(5) *Failure to meet the requirements of this paragraph (n).* The fair market value of the use of property for product testing and evaluation by an employee outside the employee's workplace, under a product testing program that does not meet all of the requirements of this paragraph (n), is not excludable from gross income as a working condition fringe under this paragraph (n).

(6) *Example.* The rules of this paragraph (n) may be illustrated by the following example:

Example. Assume that an employer that manufactures automobiles establishes a product testing program under which 50 of its 5,000 employees test and evaluate the automobiles for 30 days. Assume further that the 50 employees represent a fair cross-section of all of the employees of the employer, such employees submit detailed reports to the employer on the testing and evaluation, the employer tabulates and examines the test results within a reasonable time, and the use of the automobiles is restricted to the employees. If the employer imposes the limits described in paragraph (n)(2) of this section, the employees may exclude the value of the use of the automobile during the testing and evaluation period.

(o) *Qualified automobile demonstration use*—(1) *In general.* The value of qualified automobile demonstration use is excludable from gross income as a working condition fringe. ''Qualified automobile demonstration use'' is any use of a demonstration automobile by a full-time automobile salesman in the sales area in which the automobile dealer's sales office is located if—

(i) Such use is provided primarily to facilitate the salesman's performance of services for the employer; and

(ii) There are substantial restrictions on the personal use of the automobile by the salesman.

(2) *Full-time automobile salesman*—(i) *Defined.* The term ''full-time automobile salesman'' means any individual who—

(A) Is employed by an automobile dealer;

(B) Customarily spends at least half of a normal business day performing the functions of a floor salesperson or sales manager;

(C) Directly engages in substantial promotion and negotiation of sales to customers;

(D) Customarily works a number of hours considered full-time in the industry (but at a rate not less than 1,000 hours per year); and

(E) Derives at least 25 percent of his or her gross income from the automobile dealership directly as a result of the activities described in paragraphs (o)(2)(i) (B) and (C) of this section.

For purposes of paragraph (o)(2)(i) (E) of this section, income is not considered to be derived directly as a result of activities described in paragraphs (o)(2)(i) (B) and (C) of this section to the extent that the income is attributable to an individual's ownership interest in the dealership. An individual will not be considered to engage in direct sales activities if the individual's sales-related activities are substantially limited to review of sales price offers from customers. An individual, such as the general manager of an automobile dealership, who receives a sales commission on the sale of an automobile is not a full-time automobile salesman unless the requirements of this paragraph (o)(2)(i) are met. The exclusion provided in this paragraph (o) is available to an individual who meets the definition of this paragraph (o)(2)(i) whether the individual performs services in addition to those described in this paragraph (o)(2)(i). For example, an individual who is an owner of the automobile dealership but who otherwise meets the requirements of this paragraph (o)(2)(i) may exclude from gross income the value of qualified automobile demonstration use. However, the exclusion of this paragraph (o) is not available to owners of large automobile dealerships who do not customarily engage in significant sales activities.

(ii) *Use by an individual other than a full-time automobile salesman.* Personal use of a demonstration automobile by an individual other than a full-time automobile salesman is not treated as a working condition fringe. Therefore, any personal use, including commuting use, of a demonstration automobile by a part-time salesman, automobile mechanic, or other individual who is not a full-time automobile salesman is not ''qualified automobile demonstration use'' and thus not excludable from gross income. This is the case whether or not the personal use is within the sales area (as defined in paragraph (o)(5) of this section).

(3) *Demonstration automobile.* The exclusion provided in this paragraph (o) applies only to qualified use of a demonstration automobile. A demonstration automobile is an automobile that is—

(i) Currently in the inventory of the automobile dealership; and

(ii) Available for test drives by customers during the normal business hours of the employee.

(4) *Substantial restrictions on personal use.* Substantial restrictions on the personal use of a demonstration automobile exist when all of the following conditions are satisfied:

(i) Use by individuals other than the full-time automobile salesmen (e.g., the salesman's family) is prohibited;

(ii) Use for personal vacation trips is prohibited;

(iii) The storage of personal possessions in the automobile is prohibited; and

(iv) The total use by mileage of the automobile by the salesman outside the salesman's normal working hours is limited.

(5) *Sales area*—(i) *In general.* Qualified automobile demonstration use consists of use in the sales area in which the

automobile dealer's sales office is located. The sales area is the geographic area surrounding the automobile dealer's sales office from which the office regularly derives customers.

(ii) *Sales area safe harbor.* With respect to a particular full-time salesman, the automobile dealer's sales area may be treated as the area within a radius of the larger of—

(A) 75 miles or

(B) The one-way commuting distance (in miles) of the particular salesman from the dealer's sales office.

(6) *Applicability of substantiation requirements of sections 162 and 274(d).* Notwithstanding anything in this section to the contrary, the value of the use of a demonstration automobile may not be excluded from gross income as a working condition fringe, by either the employer or the employee, unless, with respect to the restrictions of paragraph (o)(4) of this section, the substantiation requirements of section 274(d) and the regulations thereunder are satisfied. See §1.132–5(c) for general and safe harbor rules relating to the applicability of the substantiation requirements of section 274(d).

(7) *Special valuation rules.* See §1.61–21(d)(6)(ii) for special rules that may be used to value the availability of demonstration automobiles.

(p) *Parking*—(1) *In general.* The value of parking provided to an employee on or near the business premises of the employer is excludable from gross income as a working condition fringe under the special rule of this paragraph (p). If the rules of this paragraph (p) are satisfied, the value of parking is excludable from gross income whether the amount paid by the employee for parking would be deductible under section 162. The working condition fringe exclusion applies whether the employer owns or rents the parking facility or parking space.

(2) *Reimbursement of parking expenses.* A reimbursement to the employee of the ordinary and necessary expenses of renting a parking space on or near the business premises of the employer is excludable from gross income as a working condition fringe, if, but for the parking expense, the employee would not have been entitled to receive and retain such amount from the employer. If, however an employee is entitled to retain a general transportation allowance or a similar benefit whether or not the employee has parking expenses, no portion of that allowance is excludable from gross income under this paragraph (p) even if it is used for parking expenses.

(3) *Parking on residential property.* With respect to an employee, this paragraph (p) does not apply to any parking facility or space located on property owned or leased by the employee for residential purposes.

(4) *Dates of applicability.* This paragraph (p) applies to benefits provided before January 1, 1993. For benefits provided after December 31, 1992, see §1.132–9.

(q) *Nonapplicability of nondiscrimination rules.* Except to the extent provided in paragraph (n)(3) of this section (relating to discriminating classifications of a product testing program), the nondiscrimination rules of section 132 (h)(1) and §1.132–8 do not apply in determining the amount, if any, of a working condition fringe.

(r) *Volunteers*—(1) *In general.* Solely for purposes of section 132(d) and paragraph (a)(1) of this section, a bona fide volunteer (including a director or officer) who performs services for an organization exempt from tax under section 501(a), or for a government employer (as defined in paragraph (m)(7) of this section), is deemed to have a profit motive under section 162.

(2) *Limit on application of this paragraph.* This paragraph (r) shall not be used to support treatment of the bona fide volunteer as having a profit motive for purposes of any provision of the Internal Revenue Code of 1986 (Code) other than section 132(d). Nothing in this paragraph (r) shall be interpreted as determining the employment status of a bona fide volunteer for purposes of any section of the Code other than section 132(d).

(3) *Definitions*—(i) *Bona fide volunteer.* For purposes of this paragraph (r), an individual is considered a ''bona fide volunteer'' if the individual does not have a profit motive for purposes of section 162. For example, an individual is considered a ''bona fide volunteer'' if the total value of the benefits provided with respect to the volunteer services

is substantially less than the total value of the volunteer services the individual provides to an exempt organization or government employer.

(ii) *Liability insurance coverage for a bona fide volunteer*. For purposes of this paragraph (r), the receipt of liability insurance coverage by a volunteer, or an exempt organization or government employer's undertaking to indemnify the volunteer for liability, does not by itself confer a profit motive on the volunteer, provided the insurance coverage or indemnification relates to acts performed by the volunteer in the discharge of duties, or the performance of services, on behalf of the exempt organization or government employer.

(4) *Example*. The following example illustrates the provisions of paragraph (r) of this section.

Example. A is a manager and full-time employee of P, a tax-exempt organization described in section 501(c)(3). B is a member of P's board of directors. Other than $25 to defray expenses for attending board meetings, B receives no compensation for serving as a director and does not have a profit motive. Therefore, B is a bona fide volunteer by application of paragraph (r)(3)(i) of this section and is deemed to have a profit motive under paragraph (r)(1) of this section for purposes of section 132(d). In order to provide liability insurance coverage, P purchases a policy that covers actions arising from A's and B's activities performed as part of their duties to P. The value of the policy and payments made to or on behalf of A under the policy are excludable for A's gross income as a working condition fringe, because A has a profit motive under section 162 and would be able to deduct payments for liability insurance coverage had he paid for it himself. The receipt of liability insurance coverage by B does not confer a profit motive on B by application of paragraph (r)(3)(ii) of this section. Thus, the value of the policy and payments made to or on behalf of B under the policy are excludable from B's income as a working condition fringe. For the year in which the liability insurance coverage is provided to A and B, P may exclude the value of the benefit on the Form W-2 it issues to A or on any Form 1099 it might otherwise issue to B.

(s) *Application of section 274(a)(3)*—(1) *In general*. If an employer's deduction under section 162(a) for dues paid or incurred for membership in any club organized for business, pleasure, recreation, or other social purpose is disallowed by section 274(a)(3), the amount, if any, of an employee's working condition fringe benefit relating to an employer-provided membership in the club is determined without regard to the application of section 274(a) to the employee. To be excludible as a working condition fringe benefit, however, the amount must otherwise qualify for deduction by the employee under section 162(a). If an employer treats the amount paid or incurred for membership in any club organized for business, pleasure, recreation, or other social purpose as compensation under section 274(e)(2), then the expense is deductible by the employer as compensation and no amount may be excluded from the employee's gross income as a working condition fringe benefit. See §1.274–2(f)(2)(iii)(A).

(2) *Treatment of tax-exempt employers*. In the case of an employer exempt from taxation under subtitle A of the Internal Revenue Code, any reference in this paragraph (s) to a deduction disallowed by section 274(a)(3) shall be treated as a reference to the amount which would be disallowed as a deduction by section 274(a)(3) to the employer if the employer were not exempt from taxation under subtitle A of the Internal Revenue Code.

(3) *Examples*. The following examples illustrate this paragraph (s):

Example 1. Assume that Company *X* provides Employee *B* with a country club membership for which it paid $20,000. B substantiates, within the meaning of paragraph (c) of this section, that the club was used 40 percent for business purposes. The business use of the club (40 percent) may be considered a working condition fringe benefit, notwithstanding that the employer's deduction for the dues allocable to the business use is disallowed by section 274(a)(3), if *X* does not treat the club membership as compensation under section 274(e)(2). Thus, *B* may exclude from gross income $8,000 (40 percent of the club dues, which reflects *B*'s business use). *X* must report $12,000 as wages subject to withholding and payment of employment taxes (60 percent of the value of the club dues, which reflects *B*'s personal use). *B* must include $12,000 in gross income. *X* may deduct as compensation the amount it paid for the club dues which reflects *B*'s personal use provided the amount satisfies the other requirements for a salary or compensation deduction under section 162.

Example 2. Assume the same facts as *Example 1* except that Company *X* treats the $20,000 as compensation to *B* under section

274(e)(2). No portion of the $20,000 will be considered a working condition fringe benefit because the section 274(a)(3) disallowance will apply to *B*. Therefore, *B* must include $20,000 in gross income.

(t) *Application of section 274(m)(3)*—(1) *In general.* If an employer's deduction under section 162(a) for amounts paid or incurred for the travel expenses of a spouse, dependent, or other individual accompanying an employee is disallowed by section 274(m)(3), the amount, if any, of the employee's working condition fringe benefit relating to the employer-provided travel is determined without regard to the application of section 274(m)(3). To be excludible as a working condition fringe benefit, however, the amount must otherwise qualify for deduction by the employee under section 162(a). The amount will qualify for deduction and for exclusion as a working condition fringe benefit if it can be adequately shown that the spouse's, dependent's, or other accompanying individual's presence on the employee's business trip has a bona fide business purpose and if the employee substantiates the travel within the meaning of paragraph (c) of this section. If the travel does not qualify as a working condition fringe benefit, the employee must include in gross income as a fringe benefit the value of the employer's payment of travel expenses with respect to a spouse, dependent, or other individual accompanying the employee on business travel. See §§1.61–21(a)(4) and 1.162–2(c). If an employer treats as compensation under section 274(e)(2) the amount paid or incurred for the travel expenses of a spouse, dependent, or other individual accompanying an employee, then the expense is deductible by the employer as compensation and no amount may be excluded from the employee's gross income as a working condition fringe benefit. See §1.274–2(f)(2)(iii)(A).

(2) *Treatment of tax-exempt employers.* In the case of an employer exempt from taxation under subtitle A of the Internal Revenue Code, any reference in this paragraph (t) to a deduction disallowed by section 274(m)(3) shall be treated as a reference to the amount which would be disallowed as a deduction by section 274(m)(3) to the employer if the employer were not exempt from taxation under subtitle A of the Internal Revenue Code.

[T.D. 8256, 54 FR 28608, July 6, 1989, as amended by T.D. 8451, 57 FR 57669, Dec. 7, 1992; T.D. 8457, 57 FR 62196, Dec. 30, 1992; T.D. 8666, 61 FR 27006, May 30, 1996; T.D. 8933, 66 FR 2244, Jan. 11, 2001; T.D. 9483, 75 FR 27936, May 19, 2010]

§ 1.132–5T Working condition fringe—1985 through 1988 (temporary).

(a) *In general*—(1) *Definition.* Gross income does not include the value of a working condition fringe. The term ''working condition fringe'' means any property or service provided to an employee of an employer to the extent that, if the employee paid for the property or service, the amount paid would be allowable as a deduction under section 162 or 167. If, under section 274 or any other section, certain substantiation requirements must be met in order for a deduction under section 162 or 167 to be allowable, those substantiation requirements apply to the determination of a working condition fringe. An amount that would be deductible by the employee under, for example, section 212 is not a working condition fringe.

(2) *Trade or business of the employee.* If the hypothetical payment for the property or service would be allowable as a deduction with respect to a trade or business of the employee other than the employee's trade or business of being an employee of the employer, it cannot be taken into account for purposes of determining the amount, if any, of the working condition fringe. For example, assume that, unrelated to company X's trade or business and unrelated to company X's employee's trade or business of being an employee of company X, the employee is a member of the board of directors of company Y. Assume further that company X provides the employee with air transportation to a company Y board of director's meeting. The employee may not exclude the value of the air transportation to the meeting as a working condition fringe. The employee may, however, deduct such amount under section 162 if the section 162 requirements are satisfied. The result would be the same whether the air

transportation was provided in the form of a flight on a commercial airline or a seat on a company X airplane.

(b) *Vehicle allocation rules*—(1) *In general*—(i) *General rule.* In general, with respect to an employer-provided vehicle, the amount excludable as a working condition fringe is the amount that would be allowable as a deduction under section 162 or 167 if the employee paid for the availability of the vehicle. For example, assume that the value of the availability of an employer-provided vehicle for a full year is $2,000, without regard to any working condition fringe (*i.e.*, assuming all personal use). Assume further that the employee drives the vehicle 6,000 miles for his employer's business and 2,000 miles for reasons other than the employer's business. In this situation, the value of the working condition fringe is $2,000 multiplied by a fraction, the numerator of which is the business-use mileage (6,000 miles) and the denominator of which is the total mileage (8,000 miles). Thus, the value of the working condition fringe is $1,500. The total amount includable in the employee's gross income on account of the availability of the vehicle is $500. For purposes of this section, the term ''vehicle'' has the same meaning given the term in §1.61–2T(e)(*2*). Generally, when determining the amount of an employee's working condition fringe, miles accumulated on the vehicle by all employees of the employer during the period in which the vehicle is available to the employee must be considered. For example, assume that an employee of the employer is provided the availability of an automobile for one year. Assume further that during the year, the automobile is regularly used in the employer's business by other employees. All miles accumulated on the automobile by all employees of the employer during the year must be considered. If, however, substantially all the use of the automobile by other employees in the employer's business is permitted during a certain period, such as the last three months of the year, the miles driven by the other employees during that period would not be considered when determining the employee's working condition fringe exclusion.

(ii) *Use by an individual other than the employee.* For purposes of this section, if the availability of a vehicle to an individual would be taxed to an employee, use of the vehicle by the individual is included in references to use by the employee.

(iii) *Provision of an expensive vehicle for personal use.* Assume an employer provides an employee with an expensive vehicle that an employee may use in part for personal purposes. Even though the decision to provide an expensive rather than an inexpensive vehicle is made by the employer for bona fide noncompensatory business reasons, there is no working condition fringe exclusion with respect to the personal miles driven by the employee. If the employee paid for the availability of the vehicle, he would not be entitled to deduct any part of the payment attributable to personal miles.

(2) *Use of different employer-provided automobiles.* The working condition fringe exclusion must be applied on an automobile by automobile basis. For example, assume that automobile Y is available to employee D for 3 days in January and for 5 days in March, and automobile Z is available to D for a week in July. Assume further that the Daily Lease Value, as defined in §1.61–2T, of each automobile is $50. For the eight days of availability of Y in January and March, D uses Y 90 percent for business (by mileage). During July, D uses Z 60 percent for business (by mileage). The value of the working condition fringe is determined separately for each automobile. Therefore, the working condition fringe for Y is $360 ($400 × .90) leaving an income inclusion of $40. The working condition fringe for Z is $210 ($350 × .60) leaving an income inclusion of $140. If the value of the availability of an automobile is determined under the Annual Lease Value rule for one period and Daily Lease Value rule for a second period (see §1.61–2T), the working condition fringe exclusion must be calculated separately for the two periods.

(c) *Applicability of sections 162 and 274(d)*—(1) *In general.* The value of property or services provided to an employee may not be excluded from the employee's gross income as a working condition fringe, by either the employer or the employee, unless the applicable substantiation requirements of either section 274(d) or section 162 (whichever is applicable) and the regulations thereunder are statisfied. With respect to listed property, the substantiation requirements of section 274(d) and the regulations thereunder do not apply to the determination of an employee's working condition fringe exclusion prior to the date that those requirements apply to the first taxable year of the employer beginning after December 31, 1985. For example, if an employer's first taxable year beginning after December 31, 1985, begins on July 1, 1986, with respect to listed property, the substantiation requirements of section 274(d) apply as of that date. The substantiation requirements of section 274(d) apply to an employee even if the requirements of section 274 do not apply to the employee's employer for deduction purposes (such as when the employer is a tax-exempt organization or a governmental unit); in these cases, the requirements of section 274(d) apply to the employee as of January 1, 1986.

(2) *Section 274(d) requirements.* The substantiation requirements of section 274(d) are satisfied by ''adequate records or sufficient evidence corroborating the [employee's] own statement''. Therefore, such records or evidence provided by the employee, and relied upon by the employer to the extent permitted by the regulations promulgated under section 274(d), will be sufficient to substantiate a working condition fringe exclusion.

(d) *Safe harbor rules*—(1) *In general.* Section 1.274–6T provides that the substantiation requirements of section 274(d) and the regulations thereunder may be satisfied, in certain circumstances, by using one or more of the safe harbor rules prescribed in §1.274–6T. If the employer uses one of the safe harbor rules prescribed in §1.274–6T during a period with respect to a vehicle (as defined in §1.61–2T), that rule must be used by the employer to substantiate a working condition fringe exclusion with respect to that vehicle during the period. An employer that is exempt from Federal income tax may still use one of the safe harbor rules (if the requirements of that section are otherwise met during a period) to substantiate a working condition fringe exclusion with respect to a vehicle during the period. If the employer uses one of the methods prescribed in §1.274–6T during a period with respect to an employer-provided vehicle, that method may be used by an employee to substantiate a working condition fringe exclusion with respect to the same vehicle during the period, as long as the employee includes in gross income the amount allocated to the employee pursuant to §1.274–6T and this section. (See §1.61–2T(c)(2)(i) for other rules concerning when an employee must include in income the amount determined by the employer.) If, however, the employer uses the safe harbor rule prescribed in §1.274–6T(a) (2) or (3) and the employee without the employer's knowledge uses the vehicle for purposes other than de minimis personal use (in the case of the rule prescribed in §1.274–6T(a)(2)), or for purposes other than de minimis personal use and commuting (in the case of the rule prescribed in §1.274–6T(a)(3)), then the employee must include additional income for the unauthorized use of the vehicle.

(2) *Period for use of safe harbor rules.* The rules prescribed in this paragraph (d) assume that the safe harbor rules prescribed in §1.274–6T are used for a one-year period. Accordingly, references to the value of the availability of a vehicle, amounts excluded as a working condition fringe, etc., are based on a one-year period. If the safe harbor rules prescribed in §1.274–6T are used for a period of less than a year, the amounts referenced in the previous sentence must be adjusted accordingly. For purposes of this section, the term ''personal use'' has the same meaning as prescribed in §1.274–6T(e)(5).

(e) *Vehicles not available to employees for personal use.* For a vehicle described in §1.274–6T(a)(2) (relating to certain vehicles not used for personal purposes), the working condition fringe exclusion is equal to the value of the availability of the vehicle if the employer uses the method prescribed in §1.274–6T(a)(2).

(f) *Vehicles not available to employees for personal use other than commuting.* For a vehicle described in §1.274–

6T(a)(3) (relating to certain vehicles not used for personal purposes other than commuting), the working condition fringe exclusion is equal to the value of the availability of the vehicle for purposes other than commuting if the employer uses the method prescribed in §1.274–6T(a)(3). This rule applies only if the special rule for valuing commuting use, as prescribed in §1.61–2T, is used and the amount determined under the special rule is either included in the employee's income or reimbursed by the employee.

(g) *Vehicles used in connection with the business of farming that are available to employees for personal use*—(1) *In general.* For a vehicle described in §1.274–6T(b) (relating to certain vehicles used in connection with the business of farming), the working condition fringe exclusion is calculated by multiplying the value of the availability of the vehicle by 75 percent.

(2) *Vehicles available to more than one individual.* If the vehicle is available to more than one individual, the employer must allocate the gross income attributable to the vehicle (25 percent of the value of the availability of the vehicle) among the employees (and other individuals whose use would not be attributed to an employee) to whom the vehicle was available. This allocation must be done in a reasonable manner to reflect the personal use of the vehicle by the individuals. An amount that would be allocated to a sole proprietor reduces the amounts that may be allocated to employees but are otherwise to be disregarded for purposes of this paragraph (g). For purposes of this paragraph (g), the value of the availability of a vehicle may be calculated as if the vehicle were available to only one employee continuously and without regard to any working condition fringe exclusion.

(3) *Examples.* The following examples illustrate a reasonable allocation of gross income with respect to an employer-provided vehicle between two employees:

Example 1. Assume that two farm employees share the use of a vehicle which for a calendar year is regularly used directly in connection with the business of farming and qualifies for use of the rule in §1.274–6T (b). Employee A uses the vehicle in the morning directly in connection with the business of farming and employee B uses the vehicle in the afternoon directly in connection with the business of farming. Assume further that employee B takes the vehicle home in the evenings and on weekends. The employer should allocate all the income attributable to the availability of the vehicle to employee B.

Example 2. Assume that for a calendar year, farm employees C and D share the use of a vehicle that is regularly used directly in connection with the business of farming and qualifies for use of the rule in §1.274–6T (b). Assume further that the employees alternate taking the vehicle home in the evening and alternate the availability of the vehicle for personal purposes on weekends. The employer should allocate the income attributable to the availability of the vehicle for personal use (25 percent of the value of the availability of the vehicle) equally between the two employees.

Example 3. Assume the same facts as in example (2) except that C is the sole proprietor of the farm. Based on these facts, C should allocate the same amount of income to D as was allocated to D in example (2). No other income attributable to the availability of the vehicle for personal use should be allocated.

(h) *Qualified non-personal use vehicles.* Effective January 1, 1985, 100 percent of the value of the use of a qualified non-personal use vehicle (as described in §1.274–5T (k)) is excluded from gross income as a working condition fringe, provided that, in the case of a vehicle described in paragraph (k) (3) through (7) of that section, the use of the vehicles conforms to the requirements of that paragraph.

(i) [Reserved]

(j) *Application of section 280F.* In determining the amount, if any, of an employee's working condition fringe, section 280F and the regulations thereunder do not apply. For example, assume that an employee has available for a calendar year an employer-provided automobile with a fair market value of $28,000. Assume further that the special rule provided in §1.61–2T is used and that the Annual Lease Value, as defined in §1.61–2T, is $7,750, and that all of the employee's use of the automobile is in the employer's business. The employee would be entitled to exclude the entire Annual Lease Value as a working condition fringe, despite the fact that if the employee paid for the availability of the automobile, an income inclusion would be required under §1.280F–5T(d)(1). This paragraph (j) does not affect the applicability of section 280F to the employer with respect to such employer-provided automobile, nor does it affect the applicability of section 274. For rules concerning substantiation of an employee's working condition fringe, see paragraph (c) of this section.

(k) *Aircraft allocation rule*. In general, with respect to a flight on an employer-provided aircraft, the amount excludable as a working condition fringe is the amount that would be allowable as a deduction under section 162 or 167 if the employee paid for the flight on the aircraft. For example, if employee P flies on P's employer's airplane primarily for business reasons of P's employer, the value of P's flight is excludable as a working condition fringe. However, if P's spouse and children accompany P on such airplane trip primarily for personal reasons, the value of the flights by P's spouse and children are includable in P's gross income. See §1.61–2T(g) for special rules for valuing personal flights.

(l) [Reserved]

(m) *Employer-provided transportation for security concerns*—(1) *In general*. The amount of a working condition fringe exclusion with respect to employer-provided transportation is the amount that would be allowable as a deduction under section 162 or 167 if the employee paid for the transportation. Generally, if an employee pays for transportation taken for primarily personal purposes, the employee may not deduct any part of the amount paid. Thus, the employee may not generally exclude the value of employer-provided transportation as a working condition fringe if such transportation is primarily personal. If, however, for bona fide business-oriented security concerns, the employee purchases transportation that provides him or her with additional security, the employee may generally deduct the excess of the amount paid for the transportation over the lesser amount the employee would have paid for the same mode of transportation absent the bona fide business-oriented security concerns. With respect to a vehicle, the phrase ''the same mode of transportation'' means use of the same vehicle without the additional security aspects, such as bulletproof glass. With respect to air transportation, the phrase ''the same mode of transportation'' means comparable air transportation. These same rules apply to the determination of an employee's working condition fringe exclusion. For example, if an employer provides an employee with an automobile for commuting and, for bona fide business-oriented security concerns, the automobile is specially designed for security, then the employee may exclude the value of the special security design as a working condition fringe if the employee's automobile would not have had such security design but for the bona fide business-oriented security concerns. The employee may not exclude the value of the commuting from income as a working condition fringe because commuting is a nondeductible personal expense. Similarly, if an employee travels on a personal trip in an employer-provided aircraft for bona fide business-oriented security concerns, the employee may exclude the excess, if any, of the value of the flight over the amount the employee would have paid for comparable air transportation, but for the bona fide business-oriented security concerns. Because personal travel is a nondeductible expense, the employee may not exclude the total value of the trip as a working condition fringe.

(2) *Demonstration of bona fide business-oriented security concerns*—(i) *In general*. For purposes of this paragraph (m), the existence of a bona fide business-oriented security concern for the furnishing of a specific form of transportation to an employee is determined on the basis of all the facts and circumstances within the following guidelines:

(A) *Services performed outside the United States*. With respect to an employee performing services for an employer in a geographic area other than the United States, a factor indicating a bona fide business-oriented security concern is a recent history of violent terrorist activity in such geographic area (such as bombings or abductions for ransom), unless such activity is focused on a group of individuals which does not include the employee or a similarly situated employee or on a section of the geographic area which does not incude the employee.

(B) *Services performed in the United States.* With respect to an employee performing services for an employer in the United States, a factor indicating a bona fide business-oriented security concern is threats on the life of the employee or on the life of a similarly situated employee because of the employee's status as an employee of the employer.

(ii) *Establishment of overall security program.* Notwithstanding anything in paragraph (m)(2)(i) of this section to the contrary, *no* bona fide business-oriented security concern will be deemed to exist unless the employee's employer establishes an overall security program with respect to the employee involved.

(iii) *Overall security program*—(A) *Definition.* An overall security program is one in which security is provided to protect the employee on a 24-hour basis. The employee must be protected while at the employee's residence, while commuting to and from the employee's workplace, and while at the employee's workplace. In addition, the employee must be protected while traveling, whether for business or personal purposes. An overall security program would include the provision of a bodyguard/driver who is trained in evasive driving techniques; and automobile specially equipped for security; guards, metal detectors, alarms, or similar methods of controling access to the employee's workplace and residence; and, in appropriate cases, flights on the employer's aircraft for business and personal reasons.

(B) *Application.* There is no overall security program when, for example, security is provided at the employee's workplace but not at the employee's residence. In addition, the fact that an employer requires an employee to travel on the employer's aircraft, or in an employer-provided vehicle that contains special security features, does not alone constitute an overall security program. The preceding sentence applies regardless of the existence of a corporate or other resolution requiring the employee to travel in the employer's airplane or vehicle for personal as well as business reasons. Similarly, the existence of an independent security study particular to the employer and its employees, or to the employee involved, does not alone constitute an overall security program.

(iv) *Effect of an independent security study.* An overall security program with respect to an employee is deemed to exist even though security is not provided to an employee on a 24-hour basis if the conditions of this paragraph (m)(2)(iv) are satisfied:

(A) A security study is performed with respect to the employer and the employee (or a similarly situated employee) by an independent security consultant;

(B) The security study is based on an objective assessment of all the facts and circumstances;

(C) The recommendation of the security study is that an overall security program (as defined in paragraph (m)(2)(iii) of this section) is not necessary and such recommendation is reasonable under the circumstances; and

(D) The employer applies the specific security recommendations contained in the security study to the employee on a consistent basis.

The value of the security provided pursuant to a security study that meets the requirements of this paragraph (m)(2)(iv) may be excluded from income, if the security study conclusions are reasonable and, but for the bona fide business-oriented security concerns, the employee would not have had such security. No exclusion from income applies to security provided by the employer that is not recommended in the security study. Security study conclusions may be reasonable even if, for example, it is recommended that security be limited to certain geographic areas, as in the case where air travel security is provided only in certain foreign countries.

(v) *Application of security rules to spouses and dependents.* The availability of a working condition fringe exclusion based on the existence of a bona fide business-oriented security concern with respect to the spouse and dependents of an employee is determined separately for such spouse and dependents under the rules established in this paragraph (m).

(vi) *Working condition safe harbor*. Under the special rule of this paragraph (m)(2)(vi), if, for a bona fide business-oriented security concern, the employer requires that the employee travel on an employer-provided aircraft for a personal trip, the employer and the employee may exclude, as a working condition fringe, the excess value of the trip over comparable first-class airfare without having to show that but for the bona fide business-oriented security concerns, the employee would have flown first-class on a commercial aircraft. If the special valuation rule provided in §1.61–2T is used, the excess over the amount determined by multiplying an aircraft multiple of 200-percent by the base aircraft valuation formula may be excluded as a working condition fringe.

(3) *Examples*. The provisions of this paragraph (m) may be illustrated by the following examples:

Example 1. Assume that in response to several death threats on the life of A, the president of a multinational company (company X), company X establishes an overall security program for A, including an alarm system at A's home and guards at A's workplace, the use of a vehicle that is specially equipped with alarms, bulletproof glass, and armor plating and a bodyguard/driver who is trained in evasive driving techniques. Assume further that A is driven for both personal and business reasons in the vehicle. Also, assume that but for the bona fide business-oriented security concerns, no part of the overall suecurity program would been provided to A. With respect to the transportation provided for security reasons, A may exclude as a working condition fringe the value of the special security features of the vehicle and the value attributable to the bodyguard/driver. Thus, if the value of the specially equipped vehicle is $40,000, and the value of the vehicle without the security features is $25,000, A may determine A's income attributable to the vehicle as if the vehicle were worth $25,000. A must include in income the value of the availability of the vehicle for personal use.

Example 2. Assume that B is the chief executive officer of a multinational corporation (company Y). Assume further that there have been kidnapping attempts and other terrorist activities in the foreign countries in which B performs services and that at least some of such activities have been directed against B or similarly situated employees. In response to these activities, company Y provides B with an overall security program, including an alarm system at B's home and bodyguards at B's workplace, a bodyguard/driver who is trained in evasive driving techniques, and a vehicle specially designed for security during B's overseas travels. In addition, assume that company Y requires B to travel in company Y's airplane for business and personal trips taken to, from, and within these foreign countries. Also, assume that but for bona fide business-oriented security concerns, no part of the overall sucurity program would have been provided to B. B may exclude as a working condition fringe the value of the special security features of the automobile and the value attributable to the bodyguards and the bodyguard/driver. B may also exclude as a working condition fringe the excess, if any, of the value of personal flights in the company Y airplane over first-class airfare (as determined under the special valuation rule provided in §1.61–2T if the safe harbor described in paragraph (m)(2)(vi) of this section is used). B must include in income the value of the availability of the vehicle for personal use and the lesser of the value of first-class airfare or the value of the flight determined under §1.61–2T for each personal flight taken by B in company Y's airplane.

Example 3. Assume the same facts as in example (2) except that company Y also requires B to travel in company Y's airplane within the United States, and provides B with a chauffeur-driven limousine for business and personal travel in the United States. Assume further that company Y also requires B's spouse and dependents to travel in company Y's airplane for personal flights in the United States. If no bona fide business-oriented security concern exists with respect to travel in the United States, B may not exclude any portion of the value of the availability of the driver or limousine for personal use in the United States. Thus, B must include in income the value of the availability of the vehicle and driver for personal use. In addition, B may not exclude any portion of the value attributable to personal flights by B or B's spouse and dependents on company Y's airplane. Thus, B must include in income the value attributable to the personal use of company Y's airplane. See §1.61–2T for rules relating to the valuation of personal flights on employer-provided airplanes.

Example 4. Assume that company Z retains an independent security consultant to perform a security study with respect to its chief executive officer. Assume further that, based on an objective assessment of the facts and circumstances, the security consultant reasonably recommends that the employee be provided security at his workplace and for ground transportation, but not for air transportation. If company Z follows the recommendations on a consistent basis, an overall security program will be deemed to exist with respect to the workplace and ground transportation security only.

Example 5. Assume the same facts as in example (4) except that company Z only provides the employee security while commuting to and from work, but not for any other ground transportation. Since the recommendations of the independent security study are not applied on a consistent basis, an overall security program will not be deemed to exist.

(n) *Product testing*—(1) *In general.* The fair market value of the use of consumer goods, which are manufactured for sale to nonemployees, for product testing and evaluation by an employee outside the employer's workplace is excludable as a working condition fringe if—

(i) Consumer testing and evaluation of the product is an ordinary and necessary business expense of the employer,

(ii) Business reasons necessitate that the testing and evaluation of the product be performed off the employer's business premises by employees (*i.e.*, the testing and evaluation cannot be carried out adequately in the employer's office or in laboratory testing facilities),

(iii) The product is furnished to the employee for purposes of testing and evaluation,

(iv) The product is made available to the employee for no longer than necessary to test and evaluate its performance and must be returned to the employer at completion of the testing and evaluation period,

(v) The employer imposes limitations of the employee's use of the product which significantly reduce the value of any personal benefit to the employee, and

(vi) The employee must submit detailed reports to the employer on the testing and evaluation.

The length of the testing and evaluation period must be reasonable in relation to the product being tested.

(2) *Employer-imposed limitations.* The requirement of paragraph (n)(1)(v) of this section is satisfied if—

(i) The employer places limitations on the employee's ability to select among different models or varieties of the consumer product that is furnished for testing and evaluation purposes,

(ii) The employer's policy provides for the employee, in appropriate cases, to purchase or lease at his or her own expense the same type of product as that being tested (so that personal use by the employee's family will be limited), and

(iii) The employer generally prohibits use of the product by members of the employee's family.

(3) *Discriminating classifications.* If an employer furnishes products under a testing and evaluation program only to officers, owners, or highly compensated employees, this fact may be considered in a determination of whether the products are furnished for testing and evaluation purposes or for compensation purposes, unless the employer can show a business reason for the classification of employees to whom the products are furnished (e.g., that automobiles are furnished for testing and evaluation by an automobile manufacturer to its design engineers and supervisory mechanics).

(4) *Factors that negate the existence of a product testing program.* If an employer fails to tabulate and examine the results of the detailed reports within a reasonable period of time after expiration of the testing period, the program will not be considered a product testing program. Existence of one or more of the following factors may also establish that the program is not a bona fide product testing program:

(i) The program is in essence a leasing program under which employees lease the consumer goods from the employer for a fee;

(ii) The nature of the product and other considerations are insufficient to justify the testing program; or

(iii) The expense of the program outweighs the benefits to be gained from testing and evaluation.

(5) *Failure to meet the requirements of this paragraph (n).* The fair market value of the use of property for product testing and evaluation by an employee outside the employee's workplace, under a product testing program that does not meet all of the requirements of this paragraph (n), is not excludable as a working condition fringe.

(6) *Example.* Assume that an employer that manufactures automobiles establishes a product testing program

under which 50 of its 5,000 employees test and evaluate the automobiles for 30 days. Assume further that the 50 employees represent a fair cross section of all of the employees of the employer, such employees submit detailed reports to the employer on the testing and evaluation, the employer tabulates and examines the test results within a reasonable time, and the use of the automobiles is restricted to the employees. If the rules of paragraph (n)(2) of this section are also met, the employees may exclude the value of the use of the automobile during the testing and evaluation period.

(o) *Qualified automobile demonstration use*—(1) *In general.* The value of qualified automobile demonstration use is excludable from gross income as a working condition fringe. The term ''qualified automobile demonstration use'' means any use of a demonstration automobile by a full-time automobile salesman in the sales area in which the automobile dealer's sales office is located if—

(i) Such use is provided primarily to facilitate the salesman's performance of services for the employer, and

(ii) There are substantial restrictions on the personal use of the automobile by the salesman.

(2) *Full-time automobile salesman*—(i) *Definition.* The term ''full-time automobile salesman'' means any individual who—

(A) Is employed by an automobile dealer,

(B) Customarily spends substantially all of a normal business day on the sales floor selling automobiles to customers of the automobile dealership,

(C) Customarily works a number of hours considered full-time in the industry (but at a rate not less than 1,000 hours per year), and

(D) Derives at least 85 percent of his or her gross income from the automobile dealership directly as a result of such automobile sales activities.

An individual, such as the general manager of an automobile dealership, who receives a sales commission on the sale of an automobile is not a full-time automobile salesman unless the requirements of this paragraph (o)(2)(i) are met. The exclusion provided in this paragraph (o) is available to an individual who meets the definition of this paragraph (o)(2)(i) regardless of whether the individual performs services in addition to those described in this paragraph (o)(2)(i). For example, an individual who is an owner of the automobile dealership but who otherwise meets the requirements of this paragraph (o)(2)(i) may exclude from gross income the value of qualified automobile demonstration use.

(ii) *Use by an individual other than a full-time automobile salesman.* Personal use of a demonstration automobile by an individual other than a full-time automobile salesman is not treated as a working condition fringe. Therefore, any personal use, including commuting use, of a demonstration automobile by a part-time salesman, automobile mechanic, manager, or other individual is not ''qualified automobile demonstration use'' and thus not excludable from gross income.

(3) *Demonstration automobile.* The exclusion provided in this paragraph (o) applies only to qualified use of a demonstration automobile. A demonstration automobile is an automobile that is—

(i) Currently in the inventory of the automobile dealership, and

(ii) Available for test drives by customers during the normal business hours of the employee.

(4) *Substantial restrictions on personal use.* Substantial restrictions on the personal use of demonstration automobiles exist when all of the following conditions are satisfied:

(i) Use by individuals other than the full-time automobile salesmen (e.g., the salesman's family) is prohibited,

(ii) Use for personal vacation trips is prohibited,

(iii) The storage of personal possessions in the automobile is prohibited, and

(iv) The total use by mileage of the automobile by the salesman outside the salesman's normal working hours is limited.

(5) *Sales area*—(i) *In general.* Qualified automobile demonstration use must be use in the sales area in which the automobile dealer's sales office is located. The sales area is the geographic area surrounding the automobile dealer's

sales office from which the office regularly derives customers.

(ii) *Sales area safe harbor.* With respect to a particular full-time salesman, the automobile dealer's sales area may be treated as the larger of the area within a 75 mile radius of the dealer's sales office, or the on-way commuting distance (in miles) of the particular salesman.

(p) *Parking*—(1) *In general.* The value of parking provided to an employee on or near the business premises of the employer is excludable from gross income as a working condition fringe. The working condition fringe exclusion applies whether the employer owns or rents the parking facility or parking space.

(2) *Reimbursement of parking expenses.* Any reimbursement to the employee of the ordinary and necessary expenses of renting a parking space on or near the business premises of the employer is excludable as a working condition fringe. The preceding sentence does not apply, however, to cash payments that are not actually used for renting a parking space. Thus, that part of a general transportation allowance that is not used for parking is not excludable as a working condition fringe under this paragraph (p).

(3) *Parking on residential property.* With respect to an employee, this paragraph (p) does not apply to any parking facility or space located on property owned or leased for residential purposes by the employee.

(q) *Nonapplicability of nondiscrimination rules.* Except to the extent provided in paragraph (n)(3) of this section, the nondiscrimination rules of section 132(h)(1) and §1.132–8T do not apply in determining the amount, if any, of a working condition fringe.

[T.D. 8063, 50 FR 52303, Dec. 23, 1985, as amended by T.D. 8256, 54 FR 28600, July 6, 1989]

§ 1.132–6 De minimis fringes.

(a) *In general.* Gross income does not include the value of a de minimis fringe provided to an employee. The term ''de minimis fringe'' means any property or service the value of which is (after taking into account the frequency with which similar fringes are provided by the employer to the employer's employees) so small as to make accounting for it unreasonable or administratively impracticable.

(b) *Frequency*—(1) *Employee-measured frequency.* Generally, the frequency with which similar fringes are provided by the employer to the employer's employees is determined by reference to the frequency with which the employer provides the fringes to each individual employee. For example, if an employer provides a free meal in kind to one employee on a daily basis, but not to any other employee, the value of the meals is not de minimis with respect to that one employee even though with respect to the employer's entire workforce the meals are provided ''infrequently.''

(2) *Employer-measured frequency.* Notwithstanding the rule of paragraph (b)(1) of this section, except for purposes of applying the special rules of paragraph (d)(2) of this section, where it would be administratively difficult to determine frequency with respect to individual employees, the frequency with which similar fringes are provided by the employer to the employer's employees is determined by reference to the frequency with which the employer provides the fringes to the workforce as a whole. Therefore, under this rule, the frequency with which any individual employee receives such a fringe benefit is not relevant and in some circumstances, the de minimis fringe exclusion may apply with respect to a benefit even though a particular employee receives the benefit frequently. For example, if an employer exercises sufficient control and imposes significant restrictions on the personal use of a company copying machine so that at least 85 percent of the use of the machine is for business purposes, any personal use of the copying machine by particular employees is considered to be a de minimis fringe.

(c) *Administrability.* Unless excluded by a provision of chapter 1 of the Internal Revenue Code of 1986 other than section 132(a)(4), the value of any fringe benefit that would not be unreasonable or administratively impracticable to account for is includible in the employee's gross income. Thus, except as provided in paragraph (d)(2) of this section, the provision of any cash fringe benefit is never excludable under section 132(a) as a de minimis fringe benefit. Similarly except as otherwise provided in paragraph (d) of this section, a cash equivalent fringe benefit (such as a fringe benefit provided to an employee through the use of a gift certificate or charge or credit card) is generally not excludable under section 132(a) even if the same property or service acquired (if provided in kind) would be excludable as a de minimis fringe benefit. For example, the provision of cash to an employee for a theatre ticket that would itself be excludable as a de minimis fringe (see paragraph (e)(1) of this section) is not excludable as a de minimis fringe.

(d) *Special rules*—(1) *Transit passes.* A public transit pass provided at a discount to defray an employee's commuting costs may be excluded from the employee's gross income as a de minimis fringe if such discount does not exceed $21 in any month. The exclusion provided in this paragraph (d)(1) also applies to the provision of tokens or fare cards that enable an individual to travel on the public transit system if the value of such tokens and fare cards in any month does not exceed by more than $21 the amount the employee paid for the tokens and fare cards for such month. Similarly, the exclusion of this paragraph (d)(1) applies to the provision of a voucher or similar instrument that is exchangeable solely for tokens, fare cards, or other instruments that enable the employee to use the public transit system if the value of such vouchers and other instruments in any month does not exceed $21. The exclusion of this paragraph (d)(1) also applies to reimbursements made by an employer to an employee after December 31, 1988, to cover the cost of commuting on a public transit system, provided the employee does not receive more than $21 in such reimbursements for commuting costs in any given month. The reimbursement must be made under a bona fide reimbursement arrangement. A reimbursement arrangement will be treated as bona fide if the employer establishes appropriate procedures for verifying on a periodic basis that the employee's use of public transportation for commuting is consistent with the value of the benefit provided by the employer for that purpose. The amount of in-kind public transit commuting benefits and reimbursements provided during any month that are excludible under this paragraph (d)(1) is limited to $21. For months ending before July 1, 1991, the amount is $15 per month. The exclusion provided in this paragraph (d)(1) does not apply to the provision of any benefit to defray public transit expenses incurred for personal travel other than commuting.

(2) *Occasional meal money or local transportation fare*—(i) *General rule.* Meals, meal money or local transportation fare provided to an employee is excluded as a de minimis fringe benefit if the benefit provided is reasonable and is provided in a manner that satisfies the following three conditions:

(A) *Occasional basis.* The meals, meal money or local transportation fare is provided to the employee on an occasional basis. Whether meal money or local transportation fare is provided to an employee on an occasional basis will depend upon the frequency *i.e.*, the availability of the benefit and regularity with which the benefit is provided by the employer to the employee. Thus, meals, meal money, or local transportation fare or a combination of such benefits provided to an employee on a regular or routine basis is not provided on an occasional basis.

(B) *Overtime.* The meals, meal money or local transportation fare is provided to an employee because overtime work necessitates an extension of the employee's normal work schedule. This condition does not fail to be satisifed merely because the circumstances giving rise to the need for overtime work are reasonably foreseeable.

(C) *Meal money.* In the case of a meal or meal money, the meal or meal money is provided to enable the employee to work overtime. Thus, for example, meals provided on the employer's premises that are consumed during the period that the employee works overtime or meal money provided for meals consumed during such period satisfy this condition.

In no event shall meal money or local transportation fare calculated on the basis of the number of hours worked (e.g., $1.00 per hour for each hour over eight hours) be considered a de minimis fringe benefit.

(ii) *Applicability of other exclusions for certain meals and for transportation provided for security concerns.* The value of meals furnished to an employee, an employee's spouse, or any of the employee's dependents by or on behalf of the employee's employer for the convenience of the employer is excluded from the employee's gross income if the meals are furnished on the business premises of the employer (see section 119). (For purposes of the exclusion under section 119, the definitions of an employee under §1.132–1(b) do not apply.) If, for a bona fide business-oriented security concern, an employer provides an employee vehicle transportation that is specially designed for security (for example, the vehicle is equipped with bulletproof glass and armor plating), and the conditions of §1.132–5(m) are satisfied, the value of the special security design is excludable from gross income as a working condition fringe if the employee would not have had such special security design but for the bona fide business-oriented security concern.

(iii) *Special rule for employer-provided transportation provided in certain circumstances.* (A) *Partial exclusion of value.* If an employer provides transportation (such as taxi fare to an employee for use in commuting to and/or from work because or unusual circumstances and because, based on the facts and circumstances, it is unsafe for the employee to use other available means of transportation, the excess of the value of each one-way trip over $1.50 per one-way commute is excluded from gross income. The rule of this paragraph (d)(2)(iii) is not available to a control employee as defined in §1.61–21(f) (5) and (6).

(B) ''*Unusual circumstances*''. Unusual circumstances are determined with respect to the employee receiving the transportation and are based on all facts and circumstances. An example of unusual circumstances would be when an employee is asked to work outside of his normal work hours (such as being called to the workplace at 1:00 am when the employee normally works from 8:00 am to 4:00 pm). Another example of unusual circumstances is a temporary change in the employee's work schedule (such as working from 12 midnight to 8:00 am rather than from 8:00 am to 4:00 pm for a two-week period).

(C) ''*Unsafe conditions*''. Factors indicating whether it is unsafe for an employee to use other available means of transportation are the history of crime in the geographic area surrounding the employee's workplace or residence and the time of day during which the employee must commute.

(3) *Use of special rules or examples to establish a general rule.* The special rules provided in this paragraph (d) or examples provided in paragraph (e) of this section may not be used to establish any general rule permitting exclusion as a de minimis fringe. For example, the fact that $252 (*i.e.*, $21 per month for 12 months) worth of public transit passes can be excluded from gross income as a de minimis fringe in 1992 does not mean that any fringe benefit with a value equal to or less than $252 may be excluded as a de minimis fringe. As another example, the fact that the commuting use of an employer-provided vehicle more than one day a month is an example of a benefit not excludable as a de minimis fringe (see paragraph (e)(2) of this section) does not mean that the commuting use of a vehicle up to 12 times per year is excludable from gross income as a de minimis fringe.

(4) *Benefits exceeding value and frequency limits.* If a benefit provided to an employee is not de minimis because either the value or frequency exceeds a limit provided in this paragraph (d), no amount of the benefit is considered to be a de minimis fringe. For example, if, in 1992, an employer provides a $50 monthly public transit pass, the entire $50 must be included in income, not just the excess value over $21.

(e) *Examples*—(1) *Benefits excludable from income.* Examples of de minimis fringe benefits are occasional typing of personal letters by a company secretary; occasional personal use of an employer's copying machine, provided that the employer exercises sufficient control and imposes significant restrictions on the personal use of the machine so that at least 85 percent of the use of the machine is for business purposes; occasional cocktail parties, group meals, or picnics for employees and their guests; traditional birthday or holiday gifts of property (not cash) with a low fair market value; occasional theater or sporting event tickets; coffee, doughnuts, and soft drinks; local telephone calls; and flowers, fruit, books, or similar property provided to employees under special circumstances (e.g., on account of illness, outstanding performance, or family crisis).

(2) *Benefits not excludable as de minimis fringes.* Examples of fringe benefits that are not excludable from gross income as de minimis fringes are: season tickets to sporting or theatrical events; the commuting use of an employer-provided automobile or other vehicle more than one day a month; membership in a private country club or athletic facility, regardless of the frequency with which the employee uses the facility; employer-provided group-term life insurance on the life of the spouse or child of an employee; and use of employer-owned or leased facilities (such as an apartment, hunting lodge, boat, etc.) for a weekend. Some amount of the value of certain of these fringe benefits may be excluded from income under other statutory provisions, such as the exclusion for working condition fringes. See § 1.132–5.

(f) *Nonapplicability of nondiscrimination rules.* Except to the extent provided in § 1.132–7, the nondiscrimination rules of section 132(h)(1) and § 1.132–8 do not apply in determining the amount, if any, of a de minimis fringe. Thus, a fringe benefit may be excludable as a de minimis fringe even if the benefit is provided exclusively to highly compensated employees of the employer.

[T.D. 8256, 54 FR 28615, July 6, 1989, as amended by T.D. 8389, 57 FR 1871, Jan. 16, 1992; 57 FR 5982, Feb. 19, 1992]

§ 1.132–6T De minimis fringe—1985 through 1988 (temporary).

(a) *In general.* Gross income does not include the value of a de minimis fringe provided to an employee. The term ''de minimis fringe'' means any property or service the value of which is (after taking into account the frequency with which similar fringes are provided by the employer to the employer's employees) so small as to make accounting for it unreasonable or administratively impracticable.

(b) *Frequency.* Generally, the frequency with which similar fringes are provided by the employer to the employer's employees is determined by reference to the frequency with which the employer provides the fringe to each individual employee. For example, if an employer provides a free meal to one employee on a daily basis, but not to any other employee, the value of the meals is not de minimis with respect to that one employee even though with respect to the employer's entire workforce the meals are provided ''infrequently.'' However, where it would be administratively difficult to determine frequency with respect to individual employees, the frequency with which similar fringes are provided by the employer to the employer's employees is determined by reference to the frequency with which the employer provides the fringes to the employees and not the frequency with which individual employees receive them. In these cases, if an employer occasionally provides a fringe benefit of de minimis value to the employer's employees, the de minimis fringe exclusion may apply even though a particular employee receives the benefit frequently. For example, if an employer exercises sufficient control and imposes significant restrictions on the personal use of a company copying machine so that at least 85 percent of the use of the machine is for business purposes, any personal use the copying machine by particular employees is considered to be a de minimis fringe.

(c) *Administrability.* Unless excluded by a statutory provision other than section 132(a)(4), the value of any fringe benefit that would not be unreasonable or administratively impracticable to account for must be included in the employee's gross income. Thus, except as otherwise provided in this section, the provision of any cash fringe benefit (or any fringe benefit provided to an employee through the use of a charge or credit card) is not excludable as a de minimis fringe. For example, the provision of cash to an employee for personal entertainment is not excludable as a de minimis fringe.

(d) *Special rules*—(1) *Transit passes.* A transit pass provided to an employee at a discount not exceeding $15 per month may be excluded as a de minimis fringe. The exclusion provided in this paragraph (d) also applies to the provision of $15 in tokens or fare cards that enable an individual to travel on the transit system. The exclusion provided in this paragraph (d) does not apply to any provision of cash or other benefit to defray transit expenses incurred for personal travel.

(2) *Occasional meal money or local transportation fare.* Occasional meal money or local transportation fare provided to an employee because overtime work necessitates an extension of the employee's normal workday is excluded as a de minimis fringe.

(3) *Use of special rules to establish a general rule.* The special rules provided in this paragraph (d) may not be used to establish any general rule. For example, the fact that $180 ($15 per month for 12 months) worth of transit passes can be excluded in a year does not mean that any fringe benefit with a value equal to or less than $180 may be excluded as a de minimis fringe.

(4) *Benefits exceeding value and frequency limitations.* If the benefit provided to an employee is not de minimis because either the value or frequency exceeds a limit provided in this paragraph (d), no amount of the benefit is considered to be de minimis. For example, if an employer provides a $20 monthly transit pass, the entire $20 must be included in income, not just the excess value over $15.

(e) *Nonapplicability of nondiscrimination rules.* Except to the extent provided in §1.132–7T, the nondiscrimination rules of section 132(h)(1) and §1.132–8T do not apply. Thus, for example, a fringe benefit may be a de minimis fringe even if the benefit is provided exclusively to officers of the employer.

(f) *Examples*—(1) *Benefits excludable from income.* Examples of de minimis fringe benefits are occasional typing of personal letters by a company secretary; occasional personal use of an employer's copying machine, provided that the employer exercises sufficient control and imposes significant restrictions on the personal use of the machine so that at least 85 percent of the use of the machine is for business purposes; occasional cocktail parties or picnics for employees and their guests; traditional holiday gifts of property (not cash) with a low fair market value; occasional theatre or sporting event tickets; and coffee and doughnuts.

(2) *Benefits not excludable as de minimis fringes.* Examples of fringe benefits that are not excludable from income as de minimis fringes are: season tickets to sporting or theatrical events; the commuting use of an employer-provided automobile or other vehicle more than once a month; membership in a private country club or athletic facility, regardless of the frequency with which the employee uses the facility; and use of employer-owned or leased facilities (such as an apartment, hunting lodge, boat, etc.) for a weekend. Some amount of the value of these fringe benefits may be excluded under other statutory provisions, such as the exclusion for working condition fringes. See §1.132–5T.

[T.D. 8063, 50 FR 52308, Dec. 23, 1985, as amended by T.D. 8256, 54 FR 28600, July 6, 1989]

§ 1.132–7 Employer-operated eating facilities.

(a) *In general*—(1) *Condition for exclusion*—(i) *General rule.* The value of meals provided to employees at an employer-operated eating facility for employees is excludable from gross income as a de minimis fringe only if on an annual basis, the revenue from the facility equals or exceeds the direct operating costs of the facility.

(ii) *Additional condition for highly compensated employees.* With respect to any highly compensated employee, an exclusion is available under this section only if the condition set out in paragraph (a)(1)(i) of this section is satisfied and access to the facility is available on substantially the same terms to each member of a group of employees that is defined under a reasonable classification set up by the employer that does not discriminate in favor of highly compensated employees. See §1.132–8. For purposes of this paragraph (a)(1)(ii), each dining room or cafeteria in which meals are served is treated as a separate eating facility, whether each such dining room or cafeteria has its own kitchen or other food-preparation area.

(2) *Employer-operated eating facility for employees*. An employer-operated eating facility for employees is a facility that meets all of the following conditions—

(i) The facility is owned or leased by the employer,

(ii) The facility is operated by the employer,

(iii) The facility is located on or near the business premises of the employer, and

(iv) The meals furnished at the facility are provided during, or immediately before or after, the employee's workday.

For purposes of this section, the term ''meals'' means food, beverages, and related services provided at the facility. If an employer can reasonably determine the number of meals that are excludable from income by the recipient employees under section 119, the employer may, in determining whether the requirement of paragraph (a)(1)(i) of this section is satisfied, disregard all costs and revenues attributable to such meals provided to such employees. If an employer can reasonably determine the number of meals received by volunteers who receive food and beverages at a hospital, free or at a discount, the employer may, in determining whether the requirement of paragraph (a)(1)(i) of this section is satisfied, disregard all costs and revenues attributable to such meals provided to such volunteers. If an employer charges nonemployees a greater amount than employees, in determining whether the requirement of paragraph (a)(1)(i) of this section is satisfied, the employer must disregard all costs and revenues attributable to such meals provided to such nonemployees.

(3) *Operation by the employer*. If an employer contracts with another to operate an eating facility for its employees, the facility is considered to be operated by the employer for purposes of this section. If an eating facility is operated by more than one employer, it is considered to be operated by each employer.

(4) *Example*. The provisions of this paragraph (a)(2) may be illustrated by the following example:

Example 1. Assume that a not-for-profit hospital system maintains cafeterias for the use of its employees and volunteers. Only the employees are charged for food service at the cafeteria and the policy of the hospital is to charge the employees only for the costs of food, beverage and labor directly attributable to the meal. Most of the cafeterias within the system furnish more free meals to volunteers than they serve paid meals to employees. For purposes of this paragraph, as long as the employer can accurately determine the number of meals received free or at a discount by volunteers, the employer may disregard all the costs and revenues attributable to such meals provided to volunteers. Therefore, for purposes of this paragraph, the costs of the hospital system for furnishing meals to employees who pay for them are the costs to be compared to determine if the revenues from the facility equal or exceed direct operating costs of the facility's service to employees.

(b) *Direct operating costs*—(1) *In general*. For purposes of this section, the direct operating costs of an eating facility are—

(i) The cost of food and beverages, and

(ii) The cost of labor for personnel whose services relating to the facility are performed primarily on the premises of the eating facility. Direct operating costs do not include the labor cost attributable to personnel whose services relating to the facility are not performed primarily on the premises of the eating facility. Thus, for example, the labor costs attributable to cooks, waiters, and waitresses are included in direct operating costs, but the labor cost attributable to a manager of an eating facility whose services relating to the facility are not primarily performed on the premises of the eating facility is not included in direct operating costs. If an employee performs services relating to the facility both on and off the premises of the eating facility, only the portion of the total labor cost of the employee relating to the facility that bears the same proportion to such total labor cost as time spent on the premises bears to total time spent performing services relating to the facility is included in direct operating costs. For example, assume that 60 percent of the services of a cook in the above example are not related to the eating facility. Only 40 percent of the total labor cost of the cook is includible in direct operating costs. For purposes of this section, labor costs include all compensation required to be reported on a Form W-2 for income tax purposes and related employment taxes paid by the employer. In determining the direct operating costs of an eating facility, the employer may include as part of the facility, vending machines that are provided by the employer and located on the same premises as the other eating facilities operated by the employer.

(2) *Multiple dining rooms or cafeterias.* The direct operating costs test may be applied separately for each dining room or cafeteria. Alternatively, the direct operating costs test may be applied with respect to all the eating facilities operated by the employer.

(3) *Payment to operator of facility.* If an employer contracts with another to operate an eating facility for its employees, the direct operating costs of the facility consist both of direct operating costs, if any, incurred by the employer and the amount paid to the operator of the facility to the extent that such amount is attributable to what would be direct operating costs if the employer operated the facility directly.

(c) *Valuation of non-excluded meals provided at an employer-operated eating facility for employees.* If the exclusion for meals provided at an employer-operated eating facility for employees is not available, the recipient of meals provided at such facility must include in income the amount by which the fair market value of the meals provided exceeds the sum of—

(1) The amount, if any, paid for the meals, and

(2) The amount, if any, specifically excluded by another section of chapter 1 of this subtitle.

For special valuation rules relating to such meals, see §1.61–21(j).

[T.D. 8256, 54 FR 28617, July 6, 1989]

§1.132–7T Treatment of employer-operated eating facilities—1985 through 1988 (temporary).

(a) *In general*—(1) *General rule.* The value of meals provided to employees at an employer-operated eating facility for employees is excludable from gross income as a de minimis fringe only if—

(i) On an annual basis, the revenue from the facility equals or exceeds the direct operating costs of the facility, and

(ii) With respect to any officer, owner or highly compensated employee, access to the facility is available on substantially the same terms to each member of a group of employees that is defined under a reasonable classification set up by the employer that does not discriminate in favor of officers, owners, and highly compensated employees. See §1.132–8T.

(2) *Employer-operated eating facility for employees.* An employer-operated eating facility for employees is a facility that meets all of the following conditions—

(i) The facility is owned or leased by the employer,

(ii) The facility is operated by the employer,

(iii) The facility is located on or near the business premises of the employer,

(iv) Substantially all of the use of the facility is by employees of the employer operating the facility, and

(v) The meals furnished at the facility are provided during, or immediately before or after, the employee's workday.

For purposes of this section, the term ''meals'' means food, beverages, and related services provided at the facility. If an employer can determine the number of employees who receive meals that are excludable from income under section 119, the employer may, in determining whether the requirement of paragraph (a)(1)(i) of this section is satisfied, disregard all costs and revenues attributable to such meals provided to such employees. For purposes of this section, each dining room or cafeteria in which meals are served is treated as a separate eating facility, regardless of whether each such dining room or cafeteria has its own kitchen or other food-preparation area.

(3) *Operation by the employer*. If an employer contracts with another to operate an eating facility for its employees, the facility is considered to be operated by the employer for purposes of this section. If an eating facility is operated by more than one employer, it is considered to be operated by each employer.

(b) *Direct operating costs*. The direct operating costs test must be applied separately for each dining room or cafeteria. For purpose of this section, the direct operating costs of an eating facilities are: (1) The cost of food and beverages and (2) the cost of labor for personnel whose services relating to the facility are performed primarily on the premises of the eating facility. Direct operating costs do not include the cost of labor for personnel whose services relating to the facility are not performed primarily on the premises of the eating facility. Thus, for example, the labor cost for cooks, waiters, and waitresses is included in direct operating costs, but the labor cost for a manager of an eating facility whose services relating to the facility are not primarily performed on the premises of the eating facility is not included in direct operating costs. If an employee perfoms services both on and off the premises of the eating facility, only the applicable percentage of the total labor cost of the employee that bears the same proportion as time spent on the premises bears to total time is included in direct operating costs. For example, assume that 60 percent of the services of the cooks in the above example are not related to the eating facility. Only 40 percent of the total labor cost of the cooks is includible in direct operating costs. For purposes of this section, labor costs include all compensation required to be reported on a Form W-2 for income tax purposes and related employment taxes paid by the employer.

(c) *Valuation of non-excluded meals provided at an employer-operated eating facility for employees*. If the exclusion for meals provided at an employer-operated eating facility for employees is not available, the recipient of meals provided at such facility must include in income the amount by which the fair market value of the meals provided exceeds the sume of: (1) The amount, if any, paid for the meals, and (2) the amount, if any, specifically excluded by another section of the Code. For special valuation rules relating to such meals see §1.61–2T (j).

[T.D. 8063, 50 FR 52308, Dec. 23, 1985, as amended by T.D. 8256, 54 FR 28600, July 6, 1989]

§ 1.132–8 Fringe benefit nondiscrimination rules.

(a) *Application of nondiscrimination rules*—(1) *General rule*. A highly compensated employee who receives a no-additional cost service, a qualified employee discount or a meal provided at an employer-operated eating facility for employees shall not be permitted to exclude such benefit from his or her income unless the benefit is available on substantially the same terms to:

(i) All employees of the employer; or

(ii) A group of employees of the employer which is defined under a reasonable classification set up by the employer that does not discriminate in favor of highly compensated employees. See paragraph (f) of this section for the definition of a highly compensated employee.

(2) *Consequences of discrimination*—(i) *In general*. If an employer maintains more than one fringe benefit program, *i.e.*, either different fringe benefits being provided to the same group of employees, or different classifications of employees or the same fringe benefit being provided to two or more classifications of employees, the nondiscrimination requirements of section 132 will generally be applied separately to each such program. Thus, a determination that one fringe benefit program discriminates in favor of highly compensated employees generally will not cause other fringe benefit programs covering the same highly compensated employees to be treated as discriminatory. If the fringe benefits provided to a highly compensated individual do not satisfy the nondiscrimination rules provided in this section, such individual shall be unable to exclude from gross income any portion of the benefit. For example, if an employer offers a 20 percent discount (which otherwise satisfies the requirements for a qualified employee discount) to all non-

highly compensated employees and a 35 percent discount to all highly compensated employees, the entire value of the 35 percent discount (not just the excess over 20 percent) is includible in the gross income and wages of the highly compensated employees who make purchases at a discount.

(ii) *Exception*—(A) *Related fringe benefit programs.* If one of a group of fringe benefit programs discriminates in favor of highly compensated employees, no related fringe benefit provided to such highly compensated employees under any other fringe benefit program may be excluded from the gross income of such highly compensated employees. For example, assume a department store provides a 20 percent merchandise discount to all employees under one fringe benefit program. Assume further that under a second fringe benefit program, the department store provides an additional 15 percent merchandise discount to a group of employees defined under a classification which discriminates in favor of highly compensated employees. Because the second fringe benefit program is discriminatory, the 15 percent merchandise discount provided to the highly compensated employees is not a qualified employee discount. In addition, because the 20 percent merchandise discount provided under the first fringe benefit program is related to the fringe benefit provided under the second fringe benefit program, the 20 percent merchandise discount provided the highly compensated employees is not a qualified employee discount. Thus, the entire 35 percent merchandise discount provided to the highly compensated employees is includible in such employees' gross incomes.

(B) *Employer operated eating facilities for employees.* For purposes of paragraph (a)(2)(ii)(A) of this section, meals at different employer-operated eating facilities for employees are not related fringe benefits, so that a highly compensated employee may exclude from gross income the value of a meal at a nondiscriminatory facility even though any meals provided to him or her at a discriminatory facility cannot be excluded.

(3) *Scope of the nondiscrimination rules provided in this section.* The nondiscrimination rules provided in this section apply only to fringe benefits provided pursuant to section 132 (a)(1), (a)(2), and (e)(2). These rules have no application to any other employee benefit that may be subject to nondiscrimination requirements under any other section of the Code.

(b) *Aggregation of employees*—(1) *Section 132(a) (1) and (2).* For purposes of determining whether the exclusions for no-additional-cost services and qualified employee discounts are available to highly compensated employees, the nondiscrimination rules of this section are applied by aggregating the employees of all related employers (as defined in §1.132–1(c)), except that employees in different lines of business (as defined in §1.132–4) are not to be aggregated. Thus, in general, for purposes of this section, the term ''employees of the employer'' refers to all employees of the employer and any other entity that is a member of a group described in sections 414 (b), (c), (m), or (o) and that performs services within the same line of business as the employer which provides the particular fringe benefit. Employees in different lines of business will be aggregated, however, if the line of business limitation has been relaxed pursuant to paragraphs (b) through (g) of §1.132–4.

(2) *Section 132 (e) (2).* For purposes of determining whether the exclusions for meals provided at employer-operated eating facilities are available to highly compensated, the nondiscrimination rules of this section are applied by aggregating the employees of all related employers (as defined in section §1.132–1(c)) who regularly work at or near the premises on which the eating facility is located, except that employees in different lines of business (as defined in §1.132–4) are not to be aggregated. The nondiscrimination rules of this section are applied separately to each eating facility. Each dining room or cafeteria in which meals are served is treated as a separate eating facility, regardless of whether each such dining room or cafeteria has its own kitchen or other food-preparation area.

(3) *Classes of employees who may be excluded.* For purposes of applying the nondiscrimination rules of this section to a particular fringe benefit program,

there may be excluded from consideration employees who may be excluded from consideration under section 89(h), as enacted by the Tax Reform Act of 1986, Pub. L. 99–514, 100 Stat. 2085 (1986) and amended by the Technical and Miscellaneous Revenue Act of 1988, Pub. L. 100–647, 102 Stat. 3342 (1988).

(c) *Availability on substantially the same terms*—(1) *General rule.* The determination of whether a benefit is available on substantially the same terms shall be made upon the basis of the facts and circumstances of each situation. In general, however, if any one of the terms or conditions governing the availability of a particular benefit to one or more employees varies from any one of the terms or conditions governing the availability of a benefit made available to one or more other employees, such benefit shall not be considered to be available on substantially the same terms except to the extent otherwise provided in paragraph (c)(2) of this section. For example, if a department store provides a 20 percent qualified employee discount to all of its employees on all merchandise, the substantially the same terms requirement will be satisfied. Similarly, if the discount provided to all employees is 30 percent on certain merchandise (such as apparel), and 20 percent on all other merchandise, the substantially the same terms requirement will be satisfied. However, if a department store provides a 20 percent qualified employee discount to all employees, but as to the employees in certain departments, the discount is available upon hire, and as to the remaining departments, the discount is only available when an employee has completed a specified term of services, the 20 percent discount is not available on substantially the same terms to all of the employees of the employer. Similarly, if a greater discount is given to employees with more seniority, full-time work status, or a particular job description, such benefit (*i.e.*, the discount) would not be available to all employees eligible for the discount on substantially the same terms, except to the extent otherwise provided in paragraph (c)(2) of this section. These examples also apply to no-additional-cost-services. Thus, if an employer charges non-highly compensated employees for a no-additional-cost service and does not charge highly compensated employees (or charges highly compensated employees a lesser amount), the substantially the same terms requirement will not be satisfied.

(2) *Certain terms relating to priority.* Certain fringe benefits made available to employees are available only in limited quantities that may be insufficient to meet employee demand. This situation may occur either because of employer policy (such as where an employer determines that only a certain number of units of a specific product will be made available to employees each year) or because of the nature of the fringe benefit (such as where an employer provides a no-additional-cost transportation service that is limited to the number of seats available just before departure). Under these circumstances, an employer may find it necessary to establish some method of allocating the limited fringe benefits among the employees eligible to receive the fringe benefits. The employer may establish the priorities described below.

(i) *Priority on a first come, first served, or similar basis.* A benefit shall not fail to be treated as available to a group of employees on substantially the same terms merely because the employer allocates the benefit among such employees on a ''first come, first served'' or lottery basis, provided that the same notice of the terms of availability is given to all employees in the group and the terms under which the benefit is provided to employees within the group are otherwise the same with respect to all employees. For purposes of the preceding sentence, a program that gives priority to employees who are the first to submit written requests for the benefit will constitute priority on a ''first come, first served'' basis. Similarly, if the employer regularly engages in the practice of allocating benefits on a priority basis to employees demonstrating a critical need, such benefit shall not fail to be treated as available on substantially the same terms to all of the employees with respect to whom such priority status is available as long as the determination is based upon uniform and objective criteria which have been communicated to all employees in the group of eligible employees. An example of a critical need would be priority transportation given to an employee in the event of a medical emergency involving the employee (or a member of the employee's immediate family) or a recent death in the employee's immediate family. Frustrated vacation plans or forfeited deposits would not be treated as giving rise to particularly critical needs.

(ii) *Priority on the basis of seniority*. Solely for purposes of §1.132–8, a benefit shall not fail to be treated as available to a group of employees of the employer on substantially the same terms merely because the employer allocates the benefit among such employees on a seniority basis provided that:

(A) The same notice of the terms of availability is given to all employees in the group; and

(B) The average value of the benefit provided for each nonhighly compensated employee is at least 75% of that provided for each highly compensated employee. For purposes of this test, the average value of the benefit provided for each nonhighly compensated (highly compensated) employee is determined by taking the sum of the fair market values of such benefit provided to all the nonhighly compensated (highly compensated) employees, determined in accordance with §1.61–21, and then dividing that sum by the total number of nonhighly compensated (highly compensated) employees of the employer. For purposes of determining the average value of the benefit provided for each employee, all employee's of the employer are counted, including those who are not eligible to receive the benefit from the employer.

(d) *Testing for discrimination*—(1) *Classification test*. In the event that a benefit described in section 132 (a)(1), (a)(2) or (e)(2) is not available on substantially the same terms to all of the employees of the employer, no exclusion shall be available to a highly compensated employee for such benefit unless the program under which the benefit is provided satisfies the nondiscrimination standards set forth in this section. The nondiscrimination standard of this section will be satisfied only if the benefit is available on substantially the same terms to a group of employees of the employer which is defined under a reasonable classification established by the employer that does not discriminate in favor of highly compensated employees. The determination of whether a particular classification is discriminatory will generally depend upon the facts and circumstances involved, based upon principles similar to those applied for purposes of section 410(b)(2)(A)(i) or, for years commencing prior to January 1, 1988, section 410(b)(1)(B). Thus, in general, except as otherwise provided in this section, if a benefit is available on substantially the same terms to a group of employees which, when compared with all of the other employees of the employer, constitutes a nondiscriminatory classification under section 410(b)(2)(A)(i) (or, if applicable, section 410(b)(1)(B)), it shall be deemed to be nondiscriminatory.

(2) *Classifications that are per se discriminatory*. A classification that, on its face, makes fringe benefits available principally to highly compensated employees is per se discriminatory. In addition, a classification that is based on either an amount or rate of compensation is per se discriminatory if it favors those with the higher amount or rate of compensation. On the other hand, a classification that is based on factors such as seniority, full-time vs. part-time employment, or job description is not per se discriminatory but may be discriminatory as applied to the workforce of a particular employer.

(3) *Former employees*. When determining whether a classification is discriminatory, former employees shall be tested separately from other employees of the employer. Therefore, a classification is not discriminatory solely because the employer does not make fringe benefits available to any former employee. Whether a classification of former employees discriminates in favor of highly compensated employees will depend upon the particular facts and circumstances.

(4) *Restructuring of benefits*. For purposes of testing whether a particular group of employees would constitute a

discriminatory classification for purposes of this section, an employer may restructure its fringe benefit program as described in this paragraph. If a fringe benefit is provided to more than one group of employees, and one or more such groups would constitute a discriminatory classification if considered by itself, then for purposes of this section, the employer may restructure its fringe benefit program so that all or some of the members of such group may be aggregated with another group, provided that each member of the restructured group will have available to him or her the same benefit upon the same terms and conditions. For example, assume that all highly compensated employees of an employer have fewer than five years of service and all nonhighly compensated employees have over five years of service. If the employer provided a five percent discount to employees with under five years of service and a ten percent discount to employees with over five years of service, the discount program available to the highly compensated employees would not satisfy the nondiscriminatory classification test; however, as a result of the rule described in this paragraph (d)(4), the employer could structure the program to consist of a five percent discount for all employees and a five percent additional discount for nonhighly compensated employees.

(5) *Employer-operated eating facilities for employees*—(i) *General rule*. If access to an employer-operated eating facility for employees is available to a classification of employees that discriminates in favor of highly compensated employees, then the classification will not be treated as discriminating in favor of highly compensated employees unless the facility is used by one or more executive group employees more than a de minimis amount.

(ii) *Executive group employee*. For purposes of this paragraph (d)(5), an employee is an ''executive group employee'' if the definition of paragraph (f)(1) of this section is satisfied. For purposes of identifying such employees, the phrase ''top one percent of the employees'' is substituted for the phrase ''top ten percent of the employees'' in section 414(q)(4) (relating to the definition of ''top-paid group'').

(e) *Cash bonuses or rebates*. A cash bonus or rebate provided to an employee by an employer that is determined with reference to the value of employer-provided property or services purchased by the employee, is treated as an equivalent employee discount. For example, assume a department store provides a 20 percent merchandise discount to all employees under a fringe benefit program. In addition, assume that the department store provides cash bonuses to a group of employees defined under a classification which discriminates in favor of highly compensated employees. Assume further that such cash bonuses equal 15 percent of the value of merchandise purchased by each employee. This arrangement is substantively identical to the example described in paragraph (e)(2)(i) of this section concerning related fringe benefit programs. Thus, both the 20 percent merchandise discount and the 15 percent cash bonus provided to the highly compensated employees are includible in such employees' gross incomes.

(f) *Highly compensated employee*—(1) *Government and nongovernment employees*. A highly compensated employee of any employer is any employee who, during the year or the preceding year—

(i) Was a 5-percent owner,

(ii) Received compensation from the employer in excess of $75,000,

(iii) Received compensation from the employer in excess of $50,000 and was in the top-paid group of employees for such year, or

(iv) Was at any time an officer and received compensation greater than 150 percent of the amount in effect under section 415(c)(1)(A) for such year.

For purposes of determining whether an employee is a highly compensated employee, the rules of sections 414 (q), (s), and (t) apply.

(2) *Former employees*. A former employee shall be treated as a highly compensated employee if—

(i) The employee was a highly compensated employee when the employee separated from service, or

(ii) The employee was a highly compensated employee at any time after attaining age 55.

[T.D. 8256, 54 FR 28618, July 6, 1989]

§ 1.132–8T Nondiscrimination rules—1985 through 1988 (temporary).

(a) *Application of nondiscrimination rules*—(1) *General rule.* To qualify under section 132 for the exclusions for nonadditional-cost services, qualified employee discounts, or meals provided at employer-operated eating facilities for employees, the fringe benefit must be available on substantially the same terms to each member of a group of employees which is defined under a reasonable classification set up by the employer that does not discriminate in favor of officers, owners, or highly compensated employees (the ''prohibited group employees'').

(2) *Consequences of discrimination.* If the availability of or the provision of the fringe benefit does not satisfy the nondiscrimination rules provided in this section, the exclusion applies only to those employees (if any) who receive the benefit and who are not prohibited group employees. For example, if an employer offers a 20 percent discount (which otherwise satisfies the requirements for a qualified employee discount) to all nonprohibited group employees and a 35 percent discount to all prohibited group employees, the entire value of the 35 percent discount (not just the excess over 20 percent) is includible in the gross income and wages of the prohibited group employees who make purchases at a discount.

(3) *Scope of the nondiscrimination rules provided in this section.* The nondiscrimination rules provided in this section apply only to fringe benefits provided pursuant to section 132 (a)(1), (a)(2), and (e)(2). These rules have no application to any other employee benefit that may be subject to nondiscrimination requirements under any other section of the Code.

(b) *Coverage requirement*—(1) *Section 132 (a)(1) and (2).* For purposes of the exclusions for no-additional-cost services and qualified employee discounts, the nondiscrimination rules of this section are applied by aggregating the employees of all related employers (as defined in §1.132–1T (c)), but without aggregating employees in different lines of business (as defined in §1.132–4T). Employees in different lines of business will be aggregated, however, if the line of business limitation has been relaxed pursuant to either section 1.132–4T (b) or (c). Except as provided in paragraph (e) of this section, the nondiscrimination rules of this section are generally applied separately to each fringe benefit program of an employer.

(2) *Section 132(e)(2).* For purposes of the exclusion for meals provided at employer-operated eating facilities for employees, the nondiscrimination rules of this section are applied by aggregating the employees of all related employers, without regard to different lines of business, who regularly work at or near the premises on which the eating facility is located. The nondiscrimination rules of this section are applied separately to each eating facility. Each dining room or cafeteria in which meals are served is treated as a separate eating facility, regardless of whether each such dining room or cafeteria has its own kitchen or other food-preparation area.

(3) *Classes of employees who may be excluded.* Except as otherwise provided in this section, for purposes of applying the nondiscrimination rules of this section to a particular fringe benefit program, there may be excluded from consideration the following classes of employees provided that, with respect to each class (other than the class described in paragraph (b)(3)(iii) of this section), all employees in the class are excluded from participating in the particular fringe benefit program—

(i) All part-time or seasonal employees who are (or who are reasonably expected to be) credited with less than 1,000 hours (or such lesser number required for the program) of service during a calendar year;

(ii) All employees who are included in a unit of employees covered by an agreement with the Secretary of Labor finds to be a collective bargaining agreement between employee representatives and one or more employers, if there is evidence that the particular fringe benefit program was the subject of good faith bargaining between such employee representatives and such employer or employers (and if, after March 31, 1984, the additional condition of section 7701(a)(46) is satisfied);

(iii) All employees who are nonresident aliens and who receive no earned income (within the meaning of section 911(d)(2)) from the employer which constitutes income from services within the United States (within the meaning of section 861(a)(3));

(iv) All employees who have not completed at least one year (or such lesser period required for the program) of service with the employer;

(v) All employees who have separated from the service of the employer in a year prior to the current year (regardless of the reason for the separation);

(vi) All employees who have separated from the service of the employer in a year prior to the current year except for retired and/or disabled employees (either with or without a time limit based on a set number of years since separation from the service of the employer); and

(vii) All employees of a leased section of a department store.

(c) *Classification requirement*—(1) *General rule*. The determination of whether a particular classification established by an employer discriminates in favor of the prohibited group will depend on the facts and circumstances involved, based on principles similar to those applied in the qualified plan area (see section 410(b)(1)(B) and the regulations thereunder). In general, except as otherwise provided in this section, a classification that would be determined to be nondiscriminatory pursuant to the application of the nondiscrimination standards that are applied in the qualified plan area shall be deemed to be nondiscriminatory for purposes of section 132.

(2) *Classifications that are per se discriminatory*. A classification that, on its face, makes fringe benefits available only to prohibited group employees is per se discriminatory, and no exclusion from gross income is available to any prohibited group employee under section 132. In addition, a classification that is based on either an amount or rate of compensation is per se discriminatory if it favors those with the higher amount or rate of compensation. On the other hand, a classification that is based on factors such as seniority, full-time vs. part-time employment, or job description is not per se discriminatory but may be discriminatory as applied to the workforce of a particular employer.

(3) *Former employees*. When determining whether a classification is discriminatory, former employees shall not be considered together with other employees of the employer. Therefore, a classification is not discriminatory if the employer does not make the fringe benefits available to any former employee. Whether a classification of former employees discriminates in favor of prohibited group employees will depend on the facts and circumstances. The rules of this section shall apply separately to the former employee classification.

(4) *Employer-operated eating facilities for employees*—(i) *General rule*. If access to an employer-operated eating facility for employees is available to a classification of employees that discriminates in favor of highly compensated employees, the classification will not be treated as discriminating in favor of the prohibited group employees unless the facility is used, more than a de minimis amount, by any executive group employee.

(ii) *Executive group employees*. For purposes of this paragraph (c)(4), the term ''executive group employees'' has the same meaning as the term ''prohibited group employees'' (as defined in paragraph (g) of this section), except that for purposes of identifying highly compensated employees—

(A) The exception provided in paragraph (g)(1)(i)(A) of this section does not apply, and

(B) The phrase ''highest-paid one percent of all employees of an employer'' is substituted for the phrase ''highest-paid ten percent of all employees of an employer'' in paragraph (g)(1)(ii)(A) of this section.

(d) *Substantially-the-same-terms requirement*—(1) *General rule*. Fringe benefits available to a particular classification of employees must be available to each employee in the classification on substantially the same terms. The determination of whether this requirement is met shall depend on the facts and circumstances involved. For example, if a department store provides a 20 percent qualified employee discount to its employees on all merchandise, the substantially-the-same-terms requirement will be satisfied. Similarly, if the discount provided to all employees is 30 percent on certain merchandise (such as apparel), and 20 percent on all other merchandise, the substantially-the-same-terms requirement will be satisfied. However, if the discount provided is 20 percent on all merchandise for hourly employees and 30 percent on all merchandise for salaried employees, the substantially-the-same-terms requirement will not be satisfied. In addition, if the percentage discount varies depending on either an employee's amount or rate of compensation, or volume of purchases, the substantially-the-same-terms requirement will not be satisfied. In order to determine whether such a discount program satisfies the nondiscrimination requirements of section 132, each group of employees that does receive fringe benefits on substantially the same terms must be treated as a separate classification. However, subject to the rules of paragraph (e)(2) of this section, an employer may divide a fringe benefit program into two programs for purposes of aggregating groups of employees. See Example (1) of paragraph (d)(3) of this section.

(2) *Terms relating to priority.* Certain fringe benefits made available to employees are available only in limited quantities that may be insufficient to meet employee demand. This may occur either because of employer policy (such as where an employer determines that only a certain number of units of a specific product will be made available to employees each year) or because of the nature of the fringe benefit (such as where an employer provides a no-additional-cost transportation service that is limited to the number of seats available just before departure). Under these circumstances, an employer may find it necessary to establish some method of allocating the limited fringe benefits among the employees eligible to receive the fringe benefits. An allocation among employees on a "first-come, first-served" basis will not violate the substantially-the-same-terms requirement provided that such an allocation is not discriminatory in practice. In addition, an allocation among employees on a lottery basis will not violate the substantially-the-same-terms requirement provided that such an allocation is nondiscriminatory in practice. For example, assume that an employer has a limited number of a particular benefit to offer to its employees. Assume further that the employees interested in receiving the benefit submit their names to the employer who then selects a number of names, at random, equal to the number of fringe benefits available. This lottery system would not violate the substantially-the-same-terms requirement. An allocation among employees on other than a "first-come, first-served", lottery, or similar basis will violate the substantially-the-same-terms requirement. Therefore, an allocation based on seniority, full-time vs. part-time employment, or job description will violate the substantially-the-same-terms requirement. In order to determine whether such a fringe benefit program satisfies the nondiscrimination requirements of section 132, each group of employees that does receive fringe benefits on substantially the same terms must be treated as a separate classification. For purposes of this rule, the last two sentences of paragraph (d)(1) of this section apply.

(3) *Examples.* The followings examples illustrate the provisions of this paragraph (d):

Example 1. Assume that with respect to a benefit available in limited quantities an employer provides priority to employees based on seniority. Assume further that all non-prohibited group employees have ten years of seniority and all prohibited group employees have nine years seniority. If each of these groups were tested separately, the benefits offered to prohibited group employees would be discriminatory under this section. In this case, the employer could divide the fringe benefit program provided to non-prohibited group employees into two parts: one relating to nine years of seniority and one relating to an additional year of seniority. As restructured in this manner, all employees receive the benefit relating to nine years seniority and only non-prohibited group employees receive the benefit relating to an additional year of seniority. Both groups (all employees and all non-prohibited group employees) are nondiscriminatory groups.

Example 2. Assume that prices charged to prohibited group employees at an employer-operated eating facility for employees are lower than prices charged to non-prohibited group employees. The substantially-the-same requirement is not satisfied.

(4) *Disproportionate use of eating facility.* If access to an employer-operated eating facility for employees is technically available on substantially-the-same-terms (to (i) all employees who regularly work at or near the premises on which the eating facility is located (the employee group), or (ii) a nondiscriminatory classification of the employee group, but in practice a highly disproportionate number of the prohibited group employees in the employee group, compared to the non-prohibited group employees in the employee group, use the facility, the substantially-the-same-terms requirement will not be satisfied unless no member of the executive group eats there more than a de minimis amount.

(e) *Aggregation of separate fringe benefit programs*—(1) *General rule.* If an employer maintains more than one fringe benefit program, *i.e.*, two or more classifications of employees providing either identical or different fringe benefits, the nondiscrimination requirements of section 132 will generally be applied separately to each such program. Thus, a determination that one fringe benefit program discriminates in favor of prohibited group employees generally will not cause other fringe benefit programs covering the same prohibited group employees to be treated as discriminatory.

(2) *Exception*—(i) *Related fringe benefit programs.* If one of a group of fringe benefit programs discriminates in favor of prohibited group employees, no related fringe benefit provided to such prohibited group employees under any other fringe benefit program may be excluded from the gross income of such prohibited group employees. For example, assume a department store provides a 20 percent merchandise discount to all employees under one fringe benefit program. Assume further that under a second fringe benefit program, the department store provides an additional 15 percent merchandise discount to a group of employees defined under a classification which discriminates in favor of the prohibited group. Because the second fringe benefit program is discriminatory, the 15 percent merchandise discount provided to the prohibited group employees is not a qualified employee discount. In addition, because the 20 percent merchandise discount provided under the first fringe benefit program is related to the fringe benefit provided under the second fringe benefit program, the 20 percent merchandise discount provided the prohibited group employees is not a qualified employee discount. Thus, the entire 35 percent merchandise discount provided to the prohibited group employees is includible in such employees' gross incomes.

(ii) *Employer-operated eating facilities for employees.* For purposes of paragraph (e)(2)(i) of this section, meals at different employer-operated eating facilities for employees are not related fringe benefits, so that a prohibited group employee may exclude the value of a meal at a nondiscriminatory facility even though any meals provided to him or her at the discriminatory facility cannot be excluded.

(f) *Cash bonuses or rebates.* A cash bonus or rebate provided to an employee by an employer that is determined pursuant to the value of employer-provided property or services purchased by the employee, is treated as an equivalent employee discount. For example, assume a department store provides a 20 percent merchandise discount to all employees under a fringe benefit program. In addition, assume that the department store provides cash bonuses to a group of employees defined under a classification which discriminates in favor of the prohibited group. Assume further that such cash bonuses equal 15 percent of the value of merchandise purchased by each employee. This arrangement is substantively identical to the example described in paragraph (e)(2) of this section. Thus, both the 20 percent merchandise discount and the 15 percent cash bonus provided to the prohibited group employees are includible in such employees' gross incomes.

(g) *Prohibited group employees*—(1) *Highly compensated*—(i) *General rule.* Except as otherwise provided in this paragraph (g)(1)(i), any employee of an employer who has (or is reasonably expected to have) compensation during a calendar year equal to or greater than the employer's base compensation amount is highly compensated. There are two exceptions to this rule:

(A) Any employee who has (or is reasonably expected to have) compensation during a calendar year equal to or greater than $50,000 is highly compensated, regardless of whether such compensation is in excess of the base compensation amount, and

(B) Any employee who is reasonably expected to have compensation during a calendar year equal to or less than $20,000 is not highly compensated, unless no employee of the employer is reasonably expected to have compensation equal to or greater than $35,000.

The determination of whether an employee is a highly compensated employee will be determined based on the entire employee workforce of all employers aggregated pursuant to the rules of section 414 (b), (c), or (m) without regard to the regular workplace of the employees.

(ii) *Base compensation amount*—(A) *General rule.* The term ''base compensation amount'' is defined as that amount corresponding to the lowest annual compensation amount received by the highest-paid ten percent of all employees of an employer (the number of employees in the top ten percent will be increased to the next highest integer if necessary), determined on the basis of the preceding calendar year. For purposes of this paragraph (g)(1)(ii), the term ''employer'' includes all entities that would be aggregated pursuant to the rules of section 414 (b), (c), or (m).

(B) *Employees that are excluded.* For purposes of determining the base compensation amount with respect to a fringe benefit program, employees described in paragraph (b)(3) of this section are excluded whether or not they are covered under the fringe benefit program, except that: (*1*) Employees described in paragraph (b)(3)(ii) of this section are taken into account with respect to the program even if they are excluded under paragraph (b)(3), and (*2*) employees described in paragraph (b)(3) (i) and (iv) of this section are taken into account with respect to the program unless they are excluded under paragraph (b)(3).

(C) *Exception to preceding calendar year rule.* In the case of an employer's first year of operation, or where an employer's business has changed significantly from the prior calendar year (e.g., due to an acquisition or merger), the employer must make a good faith attempt to either determine or adjust the base compensation amount for the current year based on reasonable estimates of current year compensation.

(iii) *Compensation.* The term ''compensation'' is defined as the amount reportable on a Form W-2 as income. Amounts that would be excluded from income but for section 132(h)(1) are not included in compensation for purposes of this paragraph (g)(1). Compensation includes amounts received from all entities which would be treated as a single employer under section 414 (b), (c), or (m) and is not restricted to amounts received with respect to any one line of business.

(iv) *Employee.* Generally, for purposes of determining whether an employee is highly compensated under this paragraph (g)(1), the term ''employee'' does not include any individual who does not perform services for the employer as an employee during the calendar year. For example, if an employer has active employees, retired or disabled employees, and widows or widowers who are ''employees'' under section 132(f)(1)(B), the general rule (described in paragraph (g)(1)(i) of this section) applies only to the active employees.

(2) *Owner*—(i) *General rule.* For purposes of this section, the term ''owner'' means any employee who owns a one percent or greater interest in either the employer or in any entity that would be aggregated with the employer pursuant to the rules of section 414 (b), (c), or (m). In addition, such an employee shall be treated as an owner of all entities that would be aggregated with the employer pursuant to the rules of section 414 (b), (c), or (m).

(ii) *Determining ownership.* Ownership in a corporation shall be determined pursuant to the rules of section 318(a). For purposes of determining ownership in an entity other than a corporation, the rules of section 318(a) shall apply in a manner similar to the way in which they apply for purposes of determining ownership in a corporation. For non-corporate interests, capital or profits interest must be substituted for stock.

(3) *Officer*—(i) *Non-government*. For purposes of this section, an officer of a non-government employer is any employee who is appointed, confirmed, or elected by the Board or shareholders of the employer. An employee who is an officer of an employer shall be treated as an officer of all entities treated as a single employer pursuant to section 414 (b), (c), or (m). The number of officers is not to exceed one-percent of the total number of employees of all entities treated as a single employer pursuant to section 414 (b), (c), or (m) (increased to the next highest integer, if necessary). If the number of officers exceeds one-percent of all employees, then the limitation is to be applied to employees in descending order of compensation (as defined in paragraph (g)(1)(iii) of this section). Thus, if an employer with 1,000 employees has 11 board-appointed officers, the employee with the least compensation of those officers would not be an officer under this paragraph (g)(3)(i). In determining the total number of employees with respect to a fringe benefit program, employees described in paragraph (b)(3) of this section are excluded whether or not they are covered under the fringe benefit program, except that (A) employees described in paragraph (b)(3)(ii) of this section are taken into account with respect to the program even if they are excluded under paragraph (b)(3), and (B) employees described in paragraph (b)(3) (i) and (iv) of this section are taken into account with respect to the program unless they are excluded under paragraph (b)(3).

(ii) *Government*. For purposes of this section, an officer of a government employer is any—

(A) Elected official,

(B) Federal employee appointed by the President and confirmed by the Senate. However, in the case of any commissioned officer of the United States Armed Forces, an officer is any employee with the rank of brigadier general or rear admiral (lower half) or above, and

(C) State or local executive officer comparable to individuals described in paragraphs (g)(3)(ii) (A) and (B) of this section.

For purposes of this paragraph (g)(3)(ii), the term "government" includes any Federal, state, or local governmental unit, and any agency or instrumentality thereof.

(4) *Former employees*. [Reserved]

[T.D. 8063, 50 FR 52309, Dec. 23, 1985, as amended by T.D. 8256, 54 FR 28600, July 6, 1989]

§ 1.132–9 Qualified transportation fringes.

(a) *Table of contents*. This section contains a list of the questions and answers in § 1.132–9.

(b) *Questions and answers.*

Q–1. What is a qualified transportation fringe?

A–1. (a) The following benefits are qualified transportation fringe benefits:

(1) Transportation in a commuter highway vehicle.

(2) Transit passes.

(3) Qualified parking.

(b) An employer may simultaneously provide an employee with any one or more of these three benefits.

Q–2. What is transportation in a commuter highway vehicle?

A–2. Transportation in a commuter highway vehicle is transportation provided by an employer to an employee in connection with travel between the employee's residence and place of employment. A commuter highway vehicle is a highway vehicle with a seating capacity of at least 6 adults (excluding the driver) and with respect to which at least 80 percent of the vehicle's mileage for a year is reasonably expected to be—

(a) For transporting employees in connection with travel between their residences and their place of employment; and

(b) On trips during which the number of employees transported for commuting is at least one-half of the adult seating capacity of the vehicle (excluding the driver).

Q–3. What are transit passes?

A–3. A transit pass is any pass, token, farecard, voucher, or similar item (including an item exchangeable for fare media) that entitles a person to transportation—

(a) On mass transit facilities (whether or not publicly owned); or

(b) Provided by any person in the business of transporting persons for compensation or hire in a highway vehicle with a seating capacity of at least 6 adults (excluding the driver).

Q–4. What is qualified parking?

A–4. (a) Qualified parking is parking provided to an employee by an employer—

(1) On or near the employer's business premises; or

(2) At a location from which the employee commutes to work (including commuting by carpool, commuter highway vehicle, mass transit facilities, or transportation provided by any person in the business of transporting persons for compensation or hire).

(b) For purposes of section 132(f), parking on or near the employer's business premises includes parking on or near a work location at which the employee provides services for the employer. However, qualified parking does not include—

(1) The value of parking provided to an employee that is excludable from gross income under section 132(a)(3) (as a working condition fringe), or

(2) Reimbursement paid to an employee for parking costs that is excludable from gross income as an amount treated as paid under an accountable plan. See §1.62–2.

(c) However, parking on or near property used by the employee for residential purposes is not qualified parking.

(d) Parking is provided by an employer if—

(1) The parking is on property that the employer owns or leases;

(2) The employer pays for the parking; or

(3) The employer reimburses the employee for parking expenses (see Q/A–16

of this section for rules relating to cash reimbursements).

Q–5. May qualified transportation fringes be provided to individuals who are not employees?

A–5. An employer may provide qualified transportation fringes only to individuals who are currently employees of the employer at the time the qualified transportation fringe is provided. The term employee for purposes of qualified transportation fringes is defined in §1.132–1(b)(2)(i). This term includes only common law employees and other statutory employees, such as officers of corporations. See Q/A–24 of this section for rules regarding partners, 2-percent shareholders, and independent contractors.

Q–6. Must a qualified transportation fringe benefit plan be in writing?

A–6. No. Section 132(f) does not require that a qualified transportation fringe benefit plan be in writing.

Q–7. Is there a limit on the value of qualified transportation fringes that may be excluded from an employee's gross income?

A–7. (a) *Transportation in a commuter highway vehicle and transit passes.* Before January 1, 2002, up to $65 per month is excludable from the gross income of an employee for transportation in a commuter highway vehicle and transit passes provided by an employer. On January 1, 2002, this amount is increased to $100 per month.

(b) *Parking.* Up to $175 per month is excludable from the gross income of an employee for qualified parking.

(c) *Combination.* An employer may provide qualified parking benefits in addition to transportation in a commuter highway vehicle and transit passes.

(d) *Cost-of-living adjustments.* The amounts in paragraphs (a) and (b) of this Q/A–7 are adjusted annually, beginning with 2000, to reflect cost-of-living. The adjusted figures are announced by the Service before the beginning of the year.

Q–8. What amount is includible in an employee's wages for income and employment tax purposes if the value of the qualified transportation fringe exceeds the applicable statutory monthly limit?

A–8. (a) Generally, an employee must include in gross income the amount by which the fair market value of the benefit exceeds the sum of the amount, if any, paid by the employee and any amount excluded from gross income under section 132(a)(5). Thus, assuming no other statutory exclusion applies, if an employer provides an employee with a qualified transportation fringe that exceeds the applicable statutory monthly limit and the employee does not make any payment, the value of the benefits provided in excess of the applicable statutory monthly limit is included in the employee's wages for income and employment tax purposes. See §1.61–21(b)(1).

(b) The following examples illustrate the principles of this Q/A–8:

Example 1. (i) For each month in a year in which the statutory monthly transit pass limit is $100 (*i.e.*, a year after 2001), Employer M provides a transit pass valued at $110 to Employee D, who does not pay any amount to Employer M for the transit pass.

(ii) In this *Example 1,* because the value of the monthly transit pass exceeds the statutory monthly limit by $10, $120 ($110—$100, times 12 months) must be included in D's wages for income and employment tax purposes for the year with respect to the transit passes.

Example 2. (i) For each month in a year in which the statutory monthly qualified parking limit is $175, Employer M provides qualified parking valued at $195 to Employee E, who does not pay any amount to M for the parking.

(ii) In this *Example 2,* because the fair market value of the qualified parking exceeds the statutory monthly limit by $20, $240 ($195—$175, times 12 months) must be included in Employee E's wages for income and employment tax purposes for the year with respect to the qualified parking.

Example 3. (i) For each month in a year in which the statutory monthly qualified parking limit is $175, Employer P provides qualified parking with a fair market value of $220 per month to its employees, but charges each employee $45 per month.

(ii) In this *Example 3,* because the sum of the amount paid by an employee ($45) plus the amount excludable for qualified parking ($175) is not less than the fair market value of the monthly benefit, no amount is includible in the employee's wages for income and employment tax purposes with respect to the qualified parking.

Q–9. Are excludable qualified transportation fringes calculated on a monthly basis?

A–9. (a) *In general.* Yes. The value of transportation in a commuter highway vehicle, transit passes, and qualified parking is calculated on a monthly basis to determine whether the value of the benefit has exceeded the applicable statutory monthly limit on qualified transportation fringes. Except in the case of a transit pass provided to an employee, the applicable statutory monthly limit applies to qualified transportation fringes used by the employee in a month. Monthly exclusion amounts are not combined to provide a qualified transportation fringe for any month exceeding the statutory limit. A month is a calendar month or a substantially equivalent period applied consistently.

(b) *Transit passes.* In the case of transit passes provided to an employee, the applicable statutory monthly limit applies to the transit passes provided by the employer to the employee in a month for that month or for any previous month in the calendar year. In addition, transit passes distributed in advance for more than one month, but not for more than twelve months, are qualified transportation fringes if the requirements in paragraph (c) of this Q/A–9 are met (relating to the income tax and employment tax treatment of advance transit passes). The applicable statutory monthly limit under section 132(f)(2) on the combined amount of transportation in a commuter highway vehicle and transit passes may be calculated by taking into account the monthly limits for all months for which the transit passes are distributed. In the case of a pass that is valid for more than one month, such as an annual pass, the value of the pass may be divided by the number of months for which it is valid for purposes of determining whether the value of the pass exceeds the statutory monthly limit.

(c) *Rule if employee's employment terminates*—(1) *Income tax treatment.* The value of transit passes provided in advance to an employee with respect to a month in which the individual is not an employee is included in the employee's wages for income tax purposes.

(2) *Reporting and employment tax treatment.* Transit passes distributed in advance to an employee are excludable from wages for employment tax purposes under sections 3121, 3306, and 3401 (FICA, FUTA, and income tax withholding) if the employer distributes transit passes to the employee in advance for not more than three months and, at the time the transit passes are distributed, there is not an established date that the employee's employment will terminate (for example, if the employee has given notice of retirement) which will occur before the beginning of the last month of the period for which the transit passes are provided. If the employer distributes transit passes to an employee in advance for not more than three months and at the time the transit passes are distributed there is an established date that the employee's employment will terminate, and the employee's employment does terminate before the beginning of the last month of the period for which the transit passes are provided, the value of transit passes provided for months beginning after the date of termination during which the employee is not employed by the employer is included in the employee's wages for employment tax purposes. If transit passes are distributed in advance for more than three months, the value of transit passes provided for the months during which the employee is not employed by the employer is includible in the employee's wages for employment tax purposes regardless of whether at the time the transit passes were distributed there was an established date of termination of the employee's employment.

(d) *Examples.* The following examples illustrate the principles of this Q/A–9:

Example 1. (i) Employee E incurs $150 for qualified parking used during the month of June of a year in which the statutory monthly parking limit is $175, for which E is reimbursed $150 by Employer R. Employee E incurs $180 in expenses for qualified parking used during the month of July of that year, for which E is reimbursed $180 by Employer R.

(ii) In this *Example 1,* because monthly exclusion amounts may not be combined to provide a benefit in any month greater than the applicable statutory limit, the amount by which the amount reimbursed for July exceeds the applicable statutory monthly limit ($180 minus $175 equals $5) is includible in Employee E's wages for income and employment tax purposes.

Example 2. (i) Employee F receives transit passes from Employer G with a value of $195 in March of a year (for which the statutory monthly transit pass limit is $65) for January, February, and March of that year. F was hired during January and has not received any transit passes from G.

(ii) In this *Example 2,* the value of the transit passes (three months times $65 equals $195) is excludable from F's wages for income and employment tax purposes.

Example 3. (i) Employer S has a qualified transportation fringe benefit plan under which its employees receive transit passes near the beginning of each calendar quarter for that calendar quarter. All employees of Employer S receive transit passes from Employer S with a value of $195 on March 31 for the second calendar quarter covering the months April, May, and June (of a year in which the statutory monthly transit pass limit is $65).

(ii) In this *Example 3,* because the value of the transit passes may be calculated by taking into account the monthly limits for all months for which the transit passes are distributed, the value of the transit passes (three months times $65 equals $195) is excludable from the employees' wages for income and employment tax purposes.

Example 4. (i) Same facts as in *Example 3,* except that Employee T, an employee of Employer S, terminates employment with S on May 31. There was not an established date of termination for Employee T at the time the transit passes were distributed.

(ii) In this *Example 4,* because at the time the transit passes were distributed there was not an established date of termination for Employee T, the value of the transit passes provided for June ($65) is excludable from T's wages for employment tax purposes. However, the value of the transit passes distributed to Employee T for June ($65) is not excludable from T's wages for income tax purposes.

(iii) If Employee T's May 31 termination date was established at the time the transit passes were provided, the value of the transit passes provided for June ($65) is included in T's wages for both income and employment tax purposes.

Example 5. (i) Employer F has a qualified transportation fringe benefit plan under which its employees receive transit passes semi-annually in advance of the months for which the transit passes are provided. All employees of Employer F, including Employee X, receive transit passes from F with a value of $390 on June 30 for the 6 months of July through December (of a year in which the statutory monthly transit pass limit is $65). Employee X's employment terminates and his last day of work is August 1. Employer F's other employees remain employed throughout the remainder of the year.

(ii) In this *Example 5,* the value of the transit passes provided to Employee X for the months September, October, November, and December ($65 times 4 months equals $260) of the year is included in X's wages for income and employment tax purposes. The value of the transit passes provided to Employer F's other employees is excludable from the employees' wages for income and employment tax purposes.

Example 6. (i) Each month during a year in which the statutory monthly transit pass limit is $65, Employer R distributes transit passes with a face amount of $70 to each of its employees. Transit passes with a face amount of $70 can be purchased from the transit system by any individual for $65.

(ii) In this *Example 6,* because the value of the transit passes distributed by Employer R does not exceed the applicable statutory monthly limit ($65), no portion of the value of the transit passes is included as wages for income and employment tax purposes.

Q–10. May an employee receive qualified transportation fringes from more than one employer?

A–10. (a) *General rule.* Yes. The statutory monthly limits described in Q/A–7 of this section apply to benefits provided by an employer to its employees. For this purpose, all employees treated as employed by a single employer under section 414(b), (c), (m), or (o) are treated as employed by a single employer. See section 414(t) and §1.132–1(c). Thus, qualified transportation fringes paid by entities under common control under section 414(b), (c), (m), or (o) are combined for purposes of applying the applicable statutory monthly limit. In addition, an individual who is treated as a leased employee of the employer under section 414(n) is treated as an employee of that employer for purposes of section 132. See section 414(n)(3)(C).

(b) *Examples.* The following examples illustrate the principles of this Q/A–10:

Example 1. (i) During a year in which the statutory monthly qualified parking limit is $175, Employee E works for Employers M and N, who are unrelated and not treated as a single employer under section 414(b), (c), (m), or (o). Each month, M and N each provide qualified parking benefits to E with a value of $100.

(ii) In this *Example 1,* because M and N are unrelated employers, and the value of the monthly parking benefit provided by each is not more than the applicable statutory monthly limit, the parking benefits provided by each employer are excludable as qualified transportation fringes assuming that the other requirements of this section are satisfied.

Example 2. (i) Same facts as in Example 1, except that Employers M and N are treated as a single employer under section 414(b).

(ii) In this *Example 2,* because M and N are treated as a single employer, the value of the monthly parking benefit provided by M and N must be combined for purposes of determining whether the applicable statutory monthly limit has been exceeded. Thus, the amount by which the value of the parking benefit exceeds the monthly limit ($200 minus the monthly limit amount of $175 equals $25) for each month in the year is includible in E's wages for income and employment tax purposes.

Q–11. May qualified transportation fringes be provided to employees pursuant to a compensation reduction agreement?

A–11. Yes. An employer may offer employees a choice between cash compensation and any qualified transportation fringe. An employee who is offered this choice and who elects qualified transportation fringes is not required to include the cash compensation in income if—

(a) The election is pursuant to an arrangement described in Q/A–12 of this section;

(b) The amount of the reduction in cash compensation does not exceed the limitation in Q/A–13 of this section;

(c) The arrangement satisfies the timing and reimbursement rules in Q/A–14 and 16 of this section; and

(d) The related fringe benefit arrangement otherwise satisfies the requirements set forth elsewhere in this section.

Q–12. What is a compensation reduction election for purposes of section 132(f)?

A–12. (a) *Election requirements generally.* A compensation reduction arrangement is an arrangement under which the employer provides the employee with the right to elect whether the employee will receive either a fixed amount of cash compensation at a specified future date or a fixed amount of qualified transportation fringes to be provided for a specified future period (such as qualified parking to be used during a future calendar month). The employee's election must be in writing or another form, such as electronic, that includes, in a permanent and verifiable form, the information required to be in the election. The election must contain the date of the election, the amount of the compensation to be reduced, and the period for which the benefit will be provided. The election must relate to a fixed dollar amount or fixed percentage of compensation reduction. An election to reduce compensation for a period by a set amount for such period may be automatically renewed for subsequent periods.

(b) *Automatic election permitted.* An employer may provide under its qualified transportation fringe benefit plan that a compensation reduction election will be deemed to have been made if the employee does not elect to receive cash compensation in lieu of the qualified transportation fringe, provided that the employee receives adequate notice that a compensation reduction will be made and is given adequate opportunity to choose to receive the cash compensation instead of the qualified transportation fringe. See §1.401(a)–21 of this chapter for rules permitting the use of electronic media to make participant elections with respect to employee benefit arrangements.

Q–13. Is there a limit to the amount of the compensation reduction?

A–13. Yes. Each month, the amount of the compensation reduction may not exceed the combined applicable statutory monthly limits for transportation in a commuter highway vehicle, transit passes, and qualified parking. For example, for a year in which the statutory monthly limit is $65 for transportation in a commuter highway vehicle and transit passes, and $175 for qualified parking, an employee could elect to reduce compensation for any month by no more than $240 ($65 plus $175) with respect to qualified transportation fringes. If an employee were to elect to reduce compensation by $250 for a month, the excess $10 ($250 minus $240) would be includible in the employee's wages for income and employment tax purposes.

Q–14. When must the employee have made a compensation reduction election and under what circumstances may the amount be paid in cash to the employee?

A–14. (a) The compensation reduction election must satisfy the requirements set forth under paragraphs (b), (c), and (d) of this Q/A–14.

(b) *Timing of election.* The compensation reduction election must be made before the employee is able currently to receive the cash or other taxable amount at the employee's discretion. The determination of whether the employee is able currently to receive the cash does not depend on whether it has been constructively received for purposes of section 451. The election must specify that the period (such as a calendar month) for which the qualified transportation fringe will be provided must not begin before the election is made. Thus, a compensation reduction election must relate to qualified transportation fringes to be provided after the election. For this purpose, the date a qualified transportation fringe is provided is—

(1) The date the employee receives a voucher or similar item; or

(2) In any other case, the date the employee uses the qualified transportation fringe.

(c) *Revocability of elections.* The employee may not revoke a compensation reduction election after the employee is able currently to receive the cash or other taxable amount at the employee's discretion. In addition, the election may not be revoked after the beginning of the period for which the qualified transportation fringe will be provided.

(d) *Compensation reduction amounts not refundable.* Unless an election is revoked in a manner consistent with paragraph (c) of this Q/A–14, an employee may not subsequently receive the compensation (in cash or any form other than by payment of a qualified transportation fringe under the employer's plan). Thus, an employer's qualified transportation fringe benefit plan may not provide that an employee who ceases to participate in the employer's qualified transportation fringe benefit plan (such as in the case of termination of employment) is entitled to receive a refund of the amount by which the employee's compensation reductions exceed the actual qualified transportation fringes provided to the employee by the employer.

(e) *Examples.* The following examples illustrate the principles of this Q/A–14:

Example 1. (i) Employer P maintains a qualified transportation fringe benefit arrangement during a year in which the statutory monthly limit is $100 for transportation in a commuter highway vehicle and transit passes (2002 or later) and $180 for qualified parking. Employees of P are paid cash compensation twice per month, with the payroll dates being the first and the fifteenth day of the month. Under P's arrangement, an employee is permitted to elect at any time before the first day of a month to reduce his or her compensation payable during that month in an amount up to the applicable statutory monthly limit ($100 if the employee elects coverage for transportation in a commuter highway vehicle or a mass transit pass, or $180 if the employee chooses qualified parking) in return for the right to receive qualified transportation fringes up to the amount of the election. If such an election is made, P will provide a mass transit pass for that month with a value not exceeding the compensation reduction amount elected by the employee or will reimburse the cost of other qualified transportation fringes used by the employee on or after the first day of that month up to the compensation reduction amount elected by the employee. Any compensation reduction amount elected by the employee for the month that is not used for qualified transportation fringes is not refunded to the employee at any future date.

(ii) In this *Example 1*, the arrangement satisfies the requirements of this Q/A–14 because the election is made before the employee is able currently to receive the cash and the election specifies the future period for which the qualified transportation fringes will be provided. The arrangement would also satisfy the requirements of this Q/A–14 and Q/A–13 of this section if employees are allowed to elect to reduce compensation up to $280 per month ($100 plus $180).

(iii) The arrangement would also satisfy the requirements of this Q/A–14 (and Q/A–13 of this section) if employees are allowed to make an election at any time before the first or the fifteenth day of the month to reduce their compensation payable on that payroll date by an amount not in excess of one-half of the applicable statutory monthly limit (depending on the type of qualified transportation fringe elected by the employee) and P provides a mass transit pass on or after the applicable payroll date for the compensation reduction amount elected by the employee for the payroll date or reimburses the cost of other qualified transportation fringes used by the employee on or after the payroll date up to the compensation reduction amount elected by the employee for that payroll date.

Example 2. (i) Employee Q elects to reduce his compensation payable on March 1 of a year (for which the statutory monthly mass transit limit is $65) by $195 in exchange for a mass transit voucher to be provided in March. The election is made on the preceding February 27. Employee Q was hired in January of the year. On March 10 of the year, the employer of Employee Q delivers to Employee Q a mass transit voucher worth $195 for the months of January, February, and March.

(ii) In this *Example 2*, $65 is included in Employee Q's wages for income and employment tax purposes because the compensation reduction election fails to satisfy the requirement in this Q/A–14 and Q/A–12 of this section that the period for which the qualified transportation fringe will be provided not begin before the election is made to the extent the election relates to $65 worth of transit passes for January of the year. The $65 for February is not taxable because the election was for a future period that includes at least one day in February.

(iii) However, no amount would be included in Employee Q's wages as a result of the election if $195 worth of mass transit passes were instead provided to Q for the months of February, March, and April (because the compensation reduction would relate solely to fringes to be provided for a period not beginning before the date of the election and the amount provided does not exceed the aggregate limit for the period, *i.e.*, the sum of $65 for each of February, March, and April). See Q/A–9 of this section for rules governing transit passes distributed in advance for more than one month.

Example 3. (i) Employee R elects to reduce his compensation payable on March 1 of a year (for which the statutory monthly parking limit is $175) by $185 in exchange for reimbursement by Employer T of parking expenses incurred by Employee R for parking on or near Employer T's business premises during the period beginning after the date of the election through March. The election is made on the preceding February 27. Employee R incurs $10 in parking expenses on February 28 of the year, and $175 in parking expenses during the month of March. On April 5 of the year, Employer T reimburses Employee R $185 for the parking expenses incurred on February 28, and during March, of the year.

(ii) In this *Example 3*, no amount would be includible in Employee R's wages for income and employment tax purposes because the compensation reduction related solely to parking on or near Employer R's business premises used during a period not beginning before the date of the election and the amount reimbursed for parking used in any one month does not exceed the statutory monthly limitation.

Q–15. May an employee whose qualified transportation fringe costs are less than the employee's compensation reduction carry over this excess amount to subsequent periods?

A–15. (a) Yes. An employee may carry over unused compensation reduction amounts to subsequent periods under the plan of the employee's employer.

(b) The following example illustrates the principles of this Q/A–15:

Example. (i) By an election made before November 1 of a year for which the statutory monthly mass transit limit is $65, Employee E elects to reduce compensation in the amount of $65 for the month of November. E incurs $50 in employee-operated commuter highway vehicle expenses during November for which E is reimbursed $50 by Employer R, E's employer. By an election made before December, E elects to reduce compensation by $65 for the month of December. E incurs $65 in employee-operated commuter highway vehicle expenses during December for which E is reimbursed $65 by R. Before the following January, E elects to reduce compensation by $50 for the month of January. E incurs $65 in employee-operated commuter highway vehicle expenses during January for which E is reimbursed $65 by R because R allows E to carry over to the next year the $15 amount by which the compensation reductions for November and December exceeded the employee-operated commuter highway vehicle expenses incurred during those months.

(ii) In this *Example*, because Employee E is reimbursed in an amount not exceeding the applicable statutory monthly limit, and the reimbursement does not exceed the amount of employee-operated commuter highway vehicle expenses incurred during the month of January, the amount reimbursed ($65) is excludable from E's wages for income and employment tax purposes.

Q–16. How does section 132(f) apply to expense reimbursements?

A–16. (a) *In general*. The term qualified transportation fringe includes cash reimbursement by an employer to an employee for expenses incurred or paid by an employee for transportation in a commuter highway vehicle or qualified parking. The term qualified transportation fringe also includes cash reimbursement for transit passes made under a bona fide reimbursement arrangement, but, in accordance with section 132(f)(3), only if permitted under paragraph (b) of this Q/A–16. The reimbursement must be made under a bona fide reimbursement arrangement which meets the rules of paragraph (c) of this Q/A–16. A payment made before the date an expense has been incurred or paid is not a reimbursement. In addition, a bona fide reimbursement arrangement does not include an arrangement that is dependent solely upon an employee certifying in advance that the employee will incur expenses at some future date.

(b) *Special rule for transit passes*—(1) *In general.* The term *qualified transportation fringe* includes cash reimbursement for transit passes made under a bona fide reimbursement arrangement, but, in accordance with section 132(f)(3), only if no voucher or similar item that may be exchanged only for a transit pass is readily available for direct distribution by the employer to employees. If a voucher is readily available, the requirement that a voucher be distributed in-kind by the employer is satisfied if the voucher is distributed by the employer or by another person on behalf of the employer (for example, if a transit operator credits amounts to the employee's fare card as a result of payments made to the operator by the employer).

(2) *Voucher or similar item.* For purposes of the special rule in paragraph (b) of this Q/A–16, a transit system voucher is an instrument that may be purchased by employers from a voucher provider that is accepted by one or more mass transit operators (e.g., train, subway, and bus) in an area as fare media or in exchange for fare media. Thus, for example, a transit pass that may be purchased by employers directly from a voucher provider is a transit system voucher.

(3) *Voucher provider.* The term voucher provider means any person in the trade or business of selling transit system vouchers to employers, or any transit system or transit operator that sells vouchers to employers for the purpose of direct distribution to employees. Thus, a transit operator might or might not be a voucher provider. A voucher provider is not, for example, a third-party employee benefits administrator that administers a transit pass benefit program for an employer using vouchers that the employer could obtain directly.

(4) *Readily available.* For purposes of this paragraph (b), a voucher or similar item is readily available for direct distribution by the employer to employees if and only if an employer can obtain it from a voucher provider that—

(i) does not impose fare media charges that cause vouchers to not be readily available as described in paragraph (b)(5) of this section; and

(ii) does not impose other restrictions that cause vouchers to not be readily available as described in paragraph (b)(6) of this section.

(5) *Fare media charges.* For purposes of paragraph (b)(4) of this section, fare media charges relate only to fees paid by the employer to voucher providers for vouchers. The determination of whether obtaining a voucher would result in fare media charges that cause vouchers to not be readily available as described in this paragraph (b) is made with respect to each transit system voucher. If more than one transit system voucher is available for direct distribution to employees, the employer must consider the fees imposed for the lowest cost monthly voucher for purposes of determining whether the fees imposed by the voucher provider satisfy this paragraph. However, if transit system vouchers for multiple transit systems are required in an area to meet the transit needs of the individual employees in that area, the employer has the option of averaging the costs applied to each transit system voucher for purposes of determining whether the fare media charges for transit system vouchers satisfy this paragraph. Fare media charges are described in this paragraph (b)(5), and therefore cause vouchers to not be readily available, if and only if the average annual fare media charges that the employer reasonably expects to incur for transit system vouchers purchased from the voucher provider (disregarding reasonable and customary delivery charges imposed by the voucher provider, e.g., not in excess of $15) are more than 1 percent of the average annual value of the vouchers for a transit system.

(6) *Other restrictions.* For purposes of paragraph (b)(4) of this section, restrictions that cause vouchers to not be

readily available are restrictions imposed by the voucher provider other than fare media charges that effectively prevent the employer from obtaining vouchers appropriate for distribution to employees. Examples of such restrictions include—

(i) *Advance purchase requirements.* Advance purchase requirements cause vouchers to not be readily available only if the voucher provider does not offer vouchers at regular intervals or fails to provide the voucher within a reasonable period after receiving payment for the voucher. For example, a requirement that vouchers may be purchased only once per year may effectively prevent an employer from obtaining vouchers for distribution to employees. An advance purchase requirement that vouchers be purchased not more frequently than monthly does not effectively prevent the employer from obtaining vouchers for distribution to employees.

(ii) *Purchase quantity requirements.* Purchase quantity requirements cause vouchers to not be readily available if the voucher provider does not offer vouchers in quantities that are reasonably appropriate to the number of the employer's employees who use mass transportation (for example, the voucher provider requires a $1,000 minimum purchase and the employer seeks to purchase only $200 of vouchers).

(iii) *Limitations on denominations of vouchers that are available.* If the voucher provider does not offer vouchers in denominations appropriate for distribution to the employer's employees, vouchers are not readily available. For example, vouchers provided in $5 increments up to the monthly limit are appropriate for distribution to employees, while vouchers available only in a denomination equal to the monthly limit are not appropriate for distribution to employees if the amount of the benefit provided to the employer's employees each month is normally less than the monthly limit.

(7) *Example.* The following example illustrates the principles of this paragraph (b):

Example. (i) Company C in City X sells mass transit vouchers to employers in the metropolitan area of X in various denominations appropriate for distribution to employees. Employers can purchase vouchers monthly in reasonably appropriate quantities. Several different bus, rail, van pool, and ferry operators service X, and a number of the operators accept the vouchers either as fare media or in exchange for fare media. To cover its operating expenses, C imposes on each voucher a 50 cents charge, plus a reasonable and customary $15 charge for delivery of each order of vouchers. Employer M disburses vouchers purchased from C to its employees who use operators that accept the vouchers and M reasonably expects that $55 is the average value of the voucher it will purchase from C for the next calendar year.

(ii) In this *Example,* vouchers for X are readily available for direct distribution by the employer to employees because the expected cost of the vouchers disbursed to M's employees for the next calendar year is not more than 1 percent of the value of the vouchers (50 cents divided by $55 equals 0.91 percent), the delivery charges are disregarded because they are reasonable and customary, and there are no other restrictions that cause the vouchers to not be readily available. Thus, any reimbursement of mass transportation costs in X would not be a qualified transportation fringe.

(c) *Substantiation requirements.* Employers that make cash reimbursements must establish a bona fide reimbursement arrangement to establish that their employees have, in fact, incurred expenses for transportation in a commuter highway vehicle, transit passes, or qualified parking. For purposes of section 132(f), whether cash reimbursements are made under a bona fide reimbursement arrangement may vary depending on the facts and circumstances, including the method or methods of payment utilized within the mass transit system. The employer must implement reasonable procedures to ensure that an amount equal to the reimbursement was incurred for transportation in a commuter highway vehicle, transit passes, or qualified parking. The expense must be substantiated within a reasonable period of time. An expense substantiated to the payor within 180 days after it has been paid will be treated as having been substantiated within a reasonable period of time. An employee certification at the time of reimbursement in either written or electronic form may be a reasonable reimbursement procedure depending on the facts and circumstances. Examples of reasonable reimbursement procedures are set forth in paragraph (d) of this Q/A–16.

(d) *Illustrations of reasonable reimbursement procedures*. The following are examples of reasonable reimbursement procedures for purposes of paragraph (c) of this Q/A–16. In each case, the reimbursement is made at or within a reasonable period after the end of the events described in paragraphs (d)(1) through (d)(3) of this section.

(1) An employee presents to the employer a parking expense receipt for parking on or near the employer's business premises, the employee certifies that the parking was used by the employee, and the employer has no reason to doubt the employee's certification.

(2) An employee either submits a used time-sensitive transit pass (such as a monthly pass) to the employer and certifies that he or she purchased it or presents an unused or used transit pass to the employer and certifies that he or she purchased it and the employee certifies that he or she has not previously been reimbursed for the transit pass. In both cases, the employer has no reason to doubt the employee's certification.

(3) If a receipt is not provided in the ordinary course of business (e.g., if the employee uses metered parking or if used transit passes cannot be returned to the user), the employee certifies to the employer the type and the amount of expenses incurred, and the employer has no reason to doubt the employee's certification.

Q–17. May an employer provide nontaxable cash reimbursement under section 132(f) for periods longer than one month?

A–17. (a) *General rule*. Yes. Qualified transportation fringes include reimbursement to employees for costs incurred for transportation in more than one month, provided the reimbursement for each month in the period is calculated separately and does not exceed the applicable statutory monthly limit for any month in the period. See Q/A–8 and 9 of this section if the limit for a month is exceeded.

(b) *Example*. The following example illustrates the principles of this Q/A–17:

Example. (i) Employee R pays $100 per month for qualified parking used during the period from April 1 through June 30 of a year in which the statutory monthly qualified parking limit is $175. After receiving adequate substantiation from Employee R, R's employer reimburses R $300 in cash on June 30 of that year.

(ii) In this *Example*, because the value of the reimbursed expenses for each month did not exceed the applicable statutory monthly limit, the $300 reimbursement is excludable from R's wages for income and employment tax purposes as a qualified transportation fringe.

Q–18. What are the substantiation requirements if an employer distributes transit passes?

A–18. There are no substantiation requirements if the employer distributes transit passes. Thus, an employer may distribute a transit pass for each month with a value not more than the statutory monthly limit without requiring any certification from the employee regarding the use of the transit pass.

Q–19. May an employer choose to impose substantiation requirements in addition to those described in this regulation?

A–19. Yes.

Q–20. How is the value of parking determined?

A–20. Section 1.61–21(b)(2) applies for purposes of determining the value of parking.

Q–21. How do the qualified transportation fringe rules apply to van pools?

A–21. (a) *Van pools generally*. Employer and employee-operated van pools, as well as private or public transit-operated van pools, may qualify as qualified transportation fringes. The value of van pool benefits which are qualified transportation fringes may be excluded up to the applicable statutory monthly limit for transportation in a commuter highway vehicle and transit passes, less the value of any transit passes provided by the employer for the month.

(b) *Employer-operated van pools*. The value of van pool transportation provided by or for an employer to its employees is excludable as a qualified transportation fringe, provided the van qualifies as a commuter highway vehicle as defined in section 132(f)(5)(B) and Q/A–2 of this section. A van pool is operated by or for the employer if the employer purchases or leases vans to enable employees to commute together or the employer contracts with and pays a third party to provide the vans and some or all of the costs of operating the vans, including maintenance, liability insurance and other operating expenses.

(c) *Employee-operated van pools.* Cash reimbursement by an employer to employees for expenses incurred for transportation in a van pool operated by employees independent of their employer are excludable as qualified transportation fringes, provided that the van qualifies as a commuter highway vehicle as defined in section 132(f)(5)(B) and Q/A–2 of this section. See Q/A–16 of this section for the rules governing cash reimbursements.

(d) *Private or public transit-operated van pool transit passes.* The qualified transportation fringe exclusion for transit passes is available for travel in van pools owned and operated either by public transit authorities or by any person in the business of transporting persons for compensation or hire. In accordance with paragraph (b) of Q/A–3 of this section, the van must seat at least 6 adults (excluding the driver). See Q/A–16(b) and (c) of this section for a special rule for cash reimbursement for transit passes and the substantiation requirements for cash reimbursement.

(e) *Value of van pool transportation benefits.* Section 1.61–21(b)(2) provides that the fair market value of a fringe benefit is based on all the facts and circumstances. Alternatively, transportation in an employer-provided commuter highway vehicle may be valued under the automobile lease valuation rule in §1.61–21(d), the vehicle cents-per-mile rule in §1.61–21(e), or the commuting valuation rule in §1.61–21(f). If one of these special valuation rules is used, the employer must use the same valuation rule to value the use of the commuter highway vehicle by each employee who share the use. See §1.61–21(c)(2)(i)(B).

(f) *Qualified parking prime member.* If an employee obtains a qualified parking space as a result of membership in a car or van pool, the applicable statutory monthly limit for qualified parking applies to the individual to whom the parking space is assigned. This individual is the prime member. In determining the tax consequences to the prime member, the statutory monthly limit amounts of each car pool member may not be combined. If the employer provides access to the space and the space is not assigned to a particular individual, then the employer must designate one of its employees as the prime member who will bear the tax consequences. The employer may not designate more than one prime member for a car or van pool during a month. The employer of the prime member is responsible for including the value of the qualified parking in excess of the statutory monthly limit in the prime member's wages for income and employment tax purposes.

Q–22. What are the reporting and employment tax requirements for qualified transportation fringes?

A–22. (a) *Employment tax treatment generally.* Qualified transportation fringes not exceeding the applicable statutory monthly limit described in Q/A–7 of this section are not wages for purposes of the Federal Insurance Contributions Act (FICA), the Federal Unemployment Tax Act (FUTA), and federal income tax withholding. Any amount by which an employee elects to reduce compensation as provided in Q/A–11 of this section is not subject to the FICA, the FUTA, and federal income tax withholding. Qualified transportation fringes exceeding the applicable statutory monthly limit described in Q/A–7 of this section are wages for purposes of the FICA, the FUTA, and federal income tax withholding and are reported on the employee's Form W-2, Wage and Tax Statement.

(b) *Employment tax treatment of cash reimbursement exceeding monthly limits.* Cash reimbursement to employees (for example, cash reimbursement for qualified parking) in excess of the applicable statutory monthly limit under section 132(f) is treated as paid for employment tax purposes when actually or constructively paid. See §§31.3121(a)–2(a), 31.3301–4, 31.3402(a)–1(b) of this chapter. Employers must report and deposit the amounts withheld in addition to reporting and depositing other employment taxes. See Q/A–16 of this section for rules governing cash reimbursements.

(c) *Noncash fringe benefits exceeding monthly limits.* If the value of noncash qualified transportation fringes exceeds the applicable statutory monthly limit, the employer may elect, for purposes of the FICA, the FUTA, and federal income tax withholding, to treat the noncash taxable fringe benefits as paid on a pay period, quarterly, semiannual, annual, or other basis, provided that the benefits are treated as paid no less frequently than annually.

Q–23. How does section 132(f) interact with other fringe benefit rules?

A–23. For purposes of section 132, the terms working condition fringe and de minimis fringe do not include any qualified transportation fringe under section 132(f). If, however, an employer provides local transportation other than transit passes (without any direct or indirect compensation reduction election), the value of the benefit may be excludable, either totally or partially, under fringe benefit rules other than the qualified transportation fringe rules under section 132(f). See §§1.132–6(d)(2)(i) (occasional local transportation fare), 1.132–6(d)(2)(iii) (transportation provided under unusual circumstances), and 1.61–21(k) (valuation of local transportation provided to qualified employees). See also Q/A–4(b) of this section.

Q–24. May qualified transportation fringes be provided to individuals who are partners, 2-percent shareholders of S-corporations, or independent contractors?

A–24. (a) *General rule.* Section 132(f)(5)(E) states that self-employed individuals who are employees within the meaning of section 401(c)(1) are not employees for purposes of section 132(f). Therefore, individuals who are partners, sole proprietors, or other independent contractors are not employees for purposes of section 132(f). In addition, under section 1372(a), 2-percent shareholders of S corporations are treated as partners for fringe benefit purposes. Thus, an individual who is both a 2-percent shareholder of an S corporation and a common law employee of that S corporation is not considered an employee for purposes of section 132(f). However, while section 132(f) does not apply to individuals who are partners, 2-percent shareholders of S corporations, or independent contractors, other exclusions for working condition and de minimis fringes may be available as described in paragraphs (b) and (c) of this Q/A–24. See §§1.132–1(b)(2) and 1.132–1(b)(4).

(b) *Transit passes.* The working condition and de minimis fringe exclusions under section 132(a)(3) and (4) are available for transit passes provided to individuals who are partners, 2-percent shareholders, and independent contractors. For example, tokens or farecards provided by a partnership to an individual who is a partner that enable the partner to commute on a public transit system (not including privately-operated van pools) are excludable from the partner's gross income if the value of the tokens and farecards in any month does not exceed the dollar amount specified in §1.132–6(d)(1). However, if the value of a pass provided in a month exceeds the dollar amount specified in §1.132–6(d)(1), the full value of the benefit provided (not merely the amount in excess of the dollar amount specified in §1.132–6(d)(1)) is includible in gross income.

(c) *Parking.* The working condition fringe rules under section 132(d) do not apply to commuter parking. See §1.132–5(a)(1). However, the de minimis fringe rules under section 132(e) are available for parking provided to individuals who are partners, 2-percent shareholders, or independent contractors that qualifies under the de minimis rules. See §1.132–6(a) and (b).

(d) *Example.* The following example illustrates the principles of this Q/A–24:

Example. (i) Individual G is a partner in partnership P. Individual G commutes to and from G's office every day and parks free of charge in P's lot.

(ii) In this *Example,* the value of the parking is not excluded under section 132(f), but may be excluded under section 132(e) if the parking is a de minimis fringe under §1.132–6.

Q–25. What is the effective date of this section?

A–25. (a) Except as provided in paragraph (b) of this Q/A–25, this section is applicable for employee taxable years beginning after December 31, 2001. For this purpose, an employer may assume that the employee taxable year is the calendar year.

(b) The last sentence of paragraph (b)(5) of Q/A–16 of this section (relating to whether transit system vouchers for transit passes are readily available) is applicable for employee taxable years beginning after December 31, 2003. For this purpose, an employer may assume that the employee taxable year is the calendar year.

[T.D. 8933, 66 FR 2244, Jan. 11, 2001; 66 FR 18190, Apr. 6, 2001, as amended by T.D. 9294, 71 FR 61883, Oct. 20, 2006]

§ 1.133–1T Questions and answers relating to interest on certain loans used to acquire employer securities (temporary).

Q–1: What does section 133 provide?

A–1: In general, section 133 provides that certain commercial lenders may exclude from gross income fifty percent of the interest received with respect to securities acquisition loans. A securities acquisition loan is any loan to an employee stock ownership plan (ESOP) (as defined in section 4975(e)(7)) that qualifies as an exempt loan under §§ 54.4975–7 and –11 to the extent that the proceeds are used to acquire employer securities (within the meaning of section 409(l)) for the ESOP. A loan made to a corporation sponsoring an ESOP (or to a person related to such corporation under section 133(b)(2)) may also qualify as a securities acquisition loan to the extent and for the period that the proceeds are (a) loaned to the corporation's ESOP under a loan that qualifies as an exempt loan under §§ 54.4975–7 and –11 and that has substantially similar terms as the loan from the commercial lender to the sponsoring corporation, and (b) used to acquire employer securities for the ESOP. The terms of the loan between the commercial lender and the sponsoring corporation (or a related corporation) and the loan between such corporation and the ESOP shall be treated as substantially similar only if the timing and rate at which employer securities would be released from encumbrance if the loan from the commercial lender were the exempt loan under the applicable rule of § 54.4975–7(b)(8) are substantially similar to the timing and rate at which employer securities will actually be released from encumbrance in accordance with such rule. For this purpose, if the loan from the commercial lender to the sponsoring corporation states a variable rate of interest and the loan between the corporation and the ESOP states a fixed rate of interest, whether the terms of the loans are substantially similar shall be determined at the time the obligations are initially issued by taking into account the adjustment interval on the variable rate loan and the maturity of the fixed rate loan. For example, if the rate on the loan from the commercial lender to the sponsoring corporation adjusts each six months and the loan from the corporation to the ESOP has a ten year term, the initial interest rate on the variable rate loan could be compared to the rate on the fixed rate loan by comparing the yields on 6 month and ten year Treasury obligations. Similarly, if the rates on the two loans are based on different compounding assumptions, whether the terms of the loans are substantially similar shall be determined by taking into account the different compounding assumptions. A securities acquisition loan may be evidenced by any note, bond, debenture, or certificate. Also, section 133(b)(2) provides that certain loans between related persons are not securities acquisition loans. In addition, a loan from a commercial lender to an ESOP or sponsoring corporation to purchase employer securities will not be treated as a securities acquisition loan to the extent that such loan is used, either directly or indirectly, to purchase employer securities from any other qualified plan, including any other ESOP, maintained by the employer or any other corporation which is a member of the same controlled group (as defined in section 409(l)(4)).

Q–2: What lenders are eligible to receive the fifty percent interest exclusion?

A–2: Under section 133(a), a bank (within the meaning of section 581), an insurance company to which subchapter L applies, or a corporation (other than a subchapter S corporation) actively engaged in the business of lending money may exclude from gross income fifty percent of the interest received with respect to a securities acquisition loan (as defined in Q&A–1

of §1.133–1T). For purposes of section 133(a)(3), a corporation is actively engaged in the business of lending money if it lends money to the public on a regular and continuing basis (other than in connection with the purchase by the public of goods and services from the lender or a related party). A corporation is not actively engaged in the business of lending money if a predominant share of the original value of the loans it makes to unrelated parties (other than in connection with the purchase by the public of goods and services from the lender or a related party) are securities acquisition loans.

Q–3: May loans which qualify for the fifty percent interest exclusion under section 133 be syndicated to other lending institutions?

A–3: Securities acquisition loans under section 133 may be syndicated to other lending institutions provided that such lending institutions are described in section 133(a) (1), (2) or (3) and the loan was originated by a qualified holder. Subsequent holders of the debt instrument may qualify for the partial interest exclusion of section 133 if such holders satisfy the requirements of section 133 and such loan does not fail to be a securities acquisition loan under section 133(b)(2).

Q–4: When is section 133 effective?

A–4: Section 133 applies to securities acquisition loans made after July 18, 1984, and used to acquire employer securities after July 18, 1984. The provision does not apply to loans made after July 18, 1984, to the extent that such loans are renegotiations, directly or indirectly, of loans outstanding on such date. A loan extended to an ESOP or sponsoring corporation after July 18, 1984, will be treated as a renegotiation of an outstanding loan if the loan proceeds are used to refinance acquisitions of employer securities made prior to July 19, 1984. For example, if an ESOP borrowed money prior to July 19, 1984, to purchase employer securities and after July 18, 1984, borrows other funds from the same or a different commercial lender to repay the first loan, the second loan will be treated as a renegotiation of an outstanding loan to the extent of the repaid amount. Similarly, if, after July 18, 1984, an ESOP sells employer securities, uses the proceeds to retire a pre-July 19, 1984, loan and obtains a second loan to acquire replacement employer securities, the second loan will be treated as a renegotiation of an outstanding loan.

[T.D. 8073, 51 FR 4319, Feb. 4, 1986]

§ 1.141–0 Table of contents.

This section lists the captioned paragraphs contained in §§1.141–1 through 1.141–16.

(3) Exceptions for arrangements other than arrangements resulting in ownership of financed property by a nongovernmental person.
(4) Temporary use by developers.
(5) Incidental use.
(6) Qualified improvements.
(e) Special rule for tax assessment bonds.
(f) Examples.
(g) Measurement of private business use.
(1) In general.
(2) Measurement period.
(3) Determining average percentage of private business use.
(4) Determining the average amount of private business use for a 1-year period.
(5) Common areas.
(6) Allocation of neutral costs.
(7) Commencement of measurement of private business use.
(8) Examples.

§ 1.141–4 Private security or payment test.

(a) General rule.
(1) Private security or payment.
(2) Aggregation of private payments and security.
(3) Underlying arrangement.
(b) Measurement of private payments and security.
(1) Scope.
(2) Present value measurement.
(c) Private payments.
(1) In general.
(2) Payments taken into account.
(3) Allocation of payments.
(d) Private security.
(1) In general.
(2) Security taken into account.
(3) Pledge of unexpended proceeds.
(4) Secured by any interest in property or payments.
(5) Payments in respect of property.
(6) Allocation of security among issues.
(e) Generally applicable taxes.
(1) General rule.
(2) Definition of generally applicable taxes.
(3) Special charges.
(4) Manner of determination and collection.
(5) Payments in lieu of taxes.
(f) Certain waste remediation bonds.
(1) Scope.
(2) Persons that are not private users.
(3) Persons that are private users.
(g) Examples.

§ 1.141–5 Private loan financing test.

(a) In general.
(b) Measurement of test.
(c) Definition of private loan.
(1) In general.
(2) Application only to purpose investments.
(3) Grants.
(4) Hazardous waste remediation bonds.
(d) Tax assessment loan exception.
(1) General rule.
(2) Tax assessment loan defined.
(3) Mandatory tax or other assessment.
(4) Specific essential governmental function.
(5) Equal basis requirement.
(6) Coordination with private business tests.
(e) Examples.

§ 1.141–6 Allocation and accounting rules.

(a) Allocation of proceeds to expenditures.
(b) Allocation of proceeds to property. [Reserved]
(c) Special rules for mixed use facilities. [Reserved]
(d) Allocation of proceeds to common areas. [Reserved]
(e) Allocation of proceeds to bonds. [Reserved]
(f) Treatment of partnerships. [Reserved]
(g) Examples. [Reserved]

§ 1.141–7 Special rules for output facilities.

(a) Overview.
(b) Definitions.
(1) Available output.
(2) Measurement period.
(3) Sale at wholesale.
(4) Take contract and take or pay contract.
(5) Requirements contract.
(6) Nonqualified amount.
(c) Output contracts.
(1) General rule.
(2) Take contract or take or pay contract.
(3) Requirements contract.
(4) Output contract properly characterized as a lease.
(d) Measurement of private business use.
(e) Measurement of private security or payment.
(f) Exceptions for certain contracts.
(1) Small purchases of output.
(2) Swapping and pooling arrangements.
(3) Short-term output contracts.
(4) Certain conduit parties disregarded.
(g) Special rules for electric output facilities used to provide open access.
(1) Operation of transmission facilities by nongovernmental persons.
(2) Certain use by nongovernmental persons under output contracts.
(3) Ancillary services.
(4) Exceptions to deliberate action rules.
(5) Additional transactions as permitted by the Commissioner.
(h) Allocations of output facilities and systems.
(1) Facts and circumstances analysis.
(2) Illustrations.
(3) Transmission and distribution contracts.
(4) Allocation of payments.
(i) Examples.

§ 1.141–8 $15 million limitation for output facilities.

(a) In general.
(1) General rule.
(2) Reduction in $15 million output limitation for outstanding issues.
(3) Benefits and burdens test applicable.
(b) Definition of project.
(1) General rule.
(2) Separate ownership.
(3) Generating property.
(4) Transmission and distribution.
(5) Subsequent improvements.
(6) Replacement property.
(c) Examples.

§ 1.141–9 Unrelated or disproportionate use test.

(a) General rules.
(1) Description of test.
(2) Application of unrelated or disproportionate use test.
(b) Unrelated use.
(1) In general.
(2) Use for the same purpose as government use.
(c) Disproportionate use.
(1) Definition of disproportionate use.
(2) Aggregation of related uses.
(3) Allocation rule.
(d) Maximum use taken into account.
(e) Examples.

§ 1.141–10 Coordination with volume cap. [Reserved]

§ 1.141–11 Acquisition of nongovernmental output property. [Reserved]

§ 1.141–12 Remedial actions.

(a) Conditions to taking remedial action.
(1) Reasonable expectations test met.
(2) Maturity not unreasonably long.
(3) Fair market value consideration.
(4) Disposition proceeds treated as gross proceeds for arbitrage purposes.
(5) Proceeds expended on a governmental purpose.
(b) Effect of a remedial action.
(1) In general.
(2) Effect on bonds that have been advance refunded.
(c) Disposition proceeds.
(1) Definition.
(2) Allocating disposition proceeds to an issue.
(3) Allocating disposition proceeds to different sources of funding.
(d) Redemption or defeasance of nonqualified bonds.
(1) In general.
(2) Special rule for dispositions for cash.
(3) Notice of defeasance.
(4) Special limitation.
(5) Defeasance escrow defined.
(e) Alternative use of disposition proceeds.
(1) In general.
(2) Special rule for use by 501(c)(3) organizations.
(f) Alternative use of facility.
(g) Rules for deemed reissuance.
(h) Authority of Commissioner to provide for additional remedial actions.
(i) Effect of remedial action on continuing compliance.
(j) Nonqualified bonds.
(1) Amount of nonqualified bonds.
(2) Allocation of nonqualified bonds.
(k) Examples.

§ 1.141–13 Refunding issues.

(a) In general.
(b) Application of private business use test and private loan financing test.
(1) Allocation of proceeds.
(2) Determination of amount of private business use.
(c) Application of private security or payment test.
(1) Separate issue treatment.
(2) Combined issue treatment.
(3) Special rule for arrangements not entered into in contemplation of the refunding issue.
(d) Multipurpose issue allocations.
(1) In general.
(2) Exceptions.
(e) Application of reasonable expectations test to certain refunding bonds.
(f) Special rule for refundings of certain general obligation bonds.
(g) Examples.

§ 1.141–14 Anti-abuse rules.

(a) Authority of Commissioner to reflect substance of transactions.
(b) Examples.

§ 1.141–15 Effective dates.

(a) Scope.
(b) Effective dates.
(1) In general.
(2) Certain short-term arrangements.
(3) Certain prepayments.
(c) Refunding bonds.
(d) Permissive application of regulations.
(e) Permissive retroactive application of certain sections.
(f) Effective dates for certain regulations relating to output facilities.
(1) General rule.
(2) Transition rule for requirements contracts.
(g) Refunding bonds for output facilities.
(h) Permissive retroactive application.
(i) Permissive application of certain regulations relating to output facilities.
(j) Effective dates for certain regulations relating to refundings.
(k) Effective/applicability dates for certain regulations relating to generally applicable taxes and payments in lieu of tax.

§ 1.141–16 Effective dates for qualified private activity bond provisions.

(a) Scope.
(b) Effective dates.
(c) Permissive application.
(d) Certain remedial actions.
(1) General rule.
(2) Special rule for allocations of nonqualified bonds.

[T.D. 8712, 62 FR 2283, Jan. 16, 1997, as amended by T.D. 8757, 63 FR 3259, Jan. 22, 1998; T.D. 8941, 66 FR 4664, Jan. 18, 2001; T.D. 9016, 67 FR 59759, Sept. 23, 2002; T.D. 9085, 68 FR 45775, Aug. 4, 2003; T.D. 9150, 69 FR 50066, Aug. 13, 2004; T.D. 9234, 70 FR 75031, Dec. 19, 2005; T.D. 9429, 73 FR 63374, Oct. 24, 2008]

TAX EXEMPTION REQUIREMENTS FOR STATE AND LOCAL BONDS

§ 1.141–1 Definitions and rules of general application.

(a) *In general.* For purposes of §§ 1.141–0 through 1.141–16, the following definitions and rules apply: the definitions in this section, the definitions in § 1.150–1, the definition of placed in service under § 1.150–2(c), the definition of grant under § 1.148–6(d)(4)(iii), the definition of reasonably required reserve or replacement fund in § 1.148–2(f), and the following definitions under § 1.148–1: bond year, commingled fund, fixed yield issue, higher yielding investments, investment, investment proceeds, issue price, issuer, nonpurpose investment, purpose investment, qualified guarantee, qualified hedge, reasonable expectations or reasonableness, rebate amount, replacement proceeds, sale proceeds, variable yield issue, and yield.

(b) *Certain general definitions.*

Common areas means portions of a facility that are equally available to all users of a facility on the same basis for uses that are incidental to the primary use of the facility. For example, hallways and elevators generally are treated as common areas if they are used by the different lessees of a facility in connection with the primary use of that facility.

Consistently applied means applied uniformly to account for proceeds and other amounts.

Deliberate action is defined in § 1.141–2(d)(3).

Discrete portion means a portion of a facility that consists of any separate and discrete portion of a facility to which use is limited, other than common areas. A floor of a building and a portion of a building separated by walls, partitions, or other physical barriers are examples of a discrete portion.

Disposition is defined in § 1.141–12(c)(1).

Disposition proceeds is defined in § 1.141–12(c)(1).

Essential governmental function is defined in § 1.141–5(d)(4)(ii).

Financed means constructed, reconstructed, or acquired with proceeds of an issue.

Governmental bond has the same meaning as in § 1.150–1(b), except that, for purposes of § 1.141–13, governmental bond is defined in § 1.141–13(b)(2)(iv).

Governmental person means a state or local governmental unit as defined in § 1.103–1 or any instrumentality thereof. It does not include the United States or any agency or instrumentality thereof.

Hazardous waste remediation bonds is defined in § 1.141–4(f)(1).

Measurement period is defined in § 1.141–3(g)(2).

Nongovernmental person means a person other than a governmental person.

Output facility means electric and gas generation, transmission, distribution, and related facilities, and water collection, storage, and distribution facilities.

Private business tests means the private business use test and the private security or payment test of section 141(b).

Proceeds means the sale proceeds of an issue (other than those sale proceeds used to retire bonds of the issue that are not deposited in a reasonably required reserve or replacement fund). Proceeds also include any investment proceeds from investments that accrue during the project period (net of rebate amounts attributable to the project period). Disposition proceeds of an issue are treated as proceeds to the extent provided in § 1.141–12. The Commissioner may treat any replaced amounts as proceeds.

Project period means the period beginning on the issue date and ending on the date that the project is placed in service. In the case of a multipurpose issue, the issuer may elect to treat the project period for the entire issue as ending on either the expiration of the temporary period described in §1.148–2(e)(2) or the end of the fifth bond year after the issue date.

Public utility property means public utility property as defined in section 168(i)(10).

Qualified bond means a qualified bond as defined in section 141(e).

Renewal option means a provision under which either party has a legally enforceable right to renew the contract. Thus, for example, a provision under which a contract is automatically renewed for 1-year periods absent cancellation by either party is not a renewal option (even if it is expected to be renewed).

Replaced amounts means replacement proceeds other than amounts that are treated as replacement proceeds solely because they are sinking funds or pledged funds.

Weighted average maturity is determined under section 147(b).

Weighted average reasonably expected economic life is determined under section 147(b). The reasonably expected economic life of property may be determined by reference to the class life of the property under section 168.

(c) *Elections.* Elections must be made in writing on or before the issue date and retained as part of the bond documents, and, once made, may not be revoked without the permission of the Commissioner.

(d) *Related parties.* Except as otherwise provided, all related parties are treated as one person and any reference to ''person'' includes any related party.

[T.D. 8712, 62 FR 2284, Jan. 16, 1997, as amended by T.D. 9234, 70 FR 75032, Dec. 19, 2005]

§ 1.141–2 Private activity bond tests.

(a) *Overview.* Interest on a private activity bond is not excludable from gross income under section 103(a) unless the bond is a qualified bond. The purpose of the private activity bond tests of section 141 is to limit the volume of tax-exempt bonds that finance the activities of nongovernmental persons, without regard to whether a financing actually transfers benefits of tax-exempt financing to a nongovernmental person. The private activity bond tests serve to identify arrangements that have the potential to transfer the benefits of tax-exempt financing, as well as arrangements that actually transfer these benefits. The regulations under section 141 may not be applied in a manner that is inconsistent with these purposes.

(b) *Scope.* Sections 1.141–0 through 1.141–16 apply generally for purposes of the private activity bond limitations under section 141.

(c) *General definition of private activity bond.* Under section 141, bonds are private activity bonds if they meet either the private business use test and private security or payment test of section 141(b) or the private loan financing test of section 141(c). The private business use and private security or payment tests are described in §§1.141–3 and 1.141–4. The private loan financing test is described in §1.141–5.

(d) *Reasonable expectations and deliberate actions*—(1) *In general.* An issue is an issue of private activity bonds if the issuer reasonably expects, as of the issue date, that the issue will meet either the private business tests or the private loan financing test. An issue is also an issue of private activity bonds if the issuer takes a deliberate action, subsequent to the issue date, that causes the conditions of either the private business tests or the private loan financing test to be met.

(2) *Reasonable expectations test*—(i) *In general.* In general, the reasonable expectations test must take into account reasonable expectations about events and actions over the entire stated term of an issue.

(ii) *Special rule for issues with mandatory redemption provisions.* An action that is reasonably expected, as of the issue date, to occur after the issue date and to cause either the private business tests or the private loan financing test to be met may be disregarded for purposes of those tests if—

(A) The issuer reasonably expects, as of the issue date, that the financed property will be used for a governmental purpose for a substantial period before the action;

(B) The issuer is required to redeem all nonqualifying bonds (regardless of the amount of disposition proceeds actually received) within 6 months of the date of the action;

(C) The issuer does not enter into any arrangement with a nongovernmental person, as of the issue date, with respect to that specific action; and

(D) The mandatory redemption of bonds meets all of the conditions for remedial action under § 1.141–12(a).

(3) *Deliberate action defined*—(i) *In general.* Except as otherwise provided in this paragraph (d)(3), a deliberate action is any action taken by the issuer that is within its control. An intent to violate the requirements of section 141 is not necessary for an action to be deliberate.

(ii) *Safe harbor exceptions.* An action is not treated as a deliberate action if—

(A) It would be treated as an involuntary or compulsory conversion under section 1033; or

(B) It is taken in response to a regulatory directive made by the federal government. See § 1.141–7(g)(4).

(4) *Special rule for dispositions of personal property in the ordinary course of an established governmental program*—(i) *In general.* Dispositions of personal property in the ordinary course of an established governmental program are not treated as deliberate actions if—

(A) The weighted average maturity of the bonds financing that personal property is not greater than 120 percent of the reasonably expected actual use of that property for governmental purposes;

(B) The issuer reasonably expects on the issue date that the fair market value of that property on the date of disposition will be not greater than 25 percent of its cost; and

(C) The property is no longer suitable for its governmental purposes on the date of disposition.

(ii) *Reasonable expectations test.* The reasonable expectation that a disposition described in paragraph (d)(4)(i) of this section may occur in the ordinary course while the bonds are outstanding will not cause the issue to meet the private activity bond tests if the issuer is required to deposit amounts received from the disposition in a commingled fund with substantial tax or other governmental revenues and the issuer reasonably expects to spend the amounts on governmental programs within 6 months from the date of commingling.

(iii) *Separate issue treatment.* An issuer may treat the bonds properly allocable to the personal property eligible for this exception as a separate issue under § 1.150–1(c)(3).

(5) *Special rule for general obligation bond programs that finance a large number of separate purposes.* The determination of whether bonds of an issue are private activity bonds may be based solely on the issuer's reasonable expectations as of the issue date if all of the requirements of paragraphs (d)(5)(i) through (vii) of this section are met.

(i) The issue is an issue of general obligation bonds of a general purpose governmental unit that finances at least 25 separate purposes (as defined in § 1.150–1(c)(3)) and does not predominantly finance fewer than 4 separate purposes.

(ii) The issuer has adopted a fund method of accounting for its general governmental purposes that makes tracing the bond proceeds to specific expenditures unreasonably burdensome.

(iii) The issuer reasonably expects on the issue date to allocate all of the net proceeds of the issue to capital expenditures within 6 months of the issue date and adopts reasonable procedures to verify that net proceeds are in fact so expended. A program to randomly spot check that 10 percent of the net proceeds were so expended generally is a reasonable verification procedure for this purpose.

(iv) The issuer reasonably expects on the issue date to expend all of the net proceeds of the issue before expending proceeds of a subsequent issue of similar general obligation bonds.

(v) The issuer reasonably expects on the issue date that it will not make any loans to nongovernmental persons with the proceeds of the issue.

(vi) The issuer reasonably expects on the issue date that the capital expenditures that it could make during the 6-month period beginning on the issue date with the net proceeds of the issue that would not meet the private business tests are not less than 125 percent of the capital expenditures to be financed with the net proceeds of the issue.

(vii) The issuer reasonably expects on the issue date that the weighted average maturity of the issue is not greater than 120 percent of the weighted average reasonably expected economic life of the capital expenditures financed with the issue. To determine reasonably expected economic life for this purpose an issuer may use reasonable estimates based on the type of expenditures made from a fund.

(e) *When a deliberate action occurs.* A deliberate action occurs on the date the issuer enters into a binding contract with a nongovernmental person for use of the financed property that is not subject to any material contingencies.

(f) *Certain remedial actions.* See § 1.141–12 for certain remedial actions that prevent a deliberate action with respect to property financed by an issue from causing that issue to meet the private business use test or the private loan financing test.

(g) *Examples.* The following examples illustrate the application of this section:

Example 1. Involuntary action. City B issues bonds to finance the purchase of land. On the issue date, B reasonably expects that it will be the sole user of the land for the entire term of the bonds. Subsequently, the federal government acquires the land in a condemnation action. B sets aside the condemnation proceeds to pay debt service on the bonds but does not redeem them on their first call date. The bonds are not private activity bonds because B has not taken a deliberate action after the issue date. See, however, § 1.141–14(b), *Example 2.*

Example 2. Reasonable expectations test—involuntary action. The facts are the same as in *Example 1,* except that, on the issue date, B reasonably expects that the federal government will acquire the land in a condemnation action during the term of the bonds. On the issue date, the present value of the amount that B reasonably expects to receive from the federal government is greater than 10 percent of the present value of the debt service on the bonds. The terms of the bonds do not require that the bonds be redeemed within 6 months of the acquisition by the federal government. The bonds are private activity bonds because the issuer expects as of the issue date that the private business tests will be met.

Example 3. Reasonable expectations test—mandatory redemption. City C issues bonds to rehabilitate an existing hospital that it currently owns. On the issue date of the bonds, C reasonably expects that the hospital will be used for a governmental purpose for a substantial period. On the issue date, C also plans to construct a new hospital, but the placed in service date of that new hospital is uncertain. C reasonably expects that, when the new hospital is placed in service, it will sell or lease the rehabilitated hospital to a private hospital corporation. The bond documents require that the bonds must be redeemed within 6 months of the sale or lease of the rehabilitated hospital (regardless of the amount actually received from the sale). The bonds meet the reasonable expectations requirement of the private activity bond tests if the mandatory redemption of bonds meets all of the conditions for a remedial action under § 1.141–12(a).

Example 4. Dispositions in the ordinary course of an established governmental program. City D issues bonds with a weighted average maturity of 6 years for the acquisition of police cars. D reasonably expects on the issue date that the police cars will be used solely by its police department, except that, in the ordinary course of its police operations, D sells its police cars to a taxicab corporation after 5 years of use because they are no longer suitable for police use. Further, D reasonably expects that the value of the police cars when they are no longer suitable for police use will be no more than 25 percent of cost. D subsequently sells 20 percent of the police cars after only 3 years of actual use. At that time, D deposits the proceeds from the sale of the police cars in a commingled fund with substantial tax revenues and reasonably expects to spend the proceeds on governmental programs within 6 months of the date of deposit. D does not trace the actual use of these commingled amounts. The sale of the police cars does not cause the private activity bond tests to be met because the requirements of paragraph (d)(4) of this section are met.

[T.D. 8712, 62 FR 2284, Jan. 16, 1997, as amended by T.D. 8757, 63 FR 3260, Jan. 22, 1998; T.D. 9016, 67 FR 59759, Sept. 23, 2002]

§ 1.141–3 Definition of private business use.

(a) *General rule*—(1) *In general.* The private business use test relates to the use of the proceeds of an issue. The 10 percent private business use test of section 141(b)(1) is met if more than 10 percent of the proceeds of an issue is used in a trade or business of a nongovernmental person. For this purpose, the use of financed property is treated as the direct use of proceeds. Any activity carried on by a person other than a natural person is treated as a trade or business. Unless the context or a provision clearly requires otherwise, this section also applies to the private business use test under sections 141(b)(3) (unrelated or disproportionate use), 141(b)(4) ($15 million limitation for certain output facilities), and 141(b)(5) (the coordination with the volume cap where the nonqualified amount exceeds $15 million).

(2) *Indirect use.* In determining whether an issue meets the private business use test, it is necessary to look to both the indirect and direct uses of proceeds. For example, a facility is treated as being used for a private business use if it is leased to a nongovernmental person and subleased to a governmental person or if it is leased to a governmental person and then subleased to a nongovernmental person, provided that in each case the nongovernmental person's use is in a trade or business. Similarly, the issuer's use of the proceeds to engage in a series of financing transactions for property to be used by nongovernmental persons in their trades or businesses may cause the private business use test to be met. In addition, proceeds are treated as used in the trade or business of a nongovernmental person if a nongovernmental person, as a result of a single transaction or a series of related transactions, uses property acquired with the proceeds of an issue.

(3) *Aggregation of private business use.* The use of proceeds by all nongovernmental persons is aggregated to determine whether the private business use test is met.

(b) *Types of private business use arrangements*—(1) *In general.* Both actual and beneficial use by a nongovernmental person may be treated as private business use. In most cases, the private business use test is met only if a nongovernmental person has special legal entitlements to use the financed property under an arrangement with the issuer. In general, a nongovernmental person is treated as a private business user of proceeds and financed property as a result of ownership; actual or beneficial use of property pursuant to a lease, or a management or incentive payment contract; or certain other arrangements such as a take or pay or other output-type contract.

(2) *Ownership.* Except as provided in paragraph (d)(1) or (d)(2) of this section, ownership by a nongovernmental person of financed property is private business use of that property. For this purpose, ownership refers to ownership for federal income tax purposes.

(3) *Leases.* Except as provided in paragraph (d) of this section, the lease of financed property to a nongovernmental person is private business use of that property. For this purpose, any arrangement that is properly characterized as a lease for federal income tax purposes is treated as a lease. In determining whether a management contract is properly characterized as a lease, it is necessary to consider all of the facts and circumstances, including the following factors—

(i) The degree of control over the property that is exercised by a nongovernmental person; and

(ii) Whether a nongovernmental person bears risk of loss of the financed property.

(4) *Management contracts*—(i) *Facts and circumstances test.* Except as provided in paragraph (d) of this section, a management contract (within the meaning of paragraph (b)(4)(ii) of this section) with respect to financed property may result in private business use of that property, based on all of the facts and circumstances. A management contract with respect to financed property generally results in private business use of that property if the contract provides for compensation for services rendered with compensation based, in whole or in part, on a share of net profits from the operation of the facility.

(ii) *Management contract defined.* For purposes of this section, a management contract is a management, service, or incentive payment contract between a governmental person and a service provider under which the service provider provides services involving all, a portion of, or any function of, a facility. For example, a contract for the provision of management services for an entire hospital, a contract for management services for a specific department of a hospital, and an incentive payment contract for physician services to patients of a hospital are each treated as a management contract.

(iii) *Arrangements generally not treated as management contracts.* The arrangements described in paragraphs (b)(4)(iii)(A) through (D) of this section generally are not treated as management contracts that give rise to private business use.

(A) Contracts for services that are solely incidental to the primary governmental function or functions of a financed facility (for example, contracts for janitorial, office equipment repair, hospital billing, or similar services).

(B) The mere granting of admitting privileges by a hospital to a doctor, even if those privileges are conditioned on the provision of de minimis services, if those privileges are available to all qualified physicians in the area, consistent with the size and nature of its facilities.

(C) A contract to provide for the operation of a facility or system of facilities that consists predominantly of public utility property, if the only compensation is the reimbursement of actual and direct expenses of the service provider and reasonable administrative overhead expenses of the service provider.

(D) A contract to provide for services, if the only compensation is the reimbursement of the service provider for actual and direct expenses paid by the service provider to unrelated parties.

(iv) *Management contracts that are properly treated as other types of private business use.* A management contract with respect to financed property results in private business use of that property if the service provider is treated as the lessee or owner of financed property for federal income tax purposes, unless an exception under paragraph (d) of this section applies to the arrangement.

(5) *Output contracts.* See §1.141–7 for special rules for contracts for the purchase of output of output facilities.

(6) *Research agreements*—(i) *Facts and circumstances test.* Except as provided in paragraph (d) of this section, an agreement by a nongovernmental person to sponsor research performed by a governmental person may result in private business use of the property used for the research, based on all of the facts and circumstances.

(ii) *Research agreements that are properly treated as other types of private business use.* A research agreement with respect to financed property results in private business use of that property if the sponsor is treated as the lessee or owner of financed property for federal income tax purposes, unless an exception under paragraph (d) of this section applies to the arrangement.

(7) *Other actual or beneficial use*—(i) *In general.* Any other arrangement that conveys special legal entitlements for beneficial use of bond proceeds or of financed property that are comparable to special legal entitlements described in paragraphs (b)(2), (3), (4), (5), or (6) of this section results in private business use. For example, an arrangement that conveys priority rights to the use or capacity of a facility generally results in private business use.

(ii) *Special rule for facilities not used by the general public.* In the case of financed property that is not available for use by the general public (within the meaning of paragraph (c) of this section), private business use may be established solely on the basis of a special economic benefit to one or more nongovernmental persons, even if those nongovernmental persons have no special legal entitlements to use of the property. In determining whether special economic benefit gives rise to private business use it is necessary to consider all of the facts and circumstances, including one or more of the following factors—

(A) Whether the financed property is functionally related or physically proximate to property used in the trade or business of a nongovernmental person;

(B) Whether only a small number of nongovernmental persons receive the special economic benefit; and

(C) Whether the cost of the financed property is treated as depreciable by any nongovernmental person.

(c) *Exception for general public use*—(1) *In general.* Use as a member of the general public (general public use) is not private business use. Use of financed property by nongovernmental persons in their trades or businesses is treated as general public use only if the property is intended to be available and in fact is reasonably available for use on the same basis by natural persons not engaged in a trade or business.

(2) *Use on the same basis.* In general, use under an arrangement that conveys priority rights or other preferential benefits is not use on the same basis as the general public. Arrangements providing for use that is available to the general public at no charge or on the basis of rates that are generally applicable and uniformly applied do not convey priority rights or other preferential benefits. For this purpose, rates may be treated as generally applicable and uniformly applied even if—

(i) Different rates apply to different classes of users, such as volume purchasers, if the differences in rates are customary and reasonable; or

(ii) A specially negotiated rate arrangement is entered into, but only if the user is prohibited by federal law from paying the generally applicable rates, and the rates established are as comparable as reasonably possible to the generally applicable rates.

(3) *Long-term arrangements not treated as general public use.* An arrangement is not treated as general public use if the term of the use under the arrangement, including all renewal options, is greater than 200 days. For this purpose, a right of first refusal to renew use under the arrangement is not treated as a renewal option if—

(i) The compensation for the use under the arrangement is redetermined at generally applicable, fair market value rates that are in effect at the time of renewal; and

(ii) The use of the financed property under the same or similar arrangements is predominantly by natural persons who are not engaged in a trade or business.

(4) *Relation to other use.* Use of financed property by the general public does not prevent the proceeds from being used for a private business use because of other use under this section.

(d) *Other exceptions*—(1) *Agents.* Use of proceeds by nongovernmental persons solely in their capacity as agents of a governmental person is not private business use. For example, use by a nongovernmental person that issues obligations on behalf of a governmental person is not private business use to the extent the nongovernmental person's use of proceeds is in its capacity as an agent of the governmental person.

(2) *Use incidental to financing arrangements.* Use by a nongovernmental person that is solely incidental to a financing arrangement is not private business use. A use is solely incidental to a financing arrangement only if the nongovernmental person has no substantial rights to use bond proceeds or financed property other than as an agent of the bondholders. For example, a nongovernmental person that acts solely as an owner of title in a sale and leaseback financing transaction with a city generally is not a private business user of the property leased to the city, provided that the nongovernmental person has assigned all of its rights to use the leased facility to the trustee for the bondholders upon default by the city. Similarly, bond trustees, servicers, and guarantors are generally not treated as private business users.

(3) *Exceptions for arrangements other than arrangements resulting in ownership of financed property by a nongovernmental person*—(i) *Arrangements not available for use on the same basis by natural persons not engaged in a trade or business.* Use by a nongovernmental person pursuant to an arrangement, other than an arrangement resulting in ownership of financed property by a nongovernmental person, is not private business use if—

(A) The term of the use under the arrangement, including all renewal options, is not longer than 100 days;

(B) The arrangement would be treated as general public use, except that it is not available for use on the same basis by natural persons not engaged in a trade or business because generally applicable and uniformly applied rates are not reasonably available to natural persons not engaged in a trade or business; and

(C) The property is not financed for a principal purpose of providing that property for use by that nongovernmental person.

(ii) *Negotiated arm's-length arrangements.* Use by a nongovernmental person pursuant to an arrangement, other than an arrangement resulting in ownership of financed property by a nongovernmental person, is not private business use if—

(A) The term of the use under the arrangement, including all renewal options, is not longer than 50 days;

(B) The arrangement is a negotiated arm's-length arrangement, and compensation under the arrangement is at fair market value; and

(C) The property is not financed for a principal purpose of providing that property for use by that nongovernmental person.

(4) *Temporary use by developers.* Use during an initial development period by a developer of an improvement that carries out an essential governmental function is not private business use if the issuer and the developer reasonably expect on the issue date to proceed with all reasonable speed to develop the improvement and property benefited by that improvement and to transfer the improvement to a governmental person, and if the improvement is in fact transferred to a governmental person promptly after the property benefited by the improvement is developed.

(5) *Incidental use*—(i) *General rule.* Incidental uses of a financed facility are disregarded, to the extent that those uses do not exceed 2.5 percent of the proceeds of the issue used to finance the facility. A use of a facility by a nongovernmental person is incidental if—

(A) Except for vending machines, pay telephones, kiosks, and similar uses, the use does not involve the transfer to the nongovernmental person of possession and control of space that is separated from other areas of the facility by walls, partitions, or other physical barriers, such as a night gate affixed to a structural component of a building (a nonpossessory use);

(B) The nonpossessory use is not functionally related to any other use of the facility by the same person (other than a different nonpossessory use); and

(C) All nonpossessory uses of the facility do not, in the aggregate, involve the use of more than 2.5 percent of the facility.

(ii) *Illustrations.* Incidental uses may include pay telephones, vending machines, advertising displays, and use for television cameras, but incidental uses may not include output purchases.

(6) *Qualified improvements.* Proceeds that provide a governmentally owned improvement to a governmentally owned building (including its structural components and land functionally related and subordinate to the building) are not used for a private business use if—

(i) The building was placed in service more than 1 year before the construction or acquisition of the improvement is begun;

(ii) The improvement is not an enlargement of the building or an improvement of interior space occupied exclusively for any private business use;

(iii) No portion of the improved building or any payments in respect of the improved building are taken into account under section 141(b)(2)(A) (the private security test); and

(iv) No more than 15 percent of the improved building is used for a private business use.

(e) *Special rule for tax assessment bonds.* In the case of a tax assessment bond that satisfies the requirements of §1.141–5(d), the loan (or deemed loan) of the proceeds to the borrower paying the assessment is disregarded in determining whether the private business use test is met. However, the use of the loan proceeds is not disregarded in determining whether the private business use test is met.

(f) *Examples.* The following examples illustrate the application of paragraphs (a) through (e) of this section. In each example, assume that the arrangements described are the only arrangements with nongovernmental persons for use of the financed property.

Example 1. Nongovernmental ownership. State A issues 20-year bonds to purchase land and equip and construct a factory. A then enters into an arrangement with Corporation X to sell the factory to X on an installment basis while the bonds are outstanding. The issue meets the private business use test because a nongovernmental person owns the financed facility. See also §1.141–2 (relating to the private activity bond tests), and §1.141–5 (relating to the private loan financing test).

Example 2. Lease to a nongovernmental person. (i) The facts are the same as in *Example 1*, except that A enters into an arrangement with X to lease the factory to X for 3 years rather than to sell it to X. The lease payments will be made annually and will be based on the tax-exempt interest rate on the bonds. The issue meets the private business use test because a nongovernmental person leases the financed facility. See also §1.141–14 (relating to anti-abuse rules).

(ii) The facts are the same as in *Example 2(i)*, except that the annual payments made by X will equal fair rental value of the facility and exceed the amount necessary to pay debt service on the bonds for the 3 years of the lease. The issue meets the private business use test because a nongovernmental person leases the financed facility and the test does not require that the benefits of tax-exempt financing be passed through to the nongovernmental person.

Example 3. Management contract in substance a lease. City L issues 30-year bonds to finance the construction of a city hospital. L enters into a 15-year contract with M, a nongovernmental person that operates a health maintenance organization relating to the treatment of M's members at L's hospital. The contract provides for reasonable fixed compensation to M for services rendered with no compensation based, in whole or in part, on a share of net profits from the operation of the hospital. However, the contract also provides that 30 percent of the capacity of the hospital will be exclusively available to M's members and M will bear the risk of loss of that portion of the capacity of the hospital so that, under all of the facts and circumstances, the contract is properly characterized as a lease for federal income tax purposes. The issue meets the private business use test because a nongovernmental person leases the financed facility.

Example 4. Ownership of title in substance a leasehold interest. Nonprofit Corporation R issues bonds on behalf of City P to finance the construction of a hospital. R will own legal title to the hospital. In addition, R will operate the hospital, but R is not treated as an agent of P in its capacity as operator of the hospital. P has certain rights to the hospital that establish that it is properly treated as the owner of the property for federal income tax purposes. P does not have rights, however, to directly control operation of the hospital while R owns legal title to it and operates it. The issue meets the private business use test because the arrangement provides a nongovernmental person an interest in the financed facility that is comparable to a leasehold interest. See paragraphs (a)(2) and (b)(7)(i) of this section.

Example 5. Rights to control use of property treated as private business use—parking lot. Corporation C and City D enter into a plan to finance the construction of a parking lot adjacent to C's factory. Pursuant to the plan, C conveys the site for the parking lot to D for a nominal amount, subject to a covenant running with the land that the property be used only for a parking lot. In addition, D agrees that C will have the right to approve rates charged by D for use of the parking lot. D issues bonds to finance construction of the parking lot on the site. The parking lot will be available for use by the general public on the basis of rates that are generally applicable and uniformly applied. The issue meets the private business use test because a nongovernmental person has special legal entitlements for beneficial use of the financed facility that are comparable to an ownership interest. See paragraph (b)(7)(i) of this section.

Example 6. Other actual or beneficial use—hydroelectric enhancements. J, a political subdivision, owns and operates a hydroelectric generation plant and related facilities. Pursuant to a take or pay contract, J sells 15 percent of the output of the plant to Corporation K, an investor-owned utility. K is treated as a private business user of the plant. Under the license issued to J for operation of the plant, J is required by federal regulations to construct and operate various facilities for the preservation of fish and for public recreation. J issues its obligations to finance the fish preservation and public recreation facilities. K has no special legal entitlements for beneficial use of the financed facilities. The fish preservation facilities are functionally related to the operation of the plant. The recreation facilities are available to natural persons on a short-term basis according to generally applicable and uniformly applied rates. Under paragraph (c) of this section, the recreation facilities are treated as used by the general public. Under paragraph (b)(7) of this section, K's use is not treated as private business use of the recreation facilities because K has no special legal entitlements for beneficial use of the recreation facilities. The fish preservation facilities are not of a type reasonably available for use on the same basis by natural persons not engaged in a trade or business. Under all of the facts and circumstances (including the functional relationship of the fish preservation facilities to property used in K's trade or business) under paragraph (b)(7)(ii) of this section, K derives a special economic benefit from the fish preservation facilities. Therefore, K's private business use may be established solely on the basis of that special economic benefit, and K's use of the fish preservation facilities is treated as private business use.

Example 7. Other actual or beneficial use—pollution control facilities. City B issues obligations to finance construction of a specialized pollution control facility on land that it owns adjacent to a factory owned by Corporation N. B will own and operate the pollution control facility, and N will have no special legal entitlements to use the facility. B, however, reasonably expects that N will be the only user of the facility. The facility will not be reasonably available for use on the same basis by natural persons not engaged in a trade or business. Under paragraph (b)(7)(ii) of this section, because under all of the facts and circumstances the facility is functionally related and is physically proximate to property used in N's trade or business, N derives a special economic benefit from the facility. Therefore, N's private business use may be established solely on the basis of that special economic benefit, and N's use is treated as private business use of the facility. See paragraph (b)(7)(ii) of this section.

Example 8. General public use—airport runway. (i) City I issues bonds and uses all of the proceeds to finance construction of a runway at a new city-owned airport. The runway will be available for take-off and landing by any operator of an aircraft desiring to use the airport, including general aviation operators who are natural persons not engaged in a trade or business. It is reasonably expected that most of the actual use of the runway will be by private air carriers (both charter airlines and commercial airlines) in connection with their use of the airport terminals leased by those carriers. These leases for the use of terminal space provide no priority rights or other preferential benefits to the air carriers for use of the runway. Moreover, under the leases the lease payments are determined without taking into account the revenues generated by runway landing fees (that is, the lease payments are not determined on a "residual" basis). Although the lessee air carriers receive a special economic benefit from the use of the runway, this economic benefit is not sufficient to cause the air carriers to be private business users, because the runway is available for general public use. The issue does not meet the private business use test. See paragraphs (b)(7)(ii) and (c) of this section.

(ii) The facts are the same as in *Example 8(i),* except that the runway will be available for use only by private air carriers. The use by these private air carriers is not for general public use, because the runway is not reasonably available for use on the same basis by natural persons not engaged in a trade or business. Depending on all of the facts and circumstances, including whether there are only a small number of lessee private air carriers, the issue may meet the private business use test solely because the private air carriers receive a special economic benefit from the runway. See paragraph (b)(7)(ii) of this section.

(iii) The facts are the same as in *Example 8(i),* except that the lease payments under the leases with the private air carriers are determined on a residual basis by taking into account the net revenues generated by runway landing fees. These leases cause the private business use test to be met with respect to the runway because they are arrangements that convey special legal entitlements to the financed facility to nongovernmental persons. See paragraph (b)(7)(i) of this section.

Example 9. General public use—airport parking garage. City S issues bonds and uses all of the proceeds to finance construction of a city-owned parking garage at the city-owned airport. S reasonably expects that more than 10 percent of the actual use of the parking garage will be by employees of private air carriers (both charter airlines and commercial airlines) in connection with their use of the airport terminals leased by those carriers. The air carriers' use of the parking garage, however, will be on the same basis as passengers and other members of the general public using the airport. The leases for the use of the terminal space provide no priority rights to the air carriers for use of the parking garage, and the lease payments are determined without taking into account the revenues generated by the parking garage. Although the lessee air carriers receive a special economic benefit from the use of the parking garage, this economic benefit is not sufficient to cause the air carriers to be private business users, because the parking garage is available for general public use. The issue does not meet the private business use test. See paragraphs (b)(7)(ii) and (c) of this section.

Example 10. Long-term arrangements not treated as general public use—insurance fund. Authority T deposits all of the proceeds of its bonds in its insurance fund and invests all of those proceeds in tax-exempt bonds. The insurance fund provides insurance to a large number of businesses and natural persons not engaged in a trade or business. Each participant receives insurance for a term of 1 year. The use by the participants, other than participants that are natural persons not engaged in a trade or business, is treated as private business use of the proceeds of the bonds because the participants have special legal entitlements to the use of bond proceeds, even though the contractual rights are not necessarily properly characterized as ownership, leasehold, or similar interests listed in paragraph (b) of this section. Use of the bond proceeds is not treated as general public use because the term of the insurance is greater than 200 days. See paragraphs (b)(7)(i) and (c)(3) of this section.

Example 11. General public use—port road. Highway Authority W uses all of the proceeds of its bonds to construct a 25-mile road to connect an industrial port owned by Corporation Y with existing roads owned and operated by W. Other than the port, the nearest residential or commercial development to the new road is 12 miles away. There is no reasonable expectation that development will occur in the area surrounding the new road. W and Y enter into no arrangement (either by contract or ordinance) that conveys special legal entitlements to Y for the use of the road. Use of the road will be available without restriction to all users, including natural persons who are not engaged in a trade or business. The issue does not meet the private business use test because the road is treated as used only by the general public.

Example 12. General public use of governmentally owned hotel. State Q issues bonds to purchase land and construct a hotel for use by the general public (that is, tourists, visitors, and business travelers). The bond documents provide that Q will own and operate the project for the term of the bonds. Q will not enter into a lease or license with any user for use of rooms for a period longer than 200 days (although users may actually use rooms for consecutive periods in excess of 200 days). Use of the hotel by hotel guests who are travelling in connection with trades or businesses of nongovernmental persons is not a private business use of the hotel by these persons because the hotel is intended to be available and in fact is reasonably available for use on the same basis by natural persons not engaged in a trade or business. See paragraph (c)(1) of this section.

Example 13. General public use with rights of first refusal. Authority V uses all of the proceeds of its bonds to construct a parking garage. At least 90 percent of the spaces in the garage will be available to the general public on a monthly first-come, first-served basis. V reasonably expects that the spaces will be predominantly leased to natural persons not engaged in a trade or business who have priority rights to renew their spaces at then current fair market value rates. More than 10 percent of the spaces will be leased to nongovernmental persons acting in a trade or business. These leases are not treated as arrangements with a term of use greater than 200 days. The rights to renew are not treated as renewal options because the compensation for the spaces is redetermined at generally applicable, fair market value rates that will be in effect at the time of renewal and the use of the spaces under similar arrangements is predominantly by natural persons who are not engaged in a trade or business. The issue does not meet the private business use test because at least 90 percent of the use of the parking garage is general public use. See paragraph (c)(3) of this section.

Example 14. General public use with a specially negotiated rate agreement with agency of United States. G, a sewage collection and treatment district, operates facilities that were financed with its bonds. F, an agency of the United States, has a base located within G. Approximately 20 percent of G's facilities are used to treat sewage produced by F under a specially negotiated rate agreement. Under the specially negotiated rate agreement, G uses its best efforts to charge F as closely as possible the same amount for its use of G's services as its other customers pay for the same amount of services, although those other customers pay for services based on standard district charges and tax levies. F is prohibited by federal law from paying for the services based on those standard district charges and tax levies. The use of G's facilities by F is on the same basis as the general public. See paragraph (c)(2)(ii) of this section.

Example 15. Arrangements not available for use by natural persons not engaged in a trade or business—federal use of prisons. Authority E uses all of the proceeds of its bonds to construct a prison. E contracts with federal agency F to house federal prisoners on a space-available, first-come, first-served basis, pursuant to which F will be charged approximately the same amount for each prisoner as other persons that enter into similar transfer agreements. It is reasonably expected that other persons will enter into similar agreements. The term of the use under the contract is not longer than 100 days, and F has no right to renew, although E reasonably expects to renew the contract indefinitely. The prison is not financed for a principal purpose of providing the prison for use by F. It is reasonably expected that during the term of the bonds, more than 10 percent of the prisoners at the prison will be federal prisoners. F's use of the facility is not general public use because this type of use (leasing space for prisoners) is not available for use on the same basis by natural persons not engaged in a trade or business. The issue does not meet the private business use test, however, because the leases satisfy the exception of paragraph (d)(3)(i) of this section.

Example 16. Negotiated arm's-length arrangements—auditorium reserved in advance. (i) City Z issues obligations to finance the construction of a municipal auditorium that it will own and operate. The use of the auditorium will be open to anyone who wishes to use it for a short period of time on a rate-scale basis. Z reasonably expects that the auditorium will be used by schools, church groups, sororities, and numerous commercial organizations. Corporation H, a nongovernmental person, enters into an arm's-length arrangement with Z to use the auditorium for 1 week for each year for a 10-year period (a total of 70 days), pursuant to which H will be charged a specific price reflecting fair market value. On the date the contract is entered into, Z has not established generally applicable rates for future years. Even though the auditorium is not financed for a principal purpose of providing use of the auditorium to H, H is not treated as using the auditorium as a member of the general public because its use is not on the same basis as the general public. Because the term of H's use of the auditorium is longer than 50 days, the arrangement does not meet the exception under paragraph (d)(3)(ii) of this section.

(ii) The facts are the same as in *Example 16(i)*, except that H will enter into an arm's-length arrangement with Z to use the auditorium for 1 week for each year for a 4-year period (a total of 28 days), pursuant to which H will be charged a specific price reflecting fair market value. H is not treated as a private business user of the auditorium because its contract satisfies the exception of paragraph (d)(3)(ii) of this section for negotiated arm's-length arrangements.

(g) *Measurement of private business use*—(1) *In general*. In general, the private business use of proceeds is allocated to property under §1.141–6. The amount of private business use of that property is determined according to the average percentage of private business use of that property during the measurement period.

(2) *Measurement period*—(i) *General rule*. Except as provided in this paragraph (g)(2), the measurement period of property financed by an issue begins on the later of the issue date of that issue or the date the property is placed in service and ends on the earlier of the last date of the reasonably expected economic life of the property or the latest maturity date of any bond of the issue financing the property (determined without regard to any optional redemption dates). In general, the period of reasonably expected economic life of the property for this purpose is based on reasonable expectations as of the issue date.

(ii) *Special rule for refundings of short-term obligations*. For an issue of short-term obligations that the issuer reasonably expects to refund with a long-term financing (such as bond anticipation notes), the measurement period is based on the latest maturity date of any bond of the last refunding issue with respect to the financed property (determined without regard to any optional redemption dates).

(iii) *Special rule for reasonably expected mandatory redemptions*. If an issuer reasonably expects on the issue date that an action will occur during the term of the bonds to cause either the private business tests or the private loan financing test to be met and is required to redeem bonds to meet the reasonable expectations test of §1.141–2(d)(2), the measurement period ends on the reasonably expected redemption date.

(iv) *Special rule for ownership by a nongovernmental person*. The amount of private business use resulting from ownership by a nongovernmental person is the greatest percentage of private business use in any 1-year period.

(v) *Anti-abuse rule*. If an issuer establishes the term of an issue for a period that is longer than is reasonably necessary for the governmental purposes of the issue for a principal purpose of increasing the permitted amount of private business use, the Commissioner may determine the amount of private business use according to the greatest percentage of private business use in any 1-year period.

(3) *Determining average percentage of private business use*. The average percentage of private business use is the average of the percentages of private business use during the 1-year periods within the measurement period. Appropriate adjustments must be made for beginning and ending periods of less than 1 year.

(4) *Determining the average amount of private business use for a 1-year period*—(i) *In general*. The percentage of private business use of property for any 1-year period is the average private business use during that year. This average is determined by comparing the amount of private business use during the year to the total amount of private business use and use that is not private business use (government use) during that year. Paragraphs (g)(4) (ii) through (v) of this section apply to determine the average amount of private business use for a 1-year period.

(ii) *Uses at different times*. For a facility in which actual government use and private business use occur at different times (for example, different days), the average amount of private business use generally is based on the amount of time that the facility is used for private business use as a percentage of the total time for all actual use. In determining the total amount of actual use, periods during which the facility is not in use are disregarded.

(iii) *Simultaneous use.* In general, for a facility in which government use and private business use occur simultaneously, the entire facility is treated as having private business use. For example, a governmentally owned facility that is leased or managed by a nongovernmental person in a manner that results in private business use is treated as entirely used for a private business use. If, however, there is also private business use and actual government use on the same basis, the average amount of private business use may be determined on a reasonable basis that properly reflects the proportionate benefit to be derived by the various users of the facility (for example, reasonably expected fair market value of use). For example, the average amount of private business use of a garage with unassigned spaces that is used for government use and private business use is generally based on the number of spaces used for private business use as a percentage of the total number of spaces.

(iv) *Discrete portion.* For purposes of this paragraph (g), measurement of the use of proceeds allocated to a discrete portion of a facility is determined by treating that discrete portion as a separate facility.

(v) *Relationship to fair market value.* For purposes of paragraphs (g)(4) (ii) through (iv) of this section, if private business use is reasonably expected as of the issue date to have a significantly greater fair market value than government use, the average amount of private business use must be determined according to the relative reasonably expected fair market values of use rather than another measure, such as average time of use. This determination of relative fair market value may be made as of the date the property is acquired or placed in service if making this determination as of the issue date is not reasonably possible (for example, if the financed property is not identified on the issue date). In general, the relative reasonably expected fair market value for a period must be determined by taking into account the amount of reasonably expected payments for private business use for the period in a manner that properly reflects the proportionate benefit to be derived from the private business use.

(5) *Common areas.* The amount of private business use of common areas within a facility is based on a reasonable method that properly reflects the proportionate benefit to be derived by the users of the facility. For example, in general, a method that is based on the average amount of private business use of the remainder of the entire facility reflects proportionate benefit.

(6) *Allocation of neutral costs.* Proceeds that are used to pay costs of issuance, invested in a reserve or replacement fund, or paid as fees for a qualified guarantee or a qualified hedge must be allocated ratably among the other purposes for which the proceeds are used.

(7) *Commencement of measurement of private business use.* Generally, private business use commences on the first date on which there is a right to actual use by the nongovernmental person. However, if an issuer enters into an arrangement for private business use a substantial period before the right to actual private business use commences and the arrangement transfers ownership or is an arrangement for other long-term use (such as a lease for a significant portion of the remaining economic life of financed property), private business use commences on the date the arrangement is entered into, even if the right to actual use commences after the measurement period. For this purpose, 10 percent of the measurement period is generally treated as a substantial period.

(8) *Examples.* The following examples illustrate the application of this paragraph (g):

Example 1. Research facility. University U, a state owned and operated university, owns and operates a research facility. U proposes to finance general improvements to the facility with the proceeds of an issue of bonds. U enters into sponsored research agreements with nongovernmental persons that result in private business use because the sponsors will own title to any patents resulting from the research. The governmental research conducted by U and the research U conducts for the sponsors take place simultaneously in all laboratories within the research facility. All laboratory equipment is available continuously for use by workers who perform both types of research. Because it is not possible to predict which research projects will be successful, it is not reasonably practicable to estimate the relative revenues expected to result from the governmental and nongovernmental research. U contributed 90 percent of the cost of the facility and the nongovernmental persons contributed 10 percent of the cost. Under this section, the nongovernmental persons are using the facility for a private business use on the same basis as the government use of the facility. The portions of the costs contributed by the various users of the facility provide a reasonable basis that properly reflects the proportionate benefit to be derived by the users of the facility. The nongovernmental persons are treated as using 10 percent of the proceeds of the issue.

Example 2. Stadium. (i) City L issues bonds and uses all of the proceeds to construct a stadium. L enters into a long-term contract with a professional sports team T under which T will use the stadium 20 times during each year. These uses will occur on nights and weekends. L reasonably expects that the stadium will be used more than 180 other times each year, none of which will give rise to private business use. This expectation is based on a feasibility study and historical use of the old stadium that is being replaced by the new stadium. There is no significant difference in the value of T's uses when compared to the other uses of the stadium, taking into account the payments that T is reasonably expected to make for its use. Assuming no other private business use, the issue does not meet the private business use test because not more than 10 percent of the use of the facility is for a private business use.

(ii) The facts are the same as in *Example 2(i)*, except that L reasonably expects that the stadium will be used not more than 60 other times each year, none of which will give rise to private business use. The issue meets the private business use test because 25 percent of the proceeds are used for a private business use.

Example 3. Airport terminal areas treated as common areas. City N issues bonds to finance the construction of an airport terminal. Eighty percent of the leasable space of the terminal will be leased to private air carriers. The remaining 20 percent of the leasable space will be used for the term of the bonds by N for its administrative purposes. The common areas of the terminal, including waiting areas, lobbies, and hallways are treated as 80 percent used by the air carriers for purposes of the private business use test.

[T.D. 8712, 62 FR 2286, Jan. 16, 1997, as amended by T.D. 8967, 66 FR 58062, Nov. 20, 2001]

§ 1.141–4 Private security or payment test.

(a) *General rule*—(1) *Private security or payment.* The private security or payment test relates to the nature of the security for, and the source of, the payment of debt service on an issue. The private payment portion of the test takes into account the payment of the debt service on the issue that is directly or indirectly to be derived from payments (whether or not to the issuer or any related party) in respect of property, or borrowed money, used or to be used for a private business use. The private security portion of the test takes into account the payment of the debt service on the issue that is directly or indirectly secured by any interest in property used or to be used for a private business use or payments in respect of property used or to be used for a private business use. For additional rules for output facilities, see § 1.141–7.

(2) *Aggregation of private payments and security.* For purposes of the private security or payment test, payments taken into account as private payments and payments or property taken into account as private security are aggregated. However, the same payments are not taken into account as both private security and private payments.

(3) *Underlying arrangement.* The security for, and payment of debt service on, an issue is determined from both the terms of the bond documents and on the basis of any underlying arrangement. An underlying arrangement may result from separate agreements between the parties or may be determined on the basis of all of the facts and circumstances surrounding the issuance of the bonds. For example, if the payment of debt service on an issue is secured by both a pledge of the full faith and credit of a state or local governmental unit and any interest in property used or to be used in a private business use, the issue meets the private security or payment test.

(b) *Measurement of private payments and security*—(1) *Scope.* This paragraph (b) contains rules that apply to both private security and private payments.

(2) *Present value measurement*—(i) *Use of present value.* In determining whether an issue meets the private security

or payment test, the present value of the payments or property taken into account is compared to the present value of the debt service to be paid over the term of the issue.

(ii) *Debt service*—(A) *Debt service paid from proceeds.* Debt service does not include any amount paid or to be paid from sale proceeds or investment proceeds. For example, debt service does not include payments of capitalized interest funded with proceeds.

(B) *Adjustments to debt service.* Debt service is adjusted to take into account payments and receipts that adjust the yield on an issue for purposes of section 148(f). For example, debt service includes fees paid for qualified guarantees under §1.148–4(f) and is adjusted to take into account payments and receipts on qualified hedges under §1.148–4(h).

(iii) *Computation of present value*—(A) *In general.* Present values are determined by using the yield on the issue as the discount rate and by discounting all amounts to the issue date. See, however, §1.141–13 for special rules for refunding bonds.

(B) *Fixed yield issues.* For a fixed yield issue, yield is determined on the issue date and is not adjusted to take into account subsequent events.

(C) *Variable yield issues.* The yield on a variable yield issue is determined over the term of the issue. To determine the reasonably expected yield as of any date, the issuer may assume that the future interest rate on a variable yield bond will be the then-current interest rate on the bonds determined under the formula prescribed in the bond documents. A deliberate action requires a recomputation of the yield on the variable yield issue to determine the present value of payments under that arrangement. In that case, the issuer must use the yield determined as of the date of the deliberate action for purposes of determining the present value of payments under the arrangement causing the deliberate action. See paragraph (g) of this section, *Example 3.*

(iv) *Application to private security.* For purposes of determining the present value of debt service that is secured by property, the property is valued at fair market value as of the first date on which the property secures bonds of the issue.

(c) *Private payments*—(1) *In general.* This paragraph (c) contains rules that apply to private payments.

(2) *Payments taken into account*—(i) *Payments for use*—(A) *In general.* Both direct and indirect payments made by any nongovernmental person that is treated as using proceeds of the issue are taken into account as private payments to the extent allocable to the proceeds used by that person. Payments are taken into account as private payments only to the extent that they are made for the period of time that proceeds are used for a private business use. Payments for a use of proceeds include payments (whether or not to the issuer) in respect of property financed (directly or indirectly) with those proceeds, even if not made by a private business user. Payments are not made in respect of financed property if those payments are directly allocable to other property being directly used by the person making the payment and those payments represent fair market value compensation for that other use. See paragraph (g) of this section, *Example 4* and *Example 5.* See also paragraph (c)(3) of this section for rules relating to allocation of payments to the source or sources of funding of property.

(B) *Payments not to exceed use.* Payments with respect to proceeds that are used for a private business use are not taken into account to the extent that the present value of those payments exceeds the present value of debt service on those proceeds. Payments need not be directly derived from a private business user, however, to be taken into account. Thus, if 7 percent of the proceeds of an issue is used by a person over the measurement period, payments with respect to the property financed with those proceeds are taken into account as private payments only to the extent that the present value of those payments does not exceed the present value of 7 percent of the debt service on the issue.

(C) *Payments for operating expenses.* Payments by a person for a use of proceeds do not include the portion of any payment that is properly allocable to the payment of ordinary and necessary expenses (as defined under section 162) directly attributable to the operation and maintenance of the financed property used by that person. For this purpose, general overhead and administrative expenses are not directly attributable to those operations and maintenance. For example, if an issuer receives $5,000 rent during the year for use of space in a financed facility and during the year pays $500 for ordinary and necessary expenses properly allocable to the operation and maintenance of that space and $400 for general overhead and general administrative expenses properly allocable to that space, $500 of the $5,000 received would not be considered a payment for the use of the proceeds allocable to that space (regardless of the manner in which that $500 is actually used).

(ii) *Refinanced debt service.* Payments of debt service on an issue to be made from proceeds of a refunding issue are taken into account as private payments in the same proportion that the present value of the payments taken into account as private payments for the refunding issue bears to the present value of the debt service to be paid on the refunding issue. For example, if all the debt service on a note is paid with proceeds of a refunding issue, the note meets the private security or payment test if (and to the same extent that) the refunding issue meets the private security or payment test. This paragraph (c)(2)(ii) does not apply to payments that arise from deliberate actions that occur more than 3 years after the retirement of the prior issue that are not reasonably expected on the issue date of the refunding issue. For purposes of this paragraph (c)(2)(ii), whether an issue is a refunding issue is determined without regard to §1.150–1(d)(2)(i) (relating to certain payments of interest).

(3) *Allocation of payments*—(i) *In general.* Private payments for the use of property are allocated to the source or different sources of funding of property. The allocation to the source or different sources of funding is based on all of the facts and circumstances, including whether an allocation is consistent with the purposes of section 141. In general, a private payment for the use of property is allocated to a source of funding based upon the nexus between the payment and both the financed property and the source of funding. For this purpose, different sources of funding may include different tax-exempt issues, taxable issues, and amounts that are not derived from a borrowing, such as revenues of an issuer (equity).

(ii) *Payments for use of discrete property.* Payments for the use of a discrete facility (or a discrete portion of a facility) are allocated to the source or different sources of funding of that discrete property.

(iii) *Allocations among two or more sources of funding.* In general, except as provided in paragraphs (c)(3)(iv) and (v) of this section, if a payment is made for the use of property financed with two or more sources of funding (for example, equity and a tax-exempt issue), that payment must be allocated to those sources of funding in a manner that reasonably corresponds to the relative amounts of those sources of funding that are expended on that property. If an issuer has not retained records of amounts expended on the property (for example, records of costs of a building that was built 30 years before the allocation), an issuer may use reasonable estimates of those expenditures. For this purpose, costs of issuance and other similar neutral costs are allocated ratably among expenditures in the same manner as in §1.141–3(g)(6). A payment for the use of property may be allocated to two or more issues that finance property according to the relative amounts of debt service (both paid and accrued) on the issues during the annual period for which the payment is made, if that allocation reasonably reflects the economic substance of the arrangement. In general, allocations of payments according to relative debt service reasonably reflect the economic substance of the arrangement if the maturity of the bonds reasonably corresponds to the reasonably expected economic life of the property and debt service payments on the bonds are approximately level from year to year.

(iv) *Payments made under an arrangement entered into in connection with issuance of bonds.* A private payment for the use of property made under an arrangement that is entered into in connection with the issuance of the issue that finances that property generally is allocated to that issue. Whether an arrangement is entered into in connection with the issuance of an issue is determined on the basis of all of the facts and circumstances. An arrangement is ordinarily treated as entered into in connection with the issuance of an issue if—

(A) The issuer enters into the arrangement during the 3-year period beginning 18 months before the issue date; and

(B) The amount of payments reflects all or a portion of debt service on the issue.

(v) *Allocations to equity*. A private payment for the use of property may be allocated to equity before payments are allocated to an issue only if—

(A) Not later than 60 days after the date of the expenditure of those amounts, the issuer adopts an official intent (in a manner comparable to §1.150–2(e)) indicating that the issuer reasonably expects to be repaid for the expenditure from a specific arrangement; and

(B) The private payment is made not later than 18 months after the later of the date the expenditure is made or the date the project is placed in service.

(d) *Private security*—(1) *In general*. This paragraph (d) contains rules that relate to private security.

(2) *Security taken into account*. The property that is the security for, or the source of, the payment of debt service on an issue need not be property financed with proceeds. For example, unimproved land or investment securities used, directly or indirectly, in a private business use that secures an issue provides private security. Private security (other than financed property and private payments) for an issue is taken into account under section 141(b), however, only to the extent it is provided, directly or indirectly, by a user of proceeds of the issue.

(3) *Pledge of unexpended proceeds*. Proceeds qualifying for an initial temporary period under §1.148–2(e)(2) or (3) or deposited in a reasonably required reserve or replacement fund (as defined in §1.148–2(f)(2)(i)) are not taken into account under this paragraph (d) before the date on which those amounts are either expended or loaned by the issuer to an unrelated party.

(4) *Secured by any interest in property or payments*. Property used or to be used for a private business use and payments in respect of that property are treated as private security if any interest in that property or payments secures the payment of debt service on the bonds. For this purpose, the phrase any interest in is to be interpreted broadly and includes, for example, any right, claim, title, or legal share in property or payments.

(5) *Payments in respect of property*. The payments taken into account as private security are payments in respect of property used or to be used for a private business use. Except as otherwise provided in this paragraph (d)(5) and paragraph (d)(6) of this section, the rules in paragraphs (c)(2)(i)(A) and (B) and (c)(2)(ii) of this section apply to determine the amount of payments treated as payments in respect of property used or to be used for a private business use. Thus, payments made by members of the general public for use of a facility used for a private business use (for example, a facility that is the subject of a management contract that results in private business use) are taken into account as private security to the extent that they are made for the period of time that property is used by a private business user.

(6) *Allocation of security among issues*. In general, property or payments from the disposition of that property that are taken into account as private security are allocated to each issue secured by the property or payments on a reasonable basis that takes into account bondholders' rights to the payments or property upon default.

(e) *Generally applicable taxes*—(1) *General rule*. For purposes of the private security or payment test, generally applicable taxes are not taken into account (that is, are not payments from a nongovernmental person and are not payments in respect of property used for a private business use).

(2) *Definition of generally applicable taxes*. A generally applicable tax is an enforced contribution exacted pursuant to legislative authority in the exercise of the taxing power that is imposed and

collected for the purpose of raising revenue to be used for governmental or public purposes. A generally applicable tax must have a uniform tax rate that is applied to all persons of the same classification in the appropriate jurisdiction and a generally applicable manner of determination and collection.

(3) *Special charges.* A special charge (as defined in this paragraph (e)(3)) is not a generally applicable tax. For this purpose, a special charge means a payment for a special privilege granted or regulatory function (for example, a license fee), a service rendered (for example, a sanitation services fee), a use of property (for example, rent), or a payment in the nature of a special assessment to finance capital improvements that is imposed on a limited class of persons based on benefits received from the capital improvements financed with the assessment. Thus, a special assessment to finance infrastructure improvements in a new industrial park (such as sidewalks, streets, streetlights, and utility infrastructure improvements) that is imposed on a limited class of persons composed of property owners within the industrial park who benefit from those improvements is a special charge. By contrast, an otherwise qualified generally applicable tax (such as a generally applicable ad valorem tax on all real property within a governmental taxing jurisdiction) or an eligible PILOT under paragraph (e)(5) of this section that is based on such a generally applicable tax is not treated as a special charge merely because the taxes or PILOTs received are used for governmental or public purposes in a manner which benefits particular property owners.

(4) *Manner of determination and collection*—(i) *In general.* A tax does not have a generally applicable manner of determination and collection to the extent that one or more taxpayers make any impermissible agreements relating to payment of those taxes. An impermissible agreement relating to the payment of a tax is taken into account whether or not it is reasonably expected to result in any payments that would not otherwise have been made. For example, if an issuer uses proceeds to make a grant to a taxpayer to improve property, agreements that impose reasonable conditions on the use of the grant do not cause a tax on that property to fail to be a generally applicable tax. If an agreement by a taxpayer causes the tax imposed on that taxpayer not to be treated as a generally applicable tax, the entire tax paid by that taxpayer is treated as a special charge, unless the agreement is limited to a specific portion of the tax.

(ii) *Impermissible agreements.* The following are examples of agreements that cause a tax to fail to have a generally applicable manner of determination and collection: an agreement to be personally liable on a tax that does not generally impose personal liability, to provide additional credit support such as a third party guarantee, or to pay unanticipated shortfalls; an agreement regarding the minimum market value of property subject to property tax; and an agreement not to challenge or seek deferral of the tax.

(iii) *Permissible agreements.* The following are examples of agreements that do not cause a tax to fail to have a generally applicable manner of determination and collection: an agreement to use a grant for specified purposes (whether or not that agreement is secured); a representation regarding the expected value of the property following the improvement; an agreement to insure the property and, if damaged, to restore the property; a right of a grantor to rescind the grant if property taxes are not paid; and an agreement to reduce or limit the amount of taxes collected to further a bona fide governmental purpose. For example, an agreement to abate taxes to encourage a property owner to rehabilitate property in a distressed area is a permissible agreement.

(5) *Payments in lieu of taxes.* A tax equivalency payment or other payment in lieu of a tax (''PILOT'') is treated as a generally applicable tax if it meets the requirements of paragraphs (e)(5)(i) through (iv) of this section—

(i) *Maximum amount limited by underlying generally applicable tax.* The PILOT is not greater than the amount imposed by a statute for a generally applicable tax in each year.

(ii) *Commensurate with a generally applicable tax*. The PILOT is commensurate with the amount imposed by a statute for a generally applicable tax in each year under the commensurate standard set forth in this paragraph (e)(5)(ii). For this purpose, except as otherwise provided in this paragraph (e)(5)(ii), a PILOT is commensurate with a generally applicable tax only if it is equal to a fixed percentage of the generally applicable tax that would otherwise apply in each year or it reflects a fixed adjustment to the generally applicable tax that would otherwise apply in each year. A PILOT based on a property tax does not fail to be commensurate with the property tax as a result of changes in the level of the percentage of or adjustment to that property tax for a reasonable phase-in period ending when the subject property is placed in service (as defined in §1.150–2(c)). A PILOT based on a property tax must take into account the current assessed value of the property for property tax purposes for each year in which the PILOT is paid and that assessed value must be determined in the same manner and with the same frequency as property subject to the property tax. A PILOT is not commensurate with a generally applicable tax, however, if the PILOT is set at a fixed dollar amount (for example, fixed debt service on a bond issue) that cannot vary with changes in the level of the generally applicable tax on which it is based.

(iii) *Use of PILOTs for governmental or public purposes*. The PILOT is to be used for governmental or public purposes for which the generally applicable tax on which it is based may be used.

(iv) *No special charges*. The PILOT is not a special charge under paragraph (e)(3) of this section.

(f) *Certain waste remediation bonds*—(1) *Scope*. This paragraph (f) applies to bonds issued to finance hazardous waste clean-up activities on privately owned land (hazardous waste remediation bonds).

(2) *Persons that are not private users*. Payments from nongovernmental persons who are not (other than coincidentally) either users of the site being remediated or persons potentially responsible for disposing of hazardous waste on that site are not taken into account as private security. This paragraph (f)(2) applies to payments that secure (directly or indirectly) the payment of principal of, or interest on, the bonds under the terms of the bonds. This paragraph (f)(2) applies only if the payments are made pursuant to either a generally applicable state or local taxing statute or a state or local statute that regulates or restrains activities on an industry-wide basis of persons who are engaged in generating or handling hazardous waste, or in refining, producing, or transporting petroleum, provided that those payments do not represent, in substance, payment for the use of proceeds. For this purpose, a state or local statute that imposes payments that have substantially the same character as those described in Chapter 38 of the Code are treated as generally applicable taxes.

(3) *Persons that are private users*. If payments from nongovernmental persons who are either users of the site being remediated or persons potentially responsible for disposing of hazardous waste on that site do not secure (directly or indirectly) the payment of principal of, or interest on, the bonds under the terms of the bonds, the payments are not taken into account as private payments. This paragraph (f)(3) applies only if at the time the bonds are issued the payments from those nongovernmental persons are not material to the security for the bonds. For this purpose, payments are not material to the security for the bonds if—

(i) The payments are not required for the payment of debt service on the bonds;

(ii) The amount and timing of the payments are not structured or designed to reflect the payment of debt service on the bonds;

(iii) The receipt or the amount of the payment is uncertain (for example, as of the issue date, no final judgment has been entered into against the nongovernmental person);

(iv) The payments from those nongovernmental persons, when and if received, are used either to redeem bonds of the issuer or to pay for costs of any hazardous waste remediation project; and

(v) In the case when a judgment (but not a final judgment) has been entered by the issue date against a nongovernmental person, there are, as of the issue date, costs of hazardous waste remediation other than those financed with the bonds that may be financed with the payments.

(g) *Examples*. The following examples illustrate the application of this section:

Example 1. Aggregation of payments. State B issues bonds with proceeds of $10 million. B uses $9.7 million of the proceeds to construct a 10-story office building. B uses the remaining $300,000 of proceeds to make a loan to Corporation Y. In addition, Corporation X leases 1 floor of the building for the term of the bonds. Under all of the facts and circumstances, it is reasonable to allocate 10 percent of the proceeds to that 1 floor. As a percentage of the present value of the debt service on the bonds, the present value of Y's loan repayments is 3 percent and the present value of X's lease payments is 8 percent. The bonds meet the private security or payment test because the private payments taken into account are more than 10 percent of the present value of the debt service on the bonds.

Example 2. Indirect private payments. J, a political subdivision of a state, will issue several series of bonds from time to time and will use the proceeds to rehabilitate urban areas. Under all of the facts and circumstances, the private business use test will be met with respect to each issue that will be used for the rehabilitation and construction of buildings that will be leased or sold to nongovernmental persons for use in their trades or businesses. Nongovernmental persons will make payments for these sales and leases. There is no limitation either on the number of issues or the aggregate amount of bonds that may be outstanding. No group of bondholders has any legal claim prior to any other bondholders or creditors with respect to specific revenues of J, and there is no arrangement whereby revenues from a particular project are paid into a trust or constructive trust, or sinking fund, or are otherwise segregated or restricted for the benefit of any group of bondholders. There is, however, an unconditional obligation by J to pay the principal of, and the interest on, each issue. Although not directly pledged under the terms of the bond documents, the leases and sales are underlying arrangements. The payments relating to these leases and sales are taken into account as private payments to determine whether each issue of bonds meets the private security or payment test.

Example 3. Computation of payment in variable yield issues. (i) City M issues general obligation bonds with proceeds of $10 million to finance a 5-story office building. The bonds bear interest at a variable rate that is recomputed monthly according to an index that reflects current market yields. The yield that the interest index would produce on the issue date is 6 percent. M leases 1 floor of the office building to Corporation T, a nongovernmental person, for the term of the bonds. Under all of the facts and circumstances, T is treated as using more than 10 percent of the proceeds. Using the 6 percent yield as the discount rate, M reasonably expects on the issue date that the present value of lease payments to be made by T will be 8 percent of the present value of the total debt service on the bonds. After the issue date of the bonds, interest rates decline significantly, so that the yield on the bonds over their entire term is 4 percent. Using this actual 4 percent yield as the discount rate, the present value of lease payments made by T is 12 percent of the present value of the actual total debt service on the bonds. The bonds are not private activity bonds because M reasonably expected on the issue date that the bonds would not meet the private security or payment test and because M did not take any subsequent deliberate action to meet the private security or payment test.

(ii) The facts are the same as *Example 3(i)*, except that 5 years after the issue date M leases a second floor to Corporation S, a nongovernmental person, under a long-term lease. Because M has taken a deliberate action, the present value of the lease payments must be computed. On the date this lease is entered into, M reasonably expects that the yield on the bonds over their entire term will be 5.5 percent, based on actual interest rates to date and the then-current rate on the variable yield bonds. M uses this 5.5 percent yield as the discount rate. Using this 5.5 percent yield as the discount rate, as a percentage of the present value of the debt service on the bonds, the present value of the lease payments made by S is 3 percent. The bonds are private activity bonds because the present value of the aggregate private payments is greater than 10 percent of the present value of debt service.

Example 4. Payments not in respect of financed property. In order to further public safety, City Y issues tax assessment bonds the proceeds of which are used to move existing electric utility lines underground. Although the utility lines are owned by a nongovernmental utility company, that company is under no obligation to move the lines. The debt service on the bonds will be paid using assessments levied by City Y on the customers of the utility. Although the utility lines are privately owned and the utility customers make payments to the utility company for the use of those lines, the assessments are payments in respect of the cost of relocating the utility line. Thus, the assessment payments are not made in respect of property used for a private business use. Any direct or indirect payments to Y by the utility company for the undergrounding are, however, taken into account as private payments.

Example 5. Payments from users of proceeds that are not private business users taken into account. City P issues general obligation bonds to finance the renovation of a hospital that it owns. The hospital is operated for P by D, a nongovernmental person, under a management contract that results in private business use under §1.141–3. P will use the revenues from the hospital (after the required payments to D and the payment of operation and maintenance expenses) to pay the debt service on the bonds. The bonds meet the private security or payment test because the revenues from the hospital are payments in respect of property used for a private business use.

Example 6. Limitation of amount of payments to amount of private business use not determined annually. City Q issues bonds with a term of 15 years and uses the proceeds to construct an office building. The debt service on the bonds is level throughout the 15-year term. Q enters into a 5-year lease with Corporation R under which R is treated as a user of 11 percent of the proceeds. R will make lease payments equal to 20 percent of the annual debt service on the bonds for each year of the lease. The present value of R's lease payments is equal to 12 percent of the present value of the debt service over the entire 15-year term of the bonds. If, however, the lease payments taken into account as private payments were limited to 11 percent of debt service paid in each year of the lease, the present value of these payments would be only 8 percent of the debt service on the bonds over the entire term of the bonds. The bonds meet the private security or payment test, because R's lease payments are taken into account as private payments in an amount not to exceed 11 percent of the debt service of the bonds.

Example 7. Allocation of payments to funds not derived from a borrowing. City Z purchases property for $1,250,000 using $1,000,000 of proceeds of its tax increment bonds and $250,000 of other revenues that are in its redevelopment fund. Within 60 days of the date of purchase, Z declared its intent to sell the property pursuant to a redevelopment plan and to use that amount to reimburse its redevelopment fund. The bonds are secured only by the incremental property taxes attributable to the increase in value of the property from the planned redevelopment of the property. Within 18 months after the issue date, Z sells the financed property to Developer M for $250,000, which Z uses to reimburse the redevelopment fund. The property that M uses is financed both with the proceeds of the bonds and Z's redevelopment fund. The payments by M are properly allocable to the costs of property financed with the amounts in Z's redevelopment fund. See paragraphs (c)(3) (i) and (v) of this section.

Example 8. Allocation of payments to different sources of funding—improvements. In 1997, City L issues bonds with proceeds of $8 million to finance the acquisition of a building. In 2002, L spends $2 million of its general revenues to improve the heating system and roof of the building. At that time, L enters into a 10-year lease with Corporation M for the building providing for annual payments of $1 million to L. The lease payments are at fair market value, and the lease payments do not otherwise have a significant nexus to either the issue or to the expenditure of general revenues. Eighty percent of each lease payment is allocated to the issue and is taken into account under the private payment test because each lease payment is properly allocated to the sources of funding in a manner that reasonably corresponds to the relative amounts of the sources of funding that are expended on the building.

Example 9. Security not provided by users of proceeds not taken into account. County W issues certificates of participation in a lease of a building that W owns and covenants to appropriate annual payments for the lease. A portion of each payment is specified as interest. More than 10 percent of the building is used for private business use. None of the proceeds of the obligations are used with respect to the building. W uses the proceeds of the obligations to make a grant to Corporation Y for the construction of a factory that Y will own. Y makes no payments to W, directly or indirectly, for its use of proceeds, and Y has no relationship to the users of the leased building. If W defaults under the lease, the trustee for the holders of the certificates of participation has a limited right of repossession under which the trustee may not foreclose but may lease the property to a new tenant at fair market value. The obligations are secured by an interest in property used for a private business use. However, because the property is not provided by a private business user and is not financed property, the obligations do not meet the private security or payment test.

Example 10. Allocation of payments among issues. University L, a political subdivision, issued three separate series of revenue bonds during 1989, 1991, and 1993 under the same bond resolution. L used the proceeds to construct facilities exclusively for its own use. Bonds issued under the resolution are equally and ratably secured and payable solely from the income derived by L from rates, fees, and charges imposed by L for the use of the facilities. The bonds issued in 1989, 1991, and 1993 are not private activity bonds. In 1997, L issues another series of bonds under the resolution to finance additional facilities. L leases 20 percent of the new facilities for the term of the 1997 bonds to nongovernmental persons who will use the facilities in their trades or businesses. The present value of the lease payments from the nongovernmental users will equal 15 percent of the present value of the debt service on the 1997 bonds. L will commingle all of the revenues from all its bond-financed facilities in its revenue fund. The present value of the portion of the lease payments from nongovernmental lessees of the new facilities allocable to the 1997 bonds under paragraph (d) of this section is less than 10 percent of the present value of the debt service on the 1997 bonds because the bond documents provide that the bonds are equally and ratably secured. Accordingly, the 1997 bonds do not meet the private security test. The 1997 bonds meet the private payment test, however, because the private lease payments for the new facility are properly allocated to those bonds (that is, because none of the proceeds of the prior issues were used for the new facilities). See paragraph (c) of this section.

Example 11. Generally applicable tax. (i) Authority N issues bonds to finance the construction of a stadium. Under a long-term lease, Corporation X, a professional sports team, will use more than 10 percent of the stadium. X will not, however, make any payments for this private business use. The security for the bonds will be a ticket tax imposed on each person purchasing a ticket for an event at the stadium. The portion of the ticket tax attributable to tickets purchased by persons attending X's events will, on a present value basis, exceed 10 percent of the present value of the debt service on N's bonds. The bonds meet the private security or payment test. The ticket tax is not a generally applicable tax and, to the extent that the tax receipts relate to X's events, the taxes are payments in respect of property used for a private business use.

(ii) The facts are the same as *Example 11(i)*, except that the ticket tax is imposed by N on tickets purchased for events at a number of large entertainment facilities within the N's jurisdiction (for example, other stadiums, arenas, and concert halls), some of which were not financed with tax-exempt bonds. The ticket tax is a generally applicable tax and therefore the revenues from this tax are not payments in respect of property used for a private business use. The receipt of the ticket tax does not cause the bonds to meet the private security or payment test.

[T.D. 8712, 62 FR 2291, Jan. 16, 1997, as amended by T.D. 9429, 73 FR 63374, Oct. 24, 2008]

§ 1.141–5 Private loan financing test.

(a) *In general.* Bonds of an issue are private activity bonds if more than the lesser of 5 percent or $5 million of the proceeds of the issue is to be used (directly or indirectly) to make or finance loans to persons other than governmental persons. Section 1.141–2(d) applies in determining whether the private loan financing test is met. In determining whether the proceeds of an issue are used to make or finance loans, indirect, as well as direct, use of the proceeds is taken into account.

(b) *Measurement of test.* In determining whether the private loan financing test is met, the amount actually loaned to a nongovernmental person is not discounted to reflect the present value of the loan repayments.

(c) *Definition of private loan*—(1) *In general.* Any transaction that is generally characterized as a loan for federal income tax purposes is a loan for purposes of this section. In addition, a loan may arise from the direct lending of bond proceeds or may arise from transactions in which indirect benefits that are the economic equivalent of a loan are conveyed. Thus, the determination of whether a loan is made depends on the substance of a transaction rather than its form. For example, a lease or other contractual arrangement (for example, a management contract or an output contract) may in substance constitute a loan if the arrangement transfers tax ownership of the facility to a nongovernmental person. Similarly, an output contract or a management contract with respect to a financed facility generally is not treated as a loan of proceeds unless the agreement in substance shifts significant burdens and benefits of ownership to the nongovernmental purchaser or manager of the facility.

(2) *Application only to purpose investments*—(i) *In general.* A loan may be either a purpose investment or a nonpurpose investment. A loan that is a nonpurpose investment does not cause the private loan financing test to be met. For example, proceeds invested in loans, such as obligations of the United States, during a temporary period, as part of a reasonably required reserve or replacement fund, as part of a refunding escrow, or as part of a minor portion (as each of those terms are defined in § 1.148–1 or § 1.148–2) are generally not

treated as loans under the private loan financing test.

(ii) *Certain prepayments treated as loans.* Except as otherwise provided, a prepayment for property or services, including a prepayment for property or services that is made after the date that the contract to buy the property or services is entered into, is treated as a loan for purposes of the private loan financing test if a principal purpose for prepaying is to provide a benefit of tax-exempt financing to the seller. A prepayment is not treated as a loan for purposes of the private loan financing test if—

(A) Prepayments on substantially the same terms are made by a substantial percentage of persons who are similarly situated to the issuer but who are not beneficiaries of tax-exempt financing;

(B) The prepayment is made within 90 days of the reasonably expected date of delivery to the issuer of all of the property or services for which the prepayment is made; or

(C) The prepayment meets the requirements of §1.148–1(e)(2)(iii)(A) or (B) (relating to certain prepayments to acquire a supply of natural gas or electricity).

(iii) *Customary prepayments.* The determination of whether a prepayment satisfies paragraph (c)(2)(ii)(A) of this section is generally made based on all the facts and circumstances. In addition, a prepayment is deemed to satisfy paragraph (c)(2)(ii)(A) of this section if—

(A) The prepayment is made for—

(*1*) Maintenance, repair, or an extended warranty with respect to personal property (for example, automobiles or electronic equipment); or

(*2*) Updates or maintenance or support services with respect to computer software; and

(B) The same maintenance, repair, extended warranty, updates or maintenance or support services, as applicable, are regularly provided to nongovernmental persons on the same terms.

(iv) *Additional prepayments as permitted by the Commissioner.* The Commissioner may, by published guidance, set forth additional circumstances in which a prepayment is not treated as a loan for purposes of the private loan financing test.

(3) *Grants*—(i) *In general.* A grant of proceeds is not a loan. Whether a transaction may be treated as a grant or a loan depends on all of the facts and circumstances.

(ii) *Tax increment financing*—(A) *In general.* Generally, a grant using proceeds of an issue that is secured by generally applicable taxes attributable to the improvements to be made with the grant is not treated as a loan, unless the grantee makes any impermissible agreements relating to the payment that results in the taxes imposed on that taxpayer not to be treated as generally applicable taxes under §1.141–4(e).

(B) *Amount of loan.* If a grant is treated as a loan under this paragraph (c)(3), the entire grant is treated as a loan unless the impermissible agreement is limited to a specific portion of the tax. For this purpose, an arrangement with each unrelated grantee is treated as a separate grant.

(4) *Hazardous waste remediation bonds.* In the case of an issue of hazardous waste remediation bonds, payments from nongovernmental persons that are either users of the site being remediated or persons potentially responsible for disposing of hazardous waste on that site do not establish that the transaction is a loan for purposes of this section. This paragraph (c)(4) applies only if those payments do not secure the payment of principal of, or interest on, the bonds (directly or indirectly), under the terms of the bonds and those payments are not taken into account under the private payment test pursuant to §1.141–4(f)(3).

(d) *Tax assessment loan exception*—(1) *General rule.* For purposes of this section, a tax assessment loan that satisfies the requirements of this paragraph (d) is not a loan for purposes of the private loan financing test.

(2) *Tax assessment loan defined.* A tax assessment loan is a loan that arises when a governmental person permits or requires property owners to finance any governmental tax or assessment of general application for an essential governmental function that satisfies each of the requirements of paragraphs (d) (3) through (5) of this section.

(3) *Mandatory tax or other assessment.* The tax or assessment must be an enforced contribution that is imposed and collected for the purpose of raising revenue to be used for a specific purpose (that is, to defray the capital cost of an improvement). Taxes and assessments do not include fees for services. The tax or assessment must be imposed pursuant to a state law of general application that can be applied equally to natural persons not acting in a trade or business and persons acting in a trade or business. For this purpose, taxes and assessments that are imposed subject to protest procedures are treated as enforced contributions.

(4) *Specific essential governmental function*—(i) *In general.* A mandatory tax or assessment that gives rise to a tax assessment loan must be imposed for one or more specific, essential governmental functions.

(ii) *Essential governmental functions.* For purposes of paragraph (d) of this section, improvements to utilities and systems that are owned by a governmental person and that are available for use by the general public (such as sidewalks, streets and street-lights; electric, telephone, and cable television systems; sewage treatment and disposal systems; and municipal water facilities) serve essential governmental functions. For other types of facilities, the extent to which the service provided by the facility is customarily performed (and financed with governmental bonds) by governments with general taxing powers is a primary factor in determining whether the facility serves an essential governmental function. For example, parks that are owned by a governmental person and that are available for use by the general public serve an essential governmental function. Except as otherwise provided in this paragraph (d)(4)(ii), commercial or industrial facilities and improvements to property owned by a nongovernmental person do not serve an essential governmental function. Permitting installment payments of property taxes or other taxes is not an essential governmental function.

(5) *Equal basis requirement*—(i) *In general.* Owners of both business and nonbusiness property benefiting from the financed improvements must be eligible, or required, to make deferred payments of the tax or assessment giving rise to a tax assessment loan on an equal basis (the equal basis requirement). A tax or assessment does not satisfy the equal basis requirement if the terms for payment of the tax or assessment are not the same for all taxed or assessed persons. For example, the equal basis requirement is not met if certain property owners are permitted to pay the tax or assessment over a period of years while others must pay the entire tax or assessment immediately or if only certain property owners are required to prepay the tax or assessment when the property is sold.

(ii) *General rule for guarantees.* A guarantee of debt service on bonds, or of taxes or assessments, by a person that is treated as a borrower of bond proceeds violates the equal basis requirement if it is reasonable to expect on the date the guarantee is entered into that payments will be made under the guarantee.

(6) *Coordination with private business tests.* See §§1.141–3 and 1.141–4 for rules for determining whether tax assessment loans cause the bonds financing those loans to be private activity bonds under the private business use and the private security or payment tests.

(e) *Examples.* The following examples illustrate the application of this section:

Example 1. Turnkey contract not treated as a loan. State agency Z and federal agency H will each contribute to rehabilitate a project owned by Z. H can only provide its funds through a contribution to Z to be used to acquire the rehabilitated project on a turnkey basis from an approved developer. Under H's turnkey program, the developer must own the project while it is rehabilitated. Z issues its notes to provide funds for construction. A portion of the notes will be retired using the H contribution, and the balance of the notes will be retired through the issuance by Z of long-term bonds. Z lends the proceeds of its notes to Developer B as construction financing and transfers title to B for a nominal amount. The conveyance is made on condition that B rehabilitate the property and reconvey it upon completion, with Z retaining the right to force reconveyance if these conditions are not satisfied. B must name Z as an additional insured on all insurance. Upon completion, B must transfer title to the project back to Z at a set price, which price reflects B's costs and profit, not fair market value. Further, this price is adjusted downward to reflect any cost-underruns. For purposes of section 141(c), this transaction does not involve a private loan.

Example 2. Essential government function requirement not met. City D creates a special taxing district consisting of property owned by nongovernmental persons that requires environmental clean-up. D imposes a special tax on each parcel within the district in an amount that is related to the expected environmental clean-up costs of that parcel. The payment of the tax over a 20-year period is treated as a loan by the property owners for purposes of the private loan financing test. The special district issues bonds, acting on behalf of D, that are payable from the special tax levied within the district, and uses the proceeds to pay for the costs of environmental clean-up on the property within the district. The bonds meet the private loan financing test because more than 5 percent of the proceeds of the issue are loaned to nongovernmental persons. The issue does not meet the tax assessment loan exception because the improvements to property owned by a nongovernmental person are not an essential governmental function under section 141(c)(2). The issue also meets the private business tests of section 141(b).

[T.D. 8712, 62 FR 2296, Jan. 16, 1997, as amended by T.D. 9085, 68 FR 45775, Aug. 4, 2003]

§ 1.141–6 Allocation and accounting rules.

(a) *Allocation of proceeds to expenditures.* For purposes of §§ 1.141–1 through 1.141–15, the provisions of § 1.148–6(d) apply for purposes of allocating proceeds to expenditures. Thus, allocations generally may be made using any reasonable, consistently applied accounting method, and allocations under section 141 and section 148 must be consistent with each other.

(b) *Allocation of proceeds to property.* [Reserved]

(c) *Special rules for mixed use facilities.* [Reserved]

(d) *Allocation of proceeds to common areas.* [Reserved]

(e) *Allocation of proceeds to bonds.* [Reserved]

(f) *Treatment of partnerships.* [Reserved]

(g) *Examples.* [Reserved]

[T.D. 8712, 62 FR 2297, Jan. 16, 1997]

§ 1.141–7 Special rules for output facilities.

(a) *Overview.* This section provides special rules to determine whether arrangements for the purchase of output from an output facility cause an issue of bonds to meet the private business tests. For this purpose, unless otherwise stated, water facilities are treated as output facilities. Sections 1.141–3 and 1.141–4 generally apply to determine whether other types of arrangements for use of an output facility cause an issue to meet the private business tests.

(b) *Definitions.* For purposes of this section and § 1.141–8, the following definitions and rules apply:

(1) *Available output.* The available output of a facility financed by an issue is determined by multiplying the number of units produced or to be produced by the facility in one year by the number of years in the measurement period of that facility for that issue.

(i) *Generating facilities.* The number of units produced or to be produced by a generating facility in one year is determined by reference to its nameplate capacity or the equivalent (or where there is no nameplate capacity or the equivalent, its maximum capacity), which is not reduced for reserves, maintenance or other unutilized capacity.

(ii) *Transmission and other output facilities*—(A) *In general.* For transmission, distribution, cogeneration, and other output facilities, available output must be measured in a reasonable manner to reflect capacity.

(B) *Electric transmission facilities.* Measurement of the available output of all or a portion of electric transmission facilities may be determined in a manner consistent with the reporting rules and requirements for transmission networks promulgated by the Federal Energy Regulatory Commission (FERC). For example, for a transmission network, the use of aggregate load and load share ratios in a manner consistent with the requirements of the FERC may be reasonable. In addition, depending on the facts and circumstances, measurement of the available output of transmission facilities using thermal capacity or transfer capacity may be reasonable.

(iii) *Special rule for facilities with significant unutilized capacity.* If an issuer reasonably expects on the issue date that persons that are treated as private business users will purchase more than 30 percent of the actual output of the facility financed with the issue, the Commissioner may determine the number of units produced or to be produced by the facility in one year on a reasonable basis other than by reference to nameplate or other capacity, such as the average expected annual output of the facility. For example, the Commissioner may determine the available output of a financed peaking electric generating unit by reference to the reasonably expected annual output of that unit if the issuer reasonably expects, on the issue date of bonds that finance the unit, that an investor-owned utility will purchase more than 30 percent of the actual output of the facility during the measurement period under a take or pay contract, even if the amount of output purchased is less than 10 percent of the available output determined by reference to nameplate capacity. The reasonably expected annual output of the generating facility must be consistent with the capacity reported for prudent reliability purposes.

(iv) *Special rule for facilities with a limited source of supply.* If a limited source of supply constrains the output of an output facility, the number of units produced or to be produced by the facility must be determined by reasonably taking into account those constraints. For this purpose, a limited source of supply shall include a physical limitation (for example, flow of water), but not an economic limitation (for example, cost of coal or gas). For example, the available output of a hydroelectric unit must be determined by reference to the reasonably expected annual flow of water through the unit.

(2) *Measurement period.* The measurement period of an output facility financed by an issue is determined under §1.141–3(g).

(3) *Sale at wholesale.* A sale at wholesale means a sale of output to any person for resale.

(4) *Take contract and take or pay contract.* A *take contract* is an output contract under which a purchaser agrees to pay for the output under the contract if the output facility is capable of providing the output. A *take or pay contract* is an output contract under which a purchaser agrees to pay for the output under the contract, whether or not the output facility is capable of providing the output.

(5) *Requirements contract.* A *requirements contract* is an output contract, other than a take contract or a take or pay contract, under which a nongovernmental person agrees to purchase all or part of its output requirements.

(6) *Nonqualified amount.* The nonqualified amount with respect to an issue is determined under section 141(b)(8).

(c) *Output contracts*—(1) *General rule.* The purchase pursuant to a contract by a nongovernmental person of available output of an output facility (output contract) financed with proceeds of an issue is taken into account under the private business tests if the purchase has the effect of transferring the benefits of owning the facility and the burdens of paying the debt service on bonds used (directly or indirectly) to finance the facility (the benefits and burdens test). See paragraph (c)(4) of this section for the treatment of an output contract that is properly characterized as a lease for Federal income tax purposes. See paragraphs (d) and (e) of this section for rules regarding measuring the use of, and payments of debt service for, an output facility for determining whether the private business tests are met. See also §1.141–8 for rules for when an issue that finances an output facility (other than a water facility) meets the private business tests because the nonqualified amount of the issue exceeds $15 million.

(2) *Take contract or take or pay contract.* The benefits and burdens test is met if a nongovernmental person agrees pursuant to a take contract or a take or pay contract to purchase available output of a facility.

(3) *Requirements contract*—(i) *In general.* A requirements contract may satisfy the benefits and burdens test under paragraph (c)(3)(ii) or (iii) of this section. See §1.141–15(f)(2) for special effective dates for the application of this paragraph (c)(3) to issues financing facilities subject to requirements contracts.

(ii) *Requirements contract similar to take contract or take or pay contract.* A requirements contract generally meets the benefits and burdens test to the extent that it contains contractual terms that obligate the purchaser to make payments that are not contingent on the output requirements of the purchaser or that obligate the purchaser to have output requirements. For example, a requirements contract with an industrial purchaser meets the benefits and burdens test if the purchaser enters into additional contractual obligations with the issuer or another governmental unit not to cease operations. A requirements contract does not meet the benefits and burdens test, however, by reason of a provision that requires the purchaser to pay reasonable and customary damages (including liquidated damages) in the event of a default, or a provision that permits the purchaser to pay a specified amount to terminate the contract while the purchaser has requirements, in each case if the amount of the payment is reasonably related to the purchaser's obligation to buy requirements that is discharged by the payment.

(iii) *Wholesale requirements contract*—(A) *In general.* A requirements contract that is a sale at wholesale (a *wholesale requirements contract*) may satisfy the benefits and burdens test, depending on all the facts and circumstances.

(B) *Significant factors.* Significant factors that tend to establish that a wholesale requirements contract meets the benefits and burdens test include, but are not limited to—

(*1*) The term of the contract is substantial relative to the term of the issue or issues that finance the facility; and

(*2*) The amount of output to be purchased under the contract represents a substantial portion of the available output of the facility.

(C) *Safe harbors.* A wholesale requirements contract does not meet the benefits and burdens test if—

(*1*) The term of the contract, including all renewal options, does not exceed the lesser of 5 years or 30 percent of the term of the issue; or

(*2*) The amount of output to be purchased under the contract (and any other requirements contract with the same purchaser or a related party with respect to the facility) does not exceed 5 percent of the available output of the facility.

(iv) *Retail requirements contract.* Except as otherwise provided in this paragraph (c)(3), a requirements contract that is not a sale at wholesale does not meet the benefits and burdens test.

(4) *Output contract properly characterized as a lease.* Notwithstanding any other provision of this section, an output contract that is properly characterized as a lease for Federal income tax purposes shall be tested under the rules contained in §§1.141–3 and 1.141–4 to determine whether it is taken into account under the private business tests.

(d) *Measurement of private business use.* If an output contract results in private business use under this section, the amount of private business use generally is the amount of output purchased under the contract.

(e) *Measurement of private security or payment.* The measurement of payments made or to be made by nongovernmental persons under output contracts as a percent of the debt service of an issue is determined under the rules provided in §1.141–4.

(f) *Exceptions for certain contracts*—(1) *Small purchases of output.* An output contract for the use of a facility is not taken into account under the private business tests if the average annual payments to be made under the contract do not exceed 1 percent of the average annual debt service on all outstanding tax-exempt bonds issued to finance the facility, determined as of the effective date of the contract.

(2) *Swapping and pooling arrangements.* An agreement that provides for swapping or pooling of output by one or more governmental persons and one or more nongovernmental persons does not result in private business use of the output facility owned by the governmental person to the extent that—

(i) The swapped output is reasonably expected to be approximately equal in value (determined over periods of three years or less); and

(ii) The purpose of the agreement is to enable each of the parties to satisfy different peak load demands, to accommodate temporary outages, to diversify supply, or to enhance reliability in accordance with prudent reliability standards.

(3) *Short-term output contracts.* An output contract with a nongovernmental person is not taken into account under the private business tests if—

(i) The term of the contract, including all renewal options, is not longer than 3 years;

(ii) The contract either is a negotiated, arm's-length arrangement that provides for compensation at fair market value, or is based on generally applicable and uniformly applied rates; and

(iii) The output facility is not financed for a principal purpose of providing that facility for use by that nongovernmental person.

(4) *Certain conduit parties disregarded.* A nongovernmental person acting solely as a conduit for the exchange of output among governmentally owned and operated utilities is disregarded in determining whether the private business tests are met with respect to financed facilities owned by a governmental person.

(g) *Special rules for electric output facilities used to provide open access*—(1) *Operation of transmission facilities by nongovernmental persons*—(i) *In general.* The operation of an electric transmission facility by a nongovernmental person may result in private business use of the facility under §1.141–3 and this section based on all the facts and circumstances. For example, a transmission facility is generally used for a private business use if a nongovernmental person enters into a contract to operate the facility and receives compensation based, in whole or in part, on a share of net profits from the operation of the facility.

(ii) *Certain use by independent transmission operators.* A contract for the operation of an electric transmission facility by an independent entity, such as a regional transmission organization or an independent system operator (*independent transmission operator*), does not constitute private business use of the facility if—

(A) The facility is owned by a governmental person;

(B) The operation of the facility by the independent transmission operator is approved by the FERC under one or more provisions of the Federal Power Act (16 U.S.C. 791a through 825r) (or by a state authority under comparable provisions of state law);

(C) No portion of the compensation of the independent transmission operator is based on a share of net profits from the operation of the facility; and

(D) The independent transmission operator does not bear risk of loss of the facility.

(2) *Certain use by nongovernmental persons under output contracts*—(i) *Transmission facilities.* The use of an electric transmission facility by a nongovernmental person pursuant to an output contract does not constitute private business use of the facility if—

(A) The facility is owned by a governmental person;

(B) The facility is operated by an independent transmission operator in a manner that satisfies paragraph (g)(1)(ii) of this section; and

(C) The facility is not financed for a principal purpose of providing that facility for use by that nongovernmental person.

(ii) *Distribution facilities.* The use of an electric distribution facility by a nongovernmental person pursuant to an output contract does not constitute private business use of the facility if—

(A) The facility is owned by a governmental person;

(B) The facility is available for use on a nondiscriminatory, open access basis by buyers and sellers of electricity in accordance with rates that are generally applicable and uniformly applied within the meaning of §1.141–3(c)(2); and

(C) The facility is not financed for a principal purpose of providing that facility for use by that nongovernmental person (other than a retail end-user).

(3) *Ancillary services.* The use of an electric output facility to provide ancillary services required to be offered as part of an open access transmission tariff under rules promulgated by the FERC under the Federal Power Act (16 U.S.C. 791a through 825r) (or by a state regulatory authority under comparable provisions of state law) does not result in private business use.

(4) *Exceptions to deliberate action rules*—(i) *Mandated wheeling.* Entering into a contract for the use of electric transmission or distribution facilities is not treated as a deliberate action under § 1.141–2(d) if—

(A) The contract is entered into in response to (or in anticipation of) an order by the United States under sections 211 and 212 of the Federal Power Act (16 U.S.C. 824j and 824k) (or a state regulatory authority under comparable provisions of state law); and

(B) The terms of the contract are bona fide and arm's-length, and the consideration paid is consistent with the provisions of section 212(a) of the Federal Power Act.

(ii) *Actions taken to implement non-discriminatory, open access.* An action is not treated as a deliberate action under § 1.141–2(d) if it is taken to implement the offering of non-discriminatory, open access tariffs for the use of electric transmission or distribution facilities in a manner consistent with rules promulgated by the FERC under sections 205 and 206 of the Federal Power Act (16 U.S.C. 824d and 824e) (or comparable provisions of state law). This paragraph (g)(4)(ii) does not apply, however, to the sale, exchange, or other disposition (within the meaning of section 1001(a)) of transmission or distribution facilities to a nongovernmental person.

(iii) *Application of reasonable expectations test to certain current refunding bonds.* An action taken or to be taken with respect to electric transmission or distribution facilities refinanced by an issue is not taken into account under the reasonable expectations test of § 1.141–2(d) if—

(A) The action is described in paragraph (g)(4)(i) or (ii) of this section;

(B) The bonds of the issue are current refunding bonds that refund bonds originally issued before February 23, 1998; and

(C) The weighted average maturity of the refunding bonds is not greater than the remaining weighted average maturity of the prior bonds.

(5) *Additional transactions as permitted by the Commissioner.* The Commissioner may, by published guidance, set forth additional circumstances in which the use of electric output facilities in a restructured electric industry does not constitute private business use.

(h) *Allocations of output facilities and systems*—(1) *Facts and circumstances analysis.* Whether output sold under an output contract is allocated to a particular facility (for example, a generating unit), to the entire system of the seller of that output (net of any uses of that system output allocated to a particular facility), or to a portion of a facility is based on all the facts and circumstances. Significant factors to be considered in determining the allocation of an output contract to financed property are the following:

(i) The extent to which it is physically possible to deliver output to or from a particular facility or system.

(ii) The terms of a contract relating to the delivery of output (such as delivery limitations and options or obligations to deliver power from additional sources).

(iii) Whether a contract is entered into as part of a common plan of financing for a facility.

(iv) The method of pricing output under the contract, such as the use of market rates rather than rates designed to pay debt service of tax-exempt bonds used to finance a particular facility.

(2) *Illustrations.* The following illustrate the factors set forth in paragraph (h)(1) of this section:

(i) *Physical possibility.* Output from a generating unit that is fed directly into a low voltage distribution system of the owner of that unit and that cannot physically leave that distribution system generally must be allocated to those receiving electricity through that distribution system. Output may be allocated without regard to physical limitations, however, if exchange or similar agreements provide output to a purchaser where, but for the exchange agreements, it would not be possible for the seller to provide output to that purchaser.

(ii) *Contract terms relating to performance.* A contract to provide a specified amount of electricity from a system, but only when at least that amount of electricity is being generated by a particular unit, is allocated to that unit. For example, a contract to buy 20 MW of system power with a right to take up to 40 percent of the actual output of a specific 50 MW facility whenever total system output is insufficient to meet all of the seller's obligations generally is allocated to the specific facility rather than to the system.

(iii) *Common plan of financing.* A contract entered into as part of a common plan of financing for a facility generally is allocated to the facility if debt service for the issue of bonds is reasonably expected to be paid, directly or indirectly, from payments under the contract.

(iv) *Pricing method.* Pricing based on the capital and generating costs of a particular turbine tends to indicate that output under the contract is properly allocated to that turbine.

(3) *Transmission and distribution contracts.* Whether use under an output contract for transmission or distribution is allocated to a particular facility or to a transmission or distribution network is based on all the facts and circumstances, in a manner similar to paragraphs (h)(1) and (2) of this section. In general, the method used to determine payments under a contract is a more significant contract term for this purpose than nominal contract path. In general, if reasonable and consistently applied, the determination of use of transmission or distribution facilities under an output contract may be based on a method used by third parties, such as reliability councils.

(4) *Allocation of payments.* Payments for output provided by an output facility financed with two or more sources of funding are generally allocated under the rules in §1.141–4(c).

(i) *Examples.* The following examples illustrate the application of this section:

Example 1. Joint ownership. Z, an investor-owned electric utility, and City H agree to construct an electric generating facility of a size sufficient to take advantage of the economies of scale. H will issue $50 million of its 24-year bonds, and Z will use $100 million of its funds for construction of a facility they will jointly own as tenants in common. Each of the participants will share in the ownership, output, and operating expenses of the facility in proportion to its contribution to the cost of the facility, that is, one-third by H and two-thirds by Z. H's bonds will be secured by H's ownership interest in the facility and by revenues to be derived from its share of the annual output of the facility. H will need only 50 percent of its share of the annual output of the facility during the first 20 years of operations. It agrees to sell 10 percent of its share of the annual output to Z for a period of 20 years pursuant to a contract under which Z agrees to take that power if available. The facility will begin operation, and Z will begin to receive power, 4 years after the H bonds are issued. The measurement period for the property financed by the issue is 20 years. H also will sell the remaining 40 percent of its share of the annual output to numerous other private utilities under contracts of three years or less that satisfy the exception under paragraph (f)(3) of this section. No other contracts will be executed obligating any person to purchase any specified amount of the power for any specified period of time. No person (other than Z) will make payments that will result in a transfer of the burdens of paying debt service on bonds used directly or indirectly to provide H's share of the facilities. The bonds are not private activity bonds, because H's one-third interest in the facility is not treated as used by the other owners of the facility. Although 10 percent of H's share of the annual output of the facility will be used in the trade or business of Z, a nongovernmental person, under this section, that portion constitutes not more than 10 percent of the available output of H's ownership interest in the facility.

Example 2. Wholesale requirements contract. (i) City J issues 20-year bonds to acquire an electric generating facility having a reasonably expected economic life substantially greater than 20 years and a nameplate capacity of 100 MW. The available output of the facility under paragraph (b)(1) of this section is approximately 17,520,000 MWh (100 MW × 24 hours × 365 days × 20 years). On the issue date, J enters into a contract with T, an investor-owned utility, to provide T with all of its power requirements for a period of 10 years, commencing on the issue date. J reasonably expects that T will actually purchase an average of 30 MW over the 10-year period. The contract is taken into account under the private business tests pursuant to paragraph (c)(3) of this section because the term of the contract is substantial relative to the term of the issue and the amount of output to be purchased is a substantial portion of the available output.

(ii) Under paragraph (d) of this section, the amount of reasonably expected private business use under this contract is approximately 15 percent (30 MW × 24 hours × 365 days × 10 years, or 2,628,000 MWh) of the available output. Accordingly, the issue meets the private business use test. J reasonably expects that the amount to be paid for an average of 30 MW of power (less the operation and maintenance costs directly attributable to generating that 30 MW of power), will be more than 10 percent of debt service on the issue on a present-value basis. Accordingly, the issue meets the private security or payment test because J reasonably expects that payment of more than 10 percent of the debt service will be indirectly derived from payments by T. The bonds are private activity bonds under paragraph (c) of this section. Further, if 15 percent of the sale proceeds of the issue is greater than $15 million and the issue meets the private security or payment test with respect to the $15 million output limitation, the bonds are also private activity bonds under section 141(b)(4). See §1.141–8.

Example 3. Retail contracts. (i) State Agency M, a political subdivision, issues bonds in 2003 to finance the construction of a generating facility that will be used to furnish electricity to M's retail customers. In 2007, M enters into a 10-year contract with industrial corporation I. Under the contract, M agrees to supply I with all of its power requirements during the contract term, and I agrees to pay for that power at a negotiated price as it is delivered. The contract does not require I to pay for any power except to the extent I has requirements. In addition, the contract requires I to pay reasonable and customary liquidated damages in the event of a default by I, and permits I to terminate the contract while it has requirements by paying M a specified amount that is a reasonable and customary amount for terminating the contract. Any damages or termination payment by I will be reasonably related to I's obligation to buy requirements that is discharged by the payment. Under paragraph (c)(3) of this section, the contract does not meet the benefits and burdens test. Thus, it is not taken into account under the private business tests.

(ii) The facts are the same as in paragraph (i) of this *Example 3,* except that the contract requires I to make guaranteed minimum payments, regardless of I's requirements, in an amount such that the contract does not meet the exception for small purchases in paragraph (f)(1) of this section. Under paragraph (c)(3)(ii) of this section, the contract meets the benefits and burdens test because it obligates I to make payments that are not contingent on its output requirements. Thus, it is taken into account under the private business tests.

Example 4. Allocation of existing contracts to new facilities. Power Authority K, a political subdivision created by the legislature in State X to own and operate certain power generating facilities, sells all of the power from its existing facilities to four private utility systems under contracts executed in 1999, under which the four systems are required to take or pay for specified portions of the total power output until the year 2029. Existing facilities supply all of the present needs of the four utility systems, but their future power requirements are expected to increase substantially beyond the capacity of K's current generating system. K issues 20-year bonds in 2004 to construct a large generating facility. As part of the financing plan for the bonds, a fifth private utility system contracts with K to take or pay for 15 percent of the available output of the new facility. The balance of the output of the new facility will be available for sale as required, but initially it is not anticipated that there will be any need for that power. The revenues from the contract with the fifth private utility system will be sufficient to pay less than 10 percent of the debt service on the bonds (determined on a present value basis). The balance, which will exceed 10 percent of the debt service on the bonds, will be paid from revenues derived from the contracts with the four systems initially from sale of power produced by the old facilities. The output contracts with all the private utilities are allocated to K's entire generating system. See paragraphs (h)(1) and (2) of this section. Thus, the bonds meet the private business use test because more than 10 percent of the proceeds will be used in the trade or business of a nongovernmental person. In addition, the bonds meet the private security or payment test because payment of more than 10 percent of the debt service, pursuant to underlying arrangements, will be derived from payments in respect of property used for a private business use.

Example 5. Allocation to displaced resource. Municipal utility MU, a political subdivision, purchases all of the electricity required to meet the needs of its customers (1,000 MW) from B, an investor-owned utility that operates its own electric generating facilities, under a 50-year take or pay contract. MU does not anticipate that it will require additional electric resources, and any new resources would produce electricity at a higher cost to MU than its cost under its contract with B. Nevertheless, B encourages MU to construct a new generating plant sufficient to meet MU's requirements. MU issues obligations to construct facilities that will produce 1,000 MW of electricity. MU, B, and I, another investor-owned utility, enter into an agreement under which MU assigns to I its rights under MU's take or pay contract with B. Under this arrangement, I will pay MU, and MU will continue to pay B, for the 1,000 MW. I's payments to MU will at least equal the amounts required to pay debt service on MU's bonds. In addition, under paragraph (h)(1)(iii) of this section, the contract among MU, B, and I is entered into as part of a common plan of financing of the MU facilities. Under all the facts and circumstances, MU's assignment to I of its rights under the original take or pay contract is allocable to MU's new facilities under paragraph (h) of this section. Because I is a nongovernmental person, MU's bonds are private activity bonds.

Example 6. Operation of transmission facilities by regional transmission organization. (i) Public Power Agency D is a political subdivision that owns and operates electric generation, transmission and distribution facilities. In 2003, D transfers operating control of its transmission system to a regional transmission organization (RTO), a nongovernmental person, pursuant to an operating agreement that is approved by the FERC under sections 205 and 206 of the Federal Power Act. D retains ownership of its facilities. No portion of the RTO's compensation is based on a share of net profits from the operation of D's facilities, and the RTO does not bear any risk of loss of those facilities. Under paragraph (g)(1)(ii) of this section, the RTO's use of D's facilities does not constitute a private business use.

(ii) Company A is located in D's service territory. In 2004, Power Supplier E, a nongovernmental person, enters into a 10-year contract with A to supply A's electricity requirements. The electricity supplied by E to A will be transmitted over D's transmission and distribution facilities. D's distribution facilities are available for use on a nondiscriminatory, open access basis by buyers and sellers of electricity in accordance with rates that are generally applicable and uniformly applied within the meaning of §1.141–3(c)(2). D's facilities are not financed for a principal purpose of providing the facilities for use by E. Under paragraph (g)(2) of this section, the contract between A and E does not result in private business use of D's facilities.

Example 7. Certain actions not treated as deliberate actions. The facts are the same as in *Example 6* of this paragraph (i), except that the RTO's compensation is based on a share of net profits from operating D's facilities. In addition, D had issued bonds in 1994 to finance improvements to its transmission system. At the time D transfers operating control of its transmission system to the RTO, D chooses to apply the private activity bond regulations of §§1.141–1 through 1.141–15 to the 1994 bonds. The operation of D's facilities by the RTO results in private business use under §1.141–3 and paragraph (g)(1)(i) of this section. Under the special exception in paragraph (g)(4)(ii) of this section, however, the transfer of control is not treated as a deliberate action. Accordingly, the transfer of control does not cause the 1994 bonds to meet the private activity bond tests.

Example 8. Current refunding. The facts are the same as in *Example 7* of this paragraph (i), and in addition D issues bonds in 2004 to currently refund the 1994 bonds. The weighted average maturity of the 2004 bonds is not greater than the remaining weighted average maturity of the 1994 bonds. D chooses to apply the private activity bond regulations of §§1.141–1 through 1.141–15 to the refunding bonds. In general, reasonable expectations must be separately tested on the date that refunding bonds are issued under §1.141–2(d). Under the special exception in paragraph (g)(4)(iii) of this section, however, the transfer of the financed facilities to the RTO need not be taken into account in applying the reasonable expectations test to the refunding bonds.

[T.D. 9016, 67 FR 59759, Sept. 23, 2002; 67 FR 70845, Nov. 27, 2002]

§ 1.141–8 $15 million limitation for output facilities.

(a) *In general*—(1) *General rule.* Section 141(b)(4) provides a special private activity bond limitation (the $15 million output limitation) for issues 5 percent or more of the proceeds of which are to be used to finance output facilities (other than a facility for the furnishing of water). Under this rule, an issue consists of private activity bonds under the private business tests of section 141(b)(1) and (2) if the nonqualified amount with respect to output facilities financed by the proceeds of the issue exceeds $15 million. The $15 million output limitation applies in addition to the private business tests of section 141(b)(1) and (2). Under section 141(b)(4) and paragraph (a)(2) of this section, the $15 million output limitation is reduced in certain cases. Specifically, an issue meets the test in section 141(b)(4) if both of the following tests are met:

(i) More than $15 million of the proceeds of the issue to be used with respect to an output facility are to be used for a private business use. Investment proceeds are disregarded for this purpose if they are not allocated disproportionately to the private business use portion of the issue.

(ii) The payment of the principal of, or the interest on, more than $15 million of the sale proceeds of the portion of the issue used with respect to an output facility is (under the terms of the issue or any underlying arrangement) directly or indirectly—

(A) Secured by any interest in an output facility used or to be used for a private business use (or payments in respect of such an output facility); or

(B) To be derived from payments (whether or not to the issuer) in respect of an output facility used or to be used for a private business use.

(2) *Reduction in $15 million output limitation for outstanding issues*—(i) *General rule*. In determining whether an issue 5 percent or more of the proceeds of which are to be used with respect to an output facility consists of private activity bonds under the $15 million output limitation, the $15 million limitation on private business use and private security or payments is applied by taking into account the aggregate nonqualified amounts of any outstanding bonds of other issues 5 percent or more of the proceeds of which are or will be used with respect to that output facility or any other output facility that is part of the same project.

(ii) *Bonds taken into account*. For purposes of this paragraph (a)(2), in applying the $15 million output limitation to an issue (the later issue), a tax-exempt bond of another issue (the earlier issue) is taken into account if—

(A) That bond is outstanding on the issue date of the later issue;

(B) That bond will not be redeemed within 90 days of the issue date of the later issue in connection with the refunding of that bond by the later issue; and

(C) 5 percent or more of the sale proceeds of the earlier issue financed an output facility that is part of the same project as the output facility that is financed by 5 percent or more of the sale proceeds of the later issue.

(3) *Benefits and burdens test applicable*—(i) *In general*. In applying the $15 million output limitation, the benefits and burdens test of § 1.141–7 applies, except that ''$15 million'' is applied in place of ''10 percent'', or ''5 percent'' as appropriate.

(ii) *Earlier issues for the project*. If bonds of an earlier issue are outstanding and must be taken into account under paragraph (a)(2) of this section, the nonqualified amount for that earlier issue is multiplied by a fraction, the numerator of which is the adjusted issue price of the earlier issue as of the issue date of the later issue, and the denominator of which is the issue price of the earlier issue. Pre-issuance accrued interest as defined in § 1.148–1(b) is disregarded for this purpose.

(b) *Definition of project*—(1) *General rule*. For purposes of paragraph (a)(2) of this section, *project* has the meaning provided in this paragraph. Facilities that are functionally related and subordinate to a project are treated as part of that same project. Facilities having different purposes or serving different customer bases are not ordinarily part of the same project. For example, the following are generally not part of the same project—

(i) Generation, transmission and distribution facilities;

(ii) Separate facilities designed to serve wholesale customers and retail customers; and

(iii) A peaking unit and a baseload unit (regardless of the location of the units).

(2) *Separate ownership*. Except as otherwise provided in this paragraph (b)(2), facilities that are not owned by the same person are not part of the same project. If different governmental persons act in concert to finance a project, however (for example as participants in a joint powers authority), their interests are aggregated with respect to that project to determine whether the $15 million output limitation is met. In the case of undivided ownership interests in a single output facility, property that is not owned by different persons is treated as separate projects only if the separate interests are financed—

(i) With bonds of different issuers; and

(ii) Without a principal purpose of avoiding the limitation in this section.

(3) *Generating property*—(i) *Property on same site*. In the case of generation and related facilities, *project* means property located at the same site.

(ii) *Special rule for generating units*. Separate generating units are not part of the same project if one unit is reasonably expected, on the issue date of each issue that finances the units, to be placed in service more than 3 years before the other. Common facilities or property that will be functionally related to more than one generating unit must be allocated on a reasonable basis. If a generating unit already is constructed or is under construction (the first unit) and bonds are to be issued to finance an additional generating unit (the second unit), all costs for any common facilities paid or incurred before the earlier of the issue date of bonds to finance the second unit or the commencement of construction of the second unit are allocated to the first unit. At the time that bonds are issued to finance the second unit (or, if earlier, upon commencement of construction of that unit), any remaining costs of the common facilities may be allocated between the first and second units so that in the aggregate the allocation is reasonable.

(4) *Transmission and distribution.* In the case of transmission or distribution facilities, *project* means functionally related or contiguous property. Separate transmission or distribution facilities are not part of the same project if one facility is reasonably expected, on the issue date of each issue that finances the facilities, to be placed in service more than 2 years before the other.

(5) *Subsequent improvements*—(i) In general. An improvement to generation, transmission or distribution facilities that is not part of the original design of those facilities (the original project) is not part of the same project as the original project if the construction, reconstruction, or acquisition of that improvement commences more than 3 years after the original project was placed in service and the bonds issued to finance that improvement are issued more than 3 years after the original project was placed in service.

(ii) *Special rule for transmission and distribution facilities.* An improvement to transmission or distribution facilities that is not part of the original design of that property is not part of the same project as the original project if the issuer did not reasonably expect the need to make that improvement when it commenced construction of the original project and the construction, reconstruction, or acquisition of that improvement is mandated by the federal government or a state regulatory authority to accommodate requests for wheeling.

(6) *Replacement property.* For purposes of this section, property that replaces existing property of an output facility is treated as part of the same project as the replaced property unless—

(i) The need to replace the property was not reasonably expected on the issue date or the need to replace the property occurred more than 3 years before the issuer reasonably expected (determined on the issue date of the bonds financing the property) that it would need to replace the property; and

(ii) The bonds that finance (and refinance) the output facility have a weighted average maturity that is not greater than 120 percent of the reasonably expected economic life of the facility.

(c) *Example.* The application of the provisions of this section is illustrated by the following example:

Example. (i) Power Authority K, a political subdivision, intends to issue a single issue of tax-exempt bonds at par with a stated principal amount and sale proceeds of $500 million to finance the acquisition of an electric generating facility. No portion of the facility will be used for a private business use, except that L, an investor-owned utility, will purchase 10 percent of the output of the facility under a take contract and will pay 10 percent of the debt service on the bonds. The nonqualified amount with respect to the bonds is $50 million.

(ii) The maximum amount of tax-exempt bonds that may be issued for the acquisition of an interest in the facility in paragraph (i) of this *Example* is $465 million (that is, $450 million for the 90 percent of the facility that is governmentally owned and used plus a nonqualified amount of $15 million).

[T.D. 9016, 67 FR 59763, Sept. 23, 2002]

§ 1.141–9 Unrelated or disproportionate use test.

(a) *General rules*—(1) *Description of test.* Under section 141(b)(3) (the unrelated or disproportionate use test), an issue meets the private business tests if the amount of private business use and private security or payments attributable to unrelated or disproportionate private business use exceeds 5 percent of the proceeds of the issue. For this purpose, the private business use test is applied by taking into account only use that is not related to any government use of proceeds of the issue (unrelated use) and use that is related but disproportionate to any government use of those proceeds (disproportionate use).

(2) *Application of unrelated or disproportionate use test*—(i) *Order of application.* The unrelated or disproportionate use test is applied by first determining whether a private business use is related to a government use. Next, private business use that relates to a government use is examined to determine whether it is disproportionate to that government use.

(ii) *Aggregation of unrelated and disproportionate use.* All the unrelated use and disproportionate use financed with the proceeds of an issue are aggregated to determine compliance with the unrelated or disproportionate use test. The amount of permissible unrelated and disproportionate private business use is not reduced by the amount of private business use financed with the proceeds of an issue that is neither unrelated use nor disproportionate use.

(iii) *Deliberate actions.* A deliberate action that occurs after the issue date does not result in unrelated or disproportionate use if the issue meets the conditions of § 1.141–12(a).

(b) *Unrelated use*—(1) *In general.* Whether a private business use is related to a government use financed with the proceeds of an issue is determined on a case-by-case basis, emphasizing the operational relationship between the government use and the private business use. In general, a facility that is used for a related private business use must be located within, or adjacent to, the governmentally used facility.

(2) *Use for the same purpose as government use.* Use of a facility by a nongovernmental person for the same purpose as use by a governmental person is not treated as unrelated use if the government use is not insignificant. Similarly, a use of a facility in the same manner both for private business use that is related use and private business use that is unrelated use does not result in unrelated use if the related use is not insignificant. For example, a privately owned pharmacy in a governmentally owned hospital does not ordinarily result in unrelated use solely because the pharmacy also serves individuals not using the hospital. In addition, use of parking spaces in a garage by a nongovernmental person is not treated as unrelated use if more than an insignificant portion of the parking spaces are used for a government use (or a private business use that is related to a government use), even though the use by the nongovernmental person is not directly related to that other use.

(c) *Disproportionate use*—(1) *Definition of disproportionate use.* A private business use is disproportionate to a related government use only to the extent that the amount of proceeds used for that private business use exceeds the amount of proceeds used for the related government use. For example, a private use of $100 of proceeds that is related to a government use of $70 of proceeds results in $30 of disproportionate use.

(2) *Aggregation of related uses.* If two or more private business uses of the proceeds of an issue relate to a single government use of those proceeds, those private business uses are aggregated to apply the disproportionate use test.

(3) *Allocation rule.* If a private business use relates to more than a single use of the proceeds of the issue (for example, two or more government uses of the proceeds of the issue or a government use and a private use), the amount of any disproportionate use may be determined by—

(i) Reasonably allocating the proceeds used for the private business use among the related uses;

(ii) Aggregating government uses that are directly related to each other; or

(iii) Allocating the private business use to the government use to which it is primarily related.

(d) *Maximum use taken into account.* The determination of the amount of unrelated use or disproportionate use of a facility is based on the maximum amount of reasonably expected government use of a facility during the measurement period. Thus, no unrelated use or disproportionate use arises solely because a facility initially has excess capacity that is to be used by a nongovernmental person if the facility will be completely used by the issuer during the term of the issue for more than an insignificant period.

(e) *Examples*. The following examples illustrate the application of this section:

Example 1. School and remote cafeteria. County X issues bonds with proceeds of $20 million and uses $18.1 million of the proceeds for construction of a new school building and $1.9 million of the proceeds for construction of a privately operated cafeteria in its administrative office building, which is located at a remote site. The bonds are secured, in part, by the cafeteria. The $1.9 million of proceeds is unrelated to the government use (that is, school construction) financed with the bonds and exceeds 5 percent of $20 million. Thus, the issue meets the private business tests.

Example 2. Public safety building and courthouse. City Y issues bonds with proceeds of $50 million for construction of a new public safety building ($32 million) and for improvements to an existing courthouse ($15 million). Y uses $3 million of the bond proceeds for renovations to an existing privately operated cafeteria located in the courthouse. The bonds are secured, in part, by the cafeteria. Y's use of the $3 million for the privately operated cafeteria does not meet the unrelated or disproportionate use test because these expenditures are neither unrelated use nor disproportionate use.

Example 3. Unrelated garage. City Y issues bonds with proceeds of $50 million for construction of a new public safety building ($30.5 million) and for improvements to an existing courthouse ($15 million). Y uses $3 million of the bond proceeds for renovations to an existing privately operated cafeteria located in the courthouse. The bonds are secured, in part, by the cafeteria. Y also uses $1.5 million of the proceeds to construct a privately operated parking garage adjacent to a private office building. The private business use of the parking garage is unrelated to any government use of proceeds of the issue. Since the proceeds used for unrelated uses and disproportionate uses do not exceed 5 percent of the proceeds, the unrelated or disproportionate use test is not met.

Example 4. Disproportionate use of garage. County Z issues bonds with proceeds of $20 million for construction of a hospital with no private business use ($17 million); renovation of an office building with no private business use ($1 million); and construction of a garage that is entirely used for a private business use ($2 million). The use of the garage is related to the use of the office building but not to the use of the hospital. The private business use of the garage results in $1 million of disproportionate use because the proceeds used for the garage ($2 million) exceed the proceeds used for the related government use ($1 million). The bonds are not private activity bonds, however, because the disproportionate use does not exceed 5 percent of the proceeds of the issue.

Example 5. Bonds for multiple projects. (i) County W issues bonds with proceeds of $80 million for the following purposes: (1) $72 million to construct a County-owned and operated waste incinerator; (2) $1 million for a County-owned and operated facility for the temporary storage of hazardous waste prior to final disposal; (3) $1 million to construct a privately owned recycling facility located at a remote site; and (4) $6 million to build a garage adjacent to the County-owned incinerator that will be leased to Company T to store and repair trucks that it owns and uses to haul County W refuse. Company T uses 75 percent of its trucks to haul materials to the incinerator and the remaining 25 percent of its trucks to haul materials to the temporary storage facility.

(ii) The $1 million of proceeds used for the recycling facility is used for an unrelated use. The garage is related use. In addition, 75 percent of the use of the $6 million of proceeds used for the garage is allocable to the government use of proceeds at the incinerator. The remaining 25 percent of the proceeds used for the garage ($1.5 million) relates to the government use of proceeds at the temporary storage facility. Thus, this portion of the proceeds used for the garage exceeds the proceeds used for the temporary storage facility by $0.5 million and this excess is disproportionate use (but not unrelated use). Thus, the aggregate amount of unrelated use and disproportionate use financed with the proceeds of the issue is $1.5 million. Alternatively, under paragraph (c)(3)(iii) of this section, the entire garage may be treated as related to the government use of the incinerator and, under that allocation, the garage is not disproportionate use. In either event, section 141(b)(3) limits the aggregate unrelated use and disproportionate use to $4 million. Therefore, the bonds are not private activity bonds under this section.

[T.D. 8712, 62 FR 2297, Jan. 16, 1997]

§ 1.141–10 Coordination with volume cap. [Reserved]

§ 1.141–11 Acquisition of nongovernmental output property. [Reserved]

§ 1.141–12 Remedial actions.

(a) *Conditions to taking remedial action*. An action that causes an issue to meet the private business tests or the private loan financing test is not treated as a deliberate action if the issuer takes a remedial action described in paragraph (d), (e), or (f) of this section with respect to the nonqualified bonds and if all of the requirements in paragraphs (a) (1) through (5) of this section are met.

(1) *Reasonable expectations test met.* The issuer reasonably expected on the issue date that the issue would meet neither the private business tests nor the private loan financing test for the entire term of the bonds. For this purpose, if the issuer reasonably expected on the issue date to take a deliberate action prior to the final maturity date of the issue that would cause either the private business tests or the private loan financing test to be met, the term of the bonds for this purpose may be determined by taking into account a redemption provision if the provisions of §1.141–2(d)(2)(ii) (A) through (C) are met.

(2) *Maturity not unreasonably long.* The term of the issue must not be longer than is reasonably necessary for the governmental purposes of the issue (within the meaning of §1.148–1(c)(4)). Thus, this requirement is met if the weighted average maturity of the bonds of the issue is not greater than 120 percent of the average reasonably expected economic life of the property financed with the proceeds of the issue as of the issue date.

(3) *Fair market value consideration.* Except as provided in paragraph (f) of this section, the terms of any arrangement that results in satisfaction of either the private business tests or the private loan financing test are bona fide and arm's-length, and the new user pays fair market value for the use of the financed property. Thus, for example, fair market value may be determined in a manner that takes into account restrictions on the use of the financed property that serve a bona fide governmental purpose.

(4) *Disposition proceeds treated as gross proceeds for arbitrage purposes.* The issuer must treat any disposition proceeds as gross proceeds for purposes of section 148. For purposes of eligibility for temporary periods under section 148(c) and exemptions from the requirement of section 148(f) the issuer may treat the date of receipt of the disposition proceeds as the issue date of the bonds and disregard the receipt of disposition proceeds for exemptions based on expenditure of proceeds under §1.148–7 that were met before the receipt of the disposition proceeds.

(5) *Proceeds expended on a governmental purpose.* Except for a remedial action under paragraph (d) of this section, the proceeds of the issue that are affected by the deliberate action must have been expended on a governmental purpose before the date of the deliberate action.

(b) *Effect of a remedial action*—(1) *In general.* The effect of a remedial action is to cure use of proceeds that causes the private business use test or the private loan financing test to be met. A remedial action does not affect application of the private security or payment test.

(2) *Effect on bonds that have been advance refunded.* If proceeds of an issue were used to advance refund another bond, a remedial action taken with respect to the refunding bond proportionately reduces the amount of proceeds of the advance refunded bond that is taken into account under the private business use test or the private loan financing test.

(c) *Disposition proceeds*—(1) *Definition. Disposition proceeds* are any amounts (including property, such as an agreement to provide services) derived from the sale, exchange, or other disposition (disposition) of property (other than investments) financed with the proceeds of an issue.

(2) *Allocating disposition proceeds to an issue.* In general, if the requirements of paragraph (a) of this section are met, after the date of the disposition, the proceeds of the issue allocable to the transferred property are treated as financing the disposition proceeds rather than the transferred property. If a disposition is made pursuant to an installment sale, the proceeds of the issue continue to be allocated to the transferred property. If an issue does not meet the requirements for remedial action in paragraph (a) of this section or the issuer does not take an appropriate remedial action, the proceeds of the issue are allocable to either the transferred property or the disposition proceeds, whichever allocation produces the greater amount of private business use and private security or payments.

(3) *Allocating disposition proceeds to different sources of funding.* If property

has been financed by different sources of funding, for purposes of this section, the disposition proceeds from that property are first allocated to the outstanding bonds that financed that property in proportion to the principal amounts of those outstanding bonds. In no event may disposition proceeds be allocated to bonds that are no longer outstanding or to a source of funding not derived from a borrowing (such as revenues of the issuer) if the disposition proceeds are not greater than the total principal amounts of the outstanding bonds that are allocable to that property. For purposes of this paragraph (c)(3), principal amount has the same meaning as in § 1.148–9(b)(2) and outstanding bonds do not include advance refunded bonds.

(d) *Redemption or defeasance of nonqualified bonds*—(1) *In general.* The requirements of this paragraph (d) are met if all of the nonqualified bonds of the issue are redeemed. Proceeds of tax-exempt bonds must not be used for this purpose, unless the tax-exempt bonds are qualified bonds, taking into account the purchaser's use of the facility. If the bonds are not redeemed within 90 days of the date of the deliberate action, a defeasance escrow must be established for those bonds within 90 days of the deliberate action.

(2) *Special rule for dispositions for cash.* If the consideration for the disposition of financed property is exclusively cash, the requirements of this paragraph (d) are met if the disposition proceeds are used to redeem a pro rata portion of the nonqualified bonds at the earliest call date after the deliberate action. If the bonds are not redeemed within 90 days of the date of the deliberate action, the disposition proceeds must be used to establish a defeasance escrow for those bonds within 90 days of the deliberate action.

(3) *Notice of defeasance.* The issuer must provide written notice to the Commissioner of the establishment of the defeasance escrow within 90 days of the date the defeasance escrow is established.

(4) *Special limitation.* The establishment of a defeasance escrow does not satisfy the requirements of this paragraph (d) if the period between the issue date and the first call date of the bonds is more than 10½ years.

(5) *Defeasance escrow defined.* A defeasance escrow is an irrevocable escrow established to redeem bonds on their earliest call date in an amount that, together with investment earnings, is sufficient to pay all the principal of, and interest and call premium on, bonds from the date the escrow is established to the earliest call date. The escrow may not be invested in higher yielding investments or in any investment under which the obligor is a user of the proceeds of the bonds.

(e) *Alternative use of disposition proceeds*—(1) *In general.* The requirements of this paragraph (e) are met if—

(i) The deliberate action is a disposition for which the consideration is exclusively cash;

(ii) The issuer reasonably expects to expend the disposition proceeds within two years of the date of the deliberate action;

(iii) The disposition proceeds are treated as proceeds for purposes of section 141 and are used in a manner that does not cause the issue to meet either the private business tests or the private loan financing test, and the issuer does not take any action subsequent to the date of the deliberate action to cause either of these tests to be met; and

(iv) If the issuer does not use all of the disposition proceeds for an alternative use described in paragraph (e)(1)(iii) of this section, the issuer uses those remaining disposition proceeds for a remedial action that meets paragraph (d) of this section.

(2) *Special rule for use by 501(c)(3) organizations.* If the disposition proceeds are to be used by a 501(c)(3) organization, the nonqualified bonds must in addition be treated as reissued for purposes of sections 141, 145, 147, 149, and 150 and, under this treatment, satisfy all of the applicable requirements for qualified 501(c)(3) bonds. Thus, beginning on the date of the deliberate action, nonqualified bonds that satisfy these requirements must be treated as qualified 501(c)(3) bonds for all purposes, including sections 145(b) and 150(b).

(f) *Alternative use of facility.* The requirements of this paragraph (f) are met if—

(1) The facility with respect to which the deliberate action occurs is used in an alternative manner (for example, used for a qualifying purpose by a nongovernmental person or used by a 501(c)(3) organization rather than a governmental person);

(2) The nonqualified bonds are treated as reissued, as of the date of the deliberate action, for purposes of sections 55 through 59 and 141, 142, 144, 145, 146, 147, 149 and 150, and under this treatment, the nonqualified bonds satisfy all the applicable requirements for qualified bonds throughout the remaining term of the nonqualified bonds;

(3) The deliberate action does not involve a disposition to a purchaser that finances the acquisition with proceeds of another issue of tax-exempt bonds; and

(4) Any disposition proceeds other than those arising from an agreement to provide services (including disposition proceeds from an installment sale) resulting from the deliberate action are used to pay the debt service on the bonds on the next available payment date or, within 90 days of receipt, are deposited into an escrow that is restricted to the yield on the bonds to pay the debt service on the bonds on the next available payment date.

(g) *Rules for deemed reissuance.* For purposes of determining whether bonds that are treated as reissued under paragraphs (e) and (f) of this section are qualified bonds—

(1) The provisions of the Code and regulations thereunder in effect as of the date of the deliberate action apply; and

(2) For purposes of paragraph (f) of this section, section 147(d) (relating to the acquisition of existing property) does not apply.

(h) *Authority of Commissioner to provide for additional remedial actions.* The Commissioner may, by publication in the FEDERAL REGISTER or the Internal Revenue Bulletin, provide additional remedial actions, including making a remedial payment to the United States, under which a subsequent action will not be treated as a deliberate action for purposes of §1.141–2.

(i) *Effect of remedial action on continuing compliance.* Solely for purposes of determining whether deliberate actions that are taken after a remedial action cause an issue to meet the private business tests or the private loan financing test—

(1) If a remedial action is taken under paragraph (d), (e), or (f) of this section, the private business use or private loans resulting from the deliberate action are not taken into account for purposes of determining whether the bonds are private activity bonds; and

(2) After a remedial action is taken, the amount of disposition proceeds is treated as equal to the proceeds of the issue that had been allocable to the transferred property immediately prior to the disposition. See paragraph (k) of this section, *Example 5*.

(j) *Nonqualified bonds*—(1) *Amount of nonqualified bonds.* The percentage of outstanding bonds that are nonqualified bonds equals the highest percentage of private business use in any 1-year period commencing with the deliberate action.

(2) *Allocation of nonqualified bonds.* Allocations to nonqualified bonds must be made on a pro rata basis, except that, for purposes of paragraph (d) of this section (relating to redemption or defeasance), an issuer may treat bonds with longer maturities (determined on a bond-by-bond basis) as the nonqualified bonds.

(k) *Examples.* The following examples illustrate the application of this section:

Example 1. Disposition proceeds less than outstanding bonds used to retire bonds. On June 1, 1997, City C issues 30-year bonds with an issue price of $10 million to finance the construction of a hospital building. The bonds have a weighted average maturity that does not exceed 120 percent of the reasonably expected economic life of the building. On the issue date, C reasonably expects that it will be the only user of the building for the entire term of the bonds. Six years after the issue date, C sells the building to Corporation P for $5 million. The sale price is the fair market value of the building, as verified by an independent appraiser. C uses all of the $5 million disposition proceeds to immediately retire a pro rata portion of the bonds. The sale does not cause the bonds to be private activity bonds because C has taken a remedial action described in paragraph (d) of this section so that P is not treated as a private business user of bond proceeds.

Example 2. Lease to nongovernmental person. The facts are the same as in *Example 1*, except that instead of selling the building, C, 6 years after the issue date, leases the building to P for 7 years and uses other funds to redeem all of the $10 million outstanding bonds within 90 days of the deliberate act. The bonds are not treated as private activity bonds because C has taken the remedial action described in paragraph (d) of this section.

Example 3. Sale for less than fair market value. The facts are the same as in *Example 1*, except that the fair market value of the building at the time of the sale to P is $6 million. Because the transfer was for less than fair market value, the bonds are ineligible for the remedial actions under this section. The bonds are private activity bonds because P is treated as a user of all of the proceeds and P makes a payment ($6 million) for this use that is greater than 10 percent of the debt service on the bonds, on a present value basis.

Example 4. Fair market value determined taking into account governmental restrictions. The facts are the same as in *Example 1*, except that the building was used by C only for hospital purposes and C determines to sell the building subject to a restriction that it be used only for hospital purposes. After conducting a public bidding procedure as required by state law, the best price that C is able to obtain for the building subject to this restriction is $4.5 million from P. C uses all of the $4.5 million disposition proceeds to immediately retire a pro rata portion of the bonds. The sale does not cause the bonds to be private activity bonds because C has taken a remedial action described in paragraph (d) of this section so that P is not treated as a private business user of bond proceeds.

Example 5. Alternative use of disposition proceeds. The facts are the same as in *Example 1*, except that C reasonably expects on the date of the deliberate action to use the $5 million disposition proceeds for another governmental purpose (construction of governmentally owned roads) within two years of receipt, rather than using the $5 million to redeem outstanding bonds. C treats these disposition proceeds as gross proceeds for purposes of section 148. The bonds are not private activity bonds because C has taken a remedial action described in paragraph (e) of this section. After the date of the deliberate action, the proceeds of all of the outstanding bonds are treated as used for the construction of the roads, even though only $5 million of disposition proceeds was actually used for the roads.

Example 6. Alternative use of financed property. The facts are the same as in *Example 1*, except that C determines to lease the hospital building to Q, an organization described in section 501(c)(3), for a term of 10 years rather than to sell the building to P. In order to induce Q to provide hospital services, C agrees to lease payments that are less than fair market value. Before entering into the lease, an applicable elected representative of C approves the lease after a noticed public hearing. As of the date of the deliberate action, the issue meets all the requirements for qualified 501(c)(3) bonds, treating the bonds as reissued on that date. For example, the issue meets the two percent restriction on use of proceeds of finance issuance costs of section 147(g) because the issue pays no costs of issuance from disposition proceeds in connection with the deemed reissuance. C and Q treat the bonds as qualified 501(c)(3) bonds for all purposes commencing with the date of the deliberate action. The bonds are treated as qualified 501(c)(3) bonds commencing with the date of the deliberate action.

Example 7. Deliberate action before proceeds are expended on a governmental purpose. County J issues bonds with proceeds of $10 million that can be used only to finance a correctional facility. On the issue date of the bonds, J reasonably expects that it will be the sole user of the bonds for the useful life of the facility. The bonds have a weighted average maturity that does not exceed 120 percent of the reasonably expected economic life of the facility. After the issue date of the bonds, but before the facility is placed in service, J enters into a contract with the federal government pursuant to which the federal government will make a fair market value, lump sum payment equal to 25 percent of the cost of the facility. In exchange for this payment, J provides the federal government with priority rights to use of 25 percent of the facility. J uses the payment received from the federal government to defease the nonqualified bonds. The agreement does not cause the bonds to be private activity bonds because J has taken a remedial action described in paragraph (d) of this section. See paragraph (a)(5) of this section.

Example 8. Compliance after remedial action. In 1997, City G issues bonds with proceeds of $10 million to finance a courthouse. The bonds have a weighted average maturity that does not exceed 120 percent of the reasonably expected economic life of the courthouse. G uses $1 million of the proceeds for a private business use and more than 10 percent of the debt service on the issue is secured by private security or payments. G later sells one-half of the courthouse property to a nongovernmental person for cash. G immediately redeems 60 percent of the outstanding bonds. This percentage of outstanding bonds is based on the highest private business use of the courthouse in any 1-year period commencing with the deliberate action. For purposes of subsequently applying section 141 to the issue, G may continue to use all of the proceeds of the outstanding bonds in the same manner (that is, for both the courthouse and the existing private business use) without causing the issue to meet the private business use test. The issue, however, continues to meet the private security or payment test. The result would be the same if D, instead of redeeming the bonds, established a defeasance escrow for those bonds, provided that the requirement of paragraph (d)(4) of this section was met.

[T.D. 8712, 62 FR 2298, Jan. 16, 1997]

§ 1.141–13 Refunding issues.

(a) *In general*. Except as provided in this section, a refunding issue and a prior issue are tested separately under section 141. Thus, the determination of whether a refunding issue consists of private activity bonds generally does not depend on whether the prior issue consists of private activity bonds.

(b) *Application of private business use test and private loan financing test*—(1) *Allocation of proceeds*. In applying the private business use test and the private loan financing test to a refunding issue, the proceeds of the refunding issue are allocated to the same expenditures and purpose investments as the proceeds of the prior issue.

(2) *Determination of amount of private business use*—(i) *In general*. Except as provided in paragraph (b)(2)(ii) of this section, the amount of private business use of a refunding issue is determined under §1.141–3(g), based on the measurement period for that issue (for example, without regard to any private business use that occurred prior to the issue date of the refunding issue).

(ii) *Refundings of governmental bonds*. In applying the private business use test to a refunding issue that refunds a prior issue of governmental bonds, the amount of private business use of the refunding issue is the amount of private business use—

(A) During the combined measurement period; or

(B) At the option of the issuer, during the period described in paragraph (b)(2)(i) of this section, but only if, without regard to the reasonable expectations test of §1.141–2(d), the prior issue does not satisfy the private business use test, based on a measurement period that begins on the first day of the combined measurement period and ends on the issue date of the refunding issue.

(iii) *Combined measurement period*—(A) *In general*. Except as provided in paragraph (b)(2)(iii)(B) of this section, the *combined measurement period* is the period that begins on the first day of the measurement period (as defined in §1.141–3(g)) for the prior issue (or, in the case of a series of refundings of governmental bonds, the first issue of governmental bonds in the series) and ends on the last day of the measurement period for the refunding issue.

(B) *Transition rule for refundings of bonds originally issued before May 16, 1997*. If the prior issue (or, in the case of a series of refundings of governmental bonds, the first issue of governmental bonds in the series) was issued before May 16, 1997, then the issuer, at its option, may treat the combined measurement period as beginning on the date (the transition date) that is the earlier of December 19, 2005 or the first date on which the prior issue (or an earlier issue in the case of a series of refundings of governmental bonds) became subject to the 1997 regulations (as defined in §1.141–15(b)). If the issuer treats the combined measurement period as beginning on the transition date in accordance with this paragraph (b)(2)(iii)(B), then paragraph (c)(2) of this section shall be applied by treating the transition date as the issue date of the earliest issue, by treating the bonds as reissued on the transition date at an issue price equal to the value of the bonds (as determined under §1.148–4(e)) on that date, and by disregarding any private security or private payments before the transition date.

(iv) *Governmental bond*. For purposes of this section, the term *governmental bond* means any bond that, when issued, purported to be a governmental bond, as defined in §1.150–1(b), or a qualified 501(c)(3) bond, as defined in section 145(a).

(v) *Special rule for refundings of qualified 501(c)(3) bonds with governmental bonds*. For purposes of applying this paragraph (b)(2) to a refunding issue that refunds a qualified 501(c)(3) bond, any use of the property refinanced by the refunding issue before the issue date of the refunding issue by a

501(c)(3) organization with respect to its activities that do not constitute an unrelated trade or business under section 513(a) is treated as government use.

(c) *Application of private security or payment test—(1) Separate issue treatment.* If the amount of private business use of a refunding issue is determined based on the measurement period for that issue in accordance with paragraph (b)(2)(i) or (b)(2)(ii)(B) of this section, then the amount of private security and private payments allocable to the refunding issue is determined under §1.141–4 by treating the refunding issue as a separate issue.

(2) *Combined issue treatment.* If the amount of private business use of a refunding issue is determined based on the combined measurement period for that issue in accordance with paragraph (b)(2)(ii)(A) of this section, then the amount of private security and private payments allocable to the refunding issue is determined under §1.141–4 by treating the refunding issue and all earlier issues taken into account in determining the combined measurement period as a combined issue. For this purpose, the present value of the private security and private payments is compared to the present value of the debt service on the combined issue (other than debt service paid with proceeds of any refunding bond). Present values are computed as of the issue date of the earliest issue taken into account in determining the combined measurement period (the earliest issue). Except as provided in paragraph (c)(3) of this section, present values are determined by using the yield on the combined issue as the discount rate. The yield on the combined issue is determined by taking into account payments on the refunding issue and all earlier issues taken into account in determining the combined measurement period (other than payments made with proceeds of any refunding bond), and based on the issue price of the earliest issue. In the case of a refunding of only a portion of the original principal amount of a prior issue, the refunded portion of the prior issue is treated as a separate issue and any private security or private payments with respect to the prior issue are allocated ratably between the combined issue and the unrefunded portion of the prior issue in a consistent manner based on relative debt service. See paragraph (b)(2)(iii)(B) of this section for special rules relating to certain refundings of governmental bonds originally issued before May 16, 1997.

(3) *Special rule for arrangements not entered into in contemplation of the refunding issue.* In applying the private security or payment test to a refunding issue that refunds a prior issue of governmental bonds, the issuer may use the yield on the prior issue to determine the present value of private security and private payments under arrangements that were not entered into in contemplation of the refunding issue. For this purpose, any arrangement that was entered into more than 1 year before the issue date of the refunding issue is treated as not entered into in contemplation of the refunding issue.

(d) *Multipurpose issue allocations*—(1) *In general.* For purposes of section 141, unless the context clearly requires otherwise, §1.148–9(h) applies to allocations of multipurpose issues (as defined in §1.148–1(b)), including allocations involving the refunding purposes of the issue. An allocation under this paragraph (d) may be made at any time, but once made may not be changed. An allocation is not reasonable under this paragraph (d) if it achieves more favorable results under section 141 than could be achieved with actual separate issues. The issue to be allocated and each of the separate issues under the allocation must consist of one or more tax-exempt bonds. Allocations made under this paragraph (d) and §1.148–9(h) must be consistent for purposes of section 141 and section 148.

(2) *Exceptions.* This paragraph (d) does not apply for purposes of sections 141(c)(1) and 141(d)(1).

(e) *Application of reasonable expectations test to certain refunding bonds.* An action that would otherwise cause a refunding issue to satisfy the private business tests or the private loan financing test is not taken into account under the reasonable expectations test of §1.141–2(d) if—

(1) The action is not a deliberate action within the meaning of §1.141–2(d)(3); and

(2) The weighted average maturity of the refunding bonds is not greater than the weighted average reasonably expected economic life of the property financed by the prior bonds.

(f) *Special rule for refundings of certain general obligation bonds.* Notwithstanding any other provision of this section, a refunding issue does not consist of private activity bonds if—

(1) The prior issue meets the requirements of §1.141–2(d)(5) (relating to certain general obligation bond programs that finance a large number of separate purposes); or

(2) The refunded portion of the prior issue is part of a series of refundings of all or a portion of an issue that meets the requirements of §1.141–2(d)(5).

(g) *Examples.* The following examples illustrate the application of this section:

Example 1. Measuring private business use. In 2002, Authority A issues tax-exempt bonds that mature in 2032 to acquire an office building. The measurement period for the 2002 bonds under §1.141–3(g) is 30 years. At the time A acquires the building, it enters into a 10-year lease with a nongovernmental person under which the nongovernmental person will use 5 percent of the building in its trade or business during each year of the lease term. In 2007, A issues bonds to refund the 2002 bonds. The 2007 bonds mature on the same date as the 2002 bonds and have a measurement period of 25 years under §1.141–3(g). Under paragraph (b)(2)(ii)(A) of this section, the amount of private business use of the proceeds of the 2007 bonds is 1.67 percent, which equals the amount of private business use during the combined measurement period (5 percent of ⅓ of the 30-year combined measurement period). In addition, the 2002 bonds do not satisfy the private business use test, based on a measurement period beginning on the first day of the measurement period for the 2002 bonds and ending on the issue date of the 2007 bonds, because only 5 percent of the proceeds of the 2002 bonds are used for a private business use during that period. Thus, under paragraph (b)(2)(ii)(B) of this section, A may treat the amount of private business use of the 2007 bonds as 1 percent (5 percent of ⅕ of the 25-year measurement period for the 2007 bonds). The 2007 bonds do not satisfy the private business use test.

Example 2. Combined issue yield computation. (i) On January 1, 2000, County B issues 20-year bonds to finance the acquisition of a municipal auditorium. The 2000 bonds have a yield of 7.7500 percent, compounded annually, and an issue price and par amount of $100 million. The debt service payments on the 2000 bonds are as follows:

Date	Debt service
1/1/01	$9,996,470
1/1/02	9,996,470
1/1/03	9,996,470
1/1/04	9,996,470
1/1/05	9,996,470
1/1/06	9,996,470
1/1/07	9,996,470
1/1/08	9,996,470
1/1/09	9,996,470
1/1/10	9,996,470
1/1/11	9,996,470
1/1/12	9,996,470
1/1/13	9,996,470
1/1/14	9,996,470
1/1/15	9,996,470
1/1/16	9,996,470
1/1/17	9,996,470
1/1/18	9,996,470
1/1/19	9,996,470
1/1/20	9,996,470
	199,929,400

(ii) On January 1, 2005, B issues 15-year bonds to refund all of the outstanding 2000 bonds maturing after January 1, 2005 (in the aggregate principal amount of $86,500,000). The 2005 bonds have a yield of 6.0000 percent, compounded annually, and an issue price and par amount of $89,500,000. The debt service payments on the 2005 bonds are as follows:

Date	Debt service
1/1/06	$9,215,167
1/1/07	9,215,167
1/1/08	9,215,167
1/1/09	9,215,167
1/1/10	9,215,167
1/1/11	9,215,167
1/1/12	9,215,167
1/1/13	9,215,167
1/1/14	9,215,167
1/1/15	9,215,167
1/1/16	9,215,167
1/1/17	9,215,167
1/1/18	9,215,167
1/1/19	9,215,167
1/1/20	9,215,167
	138,227,511

(iii) In accordance with §1.141–15(h), B chooses to apply §1.141–13 (together with the other provisions set forth in §1.141–15(h)), to the 2005 bonds. For purposes of determining the amount of private security and private payments with respect to the 2005 bonds, the 2005 bonds and the refunded portion of the 2000 bonds are treated as a combined issue under paragraph (c)(2) of this section. The yield on the combined issue is determined in accordance with §§1.148–4, 1.141–4(b)(2)(iii) and 1.141–13(c)(2). Under this methodology, the yield on the combined issue is 7.1062 percent per year compounded annually, illustrated as follows:

Date	Previous debt service on refunded portion of prior issue	Refunding debt service	Total debt service	Present value on 1/1/00
1/1/00				($86,500,000.00)
1/1/01	6,689,793		6,689,793	6,245,945.33
1/1/02	6,689,793		6,689,793	5,831,545.62
1/1/03	6,689,793		6,689,793	5,444,640.09
1/1/04	6,689,793		6,689,793	5,083,404.58
1/1/05	6,689,793		6,689,793	4,746,135.95
1/1/06		9,215,167	9,215,167	6,104,023.84
1/1/07		9,215,167	9,215,167	5,699,040.20
1/1/08		9,215,167	9,215,167	5,320,926.00
1/1/09		9,215,167	9,215,167	4,967,898.55
1/1/10		9,215,167	9,215,167	4,638,293.40
1/1/11		9,215,167	9,215,167	4,330,556.57
1/1/12		9,215,167	9,215,167	4,043,237.15
1/1/13		9,215,167	9,215,167	3,774,980.51
1/1/14		9,215,167	9,215,167	3,524,521.90
1/1/15		9,215,167	9,215,167	3,290,680.46
1/1/16		9,215,167	9,215,167	3,072,353.70
1/1/17		9,215,167	9,215,167	2,868,512.26
1/1/18		9,215,167	9,215,167	2,678,195.09
1/1/19		9,215,167	9,215,167	2,500,504.89
1/1/20		9,215,167	9,215,167	2,334,603.90
	33,448,965	138,227,511	171,676,4760.00	0.00

Example 3. Determination of private payments allocable to combined issue. The facts are the same as in *Example 2*. In addition, on January 1, 2001, B enters into a contract with a nongovernmental person for the use of the auditorium. The contract results in a private payment in the amount of $500,000 on each January 1 beginning on January 1, 2001, and ending on January 1, 2020. Under paragraph (c)(2) of this section, the amount of the private payments allocable to the combined issue is determined by treating the refunded portion of the 2000 bonds ($86,500,000 principal amount) as a separate issue, and by allocating the total private payments ratably between the combined issue and the unrefunded portion of the 2000 bonds ($13,500,000 principal amount) based on relative debt service, as follows:

Date	Private payments	Debt service on unrefunded portion of prior issue	Debt service on combined issue	Percentage of private payments allocable to combined issue	Amount of private payments allocable to combined issue
1/1/01	$500,000	$3,306,677	$6,689,793	66.92	$334,608
1/1/02	500,000	3,306,677	6,689,793	66.92	334,608
1/1/03	500,000	3,306,677	6,689,793	66.92	334,608
1/1/04	500,000	3,306,677	6,689,793	66.92	334,608
1/1/05	500,000	3,306,677	6,689,793	66.92	334,608
1/1/06	500,000		9,215,167	100.00	500,000
1/1/07	500,000		9,215,167	100.00	500,000
1/1/08	500,000		9,215,167	100.00	500,000
1/1/09	500,000		9,215,167	100.00	500,000
1/1/10	500,000		9,215,167	100.00	500,000
1/1/11	500,000		9,215,167	100.00	500,000
1/1/12	500,000		9,215,167	100.00	500,000
1/1/13	500,000		9,215,167	100.00	500,000
1/1/14	500,000		9,215,167	100.00	500,000
1/1/15	500,000		9,215,167	100.00	500,000
1/1/16	500,000		9,215,167	100.00	500,000
1/1/17	500,000		9,215,167	100.00	500,000
1/1/18	500,000		9,215,167	100.00	500,000
1/1/19	500,000		9,215,167	100.00	500,000
1/1/20	500,000		9,215,167	100.00	500,000
	$10,000,000	$16,533,385	$171,676,476		$9,173,039

Example 4. Refunding taxable bonds and qualified bonds. (i) In 1999, City C issues taxable bonds to finance the construction of a facility for the furnishing of water. The bonds are secured by revenues from the facility. The facility is managed pursuant to a management contract with a nongovernmental person that gives rise to private business use. In 2007, C terminates the management contract and takes over the operation of the facility. In 2009, C issues bonds to refund the 1999 bonds. On the issue date of the 2009 bonds, C reasonably expects that the facility will not be used for a private business use during the term of the 2009 bonds. In addition, during the term of the 2009 bonds, the facility is not used for a private business use. Under paragraph (b)(2)(i) of this section, the 2009 bonds do not satisfy the private business use test because the amount of private business use is based on the measurement period for those bonds and therefore does not take into account any private business use that occurred pursuant to the management contract.

(ii) The facts are the same as in paragraph (i) of this *Example 4*, except that the 1999 bonds are issued as exempt facility bonds under section 142(a)(4). The 2009 bonds do not satisfy the private business use test.

Example 5. Multipurpose issue. In 2001, State D issues bonds to finance the construction of two office buildings, Building 1 and Building 2. D expends an equal amount of the proceeds on each building. D enters into arrangements that result in 8 percent of Building 1 and 12 percent of Building 2 being used for a private business use during the measurement period under §1.141–3(g). These arrangements result in a total of 10 percent of the proceeds of the 2001 bonds being used for a private business use. In 2006, D purports to allocate, under paragraph (d) of this section, an equal amount of the outstanding 2001 bonds to Building 1 and Building 2. D also enters into another private business use arrangement with respect to Building 1 that results in an additional 2 percent (and a total of 10 percent) of Building 1 being used for a private business use during the measurement period. An allocation is not reasonable under paragraph (d) of this section if it achieves more favorable results under section 141 than could be achieved with actual separate issues. D's allocation is unreasonable because, if permitted, it would result in more than 10 percent of the proceeds of the 2001 bonds being used for a private business use.

Example 6. Non-deliberate action. In 1998, City E issues bonds to finance the purchase of land and construction of a building (the prior bonds). On the issue date of the prior bonds, E reasonably expects that it will be the sole user of the financed property for the entire term of the bonds. In 2003, the federal government acquires the financed property in a condemnation action. In 2006, E issues bonds to refund the prior bonds (the refunding bonds). The weighted average maturity of the refunding bonds is not greater than the reasonably expected economic life of the financed property. In general, under §1.141–2(d) and this section, reasonable expectations must be separately tested on the issue date of a refunding issue. Under paragraph (e) of this section, however, the condemnation action is not taken into account in applying the reasonable expectations test to the refunding bonds because the condemnation action is not a deliberate action within the meaning of §1.141–2(d)(3) and the weighted average maturity of the refunding bonds is not greater than the weighted average reasonably expected economic life of the property financed by the prior bonds. Thus, the condemnation action does not cause the refunding bonds to be private activity bonds.

Example 7. Non-transitioned refunding of bonds subject to 1954 Code. In 1985, County F issues bonds to finance a court house. The 1985 bonds are subject to the provisions of the Internal Revenue Code of 1954. In 2006, F issues bonds to refund all of the outstanding 1985 bonds. The weighted average maturity of the 2006 bonds is longer than the remaining weighted average maturity of the 1985 bonds. In addition, the 2006 bonds do not satisfy any transitional rule for refundings in the Tax Reform Act of 1986, 100 Stat. 2085 (1986). Section 141 and this section apply to determine whether the 2006 bonds are private activity bonds including whether, for purposes of §1.141–13(b)(2)(ii)(B), the 1985 bonds satisfy the private business use test based on a measurement period that begins on the first day of the combined measurement period for the 2006 bonds and ends on the issue date of the 2006 bonds.

[T.D. 9234, 70 FR 75032, Dec. 19, 2006]

§ 1.141–14 Anti-abuse rules.

(a) *Authority of Commissioner to reflect substance of transactions.* If an issuer enters into a transaction or series of transactions with respect to one or more issues with a principal purpose of transferring to nongovernmental persons (other than as members of the general public) significant benefits of tax-exempt financing in a manner that is inconsistent with the purposes of section 141, the Commissioner may take any action to reflect the substance of the transaction or series of transactions, including—

(1) Treating separate issues as a single issue for purposes of the private activity bond tests;

(2) Reallocating proceeds to expenditures, property, use, or bonds;

(3) Reallocating payments to use or proceeds;

(4) Measuring private business use on a basis that reasonably reflects the economic benefit in a manner different than as provided in § 1.141–3(g); and

(5) Measuring private payments or security on a basis that reasonably reflects the economic substance in a manner different than as provided in § 1.141–4.

(b) *Examples.* The following examples illustrate the application of this section:

Example 1. Reallocating proceeds to indirect use. City C issues bonds with proceeds of $20 million for the stated purpose of financing improvements to roads that it owns. As a part of the same plan of financing, however, C also agrees to make a loan of $7 million to Corporation M from its general revenues that it otherwise would have used for the road improvements. The interest rate of the loan corresponds to the interest rate on a portion of the issue. A principal purpose of the financing arrangement is to transfer to M significant benefits of the tax-exempt financing. Although C actually allocates all of the proceeds of the bonds to the road improvements, the Commissioner may reallocate a portion of the proceeds of the bonds to the loan to M because a principal purpose of the financing arrangement is to transfer to M significant benefits of tax-exempt financing in a manner that is inconsistent with the purposes of section 141. The bonds are private activity bonds because the issue meets the private loan financing test. The bonds also meet the private business tests. See also §§ 1.141–3(a)(2), 1.141–4(a)(1), and 1.141–5(a), under which indirect use of proceeds and payments are taken into account.

Example 2. Taking into account use of amounts derived from proceeds that would be otherwise disregarded. County B issues bonds with proceeds of $10 million to finance the purchase of land. On the issue date, B reasonably expects that it will be the sole user of the land. Subsequently, the federal government acquires the land for $3 million in a condemnation action. B uses this amount to make a loan to Corporation M. In addition, the interest rate on the loan reflects the tax-exempt interest rate on the bonds and thus is substantially less than a current market rate. A principal purpose of the arrangement is to transfer to M significant benefits of the tax-exempt financing. Although the condemnation action is not a deliberate action, the Commissioner may treat the condemnation proceeds as proceeds of the issue because a principal purpose of the arrangement is to transfer to M significant benefits of tax-exempt financing in a manner inconsistent with the purposes of section 141. The bonds are private activity bonds.

Example 3. Measuring private business use on an alternative basis. City F issues bonds with a 30-year term to finance the acquisition of an industrial building having a remaining reasonably expected useful economic life of more than 30 years. On the issue date, F leases the building to Corporation G for 3 years. F reasonably expects that it will be the sole user of the building for the remaining term of the bonds. Because of the local market conditions, it is reasonably expected that the fair rental value of the industrial building will be significantly greater during the early years of the term of the bonds than in the later years. The annual rental payments are significantly less than fair market value, reflecting the interest rate on the bonds. The present value of these rental payments (net of operation and maintenance expenses) as of the issue date, however, is approximately 25 percent of the present value of debt service on the issue. Under § 1.141–3, the issue does not meet the private business tests, because only 10 percent of the proceeds are used in a trade or business by a nongovernmental person. A principal purpose of the issue is to transfer to G significant benefits of tax-exempt financing in a manner inconsistent with the purposes of section 141. The method of measuring private business use over the reasonably expected useful economic life of financed property is for the administrative convenience of issuers of state and local bonds. In cases where this method is used in a manner inconsistent with the purposes of section 141, the Commissioner may measure private business use on another basis that reasonably reflects economic benefit, such as in this case on an annual basis. If the Commissioner measures private business use on an annual basis, the bonds are private activity bonds because the private payment test is met and more than 10 percent of the proceeds are used in a trade or business by a nongovernmental person.

Example 4. Treating separate issues as a single issue. City D enters into a development agreement with Corporation T to induce T to locate its headquarters within D's city limits. Pursuant to the development agreement, in 1997 D will issue $20 million of its general obligation bonds (the 1997 bonds) to purchase land that it will grant to T. The development agreement also provides that, in 1998, D will issue $20 million of its tax increment bonds (the 1998 bonds), secured solely by the increase in property taxes in a special taxing district. Substantially all of the property within the special taxing district is owned by T or D. T will separately enter into an agreement to guarantee the payment of tax increment to D in an amount sufficient to retire the 1998 bonds. The proceeds of the 1998 bonds will be used to finance improvements owned and operated by D that will not give rise to private business use. Treated separately, the 1997 issue meets the private business use test, but not the private security or payment test; the 1998 issue meets the private security or payment test, but not the private business use test. A principal purpose of the financing plan, including the two issues, is to transfer significant benefits of tax-exempt financing to T for its headquarters. Thus, the 1997 issue and the 1998 issue may be treated by the Commissioner as a single issue for purposes of applying the private activity bond tests. Accordingly, the bonds of both the 1997 issue and the 1998 issue may be treated as private activity bonds.

Example 5. Reallocating proceeds. City E acquires an electric generating facility with a useful economic life of more than 40 years and enters into a 30-year take or pay contract to sell 30 percent of the available output to investor-owned utility M. E plans to use the remaining 70 percent of available output for its own governmental purposes. To finance the entire cost of the facility, E issues $30 million of its series A taxable bonds at taxable interest rates and $70 million series B bonds, which purport to be tax-exempt bonds, at tax-exempt interest rates. E allocates all of M's private business use to the proceeds of the series A bonds and all of its own government use to the proceeds of the series B bonds. The series A bonds have a weighted average maturity of 15 years, while the series B bonds have a weighted average maturity of 26 years. M's payments under the take or pay contract are expressly determined by reference to 30 percent of M's total costs (that is, the sum of the debt service required to be paid on both the series A and the series B bonds and all other operating costs). The allocation of all of M's private business use to the series A bonds does not reflect economic substance because the series of transactions transfers to M significant benefits of the tax-exempt interest rates paid on the series B bonds. A principal purpose of the financing arrangement is to transfer to M significant benefits of the tax-exempt financing. Accordingly, the Commissioner may allocate M's private business use on a pro rata basis to both the series B bonds as well as the series A bonds, in which case the series B bonds are private activity bonds.

Example 6. Allocations respected. The facts are the same as in *Example 5*, except that the debt service component of M's payments under the take or pay contract is based exclusively on the amounts necessary to pay the debt service on the taxable series A bonds. E's allocation of all of M's private business use to the series A bonds is respected because the series of transactions does not actually transfer benefits of tax-exempt interest rates to M. Accordingly, the series B bonds are not private activity bonds. The result would be the same if M's payments under the take or pay contract were based exclusively on fair market value pricing, rather than the tax-exempt interest rates on E's bonds. The result also would be the same if the series A bonds and the series B bonds had substantially equivalent weighted average maturities and E and M had entered into a customary contract providing for payments based on a ratable share of total debt service. E would not be treated by the Commissioner in any of these cases as entering into the contract with a principal purpose of transferring the benefits of tax-exempt financing to M in a manner inconsistent with the purposes of section 141.

[T.D. 8712, 62 FR 2301, Jan. 16, 1997]

§ 1.141–15 Effective dates.

(a) *Scope.* The effective dates of this section apply for purposes of §§ 1.141–1 through 1.141–6(a), 1.141–7 through 1.141–14, 1.145–1 through 1.145–2, 1.150–1(a)(3) and the definition of bond documents contained in § 1.150–1(b).

(b) *Effective dates*—(1) *In general.* Except as otherwise provided in this section, §§ 1.141–0 through 1.141–6(a), 1.141–9 through 1.141–12, 1.141–14, 1.145–1 through 1.145–2(c), and the definition of bond documents contained in § 1.150–1(b) (the 1997 regulations) apply to bonds issued on or after May 16, 1997, that are subject to section 1301 of the Tax Reform Act of 1986 (100 Stat. 2602).

(2) *Certain short-term arrangements.* The provisions of § 1.141–3 that refer to arrangements for 200 days, 100 days, or 50 days apply to any bond sold on or after November 20, 2001 and may be applied to any bond outstanding on November 20, 2001 to which § 1.141–3 applies.

(3) *Certain prepayments.* Except as provided in paragraph (c) of this section, paragraphs (c)(2)(ii), (c)(2)(iii) and (c)(2)(iv) of § 1.141–5 apply to bonds sold on or after October 3, 2003. Issuers may apply paragraphs (c)(2)(ii), (c)(2)(iii) and (c)(2)(iv) of § 1.141–5, in whole but not in part, to bonds sold before October 3, 2003 that are subject to § 1.141–5.

(c) *Refunding bonds.* Except as otherwise provided in this section, the 1997 regulations (defined in paragraph (b)(1) of this section) do not apply to any bonds issued on or after May 16, 1997, to refund a bond to which those regulations do not apply unless—

(1) The refunding bonds are subject to section 1301 of the Tax Reform Act of 1986 (100 Stat. 2602); and

(2)(i) The weighted average maturity of the refunding bonds is longer than—

(A) The weighted average maturity of the refunded bonds; or

(B) In the case of a short-term obligation that the issuer reasonably expects to refund with a long-term financing (such as a bond anticipation note), 120 percent of the weighted average reasonably expected economic life of the facilities financed; or

(ii) A principal purpose for the issuance of the refunding bonds is to make one or more new conduit loans.

(d) *Permissive application of regulations*. Except as provided in paragraph (e) of this section, the 1997 regulations (defined in paragraph (b)(1) of this section) may be applied in whole, but not in part, to actions taken before February 23, 1998, with respect to—

(1) Bonds that are outstanding on May 16, 1997, and subject to section 141; or

(2) Refunding bonds issued on or after May 16, 1997, that are subject to 141.

(e) *Permissive application of certain sections*. The following sections may each be applied to any bonds—

(1) Section 1.141–3(b)(4);

(2) Section 1.141–3(b)(6); and

(3) Section 1.141–12.

(f) *Effective dates for certain regulations relating to output facilities*—(1) *General rule*. Except as otherwise provided in this section, §§1.141–7 and 1.141–8 apply to bonds sold on or after November 22, 2002, that are subject to section 1301 of the Tax Reform Act of 1986 (100 Stat. 2602).

(2) *Transition rule for requirements contracts*. For bonds otherwise subject to §§1.141–7 and 1.141–8, §1.141–7(c)(3) applies to output contracts entered into on or after September 19, 2002. An output contract is treated as entered into on or after that date if it is amended on or after that date, but only if the amendment results in a change in the parties to the contract or increases the amount of requirements covered by the contract by reason of an extension of the contract term or a change in the method for determining such requirements. For purposes of this paragraph (f)(2)—

(i) The extension of the term of a contract causes the contract to be treated as entered into on the first day of the additional term;

(ii) The exercise by a party of a legally enforceable right that was provided under a contract before September 19, 2002, on terms that were fixed and determinable before such date, is not treated as an amendment of the contract. For example, the exercise by a purchaser after September 19, 2002 of a renewal option that was provided under a contract before that date, on terms identical to the original contract, is not treated as an amendment of the contract; and

(iii) An amendment that increases the amount of requirements covered by the contract by reason of a change in the method for determining such requirements is treated as a separate contract that is entered into as of the effective date of the amendment, but only with respect to the increased output to be provided under the contract.

(g) *Refunding bonds for output facilities*. Except as otherwise provided in paragraph (h) or (i) of this section, §§1.141–7 and 1.141–8 do not apply to any bonds sold on or after November 22, 2002, to refund a bond to which §§1.141–7 and 1.141–8 do not apply unless—

(1) The refunding bonds are subject to section 1301 of the Tax Reform Act of 1986 (100 Stat. 2602); and

(2)(i) The weighted average maturity of the refunding bonds is longer than—

(A) The weighted average maturity of the refunded bonds; or

(B) In the case of a short-term obligation that the issuer reasonably expects to refund with a long-term financing (such as a bond anticipation note), 120 percent of the weighted average reasonably expected economic life of the facilities financed; or

(ii) A principal purpose for the issuance of the refunding bonds is to make one or more new conduit loans.

(h) *Permissive retroactive application*. Except as provided in paragraphs (d), (e) or (i) of this section, §§1.141–1 through 1.141–6(a), 1.141–7 through 1.141–14, 1.145–1 through 1.145–2, 1.149(d)–1(g), 1.150–1(a)(3), the definition of bond documents contained in §1.150–1(b) and §1.150–1(c)(3)(ii) may be applied by issuers in whole, but not in part, to—

(1) Outstanding bonds that are sold before February 17, 2006, and subject to section 141; or

(2) Refunding bonds that are sold on or after February 17, 2006, and subject to section 141.

(i) *Permissive application of certain regulations relating to output facilities.* Issuers may apply §§ 1.141–7(f)(3) and 1.141–7(g) to any bonds.

(j) *Effective dates for certain regulations relating to refundings.* Except as otherwise provided in this section, §§ 1.141–13, 1.145–2(d), 1.149(d)–1(g), 1.150–1(a)(3) and 1.150–1(c)(3)(ii) apply to bonds that are sold on or after February 17, 2006, and that are subject to the 1997 regulations (defined in paragraph (b)(1) of this section).

(k) *Effective/applicability dates for certain regulations relating to generally applicable taxes and payments in lieu of tax*—(1) *In general.* Except as otherwise provided in paragraphs (k)(2) and (k)(3) of this section, revised §§ 1.141–4(e)(2), 1.141–4(e)(3) and 1.141–4(e)(5) apply to bonds sold on or after October 24, 2008 that are otherwise subject to the 1997 Regulations (defined in paragraph (b)(1) of this section).

(2) *Transitional rule for certain refundings.* Paragraph (k)(1) does not apply to bonds that are issued to refund bonds if—

(i) Either—

(A) The refunded bonds (or the original bonds in a series of refundings) were sold before October 24, 2008, or

(B) The refunded bonds (or the original bonds in a series of refundings) satisfied the transitional rule for projects substantially in progress under paragraph (k)(3) of this section; and

(ii) The weighted average maturity of the refunding bonds does not exceed the remaining weighted average maturity of the refunded bonds.

(3) *Transitional rule for certain projects substantially in progress.* Paragraph (k)(1) of this section does not apply to bonds issued for projects for which all of the following requirements are met:

(i) A governmental person (as defined in § 1.141–1) took official action evidencing its preliminary approval of the project before October 19, 2006, and the plan of finance for the project in place at that time contemplated financing the project with tax-exempt bonds to be paid or secured by PILOTs.

(ii) Before October 19, 2006, significant expenditures were paid or incurred with respect to the project or a contract was entered into to pay or incur significant expenditures with respect to the project.

(iii) The bonds for the project (excluding refunding bonds) are issued on or before December 31, 2009.

[T.D. 8757, 63 FR 3265, Jan. 22, 1998, as amended by T.D. 8941, 66 FR 4670, Jan. 18, 2001; T.D. 8967, 66 FR 58062, Nov. 20, 2001; T.D. 9016, 67 FR 59765, Sept. 23, 2002; T.D. 9085, 68 FR 45775, Aug. 4, 2003; T.D. 9234, 70 FR 75035, Dec. 19, 2005; 71 FR 1971, Jan. 12, 2006; T.D. 9429, 73 FR 63375, Oct. 24, 2008]

§ 1.141–16 Effective dates for qualified private activity bond provisions.

(a) *Scope.* The effective dates of this section apply for purposes of §§ 1.142–0 through 1.142–2, 1.144–0 through 1.144–2, 1.147–0 through 1.147–2, and 1.150–4.

(b) *Effective dates.* Except as otherwise provided in this section, the regulations designated in paragraph (a) of this section apply to bonds issued on or after May 16, 1997 (the effective date).

(c) *Permissive application.* The regulations designated in paragraph (a) of this section may be applied by issuers in whole, but not in part, to bonds outstanding on the effective date. For this purpose, issuers may apply § 1.142–2 without regard to paragraph (c)(3) thereof to failures to properly use proceeds that occur on or after April 21, 2003.

(d) *Certain remedial actions*—(1) *General rule.* The provisions of § 1.142–2(e) apply to failures to properly use proceeds that occur on or after August 13, 2004 and may be applied by issuers to failures to properly use proceeds that occur on or after May 14, 2004, provided that the bonds are subject to § 1.142–2.

(2) *Special rule for allocations of nonqualified bonds.* For purposes of § 1.142–2(e)(2), in addition to the allocation methods permitted in § 1.142–2(e)(2), an issuer may treat bonds with the longest maturities (determined on a bond-by-bond basis) as the nonqualified bonds, but only with respect to failures to properly use proceeds that occur on

or after May 14, 2004, with respect to bonds sold before August 13, 2004.

[T.D. 8712, 62 FR 2302, Jan. 16, 1997, as amended by T.D. 9150, 69 FR 50066, Aug. 13, 2004]

§ 1.142–0 Table of contents.

This section lists the captioned paragraphs contained in §§ 1.142–1 through 1.142–3.

[T.D. 8712, 62 FR 2302, Jan. 16, 1997, as amended by T.D. 9150, 69 FR 50066, Aug. 13, 2004]

§ 1.142–1 Exempt facility bonds.

(a) *Overview.* Interest on a private activity bond is not excludable from gross income under section 103(a) unless the bond is a qualified bond. Under section 141(e)(1)(A), an exempt facility bond issued under section 142 may be a qualified bond.

Under section 142(a), an exempt facility bond is any bond issued as a part of an issue using 95 percent or more of the proceeds for certain exempt facilities.

(b) *Scope.* Sections 1.142–0 through 1.142–3 apply for purposes of the rules for exempt facility bonds under section 142, except that, with respect to net proceeds that have been spent, § 1.142–2 does not apply to bonds issued under section 142(d) (relating to bonds issued to provide qualified residential rental projects) and section 142(f) (2) and (4) (relating to bonds issued to provide local furnishing of electric energy or gas).

(c) *Effective dates.* For effective dates of §§ 1.142–0 through 1.142–2, see § 1.141–16.

[T.D. 8712, 62 FR 2302, Jan. 16, 1997]

§ 1.142–2 Remedial actions.

(a) *General rule.* If less than 95 percent of the net proceeds of an exempt facility bond are actually used to provide an exempt facility, and for no other purpose, the issue will be treated as meeting the use of proceeds requirement of section 142(a) if the issue meets the condition of paragraph (b) of this section and the issuer takes the remedial action described in paragraph (c) of this section.

(b) *Reasonable expectations requirement.* The issuer must have reasonably expected on the issue date that 95 percent of the net proceeds of the issue would be used to provide an exempt facility and for no other purpose for the entire term of the bonds (disregarding any redemption provisions). To meet this condition the amount of the issue must have been based on reasonable estimates about the cost of the facility.

(c) *Redemption or defeasance*—(1) *In general.* The requirements of this paragraph (c) are met if all of the nonqualified bonds of the issue are redeemed on the earliest call date after the date on which the failure to properly use the proceeds occurs under paragraph (d) of this section. Proceeds of tax-exempt bonds (other than those described in paragraph (d)(1) of this section) must not be used for this purpose. If the bonds are not redeemed within 90 days of the date on which the failure to properly use proceeds occurs, a defeasance escrow must be established for those bonds within 90 days of that date.

(2) *Notice of defeasance.* The issuer must provide written notice to the Commissioner of the establishment of the defeasance escrow within 90 days of the date the escrow is established.

(3) *Special limitation.* The establishment of a defeasance escrow does not satisfy the requirements of this paragraph (c) if the period between the issue date and the first call date is more than 10½ years.

(4) *Special rule for dispositions of personal property.* For dispositions of personal property exclusively for cash, the

requirements of this paragraph (c) are met if the issuer expends the disposition proceeds within 6 months of the date of the disposition to acquire replacement property for the same qualifying purpose of the issue under section 142.

(5) *Definitions.* For purposes of paragraph (c)(4) of this section, *disposition proceeds* means disposition proceeds as defined in §1.141–12(c).

(d) *When a failure to properly use proceeds occurs*—(1) *Proceeds not spent.* For net proceeds that are not spent, a failure to properly use proceeds occurs on the earlier of the date on which the issuer reasonably determines that the financed facility will not be completed or the date on which the financed facility is placed in service.

(2) *Proceeds spent.* For net proceeds that are spent, a failure to properly use proceeds occurs on the date on which an action is taken that causes the bonds not to be used for the qualifying purpose for which the bonds were issued.

(e) *Nonqualified bonds*—(1) *Amount of nonqualified bonds.* For purposes of this section, the nonqualified bonds are a portion of the outstanding bonds in an amount that, if the remaining bonds were issued on the date on which the failure to properly use the proceeds occurs, at least 95 percent of the net proceeds of the remaining bonds would be used to provide an exempt facility. If no proceeds have been spent to provide an exempt facility, all of the outstanding bonds are nonqualified bonds.

(2) *Allocation of nonqualified bonds.* Allocations of nonqualified bonds must be made on a pro rata basis, except that an issuer may treat any bonds of an issue as the nonqualified bonds so long as—

(i) The remaining weighted average maturity of the issue, determined as of the date on which the nonqualified bonds are redeemed or defeased (determination date), and excluding from the determination the nonqualified bonds redeemed or defeased by the issuer to meet the requirements of paragraph (c) of this section, is not greater than

(ii) The remaining weighted average maturity of the issue, determined as of the determination date, but without regard to the redemption or defeasance of any bonds (including the nonqualified bonds) occurring on the determination date.

[T.D. 8712, 62 FR 2302, Jan. 16, 1997, as amended by T.D. 9150, 69 FR 50067, Aug. 13, 2004]

§ 1.142–3 Refunding Issues. [Reserved]

§ 1.142–4 Use of proceeds to provide a facility.

(a) *In general.* [Reserved]

(b) *Reimbursement allocations.* If an expenditure for a facility is paid before the issue date of the bonds to provide that facility, the facility is described in section 142(a) only if the expenditure meets the requirements of §1.150–2 (relating to reimbursement allocations). For purposes of this paragraph (b), if the proceeds of an issue are used to pay principal of or interest on an obligation other than a State or local bond (for example, temporary construction financing of the conduit borrower), that issue is not a refunding issue, and, thus, §1.150–2(g) does not apply.

(c) *Limitation on use of facilities by substantial users*—(1) *In general.* If the original use of a facility begins before the issue date of the bonds to provide the facility, the facility is not described in section 142(a) if any person that was a substantial user of the facility at any time during the 5-year period before the issue date or any related person to that user receives (directly or indirectly) 5 percent or more of the proceeds of the issue for the user's interest in the facility and is a substantial user of the facility at any time during the 5-year period after the issue date, unless—

(i) An official intent for the facility is adopted under §1.150–2 within 60 days after the date on which acquisition, construction, or reconstruction of that facility commenced; and

(ii) For an acquisition, no person that is a substantial user or related person after the acquisition date was also a substantial user more than 60 days before the date on which the official intent was adopted.

(2) *Definitions.* For purposes of paragraph (c)(1) of this section, *substantial user* has the meaning used in section 147(a)(1), *related person* has the meaning used in section 144(a)(3), and a user

that is a governmental unit within the meaning of § 1.103–1 is disregarded.

(d) *Effective date*—(1) *In general*. This section applies to bonds sold on or after July 8, 1997. See § 1.103–8(a)(5) for rules applicable to bonds sold before that date.

(2) *Elective retroactive application*. An issuer may apply this section to any bond sold before July 8, 1997.

[T.D. 8718, 62 FR 25506, May 9, 1997]

§ 1.142(a)(5)–1 Exempt facility bonds: Sewage facilities.

(a) *In general*. Under section 103(a), a private activity bond is a tax-exempt bond only if it is a qualified bond. A qualified bond includes an exempt facility bond, defined as any bond issued as part of an issue 95 percent or more of the net proceeds of which are used to provide a facility specified in section 142. One type of facility specified in section 142(a) is a sewage facility. This section defines the term *sewage facility* for purposes of section 142(a).

(b) *Definitions*—(1) *Sewage facility defined*. A sewage facility is property—

(i) Except as provided in paragraphs (b)(2) and (d) of this section, used for the secondary treatment of wastewater; however, for property treating wastewater reasonably expected to have an average daily raw wasteload concentration of biochemical oxygen demand (BOD) that exceeds 350 milligrams per liter as oxygen (measured at the time the influent enters the facility) (the *BOD limit*), this paragraph (b)(1)(i) applies only to the extent the treatment is for wastewater having an average daily raw wasteload concentration of BOD that does not exceed the BOD limit;

(ii) Used for the preliminary and/or primary treatment of wastewater but only to the extent used in connection with secondary treatment (without regard to the BOD limit described in paragraph (b)(1)(i) of this section);

(iii) Used for the advanced or tertiary treatment of wastewater but only to the extent used in connection with and after secondary treatment;

(iv) Used for the collection, storage, use, processing, or final disposal of—

(A) Wastewater, which property is necessary for such preliminary, primary, secondary, advanced, or tertiary treatment; or

(B) Sewage sludge removed during such preliminary, primary, secondary, advanced, or tertiary treatment (without regard to the BOD limit described in paragraph (b)(1)(i) of this section);

(v) Used for the treatment, collection, storage, use, processing, or final disposal of septage (without regard to the BOD limit described in paragraph (b)(1)(i) of this section); and

(vi) Functionally related and subordinate to property described in this paragraph (b)(1), such as sewage disinfection property.

(2) *Special rules and exceptions*—(i) *Exception to BOD limit*. A facility treating wastewater with an average daily raw wasteload concentration of BOD exceeding the BOD limit will not fail to qualify as a sewage facility described in paragraph (b)(1) of this section to the extent that the failure to satisfy the BOD limit results from the implementation of a federal, state, or local water conservation program (for example, a program designed to promote water use efficiency that results in BOD concentrations beyond the BOD limit).

(ii) *Anti-abuse rule for BOD limit*. A facility does not satisfy the BOD limit if there is any intentional manipulation of the BOD level to circumvent the BOD limit (for example, increasing the volume of water in the wastewater before the influent enters the facility with the intention of reducing the BOD level).

(iii) *Authority of Commissioner*. In appropriate cases upon application to the Commissioner, the Commissioner may determine that facilities employing technologically advanced or innovative treatment processes qualify as sewage facilities if it is demonstrated that these facilities perform functions that are consistent with the definition of sewage facilities described in paragraph (b)(1) of this section.

(3) *Other applicable definitions*—(i) *Advanced or tertiary treatment* means the treatment of wastewater after secondary treatment. Advanced or tertiary treatment ranges from biological treatment extensions to physical-chemical separation techniques such as denitrification, ammonia stripping,

carbon adsorption, and chemical precipitation.

(ii) *Nonconventional pollutants* are any pollutants that are not listed in 40 CFR 401.15, 401.16, or appendix A to part 423.

(iii) *Preliminary treatment* means treatment that removes large extraneous matter from incoming wastewater and renders the incoming wastewater more amenable to subsequent treatment and handling.

(iv) *Pretreatment* means a process that preconditions wastewater to neutralize or remove toxic, priority, or nonconventional pollutants that could adversely affect sewers or inhibit a preliminary, primary, secondary, advanced, or tertiary treatment operation.

(v) *Primary treatment* means treatment that removes material that floats or will settle, usually by screens or settling tanks.

(vi) *Priority pollutants* are those pollutants listed in appendix A to 40 CFR part 423.

(vii) *Secondary treatment* means the stage in sewage treatment in which a bacterial process (or an equivalent process) consumes the organic parts of wastes, usually by trickling filters or an activated sludge process.

(viii) *Sewage sludge* is defined in 40 CFR 122.2 and includes septage.

(ix) *Toxic pollutants* are those pollutants listed in 40 CFR 401.15.

(c) *Other property not included in the definition of a sewage facility.* Property other than property described in paragraph (b)(1) of this section is not a sewage facility. Thus, for example, property is not a sewage facility, or functionally related and subordinate property, if the property is used for pretreatment of wastewater (whether or not this treatment is necessary to perform preliminary, primary, secondary, advanced, or tertiary treatment), or the related collection, storage, use, processing, or final disposal of the wastewater. In addition, property used to treat, process, or use wastewater subsequent to the time the wastewater can be discharged into navigable waters, as defined in 33 U.S.C. 1362, is not a sewage facility.

(d) *Allocation of costs.* In the case of property that has both a use described in paragraph (b)(1) of this section (a sewage treatment function) and a use other than sewage treatment, only the portion of the cost of the property allocable to the sewage treatment function is taken into account as an expenditure to provide sewage facilities. The portion of the cost of property allocable to the sewage treatment function is determined by allocating the cost of that property between the property's sewage treatment function and any other uses by any method which, based on all the facts and circumstances, reasonably reflects a separation of costs for each use of the property.

(e) *Effective date*—(1) *In general.* This section applies to issues of bonds issued after February 21, 1995.

(2) *Refundings.* In the case of a refunding bond issued to refund a bond to which this section does not apply, the issuer need not apply this section to that refunding bond. This paragraph (e)(2) applies only if the weighted average maturity of the refunding bonds, as described in section 147(b), is not greater than the remaining weighted average maturity of the refunded bonds.

[T.D. 8576, 59 FR 66163, Dec. 23, 1994, as amended by T.D. 9546, Aug. 19, 2011]

§ 1.142(a)(6)–1 Exempt facility bonds: solid waste disposal facilities.

(a) *In general.* This section defines the term solid waste disposal facility for purposes of section 142(a)(6).

(b) *Solid waste disposal facility.* The term *solid waste disposal facility* means a facility to the extent that the facility—

(1) Processes solid waste (as defined in paragraph (c) of this section) in a qualified solid waste disposal process (as defined in paragraph (d) of this section);

(2) Performs a preliminary function (as defined in paragraph (f) of this section); or

(3) Is functionally related and subordinate (within the meaning of § 1.103–8(a)(3)) to a facility described in paragraph (b)(1) or (b)(2) of this section.

(c) *Solid waste*—(1) *In general.* Except to the extent excluded under paragraph (c)(2) of this section, for purposes of section 142(a)(6), the term *solid waste* means garbage, refuse, and other solid material derived from any agricultural, commercial, consumer, governmental, or industrial operation or activity if the material meets the requirements of both paragraph (c)(1)(i) and paragraph (c)(1)(ii) of this section. For purposes of this section, material is solid if it is solid at ambient temperature and pressure.

(i) *Used material or residual material*. Material meets the requirements of this paragraph (c)(1)(i) if it is either used material (as defined in paragraph (c)(1)(i)(A)) of this section or residual material (as defined in paragraph (c)(1)(i)(B) of this section).

(A) *Used material*. The term *used material* means any material that is a product of any agricultural, commercial, consumer, governmental, or industrial operation or activity, or a component of any such product or activity, and that has been used previously. Used material also includes animal waste produced by animals from a biological process.

(B) *Residual material*. The term *residual material* means material that meets the requirements of this paragraph (c)(1)(i)(B). The material must be a residual byproduct or excess raw material that results from or remains after the completion of any agricultural, commercial, consumer, governmental, or industrial production process or activity or from the provision of any service. In the case of multiple processes constituting an integrated manufacturing or industrial process, the material must result from or remain after the completion of such integrated process. As of the issue date of the bonds used to finance the solid waste disposal facility, the material must be reasonably expected to have a fair market value that is lower than the value of all of the products made in that production process or lower than the value of the service that produces such residual material.

(ii) *Reasonably expected introduction into a qualified solid waste disposal process*. Material meets the requirements of this paragraph (c)(1)(ii) if it is reasonably expected by the person who generates, purchases, or otherwise acquires it to be introduced within a reasonable time after such generation, purchase or acquisition into a qualified solid waste disposal process described in paragraph (d) of this section.

(2) *Exclusions from solid waste*. The following materials do not constitute solid waste:

(i) *Virgin material*. Except to the extent that virgin material constitutes an input to a final disposal process or residual material, solid waste excludes any virgin material. The term *virgin material* means material that has not been processed into an agricultural, commercial, consumer, governmental, or industrial product, or a component of any such product. Further, for this purpose, material continues to be virgin material after it has been grown, harvested, mined, or otherwise extracted from its naturally occurring location and cleaned, divided into component elements, modified, or enhanced, as long as further processing is required before it becomes an agricultural, commercial, consumer, or industrial product, or a component of any such product.

(ii) *Solids within liquids and liquid waste*. Solid waste excludes any solid or dissolved material in domestic sewage or other significant pollutant in water resources, such as silt, dissolved or suspended solids in industrial waste water effluents, dissolved materials in irrigation return flows or other common water pollutants, and liquid or gaseous waste.

(iii) *Precious metals*. Except to the extent that a precious metal constitutes an input to a final disposal process and/or an unrecoverable trace of the particular precious metal, solid waste excludes gold, silver, ruthenium, rhodium, palladium, osmium, iridium, platinum, gallium, rhenium, and any other precious metal material as may be identified by the Internal Revenue Service in future public administrative guidance.

(iv) *Hazardous material*. Solid waste excludes any hazardous material that must be disposed of at a facility that is subject to final permit requirements under subtitle C of title II of the Solid Waste Disposal Act as in effect on the date of the enactment of the Tax Reform Act of 1986 (which is October 22, 1986). See section 142(h)(1) of the Internal Revenue Code for the definition of qualified hazardous waste facilities.

(v) *Radioactive material.* Solid waste excludes any radioactive material subject to regulation under the Nuclear Regulatory Act (10 CFR 1.1 *et seq.*), as in effect on the issue date of the bonds.

(d) *Qualified solid waste disposal process.* The term *qualified solid waste disposal process* means the processing of solid waste in a final disposal process (as defined in paragraph (d)(1) of this section), an energy conversion process (as defined in paragraph (d)(2) of this section), or a recycling process (as defined in paragraph (d)(3) of this section). Absent an express restriction to the contrary in this section, a qualified solid waste disposal process may employ any biological, engineering, industrial, or technological method.

(1) *Final disposal process.* The term *final disposal process* means the placement of solid waste in a landfill (including, for this purpose, the spreading of solid waste over land in an environmentally compliant and safe manner with no intent to remove such solid waste), the incineration of solid waste without capturing any useful energy, or the containment of solid waste with a reasonable expectation as of the date of issue of the bonds that the containment will continue indefinitely and that the solid waste has no current or future beneficial use.

(2) *Energy conversion process.* The term *energy conversion process* means a thermal, chemical, or other process that is applied to solid waste to create and capture synthesis gas, heat, hot water, steam, or other useful energy. The energy conversion process begins at the point of the first application of such process. The energy conversion process ends at the point at which the useful energy is first created, captured, or incorporated into the form of synthesis gas, heat, hot water, or other useful energy and before any transfer or distribution of such synthesis gas, heat, hot water or other useful energy, regardless of whether such synthesis gas, heat, hot water, or other useful energy constitutes a first useful product within the meaning of paragraph (e) of this section.

(3) *Recycling process*—(i) *In general.* The term *recycling process* means reconstituting, transforming, or otherwise processing solid waste into a useful product. The recycling process begins at the point of the first application of a process to reconstitute or transform the solid waste into a useful product, such as decontamination, melting, repulping, shredding, or other processing of the solid waste to accomplish this purpose. The recycling process ends at the point of completion of production of the first useful product from the solid waste.

(ii) *Refurbishment, repair, or similar activities.* The term *recycling process* does not include refurbishment, repair, or similar activities. The term *refurbishment* means the breakdown and reassembly of a product if such activity is done on a product-by-product basis and if the finished product contains more than 30 percent of its original materials or components.

(e) *First useful product.* The term *first useful product* means the first product produced from the processing of solid waste in a solid waste disposal process that is useful for consumption in agricultural, consumer, commercial, governmental, or industrial operation or activity and that could be sold for such use, whether or not actually sold. A useful product includes both a product useful to an individual consumer as an ultimate end-use consumer product and a product useful to an industrial user as a material or input for processing in some stage of a manufacturing or production process to produce a different end-use consumer product. The determination of whether a useful product has been produced may take into account operational constraints that affect the point in production when a useful product reasonably can be extracted or isolated and sold independently. For this purpose, the costs of extracting, isolating, storing, and transporting the product to a market may only be taken into account as operational constraints if the product is not to be used as part of an integrated manufacturing or industrial process in the same location as that in which the product is produced.

(f) *Preliminary function.* A *preliminary function* is a function to collect, separate, sort, store, treat, process, disassemble, or handle solid waste that is preliminary to and directly related to a qualified solid waste disposal process.

(g) *Mixed-use facilities*—(1) *In general.* If a facility is used for both a qualified solid waste disposal function (including a qualified solid waste disposal process or a preliminary function) and a nonqualified function (a mixed-use facility), then the costs of the facility allocable to the qualified solid waste disposal function are determined using any reasonable method, based on all the facts and circumstances. See §1.103–8(a)(1) for allocation rules on amounts properly allocable to an exempt facility. Facilities qualify as functionally related and subordinate to a qualified solid waste disposal function only to the extent that they are functionally related and subordinate to the portion of the mixed-use facility that is used for one or more qualified solid waste disposal functions (including a qualified solid waste disposal process or a preliminary function).

(2) *Mixed inputs*—(i) *In general.* Except as otherwise provided in paragraph (g)(2)(ii) of this section, for each facility (or a portion of a mixed-use facility) performing a qualified solid waste disposal process or a preliminary function, the percentage of the costs of the property used for such process that are allocable to a qualified solid waste disposal process or a preliminary function cannot exceed the average annual percentage of solid waste processed in that qualified solid waste disposal process or that preliminary function while the issue is outstanding. The annual percentage of solid waste processed in that qualified solid waste disposal process or preliminary function for any year is the percentage, by weight or volume, of the total materials processed in that qualified solid waste disposal process or preliminary function that constitute solid waste for that year.

(ii) *Special rule for mixed-input processes if at least 65 percent of the materials processed are solid waste*—(A) *In general.* Except as otherwise provided in paragraph (g)(2)(ii)(B) of this section, for each facility (or a portion of a mixed-use facility) performing a qualified solid waste disposal process or preliminary function, if the annual percentage of solid waste processed in that qualified solid waste disposal process or preliminary function for each year that the issue is outstanding (beginning with the date such facility is placed in service within the meaning of §1.150–2(c)) equals at least 65 percent of the materials processed in that qualified solid waste disposal process or preliminary function, then all of the costs of the property used for such process are treated as allocable to a qualified solid waste disposal process. The annual percentage of solid waste processed in such qualified solid waste disposal process or preliminary function for any year is the percentage, by weight or volume, of the total materials processed in that qualified solid waste disposal process or preliminary function that constitute solid waste for that year.

(B) *Special rule for extraordinary events.* In the case of an extraordinary event that is beyond the control of the operator of a solid waste disposal facility (such as a natural disaster, strike, major utility disruption, or governmental intervention) and that causes a solid waste disposal facility to be unable to meet the 65 percent test under paragraph (g)(2)(ii)(A) of this section for a particular year, the percentage of solid waste processed for that year equals—

(*1*) The sum of the amount of solid waste processed in the solid waste disposal facility for the year affected by the extraordinary event and the amount of solid waste processed in the solid waste disposal facility during the following two years in excess of the amount required to meet the general 65 percent threshold for the facility during each of such two years; divided by

(*2*) The total materials processed in the solid waste disposal facility during the year affected by the extraordinary event. If the resulting measure of solid waste processed for the year affected by the extraordinary event equals at least 65 percent, then the facility is treated as meeting the requirements of the 65 percent test under paragraph (g)(2)(ii)(A) of this section for such year.

(iii) *Facilities functionally related and subordinate to mixed-input facilities.* Except to the extent that facilities are functionally related and subordinate to a mixed-input facility that meets the 65 percent test under paragraph (g)(2)(ii) of this section, facilities qualify as functionally related and subordinate to a mixed-input facility only to the extent that they are functionally related and subordinate to the qualified portion of the mixed-input facility that is used for one or more qualified solid waste disposal functions (including a qualified solid waste disposal process or a preliminary function).

(h) *Examples.* The following examples illustrate the application of this section:

Example 1. Nonqualified Unused Material—Cloth. Company A takes wool and weaves it into cloth and then sells the cloth to a manufacturer to manufacture clothing. The cloth is material that has not been used previously as a product of or otherwise used in an agricultural, commercial, consumer, governmental, or industrial operation or activity, or as a component of any such product or activity. Accordingly, the cloth is not solid waste.

Example 2. Residual Material—Waste Coal. Company B mines coal. Some of the ore mined is a low quality byproduct of coal mining commonly known as waste coal, which cannot be converted to energy under a normal energy-production process because the BTU content is too low. Waste coal has the lowest fair market value of any product produced in Company B's coal mining process. Waste coal is solid waste because it is residual material within the meaning of paragraph (c)(1)(i)(B) of this section and Company B reasonably expects to introduce the waste coal into a solid waste disposal process.

Example 3. Virgin Material—Logs. Company C cuts down trees and sells the logs to another company, which further processes the logs into lumber. In order to facilitate shipping, Company C cuts the trees into uniform logs. The trees are not solid waste because they are virgin material within the meaning of paragraph (c)(2)(i) of this section that are not being introduced into a final disposal process within the meaning of paragraph (d)(1) of this section. The division of such trees into uniform logs does not change the status of the trees as virgin material.

Example 4. Qualified Solid Waste Disposal Process—Landfill. Company D plans to construct a landfill. The landfill will not be subject to the final permit requirements under subtitle C of title II of the Solid Waste Disposal Act (as in effect on the date of enactment of the Tax Reform Act of 1986). As of the issue date, Company D expects that the landfill will be filled entirely with material that will qualify as solid waste within the meaning of paragraph (c) of this section. Placing solid waste into a landfill is a qualified solid waste disposal process. The landfill is a qualified solid waste disposal facility.

Example 5. Qualified Solid Waste Disposal Process—Recycling Tires. Company E owns a facility that converts used tires into roadbed material. The used tires are used material within the meaning of paragraph (c)(1)(i)(A) of this section that qualifies as solid waste. Between the introduction of the old tires into the roadbed manufacturing process and the completion of the roadbed material, the facility does not create any interim useful products. The process for the manufacturing of the roadbed material from the old tires is a qualified solid waste disposal process as a recycling process and the facility that converts the tires into roadbed material is a qualified solid waste disposal facility. This conclusion would be the same if the recycling process took place at more than one plant.

Example 6. Qualified Solid Waste Disposal Process—Energy Conversion Process. Company F receives solid waste from a municipal garbage collector. Company F burns that solid waste in an incinerator to remove exhaust gas and to produce heat. Company F further processes the heat in a heat exchanger to produce steam. Company F further processes the steam to generate electricity. The energy conversion process ends with the production of steam. The facilities used to burn the solid waste and to capture the steam as useful energy are qualified solid waste disposal facilities because they process solid waste in an energy conversion process. The generating facilities used to process the steam further to generate electricity are not engaged in the energy conversion process and are not qualified solid waste disposal facilities.

Example 7. Nonqualified Refurbishment. Company G purchases used cars and restores them. This restoration process includes disassembly, cleaning, and repairing of the cars. Parts that cannot be repaired are replaced. The restored cars contain at least 30 percent of the original parts. While the cars are used material, the refurbishing process is not a qualified solid waste disposal process. Accordingly, Company G's facility is not a qualified solid waste disposal facility.

Example 8. Qualified Solid Waste Disposal Facility—First Useful Product Rule—Paper Recycling. (i) Company H employs an integrated process to re-pulp discarded magazines, clean the pulp, and produce retail paper towel products. Operational constraints on Company H's process do not allow for reasonable extraction, isolation, and sale of the cleaned paper pulp independently without degradation of the pulp. Company H further processes the paper pulp into large industrial-sized rolls of paper which are approximately 12 feet in diameter. At this point in the process, Company H could either sell such industrial-sized rolls of paper to another company for further processing to produce retail paper products or it could produce those retail products itself. In general, paper pulp is a useful product that is bought and sold on the market as a material for input into manufacturing or production processes. The discarded magazines are used material within the meaning of paragraph (c)(1)(i)(A) of this section. Company H's facility is engaged in a recycling process within the meaning of paragraph (d)(3) of this section to the extent that it repulps and cleans the discarded magazines generally and further to the extent that it produces industrial-sized rolls of paper under the particular circumstances here. Specifically, taking into account the operational constraints on Company H's facility that limit its ability reasonably to extract, isolate, and sell the paper pulp independently, the first useful products within the meaning of paragraph (e) of this section from Company H's recycling process are the industrial-sized rolls of paper. The portion of Company H's facility that processes the discarded magazines and produces industrial-sized rolls of paper is a qualified solid waste disposal facility, and the portion of Company H's facility that further processes the industrial-sized rolls of paper into retail paper towels is not a qualified solid waste facility.

(ii) The facts are the same as in paragraph (i) of this *Example 8*, except that Company H is able reasonably to extract the cleaned paper pulp from the process without degradation of the pulp and to sell the cleaned paper pulp at its dock for a price that exceeds its costs of extracting the pulp from the process. Therefore, the paper pulp is the first useful product within the meaning of paragraph (e) of this section. As a result, the portion of Company H's facility that processes the discarded magazines is a qualified solid waste disposal facility, and the portion of Company H's facility that produces industrial-sized rolls of paper is not a qualified solid waste disposal facility. If, however, the only reasonable way Company H could sell the pulp was to transport the pulp to a distant market, then the costs of storing and transporting the pulp to the market may be taken into account in determining whether the pulp is the first useful product.

Example 9. Preliminary Function—Energy Conversion Process. (i) Company I owns a paper mill. At the mill, logs from nearby timber operations are processed through a machine that removes bark. The stripped logs are used to manufacture paper. The stripped bark has the lowest fair market value of any product produced from the paper mill. The stripped bark falls onto a conveyor belt that transports the bark to a storage bin that is used to store the bark briefly until Company I feeds the bark into a boiler. The conveyor belt and storage bin are used only for these purposes. The boiler is used only to create steam by burning the bark, and the steam is used to generate electricity. The stripped bark is solid waste because it is residual material within the meaning of paragraph (c)(1)(i)(B) of this section and Company I expects to introduce the bark into an energy conversion process within a reasonable period of time. The creation of steam from the stripped bark is an energy conversion process that starts with the incineration of the stripped bark. The energy conversion process is a qualified solid waste disposal process. The conveyor belt performs a collection activity that is preliminary and that is directly related to the solid waste disposal function. The storage bin performs a storage function that is preliminary and that is directly related to the solid waste disposal function. Thus, the conveyor belt and storage bin are solid waste disposal facilities. The bark removal process is not a preliminary function because it is not directly related to the energy conversion process and it does not become so related merely because it results in material that is solid waste.

(ii) The facts are the same as in paragraph (i) of this *Example 9*, except that the stripped bark represents only 55 percent by weight and volume of the materials that are transported by the conveyor belt. The remaining 45 percent of the materials transported by the conveyor belt are not solid waste and these other materials are sorted from the conveyor belt by a sorting machine immediately before the stripped bark arrives at the storage bin. Fifty-five percent of the costs of the conveyor belt and the sorting machine are allocable to solid waste disposal functions.

Example 10. Preliminary Function—Final Disposal Process. Company J owns a waste transfer station and uses it to collect, sort, and process solid waste. Company J uses its trucks to haul the solid waste to the nearest landfill. At least 65 percent by weight and volume of the material brought to the transfer station is solid waste. The waste transfer station and the trucks perform functions that are preliminary and directly related to the solid waste disposal function of the landfill. Thus, the waste transfer station and the trucks qualify as solid waste disposal facilities.

Example 11. Mixed-Input Facility. Company K owns an incinerator financed by an issue and uses the incinerator exclusively to burn coal and other solid material to create steam. Each year while the issue is outstanding, 40 percent by volume and 45 percent by weight of the solid material that Company K processes in the conversion process is coal. The remainder of the solid material is either used material or residual material within the meaning of paragraph (c)(1)(i) of this section. Sixty percent of the costs of the property used to perform the energy conversion process are allocable to a solid waste disposal function.

(i) *Effective/Applicability Dates*—(1) *In general*. Except as otherwise provided in this paragraph (i), this section applies to bonds to which section 142 applies that are sold on or after October 18, 2011.

(2) *Elective retroactive application*. Issuers may apply this section, in whole, but not in part, to outstanding bonds to which section 142 applies and which were sold before October 18, 2011.

(3) *Certain refunding bonds*. An issuer need not apply this section to bonds that are issued in a current refunding to refund bonds to which this section does not apply if the weighted average maturity of the refunding bonds is no longer than the remaining weighted average maturity of the refunded bonds.

[T.D. 9546, 76 FR 51881, Aug. 19, 2011; 76 FR 55255, Sept. 7, 2011]

§ 1.142(f)(4)–1 Manner of making election to terminate tax-exempt bond financing.

(a) *Overview*. Section 142(f)(4) permits a person engaged in the local furnishing of electric energy or gas (a local furnisher) that uses facilities financed with exempt facility bonds under section 142(a)(8) and that expands its service area in a manner inconsistent with the requirements of sections 142(a)(8) and (f) to make an election to ensure that those bonds will continue to be treated as exempt facility bonds. The election must meet the requirements of paragraphs (b) and (c) of this section.

(b) *Time for making election*—(1) *In general*. An election under section 142(f)(4)(B) must be filed with the Internal Revenue Service on or before 90 days after the date of the service area expansion that causes bonds to cease to meet the requirements of sections 142(a)(8) and (f).

(2) *Date of service area expansion*. For the purposes of this section, the date of the service area expansion is the first date on which the local furnisher is authorized to collect revenue for the provision of service in the expanded area.

(c) *Manner of making election*. An election under section 142(f)(4)(B) must be captioned "ELECTION TO TERMINATE TAX-EXEMPT BOND FINANCING", must be signed under penalties of perjury by a person who has authority to sign on behalf of the local furnisher, and must contain the following information—

(1) The name of the local furnisher;

(2) The tax identification number of the local furnisher;

(3) The complete address of the local furnisher;

(4) The date of the service area expansion;

(5) Identification of each bond issue subject to the election, including the complete name of each issue, the tax identification number of each issuer, the report number of the information return filed under section 149(e) for each issue, the issue date of each issue, the CUSIP number (if any) of the bond with the latest maturity of each issue, the issue price of each issue, the adjusted issue price of each issue as of the date of the election, the earliest date on which the bonds of each issue may be redeemed, and the principal amount of bonds of each issue to be redeemed on the earliest redemption date;

(6) A statement that the local furnisher making the election agrees to the conditions stated in section 142(f)(4)(B); and

(7) A statement that each issuer of the bonds subject to the election has received written notice of the election.

(d) *Effect on section 150(b)*. Except as provided in paragraph (e) of this section, if a local furnisher files an election within the period specified in paragraph (b) of this section, section 150(b) does not apply to bonds identified in the election during and after that period.

(e) *Effect of failure to meet agreements*. If a local furnisher fails to meet any of the conditions stated in an election pursuant to paragraph (c)(6) of this section, the election is invalid.

(f) *Corresponding provisions of the Internal Revenue Code of 1954*. Section 103(b)(4)(E) of the Internal Revenue Code of 1954 set forth corresponding requirements for the exclusion from gross income of the interest on bonds issued for facilities for the local furnishing of electric energy or gas. For the purposes of this section any reference to sections 142(a)(8) and (f) of the Internal Revenue Code of 1986 includes a reference to the corresponding portion of section 103(b)(4)(E) of the Internal Revenue Code of 1954.

(g) *Effective dates.* This section applies to elections made on or after January 19, 2001.

[T.D. 8941, 66 FR 4671, Jan. 18, 2001]

§ 1.143(g)–1 Requirements related to arbitrage.

(a) *In general.* Under section 143, for an issue to be an issue of qualified mortgage bonds or qualified veterans' mortgage bonds (together, mortgage revenue bonds), the requirements of section 143(g) must be satisfied. An issue satisfies the requirements of section 143(g) only if such issue meets the requirements of paragraph (b) of this section and, in the case of an issue 95 percent or more of the net proceeds of which are to be used to provide residences for veterans, such issue also meets the requirements of paragraph (c) of this section. The requirements of section 143(g) and this section are applicable in addition to the requirements of section 148 and §§ 1.148–0 through 1.148–11.

(b) *Effective rate of mortgage interest not to exceed bond yield by more than 1.125 percentage points*—(1) *Maximum yield.* An issue shall be treated as meeting the requirements of this paragraph (b) only if the excess of the effective rate of interest on the mortgages financed by the issue, over the yield on the issue, is not greater over the term of the issue than 1.125 percentage points.

(2) *Effective rate of interest.* (i) In determining the effective rate of interest on any mortgage for purposes of this paragraph (b), there shall be taken into account all fees, charges, and other amounts borne by the mortgagor that are attributable to the mortgage or to the bond issue. Such amounts include points, commitment fees, origination fees, servicing fees, and prepayment penalties paid by the mortgagor.

(ii) Items that shall be treated as borne by the mortgagor and shall be taken into account in calculating the effective rate of interest also include—

(A) All points, commitment fees, origination fees, or similar charges borne by the seller of the property; and

(B) The excess of any amounts received from any person other than the mortgagor by any person in connection with the acquisition of the mortgagor's interest in the property over the usual and reasonable acquisition costs of a person acquiring like property when owner-financing is not provided through the use of mortgage revenue bonds.

(iii) The following items shall not be treated as borne by the mortgagor and shall not be taken into account in calculating the effective rate of interest—

(A) Any expected rebate of arbitrage profit under paragraph (c) of this section; and

(B) Any application fee, survey fee, credit report fee, insurance charge or similar settlement or financing cost to the extent such amount does not exceed amounts charged in the area in cases when owner-financing is not provided through the use of mortgage revenue bonds. For example, amounts paid for Federal Housing Administration, Veterans' Administration, or similar private mortgage insurance on an individual's mortgage, or amounts paid for pool mortgage insurance on a pool of mortgages, are not taken into account so long as such amounts do not exceed the amounts charged in the area with respect to a similar mortgage, or pool of mortgages, that is not financed with mortgage revenue bonds. For this purpose, amounts paid for pool mortgage insurance include amounts paid to an entity (for example, the Government National Mortgage Association, the Federal National Mortgage Association (FNMA), the Federal Home Loan Mortgage Corporation, or other mortgage insurer) to directly guarantee the pool of mortgages financed with the bonds, or to guarantee a pass-through security backed by the pool of mortgages financed with the bonds.

(C) The following example illustrates the provisions of this paragraph (b)(2)(iii):

Example. Housing Authority X issues bonds intended to be qualified mortgage bonds under section 143(a). At the time the bonds are issued, X enters into an agreement with a group of mortgage lending institutions (lenders) under which the lenders agree to originate and service mortgages that meet certain specified requirements. After originating a specified amount of mortgages, each lender issues a ''pass-though security'' (each, a PTS) backed by the mortgages and sells the PTS to X. Under the terms of the PTS, the lender pays X an amount equal to the regular monthly payments on the mortgages (less certain fees), whether or not received by the lender (plus any prepayments and liquidation proceeds in the event of a foreclosure or other disposition of any mortgages). FNMA guarantees the timely payment of principal and interest on each PTS. From the payments received from each mortgagor, the lender pays a fee to FNMA for its guarantee of the PTS. The amounts paid to FNMA do not exceed the amounts charged in the area with respect to a similar pool of mortgages that is not financed with mortgage revenue bonds. Under this paragraph (b)(2)(iii), the fees for the guarantee provided by FNMA are an insurance charge because the guarantee is pool mortgage insurance. Because the amounts charged for the guarantee do not exceed the amounts charged in the area with respect to a similar pool of mortgages that is not financed with mortgage revenue bonds, the amounts charged for the guarantee are not taken into account in computing the effective rate of interest on the mortgages financed with X's bonds.

(3) *Additional rules.* To the extent not inconsistent with the Tax Reform Act of 1986, Public Law 99–514 (the 1986 Act), or subsequent law, § 6a.103A–2(i)(2) (other than paragraphs (i)(2)(i) and (i)(2)(ii)(A) through (C)) of this chapter applies to provide additional rules relating to compliance with the requirement that the effective rate of mortgage interest not exceed the bond yield by more than 1.125 percentage points.

(c) *Arbitrage and investment gains to be used to reduce costs of owner-financing.* As provided in section 143(g)(3), certain earnings on nonpurpose investments must either be paid or credited to mortgagors, or paid to the United States, in certain circumstances. To the extent not inconsistent with the 1986 Act or subsequent law, § 6a.103A–2(i)(4) of this chapter applies to provide guidance relating to compliance with this requirement.

(d) *Effective dates*—(1) *In general.* Except as otherwise provided in this section, § 1.143(g)–1 applies to bonds sold on or after May 23, 2005, that are subject to section 143.

(2) *Permissive retroactive application in whole.* Except as provided in paragraph (d)(4) of this section, issuers may apply § 1.143(g)–1, in whole, but not in part, to bonds sold before May 23, 2005, that are subject to section 143.

(3) *Bonds subject to the Internal Revenue Code of 1954.* Except as provided in paragraph (d)(4) of this section and subject to the applicable effective dates for the corresponding statutory provisions, an issuer may apply § 1.143(g)–1, in whole, but not in part, to bonds that are subject to section 103A(i) of the Internal Revenue Code of 1954.

(4) *Special rule for pre-July 1, 1993 bonds.* To the extent that an issuer applies this section to bonds issued before July 1, 1993, § 6a.103A–2(i)(3) of this chapter also applies to the bonds.

[T.D. 9204, 70 FR 29449, May 23, 2005]

§ 1.144–0 Table of contents.

This section lists the captioned paragraphs contained in §§ 1.144–1 and 1.144–2.

[T.D. 8712, 62 FR 2303, Jan. 16, 1997]

§ 1.144–1 Qualified small issue bonds, qualified student loan bonds, and qualified redevelopment bonds.

(a) *Overview.* Interest on a private activity bond is not excludable from gross income under section 103(a) unless the bond is a qualified bond. Under section 141(e)(1)(D), a qualified small issue bond issued under section 144(a) may be a qualified bond. Under section 144(a), any qualified small issue bond is any bond issued as a part of an issue 95 percent or more of the proceeds of which are to be used to provide certain manufacturing facilities or certain depreciable farm property and which meets other requirements. Under section 141(e)(1)(F) a qualified redevelopment bond issued under section 144(c) is a qualified bond. Under section 144(c), a qualified redevelopment bond is any bond issued as a part of an issue 95 percent or more of the net proceeds of which are to be used for one or more redevelopment purposes and which meets certain other requirements.

(b) *Scope.* Sections 1.144–0 through 1.144–2 apply for purposes of the rules for small issue bonds under section 144(a) and qualified redevelopment bonds under section 144(c), except that § 1.144–2 does not apply to the requirements for qualified small issue bonds under section 144(a)(4) (relating to the limitation on capital expenditures) or under section 144(a)(10) (relating to the aggregate limit of tax-exempt bonds per taxpayer).

(c) *Effective dates.* For effective dates of §§ 1.144–0 through 1.144–2, see § 1.141–16.

[T.D. 8712, 62 FR 2303, Jan. 16, 1997]

§ 1.144–2 Remedial actions.

The remedial action rules of § 1.142–2 apply to qualified small issue bonds issued under section 144(a) and to qualified redevelopment bonds issued under section 144(c), for this purpose treating those bonds as exempt facility bonds and the qualifying purposes for those bonds as exempt facilities.

[T.D. 8712, 62 FR 2303, Jan. 16, 1997]

§ 1.145–0 Table of contents.

This section lists the captioned paragraphs contained in §§ 1.145–1 and 1.145–2.

[T.D. 8712, 62 FR 2303, Jan. 16, 1997, as amended by T.D. 9234, 70 FR 75035, Dec. 19, 2005]

§ 1.145–1 Qualified 501(c)(3) bonds.

(a) *Overview.* Interest on a private activity bond is not excludable from gross income under section 103(a) unless the bond is a qualified bond. Under section 141(e)(1)(G), a qualified 501(c)(3) bond issued under section 145 is a qualified bond. Under section 145, a qualified 501(c)(3) bond is any bond issued as a part of an issue that satisfies the requirements of sections 145(a) through (d).

(b) *Scope.* Sections 1.145–0 through 1.145–2 apply for purposes of section 145(a).

(c) *Effective dates.* For effective dates of §§ 1.145–0 through 1.145–2, see § 1.141–15.

[T.D. 8712, 62 FR 2303, Jan. 16, 1997]

§ 1.145–2 Application of private activity bond regulations.

(a) *In general.* Except as provided in this section, §§ 1.141–0 through 1.141–15 apply to section 145(a). For example, under this section, § 1.141–1, and § 1.141–2, an issue ceases to be an issue of qualified 501(c)(3) bonds if the issuer or a conduit borrower 501(c)(3) organization takes a deliberate action, subsequent to the issue date, that causes the issue to fail to comply with the requirements of sections 141(e) and 145 (such as an action that results in revocation of exempt status of the 501(c)(3) organization).

(b) *Modification of private business tests.* In applying §§ 1.141–0 through 1.141–15 to section 145(a)—

(1) References to governmental persons include 501(c)(3) organizations with respect to their activities that do not constitute unrelated trades or businesses under section 513(a);

(2) References to ''10 percent'' and ''proceeds'' in the context of the private business use test and the private security or payment test mean ''5 percent'' and ''net proceeds''; and

(3) References to the private business use test in §§ 1.141–2 and 1.141–12 include the ownership test of section 145(a)(1).

(c) *Exceptions*—(1) *Certain provisions relating to governmental programs.* The following provisions do not apply to section 145: § 1.141–2(d)(4) (relating to the special rule for dispositions of personal property in the ordinary course of an established governmental program) and § 1.141–2(d)(5) (relating to the special rule for general obligation bond programs that finance a large number of separate purposes).

(2) *Costs of issuance.* Section 1.141–3(g)(6) does not apply to section 145(a)(2) to the extent that it provides that costs of issuance are allocated ratably among the other purposes for

which the proceeds are used. For purposes of section 145(a)(2), costs of issuance are treated as private business use.

(d) *Issuance costs financed by prior issue.* Solely for purposes of applying the private business use test to a refunding issue under § 1.141–13, the use of proceeds of the prior issue (or any earlier issue in a series of refundings) to pay issuance costs of the prior issue (or the earlier issue) is treated as a government use.

[T.D. 8712, 62 FR 2303, Jan. 16, 1997, as amended by T.D. 9234, 70 FR 75035, Dec. 19, 2005]

§ 1.147–0 Table of contents.

This section lists the captioned paragraphs contained in §§ 1.147–1 and 1.147–2.

[T.D. 8712, 62 FR 2304, Jan. 16, 1997]

§ 1.147–1 Other requirements applicable to certain private activity bonds.

(a) *Overview.* Interest on a private activity bond is not excludable from gross income under section 103(a) unless the bond is a qualified bond. Under section 147, certain requirements must be met for a private activity bond to qualify as a qualified bond.

(b) *Scope.* Sections 1.147–0 through 1.147–2 apply for purposes of the rules in section 147 for qualified private activity bonds that permit use of proceeds to acquire land for environmental purposes (section 147(c)(3)), permit use of proceeds for certain rehabilitations (section 147(d) (2) and (3)), prohibit use of proceeds to finance skyboxes, airplanes, gambling establishments and similar facilities (section 147(e)), and require public approval (section 147(f)), but not for the rules limiting use of proceeds to acquire land or existing property under sections 147(c) (1) and (2), and (d)(1).

(c) *Effective dates.* For effective dates of §§ 1.147–0 through 1.147–2, see § 1.141–16.

[T.D. 8712, 62 FR 2304, Jan. 16, 1997]

§ 1.147–2 Remedial actions.

The remedial action rules of § 1.142–2 apply to the rules in section 147 for qualified private activity bonds that permit use of proceeds to acquire land for environmental purposes (section 147(c)(3)), permit use of proceeds for certain rehabilitations (section 147(d) (2) and (3)), prohibit use of proceeds to finance skyboxes, airplanes, gambling establishments and similar facilities (section 147(e)), and require public approval (section 147(f)), for this purpose treating those private activity bonds subject to the rules under section 147 as exempt facility bonds and the qualifying purposes for those bonds as exempt facilities.

[T.D. 8712, 62 FR 2304, Jan. 16, 1997]

§ 1.147(b)–1 Bond maturity limitation-treatment of working capital.

Section 147(b) does not apply to proceeds of a private activity bond issue used to finance working capital expenditures.

[T.D. 8476, 58 FR 33515, June 18, 1993]

§ 1.148–0 Scope and table of contents.

(a) *Overview.* Under section 103(a), interest on certain obligations issued by States and local governments is excludable from the gross income of the owners. Section 148 was enacted to minimize the arbitrage benefits from investing gross proceeds of tax-exempt bonds in higher yielding investments and to remove the arbitrage incentives to issue more bonds, to issue bonds earlier, or to leave bonds outstanding longer than is otherwise reasonably necessary to accomplish the governmental purposes for which the bonds were issued. To accomplish these purposes, section 148 restricts the direct and indirect investment of bond proceeds in higher yielding investments and requires that certain earnings on higher yielding investments be rebated to the United States. Violation of these provisions causes the bonds in the issue to become *arbitrage bonds,* the interest on which is not excludable from the gross income of the owners under section 103(a). The regulations in §§ 1.148–1 through 1.148–11 apply in a manner consistent with these purposes.

(b) *Scope*. Sections 1.148–1 through 1.148–11 apply generally for purposes of the arbitrage restrictions on State and local bonds under section 148.

(c) *Table of contents*. This paragraph (c) lists the table of contents for §§ 1.148–1, 1.148–2, 1.148–3, 1.148–4, 1.148–5, 1.148–6, 1.148–7, 1.148–8, 1.148–9, 1.148–10 and 1.148–11.

(h) Safe harbor for establishing fair market value for guaranteed investment contracts and investments purchased for a yield restricted defeasance escrow.
(i) Special rule for certain broker's commissions and similar fees.
(j) Certain prepayments.

[T.D. 8476, 58 FR 33515, June 18, 1993, as amended by T.D. 8538, 59 FR 24041, May 10, 1994; T.D. 8718, 62 FR 25506, May 9, 1997; T.D. 9085, 68 FR 45775, Aug. 4, 2003; T.D. 9097, 68 FR 69022, Dec. 11, 2003]

§ 1.148–1 Definitions and elections.

(a) *In general.* The definitions in this section and the definitions under section 150 apply for purposes of section 148 and §§ 1.148–1 through 1.148–11.

(b) *Certain definitions.* The following definitions apply:

Accounting method means both the overall method used to account for gross proceeds of an issue (e.g., the cash method or a modified accrual method) and the method used to account for or allocate any particular item within that overall accounting method (e.g., accounting for investments, expenditures, allocations to and from different sources, and particular items of the foregoing).

Annuity contract means annuity contract as defined in section 72.

Available amount means available amount as defined in § 1.148–6(d)(3)(iii).

Bona fide debt service fund means a fund, which may include proceeds of an issue, that—

(1) Is used primarily to achieve a proper matching of revenues with principal and interest payments within each bond year; and

(2) Is depleted at least once each bond year, except for a reasonable carryover amount not to exceed the greater of:

(i) the earnings on the fund for the immediately preceding bond year; or

(ii) one-twelfth of the principal and interest payments on the issue for the immediately preceding bond year.

Bond year means, in reference to an issue, each 1-year period that ends on the day selected by the issuer. The first and last bond years may be short periods. If no day is selected by the issuer before the earlier of the final maturity date of the issue or the date that is 5 years after the issue date, bond years end on each anniversary of the issue date and on the final maturity date.

Capital project or capital projects means all capital expenditures, plus related working capital expenditures to which the de minimis rule under § 1.148–6(d)(3)(ii)(A) applies, that carry out the governmental purposes of an issue. For example, a capital project may include capital expenditures for one or more buildings, plus related start-up operating costs.

Commingled fund means any fund or account containing both gross proceeds of an issue and amounts in excess of $25,000 that are not gross proceeds of that issue if the amounts in the fund or account are invested and accounted for collectively, without regard to the source of funds deposited in the fund or account. An open-end regulated investment company under section 851, however, is not a commingled fund.

Computation date means each date on which the rebate amount for an issue is computed under § 1.148–3(e).

Computation period means the period between computation dates. The first computation period begins on the issue date and ends on the first computation date. Each succeeding computation period begins on the date immediately following the computation date and ends on the next computation date.

Consistently applied means applied uniformly within a fiscal period and between fiscal periods to account for gross proceeds of an issue and any amounts that are in a commingled fund.

De minimis amount means—

(1) In reference to original issue discount (as defined in section 1273(a)(1)) or premium on an obligation—

(i) An amount that does not exceed 2 percent multiplied by the stated redemption price at maturity; plus

(ii) Any original issue premium that is attributable exclusively to reasonable underwriters' compensation; and

(2) In reference to market discount (as defined in section 1278(a)(2)(A)) or premium on an obligation, an amount that does not exceed 2 percent multiplied by the stated redemption price at maturity.

Economic accrual method (also known as the *constant interest method* or *actuarial method*) means the method of computing yield that is based on the compounding of interest at the end of each compounding period.

Fair market value means fair market value as defined in § 1.148–5(d)(6).

Fixed rate investment means any investment whose yield is fixed and determinable on the issue date.

Fixed yield bond means any bond whose yield is fixed and determinable on the issue date using the assumptions and rules provided in § 1.148–4(b).

Fixed yield issue means any issue if each bond that is part of the issue is a fixed yield bond.

Gross proceeds means any proceeds and replacement proceeds of an issue.

Guaranteed investment contract includes any nonpurpose investment that has specifically negotiated withdrawal or reinvestment provisions and a specifically negotiated interest rate, and also includes any agreement to supply investments on two or more future dates (e.g., a forward supply contract).

Higher yielding investments means higher yielding investments as defined in section 148(b)(1).

Investment means any investment property as defined in sections 148(b)(2) and 148(b)(3), and any other tax-exempt bond.

Investment proceeds means any amounts actually or constructively received from investing proceeds of an issue.

Investment-type property is defined in paragraph (e) of this section.

Issue price means, except as otherwise provided, issue price as defined in sections 1273 and 1274. Generally, the issue price of bonds that are publicly offered is the first price at which a substantial amount of the bonds is sold to the public. Ten percent is a substantial amount. The public does not include bond houses, brokers, or similar persons or organizations acting in the capacity of underwriters or wholesalers. The issue price does not change if part of the issue is later sold at a different price. The issue price of bonds that are not substantially identical is determined separately. The issue price of bonds for which a bona fide public offering is made is determined as of the sale date based on reasonable expectations regarding the initial public offering price. If a bond is issued for property, the applicable Federal tax-exempt rate is used in lieu of the Federal rate in determining the issue price under section 1274. The issue price of bonds may not exceed their fair market value as of the sale date.

Issuer generally means the entity that actually issues the issue, and, unless the context or a provision clearly requires otherwise, each conduit borrower of the issue. For example, rules imposed on issuers to account for gross proceeds of an issue apply to a conduit borrower to account for any gross proceeds received under a purpose investment. Provisions regarding elections, filings, liability for the rebate amount, and certifications of reasonable expectations apply only to the actual issuer.

Multipurpose issue means an issue the proceeds of which are used for two or more separate purposes determined in accordance with § 1.148–9(h).

Net sale proceeds means sale proceeds, less the portion of those sale proceeds invested in a reasonably required reserve or replacement fund under section 148(d) and as part of a minor portion under section 148(e).

Nonpurpose investment means any investment property, as defined in section 148(b), that is not a purpose investment.

Payment means a payment as defined in § 1.148–3(d) for purposes of computing the rebate amount, and a payment as defined in § 1.148–5(b) for purposes of computing the yield on an investment.

Plain par bond means a qualified tender bond or a bond—

(1) Issued with not more than a de minimis amount of original issue discount or premium;

(2) Issued for a price that does not include accrued interest other than preissuance accrued interest;

(3) That bears interest from the issue date at a single, stated, fixed rate or that is a variable rate debt instrument under section 1275, in each case with interest unconditionally payable at least annually; and

(4) That has a lowest stated redemption price that is not less than its outstanding stated principal amount.

Plain par investment means an investment that is an obligation—

(1) Issued with not more than a de minimis amount of original issue discount or premium, or, if acquired on a

date other than the issue date, acquired with not more than a de minimis amount of market discount or premium;

(2) Issued for a price that does not include accrued interest other than pre-issuance accrued interest;

(3) That bears interest from the issue date at a single, stated, fixed rate or that is a variable rate debt instrument under section 1275, in each case with interest unconditionally payable at least annually; and

(4) That has a lowest stated redemption price that is not less than its outstanding stated principal amount.

Pre-issuance accrued interest means amounts representing interest that accrued on an obligation for a period not greater than one year before its issue date but only if those amounts are paid within one year after the issue date.

Proceeds means any sale proceeds, investment proceeds, and transferred proceeds of an issue. Proceeds do not include, however, amounts actually or constructively received with respect to a purpose investment that are properly allocable to the immaterially higher yield under §1.148–2(d) or section 143(g) or to qualified administrative costs recoverable under §1.148–5(e).

Program investment means a purpose investment that is part of a governmental program in which—

(1) The program involves the origination or acquisition of purpose investments;

(2) At least 95 percent (90 percent for qualified student loans under section 144(b)(1)(A)) of the cost of the purpose investments acquired under the program represents one or more loans to a substantial number of persons representing the general public, States or political subdivisions, 501(c)(3) organizations, persons who provide housing and related facilities, or any combination of the foregoing;

(3) At least 95 percent of the receipts from the purpose investments are used to pay principal, interest, or redemption prices on issues that financed the program, to pay or reimburse administrative costs of those issues or of the program, to pay or reimburse anticipated future losses directly related to the program, to finance additional purpose investments for the same general purposes of the program, or to redeem and retire governmental obligations at the next earliest possible date of redemption;

(4) The program documents prohibit any obligor on a purpose investment financed by the program or any related party to that obligor from purchasing bonds of an issue that finance the program in an amount related to the amount of the purpose investment acquired from that obligor; and

(5) The issuer has not waived the right to treat the investment as a program investment.

Purpose investment means an investment that is acquired to carry out the governmental purpose of an issue.

Qualified administrative costs means qualified administrative costs as defined in §1.148–5(e).

Qualified guarantee means a qualified guarantee as defined in §1.148–4(f).

Qualified hedge means a qualified hedge as defined in §1.148–4(h)(2).

Reasonable expectations or reasonableness. An issuer's expectations or actions are reasonable only if a prudent person in the same circumstances as the issuer would have those same expectations or take those same actions, based on all the objective facts and circumstances. Factors relevant to a determination of reasonableness include the issuer's history of conduct concerning stated expectations made in connection with the issuance of obligations, the level of inquiry by the issuer into factual matters, and the existence of covenants, enforceable by bondholders, that require implementation of specific expectations. For a conduit financing issue, factors relevant to a determination of reasonableness include the reasonable expectations of the conduit borrower, but only if, under the circumstances, it is reasonable and prudent for the issuer to rely on those expectations.

Rebate amount means 100 percent of the amount owed to the United States under section 148(f)(2), as further described in §1.148–3.

Receipt means a receipt as defined in §1.148–3(d) for purposes of computing the rebate amount, and a receipt as defined in §1.148–5(b) for purposes of computing yield on an investment.

Refunding escrow means one or more funds established as part of a single transaction or a series of related transactions, containing proceeds of a refunding issue and any other amounts to provide for payment of principal or interest on one or more prior issues. For this purpose, funds are generally not so established solely because of—

(1) The deposit of proceeds of an issue and replacement proceeds of the prior issue in an escrow more than 6 months apart, or

(2) The deposit of proceeds of completely separate issues in an escrow.

Replacement proceeds is defined in paragraph (c) of this section.

Restricted working capital expenditures means working capital expenditures that are subject to the proceeds-spent-last rule in §1.148–6(d)(3)(i) and are ineligible for any exception to that rule.

Sale proceeds means any amounts actually or constructively received from the sale of the issue, including amounts used to pay underwriters' discount or compensation and accrued interest other than pre-issuance accrued interest. Sale proceeds also include, but are not limited to, amounts derived from the sale of a right that is associated with a bond, and that is described in §1.148–4(b)(4). See also §1.148–4(h)(5) treating amounts received upon the termination of certain hedges as sale proceeds.

Stated redemption price means the redemption price of an obligation under the terms of that obligation, including any call premium.

Transferred proceeds means transferred proceeds as defined in §1.148–9 (or the applicable corresponding provision of prior law).

Unconditionally payable means payable under terms in which—

(1) Late payment or nonpayment results in a significant penalty to the borrower or reasonable remedies to the lender, and

(2) It is reasonably certain on the issue date that the payment will actually be made.

Value means value determined under §1.148–4(e) for a bond, and value determined under §1.148–5(d) for an investment.

Variable yield bond means any bond that is not a fixed yield bond.

Variable yield issue means any issue that is not a fixed yield issue.

Yield means yield computed under §1.148–4 for an issue, and yield computed under §1.148–5 for an investment.

Yield restricted means required to be invested at a yield that is not materially higher than the yield on the issue under section 148(a) and §1.148–2.

(c) *Definition of replacement proceeds*—(1) *In general.* Amounts are replacement proceeds of an issue if the amounts have a sufficiently direct nexus to the issue or to the governmental purpose of the issue to conclude that the amounts would have been used for that governmental purpose if the proceeds of the issue were not used or to be used for that governmental purpose. For this purpose, governmental purposes include the expected use of amounts for the payment of debt service on a particular date. The mere availability or preliminary earmarking of amounts for a governmental purpose, however, does not in itself establish a sufficient nexus to cause those amounts to be replacement proceeds. Replacement proceeds include, but are not limited to, sinking funds, pledged funds, and other replacement proceeds described in paragraph (c)(4) of this section, to the extent that those funds or amounts are held by or derived from a substantial beneficiary of the issue. A substantial beneficiary of an issue includes the issuer and any related party to the issuer, and, if the issuer is not a state, the state in which the issuer is located. A person is not a substantial beneficiary of an issue solely because it is a guarantor under a qualified guarantee.

(2) *Sinking fund. Sinking fund* includes a debt service fund, redemption fund, reserve fund, replacement fund, or any similar fund, to the extent reasonably expected to be used directly or indirectly to pay principal or interest on the issue.

(3) *Pledged fund*—(i) *In general.* A *pledged fund* is any amount that is directly or indirectly pledged to pay principal or interest on the issue. A pledge need not be cast in any particular form but, in substance, must provide reasonable assurance that the amount will be available to pay principal or interest on the issue, even if

the issuer encounters financial difficulties. A pledge to a guarantor of an issue is an indirect pledge to secure payment of principal or interest on the issue. A pledge of more than 50 percent of the outstanding stock of a corporation that is a conduit borrower of the issue is not treated as a pledge for this purpose, unless the corporation is formed or availed of to avoid the creation of replacement proceeds.

(ii) *Negative pledges.* An amount is treated as pledged to pay principal or interest on an issue if it is held under an agreement to maintain the amount at a particular level for the direct or indirect benefit of the bondholders or a guarantor of the bonds. An amount is not treated as pledged under this paragraph (c)(3)(ii), however, if—

(A) The issuer or a substantial beneficiary may grant rights in the amount that are superior to the rights of the bondholders or the guarantor; or

(B) The amount does not exceed reasonable needs for which it is maintained, the required level is tested no more frequently than every 6 months, and the amount may be spent without any substantial restriction other than a requirement to replenish the amount by the next testing date.

(4) *Other replacement proceeds*—(i) *Bonds outstanding longer than necessary*—(A) *In general.* Replacement proceeds arise to the extent that the issuer reasonably expects as of the issue date that—

(*1*) The term of an issue will be longer than is reasonably necessary for the governmental purposes of the issue, and

(*2*) There will be available amounts during the period that the issue remains outstanding longer than necessary. Whether an issue is outstanding longer than necessary is determined under §1.148–10. Replacement proceeds are created under this paragraph (c)(4)(i)(A) at the beginning of each fiscal year during which an issue remains outstanding longer than necessary in an amount equal to available amounts of the issuer as of that date.

(B) *Safe harbor against creation of replacement proceeds.* As a safe harbor, replacement proceeds do not arise under paragraph (c)(4)(i)(A) of this section—

(*1*) For the portion of an issue that is to be used to finance restricted working capital expenditures, if that portion is not outstanding longer than 2 years;

(*2*) For the portion of an issue (including a refunding issue) that is to be used to finance or refinance capital projects, if that portion has a weighted average maturity that does not exceed 120 percent of the average reasonably expected economic life of the financed capital projects, determined in the same manner as under section 147(b); or

(*3*) For the portion of an issue that is a refunding issue, if that portion has a weighted average maturity that does not exceed the remaining weighted average maturity of the prior issue, and the issue of which the prior issue is a part satisfies paragraph (c)(4)(i)(B) (*1*) or (*2*) of this section.

(ii) *Bonds financing a working capital reserve*—(A) *In general.* Except as otherwise provided in paragraph (c)(4)(ii)(B) of this section, replacement proceeds arise to the extent a working capital reserve is, directly or indirectly, financed with the proceeds of the issue (regardless of the expenditure of proceeds of the issue). Thus, for example, if an issuer that does not maintain a working capital reserve borrows to fund a working capital reserve, the issuer will have replacement proceeds. To determine the amount of a working capital reserve maintained, an issuer may use the average amount maintained as a working capital reserve during annual periods of at least 1 year, the last of which ends within 1 year before the issue date. For example, the amount of a working capital reserve may be computed using the average of the beginning or ending monthly balances of the amount maintained as a reserve (net of unexpended gross proceeds) during the 1 year period preceding the issue date.

(B) *Exception to creation of replacement proceeds.* Replacement proceeds do not arise under paragraph (c)(4)(ii)(A) of this section with respect to an issue—

(*1*) All of the net proceeds of which are spent within 6 months of the issue date under section 148(f)(4)(B)(iii)(I); or

(*2*) That is not subject to the rebate requirement under the exception provided by section 148(f)(4)(D).

(d) *Elections.* Except as otherwise provided, any required elections must be made in writing, and, once made, may not be revoked without the permission of the Commissioner.

(e) *Investment-type property*—(1) *In general.* Investment-type property includes any property, other than property described in section 148(b)(2)(A), (B), (C) or (E), that is held principally as a passive vehicle for the production of income. For this purpose, production of income includes any benefit based on the time value of money.

(2) *Prepayments*—(i) *In general*—(A) *Generally.* Except as otherwise provided in this paragraph (e)(2), a prepayment for property or services, including a prepayment for property or services that is made after the date that the contract to buy the property or services is entered into, also gives rise to investment-type property if a principal purpose for prepaying is to receive an investment return from the time the prepayment is made until the time payment otherwise would be made. A prepayment does not give rise to investment-type property if—

(*1*) Prepayments on substantially the same terms are made by a substantial percentage of persons who are similarly situated to the issuer but who are not beneficiaries of tax-exempt financing;

(*2*) The prepayment is made within 90 days of the reasonably expected date of delivery to the issuer of all of the property or services for which the prepayment is made; or

(*3*) The prepayment meets the requirements of paragraph (e)(2)(iii)(A) or (B) of this section.

(B) *Example.* The following example illustrates an application of this paragraph (e)(2)(i):

Example. Prepayment after contract is executed.

In 1998, City A enters into a ten-year contract with Company Y. Under the contract, Company Y is to provide services to City A over the term of the contract and in return City A will pay Company Y for its services as they are provided. In 2004, City A issues bonds to finance a lump sum payment to Company Y in satisfaction of City A's obligation to pay for Company Y's services to be provided over the remaining term of the contract. The use of bond proceeds to make the lump sum payment constitutes a prepayment for services under paragraph (e)(2)(i) of this section, even though the payment is made after the date that the contract is executed.

(ii) *Customary prepayments.* The determination of whether a prepayment satisfies paragraph (e)(2)(i)(A)(*1*) of this section is generally made based on all the facts and circumstances. In addition, a prepayment is deemed to satisfy paragraph (e)(2)(i)(A)(*1*) of this section if—

(A) The prepayment is made for—

(*1*) Maintenance, repair, or an extended warranty with respect to personal property (for example, automobiles or electronic equipment); or

(*2*) Updates or maintenance or support services with respect to computer software; and

(B) The same maintenance, repair, extended warranty, updates or maintenance or support services, as applicable, are regularly provided to nongovernmental persons on the same terms.

(iii) *Certain prepayments to acquire a supply of natural gas or electricity*—(A) *Natural gas prepayments.* A prepayment meets the requirements of this paragraph (e)(2)(iii)(A) if—

(*1*) It is made by or for one or more utilities that are owned by a governmental person, as defined in §1.141–1(b) (each of which is referred to in this paragraph (e)(2)(iii)(A) as the issuing municipal utility), to purchase a supply of natural gas; and

(*2*) At least 90 percent of the prepaid natural gas financed by the issue is used for a qualifying use. Natural gas is used for a qualifying use if it is to be—

(*i*) Furnished to retail gas customers of the issuing municipal utility who are located in the natural gas service area of the issuing municipal utility, provided, however, that gas used to produce electricity for sale shall not be included under this paragraph (e)(2)(iii)(A)(*2*)(*i*);

(*ii*) Used by the issuing municipal utility to produce electricity that will be furnished to retail electric customers of the issuing municipal utility who are located in the electricity service area of the issuing municipal utility;

(*iii*) Used by the issuing municipal utility to produce electricity that will be sold to a utility that is owned by a governmental person and furnished to retail electric customers of the purchaser who are located in the electricity service area of the purchaser;

(*iv*) Sold to a utility that is owned by a governmental person if the requirements of paragraph (e)(2)(iii)(A)(*2*)(*i*), (*ii*) or (*iii*) of this section are satisfied by the purchaser (treating the purchaser as the issuing municipal utility); or

(*v*) Used to fuel the pipeline transportation of the prepaid gas supply acquired in accordance with this paragraph (e)(2)(iii)(A).

(B) *Electricity prepayments.* A prepayment meets the requirements of this paragraph (e)(2)(iii)(B) if—

(*1*) It is made by or for one or more utilities that are owned by a governmental person (each of which is referred to in this paragraph (e)(2)(iii)(B) as the issuing municipal utility) to purchase a supply of electricity; and

(*2*) At least 90 percent of the prepaid electricity financed by the issue is used for a qualifying use. Electricity is used for a qualifying use if it is to be—

(*i*) Furnished to retail electric customers of the issuing municipal utility who are located in the electricity service area of the issuing municipal utility; or

(*ii*) Sold to a utility that is owned by a governmental person and furnished to retail electric customers of the purchaser who are located in the electricity service area of the purchaser.

(C) *Service area.* For purposes of this paragraph (e)(2)(iii), the service area of a utility owned by a governmental person consists of—

(*1*) Any area throughout which the utility provided, at all times during the 5-year period ending on the issue date—

(*i*) In the case of a natural gas utility, natural gas transmission or distribution service; and

(*ii*) In the case of an electric utility, electricity distribution service; and

(*2*) Any area recognized as the service area of the utility under state or Federal law.

(D) *Retail customer.* For purposes of this paragraph (e)(2)(iii), a retail customer is a customer that purchases natural gas or electricity, as applicable, other than for resale.

(E) *Commodity swaps.* A prepayment does not fail to meet the requirements of this paragraph (e)(2)(iii) by reason of any commodity swap contract that may be entered into between the issuer and an unrelated party (other than the gas or electricity supplier), or between the gas or electricity supplier and an unrelated party (other than the issuer), so long as each swap contract is an independent contract. A swap contract is an independent contract if the obligation of each party to perform under the swap contract is not dependent on performance by any person (other than the other party to the swap contract) under another contract (for example, a gas or electricity supply contract or another swap contract); provided, however, that a commodity swap contract will not fail to be an independent contract solely because the swap contract may terminate in the event of a failure of a gas or electricity supplier to deliver gas or electricity for which the swap contract is a hedge.

(F) *Remedial action.* Issuers may apply principles similar to the rules of §1.141–12, including §1.141–12(d) (relating to redemption or defeasance of nonqualified bonds) and §1.141–12(e) (relating to alternative use of disposition proceeds), to cure a violation of paragraph (e)(2)(iii)(A)(*2*) or (e)(2)(iii)(B)(*2*) of this section. For this purpose, the amount of nonqualified bonds is determined in the same manner as for output contracts taken into account under the private business tests, including the principles of §1.141–7(d), treating nonqualified sales of gas or electricity under this paragraph (e)(2)(iii) as satisfying the benefits and burdens test under §1.141–7(c)(1).

(iv) *Additional prepayments as permitted by the Commissioner.* The Commissioner may, by published guidance, set forth additional circumstances in which a prepayment does not give rise to investment-type property.

[T.D. 8476, 58 FR 33517, June 18, 1993; 58 FR 44452, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24041, May 10, 1994; T.D. 8718, 62 FR 25507, May 9, 1997; T.D. 9085, 68 FR 45775, Aug. 4, 2003]

§ 1.148–2 General arbitrage yield restriction rules.

(a) *In general.* Under section 148(a), the direct or indirect investment of the gross proceeds of an issue in higher yielding investments causes the bonds of the issue to be arbitrage bonds. The investment of proceeds in higher yielding investments, however, during a temporary period described in paragraph (e) of this section, as part of a reasonably required reserve or replacement fund described in paragraph (f) of this section, or as part of a minor portion described in paragraph (g) of this section does not cause the bonds of the issue to be arbitrage bonds. Bonds are not arbitrage bonds under this section as a result of an inadvertent, insubstantial error.

(b) *Reasonable expectations*—(1) *In general.* Except as provided in paragraph (c) of this section, the determination of whether an issue consists of arbitrage bonds under section 148(a) is based on the issuer's reasonable expectations as of the issue date regarding the amount and use of the gross proceeds of the issue.

(2) *Certification of expectations*—(i) *In general.* An officer of the issuer responsible for issuing the bonds must, in good faith, certify the issuer's expectations as of the issue date. The certification must state the facts and estimates that form the basis for the issuer's expectations. The certification is evidence of the issuer's expectations, but does not establish any conclusions of law or any presumptions regarding either the issuer's actual expectations or their reasonableness.

(ii) *Exceptions to certification requirement.* An issuer is not required to make a certification for an issue under paragraph (b)(2)(i) of this section if—

(A) The issuer reasonably expects as of the issue date that there will be no unspent gross proceeds after the issue date, other than gross proceeds in a bona fide debt service fund (e.g., equipment lease financings in which the issuer purchases equipment in exchange for an installment payment note); or

(B) The issue price of the issue does not exceed $1,000,000.

(c) *Intentional acts.* The taking of any deliberate, intentional action by the issuer or person acting on its behalf after the issue date in order to earn arbitrage causes the bonds of the issue to be arbitrage bonds if that action, had it been expected on the issue date, would have caused the bonds to be arbitrage bonds. An intent to violate the requirements of section 148 is not necessary for an action to be intentional.

(d) *Materially higher yielding investments*—(1) *In general.* The yield on investments is materially higher than the yield on the issue to which the investments are allocated if the yield on the investments over the term of the issue exceeds the yield on the issue by an amount in excess of the applicable definition of *materially higher* set forth in paragraph (d)(2) of this section. If yield restricted investments in the same class are subject to different definitions of *materially higher*, the applicable definition of *materially higher* that produces the lowest permitted yield applies to all the investments in the class. The yield on the issue is determined under §1.148–4. The yield on investments is determined under §1.148–5.

(2) *Definitions of materially higher yield*—(i) *General rule for purpose and nonpurpose investments.* For investments that are not otherwise described in this paragraph (d)(2), materially higher means one-eighth of 1 percentage point.

(ii) *Refunding escrows and replacement proceeds.* For investments in a refunding escrow or for investments allocable to replacement proceeds, materially higher means one-thousandth of 1 percentage point.

(iii) *Program investments.* For program investments that are not described in paragraph (d)(2)(iv) of this section, materially higher means 1 and one-half percentage points.

(iv) *Student loans.* For qualified student loans that are program investments, materially higher means 2 percentage points.

(v) *Tax-exempt investments.* For investments that are tax-exempt bonds and are not investment property under section 148(b)(3), no yield limitation applies.

(3) *Mortgage loans.* Qualified mortgage loans that satisfy the requirements of section 143(g) are treated as

meeting the requirements of this paragraph (d).

(e) *Temporary periods*—(1) *In general.* During the temporary periods set forth in this paragraph (e), the proceeds and replacement proceeds of an issue may be invested in higher yielding investments without causing bonds in the issue to be arbitrage bonds. This paragraph (e) does not apply to refunding issues (see §1.148–9).

(2) *General 3-year temporary period for capital projects and qualified mortgage loans*—(i) *In general.* The net sale proceeds and investment proceeds of an issue reasonably expected to be allocated to expenditures for capital projects qualify for a temporary period of 3 years beginning on the issue date (the *3-year temporary period).* The 3-year temporary period also applies to the proceeds of qualified mortgage bonds and qualified veterans' mortgage bonds by substituting *qualified mortgage loans* in each place that *capital projects* appears in this paragraph (e)(2). The 3-year temporary period applies only if the issuer reasonably expects to satisfy the expenditure test, the time test, and the due diligence test. These rules apply separately to each conduit loan financed by an issue (other than qualified mortgage loans), with the expenditure and time tests measured from the issue date of the issue.

(A) *Expenditure test.* The expenditure test is met if at least 85 percent of the net sale proceeds of the issue are allocated to expenditures on the capital projects by the end of the 3-year temporary period.

(B) *Time test.* The time test is met if the issuer incurs within 6 months of the issue date a substantial binding obligation to a third party to expend at least 5 percent of the net sale proceeds of the issue on the capital projects. An obligation is not binding if it is subject to contingencies within the issuer's or a related party's control.

(C) *Due diligence test.* The due diligence test is met if completion of the capital projects and the allocation of the net sale proceeds of the issue to expenditures proceed with due diligence.

(ii) *5-year temporary period.* In the case of proceeds expected to be allocated to a capital project involving a substantial amount of construction expenditures (as defined in §1.148–7), a 5-year temporary period applies in lieu of the 3-year temporary period if the issuer satisfies the requirements of paragraph (e)(2)(i) of this section applied by substituting ''5 years'' in each place that ''3 years'' appears, and both the issuer and a licensed architect or engineer certify that the longer period is necessary to complete the capital project.

(3) *Temporary period for restricted working capital expenditures*—(i) *General rule.* The proceeds of an issue that are reasonably expected to be allocated to restricted working capital expenditures within 13 months after the issue date qualify for a temporary period of 13 months beginning on the issue date. Paragraph (e)(2) of this section contains additional temporary period rules for certain working capital expenditures that are treated as part of a capital project.

(ii) *Longer temporary period for certain tax anticipation issues.* If an issuer reasonably expects to use tax revenues arising from tax levies for a single fiscal year to redeem or retire an issue, and the issue matures by the earlier of 2 years after the issue date or 60 days after the last date for payment of those taxes without interest or penalty, the temporary period under paragraph (e)(3)(i) of this section is extended until the maturity date of the issue.

(4) *Temporary period for pooled financings*—(i) *In general.* Proceeds of a pooled financing issue reasonably expected to be used to finance purpose investments qualify for a temporary period of 6 months while held by the issuer before being loaned to a conduit borrower. Any otherwise available temporary period for proceeds held by a conduit borrower, however, is reduced by the period of time during which those proceeds were held by the issuer before being loaned. For example, if the proceeds of a pooled financing issue loaned to a conduit borrower would qualify for a 3-year temporary period, and the proceeds are held by the issuer for 5 months before being loaned to the conduit borrower, the proceeds qualify for only an additional 31-month temporary period after being loaned to the conduit borrower. Except as provided in paragraph (e)(4)(iv) of this section,

this paragraph (e)(4) does not apply to any qualified mortgage bond or qualified veterans' mortgage bond under section 143.

(ii) *Loan repayments*—(A) *Amount held by the issuer.* The temporary period under this paragraph (e)(4) for proceeds from the sale or repayment of any loan that are reasonably expected to be used to make or finance new loans is 3 months.

(B) *Amounts re-loaned to conduit borrowers.* Any temporary period for proceeds held by a conduit borrower under a new loan from amounts described in paragraph (e)(4)(ii)(A) of this section is determined by treating the date the new loan is made as the issue date and by reducing the temporary period by the period the amounts were held by the issuer following the last repayment.

(iii) *Construction issues.* If all or a portion of a pooled financing issue qualifies as a construction issue under §1.148–7(b)(6), paragraph (e)(4)(i) of this section is applied by substituting "2 years" for "6 months."

(iv) *Amounts re-loaned for qualified mortgage loans.* The temporary period under this paragraph (e)(4) for proceeds from the sale, prepayment, or repayment of any qualified mortgage loan that are reasonably expected to be used to make or finance new qualified mortgage loans is 3 years.

(5) *Temporary period for replacement proceeds*—(i) *In general.* Except as otherwise provided, replacement proceeds qualify for a temporary period of 30 days beginning on the date that the amounts are first treated as replacement proceeds.

(ii) *Temporary period for bona fide debt service funds.* Amounts in a bona fide debt service fund for an issue qualify for a temporary period of 13 months. If only a portion of a fund qualifies as a bona fide debt service fund, only that portion qualifies for this temporary period.

(6) *Temporary period for investment proceeds.* Except as otherwise provided in this paragraph (e), investment proceeds qualify for a temporary period of 1 year beginning on the date of receipt.

(7) *Other amounts.* Gross proceeds not otherwise eligible for a temporary period described in this paragraph (e) qualify for a temporary period of 30 days beginning on the date of receipt.

(f) *Reserve or replacement funds*—(1) *General 10 percent limitation on funding with sale proceeds.* An issue consists of arbitrage bonds if sale proceeds of the issue in excess of 10 percent of the stated principal amount of the issue are used to finance any reserve or replacement fund, without regard to whether those sale proceeds are invested in higher yielding investments. If an issue has more than a de minimis amount of original issue discount or premium, the issue price (net of pre-issuance accrued interest) is used to measure the 10-percent limitation in lieu of stated principal amount. This rule does not limit the use of amounts other than sale proceeds of an issue to fund a reserve or replacement fund.

(2) *Exception from yield restriction for reasonably required reserve or replacement funds*—(i) *In general.* The investment of amounts that are part of a reasonably required reserve or replacement fund in higher yielding investments will not cause an issue to consist of arbitrage bonds. A reasonably required reserve or replacement fund may consist of all or a portion of one or more funds, however labelled, derived from one or more sources. Amounts in a reserve or replacement fund in excess of the amount that is reasonably required are not part of a reasonably required reserve or replacement fund.

(ii) *Size limitation.* The amount of gross proceeds of an issue that qualifies as a reasonably required reserve or replacement fund may not exceed an amount equal to the least of 10 percent of the stated principal amount of the issue, the maximum annual principal and interest requirements on the issue, or 125 percent of the average annual principal and interest requirements on the issue. If an issue has more than a de minimis amount of original issue discount or premium, the issue price of the issue (net of pre-issuance accrued interest) is used to measure the 10 percent limitation in lieu of its stated principal amount. For a reserve or replacement fund that secures more than one issue (e.g. a parity reserve fund), the size limitation may be measured on an aggregate basis.

(iii) *Valuation of investments.* Investments in a reasonably required reserve or replacement fund may be valued in any reasonable, consistently applied manner that is permitted under § 1.148–5.

(iv) *150 percent debt service limitation on investment in nonpurpose investments for certain private activity bonds.* Section 148(d)(3) contains additional limits on the amount of gross proceeds of an issue of private activity bonds, other than qualified 501(c)(3) bonds, that may be invested in higher yielding nonpurpose investments without causing the bonds to be arbitrage bonds. For purposes of these rules, *initial temporary period* means the temporary periods under paragraphs (e)(2), (e)(3), and (e)(4) of this section and under § 1.148–9(d)(2)(i), (ii), and (iii).

(3) *Certain parity reserve funds.* The limitation contained in paragraph (f)(1) of this section does not apply to an issue if the master legal document authorizing the issuance of the bonds (e.g., a master indenture) was adopted before August 16, 1986, and that document—

(i) Requires a reserve or replacement fund in excess of 10 percent of the sale proceeds, but not more than maximum annual principal and interest requirements;

(ii) Is not amended after August 31, 1986 (other than to permit the issuance of additional bonds as contemplated in the master legal document); and

(iii) Provides that bonds having a parity of security may not be issued by or on behalf of the issuer for the purposes provided under the document without satisfying the reserve fund requirements of the indenture.

(g) *Minor portion.* Under section 148(e), a bond of an issue is not an arbitrage bond solely because of the investment in higher yielding investments of gross proceeds of the issue in an amount not exceeding the lesser of—

(1) 5 percent of the sale proceeds of the issue; or

(2) $100,000.

(h) *Certain waivers permitted.* On or before the issue date, an issuer may elect to waive the right to invest in higher yielding investments during any temporary period under paragraph (e) of this section or as part of a reasonably required reserve or replacement fund under paragraph (f) of this section. At any time, an issuer may waive the right to invest in higher yielding investments as part of a minor portion under paragraph (g) of this section.

[T.D. 8476, 58 FR 33520, June 18, 1993; 58 FR 44452, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24042, May 10, 1994; T.D. 8718, 62 FR 25507, May 9, 1997]

§ 1.148–3 General arbitrage rebate rules.

(a) *In general.* Section 148(f) requires that certain earnings on nonpurpose investments allocable to the gross proceeds of an issue be paid to the United States to prevent the bonds in the issue from being arbitrage bonds. The arbitrage that must be rebated is based on the difference between the amount actually earned on nonpurpose investments and the amount that would have been earned if those investments had a yield equal to the yield on the issue.

(b) *Definition of rebate amount.* As of any date, the rebate amount for an issue is the excess of the future value, as of that date, of all receipts on nonpurpose investments over the future value, as of that date, of all payments on nonpurpose investments.

(c) *Computation of future value of a payment or receipt.* The future value of a payment or receipt at the end of any period is determined using the economic accrual method and equals the value of that payment or receipt when it is paid or received (or treated as paid or received), plus interest assumed to be earned and compounded over the period at a rate equal to the yield on the issue, using the same compounding interval and financial conventions used to compute that yield.

(d) *Payments and receipts*—(1) *Definition of payments.* For purposes of this section, payments are—

(i) Amounts actually or constructively paid to acquire a nonpurpose investment (or treated as paid to a commingled fund);

(ii) For a nonpurpose investment that is first allocated to an issue on a date after it is actually acquired (e.g., an investment that becomes allocable to transferred proceeds or to replacement proceeds) or that becomes subject to the rebate requirement on a date after it is actually acquired (e.g., an investment allocated to a reasonably required reserve or replacement fund for a construction issue at the end of the 2-year spending period), the value of that investment on that date;

(iii) For a nonpurpose investment that was allocated to an issue at the end of the preceding computation period, the value of that investment at the beginning of the computation period;

(iv) On the last day of each bond year during which there are amounts allocated to gross proceeds of an issue that are subject to the rebate requirement, and on the final maturity date, a computation credit of $1,000; and

(v) Yield reduction payments on nonpurpose investments made pursuant to § 1.148–5(c).

(2) *Definition of receipts.* For purposes of this section, receipts are—

(i) Amounts actually or constructively received from a nonpurpose investment (including amounts treated as received from a commingled fund), such as earnings and return of principal;

(ii) For a nonpurpose investment that ceases to be allocated to an issue before its disposition or redemption date (e.g., an investment that becomes allocable to transferred proceeds of another issue or that ceases to be allocable to the issue pursuant to the universal cap under § 1.148–6) or that ceases to be subject to the rebate requirement on a date earlier than its disposition or redemption date (e.g., an investment allocated to a fund initially subject to the rebate requirement but that subsequently qualifies as a bona fide debt service fund), the value of that nonpurpose investment on that date; and

(iii) For a nonpurpose investment that is held at the end of a computation period, the value of that investment at the end of that period.

(3) *Special rules for commingled funds.* Section 1.148–6(e) provides special rules to limit certain of the required determinations of payments and receipts for investments of a commingled fund.

(e) *Computation dates*—(1) *In general.* For a fixed yield issue, an issuer may treat any date as a computation date. For a variable yield issue, an issuer:

(i) May treat the last day of any bond year ending on or before the latest date on which the first rebate amount is required to be paid under paragraph (f) of this section (the *first required payment date*) as a computation date but may not change that treatment after the first payment date; and

(ii) After the first required payment date, must consistently treat either the end of each bond year or the end of each fifth bond year as computation dates and may not change these computation dates after the first required payment date.

(2) *Final computation date.* The date that an issue is discharged is the final computation date. For an issue retired within 3 years of the issue date, however, the final computation date need not occur before the end of 8 months after the issue date or during the period in which the issuer reasonably expects that any of the spending exceptions under § 1.148–7 will apply to the issue.

(f) *Amount of required rebate installment payment*—(1) *Amount of interim rebate payments.* The first rebate installment payment must be made for a computation date that is not later than 5 years after the issue date. Subsequent rebate installment payments must be made for a computation date that is not later than 5 years after the previous computation date for which an installment payment was made. A rebate installment payment must be in an amount that, when added to the future value, as of the computation date, of previous rebate payments made for the issue, equals at least 90 percent of the rebate amount as of that date.

(2) *Amount of final rebate payment.* For the final computation date, a final rebate payment must be paid in an amount that, when added to the future value of previous rebate payments made for the issue, equals 100 percent of the rebate amount as of that date.

(3) *Future value of rebate payments.* The future value of a rebate payment is determined under paragraph (c) of this section. This value is computed by taking into account recoveries of overpayments.

(g) *Time and manner of payment.* Each rebate payment must be paid no later than 60 days after the computation date to which the payment relates. Any rebate payment paid within this 60-day period may be treated as paid on the computation date to which it relates. A rebate payment is paid when it is filed with the Internal Revenue Service at the place or places designated by the Commissioner. A payment must be accompanied by the form provided by the Commissioner for this purpose.

(h) *Penalty in lieu of loss of tax exemption*—(1) *In general.* The failure to pay the correct rebate amount when required will cause the bonds of the issue to be arbitrage bonds, unless the Commissioner determines that the failure was not caused by willful neglect and the issuer promptly pays a penalty to the United States. If no bond of the issue is a private activity bond (other than a qualified 501(c)(3) bond), the penalty equals 50 percent of the rebate amount not paid when required to be paid, plus interest on that amount. Otherwise, the penalty equals 100 percent of the rebate amount not paid when required to be paid, plus interest on that amount.

(2) *Interest on underpayments.* Interest accrues at the underpayment rate under section 6621, beginning on the date the correct rebate amount is due and ending on the date 10 days before it is paid.

(3) *Waivers of the penalty.* The penalty is automatically waived if the rebate amount that the issuer failed to pay plus interest is paid within 180 days after discovery of the failure, unless, the Commissioner determines that the failure was due to willful neglect, or the issue is under examination by the Commissioner at any time during the period beginning on the date the failure first occurred and ending on the date 90 days after the receipt of the rebate amount. Generally, extensions of this 180-day period and waivers of the penalty in other cases will be granted by the Commissioner only in unusual circumstances. For purposes of this paragraph (h)(3), willful neglect does not include a failure that is attributable solely to the permissible retroactive selection of a short first bond year if the rebate amount that the issuer failed to pay is paid within 60 days of the selection of that bond year.

(4) *Application to alternative penalty under §1.148–7.* Paragraphs (h) (1), (2), and (3) of this section apply to failures to pay penalty payments under §1.148–7 (*alternative penalty amounts*) by substituting *alternative penalty amounts* for *rebate amount* and *the last day of each spending period* for *computation date.*

(i) *Recovery of overpayment of rebate*—(1) *In general.* An issuer may recover an overpayment for an issue of tax-exempt bonds by establishing to the satisfaction of the Commissioner that the overpayment occurred. An overpayment is the excess of the amount paid to the United States for an issue under section 148 over the sum of the rebate amount for the issue as of the most recent computation date and all amounts that are otherwise required to be paid under section 148 as of the date the recovery is requested.

(2) *Limitations on recovery.* (i) An overpayment may be recovered only to the extent that a recovery on the date that it is first requested would not result in an additional rebate amount if that date were treated as a computation date.

(ii) Except for overpayments of penalty in lieu of rebate under section 148(f)(4)(C)(vii) and §1.148–7(k), an overpayment of less than $5,000 may not be recovered before the final computation date.

(j) *Examples.* The provisions of this section may be illustrated by the following examples.

Example 1. Calculation and payment of rebate for a fixed yield issue. (i) *Facts.* On January 1, 1994, City *A* issues a fixed yield issue and invests all the sale proceeds of the issue ($49 million). There are no other gross proceeds. The issue has a yield of 7.0000 percent per year compounded semiannually (computed on a 30 day month/360 day year basis). City *A* receives amounts from the investment and immediately expends them for the governmental purpose of the issue as follows:

Date	Amount
2/1/94	$3,000,000
5/1/94	5,000,000
1/1/95	5,000,000
9/1/95	20,000,000
3/1/96	22,000,000

(ii) *First computation date.* (A) City *A* chooses January 1, 1999, as its first computation date. This date is the latest date that may be used to compute the first required rebate installment payment. The rebate amount as of this date is computed by determining the future value of the receipts and the payments for the investment. The compounding interval is each 6-month (or shorter) period and the 30 day month/360 day year basis is used because these conventions were used to compute yield on the issue. The future value of these amounts, plus the computation credit, as of January 1, 1999, is:

Date	Receipts (payments)	FV (7.0000 percent)
1/1/94	($49,000,000)	($69,119,339)
2/1/94	3,000,000	4,207,602
5/1/94	5,000,000	6,893,079
1/1/95	5,000,000	6,584,045
1/1/95	(1,000)	(1,317)
9/1/95	20,000,000	25,155,464
1/1/96	(1,000)	1,229)
3/1/96	22,000,000	26,735,275
1/1/97	(1,000)	(1,148)
Rebate amount (1/01/99)	....	452,432

(B) City *A* pays 90 percent of the rebate amount ($407,189) to the United States within 60 days of January 1, 1999.

(iii) *Second computation date.* (A) On the next required computation date, January 1, 2004, the future value of the payments and receipts is:

Date	Receipts (payments)	FV (7.0000 percent)
1/1/99	$452,432	$638,200
Rebate amount (1/01/04)	....	638,200

(B) As of this computation date, the future value of the payment treated as made on January 1, 1999, is $574,380, which equals at least 90 percent of the rebate amount as of this computation date ($638,200 × 0.9), and thus no additional rebate payment is due as of this date.

(iv) *Final computation date.* (A) On January 1, 2009, City *A* redeems all the bonds, and thus this date is the final computation date. The future value of the receipts and payments as of this date is:

Date	Receipts (payments)	FV (7.0000 percent)
1/1/04	$638,200	$900,244
1/1/09	(1,000)	(1,000)
Rebate amount (1/01/09)	....	899,244

(B) As of this computation date, the future value of the payment made on January 1, 1999, is $810,220 and thus an additional rebate payment of $89,024 is due. This payment reflects the future value of the 10 percent unpaid portion, and thus would not be owed had the issuer paid the full rebate amount as of any prior computation date.

Example 2. Calculation and payment of rebate for a variable yield issue. (i) *Facts.* On July 1, 1994, City *B* issues a variable yield issue and invests all of the sale proceeds of the issue ($30 million). There are no other gross proceeds. As of July 1, 1999, there are nonpurpose investments allocated to the issue. Prior to July 1, 1999, City *B* receives amounts from nonpurpose investments and immediately expends them for the governmental purpose of the issue as follows:

Date	Amount
8/1/1994	$5,000,000
7/1/1995	8,000,000
12/1/1995	17,000,000
7/1/1999	650,000

(ii) *First computation date.* (A) City *B* treats the last day of the fifth bond year (July 1, 1999) as a computation date. The yield on the variable yield issue during the first computation period (the period beginning on the issue date and ending on the first computation date) is 6.0000 percent per year compounded semiannually. The value of the nonpurpose investments allocated to the issue as of July 1, 1999, is $3 million. The rebate amount as of July 1, 1999, is computed by determining the future value of the receipts and the payments for the nonpurpose investments. The compounding interval is each 6-month (or shorter) period and the 30 day month/360 day year basis is used because these conventions were used to compute yield on the issue. The future value of these amounts and of the computation date credits as of July 1, 1999, is:

Date	Receipts (payments)	FV (6.0000 percent)
7/1/1994	($30,000,000)	($40,317,491)
8/1/1994	5,000,000	6,686,560
7/1/1995	(1,000)	(1,267)
7/1/1995	8,000,000	10,134,161
12/1/1995	17,000,000	21,011,112
7/1/1996	(1,000)	(1,194)
7/1/1997	(1,000)	(1,126)
7/1/1998	(1,000)	(1,061)
7/1/1999	3,000,000	3,000,000
7/1/1999	650,000	650,000
7/1/1999	(1,000)	(1,000)
Rebate amount (7/01/1999)		1,158,694

(B) City *B* pays 90 percent of the rebate amount ($1,042,824.60) to the United States within 60 days of July 1, 1999.

(iii) *Next computation date.* (A) On July 1, 2004, City *B* redeems all of the bonds. Thus, the next computation date is July 1, 2004. On July 30, 1999, City *B* chose to compute rebate for periods following the first computation period by treating the end of each fifth bond year as a computation date. The yield during the second computation period is 5.0000 percent per year compounded semiannually. The computation of the rebate amount as of this date reflects the value of the nonpurpose investments allocated to the issue at the end of the prior computation period. On July 1, 2004, City *B* sells those nonpurpose investments for $3,925,000 and expends that amount for the governmental purpose of the issue.

(B) As of July 1, 2004, the future value of the rebate amount computed as of July 1, 1999, and of all other payments and receipts is:

Date	Receipts (payments)	FV (5.0000 percent)
7/1/1999	$1,158,694	$1,483,226
7/1/1999	(3,000,000)	(3,840,254)
7/1/2000	(1,000)	(1,218)
7/1/2001	(1,000)	(1,160)
7/1/2002	(1,000)	(1,104)
7/1/2003	(1,000)	(1,051)
7/1/2004	(2,000)	(2,000)
7/1/2004	3,925,000	3,925,000
		1,561,439

(C) As of this computation date, the future value of the payment made on July 1, 1999, is $1,334,904 and thus an additional rebate payment of $226,535 is due.

(D) If the yield during the second computation period were, instead, 7.0000 percent, the rebate amount computed as of July 1, 1999, would be $1,320,891. The future value of the payment made on July 1, 1999, would be $1,471,007, and, therefore, City B would have overpaid the rebate amount by $150,116.

(k) *Bona fide debt service fund exception.* Under section 148(f)(4)(A), the rebate requirement does not apply to amounts in certain bona fide debt service funds. An issue with an average annual debt service that is not in excess of $2,500,000 may be treated as satisfying the $100,000 limitation in section 148(f)(4)(A)(ii).

[T.D. 8476, 58 FR 33522, June 18, 1993; 58 FR 44452, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24042, May 10, 1994; T.D. 8476, 59 FR 24350, May 11, 1994; T.D. 8718, 62 FR 25507, May 9, 1997]

§ 1.148–4 Yield on an issue of bonds.

(a) *In general.* The yield on an issue of bonds is used to apply investment yield restrictions under section 148(a) and to compute rebate liability under section 148(f). Yield is computed under the economic accrual method using any consistently applied compounding interval of not more than one year. A short first compounding interval and a short last compounding interval may be used. Yield is expressed as an annual percentage rate that is calculated to at least four decimal places (e.g., 5.2525 percent). Other reasonable, standard financial conventions, such as the 30 days per month/360 days per year convention, may be used in computing yield but must be consistently applied. The yield on an issue that would be a purpose investment (absent section 148(b)(3)(A)) is equal to the yield on the conduit financing issue that financed that purpose investment. The Commissioner may permit issuers of qualified mortgage bonds or qualified student loan bonds to use a single yield for two or more issues.

(b) *Computing yield on a fixed yield issue*—(1) *In general*—(i) *Yield on an issue.* The yield on a fixed yield issue is the discount rate that, when used in computing the present value as of the issue date of all unconditionally payable payments of principal, interest, and fees for qualified guarantees on the issue and amounts reasonably expected to be paid as fees for qualified guarantees on the issue, produces an amount equal to the present value, using the same discount rate, of the aggregate issue price of bonds of the issue as of the issue date. Further, payments include certain amounts properly allocable to a qualified hedge. Yield on a fixed yield issue is computed as of the issue date and is not affected by subsequent unexpected events, except to the extent provided in paragraphs (b)(4) and (h)(3) of this section.

(ii) *Yield on a bond.* Yield on a fixed yield bond is computed in the same manner as yield on a fixed yield issue.

(2) *Yield on certain fixed yield bonds subject to mandatory or contingent early redemption*—(i) *In general.* The yield on a fixed yield issue that includes a bond subject to mandatory early redemption or expected contingent redemption is computed by treating that bond as redeemed on its reasonably expected early redemption date for an amount equal to its value on that date. Reasonable expectations are determined on the issue date. A bond is subject to mandatory early redemption if it is unconditionally payable in full before its final maturity date. A bond is subject to a contingent redemption if it must be, or is reasonably expected to be, redeemed prior to final maturity upon

the occurrence of a contingency. A contingent redemption is taken into account only if the contingency is reasonably expected to occur, in which case the date of occurrence of the contingency must be reasonably estimated. For example, if bonds are reasonably expected to be redeemed early using excess revenues from general or special property taxes or benefit assessments or similar amounts, the reasonably expected redemption schedule is used to determine yield. For purposes of this paragraph (b)(2)(i), excess proceeds calls for issues for which the requirements of §1.148–2(e) (2) or (3) are satisfied, calamity calls, and refundings do not cause a bond to be subject to early redemption. The value of a bond is determined under paragraph (e) of this section.

(ii) *Substantially identical bonds subject to mandatory early redemption.* If substantially identical bonds of an issue are subject to specified mandatory redemptions prior to final maturity (e.g., a mandatory sinking fund redemption requirement), yield on that issue is computed by treating those bonds as redeemed in accordance with the redemption schedule for an amount equal to their value. Generally, bonds are substantially identical if the stated interest rate, maturity, and payment dates are the same. In computing the yield on an issue containing bonds described in this paragraph (b)(2)(ii), each of those bonds must be treated as redeemed at its present value, unless the stated redemption price at maturity of the bond does not exceed the issue price of the bond by more than one-fourth of one percent multiplied by the product of the stated redemption price at maturity and the number of years to the weighted average maturity date of the substantially identical bonds, in which case each of those bonds must be treated as redeemed at its outstanding stated principal amount, plus accrued, unpaid interest. Weighted average maturity is determined by taking into account the mandatory redemption schedule.

(3) *Yield on certain fixed yield bonds subject to optional early redemption*—(i) *In general.* If a fixed yield bond is subject to optional early redemption and is described in paragraph (b)(3)(ii) of this section, the yield on the issue containing the bond is computed by treating the bond as redeemed at its stated redemption price on the optional redemption date that would produce the lowest yield on the issue.

(ii) *Fixed yield bonds subject to special yield calculation rule.* A fixed yield bond is described in this paragraph (b)(3)(ii) only if it—

(A) Is subject to optional redemption within five years of the issue date, but only if the yield on the issue computed by assuming all bonds in the issue subject to redemption within 5 years of the issue date are redeemed at maturity is more than one-eighth of one percentage point higher than the yield on that issue computed by assuming all bonds subject to optional redemption within 5 years of the issue date are redeemed at the earliest date for their redemption;

(B) Is issued at an issue price that exceeds the stated redemption price at maturity by more than one-fourth of one percent multiplied by the product of the stated redemption price at maturity and the number of complete years to the first optional redemption date for the bond; or

(C) Bears interest at increasing interest rates (*i.e.*, a *stepped coupon bond*).

(4) *Yield recomputed upon transfer of certain rights associated with the bond.* For purposes of §1.148–3, as of the date of any transfer, waiver, modification, or similar transaction (collectively, a *transfer*) of any right that is part of the terms of a bond or is otherwise associated with a bond (e.g., a redemption right), in a transaction that is separate and apart from the original sale of the bond, the issue is treated as if it were retired and a new issue issued on the date of the transfer (*reissued*). The redemption price of the retired issue and the issue price of the new issue equal the aggregate values of all the bonds of the issue on the date of the transfer. In computing yield on the new issue, any amounts received by the issuer as consideration for the transfer are taken into account.

(5) *Special aggregation rule treating certain bonds as a single fixed yield bond.* Two variable yield bonds of an issue are treated in the aggregate as a single fixed yield bond if—

(i) Aggregate treatment would result in the single bond being a fixed yield bond; and

(ii) The terms of the bonds do not contain any features that could distort the aggregate fixed yield from what the yield would be if a single fixed yield bond were issued. For example, if an issue contains a bond bearing interest at a floating rate and a related bond bearing interest at a rate equal to a fixed rate minus that floating rate, those two bonds are treated as a single fixed yield bond only if neither bond may be redeemed unless the other bond is also redeemed at the same time.

(6) *Examples.* The provisions of this paragraph (b) may be illustrated by the following examples.

Example 1. No early call—(i) *Facts.* On January 1, 1994, City *A* issues an issue consisting of four identical fixed yield bonds. The stated final maturity date of each bond is January 1, 2004, and no bond is subject to redemption before this date. Interest is payable on January 1 of each year at a rate of 6.0000 percent per year on the outstanding principal amount. The total stated principal amount of the bonds is $20 million. The issue price of the bonds $20,060,000.

(ii) *Computation.* The yield on the issue is computed by treating the bonds as retired at the stated maturity under the general rule of §1.148–4(b)(1). The bonds are treated as redeemed for their stated redemption prices. The yield on the issue is 5.8731 percent per year compounded semiannually, computed as follows:

Date	Payments	PV (5.8731 percent)
1/1/1995	$1,200,000	$1,132,510
1/1/1996	1,200,000	1,068,816
1/1/1997	1,200,000	1,008,704
1/1/1998	1,200,000	951,973
1/1/1999	1,200,000	898,433
1/1/2000	1,200,000	847,903
1/1/2001	1,200,000	800,216
1/1/2002	1,200,000	755,210
1/1/2003	1,200,000	712,736
1/1/2004	21,200,000	11,883,498
		20,060,000

Example 2. Mandatory calls. (i) *Facts.* The facts are the same as in *Example 1.* In this case, however, the bonds are subject to mandatory sinking fund redemption on January 1 of each year, beginning January 1, 2001. On each sinking fund redemption date, one of the bonds is chosen by lottery and is required to be redeemed at par plus accrued interest.

(ii) *Computation.* Because the bonds are subject to specified redemptions, yield on the issue is computed by treating the bonds as redeemed in accordance with the redemption schedule under §1.148–4(b)(2)(ii). Because the bonds are not sold at a discount, the bonds are treated as retired at their stated redemption prices. The yield on the issue is 5.8678 percent per year compounded semiannually, computed as follows:

Date	Payments	PV (5.8678 percent)
1/1/1995	$1,200,000	$1,132,569
1/1/1996	1,200,000	1,068,926
1/1/1997	1,200,000	1,008,860
1/1/1998	1,200,000	952,169
1/1/1999	1,200,000	898,664
1/1/2000	1,200,000	848,166
1/1/2001	6,200,000	4,135,942
1/1/2002	5,900,000	3,714,650
1/1/2003	5,600,000	3,327,647
1/1/2004	5,300,000	2,972,407
		$20,060,000

Example 3. Optional early call. (i) *Facts.* On January 1, 1994, City *C* issues an issue consisting of three bonds. Each bond has a stated principal amount of $10 million dollars and is issued for par. Bond *X* bears interest at 5 percent per year and matures on January 1, 1999. Bond *Y* bears interest at 6 percent per year and matures on January 1, 2002. Bond *Z* bears interest at 7 percent per year and matures on January 1, 2004. Bonds *Y* and *Z* are callable by the issuer at par plus accrued interest after December 31, 1998.

(ii) *Computation.* (A) The yield on the issue computed as if each bond is outstanding to its maturity is 6.0834 percent per year compounded semiannually, computed as follows:

Date	Payments	PV (6.0834 percent)
1/1/1995	$1,800,000	$1,695,299
1/1/1996	1,800,000	1,596,689
1/1/1997	1,800,000	1,503,814
1/1/1998	1,800,000	1,416,342
1/1/1999	11,800,000	8,744,830
1/1/2000	1,300,000	907,374
1/1/2001	1,300,000	854,595
1/1/2002	11,300,000	6,996,316
1/1/2003	700,000	408,190
1/1/2004	10,700,000	5,876,551
		30,000,000

(B) The yield on the issue computed as if all bonds are called at the earliest date for redemption is 5.9126 percent per year compounded semiannually, computed as follows:

Date	Payments	PV (5.9126 percent)
1/1/1995	$1,800,000	$1,698,113
1/1/1996	1,800,000	1,601,994
1/1/1997	1,800,000	1,511,315
1/1/1998	1,800,000	1,425,769
1/1/1999	31,800,000	23,762,809
		30,000,000

(C) Because the yield on the issue computed by assuming all bonds in the issue subject to redemption within 5 years of the issue date are redeemed at maturity is more than one-eighth of one percentage point higher than the yield on the issue computed by assuming all bonds subject to optional redemption within 5 years of the issue date are redeemed at the earliest date for their redemption, each bond is treated as redeemed on the date that would produce the lowest yield for the issue. The lowest yield on the issue would result from a redemption of all the bonds on January 1, 1999. Thus, the yield on the issue is 5.9126 percent per year compounded semiannually.

(c) *Computing yield on a variable yield issue*—(1) *In general.* The yield on a variable yield issue is computed separately for each computation period. The yield for each computation period is the discount rate that, when used in computing the present value as of the first day of the computation period of all the payments of principal and interest and fees for qualified guarantees that are attributable to the computation period, produces an amount equal to the present value, using the same discount rate, of the aggregate issue price (or deemed issue price, as determined in paragraph (c)(2)(iv) of this section) of the bonds of the issue as of the first day of the computation period. The yield on a variable yield bond is computed in the same manner as the yield on a variable yield issue. Except as provided in paragraph (c)(2) of this section, yield on any fixed yield bond in a variable yield issue is computed in the same manner as the yield on a fixed yield issue as provided in paragraph (b) of this section.

(2) *Payments on bonds included in yield for a computation period*—(i) *Payments in general.* The payments on a bond that are attributable to a computation period include any amounts actually paid during the period for principal on the bond. Payments also include any amounts paid during the current period both for interest accruing on the bond during the current period and for interest accruing during the prior period that was included in the deemed issue price of the bond as accrued unpaid interest at the start of the current period under this paragraph (c)(2). Further, payments include any amounts properly allocable to fees for a qualified guarantee of the bond for the period and to any amounts properly allocable to a qualified hedge for the period.

(ii) *Payments at actual redemption.* If a bond is actually redeemed during a computation period, an amount equal to the greater of its value on the redemption date or the actual redemption price is a payment on the actual redemption date.

(iii) *Payments for bonds outstanding at end of computation period.* If a bond is outstanding at the end of a computation period, a payment equal to the bond's value is taken into account on the last day of that period.

(iv) *Issue price for bonds outstanding at beginning of next computation period.* A bond outstanding at the end of a computation period is treated as if it were immediately reissued on the next day for a deemed issue price equal to the value from the day before as determined under paragraph (c)(2)(iii) of this section.

(3) *Example.* The provisions of this paragraph (c) may be illustrated by the following example.

Example. On January 1, 1994, City *A* issues an issue of identical plain par bonds in an aggregate principal amount of $1,000,000. The bonds pay interest at a variable rate on each June 1 throughout the term of the issue. The entire principal amount of the bonds plus accrued, unpaid interest is payable on the final maturity date of January 1, 2000. No bond year is selected. On June 1, 1994, 1995, 1996, 1997, and 1998, interest in the amounts of $30,000, $55,000, $57,000, $56,000, and $45,000 is paid on the bonds. From June 1, 1998, to January 1, 1999, $30,000 of interest accrues on the bonds. From January 1, 1999, to June 1, 1999, another $35,000 of interest accrues. On June 1, 1999, the issuer actually pays $65,000 of interest. On January 1, 2000, $1,000,000 of principal and $38,000 of accrued interest are paid. The payments for the computation period starting on the issue date and ending on January 1, 1999, include all annual interest payments paid from the issue date to June 1, 1998. Because the issue is outstanding on January 1, 1999, it is treated as redeemed on that date for amount equal to its value ($1,000,000 plus accrued, unpaid interest of $30,000 under paragraph (e)(1) of this section). Thus, $1,030,000 is treated as paid on January 1, 1999. The issue is then treated as reissued on January 1, 1999, for $1,030,000. The payments for the next computation period starting on January 1, 1999, and ending on January 1, 2000, include the interest actually paid on the bonds during that period ($65,000 on June 1, 1999, plus $38,000 paid on January 1, 2000). Because the issue was actually redeemed on January 1, 2000, an amount equal to its stated redemption price is also treated as paid on January 1, 2000.

(d) *Conversion from variable yield issue to fixed yield issue.* For purposes of determining yield under this section, as of the first day on which a variable yield issue would qualify as a fixed yield issue if it were newly issued on that date (a *conversion date*), that issue is treated as if it were reissued as a fixed yield issue on the conversion date. The redemption price of the variable yield issue and the issue price of the fixed yield issue equal the aggregate values of all the bonds on the conversion date. Thus, for example, for plain par bonds (e.g., tender bonds), the deemed issue price would be the outstanding principal amount, plus accrued unpaid interest. If the conversion date occurs on a date other than a computation date, the issuer may continue to treat the issue as a variable yield issue until the next computation date, at which time it must be treated as converted to a fixed yield issue.

(e) *Value of bonds*—(1) *Plain par bonds.* Except as otherwise provided, the value of a plain par bond is its outstanding stated principal amount, plus accrued unpaid interest. The value of a plain par bond that is actually redeemed or treated as redeemed is its stated redemption price on the redemption date, plus accrued, unpaid interest.

(2) *Other bonds.* The value of a bond other than a plain par bond on a date is its present value on that date. The present value of a bond is computed under the economic accrual method taking into account all the unconditionally payable payments of principal, interest, and fees for a qualified guarantee to be paid on or after that date and using the yield on the bond as the discount rate, except that for purposes of §1.148–6(b)(2) (relating to the universal cap), these values may be determined by consistently using the yield on the issue of which the bonds are a part. To determine yield on fixed yield bonds, see paragraph (b)(1) of this section. The rules contained in paragraphs (b)(2) and (b)(3) of this section apply for this purpose. In the case of bonds described in paragraph (b)(2)(ii) of this section, the present value of those bonds on any date is computed using the yield to the final maturity date of those bonds as the discount rate. In determining the present value of a variable yield bond under this paragraph (e)(2), the initial interest rate on the bond established by the interest index or other interest rate setting mechanism is used to determine the interest payments on that bond.

(f) *Qualified guarantees*—(1) *In general.* Fees properly allocable to payments for a qualified guarantee for an issue (as determined under paragraph (f)(6) of this section) are treated as additional interest on that issue under section 148. A guarantee is a qualified guarantee if it satisfies each of the requirements of paragraphs (f)(2) through (f)(4) of this section.

(2) *Interest savings.* As of the date the guarantee is obtained, the issuer must reasonably expect that the present value of the fees for the guarantee will be less than the present value of the expected interest savings on the issue as a result of the guarantee. For this purpose, present value is computed using the yield on the issue, determined with regard to guarantee payments, as the discount rate.

(3) *Guarantee in substance.* The arrangement must create a guarantee in substance. The arrangement must impose a secondary liability that unconditionally shifts substantially all of the credit risk for all or part of the payments, such as payments for principal and interest, redemption prices, or tender prices, on the guaranteed bonds. Reasonable procedural or administrative requirements of the guarantee do not cause the guarantee to be conditional. In the case of a guarantee against failure to remarket a qualified tender bond, commercially reasonable limitations based on credit risk, such as limitations on payment in the event of default by the primary obligor or the bankruptcy of a long-term credit guarantor, do not cause the guarantee to be conditional. The guarantee may be in any form. The guarantor may not be a co-obligor. Thus, the guarantor must not expect to make any payments other than under a direct-pay letter of credit or similar arrangement for which the guarantor will be reimbursed immediately. The guarantor and any

related parties together must not use more than 10 percent of the proceeds of the portion of the issue allocable to the guaranteed bonds.

(4) *Reasonable charge*—(i) *In general.* Fees for a guarantee must not exceed a reasonable, arm's-length charge for the transfer of credit risk. In complying with this requirement, the issuer may not rely on the representations of the guarantor.

(ii) *Fees for services other than transfer of credit risk must be separately stated.* A fee for a guarantee must not include any payment for any direct or indirect services other than the transfer of credit risk, unless the compensation for those other services is separately stated, reasonable, and excluded from the guarantee fee. Fees for the transfer of credit risk include fees for the guarantor's overhead and other costs relating to the transfer of credit risk. For example, a fee includes payment for services other than transfer of credit risk if—

(A) It includes payment for the cost of underwriting or remarketing bonds or for the cost of insurance for casualty to bond-financed property;

(B) It is refundable upon redemption of the guaranteed bond before the final maturity date and the amount of the refund would exceed the portion of the fee that had not been earned; or

(C) The requirements of §1.148–2(e)(2) (relating to temporary periods for capital projects) are not satisfied, and the guarantor is not reasonably assured that the bonds will be repaid if the project to be financed is not completed.

(5) *Guarantee of purpose investments.* Except for guarantees of qualified mortgage loans and qualified student loans, a guarantee of payments on a purpose investment is a qualified guarantee of the issue if all payments on the purpose investment reasonably coincide with payments on the related bonds and the payments on the purpose investment are unconditionally payable no more than 6 months before the corresponding interest payment and 12 months before the corresponding principal payments on the bonds. This paragraph (f)(5) only applies if, in addition to satisfying the other requirements of this paragraph (f), the guarantee is, in substance, a guarantee of the bonds allocable to that purpose investment and to no other bonds except for bonds that are equally and ratably secured by purpose investments of the same conduit borrower.

(6) *Allocation of qualified guarantee payments*—(i) *In general.* Payments for a qualified guarantee must be allocated to bonds and to computation periods in a manner that properly reflects the proportionate credit risk for which the guarantor is compensated. Proportionate credit risk for bonds that are not substantially identical may be determined using any reasonable, consistently applied method. For example, this risk may be based on the ratio of the total principal and interest paid and to be paid on a guaranteed bond to the total principal and interest paid and to be paid on all bonds of the guaranteed issue. An allocation method generally is not reasonable, for example, if a substantial portion of the fee is allocated to the construction portion of the issue and a correspondingly insubstantial portion is allocated to the later years covered by the guarantee. Reasonable letter of credit *set up* fees may be allocated ratably during the initial term of the letter of credit. Upon an early redemption of a variable yield bond, fees otherwise allocable to the period after the redemption are allocated to remaining outstanding bonds of the issue or, if none remain outstanding, to the period before the redemption.

(ii) *Safe harbor for allocation of qualified guarantee fees for variable yield issues.* An allocation of non-level payments for a qualified guarantee for variable yield bonds is treated as meeting the requirements of paragraph (f)(6)(i) of this section if, for each bond year for which the guarantee is in effect, an equal amount (or for any short bond year, a proportionate amount of the equal amount) is treated as paid as of the beginning of that bond year. The present value of the annual amounts must equal the fee for the guarantee allocated to that bond, with present value computed as of the first day the guarantee is in effect by using as the discount rate the yield on the variable yield bonds covered by the guarantee, determined without regard to any fee allocated under this paragraph (f)(6)(ii).

(7) *Refund or reduction of guarantee payments.* If as a result of an investment of proceeds of a refunding issue in a refunding escrow, there will be a reduction in, or refund of, payments for a guarantee (*savings*), the savings must be treated as a reduction in the payments on the refunding issue.

(g) *Yield on certain mortgage revenue and student loan bonds.* For purposes of section 148 and this section, section 143(g)(2)(C)(ii) applies to the computation of yield on an issue of qualified mortgage bonds or qualified veterans' mortgage bonds. For purposes of applying section 148 and section 143(g) with respect to purpose investments allocable to a variable yield issue of qualified mortgage bonds, qualified veterans' mortgage bonds, or qualified student loan bonds that is reasonably expected as of the issue date to convert to a fixed yield issue, the yield may be computed over the term of the issue, and, if the yield is so computed, paragraph (d) of this section does not apply to the issue. As of any date, the yield over the term of the issue is based on—

(1) With respect to any bond of the issue that has not converted to a fixed and determinable yield on or before that date, the actual amounts paid or received to that date and the amounts that are reasonably expected (as of that date) to be paid or received with respect to that bond over the remaining term of the issue (taking into account prepayment assumptions under section 143(g)(2)(B)(iv), if applicable); and

(2) With respect to any bond of the issue that has converted to a fixed and determinable yield on or before that date, the actual amounts paid or received before that bond converted, if any, and the amount that was reasonably expected (on the date that bond converted) to be paid or received with respect to that bond over the remaining term of the issue (taking into account prepayment assumptions under section 143(g)(2)(B)(iv), if applicable).

(h) *Qualified hedging transactions*—(1) *In general.* Payments made or received by an issuer under a qualified hedge (as defined in paragraph (h)(2) of this section) relating to bonds of an issue are taken into account (as provided in paragraph (h)(3) of this section) to determine the yield on the issue. Except as provided in paragraphs (h)(4) and (h)(5)(ii)(E) of this section, the bonds to which a qualified hedge relates are treated as variable yield bonds from the issue date of the bonds. This paragraph (h) applies solely for purposes of sections 143(g), 148, and 149(d).

(2) *Qualified hedge defined.* Except as provided in paragraph (h)(5) of this section, the term *qualified hedge* means a contract that satisfies each of the following requirements:

(i) *Hedge*—(A) *In general.* The contract is entered into primarily to modify the issuer's risk of interest rate changes with respect to a bond (a hedge). For example, the contract may be an interest rate swap, an interest rate cap, a futures contract, a forward contract, or an option.

(B) *Special rule for fixed rate issues.* If the contract modifies the issuer's risk of interest rate changes with respect to a bond that is part of an issue that, absent the contract, would be a fixed rate issue, the contract must be entered into—

(*1*) No later than 15 days after the issue date (or the deemed issue date under paragraph (d) of this section) of the issue; or

(*2*) No later than the expiration of a qualified hedge with respect to bonds of that issue that satisfies paragraph (h)(2)(i)(B)(*1*) of this section; or

(*3*) No later than the expiration of a qualified hedge with respect to bonds of that issue that satisfies either paragraph (h)(2)(i)(B)(*2*) of this section or this paragraph (h)(2)(i)(B)(*3*).

(C) *Contracts with certain acquisition payments.* If a hedge provider makes a single payment to the issuer (e.g., a payment for an off-market swap) in connection with the acquisition of a contract, the issuer may treat a portion of that contract as a hedge provided—

(*1*) The hedge provider's payment to the issuer and the issuer's payments under the contract in excess of those that it would make if the contract bore rates equal to the on-market rates for the contract (determined as of the date the parties enter into the contract) are separately identified in a certification of the hedge provider; and

(*2*) The payments described in paragraph (h)(2)(i)(C)(*1*) of this section are not treated as payments on the hedge.

(ii) *No significant investment element*—(A) *In general.* The contract does not contain a significant investment element. Except as provided in paragraph (h)(2)(ii)(B) of this section, a contract contains a significant investment element if a significant portion of any payment by one party relates to a conditional or unconditional obligation by the other party to make a payment on a different date. Examples of contracts that contain a significant investment element are a debt instrument held by the issuer; an interest rate swap requiring any payments other than periodic payments, within the meaning of §1.446–3 (periodic payments) (e.g., a payment for an off-market swap or prepayment of part or all of one leg of a swap); and an interest rate cap requiring the issuer's premium for the cap to be paid in a single, up-front payment.

(B) *Special level payment rule for interest rate caps.* An interest rate cap does not contain a significant investment element if—

(*1*) All payments to the issuer by the hedge provider are periodic payments;

(*2*) The issuer makes payments for the cap at the same time as periodic payments by the hedge provider must be made if the specified index (within the meaning of §1.446–3) of the cap is above the strike price of the cap; and

(*3*) Each payment by the issuer bears the same ratio to the notional principal amount (within the meaning of §1.446–3) that is used to compute the hedge provider's payment, if any, on that date.

(iii) *Parties.* The contract is entered into between the issuer or the political subdivision on behalf of which the issuer issues the bonds (collectively referred to in this paragraph (h) as the *issuer*) and a provider that is not a related party (the *hedge provider*).

(iv) *Hedged bonds.* The contract covers, in whole or in part, all of one or more groups of substantially identical bonds in the issue (*i.e.*, all of the bonds having the same interest rate, maturity, and terms). Thus, for example, a qualified hedge may include a hedge of all or a pro rata portion of each interest payment on the variable rate bonds in an issue for the first 5 years following their issuance. For purposes of this paragraph (h), unless the context clearly requires otherwise, *hedged bonds* means the specific bonds or portions thereof covered by a hedge.

(v) *Interest based contract.* The contract is primarily interest based. A contract is not primarily interest based unless—

(A) The hedged bond, without regard to the contract, is either a fixed rate bond, a variable rate debt instrument within the meaning of §1.1275–5 provided the rate is not based on an objective rate other than a qualified inverse floating rate or a qualified inflation rate, a tax-exempt obligation described in §1.1275–4(d)(2), or an inflation-indexed debt instrument within the meaning of §1.1275–7; and

(B) As a result of treating all payments on (and receipts from) the contract as additional payments on (and receipts from) the hedged bond, the resulting bond would be substantially similar to either a fixed rate bond, a variable rate debt instrument within the meaning of §1.1275–5 provided the rate is not based on an objective rate other than a qualified inverse floating rate or a qualified inflation rate, a tax-exempt obligation described in §1.1275–4(d)(2), or an inflation-indexed debt instrument within the meaning of §1.1275–7. For this purpose, differences that would not prevent the resulting bond from being substantially similar to another type of bond include a difference between the index used to compute payments on the hedged bond and the index used to compute payments on the hedge where one index is substantially the same, but not identical to, the other; the difference resulting from the payment of a fixed premium for a cap (e.g., payments for a cap that are made in other than level installments); and the difference resulting from the allocation of a termination payment where the termination was not expected as of the date the contract was entered into.

(vi) *Payments closely correspond.* The payments received by the issuer from the hedge provider under the contract correspond closely in time to either the specific payments being hedged on the hedged bonds or specific payments required to be made pursuant to the bond documents, regardless of the hedge, to a sinking fund, debt service fund, or similar fund maintained for the issue of which the hedged bond is a part.

(vii) *Source of payments.* Payments to the hedge provider are reasonably expected to be made from the same source of funds that, absent the hedge, would be reasonably expected to be used to pay principal and interest on the hedged bonds.

(viii) *Identification.* The contract must be identified by the actual issuer on its books and records maintained for the hedged bonds not later than 3 days after the date on which the issuer and the hedge provider enter into the contract. The identification must specify the hedge provider, the terms of the contract, and the hedged bonds. The identification must contain sufficient detail to establish that the requirements of this paragraph (h)(2) and, if applicable, paragraph (h)(4) of this section are satisfied. In addition, the existence of the hedge must be noted on the first form relating to the issue of which the hedged bonds are a part that is filed with the Internal Revenue Service on or after the date on which the contract is identified pursuant to this paragraph (h)(2)(viii).

(3) *Accounting for qualified hedges*—(i) *In general.* Except as otherwise provided in paragraph (h)(4) of this section, payments made or received by the issuer under a qualified hedge are treated as payments made or received, as appropriate, on the hedged bonds that are taken into account in determining the yield on those bonds. These payments are reasonably allocated to the hedged bonds in the period to which the payments relate, as determined under paragraph (h)(3)(iii) of this section. Payments made or received by the issuer include payments deemed made or received when a contract is terminated or deemed terminated under this paragraph (h)(3). Payments reasonably allocable to the modification of risk of interest rate changes and to the hedge provider's overhead under this paragraph (h) are included as payments made or received under a qualified hedge.

(ii) *Exclusions from hedge.* If any payment for services or other items under the contract is not expressly treated by paragraph (h)(3)(i) of this section as a payment under the qualified hedge, the payment is not a payment with respect to a qualified hedge.

(iii) *Timing and allocation of payments.* Except as provided in paragraphs (h)(3)(iv) and (h)(5) of this section, payments made or received by the issuer under a qualified hedge are taken into account in the same period in which those amounts would be treated as income or deductions under §1.446–4 (without regard to §1.446–4(a)(2)(iv)) and are adjusted as necessary to reflect the end of a computation period and the start of a new computation period.

(iv) *Termination payments*—(A) *Termination defined.* A termination of a qualified hedge includes any sale or other disposition of the hedge by the issuer or the acquisition by the issuer of an offsetting hedge. A deemed termination occurs when the hedged bonds are redeemed or when a hedge ceases to be a qualified hedge of the hedged bonds. In the case of an assignment by a hedge provider of its remaining rights and obligations under the hedge to a third party or a modification of the hedging contract, the assignment or modification is treated as a termination with respect to the issuer only if it results in a deemed exchange of the hedge and a realization event under section 1001 to the issuer.

(B) *General rule.* A payment made or received by an issuer to terminate a qualified hedge, including loss or gain realized or deemed realized, is treated as a payment made or received on the hedged bonds, as appropriate. The payment is reasonably allocated to the remaining periods originally covered by the terminated hedge in a manner that reflects the economic substance of the hedge.

(C) *Special rule for terminations when bonds are redeemed.* Except as otherwise provided in this paragraph (h)(3)(iv)(C) and in paragraph (h)(3)(iv)(D) of this section, when a qualified hedge is deemed terminated because the hedged bonds are redeemed, the fair market value of the qualified hedge on the redemption date is treated as a termination payment made or received on that date. When hedged bonds are redeemed, any payment received by the issuer on termination of a hedge, including a termination payment or a deemed termination payment, reduces, but not below zero, the interest payments made by the issuer on the hedged bonds in the computation period ending on the termination date. The remainder of the payment, if any, is reasonably allocated over the bond years in the immediately preceding computation period or periods to the extent necessary to eliminate the excess.

(D) *Special rules for refundings.* To the extent that the hedged bonds are redeemed using the proceeds of a refunding issue, the termination payment is accounted for under paragraph (h)(3)(iv)(B) of this section by treating it as a payment on the refunding issue, rather than the hedged bonds. In addition, to the extent that the refunding issue is redeemed during the period to which the termination payment has been allocated to that issue, paragraph (h)(3)(iv)(C) of this section applies to the termination payment by treating it as a payment on the redeemed refunding issue.

(E) *Safe harbor for allocation of certain termination payments.* A payment to terminate a qualified hedge does not result in that hedge failing to satisfy the applicable provisions of paragraph (h)(3)(iv)(B) of this section if the payment is allocated in accordance with this paragraph (h)(3)(iv)(E). For an issue that is a variable yield issue after termination of a qualified hedge, an amount must be allocated to each date on which the hedge provider's payment, if any, would have been made had the hedge not been terminated. The amounts allocated to each date must bear the same ratio to the notional principal amount (within the meaning of §1.446–3) that would have been used to compute the hedge provider's payment, if any, on that date, and the sum of the present values of those amounts must equal the present value of the termination payment. Present value is computed as of the day the qualified hedge is terminated, using the yield on the hedged bonds, determined without regard to the termination payment. The yield used for this purpose is computed for the period beginning on the first date the qualified hedge is in effect and ending on the date the qualified hedge is terminated. On the other hand, for an issue that is a fixed yield issue after termination of a qualified hedge, the termination payment is taken into account as a single payment on the date it is paid.

(4) *Certain variable yield bonds treated as fixed yield bonds*—(i) *In general.* Except as otherwise provided in this paragraph (h)(4), if the issuer of variable yield bonds enters into a qualified hedge, the hedged bonds are treated as fixed yield bonds paying a fixed interest rate if:

(A) *Maturity.* The term of the hedge is equal to the entire period during which the hedged bonds bear interest at variable interest rates, and the issuer does not reasonably expect that the hedge will be terminated before the end of that period.

(B) *Payments closely correspond.* Payments to be received under the hedge correspond closely in time to the hedged portion of payments on the hedged bonds. Hedge payments received within 15 days of the related payments on the hedged bonds generally so correspond.

(C) *Aggregate payments fixed.* Taking into account all payments made and received under the hedge and all payments on the hedged bonds (*i.e.*, after netting all payments), the issuer's aggregate payments are fixed and determinable as of a date not later than 15 days after the issue date of the hedged bonds. Payments on bonds are treated as fixed for purposes of this paragraph (h)(4)(i)(C) if payments on the bonds are based, in whole or in part, on one interest rate, payments on the hedge are based, in whole or in part, on a second interest rate that is substantially the same as, but not identical to, the first interest rate and payments on the bonds would be fixed if the two rates were identical. Rates are treated as substantially the same if they are reasonably expected to be substantially the same throughout the term of the hedge. For example, an objective 30-day tax-exempt variable rate index or other objective index may be substantially the same as an issuer's individual 30-day interest rate.

(ii) *Accounting.* Except as otherwise provided in this paragraph (h)(4)(ii), in determining yield on the hedged bonds, all the issuer's payments on the hedged bonds and all payments made and received on a hedge described in paragraph (h)(4)(i) of this section are taken into account. If payments on the bonds and payments on the hedge are based, in whole or in part, on variable interest rates that are substantially the same within the meaning of paragraph (h)(4)(i)(C) of this section (but not identical), yield on the issue is determined by treating the variable interest rates as identical. For example, if variable rate bonds bearing interest at a weekly rate equal to the rate necessary to remarket the bonds at par are hedged with an interest rate swap under which the issuer receives payments based on a short-term floating rate index that is substantially the same as, but not identical to, the weekly rate on the bonds, the interest payments on the bonds are treated as equal to the payments received by the issuer under the swap for purposes of computing the yield on the bonds.

(iii) *Effect of termination*—(A) *In general.* Except as otherwise provided in this paragraph (h)(4)(iii) and paragraph (h)(5) of this section, the issue of which the hedged bonds are a part is treated as if it were reissued as of the termination date of the qualified hedge covered by paragraph (h)(4)(i) of this section in determining yield on the hedged bonds for purposes of §1.148–3. The redemption price of the retired issue and the issue price of the new issue equal the aggregate values of all the bonds of the issue on the termination date. In computing the yield on the new issue for this purpose, any termination payment is accounted for under paragraph (h)(3)(iv) of this section, applied by treating the termination payment as made or received on the new issue under this paragraph (h)(4)(iii).

(B) *Effect of early termination.* Except as otherwise provided in this paragraph (h)(4)(iii), the general rules of paragraph (h)(4)(i) of this section do not apply in determining the yield on the hedged bonds for purposes of §1.148–3 if the hedge is terminated or deemed terminated within 5 years after the issue date of the issue of which the hedged bonds are a part. Thus, the hedged bonds are treated as variable yield bonds for purposes of §1.148–3 from the issue date.

(C) *Certain terminations disregarded.* This paragraph (h)(4)(iii) does not apply to a termination if, based on the facts and circumstances (e.g., taking into account both the termination and any qualified hedge that immediately replaces the terminated hedge), there is no change in the yield.

(5) *Contracts entered into before issue date of hedged bond*—(i) *In general.* A contract does not fail to be a hedge under paragraph (h)(2)(i) of this section solely because it is entered into before the issue date of the hedged bond. However, that contract must be one to which either paragraph (h)(5)(ii) or (h)(5)(iii) of this section applies.

(ii) *Contracts expected to be closed substantially contemporaneously with the issue date of hedged bond*—(A) *Application.* This paragraph (h)(5)(ii) applies to a contract if, on the date the contract is identified, the issuer reasonably expects to terminate or otherwise close (terminate) the contract substantially contemporaneously with the issue date of the hedged bond.

(B) *Contract terminated.* If a contract to which this paragraph (h)(5)(ii) applies is terminated substantially contemporaneously with the issue date of the hedged bond, the amount paid or received, or deemed to be paid or received, by the issuer in connection with the issuance of the hedged bond to terminate the contract is treated as an adjustment to the issue price of the hedged bond and as an adjustment to the sale proceeds of the hedged bond for purposes of section 148. Amounts paid or received, or deemed to be paid or received, before the issue date of the hedged bond are treated as paid or received on the issue date in an amount equal to the future value of the payment or receipt on that date. For this purpose, future value is computed using yield on the hedged bond without taking into account amounts paid or received (or deemed paid or received) on the contract.

(C) *Contract not terminated.* If a contract to which this paragraph (h)(5)(ii) applies is not terminated substantially contemporaneously with the issue date of the hedged bond, the contract is deemed terminated for its fair market value as of the issue date of the hedged bond. Once a contract has been deemed terminated pursuant to this paragraph (h)(5)(ii)(C), payments on and receipts from the contract are no longer taken into account under this paragraph (h) for purposes of determining yield on the hedged bond.

(D) *Relation to other requirements of a qualified hedge*. Payments made in connection with the issuance of a bond to terminate a contract to which this paragraph (h)(5)(ii) applies do not prevent the contract from satisfying the requirements of paragraph (h)(2)(vi) of this section.

(E) *Fixed yield treatment*. A bond that is hedged with a contract to which this paragraph (h)(5)(ii) applies does not fail to be a fixed yield bond if, taking into account payments on the contract and the payments to be made on the bond, the bond satisfies the definition of fixed yield bond. See also paragraph (h)(4) of this section.

(iii) *Contracts expected not to be closed substantially contemporaneously with the issue date of hedged bond*—(A) *Application*. This paragraph (h)(5)(iii) applies to a contract if, on the date the contract is identified, the issuer does not reasonably expect to terminate the contract substantially contemporaneously with the issue date of the hedge bond.

(B) *Contract terminated*. If a contract to which this paragraph (h)(5)(iii) applies is terminated in connection with the issuance of the hedged bond, the amount paid or received, or deemed to be paid or received, by the issuer to terminate the contract is treated as an adjustment to the issue price of the hedged bond and as an adjustment to the sale proceeds of the hedged bond for purposes of section 148.

(C) *Contract not terminated*. If a contract to which this paragraph (h)(5)(iii) applies is not terminated substantially contemporaneously with the issue date of the hedged bond, no payments with respect to the hedge made by the issuer before the issue date of the hedged bond are taken into account under this section.

(iv) *Identification*. The identification required under paragraph (h)(2)(viii) of this section must specify the reasonably expected governmental purpose, issue price, maturity, and issue date of the hedged bond, the manner in which interest is reasonably expected to be computed, and whether paragraph (h)(5)(ii) or (h)(5)(iii) of this section applies to the contract. If an issuer identifies a contract under this paragraph (h)(5)(iv) that would be a qualified hedge with respect to the anticipated bond, but does not issue the anticipated bond on the identified issue date, the contract is taken into account as a qualified hedge of any bond of the issuer that is issued for the identified governmental purpose within a reasonable interval around the identified issue date of the anticipated bond.

(6) *Authority of the Commissioner*. The Commissioner, by publication of a revenue ruling or revenue procedure (see § 601.601(d)(2) of this chapter), may specify contracts that, although they do not meet the requirements of paragraph (h)(2) of this section, are qualified hedges or, although they do not meet the requirements of paragraph (h)(4) of this section, cause the hedged bonds to be treated as fixed yield bonds.

[T.D. 8476, 58 FR 33524, June 18, 1993; 58 FR 44452, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24042, May 10, 1994; T.D. 8718, 62 FR 25507, May 9, 1997; T.D. 8838, 64 FR 48547, Sept. 7, 1999]

§ 1.148–5 Yield and valuation of investments.

(a) *In general*. This section provides rules for computing the yield and value of investments allocated to an issue for various purposes under section 148.

(b) *Yield on an investment*—(1) *In general*. Except as otherwise provided, the yield on an investment allocated to an issue is computed under the economic accrual method, using the same compounding interval and financial conventions used to compute the yield on the issue. The yield on an investment allocated to an issue is the discount rate that, when used in computing the present value as of the date the investment is first allocated to the issue of all unconditionally payable receipts from the investment, produces an amount equal to the present value of all unconditionally payable payments for the investment. For this purpose, *payments* means amounts to be actually or constructively paid to acquire the investment, and *receipts* means amounts to be actually or constructively received from the investment, such as earnings and return of principal. The yield on a variable rate investment is determined in a manner comparable to the determination of the yield on a variable rate issue. For an issue of qualified mortgage bonds, qualified veterans' mortgage bonds, or qualified student loan bonds on which interest is paid semiannually, all regular monthly loan payments to be received during a semiannual debt service period may be treated as received at the end of that period. In addition, for any conduit financing issue, payments made by the conduit borrower are not treated as paid until the conduit borrower ceases to receive the benefit of earnings on those amounts.

(2) *Yield on a separate class of investments*—(i) *In general.* For purposes of the yield restriction rules of section 148(a) and §1.148–2, yield is computed separately for each class of investments. For this purpose, in determining the yield on a separate class of investments, the yield on each individual investment within the class is blended with the yield on other individual investments within the class, whether or not held concurrently, by treating those investments as a single investment. The yields on investments that are not within the same class are not blended.

(ii) *Separate classes of investments.* Each of the following is a separate class of investments—

(A) Each category of yield restricted purpose investment and program investment that is subject to a different definition of *materially higher* under §1.148–2(d)(2);

(B) Yield-restricted nonpurpose investments; and

(C) All other nonpurpose investments;

(iii) *Permissive application of single investment rules to certain yield restricted investments for all purposes of section 148.* For all purposes of section 148, if an issuer reasonably expects as of the issue date to establish and maintain a sinking fund solely to reduce the yield on the investments in a refunding escrow, then the issuer may treat all of the yield restricted nonpurpose investments in the refunding escrow and that sinking fund as a single investment having a single yield, determined under this paragraph (b)(2). Thus, an issuer may not treat the nonpurpose investments in a reasonably required reserve fund and a refunding escrow as a single investment having a single yield under this paragraph (b)(2)(iii).

(iv) *Mandatory application of single investment rules for refunding escrows for all purposes of section 148.* For all purposes of section 148, in computing the yield on yield restricted investments allocable to proceeds (*i.e.*, sale proceeds, investment proceeds, and transferred proceeds) of a refunding issue that are held in one or more refunding escrows, the individual investments are treated as a single investment having a single yield, whether or not held concurrently. For example, this single investment includes both the individual investments allocable to sale and investment proceeds of a refunding issue that are held in one refunding escrow for a prior issue and the investments allocable to transferred proceeds of that refunding issue that are held in another refunding escrow.

(3) *Investments to be held beyond issue's maturity or beyond temporary period.* In computing the yield on investments allocable to an issue that are to be held beyond the reasonably expected redemption date of the issue, those investments are treated as sold for an amount equal to their value on that date. In computing the yield on investments that are held beyond an applicable temporary period under §1.148–2, for purposes of §1.148–2 those investments may be treated as purchased for an amount equal to their fair market value as of the end of the temporary period.

(4) *Consistent redemption assumptions on purpose investments.* The yield on purpose investments allocable to an issue is computed using the same redemption assumptions used to compute the yield on the issue. Yield on purpose investments allocable to an issue of qualified mortgage bonds and qualified

veterans' mortgage bonds must be determined in a manner that is consistent with, and using the assumptions required by, section 143(g)(2)(B).

(5) *Student loan special allowance payments included in yield.* Except as provided in §1.148–11(e), the yield on qualified student loans is computed by including as receipts any special allowance payments made by the Secretary of Education pursuant to section 438 of the Higher Education Act of 1965.

(c) *Yield reduction payments to the United States*—(1) *In general.* In determining the yield on an investment to which this paragraph (c) applies, any amount paid to the United States in accordance with this paragraph (c), including a rebate amount, is treated as a payment for that investment that reduces the yield on that investment.

(2) *Manner of payment*—(i) *In general.* Except as otherwise provided in paragraph (c)(2)(ii) of this section, an amount is paid under this paragraph (c) if it is paid to the United States at the same time and in the same manner as rebate amounts are required to be paid or at such other time or in such manner as the Commissioner may prescribe. For example, yield reduction payments must be made on or before the date of required rebate installment payments as described in §§1.148–3(f), (g), and (h). The provisions of §1.148–3(i) apply to payments made under this paragraph (c).

(ii) *Special rule for purpose investments.* For purpose investments allocable to an issue—

(A) No amounts are required to be paid to satisfy this paragraph (c) until the earlier of the end of the tenth bond year after the issue date of the issue or 60 days after the date on which the issue is no longer outstanding; and

(B) For payments made prior to the date on which the issue is retired, the issuer need not pay more than 75 percent of the amount otherwise required to be paid as of the date to which the payment relates.

(3) *Applicability of special yield reduction rule*—(i) *Covered investments.* This paragraph (c) applies to—

(A) Nonpurpose investments allocable to proceeds of an issue that qualified for one of the temporary periods available for capital projects, restricted working capital expenditures, pooled financings, or investment proceeds under §1.148–2(e)(2), (e)(3), (e)(4), or (e)(6), respectively;

(B) Investments allocable to a variable yield issue during any computation period in which at least 5 percent of the value of the issue is represented by variable yield bonds, unless the issue is an issue of hedge bonds (as defined in section 149(g)(3)(A));

(C) Nonpurpose investments allocable to transferred proceeds of—

(*1*) A current refunding issue to the extent necessary to reduce the yield on those investments to satisfy yield restrictions under section 148(a); or

(*2*) An advance refunding issue to the extent that investment of the refunding escrows allocable to the proceeds, other than transferred proceeds, of the refunding issue in zero-yielding nonpurpose investments is insufficient to satisfy yield restrictions under section 148(a);

(D) Purpose investments allocable to qualified student loans under a program described in section 144(b)(1)(A);

(E) Nonpurpose investments allocable to gross proceeds of an issue in a reasonably required reserve or replacement fund or in a fund that, except for its failure to satisfy the size limitation in §1.148–2(f)(2)(ii), would qualify as a reasonably required reserve or replacement fund, but only to the extent that—

(*1*) The value of the nonpurpose investments in the fund is not greater than 15 percent of the stated principal amount of the issue, as computed under §1.148–2(f)(2)(ii), or

(*2*) The amounts in the fund (other than investment earnings) are not reasonably expected to be used to pay debt service on the issue other than in connection with reductions in the amount required to be in that fund (e.g. a reserve fund for a revolving fund loan program);

(F) Nonpurpose investments allocated to replacement proceeds of a refunded issue as a result of the application of the universal cap to amounts in a refunding escrow (see §1.148–11(c)(1)(ii)); and

(G) Investments described in §1.148–11(f).

(ii) *Exception to yield reduction payments rule for advance refunding issues.* Paragraph (c)(1) of this section does not apply to investments allocable to gross proceeds of an advance refunding issue, other than—

(A) Transferred proceeds to which paragraph (c)(3)(i)(C) of this section applies;

(B) Replacement proceeds to which paragraph (c)(3)(i)(F) of this section applies; and

(C) Transferred proceeds to which paragraph (c)(3)(i)(E) of this section applies, but only to the extent necessary to satisfy yield restriction under section 148(a) on those proceeds treating all investments allocable to those proceeds as a separate class.

(d) *Value of investments*—(1) *In general.* Except as otherwise provided, the value of an investment (including a payment or receipt on the investment) on a date must be determined using one of the following valuation methods consistently for all purposes of section 148 to that investment on that date:

(i) *Plain par investment—outstanding principal amount.* A plain par investment may be valued at its outstanding stated principal amount, plus any accrued unpaid interest on that date.

(ii) *Fixed rate investment—present value.* A fixed rate investment may be valued at its present value on that date.

(iii) *Any investment—fair market value.* An investment may be valued at its fair market value on that date.

(2) *Mandatory valuation of yield restricted investments at present value.* Any yield restricted investment must be valued at present value. For example, a purpose investment or an investment allocable to gross proceeds in a refunding escrow after the expiration of the initial temporary period must be valued at present value. See, however, paragraph (b)(3) of this section.

(3) *Mandatory valuation of certain investments at fair market value*—(i) *In general.* Except as provided in paragraphs (d)(2), (d)(3)(ii), and (d)(4) of this section, an investment must be valued at fair market value on the date that it is first allocated to an issue or first ceases to be allocated to an issue as a consequence of a deemed acquisition or deemed disposition. For example, if an issuer deposits existing investments into a sinking fund for an issue, those investments must be valued at fair market value as of the date first deposited into the fund.

(ii) *Exception to fair market value requirement for transferred proceeds allocations, universal cap allocations, and commingled funds.* Paragraph (d)(3)(i) of this section does not apply if the investment is allocated from one issue to another issue as a result of the transferred proceeds allocation rule under §1.148–9(b) or the universal cap rule under §1.148–6(b)(2), provided that both issues consist exclusively of tax-exempt bonds. In addition, paragraph (d)(3)(i) of this section does not apply to investments in a commingled fund (other than a bona fide debt service fund) unless it is an investment being initially deposited in or withdrawn from a commingled fund described in §1.148–6(e)(5)(iii).

(4) *Special transition rule for transferred proceeds.* The value of a nonpurpose investment that is allocated to transferred proceeds of a refunding issue on a transfer date may not exceed the value of that investment on the transfer date used for purposes of applying the arbitrage restrictions to the refunded issue.

(5) *Definition of present value of an investment.* Except as otherwise provided, present value of an investment is computed under the economic accrual method, using the same compounding interval and financial conventions used to compute the yield on the issue. The present value of an investment on a date is equal to the present value of all unconditionally payable receipts to be received from and payments to be paid for the investment after that date, using the yield on the investment as the discount rate.

(6) *Definition of fair market value*—(i) *In general.* The fair market value of an investment is the price at which a willing buyer would purchase the investment from a willing seller in a bona fide, arm's-length transaction. Fair market value generally is determined on the date on which a contract to purchase or sell the nonpurpose investment becomes binding (*i.e.*, the trade date rather than the settlement date). Except as otherwise provided in this

paragraph (d)(6), an investment that is not of a type traded on an established securities market, within the meaning of section 1273, is rebuttably presumed to be acquired or disposed of for a price that is not equal to its fair market value. The fair market value of a United States Treasury obligation that is purchased directly from the United States Treasury is its purchase price.

(ii) *Safe harbor for establishing fair market value for certificates of deposit.* This paragraph (d)(6)(ii) applies to a certificate of deposit that has a fixed interest rate, a fixed payment schedule, and a substantial penalty for early withdrawal. The purchase price of such a certificate of deposit is treated as its fair market value on the purchase date if the yield on the certificate of deposit is not less than—

(A) The yield on reasonably comparable direct obligations of the United States; and

(B) The highest yield that is published or posted by the provider to be currently available from the provider on reasonably comparable certificates of deposit offered to the public.

(iii) *Safe harbor for establishing fair market value for guaranteed investment contracts and investments purchased for a yield restricted defeasance escrow.* The purchase price of a guaranteed investment contract and the purchase price of an investment purchased for a yield restricted defeasance escrow will be treated as the fair market value of the investment on the purchase date if all of the following requirements are satisfied:

(A) The issuer makes a bona fide solicitation for the purchase of the investment. A bona fide solicitation is a solicitation that satisfies all of the following requirements:

(*1*) The bid specifications are in writing and are timely forwarded to potential providers.

(*2*) The bid specifications include all material terms of the bid. A term is material if it may directly or indirectly affect the yield or the cost of the investment.

(*3*) The bid specifications include a statement notifying potential providers that submission of a bid is a representation that the potential provider did not consult with any other potential provider about its bid, that the bid was determined without regard to any other formal or informal agreement that the potential provider has with the issuer or any other person (whether or not in connection with the bond issue), and that the bid is not being submitted solely as a courtesy to the issuer or any other person for purposes of satisfying the requirements of paragraph (d)(6)(iii)(B)(*1*) or (*2*) of this section.

(*4*) The terms of the bid specifications are commercially reasonable. A term is commercially reasonable if there is a legitimate business purpose for the term other than to increase the purchase price or reduce the yield of the investment. For example, for solicitations of investments for a yield restricted defeasance escrow, the hold firm period must be no longer than the issuer reasonably requires.

(*5*) For purchases of guaranteed investment contracts only, the terms of the solicitation take into account the issuer's reasonably expected deposit and drawdown schedule for the amounts to be invested.

(*6*) All potential providers have an equal opportunity to bid. For example, no potential provider is given the opportunity to review other bids (*i.e.*, a last look) before providing a bid.

(*7*) At least three reasonably competitive providers are solicited for bids. A reasonably competitive provider is a provider that has an established industry reputation as a competitive provider of the type of investments being purchased.

(B) The bids received by the issuer meet all of the following requirements:

(*1*) The issuer receives at least three bids from providers that the issuer solicited under a bona fide solicitation meeting the requirements of paragraph (d)(6)(iii)(A) of this section and that do not have a material financial interest in the issue. A lead underwriter in a negotiated underwriting transaction is deemed to have a material financial interest in the issue until 15 days after the issue date of the issue. In addition, any entity acting as a financial advisor with respect to the purchase of the investment at the time the bid specifications are forwarded to potential providers has a material financial interest in the issue. A provider that is a related party to a provider that has a material financial interest in the issue is deemed to have a material financial interest in the issue.

(*2*) At least one of the three bids described in paragraph (d)(6)(iii)(B)(*1*) of this section is from a reasonably competitive provider, within the meaning of paragraph (d)(6)(iii)(A)(*7*) of this section.

(*3*) If the issuer uses an agent to conduct the bidding process, the agent did not bid to provide the investment.

(C) The winning bid meets the following requirements:

(*1*) *Guaranteed investment contracts.* If the investment is a guaranteed investment contract, the winning bid is the highest yielding bona fide bid (determined net of any broker's fees).

(*2*) *Other investments.* If the investment is not a guaranteed investment contract, the following requirements are met:

(*i*) The winning bid is the lowest cost bona fide bid (including any broker's fees). The lowest cost bid is either the lowest cost bid for the portfolio or, if the issuer compares the bids on an investment-by-investment basis, the aggregate cost of a portfolio comprised of the lowest cost bid for each investment. Any payment received by the issuer from a provider at the time a guaranteed investment contract is purchased (e.g., an escrow float contract) for a yield restricted defeasance escrow under a bidding procedure meeting the requirements of this paragraph (d)(6)(iii) is taken into account in determining the lowest cost bid.

(*ii*) The lowest cost bona fide bid (including any broker's fees) is not greater than the cost of the most efficient portfolio comprised exclusively of State and Local Government Series Securities from the United States Department of the Treasury, Bureau of Public Debt. The cost of the most efficient portfolio of State and Local Government Series Securities is to be determined at the time that bids are required to be submitted pursuant to the terms of the bid specifications.

(*iii*) If State and Local Government Series Securities from the United States Department of the Treasury, Bureau of Public Debt are not available for purchase on the day that bids are required to be submitted pursuant to terms of the bid specifications because sales of those securities have been suspended, the cost comparison of paragraph (d)(6)(iii) (C)(*2*)(*ii*) of this section is not required.

(D) The provider of the investments or the obligor on the guaranteed investment contract certifies the administrative costs that it pays (or expects to pay, if any) to third parties in connection with supplying the investment.

(E) The issuer retains the following records with the bond documents until three years after the last outstanding bond is redeemed:

(*1*) For purchases of guaranteed investment contracts, a copy of the contract, and for purchases of investments other than guaranteed investment contracts, the purchase agreement or confirmation.

(*2*) The receipt or other record of the amount actually paid by the issuer for the investments, including a record of any administrative costs paid by the issuer, and the certification under paragraph (d)(6)(iii)(D) of this section.

(*3*) For each bid that is submitted, the name of the person and entity submitting the bid, the time and date of the bid, and the bid results.

(*4*) The bid solicitation form and, if the terms of the purchase agreement or the guaranteed investment contract deviated from the bid solicitation form or a submitted bid is modified, a brief statement explaining the deviation and stating the purpose for the deviation. For example, if the issuer purchases a portfolio of investments for a yield restricted defeasance escrow and, in order to satisfy the yield restriction requirements of section 148, an investment in the winning bid is replaced with an investment with a lower yield, the issuer must retain a record of the substitution and how the price of the substitute investment was determined. If the issuer replaces an investment in the winning bid portfolio with another investment, the purchase price of the new investment is not covered by the safe harbor unless the investment is bid under a bidding procedure meeting the requirements of this paragraph (d)(6)(iii).

(*5*) For purchases of investments other than guaranteed investment contracts, the cost of the most efficient portfolio of State and Local Government Series Securities, determined at the time that the bids were required to be submitted pursuant to the terms of the bid specifications.

(e) *Administrative costs of investments*—(1) *In general*. Except as otherwise provided in this paragraph (e), an allocation of gross proceeds of an issue to a payment or a receipt on an investment is not adjusted to take into account any costs or expenses paid, directly or indirectly, to purchase, carry, sell, or retire the investment (administrative costs). Thus, these administrative costs generally do not increase the payments for, or reduce the receipts from, investments.

(2) *Qualified administrative costs on nonpurpose investments*—(i) *In general*. In determining payments and receipts on nonpurpose investments, qualified administrative costs are taken into account. Thus, qualified administrative costs increase the payments for, or decrease the receipts from, the investments. Qualified administrative costs are reasonable, direct administrative costs, other than carrying costs, such as separately stated brokerage or selling commissions, but not legal and accounting fees, recordkeeping, custody, and similar costs. General overhead costs and similar indirect costs of the issuer such as employee salaries and office expenses and costs associated with computing the rebate amount under section 148(f) are not qualified administrative costs. In general, administrative costs are not reasonable unless they are comparable to administrative costs that would be charged for the same investment or a reasonably comparable investment if acquired with a source of funds other than gross proceeds of tax-exempt bonds.

(ii) *Special rule for administrative costs of nonpurpose investments in certain regulated investment companies and commingled funds*. Qualified administrative costs include all reasonable administrative costs, without regard to the limitation on indirect costs under paragraph (e)(2)(i) of this section, incurred by:

(A) *Regulated investment companies*. A publicly offered regulated investment company (as defined in section 67(c)(2)(B)); and

(B) *External commingled funds*. A widely held commingled fund in which no investor in the fund owns more than 10 percent of the beneficial interest in the fund. For purposes of this paragraph (e)(2)(ii)(B), a fund is treated as widely held only if, during the immediately preceding fixed, semiannual period chosen by the fund (e.g., semiannual periods ending June 30 and December 31), the fund had a daily average of more than 15 investors that were not related parties, and the daily average amount each investor had invested in the fund was not less than the lesser of $500,000 and 1 percent of the daily average of the total amount invested in the fund. For purposes of this paragraph (e)(2)(ii)(B), an investor will be treated as owning not more than 10 percent of the beneficial interest in the fund if, on the date of each deposit by the investor into the fund, the total amount the investor and any related parties have on deposit in the fund is not more than 10 percent of the total amount that all investors have on deposit in the fund. For purposes of the preceding sentence, the total amount that all investors have on deposit in the fund is equal to the sum of all deposits made by the investor and any related parties on the date of those deposits and the closing balance in the fund on the day before those deposits. If any investor in the fund owns more than 10 percent of the beneficial interest in the fund, the fund does not qualify under this paragraph (e)(2)(ii)(B) until that investor makes sufficient withdrawals from the fund to reduce its beneficial interest in the fund to 10 percent or less.

(iii) *Special rule for guaranteed investment contracts and investments purchased for a yield restricted defeasance escrow*—(A) *In general*. An amount paid for a broker's commission or similar fee with respect to a guaranteed investment contract or investments purchased for a yield restricted defeasance escrow is a qualified administrative cost if the fee is reasonable within the meaning of paragraph (e)(2)(i) of this section.

(B) *Safe harbor*—(*1*) *In general.* A broker's commission or similar fee with respect to the acquisition of a guaranteed investment contract or investments purchased for a yield restricted defeasance escrow is reasonable within the meaning of paragraph (e)(2)(i) of this section to the extent that—

(*i*) The amount of the fee that the issuer treats as a qualified administrative cost does not exceed the lesser of:

(*A*) $30,000 and

(*B*) 0.2% of the computational base or, if more, $3,000; and

(*ii*) For any issue, the issuer does not treat as qualified administrative costs more than $85,000 in brokers' commissions or similar fees with respect to all guaranteed investment contracts and investments for yield restricted defeasance escrows purchased with gross proceeds of the issue.

(*2*) *Computational base.* For purposes of paragraph (e)(2)(iii)(B)(*1*) of this section, computational base shall mean—

(*i*) For a guaranteed investment contract, the amount of gross proceeds the issuer reasonably expects, as of the date the contract is acquired, to be deposited in the guaranteed investment contract over the term of the contract, and

(*ii*) For investments (other than guaranteed investment contracts) to be deposited in a yield restricted defeasance escrow, the amount of gross proceeds initially invested in those investments.

(*3*) *Cost-of-living adjustment.* In the case of a calendar year after 2004, each of the dollar amounts in paragraph (e)(2)(iii)(B)(*1*) of this section shall be increased by an amount equal to—

(*i*) Such dollar amount; multiplied by

(*ii*) The cost-of-living adjustment determined under section 1(f)(3) for such calendar year by using the language ''calendar year 2003'' instead of ''calendar year 1992'' in section 1(f)(3)(B).

(*4*) *Rounding.* If any increase determined under paragraph (e)(2)(iii)(B)(*3*) of this section is not a multiple of $1,000, such increase shall be rounded to the nearest multiple thereof.

(*5*) *Applicable year for cost-of-living adjustment.* The cost-of-living adjustments under paragraph (e)(2)(iii)(B)(*3*) of this section shall apply to the safe harbor amounts under paragraph (e)(2)(iii)(B)(*1*) of this section based on the year the guaranteed investment contract or the investments for the yield restricted defeasance escrow, as applicable, are acquired.

(*6*) *Cost-of-living adjustment to determine remaining amount of per-issue safe harbor*—(i) *In general.* This paragraph (e)(2)(iii)(B)(*6*) applies to determine the portion of the safe harbor amount under paragraph (e)(2)(iii)(B)(1)(*ii*) of this section, as modified by paragraph (e)(2)(iii)(B)(*3*) of this section (the per-issue safe harbor), that is available (the remaining amount) for any year (the determination year) if the per-issue safe harbor was partially used in one or more prior years.

(*ii*) *Remaining amount of per-issue safe harbor.* The remaining amount of the per-issue safe harbor for any determination year is equal to the per-issue safe harbor for that year, reduced by the portion of the per-issue safe harbor used in one or more prior years.

(*iii*) *Portion of per-issue safe harbor used in prior years.* The portion of the per-issue safe harbor used in any prior year (the prior year) is equal to the total amount of broker's commissions or similar fees paid in connection with guaranteed investment contracts or investments for a yield restricted defeasance escrow acquired in the prior year that the issuer treated as qualified administrative costs for the issue, multiplied by a fraction the numerator of which is the per-issue safe harbor for the determination year and the denominator of which is the per-issue safe harbor for the prior year. See paragraph (e)(2)(iii)(C) *Example 2* of this section.

(C) *Examples.* The following examples illustrate the application of the safe harbor in paragraph (e)(2)(iii)(B) of this section:

Example 1. Multipurpose issue. In 2003, the issuer of a multipurpose issue uses brokers to acquire the following investments with gross proceeds of the issue: a guaranteed investment contract for amounts to be deposited in a construction fund (construction GIC), Treasury securities to be deposited in a yield restricted defeasance escrow (Treasury investments) and a guaranteed investment contract that will be used to earn a return on what otherwise would be idle cash balances from maturing investments in the yield restricted defeasance escrow (the float GIC). The issuer deposits $22,000,000 into the construction GIC and reasonably expects that no further deposits will be made over its term. The issuer uses $8,040,000 of the proceeds to purchase the Treasury investments. The issuer reasonably expects that it will make aggregate deposits of $600,000 to the float GIC over its term. The brokers' fees are $30,000 for the construction GIC, $16,080 for the Treasury investments and $3,000 for the float GIC. The issuer has not previously treated any brokers' commissions or similar fees as qualified administrative costs. The issuer may claim all $49,080 in brokers' fees for these investments as qualified administrative costs because the fees do not exceed the safe harbors in paragraph (e)(2)(iii)(B) of this section. Specifically, each of the brokers' fees equals the lesser of $30,000 and 0.2% of the computational base (or, if more, $3,000) (*i.e.*, lesser of $30,000 and 0.2% × $22,000,000 for the construction GIC; lesser of $30,000 and 0.2% × $8,040,000 for the Treasury investments; and lesser of $30,000 and $3,000 for the float GIC). In addition, the total amount of brokers' fees claimed by the issuer as qualified administrative costs ($49,080) does not exceed the per-issue safe harbor of $85,000.

Example 2. Cost-of-living adjustment. In 2003, an issuer issues bonds and uses gross proceeds of the issue to acquire two guaranteed investment contracts. The issuer pays a total of $50,000 in brokers' fees for the two guaranteed investment contracts and treats these fees as qualified administrative costs. In a year subsequent to 2003 (Year Y), the issuer uses gross proceeds of the issue to acquire two additional guaranteed investment contracts, paying a total of $20,000 in broker's fees for the two guaranteed investment contracts, and treats those fees as qualified administrative costs. For Year Y, applying the cost-of-living adjustment under paragraph (e)(2)(iii)(B)(*3*) of this section, the safe harbor dollar limits under paragraph (e)(2)(iii)(B)(*1*) of this section are $3,000, $32,000 and $90,000. The remaining amount of the per-issue safe harbor for Year Y is $37,059 ($90,000–[$50,000 × $90,000/$85,000]). The broker's fees in Year Y do not exceed the per-issue safe harbor under paragraph (e)(2)(iii)(B)(*1*)(*ii*) (as modified by paragraph (e)(2)(iii)(B)(*3*)) of this section because the broker's fees do not exceed the remaining amount of the per-issue safe harbor determined under paragraph (e)(2)(iii)(B)(*6*) of this section for Year Y. In a year subsequent to Year Y (Year Z), the issuer uses gross proceeds of the issue to acquire an additional guaranteed investment contract, pays a broker's fee of $15,000 for the guaranteed investment contract, and treats the broker's fee as a qualified administrative cost. For Year Z, applying the cost-of-living adjustment under paragraph (e)(2)(iii)(B)(*3*) of this section, the safe harbor dollar limits under paragraph (e)(2)(iii)(B)(*1*) of this section are $3,000, $33,000 and $93,000. The remaining amount of the per-issue safe harbor for Year Z is $17,627 ($93,000—[($50,000 × $93,000/$85,000) + ($20,000 × $93,000/$90,000)]). The broker's fee incurred in Year Z does not exceed the per-issue safe harbor under paragraph (e)(2)(iii)(B)(*1*)(*ii*) (as modified by paragraph (e)(2)(iii)(B)(*3*)) of this section because the broker's fee does not exceed the remaining amount of the per-issue safe harbor determined under paragraph (e)(2)(iii)(B)(*6*) of this section for Year Z. See paragraph (e)(2)(iii)(B)(*6*) of this section.

(3) *Qualified administrative costs on purpose investments*—(i) *In general.* In determining payments and receipts on purpose investments, qualified administrative costs described in this paragraph (e)(3) paid by the conduit borrower are taken into account. Thus, these costs increase the payments for, or decrease the receipts from, the purpose investments. This rule applies even if those payments merely reimburse the issuer. Although the actual payments by the conduit borrower may be made at any time, for this purpose, a pro rata portion of each payment made by a conduit borrower is treated as a reimbursement of reasonable administrative costs, if the present value of those payments does not exceed the present value of the reasonable administrative costs paid by the issuer, using the yield on the issue as the discount rate.

(ii) *Definition of qualified administrative costs of purpose investments*—(A) *In general.* Except as otherwise provided in this paragraph (e)(3)(ii), qualified administrative costs of a purpose investment means—

(*1*) Costs or expenses paid, directly or indirectly, to purchase, carry, sell, or retire the investment; and

(*2*) Costs of issuing, carrying, or repaying the issue, and any underwriters' discount.

(B) *Limitation on program investments.* For a program investment, qualified administrative costs include only those costs described in paragraph (e)(3)(ii)(A)(*2*) of this section.

[T.D. 8476, 58 FR 33529, June 18, 1993; 58 FR 44452, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24044, May 10, 1994; T.D. 8718, 62 FR 25511, May 9, 1997; T.D. 8801, 63 FR 71751, Dec. 30, 1998; T.D. 9097, 68 FR 69022, Dec. 11, 2003]

§ 1.148–6 General allocation and accounting rules.

(a) *In general*—(1) *Reasonable accounting methods required.* An issuer may use any reasonable, consistently applied accounting method to account for gross proceeds, investments, and expenditures of an issue.

(2) *Bona fide deviations from accounting method.* An accounting method does not fail to be reasonable and consistently applied solely because a different accounting method is used for a bona fide governmental purpose to consistently account for a particular item. Bona fide governmental purposes may include special State law restrictions imposed on specific funds or actions to avoid grant forfeitures.

(3) *Absence of allocation and accounting methods.* If an issuer fails to maintain books and records sufficient to establish the accounting method for an issue and the allocation of the proceeds of that issue, the rules of this section are applied using the specific tracing method. This paragraph (a)(3) applies to bonds issued on or after May 16, 1997.

(b) *Allocation of gross proceeds to an issue*—(1) *One-issue rule and general ordering rules.* Except as otherwise provided, amounts are allocable to only one issue at a time as gross proceeds, and if amounts simultaneously are proceeds of one issue and replacement proceeds of another issue, those amounts are allocable to the issue of which they are proceeds. Amounts cease to be allocated to an issue as proceeds only when those amounts are allocated to an expenditure for a governmental purpose, are allocated to transferred proceeds of another issue, or cease to be allocated to that issue at retirement of the issue or under the universal cap of paragraph (b)(2) of this section. Amounts cease to be allocated to an issue as replacement proceeds only when those amounts are allocated to an expenditure for a governmental purpose, are no longer used in a manner that causes those amounts to be replacement proceeds of that issue, or cease to be allocated to that issue because of the retirement of the issue or the application of the universal cap under paragraph (b)(2) of this section. Amounts that cease to be allocated to an issue as gross proceeds are eligible for allocation to another issue. Under §1.148–10(a), however, the rules in this paragraph (b)(1) do not apply in certain cases involving abusive arbitrage devices.

(2) *Universal cap on value of nonpurpose investments allocated to an issue*—(i) *Application.* The rules in this paragraph (b)(2) provide an overall limitation on the amount of gross proceeds allocable to an issue. Although the universal cap generally may be applied at any time in the manner described in this paragraph (b)(2), it need not be applied on any otherwise required date of application if its application on that date would not result in a reduction or reallocation of gross proceeds of an issue. For this purpose, if an issuer reasonably expects as of the issue date that the universal cap will not reduce the amount of gross proceeds allocable to the issue during the term of the issue, the universal cap need not be applied on any date on which an issue actually has all of the following characteristics—

(A) No replacement proceeds are allocable to the issue, other than replacement proceeds in a bona fide debt service fund or a reasonably required reserve or replacement fund;

(B) The net sale proceeds of the issue—

(*1*) Qualified for one of the temporary periods available for capital projects, restricted working capital expenditures, or pooled financings under §1.148–2 (e)(2), (e)(3), or (e)(4), and those net sales proceeds were in fact allocated to expenditures prior to the expiration of the longest applicable temporary period; or

(*2*) were deposited in a refunding escrow and expended as originally expected;

(C) The issue does not refund a prior issue that, on any transfer date, has unspent proceeds allocable to it;

(D) None of the bonds are retired prior to the date on which those bonds are treated as retired in computing the yield on the issue; and

(E) No proceeds of the issue are invested in qualified student loans or qualified mortgage loans.

(ii) *General rule.* Except as otherwise provided below, amounts that would otherwise be gross proceeds allocable to an issue are allocated (and remain allocated) to the issue only to the extent that the value of the nonpurpose investments allocable to those gross proceeds does not exceed the value of all outstanding bonds of the issue. For this purpose, gross proceeds allocable to cash, tax-exempt bonds that would be nonpurpose investments (absent section 148(b)(3)(A)), qualified student loans, and qualified mortgage loans are treated as nonpurpose investments. The values of bonds and investments are determined under §1.148–4(e) and §1.148–5(d), respectively. The value of all outstanding bonds of the issue is referred to as the *universal cap*. Thus, for example, the universal cap for an issue of plain par bonds is equal to the outstanding stated principal amount of those bonds plus accrued interest.

(iii) *Determination and application of the universal cap*. Except as otherwise provided, beginning with the first bond year that commences after the second anniversary of the issue date, the amount of the universal cap and the value of the nonpurpose investments must be determined as of the first day of each bond year. For refunding and refunded issues, the cap and values must be determined as of each date that, but for this paragraph (b)(2), proceeds of the refunded issue would become transferred proceeds of the refunding issue, and need not otherwise be determined in the bond year in which that date occurs. All values are determined as of the close of business on each determination date, after giving effect to all payments on bonds and payments for and receipts on investments on that date.

(iv) *General ordering rule for allocations of amounts in excess of the universal cap*—(A) *In general*. If the value of all nonpurpose investments allocated to the gross proceeds of an issue exceeds the universal cap for that issue on a date as of which the cap is determined under paragraph (b)(2)(iii) of this section, nonpurpose investments allocable to gross proceeds necessary to eliminate that excess cease to be allocated to the issue, in the following order of priority—

(*1*) First, nonpurpose investments allocable to replacement proceeds;

(*2*) Second, nonpurpose investments allocable to transferred proceeds; and

(*3*) Third, nonpurpose investments allocable to sale proceeds and investment proceeds.

(B) *Re-allocation of certain amounts*. Except as provided in §1.148–9(b)(3), amounts that cease to be allocated to an issue as a result of the application of the universal cap may only be allocated to another issue as replacement proceeds.

(C) *Allocations of portions of investments*. Portions of investments to which this paragraph (b)(2)(iv) applies are allocated under either the ratable method or the representative method in the same manner as allocations of portions of investments to transferred proceeds under §1.148–9(c).

(v) *Nonpurpose investments in a bona fide debt service fund not counted*. For purposes of this paragraph (b)(2), nonpurpose investments allocated to gross proceeds in a bona fide debt service fund for an issue are not taken into account in determining the value of the nonpurpose investments, and those nonpurpose investments remain allocated to the issue.

(c) *Fair market value limit on allocations to nonpurpose investments*. Upon a purchase or sale of a nonpurpose investment, gross proceeds of an issue are not allocated to a payment for that nonpurpose investment in an amount greater than, or to a receipt from that nonpurpose investment in an amount less than, the fair market value of the nonpurpose investment as of the purchase or sale date. For purposes of this paragraph (c) only, the fair market value of a nonpurpose investment is adjusted to take into account qualified administrative costs allocable to the investment.

(d) *Allocation of gross proceeds to expenditures*—(1) *Expenditures in general*—(i) *General rule*. Reasonable accounting methods for allocating funds from different sources to expenditures for the same governmental purpose include any of the following methods if consistently applied: a specific tracing method; a gross proceeds spent first method; a first-in, first-out method; or a ratable allocation method.

(ii) *General limitation*. An allocation of gross proceeds of an issue to an expenditure must involve a current outlay of cash for a governmental purpose of the issue. A *current outlay of cash* means an outlay reasonably expected to occur not later than 5 banking days after the date as of which the allocation of gross proceeds to the expenditure is made.

(iii) *Timing.* An issuer must account for the allocation of proceeds to expenditures not later than 18 months after the later of the date the expenditure is paid or the date the project, if any, that is financed by the issue is placed in service. This allocation must be made in any event by the date 60 days after the fifth anniversary of the issue date or the date 60 days after the retirement of the issue, if earlier. This paragraph (d)(1)(iii) applies to bonds issued on or after May 16, 1997.

(2) *Treatment of gross proceeds invested in purpose investments*—(i) *In general.* Gross proceeds of an issue invested in a purpose investment are allocated to an expenditure on the date on which the conduit borrower under the purpose investment allocates the gross proceeds to an expenditure in accordance with this paragraph (d).

(ii) *Exception for qualified mortgage loans and qualified student loans.* If gross proceeds of an issue are allocated to a purpose investment that is a qualified mortgage loan or a qualified student loan, those gross proceeds are allocated to an expenditure for the governmental purpose of the issue on the date on which the issuer allocates gross proceeds to that purpose investment.

(iii) *Continuing allocation of gross proceeds to purpose investments.* Regardless of whether gross proceeds of a conduit financing issue invested in a purpose investment have been allocated to an expenditure under paragraph (d)(2) (i) or (ii) of this section, with respect to the actual issuer those gross proceeds continue to be allocated to the purpose investment until the sale, discharge, or other disposition of the purpose investment.

(3) *Expenditures for working capital purposes*—(i) *In general.* Except as otherwise provided in this paragraph (d)(3) or paragraph (d)(4) of this section, proceeds of an issue may only be allocated to working capital expenditures as of any date to the extent that those working capital expenditures exceed available amounts (as defined in paragraph (d)(3)(iii) of this section) as of that date (*i.e.*, a ''proceeds-spent-last'' method). For this purpose, proceeds include replacement proceeds described in § 1.148–1(c)(4).

(ii) *Exceptions*—(A) *General de minimis exception.* Paragraph (d)(3)(i) of this section does not apply to expenditures to pay—

(*1*) Any issuance costs of the issue or any qualified administrative costs within the meaning of §§ 1.148–5(e)(2) (i) or (ii), or § 1.148–5(e)(3)(ii)(A);

(*2*) Fees for qualified guarantees of the issue or payments for a qualified hedge for the issue;

(*3*) Interest on the issue for a period commencing on the issue date and ending on the date that is the later of three years from the issue date or one year after the date on which the project is placed in service;

(*4*) Amounts paid to the United States under §§ 1.148–3, 1.148–5(c), or 1.148–7 for the issue;

(*5*) Costs, other than those described in paragraphs (d)(3)(ii)(A) (*1*) through (*4*) of this section, that do not exceed 5 percent of the sale proceeds of an issue and that are directly related to capital expenditures financed by the issue (e.g., initial operating expenses for a new capital project);

(*6*) Principal or interest on an issue paid from unexpected excess sale or investment proceeds; and

(*7*) Principal or interest on an issue paid from investment earnings on a reserve or replacement fund that are deposited in a bona fide debt service fund.

(B) *Exception for extraordinary items.* Paragraph (d)(3)(i) of this section does not apply to expenditures for extraordinary, nonrecurring items that are not customarily payable from current revenues, such as casualty losses or extraordinary legal judgments in amounts in excess of reasonable insurance coverage. If, however, an issuer or a related party maintains a reserve for such items (e.g., a self-insurance fund) or has set aside other available amounts for such expenses, gross proceeds within that reserve must be allocated to expenditures only after all other available amounts in that reserve are expended.

(C) *Exception for payment of principal and interest on prior issues.* Paragraph (d)(3)(i) of this section does not apply to expenditures for payment of principal, interest, or redemption prices on a prior issue and, for a crossover refunding issue, interest on that issue.

(D) *No exceptions if replacement proceeds created.* The exceptions provided in this paragraph (d)(3)(ii) do not apply if the allocation merely substitutes gross proceeds for other amounts that would have been used to make those expenditures in a manner that gives rise to replacement proceeds. For example, if a purported reimbursement allocation of proceeds of a reimbursement bond does not result in an expenditure under § 1.150–2, those proceeds may not be allocated to pay interest on an issue that, absent this allocation, would have been paid from the issuer's current revenues.

(iii) *Definition of available amount*—(A) *In general.* For purposes of this paragraph (d)(3), *available amount* means any amount that is available to an issuer for working capital expenditure purposes of the type financed by an issue. Except as otherwise provided, *available amount* excludes proceeds of the issue but includes cash, investments, and other amounts held in accounts or otherwise by the issuer or a related party if those amounts may be used by the issuer for working capital expenditures of the type being financed by an issue without legislative or judicial action and without a legislative, judicial, or contractual requirement that those amounts be reimbursed.

(B) *Reasonable working capital reserve treated as unavailable.* A reasonable working capital reserve is treated as unavailable. Any working capital reserve is reasonable if it does not exceed 5 percent of the actual working capital expenditures of the issuer in the fiscal year before the year in which the determination of available amounts is made. For this purpose only, in determining the working capital expenditures of an issuer for a prior fiscal year, any expenditures (whether capital or working capital expenditures) that are paid out of current revenues may be treated as working capital expenditures.

(C) *Qualified endowment funds treated as unavailable.* For a 501(c)(3) organization, a qualified endowment fund is treated as unavailable. A fund is a qualified endowment fund if—

(*1*) The fund is derived from gifts or bequests, or the income thereon, that were neither made nor reasonably expected to be used to pay working capital expenditures;

(*2*) Pursuant to reasonable, established practices of the organization, the governing body of the 501(c)(3) organization designates and consistently operates the fund as a permanent endowment fund or quasi-endowment fund restricted as to use; and

(*3*) There is an independent verification that the fund is reasonably necessary as part of the organization's permanent capital.

(D) *Application to statutory safe harbor for tax and revenue anticipation bonds.* For purposes of section 148(f)(4)(B)(iii)(II), *available amount* has the same meaning as in paragraph (d)(3)(iii) of this section, except that the otherwise-permitted reasonable working capital reserve is treated as part of the available amount.

(4) *Expenditures for grants*—(i) *In general.* Gross proceeds of an issue that are used to make a grant are allocated to an expenditure on the date on which the grant is made.

(ii) *Characterization of repayments of grants.* If any amount of a grant financed by gross proceeds of an issue is repaid to the grantor, the repaid amount is treated as unspent proceeds of the issue as of the repayment date unless expended within 60 days of repayment.

(iii) *Definition of grant. Grant* means a transfer for a governmental purpose of money or property to a transferee that is not a related party to or an agent of the transferor. The transfer must not impose any obligation or condition to directly or indirectly repay any amount to the transferor. Obligations or conditions intended solely to assure expenditure of the transferred moneys in accordance with the governmental purpose of the transfer do not prevent a transfer from being a grant.

(5) *Expenditures for reimbursement purposes.* In allocating gross proceeds of

issues of reimbursement bonds (as defined in §1.150–2)) to certain expenditures, §1.150–2 applies. In allocating gross proceeds to an expenditure to reimburse a previously paid working capital expenditure, paragraph (d)(3) of this section applies. Thus, if the expenditure is described in paragraph (d)(3)(ii) of this section or there are no available amounts on the date a working capital expenditure is made and there are no other available amounts on the date of the reimbursement of that expenditure, gross proceeds are allocated to the working capital expenditure as of the date of the reimbursement.

(6) *Expenditures of certain commingled investment proceeds of governmental issues.* This paragraph (d)(6) applies to any issue of governmental bonds, any issue of private activity bonds issued to finance a facility that is required by section 142 to be owned by a governmental unit, and any portion of an issue that is not treated as consisting of private activity bonds under section 141(b)(9). Investment proceeds of the issue (other than investment proceeds held in a refunding escrow) are treated as allocated to expenditures for a governmental purpose when the amounts are deposited in a commingled fund with substantial tax or other revenues from governmental operations of the issuer and the amounts are reasonably expected to be spent for governmental purposes within 6 months from the date of the commingling. In establishing these reasonable expectations, an issuer may use any reasonable accounting assumption and is not bound by the *proceeds-spent-last* assumption generally required for working capital expenditures under paragraph (d)(3) of this section.

(7) *Payments to related parties.* Any payment of gross proceeds of the issue to a related party of the payor is not an expenditure of those gross proceeds.

(e) *Special rules for commingled funds*—(1) *In general.* An accounting method for gross proceeds of an issue in a commingled fund, other than a bona fide debt service fund, is reasonable only if it satisfies the requirements of paragraphs (e)(2) through (6) of this section in addition to the other requirements of this section.

(2) *Investments held by a commingled fund*—(i) *Required ratable allocations.* Not less frequently than as of the close of each fiscal period, all payments and receipts (including deemed payments and receipts) on investments held by a commingled fund must be allocated (but not necessarily distributed) among the different investors in the fund. This allocation must be based on a consistently applied, reasonable ratable allocation method.

(ii) *Safe harbors for ratable allocation methods.* Reasonable ratable allocation methods include, without limitation, methods that allocate these items in proportion to either—

(A) The average daily balances of the amounts in the commingled fund from different investors during a fiscal period (as described in paragraph (e)(4) of this section); or

(B) The average of the beginning and ending balances of the amounts in the commingled fund from different investors for a fiscal period that does not exceed one month.

(iii) *Definition of investor.* For purposes of this paragraph (e), the term *investor* means each different source of funds invested in a commingled fund. For example, if a city invests gross proceeds of an issue and tax revenues in a commingled fund, it is treated as two different investors.

(3) *Certain expenditures involving a commingled fund.* If a ratable allocation method is used under paragraph (d) of this section to allocate expenditures from the commingled fund, the same ratable allocation method must be used to allocate payments and receipts on investments in the commingled fund under paragraph (e)(2) of this section.

(4) *Fiscal periods.* The fiscal year of a commingled fund is the calendar year unless the fund adopts another fiscal year. A commingled fund may use any consistent fiscal period that does not exceed three months (e.g., a daily, weekly, monthly, or quarterly fiscal period).

(5) *Unrealized gains and losses on investments of a commingled fund*—(i) *Mark-to-market requirement for internal commingled funds with longer-term investment portfolios.* Except as otherwise provided in this paragraph (e), in the case of a commingled fund in which the

issuer and any related party own more than 25 percent of the beneficial interests in the fund (an *internal commingled fund*), the fund must treat all its investments as if sold at fair market value either on the last day of the fiscal year or the last day of each fiscal period. The net gains or losses from these deemed sales of investments must be allocated to all investors of the commingled fund during the period since the last allocation.

(ii) *Exception for internal commingled funds with shorter-term investment portfolios.* If the remaining weighted average maturity of all investments held by a commingled fund during a particular fiscal year does not exceed 18 months, and the investments held by the commingled fund during that fiscal year consist exclusively of obligations, the mark-to-market requirement of paragraph (e)(5)(i) of this section does not apply.

(iii) *Exception for commingled reserve funds and sinking funds.* The mark-to-market requirement of paragraph (e)(5)(i) of this section does not apply to a commingled fund that operates exclusively as a reserve fund, sinking fund, or replacement fund for two or more issues of the same issuer.

(6) *Allocations of commingled funds serving as common reserve funds or sinking funds*—(i) *Permitted ratable allocation methods.* If a commingled fund serves as a common reserve fund, replacement fund, or sinking fund for two or more issues (a *commingled reserve*), after making reasonable adjustments to account for proceeds allocated under paragraph (b)(1) or (b)(2) of this section, investments held by that commingled fund must be allocated ratably among the issues served by the commingled fund in accordance with one of the following methods—

(A) The relative values of the bonds of those issues under §1.148–4(e);

(B) The relative amounts of the remaining maximum annual debt service requirements on the outstanding principal amounts of those issues; or

(C) The relative original stated principal amounts of the outstanding issues.

(ii) *Frequency of allocations.* An issuer must make any allocations required by this paragraph (e)(6) as of a date at least every 3 years and as of each date that an issue first becomes secured by the commingled reserve. If relative original principal amounts are used to allocate, allocations must also be made on the retirement of any issue secured by the commingled reserve.

[T.D. 8476, 58 FR 33532, June 18, 1993; 58 FR 44452, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24045, May 10, 1994; T.D. 8712, 62 FR 2304, Jan. 16, 1997; T.D. 8718, 62 FR 25512, May 9, 1997]

§ 1.148–7 Spending exceptions to the rebate requirement.

(a) *Scope of section*—(1) *In general.* This section provides guidance on the spending exceptions to the arbitrage rebate requirement of section 148(f)(2). These exceptions are the 6-month exception in section 148(f)(4)(B) (the *6-month exception*), the 18-month exception under paragraph (d) of this section (the *18-month exception*), and the 2-year construction exception under section 148(f)(4)(C) (the *2-year exception*) (collectively, the *spending exceptions*).

(2) *Relationship of spending exceptions.* Each of the spending exceptions is an independent exception to arbitrage rebate. For example, a construction issue may qualify for the 6-month exception or the 18-month exception even though the issuer makes one or more elections under the 2-year exception with respect to the issue.

(3) *Spending exceptions not mandatory.* Use of the spending exceptions is not mandatory. An issuer may apply the arbitrage rebate requirement to an issue that otherwise satisfies a spending exception. If an issuer elects to pay penalty in lieu of rebate under the 2-year exception, however, the issuer must apply those penalty provisions.

(b) *Rules applicable for all spending exceptions.* The provisions of this paragraph (b) apply for purposes of applying each of the spending exceptions.

(1) *Special transferred proceeds rules*—(i) *Application to prior issues.* For purposes of applying the spending exceptions to a prior issue only, proceeds of the prior issue that become transferred proceeds of the refunding issue continue to be treated as unspent proceeds of the prior issue. If the prior issue satisfies one of the spending exceptions, the proceeds of the prior issue that are

excepted from rebate under that spending exception are not subject to rebate either as proceeds of the prior issue or as transferred proceeds of the refunding issue.

(ii) *Application to refunding issues*—(A) *In general.* The only spending exception applicable to refunding issues is the 6-month exception. For purposes of applying the 6-month exception to a refunding issue only, proceeds of the prior issue that become transferred proceeds of the refunding issue generally are not treated as proceeds of the refunding issue and need not be spent for the refunding issue to satisfy that spending exception. Even if the refunding issue qualifies for that spending exception, those transferred proceeds are subject to rebate as proceeds of the refunding issue unless an exception to rebate applied to those proceeds as proceeds of the prior issue.

(B) *Exception.* For purposes of applying the 6-month exception to refunding issues, those transferred proceeds of the refunding issue excluded from the gross proceeds of the prior issue under the special definition of gross proceeds in paragraph (c)(3) of this section, and those that transferred from a prior taxable issue, are generally treated as gross proceeds of the refunding issue. Thus, for the refunding issue to qualify for the 6-month exception, those proceeds must be spent within 6 months of the issue date of the refunding issue, unless those amounts continue to be used in a manner that does not cause those amounts to be gross proceeds under paragraph (c)(3) of this section.

(2) *Application of multipurpose issue rules.* Except as otherwise provided, if any portion of an issue is treated as a separate issue allocable to refunding purposes under §1.148–9(h) (relating to multipurpose issues), for purposes of this section, that portion is treated as a separate issue.

(3) *Expenditures for governmental purposes of the issue.* For purposes of this section, expenditures for the governmental purpose of an issue include payments for interest, but not principal, on the issue, and for principal or interest on another issue of obligations. The preceding sentence does not apply for purposes of the 18-month and 2-year exceptions if those payments cause the issue to be a refunding issue.

(4) *De minimis rule.* Any failure to satisfy the final spending requirement of the 18-month exception or the 2-year exception is disregarded if the issuer exercises due diligence to complete the project financed and the amount of the failure does not exceed the lesser of 3 percent of the issue price of the issue or $250,000.

(5) *Special definition of reasonably required reserve or replacement fund.* For purposes of this section only, a reasonably required reserve or replacement fund also includes any fund to the extent described in §1.148–5(c)(3)(i)(E) or (G).

(6) *Pooled financing issue*—(i) *In general.* Except as otherwise provided in this paragraph (b)(6), the spending exceptions apply to a pooled financing issue as a whole, rather than to each loan separately.

(ii) *Election to apply spending exceptions separately to each loan*—(A) *In general.* At the election (made on or before the issue date) of the issuer of a pooled financing issue, the spending exceptions are applied separately to each conduit loan, and the applicable spending requirements for a loan begin on the earlier of the date the loan is made, or the first day following the 1-year period beginning on the issue date of the pooled financing issue. If this election is made, the rebate requirement applies to, and none of the spending exceptions are available for, gross proceeds of the pooled financing bonds before the date on which the spending requirements for those proceeds begin.

(B) *Application of spending exceptions.* If the issuer makes the election under this paragraph (b)(6)(ii), the rebate requirement is satisfied for proceeds used to finance a particular conduit loan to the extent that the loan satisfies a spending exception or the small issuer exception under §1.148–8, regardless of whether any other conduit loans allocable to the issue satisfy such an exception. A pooled financing issue is an issue of arbitrage bonds, however, unless the entire issue satisfies the requirements of section 148. An issuer may pay rebate for some conduit loans and 1½ percent penalty for other conduit loans from the same pooled financing issue. The 1½ percent penalty is computed separately for each conduit loan.

(C) *Elections under 2-year exception.* If the issuer makes the election under this paragraph (b)(6)(ii), the issuer may make all elections under the 2-year exception separately for each loan. Elections regarding a loan that otherwise must be made by the issuer on or before the issue date instead may be made on or before the date the loan is made (but not later than 1 year after the issue date).

(D) *Example.* The operation of this paragraph (b)(6) is illustrated by the following example:

Example. Pooled financing issue. On January 1, 1994, Authority *J* issues bonds. As of the issue date, *J* reasonably expects to use the proceeds of the issue to make loans to City *K*, County *L*, and City *M*. *J* does not reasonably expect to use more than 75 percent of the available construction proceeds of the issue for construction expenditures. On or before the issue date, *J* elects to apply the spending exceptions separately for each loan, with spending requirements beginning on the earlier of the date the loan is made or the first day following the 1-year period beginning on the issue date. On February 1, 1994, *J* loans a portion of the proceeds to *K*, and *K* reasonably expects that 45 percent of those amounts will be used for construction expenditures. On the date this loan is made, *J* elects under paragraph (j) of this section to treat 60 percent of the amount loaned to *K* as a separate construction issue, and also elects the 1½ percent penalty under paragraph (k) of this section for the separate construction issue. On March 1, 1994, *J* loans a portion of the proceeds to *L*, and *L* reasonably expects that more than 75 percent of those amounts will be used for construction expenditures. On March 1, 1995, *J* loans the remainder of the proceeds to *M*, and none of those amounts will be used for construction expenditures. *J* must satisfy the rebate requirement for all gross proceeds before those amounts are loaned. For the loan to *K*, the spending periods begin on February 1, 1994, and the 1½ percent penalty must be paid for any failure to meet a spending requirement for the portion of the loan to *K* that is treated as a separate construction issue. Rebate must be paid on the remaining portion of the loan to *K*, unless that portion qualifies for the 6-month exception. For the loan to *L*, the spending periods begin on March 1, 1994, and the rebate requirement must be satisfied unless the 6-month, 18-month, or the 2-year exception is satisfied with respect to those amounts. For the loan to *M*, the spending periods begin on January 2, 1995, and the rebate requirement must be satisfied for those amounts unless the 6-month or 18-month exception is satisfied.

(c) *6-month exception*—(1)*General rule.* An issue is treated as meeting the rebate requirement if—

(i) The gross proceeds (as modified by paragraph (c)(3) of this section) of the issue are allocated to expenditures for the governmental purposes of the issue within the 6-month period beginning on the issue date (the *6-month spending period*); and

(ii) The rebate requirement is met for amounts not required to be spent within the 6-month spending period (excluding earnings on a bona fide debt service fund).

(2) *Additional period for certain bonds.* The 6-month spending period is extended for an additional 6 months in certain circumstances specified under section 148(f)(4)(B)(ii).

(3) *Amounts not included in gross proceeds.* For purposes of paragraph (c)(1)(i) of this section only, gross proceeds has the meaning used in §1.148–1, except it does not include amounts—

(i) In a bona fide debt service fund;

(ii) In a reasonably required reserve or replacement fund (see §1.148–7(b)(5));

(iii) That, as of the issue date, are not reasonably expected to be gross proceeds but that become gross proceeds after the end of the 6-month spending period;

(iv) Representing sale or investment proceeds derived from payments under any purpose investment of the issue; and

(v) Representing repayments of grants (as defined in §1.148–6(d)(4)) financed by the issue.

(4) *Series of refundings.* If a principal purpose of a series of refunding issues is to exploit the difference between taxable and tax-exempt interest rates by investing proceeds during the temporary periods provided in §1.148–9(d), the 6-month spending period for all issues in the series begins on the issue date of the first issue in the series.

(d) *18-month exception*—(1) *General rule.* An issue is treated as meeting the rebate requirement if all of the following requirements are satisfied—

(i) *18-month expenditure schedule met.* The gross proceeds (as defined in paragraph (d)(3) of this section) are allocated to expenditures for a governmental purpose of the issue in accordance with the following schedule (the *18-month expenditure schedule*) measured from the issue date—

(A) At least 15 percent within 6 months (the *first spending period*);

(B) At least 60 percent within 12 months (the *second spending period*); and

(C) 100 percent within 18 months (the *third spending period*).

(ii) *Rebate requirement met for amounts not required to be spent.* The rebate requirement is met for all amounts not required to be spent in accordance with the 18-month expenditure schedule (other than earnings on a bona fide debt service fund).

(iii) *Issue qualifies for initial temporary period.* All of the gross proceeds (as defined in paragraph (d)(3)(i) of this section) of the issue qualify for the initial temporary period under §1.148–2(e)(2).

(2) *Extension for reasonable retainage.* An issue does not fail to satisfy the spending requirement for the third spending period as a result of a reasonable retainage if the reasonable retainage is allocated to expenditures within 30 months of the issue date. Reasonable retainage has the meaning under paragraph (h) of this section, as modified to refer to net sale proceeds on the date 18 months after the issue date.

(3) *Gross proceeds*—(i) *Definition of gross proceeds.* For purposes of paragraph (d)(1) of this section only, *gross proceeds* means gross proceeds as defined in paragraph (c)(3) of this section, as modified to refer to ''18 months'' in paragraph (c)(3)(iii) of this section in lieu of ''6 months.''

(ii) *Estimated earnings.* For purposes of determining compliance with the first two spending periods under paragraph (d)(1)(i) of this section, the amount of investment proceeds included in gross proceeds of the issue is determined based on the issuer's reasonable expectations on the issue date.

(4) *Application to multipurpose issues.* This paragraph (d) does not apply to an issue any portion of which is treated as meeting the rebate requirement under paragraph (e) of this section (relating to the 2-year exception).

(e) *2-year exception*—(1) *General rule.* A construction issue is treated as meeting the rebate requirement for available construction proceeds if those proceeds are allocated to expenditures for governmental purposes of the issue in accordance with the following schedule (the *2-year expenditure schedule*), measured from the issue date—

(i) At least 10 percent within 6 months (the *first spending period*);

(ii) At least 45 percent within 1 year (the *second spending period*);

(iii) At least 75 percent within 18 months (the *third spending period*); and

(iv) 100 percent within 2 years (the *fourth spending period*).

(2) *Extension for reasonable retainage.* An issue does not fail to satisfy the spending requirement for the fourth spending period as a result of unspent amounts for reasonable retainage (as defined in paragraph (h) of this section) if those amounts are allocated to expenditures within 3 years of the issue date.

(3) *Definitions.* For purposes of the 2-year exception, the following definitions apply:

(i) *Real property* means land and improvements to land, such as buildings or other inherently permanent structures, including interests in real property. For example, real property includes wiring in a building, plumbing systems, central heating or air-conditioning systems, pipes or ducts, elevators, escalators installed in a building, paved parking areas, roads, wharves and docks, bridges, and sewage lines.

(ii) *Tangible personal property* means any tangible property other than real property, including interests in tangible personal property. For example, tangible personal property includes machinery that is not a structural component of a building, subway cars, fire trucks, automobiles, office equipment, testing equipment, and furnishings.

(iii) *Substantially completed.* Construction may be treated as substantially completed when the issuer abandons construction or when at least 90 percent of the total costs of the construction reasonably expected, as of that date, to be financed with the available construction proceeds have been allocated to expenditures.

(f) *Construction issue*—(1) *Definition. Construction issue* means any issue that is not a refunding issue if—

(i) The issuer reasonably expects, as of the issue date, that at least 75 percent of the available construction proceeds of the issue will be allocated to construction expenditures (as defined in paragraph (g) of this section) for property owned by a governmental unit or a 501(c)(3) organization; and

(ii) Any private activity bonds that are part of the issue are qualified 501(c)(3) bonds or private activity bonds issued to finance property to be owned by a governmental unit or a 501(c)(3) organization.

(2) *Use of actual facts.* For the provisions of paragraphs (e) through (m) of this section that apply based on the issuer's reasonable expectations, an issuer may elect on or before the issue date to apply all of those provisions based on actual facts, except that this election does not apply for purposes of determining whether an issue is a construction issue under paragraph (f)(1) of this section if the 1½ percent penalty election is made under paragraph (k) of this section.

(3) *Ownership requirement*—(i) *In general.* A governmental unit or 501(c)(3) organization is treated as the owner of property if it would be treated as the owner for Federal income tax purposes. For obligations issued on behalf of a State or local governmental unit, the entity that actually issues the bonds is treated as a governmental unit.

(ii) *Safe harbor for leases and management contracts.* Property leased by a governmental unit or a 501(c)(3) organization is treated as owned by the governmental unit or 501(c)(3) organization if the lessee complies with the requirements of section 142(b)(1)(B). For a bond described in section 142(a)(6), the requirements of section 142(b)(1)(B) apply as modified by section 146(h)(2).

(g) *Construction expenditures*—(1) *Definition.* Except as otherwise provided, *construction expenditures* means capital expenditures (as defined in §1.150–1) that are allocable to the cost of real property or constructed personal property (as defined in paragraph (g)(3) of this section). Except as provided in paragraph (g)(2) of this section, construction expenditures do not include expenditures for acquisitions of interests in land or other existing real property.

(2) *Certain acquisitions under turnkey contracts treated as construction expenditures.* Expenditures are not for the acquisition of an interest in existing real property other than land if the contract between the seller and the issuer requires the seller to build or install the property (e.g., a *turnkey contract*), but only to the extent that the property has not been built or installed at the time the parties enter into the contract.

(3) *Constructed personal property. Constructed personal property* means tangible personal property (or, if acquired pursuant to a single acquisition contract, properties) or specially developed computer software if—

(i) A substantial portion of the property or properties is completed more than 6 months after the earlier of the date construction or rehabilitation commenced and the date the issuer entered into an acquisition contract;

(ii) Based on the reasonable expectations of the issuer, if any, or representations of the person constructing the property, with the exercise of due diligence, completion of construction or rehabilitation (and delivery to the issuer) could not have occurred within that 6-month period; and

(iii) If the issuer itself builds or rehabilitates the property, not more than 75 percent of the capitalizable cost is attributable to property acquired by the issuer (e.g., components, raw materials, and other supplies).

(4) *Specially developed computer software. Specially developed computer software* means any programs or routines used to cause a computer to perform a desired task or set of tasks, and the documentation required to describe and maintain those programs, provided that the software is specially developed and is functionally related and subordinate to real property or other constructed personal property.

(5) *Examples.* The operation of this paragraph (g) is illustrated by the following examples:

Example 1. Purchase of construction materials. City A issues bonds to finance a new office building. *A* uses proceeds of the bonds to purchase materials to be used in constructing the building, such as bricks, pipes, wires, lighting, carpeting, heating equipment, and similar materials. Expenditures by *A* for the construction materials are construction expenditures because those expenditures will be capitalizable to the cost of the building upon completion, even though they are not initially capitalizable to the cost of existing real property. This result would be the same if *A* hires a third-party to perform the construction, unless the office building is partially constructed at the time that *A* contracts to purchase the building.

Example 2. Turnkey contract. City *B* issues bonds to finance a new office building. *B* enters into a turnkey contract with developer *D* under which *D* agrees to provide *B* with a completed building on a specified completion date on land currently owned by *D*. Under the agreement, *D* holds title to the land and building and assumes any risk of loss until the completion date, at which time title to the land and the building will be transferred to *B*. No construction has been performed by the date that *B* and *D* enter into the agreement. All payments by *B* to *D* for construction of the building are construction expenditures because all the payments are properly capitalized to the cost of the building, but payments by *B* to *D* allocable to the acquisition of the land are not construction expenditures.

Example 3. Right-of-way. P, a public agency, issues bonds to finance the acquisition of a right-of-way and the construction of sewage lines through numerous parcels of land. The right-of-way is acquired primarily through *P*' s exercise of its powers of eminent domain. As of the issue date, *P* reasonably expects that it will take approximately 2 years to acquire the entire right-of-way because of the time normally required for condemnation proceedings. No expenditures for the acquisition of the right-of-way are construction expenditures because they are costs incurred to acquire an interest in existing real property.

Example 4. Subway cars. City *C* issues bonds to finance new subway cars. *C* reasonably expects that it will take more than 6 months for the subway cars to be constructed to *C*'s specifications. The subway cars are constructed personal property. Alternatively, if the builder of the subway cars informs *C* that it will only take 3 months to build the subway cars to *C*'s specifications, no payments for the subway cars are construction expenditures.

Example 5. Fractional interest in property. U, a public agency, issues bonds to finance an undivided fractional interest in a newly constructed power-generating facility. *U* contributes its ratable share of the cost of building the new facility to the project manager for the facility. *U*'s contributions are construction expenditures in the same proportion that the total expenditures for the facility qualify as construction expenditures.

Example 6. Park land. City *D* issues bonds to finance the purchase of unimproved land and the cost of subsequent improvements to the land, such as grading and landscaping, necessary to transform it into a park. The costs of the improvements are properly capitalizable to the cost of the land, and therefore, are construction expenditures, but expenditures for the acquisition of the land are not.

(h) *Reasonable retainage definition. Reasonable retainage* means an amount, not to exceed 5 percent of available construction proceeds as of the end of the fourth spending period, that is retained for reasonable business purposes relating to the property financed with the proceeds of the issue. For example, a reasonable retainage may include a retention to ensure or promote compliance with a construction contract in circumstances in which the retained amount is not yet payable, or in which the issuer reasonably determines that a dispute exists regarding completion or payment.

(i) *Available construction proceeds*—(1) *Definition in general. Available construction proceeds* has the meaning used in section 148(f)(4)(C)(vi). For purposes of this definition, earnings include earnings on any tax-exempt bond. Pre-issuance accrued interest and earnings thereon may be disregarded. Amounts that are not gross proceeds as a result of the application of the universal cap under §1.148–6(b)(2) are not available construction proceeds.

(2) *Earnings on a reasonably required reserve or replacement fund.* Earnings on any reasonably required reserve or replacement fund are available construction proceeds only to the extent that those earnings accrue before the earlier of the date construction is substantially completed or the date that is 2 years after the issue date. An issuer may elect on or before the issue date to exclude from available construction proceeds the earnings on such a fund. If the election is made, the rebate requirement applies to the excluded amounts from the issue date.

(3) *Reasonable expectations test for future earnings.* For purposes of determining compliance with the spending requirements as of the end of each of the first three spending periods, available construction proceeds include the amount of future earnings that the issuer reasonably expected as of the issue date.

(4) *Issuance costs.* Available construction proceeds do not include gross proceeds used to pay issuance costs financed by an issue, but do include earnings on such proceeds. Thus, an expenditure of gross proceeds of an issue for issuance costs does not count toward meeting the spending requirements. The expenditure of earnings on gross proceeds used to pay issuance costs does count toward meeting those requirements. If the spending requirements are met and the proceeds used to pay issuance costs are expended by the end of the fourth spending period, those proceeds and the earnings thereon are treated as having satisfied the rebate requirement.

(5) *One and one-half percent penalty in lieu of arbitrage rebate.* For purposes of the spending requirements of paragraph (e) of this section, available construction proceeds as of the end of any spending period are reduced by the amount of penalty in lieu of arbitrage rebate (under paragraph (k) of this section) that the issuer has paid from available construction proceeds before the last day of the spending period.

(6) *Payments on purpose investments and repayments of grants.* Available construction proceeds do not include—

(i) Sale or investment proceeds derived from payments under any purpose investment of the issue; or

(ii) Repayments of grants (as defined in §1.148–6(d)(4)) financed by the issue.

(7) *Examples.* The operation of this paragraph (i) is illustrated by the following examples:

Example 1. Treatment of investment earnings. City *F* issues bonds having an issue price of $10,000,000. *F* deposits all of the proceeds of the issue into a construction fund to be used for expenditures other than costs of issuance. *F* estimates on the issue date that, based on reasonably expected expenditures and rates of investment, earnings on the construction fund will be $800,000. As of the issue date and the end of each of the first three spending periods, the amount of available construction proceeds is $10,800,000. To qualify as a construction issue, *F* must reasonably expect on the issue date that at least $8,100,000 (75 percent of $10,800,000) will be used for construction expenditures. In order to meet the 10 percent spending requirement at the end of the first spending period, *F* must spend at least $1,080,000. As of the end of the fourth spending period, *F* has received $1,100,000 in earnings. In order to meet the spending requirement at the end of the fourth spending period, however, *F* must spend all of the $11,100,000 of actual available construction proceeds (except for reasonable retainage not exceeding $555,000).

Example 2. Treatment of investment earnings without a reserve fund. City *G* issues bonds having an issue price of $11,200,000. *G* does not elect to exclude earnings on the reserve fund from available construction proceeds. *G* uses $200,000 of proceeds to pay issuance costs and deposits $1,000,000 of proceeds into a reasonably required reserve fund. *G* deposits the remaining $10,000,000 of proceeds into a construction fund to be used for construction expenditures. On the issue date, *G* reasonably expects that, based on the reasonably expected date of substantial completion and rates of investment, total earnings on the construction fund will be $800,000, and total earnings on the reserve fund to the date of substantial completion will be $150,000. *G* reasonably expects that substantial completion will occur during the fourth spending period. As of the issue date, the amount of available construction proceeds is $10,950,000 ($10,000,000 originally deposited into the construction fund plus $800,000 expected earnings on the construction fund and $150,000 expected earnings on the reserve fund). To qualify as a construction issue, *G* must reasonably expect on the issue date that at least $8,212,500 will be used for construction expenditures.

Example 3. Election to exclude earnings on a reserve fund. The facts are the same as *Example 2,* except that *G* elects on the issue date to exclude earnings on the reserve fund from available construction proceeds. The amount of available construction proceeds as of the issue date is $10,800,000.

(j) *Election to treat portion of issue used for construction as separate issue*—(1) *In general.* For purposes of paragraph (e) of this section, if any proceeds of an issue are to be used for construction expenditures, the issuer may elect on or before the issue date to treat the portion of the issue that is not a refunding issue as two, and only two, separate issues, if—

(i) One of the separate issues is a construction issue as defined in paragraph (f) of this section;

(ii) The issuer reasonably expects, as of the issue date, that this construction issue will finance all of the construction expenditures to be financed by the issue; and

(iii) The issuer makes an election to apportion the issue under this paragraph (j)(1) in which it identifies the amount of the issue price of the issue allocable to the construction issue.

(2) *Example*. The operation of this paragraph (j) is illustrated by the following example.

Example. City *D* issues bonds having an issue price of $19,000,000. On the issue date, *D* reasonably expects to use $10,800,000 of bond proceeds (including investment earnings) for construction expenditures for the project being financed. *D* deposits $10,000,000 in a construction fund to be used for construction expenditures and $9,000,000 in an acquisition fund to be used for acquisition of equipment not qualifying as construction expenditures. *D* estimates on the issue date, based on reasonably expected expenditures and rates of investment, that total earnings on the construction fund will be $800,000 and total earnings on the acquisition fund will be $200,000. Because the total construction expenditures to be financed by the issue are expected to be $10,800,000, the maximum available construction proceeds for a construction issue is $14,400,000 ($10,800,000 divided by 0.75). To determine the maximum amount of the issue price allocable to a construction issue, the estimated investment earnings allocable to the construction issue are subtracted. The entire $800,000 of earnings on the construction fund are allocable to the construction issue. Only a portion of the $200,000 of earnings on the acquisition fund, however, are allocable to the construction issue. The total amount of the available construction proceeds that is expected to be used for acquisition is $3,600,000 ($14,400,000 − $10,800,000). The portion of earnings on the acquisition fund that is allocable to the construction issue is $78,261 ($200,000×$3,600,000/$9,200,000). Accordingly, *D* may elect on or before the issue date to treat up to $13,521,739 of the issue price as a construction issue ($14,400,000 − $800,000 − $78,261). *D*'s election must specify the amount of the issue price treated as a construction issue. The balance of the issue price is treated as a separate nonconstruction issue that is subject to the rebate requirement unless it meets another exception to arbitrage rebate. Because the financing of a construction issue is a separate governmental purpose under §1.148–9(h), the election causes the issue to be a multipurpose issue under that section.

(k) *One and one-half percent penalty in lieu of arbitrage rebate*—(1) *In general*. Under section 148(f)(4)(C)(vii), an issuer of a construction issue may elect on or before the issue date to pay a penalty (the *1½ percent penalty*) to the United States in lieu of the obligation to pay the rebate amount on available construction proceeds upon failure to satisfy the spending requirements of paragraph (e) of this section. The 1½ percent penalty is calculated separately for each spending period, including each semiannual period after the end of the fourth spending period, and is equal to 1.5 percent times the underexpended proceeds as of the end of the spending period. For each spending period, underexpended proceeds equal the amount of available construction proceeds required to be spent by the end of the spending period, less the amount actually allocated to expenditures for the governmental purposes of the issue by that date. The 1½ percent penalty must be paid to the United States no later than 90 days after the end of the spending period to which it relates. The 1½ percent penalty continues to apply at the end of each spending period and each semiannual period thereafter until the earliest of the following—

(i) The termination of the penalty under paragraph (l) of this section;

(ii) The expenditure of all of the available construction proceeds; or

(iii) The last stated final maturity date of bonds that are part of the issue and any bonds that refund those bonds.

(2) *Application to reasonable retainage*. If an issue meets the exception for reasonable retainage except that all retainage is not spent within 3 years of the issue date, the issuer must pay the 1½ percent penalty to the United States for any reasonable retainage that was not so spent as of the close of the 3-year period and each later spending period.

(3) *Coordination with rebate requirement*. The rebate requirement is treated as met with respect to available construction proceeds for a period if the 1½ percent penalty is paid in accordance with this section.

(l) *Termination of 1½ percent penalty*—(1)*Termination after initial temporary period*. The issuer may terminate the 1½ percent penalty after the initial temporary period (a *section 148(f)(4)(C)(viii) penalty termination*) if—

(i) Not later than 90 days after the earlier of the end of the initial temporary period or the date construction is substantially completed, the issuer elects to terminate the 1½ percent penalty; provided that solely for this purpose, the initial temporary period may be extended by the issuer to a date ending 5 years after the issue date;

(ii) Within 90 days after the end of the initial temporary period, the issuer pays a penalty equal to 3 percent of the unexpended available construction proceeds determined as of the end of the initial temporary period, multiplied by the number of years (including fractions of years computed to 2 decimal places) in the initial temporary period;

(iii) For the period beginning as of the close of the initial temporary period, the unexpended available construction proceeds are not invested in higher yielding investments; and

(iv) On the earliest date on which the bonds may be called or otherwise redeemed, with or without a call premium, the unexpended available construction proceeds as of that date (not including any amount earned after the date on which notice of the redemption was required to be given) must be used to redeem the bonds. Amounts used to pay any call premium are treated as used to redeem bonds. This redemption requirement may be met by purchases of bonds by the issuer on the open market at prices not exceeding fair market value. A portion of the annual principal payment due on serial bonds of a construction issue may be paid from the unexpended amount, but only in an amount no greater than the amount that bears the same ratio to the annual principal due that the total unexpended amount bears to the issue price of the construction issue.

(2) *Termination before end of initial temporary period.* If the construction to be financed by the construction issue is substantially completed before the end of the initial temporary period, the issuer may elect to terminate the 1½ percent penalty before the end of the initial temporary period (a *section 148(f)(4)(C)(ix) penalty termination*) if—

(i) Before the close of the initial temporary period and not later than 90 days after the date the construction is substantially completed, the issuer elects to terminate the 1½ percent penalty;

(ii) The election identifies the amount of available construction proceeds that will not be spent for the governmental purposes of the issue; and

(iii) The issuer has met all of the conditions for a section 148(f)(4)(C)(viii) penalty termination, applied as if the initial temporary period ended as of the date the required election for a section 148(f)(4)(C)(ix) penalty termination is made. That penalty termination election satisfies the required election for a section 148(f)(4)(C)(viii) termination.

(3) *Application to reasonable retainage.* Solely for purposes of determining whether the conditions for terminating the 1½ percent penalty are met, reasonable retainage may be treated as spent for a governmental purpose of the construction issue. Reasonable retainage that is so treated continues to be subject to the 1½ percent penalty.

(4) *Example.* The operation of this paragraph (l) is illustrated by the following example.

Example. City *I* issues a construction issue having a 20-year maturity and qualifying for a 3-year initial temporary period. The bonds are first subject to optional redemption 10 years after the issue date at a premium of 3 percent. *I* elects, on or before the issue date, to pay the 1½ percent penalty in lieu of arbitrage rebate. At the end of the 3-year temporary period, the project is not substantially completed, and $1,500,000 of available construction proceeds of the issue are unspent. At that time, *I* reasonably expects to need $500,000 to complete the project. *I* may terminate the 1½ percent penalty in lieu of arbitrage rebate with respect to the excess $1,500,000 by electing to terminate within 90 days of the end of the initial temporary period; paying a penalty to the United States of $135,000 (3 percent of $1,500,000 multiplied by 3 years); restricting the yield on the investment of unspent available construction proceeds for 7 years until the first call date, although any portion of these proceeds may still be spent on the project prior to that call date; and using the available construction proceeds that, as of the first call date, have not been allocated to expenditures for the governmental purposes of the issue to redeem bonds on that call date. If *I* fails to make the termination election, *I* is required to pay the 1½ percent penalty on unspent available construction proceeds every 6 months until the latest maturity date of bonds of the issue (or any bonds of another issue that refund such bonds).

(m) *Payment of penalties.* Each penalty payment under this section must be paid in the manner provided in §1.148–3(g). See §1.148–3(h) for rules on failures to pay penalties under this section.

[T.D. 8476, 58 FR 33535, June 18, 1993; 58 FR 44452, Aug. 23, 1993]

§ 1.148–8 Small issuer exception to rebate requirement.

(a) *Scope.* Under section 148(f)(4)(D), bonds issued to finance governmental activities of certain small issuers are treated as meeting the arbitrage rebate requirement of section 148(f)(2) (the ''small issuer exception''). This section provides guidance on the small issuer exception.

(b) *General taxing powers.* The small issuer exception generally applies only to bonds issued by governmental units with general taxing powers. A governmental unit has general taxing powers if it has the power to impose taxes (or to cause another entity to impose taxes) of general applicability which, when collected, may be used for the general purposes of the issuer. The taxing power may be limited to a specific type of tax, provided that the applicability of the tax is not limited to a small number of persons. The governmental unit's exercise of its taxing power may be subject to procedural limitations, such as voter approval requirements, but may not be contingent on approval by another governmental unit. See, also, section 148(f)(4)(D)(iv).

(c) *Size limitation*—(1) *In general.* An issue (other than a refunding issue) qualifies for the small issuer exception only if the issuer reasonably expects, as of the issue date, that the aggregate face amount of all tax-exempt bonds (other than private activity bonds) issued by it during that calendar year will not exceed $5,000,000; or the aggregate face amount of all tax-exempt bonds of the issuer (other than private activity bonds) actually issued during that calendar year does not exceed $5,000,000. For this purpose, if an issue has more than a de minimis amount of original issue discount or premium, *aggregate face amount* means the aggregate issue price of that issue (determined without regard to pre-issuance accrued interest).

(2) *Aggregation rules.* The following aggregation rules apply for purposes of applying the $5,000,000 size limitation under paragraph (c)(1) of this section.

(i) *On-behalf-of issuers.* An issuer and all entities (other than political subdivisions) that issue bonds on behalf of that issuer are treated as one issuer.

(ii) *Subordinate entities*—(A) *In general.* Except as otherwise provided in paragraph (d) of this section and section 148(f)(4)(D)(iv), all bonds issued by a subordinate entity are also treated as issued by each entity to which it is subordinate. An issuer is subordinate to another governmental entity if it is directly or indirectly controlled by the other entity within the meaning of §1.150–1(e).

(B) *Exception for allocations of size limitation.* If an entity properly makes an allocation of a portion of its $5,000,000 size limitation to a subordinate entity (including an on behalf of issuer) under section 148(f)(4)(D)(iv), the portion of bonds issued by the subordinate entity under the allocation is treated as issued only by the allocating entity and not by any other entity to which the issuing entity is subordinate. These allocations are irrevocable and must bear a reasonable relationship to the benefits received by the allocating unit from issues issued by the subordinate entity. The benefits to be considered include the manner in which—

(*1*) Proceeds are to be distributed;

(*2*) The debt service is to be paid;

(*3*) The facility financed is to be owned;

(*4*) The use or output of the facility is to be shared; and

(*5*) Costs of operation and maintenance are to be shared.

(iii) *Avoidance of size limitation.* An entity formed or availed of to avoid the purposes of the $5,000,000 size limitation and all entities that would benefit from the avoidance are treated as one issuer. Situations in which an entity is formed or availed of to avoid the purposes of the $5,000,000 size limitation include those in which the issuer—

(A) Issues bonds which, but for the $5,000,000 size limitation, would have been issued by another entity; and

(B) Does not receive a substantial benefit from the project financed by the bonds.

(3) *Certain refunding bonds not taken into account.* In applying the $5,000,000 size limitation, there is not taken into account the portion of an issue that is a current refunding issue to the extent that the stated principal amount of the refunding bond does not exceed the portion of the outstanding stated principal amount of the refunded bond paid with proceeds of the refunding bond. For this purpose, *principal amount* means, in reference to a plain par bond, its stated principal amount plus accrued unpaid interest, and in reference to any other bond, its present value.

(d) *Pooled financings*—(1) *Treatment of pool issuer.* To the extent that an issuer of a pooled financing is not an ultimate borrower in the financing and the conduit borrowers are governmental units with general taxing powers and not subordinate to the issuer, the pooled financing is not counted towards the $5,000,000 size limitation of the issuer for purposes of applying the small issuer exception to its other issues. The issuer of the pooled financing issue is, however, subject to the rebate requirement for any unloaned gross proceeds.

(2) *Treatment of conduit borrowers.* A loan to a conduit borrower in a pooled financing qualifies for the small issuer exception, regardless of the size of either the pooled financing or of any loan to other conduit borrowers, only if—

(i) The bonds of the pooled financing are not private activity bonds;

(ii) None of the loans to conduit borrowers are private activity bonds; and

(iii) The loan to the conduit borrower meets all the requirements of the small issuer exception.

(e) *Refunding issues*—(1) *In general.* Sections 148(f)(4)(D) (v) and (vi) provide restrictions on application of the small issuer exception to refunding issues.

(2) *Multipurpose issues.* The multipurpose issue allocation rules of §1.148–9(h) apply for purposes of determining whether refunding bonds meet the requirements of section 148(f)(4)(D)(v).

[T.D. 8476, 58 FR 33540, June 18, 1993]

§ 1.148–9 Arbitrage rules for refunding issues.

(a) *Scope of application.* This section contains special arbitrage rules for refunding issues. These rules apply for all purposes of section 148 and govern allocations of proceeds, bonds, and investments to determine transferred proceeds, temporary periods, reasonably required reserve or replacement funds, minor portions, and separate issue treatment of certain multipurpose issues.

(b) *Transferred proceeds allocation rule*—(1) *In general.* When proceeds of the refunding issue discharge any of the outstanding principal amount of the prior issue, proceeds of the prior issue become transferred proceeds of the refunding issue and cease to be proceeds of the prior issue. The amount of proceeds of the prior issue that becomes transferred proceeds of the refunding issue is an amount equal to the proceeds of the prior issue on the date of that discharge multiplied by a fraction—

(i) The numerator of which is the principal amount of the prior issue discharged with proceeds of the refunding issue on the date of that discharge; and

(ii) The denominator of which is the total outstanding principal amount of the prior issue on the date immediately before the date of that discharge.

(2) *Special definition of principal amount.* For purposes of this section, *principal amount* means, in reference to a plain par bond, its stated principal amount, and in reference to any other bond, its present value.

(3) *Relation of transferred proceeds rule to universal cap rule*—(i) *In general.* Paragraphs (b)(1) and (c) of this section apply to allocate transferred proceeds and corresponding investments to a refunding issue on any date required by those paragraphs before the application of the universal cap rule of §1.148–6(b)(2) to reallocate any of those amounts. To the extent nonpurpose investments allocable to proceeds of a refunding issue exceed the universal cap for the issue on the date that amounts

become transferred proceeds of the refunding issue, those transferred proceeds and corresponding investments are reallocated back to the issue from which they transferred on that same date to the extent of the unused universal cap on that prior issue.

(ii) *Example.* The following example illustrates the application of this paragraph of (b)(3):

Example. On January 1, 1995, $100,000 of nonpurpose investments allocable to proceeds of issue *A* become transferred proceeds of issue *B* under § 1.148–9, but the unused portion of issue *B'* s universal cap is $75,000 as of that date. On January 1, 1995, issue *A* has unused universal cap in excess of $25,000. Thus, $25,000 of nonpurpose investments representing the transferred proceeds are immediately reallocated back to issue *A* on January 1, 1995, and are proceeds of issue *A*. On the next transfer date under § 1.148–9, the $25,000 receives no priority in determining transferred proceeds as of that date but is treated the same as all other proceeds of issue *A* subject to transfer.

(4) *Limitation on multi-generational transfers.* This paragraph (b)(4) contains limitations on the manner in which proceeds of a first generation issue that is refunded by a refunding issue (a *second generation issue*) become transferred proceeds of a refunding issue (a *third generation issue*) that refunds the second generation issue. Proceeds of the first generation issue that become transferred proceeds of the third generation issue are treated as having a yield equal to the yield on the refunding escrow allocated to the second generation issue (*i.e.*, as determined under § 1.148–5(b)(2)(iv)). The determination of the transferred proceeds of the third generation issue does not affect compliance with the requirements of section 148, including the determination of the amount of arbitrage rebate with respect to or the yield on the refunding escrow, of the second generation issue.

(c) *Special allocation rules for refunding issues*—(1) *Allocations of investments*—(i) *In general.* Except as otherwise provided in this paragraph (c), investments purchased with sale proceeds or investment proceeds of a refunding issue must be allocated to those proceeds, and investments not purchased with those proceeds may not be allocated to those proceeds (*i.e.*, a *specific tracing method*).

(ii) *Allocations to transferred proceeds.* When proceeds of a prior issue become transferred proceeds of a refunding issue, investments (and the related payments and receipts) of proceeds of the prior issue that are held in a refunding escrow for another issue are allocated to the transferred proceeds under the ratable allocation method described in paragraph (c)(1)(iii) of this section. Investments of proceeds of the prior issue that are not held in a refunding escrow for another issue are allocated to the transferred proceeds by application of the allocation methods described in paragraph (c)(1) (iii) or (iv) of this section, consistently applied to all investments on a transfer date.

(iii) *Ratable allocation method.* Under the ratable allocation method, a ratable portion of each nonpurpose and purpose investment of proceeds of the prior issue is allocated to transferred proceeds of the refunding issue.

(iv) *Representative allocation method*—(A) *In general.* Under the representative allocation method, representative portions of the portfolio of nonpurpose investments and the portfolio of purpose investments of proceeds of the prior issue are allocated to transferred proceeds of the refunding issue. Unlike the ratable allocation method, this representative allocation method permits an allocation of particular whole investments. Whether a portion is representative is based on all the facts and circumstances, including, without limitation, whether the current yields, maturities, and current unrealized gains or losses on the particular allocated investments are reasonably comparable to those of the unallocated investments in the aggregate. In addition, if a portion of nonpurpose investments is otherwise representative, it is within the issuer's discretion to allocate the portion from whichever source of funds it deems appropriate, such as a reserve fund or a construction fund for a prior issue.

(B) *Mark-to-market safe harbor for representative allocation method.* In addition to other representative allocations, a specific allocation of a particular nonpurpose investment to transferred proceeds (e.g., of lower yielding investments) is treated as satisfying the representative allocation method if that investment is valued at fair market value on the transfer date in determining the payments and receipts on that date, but only if the portion of the nonpurpose investments that transfers is based on the relative fair market value of all nonpurpose investments.

(2) *Allocations of mixed escrows to expenditures for principal, interest, and redemption prices on a prior issue*—(i) *In general.* Except for amounts required or permitted to be accounted for under paragraph (c)(2)(ii) of this section, proceeds of a refunding issue and other amounts that are not proceeds of a refunding issue that are deposited in a refunding escrow (a *mixed escrow*) must be accounted for under this paragraph (c)(2)(i). Those proceeds and other amounts must be allocated to expenditures for principal, interest, or stated redemption prices on the prior issue so that the expenditures of those proceeds do not occur faster than ratably with expenditures of the other amounts in the mixed escrow. During the period that the prior issue has unspent proceeds, however, these allocations must be ratable (with reasonable adjustments for rounding) both between sources for expenditures (*i.e.*, proceeds and other amounts) and between uses (*i.e.*, principal, interest, and stated redemption prices on the prior issue).

(ii) *Exceptions*—(A) *Mandatory allocation of certain non-proceeds to earliest expenditures.* If amounts other than proceeds of the refunding issue are deposited in a mixed escrow, but before the issue date of the refunding issue those amounts had been held in a bona fide debt service fund or a fund to carry out the governmental purpose of the prior issue (e.g., a construction fund), those amounts must be allocated to the earliest maturing investments in the mixed escrow.

(B) *Permissive allocation of non-proceeds to earliest expenditures.* Excluding amounts covered by paragraph (c)(2)(ii)(A) of this section and subject to any required earlier expenditure of those amounts, any amounts in a mixed escrow that are not proceeds of a refunding issue may be allocated to the earliest maturing investments in the mixed escrow, provided that those investments mature and the proceeds thereof are expended before the date of any expenditure from the mixed escrow to pay any principal of the prior issue.

(d) *Temporary periods in refundings*—(1) *In general.* Proceeds of a refunding issue may be invested in higher yielding investments under section 148(c) only during the temporary periods described in paragraph (d)(2) of this section.

(2) *Types of temporary periods in refundings.* The available temporary periods for proceeds of a refunding issue are as follows:

(i) *General temporary period for refunding issues.* Except as otherwise provided in this paragraph (d)(2), the temporary period for proceeds (other than transferred proceeds) of a refunding issue is the period ending 30 days after the issue date of the refunding issue.

(ii) *Temporary periods for current refunding issues*—(A) *In general.* Except as otherwise provided in paragraph (d)(2)(ii)(B) of this section, the temporary period for proceeds (other than transferred proceeds) of a current refunding issue is 90 days.

(B) *Temporary period for short-term current refunding issues.* The temporary period for proceeds (other than transferred proceeds) of a current refunding issue that has an original term to maturity of 270 days or less may not exceed 30 days. The aggregate temporary periods for proceeds (other than transferred proceeds) of all current refunding issues described in the preceding sentence that are part of the same series of refundings is 90 days. An issue is part of a series of refundings if it finances or refinances the same expenditures for a particular governmental purpose as another issue.

(iii) *Temporary periods for transferred proceeds*—(A) *In general.* Except as otherwise provided in paragraph (d)(2)(iii)(B) of this section, each available temporary period for transferred proceeds of a refunding issue begins on the date those amounts become transferred proceeds of the refunding issue and ends on the date that, without regard to the discharge of the prior issue, the available temporary period for those proceeds would have ended had those proceeds remained proceeds of the prior issue.

(B) *Termination of initial temporary period for prior issue in an advance refunding.* The initial temporary period under §1.148–2(e) (2) and (3) for the proceeds of a prior issue that is refunded by an advance refunding issue (including transferred proceeds) terminates on the issue date of the advance refunding issue.

(iv) *Certain short-term gross proceeds.* Except for proceeds of a refunding issue held in a refunding escrow, proceeds otherwise reasonably expected to be used to pay principal or interest on the prior issue, replacement proceeds not held in a bona fide debt service fund, and transferred proceeds, the temporary period for gross proceeds of a refunding issue is the 13-month period beginning on the date of receipt.

(e) *Reasonably required reserve or replacement funds in refundings.* In addition to the requirements of §1.148–2(f), beginning on the issue date of a refunding issue, a reserve or replacement fund for a refunding issue or a prior issue is a reasonably required reserve or replacement fund under section 148(d) that may be invested in higher yielding investments only if the aggregate amount invested in higher yielding investments under this paragraph (e) for both the refunding issue and the prior issue does not exceed the size limitations under §1.148–2 (f)(2) and (f)(3), measured by reference to the refunding issue only (regardless of whether proceeds of the prior issue have become transferred proceeds of the refunding issue).

(f) *Minor portions in refundings.* Beginning on the issue date of the refunding issue, gross proceeds not in excess of a minor portion of the refunding issue qualify for investment in higher yielding investments under section 148(e), and gross proceeds not in excess of a minor portion of the prior issue qualify for investment in higher yielding investments under either section 148(e) or section 149(d)(3)(A)(v), whichever is applicable. *Minor portion* is defined in §1.148–2(g).

(g) *Certain waivers permitted.* On or before the issue date, an issuer may waive the right to invest in higher yielding investments during any temporary period or as part of a reasonably required reserve or replacement fund. At any time, an issuer may waive the right to invest in higher yielding investments as part of a minor portion.

(h) *Multipurpose issue allocations*—(1) *Application of multipurpose issue allocation rules.* The portion of the bonds of a multipurpose issue reasonably allocated to any separate purpose under this paragraph (h) is treated as a separate issue for all purposes of section 148 except the following—

(i) *Arbitrage yield.* Except to the extent that the proceeds of an issue are allocable to two or more conduit loans that are tax-exempt bonds, determining the yield on a multipurpose issue and the yield on investments for purposes of the arbitrage yield restrictions of section 148 and the arbitrage rebate requirement of section 148(f);

(ii) *Rebate amount.* Except as provided in paragraph (h)(1)(i) of this section, determining the rebate amount for a multipurpose issue, including subsidiary matters with respect to that determination, such as the computation date credit under §1.148–3(d)(1), the due date for payments, and the $100,000 bona fide debt service fund exception under section 148(f)(4)(A)(ii);

(iii) *Minor portion.* Determining the *minor portion* of an issue under section 148(e);

(iv) *Reasonably required reserve or replacement fund.* Determining the portion of an issue eligible for investment in higher yielding investments as part of a reasonably required reserve or replacement fund under section 148(d); and

(v) *Effective date.* Applying the provisions of §1.148–11(b) (relating to elective retroactive application of §§1.148–1 through 1.148–10 to certain issues).

(2) *Rules on allocations of multipurpose issues*—(i) *In general.* This paragraph (h) applies to allocations of multipurpose issues, including allocations involving the refunding purposes of the issue. Except as otherwise provided in this paragraph (h), proceeds, investments, and bonds of a multipurpose issue may be allocated among the various separate purposes of the issue using any reasonable, consistently applied allocation method. An allocation is not reasonable if it achieves more favorable results under section 148 or 149(d) than could be achieved with actual separate

issues. An allocation under this paragraph (h) may be made at any time, but once made may not be changed.

(ii) *Allocations involving certain common costs*. A ratable allocation of common costs (as described in paragraph (h)(3)(ii) of this section) among the separate purposes of the multipurpose issue is generally reasonable. If another allocation method more accurately reflects the extent to which any separate purpose of a multipurpose issue enjoys the economic benefit or bears the economic burden of certain common costs, that allocation method may be used.

(3) *Separate purposes of a multipurpose issue*—(i) *In general*. Separate purposes of a multipurpose issue include refunding a separate prior issue, financing a separate purpose investment, financing a construction issue (as defined in §1.148–7(f)), and any clearly discrete governmental purpose reasonably expected to be financed by that issue. In general, all integrated or functionally related capital projects that qualify for the same initial temporary period under §1.148–2(e)(2) are treated as having a single governmental purpose. The separate purposes of a refunding issue include the separate purposes of the prior issue, if any. Separate purposes may be treated as a single purpose if the proceeds used to finance those purposes are eligible for the same initial temporary period under section 148(c). For example, the use of proceeds of a multipurpose issue to finance separate qualified mortgage loans may be treated as a single purpose.

(ii) *Financing common costs*. Common costs of a multipurpose issue are not separate purposes. Common costs include issuance costs, accrued interest, capitalized interest on the issue, a reserve or replacement fund, qualified guarantee fees, and similar costs properly allocable to the separate purposes of the issue.

(iii) *Example*. The following example illustrates the application of this paragraph (h)(3).

Example. On January 1, 1994, Housing Authority of State *A* issues a $10 million issue (the *1994 issue*) at an interest rate of 10 percent to finance qualified mortgage loans for owner-occupied residences under section 143. During 1994, *A* originates $5 million in qualified mortgage loans at an interest rate of 10 percent. In 1995, the market interest rates for housing loans falls to 8 percent and *A* is unable to originate further loans from the 1994 issue. On January 1, 1996, *A* issues a $5 million issue (the *1996 issue*) at an interest rate of 8 percent to refund partially the 1994 issue. Under paragraph (h) of this section, *A* treats the portion of the 1994 issue used to originate $5 million in loans as a separate issue comprised of that group of purpose investments. *A* allocates those purpose investments representing those loans to that separate unrefunded portion of the issue. In addition, *A* treats the unoriginated portion of the 1994 issue as a separate issue and allocates the nonpurpose investments representing the unoriginated proceeds of the 1994 issue to the refunded portion of the issue. Thus, when proceeds of the 1996 issue are used to pay principal on the refunded portion of the 1994 issue that is treated as a separate issue under paragraph (h) of this section, only the portion of the 1994 issue representing unoriginated loan funds invested in nonpurpose investments transfer to become transferred proceeds of the 1996 issue.

(4) *Allocations of bonds of a multipurpose issue*—(i) *Reasonable allocation of bonds to portions of issue*. After reasonable adjustment of the issue price of a multipurpose issue to account for common costs, the portion of the bonds of a multipurpose issue allocated to a separate purpose must have an issue price that bears the same ratio to the aggregate issue price of the multipurpose issue as the portion of the sale proceeds of the multipurpose issue used for that separate purpose bears to the aggregate sale proceeds of the multipurpose issue. For a refunding issue used to refund two or more prior issues, the portion of the sales proceeds allocated to the refunding of a separate prior issue is based on the present value of the refunded debt service on that prior issue, using the yield on investments in the refunding escrow allocable to the entire refunding issue as the discount rate.

(ii) *Safe harbor for pro rata allocation method for bonds*. The use of the relative amount of sales proceeds used for each separate purpose to ratably allocate each bond or a ratable number of substantially identical whole bonds is a reasonable method for allocating bonds of a multipurpose issue.

(iii) *Safe harbor for allocations of bonds used to finance separate purpose investments*. An allocation of a portion of the bonds of a multipurpose issue to a particular purpose investment is generally reasonable if that purpose investment has principal and interest payments that reasonably coincide in time and amount to principal and interest payments on the bonds allocated to that purpose investment.

(iv) *Rounding of bond allocations to next whole bond denomination permitted.* An allocation that rounds each resulting fractional bond up or down to the next integral multiple of a permitted denomination of bonds of that issue not in excess of $100,000 does not prevent the allocation from satisfying this paragraph (h)(4).

(v) *Restrictions on allocations of bonds to refunding purposes.* For each portion of a multipurpose issue that is used to refund a separate prior issue, a method of allocating bonds of that issue is reasonable under this paragraph (h) only if, in addition to the requirements of paragraphs (h)(1) and (h)(2) of this section, the portion of the bonds allocated to the refunding of that prior issue—

(A) Results from a pro rata allocation under paragraph (h)(4)(ii) of this section;

(B) Reflects aggregate principal and interest payable in each bond year that is less than, equal to, or proportionate to, the aggregate principal and interest payable on the prior issue in each bond year;

(C) Results from an allocation of all the bonds of the entire multipurpose issue in proportion to the remaining weighted average economic life of the capital projects financed or refinanced by the issue, determined in the same manner as under section 147(b); or

(D) Results from another reasonable allocation method, but only to the extent that the application of the allocation methods provided in this paragraph (h)(4)(v) is not permitted under state law restrictions applicable to the bonds, reasonable terms of bonds issued before, or subject to a master indenture that became effective prior to, July 1, 1993, or other similar restrictions or circumstances. This paragraph (h)(4)(v)(D) shall be strictly construed and is available only if it does not result in a greater burden on the market for tax-exempt bonds than would occur using one of the other allocation methods provided in this paragraph (h)(4)(v). (See also §1.148–11(c)(2).)

(vi) *Exception for refundings of interim notes.* Paragraph (h)(4)(v) of this section need not be applied to refunding bonds issued to provide permanent financing for one or more projects if the prior issue had a term of less than 3 years and was sold in anticipation of permanent financing, but only if the aggregate term of all prior issues sold in anticipation of permanent financing was less than 3 years.

(5) *Limitation on multi-generation allocations.* This paragraph (h) does not apply to allocations of a multipurpose refunded issue unless that refunded issue is refunded directly by an issue to which this paragraph (h) applies. For example, if a 1994 issue refunds a 1984 multipurpose issue, which in turn refunded a 1980 multipurpose issue, this paragraph (h) applies to allocations of the 1984 issue for purposes of allocating the refunding purposes of the 1994 issue, but does not permit allocations of the 1980 issue.

(i) *Operating rules for separation of prior issue into refunded and unrefunded portions*—(1) *In general.* For purposes of paragraph (h)(3)(i) of this section, the separate purposes of a prior issue include the refunded and unrefunded portions of the prior issue. Thus, the refunded and unrefunded portions are treated as separate issues under paragraph (h)(1) of this section. Those separate issues must satisfy the requirements of paragraphs (h) and (i) of this section. The refunded portion of the bonds of a prior issue is based on a fraction the numerator of which is the principal amount of the prior issue to be paid with proceeds of the refunding issue and the denominator of which is the outstanding principal amount of the bonds of the prior issue, each determined as of the issue date of the refunding issue. (See also paragraph (b)(2) of this section.)

(2) *Allocations of proceeds and investments in a partial refunding.* As of the issue date of a partial refunding issue under this paragraph (i), unspent proceeds of the prior issue are allocated ratably between the refunded and unrefunded portions of the prior issue and the investments allocable to those unspent proceeds are allocated in the

manner required for the allocation of investments to transferred proceeds under paragraph (c)(1)(ii) of this section.

(3) *References to prior issue.* If the refunded and unrefunded portions of a prior issue are treated as separate issues under this paragraph (i), then, except to the extent that the context clearly requires otherwise (e.g., references to the aggregate prior issue in the mixed escrow rule in paragraph (c)(2) of this section), all references in this section to a prior issue refer only to the refunded portion of that prior issue.

[T.D. 8476, 58 FR 33541, June 18, 1993; 58 FR 44453, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24045, May 10, 1994; T.D. 8718, 62 FR 25512, May 9, 1997]

§ 1.148–10 Anti-abuse rules and authority of Commissioner.

(a) *Abusive arbitrage device*—(1) *In general.* Bonds of an issue are arbitrage bonds under section 148 if an abusive arbitrage device under paragraph (a)(2) of this section is used in connection with the issue. This paragraph (a) is to be applied and interpreted broadly to carry out the purposes of section 148, as further described in § 1.148–0. Except as otherwise provided in paragraph (c) of this section, any action that is expressly permitted by section 148 or §§ 1.148–1 through 1.148–11 is not an abusive arbitrage device (e.g., investment in higher yielding investments during a permitted temporary period under section 148(c)).

(2) *Abusive arbitrage device defined.* Any action is an abusive arbitrage device if the action has the effect of—

(i) Enabling the issuer to exploit the difference between tax-exempt and taxable interest rates to obtain a material financial advantage; and

(ii) Overburdening the tax-exempt bond market.

(3) *Exploitation of tax-exempt interest rates.* An action may exploit tax-exempt interest rates under paragraph (a)(2) of this section as a result of an investment of any portion of the gross proceeds of an issue over any period of time, notwithstanding that, in the aggregate, the gross proceeds of the issue are not invested in higher yielding investments over the term of the issue.

(4) *Overburdening the tax-exempt market.* An action overburdens the tax-exempt bond market under paragraph (a)(2)(ii) of this section if it results in issuing more bonds, issuing bonds earlier, or allowing bonds to remain outstanding longer than is otherwise reasonably necessary to accomplish the governmental purposes of the bonds, based on all the facts and circumstances. Whether an action is reasonably necessary to accomplish the governmental purposes of the bonds depends on whether the primary purpose of the transaction is a bona fide governmental purpose (e.g., an issue of refunding bonds to achieve a debt service restructuring that would be issued independent of any arbitrage benefit). An important factor bearing on this determination is whether the action would reasonably be taken to accomplish the governmental purpose of the issue if the interest on the issue were not excludable from gross income under section 103(a) (assuming that the hypothetical taxable interest rate would be the same as the actual tax-exempt interest rate). Factors evidencing an overissuance include the issuance of an issue the proceeds of which are reasonably expected to exceed by more than a minor portion the amount necessary to accomplish the governmental purposes of the issue, or an issue the proceeds of which are, in fact, substantially in excess of the amount of sale proceeds allocated to expenditures for the governmental purposes of the issue. One factor evidencing an early issuance is the issuance of bonds that do not qualify for a temporary period under § 1.148–2(e)(2), (e)(3), or (e)(4). One factor evidencing that bonds may remain outstanding longer than necessary is a term that exceeds the safe harbors against the creation of replacement proceeds under § 1.148–1(c)(4)(i)(B). These factors may be outweighed by other factors, however, such as bona fide cost underruns or long-term financial distress.

(b) *Consequences of overburdening the tax-exempt bond market*—(1) *In general.* An issue that overburdens the tax-exempt bond market (within the meaning of paragraph (a)(4) of this section) is subject to the following special limitations—

(i) *Special yield restriction.* Investments are subject to the definition of *materially higher* yield under §1.148–2(d) that is equal to one-thousandth of 1 percent. In addition, each investment is treated as a separate class of investments under §1.148–5(b)(2)(ii), the yield on which may not be blended with that of other investments.

(ii) *Certain regulatory provisions inapplicable.* The provisions of §1.148–5(c) (relating to yield reduction payments) and §1.148–5(e) (2) and (3) (relating to recovery of qualified administrative costs) do not apply.

(iii) *Restrictive expenditure rule.* Proceeds are not allocated to expenditures unless the proceeds-spent-last rule under §1.148–6(d)(3)(i) is satisfied, applied by treating those proceeds as proceeds to be used for restricted working capital expenditures. For this purpose, available amount includes a reasonable working capital reserve as defined in §1.148–6(d)(3)(iii)(B).

(2) *Application.* The provisions of this paragraph (b) only apply to the portion of an issue that, as a result of actions taken (or actions not taken) after the issue date, overburdens the market for tax-exempt bonds, except that for an issue that is reasonably expected as of the issue date to overburden the market, those provisions apply to all of the gross proceeds of the issue.

(c) *Anti-abuse rules on excess gross proceeds of advance refunding issues*—(1) *In general.* Except as otherwise provided in this paragraph (c), an abusive arbitrage device is used and bonds of an advance refunding issue are arbitrage bonds if the issue has excess gross proceeds.

(2) *Definition of excess gross proceeds.* Excess gross proceeds means all gross proceeds of an advance refunding issue that exceed an amount equal to 1 percent of sale proceeds of the issue, other than gross proceeds allocable to—

(i) Payment of principal, interest, or call premium on the prior issue;

(ii) Payment of pre-issuance accrued interest on the refunding issue, and interest on the refunding issue that accrues for a period up to the completion date of any capital project for which the prior issue was issued, plus one year;

(iii) A reasonably required reserve or replacement fund for the refunding issue or investment proceeds of such a fund;

(iv) Payment of costs of issuance of the refunding issue;

(v) Payment of administrative costs allocable to repaying the prior issue, carrying and repaying the refunding issue, or investments of the refunding issue;

(vi) Transferred proceeds that will be used or maintained for the governmental purpose of the prior issue;

(vii) Interest on purpose investments;

(viii) Replacement proceeds in a sinking fund for the refunding issue;

(ix) Qualified guarantee fees for the refunding issue or the prior issue; and

(x) Fees for a qualified hedge for the refunding issue.

(3) *Special treatment of transferred proceeds.* For purposes of this paragraph (c), all unspent proceeds of the prior issue as of the issue date of the refunding issue are treated as transferred proceeds of the advance refunding issue.

(4) *Special rule for crossover refundings.* An advance refunding issue is not an issue of arbitrage bonds under this paragraph (c) if all excess gross proceeds of the refunding issue are used to pay interest that accrues on the refunding issue before the prior issue is discharged, and no gross proceeds of any refunding issue are used to pay interest on the prior issue or to replace funds used directly or indirectly to pay such interest (other than transferred proceeds used to pay interest on the prior issue that accrues for a period up to the completion date of the project for which the prior issue was issued, plus one year, or proceeds used to pay principal that is attributable to accrued original issue discount).

(5) *Special rule for gross refundings.* This paragraph (c)(5) applies if an advance refunding issue (the *series B issue*) is used together with one or more other advance refunding issues (the *series A issues*) in a gross refunding of a prior issue, but only if the use of a gross refunding method is required under bond documents that were effective prior to November 6, 1992. These advance refunding issues are not arbitrage bonds under this paragraph (c) if—

(i) All excess gross proceeds of the series B issue and each series A issue are investment proceeds used to pay principal and interest on the series B issue;

(ii) At least 99 percent of all principal and interest on the series B issue is paid with proceeds of the series B and series A issues or with the earnings on other amounts in the refunding escrow for the prior issue;

(iii) The series B issue is discharged not later than the prior issue; and

(iv) As of any date, the amount of gross proceeds of the series B issue allocated to expenditures does not exceed the aggregate amount of expenditures before that date for principal and interest on the series B issue, and administrative costs of carrying and repaying the series B issue, or of investments of the series B issue.

(d) *Examples.* The provisions of this section are illustrated by the following examples:

Example 1. Mortgage sale. In 1982, City issued its revenue issue (the *1982 issue*) and lent the proceeds to Developer to finance a low-income housing project under former section 103(b)(4)(A) of the 1954 Code. In 1994, Developer encounters financial difficulties and negotiates with City to refund the 1982 issue. City issues $10 million in principal amount of its 8 percent bonds (the *1994 issue*). City lends the proceeds of the 1994 issue to Developer. To evidence Developer's obligation to repay that loan, Developer, as obligor, issues a note to City (the *City note*). Bank agrees to provide Developer with a direct-pay letter of credit pursuant to which Bank will make all payments to the trustee for the 1994 issue necessary to meet Developer's obligations under the City note. Developer pays Bank a fee for the issuance of the letter of credit and issues a note to Bank (the *Bank note*). The Bank note is secured by a mortgage on the housing project and is guaranteed by FHA. The Bank note and the 1994 issue have different prepayment terms. The City does not reasonably expect to treat prepayments of the Bank note as gross proceeds of the 1994 issue. At the same time or pursuant to a series of related transactions, Bank sells the Bank note to Investor for $9.5 million. Bank invests these monies together with its other funds. In substance, the transaction is a loan by City to Bank, under which Bank enters into a series of transactions that, in effect, result in Bank retaining $9.5 million in amounts treated as proceeds of the 1994 issue. Those amounts are invested in materially higher yielding investments that provide funds sufficient to equal or exceed the Bank's liability under the letter of credit. Alternatively, the letter of credit is investment property in a sinking fund for the 1994 issue provided by Developer, a substantial beneficiary of the financing. Because, in substance, Developer acquires the $10 million principal amount letter of credit for a fair market value purchase price of $9.5 million, the letter of credit is a materially higher yielding investment. Neither result would change if Developer's obligation under the Bank note is contingent on Bank performing its obligation under the letter of credit. Each characterization causes the bonds to be arbitrage bonds.

Example 2. Bonds outstanding longer than necessary for yield-blending device. (i) *Longer bond maturity to create sinking fund.* In 1994, Authority issues an advance refunding issue (the *refunding issue*) to refund a 1982 prior issue (the *prior issue*). Under current market conditions, Authority will have to invest the refunding escrow at a yield significantly below the yield on the refunding issue. Authority issues its refunding issue with a longer weighted average maturity than otherwise necessary primarily for the purpose of creating a sinking fund for the refunding issue that will be invested in a guaranteed investment contract. The weighted average maturity of the refunding issue is less than 120 percent of the remaining average economic life of the facilities financed with the proceeds of the prior issue. The guaranteed investment contract has a yield that is higher than the yield on the refunding issue. The yield on the refunding escrow blended with the yield on the guaranteed investment contract does not exceed the yield on the issue. The refunding issue uses an abusive arbitrage device and the bonds of the issue are arbitrage bonds under section 148(a).

(ii) *Refunding of noncallable bonds.* The facts are the same as in paragraph (i) of this *Example 2* except that instead of structuring the refunding issue to enable it to take advantage of sinking fund investments, Authority will also refund other long-term, non-callable bonds in the same refunding issue. There are no savings attributable to the refunding of the non-callable bonds (e.g., a *low-to-high* refunding). The Authority invests the portion of the proceeds of the refunding issue allocable to the refunding of the non-callable bonds in the refunding escrow at a yield that is higher than the yield on the refunding issue, based on the relatively long escrow period for this portion of the refunding. The Authority invests the other portion of the proceeds of the refunding issue in the refunding escrow at a yield lower than the yield on the refunding issue. The blended yield on all the investments in the refunding escrow for the prior issues does not exceed the yield on the refunding issue. The portion of the refunding issue used to refund the noncallable bonds, however, was not otherwise necessary and was issued primarily to exploit the difference between taxable and tax-exempt rates for that long portion of the refunding escrow to minimize the effect of lower yielding investments in the other portion of the escrow. The refunding issue uses an abusive arbitrage device and the bonds of the issue are arbitrage bonds.

(iii) *Governmental purpose.* In paragraphs (i) and (ii) of this *Example 2,* the existence of a governmental purpose for the described financing structures would not change the conclusions unless Authority clearly established that the primary purpose for the use of the particular structure was a bona fide governmental purpose. The fact that each financing structure had the effect of eliminating significant amounts of negative arbitrage is strong evidence of a primary purpose that is not a bona fide governmental purpose. Moreover, in paragraph (i) of this *Example 2,* the structure of the refunding issue coupled with the acquisition of the guaranteed investment contract to lock in the investment yield associated with the structure is strong evidence of a primary purpose that is not a bona fide governmental purpose.

Example 3. Window refunding. (i) Authority issues its 1994 refunding issue to refund a portion of the principal and interest on its outstanding 1985 issue. The 1994 refunding issue is structured using zero-coupon bonds that pay no interest or principal for the 5-year period following the issue date. The proceeds of the 1994 refunding issue are deposited in a refunding escrow to be used to pay only the interest requirements of the refunded portion of the 1985 issue. Authority enters into a guaranteed investment contract with a financial institution, *G,* under which *G* agrees to provide a guaranteed yield on revenues invested by Authority during the 5-year period following the issue date. The guaranteed investment contract has a yield that is no higher than the yield on the refunding issue. The revenues to be invested under this guaranteed investment contract consist of the amounts that Authority otherwise would have used to pay principal and interest on the 1994 refunding issue. The guaranteed investment contract is structured to generate receipts at times and in amounts sufficient to pay the principal and redemption requirements of the refunded portion of the 1985 issue. A principal purpose of these transactions is to avoid transferred proceeds. Authority will continue to invest the unspent proceeds of the 1985 issue that are on deposit in a refunding escrow for its 1982 issue at a yield equal to the yield on the 1985 issue and will not otherwise treat those unspent proceeds as transferred proceeds of the 1994 refunding issue. The 1994 refunding issue is an issue of arbitrage bonds since those bonds involve a transaction or series of transactions that overburdens the market by leaving bonds outstanding longer than is necessary to obtain a material financial advantage based on arbitrage. Specifically, Authority has structured the 1994 refunding issue to make available for the refunding of the 1985 issue replacement proceeds rather than proceeds so that the unspent proceeds of the 1985 issue will not become transferred proceeds of the 1994 refunding issue.

(ii) The result would be the same in each of the following circumstances:

(A) The facts are the same as in paragraph (i) of this *Example 3* except that Authority does not enter into the guaranteed investment contract but instead, as of the issue date of the 1994 refunding issue, reasonably expects that the released revenues will be available for investment until used to pay principal and interest on the 1985 issue.

(B) The facts are the same as in paragraph (i) of this *Example 3* except that there are no unspent proceeds of the 1985 issue and Authority invests the released revenues at a yield materially higher than the yield on the 1994 issue.

(C) The facts are the same as in paragraph (i) of this *Example 3* except that Authority uses the proceeds of the 1994 issue for capital projects instead of to refund a portion of the 1985 issue.

Example 4. Sale of conduit loan. On January 1, 1994, Authority issues a conduit financing issue (the *1994 conduit financing issue*) and uses the proceeds to purchase from City, an unrelated party, a tax-exempt bond of City (the *City note*). The proceeds of the 1994 conduit financing issue are to be used to advance refund a prior conduit financing issue that was issued in 1988 and used to make a loan to City. The 1994 conduit financing issue and the City note each have a yield of 8 percent on January 1, 1994. On June 30, 1996, interest rates have decreased and Authority sells the City note to D, a person unrelated to either City or Authority. Based on the sale price of the City note and treating June 30, 1996 as the issue date of the City note, the City note has a 6 percent yield. Authority deposits the proceeds of the sale of the City note into an escrow to redeem the bonds of the 1994 conduit financing issue on January 1, 2001. The escrow is invested in nonpurpose investments having a yield of 8 percent. For purposes of section 149(d), City and Authority are related parties and, therefore, the issue date of the City note is treated as being June 30, 1996. Thus, the City note is an advance refunding of Authority's 1994 conduit financing issue. Interest on the City note is not exempt from Federal income tax from the date it is sold to D under section 149(d), because, by investing the escrow investments at a yield of 8 percent instead of a yield not materially higher than 6 percent, the sale of the City note employs a device to obtain a material financial advantage, based on arbitrage, apart from the savings attributable to lower interest rates. In addition, the City note is not a tax-exempt bond because the note is the second advance refunding of the original bond under section 149(d)(3). The City note also employs an abusive arbitrage device and is an arbitrage bond under section 148.

Example 5. Re-refunding. (i) On January 1, 1984, City issues a tax-exempt issue (the *1984 issue*) to finance the cost of constructing a prison. The 1984 issue has a 7 percent yield and a 30-year maturity. The 1984 issue is callable at any time on or after January 1, 1994. On January 1, 1990, City issues a refunding issue (the *1990 issue*) to advance refund the 1984 issue. The 1990 issue has an 8 percent yield and a 30-year maturity. The 1990 issue is callable at any time on or after January 1, 2000. The proceeds of the 1990 issue are invested at an 8 percent yield in a refunding escrow for the 1984 issue (the *original 1984 escrow*) in a manner sufficient to pay debt service on the 1984 issue until maturity (*i.e.*, an escrow to maturity). On January 1, 1994, City issues a refunding issue (the *1994 issue*). The 1994 issue has a 6 percent yield and a 30-year maturity. City does not invest the proceeds of the 1994 issue in a refunding escrow for the 1990 issue in a manner sufficient to pay a portion of the debt service until, and redeem a portion of that issue on, January 1, 2000. Instead, City invests those proceeds at a 6 percent yield in a new refunding escrow for a portion of the 1984 issue (the *new 1984 escrow*) in a manner sufficient to pay debt service on a portion of the 1984 issue until maturity. City also liquidates the investments allocable to the proceeds of the 1990 issue held in the original 1984 escrow and reinvests those proceeds in an escrow to pay a portion of the debt service on the 1990 issue itself until, and redeem a portion of that issue on, January 1, 2000 (the *1990 escrow*). The 1994 bonds are arbitrage bonds and employ an abusive device under section 149(d)(4). Although, in form, the proceeds of the 1994 issue are used to pay principal on the 1984 issue, this accounting for the use of the proceeds of the 1994 issue is an unreasonable, inconsistent accounting method under §1.148–6(a). Moreover, since the proceeds of the 1990 issue were set aside in an escrow to be used to retire the 1984 issue, the use of proceeds of the 1994 issue for that same purpose involves a replacement of funds invested in higher yielding investments under section 148(a)(2). Thus, using a reasonable, consistent accounting method and giving effect to the substance of the transaction, the proceeds of the 1994 issue are treated as used to refund the 1990 issue and are allocable to the 1990 escrow. The proceeds of the 1990 issue are treated as used to refund the 1984 issue and are allocable to the investments in the new 1984 escrow. The proceeds of the 1990 issue allocable to the nonpurpose investments in the new 1984 escrow become transferred proceeds of the 1994 issue as principal is paid on the 1990 issue from amounts on deposit in the 1990 escrow. As a result, the yield on nonpurpose investments allocable to the 1994 issue is materially higher than the yield on the 1994 issue, causing the bonds of the 1994 issue to be arbitrage bonds. In addition, the transaction employs a device under section 149(d)(4) to obtain a material financial advantage based on arbitrage, other than savings attributable to lower interest rates.

(ii) The following changes in the facts do not affect the conclusion that the 1994 issue consists of arbitrage bonds—

(1) The 1990 issue is a taxable issue;

(2) The original 1984 escrow is used to pay the 1994 issue (rather than the 1990 issue); or

(3) The 1994 issue is used to retire the 1984 issue within 90 days of January 1, 1994.

(e) *Authority of the Commissioner to clearly reflect the economic substance of a transaction.* If an issuer enters into a transaction for a principal purpose of obtaining a material financial advantage based on the difference between tax-exempt and taxable interest rates in a manner that is inconsistent with the purposes of section 148, the Commissioner may exercise the Commissioner's discretion to depart from the rules of §1.148–1 through §1.148–11 as necessary to clearly reflect the economic substance of the transaction. For this purpose, the Commissioner may recompute yield on an issue or on investments, reallocate payments and receipts on investments, recompute the rebate amount on an issue, treat a hedge as either a qualified hedge or not a qualified hedge, or otherwise adjust any item whatsoever bearing upon the investments and expenditures of gross proceeds of an issue. For example, if the amount paid for a hedge is specifically based on the amount of arbitrage earned or expected to be earned on the hedged bonds, a principal purpose of entering into the contract is to obtain a material financial advantage based on the difference between tax-exempt and taxable interest rates in a manner that is inconsistent with the purposes of section 148.

(f) *Authority of the Commissioner to require an earlier date for payment of rebate.* If the Commissioner determines that an issue is likely to fail to meet the requirements of §1.148–3 and that a failure to serve a notice of demand for payment on the issuer will jeopardize the assessment or collection of tax on interest paid or to be paid on the issue, the date that the Commissioner serves notice on the issuer is treated as a required computation date for payment of rebate for that issue.

(g) *Authority of the Commissioner to waive regulatory limitations.* Notwithstanding any specific provision in §§1.148–1 through 1.148–11, the Commissioner may prescribe extensions of temporary periods, larger reasonably required reserve or replacement funds, or consequences of failures or remedial action under section 148 in lieu of or in addition to other consequences of those failures, or take other action, if the Commissioner finds that good faith or other similar circumstances so warrant, consistent with the purposes of section 148.

[T.D. 8476, 58 FR 33544, June 18, 1993; 58 FR 44453, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24046, May 10, 1994; T.D. 8476, 59 FR 24351, May 11, 1994; T.D. 8718, 62 FR 25512, May 9, 1997]

§ 1.148–11 Effective dates.

(a) *In general.* Except as otherwise provided in this section, §§1.148–1 through 1.148–11 apply to bonds sold on or after July 8, 1997.

(b) *Elective retroactive application in whole*—(1) *In general.* Except as otherwise provided in this section, and subject to the applicable effective dates for the corresponding statutory provisions, an issuer may apply the provisions of §§1.148–1 through 1.148–11 in whole, but not in part, to any issue that is outstanding on July 8, 1997, and is subject to section 148(f) or to sections 103(c)(6) or 103A(i) of the Internal Revenue Code of 1954, in lieu of otherwise applicable regulations under those sections.

(2) *No elective retroactive application for 18-month spending exception.* The provisions of §1.148–7(d) (relating to the 18-month spending exception) may not be applied to any issue issued on or before June 30, 1993.

(3) *No elective retroactive application for hedges of fixed rate issues.* The provisions of §1.148–4(h)(2)(i)(B) (relating to hedges of fixed rate issues) may not be applied to any bond sold on or before July 8, 1997.

(4) *No elective retroactive application for safe harbor for establishing fair market value for guaranteed investment contracts and investments purchased for a yield restricted defeasance escrow.* The provisions of §§1.148–5(d)(6)(iii) (relating to the safe harbor for establishing fair market value of guaranteed investment contracts and yield restricted defeasance escrow investments) and 1.148–5(e)(2)(iv) (relating to a special rule for yield restricted defeasance escrow investments) may not be applied to any bond sold before December 30, 1998.

(c) *Elective retroactive application of certain provisions and special rules*—(1) *Retroactive application of overpayment recovery provisions.* An issuer may apply the provisions of §1.148–3(i) to any issue that is subject to section 148(f) or to sections 103(c)(6) or 103A(i) of the Internal Revenue Code of 1954.

(2) *Certain allocations of multipurpose issues.* An allocation of bonds to a refunding purpose under §1.148–9(h) may be adjusted as necessary to reflect allocations made between May 18, 1992, and August 15, 1993, if the allocations satisfied the corresponding prior provision of §1.148–11(j)(4) under applicable prior regulations.

(3) *Special limitation.* The provisions of §1.148–9 apply to issues issued before August 15, 1993, only if the issuer in good faith estimates the present value savings, if any, associated with the effect of the application of that section on refunding escrows, using any reasonable accounting method, and applies those savings, if any, to redeem outstanding tax-exempt bonds of the applicable issue at the earliest possible date on which those bonds may be redeemed or otherwise retired. These savings are not reduced to take into account any administrative costs associated with applying these provisions retroactively.

(d) *Transition rule excepting certain state guarantee funds from the definition of replacement proceeds*—(1) *Certain perpetual trust funds.* A guarantee by a fund created and controlled by a State and established pursuant to its constitution does not cause the amounts in the fund to be pledged funds treated as replacement proceeds if—

(i) Substantially all of the corpus of the fund consists of nonfinancial assets, revenues derived from these assets, gifts, and bequests;

(ii) The corpus of the guarantee fund may be invaded only to support specifically designated essential governmental functions (*designated functions*) carried on by political subdivisions with general taxing powers;

(iii) Substantially all of the available income of the fund is required to be applied annually to support designated functions;

(iv) The issue guaranteed consists of general obligations that are not private activity bonds substantially all of the proceeds of which are to be used for designated functions;

(v) The fund satisfied each of the requirements of paragraphs (d)(1)(i) through (d)(1)(iii) of this section on August 16, 1986; and

(vi) The guarantee is not attributable to a deposit to the fund made after May 14, 1989, unless—

(A) The deposit is attributable to the sale or other disposition of fund assets; or

(B) Prior to the deposit, the outstanding amount of the bonds guaranteed by the fund did not exceed 250 percent of the lower of the cost or fair market value of the fund.

(2) *Permanent University Fund.* Replacement proceeds do not include amounts allocable to investments of the fund described in section 648 of Public Law 98–369.

(e) *Transition rule regarding special allowance payments.* Section 1.148–5(b)(5) applies to any bond issued after January 5, 1990, except a bond issued exclusively to refund a bond issued before January 6, 1990, if the amount of the refunding bond does not exceed 101 percent of the amount of the refunded bond, and the maturity date of the refunding bond is not later than the date that is 17 years after the date on which the refunded bond was issued (or, in the case of a series of refundings, the date on which the original bond was issued), but only if §1.148–2(d)(2)(iv) is applied by substituting *1 and one-half percentage points* for *2 percentage points*.

(f) *Transition rule regarding applicability of yield reduction rule.* Section 1.148–5(c) applies to nonpurpose investments allocable to replacement proceeds of an issue that are held in a reserve or replacement fund to the extent that—

(1) Amounts must be paid into the fund under a constitutional provision, statute, or ordinance adopted before May 3, 1978;

(2) Under that provision, amounts paid into the fund (and investment earnings thereon) can be used only to pay debt service on the issues; and

(3) The size of the payments made into the fund is independent of the size of the outstanding issues or the debt service thereon.

(g) *Provisions applicable to certain bonds sold before effective date.* Except for bonds to which paragraph (b)(1) of this section applies—

(1) Section 1.148–11A provides rules applicable to bonds sold after June 6, 1994, and before July 8, 1997; and

(2) Sections 1.148–1 through 1.148–11 as in effect on July 1, 1993 (see 26 CFR part 1 as revised April 1, 1994), and §1.148–11A(i) (relating to elective retroactive application of certain provisions) provide rules applicable to certain issues issued before June 7, 1994.

(h) *Safe harbor for establishing fair market value for guaranteed investment contracts and investments purchased for a yield restricted defeasance escrow.* The provisions of §1.148–5(d)(6)(iii) are applicable to bonds sold on or after March 1, 1999. Issuers may apply these provisions to bonds sold on or after December 30, 1998, and before March 1, 1999.

(i) *Special rule for certain broker's commissions and similar fees.* Section 1.148–5(e)(2)(iii) applies to bonds sold on or after February 9, 2004. In the case of bonds sold before February 9, 2004, that are subject to §1.148–5 (pre-effective date bonds), issuers may apply §1.148–5(e)(2)(iii), in whole but not in part, with respect to transactions entered into on or after December 11, 2003. If an issuer applies §1.148–5(e)(2)(iii) to pre-effective date bonds, the per-issue safe harbor in §1.148–5(e)(2)(iii)(B)(*1*)(*ii*) is applied by taking into account all brokers' commissions or similar fees with respect to guaranteed investment contracts and investments for yield restricted defeasance escrows that the issuer treats as qualified administrative costs for the issue, including all such commissions or fees paid before February 9, 2004. For purposes of §§1.148–5(e)(2)(iii)(B)(*3*) and 1.148–

5(e)(2)(iii)(B)(*6*) (relating to cost-of-living adjustments), transactions entered into before 2003 are treated as entered into in 2003.

(j) *Certain prepayments.* Section 1.148–1(e)(1) and (2) apply to bonds sold on or after October 3, 2003. Issuers may apply §1.148–1(e)(1) and (2), in whole but not in part, to bonds sold before October 3, 2003, that are subject to §1.148–1.

[T.D. 8476, 58 FR 33547, June 18, 1993; 58 FR 44453, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24046, May 10, 1994; T.D. 8718, 62 FR 25512, May 9, 1997; T.D. 8476, 64 FR 37037, July 9, 1999; T.D. 9085, 68 FR 45777, Aug. 4, 2003; T.D. 9097, 68 FR 69023, Dec. 11, 2003]

§ 1.149(b)–1 Federally guaranteed bonds.

(a) *General rule.* Under section 149(b) and this section, nothing in section 103(a) or in any other provision of law shall be construed to provide an exemption from Federal income tax for interest on any bond issued as part of an issue that is federally guaranteed.

(b) *Exceptions.* Pursuant to section 149(b)(3)(B), section 149(b)(1) and paragraph (a) of this section do not apply to—

(1) Investments in obligations issued pursuant to §21B(d)(3) of the Federal Home Loan Bank Act, as amended by §511 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989, or any successor provision; or

(2) Any investments that are held in a refunding escrow (as defined in §1.148–1).

(c) *Effective date.* This section applies to investments made after June 30, 1993.

[T.D. 8476, 58 FR 33548, June 18, 1993]

§ 1.149(d)–1 Limitations on advance refundings.

(a) *General rule.* Under section 149(d) and this section, nothing in section 103(a) or in any other provision of law shall be construed to provide an exemption from Federal income tax for interest on any bond issued as part of an issue described in paragraphs (2), (3), or (4) of section 149(d).

(b) *Advance refunding issues that employ abusive devices*—(1) *In general.* An advance refunding issue employs an abusive device and is described in section 149(d)(4) if the issue violates any of the anti-abuse rules under §1.148–10.

(2) *Failure to pay required rebate.* An advance refunding issue is described in section 149(d)(4) if the issue fails to meet the requirements of §1.148–3. This paragraph (b)(2) applies to any advance refunding issue issued after August 31, 1986.

(3) *Mixed escrows invested in tax-exempt bonds.* An advance refunding issue is described in section 149(d)(4) if—

(i) Any of the proceeds of the issue are invested in a refunding escrow in which a portion of the proceeds are invested in tax-exempt bonds and a portion of the proceeds are invested in nonpurpose investments;

(ii) The yield on the tax-exempt bonds in the refunding escrow exceeds the yield on the issue;

(iii) The yield on all the investments (including investment property and tax-exempt bonds) in the refunding escrow exceeds the yield on the issue; and

(iv) The weighted average maturity of the tax-exempt bonds in the refunding escrow is more than 25 percent greater or less than the weighted average maturity of the nonpurpose investments in the refunding escrow, and the weighted average maturity of nonpurpose investments in the refunding escrow is greater than 60 days.

(4) *Tax-exempt conduit loans.* For purposes of applying section 149(d) to a conduit financing issue that finances any conduit loan that is a tax-exempt bond, the actual issuer of a conduit financing issue and the conduit borrower of that conduit financing issue are treated as related parties. Thus, the issue date of the conduit loan does not occur prior to the date on which the actual issuer of the conduit financing issue sells, exchanges, or otherwise disposes of that conduit loan, and the use of the proceeds of the disposition to pay debt service on the conduit financing issue causes the conduit loan to be a refunding issue. See §1.148–10(d), *Example 4.*

(c) *Unrefunded debt service remains eligible for future advance refunding.* For purposes of section 149(d)(3)(A)(i), any principal or interest on a prior issue that has not been paid or provided for by any advance refunding issue is treated as not having been advance refunded.

(d) *Application of arbitrage regulations*—(1) *Application of multipurpose issue rules*. For purposes of sections 149(d)(2) and (3)(A)(i), (ii), and (iii), the provisions of the multipurpose issue rule in §1.148–9(h) apply, except that the limitation in §1.148–9(h)(5) is disregarded.

(2) *General mixed escrow rules*. For purposes of section 149(d), the provisions of §1.148–9(c) (relating to mixed escrows) apply, except that those provisions do not apply for purposes of section 149(d)(2) and (d)(3)(A) (i) and (ii) to amounts that were not gross proceeds of the prior issue before the issue date of the refunding issue.

(3) *Temporary periods and minor portions*. Section 1.148–9(d) and (f) contains rules applicable to temporary periods and minor portions for advance refunding issues.

(4) *Definitions*. Section 1.148–1 applies for purposes of section 149(d).

(e) *Taxable refundings*—(1) *In general*. Except as provided in paragraph (e)(2) of this section, for purposes of section 149(d)(3)(A)(i), an advance refunding issue the interest on which is not excludable from gross income under section 103(a) (*i.e.*, a taxable advance refunding issue) is not taken into account. In addition, for this purpose, an advance refunding of a taxable issue is not taken into account unless the taxable issue is a conduit loan of a tax-exempt conduit financing issue.

(2) *Use to avoid section 149(d)(3)(A)(i)*. A taxable issue is taken into account under section 149(d)(3)(A)(i) if it is issued to avoid the limitations of that section. For example, in the case of a refunding of a tax-exempt issue with a taxable advance refunding issue that is, in turn, currently refunded with a tax-exempt issue, the taxable advance refunding issue is taken into account under section 149(d)(3)(A)(i) if the two tax-exempt issues are outstanding concurrently for more than 90 days.

(f) *Redemption at first call date*—(1) *General rule*. Under sections 149(d)(3)(A)(ii) and (iii) (the *first call requirement*), bonds refunded by an advance refunding must be redeemed on their first call date if the savings test under section 149(d)(3)(B)(i) (the *savings test*) is satisfied. The savings test is satisfied if the issuer may realize present value debt service savings (determined without regard to administrative expenses) in connection with the issue of which the refunding bond is a part.

(2) *First call date*. *First call date* means the earliest date on which a bond may be redeemed (or, if issued before 1986, on the earliest date on which that bond may be redeemed at a redemption price not in excess of 103 percent of par). If, however, the savings test is not met with respect to the date described in the preceding sentence (*i.e.*, there are no present value savings if the refunded bonds are retired on that date), the first call date is the first date thereafter on which the bonds can be redeemed and on which the savings test is met.

(3) *Application of savings test to multipurpose issues*. Except as otherwise provided in this paragraph (f)(3), the multipurpose issue rules in §1.148–9(h) apply for purposes of the savings test. If any separate issue in a multipurpose issue increases the aggregate present value debt service savings on the entire multipurpose issue or reduces the present value debt service losses on that entire multipurpose issue, that separate issue satisfies the savings test.

(g) *Limitation on advance refundings of private activity bonds*. Under section 149(d)(2) and this section, interest on a bond is not excluded from gross income if any portion of the issue of which the bond is a part is issued to advance refund a private activity bond (other than a qualified 501(c)(3) bond). For this purpose, the term private activity bond—

(1) Includes a qualified bond described in section 141(e) (other than a qualified 501(c)(3) bond), regardless of whether the refunding issue consists of private activity bonds under §1.141–13; and

(2) Does not include a taxable bond.

(h) *Effective dates*—(1) *In general*. Except as provided in this paragraph (h), this section applies to bonds issued after June 30, 1993, to which §§1.148–1 through 1.148–11 apply, including conduit loans that are treated as issued after June 30, 1993, under paragraph (b)(4) of this section. In addition, this section applies to any issue to which the election described in §1.148–11(b)(1) is made.

(2) *Special effective date for paragraph (b)(3).* Paragraph (b)(3) of this section applies to any advance refunding issue issued after May 28, 1991.

(3) *Special effective date for paragraph (f)(3).* Paragraph (f)(3) of this section applies to bonds sold on or after July 8, 1997 and to any issue to which the election described in §1.148–11(b)(1) is made. See §1.148–11A(i) for rules relating to certain bonds sold before July 8, 1997.

(4) *Special effective date for paragraph (g).* See §1.141–15 for the applicability date of paragraph (g) of this section.

[T.D. 8476, 58 FR 33548, June 18, 1993; 58 FR 44453, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24046, May 10, 1994; T.D. 8718, 62 FR 25513, May 9, 1997; T.D. 9234, 70 FR 75035, Dec. 19, 2005]

§ 1.149(e)–1 Information reporting requirements for tax-exempt bonds.

(a) *General rule.* Interest on a bond is included in gross income unless certain information with respect to the issue of which the bond is a part is reported to the Internal Revenue Service in accordance with the requirements of this section. This section applies to any bond if the issue of which the bond is a part is issued after December 31, 1986 (including any bond issued to refund a bond issued on or before December 31, 1986).

(b) *Requirements for private activity bonds*—(1) *In general.* If the issue of which the bond is a part is an issue of private activity bonds, the issuer must comply with the following requirements—

(i) Not later than the 15th day of the second calendar month after the close of the calendar quarter in which the issue is issued, the issuer must file with the Internal Revenue Service a completed information reporting form prescribed for this purpose;

(ii) If any bond that is part of the issue is taken into account under section 146 (relating to volume cap on private activity bonds), the state certification requirement of paragraph (b)(2) of this section must be satisfied; and

(iii) If any bond that is part of the issue is a qualified mortgage bond or qualified veterans' mortgage bond (within the meaning of section 143 (a) or (b) or section 103A(c) (1) or (3) as in effect on the day before enactment of the Tax Reform Act of 1986), the issuer must submit the annual report containing information on the borrowers of the original proceeds of the issue as required under §1.103A–2 (k)(2)(ii) and (k)(3) through (k)(6).

(2) *State certification with respect to volume cap*—(i) *In general.* If an issue is subject to the volume cap under section 146, a state official designated by state law (if there is no such official, then the governor or the governor's delegate) must certify that the issue meets the requirements of section 146, and a copy of this certification must be attached to the information reporting form filed with respect to the issue. In the case of any constitutional home rule city (as defined in section 146(d)(3)(C)), the preceding sentence is applied by substituting ''city'' for ''state'' and ''chief executive officer'' for ''governor.''

(ii) *Certification.* The certifying official need not perform an independent investigation in order to certify that the issue meets the requirements of section 146. For example, if the certifying official receives an affidavit that was executed by an officer of the issuer who is responsible for issuing the bonds and that sets forth, in brief and summary terms, the facts necessary to determine that the issue meets the requirements of section 146 and if the certifying official has compared the information in that affidavit to other readily available information with respect to that issuer (e.g., previous affidavits and certifications for other private activity bonds issued by that issuer), the certifying official may rely on the affidavit.

(c) *Requirements for governmental bonds*—(1) *Issue price of $100,000 or more.* If the issue of which the bond is a part has an issue price of $100,000 or more and is not an issue of private activity bonds, then, not later than the 15th day of the second calendar month after the close of the calendar quarter in which the issue is issued, the issuer must file with the Internal Revenue Service a completed information reporting form prescribed for this purpose.

(2) *Issue price of less than $100,000*—(i) *In general.* If the issue of which the bond is a part has an issue price of less than $100,000 and is not an issue of private activity bonds, the issuer must file with the Internal Revenue Service one of the following information reporting forms within the prescribed period—

(A) *Separate return.* Not later than the 15th day of the second calendar month after the close of the calendar quarter in which the issue is issued, a completed information reporting form prescribed for this purpose with respect to that issue; or

(B) *Consolidated return.* Not later than February 15 of the calendar year following the calendar year in which the issue is issued, a completed information form prescribed for this purpose with respect to all issues to which this paragraph (c)(2) applies that were issued by the issuer during the calendar year and for which information was not reported on a separate information return pursuant to paragraph (c)(2)(i)(A) of this section.

(ii) *Bond issues issued before January 1, 1992.* Paragraph (c)(2)(i)(A) of this section does not apply if the issue of which the bond is a part is issued before January 1, 1992.

(iii) *Extended filing date for first and second calendar quarters of 1992.* If the issue of which the bond is a part is issued during the first or second calendar quarter of 1992, the prescribed period for filing an information reporting form with respect to that issue pursuant to paragraph (c)(2)(i)(A) of this section is extended until November 16, 1992.

(d) *Filing of forms and special rules*—(1) *Completed form.* For purposes of this section—

(i) *Good faith effort.* An information reporting form is treated as completed if the issuer (or a person acting on behalf of the issuer) has made a good faith effort to complete the form (taking into account the instructions to the form).

(ii) *Information.* In general, information reporting forms filed pursuant to this section must be completed on the basis of available information and reasonable expectations as of the date the issue is issued. Forms that are filed on a consolidated basis pursuant to paragraph (c)(2)(i)(B) of this section, however, may be completed on the basis of information readily available to the issuer at the close of the calendar year to which the form relates, supplemented by estimates made in good faith.

(iii) *Certain information not required.* An issuer need not report to the Internal Revenue Service any information specified in the first sentence of section 149(e)(2) that is not required to be reported to the Internal Revenue Service pursuant to the information reporting forms prescribed under that section and the instructions to those forms.

(2) *Manner of filing*—(i) *Place for filing.* The information reporting form must be filed with the Internal Revenue Service at the address specified on the form or in the instructions to the form.

(ii) *Extension of time.* The Commissioner may grant an extension of time to file any form or attachment required under this section if the Commissioner determines that the failure to file in a timely manner was not due to willful neglect. The Commissioner may make this determination with respect to an issue or to a class of issues.

(e) *Definitions.* For purposes of this section only—(1) *Private activity bond.* The term ''private activity bond'' has the meaning given that term in section 141(a) of the Internal Revenue Code, except that the term does not include any bond described in section 1312(c) of the Tax Reform Act of 1986 to which section 1312 or 1313 of the Tax Reform Act of 1986 applies.

(2) *Issue*—(i) *In general.* Except as otherwise provided in this paragraph (e)(2), bonds are treated as part of the same issue only if the bonds are issued—

(A) By the same issuer;

(B) On the same date; and

(C) Pursuant to a single transaction or to a series of related transactions.

(ii) *Draw-down loans, commercial paper, etc.* (A) Bonds issued during the same calendar year may be treated as part of the same tissue if the bonds are issued—

(*1*) Pursuant to a loan agreement under which amounts are to be advanced periodically (''draw-down loan''); or

(*2*) With a term not exceeding 270 days.

(B) In addition, the bonds must be equally and ratably secured under a single indenture or loan agreement and issued pursuant to a common financing arrangement (e.g., pursuant to the same official statement that is periodically updated to reflect changing factual circumstances). In the case of bonds issued pursuant to a draw-down loan that meets the requirements of the preceding sentence, bonds issued during different calendar years may be treated as part of the same issue if all the amounts to be advanced pursuant to the draw-down loan are reasonably expected to be advanced within three years of the date of issue of the first bond.

(iii) *Leases and installment sales.* Bonds other than private activity bonds may be treated as part of the same issue if—

(A) The bonds are issued pursuant to a single agreement that is in the form of a lease or installment sales agreement; and

(B) All of the property covered by that agreement is reasonably expected to be delivered within three years of the date of issue of the first bond.

(iv) *Qualified 501(c)(3) bonds.* If an issuer elects under section 141(b)(9) to treat a portion of an issue as a qualified 501(c)(3) bond, that portion is treated as a separate issue.

(3) *Date of issue*—(i) *Bond.* The date of issue of a bond is determined under §1.150–1.

(ii) *Issue.* The date of issue of an issue of bonds is the date of issue of the first bond that is part of the issue. See paragraphs (e)(2) (ii) and (iii) of this section for rules relating to draw-down loans, commercial paper, etc., and leases and installment sales.

(iii) *Bonds to which prior law applied.* Notwithstanding the provisions of this paragraph (e)(3), an issue for which an information report was required to be filed under section 103(l) or section 103A(j)(3) is treated as issued prior to January 1, 1987.

(4) *Issue price.* The term ''issue price'' has the same meaning given the term under §1.148–1(b).

[T.D. 8425, 57 FR 36002, Aug. 12, 1992, as amended at 59 FR 24351, May 11, 1994]

§ 1.149(g)–1 Hedge bonds.

(a) *Certain definitions.* Except as otherwise provided, the definitions set forth in §1.148–1 apply for purposes of section 149(g) and this section. In addition, the following terms have the following meanings:

Reasonable expectations means reasonable expectations (as defined in §1.148–1), as modified to take into account the provisions of section 149(f)(2)(B).

Spendable proceeds means net sale proceeds (as defined in §1.148–1).

(b) *Applicability of arbitrage allocation and accounting rules.* Section 1.148–6 applies for purposes of section 149(g), except that an expenditure that results in the creation of replacement proceeds (other than amounts in a bona fide debt service fund or a reasonably required reserve or replacement fund) is not an expenditure for purposes of section 149(g).

(c) *Refundings*—(1) *Investment in tax-exempt bonds.* A bond issued to refund a bond that is a tax-exempt bond by virtue of the rule in section 149(g)(3)(B) is not a tax-exempt bond unless the gross proceeds of that refunding bond (other than proceeds in a refunding escrow for the refunded bond) satisfy the requirements of section 149(g)(3)(B).

(2) *Anti-abuse rule.* A refunding bond is treated as a hedge bond unless there is a significant governmental purpose for the issuance of that bond (e.g., an advance refunding bond issued to realize debt service savings or to relieve the issuer of significantly burdensome document provisions, but not to otherwise hedge against future increases in interest rates).

(d) *Effective date.* This section applies to bonds issued after June 30, 1993 to which §§1.148–1 through 1.148–11 apply. In addition, this section applies to any issue to which the election described in §1.148–11(b)(1) is made.

[T.D. 8476, 58 FR 33549, June 18, 1993]

§ 1.150–1 Definitions.

(a) *Scope and effective date*—(1) *In general.* Except as otherwise provided, the definitions in this section apply for all purposes of sections 103 and 141 through 150.

(2) *Effective date*—(i) *In general*. Except as otherwise provided in this paragraph (a)(2), this section applies to issues issued after June 30, 1993 to which §§1.148–1 through 1.148–11 apply. In addition, this section (other than paragraph (c)(3) of this section) applies to any issue to which the election described in §1.148–11(b)(1) is made.

(ii) *Special effective date for paragraphs (c)(1), (c)(4)(iii), and (c)(6)*. Paragraphs (c)(1), (c)(4)(iii), and (c)(6) of this section apply to bonds sold on or after July 8, 1997 and to any issue to which the election described in §1.148–11(b)(1) is made. See §1.148–11A(i) for rules relating to certain bonds sold before July 8, 1997.

(3) *Exceptions to general effective date*. See §1.141–15 for the applicability date of the definition of bond documents contained in paragraph (b) of this section and the effective date of paragraph (c)(3)(ii) of this section.

(4) [Reserved] For further guidance, see §1.150–1T(a)(4).

(b) *Certain general definitions*. The following definitions apply:

Bond means any obligation of a State or political subdivision thereof under section 103(c)(1).

Bond documents means the bond indenture or resolution, transcript of proceedings, and any related documents.

Capital expenditure means any cost of a type that is properly chargeable to capital account (or would be so chargeable with a proper election or with the application of the definition of placed in service under §1.150–2(c)) under general Federal income tax principles. For example, costs incurred to acquire, construct, or improve land, buildings, and equipment generally are capital expenditures. Whether an expenditure is a capital expenditure is determined at the time the expenditure is paid with respect to the property. Future changes in law do not affect whether an expenditure is a capital expenditure.

Conduit borrower means the obligor on a purpose investment (as defined in §1.148–1). For example, if an issuer invests proceeds in a purpose investment in the form of a loan, lease, installment sale obligation, or similar obligation to another entity and the obligor uses the proceeds to carry out the governmental purpose of the issue, the obligor is a conduit borrower.

Conduit financing issue means an issue the proceeds of which are used or are reasonably expected to be used to finance at least one purpose investment representing at least one conduit loan to one conduit borrower.

Conduit loan means a purpose investment (as defined in §1.148–1).

Governmental bond means any bond of an issue of tax-exempt bonds in which none of the bonds are private activity bonds.

Issuance costs [Reserved] For further guidance, see §1.150–1T(b), *Issuance costs*.

Issue date means, in reference to an issue, the first date on which the issuer receives the purchase price in exchange for delivery of the evidence of indebtedness representing any bond included in the issue. Issue date means, in reference to a bond, the date on which the issuer receives the purchase price in exchange for that bond. In no event is the issue date earlier than the first day on which interest begins to accrue on the bond or bonds for Federal income tax purposes.

Obligation means any valid evidence of indebtedness under general Federal income tax principles.

Pooled financing issue means an issue the proceeds of which are to be used to finance purpose investments representing conduit loans to two or more conduit borrowers, unless those conduit loans are to be used to finance a single capital project.

Private activity bond means a private activity bond (as defined in section 141).

Qualified mortgage loan means a mortgage loan with respect to an owner-occupied residence acquired with the proceeds of an obligation described in section 143(a)(1) or 143(b) (or applicable prior law).

Qualified student loan means a student loan acquired with the proceeds of an obligation described in section 144(b)(1).

Related party means, in reference to a governmental unit or a 501(c)(3) organization, any member of the same controlled group, and, in reference to any person that is not a governmental unit or 501(c)(3) organization, a related person (as defined in section 144(a)(3)).

Taxable bond means any obligation the interest on which is not excludable from gross income under section 103.

Tax-exempt bond means any bond the interest on which is excludable from gross income under section 103(a). For purposes of section 148, tax-exempt bond includes:

(1) An interest in a regulated investment company to the extent that at least 95 percent of the income to the holder of the interest is interest that is excludable from gross income under section 103; and

(2) A certificate of indebtedness issued by the United States Treasury pursuant to the Demand Deposit State and Local Government Series program described in 31 CFR part 344.

Working capital expenditure means any cost that is not a capital expenditure. Generally, current operating expenses are working capital expenditures.

(c) *Definition of issue*—(1) *In general*. Except as otherwise provided in this paragraph (c), the term *issue* means two or more bonds that meet all of the following requirements:

(i) *Sold at substantially the same time*. The bonds are sold at substantially the same time. Bonds are treated as sold at substantially the same time if they are sold less than 15 days apart.

(ii) *Sold pursuant to the same plan of financing*. The bonds are sold pursuant to the same plan of financing. Factors material to the plan of financing include the purposes for the bonds and the structure of the financing. For example, generally—

(A) Bonds to finance a single facility or related facilities are part of the same plan of financing;

(B) Short-term bonds to finance working capital expenditures and long-term bonds to finance capital projects are not part of the same plan of financing; and

(C) Certificates of participation in a lease and general obligation bonds secured by tax revenues are not part of the same plan of financing.

(iii) *Payable from same source of funds*. The bonds are reasonably expected to be paid from substantially the same source of funds, determined without regard to guarantees from parties unrelated to the obligor.

(2) *Exception for taxable bonds*. Taxable bonds and tax-exempt bonds are not part of the same issue under this paragraph (c). The issuance of tax-exempt bonds in a transaction (or series of related transactions) that includes taxable bonds, however, may constitute an abusive arbitrage device under §1.148–10(a) or a device to avoid other limitations in sections 103 and 141 through 150 (for example, structures involving *windows* or unreasonable allocations of bonds).

(3) *Exception for certain bonds financing separate purposes*—(i) *In general*. Bonds may be treated as part of separate issues if the requirements of this paragraph (c)(3) are satisfied. Each of these separate issues must finance a separate purpose (e.g., refunding a separate prior issue, financing a separate purpose investment, financing integrated or functionally related capital projects, and financing any clearly discrete governmental purpose). Each of these separate issues independently must be a tax-exempt bond (e.g., a governmental bond or a qualified mortgage bond). The aggregate proceeds, investments, and bonds in such a transaction must be allocated between each of the separate issues using a reasonable, consistently applied allocation method. If any separate issue consists of refunding bonds, the allocation rules in §1.148–9(h) must be satisfied. An allocation is not reasonable if it achieves more favorable results under sections 103 and 141 to 150 than could be achieved with actual separate issues. All allocations under this paragraph (c)(3) must be made in writing on or before the issue date.

(ii) *Exceptions*. This paragraph (c)(3) does not apply for purposes of sections 141, 144(a), 148, 149(d) and 149(g).

(4) *Special rules for certain financings*—(i) *Draw-down loans*. Bonds issued pursuant to a draw-down loan are treated as part of a single issue. The issue date of that issue is the first date on which the aggregate draws under the loan exceed the lesser of $50,000 or 5 percent of the issue price.

(ii) *Commercial paper*—(A) *In general*. Short-term bonds having a maturity of 270 days or less (*commercial paper*) issued pursuant to the same commercial paper program may be treated as part of a single issue, the issue date of which is the first date the aggregate amount of commercial paper issued under the program exceeds the lesser of $50,000 or 5 percent of the aggregate issue price of the commercial paper in the program. A commercial paper program is a program to issue commercial paper to finance or refinance the same governmental purpose pursuant to a single master legal document. Commercial paper is not part of the same commercial paper program unless issued during an 18-month period, beginning on the deemed issue date. In addition, commercial paper issued after the end of this 18-month period may be treated as part of the program to the extent issued to refund commercial paper that is part of the program, but only to the extent that—

(*1*) There is no increase in the principal amount outstanding; and

(*2*) The program does not have a term in excess of—

(*i*) 30 years; or

(*ii*) The period reasonably necessary for the governmental purposes of the program.

(B) *Safe harbor*. The requirement of paragraph (c)(4)(ii)(A)(*2*) of this section is treated as satisfied if the weighted average maturity of the issue does not exceed 120 percent of the weighted average expected economic life of the property financed by the issue.

(iii) *Certain general obligation bonds*. Except as otherwise provided in paragraph (c)(2) of this section, bonds that are secured by a pledge of the issuer's full faith and credit (or a substantially similar pledge) and sold and issued on the same dates pursuant to a single offering document may be treated as part of the same issue if the issuer so elects on or before the issue date.

(5) *Anti-abuse rule*. In order to prevent the avoidance of sections 103 and 141 through 150 and the general purposes thereof, the Commissioner may treat bonds as part of the same issue or as part of separate issues to clearly reflect the economic substance of a transaction.

(6) *Sale date*. The sale date of a bond is the first day on which there is a binding contract in writing for the sale or exchange of the bond.

(d) *Definition of refunding issue and related definitions*—(1) *General definition of refunding issue*. *Refunding issue* means an issue of obligations the proceeds of which are used to pay principal, interest, or redemption price on another issue (a *prior issue*, as more particularly defined in paragraph (d)(5) of this section), including the issuance costs, accrued interest, capitalized interest on the refunding issue, a reserve or replacement fund, or similar costs, if any, properly allocable to that refunding issue.

(2) *Exceptions and special rules*. For purposes of paragraph (d)(1) of this section, the following exceptions and special rules apply—

(i) *Payment of certain interest*. An issue is not a refunding issue if the only principal and interest that is paid with proceeds of the issue (determined without regard to the multipurpose issue rules of §1.148–9(h)) is interest on another issue that—

(A) Accrues on the other issue during a one-year period including the issue date of the issue that finances the interest;

(B) Is a capital expenditure; or

(C) Is a working capital expenditure to which the de minimis rule of §1.148–6(d)(3)(ii)(A) applies.

(ii) *Certain issues with different obligors*—(A) *In general*. An issue is not a refunding issue to the extent that the obligor (as defined in paragraph (d)(2)(ii)(B) of this section) of one issue is neither the obligor of the other issue nor a related party with respect to the obligor of the other issue.

(B) *Definition of obligor*. The *obligor* of an issue means the actual issuer of the issue, except that the obligor of the portion of an issue properly allocable to an investment in a purpose investment means the conduit borrower under that purpose investment. The obligor of an issue used to finance qualified mortgage loans, qualified student loans, or similar program investments (as defined in §1.148–1) does not include the ultimate recipient of the loan (e.g., the homeowner, the student).

(iii) *Certain special rules for purpose investments.* For purposes of this paragraph (d), the following special rules apply:

(A) *Refunding of a conduit financing issue by a conduit loan refunding issue.* Except as provided in paragraph (d)(2)(iii)(B) of this section, the use of the proceeds of an issue that is used to refund an obligation that is a purpose investment (a *conduit refunding issue*) by the actual issuer of the conduit financing issue determines whether the conduit refunding issue is a refunding of the conduit financing issue (in addition to a refunding of the obligation that is the purpose investment).

(B) *Recycling of certain payments under purpose investments.* A conduit refunding issue is not a refunding of a conduit financing issue to the extent that the actual issuer of the conduit financing issue reasonably expects as of the date of receipt of the proceeds of the conduit refunding issue to use those amounts within 6 months (or, if greater, during the applicable temporary period for those amounts under section 148(c) or under applicable prior law) to acquire a new purpose investment. Any new purpose investment is treated as made from the proceeds of the conduit financing issue.

(C) *Application to tax-exempt loans.* For purposes of this paragraph (d), obligations that would be purpose investments (absent section 148(b)(3)(A)) are treated as purpose investments.

(iv) *Substance of transaction controls.* In the absence of other applicable controlling rules under this paragraph (d), the determination of whether an issue is a refunding issue is based on the substance of the transaction in light of all the facts and circumstances.

(v) *Certain integrated transactions in connection with asset acquisition not treated as refunding issues.* If, within six months before or after a person assumes (including taking subject to) obligations of an unrelated party in connection with an asset acquisition (other than a transaction to which section 381(a) applies if the person assuming the obligation is the acquiring corporation within the meaning of section 381(a)), the assumed issue is refinanced, the refinancing issue is not treated as a refunding issue.

(3) *Current refunding issue. Current refunding issue* means:

(i) Except as provided in paragraph (d)(3)(ii) of this section, a refunding issue that is issued not more than 90 days before the last expenditure of any proceeds of the refunding issue for the payment of principal or interest on the prior issue; and

(ii) In the case of a refunding issue issued before 1986—

(A) A refunding issue that is issued not more than 180 days before the last expenditure of any proceeds of the refunding issue for the payment of principal or interest on the prior issue; or

(B) A refunding issue if the prior issue had a term of less than 3 years and was sold in anticipation of permanent financing, but only if the aggregate term of all prior issues sold in anticipation of permanent financing was less than 3 years.

(4) *Advance refunding issue. Advance refunding issue* means a refunding issue that is not a current refunding issue.

(5) *Prior issue. Prior issue* means an issue of obligations all or a portion of the principal, interest, or call premium on which is paid or provided for with proceeds of a refunding issue. A prior issue may be issued before, at the same time as, or after a refunding issue. If the refunded and unrefunded portions of a prior issue are treated as separate issues under §1.148–9(i), for the purposes for which that section applies, except to the extent that the context clearly requires otherwise, references to a prior issue refer only to the refunded portion of that prior issue.

(e) *Controlled group* means a group of entities controlled directly or indirectly by the same entity or group of entities within the meaning of this paragraph (e).

(1) *Direct control.* The determination of direct control is made on the basis of all the relevant facts and circumstances. One entity or group of entities (the *controlling entity*) generally controls another entity or group of entities (the *controlled entity*) for purposes of this paragraph if the controlling entity possesses either of the following rights or powers and the rights or powers are discretionary and non-ministerial—

(i) The right or power both to approve and to remove without cause a controlling portion of the governing body of the controlled entity; or

(ii) The right or power to require the use of funds or assets of the controlled entity for any purpose of the controlling entity.

(2) *Indirect control.* If a controlling entity controls a controlled entity under the test in paragraph (e)(1) of this section, then the controlling entity also controls all entities controlled, directly or indirectly, by the controlled entity or entities.

(3) *Exception for general purpose governmental entities.* An entity is not a controlled entity under this paragraph (e) if the entity possesses substantial taxing, eminent domain, and police powers. For example, a city possessing substantial amounts of each of these sovereign powers is not a controlled entity of the state.

[T.D. 8476, 58 FR 33549, June 18, 1993; 58 FR 44453, Aug. 23, 1993, as amended by T.D. 8538, 59 FR 24046, May 10, 1994; T.D. 8712, 62 FR 2304, Jan. 16, 1997; T.D. 8718, 62 FR 25513, May 9, 1997; T.D. 9234, 70 FR 75036, Dec. 19, 2005; T.D. 9533, 76 FR 39280, July 6, 2011]

§ 1.150–1T Definitions (temporary).

(a) through (a)(3) [Reserved] For further guidance, see § 1.150–1(a) through (a)(3).

(4) *Additional exception to the general applicability date.* Section 1.150–1T(b), *Issuance costs*, applies on and after July 6, 2011.

(5) *Expiration date.* The applicability of § 1.150–1T(b), *Issuance costs*, expires on or before July 1, 2014.

(b) *Bond* through the definition of *Governmental bond* [Reserved] For further guidance, see § 1.150–1(b) *Bond* through the definition of *Governmental bond*.

Issuance costs means costs to the extent incurred in connection with, and allocable to, the issuance of an issue within the meaning of section 147(g). For example, issuance costs include the following costs but only to the extent incurred in connection with, and allocable to, the borrowing: Underwriters' spread; counsel fees; financial advisory fees; fees paid to an organization to evaluate the credit quality of an issue; trustee fees; paying agent fees; bond registrar, certification, and authentication fees; accounting fees; printing costs for bonds and offering documents; public approval process costs; engineering and feasibility study costs; guarantee fees, other than for qualified guarantees (as defined in § 1.148–4(f)); and similar costs.

(c) *Issue date* through paragraph (e) [Reserved] For further guidance, see § 1.150–1(b) *Issue date* through paragraph (e).

[T.D. 9533, 76 FR 39280, July 6, 2011]

§ 1.150–2 Proceeds of bonds used for reimbursement.

(a) *Table of contents.* This table of contents contains a listing of the headings contained in § 1.150–2.

(b) *Scope.* This section applies to reimbursement bonds (as defined in paragraph (c) of this section) for all purposes of sections 103 and 141 to 150.

(c) *Definitions.* The following definitions apply:

Issuer means—

(1) For any private activity bond (excluding a qualified 501(c)(3) bond, qualified student loan bond, qualified mortgage bond, or qualified veterans' mortgage bond), the entity that actually issues the reimbursement bond; and

(2) For any bond not described in paragraph (1) of this definition, either the entity that actually issues the reimbursement bond or, to the extent that the reimbursement bond proceeds are to be loaned to a conduit borrower, that conduit borrower.

Official intent means an issuer's declaration of intent to reimburse an original expenditure with proceeds of an obligation.

Original expenditure means an expenditure for a governmental purpose that is originally paid from a source other than a reimbursement bond.

Placed in service means, with respect to a facility, the date on which, based on all the facts and circumstances—

(1) The facility has reached a degree of completion which would permit its operation at substantially its design level; and

(2) The facility is, in fact, in operation at such level.

Reimbursement allocation means an allocation in writing that evidences an issuer's use of proceeds of a reimbursement bond to reimburse an original expenditure. An allocation made within 30 days after the issue date of a reimbursement bond may be treated as made on the issue date.

Reimbursement bond means the portion of an issue allocated to reimburse an original expenditure that was paid before the issue date.

(d) *General operating rules for reimbursement expenditures.* Except as otherwise provided, a reimbursement allocation is treated as an expenditure of proceeds of a reimbursement bond for the governmental purpose of the original expenditure on the date of the reimbursement allocation only if:

(1) *Official intent.* Not later than 60 days after payment of the original expenditure, the issuer adopts an official intent for the original expenditure that satisfies paragraph (e) of this section.

(2) *Reimbursement period*—(i) *In general.* The reimbursement allocation is made not later than 18 months after the later of—

(A) The date the original expenditure is paid; or

(B) The date the project is placed in service or abandoned, but in no event more than 3 years after the original expenditure is paid.

(ii) *Special rule for small issuers.* In applying paragraph (d)(2)(i) of this section to an issue that satisfies section 148(f)(4)(D)(i) (I) through (IV), the "18 month" limitation is changed to "3 years" and the "3-year" maximum reimbursement period is disregarded.

(iii) *Special rule for long-term construction projects.* In applying paragraph (d)(2)(i) to a construction project for which both the issuer and a licensed architect or engineer certify that at least 5 years is necessary to complete construction of the project, the maximum reimbursement period is changed from "3 years" to "5 years."

(3) *Nature of expenditure.* The original expenditure is a capital expenditure, a cost of issuance for a bond, an expenditure described in §1.148–6(d)(3)(ii)(B) (relating to certain extraordinary working capital items), a grant (as defined in §1.148–6(d)(4)), a qualified student loan, a qualified mortgage loan, or a qualified veterans' mortgage loan.

(e) *Official intent rules.* An official intent satisfies this paragraph (e) if:

(1) *Form of official intent.* The official intent is made in any reasonable form, including issuer resolution, action by an appropriate representative of the issuer (e.g., a person authorized or designated to declare official intent on behalf of the issuer), or specific legislative authorization for the issuance of obligations for a particular project.

(2) *Project description in official intent*—(i) *In general.* The official intent generally describes the project for which the original expenditure is paid and states the maximum principal amount of obligations expected to be issued for the project. A project includes any property, project, or program (e.g., *highway capital improvement program, hospital equipment acquisition*, or *school building renovation*).

(ii) *Fund accounting.* A project description is sufficient if it identifies, by name and functional purpose, the fund or account from which the original expenditure is paid (e.g., *parks and recreation fund—recreational facility capital improvement program*).

(iii) *Reasonable deviations in project description.* Deviations between a project described in an official intent and the actual project financed with reimbursement bonds do not invalidate the official intent to the extent that the actual project is reasonably related in function to the described project. For example, *hospital equipment* is a reasonable deviation from *hospital building improvements*. In contrast, a *city office building rehabilitation* is not a reasonable deviation from *highway improvements*.

(3) *Reasonableness of official intent*. On the date of the declaration, the issuer must have a reasonable expectation (as defined in §1.148–1(b)) that it will reimburse the original expenditure with proceeds of an obligation. Official intents declared as a matter of course or in amounts substantially in excess of the amounts expected to be necessary for the project (e.g., *blanket declarations*) are not reasonable. Similarly, a pattern of failure to reimburse actual original expenditures covered by official intents (other than in extraordinary circumstances) is evidence of unreasonableness. An official intent declared pursuant to a specific legislative authorization is rebuttably presumed to satisfy this paragraph (e)(3).

(f) *Exceptions to general operating rules*—(1) *De minimis exception*. Paragraphs (d)(1) and (d)(2) of this section do not apply to costs of issuance of any bond or to an amount not in excess of the lesser of $100,000 or 5 percent of the proceeds of the issue.

(2) *Preliminary expenditures exception*. Paragraphs (d)(1) and (d)(2) of this section do not apply to any preliminary expenditures, up to an amount not in excess of 20 percent of the aggregate issue price of the issue or issues that finance or are reasonably expected by the issuer to finance the project for which the preliminary expenditures were incurred. Preliminary expenditures include architectural, engineering, surveying, soil testing, reimbursement bond issuance, and similar costs that are incurred prior to commencement of acquisition, construction, or rehabilitation of a project, other than land acquisition, site preparation, and similar costs incident to commencement of construction.

(g) *Special rules on refundings*—(1) *In general—once financed, not reimbursed*. Except as provided in paragraph (g)(2) of this section, paragraph (d) of this section does not apply to an allocation to pay principal or interest on an obligation or to reimburse an original expenditure paid by another obligation. Instead, such an allocation is analyzed under rules on refunding issues. See §1.148–9.

(2) *Certain proceeds of prior issue used for reimbursement treated as unspent*. In the case of a refunding issue (or series of refunding issues), proceeds of a prior issue purportedly used to reimburse original expenditures are treated as unspent proceeds of the prior issue unless the purported reimbursement was a valid expenditure under applicable law on reimbursement expenditures on the issue date of the prior issue.

(h) *Anti-abuse rules*—(1) *General rule*. A reimbursement allocation is not an expenditure of proceeds of an issue under this section if the allocation employs an abusive arbitrage device under §1.148–10 to avoid the arbitrage restrictions or to avoid the restrictions under sections 142 through 147.

(2) *One-year step transaction rule*—(i) *Creation of replacement proceeds*. A purported reimbursement allocation is invalid and thus is not an expenditure of proceeds of an issue if, within 1 year after the allocation, funds corresponding to the proceeds of a reimbursement bond for which a reimbursement allocation was made are used in a manner that results in the creation of replacement proceeds (as defined in §1.148–1) of that issue or another issue. The preceding sentence does not apply to amounts deposited in a bona fide debt service fund (as defined in §1.148–1).

(ii) *Example*. The provisions of paragraph (h)(2)(i) of this section are illustrated by the following example.

Example. On January 1, 1994, County *A* issues an issue of 7 percent tax-exempt bonds (the *1994 issue*) and makes a purported reimbursement allocation to reimburse an original expenditure for specified capital improvements. *A* immediately deposits funds corresponding to the proceeds subject to the reimbursement allocation in an escrow fund to provide for payment of principal and interest on its outstanding 1991 issue of 9 percent tax-exempt bonds (the *prior issue*). The use of amounts corresponding to the proceeds of the reimbursement bonds to create a sinking fund for another issue within 1 year after the purported reimbursement allocation invalidates the reimbursement allocation. The proceeds retain their character as unspent proceeds of the 7 percent issue upon deposit in the escrow fund. Accordingly, the proceeds are subject to the 7 percent yield restriction of the 1994 issue instead of the 9 percent yield restriction of the prior issue.

(i) *Authority of the Commissioner to prescribe rules.* The Commissioner may by revenue ruling or revenue procedure (see §601.601(d)(2)(ii)(*b*) of this chapter) prescribe rules for the expenditure of proceeds of reimbursement bonds in circumstances that do not otherwise satisfy this section.

(j) *Effective date*—(1) *In general.* The provisions of this section apply to all allocations of proceeds of reimbursement bonds issued after June 30, 1993.

(2) *Transitional rules*—(i) *Official intent.* An official intent is treated as satisfying the official intent requirement of paragraph (d)(1) of this section if it—

(A) Satisfied the applicable provisions of §1.103–8(a)(5) as in effect prior to July 1, 1993, (as contained in 26 CFR part 1 revised as of April 1, 1993) and was made prior to that date, or

(B) Satisfied the applicable provisions of §1.103–18 as in effect between January 27, 1992, and June 30, 1993, (as contained in 26 CFR part 1 revised as of April 1, 1993) and was made during that period.

(ii) *Certain expenditures of private activity bonds.* For any expenditure that was originally paid prior to August 15, 1993, and that would have qualified for expenditure by reimbursement from the proceeds of a private activity bond under T.D. 7199, section 1.103–8(a)(5), 1972–2 C.B. 45 (see §601.601(d)(2)(ii)(*b*)) of this chapter, the requirements of that section may be applied in lieu of this section.

[T.D. 8476, 58 FR 33551, June 18, 1993; 58 FR 44453, Aug. 23, 1993]

§ 1.150–4 Change in use of facilities financed with tax-exempt private activity bonds.

(a) *Scope.* This section applies for purposes of the rules for change of use of facilities financed with private activity bonds under sections 150(b)(3) (relating to qualified 501(c)(3) bonds), 150(b)(4) (relating to certain exempt facility bonds and small issue bonds), 150(b)(5) (relating to facilities required to be owned by governmental units or 501(c)(3) organizations), and 150(c).

(b) *Effect of remedial actions*—(1) *In general.* Except as provided in this section, the change of use provisions of sections 150(b) (3) through (5), and 150(c) apply even if the issuer takes a remedial action described in §§1.142–2, 1.144–2, or 1.145–2.

(2) *Exceptions*—(i) *Redemption.* If nonqualified bonds are redeemed within 90 days of a deliberate action under §1.145–2(a) or within 90 days of the date on which a failure to properly use proceeds occurs under §1.142–2 or §1.144–2, sections 150(b) (3) through (5) do not apply during the period between that date and the date on which the nonqualified bonds are redeemed.

(ii) *Alternative qualifying use of facility.* If a bond-financed facility is used for an alternative qualifying use under §§1.145–2 and 1.141–12(f), sections 150(b) (3) and (5) do not apply because of the alternative use.

(iii) *Alternative use of disposition proceeds.* If disposition proceeds are used for a qualifying purpose under §§1.145–2 and 1.141–12(e), 1.142–2(c)(4), or 1.144–2, sections 150(b) (3) through (5) do not apply because of the deliberate action that gave rise to the disposition proceeds after the date on which all of the disposition proceeds have been expended on the qualifying purpose. If all of the disposition proceeds are so expended within 90 days of the date of the deliberate action, however, sections 150(b) (3) through (5) do not apply because of the deliberate action.

(c) *Allocation rules*—(1) *In general.* If a change in use of a portion of the property financed with an issue of qualified private activity bonds causes section 150 (b)(3), (b)(4), or (b)(5) to apply to an issue, the bonds of the issue allocable to that portion under section 150(c)(3) are the same as the nonqualified bonds determined for purposes of §§1.142–1, 1.144–1, and 1.145–1, except that bonds allocable to all common areas are also allocated to that portion.

(2) *Special rule when remedial action is taken.* If an issuer takes a remedial action with respect to an issue of private activity bonds under §§1.142–2, 1.144–2, or 1.145–2, the bonds of the issue allocable to a portion of property are the

same as the nonqualified bonds determined for purposes of those sections.

(d) *Effective dates.* For effective dates of this section, see § 1.141–16.

[T.D. 8712, 62 FR 2304, Jan. 16, 1997]

§ 1.150–5 Filing notices and elections.

(a) *In general.* Notices and elections under the following sections must be filed with the Internal Revenue Service, 1111 Constitution Avenue, NW, Attention: T:GE:TEB:O, Washington, DC 20224 or such other place designated by publication of a notice in the Internal Revenue Bulletin—

(1) Section 1.141–12(d)(3);

(2) Section 1.142(f)(4)-1; and

(3) Section 1.142–2(c)(2).

(b) *Effective dates.* This section applies to notices and elections filed on or after January 19, 2001.

[T.D. 8941, 66 FR 4671, Jan. 18, 2001]

Regulations Applicable to Certain Bonds Sold Prior to July 8, 1997

Editorial Note: IRS redesignated the following sections to appear below the undesignated center heading "Regulations Applicable to Certain Bonds Sold Prior to July 8, 1997" and preceding the undesignated center heading "Deductions for Personal Exemptions." See 62 FR 25507 and 25513, May 9, 1997 for the specific sections involved in the redesignation.

§ 1.148–1A Definitions and elections.

(a) [Reserved]. For guidance see § 1.148–1.

(b) *Certain definitions.*

Investment-type property. See § 1.148–1(b). Investment-type property also includes a contract that would be a hedge (within the meaning of § 1.148–4(h)) except that it contains a significant investment element.

(c) through (c)(4)(i) [Reserved]. For guidance see § 1.148–1.

(c)(4)(ii) *Bonds financing a working capital reserve*—(A) *In general.* Except as otherwise provided in § 1.148–1(c)(4)(ii)(B), replacement proceeds arise to the extent a working capital reserve is, directly or indirectly, financed with the proceeds of the issue (regardless of the expenditure of proceeds of the issue). Thus, for example, if an issuer that does not maintain a working capital reserve borrows to fund such a reserve, the issuer will have replacement proceeds. To determine the amount of a working capital reserve maintained, an issuer may use the average amount maintained as a working capital reserve during annual periods of at least one year, the last of which ends within a year before the issue date. For example, the amount of a working capital reserve may be computed using the average of the beginning or ending monthly balances of the amount maintained as a reserve (net of unexpended gross proceeds) during the one year period preceding the issue date.

[T.D. 8538, 59 FR 24041, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25507, May 9, 1997]

§ 1.148–2A General arbitrage yield restriction rules.

(a) through (b)(2)(i) [Reserved]. For guidance see § 1.148–2.

(b)(2)(ii) *Exceptions to certification requirement.* An issuer is not required to make a certification for an issue under § 1.148–2(b)(2)(i) if—

(A) The issuer reasonably expects as of the issue date that there will be no unspent gross proceeds after the issue date, other than gross proceeds in a bona fide debt service fund (e.g., *equipment lease* financings in which the issuer purchases equipment in exchange for an installment payment note); or

(B) The issue price of the issue does not exceed $1,000,000.

[T.D. 8538, 59 FR 24042, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25507, May 9, 1997]

§ 1.148–3A General arbitrage rebate rules.

(a) through (h)(2) [Reserved]. For guidance see § 1.148–3.

(h)(3) *Waivers of the penalty.* For purposes of § 1.148–3(h)(3), willful neglect does not include a failure that is attributable solely to the permissible retroactive selection of a short first bond year if the rebate amount that the issuer failed to pay is paid within 60 days of the selection of that bond year.

[T.D. 8538, 59 FR 24042, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25507, May 9, 1997]

§ 1.148–4A Yield on an issue of bonds.

(a) through (b)(4) [Reserved]. For guidance see § 1.148–4.

(b)(5) *Special aggregation rule treating certain bonds as a single fixed yield bond.* Two variable yield bonds of an issue are treated in the aggregate as a single fixed yield bond if—

(i) Aggregate treatment would result in the single bond being a fixed yield bond; and

(ii) The terms of the bonds do not contain any features that could distort the aggregate fixed yield from what the yield would be if a single fixed yield bond were issued. For example, if an issue contains a bond bearing interest at a floating rate and a related bond bearing interest at a rate equal to a fixed rate minus that floating rate, those two bonds are treated as a single fixed yield bond only if neither bond may be redeemed unless the other bond is also redeemed at the same time.

(c) through (f) [Reserved]. For guidance see § 1.148–4.

(g) *Yield on certain mortgage revenue and student loan bonds.* For purposes of section 148 and § 1.148–4, section 143(g)(2)(C)(ii) applies to the computation of yield on an issue of qualified mortgage bonds or qualified veterans' mortgage bonds. For purposes of applying sections 148 and 143(g) to a variable yield issue of qualified mortgage bonds, qualified veterans' mortgage bonds, or qualified student loan bonds, the yield on that issue is computed over the term of the issue, and § 1.148–4(d) does not apply to the issue. As of any date before the final maturity date, the yield over the term of the issue is based on the actual amounts paid or received to that date and the amounts that are reasonably expected (as of that date) to be paid or received over the remaining term of the issue.

(h) *Qualified hedging transactions*—(1) *In general.* Payments made or received by an issuer under a qualified hedge (as defined in § 1.148–4(h)(2)) relating to bonds of an issue are taken into account (as provided in paragraph (h)(3) of this section) to determine the yield on the issue. Except as provided in paragraphs (h)(4) and (h)(5)(ii)(C) of this section, the bonds to which a qualified hedge relates are treated as variable yield bonds. These hedging rules apply solely for purposes of sections 143(g), 148, and 149(d).

(2) (i) through (vi) [Reserved]. For guidance see § 1.148–4(h)(2).

(2)(vii) *Timing and duration.* For a contract to be a qualified hedge under § 1.148–4(h)(2), payments must not begin to accrue under the contract on a date earlier than the issue date of the hedged bonds and must not accrue longer than the hedged interest payments on the hedged bonds.

(viii) [Reserved]. For guidance see § 1.148–4(h).

(ix) *Identification.* For a contract to be a qualified hedge under § 1.148–4(h)(2), the contract must be identified by the actual issuer on its books and records maintained for the hedged bonds not later than three days after the date on which the parties enter into the contract. The identification must specify the hedge provider, the terms of the contract, and the hedged bonds. The identification must contain sufficient detail to establish that the requirements of § 1.148–4(h)(2), and if applicable, paragraph (h)(4) of this section are satisfied. The existence of the hedge must be noted on all forms filed with the Internal Revenue Service for the issue on or after the date on which the hedge is entered into.

(3) *Accounting for qualified hedges*—(i) *In general.* Except as otherwise provided in paragraph (h)(4) of this section, payments made or received by the issuer under a qualified hedge are treated as payments made or received, as appropriate, on the hedged bonds that are taken into account in determining the yield on those bonds. These payments are reasonably allocated to the hedged bonds in the period to which the payments relate, as determined under paragraph (h)(3)(iii) of this section. Payments made or received by the issuer include payments deemed made or received when a contract is terminated or deemed terminated under this paragraph (h)(3). Payments reasonably allocable to the reduction of risk of interest rate changes and to the hedge provider's overhead under this paragraph (h) are included as payments made or received under a qualified hedge.

(ii) *Exclusions from hedge.* Payments for services or other items under the contract that are not expressly treated as payments under the qualified hedge under paragraph (h)(3)(i) of this section are not payments with respect to a qualified hedge.

(iii) *Timing and allocation of payments.* The period to which a payment made by the issuer relates is determined under general Federal income tax principles, including, without limitation, § 1.446–3, and adjusted as necessary to reflect the end of a computation period and the start of a new computation period. Except as provided in paragraphs (h)(3)(iv) and (h)(5)(ii) of this section, a payment received by the issuer is taken into account in the period that the interest payment that the payment hedges is required to be made.

(iv) *Termination payments*—(A) *Termination defined.* A termination of a qualified hedge includes any sale or other disposition of the hedge by the issuer, or the acquisition by the issuer of an offsetting hedge. A deemed termination occurs when the hedged bonds are redeemed and when a hedge ceases to be a qualified hedge of the hedged bonds. In the case of an assignment by a hedge provider of its remaining rights and obligations on the hedge to a third party or a modification of the hedging contract, the assignment or modification is treated as a termination with respect to the issuer only if it results in a deemed exchange of the hedge and a realization event under section 1001.

(B) *General rule.* A payment made or received by an issuer to terminate a qualified hedge, including loss or gain realized or deemed realized, is treated as a payment made or received on the hedged bonds, as appropriate. The payment is reasonably allocated to the remaining periods originally covered by the terminated hedge in a manner that reflects the economic substance of the hedge.

(C) *Special rule for terminations when bonds are redeemed.* Except as otherwise provided in this paragraph (h)(3)(iv)(C) and in paragraph (h)(3)(iv)(D) of this section, when a qualified hedge is deemed terminated because the hedged bonds are redeemed, the fair market value of the contract on the redemption date is treated as a termination payment made or received on that date. When hedged bonds are redeemed, any payment received by the issuer on termination of a hedge, including a termination payment or a deemed termination payment, reduces, but not below zero, the interest payments made by the issuer on the hedged bonds in the computation period ending on the termination date. The remainder of the payment, if any, is reasonably allocated over the bond years in the immediately preceding computation period or periods to the extent necessary to eliminate the excess.

(D) *Special rules for refundings.* To the extent that the hedged bonds are redeemed using the proceeds of a refunding issue, the termination payment is accounted for under paragraph (h)(3)(iv)(B) of this section by treating it as a payment on the refunding issue, rather than the hedged bonds. In addition, to the extent that the refunding issue, rather than the hedged bonds, has been redeemed, paragraph (h)(3)(iv)(C) of this section applies to the termination payment by treating it as a payment on the redeemed refunding issue.

(E) *Safe harbor for certain non-level payments.* A non-level payment to terminate a hedge does not result in that hedge failing to satisfy the applicable provisions of paragraph (h)(3)(iv)(B) of this section if the payment is allocated to each bond year for which the hedge would have been in effect in accordance with this paragraph (h)(3)(iv)(E). For a variable yield issue, an equal amount (or for any short bond year, a proportionate amount of the equal amount) must be allocated to each bond year such that the sum of the present values of the annual amounts equals the present value of the non-level payment. Present value is computed as of the day the hedge is terminated, using the yield on the hedged bonds, determined without regard to the non-level payment. The yield used for this purpose is computed for the period beginning on the first date the hedge is in effect and ending on the date the hedge is terminated. On the other hand, for a fixed yield issue, the non-level payment is taken into account as a single payment on the date it is paid.

(4) *Certain variable yield bonds treated as fixed yield bonds*—(i) *In general*. Except as otherwise provided in this paragraph (h)(4), if the issuer of variable yield bonds enters into a qualified hedge, the hedged bonds are treated as fixed yield bonds paying a fixed interest rate if:

(A) *Start date*. The date on which payments begin to accrue on the hedge is not later than 15 days after the issue date of the hedged bonds.

(B) *Maturity*. The term of the hedge is equal to the entire period during which the hedged bonds bear interest at variable interest rates.

(C) *Payments closely correspond*. Payments to be received under the hedge correspond closely in time to the hedged portion of the payments on the hedged bonds. Hedge payments received within 15 days of the related payments on the hedged bonds generally so correspond.

(D) *Aggregate payments fixed*. Taking into account all payments made and received under the hedge and all payments on the hedged bonds (*i.e.*, after netting all payments), the issuer's aggregate payments are fixed and determinable as of a date not later than 15 days after the issue date of the hedged bonds. Payments on bonds are treated as fixed for purposes of this paragraph (h)(4)(i)(D) if payments on the bonds are based, in whole or in part, on one interest rate, payments on the hedge are based, in whole or in part, on a second interest rate that is substantially the same as, but not identical to, the first interest rate and payments on the bonds would be fixed if the two rates were identical. Rates are treated as substantially the same if they are reasonably expected to be substantially the same throughout the term of the hedge. For example, an objective 30-day tax-exempt variable rate index or other objective index (e.g., J.J. Kenny Index, PSA Municipal swap index, a percentage of LIBOR) may be substantially the same as an issuer's individual 30-day interest rate.

(ii) *Accounting*. Except as otherwise provided in this paragraph (h)(4)(ii), in determining yield on the hedged bonds, all the issuer's actual interest payments on the hedged bonds and all payments made and received on a hedge described in paragraph (h)(4)(i) of this section are taken into account. If payments on the bonds and payments on the hedge are based, in whole or in part, on variable interest rates that are substantially the same within the meaning of paragraph (h)(4)(i)(D) of this section (but not identical), yield on the issue is determined by treating the variable interest rates as identical. For example, if variable rate bonds bearing interest at a weekly rate equal to the rate necessary to remarket the bonds at par are hedged with an interest rate swap under which the issuer receives payments based on a short-term floating rate index that is substantially the same as, but not identical to, the weekly rate on the bonds, the interest payments on the bonds are treated as equal to the payments received by the issuer under the swap for purposes of computing the yield on the bonds.

(iii) *Effect of termination*—(A) *In general*. Except as otherwise provided in this paragraph (h)(4)(iii) and paragraph (h)(5) of this section, the issue of which the hedged bonds are a part is treated as if it were reissued as of the termination date of the qualified hedge covered by paragraph (h)(4)(i) of this section in determining yield on the hedged bonds for purposes of §1.148–3. The redemption price of the retired issue and the issue price of the new issue equal the aggregate values of all the bonds of the issue on the termination date. In computing the yield on the new issue for this purpose, any termination payment is accounted for under paragraph (h)(3)(iv) of this section, applied by treating the termination payment as made or received on the new issue under this paragraph (h)(4)(iii).

(B) *Effect of early termination*. Except as otherwise provided in this paragraph (h)(4)(iii), the general rules of paragraph (h)(4)(i) of this section do not apply in determining the yield on the hedged bonds for purposes of §1.148–3 if the hedge is terminated or deemed terminated within 5 years after the issue date of the issue of which the hedged bonds are a part. Thus, the hedged bonds are treated as variable yield bonds for purposes of §1.148–3 from the issue date.

(C) *Certain terminations disregarded.* This paragraph (h)(4)(iii) does not apply to a termination if, based on the facts and circumstances (e.g., taking into account both the termination and any qualified hedge that immediately replaces the terminated hedge), there is no change in the yield. In addition, this paragraph (h)(4)(iii) does not apply to a termination caused by the bankruptcy or insolvency of the hedge provider if the Commissioner determines that the termination occurred without any action by the issuer (other than to protect its rights under the hedge).

(5) *Special rules for certain hedges*—(i) *Certain acquisition payments.* A payment to the issuer by the hedge provider (e.g., an up-front payment for an off-market swap) in connection with the acquisition of a hedge that, but for that payment, would be a qualified hedge, does not cause the hedge to fail to be a qualified hedge provided the payment to the issuer and the issuer's payments under the hedge in excess of those that it would make if the hedge bore rates equal to the on-market rates for the hedge are separately identified in a certification of the hedge provider and not taken into account in determining the yield on the issue of which the hedged bonds are a part. The on-market rates are determined as of the date the parties enter into the contract.

(ii) *Anticipatory hedges*—(A) *In general.* A contract does not fail to be a hedge under §1.148–4(h)(2)(i)(A) solely because it is entered into with respect to an anticipated issuance of tax-exempt bonds. The identification required under §1.148–4T(h)(2)(ix) must specify the reasonably expected governmental purpose, principal amount, and issue date of the hedged bonds, and the manner in which interest is reasonably expected to be computed.

(B) *Special rules.* Payments made in connection with the issuance of a bond to terminate or otherwise close (*terminate*) an anticipatory hedge of that bond do not prevent the hedge from satisfying the requirements of §1.148–4(h)(2)(vi) and paragraph (h)(2)(vii) of this section. Amounts received or deemed to be received by the issuer in connection with the issuance of the hedged bonds to terminate an anticipatory hedge are treated as proceeds of the hedged bonds.

(C) *Fixed yield treatment.* A bond that is hedged with an anticipatory hedge is a fixed yield bond if, taking into account payments on the hedge that are made or fixed on or before the issue date of the bond and the payments to be made on the bond, the bond satisfies the definition of fixed yield bond. See also paragraph (h)(4) of this section.

(6) *Authority of the Commissioner*—(i) *In general.* A contract is not a qualified hedge if the Commissioner determines, based on all the facts and circumstances, that treating the contract as a qualified hedge would provide a material potential for arbitrage, or a principal purpose for entering into the contract is that arbitrage potential. For example, a contract that requires a substantial nonperiodic payment may constitute, in whole or part, an embedded loan, investment-type property, or other investment.

(ii) *Other qualified hedges.* The Commissioner, by publication of a revenue ruling or revenue procedure, may specify contracts that do not otherwise meet the requirements of §1.148–4(h)(2) as qualified hedges and contracts that do not otherwise meet the requirements of paragraph (h)(4) of this section as causing the hedged bonds to be treated as fixed yield bonds.

(iii) *Recomputation of yield.* If an issuer enters into a hedge that is not properly identified, fails to properly associate an anticipatory hedge with the hedged bonds, or otherwise fails to meet the requirements of this section, the Commissioner may recompute the yield on the issue taking the hedge into account if the failure to take the hedge into account distorts that yield or otherwise fails to clearly reflect the economic substance of the transaction.

[T.D. 8538, 59 FR 24042, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25507, May 9, 1997]

§ 1.148–5A Yield and valuation of investments.

(a) through (b)(2)(ii) [Reserved]. For guidance see §1.148–5.

(b)(2)(iii) *Permissive application of single investment rules to certain yield restricted investments for all purposes of section 148.* For all purposes of section 148, an issuer may treat all of the yield restricted nonpurpose investments in a refunding escrow and a sinking fund that is reasonably expected as of the issue date to be maintained to reduce the yield on the investments in the refunding escrow as a single investment having a single yield, determined under §1.148(b)(2).

(b) (2)(iv) through (c)(1) [Reserved]. For guidance see §1.148–5.

(c)(2) *Manner of payment*—(i) *In general*. Except as otherwise provided in §1.148–5(c)(2)(ii), an amount is paid under §1.148–5(c) if it is paid to the United States at the same time and in the same manner as rebate amounts are required to be paid or at such other time or in such manner as the Commissioner may prescribe. For example, yield reduction payments must be made on or before the date of required rebate installment payments as described in §1.148–3(f). The date a payment is required to be paid is determined without regard to §1.148–3(h). An amount that is paid untimely is not taken into account under this paragraph (c) unless the Commissioner determines that the failure to pay timely is not due to willful neglect. The provisions of §1.148–3(i) apply to payments made under §1.148–5(c).

(c)(2)(ii) through (c)(3)(i) [Reserved]. For guidance see §1.148–5.

(c)(3)(ii) *Exception to yield reduction payments rule for advance refunding issues*. Section 1.148–5(c)(1) does not apply to investments allocable to gross proceeds of an advance refunding issue, other than—

(A) Transferred proceeds to which §1.148–5(c)(3)(i)(C) applies;

(B) Replacement proceeds to which §1.148–5(c)(3)(i)(F) applies; and

(C) Transferred proceeds to which §1.148–5(c)(3)(i)(E) applies, but only to the extent necessary to satisfy yield restriction under section 148(a) on those proceeds treating all investments allocable to those proceeds as a separate class.

(d)(1) through (d)(3)(i) [Reserved]. For guidance see §1.148–5.

(d)(3)(ii) *Exception to fair market value requirement for transferred proceeds allocations, universal cap allocations, and commingled funds*. Section 1.148–5(d)(3)(i) does not apply if the investment is allocated from one issue to another issue as a result of the transferred proceeds allocation rule under §1.148–9(b) or the universal cap rule under §1.148–6(b)(2), provided that both issues consist exclusively of tax-exempt bonds. In addition, §1.148–5(d)(3)(i) does not apply to investments in a commingled fund (other than a bona fide debt service fund) unless it is an investment being initially deposited in or withdrawn from a commingled fund described in §1.148–6(e)(5)(iii).

(e)(1) through (e)(2)(ii)(A) [Reserved]. For guidance see §1.148–5.

(e)(2)(ii)(B) *External commingled funds*. For any semiannual period, a commingled fund satisfies the 10 percent requirement of §1.148–5(e)(2)(ii)(B) if—

(*1*) Based on average amounts on deposit, this requirement was satisfied for the prior semiannual period; and

(*2*) The fund does not accept deposits that would cause it to fail to meet this requirement.

(iii) *Special rule for guaranteed investment contracts*. For a guaranteed investment contract, a broker's commission or similar fee paid on behalf of either an issuer or the provider is treated as an administrative cost and, except in the case of an issue that satisfies section 148(f)(4)(D)(i), is not a qualified administrative cost to the extent that the present value of the commission, as of the date the contract is allocated to the issue, exceeds the present value of annual payments equal to .05 percent of the weighted average amount reasonably expected to be invested each year of the term of the contract. For this purpose, present value is computed using the taxable discount rate used by the parties to compute the commission or, if not readily ascertainable, a reasonable taxable discount rate.

[T.D. 8538, 59 FR 24045, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25507, May 9, 1997]

§1.148–6A General allocation and accounting rules.

(a) through (d)(3)(iii)(B) [Reserved]. For guidance see §1.148–6.

(d)(3)(iii)(C) *Qualified endowment funds treated as unavailable*. For a 501(c)(3) organization, a qualified endowment fund is treated as unavailable. A fund is a qualified endowment fund if—

(*1*) The fund is derived from gifts or bequests, or the income thereon, that were neither made nor reasonably expected to be used to pay working capital expenditures;

(*2*) Pursuant to reasonable, established practices of the organization, the governing body of the 501(c)(3) organization designates and consistently operates the fund as a permanent endowment fund or quasi-endowment fund restricted as to use; and

(*3*) There is an independent verification (e.g., from an independent certified public accountant) that the fund is reasonably necessary as part of the organization's permanent capital.

[T.D. 8538, 59 FR 24045, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25507, May 9, 1997]

§ 1.148–9A Arbitrage rules for refunding issues.

(a) through (c)(2)(ii)(A) [Reserved]. For guidance see § 1.148–9.

(c)(2)(ii)(B) *Permissive allocation of non-proceeds to earliest expenditures.* Excluding amounts covered by § 1.148–9(c)(2)(ii)(A) and subject to any required earlier expenditure of those amounts, any amounts in a mixed escrow that are not proceeds of a refunding issue may be allocated to the earliest maturing investments in the mixed escrow, provided that those investments mature and the proceeds thereof are expended before the date of any expenditure from the mixed escrow to pay any principal of the prior issue.

(d) through (h)(4)(v) [Reserved]. For guidance see § 1.148–9.

(h)(4)(vi) *Exception for refundings of interim notes.* Section 1.148–9(h)(4)(v) need not be applied to refunding bonds issued to provide permanent financing for one or more projects if the prior issue had a term of less than 3 years and was sold in anticipation of permanent financing, but only if the aggregate term of all prior issues sold in anticipation of permanent financing was less than 3 years.

[T.D. 8538, 59 FR 24045, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25507, May 9, 1997]

§ 1.148–10A Anti-abuse rules and authority of Commissioner.

(a) through (b)(1) [Reserved]. For guidance see § 1.148–10.

(b)(2) *Application.* The provisions of § 1.148–10(b) only apply to the portion of an issue that, as a result of actions taken (or actions not taken) after the issue date, overburdens the market for tax-exempt bonds, except that for an issue that is reasonably expected as of the issue date to overburden the market, those provisions apply to all of the gross proceeds of the issue.

(c) through (c)(2)(viii) [Reserved]. For guidance see § 1.148–10.

(c)(2)(ix) For purposes of § 1.148–10(c)(2), excess gross proceeds do not include gross proceeds allocable to fees for a qualified hedge for the refunding issue.

[T.D. 8538, 59 FR 24046, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25507, May 9, 1997]

§ 1.148–11A Effective dates.

(a) through (c)(3) [Reserved]. For guidance see § 1.148–11.

(c)(4) *Retroactive application of overpayment recovery provisions.* An issuer may apply the provisions of § 1.148–3(i) to any issue that is subject to section 148(f) or to sections 103(c)(6) or 103A(i) of the Internal Revenue Code of 1954.

(d) through (h) [Reserved]. For guidance see § 1.148–11.

(i) *Transition rules for certain amendments*—(1) *In general.* Section 1.103–8(a)(5), §§ 1.148–1, 1.148–2, 1.148–3, 1.148–4, .148–5, 1.148–6, 1.148–7, 1.148–8, 1.148–9, 1.148–10, 1.148–11, 1.149(d)–1, and 1.150–1 as in effect on June 7, 1994 (see 26 CFR part 1 as revised April 1, 1997), and §§ 1.148–1A through 1.148–11A, 1.149(d)–1A, and 1.150–1A apply, in whole, but not in part—

(i) To bonds sold after June 6, 1994, and before July 8, 1997;

(ii) To bonds issued before July 1, 1993, that are outstanding on June 7, 1994, if the first time the issuer applies §§ 1.148–1 through 1.148–11 as in effect on June 7, 1994 (see 26 CFR part 1 as revised April 1, 1997), to the bonds under § 1.148–11 (b) or (c) is after June 6, 1994, and before July 8, 1997;

(iii) At the option of the issuer, to bonds to which §§ 1.148–1 through 1.148–11, as in effect on July 1, 1993 (see 26 CFR part 1 as revised April 1, 1994), apply, if the bonds are outstanding on June 7, 1994, and the issuer applies § 1.103–8(a)(5), §§ 1.148–1, 1.148–2, 1.148–3, 1.148–4, 1.148–5, 1.148–6, 1.148–7, 1.148–8, 1.148–9, 1.148–10, 1.148–11, 1.149(d)–1, and 1.150–1 as in effect on June 7, 1994 (see 26 CFR part 1 as revised April 1, 1997), and §§ 1.148–1A through 1.148–11A, 1.149(d)–1A, and 1.150–1A to the bonds before July 8, 1997.

(2) *Special rule.* For purposes of paragraph (i)(1) of this section, any reference to a particular paragraph of §§ 1.148–1T, 1.148–2T, 1.148–3T, 1.148–4T, 1.148–5T, 1.148–6T, 1.148–9T, 1.148–10T, 1.148–11T, 1.149(d)–1T, or 1.150–1T shall be applied as a reference to the corresponding paragraph of §§ 1.148–1A, 1.148–2A, 1.148–3A, 1.148–4A, 1.148–5A, 1.148–6A, 1.148–9A, 1.148–10A, 1.148–11A, 1.149(d)–1A, or 1.150–1A, respectively.

(3) *Identification of certain hedges.* For any hedge entered into after June 18, 1993, and on or before June 6, 1994, that would be a qualified hedge within the meaning of § 1.148–4(h)(2), as in effect on June 7, 1994 (see 26 CFR part 1 as revised April 1, 1997), except that the hedge does not meet the requirements of § 1.148–4A(h)(2)(ix) because the issuer failed to identify the hedge not later than 3 days after which the issuer and the provider entered into the contract, the requirements of § 1.148–4A(h)(2)(ix) are treated as met if the contract is identified by the actual issuer on its books and records maintained for the hedged bonds not later than July 8, 1997.

[T.D. 8538, 59 FR 24046, May 10, 1994. Redesignated and amended by T.D. 8718, 62 FR 25507, 25513, May 9, 1997]

§ 1.149(d)–1A Limitations on advance refundings.

(a) through (f)(2) [Reserved]. For guidance see § 1.149(d)–1.

(f)(3) *Application of savings test to multipurpose issues.* Except as otherwise provided in this paragraph (f)(3), the multipurpose issue rules in § 1.148–9(h) apply for purposes of the savings test. If any separate issue in a multipurpose issue increases the aggregate present value debt service savings on the entire multipurpose issue or reduces the present value debt service losses on that entire multipurpose issue, that separate issue satisfies the savings test.

[T.D. 8538, 59 FR 24046, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25513, May 9, 1997]

§ 1.150–1A Definitions.

(a) through (b) [Reserved]. For guidance see § 1.150–1.

(c) *Definition of issue*—(1) *In general.* Except as otherwise provided, the provisions of this paragraph (c) apply for all purposes of sections 103 and 141 through 150. Except as otherwise provided in this paragraph (c), two or more bonds are treated as part of the same issue if all of the following factors are present:

(i) *Sold at substantially the same time.* The bonds are sold at substantially the same time. Bonds are treated as sold at substantially the same time if they are sold less than 15 days apart. For this purpose only, a variable yield bond is treated as sold on its issue date.

(ii) *Sold pursuant to the same plan of financing.* The bonds are sold pursuant to the same plan of financing. Factors material to the plan of financing include the purposes for the bonds and the structure of the financing. For example, generally—

(A) Bonds to finance a single facility or related facilities are part of the same plan of financing;

(B) Short-term bonds to finance working capital expenditures and long-term bonds to finance capital projects are not part of the same plan of financing; and

(C) Certificates of participation in a lease and general obligation bonds secured by tax revenues are not part of the same plan of financing.

(iii) *Payable from same source of funds.* The bonds are reasonably expected to be paid from substantially the same source of funds, determined without regard to guarantees from parties unrelated to the obligor.

(2) through (4)(ii) [Reserved]. For guidance see § 1.150–1 (c)(3) through (c)(4)(ii).

(c)(4)(iii) *Certain general obligation bonds.* Bonds are part of the same issue if secured by a pledge of the issuer's full faith and credit (or a substantially similar pledge) and sold and issued on the same dates pursuant to a single offering document.

(5) [Reserved]. For guidance see § 1.150–1(c)(5).

(6) *Sale date.* The sale date of a bond is the first day on which there is a

binding contract in writing for the sale or exchange of the bond.

[T.D. 8538, 59 FR 24046, May 10, 1994. Redesignated by T.D. 8718, 62 FR 25513, May 9, 1997]

DEDUCTIONS FOR PERSONAL EXEMPTIONS

§ 1.151–1 Deductions for personal exemptions.

(a) *In general.* (1) In computing taxable income, an individual is allowed a deduction for the exemptions specified in section 151. Such exemptions are: (i) The exemptions for an individual taxpayer and spouse (the so-called personal exemptions); (ii) the additional exemptions for a taxpayer attaining the age of 65 years and spouse attaining the age of 65 years (the so-called old-age exemptions); (iii) the additional exemptions for a blind taxpayer and a blind spouse; and (iv) the exemptions for dependents of the taxpayer.

(2) A nonresident alien individual who is a bona fide resident of Puerto Rico during the entire taxable year and subject to tax under section 1 or 1201(b) is allowed as deductions the exemptions specified in section 151, even though as to the United States such individual is a nonresident alien. See section 876 and the regulations thereunder, relating to alien residents of Puerto Rico.

(b) *Exemptions for individual taxpayer and spouse (so-called personal exemptions).* Section 151(b) allows an exemption for the taxpayer and an additional exemption for the spouse of the taxpayer if a joint return is not made by the taxpayer and his spouse, and if the spouse, for the calendar year in which the taxable year of the taxpayer begins, has no gross income and is not the dependent of another taxpayer. Thus, a husband is not entitled to an exemption for his wife on his separate return for the taxable year beginning in a calendar year during which she has any gross income (though insufficient to require her to file a return). Since, in the case of a joint return, there are two taxpayers (although under section 6013 there is only one income for the two taxpayers on such return, *i.e.*, their aggregate income), two exemptions are allowed on such return, one for each taxpayer spouse. If in any case a joint return is made by the taxpayer and his spouse, no other person is allowed an exemption for such spouse even though such other person would have been entitled to claim an exemption for such spouse as a dependent if such joint return had not been made.

(c) *Exemptions for taxpayer attaining the age of 65 and spouse attaining the age of 65 (so-called old-age exemptions).* (1) Section 151(c) provides an additional exemption for the taxpayer if he has attained the age of 65 before the close of his taxable year. An additional exemption is also allowed to the taxpayer for his spouse if a joint return is not made by the taxpayer and his spouse and if the spouse has attained the age of 65 before the close of the taxable year of the taxpayer and, for the calendar year in which the taxable year of the taxpayer begins, the spouse has no gross income and is not the dependent of another taxpayer. If a husband and wife make a joint return, an old-age exemption will be allowed as to each taxpayer spouse who has attained the age of 65 before the close of the taxable year for which the joint return is made. The exemptions under section 151(c) are in addition to the exemptions for the taxpayer and spouse under section 151(b).

(2) In determining the age of an individual for the purposes of the exemption for old age, the last day of the taxable year of the taxpayer is the controlling date. Thus, in the event of a separate return by a husband, no additional exemption for old age may be claimed for his spouse unless such spouse has attained the age of 65 on or before the close of the taxable year of the husband. In no event shall the additional exemption for old age be allowed with respect to a spouse who dies before attaining the age of 65 even though such spouse would have attained the age of 65 before the close of the taxable year of the taxpayer. For the purposes of the old-age exemption, an individual attains the age of 65 on the first moment of the day preceding his sixty-fifth birthday. Accordingly, an individual whose sixty-fifth birthday falls on January 1 in a given year attains the age of 65 on the last day of the calendar year immediately preceding.

(d) *Exemptions for the blind.* (1) Section 151(d) provides an additional exemption for the taxpayer if he is blind at the close of his taxable year. An additional exemption is also allowed to the taxpayer for his spouse if the spouse is blind and, for the calendar year in which the taxable year of the taxpayer begins, has no gross income and is not the dependent of another taxpayer. The determination of whether the spouse is blind shall be made as of the close of the taxable year of the taxpayer, unless the spouse dies during such taxable year, in which case such determination shall be made as of the time of such death.

(2) The exemptions for the blind are in addition to the exemptions for the taxpayer and spouse under section 151(b) and are also in addition to the exemptions under section 151(c) for taxpayers and spouses attaining the age of 65 years. Thus, a single individual who has attained the age of 65 before the close of his taxable year and who is blind at the close of his taxable year is entitled, in addition to the so-called personal exemption, to two further exemptions, one by reason of his age and the other by reason of his blindness. If a husband and wife make a joint return, an exemption for the blind will be allowed as to each taxpayer spouse who is blind at the close of the taxable year for which the joint return is made.

(3) A taxpayer claiming an exemption allowed by section 151(d) for a blind taxpayer and a blind spouse shall, if the individual for whom the exemption is claimed is not totally blind as of the last day of the taxable year of the taxpayer (or, in the case of a spouse who dies during such taxable year, as of the time of such death), attach to his return a certificate from a physician skilled in the diseases of the eye or a registered optometrist stating that as of the applicable status determination date in the opinion of such physician or optometrist (i) the central visual acuity of the individual for whom the exemption is claimed did not exceed 20/200 in the better eye with correcting lenses or (ii) such individual's visual acuity was accompanied by a limitation in the fields of vision such that the widest diameter of the visual field subtends an angle no greater than 20 degrees. If such individual is totally blind as of the status determination date there shall be attached to the return a statement by the person or persons making the return setting forth such fact.

(4) Notwithstanding subparagraph (3) of this paragraph, this subparagraph may be applied where the individual for whom an exemption under section 151(d) is claimed is not totally blind, and in the certified opinion of an examining physician skilled in the diseases of the eye there is no reasonable probability that the individual's visual acuity will ever improve beyond the minimum standards described in subparagraph (3) of this paragraph. In this event, if the examination occurs during a taxable year for which the exemption is claimed, and the examining physician certifies that, in his opinion, the condition is irreversible, and a copy of this certification is filed with the return for that taxable year, then a statement described in subparagraph (3) of this paragraph need not be attached to such individual's return for subsequent taxable years so long as the condition remains irreversible. The taxpayer shall retain a copy of the certified opinion in his records, and a statement referring to such opinion shall be attached to future returns claiming the section 151(d) exemption.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 7114, 36 FR 9018, May 18, 1971; T.D. 7230, 37 FR 28288, Dec. 22, 1972]

§ 1.151–2 Additional exemptions for dependents.

(a) Section 151(e) allows to a taxpayer an exemption for each dependent (as defined in section 152) whose gross income (as defined in section 61) for the calendar year in which the taxable year of the taxpayer begins is less than the amount provided in section 151(e)(1)(A) applicable to the taxable year of the taxpayer, or who is a child of the taxpayer and who—

(1) The taxable year of the taxpayer begins, or

(2) Is a student, as defined in paragraph (b) of § 1.151–3.

No exemption shall be allowed under section 151(e) for any dependent who has made a joint return with his spouse under section 6013 for the taxable year beginning in the calendar year in which the taxable year of the taxpayer begins. The amount provided in section 151(e)(1)(A) is $750 in the case of a taxable year beginning after December 31, 1972; $700 in the case of a taxable year beginning after December 31, 1971, and before January 1, 1973; $650 in the case of a taxable year beginning after December 31, 1970, and before January 1, 1972; $625 in the case of a taxable year beginning after December 31, 1969, and before January 1, 1971; and $600 in the case of a taxable year beginning before January 1, 1970. For special rules in the case of a taxpayer whose taxable year is a fiscal year ending after December 31, 1969, and beginning before January 1, 1973, see section 21(d) and the regulations thereunder.

(b) The only exemption allowed for a dependent of the taxpayer is that provided by section 151(e). The exemptions provided by section 151(c) (old-age exemptions) and section 151(d) (exemptions for the blind) are allowed only for the taxpayer or his spouse. For example, where a taxpayer provides the entire support for his father who meets all the requirements of a dependent, he is entitled to only one exemption for his father (section 151(e)), even though his father is over the age of 65.

[T.D. 7114, 36 FR 9019, May 18, 1971]

§ 1.151–3 Definitions.

(a) *Child.* For purposes of sections 151(e), 152, and the regulations thereunder, the term ''child'' means a son, stepson, daughter, stepdaughter, adopted son, adopted daughter, or for taxable years beginning after December 31, 1958, a child who is a member of an individual's household if the child was placed with the individual by an authorized placement agency for legal adoption pursuant to a formal application filed by the individual with the agency (see paragraph (c)(2) of § 1.152–2), or, for taxable years beginning after December 31, 1969, a foster child (if such foster child satisfies the requirements set forth in paragraph (b) of § 1.152–1 with respect to the taxpayer) of the taxpayer.

(b) *Student.* For purposes of section 151(e) and section 152(d), and the regulations thereunder, the term ''student'' means an individual who during each of 5 calendar months during the calendar year in which the taxable year of the taxpayer begins is a full-time student at an educational institution or is pursuing a full-time course of institutional on-farm training under the supervision of an accredited agent of an educational institution or of a State or political subdivision of a State. An example of ''institutional on-farm training'' is that authorized by 38 U.S.C. 1652 (formerly section 252 of the Veterans' Readjustment Assistance Act of 1952), as described in section 252 of such act. A full-time student is one who is enrolled for some part of 5 calendar months for the number of hours or courses which is considered to be full-time attendance. The 5 calendar months need not be consecutive. School attendance exclusively at night does not constitute full-time attendance. However, full-time attendance at an educational institution may include some attendance at night in connection with a full-time course of study.

(c) *Educational institution.* For purposes of sections 151(e) and 152, and the regulations thereunder, the term ''educational institution'' means a school maintaining a regular faculty and established curriculum, and having an organized body of students in attendance. It includes primary and secondary schools, colleges, universities, normal schools, technical schools, mechanical schools, and similar institutions, but does not include noneducational institutions, on-the-job training, correspondence schools, night schools, and so forth.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 7051, 35 FR 11020, July 9, 1970]

§ 1.151–4 Amount of deduction for each exemption under section 151.

The amount allowed as a deduction for each exemption under section 151 is (a) $750 in the case of a taxable year beginning after December 31, 1972; (b) $700 in the case of a taxable year beginning after December 31, 1971, and before January 1, 1973; (c) $650 in the case of a taxable year beginning after December 31, 1970, and before January 1, 1972; (d) $625 in the case of a taxable year beginning after December 31, 1969, and before January 1, 1971; and (e) $600 in the case of a taxable year beginning before January 1, 1970. For special rules in the case of a fiscal year ending after December 31, 1969, and beginning before January 1, 1973, see section 21(d) and the regulations thereunder.

[T.D. 7114, 36 FR 9019, May 18, 1971]

§ 1.152–1 General definition of a dependent.

(a)(1) For purposes of the income taxes imposed on individuals by chapter 1 of the Code, the term ''dependent'' means any individual described in paragraphs (1) through (10) of section 152(a) over half of whose support, for the calendar year in which the taxable year of the taxpayer begins, was received from the taxpayer.

(2)(i) For purposes of determining whether or not an individual received, for a given calendar year, over half of his support from the taxpayer, there shall be taken into account the amount of support received from the taxpayer as compared to the entire amount of support which the individual received from all sources, including support which the individual himself supplied. The term ''support'' includes food, shelter, clothing, medical and dental care, education, and the like. Generally, the amount of an item of support will be the amount of expense incurred by the one furnishing such item. If the item of support furnished an individual is in the form of property or lodging, it will be necessary to measure the amount of such item of support in terms of its fair market value.

(ii) In computing the amount which is contributed for the support of an individual, there must be included any amount which is contributed by such individual for his own support, including income which is ordinarily excludable from gross income, such as benefits received under the Social Security Act (42 U.S.C. ch. 7). For example, a father receives $800 social security benefits, $400 interest, and $1,000 from his son during 1955, all of which sums represent his sole support during that year. The fact that the social security benefits of $800 are not includible in the father's gross income does not prevent such amount from entering into the computation of the total amount contributed for the father's support. Consequently, since the son's contribution of $1,000 was less than one-half of the father's support ($2,200) he may not claim his father as a dependent.

(iii)(*a*) For purposes of determining the amount of support furnished for a child (or children) by a taxpayer for a given calendar year, an arrearage payment made in a year subsequent to a calendar year for which there is an unpaid liability shall not be treated as paid either during that calendar year or in the year of payment, but no amount shall be treated as an arrearage payment to the extent that there is an unpaid liability (determined without regard to such payment) with respect to the support of a child for the taxable year of payment; and

(*b*) Similarly, payments made prior to any calendar year (whether or not made in the form of a lump sum payment in settlement of the parent's liability for support) shall not be treated as made during such calendar year, but payments made during any calendar year from amounts set aside in trust by a parent in a prior year, shall be treated as made during the calendar year in which paid.

(b) Section 152(a)(9) applies to any individual (other than an individual who at any time during the taxable year was the spouse, determined without regard to section 153, of the taxpayer) who lives with the taxpayer and is a member of the taxpayer's household during the entire taxable year of the taxpayer. An individual is not a member of the taxpayer's household if at any time during the taxable year of the taxpayer the relationship between such individual and the taxpayer is in violation of local law. It is not necessary under section 152(a)(9) that the dependent be related to the taxpayer. For example, foster children may qualify as dependents. It is necessary, however, that the taxpayer both maintain and occupy the household. The taxpayer and dependent will be considered as occupying the household for such entire taxable year notwithstanding temporary absences from the household due to special circumstances. A nonpermanent failure to occupy the common abode by reason of illness, education, business, vacation, military service, or a custody agreement under which the dependent is absent for less than six months in the taxable year of the taxpayer, shall be considered temporary absence due to special circumstances. The fact that the dependent dies during the year shall not deprive the taxpayer of the deduction if the dependent lived in the household for the entire part of the year preceding his death. Likewise, the period during the taxable year preceding the birth of an individual shall not prevent such individual from qualifying as a dependent under section 152(a)(9). Moreover, a child who actually becomes a member of the taxpayer's household during the taxable year shall not be prevented from being considered a member of such household for the entire taxable year, if the child is required to remain in a hospital for a period following its birth, and if such child would otherwise have been a member of the taxpayer's household during such period.

(c) In the case of a child of the taxpayer who is under 19 or who is a student, the taxpayer may claim the dependency exemption for such child provided he has furnished more than one-half of the support of such child for the calendar year in which the taxable year of the taxpayer begins, even though the income of the child for such calendar year may be equal to or in excess of the amount determined pursuant to §1.151–2 applicable to such calendar year. In such a case, there may be two exemptions claimed for the child: One on the parent's (or stepparent's) return, and one on the child's return. In determining whether the taxpayer does in fact furnish more than one-half of the support of an individual who is a child, as defined in paragraph (a) of §1.151–3, of the taxpayer and who is a student, as defined in paragraph (b) of §1.151–3, a special rule regarding scholarships applies. Amounts received as scholarships, as defined in paragraph (a) of §1.117–3, for study at an educational institution shall not be considered in determining whether the taxpayer furnishes more than one-half the support of such individual. For example, A has a child who receives a $1,000 scholarship to the X college for 1 year. A contributes $500, which constitutes the balance of the child's support for that year. A may claim the child as a dependent, as the $1,000 scholarship is not counted in determining the support of the child. For purposes of this paragraph, amounts received for tuition payments and allowances by a veteran under the provisions of the Servicemen's Readjustment Act of 1944 (58 Stat. 284) or the Veterans' Readjustment Assistance Act of 1952 (38 U.S.C. ch. 38) are not amounts received as scholarships. See also §1.117–4. For definition of the terms "child", "student", and "educational institution", as used in this paragraph, see §1.151–3.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6603, 28 FR 7094, July 11, 1963; T.D. 7099, 36 FR 5337, Mar. 20, 1971; T.D. 7114, 36 FR 9019, May 18, 1971]

§ 1.152–2 Rules relating to general definition of dependent.

(a)(1) Except as provided in subparagraph (2) of this paragraph, to qualify as a dependent an individual must be a citizen or resident of the United States or be a resident of the Canal Zone, the Republic of Panama, Canada, or Mexico, or, for taxable years beginning after December 31, 1971, a national of the United States, at some time during the calendar year in which the taxable year of the taxpayer begins. A resident of the Republic of the Philippines who was born to or legally adopted by the taxpayer in the Philippine Islands before January 1, 1956, at a time when the taxpayer was a member of the Armed Forces of the United States, may also be claimed as a dependent if such resident otherwise qualifies as a dependent. For definition of "Armed Forces of the United States," see section 7701(a)(15).

(2)(i) For any taxable year beginning after December 31, 1957, a taxpayer who is a citizen, or, for any taxable year beginning after December 31, 1971, a national, of the United States is permitted under section 152(b)(3)(B) to treat as a dependent his legally adopted child who lives with him, as a member of his household, for the entire taxable year and who, but for the citizenship, nationality, or residence requirements of section 152(b)(3) and subparagraph (1) of this paragraph, would qualify as a dependent of the taxpayer for such taxable year.

(ii) Under section 152(b)(3)(B) and this subparagraph, it is necessary that the taxpayer both maintain and occupy the household. The taxpayer and his legally adopted child will be considered as occupying the household for the entire taxable year of the taxpayer notwithstanding temporary absences from the household due to special circumstances. A nonpermanent failure to occupy the common abode by reason of illness, education, business, vacation, military service, or a custody agreement under which the legally adopted child is absent for less than six months in the taxable year of the taxpayer shall be considered temporary absence due to special circumstances. The fact that a legally adopted child dies during the year shall not deprive the taxpayer of the deduction if the child lived in the household for the entire part of the year preceding his death. The period during the taxable year preceding the birth of a child shall not prevent such child from qualifying as a dependent under this subparagraph. Moreover, a legally adopted child who actually becomes a member of the taxpayer's household during the taxable year shall not be prevented from being considered a member of such household for the entire taxable year, if the child is required to remain in a hospital for a period following its birth and if such child would otherwise have been a member of the taxpayer's household during such period.

(iii) For purposes of section 152(b)(3)(B) and this subparagraph, any child whose legal adoption by the taxpayer (a citizen or national of the United States) becomes final at any time before the end of the taxable year of the taxpayer shall not be disqualified as a dependent of such taxpayer by reason of his citizenship, nationality, or residence, provided the child lived with the taxpayer and was a member of the taxpayer's household for the entire taxable year in which the legal adoption became final. For example, A, a citizen of the United States who makes his income tax returns on the basis of the calendar year, is employed in Brazil by an agency of the United States Government. In October 1958 he takes into his household C, a resident of Brazil who is not a citizen of the United States, for the purpose of initiating adoption proceedings. C lives with A and is a member of his household for the remainder of 1958 and for the entire calendar year 1959. On July 1, 1959, the adoption proceedings were completed and C became the legally adopted child of A. If C otherwise qualifies as a dependent, he may be claimed as a dependent by A for 1959.

(b) A payment to a wife which is includible in her gross income under section 71 or section 682 shall not be considered a payment by her husband for the support of any dependent.

(c)(1) For purposes of determining the existence of any of the relationships specified in section 152 (a) or (b)(1), a legally adopted child of an individual shall be treated as a child of such individual by blood.

(2) For any taxable year beginning after December 31, 1958, a child who is a member of an individual's household also shall be treated as a child of such individual by blood if the child was placed with the individual by an authorized placement agency for legal adoption pursuant to a formal application filed by the individual with the agency. For purposes of this subparagraph an authorized placement agency is any agency which is authorized by a State, the District of Columbia, a possession of the United States, a foreign country, or a political subdivision of any of the foregoing to place children for adoption. A taxpayer who claims as a dependent a child placed with him for adoption shall attach to his income tax return a statement setting forth the name of the child for whom the dependency deduction is claimed, the name and address of the authorized placement agency, and the date the formal application was filed with the agency.

(3) The application of this paragraph may be illustrated by the following example:

Example. On March 1, 1959, D, a resident of the United States, made formal application to an authorized child placement agency for the placement of E, a resident of the United States, with him for legal adoption. On June 1, 1959, E was placed with D for legal adoption. During the year 1959 E received over one-half of his support from D. D may claim E as a dependent for 1959. Since E was a resident of the United States, his qualification as a dependent is in no way based on the provisions of section 152(b)(3)(B). Therefore, it is immaterial that E was not a member of D's household during the entire taxable year.

(4) For purposes of determining the existence of any of the relationships specified in section 152 (a) or (b)(1), a foster child of an individual (if such foster child satisfies the requirements set forth in paragraph (b) of §1.152–1 with respect to such individual) shall, for taxable years beginning after December 31, 1969, be treated as a child of such individual by blood. For purposes of this subparagraph, a foster child is a child who is in the care of a person or persons (other than the parents or adopted parents of the child) who care for the child as their own child. Status as a foster child is not dependent upon or affected by the circumstances under which the child became a member of the household.

(d) In the case of a joint return it is not necessary that the prescribed relationship exist between the person claimed as a dependent and the spouse who furnishes the support; it is sufficient if the prescribed relationship exists with respect to either spouse. Thus, a husband and wife making a joint return may claim as a dependent a daughter of the wife's brother (wife's niece) even though the husband is the one who furnishes the chief support. The relationship of affinity once existing will not terminate by divorce or the death of a spouse. For example, a widower may continue to claim his deceased wife's father (his father-in-law) as a dependent provided he meets the other requirements of section 151.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6603, 28 FR 7094, July 11, 1963; T.D. 7051, 35 FR 11020, July 9, 1970; T.D. 7291, 38 FR 33396, Dec. 4, 1973]

§ 1.152–3 Multiple support agreements.

(a) Section 152(c) provides that a taxpayer shall be treated as having contributed over half of the support of an individual for the calendar year (in cases where two or more taxpayers contributed to the support of such individual) if—

(1) No one person contributed over half of the individual's support,

(2) Each member of the group which collectively contributed more than half of the support of the individual would have been entitled to claim the individual as a dependent but for the fact that he did not contribute more than one-half of such support.

(3) The member of the group claiming the individual as a dependent contributed more than 10 percent of the individual's support, and

(4) Each other person in the group who contributed more than 10 percent of such support furnishes to the taxpayer claiming the dependent a written declaration that such other person will not claim the individual as a dependent for any taxable year beginning in such calendar year.

(b) *Examples.* Application of the rule contained in paragraph (a) of this section may be illustrated by the following examples:

Example 1. During the taxable year, brothers A, B, C, and D contributed the entire support of their mother in the following percentages: A, 30 percent; B, 20 percent; C, 29 percent; and D, 21 percent. Any one of the brothers, except for the fact that he did not contribute more than half of her support, would have been entitled to claim his mother as a dependent. Consequently, any one of the brothers could claim a deduction for the exemption of the mother if he obtained a written declaration (as provided in paragraph (a)(4) of this section) from each of the other brothers. Even though A and D together contributed more than one-half the support of the mother, A, if he wished to claim his mother as a dependent, would be required to obtain written declarations from B, C, and D, since each of those three contributed more than 10 percent of the support and, but for the failure to contribute more than half of the mother's support, would have been entitled to claim his mother as a dependent.

Example 2. During the taxable year, E, an individual who resides with his son, S, received his entire support for that year as follows:

Source	Percentage of total
Social Security	25

Source	Percentage of total
N, an unrelated neighbor	11
B, a brother	14
D, a daughter	10
S, a son	40
Total received by E	100

B, D, and S are persons each of whom, but for the fact that none contributed more than half of E's support, could claim E as a dependent for the taxable year. The three together contributed 64 percent of E's support, and, thus, each is a member of the group to be considered for the purpose of section 152(c). B and S are the only members of such group who can meet all the requirements of section 152(c), and either one could claim E as a dependent for his taxable year if he obtained a written declaration (as provided in paragraph (a)(4) of this section) signed by the other, and furnished the other information required by the return with respect to all the contributions to E. Inasmuch as D did not contribute more than 10 percent of E's support, she is not entitled to claim E as a dependent for the taxable year nor is she required to furnish a written declaration with respect to her contributions to E. N contributed over 10 percent of the support of E, but, since he is an unrelated neighbor, he does not qualify as a member of the group for the purpose of the multiple support agreement under section 152(c).

(c)(1) The member of a group of contributors who claims an individual as a dependent for a taxable year beginning before January 1, 2002, under the multiple support agreement provisions of section 152(c) must attach to the member's income tax return for the year of the deduction a written declaration from each of the other persons who contributed more than 10 percent of the support of such individual and who, but for the failure to contribute more than half of the support of the individual, would have been entitled to claim the individual as a dependent.

(2) The taxpayer claiming an individual as a dependent for a taxable year beginning after December 31, 2001, under the multiple support agreement provisions of section 152(c) must provide with the income tax return for the year of the deduction—

(i) A statement identifying each of the other persons who contributed more than 10 percent of the support of the individual and who, but for the failure to contribute more than half of the support of the individual, would have been entitled to claim the individual as a dependent; and

(ii) A statement indicating that the taxpayer obtained a written declaration from each of the persons described in section 152(c)(2) waiving the right to claim the individual as a dependent.

(3) The taxpayer claiming the individual as a dependent for a taxable year beginning after December 31, 2001, must retain the waiver declarations and should be prepared to furnish the waiver declarations and any other information necessary to substantiate the claim, which may include a statement showing the names of all contributors (whether or not members of the group described in section 152(c)(2)) and the amount contributed by each to the support of the claimed dependent.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6603, 28 FR 7094, July 11, 1963; T.D. 8989, 67 FR 20031, Apr. 24, 2002; T.D. 9040, 68 FR 4920, Jan. 31, 2003]

§ 1.152–4 Special rule for a child of divorced or separated parents or parents who live apart.

(a) *In general.* A taxpayer may claim a dependency deduction for a child (as defined in section 152(f)(1)) only if the child is the qualifying child of the taxpayer under section 152(c) or the qualifying relative of the taxpayer under section 152(d). Section 152(c)(4)(B) provides that a child who is claimed as a qualifying child by parents who do not file a joint return together is treated as the qualifying child of the parent with whom the child resides for a longer period of time during the taxable year or, if the child resides with both parents for an equal period of time, of the parent with the higher adjusted gross income. However, a child is treated as the qualifying child or qualifying relative of the noncustodial parent if the custodial parent releases a claim to the exemption under section 152(e) and this section.

(b) *Release of claim by custodial parent*—(1) *In general.* Under section 152(e)(1), notwithstanding section 152(c)(1)(B), (c)(4), or (d)(1)(C), a child is treated as the qualifying child or qualifying relative of the noncustodial parent (as defined in paragraph (d) of this section) if the requirements of paragraphs (b)(2) and (b)(3) of this section are met.

(2) *Support, custody, and parental status*—(i) *In general.* The requirements of this paragraph (b)(2) are met if the parents of the child provide over one-half of the child's support for the calendar year, the child is in the custody of one or both parents for more than one-half of the calendar year, and the parents—

(A) Are divorced or legally separated under a decree of divorce or separate maintenance;

(B) Are separated under a written separation agreement; or

(C) Live apart at all times during the last 6 months of the calendar year whether or not they are or were married.

(ii) *Multiple support agreement.* The requirements of this paragraph (b)(2) are not met if over one-half of the support of the child is treated as having been received from a taxpayer under section 152(d)(3).

(3) *Release of claim to child.* The requirements of this paragraph (b)(3) are met for a calendar year if—

(i) The custodial parent signs a written declaration that the custodial parent will not claim the child as a dependent for any taxable year beginning in that calendar year and the noncustodial parent attaches the declaration to the noncustodial parent's return for the taxable year; or

(ii) A qualified pre-1985 instrument, as defined in section 152(e)(3)(B), applicable to the taxable year beginning in that calendar year, provides that the noncustodial parent is entitled to the dependency exemption for the child and the noncustodial parent provides at least $600 for the support of the child during the calendar year.

(c) *Custody.* A child is in the custody of one or both parents for more than one-half of the calendar year if one or both parents have the right under state law to physical custody of the child for more than one-half of the calendar year.

(d) *Custodial parent*—(1) *In general.* The *custodial parent* is the parent with whom the child resides for the greater number of nights during the calendar year, and the *noncustodial parent* is the parent who is not the custodial parent. A child is treated as residing with neither parent if the child is emancipated under state law. For purposes of this section, a child resides with a parent for a night if the child sleeps—

(i) At the residence of that parent (whether or not the parent is present); or

(ii) In the company of the parent, when the child does not sleep at a parent's residence (for example, the parent and child are on vacation together).

(2) *Night straddling taxable years.* A night that extends over two taxable years is allocated to the taxable year in which the night begins.

(3) *Absences.* (i) Except as provided in paragraph (d)(3)(ii) of this section, for purposes of this paragraph (d), a child who does not reside (within the meaning of paragraph (d)(1) of this section) with a parent for a night is treated as residing with the parent with whom the child would have resided for the night but for the absence.

(ii) A child who does not reside (within the meaning of paragraph (d)(1) of this section) with a parent for a night is treated as not residing with either parent for that night if it cannot be determined with which parent the child would have resided or if the child would not have resided with either parent for the night.

(4) *Special rule for equal number of nights.* If a child is in the custody of one or both parents for more than one-half of the calendar year and the child resides with each parent for an equal number of nights during the calendar year, the parent with the higher adjusted gross income for the calendar year is treated as the custodial parent.

(5) *Exception for a parent who works at night.* If, in a calendar year, due to a parent's nighttime work schedule, a child resides for a greater number of days but not nights with the parent who works at night, that parent is treated as the custodial parent. On a school day, the child is treated as residing at the primary residence registered with the school.

(e) *Written declaration*—(1) *Form of declaration*—(i) *In general.* The written declaration under paragraph (b)(3)(i) of this section must be an unconditional release of the custodial parent's claim to the child as a dependent for the year or years for which the declaration is effective. A declaration is not unconditional if the custodial parent's release of the right to claim the child as a dependent requires the satisfaction of any condition, including the noncustodial parent's meeting of an obligation such as the payment of support. A written declaration must name the noncustodial parent to whom the exemption is released. A written declaration must specify the year or years for which it is effective. A written declaration that specifies all future years is treated as specifying the first taxable year after the taxable year of execution and all subsequent taxable years.

(ii) *Form designated by IRS.* A written declaration may be made on Form 8332, Release/Revocation of Release of Claim to Exemption for Child by Custodial Parent, or successor form designated by the IRS. A written declaration not on the form designated by the IRS must conform to the substance of that form and must be a document executed for the sole purpose of serving as a written declaration under this section. A court order or decree or a separation agreement may not serve as a written declaration.

(2) *Attachment to return.* A noncustodial parent must attach a copy of the written declaration to the parent's return for each taxable year in which the child is claimed as a dependent.

(3) *Revocation of written declaration*—(i) *In general.* A parent may revoke a written declaration described in paragraph (e)(1) of this section by providing written notice of the revocation to the other parent. The parent revoking the written declaration must make reasonable efforts to provide actual notice to the other parent. The revocation may be effective no earlier than the taxable year that begins in the first calendar year after the calendar year in which the parent revoking the written declaration provides, or makes reasonable efforts to provide, the written notice.

(ii) *Form of revocation.* The revocation may be made on Form 8332, Release/Revocation of Release of Claim to Exemption for Child by Custodial Parent, or successor form designated by the IRS whether or not the written declaration was made on a form designated by the IRS. A revocation not on that form must conform to the substance of the form and must be a document executed for the sole purpose of serving as a revocation under this section. The revocation must specify the year or years for which the revocation is effective. A revocation that specifies all future years is treated as specifying the first taxable year after the taxable year the revocation is executed and all subsequent taxable years.

(iii) *Attachment to return.* The parent revoking the written declaration must attach a copy of the revocation to the parent's return for each taxable year for which the parent claims a child as a dependent as a result of the revocation. The parent revoking the written declaration must keep a copy of the revocation and evidence of delivery of the notice to the other parent, or of the reasonable efforts to provide actual notice.

(4) *Ineffective declaration or revocation.* A written declaration or revocation that fails to satisfy the requirements of this paragraph (e) has no effect.

(5) *Written declaration executed in a taxable year beginning on or before July 2, 2008.* A written declaration executed in a taxable year beginning on or before July 2, 2008, that satisfies the requirements for the form of a written declaration in effect at the time the written declaration is executed, will be treated as meeting the requirements of paragraph (e)(1) of this section. Paragraph (e)(3) of this section applies without regard to whether a custodial parent executed the written declaration in a taxable year beginning on or before July 2, 2008.

(f) *Coordination with other sections.* If section 152(e) and this section apply, a child is treated as the dependent of both parents for purposes of sections 105(b), 132(h)(2)(B), and 213(d)(5).

(g) *Examples.* The provisions of this section are illustrated by the following examples that assume, unless otherwise provided, that each taxpayer's taxable year is the calendar year, one or both of the child's parents provide over one-half of the child's support for the calendar year, one or both parents have the right under state law to physical custody of the child for more than one-half of the calendar year, and the child otherwise meets the requirements of a qualifying child under section 152(c) or a qualifying relative under section 152(d). In addition, in each of the examples, no qualified pre-1985 instrument or multiple support agreement is in effect. The examples are as follows:

Example 1. (i) B and C are the divorced parents of Child. In 2009, Child resides with B for 210 nights and with C for 155 nights. B executes a Form 8332 for 2009 releasing B's right to claim Child as a dependent for that year, which C attaches to C's 2009 return.

(ii) Under paragraph (d) of this section, B is the custodial parent of Child in 2009 because B is the parent with whom Child resides for the greater number of nights in 2009. Because the requirements of paragraphs (b)(2) and (3) of this section are met, C may claim Child as a dependent.

Example 2. The facts are the same as in *Example 1* except that B does not execute a Form 8332 or similar declaration for 2009. Therefore, section 152(e) and this section do not apply. Whether Child is the qualifying child or qualifying relative of B or C is determined under section 152(c) or (d).

Example 3. (i) D and E are the divorced parents of Child. Under a custody decree, Grandmother has the right under state law to physical custody of Child from January 1 to July 31, 2009.

(ii) Because D and E do not have the right under state law to physical custody of Child for over one-half of the 2009 calendar year, under paragraph (c) of this section, Child is not in the custody of one or both parents for over one-half of the calendar year. Therefore, section 152(e) and this section do not apply, and whether Child is the qualifying child or qualifying relative of D, E, or Grandmother is determined under section 152(c) or (d).

Example 4. (i) The facts are the same as in *Example 3,* except that Grandmother has the right to physical custody of Child from January 1 to March 31, 2009, and, as a result, Child resides with Grandmother during this period. D and E jointly have the right to physical custody of Child from April 1 to December 31, 2009. During this period, Child resides with D for 180 nights and with E for 95 nights. D executes a Form 8332 for 2009 releasing D's right to claim Child as a dependent for that year, which E attaches to E's 2009 return.

(ii) Under paragraph (c) of this section, Child is in the custody of D and E for over one-half of the calendar year, because D and E have the right under state law to physical custody of Child for over one-half of the calendar year.

(iii) Under paragraph (d)(3)(ii) of this section, the nights that Child resides with Grandmother are not allocated to either parent. Child resides with D for a greater number of nights than with E during the calendar year and, under paragraph (d)(1) of this section, D is the custodial parent.

(iv) Because the requirements of paragraphs (b)(2) and (3) of this section are met, section 152(e) and this section apply, and E may claim Child as a dependent.

Example 5. (i) The facts are the same as in *Example 4,* except that D is away on military service from April 10 to June 15, 2009, and September 6 to October 20, 2009. During these periods Child resides with Grandmother in Grandmother's residence. Child would have resided with D if D had not been away on military service. Grandmother claims Child as a dependent on Grandmother's 2009 return.

(ii) Under paragraph (d)(3)(i) of this section, Child is treated as residing with D for the nights that D is away on military service. Because the requirements of paragraphs (b)(2) and (3) of this section are met, section 152(e) and this section apply, and E, not Grandmother, may claim Child as a dependent.

Example 6. F and G are the divorced parents of Child. In May of 2009, Child turns age 18 and is emancipated under the law of the state where Child resides. Therefore, in 2009 and later years, F and G do not have the right under state law to physical custody of Child for over one-half of the calendar year, and Child is not in the custody of F and G for over one-half of the calendar year. Section 152(e) and this section do not apply, and whether Child is the qualifying child or qualifying relative of F or G is determined under section 152(c) or (d).

Example 7. (i) The facts are the same as in *Example 6,* except that Child turns age 18 and is emancipated under state law on August 1, 2009, resides with F from January 1, 2009, through May 31, 2009, and resides with G from June 1, 2009, through December 31, 2009. F executes a Form 8332 releasing F's right to claim Child as a dependent for 2009, which G attaches to G's 2009 return.

(ii) Under paragraph (c) of this section, Child is in the custody of F and G for over one-half of the calendar year.

(iii) Under paragraph (d)(1) of this section, Child is treated as not residing with either parent after Child's emancipation. Therefore, Child resides with F for 151 nights and with G for 61 nights. Because the requirements of paragraphs (b)(2) and (3) of this section are met, section 152(e) and this section apply, and G may claim Child as a dependent.

Example 8. H and J are the divorced parents of Child. Child generally resides with H during the week and with J every other weekend. Child resides with J in H's residence for 10 consecutive nights while H is hospitalized. Under paragraph (d)(1)(i) of this section, Child resides with H for the 10 nights.

Example 9. K and L, who are separated under a written separation agreement, are the parents of Child. In August 2009, K and

Child spend 10 nights together in a hotel while on vacation. Under paragraph (d)(1)(ii) of this section, Child resides with K for the 10 nights that K and Child are on vacation.

Example 10. M and N are the divorced parents of Child. On December 31, 2009, Child attends a party at M's residence. After midnight on January 1, 2010, Child travels to N's residence, where Child sleeps. Under paragraph (d)(1) of this section, Child resides with N for the night of December 31, 2009, to January 1, 2010, because Child sleeps at N's residence that night. However, under paragraph (d)(2) of this section, the night of December 31, 2009, to January 1, 2010, is allocated to taxable year 2009 for purposes of determining whether Child resides with M or N for a greater number of nights in 2009.

Example 11. O and P, who never married, are the parents of Child. In 2009, Child spends alternate weeks residing with O and P. During a week that Child is residing with O, O gives Child permission to spend a night at the home of a friend. Under paragraph (d)(3)(i) of this section, the night Child spends at the friend's home is treated as a night that Child resides with O.

Example 12. The facts are the same as in *Example 11*, except that Child also resides at summer camp for 6 weeks. Because Child resides with each parent for alternate weeks, Child would have resided with O for 3 weeks and with P for 3 weeks of the period that Child is at camp. Under paragraph (d)(3)(i) of this section, Child is treated as residing with O for 3 weeks and with P for 3 weeks.

Example 13. The facts are the same as in *Example 12*, except that Child does not spend alternate weeks residing with O and P, and it cannot be determined whether Child would have resided with O or P for the period that Child is at camp. Under paragraph (d)(3)(ii) of this section, Child is treated as residing with neither parent for the 6 weeks.

Example 14. (i) Q and R are the divorced parents of Child. Q works from 11 PM to 7 AM Sunday through Thursday nights. Because of Q's nighttime work schedule, Child resides with R Sunday through Thursday nights and with Q Friday and Saturday nights. Therefore, in 2009, Child resides with R for 261 nights and with Q for 104 nights. Child spends all daytime hours when Child is not in school with Q and Q's address is registered with Child's school as Child's primary residence. Q executes a Form 8332 for 2009 releasing Q's right to claim Child as a dependent for that year, which R attaches to R's 2009 return.

(ii) Under paragraph (d) of this section, Q is the custodial parent of Child in 2009. Child resides with R for a greater number of nights than with Q due to Q's nighttime work schedule, and Child spends a greater number of days with Q. Therefore, paragraph (d)(5) of this section applies rather than paragraph (d)(1) of this section. Because the requirements of paragraphs (b)(2) and (3) of this section are met, R may claim Child as a dependent.

Example 15. (i) In 2009, S and T, the parents of Child, execute a written separation agreement. The agreement provides that Child will live with S and that T will make monthly child support payments to S. In 2009, Child resides with S for 335 nights and with T for 30 nights. S executes a letter declaring that S will not claim Child as a dependent in 2009 and in subsequent alternate years. The letter contains all the information requested on Form 8332, does not require the satisfaction of any condition such as T's payment of support, and has no purpose other than to serve as a written declaration under section 152(e) and this section. T attaches the letter to T's return for 2009 and 2011.

(ii) In 2010, T fails to provide support for Child, and S executes a Form 8332 revoking the release of S's right to claim Child as a dependent for 2011. S delivers a copy of the Form 8332 to T, attaches a copy of the Form 8332 to S's tax return for 2011, and keeps a copy of the Form 8332 and evidence of delivery of the written notice to T.

(iii) T may claim Child as a dependent for 2009 because S releases the right to claim Child as a dependent under paragraph (b)(3) of this section by executing the letter, which conforms to the requirements of paragraph (e)(1) of this section, and T attaches the letter to T's return in accordance with paragraph (e)(2) of this section. In 2010, S revokes the release of the claim in accordance with paragraph (e)(3) of this section, and the revocation takes effect in 2011, the taxable year that begins in the first calendar year after S provides written notice of the revocation to T. Therefore, in 2011, section 152(e) and this section do not apply, and whether Child is the qualifying child or qualifying relative of S or T is determined under section 152(c) or (d).

Example 16. The facts are the same as *Example 15*, except that the letter expressly states that S releases the right to claim Child as a dependent only if T is current in the payment of support for Child at the end of the calendar year. The letter does not qualify as a written declaration under paragraph (b)(3) of this section because S's agreement not to claim Child as a dependent is conditioned on T's payment of support and, under paragraph (e)(1)(i) of this section, a written declaration must be unconditional. Therefore, section 152(e) and this section do not apply, and whether Child is the qualifying child or qualifying relative of S or T for 2009 as well as 2011 is determined under section 152(c) or (d).

Example 17. (i) U and V are the divorced parents of Child. Child resides with U for more nights than with V in 2009 through 2011. In 2009, U provides a written statement to V declaring that U will not claim Child as a dependent, but the statement does not specify the year or years it is effective. V attaches the statement to V's returns for 2009 through 2011.

(ii) Because the written statement does not specify a year or years, under paragraph (e)(1) of this section, it is not a written declaration that conforms to the substance of Form 8332. Under paragraph (e)(4) of this section, the statement has no effect. Section 152(e) and this section do not apply, and whether Child is the qualifying child or qualifying relative of U or V is determined under section 152(c) or (d).

Example 18. (i) W and X are the divorced parents of Child. In 2009, Child resides solely with W. The divorce decree requires X to pay child support to W and requires W to execute a Form 8332 releasing W's right to claim Child as a dependent. W fails to sign a Form 8332 for 2009, and X attaches an unsigned Form 8332 to X's return for 2009.

(ii) The order in the divorce decree requiring W to execute a Form 8332 is ineffective to allocate the right to claim Child as a dependent to X. Furthermore, under paragraph (e)(1) of this section, the unsigned Form 8332 does not conform to the substance of Form 8332, and under paragraph (e)(4) of this section, the Form 8332 has no effect. Therefore, section 152(e) and this section do not apply, and whether Child is the qualifying child or qualifying relative of W or X is determined under section 152(c) or (d).

(iii) If, however, W executes a Form 8332 for 2009, and X attaches the Form 8332 to X's return, then X may claim Child as a dependent in 2009.

Example 19. (i) Y and Z are the divorced parents of Child. In 2003, Y and Z enter into a separation agreement, which is incorporated into a divorce decree, under which Y, the custodial parent, releases Y's right to claim Child as a dependent for all future years. The separation agreement satisfies the requirements for the form of a written declaration in effect at the time it is executed. Z attaches a copy of the separation agreement to Z's returns for 2003 through 2009.

(ii) Under paragraph (e)(1)(ii) of this section, a separation agreement may not serve as a written declaration. However, under paragraph (e)(5) of this section, a written declaration executed in a taxable year beginning on or before July 2, 2008, that satisfies the requirements for the form of a written declaration in effect at the time the written declaration is executed, will be treated as meeting the requirements of paragraph (e)(1) of this section. Therefore, the separation agreement may serve as the written declaration required by paragraph (b)(3)(i) of this section for 2009, and Z may claim Child as a dependent in 2009 and later years.

Example 20. (i) The facts are the same as in *Example 19*, except that in 2009 Y executes a Form 8332 revoking the release of Y's right to claim Child as a dependent for 2010. Y complies with all the requirements of paragraph (e)(3) of this section.

(ii) Although Y executes the separation agreement releasing Y's right to claim Child as a dependent in a taxable year beginning on or before July 2, 2008, under paragraph (e)(5) of this section, Y's execution of the Form 8332 in 2009 is effective to revoke the release. Therefore, section 152(e) and this section do not apply in 2010, and whether Child is the qualifying child or qualifying relative of Y or Z is determined under section 152(c) or (d).

(h) *Effective/applicability date.* This section applies to taxable years beginning after July 2, 2008.

[T.D. 9408, 73 FR 37801, July 2, 2008]

§ 1.153–1 Determination of marital status.

For the purpose of determining the right of an individual to claim an exemption for his spouse under section 151(b), the determination of whether such individual is married shall be made as of the close of his taxable year, unless his spouse dies during such year, in which case the determination shall be made as of the time of such death. An individual legally separated from his spouse under a decree of divorce or separate maintenance shall not be considered as married. The provisions of this section may be illustrated by the following examples:

Example 1. A, who files his returns on the basis of a calendar year, married B on December 31, 1956. B, who had never previously married, had no gross income for the calendar year 1956 nor was she the dependent of another taxpayer for such year. A may claim an exemption for B for 1956.

Example 2. C and his wife, D, were married in 1940. They remained married until July 1956 at which time D was granted a decree of divorce. C, who files his income tax returns on a calendar year basis, cannot claim an exemption for D on his 1956 return as C and D were not married on the last day of C's taxable year. Had D died instead of being divorced, C could have claimed an exemption for D for 1956 as their marital status would have been determined as of the date of D's death.

§ 1.154 Statutory provisions; cross references.

SEC. 154. *Cross references.* (1) For definitions of "husband" and "wife", as used in section 152(b)(4), see section 7701(a)(17).

(2) For deductions of estates and trusts, in lieu of the exemptions under section 151, see section 642(b).

(3) For exemptions of nonresident aliens, see section 873(b)(3).

(4) For exemptions of citizens deriving income mainly from sources within possessions of the United States, see section 931(e).

(Sec. 154 as amended by sec. 103(c)(2), Foreign Investors Tax Act 1966 (80 Stat. 1551))

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 21, 1960, as amended by T.D. 7332, 39 FR 44216, Dec. 23, 1974]

ITEMIZED DEDUCTIONS FOR INDIVIDUALS AND CORPORATIONS

§ 1.161–1 Allowance of deductions.

Section 161 provides for the allowance as deductions, in computing taxable income under section 63(a), of the items specified in Part VI (section 161 and following), Subchapter B, Chapter 1 of the Code, subject to the exceptions provided in Part IX (section 261 and following), of such Subchapter B, relating to items not deductible. Double deductions are not permitted. Amounts deducted under one provision of the Internal Revenue Code of 1954 cannot again be deducted under any other provision thereof. See also section 7852(c), relating to the taking into account, both in computing a tax under Subtitle A of the Internal Revenue Code of 1954 and a tax under Chapter 1 or 2 of the Internal Revenue Code of 1939, of the same item of deduction.

§ 1.162–1 Business expenses.

(a) *In general.* Business expenses deductible from gross income include the ordinary and necessary expenditures directly connected with or pertaining to the taxpayer's trade or business, except items which are used as the basis for a deduction or a credit under provisions of law other than section 162. The cost of goods purchased for resale, with proper adjustment for opening and closing inventories, is deducted from gross sales in computing gross income. See paragraph (a) of § 1.161–3. Among the items included in business expenses are management expenses, commissions (but see section 263 and the regulations thereunder), labor, supplies, incidental repairs, operating expenses of automobiles used in the trade or business, traveling expenses while away from home solely in the pursuit of a trade or business (see § 1.162–2), advertising and other selling expenses, together with insurance premiums against fire, storm, theft, accident, or other similar losses in the case of a business, and rental for the use of business property. No such item shall be included in business expenses, however, to the extent that it is used by the taxpayer in computing the cost of property included in its inventory or used in determining the gain or loss basis of its plant, equipment, or other property. See section 1054 and the regulations thereunder. A deduction for an expense paid or incurred after December 30, 1969, which would otherwise be allowable under section 162 shall not be denied on the grounds that allowance of such deduction would frustrate a sharply defined public policy. See section 162(c), (f), and (g) and the regulations thereunder. The full amount of the allowable deduction for ordinary and necessary expenses in carrying on a business is deductible, even though such expenses exceed the gross income derived during the taxable year from such business. In the case of any sports program to which section 114 (relating to sports programs conducted for the American National Red Cross) applies, expenses described in section 114(a)(2) shall be allowable as deductions under section 162(a) only to the extent that such expenses exceed the amount excluded from gross income under section 114(a).

(b) *Cross references.* (1) For charitable contributions by individuals and corporations not deductible under section 162, see § 1.162–15.

(2) For items not deductible, see sections 261–276, inclusive, and the regulations thereunder.

(3) For research and experimental expenditures, see section 174 and regulations thereunder.

(4) For soil and water conservation expenditures, see section 175 and regulations thereunder.

(5) For expenditures attributable to grant or loan by United States for encouragement of exploration for, or development or mining of, critical and strategic minerals or metals, see section 621 and regulations thereunder.

(6) For treatment of certain rental payments with respect to public utility property, see section 167(l) and §1.167(l)–3.

(7) For limitations on the deductibility of miscellaneous itemized deductions, see section 67 and §§1.67–1T through 1.67–4T.

(8) For the timing of deductions with respect to notional principal contracts. see §1.446–3.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6690, 28 FR 12253, Nov. 19, 1963; T.D. 6996, 34 FR 835, Jan. 18, 1969; T.D. 7315, 39 FR 20203, June 7, 1974; T.D. 7345, 40 FR 7437, Feb. 20, 1975; T.D. 8189, 53 FR 9881, Mar. 28, 1988; T.D. 8491, 58 FR 53128, Oct. 14, 1993]

§ 1.162–2 Traveling expenses.

(a) Traveling expenses include travel fares, meals and lodging, and expenses incident to travel such as expenses for sample rooms, telephone and telegraph, public stenographers, etc. Only such traveling expenses as are reasonable and necessary in the conduct of the taxpayer's business and directly attributable to it may be deducted. If the trip is undertaken for other than business purposes, the travel fares and expenses incident to travel are personal expenses and the meals and lodging are living expenses. If the trip is solely on business, the reasonable and necessary traveling expenses, including travel fares, meals and lodging, and expenses incident to travel, are business expenses. For the allowance of traveling expenses as deductions in determining adjusted gross income, see section 62(2)(B) and the regulations thereunder.

(b)(1) If a taxpayer travels to a destination and while at such destination engages in both business and personal activities, traveling expenses to and from such destination are deductible only if the trip is related primarily to the taxpayer's trade or business. If the trip is primarily personal in nature, the traveling expenses to and from the destination are not deductible even though the taxpayer engages in business activities while at such destination. However, expenses while at the destination which are properly allocable to the taxpayer's trade or business are deductible even though the traveling expenses to and from the destination are not deductible.

(2) Whether a trip is related primarily to the taxpayer's trade or business or is primarily personal in nature depends on the facts and circumstances in each case. The amount of time during the period of the trip which is spent on personal activity compared to the amount of time spent on activities directly relating to the taxpayer's trade or business is an important factor in determining whether the trip is primarily personal. If, for example, a taxpayer spends one week while at a destination on activities which are directly related to his trade or business and subsequently spends an additional five weeks for vacation or other personal activities, the trip will be considered primarily personal in nature in the absence of a clear showing to the contrary.

(c) Where a taxpayer's wife accompanies him on a business trip, expenses attributable to her travel are not deductible unless it can be adequately shown that the wife's presence on the trip has a bona fide business purpose. The wife's performance of some incidental service does not cause her expenses to qualify as deductible business expenses. The same rules apply to any other members of the taxpayer's family who accompany him on such a trip.

(d) Expenses paid or incurred by a taxpayer in attending a convention or other meeting may constitute an ordinary and necessary business expense under section 162 depending upon the facts and circumstances of each case. No distinction will be made between self-employed persons and employees. The fact that an employee uses vacation or leave time or that his attendance at the convention is voluntary will not necessarily prohibit the allowance of the deduction. The allowance of deductions for such expenses will depend upon whether there is a sufficient relationship between the taxpayer's trade of business and his attendance at the convention or other meeting so that he is benefiting or advancing the interests of his trade or business by such attendance. If the convention is for political, social or other purposes unrelated to the taxpayer's trade or business, the expenses are not deductible.

(e) Commuters' fares are not considered as business expenses and are not deductible.

(f) For rules with respect to the reporting and substantiation of traveling and other business expenses of employees for taxable years beginning after December 31, 1957, see § 1.162–17.

§ 1.162–3 Materials and supplies.

(a) through (k) [Reserved] For further guidance, see § 1.163–3T(a) through (k).

[T.D. 9564, 77 FR 18687, Mar. 28, 2012]

§ 1.162–3T Materials and supplies (temporary).

(a) *In general*—(1) *Non-incidental materials and supplies.* Amounts paid to acquire or produce materials and supplies are deductible in the taxable year in which the materials and supplies are used or consumed in the taxpayer's operations.

(2) *Incidental materials and supplies.* Amounts paid to acquire or produce incidental materials and supplies that are carried on hand and for which no record of consumption is kept or of which physical inventories at the beginning and end of the taxable year are not taken, are deductible in the taxable year in which these amounts are paid, provided taxable income is clearly reflected.

(3) *Use or consumption of rotable and temporary spare parts.* Except as provided in paragraphs (d), (e), and (f) of this section, for purposes of paragraph (a)(1) of this section, rotable and temporary spare parts (defined under paragraph (c)(2) of this section) are used or consumed in the taxpayer's operations in the taxable year in which the taxpayer disposes of the parts.

(b) *Coordination with other provisions of the Internal Revenue Code.* Nothing in this section changes the treatment of any amount that is specifically provided for under any provision of the Internal Revenue Code or regulations other than section 162(a) or section 212 and the regulations under those sections. For example, see section § 1.263(a)–3T, which requires taxpayers to capitalize amounts paid to improve tangible property and section 263A and the regulations under section 263A, which require taxpayers to capitalize the direct and allocable indirect costs, including the cost of materials and supplies, to property produced or to property acquired for resale. See also § 1.471–1, which requires taxpayers to include in inventory certain materials and supplies.

(c) *Definitions*—(1) *Materials and supplies.* For purposes of this section, *materials and supplies* means tangible property that is used or consumed in the taxpayer's operations that is not inventory and that—

(i) Is a component acquired to maintain, repair, or improve a unit of tangible property (as determined under § 1.263(a)–3T(e)) owned, leased, or serviced by the taxpayer and that is not acquired as part of any single unit of tangible property;

(ii) Consists of fuel, lubricants, water, and similar items, that are reasonably expected to be consumed in 12 months or less, beginning when used in taxpayer's operations;

(iii) Is a unit of property as determined under § 1.263(a)–3T(e) that has an economic useful life of 12 months or less, beginning when the property is used or consumed in the taxpayer's operations;

(iv) Is a unit of property as determined under § 1.263(a)-3T(e) that has an acquisition cost or production cost (as determined under section 263A) of $100 or less (or other amount as identified in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(*b*) of this chapter)); or

(v) Is identified in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(*b*) of this chapter) as materials and supplies for which treatment is permitted under this section.

(2) *Rotable and temporary spare parts.* For purposes of this section, rotable spare parts are materials and supplies under paragraph (c)(1)(i) of this section that are acquired for installation on a unit of property, removable from that unit of property, generally repaired or

improved, and either reinstalled on the same or other property or stored for later installation. Temporary spare parts are materials and supplies under paragraph (c)(1)(i) of this section that are used temporarily until a new or repaired part can be installed and then are removed and stored for later (emergency or temporary) installation.

(3) *Economic useful life*—(i) *General rule.* The economic useful life of a unit of property is not necessarily the useful life inherent in the property but is the period over which the property may reasonably be expected to be useful to the taxpayer or, if the taxpayer is engaged in a trade or business or an activity for the production of income, the period over which the property may reasonably be expected to be useful to the taxpayer in its trade or business or for the production of income, as applicable. See §1.167(a)–1(b) for the factors to be considered in determining this period.

(ii) *Taxpayers with an applicable financial statement.* For taxpayers with an applicable financial statement (as defined in paragraph (c)(3)(iii) of this section), the economic useful life of a unit of property, solely for the purposes of applying the provisions of paragraph (c)(1)(iii) of this section, is the useful life initially used by the taxpayer for purposes of determining depreciation in its applicable financial statement, regardless of any salvage value of the property. If a taxpayer does not have an applicable financial statement for the taxable year in which a unit of property was originally acquired or produced, the economic useful life of the unit of property must be determined under paragraph (c)(3)(i) of this section. Further, if a taxpayer treats amounts paid for a unit of property as an expense in its applicable financial statement on a basis other than the useful life of the property or if a taxpayer does not depreciate the unit of property on its applicable financial statement, the economic useful life of the unit of property must be determined under paragraph (c)(3)(i) of this section. For example, if a taxpayer has a policy of treating as an expense on its applicable financial statement amounts paid for a unit of property costing less than a certain dollar amount, notwithstanding that the unit of property has a useful life of more than one year, the economic useful life of the unit of property must be determined under paragraph (c)(3)(i) of this section.

(iii) *Definition of applicable financial statement.* The taxpayer's applicable financial statement is the taxpayer's financial statement listed in paragraphs (c)(3)(iii)(A) through (C) of this section that has the highest priority (including within paragraph (c)(3)(iii)(B) of this section). The financial statements are, in descending priority—

(A) A financial statement required to be filed with the Securities and Exchange Commission (SEC) (the 10–K or the Annual Statement to Shareholders);

(B) A certified audited financial statement that is accompanied by the report of an independent CPA (or in the case of a foreign entity, by the report of a similarly qualified independent professional), that is used for—

(*1*) Credit purposes;

(*2*) Reporting to shareholders, partners, or similar persons; or

(*3*) Any other substantial non-tax purpose; or

(C) A financial statement (other than a tax return) required to be provided to the Federal or a state government or any Federal or state agencies (other than the SEC or the Internal Revenue Service).

(4) *Amount paid.* For purposes of this section, in the case of a taxpayer using an accrual method of accounting, the terms *amount paid* and *payment* mean a liability incurred (within the meaning of §1.446–1(c)(1)(ii)). A liability may not be taken into account under this section prior to the taxable year during which the liability is incurred.

(5) *Produce.* For purposes of this section, *produce* means construct, build, install, manufacture, develop, create, raise, or grow. This definition is intended to have the same meaning as the definition used for purposes of section 263A(g)(1) and §1.263A–2(a)(1)(i), except that improvements are excluded from the definition in this paragraph (c)(5) and are separately defined and addressed in §1.263(a)–3T. Amounts paid to produce materials and supplies are subject to section 263A.

(d) *Election to capitalize and depreciate*—(1) *In general.* A taxpayer may elect to treat as a capital expenditure and to treat as an asset subject to the allowance for depreciation the cost of any material or supply as defined in paragraph (c)(1) of this section. Except as specified in paragraph (d)(2) of this section, an election made under this paragraph (d) applies to amounts paid during the taxable year to acquire or produce any material or supply to which paragraph (a) of this section would apply (but for the election under this paragraph (d)). Any asset for which this election is made shall not be treated as a material or a supply.

(2) *Exceptions.* A taxpayer may not elect to capitalize and depreciate under paragraph (d) of this section—

(i) Any amount paid to acquire or produce a material or supply described in paragraph (c)(1)(i) of this section if—

(A) The material or supply is intended to be used as a component of a unit of property that is a material or supply under paragraph (c)(1)(iii), (iv), or (v) of this section; and

(B) The taxpayer has not elected to capitalize and depreciate that unit of property under this paragraph (d); or

(ii) Any amount paid to acquire or produce a rotable or temporary spare part if the taxpayer has applied the optional method of accounting for rotable and temporary spare parts under paragraph (e) of this section.

(3) *Manner of electing.* A taxpayer makes the election under paragraph (d) of this section by capitalizing the amounts paid to acquire or produce a material or supply in the taxable year the amounts are paid and by beginning to recover the costs when the asset is placed in service by the taxpayer for the purposes of determining depreciation under the applicable provisions of Internal Revenue Code and regulations thereunder. A taxpayer must make this election in its timely filed original Federal income tax return (including extensions) for the taxable year the asset is placed in service by the taxpayer for purposes of determining depreciation. See §1.263(a)–2T for the treatment of amounts paid to acquire or produce real or personal tangible property. In the case of a pass-through entity, the election is made by the pass-through entity, and not by the shareholders or partners. A taxpayer may make an election for each material or supply that qualifies for the election under this paragraph (d). A taxpayer may revoke an election made under this paragraph (d) with respect to a material or supply only by filing a request for a private letter ruling and obtaining the Commissioner's consent to revoke the election. The Commissioner may grant a request to revoke this election if the taxpayer can demonstrate good cause for the revocation. An election may not be made or revoked through the filing of an application for change in accounting method or, before obtaining the Commissioner's consent to make the late election or to revoke the election, by filing an amended Federal income tax return.

(e) *Optional method of accounting for rotable and temporary spare parts*—(1) *In general.* This paragraph (e) provides an optional method of accounting for rotable and temporary spare parts (the optional method for rotables). A taxpayer may use the optional method for rotables, instead of the general rule under paragraph (a)(3) of this section, to account for its rotable and temporary spare parts as defined in paragraph (c)(2) of this section. A taxpayer that uses the optional method for rotables must use this method for all of its rotable and temporary spare parts in the same trade or business. The optional method for rotables is a method of accounting under section 446(a). Under the optional method for rotables, the taxpayer must apply the rules in this paragraph (e) to each rotable or temporary spare part (part) upon the taxpayer's initial installation, removal, repair, maintenance or improvement, reinstallation, and disposal of each part.

(2) *Description of optional method for rotables*—(i) *Initial installation.* The taxpayer must deduct the amount paid to acquire or produce the part in the taxable year that the part is first installed on a unit of property for use in the taxpayer's operations.

(ii) *Removal from unit of property.* In each taxable year in which the part is removed from a unit of property to which it was initially or subsequently installed, the taxpayer must—

(A) Include in gross income the fair market value of the part; and

(B) Include in the basis of the part the fair market value of the part included in income under paragraph (e)(2)(ii)(A) of this section and the amount paid to remove the part from the unit of property.

(iii) *Repair, maintenance, or improvement of part.* The taxpayer may not currently deduct and must include in the basis of the part any amounts paid to maintain, repair, or improve the part in the taxable year these amounts are paid.

(iv) *Reinstallation of part.* The taxpayer must deduct the amounts paid to reinstall the part and those amounts included in the basis of the part under paragraphs (e)(2)(ii)(B) and (e)(2)(iii) of this section, to the extent that those amounts have not been previously deducted under this paragraph (e)(2)(iv), in the taxable year that the part is reinstalled on a unit of property.

(v) *Disposal of the part.* The taxpayer must deduct the amounts included in the basis of the part under paragraphs (e)(2)(ii)(B) and (e)(2)(iii) of this section, to the extent that those amounts have not been previously deducted under paragraph (e)(2)(iv) of this section, in the taxable year in which the part is disposed of by the taxpayer.

(f) *Election to apply de minimis rule*—(1) *In general.* A taxpayer may elect to apply the de minimis rule under §1.263(a)–2T(g) to any material or supply defined in paragraph (c)(1) this section. Any material or supply to which the taxpayer elects to apply the de minimis rule under §1.263(a)–2T(g) is not treated as a material or supply under this section. *See* §1.263(a)–2T(g)(5).

(2) *Manner of electing.* A taxpayer makes the election by deducting the amounts paid to acquire or produce a material or supply in the taxable year that the amounts are paid and by complying with the requirements set out in §1.263(a)–2T(g). A taxpayer must make this election in its timely filed original Federal income tax return (including extensions) for the taxable year that amounts are paid for the material or supply. In the case of a pass-through entity, the election is made by the pass-through entity and not by the shareholders or partners. A taxpayer may make an election for each material or supply that qualifies for the election under paragraph (f) of this section. A taxpayer may revoke an election made under paragraph (f) of this section with respect to a material or supply only by filing a request for a private letter ruling and obtaining the Commissioner's consent to revoke the election. The Commissioner may grant a request to revoke this election if the taxpayer can demonstrate good cause for the revocation. An election may not be made or revoked through the filing of an application for change in accounting method or, before obtaining the Commissioner's consent to make the late election or to revoke the election, by filing an amended Federal income tax return.

(g) *Sale or disposition of materials and supplies.* Upon sale or other disposition, materials and supplies as defined in this section are not treated as a capital asset under section 1221 or as property used in the trade or business under section 1231. Any asset for which the taxpayer makes the election to capitalize and depreciate under paragraph (d) of this section shall not be treated as a material or supply.

(h) *Examples.* The rules of this section are illustrated by the following examples, in which it is assumed (unless otherwise stated) that the property is not an incidental material or supply, that the taxpayer is a calendar year, accrual method taxpayer, and that the taxpayer has not elected to capitalize under paragraph (d) of this section or to apply the de minimis rule under paragraph (f) of this section.

Example 1. Non-rotable components. X owns a fleet of aircraft that it operates in its business. In Year 1, X purchases a stock of spare parts, which it uses to maintain and repair its aircraft. X keeps a record of consumption of these spare parts. In Year 2, X uses the spare parts for the repair and maintenance of one of its aircraft. Assume each aircraft is a unit of property under §1.263(a)–3T(e) and that spare parts are not rotable or temporary spare parts under paragraph (c)(2) of this section. Assume these repair and maintenance activities do not improve the aircraft under §1.263(a)–3T. These parts are materials and supplies under paragraph (c)(1)(i) of this section because they are components acquired and used to maintain and repair X's aircraft. Under paragraph (a)(1) of this section, the amounts that X paid for the spare parts in Year 1 are deductible in Year 2, the taxable year in which the spare parts are used to repair and maintain the aircraft.

Example 2. Rotable spare parts. X operates a fleet of specialized vehicles that it uses in its service business. Assume that each vehicle is a unit of property under §1.263(a)–3T(e). At the time that it acquires a new type of vehicle, X also acquires a substantial number of rotable spare parts that it will keep on hand to quickly replace similar parts in X's vehicles as those parts break down or wear out. These rotable parts are removable from the vehicles and are repaired so that they can be reinstalled on the same or similar vehicles. X does not use the optional method of accounting for rotable and temporary spare parts provided in paragraph (e) of this section. In Year 1, X acquires several vehicles and a number of rotable spare parts to be used as replacement parts in these vehicles. In Year 2, X repairs several vehicles by using these rotable spare parts to replace worn or damaged parts. In Year 3, X removes these rotable spare parts from its vehicles, repairs the parts, and reinstalls them on other similar vehicles. In Year 5, X can no longer use the rotable parts it acquired in Year 1 and disposes of them as scrap. Under paragraph (c)(1)(i) of this section, the rotable spare parts acquired in Year 1 are materials and supplies. Under paragraph (a)(3) of this section, rotable spare parts are generally used or consumed in the taxable year in which the taxpayer disposes of the parts. Therefore, under paragraph (a)(1) of this section, the amounts that X paid for the rotable spare parts in Year 1 are deductible in Year 5, the taxable year in which X disposes of the parts.

Example 3. Rotable spare parts; application of optional method of accounting. Assume the same facts as in *Example 2*, except X uses the optional method of accounting for all its rotable and temporary spare parts under paragraph (e) of this section. In Year 1, X acquires several vehicles and a number of rotable spare parts (the ''Year 1 rotables'') to be used as replacement parts in these vehicles. In Year 2, X repairs several vehicles and uses the Year 1 rotables to replace worn or damaged parts. In Year 3, X pays amounts to remove these Year 1 rotables from its vehicles. In Year 4, X pays amounts to maintain, repair, or improve the Year 1 rotables. In Year 5, X pays amounts to reinstall the Year 1 rotables on other similar vehicles. In Year 8, X removes the Year 1 rotables from these vehicles and stores these parts for possible later use. In Year 9, X disposes of the Year 1 rotables. Under paragraph (e) of this section, X must deduct the amounts paid to acquire and install the Year 1 rotables in Year 2, the taxable year in which the rotable spare parts are first installed by X in X's vehicles. In Year 3, when X removes the Year 1 rotables from its vehicles, X must include in its gross income the fair market value of each part. Also, in Year 3, X must include in the basis of each Year 1 rotable the fair market value of the rotable and the amount paid to remove the rotable from the vehicle. In Year 4, X must include in the basis of each Year 1 rotable the amounts paid to maintain, repair, or improve each rotable. In Year 5, the year that X reinstalls the Year 1 rotables (as repaired or improved) in other vehicles, X must deduct the reinstallation costs and the amounts previously included in the basis of each part. In Year 8, the year that X removes the Year 1 rotables from the vehicles, X must include in income the fair market value of each rotable part removed. In addition, in Year 8, X must include in the basis of each part the fair market value of that part and the amount paid to remove the each rotable from the vehicle. In Year 9, the year that X disposes of the Year 1 rotables, X may deduct the amounts remaining in the basis of each rotable.

Example 4. Rotable part acquired as part of a single unit of property; not material or supply. X operates a fleet of aircraft. In Year 1, X acquires a new aircraft, which includes two new aircraft engines. The aircraft costs $500,000 and has an economic useful life of more than 12 months, beginning when it is placed in service. In Year 5, after the aircraft is operated for several years in X's business, X removes the engines from the aircraft, repairs or improves the engines, and either reinstalls the engines on a similar aircraft or stores the engines for later reinstallation. Assume the aircraft purchased in Year 1, including its two engines, is a unit of property under §1.263(a)–3T(e). Because the engines were acquired as part of the aircraft, a single unit of property, the engines are not materials or supplies under paragraph (c)(1)(i) of this section nor rotable or temporary spare parts under paragraph (c)(2) of this section. Accordingly, X may not apply the rules of this section to the aircraft engines upon the original acquisition of the aircraft nor after the removal of the engines from the aircraft for use in the same or similar aircraft. Rather, X must apply the rules under §§1.263(a)–2T and 1.263(a)–3T to the aircraft, including its engines, to determine the treatment of amounts paid to acquire, produce, or improve the unit of property.

Example 5. Components of real property. X owns an apartment building that it leases in its business operation and discovers that a window in one of the apartments is broken. Assume that the building, including its windows, is a unit of property under §1.263(a)–3T(e) and the window is not a rotable or temporary spare part under paragraph (c)(2) of this section. X pays for the acquisition and delivery of a new window to replace the broken window. In the same taxable year, the new window is installed. Assume that the replacement of the window does not improve the property under §1.263(a)–3T and that X does not recognize gain or loss on the disposition of the broken window. The new window is a material or supply under paragraph (c)(1)(i) of this section because it is a component acquired and used to repair a unit of property owned by X and used in X's operations. Under paragraph (a)(1) of this section, the amounts X paid for the acquisition and delivery of the window are deductible in the taxable year in which the window is installed in the apartment building. See §1.168(i)–8T for the treatment of the disposition of the broken window.

Example 6. Consumable property. X operates a fleet of aircraft that carries freight for its customers. X has several storage tanks on its premises, which hold jet fuel for its aircraft. Assume that once the jet fuel is placed in X's aircraft, the jet fuel is reasonably expected to be consumed within 12 months or less. On December 31, Year 1, X purchases a two-year supply of jet fuel. In Year 2, X uses a portion of the jet fuel purchased on December 31, Year 1, to fuel the aircraft used in its business. The jet fuel that X purchased in Year 1 is a material or supply under paragraph (c)(1)(ii) of this section because it is reasonably expected to be consumed within 12 months or less from the time it is placed in X's aircraft. Under paragraph (a)(1) of this section, X may deduct in Year 2 the amounts paid for the portion of jet fuel used in the operation of X's aircraft in Year 2.

Example 7. Unit of property that costs $100 or less. X operates a business that rents out a variety of small individual items to customers (rental items). X maintains a supply of rental items on hand. In Year 1, X purchases a large quantity of rental items to use in its rental business. Assume that each rental item is a unit of property under §1.263(a)–3T(e) and costs $100 or less. In Year 2, X begins using all the rental items purchased in Year 1 by providing them to customers of its rental business. X does not sell or exchange these items on established retail markets at any time after the items are used in the rental business. The rental items are materials and supplies under paragraph (c)(1)(iv) of this section. Under paragraph (a)(1) of this section, the amounts that X paid for the rental items in Year 1 are deductible in Year 2, the taxable year in which the rental items are used in X's business.

Example 8. Unit of property that costs $100 or less. X provides billing services to its customers. In Year 1, X pays amounts to purchase 50 facsimile machines to be used by its employees. Assume each facsimile machine is a unit of property under §1.263(a)–3T(e) and costs less than $100. In Year 1, X's employees begin using 35 of the facsimile machines, and X stores the remaining 15 machines for use in a later taxable year. The facsimile machines are materials and supplies under paragraph (c)(1)(iv) of this section. Under paragraph (a)(1) of this section, the amounts X paid for 35 of the facsimile machines are deductible in Year 1, the taxable year in which X uses those machines. The amounts that X paid for each of the remaining 15 machines are deductible in the taxable year in which each machine is used.

Example 9. Materials and supplies used in improvements; coordination with §1.263(a)–3T. X owns various machines that are used in its business. Assume that each machine is a unit of property under §1.263(a)–3T(e). In Year 1, X purchases a supply of spare parts for its machines. X acquired the parts to use in the repair or maintenance of the machines under §1.162–4T or in the improvement of the machines under §1.263(a)–3T. The spare parts are not rotable or temporary spare parts under paragraph (c)(2) of this section. In Year 2, X uses all of these spare parts in an activity that improves a machine under §1.263(a)–3T. Under paragraph (c)(1)(i) of this section, the spare parts purchased by X in Year 1 are materials and supplies. Under paragraph (a)(1) of this section, the amounts paid for the spare parts are otherwise deductible as materials and supplies in Year 2, the taxable year in which X uses those parts. However, because these materials and supplies are used to improve X's machine, X is required to capitalize the amounts paid for those spare parts under §1.263(a)–3T. See also section 263A for the requirement to capitalize the direct and allocable indirect costs of property produced or property acquired for resale.

Example 10. Cost of producing materials and supplies; coordination with section 263A. X is a manufacturer that produces liquid waste as part of its operations. X determines that its current liquid waste disposal process is inadequate. To remedy the problem, in Year 1, X constructs a leaching pit to provide a draining area for the liquid waste. Assume the leaching pit is a unit of property under §1.263(a)–3T(e) and has an economic useful life 12 months or less, starting on the date that X begins to use the leaching pit as a draining area. At the end of this period, X's factory will be connected to the local sewer system. In Year 2, X starts using the leaching pit in its operations. The amounts paid to construct the leaching pit (including the direct and allocable indirect costs of property produced under section 263A) are amounts paid for a material or supply under paragraph (c)(1)(iii) of this section. Under paragraph (a)(1) of this section, the amounts paid for the leaching pit are otherwise deductible as materials and supplies in Year 2, the taxable year in which X uses the leaching pit. However, because the amounts paid to construct the leaching pit directly benefit or are incurred by reason of X's manufacturing operations, X must capitalize those costs under section 263A to the property produced. *See* §1.263A–1(e)(3)(ii)(E).

Example 11. Costs of acquiring materials and supplies for production of property; coordination with section 263A. In Year 1, X purchases jigs, dies, molds, and patterns for use in the manufacture of X's products. Assume each jig, die, mold, and pattern is a unit of property under §1.263(a)–3T(e). The economic useful life of each jig, die, mold, and pattern is 12 months or less, beginning when each item is used in the manufacturing process. The jigs, dies, molds, and patterns are not components acquired to maintain, repair, or improve any of X's equipment under paragraph (c)(1)(i) of this section. X begins using the jigs, dies, molds and patterns in Year 2 to manufacture its products. These items are materials and supplies under paragraph (c)(1)(iii) of this section. Under paragraph (a)(1) of this section, the amounts paid for the items are otherwise deductible in Year 2, the taxable year in which X uses those items. However, because the amounts paid for these materials and supplies directly benefit or are incurred by reason of X's manufacturing operations, X must capitalize the costs under section 263A to the property produced. *See* §1.263A–1(e)(3)(ii)(E).

Example 12. Election to capitalize and depreciate. X operates a rental business that rents out a variety of items (rental items) to its customers. Assume each rental item is a separate unit of property as determined under §1.263(a)–3T(e). X does not sell or exchange these items on established retail markets at any time after the items are used in the rental business. X purchases various rental items, each of which costs less than $100 or has an economic useful life of 12 months or less, beginning when the items are used or consumed. The rental items are materials and supplies under paragraph (c)(1)(iii) or (c)(1)(iv) of this section. Under paragraph (a)(1) of this section, the amount paid for each rental item is deductible in the taxable year in which the item is used in the rental business. However, X would prefer to treat the cost of each rental item as a capital expenditure subject to depreciation. Under paragraph (d) of this section, X may elect not to apply the rule contained in paragraph (a)(1) of this section to the rental items. X makes this election by capitalizing the amounts paid for each rental item in the taxable year that X purchases the item and by beginning to recover the costs of each item on its timely filed Federal income tax return for the taxable year that X places the item in service for purposes of determining depreciation under the applicable provisions of the Internal Revenue Code and the regulations thereunder. See §1.263(a)–2T(h) for the treatment of capital expenditures.

Example 13. Election to capitalize and depreciate. X is an electric utility. X acquires certain temporary spare parts, which it keeps on hand to avoid operational time loss in the event it must make emergency repairs to a unit of property that is subject to depreciation. These parts are not used to improve property under §1.263(a)–3T(d). These temporary spare parts are used until a new or repaired part can be installed and then are removed and stored for later emergency installation. X does not use the optional method of accounting for rotable and temporary spare parts in paragraph (e) of this section for any of its rotable or temporary spare parts. The temporary spare parts are materials and supplies under paragraph (c)(1)(i) of this section. Under paragraphs (a)(1) and (a)(3) of this section, the amounts paid for the temporary spare parts are deductible in the taxable year in which they are disposed of by the taxpayer. However, because it is unlikely that the temporary spare parts will be disposed of in the near future, X would prefer to treat the amounts paid for the spare parts as capital expenditures subject to depreciation. X may elect under paragraph (d) of this section not to apply the rule contained in paragraph (a)(1) of this section to each of its temporary spare parts. X makes this election by capitalizing the amounts paid for each spare part in the taxable year that X acquires the spare parts and by beginning to recover the costs of each part on its timely filed Federal income tax return for the taxable year in which the part is placed in service for purposes of determining depreciation under the applicable provisions of the Internal Revenue Code and the regulations thereunder. See §1.263(a)–2T(h) for the treatment of capital expenditures and section 263A for the requirement to capitalize the direct and allocable indirect costs of property produced or property acquired for resale.

Example 14. Election to apply de minimis rule. X provides consulting services to its customers. X purchases 50 office chairs to be used by its employees. Each office chair is a unit of property that costs $80. Also in the same taxable year, X pays amounts to purchase 50 customized briefcases. Assume each briefcase is a unit of property under §1.263(a)–3T(e), costs $120, and has an economic useful life of 12 months or less, beginning when used and consumed. X has an applicable financial statement (as defined in §1.263(a)–2T(g)(6)), and X has a written policy at the beginning of the taxable year to expense amounts paid for units of property costing less than $300. The briefcases and the office chairs are materials and supplies under paragraph (c)(1)(iii) and (c)(1)(iv), respectively, of this section. Under paragraph (a)(1) of this section, the amounts paid for the office chairs and briefcases are deductible in the taxable year in which they are used or consumed. However, assuming X meets all the requirements of §1.263(a)–2T(g), X may elect under paragraph (f) of this section to apply the de minimis rule under

§ 1.263(a)–2T(g) to amounts paid for the office chairs and briefcases, rather than treat these amounts as the costs of materials and supplies under § 1.162–3T.

(i) *Accounting method changes.* Except as otherwise provided in this section, a change to comply with this section is a change in method of accounting to which the provisions of sections 446 and 481, and the regulations thereunder, apply. A taxpayer seeking to change to a method of accounting permitted in this section must secure the consent of the Commissioner in accordance with § 1.446–1(e) and follow the administrative procedures issued under § 1.446–1(e)(3)(ii) for obtaining the Commissioner's consent to change its accounting method.

(j) *Effective/applicability date*—(1) *In general.* This section generally applies to amounts paid or incurred (to acquire or produce property) in taxable years beginning on or after January 1, 2014. However, a taxpayer may apply paragraph (e) of this section (the optional method of accounting for rotable and temporary spare parts) to taxable years beginning on or after January 1, 2014. Section 1.162–3 as contained in 26 CFR part 1 edition revised as of April 1, 2011, applies to taxable years beginning before January 1, 2014.

(2) *Optional early application.* Except for paragraph (e) of this section, a taxpayer may choose to apply this section to amounts paid or incurred (to acquire or produce property) in taxable years beginning on or after January 1, 2012. A taxpayer may choose to apply paragraph (e) of this section (the optional method of accounting for rotable and temporary spare parts) to taxable years beginning on or after January 1, 2012.

(k) *Expiration date.* The applicability of this section expires on December 23, 2014.

[T.D. 9564, 76 FR 81080, Dec. 27, 2011; 77 FR 18687, Mar. 28, 2012; 77 FR 74584, Dec. 17, 2012]

§ 1.162–4 Repairs.

(a) through (d) [Reserved] For further guidance, see § 1.162–4T(a) through (d).

[T.D. 9564, 76 FR 81084, Dec. 27, 2011]

§ 1.162–4T Repairs (temporary).

(a) *In general.* A taxpayer may deduct amounts paid for repairs and maintenance to tangible property if the amounts paid are not otherwise required to be capitalized.

(b) *Accounting method changes.* Except as otherwise provided in this section, a change to comply with this section is a change in method of accounting to which the provisions of sections 446 and 481, and the regulations thereunder, apply. A taxpayer seeking to change to a method of accounting permitted in this section must secure the consent of the Commissioner in accordance with § 1.446–1(e) and follow the administrative procedures issued under § 1.446–1(e)(3)(ii) for obtaining the Commissioner's consent to change its accounting method.

(c) *Effective/applicability date*—(1) *In general.* This section applies to taxable years beginning on or after January 1, 2014. Section 1.162–4 as contained in 26 CFR part 1 edition revised as of April 1, 2011, applies to taxable years beginning before January 1, 2014.

(2) *Optional early application.* A taxpayer may choose to apply this section to taxable years beginning on or after January 1, 2012.

(d) *Expiration date.* The applicability of this section expires on December 23, 2014

[T.D. 9564, 76 FR 81084, Dec. 27, 2011, as amended at 77 FR 74584, Dec. 17, 2012]

§ 1.162–5 Expenses for education.

(a) *General rule.* Expenditures made by an individual for education (including research undertaken as part of his educational program) which are not expenditures of a type described in paragraph (b) (2) or (3) of this section are deductible as ordinary and necessary business expenses (even though the education may lead to a degree) if the education—

(1) Maintains or improves skills required by the individual in his employment or other trade or business, or

(2) Meets the express requirements of the individual's employer, or the requirements of applicable law or regulations, imposed as a condition to the retention by the individual of an established employment relationship, status, or rate of compensation.

(b) *Nondeductible educational expenditures*—(1) *In general.* Educational expenditures described in subparagraphs (2) and (3) of this paragraph are personal expenditures or constitute an inseparable aggregate of personal and capital expenditures and, therefore, are not deductible as ordinary and necessary business expenses even though the education may maintain or improve skills required by the individual in his employment or other trade or business or may meet the express requirements of the individual's employer or of applicable law or regulations.

(2) *Minimum educational requirements.* (i) The first category of nondeductible educational expenses within the scope of subparagraph (1) of this paragraph are expenditures made by an individual for education which is required of him in order to meet the minimum educational requirements for qualification in his employment or other trade or business. The minimum education necessary to qualify for a position or other trade or business must be determined from a consideration of such factors as the requirements of the employer, the applicable law and regulations, and the standards of the profession, trade, or business involved. The fact that an individual is already performing service in an employment status does not establish that he has met the minimum educational requirements for qualification in that employment. Once an individual has met the minimum educational requirements for qualification in his employment or other trade or business (as in effect when he enters the employment or trade or business), he shall be treated as continuing to meet those requirements even though they are changed.

(ii) The minimum educational requirements for qualification of a particular individual in a position in an educational institution is the minimum level of education (in terms of aggregate college hours or degree) which under the applicable laws or regulations, in effect at the time this individual is first employed in such position, is normally required of an individual initially being employed in such a position. If there are no normal requirements as to the minimum level of education required for a position in an educational institution, then an individual in such a position shall be considered to have met the minimum educational requirements for qualification in that position when he becomes a member of the faculty of the educational institution. The determination of whether an individual is a member of the faculty of an educational institution must be made on the basis of the particular practices of the institution. However, an individual will ordinarily be considered to be a member of the faculty of an institution if (*a*) he has tenure or his years of service are being counted toward obtaining tenure; (*b*) the institution is making contributions to a retirement plan (other than Social Security or a similar program) in respect of his employment; or (*c*) he has a vote in faculty affairs.

(iii) The application of this subparagraph may be illustrated by the following examples:

Example 1. General facts:State X requires a bachelor's degree for beginning secondary school teachers which must include 30 credit hours of professional educational courses. In addition, in order to retain his position, a secondary school teacher must complete a fifth year of preparation within 10 years after beginning his employment. If an employing school official certifies to the State Department of Education that applicants having a bachelor's degree and the required courses in professional education cannot be found, he may hire individuals as secondary school teachers if they have completed a minimum of 90 semester hours of college work. However, to be retained in his position, such an individual must obtain his bachelor's degree and complete the required professional educational courses within 3 years after his employment commences. Under these facts, a bachelor's degree, without regard to whether it includes 30 credit hours of professional educational courses, is considered to be the minimum educational requirement for qualification as a secondary school teacher in State X. This is the case notwithstanding the number of teachers who are actually hired without such a degree. The following are examples of the application of these facts in particular situations:

Situation 1. A, at the time he is employed as a secondary school teacher in State X, has a bachelor's degree including 30 credit hours of professional educational courses. After his employment, A completes a fifth college year of education and, as a result, is issued a standard certificate. The fifth college year of education undertaken by A is not education required to meet the minimum educational requirements for qualification as a secondary school teacher. Accordingly, the expenditures for such education are deductible unless the expenditures are for education which is part of a program of study being pursued by A which will lead to qualifying him in a new trade or business.

Situation 2. Because of a shortage of applicants meeting the stated requirements, B, who has a bachelor's degree, is employed as a secondary school teacher in State X even though he has only 20 credit hours of professional educational courses. After his employment, B takes an additional 10 credit hours of professional educational courses. Since these courses do not constitute education required to meet the minimum educational requirements for qualification as a secondary school teacher which is a bachelor's degree and will not lead to qualifying B in a new trade or business, the expenditures for such courses are deductible.

Situation 3. Because of a shortage of applicants meeting the stated requirements, C is employed as a secondary school teacher in State X although he has only 90 semester hours of college work toward his bachelor's degree. After his employment, C undertakes courses leading to a bachelor's degree. These courses (including any courses in professional education) constitute education required to meet the minimum educational requirements for qualification as a secondary school teacher. Accordingly, the expenditures for such education are not deductible.

Situation 4. Subsequent to the employment of A, B, and C, but before they have completed a fifth college year of education, State X changes its requirements affecting secondary school teachers to provide that beginning teachers must have completed 5 college years of preparation. In the cases of A, B, and C, a fifth college year of education is not considered to be education undertaken to meet the minimum educational requirements for qualifications as a secondary school teacher. Accordingly, expenditures for a fifth year of college will be deductible unless the expenditures are for education which is part of a program being pursued by A, B, or C which will lead to qualifying him in a new trade or business.

Example 2. D, who holds a bachelor's degree, obtains temporary employment as an instructor at University Y and undertakes graduate courses as a candidate for a graduate degree. D may become a faculty member only if he obtains a graduate degree and may continue to hold a position as instructor only so long as he shows satisfactory progress towards obtaining this graduate degree. The graduate courses taken by D constitute education required to meet the minimum educational requirements for qualification in D's trade or business and, thus, the expenditures for such courses are not deductible.

Example 3. E, who has completed 2 years of a normal 3-year law school course leading to a bachelor of laws degree (LL.B.), is hired by a law firm to do legal research and perform other functions on a full-time basis. As a condition to continued employment, E is required to obtain an LL.B. and pass the State bar examination. E completes his law school education by attending night law school, and he takes a bar review course in order to prepare for the State bar examination. The law courses and bar review course constitute education required to meet the minimum educational requirements for qualification in E's trade or business and, thus, the expenditures for such courses are not deductible.

(3) *Qualification for new trade or business.* (i) The second category of nondeductible educational expenses within the scope of subparagraph (1) of this paragraph are expenditures made by an individual for education which is part of a program of study being pursued by him which will lead to qualifying him in a new trade or business. In the case of an employee, a change of duties does not constitute a new trade or business if the new duties involve the same general type of work as is involved in the individual's present employment. For this purpose, all teaching and related duties shall be considered to involve the same general type of work. The following are examples of changes in duties which do not constitute new trades or businesses:

(*a*) Elementary to secondary school classroom teacher.

(*b*) Classroom teacher in one subject (such as mathematics) to classroom teacher in another subject (such as science).

(*c*) Classroom teacher to guidance counselor.

(*d*) Classroom teacher to principal.

(ii) The application of this subparagraph to individuals other than teachers may be illustrated by the following examples:

Example 1. A, a self-employed individual practicing a profession other than law, for example, engineering, accounting, etc., attends law school at night and after completing his law school studies receives a bachelor of laws degree. The expenditures made by A in attending law school are nondeductible because this course of study qualifies him for a new trade or business.

Example 2. Assume the same facts as in example (1) except that A has the status of an employee rather than a self-employed individual, and that his employer requires him to obtain a bachelor of laws degree. A intends to continue practicing his nonlegal profession as an employee of such employer. Nevertheless, the expenditures made by A in attending law school are not deductible since this course of study qualifies him for a new trade or business.

Example 3. B, a general practitioner of medicine, takes a 2-week course reviewing new developments in several specialized fields of medicine. B's expenses for the course are deductible because the course maintains or improves skills required by him in his trade or business and does not qualify him for a new trade or business.

Example 4. C, while engaged in the private practice of psychiatry, undertakes a program of study and training at an accredited psychoanalytic institute which will lead to qualifying him to practice psychoanalysis. C's expenditures for such study and training are deductible because the study and training maintains or improves skills required by him in his trade or business and does not qualify him for a new trade or business.

(c) *Deductible educational expenditures*—(1) *Maintaining or improving skills.* The deduction under the category of expenditures for education which maintains or improves skills required by the individual in his employment or other trade or business includes refresher courses or courses dealing with current developments as well as academic or vocational courses provided the expenditures for the courses are not within either category of nondeductible expenditures described in paragraph (b) (2) or (3) of this section.

(2) *Meeting requirements of employer.* An individual is considered to have undertaken education in order to meet the express requirements of his employer, or the requirements of applicable law or regulations, imposed as a condition to the retention by the taxpayer of his established employment relationship, status, or rate of compensation only if such requirements are imposed for a bona fide business purpose of the individual's employer. Only the minimum education necessary to the retention by the individual of his established employment relationship, status, or rate of compensation may be considered as undertaken to meet the express requirements of the taxpayer's employer. However, education in excess of such minimum education may qualify as education undertaken in order to maintain or improve the skills required by the taxpayer in his employment or other trade or business (see subparagraph (1) of this paragraph). In no event, however, is a deduction allowable for expenditures for education which, even though for education required by the employer or applicable law or regulations, are within one of the categories of nondeductible expenditures described in paragraph (b) (2) and (3) of this section.

(d) *Travel as a form of education.* Subject to the provisions of paragraph (b) and (e) of this section, expenditures for travel (including travel while on sabbatical leave) as a form of education are deductible only to the extent such expenditures are attributable to a period of travel that is directly related to the duties of the individual in his employment or other trade or business. For this purpose, a period of travel shall be considered directly related to the duties of an individual in his employment or other trade or business only if the major portion of the activities during such period is of a nature which directly maintains or improves skills required by the individual in such employment or other trade or business. The approval of a travel program by an employer or the fact that travel is accepted by an employer in the fulfillment of its requirements for retention of rate of compensation, status or employment, is not determinative that the required relationship exists between the travel involved and the duties of the individual in his particular position.

(e) *Travel away from home.* (1) If an individual travels away from home primarily to obtain education the expenses of which are deductible under this section, his expenditures for travel, meals, and lodging while away from home are deductible. However, if as an incident of such trip the individual engages in some personal activity such as sightseeing, social visiting, or entertaining, or other recreation, the portion of the expenses attributable to such personal activity constitutes nondeductible personal or living expenses and is not allowable as a deduction. If the individual's travel away from home is primarily personal, the individual's expenditures for travel, meals and lodging (other than meals and lodging during the time spent in participating in deductible education pursuits) are not deductible. Whether a particular trip is primarily person or primarily to obtain education the expenses of which are deductible under this section depends upon all the facts and circumstances of each case. An important factor to be taken into consideration in making the determination is the relative amount of time devoted to personal activity as compared with the time devoted to educational pursuits. The rules set forth in this paragraph are subject to the provisions of section 162(a)(2), relating to deductibility of certain traveling expenses, and section 274 (c) and (d), relating to allocation of certain foreign travel expenses and substantiation required, respectively, and the regulations thereunder.

(2) *Examples.* The application of this subsection may be illustrated by the following examples:

Example 1. A, a self-employed tax practitioner, decides to take a 1-week course in new developments in taxation, which is offered in City X, 500 miles away from his home. His primary purpose in going to X is to take the course, but he also takes a side trip to City Y (50 miles from X) for 1 day, takes a sightseeing trip while in X, and entertains some personal friends. A's transportation expenses to City X and return to his home are deductible but his transportation expenses to City Y are not deductible. A's expenses for meals and lodging while away from home will be allocated between his educational pursuits and his personal activities. Those expenses which are entirely personal, such as sightseeing and entertaining friends, are not deductible to any extent.

Example 2. The facts are the same as in example (1) except that A's primary purpose in going to City X is to take a vacation. This purpose is indicated by several factors, one of which is the fact that he spends only 1 week attending the tax course and devotes 5 weeks entirely to personal activities. None of A's transportation expenses are deductible and his expenses for meals and lodging while away from home are not deductible to the extent attributable to personal activities. His expenses for meals and lodging allocable to the week attending the tax course are, however, deductible.

Example 3. B, a high school mathematics teacher in New York City, in the summertime travels to a university in California in order to take a mathematics course the expense of which is deductible under this section. B pursues only one-fourth of a full course of study and the remainder of her time is devoted to personal activities the expense of which is not deductible. Absent a showing by B of a substantial nonpersonal reason for taking the course in the university in California, the trip is considered taken primarily for personal reasons and the cost of traveling from New York City to California and return would not be deductible. However, one-fourth of the cost of B's meals and lodging while attending the university in California may be considered properly allocable to deductible educational pursuits and, therefore, is deductible.

[T.D. 6918, 32 FR 6679, May 2, 1967]

§ 1.162–7 Compensation for personal services.

(a) There may be included among the ordinary and necessary expenses paid or incurred in carrying on any trade or business a reasonable allowance for salaries or other compensation for personal services actually rendered. The test of deductibility in the case of compensation payments is whether they are reasonable and are in fact payments purely for services.

(b) The test set forth in paragraph (a) of this section and its practical application may be further stated and illustrated as follows:

(1) Any amount paid in the form of compensation, but not in fact as the purchase price of services, is not deductible. An ostensible salary paid by a corporation may be a distribution of a dividend on stock. This is likely to occur in the case of a corporation having few shareholders, practically all of whom draw salaries. If in such a case the salaries are in excess of those ordinarily paid for similar services and the excessive payments correspond or bear a close relationship to the stockholdings of the officers or employees, it would seem likely that the salaries are not paid wholly for services rendered, but that the excessive payments are a distribution of earnings upon the

stock. An ostensible salary may be in part payment for property. This may occur, for example, where a partnership sells out to a corporation, the former partners agreeing to continue in the service of the corporation. In such a case it may be found that the salaries of the former partners are not merely for services, but in part constitute payment for the transfer of their business.

(2) The form or method of fixing compensation is not decisive as to deductibility. While any form of contingent compensation invites scrutiny as a possible distribution of earnings of the enterprise, it does not follow that payments on a contingent basis are to be treated fundamentally on any basis different from that applying to compensation at a flat rate. Generally speaking, if contingent compensation is paid pursuant to a free bargain between the employer and the individual made before the services are rendered, not influenced by any consideration on the part of the employer other than that of securing on fair and advantageous terms the services of the individual, it should be allowed as a deduction even though in the actual working out of the contract it may prove to be greater than the amount which would ordinarily be paid.

(3) In any event the allowance for the compensation paid may not exceed what is reasonable under all the circumstances. It is, in general, just to assume that reasonable and true compensation is only such amount as would ordinarily be paid for like services by like enterprises under like circumstances. The circumstances to be taken into consideration are those existing at the date when the contract for services was made, not those existing at the date when the contract is questioned.

(4) For disallowance of deduction in the case of certain transfers of stock pursuant to employees stock options, see section 421 and the regulations thereunder.

§ 1.162–8 Treatment of excessive compensation.

The income tax liability of the recipient in respect of an amount ostensibly paid to him as compensation, but not allowed to be deducted as such by the payor, will depend upon the circumstances of each case. Thus, in the case of excessive payments by corporations, if such payments correspond or bear a close relationship to stockholdings, and are found to be a distribution of earnings or profits, the excessive payments will be treated as a dividend. If such payments constitute payment for property, they should be treated by the payor as a capital expenditure and by the recipient as part of the purchase price. In the absence of evidence to justify other treatment, excessive payments for salaries or other compensation for personal services will be included in gross income of the recipient.

§ 1.162–9 Bonuses to employees.

Bonuses to employees will constitute allowable deductions from gross income when such payments are made in good faith and as additional compensation for the services actually rendered by the employees, provided such payments, when added to the stipulated salaries, do not exceed a reasonable compensation for the services rendered. It is immaterial whether such bonuses are paid in cash or in kind or partly in cash and partly in kind. Donations made to employees and others, which do not have in them the element of compensation or which are in excess of reasonable compensation for services, are not deductible from gross income.

§ 1.162–10 Certain employee benefits.

(a) *In general.* Amounts paid or accrued by a taxpayer on account of injuries received by employees and lump sum amounts paid or accrued as compensation for injuries, are proper deductions as ordinary and necessary expenses. Such deductions are limited to the amount not compensated for by insurance or otherwise. Amounts paid or accrued within the taxable year for dismissal wages, unemployment benefits, guaranteed annual wages, vacations, or a sickness, accident, hospitalization, medical expense, recreational, welfare, or similar benefit plan, are deductible under section 162(a) if they are ordinary and necessary expenses of the trade or business. However, except as provided in paragraph (b) of this section, such amounts shall not be deductible under section 162(a) if, under any circumstances, they may be used to provide benefits under a stock bonus, pension, annuity, profit-sharing, or other deferred compensation plan of the type referred to in section 404(a). In such an event, the extent to which these amounts are deductible from gross income shall be governed by the provisions of section 404 and the regulations issued thereunder.

(b) *Certain negotiated plans.* (1) Subject to the limitations set forth in subparagraphs (2) and (3) of this paragraph, contributions paid by an employer under a plan under which such contributions are held in a welfare trust for the purpose of paying (either from principal or income or both) for the benefit of employees, their families, and dependents, at least medical or hospital care, and pensions on retirement or death of employees, are deductible when paid as business expenses under section 162(a).

(2) For the purpose of subparagraph (1) of this paragraph, the word ''plan'' means any plan established prior to January 1, 1954, as a result of an agreement between employee representatives and the Government of the United States, during a period of Government operation, under seizure powers, of a major part of the productive facilities of the industry in which the employer claiming the deduction is engaged. The phrase ''plan established prior to January 1, 1954, as a result of an agreement'' is intended primarily to cover a trust established under the terms of such an agreement. It also includes a trust established under a plan of an employer, or group of employers, who, by reason of producing the same commodity, are in competition with the employers whose facilities were seized and who would therefore be expected to establish such a trust as a reasonable measure to maintain a sound position in the labor market producing the commodity. For example, if a trust was established under such an agreement in the bituminous coal industry, a similar trust established in the anthracite coal industry within a reasonable time, but before January 1, 1954, would qualify under subparagraph (1) of this paragraph.

(3) If any trust described in subparagraph (2) of this paragraph becomes qualified for exemption from tax under the provisions of section 501(a), the deductibility of contributions by an employer to such trust on or after any date of such qualification shall no longer be governed by the provisions of section 162, even though the trust may later lose its exemption from tax under section 501(a).

(c) *Other plans providing deferred compensation.* For rules relating to the deduction of amounts paid to or under a stock bonus, pension, annuity, or profit-sharing plan or amounts paid or accrued under any other plan deferring the receipt of compensation, see section 404 and the regulations thereunder.

§ 1.162–10T Questions and answers relating to the deduction of employee benefits under the Tax Reform Act of 1984; certain limits on amounts deductible (temporary).

Q–1: How does the amendment of section 404(b) by the Tax Reform Act of 1984 affect the deduction of employee benefits under section 162 of the Internal Revenue Code?

A–1: As amended by the Tax Reform Act of 1984, section 404(b) clarifies that section 404(a) and (d) (in the case of employees and nonemployees, respectively) shall govern the deduction of contributions paid or compensation paid or incurred under a plan, or method or arrangement, deferring the receipt of compensation or providing for deferred benefits. Section 404(a) and (d) requires that such a contribution or compensation be paid or incurred for purposes of section 162 or 212 and satisfy the requirements for deductibility under either of these sections. However, notwithstanding the above, section 404 does not apply to contributions paid or accrued with respect to a ''welfare benefit fund'' (as defined in section 419(e)) after July 18, 1984, in taxable years of employers (and payors) ending after that date.

Also, section 463 shall govern the deduction of vacation pay by a taxpayer that has elected the application of such section. Section 404(b), as amended, generally applies to contributions paid and compensation paid or incurred after July 18, 1984, in taxable years of employers (and payors) ending after that date. See Q&A–3 of §1.404(b)–1T. For rules relating to the deduction of contributions attributable to the provision of deferred benefits, see section 404 (a), (b) and (d) and §1.404(a)–1T, §1.404(b)–1T and §1.404(d)–1T. For rules relating to the deduction of contributions paid or accrued with respect to a welfare benefit fund, see section 419, §1.419–1T and §1.419A–2T. For rules relating to the deduction of vacation pay for which an election is made under section 463, see §301.9100–16T of this chapter and §1.463–1T.

Q–2: How does the enactment of section 419 by the Tax Reform Act of 1984 affect the deduction of employee benefits under section 162?

A–2: As enacted by the Tax Reform Act of 1984, section 419 shall govern the deduction of contributions paid or accrued by an employer (or a person receiving services under section 419(g)) with respect to a ''welfare benefit fund'' (within the meaning of section 419(e)) after December 31, 1985, in taxable years of the employer (or person receiving the services) ending after that date. Section 419(a) requires that such a contribution be paid or accrued for purposes of section 162 or 212 and satisfy the requirements for deductibility under either of those sections. Generally, subject to a binding contract exception (as described in section 511(e)(5) of the Tax Reform Act of 1984), section 419 shall also govern the deduction of the contribution of a facility (or other contribution used to acquire or improve a facility) to a welfare benefit fund after June 22, 1984. See Q&A–11 of §1.419–1T. In the case of a welfare benefit fund maintained pursuant to a collective bargaining agreement, section 419 applies to the extent provided under the special effective date rule described in Q&A–2 of §1.419–1T and the special rules of §1.419A–2T. For rules relating to the deduction of contributions paid or accrued with respect to a welfare benefit fund, see section 419 and §1.419–1T.

[T.D. 8073, 51 FR 4319, Feb. 4, 1986, as amended by T.D. 8435, 57 FR 43896, Sept. 23, 1992]

§ 1.162–11 Rentals.

(a) *Acquisition of a leasehold.* If a leasehold is acquired for business purposes for a specified sum, the purchaser may take as a deduction in his return an aliquot part of such sum each year, based on the number of years the lease has to run. Taxes paid by a tenant to or for a landlord for business property are additional rent and constitute a deductible item to the tenant and taxable income to the landlord, the amount of the tax being deductible by the latter. For disallowance of deduction for income taxes paid by a lessee corporation pursuant to a lease arrangement with the lessor corporation, see section 110 and the regulations thereunder. See section 178 and the regulations thereunder for rules governing the effect to be given renewal options in amortizing the costs incurred after July 28, 1958 of acquiring a lease. See §1.197–2 for rules governing the amortization of costs to acquire limited interests in section 197 intangibles.

(b) [Reserved] For further guidance, see §1.162–11T(b).

(c) [Reserved] For further guidance, see §1.162–11T(c).

(d) [Reserved] For further guidance, see §1.162–11T(d).

[T.D. 6520, 25 FR 13692, Dec. 24, 1960, as amended by T.D. 8865, 65 FR 3825, Jan. 25, 2000; T.D. 9564, 76 FR 81084, Dec. 27, 2011]

§ 1.162–11T Rentals (temporary).

(a) [Reserved] For further guidance, see §1.162–11(a).

(b) *Improvements by lessee on lessor's property.* The cost to a taxpayer of erecting buildings or making permanent improvements on property of which the taxpayer is a lessee is a capital expenditure and is not deductible as a business expense. For the rules regarding improvements to leased property where the improvements are tangible property, see §1.263(a)–3T(f)(1). For the rules regarding depreciation or amortization deductions for leasehold improvements, see §1.167(a)–4T.

(c) *Effective/applicability date*—(1) *In general.* This section applies to taxable years beginning on or after January 1, 2014. Section 1.162–11 as contained in 26 CFR part 1 edition revised as of April 1, 2011, applies to taxable years beginning before January 1, 2014.

(2) *Optional early application*. A taxpayer may choose to apply this section to taxable years beginning on or after January 1, 2012.

(d) *Expiration date*. The applicability of this section expires on December 23, 2014.

[T.D. 9564, 76 FR 81084, Dec. 27, 2011, as amended at 77 FR 74584, Dec. 17, 2012]

§ 1.162–12 Expenses of farmers.

(a) *Farms engaged in for profit*. A farmer who operates a farm for profit is entitled to deduct from gross income as necessary expenses all amounts actually expended in the carrying on of the business of farming. The cost of ordinary tools of short life or small cost, such as hand tools, including shovels, rakes, etc., may be deducted. The purchase of feed and other costs connected with raising livestock may be treated as expense deductions insofar as such costs represent actual outlay, but not including the value of farm produce grown upon the farm or the labor of the taxpayer. For rules regarding the capitalization of expenses of producing property in the trade or business of farming, see section 263A and the regulations thereunder. For taxable years beginning after July 12, 1972, where a farmer is engaged in producing crops and the process of gathering and disposal of such crops is not completed within the taxable year in which such crops were planted, expenses deducted may, with the consent of the Commissioner (see section 446 and the regulations thereunder), be determined upon the crop method, and such deductions must be taken in the taxable year in which the gross income from the crop has been realized. For taxable years beginning on or before July 12, 1972, where a farmer is engaged in producing crops which take more than a year from the time of planting to the process of gathering and disposal, expenses deducted may, with the consent of the Commissioner (see section 446 and the regulations thereunder), be determined upon the crop method, and such deductions must be taken in the taxable year in which the gross income from the crop has been realized. If a farmer does not compute income upon the crop method, the cost of seeds and young plants which are purchased for further development and cultivation prior to sale in later years may be deducted as an expense for the year of purchase, provided the farmer follows a consistent practice of deducting such costs as an expense from year to year. The preceding sentence does not apply to the cost of seeds and young plants connected with the planting of timber (see section 611 and the regulations thereunder). For rules regarding the capitalization of expenses of producing property in the trade or business of farming, see section 263A of the Internal Revenue Code and § 1.263A–4. The cost of farm machinery, equipment, and farm buildings represents a capital investment and is not an allowable deduction as an item of expense. Amounts expended in the development of farms, orchards, and ranches prior to the time when the productive state is reached may, at the election of the taxpayer, be regarded as investments of capital. For the treatment of soil and water conservation expenditures as expenses which are not chargeable to capital account, see section 175 and the regulations thereunder. For taxable years beginning after December 31, 1959, in the case of expenditures paid or incurred by farmers for fertilizer, lime, etc., see section 180 and the regulations thereunder. Amounts expended in purchasing work, breeding, dairy, or sporting animals are regarded as investments of capital, and shall be depreciated unless such animals are included in an inventory in accordance with § 1.61–4. The purchase price of an automobile, even when wholly used in carrying on farming operations, is not deductible, but is regarded as an investment of capital. The cost of gasoline, repairs, and upkeep of an automobile if used wholly in the business of farming is deductible as an expense; if used partly for business purposes and partly for the pleasure or convenience of the taxpayer or his family, such cost may be apportioned according to the extent of the use for purposes of business and pleasure or convenience, and only the proportion of such cost justly attributable to business purposes is deductible as a necessary expense.

(b) *Farms not engaged in for profit; taxable years beginning before January 1, 1970*—(1) *In general.* If a farm is operated for recreation or pleasure and not on a commercial basis, and if the expenses incurred in connection with the farm are in excess of the receipts therefrom, the entire receipts from the sale of farm products may be ignored in rendering a return of income, and the expenses incurred, being regarded as personal expenses, will not constitute allowable deductions.

(2) *Effective date.* The provisions of this paragraph shall apply with respect to taxable years beginning before January 1, 1970.

(3) *Cross reference.* For provisions relating to activities not engaged in for profit, applicable to taxable years beginning after December 31, 1969, see section 183 and the regulations thereunder.

[T.D. 7198, 37 FR 13679, July 13, 1972, as amended by T.D. 8729, 62 FR 44546, Aug. 22, 1997; T.D. 8897, 65 FR 50643, Aug. 21, 2000]

§ 1.162–13 Depositors' guaranty fund.

Banking corporations which pursuant to the laws of the State in which they are doing business are required to set apart, keep, and maintain in their banks the amount levied and assessed against them by the State authorities as a ''Depositors' guaranty fund,'' may deduct from their gross income the amount so set apart each year to this fund provided that such fund, when set aside and carried to the credit of the State banking board or duly authorized State officer, ceases to be an asset of the bank and may be withdrawn in whole or in part upon demand by such board or State officer to meet the needs of these officers in reimbursing depositors in insolvent banks, and provided further that no portion of the amount thus set aside and credited is returnable under the laws of the State to the assets of the banking corporation. If, however, such amount is simply set up on the books of the bank as a reserve to meet a contingent liability and remains an asset of the bank, it will not be deductible except as it is actually paid out as required by law and upon demand of the proper State officers.

§ 1.162–14 Expenditures for advertising or promotion of good will.

A corporation which has, for the purpose of computing its excess profits tax credit under Subchapter E, Chapter 2, or Subchapter D, Chapter 1 of the Internal Revenue Code of 1939, elected under section 733 or section 451 (applicable to the excess profits tax imposed by Subchapter E of Chapter 2, and Subchapter D of Chapter 1, respectively) to charge to capital account for taxable years in its base period expenditures for advertising or the promotion of good will which may be regarded as capital investments, may not deduct similar expenditures for the taxable year. See section 263(b). Such a taxpayer has the burden of proving that expenditures for advertising or the promotion of good will which it seeks to deduct in the taxable year may not be regarded as capital investments under the provisions of the regulations prescribed under section 733 or section 451 of the Internal Revenue Code of 1939. See 26 CFR, 1938 ed., 35.733–2 (Regulations 112) and 26 CFR (1939) 40.451–2 (Regulations 130). For the disallowance of deductions for the cost of advertising in programs of certain conventions of political parties, or in publications part of the proceeds of which directly or indirectly inures (or is intended to inure) to or for the use of a political party or political candidate, see § 1.276–1.

[T.D. 6996, 34 FR 835, Jan. 18, 1969]

§ 1.162–15 Contributions, dues, etc.

(a) *Contributions to organizations described in section 170*—(1) *In general.* No deduction is allowable under section 162(a) for a contribution or gift by an individual or a corporation if any part thereof is deductible under section 170. For example, if a taxpayer makes a contribution of $5,000 and only $4,000 of this amount is deductible under section 170(a) (whether because of the percentage limitation under either section 170(b) (1) or (2), the requirement as to time of payment, or both) no deduction is allowable under section 162(a) for the remaining $1,000.

(2) *Scope of limitations.* The limitations provided in section 162(b) and this paragraph apply only to payments

which are in fact contributions or gifts to organizations described in section 170. For example, payments by a transit company to a local hospital (which is a charitable organization within the meaning of section 170) in consideration of a binding obligation on the part of the hospital to provide hospital services and facilities for the company's employees are not contributions or gifts within the meaning of section 170 and may be deductible under section 162(a) if the requirements of section 162(a) are otherwise satisfied.

(b) *Other contributions.* Donations to organizations other than those described in section 170 which bear a direct relationship to the taxpayer's business and are made with a reasonable expectation of a financial return commensurate with the amount of the donation may constitute allowable deductions as business expenses, provided the donation is not made for a purpose for which a deduction is not allowable by reason of the provisions of paragraph (b)(1)(i) or (c) of § 1.162–20. For example, a transit company may donate a sum of money to an organization (of a class not referred to in section 170) intending to hold a convention in the city in which it operates, with a reasonable expectation that the holding of such convention will augment its income through a greater number of people using its transportation facilities.

(c) *Dues.* Dues and other payments to an organization, such as a labor union or a trade association, which otherwise meet the requirements of the regulations under section 162, are deductible in full. For limitations on the deductibility of dues and other payments, see paragraph (b) and (c) of § 1.162–20.

(d) *Cross reference.* For provisions dealing with expenditures for institutional or ''good will'' advertising, see § 1.162–20.

[T.D. 6819, 30 FR 5580, Apr. 20, 1965]

§ 1.162–16 Cross reference.

For special rules relating to expenses in connection with subdividing real property for sale, see section 1237 and the regulations thereunder.

§ 1.162–17 Reporting and substantiation of certain business expenses of employees.

(a) *Introductory.* The purpose of the regulations in this section is to provide rules for the reporting of information on income tax returns by taxpayers who pay or incur ordinary and necessary business expenses in connection with the performance of services as an employee and to furnish guidance as to the type of records which will be useful in compiling such information and in its substantiation, if required. The rules prescribed in this section do not apply to expenses paid or incurred for incidentals, such as office supplies for the employer or local transportation in connection with an errand. Employees incurring such incidental expenses are not required to provide substantiation for such amounts. The term ''ordinary and necessary business expenses'' means only those expenses which are ordinary and necessary in the conduct of the taxpayer's business and are directly attributable to such business. The term does not include nondeductible personal, living or family expenses.

(b) *Expenses for which the employee is required to account to his employer*—(1) *Reimbursements equal to expenses.* The employee need not report on his tax return (either itemized or in total amount) expenses for travel, transportation, entertainment, and similar purposes paid or incurred by him solely for the benefit of his employer for which he is required to account and does account to his employer and which are charged directly or indirectly to the employer (for example, through credit cards) or for which the employee is paid through advances, reimbursements, or otherwise, provided the total amount of such advances, reimbursements, and charges is equal to such expenses. In such a case the taxpayer need only state in his return that the total of amounts charged directly or indirectly to his employer through credit cards or otherwise and received from the employer as advances or reimbursements did not exceed the ordinary and necessary business expenses paid or incurred by the employee.

(2) *Reimbursements in excess of expenses.* In case the total of amounts

charged directly or indirectly to the employer and received from the employer as advances, reimbursements, or otherwise, exceeds the ordinary and necessary business expenses paid or incurred by the employee and the employee is required to and does account to his employer for such expenses, the taxpayer must include such excess in income and state on his return that he has done so.

(3) *Expenses in excess of reimbursements.* If the employee's ordinary and necessary business expenses exceed the total of the amounts charged directly or indirectly to the employer and received from the employer as advances, reimbursements, or otherwise, and the employee is required to and does account to his employer for such expenses, the taxpayer may make the statement in his return required by subparagraph (1) of this paragraph unless he wishes to claim a deduction for such excess. If, however, he wishes to secure a deduction for such excess, he must submit a statement showing the following information as part of his tax return:

(i) The total of any charges paid or borne by the employer and of any other amounts received from the employer for payment of expenses whether by means of advances, reimbursements or otherwise; and

(ii) The nature of his occupation, the number of days away from home on business, and the total amount of ordinary and necessary business expenses paid or incurred by him (including those charged directly or indirectly to the employer through credit cards or otherwise) broken down into such broad categories as transportation, meals and lodging while away from home overnight, entertainment expenses, and other business expenses.

(4) To "account" to his employer as used in this section means to submit an expense account or other required written statement to the employer showing the business nature and the amount of all the employee's expenses (including those charged directly or indirectly to the employer through credit cards or otherwise) broken down into such broad categories as transportation, meals and lodging while away from home overnight, entertainment expenses, and other business expenses. For this purpose, the Commissioner in his discretion may approve reasonable business practices under which mileage, per diem in lieu of subsistence, and similar allowances providing for ordinary and necessary business expenses in accordance with a fixed scale may be regarded as equivalent to an accounting to the employer.

(c) *Expenses for which the employee is not required to account to his employer.* If the employee is not required to account to his employer for his ordinary and necessary business expenses, e.g., travel, transportation, entertainment, and similar items, or, though required, fails to account for such expenses, he must submit, as a part of his tax return, a statement showing the following information:

(1) The total of all amounts received as advances or reimbursements from his employer in connection with the ordinary and necessary business expenses of the employee, including amounts charged directly or indirectly to the employer through credit cards or otherwise; and

(2) The nature of his occupation, the number of days away from home on business, and the total amount of ordinary and necessary business expenses paid or incurred by him (including those charged directly or indirectly to the employer through credit cards or otherwise) broken down into such broad categories as transportation, meals and lodging while away from home overnight, entertainment expenses, and other business expenses.

(d) *Substantiation of items of expense.* (1) Although the Commissioner may require any taxpayer to substantiate such information concerning expense accounts as may appear to be pertinent in determining tax liability, taxpayers ordinarily will not be called upon to substantiate expense account information except those in the following categories:

(i) A taxpayer who is not required to account to his employer, or who does not account;

(ii) A taxpayer whose expenses exceed the total of amounts charged to his employer and amounts received through advances, reimbursements or otherwise and who claims a deduction on his return for such excess;

(iii) A taxpayer who is related to his employer within the meaning of section 267(b); and

(iv) Other taxpayers in cases where it is determined that the accounting procedures used by the employer for the reporting and substantiation of expenses by employees are not adequate.

(2) The Code contemplates that taxpayers keep such records as will be sufficient to enable the Commissioner to correctly determine income tax liability. Accordingly, it is to the advantage of taxpayers who may be called upon to substantiate expense account information to maintain as adequate and detailed records of travel, transportation, entertainment, and similar business expenses as practical since the burden of proof is upon the taxpayer to show that such expenses were not only paid or incurred but also that they constitute ordinary and necessary business expenses. One method for substantiating expenses incurred by an employee in connection with his employment is through the preparation of a daily diary or record of expenditures, maintained in sufficient detail to enable him to readily identify the amount and nature of any expenditure, and the preservation of supporting documents, especially in connection with large or exceptional expenditures. Nevertheless, it is recognized that by reason of the nature of certain expenses or the circumstances under which they are incurred, it is often difficult for an employee to maintain detailed records or to preserve supporting documents for all his expenses. Detailed records of small expenditures incurred in traveling or for transportation, as for example, tips, will not be required.

(3) Where records are incomplete or documentary proof is unavailable, it may be possible to establish the amount of the expenditures by approximations based upon reliable secondary sources of information and collateral evidence. For example, in connection with an item of traveling expense a taxpayer might establish that he was in a travel status a certain number of days but that it was impracticable for him to establish the details of all his various items of travel expense. In such a case rail fares or plane fares can usually be ascertained with exactness and automobile costs approximated on the basis of mileage covered. A reasonable approximation of meals and lodging might be based upon receipted hotel bills or upon average daily rates for such accommodations and meals prevailing in the particular community for comparable accommodations. Since detailed records of incidental items are not required, deductions for these items may be based upon a reasonable approximation. In cases where a taxpayer is called upon to substantiate expense account information, the burden is on the taxpayer to establish that the amounts claimed as a deduction are reasonably accurate and constitute ordinary and necessary business expenses paid or incurred by him in connection with his trade or business. In connection with the determination of factual matters of this type, due consideration will be given to the reasonableness of the stated expenditures for the claimed purposes in relation to the taxpayer's circumstances (such as his income and the nature of his occupation), to the reliability and accuracy of records in connection with other items more readily lending themselves to detailed recordkeeping, and to all of the facts and circumstances in the particular case.

(e) *Applicability.* (1) Except as provided in subparagraph (2) of this paragraph, the provisions of the regulations in this section are supplemental to existing regulations relating to information required to be submitted with income tax returns, and shall be applicable with respect to taxable years beginning after December 31, 1957, notwithstanding any existing regulation to the contrary.

(2) With respect to taxable years ending after December 31, 1962, but only in respect of periods after such date, the provisions of the regulations in this section are superseded by the regulations under section 274(d) to the extent inconsistent therewith. See § 1.274–5.

(3) For taxable years beginning on or after January 1, 1989, the provisions of

this section are superseded by the regulations under section 62(c) to the extent this section is inconsistent with those regulations. See § 1.62–2.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6630, 27 FR 12935, Dec. 29, 1962; T.D. 8276, 54 FR 51026, Dec. 12, 1989; T.D. 8324, 55 FR 51695, Dec. 17, 1990]

§ 1.162–18 Illegal bribes and kickbacks.

(a) *Illegal payments to government officials or employees*—(1) *In general.* No deduction shall be allowed under section 162(a) for any amount paid or incurred, directly or indirectly, to an official or employee of any government, or of any agency or other instrumentality of any government, if—

(i) In the case of a payment made to an official or employee of a government other than a foreign government described in subparagraph (3) (ii) or (iii) of this paragraph, the payment constitutes an illegal bribe or kickback, or

(ii) In the case of a payment made to an official or employee of a foreign government described in subparagraph (3) (ii) or (iii) of this paragraph, the making of the payment would be unlawful under the laws of the United States (if such laws were applicable to the payment and to the official or employee at the time the expenses were paid or incurred).

No deduction shall be allowed for an accrued expense if the eventual payment thereof would fall within the prohibition of this section. The place where the expenses are paid or incurred is immaterial. For purposes of subdivision (ii) of this subparagraph, lawfulness, or unlawfulness of the payment under the laws of the foreign country is immaterial.

(2) *Indirect payment.* For purposes of this paragraph, an indirect payment to an individual shall include any payment which inures to his benefit or promotes his interests, regardless of the medium in which the payment is made and regardless of the identity of the immediate recipient or payor. Thus, for example, payment made to an agent, relative, or independent contractor of an official or employee, or even directly into the general treasury of a foreign country of which the beneficiary is an official or employee, may be treated as an indirect payment to the official or employee, if in fact such payment inures or will inure to his benefit or promotes or will promote his financial or other interests. A payment made by an agent or independent contractor of the taxpayer which benefits the taxpayer shall be treated as an indirect payment by the taxpayer to the official or employee.

(3) *Official or employee of a government.* Any individual officially connected with—

(i) The Government of the United States, a State, a territory or possession of the United States, the District of Columbia, or the Commonwealth of Puerto Rico,

(ii) The government of a foreign country, or

(iii) A political subdivision of, or a corporation or other entity serving as an agency or instrumentality of, any of the above,

in whatever capacity, whether on a permanent or temporary basis, and whether or not serving for compensation, shall be included within the term ''official or employee of a government'', regardless of the place of residence or post of duty of such individual. An independent contractor would not ordinarily be considered to be an official or employee. For purposes of section 162(c) and this paragraph, the term ''foreign country'' shall include any foreign nation, whether or not such nation has been accorded diplomatic recognition by the United States. Individuals who purport to act on behalf of or as the government of a foreign nation, or an agency or instrumentality thereof, shall be treated under this section as officials or employees of a foreign government, whether or not such individuals in fact control such foreign nation, agency, or instrumentality, and whether or not such individuals are accorded diplomatic recognition. Accordingly, a group in rebellion against an established government shall be treated as officials or employees of a foreign government, as shall officials or employees of the government against which the group is in rebellion.

(4) *Laws of the United States.* The term ''laws of the United States'', to which reference is made in paragraph (a)(1)(ii)

of this section, shall be deemed to include only Federal statutes, including State laws which are assimilated into Federal law by Federal statute, and legislative and interpretative regulations thereunder. The term shall also be limited to statutes which prohibit some act or acts, for the violation of which there is a civil or criminal penalty.

(5) *Burden of proof.* In any proceeding involving the issue of whether, for purposes of section 162(c)(1), a payment made to a government official or employee constitutes an illegal bribe or kickback (or would be unlawful under the laws of the United States) the burden of proof in respect of such issue shall be upon the Commissioner to the same extent as he bears the burden of proof in civil fraud cases under section 7454 (*i.e.*, he must prove the illegality of the payment by clear and convincing evidence).

(6) *Example.* The application of this paragraph may be illustrated by the following example:

Example. X Corp. is in the business of selling hospital equipment in State Y. During 1970, X Corp. employed A who at the time was employed full time by State Y as Superintendent of Hospitals. The purpose of A's employment by X Corp. was to procure for it an improper advantage over other concerns in the making of sales to hospitals in respect of which A, as Superintendent, had authority. X Corp. paid A $5,000 during 1970. The making of this payment was illegal under the laws of State Y. Under section 162(c)(1), X Corp. is precluded from deducting as a trade or business expense the $5,000 paid to A.

(b) *Other illegal payments*—(1) *In general.* No deduction shall be allowed under section 162(a) for any payment (other than a payment described in paragraph (a) of this section) made, directly or indirectly, to any person, if the payment constitutes an illegal bribe, illegal kickback, or other illegal payment under the laws of the United States (as defined in paragraph (a)(4) of this section), or under any State law (but only if such State law is generally enforced), which subjects the payor to a criminal penalty or the loss (including a suspension) of license or privilege to engage in a trade or business (whether or not such penalty or loss is actually imposed upon the taxpayer). For purposes of this paragraph, a kickback includes a payment in consideration of the referral of a client, patient, or customer. This paragraph applies only to payments made after December 30, 1969.

(2) *State law.* For purposes of this paragraph, State law means a statute of a State or the District of Columbia.

(3) *Generally enforced.* For purposes of this paragraph, a State law shall be considered to be generally enforced unless it is never enforced or the only persons normally charged with violations thereof in the State (or the District of Columbia) enacting the law are infamous or those whose violations are extraordinarily flagrant. For example, a criminal statute of a State shall be considered to be generally enforced unless violations of the statute which are brought to the attention of appropriate enforcement authorities do not result in any enforcement action in the absence of unusual circumstances.

(4) *Burden of proof.* In any proceeding involving the issue of whether, for purposes of section 162(c)(2), a payment constitutes an illegal bribe, illegal kickback, or other illegal payment the burden of proof in respect of such issue shall be upon the Commissioner to the same extent as he bears the burden of proof in civil fraud cases under section 7454 (*i.e.*, he must prove the illegality of the payment by clear and convincing evidence).

(5) *Example.* The application of this paragraph may be illustrated by the following example:

Example. X Corp., a calendar-year taxpayer, is engaged in the ship repair business in State Y. During 1970, repairs on foreign ships accounted for a substantial part of its total business. It was X Corp.'s practice to kick back approximately 10 percent of the repair bill to the captain and chief engineer of all foreign-owned vessels, which kickbacks are illegal under a law of State Y (which is generally enforced) and potentially subject X Corp. to fines. During 1970, X Corp. paid $50,000 in such kickbacks. On X Corp.'s return for 1970, a deduction under section 162 was taken for the $50,000. The deduction of the $50,000 of illegal kickbacks during 1970 is disallowed under section 162(c)(2), whether or not X Corp. is prosecuted with respect to the kickbacks.

(c) *Kickbacks, rebates, and bribes under medicare and medicaid.* No deduction shall be allowed under section 162(a) for any kickback, rebate, or bribe (whether or not illegal) made on or after December 10, 1971, by any provider of services, supplier, physician, or other person who furnishes items or services for which payment is or may be made under the Social Security Act, as amended, or in whole or in part out of Federal funds under a State plan approved under such Act, if such kickback, rebate, or bribe is made in connection with the furnishing of such items or services or the making or receipt of such payments. For purposes of this paragraph, a kickback includes a payment in consideration of the referral of a client, patient, or customer.

[T.D. 7345, 40 FR 7437, Feb. 20, 1975; 40 FR 8948, Mar. 4, 1975]

§ 1.162–19 Capital contributions to Federal National Mortgage Association.

(a) *In general.* The initial holder of stock of the Federal National Mortgage Association (FNMA) which is issued pursuant to section 303(c) of the Federal National Mortgage Association Charter Act (12 U.S.C., section 1718) in a taxable year beginning after December 31, 1959, shall treat the excess, if any, of the issuance price (the amount of capital contributions evidenced by a share of stock) over the fair market value of the stock as of the issue date of such stock as an ordinary and necessary business expense paid or incurred during the year in which occurs the date of issuance of the stock. To the extent that a sale to FNMA of mortgage paper gives rise to the issuance of a share of FNMA stock during a taxable year beginning after December 31, 1959, such sale is to be treated in a manner consistent with the purpose for, and the legislative intent underlying the enactment of, the provisions of section 8, Act of September 14, 1960 (Pub. L. 86–779, 74 Stat. 1003). Thus, for the purpose of determining an initial holder's gain or loss from the sale to FNMA of mortgage paper, with respect to which a share of FNMA stock is issued in a taxable year beginning after December 31, 1959 (irrespective of when the sale is made), the amount realized by the initial holder from the sale of the mortgage paper is the amount of the ''FNMA purchase price''. The ''FNMA purchase price'' is the gross amount of the consideration agreed upon between FNMA and the initial holder for the purchase of the mortgage paper, without regard to any deduction therefrom as, for example, a deduction representing a capital contribution or a purchase or marketing fee. The date of issuance of the stock is the date which appears on the stock certificates of the initial holder as the date of issue. The initial holder is the original purchaser who is issued stock of the Federal National Mortgage Association pursuant to section 303(c) of the Act, and who appears on the books of FNMA as the initial holder. In determining the period for which the initial holder has held such stock, such period shall begin with the date of issuance.

(b) *Examples.* The provisions of paragraph (a) of this section may be illustrated by the following examples:

Example 1. A, a banking institution which reports its income on a calendar year basis, sold mortgage paper with an outstanding principal balance of $12,500 to FNMA on October 17, 1960. The FNMA purchase price was $11,500. A's basis for the mortgage paper was $10,500. In accordance with the terms of the contract, FNMA deducted $375 ($250 representing capital contribution and $125 representing purchase and marketing fee) from the amount of the purchase price. FNMA credited A's account with the amount of the capital contribution. A stock certificate evidencing two shares of FNMA common stock of $100 par value was mailed to A and FNMA deducted $200 from A's account, leaving a net balance of $50 in such account. The stock certificate, bearing an issue date of November 1, 1960, was received by A on November 7, 1960. The fair market value of a share of FNMA stock on October 17, 1960, was $65, on November 1, 1960, was $67, and on November 7, 1960, was $68. A may deduct $66 the difference between the issuance price ($200) and the fair market value ($134) of the two shares of stock on the date of issuance (November 1, 1960), as a business expense for the taxable year 1960. The basis of each share of stock issued as of November 1, 1960 will be $67. See section 1054 and § 1.1054–1. A's gain from the sale of the mortgage paper is $875 computed as follows:

Amount realized in FNMA purchase price		$11,500
A's basis in mortgage paper	$10,500	
Purchase and marketing fee	125	
		10,625
Gain on sale		875

Example 2. Assume the same facts as in Example (1), and, in addition, that A sold to FNMA on December 15, 1960, additional mortgage paper having an outstanding principal balance of $12,500. FNMA deducted from the FNMA purchase price $250 representing capital contribution and credited A's account with this amount. A then had a total credit of $300 to his account consisting of the $50 balance from the transaction described in Example (1) and $250 from the December 15th transaction. A stock certificate evidencing three shares of FNMA common stock of $100 par value was mailed to A and FNMA deducted $300 from A's account. The stock certificate, bearing an issue date of January 1, 1961, was received by A on January 9, 1961. The fair market value of a share of FNMA stock on January 1, 1961, was $69. A may deduct $93, the difference between the issuance price ($300) and the fair market value ($207) of the three shares of stock on the date of issuance (January 1, 1961), as a business expense for the taxable year 1961. The gain or loss on the sale of mortgage paper on December 15, 1960, is reportable for the taxable year 1960.

[T.D. 6690, 28 FR 12253, Nov. 19, 1963]

§ 1.162–20 Expenditures attributable to lobbying, political campaigns, attempts to influence legislation, etc., and certain advertising.

(a) *In general*—(1) *Scope of section.* This section contains rules governing the deductibility or nondeductibility of expenditures for lobbying purposes, for the promotion or defeat of legislation, for political campaign purposes (including the support of or opposition to any candidate for public office) or for carrying on propaganda (including advertising) related to any of the foregoing purposes. For rules applicable to such expenditures in respect of taxable years beginning before January 1, 1963, and for taxable years beginning after December 31, 1962, see paragraphs (b) and (c), respectively, of this section. This section also deals with expenditures for institutional or ''good will'' advertising.

(2) *Institutional or ''good will'' advertising.* Expenditures for institutional or ''good will'' advertising which keeps the taxpayer's name before the public are generally deductible as ordinary and necessary business expenses provided the expenditures are related to the patronage the taxpayer might reasonably expect in the future. For example, a deduction will ordinarily be allowed for the cost of advertising which keeps the taxpayer's name before the public in connection with encouraging contributions to such organizations as the Red Cross, the purchase of United States Savings Bonds, or participation in similar causes. In like fashion, expenditures for advertising which presents views on economic, financial, social, or other subjects of a general nature, but which does not involve any of the activities specified in paragraph (b) or (c) of this section for which a deduction is not allowable, are deductible if they otherwise meet the requirements of the regulations under section 162.

(b) *Taxable years beginning before January 1, 1963*—(1) *In general.* (i) For taxable years beginning before January 1, 1963, expenditures for lobbying purposes, for the promotion or defeat of legislation, for political campaign purposes (including the support of or opposition to any candidate for public office), or for carrying on propaganda (including advertising) related to any of the foregoing purposes are not deductible from gross income. For example, the cost of advertising to promote or defeat legislation or to influence the public with respect to the desirability or undesirability of proposed legislation is not deductible as a business expense, even though the legislation may directly affect the taxpayer's business.

(ii) If a substantial part of the activities of an organization, such as a labor union or a trade association, consists of one or more of the activities specified in the first sentence of this subparagraph, deduction will be allowed only for such portion of the dues or other payments to the organization as the taxpayer can clearly establish is attributable to activities other than those so specified. The determination of whether such specified activities constitute a substantial part of an organization's activities shall be based on all the facts and circumstances. In no event shall special assessments or similar payments (including an increase in dues) made to any organization for any of such specified purposes be deductible. For other provisions relating to the deductibility of dues and other payments to an organization, such as a labor union or a trade association, see paragraph (c) of § 1.162–15.

(2) *Expenditures for promotion or defeat of legislation.* For purposes of this paragraph, expenditures for the promotion or the defeat of legislation include, but shall not be limited to, expenditures for the purpose of attempting to—

(i) Influence members of a legislative body directly, or indirectly by urging or encouraging the public to contact such members for the purpose of proposing, supporting, or opposing legislation, or

(ii) Influence the public to approve or reject a measure in a referendum, initiative, vote on a constitutional amendment, or similar procedure.

(c) *Taxable years beginning after December 31, 1962*—(1) *In general.* For taxable years beginning after December 31, 1962, certain types of expenses incurred with respect to legislative matters are deductible under section 162(a) if they otherwise meet the requirements of the regulations under section 162. These deductible expenses are described in subparagraph (2) of this paragraph. All other expenditures for lobbying purposes, for the promotion or defeat of legislation (see paragraph (b)(2) of this section), for political campaign purposes (including the support of or opposition to any candidate for public office), or for carrying on propaganda (including advertising) relating to any of the foregoing purposes are not deductible from gross income for such taxable years. For the disallowance of deductions for bad debts and worthless securities of a political party, see §1.271–1. For the disallowance of deductions for certain indirect political contributions, such as the cost of certain advertising and the cost of admission to certain dinners, programs, and inaugural events, see §1.276–1.

(2) *Appearances, etc., with respect to legislation*—(i) *General rule.* Pursuant to the provisions of section 162(e), expenses incurred with respect to legislative matters which may be deductible are those ordinary and necessary expenses (including, but not limited to, traveling expenses described in section 162(a)(2) and the cost of preparing testimony) paid or incurred by the taxpayer during a taxable year beginning after December 31, 1962, in carrying on any trade or business which are in direct connection with—

(*a*) Appearances before, submission of statements to, or sending communications to, the committees, or individual members of Congress or of any legislative body of a State, a possession of the United States, or a political subdivision of any of the foregoing with respect to legislation or proposed legislation of direct interest to the taxpayer, or

(*b*) Communication of information between the taxpayer and an organization of which he is a member with respect to legislation or proposed legislation of direct interest to the taxpayer and to such organization.

For provisions relating to dues paid or incurred with respect to an organization of which the taxpayer is a member, see subparagraph (3) of this paragraph.

(ii) *Legislation or proposed legislation of direct interest to the taxpayer—(a) Legislation or proposed legislation.* The term ''legislation or proposed legislation'' includes bills and resolutions introduced by a member of Congress or other legislative body referred to in subdivision (i)(*a*) of this subparagraph for consideration by such body as well as oral or written proposals for legislative action submitted to the legislative body or to a committee or member of such body.

(*b*) *Direct interest*—(*1*) *In general.* (*i*) Legislation or proposed legislation is of direct interest to a taxpayer if the legislation or proposed legislation is of such a nature that it will, or may reasonably be expected to, affect the trade or business of the taxpayer. It is immaterial whether the effect, or expected effect, on the trade or business will be beneficial or detrimental to the trade or business or whether it will be immediate. If legislation or proposed legislation has such a relationship to a trade or business that the expenses of any appearance or communication in connection with the legislation meets the ordinary and necessary test of section 162(a), then such legislation ordinarily meets the direct interest test of section 162(e). However, if the nature of the legislation or proposed legislation is such that the likelihood of its having an effect on the trade or business of the taxpayer is remote or speculative, the legislation or proposed legislation is not of direct interest to the taxpayer. Legislation or proposed legislation which will not affect the trade or business of the taxpayer is not of direct interest to the taxpayer even though such legislation will affect the personal, living, or family activities or expenses of the taxpayer. Legislation or proposed legislation is not of direct interest to a taxpayer merely because it may affect business in general; however, if the legislation or proposed legislation will, or may reasonably be expected to, affect the taxpayer's trade or business it will be of direct interest to the taxpayer even though it also will affect the trade or business of other taxpayers or business in general. To meet the direct interest test, it is not necessary that all provisions of the legislation or proposed legislation have an effect, or expected effect, on the taxpayer's trade or business. The test will be met if one of the provisions of the legislation has the specified effect. Legislation or proposed legislation will be considered to be of direct interest to a membership organization if it is of direct interest to the organization, as such, or if it is of direct interest to one or more of its members.

(*ii*) Legislation which would increase or decrease the taxes applicable to the trade or business, increase or decrease the operating costs or earnings of the trade or business, or increase or decrease the administrative burdens connected with the trade or business meets the direct interest test. Legislation which would increase the social security benefits or liberalize the right to such benefits meets the direct interest test because such changes in the social security benefits may reasonably be expected to affect the retirement benefits which the employer will be asked to provide his employees or to increase his taxes. Legislation which would impose a retailer's sales tax is of direct interest to a retailer because, although the tax may be passed on to his customers, collection of the tax will impose additional burdens on the retailer, and because the increased cost of his products to the consumer may reduce the demand for them. Legislation which would provide an income tax credit or exclusion for shareholders is of direct interest to a corporation, because those tax benefits may increase the sources of capital available to the corporation. Legislation which would favorably or adversely affect the business of a competitor so as to affect the taxpayer's competitive position is of direct interest to the taxpayer. Legislation which would improve the school system of a community is of direct interest to a membership organization comprised of employers in the community because the improved school system is likely to make the community more attractive to prospective employees of such employers. On the other hand, proposed legislation relating to Presidential succession in the event of the death of the President has only a remote and speculative effect on any trade or business and therefore does not meet the direct interest test. Similarly, if a corporation is represented before a congressional committee to oppose an appropriation bill merely because of a desire to bring increased Government economy with the hope that such economy will eventually cause a reduction in the Federal income tax, the legislation does not meet the direct interest test because any effect it may have upon the corporation's trade or business is highly speculative.

(*2*) *Appearances, etc., by expert witnesses.* (*i*) An appearance or communication (of a type described in paragraph (c)(2)(i)(*a*) of this section) by an individual in connection with legislation or proposed legislation shall be considered to be with respect to legislation of direct interest to such individual if the legislation is in a field in which he specializes as an employee, if the appearance or communication is not on behalf of his employer, and if it is customary for individuals in his type of employment to publicly express their views in respect of matters in their field of competence. Expenses incurred by such an individual in connection with such an appearance of communication, including traveling expenses properly allocable thereto, represent ordinary and necessary business expenses and are, therefore, deductible under section 162. For example, if a university professor who teaches in the field of money and banking appears, on his own behalf, before a legislative committee to testify on proposed legislation regarding the banking system, his expenses incurred in connection with such appearance are deductible under section 162 since university professors customarily take an active part in the development of the law in their field of competence and publicly communicate the results of their work.

(*ii*) An appearance or communication (of a type described in paragraph (c)(2)(i)(*a*) of this section) by an employee or self-employed individual in connection with legislation or proposed legislation shall be considered to be with respect to legislation of direct interest to such person if the legislation is in the field in which he specializes in his business (or as an employee) and if the appearance or communication is made pursuant to an invitation extended to him individually for the purpose of receiving his expert testimony. Expenses incurred by an employee or self-employed individual in connection with such an appearance or communication, including traveling expenses properly allocable thereto, represent ordinary and necessary business expenses and are, therefore, deductible under section 162. For example, if a self-employed individual is personally invited by a congressional committee to testify on proposed legislation in the field in which he specializes in his business, his expenses incurred in connection with such appearance are deductible under section 162. If a self-employed individual makes an appearance, on his own behalf, before a legislative committee without having been extended an invitation his expenses will be deductible to the extent otherwise provided in this paragraph.

(*3) Nominations, etc.* A taxpayer does not have a direct interest in matters such as nominations, appointments, or the operation of the legislative body.

(iii) *Allowable expenses.* To be deductible under section 162(a), expenditures which meet the tests of deductibility under the provisions of this paragraph must also qualify as ordinary and necessary business expenses under section 162(a) and, in addition, be in direct connection with the carrying on of the activities specified in subdivision (i)(*a*) or (i)(*b*) of this subparagraph. For example, a taxpayer appearing before a committee of the Congress to present testimony concerning legislation or proposed legislation in which he has a direct interest may deduct the ordinary and necessary expenses directly connected with his appearance, such as traveling expenses described in section 162(a)(2), and the cost of preparing testimony.

(3) *Deductibility of dues and other payments to an organization.* If a substantial part of the activities of an organization, such as a labor union or a trade association, consists of one or more of the activities to which this paragraph relates (legislative matters, political campaigns, etc.), exclusive of any activity constituting an appearance or communication with respect to legislation or proposed legislation of direct interest to the organization (see subparagraph (c)(2)(ii)(*b*)(*1*)), a deduction will be allowed only for such portion of the dues or other payments to the organization as the taxpayer can clearly establish is attributable to activities to which this paragraph does not relate and to any activity constituting an appearance or communication with respect to legislation or proposed legislation of direct interest to the organization. The determination of whether a substantial part of an organization's activities consists of one or more of the activities to which this paragraph relates (exclusive of appearances or communications with respect to legislation or proposed legislation of direct interest to the organization) shall be based on all the facts and circumstances. In no event shall a deduction be allowed for that portion of a special assessment or similar payment (including an increase in dues) made to any organization for any activity to which this paragraph relates if the activity does not constitute an appearance or communication with respect to legislation or proposed legislation of direct interest to the organization. If an organization pays or incurs expenses allocable to legislative activities which meet the tests of subdivisions (i) and (ii) of subparagraph (2) of this paragraph (appearances or communications with respect to legislation or proposed legislation of direct interest to the organization), on behalf of its members, the dues paid by a taxpayer are deductible

to the extent used for such activities. Dues paid by a taxpayer will be considered to be used for such an activity, and thus deductible, although the legislation or proposed legislation involved is not of direct interest to the taxpayer, if, pursuant to the provisions of subparagraph (2)(ii)(*b*)(*1*) of this paragraph, the legislation or proposed legislation is of direct interest to the organization, as such, or is of direct interest to one or more members of the organization. For other provisions relating to the deductibility of dues and other payments to an organization, such as a labor union or a trade association, see paragraph (c) of § 1.162–15.

(4) *Limitations.* No deduction shall be allowed under section 162(a) for any amount paid or incurred (whether by way of contribution, gift, or otherwise) in connection with any attempt to influence the general public, or segments thereof, with respect to legislative matters, elections, or referendums. For example, no deduction shall be allowed for any expenses incurred in connection with ''grassroot'' campaigns or any other attempts to urge or encourage the public to contact members of a legislative body for the purpose of proposing, supporting, or opposing legislation.

(5) *Expenses paid or incurred after December 31, 1993, in connection with influencing legislation other than certain local legislation.* The provisions of paragraphs (c)(1) through (3) of this section are superseded for expenses paid or incurred after December 31, 1993, in connection with influencing legislation (other than certain local legislation) to the extent inconsistent with section 162(e)(1)(A) (as limited by section 162(e)(2)) and §§ 1.162–20(d) and 1.162–29.

(d) *Dues allocable to expenditures after 1993.* No deduction is allowed under section 162(a) for the portion of dues or other similar amounts paid by the taxpayer to an organization exempt from tax (other than an organization described in section 501(c)(3)) which the organization notifies the taxpayer under section 6033(e)(1)(A)(ii) is allocable to expenditures to which section 162(e)(1) applies. The first sentence of this paragraph (d) applies to dues or other similar amounts whether or not paid on or before December 31, 1993. Section 1.162–20(c)(3) is superseded to the extent inconsistent with this paragraph (d).

[T.D. 6819, 30 FR 5581, Apr. 20, 1965, as amended by T.D. 6996, 34 FR 835, Jan. 18, 1969; T.D. 8602, 60 FR 37573, July 21, 1995]

§ 1.162–21 Fines and penalties.

(a) *In general.* No deduction shall be allowed under section 162(a) for any fine or similar penalty paid to—

(1) The government of the United States, a State, a territory or possession of the United States, the District of Columbia, or the Commonwealth of Puerto Rico;

(2) The government of a foreign country; or

(3) A political subdivision of, or corporation or other entity serving as an agency or instrumentality of, any of the above.

(b) *Definition.* (1) For purposes of this section a fine or similar penalty includes an amount—

(i) Paid pursuant to conviction or a plea of guilty or *nolo contendere* for a crime (felony or misdemeanor) in a criminal proceeding;

(ii) Paid as a civil penalty imposed by Federal, State, or local law, including additions to tax and additional amounts and assessable penalties imposed by chapter 68 of the Internal Revenue Code of 1954;

(iii) Paid in settlement of the taxpayer's actual or potential liability for a fine or penalty (civil or criminal); or

(iv) Forfeited as collateral posted in connection with a proceeding which could result in imposition of such a fine or penalty.

(2) The amount of a fine or penalty does not include legal fees and related expenses paid or incurred in the defense of a prosecution or civil action arising from a violation of the law imposing the fine or civil penalty, nor court costs assessed against the taxpayer, or stenographic and printing charges. Compensatory damages (including damages under section 4A of the Clayton Act (15 U.S.C. 15a), as amended) paid to a government do not constitute a fine or penalty.

(c) *Examples.* The application of this section may be illustrated by the following examples:

Example 1. M Corp. was indicted under section 1 of the Sherman Anti-Trust Act (15 U.S.C. 1) for fixing and maintaining prices of certain electrical products. M Corp. was convicted and was fined $50,000. The United States sued M Corp. under section 4A of the Clayton Act (15 U.S.C. 15a) for $100,000, the amount of the actual damages resulting from the price fixing of which M Corp. was convicted. Pursuant to a final judgment entered in the civil action. M Corp. paid the United States $100,000 in damages. Section 162(f) precludes M Corp. from deducting the fine of $50,000 as a trade or business expense. Section 162(f) does not preclude it from deducting the $100,000 paid to the United States as actual damages.

Example 2. N Corp. was found to have violated 33 U.S.C. 1321(b)(3) when a vessel it operated discharged oil in harmful quantities into the navigable waters of the United States. A civil penalty under 33 U.S.C. 1321(b)(6) of $5,000 was assessed against N Corp. with respect to the discharge. N Corp. paid $5,000 to the Coast Guard in payment of the civil penalty. Section 162(f) precludes N Corp. from deducting the $5,000 penalty.

Example 3. O Corp., a manufacturer of motor vehicles, was found to have violated 42 U.S.C. 1857f–2(a)(1) by selling a new motor vehicle which was not covered by the required certificate of conformity. Pursuant to 42 U.S.C. 1857f–4, O Corp. was required to pay, and did pay, a civil penalty of $10,000. In addition, pursuant to 42 U.S.C. 1857f–5a(c)(1), O Corp. was required to expend, and did expend, $500 in order to remedy the nonconformity of that motor vehicle. Section 162(f) precludes O Corp. from deducting the $10,000 penalty as a trade or business expense, but does not preclude it from deducting the $500 which it expended to remedy the nonconformity.

Example 4. P Corp. was the operator of a coal mine in which occurred a violation of a mandatory safety standard prescribed by the Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. 801 *et seq.*). Pursuant to 30 U.S.C. 819(a), a civil penalty of $10,000 was assessed against P Corp., and P Corp. paid the penalty. Section 162(f) precludes P Corp. from deducting the $10,000 penalty.

Example 5. Q Corp., a common carrier engaged in interstate commerce by railroad, hauled a railroad car which was not equipped with efficient hand brakes, in violation of 45 U.S.C. 11. Q Corp. was found to be liable for a penalty of $250 pursuant to 45 U.S.C. 13. Q Corp. paid that penalty. Section 162(f) precludes Q Corp. from deducting the $250 penalty.

Example 6. R Corp. owned and operated on the highways of State X a truck weighing in excess of the amount permitted under the law of State X. R Corp. was found to have violated the law and was assessed a fine of $85 which it paid to State X. Section 162(f) precludes R Corp. from deducting the amount so paid.

Example 7. S Corp. was found to have violated a law of State Y which prohibited the emission into the air of particulate matter in excess of a limit set forth in a regulation promulgated under that law. The Environmental Quality Hearing Board of State Y assessed a fine of $500 against S Corp. The fine was payable to State Y, and S Corp. paid it. Section 162(f) precludes S Corp. from deducting the $500 fine.

Example 8. T Corp. was found by a magistrate of City Z to be operating in such city an apartment building which did not conform to a provision of the city housing code requiring operable fire escapes on apartment buildings of that type. Upon the basis of the magistrate's finding, T Corp. was required to pay, and did pay, a fine of $200 to City Z. Section 162(f) precludes T Corp. from deducting the $200 fine.

[T.D. 7345, 40 FR 7437, Feb. 20, 1975; 40 FR 8948, Mar. 4, 1975, as amended by T.D. 7366, 40 FR 29290, July 11, 1975]

§ 1.162–22 Treble damage payments under the antitrust laws.

(a) *In general.* In the case of a taxpayer who after December 31, 1969, either is convicted in a criminal action of a violation of the Federal antitrust laws or enters a plea of guilty or *nolo contendere* to an indictment or information charging such a violation, and whose conviction or plea does not occur in a new trial following an appeal of a conviction on or before such date, no deduction shall be allowed under section 162(a) for two-thirds of any amount paid or incurred after December 31, 1969, with respect to—

(1) Any judgment for damages entered against the taxpayer under section 4 of the Clayton Act (15 U.S.C. 15), as amended, on account of such violation or any related violation of the Federal antitrust laws, provided such related violation occurred prior to the date of the final judgment of such conviction, or

(2) Settlement of any action brought under such section 4 on account of such violation or related violation.

For the purposes of this section, where a civil judgment has been entered or a settlement made with respect to a violation of the antitrust laws and a criminal proceeding is based upon the same violation, the criminal proceeding need not have been brought prior to the civil judgment or settlement. If, in his return for any taxable year, a taxpayer claims a deduction for an amount paid or incurred with respect to a judgment or settlement described in the first sentence of this paragraph and is subsequently convicted of a violation of the antitrust laws which makes a portion of such amount unallowable, then the taxpayer shall file an amended return for such taxable year on which the amount of the deduction is appropriately reduced. Attorney's fees, court costs, and other amounts paid or incurred in connection with a controversy under such section 4 which meet the requirements of section 162 are deductible under that section. For purposes of subparagraph (2) of this paragraph, the amount paid or incurred in settlement shall not include amounts attributable to the plaintiff's costs of suit and attorney's fees, to the extent that such costs or fees have actually been paid.

(b) *Conviction.* For purposes of paragraph (a) of this section, a taxpayer is convicted of a violation of the antitrust laws if a judgment of conviction (whether or not a final judgment) with respect to such violation has been entered against him, provided a subsequent final judgment of acquittal has not been entered or criminal prosecution with respect to such violation terminated without a final judgment of conviction. During the pendency of an appeal or other action directly contesting a judgment of conviction, the taxpayer should file a protective claim for credit or refund to avoid being barred by the period of limitations on credit or refund under section 6511.

(c) *Related violation.* For purposes of this section, a violation of the Federal antitrust laws is related to a subsequent violation if (1) with respect to the subsequent violation the United States obtains both a judgment in a criminal proceeding and an injunction against the taxpayer, and (2) the taxpayer's actions which constituted the prior violation would have contravened such injunction if such injunction were applicable at the time of the prior violation.

(d) *Settlement following a dismissal of an action or amendment of the complaint.* For purposes of paragraph (a)(2) of this section, an amount may be considered as paid in settlement of an action even though the action is dismissed or otherwise disposed of prior to such settlement or the complaint is amended to eliminate the claim with respect to the violation or related violation.

(e) *Antitrust laws.* The term ''antitrust laws'' as used in section 162(g) and this section shall include the Federal acts enumerated in paragraph (1) of section 1 of the Clayton Act (15 U.S.C. 12), as amended.

(f) *Examples.* The application of this section may be illustrated by the following examples:

Example 1. In 1970, the United States instituted a criminal prosecution against X Co., Y Co., A, the president of X Co., and B, the president of Y Co., under section 1 of the Sherman Anti-Trust Act, 15 U.S.C. 1. In the indictment, the defendants were charged with conspiring to fix and maintain prices of electrical transformers from 1965 to 1970. All defendants entered pleas of nolo contendere to these charges. These pleas were accepted and judgments of conviction entered. In a companion civil suit, the United States obtained an injunction prohibiting the defendants from conspiring to fix and maintain prices in the electrical transformer market. Thereafter, Z Co. sued X Co. and Y Co. for $300,000 in treble damages under section 4 of the Clayton Act. Z Co.'s complaint alleged that the criminal conspiracy between X Co. and Y Co. forced Z Co. to pay excessive prices for electrical transformers. X Co. and Y Co. each paid Z Co. $85,000 in full settlement of Z Co.'s action. Of each $85,000 paid, $10,000 was attributable to court costs and attorney's fees actually paid by Z Co. Under section 162(g), X Co. and Y Co. are each precluded from deducting as a trade or business expense more than $35,000 of the $85,000 paid to Z Co. in settlement—

$\$10,000+[(\$85,000-\$10,000)\div 3]$

Example 2. Assume the same facts as in example (1) except that Z Co.'s claim for treble damages was based on a conspiracy to fix and maintain prices in the sale of electrical transformers during 1963. Although the criminal prosecution of the defendants did not involve 1963 (a year barred by the applicable criminal statute of limitations when the prosecution was instituted), Z Co.'s pleadings alleged that the civil statute of limitations had been tolled by the defendants' fraudulent concealment of their conspiracy. Since the United States has obtained both a judgment in a criminal proceeding and an injunction against the defendants in connection with their activities from 1965 to 1970, and the alleged actions of the defendants in 1963 would have contravened such injunction if it were applicable in 1963, the alleged violation in 1963 is related to the violation from 1965 to 1970. Accordingly, the tax consequences to X Co. and Y Co. of the payments of $85,000 in settlement of Z Co.'s claim against X Co. and Y Co. are the same as in example (1).

Example 3. Assume the same facts as in example (1) except that Z Co.'s claim for treble damages was based on a conspiracy to fix and maintain prices with respect to electrical insulators for high-tension power poles. Since the civil action was not based on the same violation of the Federal antitrust laws as the criminal action, or on a related violation (a violation which would have contravened the injunction if it were applicable), X Co. and Y Co. are not precluded by section 162(g) from deducting as a trade or business expense the entire $85,000 paid by each in settlement of the civil action.

[T.D. 7217, 37 FR 23916, Nov. 10, 1972]

§ 1.162–24 Travel expenses of state legislators.

(a) *In general.* For purposes of section 162(a), in the case of any taxpayer who is a state legislator at any time during the taxable year and who makes an election under section 162(h) for the taxable year—

(1) The taxpayer's place of residence within the legislative district represented by the taxpayer is the taxpayer's home for that taxable year;

(2) The taxpayer is deemed to have expended for living expenses (in connection with the taxpayer's trade or business as a legislator) an amount determined by multiplying the number of legislative days of the taxpayer during the taxable year by the greater of—

(i) The amount generally allowable with respect to those days to employees of the state of which the taxpayer is a legislator for per diem while away from home, to the extent the amount does not exceed 110 percent of the amount described in paragraph (a)(2)(ii) of this section; or

(ii) The Federal per diem with respect to those days for the taxpayer's state capital; and

(3) The taxpayer is deemed to be away from home in the pursuit of a trade or business on each legislative day.

(b) *Legislative day.* For purposes of section 162(h)(1) and this section, for any taxpayer who makes an election under section 162(h), a legislative day is any day on which the taxpayer is a state legislator and—

(1) The legislature is in session;

(2) The legislature is not in session for a period that is not longer than 4 consecutive days, without extension for Saturdays, Sundays, or holidays;

(3) The taxpayer's attendance at a meeting of a committee of the legislature is formally recorded; or

(4) The taxpayer's attendance at any session of the legislature that only a limited number of members are expected to attend (such as a *pro forma* session), on any day not described in paragraph (b)(1) or (b)(2) of this section, is formally recorded.

(c) *Fifty mile rule.* Section 162(h) and this section do not apply to any taxpayer who is a state legislator and whose place of residence within the legislative district represented by the taxpayer is 50 or fewer miles from the capitol building of the state. For purposes of this paragraph (c), the distance between the taxpayer's place of residence within the legislative district represented by the taxpayer and the capitol building of the state is the shortest of the more commonly traveled routes between the two points.

(d) *Definitions and special rules.* The following definitions apply for purposes of section 162(h) and this section.

(1) *State legislator.* A taxpayer becomes a state legislator on the day the taxpayer is sworn into office and ceases to be a state legislator on the day following the day on which the taxpayer's term in office ends.

(2) *Living expenses.* Living expenses include lodging, meals, and incidental expenses. *Incidental expenses* has the same meaning as in 41 CFR 300–3.1.

(3) *In session*—(i) *In general.* For purposes of this section, the legislature of which a taxpayer is a member is in session on any day if, at any time during that day, the members of the legislature are expected to attend and participate as an assembled body of the legislature.

(ii) *Examples.* The following examples illustrate the rules of this paragraph (d)(3):

Example 1. B is a member of the legislature of State X. On Day 1, the State X legislature is convened and the members of the legislature are expected to attend and participate. On Day 1, the State X legislature is in session within the meaning of paragraph (d)(3)(i) of this section. B does not attend the session of the State X legislature on Day 1. However, Day 1 is a legislative day for B for purposes of section 162(h)(2)(A) and paragraph (b)(1) of this section.

Example 2. C, D, and E are members of the legislature of State X. On Day 2, the State X legislature is convened for a limited session in which not all members of the legislature are expected to attend and participate. Thus, on Day 2 the legislature is not in session within the meaning of paragraph (d)(3)(i) of this section, and Day 2 is not a legislative day under paragraph (b)(1) of this section. In addition, Day 2 is not a day described in paragraph (b)(2) of this section. C and D are the only members who are called to, and do, attend the limited session on Day 2, and their attendance at the session is formally recorded. E is not called and does not attend. Therefore, Day 2 is a legislative day as to C and D under section 162(h)(2)(B) and paragraph (b)(4) of this section. Day 2 is not a legislative day as to E.

(4) *Committee of the legislature.* A committee of the legislature is any group that includes one or more legislators and that is charged with conducting business of the legislature. Committees of the legislature include, but are not limited to, committees to which the legislature refers bills for consideration, committees that the legislature has authorized to conduct inquiries into matters of public concern, and committees charged with the internal administration of the legislature. For purposes of this section, groups that are not considered committees of the legislature include, but are not limited to, groups that promote particular issues, raise campaign funds, or are caucuses of members of a political party.

(5) *Federal per diem.* The Federal per diem for any city and day is the maximum amount allowable to employees of the executive branch of the Federal government for living expenses while away from home in pursuit of a trade or business in that city on that day. See 5 U.S.C. 5702 and the regulations under that section.

(e) *Election*—(1) *Time for making election.* A taxpayer's election under section 162(h) must be made for each taxable year for which the election is to be in effect and must be made no later than the due date (including extensions) of the taxpayer's Federal income tax return for the taxable year.

(2) *Manner of making election.* A taxpayer makes an election under section 162(h) by attaching a statement to the taxpayer's income tax return for the taxable year for which the election is made. The statement must include—

(i) The taxpayer's name, address, and taxpayer identification number;

(ii) A statement that the taxpayer is making an election under section 162(h); and

(iii) Information establishing that the taxpayer is a state legislator entitled to make the election, for example, a statement identifying the taxpayer's state and legislative district and representing that the taxpayer's place of residence in the legislative district is not 50 or fewer miles from the state capitol building.

(3) *Revocation of election.* An election under section 162(h) may be revoked only with the consent of the Commissioner. An application for consent to revoke an election must be signed by the taxpayer and filed with the submission processing center with which the election was filed, and must include—

(i) The taxpayer's name, address, and taxpayer identification number;

(ii) A statement that the taxpayer is revoking an election under section 162(h) for a specified year; and

(iii) A statement explaining why the taxpayer seeks to revoke the election.

(f) *Effect of election on otherwise deductible expenses for travel away from home*—(1) *Legislative days*—(i) *Living expenses.* For any legislative day for which an election under section 162(h) and this section is in effect, the amount of an electing taxpayer's living expenses while away from home is the greater of the amount of the living expenses—

(A) Specified in paragraph (a)(2) of this section in connection with the trade or business of being a legislator; or

(B) Otherwise allowable under section 162(a)(2) in the pursuit of any trade or business of the taxpayer.

(ii) *Other expenses.* For any legislative day for which an election under section 162(h) and this section is in effect, the amount of an electing taxpayer's expenses (other than living expenses) for travel away from home is the sum of the substantiated expenses, such as expenses for travel fares, telephone calls, and local transportation, that are otherwise deductible under section 162(a)(2) in the pursuit of any trade or business of the taxpayer.

(2) *Non-legislative days.* For any day that is not a legislative day, the amount of an electing taxpayer's expenses (including amounts for living expenses) for travel away from home is the sum of the substantiated expenses that are otherwise deductible under section 162(a)(2) in the pursuit of any trade or business of the taxpayer.

(g) *Cross references.* See §1.62–1T(e)(4) for rules regarding allocation of unreimbursed expenses of state legislators and section 274(n) for limitations on the amount allowable as a deduction for expenses for or allocable to meals.

(h) *Effective/applicability date.* This section applies to expenses paid or incurred, or deemed expended under section 162(h), in taxable years beginning after *April 8, 2010*.

[T.D. 9481, 75 FR 17856, Apr. 8, 2010]

§1.162–25 Deductions with respect to noncash fringe benefits.

(a) [Reserved]

(b) *Employee.* If an employer provides the use of a vehicle (as defined in §1.61–21(e)(2)) to an employee as a noncash fringe benefit and includes the entire value of the benefit in the employee's gross income without taking into account any exclusion for a working condition fringe allowable under section 132 and the regulations thereunder, the employee may deduct that value multiplied by the percentage of the total use of the vehicle that is in connection with the employer's trade or business (business value). For taxable years beginning before January 1, 1990, the employee may deduct the business value from gross income in determining adjusted gross income. For taxable years beginning on or after January 1, 1990, the employee may deduct the business value only as a miscellaneous itemized deduction in determining taxable income, subject to the 2-percent floor provided in section 67. If the employer determines the value of the noncash fringe benefit under a special accounting rule that allows the employer to treat the value of benefits provided during the last two months of the calendar year or any shorter period as paid during the subsequent calendar year, then the employee must determine the deduction allowable under this paragraph (b) without regard to any use of the benefit during those last two months or any shorter period. The employee may not use a cents-per-mile valuation method to determine the deduction allowable under this paragraph (b).

[T.D. 8451, 57 FR 57669, Dec. 7, 1992; 57 FR 60568, Dec. 21, 1992]

§1.162–25T Deductions with respect to noncash fringe benefits (temporary).

(a) *Employer.* If an employer includes the value of a noncash fringe benefit in an employee's gross income, the employer may not deduct this amount as compensation for services, but rather may deduct only the costs incurred by the employer in providing the benefit to the employee. The employer may be allowed a cost recovery deduction under section 168 or a deduction under section 179 for an expense not chargeable to capital account, or, if the noncash fringe benefit is property leased by the employer, a deduction for the ordinary and necessary business expense of leasing the property.

(b) [Reserved]

(c) *Examples.* The following examples illustrate the provisions of this section.

Example 1. On January 1, 1986, X Company owns and provides the use of an automobile with a fair market value of $20,000 to E, an employee, for the entire calendar year. Both X and E compute taxable income on the basis of the calendar year. Seventy percent of the use of the automobile by E is in connection with X's trade or business. If X uses the special rule provided in §1.61–2T for valuing the availability of the automobile and takes into account the amount excludable as a working condition fringe, X would include $1,680 ($5,600, the Annual Lease Value, less 70 percent of $5,600) in E's gross income for 1986. X may not deduct the amount included in E's income as compensation for services. X may, however, determine a cost recovery deduction under section 168, subject to the limitations under section 280F, for taxable year 1986.

Example 2. The facts are the same as in example (1), except that X includes $5,600 in E's gross income, the value of the noncash fringe benefit without taking into account the amount excludable as a working condition fringe. X may not deduct that amount as compensation for services, but may determine a cost recovery deduction under section 168, subject to the limitations under section 280F. For purposes of determining adjusted gross income, E may deduct $3,920 ($5,600 multiplied by the percent of business use).

[T.D. 8061, 50 FR 46013, Nov. 6, 1985, as amended by T.D. 8063, 50 FR 52312, Dec. 23, 1985; T.D. 8276, 54 FR 51026, Dec. 12, 1989; T.D. 8451, 57 FR 57669, Dec. 7, 1992]

§ 1.162–27 Certain employee remuneration in excess of $1,000,000.

(a) *Scope.* This section provides rules for the application of the $1 million deduction limit under section 162(m) of the Internal Revenue Code. Paragraph (b) of this section provides the general rule limiting deductions under section 162(m). Paragraph (c) of this section provides definitions of generally applicable terms. Paragraph (d) of this section provides an exception from the deduction limit for compensation payable on a commission basis. Paragraph (e) of this section provides an exception for qualified performance-based compensation. Paragraphs (f) and (g) of this section provide special rules for corporations that become publicly held corporations and payments that are subject to section 280G, respectively. Paragraph (h) of this section provides transition rules, including the rules for contracts that are grandfathered and not subject to section 162(m). Paragraph (j) of this section contains the effective date provisions. For rules concerning the deductibility of compensation for services that are not covered by section 162(m) and this section, see section 162(a)(1) and §1.162–7. This section is not determinative as to whether compensation meets the requirements of section 162(a)(1).

(b) *Limitation on deduction.* Section 162(m) precludes a deduction under chapter 1 of the Internal Revenue Code by any publicly held corporation for compensation paid to any covered employee to the extent that the compensation for the taxable year exceeds $1,000,000.

(c) *Definitions*—(1) *Publicly held corporation*—(i) *General rule.* A *publicly held corporation* means any corporation issuing any class of common equity securities required to be registered under section 12 of the Exchange Act. A corporation is not considered publicly held if the registration of its equity securities is voluntary. For purposes of this section, whether a corporation is publicly held is determined based solely on whether, as of the last day of its taxable year, the corporation is subject to the reporting obligations of section 12 of the Exchange Act.

(ii) *Affiliated groups.* A publicly held corporation includes an affiliated group of corporations, as defined in section 1504 (determined without regard to section 1504(b)). For purposes of this section, however, an affiliated group of corporations does not include any subsidiary that is itself a publicly held corporation. Such a publicly held subsidiary, and its subsidiaries (if any), are separately subject to this section. If a covered employee is paid compensation in a taxable year by more than one member of an affiliated group, compensation paid by each member of the affiliated group is aggregated with compensation paid to the covered employee by all other members of the group. Any amount disallowed as a deduction by this section must be prorated among the payor corporations in proportion to the amount of compensation paid to the covered employee by each such corporation in the taxable year.

(2) *Covered employee*—(i) *General rule.* A *covered employee* means any individual who, on the last day of the taxable year, is—

(A) The chief executive officer of the corporation or is acting in such capacity; or

(B) Among the four highest compensated officers (other than the chief executive officer).

(ii) *Application of rules of the Securities and Exchange Commission.* Whether an individual is the chief executive officer described in paragraph (c)(2)(i)(A) of this section or an officer described in paragraph (c)(2)(i)(B) of this section is determined pursuant to the executive compensation disclosure rules under the Exchange Act.

(3) *Compensation*—(i) *In general.* For purposes of the deduction limitation described in paragraph (b) of this section, *compensation* means the aggregate amount allowable as a deduction under chapter 1 of the Internal Revenue Code for the taxable year (determined without regard to section 162(m)) for remuneration for services performed by a covered employee, whether or not the services were performed during the taxable year.

(ii) *Exceptions. Compensation* does not include—

(A) Remuneration covered in section 3121(a)(5)(A) through section 3121(a)(5)(D) (concerning remuneration that is not treated as *wages* for purposes of the Federal Insurance Contributions Act); and

(B) Remuneration consisting of any benefit provided to or on behalf of an employee if, at the time the benefit is provided, it is reasonable to believe that the employee will be able to exclude it from gross income. In addition, compensation does not include salary reduction contributions described in section 3121(v)(1).

(4) *Compensation Committee.* The *compensation committee* means the committee of directors (including any subcommittee of directors) of the publicly held corporation that has the authority to establish and administer performance goals described in paragraph (e)(2) of this section, and to certify that performance goals are attained, as described in paragraph (e)(5) of this section. A committee of directors is not treated as failing to have the authority to establish performance goals merely because the goals are ratified by the board of directors of the publicly held corporation or, if applicable, any other committee of the board of directors. See paragraph (e)(3) of this section for rules concerning the composition of the compensation committee.

(5) *Exchange Act.* The *Exchange Act* means the Securities Exchange Act of 1934.

(6) *Examples.* This paragraph (c) may be illustrated by the following examples:

Example 1. Corporation X is a publicly held corporation with a July 1 to June 30 fiscal year. For Corporation X's taxable year ending on June 30, 1995, Corporation X pays compensation of $2,000,000 to A, an employee. However, A's compensation is not required to be reported to shareholders under the executive compensation disclosure rules of the Exchange Act because A is neither the chief executive officer nor one of the four highest compensated officers employed on the last day of the taxable year. A's compensation is not subject to the deduction limitation of paragraph (b) of this section.

Example 2. C, a covered employee, performs services and receives compensation from Corporations X, Y, and Z, members of an affiliated group of corporations. Corporation X, the parent corporation, is a publicly held corporation. The total compensation paid to C from all affiliated group members is $3,000,000 for the taxable year, of which Corporation X pays $1,500,000; Corporation Y pays $900,000; and Corporation Z pays $600,000. Because the compensation paid by all affiliated group members is aggregated for purposes of section 162(m), $2,000,000 of the aggregate compensation paid is nondeductible. Corporations X, Y, and Z each are treated as paying a ratable portion of the nondeductible compensation. Thus, two thirds of each corporation's payment will be nondeductible. Corporation X has a nondeductible compensation expense of $1,000,000 ($1,500,000×$2,000,000/$3,000,000). Corporation Y has a nondeductible compensation expense of $600,000 ($900,000×$2,000,000/$3,000,000). Corporation Z has a nondeductible compensation expense of $400,000 ($600,000×$2,000,000/$3,000,000).

Example 3. Corporation W, a calendar year taxpayer, has total assets equal to or exceeding $5 million and a class of equity security held of record by 500 or more persons on December 31, 1994. However, under the Exchange Act, Corporation W is not required to file a registration statement with respect to that security until April 30, 1995. Thus, Corporation W is not a publicly held corporation on December 31, 1994, but is a publicly held corporation on December 31, 1995.

Example 4. The facts are the same as in *Example 3*, except that on December 15, 1996, Corporation W files with the Securities and Exchange Commission to disclose that Corporation W is no longer required to be registered under section 12 of the Exchange Act and to terminate its registration of securities under that provision. Because Corporation W is no longer subject to Exchange Act reporting obligations as of December 31, 1996, Corporation W is not a publicly held corporation for taxable year 1996, even though the registration of Corporation W's securities does not terminate until 90 days after Corporation W files with the Securities and Exchange Commission.

(d) *Exception for compensation paid on a commission basis.* The deduction limit in paragraph (b) of this section shall not apply to any compensation paid on a commission basis. For this purpose, compensation is paid on a commission basis if the facts and circumstances show that it is paid solely on account of income generated directly by the individual performance of the individual to whom the compensation is paid. Compensation does not fail to be attributable directly to the individual merely because support services, such as secretarial or research services, are utilized in generating the income. However, if compensation is paid on account of broader performance standards, such as income produced by a business unit of the corporation, the compensation does not qualify for the exception provided under this paragraph (d).

(e) *Exception for qualified performance-based compensation*—

(1) *In general.* The deduction limit in paragraph (b) of this section does not apply to qualified performance-based compensation. Qualified performance-based compensation is compensation that meets all of the requirements of paragraphs (e)(2) through (e)(5) of this section.

(2) *Performance goal requirement*—(i) *Preestablished goal.* Qualified performance-based compensation must be paid solely on account of the attainment of one or more preestablished, objective performance goals. A performance goal is considered preestablished if it is established in writing by the compensation committee not later than 90 days after the commencement of the period of service to which the performance goal relates, provided that the outcome is substantially uncertain at the time the compensation committee actually establishes the goal. However, in no event will a performance goal be considered to be preestablished if it is established after 25 percent of the period of service (as scheduled in good faith at the time the goal is established) has elapsed. A performance goal is objective if a third party having knowledge of the relevant facts could determine whether the goal is met. Performance goals can be based on one or more business criteria that apply to the individual, a business unit, or the corporation as a whole. Such business criteria could include, for example, stock price, market share, sales, earnings per share, return on equity, or costs. A performance goal need not, however, be based upon an increase or positive result under a business criterion and could include, for example, maintaining the status quo or limiting economic losses (measured, in each case, by reference to a specific business criterion). A performance goal does not include the mere continued employment of the covered employee. Thus, a vesting provision based solely on continued employment would not constitute a performance goal. See paragraph (e)(2)(vi) of this section for rules on compensation that is based on an increase in the price of stock.

(ii) *Objective compensation formula.* A preestablished performance goal must state, in terms of an objective formula or standard, the method for computing the amount of compensation payable to the employee if the goal is attained. A formula or standard is objective if a third party having knowledge of the relevant performance results could calculate the amount to be paid to the employee. In addition, a formula or standard must specify the individual employees or class of employees to which it applies.

(iii) *Discretion.* (A) The terms of an objective formula or standard must preclude discretion to increase the amount of compensation payable that would otherwise be due upon attainment of the goal. A performance goal is not discretionary for purposes of this paragraph (e)(2)(iii) merely because the compensation committee reduces or eliminates the compensation or other economic benefit that was due upon attainment of the goal. However, the exercise of negative discretion with respect to one employee is not permitted to result in an increase in the amount payable to another employee. Thus, for example, in the case of a bonus pool, if the amount payable to each employee is stated in terms of a percentage of the pool, the sum of these individual percentages of the pool is not permitted to exceed 100 percent. If the terms of an objective formula or standard fail to preclude discretion to increase the amount of compensation merely because the amount of compensation to be paid upon attainment of the performance goal is based, in whole or in part, on a percentage of salary or base pay and the dollar amount of the salary or base pay is not fixed at the time the performance goal is established, then the objective formula or standard will not be considered discretionary for purposes of this paragraph (e)(2)(iii) if the maximum dollar amount to be paid is fixed at that time.

(B) If compensation is payable upon or after the attainment of a performance goal, and a change is made to accelerate the payment of compensation to an earlier date after the attainment of the goal, the change will be treated as an increase in the amount of compensation, unless the amount of compensation paid is discounted to reasonably reflect the time value of money. If compensation is payable upon or after the attainment of a performance goal, and a change is made to defer the payment of compensation to a later date, any amount paid in excess of the amount that was originally owed to the employee will not be treated as an increase in the amount of compensation if the additional amount is based either on a reasonable rate of interest or on one or more predetermined actual investments (whether or not assets associated with the amount originally owed are actually invested therein) such that the amount payable by the employer at the later date will be based on the actual rate of return of a specific investment (including any decrease as well as any increase in the value of an investment). If compensation is payable in the form of property, a change in the timing of the transfer of that property after the attainment of the goal will not be treated as an increase in the amount of compensation for purposes of this paragraph (e)(2)(iii). Thus, for example, if the terms of a stock grant provide for stock to be transferred after the attainment of a performance goal and the transfer of the stock also is subject to a vesting schedule, a change in the vesting schedule that either accelerates or defers the transfer of stock will not be treated as an increase in the amount of compensation payable under the performance goal.

(C) Compensation attributable to a stock option, stock appreciation right, or other stock-based compensation does not fail to satisfy the requirements of this paragraph (e)(2) to the extent that a change in the grant or award is made to reflect a change in corporate capitalization, such as a stock split or dividend, or a corporate transaction, such as any merger of a corporation into another corporation, any consolidation of two or more corporations into another corporation, any separation of a corporation (including a spinoff or other distribution of stock or property by a corporation), any reorganization of a corporation (whether or not such reorganization comes within the definition of such term in section 368), or any partial or complete liquidation by a corporation.

(iv) *Grant-by-grant determination.* The determination of whether compensation satisfies the requirements of this paragraph (e)(2) generally shall be made on a grant-by-grant basis. Thus, for example, whether compensation attributable to a stock option grant satisfies the requirements of this paragraph (e)(2) generally is determined on the basis of the particular grant made and without regard to the terms of any other option grant, or other grant of compensation, to the same or another employee. As a further example, except as provided in paragraph (e)(2)(vi), whether a grant of restricted stock or other stock-based compensation satisfies the requirements of this paragraph (e)(2) is determined without regard to whether dividends, dividend equivalents, or other similar distributions with respect to stock, on such stock-based compensation are payable prior to the attainment of the performance goal. Dividends, dividend equivalents, or other similar distributions with respect to stock that are treated as separate grants under this paragraph (e)(2)(iv) are not performance-based compensation unless they separately satisfy the requirements of this paragraph (e)(2).

(v) *Compensation contingent upon attainment of performance goal.* Compensation does not satisfy the requirements of this paragraph (e)(2) if the facts and circumstances indicate that the employee would receive all or part of the compensation regardless of whether the performance goal is attained. Thus, if the payment of compensation under a grant or award is only nominally or partially contingent on attaining a performance goal, none of the compensation payable under the grant or award will be considered performance-based. For example, if an employee is entitled to a bonus under either of two arrangements, where payment under a nonperformance-based arrangement is contingent upon the failure to attain the performance goals under an otherwise performance-based arrangement, then neither arrangement provides for compensation that satisfies the requirements of this paragraph (e)(2). Compensation does not fail to be qualified performance-based compensation merely because the plan allows the compensation to be payable upon death, disability, or change of ownership or control, although compensation actually paid on account of those events prior to the attainment of the performance goal would not satisfy the requirements of this paragraph (e)(2). As an exception to the general rule set forth in the first sentence of paragraph (e)(2)(iv) of this section, the facts-and-circumstances determination referred to in the first sentence of this paragraph (e)(2)(v) is made taking into account all plans, arrangements, and agreements that provide for compensation to the employee.

(vi) *Application of requirements to stock options and stock appreciation rights*—(A) *In general*. Compensation attributable to a stock option or a stock appreciation right is deemed to satisfy the requirements of this paragraph (e)(2) if the grant or award is made by the compensation committee; the plan under which the option or right is granted states the maximum number of shares with respect to which options or rights may be granted during a specified period to any employee; and, under the terms of the option or right, the amount of compensation the employee could receive is based solely on an increase in the value of the stock after the date of the grant or award. Conversely, if the amount of compensation the employee will receive under the grant or award is not based solely on an increase in the value of the stock after the date of grant or award (e.g., in the case of restricted stock, or an option that is granted with an exercise price that is less than the fair market value of the stock as of the date of grant), none of the compensation attributable to the grant or award is qualified performance-based compensation because it does not satisfy the requirement of this paragraph (e)(2)(vi)(A). Whether a stock option grant is based solely on an increase in the value of the stock after the date of grant is determined without regard to any dividend equivalent that may be payable, provided that payment of the dividend equivalent is not made contingent on the exercise of the option. The rule that the compensation attributable to a stock option or stock appreciation right must be based solely on an increase in the value of the stock after the date of grant or award does not apply if the grant or award is made on account of, or if the vesting or exercisability of the grant or award is contingent on, the attainment of a performance goal that satisfies the requirements of this paragraph (e)(2).

(B) *Cancellation and repricing*. Compensation attributable to a stock option or stock appreciation right does not satisfy the requirements of this paragraph (e)(2) to the extent that the number of options granted exceeds the maximum number of shares for which options may be granted to the employee as specified in the plan. If an option is canceled, the canceled option continues to be counted against the maximum number of shares for which options may be granted to the employee under the plan. If, after grant, the exercise price of an option is reduced, the transaction is treated as a cancellation of the option and a grant of a new option. In such case, both the option that is deemed to be canceled and the option that is deemed to be granted reduce the maximum number of shares for which options may be granted to the employee under the plan. This paragraph (e)(2)(vi)(B) also applies in the case of a stock appreciation right where, after the award is made, the base amount on which stock appreciation is calculated is reduced to reflect a reduction in the fair market value of stock.

(vii) *Examples.* This paragraph (e)(2) may be illustrated by the following examples:

Example 1. No later than 90 days after the start of a fiscal year, but while the outcome is substantially uncertain, Corporation S establishes a bonus plan under which A, the chief executive officer, will receive a cash bonus of $500,000, if year-end corporate sales are increased by at least 5 percent. The compensation committee retains the right, if the performance goal is met, to reduce the bonus payment to A if, in its judgment, other subjective factors warrant a reduction. The bonus will meet the requirements of this paragraph (e)(2).

Example 2. The facts are the same as in *Example 1,* except that the bonus is based on a percentage of Corporation S's total sales for the fiscal year. Because Corporation S is virtually certain to have some sales for the fiscal year, the outcome of the performance goal is not substantially uncertain, and therefore the bonus does not meet the requirements of this paragraph (e)(2).

Example 3. The facts are the same as in *Example 1,* except that the bonus is based on a percentage of Corporation S's total profits for the fiscal year. Although some sales are virtually certain for virtually all public companies, it is substantially uncertain whether a company will have profits for a specified future period even if the company has a history of profitability. Therefore, the bonus will meet the requirements of this paragraph (e)(2).

Example 4. B is the general counsel of Corporation R, which is engaged in patent litigation with Corporation S. Representatives of Corporation S have informally indicated to Corporation R a willingness to settle the litigation for $50,000,000. Subsequently, the compensation committee of Corporation R agrees to pay B a bonus if B obtains a formal settlement for at least $50,000,000. The bonus to B does not meet the requirement of this paragraph (e)(2) because the performance goal was not established at a time when the outcome was substantially uncertain.

Example 5. Corporation S, a public utility, adopts a bonus plan for selected salaried employees that will pay a bonus at the end of a 3-year period of $750,000 each if, at the end of the 3 years, the price of S stock has increased by 10 percent. The plan also provides that the 10-percent goal will automatically adjust upward or downward by the percentage change in a published utilities index. Thus, for example, if the published utilities index shows a net increase of 5 percent over a 3-year period, then the salaried employees would receive a bonus only if Corporation S stock has increased by 15 percent. Conversely, if the published utilities index shows a net decrease of 5 percent over a 3-year period, then the salaried employees would receive a bonus if Corporation S stock has increased by 5 percent. Because these automatic adjustments in the performance goal are preestablished, the bonus meets the requirement of this paragraph (e)(2), notwithstanding the potential changes in the performance goal.

Example 6. The facts are the same as in *Example 5,* except that the bonus plan provides that, at the end of the 3-year period, a bonus of $750,000 will be paid to each salaried employee if either the price of Corporation S stock has increased by 10 percent or the earnings per share on Corporation S stock have increased by 5 percent. If both the earnings-per-share goal and the stock-price goal are preestablished, the compensation committee's discretion to choose to pay a bonus under either of the two goals does not cause any bonus paid under the plan to fail to meet the requirement of this paragraph (e)(2) because each goal independently meets the requirements of this paragraph (e)(2). The choice to pay under either of the two goals is tantamount to the discretion to choose not to pay under one of the goals, as provided in paragraph (e)(2)(iii) of this section.

Example 7. Corporation U establishes a bonus plan under which a specified class of employees will participate in a bonus pool if certain preestablished performance goals are attained. The amount of the bonus pool is determined under an objective formula. Under the terms of the bonus plan, the compensation committee retains the discretion to determine the fraction of the bonus pool that each employee may receive. The bonus plan does not satisfy the requirements of this paragraph (e)(2). Although the aggregate amount of the bonus plan is determined under an objective formula, a third party could not determine the amount that any individual could receive under the plan.

Example 8. The facts are the same as in *Example 7,* except that the bonus plan provides that a specified share of the bonus pool is payable to each employee, and the total of these shares does not exceed 100% of the pool. The bonus plan satisfies the requirements of this paragraph (e)(2). In addition, the bonus plan will satisfy the requirements of this paragraph (e)(2) even if the compensation committee retains the discretion to reduce the compensation payable to any individual employee, provided that a reduction in the amount of one employee's bonus does not result in an increase in the amount of any other employee's bonus.

Example 9. Corporation V establishes a stock option plan for salaried employees. The terms of the stock option plan specify that no salaried employee shall receive options for more than 100,000 shares over any 3-

year period. The compensation committee grants options for 50,000 shares to each of several salaried employees. The exercise price of each option is equal to or greater than the fair market value at the time of each grant. Compensation attributable to the exercise of the options satisfies the requirements of this paragraph (e)(2). If, however, the terms of the options provide that the exercise price is less than fair market value at the date of grant, no compensation attributable to the exercise of those options satisfies the requirements of this paragraph (e)(2) unless issuance or exercise of the options was contingent upon the attainment of a preestablished performance goal that satisfies this paragraph (e)(2).

Example 10. The facts are the same as in *Example 9*, except that, within the same 3-year grant period, the fair market value of Corporation V stock is significantly less than the exercise price of the options. The compensation committee reprices those options to that lower current fair market value of Corporation V stock. The repricing of the options for 50,000 shares held by each salaried employee is treated as the grant of new options for an additional 50,000 shares to each employee. Thus, each of the salaried employees is treated as having received grants for 100,000 shares. Consequently, if any additional options are granted to those employees during the 3-year period, compensation attributable to the exercise of those additional options would not satisfy the requirements of this paragraph (e)(2). The results would be the same if the compensation committee canceled the outstanding options and issued new options to the same employees that were exercisable at the fair market value of Corporation V stock on the date of reissue.

Example 11. Corporation W maintains a plan under which each participating employee may receive incentive stock options, nonqualified stock options, stock appreciation rights, or grants of restricted Corporation W stock. The plan specifies that each participating employee may receive options, stock appreciation rights, restricted stock, or any combination of each, for no more than 20,000 shares over the life of the plan. The plan provides that stock options may be granted with an exercise price of less than, equal to, or greater than fair market value on the date of grant. Options granted with an exercise price equal to, or greater than, fair market value on the date of grant do not fail to meet the requirements of this paragraph (e)(2) merely because the compensation committee has the discretion to determine the types of awards (*i.e.*, options, rights, or restricted stock) to be granted to each employee or the discretion to issue options or make other compensation awards under the plan that would not meet the requirements of this paragraph (e)(2). Whether an option granted under the plan satisfies the requirements of this paragraph (e)(2) is determined on the basis of the specific terms of the option and without regard to other options or awards under the plan.

Example 12. Corporation X maintains a plan under which stock appreciation rights may be awarded to key employees. The plan permits the compensation committee to make awards under which the amount of compensation payable to the employee is equal to the increase in the stock price plus a percentage "gross up" intended to offset the tax liability of the employee. In addition, the plan permits the compensation committee to make awards under which the amount of compensation payable to the employee is equal to the increase in the stock price, based on the highest price, which is defined as the highest price paid for Corporation X stock (or offered in a tender offer or other arms-length offer) during the 90 days preceding exercise. Compensation attributable to awards under the plan satisfies the requirements of paragraph (e)(2)(vi) of this section, provided that the terms of the plan specify the maximum number of shares for which awards may be made.

Example 13. Corporation W adopts a plan under which a bonus will be paid to the CEO only if there is a 10% increase in earnings per share during the performance period. The plan provides that earnings per share will be calculated without regard to any change in accounting standards that may be required by the Financial Accounting Standards Board after the goal is established. After the goal is established, such a change in accounting standards occurs. Corporation W's reported earnings, for purposes of determining earnings per share under the plan, are adjusted pursuant to this plan provision to factor out this change in standards. This adjustment will not be considered an exercise of impermissible discretion because it is made pursuant to the plan provision.

Example 14. Corporation X adopts a performance-based incentive pay plan with a four-year performance period. Bonuses under the plan are scheduled to be paid in the first year after the end of the performance period (year 5). However, in the second year of the performance period, the compensation committee determines that any bonuses payable in year 5 will instead, for bona fide business reasons, be paid in year 10. The compensation committee also determines that any compensation that would have been payable in year 5 will be adjusted to reflect the delay in payment. The adjustment will be based on the greater of the future rate of return of a specified mutual fund that invests in blue chip stocks or of a specified venture capital investment over the five-year deferral period. Each of these investments, considered by itself, is a predetermined actual investment because it is based on the future rate of return of an actual investment. However, the adjustment in this case is not based on predetermined actual investments within the meaning of paragraph (e)(2)(iii)(B) of this section because the amount payable by Corporation X in year 10 will be based on the greater of the two investment returns and, thus, will not be based on the actual rate of return on either specific investment.

Example 15. The facts are the same as in *Example 14,* except that the increase will be based on Moody's Average Corporate Bond Yield over the five-year deferral period. Because this index reflects a reasonable rate of interest, the increase in the compensation payable that is based on the index's rate of return is not considered an impermissible increase in the amount of compensation payable under the formula.

Example 16. The facts are the same as in *Example 14,* except that the increase will be based on the rate of return for the Standard & Poor's 500 Index. This index does not measure interest rates and thus does not represent a reasonable rate of interest. In addition, this index does not represent an actual investment. Therefore, any additional compensation payable based on the rate of return of this index will result in an impermissible increase in the amount payable under the formula. If, in contrast, the increase were based on the rate of return of an existing mutual fund that is invested in a manner that seeks to approximate the Standard & Poor's 500 Index, the increase would be based on a predetermined actual investment within the meaning of paragraph (e)(2)(iii)(B) of this section and thus would not result in an impermissible increase in the amount payable under the formula.

(3) *Outside directors*—(i) *General rule.* The performance goal under which compensation is paid must be established by a compensation committee comprised solely of two or more outside directors. A director is an outside director if the director—

(A) Is not a current employee of the publicly held corporation;

(B) Is not a former employee of the publicly held corporation who receives compensation for prior services (other than benefits under a tax-qualified retirement plan) during the taxable year;

(C) Has not been an officer of the publicly held corporation; and

(D) Does not receive remuneration from the publicly held corporation, either directly or indirectly, in any capacity other than as a director. For this purpose, remuneration includes any payment in exchange for goods or services.

(ii) *Remuneration received.* For purposes of this paragraph (e)(3), remuneration is received, directly or indirectly, by a director in each of the following circumstances:

(A) If remuneration is paid, directly or indirectly, to the director personally or to an entity in which the director has a beneficial ownership interest of greater than 50 percent. For this purpose, remuneration is considered paid when actually paid (and throughout the remainder of that taxable year of the corporation) and, if earlier, throughout the period when a contract or agreement to pay remuneration is outstanding.

(B) If remuneration, other than de minimis remuneration, was paid by the publicly held corporation in its preceding taxable year to an entity in which the director has a beneficial ownership interest of at least 5 percent but not more than 50 percent. For this purpose, remuneration is considered paid when actually paid or, if earlier, when the publicly held corporation becomes liable to pay it.

(C) If remuneration, other than de minimis remuneration, was paid by the publicly held corporation in its preceding taxable year to an entity by which the director is employed or self-employed other than as a director. For this purpose, remuneration is considered paid when actually paid or, if earlier, when the publicly held corporation becomes liable to pay it.

(iii) *De minimis remuneration*—(A) *In general.* For purposes of paragraphs (e)(3)(ii)(B) and (C) of this section, remuneration that was paid by the publicly held corporation in its preceding taxable year to an entity is de minimis if payments to the entity did not exceed 5 percent of the gross revenue of the entity for its taxable year ending with or within that preceding taxable year of the publicly held corporation.

(B) *Remuneration for personal services and substantial owners.* Notwithstanding paragraph (e)(3)(iii)(A) of this section, remuneration in excess of $60,000 is not de minimis if the remuneration is paid to an entity described in paragraph (e)(3)(ii)(B) of this section, or is paid for personal services to an entity described in paragraph (e)(3)(ii)(C) of this section.

(iv) *Remuneration for personal services.* For purposes of paragraph (e)(3)(iii)(B) of this section, remuneration from a publicly held corporation is for personal services if—

(A) The remuneration is paid to an entity for personal or professional services, consisting of legal, accounting, investment banking, and management consulting services (and other similar services that may be specified by the Commissioner in revenue rulings, notices, or other guidance published in the Internal Revenue Bulletin), performed for the publicly held corporation, and the remuneration is not for services that are incidental to the purchase of goods or to the purchase of services that are not personal services; and

(B) The director performs significant services (whether or not as an employee) for the corporation, division, or similar organization (within the entity) that actually provides the services described in paragraph (e)(3)(iv)(A) of this section to the publicly held corporation, or more than 50 percent of the entity's gross revenues (for the entity's preceding taxable year) are derived from that corporation, subsidiary, or similar organization.

(v) *Entity defined.* For purposes of this paragraph (e)(3), entity means an organization that is a sole proprietorship, trust, estate, partnership, or corporation. The term also includes an affiliated group of corporations as defined in section 1504 (determined without regard to section 1504(b)) and a group of organizations that would be an affiliated group but for the fact that one or more of the organizations are not incorporated. However, the aggregation rules referred to in the preceding sentence do not apply for purposes of determining whether a director has a beneficial ownership interest of at least 5 percent or greater than 50 percent.

(vi) *Employees and former officers.* Whether a director is an employee or a former officer is determined on the basis of the facts at the time that the individual is serving as a director on the compensation committee. Thus, a director is not precluded from being an outside director solely because the director is a former officer of a corporation that previously was an affiliated corporation of the publicly held corporation. For example, a director of a parent corporation of an affiliated group is not precluded from being an outside director solely because that director is a former officer of an affiliated subsidiary that was spun off or liquidated. However, an outside director would no longer be an outside director if a corporation in which the director was previously an officer became an affiliated corporation of the publicly held corporation.

(vii) *Officer.* Solely for purposes of this paragraph (e)(3), *officer* means an administrative executive who is or was in regular and continued service. The term implies continuity of service and excludes those employed for a special and single transaction. An individual who merely has (or had) the title of officer but not the authority of an officer is not considered an officer. The determination of whether an individual is or was an officer is based on all of the facts and circumstances in the particular case, including without limitation the source of the individual's authority, the term for which the individual is elected or appointed, and the nature and extent of the individual's duties.

(viii) *Members of affiliated groups.* For purposes of this paragraph (e)(3), the outside directors of the publicly held member of an affiliated group are treated as the outside directors of all members of the affiliated group.

(ix) *Examples.* This paragraph (e)(3) may be illustrated by the following examples:

Example 1. Corporations X and Y are members of an affiliated group of corporations as defined in section 1504, until July 1, 1994, when Y is sold to another group. Prior to the sale, A served as an officer of Corporation Y. After July 1, 1994, A is not treated as a former officer of Corporation X by reason of having been an officer of Y.

Example 2. Corporation Z, a calendar-year taxpayer, uses the services of a law firm by which B is employed, but in which B has a less-than-5-percent ownership interest. The law firm reports income on a July 1 to June 30 basis. Corporation Z appoints B to serve on its compensation committee for calendar year 1998 after determining that, in calendar year 1997, it did not become liable to the law firm for remuneration exceeding the lesser of $60,000 or five percent of the law firm's gross revenue (calculated for the year ending June 30, 1997). On October 1, 1998, Corporation Z becomes liable to pay remuneration of $50,000 to the law firm on June 30, 1999. For the year ending June 30, 1998, the law firm's gross revenue was less than $1 million. Thus, in calendar year 1999, B is not an outside director. However, B may satisfy the requirements for an outside director in calendar year 2000, if, in calendar year 1999, Corporation Z does not become liable to the law firm for additional remuneration. This is because the remuneration actually paid on June 30, 1999 was considered paid on October 1, 1998 under paragraph (e)(3)(ii)(C) of this section.

Example 3. Corporation Z, a publicly held corporation, purchases goods from Corporation A. D, an executive and less- than-5-percent owner of Corporation A, sits on the board of directors of Corporation Z and on its compensation committee. For 1997, Corporation Z obtains representations to the effect that D is not eligible for any commission for D's sales to Corporation Z and that, for purposes of determining D's compensation for 1997, Corporation A's sales to Corporation Z are not otherwise treated differently than sales to other customers of Corporation A (including its affiliates, if any) or are irrelevant. In addition, Corporation Z has no reason to believe that these representations are inaccurate or that it is otherwise paying remuneration indirectly to D personally. Thus, in 1997, no remuneration is considered paid by Corporation Z indirectly to D personally under paragraph (e)(3)(ii)(A) of this section.

Example 4. (i) Corporation W, a publicly held corporation, purchases goods from Corporation T. C, an executive and less- than-5-percent owner of Corporation T, sits on the board of directors of Corporation W and on its compensation committee. Corporation T develops a new product and agrees on January 1, 1998 to pay C a bonus of $500,000 if Corporation W contracts to purchase the product. Even if Corporation W purchases the new product, sales to Corporation W will represent less than 5 percent of Corporation T's gross revenues. In 1999, Corporation W contracts to purchase the new product and, in 2000, C receives the $500,000 bonus from Corporation T. In 1998, 1999, and 2000, Corporation W does not obtain any representations relating to indirect remuneration to C personally (such as the representations described in *Example 3*).

(ii) Thus, in 1998, 1999, and 2000, remuneration is considered paid by Corporation W indirectly to C personally under paragraph (e)(3)(ii)(A) of this section. Accordingly, in 1998, 1999, and 2000, C is not an outside director of Corporation W. The result would have been the same if Corporation W had obtained appropriate representations but nevertheless had reason to believe that it was paying remuneration indirectly to C personally.

Example 5. Corporation R, a publicly held corporation, purchases utility service from Corporation Q, a public utility. The chief executive officer, and less-than-5-percent owner, of Corporation Q is a director of Corporation R. Corporation R pays Corporation Q more than $60,000 per year for the utility service, but less than 5 percent of Corporation Q's gross revenues. Because utility services are not personal services, the fees paid are not subject to the $60,000 de minimis rule for remuneration for personal services within the meaning of paragraph (e)(3)(iii)(B) of this section. Thus, the chief executive officer qualifies as an outside director of Corporation R, unless disqualified on some other basis.

Example 6. Corporation A, a publicly held corporation, purchases management consulting services from Division S of Conglomerate P. The chief financial officer of Division S is a director of Corporation A. Corporation A pays more than $60,000 per year for the management consulting services, but less than 5 percent of Conglomerate P's gross revenues. Because management consulting services are personal services within the meaning of paragraph (e)(3)(iv)(A) of this section, and the chief financial officer performs significant services for Division S, the fees paid are subject to the $60,000 de minimis rule as remuneration for personal services. Thus, the chief financial officer does not qualify as an outside director of Corporation A.

Example 7. The facts are the same as in *Example 6*, except that the chief executive officer, and less-than-5-percent owner, of the parent company of Conglomerate P is a director of Corporation A and does not perform significant services for Division S. If the gross revenues of Division S do not constitute more than 50 percent of the gross revenues of Conglomerate P for P's preceding taxable year, the chief executive officer will qualify as an outside director of Corporation A, unless disqualified on some other basis.

(4) *Shareholder approval requirement*—(i) *General rule.* The material terms of the performance goal under which the compensation is to be paid must be disclosed to and subsequently approved by the shareholders of the publicly held corporation before the compensation is paid. The requirements of this paragraph (e)(4) are not satisfied if the compensation would be paid regardless of whether the material terms are approved by shareholders. The material terms include the employees eligible to receive compensation; a description of the business criteria on which the performance goal is based; and either the maximum amount of compensation

that could be paid to any employee or the formula used to calculate the amount of compensation to be paid to the employee if the performance goal is attained (except that, in the case of a formula based, in whole or in part, on a percentage of salary or base pay, the maximum dollar amount of compensation that could be paid to the employee must be disclosed).

(ii) *Eligible employees.* Disclosure of the employees eligible to receive compensation need not be so specific as to identify the particular individuals by name. A general description of the class of eligible employees by title or class is sufficient, such as the chief executive officer and vice presidents, or all salaried employees, all executive officers, or all key employees.

(iii) *Description of business criteria*—(A) *In general.* Disclosure of the business criteria on which the performance goal is based need not include the specific targets that must be satisfied under the performance goal. For example, if a bonus plan provides that a bonus will be paid if earnings per share increase by 10 percent, the 10-percent figure is a target that need not be disclosed to shareholders. However, in that case, disclosure must be made that the bonus plan is based on an earnings-per-share business criterion. In the case of a plan under which employees may be granted stock options or stock appreciation rights, no specific description of the business criteria is required if the grants or awards are based on a stock price that is no less than current fair market value.

(B) *Disclosure of confidential information.* The requirements of this paragraph (e)(4) may be satisfied even though information that otherwise would be a material term of a performance goal is not disclosed to shareholders, provided that the compensation committee determines that the information is confidential commercial or business information, the disclosure of which would have an adverse effect on the publicly held corporation. Whether disclosure would adversely affect the corporation is determined on the basis of the facts and circumstances. If the compensation committee makes such a determination, the disclosure to shareholders must state the compensation committee's belief that the information is confidential commercial or business information, the disclosure of which would adversely affect the company. In addition, the ability not to disclose confidential information does not eliminate the requirement that disclosure be made of the maximum amount of compensation that is payable to an individual under a performance goal. Confidential information does not include the identity of an executive or the class of executives to which a performance goal applies or the amount of compensation that is payable if the goal is satisfied.

(iv) *Description of compensation.* Disclosure as to the compensation payable under a performance goal must be specific enough so that shareholders can determine the maximum amount of compensation that could be paid to any employee during a specified period. If the terms of the performance goal do not provide for a maximum dollar amount, the disclosure must include the formula under which the compensation would be calculated. Thus, for example, if compensation attributable to the exercise of stock options is equal to the difference in the exercise price and the current value of the stock, disclosure would be required of the maximum number of shares for which grants may be made to any employee and the exercise price of those options (e.g., fair market value on date of grant). In that case, shareholders could calculate the maximum amount of compensation that would be attributable to the exercise of options on the basis of their assumptions as to the future stock price.

(v) *Disclosure requirements of the Securities and Exchange Commission.* To the extent not otherwise specifically provided in this paragraph (e)(4), whether the material terms of a performance goal are adequately disclosed to shareholders is determined under the same standards as apply under the Exchange Act.

(vi) *Frequency of disclosure.* Once the material terms of a performance goal are disclosed to and approved by shareholders, no additional disclosure or approval is required unless the compensation committee changes the material terms of the performance goal. If, however, the compensation committee has authority to change the targets under a performance goal after shareholder approval of the goal, material terms of the performance goal must be disclosed to and reapproved by shareholders no later than the first shareholder meeting that occurs in the fifth year following the year in which shareholders previously approved the performance goal.

(vii) *Shareholder vote.* For purposes of this paragraph (e)(4), the material terms of a performance goal are approved by shareholders if, in a separate vote, a majority of the votes cast on the issue (including abstentions to the extent abstentions are counted as voting under applicable state law) are cast in favor of approval.

(viii) *Members of affiliated group.* For purposes of this paragraph (e)(4), the shareholders of the publicly held member of the affiliated group are treated as the shareholders of all members of the affiliated group.

(ix) *Examples.* This paragraph (e)(4) may be illustrated by the following examples:

Example 1. Corporation X adopts a plan that will pay a specified class of its executives an annual cash bonus based on the overall increase in corporate sales during the year. Under the terms of the plan, the cash bonus of each executive equals $100,000 multiplied by the number of percentage points by which sales increase in the current year when compared to the prior year. Corporation X discloses to its shareholders prior to the vote both the class of executives eligible to receive awards and the annual formula of $100,000 multiplied by the percentage increase in sales. This disclosure meets the requirements of this paragraph (e)(4). Because the compensation committee does not have the authority to establish a different target under the plan, Corporation X need not redisclose to its shareholders and obtain their reapproval of the material terms of the plan until those material terms are changed.

Example 2. The facts are the same as in *Example 1* except that Corporation X discloses only that bonuses will be paid on the basis of the annual increase in sales. This disclosure does not meet the requirements of this paragraph (e)(4) because it does not include the formula for calculating the compensation or a maximum amount of compensation to be paid if the performance goal is satisfied.

Example 3. Corporation Y adopts an incentive compensation plan in 1995 that will pay a specified class of its executives a bonus every 3 years based on the following 3 factors: increases in earnings per share, reduction in costs for specified divisions, and increases in sales by specified divisions. The bonus is payable in cash or in Corporation Y stock, at the option of the executive. Under the terms of the plan, prior to the beginning of each 3-year period, the compensation committee determines the specific targets under each of the three factors (*i.e.*, the amount of the increase in earnings per share, the reduction in costs, and the amount of sales) that must be met in order for the executives to receive a bonus. Under the terms of the plan, the compensation committee retains the discretion to determine whether a bonus will be paid under any one of the goals. The terms of the plan also specify that no executive may receive a bonus in excess of $1,500,000 for any 3-year period. To satisfy the requirements of this paragraph (e)(4), Corporation Y obtains shareholder approval of the plan at its 1995 annual shareholder meeting. In the proxy statement issued to shareholders, Corporation Y need not disclose to shareholders the specific targets that are set by the compensation committee. However, Corporation Y must disclose that bonuses are paid on the basis of earnings per share, reductions in costs, and increases in sales of specified divisions. Corporation Y also must disclose the maximum amount of compensation that any executive may receive under the plan is $1,500,000 per 3-year period. Unless changes in the material terms of the plan are made earlier, Corporation Y need not disclose the material terms of the plan to the shareholders and obtain their reapproval until the first shareholders' meeting held in 2000.

Example 4. The same facts as in *Example 3*, except that prior to the beginning of the second 3-year period, the compensation committee determines that different targets will be set under the plan for that period with regard to all three of the performance criteria (*i.e.*, earnings per share, reductions in costs, and increases in sales). In addition, the compensation committee raises the maximum dollar amount that can be paid under the plan for a 3-year period to $2,000,000. The increase in the maximum dollar amount of compensation under the plan is a changed material term. Thus, to satisfy the requirements of this paragraph (e)(4), Corporation Y must disclose to and obtain approval by the shareholders of the plan as amended.

Example 5. In 1998, Corporation Z establishes a plan under which a specified group of executives will receive a cash bonus not to exceed $750,000 each if a new product that has been in development is completed and ready for sale to customers by January 1, 2000. Although the completion of the new product is a material term of the performance goal under this paragraph (e)(4), the compensation committee determines that the disclosure to shareholders of the performance goal would adversely affect Corporation Z because its competitors would be made aware of the existence and timing of its new product. In this case, the requirements of this paragraph (e)(4) are satisfied if all other material terms, including the maximum amount of compensation, are disclosed and the disclosure affirmatively states that the terms of the performance goal are not being disclosed because the compensation committee has determined that those terms include confidential information, the disclosure of which would adversely affect Corporation Z.

(5) *Compensation committee certification.* The compensation committee must certify in writing prior to payment of the compensation that the performance goals and any other material terms were in fact satisfied. For this purpose, approved minutes of the compensation committee meeting in which the certification is made are treated as a written certification. Certification by the compensation committee is not required for compensation that is attributable solely to the increase in the value of the stock of the publicly held corporation.

(f) *Companies that become publicly held, spinoffs, and similar transactions*—(1) *In general.* In the case of a corporation that was not a publicly held corporation and then becomes a publicly held corporation, the deduction limit of paragraph (b) of this section does not apply to any remuneration paid pursuant to a compensation plan or agreement that existed during the period in which the corporation was not publicly held. However, in the case of such a corporation that becomes publicly held in connection with an initial public offering, this relief applies only to the extent that the prospectus accompanying the initial public offering disclosed information concerning those plans or agreements that satisfied all applicable securities laws then in effect. In accordance with paragraph (c)(1)(ii) of this section, a corporation that is a member of an affiliated group that includes a publicly held corporation is considered publicly held and, therefore, cannot rely on this paragraph (f)(1).

(2) *Reliance period.* Paragraph (f)(1) of this section may be relied upon until the earliest of—

(i) The expiration of the plan or agreement;

(ii) The material modification of the plan or agreement, within the meaning of paragraph (h)(1)(iii) of this section;

(iii) The issuance of all employer stock and other compensation that has been allocated under the plan; or

(iv) The first meeting of shareholders at which directors are to be elected that occurs after the close of the third calendar year following the calendar year in which the initial public offering occurs or, in the case of a privately held corporation that becomes publicly held without an initial public offering, the first calendar year following the calendar year in which the corporation becomes publicly held.

(3) *Stock-based compensation.* Paragraph (f)(1) of this section will apply to any compensation received pursuant to the exercise of a stock option or stock appreciation right, or the substantial vesting of restricted property, granted under a plan or agreement described in paragraph (f)(1) of this section if the grant occurs on or before the earliest of the events specified in paragraph (f)(2) of this section.

(4) *Subsidiaries that become separate publicly held corporations*—(i) *In general.* If a subsidiary that is a member of the affiliated group described in paragraph (c)(1)(ii) of this section becomes a separate publicly held corporation (whether by spinoff or otherwise), any remuneration paid to covered employees of the new publicly held corporation will satisfy the exception for performance-based compensation described in paragraph (e) of this section if the conditions in either paragraph (f)(4)(ii) or (f)(4)(iii) of this section are satisfied.

(ii) *Prior establishment and approval.* Remuneration satisfies the requirements of this paragraph (f)(4)(ii) if the remuneration satisfies the requirements for performance-based compensation set forth in paragraphs (e)(2), (e)(3), and (e)(4) of this section (by application of paragraphs (e)(3)(viii) and (e)(4)(viii) of this section) before the corporation becomes a separate publicly held corporation, and the certification required by paragraph (e)(5) of this section is made by the compensation committee of the new publicly held corporation (but if the performance goals are attained before the corporation becomes a separate publicly held corporation, the certification may be made by the compensation committee referred to in paragraph (e)(3)(viii) of this section before it becomes a separate publicly held corporation). Thus, this paragraph (f)(4)(ii) requires that the outside directors and shareholders (within the meaning of paragraphs (e)(3)(viii) and (e)(4)(viii) of this section) of the corporation before it becomes a separate publicly held corporation establish and approve, respectively, the performance-based compensation for the covered employees of the new publicly held corporation in accordance with paragraphs (e)(3) and (e)(4) of this section.

(iii) *Transition period.* Remuneration satisfies the requirements of this paragraph (f)(4)(iii) if the remuneration satisfies all of the requirements of paragraphs (e)(2), (e)(3), and (e)(5) of this section. The outside directors (within the meaning of paragraph (e)(3)(viii) of this section) of the corporation before it becomes a separate publicly held corporation, or the outside directors of the new publicly held corporation, may establish and administer the performance goals for the covered employees of the new publicly held corporation for purposes of satisfying the requirements of paragraphs (e)(2) and (e)(3) of this section. The certification required by paragraph (e)(5) of this section must be made by the compensation committee of the new publicly held corporation. However, a taxpayer may rely on this paragraph (f)(4)(iii) to satisfy the requirements of paragraph (e) of this section only for compensation paid, or stock options, stock appreciation rights, or restricted property granted, prior to the first regularly scheduled meeting of the shareholders of the new publicly held corporation that occurs more than 12 months after the date the corporation becomes a separate publicly held corporation. Compensation paid, or stock options, stock appreciation rights, or restricted property granted, on or after the date of that meeting of shareholders must satisfy all requirements of paragraph (e) of this section, including the shareholder approval requirement of paragraph (e)(4) of this section, in order to satisfy the requirements for performance-based compensation.

(5) *Example.* The following example illustrates the application of paragraph (f)(4)(ii) of this section:

Example. Corporation P, which is publicly held, decides to spin off Corporation S, a wholly owned subsidiary of Corporation P. After the spinoff, Corporation S will be a separate publicly held corporation. Before the spinoff, the compensation committee of Corporation P, pursuant to paragraph (e)(3)(viii) of this section, establishes a bonus plan for the executives of Corporation S that provides for bonuses payable after the spinoff and that satisfies the requirements of paragraph (e)(2) of this section. If, pursuant to paragraph (e)(4)(viii) of this section, the shareholders of Corporation P approve the plan prior to the spinoff, that approval will satisfy the requirements of paragraph (e)(4) of this section with respect to compensation paid pursuant to the bonus plan after the spinoff. However, the compensation committee of Corporation S will be required to certify that the goals are satisfied prior to the payment of the bonuses in order for the bonuses to be considered performance-based compensation.

(g) *Coordination with disallowed excess parachute payments.* The $1,000,000 limitation in paragraph (b) of this section is reduced (but not below zero) by the amount (if any) that would have been included in the compensation of the covered employee for the taxable year but for being disallowed by reason of section 280G. For example, assume that during a taxable year a corporation pays $1,500,000 to a covered employee and no portion satisfies the exception in paragraph (d) of this section for commissions or paragraph (e) of this section for qualified performance-based compensation. Of the $1,500,000, $600,000 is an excess parachute payment, as defined in section 280G(b)(1) and is disallowed by reason of that section. Because the excess parachute payment reduces the limitation of paragraph (b) of this section, the corporation can deduct $400,000, and $500,000 of the otherwise deductible amount is nondeductible by reason of section 162(m).

(h) *Transition rules*—(1) *Compensation payable under a written binding contract which was in effect on February 17, 1993*—(i) *General rule.* The deduction limit of paragraph (b) of this section does not apply to any compensation payable under a written binding contract that was in effect on February 17, 1993. The preceding sentence does not apply unless, under applicable state law, the corporation is obligated to pay the compensation if the employee performs services. However, the deduction limit of paragraph (b) of this section does apply to a contract that is renewed after February 17, 1993. A written binding contract that is terminable or cancelable by the corporation after February 17, 1993, without the employee's consent is treated as a new contract as of the date that any such termination or cancellation, if made, would be effective. Thus, for example, if the terms of a contract provide that it will be automatically renewed as of a certain date unless either the corporation or the employee gives notice of termination of the contract at least 30 days before that date, the contract is treated as a new contract as of the date that termination would be effective if that notice were given. Similarly, for example, if the terms of a contract provide that the contract will be terminated or canceled as of a certain date unless either the corporation or the employee elects to renew within 30 days of that date, the contract is treated as renewed by the corporation as of that date. Alternatively, if the corporation will remain legally obligated by the terms of a contract beyond a certain date at the sole discretion of the employee, the contract will not be treated as a new contract as of that date if the employee exercises the discretion to keep the corporation bound to the contract. A contract is not treated as terminable or cancelable if it can be terminated or canceled only by terminating the employment relationship of the employee.

(ii) *Compensation payable under a plan or arrangement.* If a compensation plan or arrangement meets the requirements of paragraph (h)(1)(i) of this section, the compensation paid to an employee pursuant to the plan or arrangement will not be subject to the deduction limit of paragraph (b) of this section even though the employee was not eligible to participate in the plan as of February 17, 1993. However, the preceding sentence does not apply unless the employee was employed on February 17, 1993, by the corporation that maintained the plan or arrangement, or the employee had the right to participate in the plan or arrangement under a written binding contract as of that date.

(iii) *Material modifications.* (A) Paragraph (h)(1)(i) of this section will not apply to any written binding contract that is materially modified. A material modification occurs when the contract is amended to increase the amount of compensation payable to the employee. If a binding written contract is materially modified, it is treated as a new contract entered into as of the date of the material modification. Thus, amounts received by an employee under the contract prior to a material modification are not affected, but amounts received subsequent to the material modification are not treated as paid under a binding, written contract described in paragraph (h)(1)(i) of this section.

(B) A modification of the contract that accelerates the payment of compensation will be treated as a material modification unless the amount of compensation paid is discounted to reasonably reflect the time value of money. If the contract is modified to defer the payment of compensation, any compensation paid in excess of the amount that was originally payable to the employee under the contract will not be treated as a material modification if the additional amount is based on either a reasonable rate of interest or one or more predetermined actual investments (whether or not assets associated with the amount originally owed are actually invested therein) such that the amount payable by the employer at the later date will be based on the actual rate of return of the specific investment (including any decrease as well as any increase in the value of the investment).

(C) The adoption of a supplemental contract or agreement that provides for increased compensation, or the payment of additional compensation, is a material modification of a binding, written contract where the facts and circumstances show that the additional compensation is paid on the basis of substantially the same elements or conditions as the compensation that is otherwise paid under the written binding contract. However, a material modification of a written binding contract does not include a supplemental payment that is equal to or less than a reasonable cost-of-living increase over the payment made in the preceding year under that written binding contract. In addition, a supplemental payment of compensation that satisfies the requirements of qualified performance-based compensation in paragraph (e) of this section will not be treated as a material modification.

(iv) Examples. The following examples illustrate the exception of this paragraph (h)(1):

Example 1. Corporation X executed a 3-year compensation arrangement with C on February 15, 1993, that constitutes a written binding contract under applicable state law. The terms of the arrangement provide for automatic extension after the 3-year term for additional 1-year periods, unless the corporation exercises its option to terminate the arrangement within 30 days of the end of the 3-year term or, thereafter, within 30 days before each anniversary date. Termination of the compensation arrangement does not require the termination of C's employment relationship with Corporation X. Unless terminated, the arrangement is treated as renewed on February 15, 1996, and the deduction limit of paragraph (b) of this section applies to payments under the arrangement after that date.

Example 2. Corporation Y executed a 5-year employment agreement with B on January 1, 1992, providing for a salary of $900,000 per year. Assume that this agreement constitutes a written binding contract under applicable state law. In 1992 and 1993, B receives the salary of $900,000 per year. In 1994, Corporation Y increases B's salary with a payment of $20,000. The $20,000 supplemental payment does not constitute a material modification of the written binding contract because the $20,000 payment is less than or equal to a reasonable cost-of-living increase from 1993. However, the $20,000 supplemental payment is subject to the limitation in paragraph (b) of this section. On January 1, 1995, Corporation Y increases B's salary to $1,200,000. The $280,000 supplemental payment is a material modification of the written binding contract because the additional compensation is paid on the basis of substantially the same elements or conditions as the compensation that is otherwise paid under the written binding contract and it is greater than a reasonable, annual cost-of-living increase. Because the written binding contract is materially modified as of January 1, 1995, all compensation paid to B in 1995 and thereafter is subject to the deduction limitation of section 162(m).

Example 3. Assume the same facts as in *Example 2*, except that instead of an increase in salary, B receives a restricted stock grant subject to B's continued employment for the balance of the contract. The restricted stock grant is not a material modification of the binding written contract because any additional compensation paid to B under the grant is not paid on the basis of substantially the same elements and conditions as B's salary because it is based both on the stock price and B's continued service. However, compensation attributable to the restricted stock grant is subject to the deduction limitation of section 162(m).

(2) *Special transition rule for outside directors.* A director who is a disinterested director is treated as satisfying the requirements of an outside director under paragraph (e)(3) of this section until the first meeting of shareholders at which directors are to be elected that occurs on or after January 1, 1996. For purposes of this paragraph (h)(2) and paragraph (h)(3) of this section, a director is a disinterested director if the director is disinterested within the meaning of Rule 16b–3(c)(2)(i), 17 CFR 240.16b–3(c)(2)(i), under the Exchange Act (including the provisions of Rule 16b–3(d)(3), as in effect on April 30, 1991).

(3) *Special transition rule for previously-approved plans—(i) In general.* Any compensation paid under a plan or agreement approved by shareholders before December 20, 1993, is treated as satisfying the requirements of paragraphs (e)(3) and (e)(4) of this section, provided that the directors administering the plan or agreement are disinterested directors and the plan was approved by shareholders in a manner consistent with Rule 16b–3(b), 17 CFR 240.16b–3(b), under the Exchange Act or Rule 16b–3(a), 17 CFR 240.16b–3(a) (as contained in 17 CFR part 240 revised April 1, 1990). In addition, for purposes of satisfying the requirements of paragraph (e)(2)(vi) of this section, a plan or agreement is treated as stating a maximum number of shares with respect to which an option or right may be granted to any employee if the plan or agreement that was approved by the shareholders provided for an aggregate limit, consistent with Rule 16b–3(b), 17

CFR 250.16b–3(b), on the shares of employer stock with respect to which awards may be made under the plan or agreement.

(ii) *Reliance period.* The transition rule provided in this paragraph (h)(3) shall continue and may be relied upon until the earliest of—

(A) The expiration or material modification of the plan or agreement;

(B) The issuance of all employer stock and other compensation that has been allocated under the plan; or

(C) The first meeting of shareholders at which directors are to be elected that occurs after December 31, 1996.

(iii) *Stock-based compensation.* This paragraph (h)(3) will apply to any compensation received pursuant to the exercise of a stock option or stock appreciation right, or the substantial vesting of restricted property, granted under a plan or agreement described in paragraph (h)(3)(i) of this section if the grant occurs on or before the earliest of the events specified in paragraph (h)(3)(ii) of this section.

(iv) *Example.* The following example illustrates the application of this paragraph (h)(3):

Example. Corporation Z adopted a stock option plan in 1991. Pursuant to Rule 16b–3 under the Exchange Act, the stock option plan has been administered by disinterested directors and was approved by Corporation Z shareholders. Under the terms of the plan, shareholder approval is not required again until 2001. In addition, the terms of the stock option plan include an aggregate limit on the number of shares available under the plan. Option grants under the Corporation Z plan are made with an exercise price equal to or greater than the fair market value of Corporation Z stock. Compensation attributable to the exercise of options that are granted under the plan before the earliest of the dates specified in paragraph (h)(3)(ii) of this section will be treated as satisfying the requirements of paragraph (e) of this section for qualified performance-based compensation, regardless of when the options are exercised.

(i) [Reserved]

(j) *Effective date*—(1) *In general.* Section 162(m) and this section apply to compensation that is otherwise deductible by the corporation in a taxable year beginning on or after January 1, 1994.

(2) *Delayed effective date for certain provisions*—(i) *Date on which remuneration is considered paid.* Notwithstanding paragraph (j)(1) of this section, the rules in the second sentence of each of paragraphs (e)(3)(ii)(A), (e)(3)(ii)(B), and (e)(3)(ii)(C) of this section for determining the date or dates on which remuneration is considered paid to a director are effective for taxable years beginning on or after January 1, 1995. Prior to those taxable years, taxpayers must follow the rules in paragraphs (e)(3)(ii)(A), (e)(3)(ii)(B), and (e)(3)(ii)(C) of this section or another reasonable, good faith interpretation of section 162(m) with respect to the date or dates on which remuneration is considered paid to a director.

(ii) *Separate treatment of publicly held subsidiaries.* Notwithstanding paragraph (j)(1) of this section, the rule in paragraph (c)(1)(ii) of this section that treats publicly held subsidiaries as separately subject to section 162(m) is effective as of the first regularly scheduled meeting of the shareholders of the publicly held subsidiary that occurs more than 12 months after December 2, 1994. The rule for stock-based compensation set forth in paragraph (f)(3) of this section will apply for this purpose, except that the grant must occur before the shareholder meeting specified in this paragraph (j)(2)(ii). Taxpayers may choose to rely on the rule referred to in the first sentence of this paragraph (j)(2)(ii) for the period prior to the effective date of the rule.

(iii) *Subsidiaries that become separate publicly held corporations.* Notwithstanding paragraph (j)(1) of this section, if a subsidiary of a publicly held corporation becomes a separate publicly held corporation as described in paragraph (f)(4)(i) of this section, then, for the duration of the reliance period described in paragraph (f)(2) of this section, the rules of paragraph (f)(1) of this section are treated as applying (and the rules of paragraph (f)(4) of this section do not apply) to remuneration paid to covered employees of that new publicly held corporation pursuant to a plan or agreement that existed prior to December 2, 1994, provided that the treatment of that remuneration as performance-based is in accordance with a reasonable, good faith interpretation of section 162(m). However, if remuneration is paid to covered employees of that new publicly held corporation pursuant to a plan or agreement that existed prior to December 2, 1994, but that remuneration is not performance-based under a reasonable, good faith interpretation of section 162(m), the rules of paragraph (f)(1) of this section will be treated as applying only until the first regularly scheduled meeting of shareholders that occurs more than 12 months after December 2, 1994. The rules of paragraph (f)(4) of this section will apply as of that first regularly scheduled meeting. The rule for stock-based compensation set forth in paragraph (f)(3) of this section will apply for purposes of this paragraph (j)(2)(iii), except that the grant must occur before the shareholder meeting specified in the preceding sentence if the remuneration is not performance-based under a reasonable, good faith interpretation of section 162(m). Taxpayers may choose to rely on the rules of paragraph (f)(4) of this section for the period prior to the applicable effective date referred to in the first or second sentence of this paragraph (j)(2)(iii).

(iv) *Bonus pools.* Notwithstanding paragraph (j)(1) of this section, the rules in paragraph (e)(2)(iii)(A) that limit the sum of individual percentages of a bonus pool to 100 percent will not apply to remuneration paid before January 1, 2001, based on performance in any performance period that began prior to December 20, 1995.

(v) *Compensation based on a percentage of salary or base pay.* Notwithstanding paragraph (j)(1) of this section, the requirement in paragraph (e)(4)(i) of this section that, in the case of certain formulas based on a percentage of salary or base pay, a corporation disclose to shareholders the maximum dollar amount of compensation that could be paid to the employee, will apply only to plans approved by shareholders after April 30, 1995.

[T.D. 8650, 60 FR 65537, Dec. 20, 1995, as amended at 61 FR 4350, Feb. 6, 1996]

§ 1.162–28 Allocation of costs to lobbying activities.

(a) *Introduction*—(1) *In general.* Section 162(e)(1) denies a deduction for certain amounts paid or incurred in connection with activities described in section 162(e)(1) (A) and (D) (*lobbying activities*). To determine the nondeductible amount, a taxpayer must allocate costs to lobbying activities. This section describes costs that must be allocated to lobbying activities and prescribes rules permitting a taxpayer to use a reasonable method to allocate those costs. This section does not apply to taxpayers subject to section 162(e)(5)(A). In addition, this section does not apply for purposes of sections 4911 and 4945 and the regulations thereunder.

(2) *Recordkeeping.* For recordkeeping requirements, see section 6001 and the regulations thereunder.

(b) *Reasonable method of allocating costs*—(1) *In general.* A taxpayer must use a reasonable method to allocate the costs described in paragraph (c) of this section to lobbying activities. A method is not reasonable unless it is applied consistently and is consistent with the special rules in paragraph (g) of this section. Except as provided in paragraph (b)(2) of this section, reasonable methods of allocating costs to lobbying activities include (but are not limited to)—

(i) The ratio method described in paragraph (d) of this section;

(ii) The gross-up method described in paragraph (e) of this section; and

(iii) A method that applies the principles of section 263A and the regulations thereunder (see paragraph (f) of this section).

(2) *Taxpayers not permitted to use certain methods.* A taxpayer (other than one subject to section 6033(e)) that does not pay or incur reasonable labor costs for persons engaged in lobbying activities may not use the gross-up method. For example, a partnership or sole proprietorship in which the lobbying activities are performed by the owners who do not receive a salary or guaranteed payment for services does not pay or incur reasonable labor costs for persons engaged in those activities and may not use the gross-up method.

(c) *Costs allocable to lobbying activities*—(1) *In general.* Costs properly allocable to lobbying activities include labor costs and general and administrative costs.

(2) *Labor costs.* For each taxable year, labor costs include costs attributable to full-time, part-time, and contract

employees. Labor costs include all elements of compensation, such as basic compensation, overtime pay, vacation pay, holiday pay, sick leave pay, payroll taxes, pension costs, employee benefits, and payments to a supplemental unemployment benefit plan.

(3) *General and administrative costs.* For each taxable year, general and administrative costs include depreciation, rent, utilities, insurance, maintenance costs, security costs, and other administrative department costs (for example, payroll, personnel, and accounting).

(d) *Ratio method*—(1) *In general.* Under the ratio method described in this paragraph (d), a taxpayer allocates to lobbying activities the sum of its third-party costs (as defined in paragraph (d)(5) of this section) allocable to lobbying activities and the costs determined by using the following formula:

$$\frac{\text{Lobbying labor hours}}{\text{Total labor hours}} \times \begin{array}{l}\text{Total costs}\\ \text{of operations.}\end{array}$$

(2) *Lobbying labor hours.* Lobbying labor hours are the hours that a taxpayer's personnel spend on lobbying activities during the taxable year. A taxpayer may use any reasonable method to determine the number of labor hours spent on lobbying activities and may use the de minimis rule of paragraph (g)(1) of this section. A taxpayer may treat as zero the lobbying labor hours of personnel engaged in secretarial, clerical, support, and other administrative activities (as opposed to activities involving significant judgment with respect to lobbying activities). Thus, for example, the hours spent on lobbying activities by para-professionals and analysts may not be treated as zero.

(3) *Total labor hours.* Total labor hours means the total number of hours that a taxpayer's personnel spend on a taxpayer's trade or business during the taxable year. A taxpayer may make reasonable assumptions concerning total hours spent by personnel on the taxpayer's trade or business. For example, it may be reasonable, based on all the facts and circumstances, to assume that all full-time personnel spend 1,800 hours per year on a taxpayer's trade or business. If, under paragraph (d)(2) of this section, a taxpayer treats as zero the lobbying labor hours of personnel engaged in secretarial, clerical, support, and other administrative activities, the taxpayer must also treat as zero the total labor hours of all personnel engaged in those activities.

(4) *Total costs of operations.* A taxpayer's total costs of operations means the total costs of the taxpayer's trade or business for a taxable year, excluding third-party costs (as defined in paragraph (d)(5) of this section).

(5) *Third-party costs.* Third-party costs are amounts paid or incurred in whole or in part for lobbying activities conducted by third parties (such as amounts paid to taxpayers subject to section 162(e)(5)(A) or dues or other similar amounts that are not deductible in whole or in part under section 162(e)(3)) and amounts paid or incurred for travel (including meals and lodging while away from home) and entertainment relating in whole or in part to lobbying activities.

(6) *Example.* The provisions of this paragraph (d) are illustrated by the following example.

Example. (i) In 1996, three full-time employees, A, B, and C, of Taxpayer W engage in both lobbying activities and nonlobbying activities. A spends 300 hours, B spends 1,700 hours, and C spends 1,000 hours on lobbying activities, for a total of 3,000 hours spent on lobbying activities for W. W reasonably assumes that each of its three employees spends 2,000 hours a year on W's business.

(ii) W's total costs of operations are $300,000. W has no third-party costs.

(iii) Under the ratio method, X allocates $150,000 to its lobbying activities for 1996, as follows:

$$\frac{\text{Lobbying labor hours}}{\text{Total labor hours}} \times \begin{array}{l}\text{Total costs}\\ \text{of operations}\end{array} + \begin{array}{l}\text{Allocable third-}\\ \text{party costs}\end{array} = \begin{array}{l}\text{Costs allocable to}\\ \text{lobbying activities}\end{array}$$

$$\left[\frac{300+1{,}700+1{,}000}{6{,}000} \times \$300{,}000\right] + [0] = \$150{,}000.$$

(e) *Gross-up method*—(1) *In general.* Under the gross-up method described in this paragraph (e)(1), the taxpayer allocates to lobbying activities the sum of its third-party costs (as defined in paragraph (d)(5) of this section) allocable to lobbying activities and 175 percent of its basic lobbying labor costs (as defined in paragraph (e)(3) of this section) of all personnel.

(2) *Alternative gross-up method.* Under the alternative gross-up method described in this paragraph (e)(2), the taxpayer allocates to lobbying activities the sum of its third-party costs (as defined in paragraph (d)(5) of this section) allocable to lobbying activities and 225 percent of its basic lobbying labor costs (as defined in paragraph (e)(3)), excluding the costs of personnel who engage in secretarial, clerical, support, and other administrative activities (as opposed to activities involving significant judgment with respect to lobbying activities).

(3) *Basic lobbying labor costs.* For purposes of this paragraph (e), basic lobbying labor costs are the basic costs of lobbying labor hours (as defined in paragraph (d)(2) of this section) determined for the appropriate personnel. For purposes of this paragraph (e), basic costs of lobbying labor hours are wages or other similar costs of labor, including, for example, guaranteed payments for services. Basic costs do not include pension, profit-sharing, employee benefits, and supplemental unemployment benefit plan costs, or other similar costs.

(4) *Example.* The provisions of this paragraph (e) are illustrated by the following example.

Example. (i) In 1996, three employees, A, B, and C, of Taxpayer X engage in both lobbying activities and nonlobbying activities. A spends 300 hours, B spends 1,700 hours, and C spends 1,000 hours on lobbying activities.

(ii) X has no third-party costs.

(iii) For purposes of the gross-up method, X determines that its basic labor costs are \$20 per hour for A, \$30 per hour for B, and \$25 per hour for C. Thus, its basic lobbying labor costs are (\$20×300)+(\$30×1,700)+(\$25×1,000), or (\$6,000+\$51,000+\$25,000), for total basic lobbying labor costs for 1996 of \$82,000.

(iv) Under the gross-up method, X allocates \$143,500 to its lobbying activities for 1996, as follows:

$$175\% \times \begin{array}{l}\text{Basic lobbying labor}\\ \text{costs of all personnel}\end{array} + \begin{array}{l}\text{Allocable third-}\\ \text{party costs}\end{array} = \begin{array}{l}\text{Costs allocable to}\\ \text{lobbying activities}\end{array}$$

$$[175\% \times \$82{,}000] + [0] = \$143{,}500.$$

(f) *Section 263A cost allocation methods*—(1) *In general.* A taxpayer may allocate its costs to lobbying activities under the principles set forth in section 263A and the regulations thereunder, except to the extent inconsistent with paragraph (g) of this section. For this purpose, lobbying activities are considered a service department or function. Therefore, a taxpayer may allocate costs to lobbying activities by applying the methods provided in §§ 1.263A–1 through 1.263A–3. See § 1.263A–1(e)(4), which describes service costs generally; § 1.263A–1(f), which sets forth cost allocation methods available under section 263A; and § 1.263A–1(g)(4), which provides methods of allocating service costs.

(2) *Example.* The provisions of this paragraph (f) are illustrated by the following example.

Example. (i) Three full-time employees, A, B, and C, work in the Washington office of Taxpayer Y, a manufacturing concern. They each engage in lobbying activities and non-lobbying activities. In 1996, A spends 75 hours, B spends 1,750 hours, and C spends 2,000 hours on lobbying activities. A's hours are not spent on direct contact lobbying as defined in paragraph (g)(2) of this section. All three work 2,000 hours during 1996. The Washington office also employs one secretary, D, who works exclusively for A, B, and C.

(ii) In addition, three departments in the corporate headquarters in Chicago benefit the Washington office: Public affairs, human resources, and insurance.

(iii) Y is subject to section 263A and uses the step-allocation method to allocate its service costs. Prior to the amendments to section 162(e), the Washington office was treated as an overall management function for purposes of section 263A. As such, its costs were fully deductible and no further allocations were made under Y's step allocation. Following the amendments to section 162(e), Y adopts its 263A step-allocation methodology to allocate costs to lobbying activities. Y adds a lobbying department to its step-allocation program, which results in an allocation of costs to the lobbying department from both the Washington office and the Chicago office.

(iv) Y develops a labor ratio to allocate its Washington office costs between the newly defined lobbying department and the overall management department. To determine the hours allocable to lobbying activities, Y uses the de minimis rule of paragraph (g)(1) of this section. Under this rule, A's hours spent on lobbying activities are treated as zero because less than 5 percent of A's time is spent on lobbying (75/2,000 = 3.75%). In addition, because D works exclusively for personnel engaged in lobbying activities, D's hours are not used to develop the allocation ratio. Y assumes that D's allocation of time follows the average time of all the personnel engaged in lobbying activities. Thus, Y's labor ratio is determined as follows:

Employee	Departments		
	Lobbying hours	Overall management hours	Total hours
A	0	2,000	2,000
B	1,750	250	2,000
C	2,000	0	2,000
Totals	3,750	2,250	6,000

$$\text{Lobbying Department Ratio} = \frac{3{,}750}{6{,}000} = 62.5\%$$

$$\text{Overall Management Department Ratio} = \frac{2{,}250}{6{,}000} = 37.5\%$$

(v) In 1996, the Washington office has the following costs:

Account	Amount
Professional Salaries and Benefits	$660,000
Clerical Salaries and Benefits	50,000
Rent Expense	100,000
Depreciation on Furniture and Equip	40,000
Utilities	15,000
Outside Payroll Service	5,000
Miscellaneous	10,000
Third-Party Lobbying (Law Firm)	90,000
Total Washington Costs	$970,000

(vi) In addition, $233,800 of costs from the public affairs department, $30,000 of costs from the insurance department, and $5,000 of costs from the human resources department are allocable to the Washington office from departments in Chicago. Therefore, the Washington office costs are allocated to the Lobbying and Overall Management departments as follows:

Total Washington department costs from above	$970,000
Plus Costs Allocated From Other Departments	268,800
Less third-party costs directly allocable to lobbying	(90,000)
Total Washington office costs	1,148,800

	Lobbying department	Overall management department
Department Allocation Ratios	62.5%	37.5%
× Washington Office Costs	$1,148,800	$1,148,800
= Costs Allocated to Departments	$718,000	$430,800

(vii) Y's step-allocation for its Lobbying Department is determined as follows:

Y's step-allocation	Lobbying department
Washington costs allocated to lobbying department	$718,000
Plus third-party costs	90,000

Y's step-allocation	Lobbying department
Total costs of lobbying activities	808,000

(g) *Special rules.* The following rules apply to any reasonable method of allocating costs to lobbying activities.

(1) *De minimis rule for labor hours.* Subject to the exception provided in paragraph (g)(2) of this section, a taxpayer may treat time spent by an individual on lobbying activities as zero if less than five percent of the person's time is spent on lobbying activities. Reasonable methods must be used to determine if less than five percent of a person's time is spent on lobbying activities.

(2) *Direct contact lobbying labor hours.* Notwithstanding paragraph (g)(1) of this section, a taxpayer must treat all hours spent by a person on direct contact lobbying (as well as the hours that person spends in connection with direct contact lobbying, including time spent traveling that is allocable to the direct contact lobbying) as labor hours allocable to lobbying activities. An activity is direct contact lobbying if it is a meeting, telephone conversation, letter, or other similar means of communication with a legislator (other than a local legislator) or covered executive branch official (as defined in section 162(e)(6)) and otherwise qualifies as a lobbying activity. A person who engages in research, preparation, and other background activities related to direct contact lobbying but who does not make direct contact with a legislator or covered executive branch official is not engaged in direct contact lobbying.

(3) *Taxpayer defined.* For purposes of this section, a taxpayer includes a tax-exempt organization subject to section 6033(e).

(h) *Effective date.* This section is effective for amounts paid or incurred on or after July 21, 1995. Taxpayers must adopt a reasonable interpretation of sections 162(e)(1)(A) and (D) for amounts paid or incurred before this date.

[T.D. 8602, 60 FR 37573, July 21, 1995]

§ 1.162–29 Influencing legislation.

(a) *Scope.* This section provides rules for determining whether an activity is influencing legislation for purposes of section 162(e)(1)(A). This section does not apply for purposes of sections 4911 and 4945 and the regulations thereunder.

(b) *Definitions.* For purposes of this section—

(1) *Influencing legislation.* Influencing legislation means—

(i) Any attempt to influence any legislation through a lobbying communication; and

(ii) All activities, such as research, preparation, planning, and coordination, including deciding whether to make a lobbying communication, engaged in for a purpose of making or supporting a lobbying communication, even if not yet made. See paragraph (c) of this section for rules for determining the purposes for engaging in an activity.

(2) *Attempt to influence legislation.* An attempt to influence any legislation through a lobbying communication is making the lobbying communication.

(3) *Lobbying communication.* A lobbying communication is any communication (other than any communication compelled by subpoena, or otherwise compelled by Federal or State law) with any member or employee of a legislative body or any other government official or employee who may participate in the formulation of the legislation that—

(i) Refers to specific legislation and reflects a view on that legislation; or

(ii) Clarifies, amplifies, modifies, or provides support for views reflected in a prior lobbying communication.

(4) *Legislation.* Legislation includes any action with respect to Acts, bills, resolutions, or other similar items by a legislative body. Legislation includes a proposed treaty required to be submitted by the President to the Senate for its advice and consent from the time the President's representative begins to negotiate its position with the prospective parties to the proposed treaty.

(5) *Specific legislation.* Specific legislation includes a specific legislative proposal that has not been introduced in a legislative body.

(6) *Legislative bodies.* Legislative bodies are Congress, state legislatures, and

other similar governing bodies, excluding local councils (and similar governing bodies), and executive, judicial, or administrative bodies. For this purpose, administrative bodies include school boards, housing authorities, sewer and water districts, zoning boards, and other similar Federal, State, or local special purpose bodies, whether elective or appointive.

(7) *Examples.* The provisions of this paragraph (b) are illustrated by the following examples.

Example 1. Taxpayer P's employee, A, is assigned to approach members of Congress to gain their support for a pending bill. A drafts and P prints a position letter on the bill. P distributes the letter to members of Congress. Additionally, A personally contacts several members of Congress or their staffs to seek support for P's position on the bill. The letter and the personal contacts are lobbying communications. Therefore, P is influencing legislation.

Example 2. Taxpayer R is invited to provide testimony at a congressional oversight hearing concerning the implementation of The Financial Institutions Reform, Recovery, and Enforcement Act of 1989. Specifically, the hearing concerns a proposed regulation increasing the threshold value of commercial and residential real estate transactions for which an appraisal by a state licensed or certified appraiser is required. In its testimony, R states that it is in favor of the proposed regulation. Because R does not refer to any specific legislation or reflect a view on any such legislation, R has not made a lobbying communication. Therefore, R is not influencing legislation.

Example 3. State X enacts a statute that requires the licensing of all day-care providers. Agency B in State X is charged with writing rules to implement the statute. After the enactment of the statute, Taxpayer S sends a letter to Agency B providing detailed proposed rules that S recommends Agency B adopt to implement the statute on licensing of day-care providers. Because the letter to Agency B neither refers to nor reflects a view on any specific legislation, it is not a lobbying communication. Therefore, S is not influencing legislation.

Example 4. Taxpayer T proposes to a State Park Authority that it purchase a particular tract of land for a new park. Even if T's proposal would necessarily require the State Park Authority eventually to seek appropriations to acquire the land and develop the new park, T has not made a lobbying communication because there has been no reference to, nor any view reflected on, any specific legislation. Therefore, T's proposal is not influencing legislation.

Example 5. (i) Taxpayer U prepares a paper that asserts that lack of new capital is hurting State X's economy. The paper indicates that State X residents either should invest more in local businesses or increase their savings so that funds will be available to others interested in making investments. U forwards a summary of the unpublished paper to legislators in State X with a cover letter that states in part:

You must take action to improve the availability of new capital in the state.

(ii) Because neither the summary nor the cover letter refers to any specific legislative proposal and no other facts or circumstances indicate that they refer to an existing legislative proposal, forwarding the summary to legislators in State X is not a lobbying communication. Therefore, U is not influencing legislation.

(iii) Q, a member of the legislature of State X, calls U to request a copy of the unpublished paper from which the summary was prepared. U forwards the paper with a cover letter that simply refers to the enclosed materials. Because U's letter to Q and the unpublished paper do not refer to any specific legislation or reflect a view on any such legislation, the letter is not a lobbying communication. Therefore, U is not influencing legislation.

Example 6. (i) Taxpayer V prepares a paper that asserts that lack of new capital is hurting the national economy. The paper indicates that lowering the capital gains rate would increase the availability of capital and increase tax receipts from the capital gains tax. V forwards the paper to its representatives in Congress with a cover letter that says, in part:

I urge you to support a reduction in the capital gains tax rate.

(ii) V's communication is a lobbying communication because it refers to and reflects a view on a specific legislative proposal (*i.e.*, lowering the capital gains rate). Therefore, V is influencing legislation.

Example 7. Taxpayer W, based in State A, notes in a letter to a legislator of State A that State X has passed a bill that accomplishes a stated purpose and then says that State A should pass such a bill. No such bill has been introduced into the State A legislature. The communication is a lobbying communication because it refers to and reflects a view on a specific legislative proposal. Therefore, W is influencing legislation.

Example 8. (i) Taxpayer Y represents citrus fruit growers. Y writes a letter to a United States senator discussing how pesticide O has benefited citrus fruit growers and disputing problems linked to its use. The letter discusses a bill pending in Congress and states in part:

This bill would prohibit the use of pesticide O. If citrus growers are unable to use this pesticide, their crop yields will be severely reduced, leading to higher prices for consumers and lower profits, even bankruptcy, for growers.

(ii) Y's views on the bill are reflected in this statement. Thus, the communication is a lobbying communication, and Y is influencing legislation.

Example 9. (i) B, the president of Taxpayer Z, an insurance company, meets with Q, who chairs the X state legislature's committee with jurisdiction over laws regulating insurance companies, to discuss the possibility of legislation to address current problems with surplus-line companies. B recommends that legislation be introduced that would create minimum capital and surplus requirements for surplus-line companies and create clearer guidelines concerning the risks that surplus-line companies can insure. B's discussion with Q is a lobbying communication because B refers to and reflects a view on a specific legislative proposal. Therefore, Z is influencing legislation.

(ii) Q is not convinced that the market for surplus-line companies is substantial enough to warrant such legislation and requests that B provide information on the amount and types of risks covered by surplus-line companies. After the meeting, B has employees of Z prepare estimates of the percentage of property and casualty insurance risks handled by surplus-line companies. B sends the estimates with a cover letter that simply refers to the enclosed materials. Although B's follow-up letter to Q does not refer to specific legislation or reflect a view on such legislation, B's letter supports the views reflected in the earlier communication. Therefore, the letter is a lobbying communication and Z is influencing legislation.

(c) *Purpose for engaging in an activity*—(1) *In general.* The purposes for engaging in an activity are determined based on all the facts and circumstances. Facts and circumstances include, but are not limited to—

(i) Whether the activity and the lobbying communication are proximate in time;

(ii) Whether the activity and the lobbying communication relate to similar subject matter;

(iii) Whether the activity is performed at the request of, under the direction of, or on behalf of a person making the lobbying communication;

(iv) Whether the results of the activity are also used for a nonlobbying purpose; and

(v) Whether, at the time the taxpayer engages in the activity, there is specific legislation to which the activity relates.

(2) *Multiple purposes.* If a taxpayer engages in an activity both for the purpose of making or supporting a lobbying communication and for some nonlobbying purpose, the taxpayer must treat the activity as engaged in partially for a lobbying purpose and partially for a nonlobbying purpose. This division of the activity must result in a reasonable allocation of costs to influencing legislation. See §1.162–28 (allocation rules for certain expenditures to which section 162(e)(1) applies). A taxpayer's treatment of these multiple-purpose activities will, in general, not result in a reasonable allocation if it allocates to influencing legislation—

(i) Only the incremental amount of costs that would not have been incurred but for the lobbying purpose; or

(ii) An amount based solely on the number of purposes for engaging in that activity without regard to the relative importance of those purposes.

(3) *Activities treated as having no purpose to influence legislation.* A taxpayer that engages in any of the following activities is treated as having done so without a purpose of making or supporting a lobbying communication—

(i) Before evidencing a purpose to influence any specific legislation referred to in paragraph (c)(3)(i)(A) or (B) of this section (or similar legislation)—

(A) Determining the existence or procedural status of specific legislation, or the time, place, and subject of any hearing to be held by a legislative body with respect to specific legislation; or

(B) Preparing routine, brief summaries of the provisions of specific legislation;

(ii) Performing an activity for purposes of complying with the requirements of any law (for example, satisfying state or federal securities law filing requirements);

(iii) Reading any publications available to the general public or viewing or listening to other mass media communications; and

(iv) Merely attending a widely attended speech.

(4) *Examples.* The provisions of this paragraph (c) are illustrated by the following examples.

Example 1. (i) *Facts.* In 1997, Agency F issues proposed regulations relating to the business of Taxpayer W. There is no specific legislation during 1997 that is similar to the regulatory proposal. W undertakes a study of the impact of the proposed regulations on its business. W incorporates the results of that study in comments sent to Agency F in 1997. In 1998, legislation is introduced in Congress that is similar to the regulatory proposal. Also in 1998, W writes a letter to Senator P stating that it opposes the proposed legislation. W encloses with the letter a copy of the comments it sent to Agency F.

(ii) *Analysis.* W's letter to Senator P refers to and reflects a view on specific legislation and therefore is a lobbying communication. Although W's study of the impact of the proposed regulations is proximate in time and similar in subject matter to its lobbying communication, W performed the study and incorporated the results in comments sent to Agency F when no legislation with a similar subject matter was pending (a nonlobbying use). On these facts, W engaged in the study solely for a nonlobbying purpose.

Example 2. (i) *Facts.* The governor of State Q proposes a budget that includes a proposed sales tax on electricity. Using its records of electricity consumption, Taxpayer Y estimates the additional costs that the budget proposal would impose upon its business. In the same year, Y writes to members of the state legislature and explains that it opposes the proposed sales tax. In its letter, Y includes its estimate of the costs that the sales tax would impose on its business. Y does not demonstrate any other use of its estimates.

(ii) *Analysis.* The letter is a lobbying communication (because it refers to and reflects a view on specific legislation, the governor's proposed budget). Y's estimate of additional costs under the proposal supports the lobbying communication, is proximate in time and similar in subject matter to a specific legislative proposal then in existence, and is not used for a nonlobbying purpose. Based on these facts, Y estimated its additional costs under the budget proposal solely to support the lobbying communication.

Example 3. (i) *Facts.* A senator in the State Q legislature announces her intention to introduce legislation to require health insurers to cover a particular medical procedure in all policies sold in the state. Taxpayer Y has different policies for two groups of employees, one of which covers the procedure and one of which does not. After the bill is introduced, Y's legislative affairs staff asks Y's human resources staff to estimate the additional cost to cover the procedure for both groups of employees. Y's human resources staff prepares a study estimating Y's increased costs and forwards it to the legislative affairs staff. Y's legislative staff then writes to members of the state legislature and explains that it opposes the proposed change in insurance coverage based on the study. Y's legislative affairs staff thereafter forwards the study, prepared for its use in opposing the statutory proposal, to its labor relations staff for use in negotiations with employees scheduled to begin later in the year.

(ii) *Analysis.* The letter to legislators is a lobbying communication (because it refers to and reflects a view on specific legislation). The activity of estimating Y's additional costs under the proposed legislation relates to the same subject as the lobbying communication, occurs close in time to the lobbying communication, is conducted at the request of a person making a lobbying communication, and relates to specific legislation then in existence. Although Y used the study in its labor negotiations, mere use for that purpose does not establish that Y estimated its additional costs under the proposed legislation in part for a nonlobbying purpose. Thus, based on all the facts and circumstances, Y estimated the additional costs it would incur under the proposal solely to make or support the lobbying communication.

Example 4. (i) *Facts.* After several years of developmental work under various contracts, in 1996, Taxpayer A contracts with the Department of Defense (DOD) to produce a prototype of a new generation military aircraft. A is aware that DOD will be able to fund the contract only if Congress appropriates an amount for that purpose in the upcoming appropriations process. In 1997, A conducts simulation tests of the aircraft and revises the specifications of the aircraft's expected performance capabilities, as required under the contract. A submits the results of the tests and the revised specifications to DOD. In 1998, Congress considers legislation to appropriate funds for the contract. In that connection, A summarizes the results of the simulation tests and of the aircraft's expected performance capabilities, and submits the summary to interested members of Congress with a cover letter that encourages them to support appropriations of funds for the contract.

(ii) *Analysis.* The letter is a lobbying communication (because it refers to specific legislation (*i.e.*, appropriations) and requests passage). The described activities in 1996, 1997, and 1998 relate to the same subject as the lobbying communication. The summary was prepared specifically for, and close in time to, that communication. Based on these facts, the summary was prepared solely for a lobbying purpose. In contrast, A conducted the tests and revised the specifications to comply with its production contract with DOD. A conducted the tests and revised the specifications solely for a nonlobbying purpose.

Example 5. (i) *Facts.* C, president of Taxpayer W, travels to the state capital to attend a two-day conference on new manufacturing processes. C plans to spend a third day in the capital meeting with state legislators to explain why W opposes a pending bill unrelated to the subject of the conference. At the meetings with the legislators, C makes lobbying communications by referring to and reflecting a view on the pending bill.

(ii) *Analysis.* C's traveling expenses (transportation and meals and lodging) are partially for the purpose of making or supporting the lobbying communications and partially for a nonlobbying purpose. As a result, under paragraph (c)(2) of this section, W must reasonably allocate C's traveling expenses between these two purposes. Allocating to influencing legislation only C's incremental transportation expenses (*i.e.*, the taxi fare to meet with the state legislators) does not result in a reasonable allocation of traveling expenses.

Example 6. (i) *Facts.* On February 1, 1997, a bill is introduced in Congress that would affect Company E. Employees in E's legislative affairs department, as is customary, prepare a brief summary of the bill and periodically confirm the procedural status of the bill through conversations with employees and members of Congress. On March 31, 1997, the head of E's legislative affairs department meets with E's President to request that B, a chemist, temporarily help the legislative affairs department analyze the bill. The President agrees, and suggests that B also be assigned to draft a position letter in opposition to the bill. Employees of the legislative affairs department continue to confirm periodically the procedural status of the bill. On October 31, 1997, B's position letter in opposition to the bill is delivered to members of Congress.

(ii) *Analysis.* B's letter is a lobbying communication because it refers to and reflects a view on specific legislation. Under paragraph (c)(3)(i) of this section, the assignment of B to assist the legislative affairs department in analyzing the bill and in drafting a position letter in opposition to the bill evidences a purpose to influence legislation. Neither the activity of periodically confirming the procedural status of the bill nor the activity of preparing the routine, brief summary of the bill before March 31 constitutes influencing legislation. In contrast, periodically confirming the procedural status of the bill on or after March 31 relates to the same subject as, and is close in time to, the lobbying communication and is used for no nonlobbying purpose. Consequently, after March 31, E determined the procedural status of the bill for the purpose of supporting the lobbying communication by B.

(d) *Lobbying communication made by another.* If a taxpayer engages in activities for a purpose of supporting a lobbying communication to be made by another person (or by a group of persons), the taxpayer's activities are treated under paragraph (b) of this section as influencing legislation. For example, if a taxpayer or an employee of the taxpayer (as a volunteer or otherwise) engages in an activity to assist a trade association in preparing its lobbying communication, the taxpayer's activities are influencing legislation even if the lobbying communication is made by the trade association and not the taxpayer. If, however, the taxpayer's employee, acting outside the employee's scope of employment, volunteers to engage in those activities, then the taxpayer is not influencing legislation.

(e) *No lobbying communication.* Paragraph (e) of this section applies if a taxpayer engages in an activity for a purpose of making or supporting a lobbying communication, but no lobbying communication that the activity supports has yet been made.

(1) *Before the filing date.* Under this paragraph (e)(1), if on the filing date of the return for any taxable year the taxpayer no longer expects, under any reasonably foreseeable circumstances, that a lobbying communication will be made that is supported by the activity, then the taxpayer will be treated as if it did not engage in the activity for a purpose of making or supporting a lobbying communication. Thus, the taxpayer need not treat any amount allocated to that activity for that year under §1.162–28 as an amount to which section 162(e)(1)(A) applies. The filing date for purposes of paragraph (e) of this section is the earlier of the time the taxpayer files its timely return for the year or the due date of the timely return.

(2) *After the filing date*—(i) *In general.* If, at any time after the filing date, the taxpayer no longer expects, under any reasonably foreseeable circumstances, that a lobbying communication will be made that is supported by the activity, then any amount previously allocated under §1.162–28 to the activity and disallowed under section 162(e)(1)(A) is

treated as an amount that is not subject to section 162(e)(1)(A) and that is paid or incurred only at the time the taxpayer no longer expects that a lobbying communication will be made.

(ii) *Special rule for certain tax-exempt organizations.* For a tax-exempt organization subject to section 6033(e), the amounts described in paragraph (e)(2)(i) of this section are treated as reducing (but not below zero) its expenditures to which section 162(e)(1) applies beginning with that year and continuing for subsequent years to the extent not treated in prior years as reducing those expenditures.

(f) *Anti-avoidance rule.* If a taxpayer, alone or with others, structures its activities with a principal purpose of achieving results that are unreasonable in light of the purposes of section 162(e)(1)(A) and section 6033(e), the Commissioner can recast the taxpayer's activities for federal tax purposes as appropriate to achieve tax results that are consistent with the intent of section 162(e)(1)(A), section 6033(e) (if applicable), and this section, and the pertinent facts and circumstances.

(g) *Taxpayer defined.* For purposes of this section, a taxpayer includes a tax-exempt organization subject to section 6033(e).

(h) *Effective date.* This section is effective for amounts paid or incurred on or after July 21, 1995. Taxpayers must adopt a reasonable interpretation of section 162(e)(1)(A) for amounts paid or incurred before this date.

[T.D. 8602, 60 FR 37575, July 21, 1995]

§ 1.162(k)–1 Disallowance of deduction for reacquisition payments.

(a) *In general.* Except as provided in paragraph (b) of this section, no deduction otherwise allowable is allowed under Chapter 1 of the Internal Revenue Code for any amount paid or incurred by a corporation in connection with the reacquisition of its stock or the stock of any related person (as defined in section 465(b)(3)(C)). Amounts paid or incurred in connection with the reacquisition of stock include amounts paid by a corporation to reacquire its stock from an ESOP that are used in a manner described in section 404(k)(2)(A). See § 1.404(k)–3.

(b) *Exceptions.* Paragraph (a) of this section does not apply to any—

(1) Deduction allowable under section 163 (relating to interest);

(2) Deduction for amounts that are properly allocable to indebtedness and amortized over the term of such indebtedness;

(3) Deduction for dividends paid (within the meaning of section 561); or

(4) Amount paid or incurred in connection with the redemption of any stock in a regulated investment company that issues only stock which is redeemable upon the demand of the shareholder.

(c) *Effective date.* This section applies with respect to amounts paid or incurred on or after August 30, 2006.

[T.D. 9282, 71 FR 51473, Aug. 30, 2006]

§ 1.163–1 Interest deduction in general.

(a) Except as otherwise provided in sections 264 to 267, inclusive, interest paid or accrued within the taxable year on indebtedness shall be allowed as a deduction in computing taxable income. For rules relating to interest on certain deferred payments, see section 483 and the regulations thereunder.

(b) Interest paid by the taxpayer on a mortgage upon real estate of which he is the legal or equitable owner, even though the taxpayer is not directly liable upon the bond or note secured by such mortgage, may be deducted as interest on his indebtedness. Pursuant to the provisions of section 163(c), any annual or periodic rental payment made by a taxpayer on or after January 1, 1962, under a redeemable ground rent, as defined in section 1055(c) and paragraph (b) of § 1.1055–1, is required to be treated as interest on an indebtedness secured by a mortgage and, accordingly, may be deducted by the taxpayer as interest on his indebtedness. Section 163(c) has no application in respect of any annual or periodic rental payment made prior to January 1, 1962, or pursuant to an arrangement which does not constitute a "redeemable ground rent" as defined in section 1055(c) and paragraph (b) of § 1.1055–1. Accordingly, annual or periodic payments of Pennsylvania ground rents made before, on, or after January 1, 1962, are deductible as interest if the ground rent is redeemable. An annual or periodic rental payment under a Maryland redeemable ground rent made prior to January 1, 1962, is deductible in accordance with the rules and regulations applicable at the time such payment was made. Any annual or periodic rental payment under a Maryland redeemable ground rent made by the taxpayer on or after January 1, 1962, is, pursuant to the provisions of section 163(c), treated as interest on an indebtedness secured by a mortgage and, accordingly, is deductible by the taxpayer as interest on his indebtedness. In any case where the ground rent is irredeemable, any annual or periodic ground rent payment shall be treated as rent and shall be deductible only to the extent that the payment constitutes a proper business expense. Amounts paid in redemption of a ground rent shall not be treated as interest. For treatment of redeemable ground rents and real property held subject to liabilities under redeemable ground rents, see section 1055 and the regulations thereunder.

(c) Interest calculated for costkeeping or other purposes on account of capital or surplus invested in the business which does not represent a charge arising under an interest-bearing obligation, is not an allowable deduction from gross income. Interest paid by a corporation on scrip dividends is an allowable deduction. So-called interest on preferred stock, which is in reality a dividend thereon, cannot be deducted in computing taxable income. (See, however, section 583.) In the case of banks and loan or trust companies, interest paid within the year on deposits, such as interest paid on moneys received for investment and secured by interest-bearing certificates of indebtedness issued by such bank or loan or trust company, may be deducted from gross income.

(d) To the extent of assistance payments made in respect of an indebtedness of the taxpayer during the taxable year by the Department of Housing and Urban Development under section 235 of the National Housing Act (12 U.S.C. 1715z), as amended, no deduction shall be allowed under section 163 and this section for interest paid or accrued with respect to such indebtedness. However, such payments shall not affect the amount of any deduction under any section of the Code other than section 163. The provisions of this paragraph shall apply to taxable years beginning after December 31, 1974.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6821, 30 FR 6216, May 4, 1965; T.D. 6873, 31 FR 941, Jan. 25, 1966; T.D. 7408, 41 FR 9547, Mar. 5, 1976]

§ 1.163–2 Installment purchases where interest charge is not separately stated.

(a) *In general.* (1) Whenever there is a contract with a seller for the purchase of personal property providing for payment of part or all of the purchase price in installments and there is a separately stated carrying charge (including a finance charge, service charge, and the like) but the actual interest charge cannot be ascertained, a portion of the payments made during the taxable year under the contract shall be treated as interest and is deductible under section 163 and this section. Section 163(b) contains a formula, described in paragraph (b) of this section, in accordance with which the amount of interest deductible in the taxable year must be computed. This formula is designed to operate automatically in the case of any installment purchase, without regard to whether payments under the contract are made when due or are in default. For applicable limitations when an obligation to pay is terminated, see paragraph (c) of this section.

(2) Whenever there is a contract with an educational institution for the purchase of educational services providing for payment of part or all of the purchase price in installments and there is a separately stated carrying charge (including a finance charge, service charge, and the like) but the actual interest charge cannot be ascertained, a portion of the payments made during the taxable year under the contract shall be treated as interest and is deductible under section 163 and this section. See paragraphs (b) and (c) of this section for the applicable computation and limitations rules. For purposes of section 163(b) and this section, the term ''educational services'' means any service (including lodging) which is

purchased from an educational institution (as defined in section 151(e)(4) and paragraph (c) of § 1.151–3) and which is provided for a student of such institution.

(3) Section 163(b) and this section do not apply to a contract for the loan of money, even if the loan is to be repaid in installments and even if the borrowed amount is used to purchase personal property or educational services. In cases to which the preceding sentence applies, the portion of the installment payment which constitutes interest (as distinguished from payments of principal and charges such as payments for credit life insurance) is deductible under section 163(a) and § 1.163–1.

(b) *Computation.* The portion of any such payments to be treated as interest shall be equal to 6 percent of the average unpaid balance under the contract during the taxable year. For purposes of this computation, the average unpaid balance under the contract is the sum of the unpaid balance outstanding on the first day of each month beginning during the taxable year, divided by 12.

(c) *Limitations.* The amount treated as interest under section 163(b) and this section for any taxable year shall not exceed the amount of the payments made under the contract during the taxable year nor the aggregate carrying charges properly attributable to each contract for such taxable year. In computing the amount to be treated as interest if the obligation to pay is terminated as, for example, in the case of a repossession of the property, the unpaid balance on the first day of the month during which the obligation is terminated shall be zero.

(d) *Illustrations.* The provisions of this section may be illustrated by the following examples:

Example 1. On January 20, 1955, A purchased a television set for $400, including a stated carrying charge of $25. The down payment was $50, and the balance was paid in 14 monthly installments of $25 each, on the 20th day of each month commencing with February. Assuming that A is a cash method, calendar year taxpayer and that no other installment purchases were made, the amount to be treated as interest in 1955 is $12.38, computed as follows:

YEAR 1955

First day of	Unpaid balance outstanding
January	0
February	$350
March	325
April	300
May	275
June	250
July	225
August	200
September	175
October	150
November	125
December	100
	2,475

Sum of unpaid balances $2,475÷12 = $206.25; 6 percent thereof = $12.38.

Example 2. On November 20, 1955, B purchased a furniture set for $1,250, including a stated carrying charge of $48. The down payment was $50 and the balance was payable in 12 monthly installments of $100 each, on the first day of each month commencing with December 1955. Assume that B is a cash method, calendar year taxpayer and that no other installment purchases were made. Assume further that B made the first payment when due, but made only one other payment on June 1, 1956. The amount to be treated as interest in 1955 is $4, and the amount to be treated as interest in 1956 is $33, computed as follows:

YEAR 1955

First day of	Unpaid balance outstanding
December	$1,200

Sum of unpaid balances $1,200÷12 = $100; 6 percent thereof = $6.

Carrying charges attributable to 1955 = $4.

YEAR 1956

First day of	Unpaid balance outstanding
January	$1,100
February	1,000
March	900
April	800
May	700
June	600
July	500
August	400
September	300
October	200
November	100
	6,600

Sum of unpaid balances $6,600÷12 = $550; 6 percent thereof = $33.

Carrying charges attributable to 1956 = $44 ($4×11).

Example 3. Assume the same facts as in example (2), except that the furniture was repossessed and B's obligation to pay terminated as of July 15, 1956. The amount to be treated as interest in 1955 is $4, computed as in example (2) above. The amount to be treated as interest in 1956 is $25.50, computed as follows:

YEAR 1956

First day of	Unpaid balance outstanding
January	$1,100
February	1,000
March	900
April	800
May	700
June	600
July-November	0
	5,100

Sum of unpaid balances $5,100÷12 = $425. 6 percent thereof = $25.50.

Carrying charges attributable to 1956 = $44 ($4×11).

Example 4. (i) On September 15, 1968, C registered at X University for the 1968–69 academic year. C entered into an agreement with the X University for the purchase during such academic year of educational services (including lodging and tuition) for a total fee of $1,000, including a separately stated carrying charge of $50. Under the terms of the agreement, an initial payment of $200 was to be made by C on September 15, 1968, and the balance was to be paid in 8 monthly installments of $100 each, on the 15th day of each month commencing with October 1968. C made all of the required 1968 payments. Assuming that C is a cash method, calendar year taxpayer and that no other installment purchases of services or property were made, the amount to be treated as interest in 1968 is $10.50, computed as follows:

YEAR 1968

First day of	Unpaid balance outstanding
January-September	0
October	$800
November	700
December	600
Total	2,100

The sum of unpaid balances ($2,100) divided by 12 is $175; 6 percent thereof is $10.50. The carrying charges attributable to 1968 are $18.75 (*i.e.*, the total carrying charges ($50), divided by the total number of payments (8), multiplied by the number of payments made in 1968 (3)). Since the amount to be treated as interest in 1968 ($10.50) does not exceed the carrying charges attributable to 1968 ($18.75), the limitation set forth in paragraph (c) of this section is not applicable.

(ii) The result in this example would be the same even if the X University assigned the agreement to a bank or other financial institution and C made his payments directly to the bank or other financial institution.

Example 5. On September 15, 1968, D registered at Y University for the 1968–69 academic year. The tuition for such year was $1,500. In order to pay his tuition, D borrowed $1,500 from the M Corporation, a lending institution, and remitted that sum to the Y University. The loan agreement between M Corporation and D provided that D was to repay the loan, plus a service charge, in 10 equal monthly installments, on the first day of each month commencing with October 1968. The service charge consisted of interest and the cost of credit life insurance on D's life. Since section 163(b) and this section do not apply to a contract for the loan of money, D is not entitled to compute his interest deduction with respect to his loan from M Corporation under such sections. D may deduct that portion of each installment payment which constitutes interest (as distinguished from payments of principal and the charge for credit life insurance) under section 163(a) and §1.163–1, provided that the amount of such interest can be ascertained.

(e) *Effective date.* Except in the case of payments made under a contract for educational services, the rule provided in section 163(b) and this section applies to payments made during taxable years beginning after December 31, 1953, and ending after August 16, 1954, regardless of when the contract of sale was made. In the case of payments made under a contract for educational services, the rule provided in section 163(b) and this section applies to payments made during taxable years beginning after December 31, 1963, regardless of when the contract for educational services was made.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6991, 34 FR 742, Jan. 17, 1969]

§ 1.163–3 Deduction for discount on bond issued on or before May 27, 1969.

(a) *Discount upon issuance.* (1) If bonds are issued by a corporation at a discount, the net amount of such discount is deductible and should be prorated or amortized over the life of the bonds. For purposes of this section, the amortizable bond discount equals the excess of the amount payable at maturity (or, in the case of a callable bond, at the earlier call date) over the issue price of the bond (as defined in paragraph (b)(2) of § 1.1232–3).

(2) In the case of a bond issued by a corporation after December 31, 1954, as part of an investment unit consisting of an obligation and an option, the issue price of the bond is determined by allocating the amount received for the investment unit to the individual elements of the unit in the manner set forth in subdivision (ii)(*a*) of § 1.1232–3(b)(2). Discount with respect to bonds issued by a corporation as part of investment units consisting of obligations and options after December 31, 1954, and before Dec. 24, 1968—

(i) Increased by any amount treated as bond premium which has been included in gross income with respect to such bonds prior to Dec. 24, 1968, or

(ii) Decreased by any amount which has been deducted by the issuer as discount attributable to such bonds prior to Dec. 24, 1968, and

(iii) Decreased by any amount which has been deducted by the issuer prior to Dec. 24, 1968 upon the exercise or sale by investors of options issued in investment units with such bonds,

should be amortized, starting with the first taxable year ending on or after Dec. 24, 1968 over the remaining life of such bonds.

(b) *Examples.* The rules in paragraph (a) of this section are illustrated by the following examples:

Example 1. M Corporation, on January 1, 1960, the beginning of its taxable year issued for $95,000, 3 percent bonds, maturing 10 years from the date of issue, with a stated redemption price at maturity of $100,000. M Corporation should treat $5,000 ($100,000–$95,000) as the total amount to be amortized over the life of the bonds.

Example 2. Assume the same facts as example (1), except that the bonds are convertible into common stock of M Corporation. Since the issue price of the bonds includes any amount attributable to the conversion privilege, the result is the same as in example (1).

Example 3. Assume the same facts as example (1), except that the bonds are issued as part of an investment unit consisting of an obligation and an option. Assume further that the issue price of the bonds as determined under the rules of allocation set forth in subdivision (ii)(*a*) of § 1.1232–3(b)(2) is $94,000. Accordingly, M Corporation should treat $6,000 ($100,000–$94,000) as the total amount to be amortized over the life of the bonds.

Example 4. Assume in example (3), that prior to Dec. 24, 1968, M Corporation had only treated $5,000 as the bond discount to be amortized and deducted only $4,000 of this amount. Starting with the first taxable year ending on or after Dec. 24, 1968, M Corporation should amortize $2,000 ($6,000 discount, less $4,000 previously deducted) over the remaining life of the bonds.

Example 5. N Corporation, on January 1, 1956, for a consideration of $102,000, issued 20-year bonds in the face amount of $100,000, together with options to purchase stock of N Corporation. The issue price of the bonds as determined under the rules of allocation set forth in subdivision (ii)(*a*) of § 1.1232–3(b)(2) is $99,000. Until Dec. 24, 1968, N Corporation has treated as bond premium, $2,000, representing the excess of the consideration received for the bond-option investment units over the maturity value of the bonds, and has accordingly prorated and included in income $1,200 of such amount. Starting with the first taxable year beginning on or after Dec. 24, 1968, N Corporation may amortize as a deduction over the remaining life of the bonds the amount of $2,200 ($1,000 discount, plus $1,200 previously included in income).

Example 6. O Corporation, on January 1, 1956, for a consideration of $100,000, issued 20-year bonds with a $100,000 face value, together with options to purchase stock of O Corporation, which could be exercised at any time up to 5 years from the date of issue. The issue price of the bonds as determined under the rules of allocation set forth in subdivision (ii)(*a*) of § 1.1232–3(b)(2) is $98,000. O Corporation, upon the exercise of the options prior to Dec. 24, 1968, had deducted from income their fair market value at the time of exercise, which is assumed for purposes of this example to have been $3,000. Even though the bonds are considered to have been issued at a discount under paragraph (a)(1) of this section, O Corporation would have no deduction over the remaining life of the bonds, inasmuch as O Corporation, in computing the amount of such deduction, is required under paragraph (a)(2)(iii) of this section to reduce the amount which would otherwise be treated as bond discount, $2,000 ($100,000–$98,000), by the amount deducted from income upon the exercise of the options, in this case, $3,000.

(c) *Deduction upon repurchase.* (1) Except as provided in subparagraphs (2) and (3) of this paragraph, if bonds are issued by a corporation and are subsequently repurchased by the corporation at a price in excess of the issue price plus any amount of discount deducted prior to repurchase, or (in the case of bonds issued subsequent to Feb. 28, 1913) minus any amount of premium returned as income prior to repurchase, the excess of the purchase price over the issue price adjusted for amortized premium or discount is a deductible expense for the taxable year.

(2) In the case of a convertible bond (except a bond which the corporation, before Sept. 5, 1968, has obligated itself to repurchase at a specified price), the deduction allowable under subparagraph (1) of this paragraph may not exceed an amount equal to 1 year's interest at the rate specified in the bond, except to the extent that the corporation can demonstrate to the satisfaction of the Commissioner or his delegate that an amount in excess of 1 year's interest does not include any amount attributable to the conversion feature.

(3) No deduction shall be allowed under subparagraph (1) of this paragraph to the extent a deduction is disallowed under subparagraph (2) of this paragraph or to the extent a deduction is disallowed by section 249 (relating to limitation on deduction of bond premium on repurchase of convertible obligation) and the regulations thereunder. See paragraph (f) of §1.249–1 for effective date limitation on section 249.

(d) *Definition.* For purposes of this section, a debenture, note, certificate other evidence of indebtedness, issued by a corporation and bearing interest shall be given the same treatment as a bond.

(e) *Effective date.* The provisions of this section shall not apply in respect of a bond issued after May 27, 1969, unless issued pursuant to a written commitment which was binding on that date and at all times thereafter.

[T.D. 6984, 33 FR 19175, Dec. 24, 1968, as amended by T.D. 7154, 36 FR 24996, Dec. 28, 1971; T.D. 7259, 38 FR 4253, Feb. 12, 1973]

§ 1.163–4 Deduction for original issue discount on certain obligations issued after May 27, 1969.

(a) *In general.* (1) If an obligation is issued by a corporation with original issue discount, the amount of such discount is deductible as interest and shall be prorated or amortized over the life of the obligation. For purposes of this section the term ''obligation'' shall have the same meaning as in §1.1232–1 (without regard to whether the obligation is a capital asset in the hands of the holder) and the term ''original issue discount'' shall have the same meaning as in section 1232(b)(1) (without regard to the one-fourth of 1 percent limitation in the second sentence thereof). Thus, in general, the amount of original issue discount equals the excess of the amount payable at maturity over the issue price of the bond (as defined in paragraph (b)(2) of §1.1232–3), regardless of whether that amount is less than one-fourth of 1 percent of the redemption price at maturity multiplied by the number of complete years to maturity. For the rule as to whether there is original issue discount in the case of an obligation issued in an exchange for property other than money, and the amount thereof, see paragraph (b)(2)(iii) of §1.1232–3. In any case in which original issue discount is carried over from one corporation to another corporation under section 381(c)(9) or from an obligation exchanged to an obligation received in any exchange under paragraph (b)(1)(iv) of §1.1232–3, such discount shall be carried over for purposes of this section. The amount of original issue discount carried over in an exchange of obligations under the preceding sentence shall be prorated or amortized over the life of the obligation issued in such exchange. For computation of issue price and the amount of original issue discount in the case of serial obligations, see paragraph (b)(2)(iv) of §1.1232–3.

(2) In the case of an obligation issued by a corporation as part of an investment unit (as defined in paragraph (b)(2)(ii)(*a*) of §1.1232–3) consisting of an obligation and other property, the issue price of the obligation is determined by allocating the amount received for the investment unit to the individual elements of the unit in the manner set forth in paragraph (b)(2)(ii) of §1.1232–3.

(3) *Recovery or retention of amounts previously deducted.* In any taxable year in which an amount of original issue

discount which was deducted as interest under this section is retained or recovered by the taxpayer, such as, for example, by reason of a fine, penalty, forfeiture, or other withdrawal fee, such amount shall be includible in the gross income of such taxpayer for such taxable year.

(b) *Examples.* The rules in paragraph (a) of this section are illustrated by the following examples:

Example 1. N Corporation, which uses the calendar year as its taxable year, on January 1, 1970, issued for $99,000, 9 percent bonds maturing 10 years from the date of issue, with a stated redemption price at maturity of $100,000. The original issue discount on each bond (as determined under section 1232(b)(1) without regard to the one-fourth-of-1-percent limitation in the second sentence thereof) is $1,000, *i.e.*, redemption price, $100,000, minus issue price, $99,000. N shall treat $1,000 as the total amount to be amortized over the life of the bonds.

Example 2. Assume the same facts as example (1), except that the bonds are convertible into common stock of N Corporation. Since the issue price of the bonds includes any amount attributable to the conversion privilege, the result is the same as in example (1).

Example 3. Assume the same facts as example (1), except that the bonds are issued as part of an investment unit consisting of an obligation and an option. Assume further that the issue price of the bonds as determined under the rules of allocation set forth in paragraph (b)(2)(ii) of §1.1232–3 is $94,000. The original issue discount on the bond (as determined under section 1232(b)(1) without regard to the one-fourth-of-1-percent limitation in the second sentence thereof) is $6,000, *i.e.*, redemption price, $100,000, minus issue price, $94,000. N shall treat $6,000 as the total amount to be amortized over the life of the bonds.

Example 4. On January 1, 1971, a commercial bank which uses the calendar year as its taxable year, issued a certificate of deposit for $10,000. The certificate of deposit is not redeemable until December 31, 1975, except in an emergency as defined in, and subject to the qualifications provided by Regulations Q of the Board of Governors of the Federal Reserve. See 12 CFR §217.4(d). The stated redemption price at maturity is $13,382.26. The certificate is an obligation to which section 1232(a)(3)(A) applies (see paragraph (d) of §1.1232–1), and the original issue discount with respect to the certificate (as determined under section 1232(b)(1) without regard to the one-fourth-of-1-percent limitation in the second sentence thereof) is $3,382.26 (*i.e.*, redemption price, $13,382.26, minus issued price, $10,000). Y shall treat $3,382.26 as the total amount to be amortized over the life of the certificate.

(c) *Deduction upon repurchase.* (1) Except as provided in subparagraph (2) of this paragraph, if bonds are issued by a corporation and are subsequently repurchased by the corporation at a price in excess of the issue price plus any amount of original issue discount deducted prior to repurchase, or minus any amount of premium returned as income prior to repurchase, the excess of the repurchase price over the issue price adjusted for amortized premium or deducted discount is deductible as interest for the taxable year.

(2) The provisions of subparagraph (1) of this paragraph shall not apply to the extent a deduction is disallowed by section 249 (relating to limitation on deduction of bond premium or repurchase of convertible obligation) and the regulations thereunder.

(d) *Effective date.* The provisions of this section shall apply in respect of obligations issued after May 27, 1969, other than—

(1) Obligations issued pursuant to a written commitment which was binding on May 27, 1969, and at all times thereafter, and

(2) Deposits made before January 1, 1971, in the case of certificates of deposit, time deposits, bonus plans, and other deposit arrangements with banks, domestic building and loan associations, and similar financial institutions.

[36 FR 24996, Dec. 28, 1971, as amended by T.D. 7213, 37 FR 21991, Oct. 18, 1972; T.D. 7259, 38 FR 4253, Feb. 12, 1973]

§ 1.163–5 Denial of interest deduction on certain obligations issued after December 31, 1982, unless issued in registered form.

(a)–(b) [Reserved]

(c) *Obligations issued to foreign persons after September 21, 1984*—(1) *In general.* A determination of whether an obligation satisfies each of the requirements of this paragraph shall be made on an obligation-by-obligation basis. An obligation issued directly (or through affiliated entities) in bearer form by, or guaranteed by, a United States Government-owned agency or a United States Government-sponsored enterprise, such as the Federal National Mortgage Association, the Federal Home Loan Banks, the Federal Loan Mortgage Corporation, the Farm Credit Administration, and the Student Loan Marketing Association, may not satisfy this paragraph (c). An obligation issued after September 21, 1984 is described in this paragraph if—

(i) There are arrangements reasonably designed to ensure that such obligation will be sold (or resold in connection with its original issuance) only to a person who is not a United States person or who is a United States person that is a financial institution (as defined in §1.165–12(c)(1)(v)) purchasing for its own account or for the account of a customer and that agrees to comply with the requirements of section 165(j)(3) (A), (B), or (C) and the regulations thereunder, and

(ii) In the case of an obligation which is not in registered form—

(A) Interest on such obligation is payable only outside the United States and its possessions, and

(B) Unless the obligation is described in subparagraph (2)(i)(C) of this paragraph or is a temporary global security, the following statement in English either appears on the face of the obligation and on any interest coupons which may be detached therefrom or, if the obligation is evidenced by a book entry, appears in the book or record in which the book entry is made: ''Any United States person who holds this obligation will be subject to limitations under the United States income tax laws, including the limitations provided in sections 165(j) and 1287(a) of the Internal Revenue Code.'' For purposes of this paragraph, the term ''temporary global security'' means a security which is held for the benefit of the purchasers of the obligations of the issuer and interests in which are exchangeable for securities in definitive registered or bearer form prior to its stated maturity.

(2) *Rules for the application of this paragraph*—(i) *Arrangements reasonably designed to ensure sale to non-United States persons*. An obligation will be considered to satisfy paragraph (c)(1)(i) of this section if the conditions of paragraph (c)(2)(i) (A), (B), (C), or (D) of this section are met in connection with the original issuance of the obligation. An exchange of one obligation for another is considered an original issuance if and only if the exchange constitutes a disposition of property for purposes of section 1001 of the Code. However, an exchange of one obligation for another will not be considered a new issuance if the obligation received is identical in all respects to the obligation surrendered in exchange therefor, except that the obligor of the obligation received need not be the same obligor as the obligor of the obligation surrendered. Obligations that meet the conditions of paragraph (c)(2)(i) (A), (B), (C) or (D) of this section may be issued in a single public offering. The preceding sentence does not apply to certificates of deposit issued under the conditions of paragraph (c)(2)(i)(C) of this section by a United States person or by a controlled foreign corporation within the meaning of section 957(a) that is engaged in the active conduct of a banking business within the meaning of section 954(c)(3)(B) as in effect prior to the Tax Reform Act of 1986, and the regulations thereunder. A temporary global security need not satisfy the conditions of paragraph (c)(2)(i) (A), (B) or (C) of this section, but must satisfy the applicable requirements of paragraph (c)(2)(i)(D) of this section.

(A) In connection with the original issuance of an obligation, the obligation is offered for sale or resale only outside of the United States and its possessions, is delivered only outside the United States and its possessions and is not registered under the Securities Act of 1933 because it is intended for distribution to persons who are not United States persons. An obligation will not be considered to be required to be registered under the Securities Act of 1933 if the issuer, in reliance on the written opinion of counsel received prior to the issuance thereof, determines in good faith that the obligation need not be registered under the Securities Act of 1933 for the reason that it is intended for distribution to persons who are not United States persons. Solely for purposes of this subdivision (i)(A), the term ''United States person'' has the same meaning as it has for purposes of determining whether an obligation is intended for distribution to persons under the Securities Act of 1933. Except as provided in paragraph (c)(3) of this section, this paragraph (c)(2)(i)(A) applies only to obligations issued on or before September 7, 1990.

(B) The obligation is registered under the Securities Act of 1933, is exempt from registration by reason of section 3 or section 4 of such Act, or does not qualify as a security under the Securities Act of 1933; all of the conditions set forth in paragraph (c)(2)(i)(B) (*1*), (*2*), (*3*), (*4*), and (*5*) of this section are met with respect to such obligations; and, except as provided in paragraph (c)(3) of this section, the obligation is issued on or before September 7, 1990.

(*1*) In connection with the original issuance of an obligation in bearer form, the obligation is offered for sale or resale only outside the United States and its possessions.

(*2*) The issuer does not, and each underwriter and each member of the selling group, if any, covenants that it will not, in connection with the original issuance of the obligation, offer to sell or resell the obligation in bearer form to any person inside the United States or to a United States person unless such United States person is a financial institution as defined in §1.165–12(c)(v) purchasing for its own account or for the account of a customer, which financial institution, as a condition of the purchase, agrees to provide on delivery of the obligation (or on issuance, if the obligation is not in definitive form) the certificate required under paragraph (c)(2)(i)(B)(4).

(*3*) In connection with its sale or resale during the original issuance of the obligation in bearer form, each underwriter and each member of the selling group, if any, or the issuer, if there is no underwriter or selling group, sends a confirmation to the purchaser of the bearer obligation stating that the purchaser represents that it is not a United States person or, if it is a United States person, it is a financial institution as defined in §1.165–12(c)(v) purchasing for its own account or for the account of a customer and that the financial institution will comply with the requirements of section 165(j)(3) (A), (B), or (C) and the regulations thereunder. The confirmation must also state that, if the purchaser is a dealer, it will send similar confirmations to whomever purchases from it.

(*4*) In connection with the original issuance of the obligation in bearer form it is delivered in definitive form (or issued, if the obligation is not in definitive form) to the person entitled to physical delivery thereof only outside the United States and its possessions and only upon presentation of a certificate signed by such person to the issuer, underwriter, or member of the selling group, which certificate states that the obligation is not being acquired by or on behalf of a United States person, or for offer to resell or for resale to a United States person or any person inside the United States, or, if a beneficial interest in the obligation is being acquired by a United States person, that such person is a financial institution as defined in §1.165.12(c)(1)(v) or is acquiring through a financial institution and that the obligation is held by a financial institution that has agreed to comply with the requirements of section 165(j)(3) (A), (B), or (C) and the regulations thereunder and that is not purchasing for offer to resell or for resale inside the United States. When a certificate is provided by a clearing organization, it must be based on statements provided to it by its member organizations. A clearing organization is an entity which is in the business of holding obligations for member organizations and transferring obligations among such members by credit or debit to the account of a member without the necessity of physical delivery of the obligation. For purposes of paragraph (c)(2)(i)(B), the term ''delivery'' does not include the delivery of an obligation to an underwriter or member of the selling group, if any.

(*5*) The issuer, underwriter, or member of the selling group does not have actual knowledge that the certificate described in paragraph (c)(2)(i)(B)(*4*) of this section is false. The issuer, underwriter, or member of the selling group shall be deemed to have actual knowledge that the certificate described in paragraph (c)(2)(i)(B)(*4*) of this section is false if the issuer, underwriter, or member of the selling group has a United States address for the beneficial owner (other than a financial institution as defined in §1.165–12(c)(v) that represents that it will comply with the requirements of section 165(j)(3) (A), (B), or (C) and the regulations thereunder) and does not have documentary evidence as described in §1.6049–5(c)(1) that the beneficial owner is not a United States person.

(C) The obligation is issued only outside the United States and its possessions by an issuer that does not significantly engage in interstate commerce with respect to the issuance of such obligation either directly or through its agent, an underwriter, or a member of the selling group. In the case of an issuer that is a United States person, such issuer may only satisfy the test set forth in this paragraph (c)(2)(i)(C) if—

(*1*) It is engaged through a branch in the active conduct of a banking business, within the meaning of section 954(c)(3)(B) as in effect before the Tax Reform Act of 1986, and the regulations thereunder, outside the United States;

(*2*) The obligation is issued outside of the United States by the branch in connection with that trade or business;

(*3*) The obligation that is so issued is sold directly to the public and is not issued as a part of a larger issuance made by means of a public offering; and

(*4*) The issuer either maintains documentary evidence as described in subdivision (iii) of A–5 of §35a.9999–4T that the purchaser is not a United States person (provided that the issuer has no actual knowledge that the documentary evidence is false) or on delivery of the obligation the issuer receives a statement signed by the person entitled to physical delivery thereof and stating either that the obligation is not being acquired by or on behalf of a United States person or that, if a beneficial interest in the obligation is being acquired by a United States person, such person is a financial institution as defined in §1.165–12(c)(v) or is acquiring through a financial institution and the obligation is held by a financial institution that has agreed to comply with the requirements of 165(j)(3) (A), (B) or (C) and the regulations thereunder and that it is not purchasing for offer to resell or for resale inside the United States (provided that the issuer has no actual knowledge that the statement is false).

In addition, an issuer that is a controlled foreign corporation within the meaning of section 957 (a) that is engaged in the active conduct of a banking business outside the United States within the meaning of section 954(c)(3)(B) as in effect before the Tax Reform Act of 1986, and the regulations thereunder, can only satisfy the provisions of this paragraph (c)(2)(i)(C), if it meets the requirements of this paragraph (c)(2)(i)(C)(2), (3) and (4).

(D) The obligation is issued after September 7, 1990, and all of the conditions set forth in this paragraph (c)(2)(i)(D) are met with respect to such obligation.

(*1*) *Offers and sales*—(*i*) *Issuer*. The issuer does not offer or sell the obligation during the restricted period to a person who is within the United States or its possessions or to a United States person.

(*ii*) *Distributors*. (*A*) The distributor of the obligation does not offer or sell the obligation during the restricted period to a person who is within the United States or its possessions or to a United States person.

(*B*) The distributor of the obligation will be deemed to satisfy the requirements of paragraph (c)(2)(i)(D)(*1*)(*ii*)(*A*) of this section if the distributor of the obligation convenants that it will not offer or sell the obligation during the restricted period to a person who is within the United States or its possessions or to a United States person; and the distributor of the obligation has in effect, in connection with the offer and sale of the obligation during the restricted period, procedures reasonably designed to ensure that its employees or agents who are directly engaged in selling the obligation are aware that the obligation cannot be offered or sold during the restricted period to a person who is within the United States or its possessions or is a United States person.

(*iii*) *Certain rules*. For purposes of paragraph (c)(2)(i)(D)(*1*) (*i*) and (*ii*) of this section:

(*A*) An offer or sale will be considered to be made to a person who is within the United States or its possessions if the offeror or seller of the obligation has an address within the United States or its possessions for the offeree or buyer of the obligation with respect to the offer or sale.

(*B*) An offer or sale of an obligation will not be treated as made to a person within the United States or its possessions or to a United States person if the person to whom the offer or sale is made is: An exempt distributor, as defined in paragraph (c)(2)(i)(D)(*5*) of this section; An international organization as defined in section 7701(a)(18) and the regulations thereunder, or a foreign central bank as defined in section 895 and the regulations thereunder; or The foreign branch of a United States financial institution as described in paragraph (c)(2)(i)(D)(*6*)(*i*) of this section.

Paragraph (c)(2)(i)(D)(*1*)(*iii*)(*B*) regarding an exempt distributor will only apply to an offer to the United States office of an exempt distributor, and paragraph (c)(2)(i)(D)(*1*)(*iii*)(*B*) regarding an international organization or foreign central bank will only apply to an offer to an international organization or foreign central bank, if such offer is made directly and specifically to the United States office, organization or bank.

(*C*) A sale of an obligation will not be treated as made to a person within the United States or its possessions or to a United States person if the person to whom the sale is made is a person described in paragraph (c)(2)(i)(D)(*6*)(*ii*) of this section.

(*2*) *Delivery*. In connection with the sale of the obligation during the restricted period, neither the issuer nor any distributor delivers the obligation in definitive form within the United States or it possessions.

(*3*) *Certification*—(*i*) *In general*. On the earlier of the date of the first actual payment of interest by the issuer on the obligation or the date of delivery by the issuer of the obligation in definitive form, a certificate is provided to the issuer of the obligation stating that on such date:

(*A*) The obligation is owned by a person that is not a United States person:

(*B*) The obligation is owned by a United States person described in paragraph (c)(2)(i)(D)(*6*) of this section; or

(*C*) The obligation is owned by a financial institution for purposes of resale during the restricted period, and such financial institution certifies in addition that it has not acquired the obligation for purposes of resale directly or indirectly to a United States person or to a person within the United States or its possessions.

A certificate described in paragraph (c)(2)(i)(D)(*3*)(*i*) (*A*) or (*B*) of this section may not be given with respect to an obligation that is owned by a financial institution for purposes of resale during the restricted period. For purposes of paragraph (c)(2)(i)(D) (*2*) and (*3*) of this section, a temporary global security (as defined in §1.163–5 (c)(1)(ii)(B)) is not considered to be an obligation in definitive form. If the issuer does not make the obligation available for delivery in definitive form within a reasonable period of time after the end of the restricted period, then the obligation shall be treated as not satisfying the requirements of this paragraph (c)(2)(i)(D)(*3*). The certificate must be signed (or sent, as provided in paragraph (c)(2)(i)(D)(*3*)(*ii*) of this section) either by the owner of the obligation or by a financial institution or clearing organization through which the owner holds the obligation, directly or indirectly. For purposes of this paragraph (c)(2)(i)(D)(*3*), the term ''financial institution'' means a financial institution described in §1.165–12(c)(i)(v). When a certificate is provided by a clearing organization, the certificate must be based on statements provided to it by its member organizations. The requirement of this paragraph (c)(1)(D)(*3*) shall be deemed not to be satisfied with respect to an obligation if the issuer knows or has reason to know that the certificate with respect to such obligation is false. The certificate must be retained by the issuer (and statements by member organizations must be retained by the clearing organization, in the case of certificates based on such statements) for a period of four calendar years following the year in which the certificate is received.

(*ii*) *Electronic certification*. The certificate required by paragraph (c)(2)(i)(D)(*3*)(*i*) of this section (including a statement provided to a clearing organization by a member organization) may be provided electronically, but only if the person receiving such electronic certificate maintains adequate records, for the retention period described in paragraph (c)(2)(i)(D)(*3*)(*i*) of this section, establishing that such certificate was received in respect of the subject obligation, and only if there is a written agreement entered into prior to the time of certification (including the written membership rules of a clearing organization) to which the sender and recipient are subject, providing that the electronic certificate shall have the effect of a signed certificate described in paragraph (c)(2)(i)(D)(*3*)(*i*) of this section.

(*iii*) *Exception for certain obligations.* This paragraph (c)(2)(i)(D)(*3*) shall not apply, and no certificate shall be required, in the case of an obligation that is sold during the restricted period and that satisfies all of the following requirements:

(*A*) The interest and principal with respect to the obligation are denominated only in the currency of a single foreign country.

(*B*) The interest and principal with respect to the obligation are payable only within that foreign country (according to rules similar to those set forth in §1.163–5(c)(2)(v)).

(*C*) The obligation is offered and sold in accordance with practices and documentation customary in that foreign country.

(*D*) The distributor covenants to use reasonable efforts to sell the obligation within that foreign country.

(*E*) The obligation is not listed, or the subject of an application for listing, on an exchange located outside that foreign country.

(*F*) The Commissioner has designated that foreign country as a foreign country in which certification under paragraph (c)(2)(i)(D)(*3*)(*i*) of this section is not permissible.

(*G*) The issuance of the obligation is subject to guidelines or restrictions imposed by governmental, banking or securities authorities in that foreign country.

(*H*) More than 80 percent by value of the obligations included in the offering of which the obligation is a part are offered and sold to non-distributors by distributors maintaining an office located in that foreign country. Foreign currency denominated obligations that are convertible into U.S. dollar denominated obligations or that by their terms are linked to the U.S. dollar in a way which effectively converts the obligations to U.S. dollar denominated obligations do not satisfy the requirements of this paragraph (c)(2)(i)(D)(*3*)(*iii*). A foreign currency denominated obligation will not be treated as linked, by its terms, to the U.S. dollar solely because the obligation is the subject of a swap transaction.

(*4*) *Distributor.* For purposes of this paragraph (c)(2)(i)(D), the term ''distributor'' means:

(*i*) A person that offers or sells the obligation during the restricted period pursuant to a written contract with the issuer;

(*ii*) Any person that offers or sells the obligation during the restricted period pursuant to a written contract with a person described in paragraph (c)(2)(i)(D) (*4*) (*i*); and

(*iii*) Any affiliate that acquires the obligation from another member of its affiliated group for the purpose of offering or selling the obligation during the restricted period, but only if the transferor member of the group is the issuer or a person described in paragraph (c)(2)(i)(D) (*4*)(*i*) or (*ii*) of this section. The terms ''affiliate'' and ''affiliated group'' have the same meanings as in section 1504(a) of the Code, but without regard to the exceptions contained in section 1504(b) and substituting ''50 percent'' for ''80 percent'' each time it appears.

For purposes of this paragraph (c)(2)(i)(D)(*4*), a written contract does not include a confirmation or other notice of the transaction.

(*5*) *Exempt distributor.* For purposes of this paragraph (c)(2)(i)(D), the term ''exempt distributor'' means a distributor that convenants in its contract with the issuer or with a distributor described in paragraph (c)(2)(i)(D)(*4*)(*i*) that it is buying the obligation for the purpose of resale in connection with the original issuance of the obligation, and that if it retains the obligation for its own account, it will only do so in accordance with the requirements of paragraph (c)(2)(i)(D)(*6*) of this section. In the latter case, the convenant will constitute the certificate required under paragraph (c)(2)(i)(D)(*6*). The provisions of paragraph (c)(2)(i)(D)(*7*) governing the restricted period for unsold allotments or subscriptions shall apply to any obligation retained for investment by an exempt distributor.

(*6*) *Certain United States persons.* A person is described in this paragraph (c)(2)(i)(D)(*6*) if the requirements of this paragraph are satisfied and the person is:

(*i*) The foreign branch of a United States financial institution purchasing for its own account or for resale, or

(*ii*) A United States person who acquired the obligation through the foreign branch of a United States financial institution and who, for purposes of the certification required in paragraph (c)(2)(i)(D)(*3*) of this section, holds the obligation through such financial institution on the date of certification.

For purposes of paragraph (c)(2)(i)(D)(*6*)(*ii*) of this section, a United States person will be considered to acquire and hold an obligation through the foreign branch of a United States financial institution if the United States person has an account with the United States office of a financial institution, and the transaction is executed by a foreign office of that financial institution, or by the foreign office of another financial institution acting on behalf of that financial institution. This paragraph (c)(2)(i)(D)(*6*) will apply, however, only if the United States financial institution (or the United States office of a foreign financial institution) holding the obligation provides a certificate to the issuer or distributor selling the obligation within a reasonable time stating that it agrees to comply with the requirements of section 165(j)(3)(A), (B), or (C) and the regulations thereunder. For purposes of this paragraph (c)(2)(i)(D)(*6*), the term ''financial institution'' means a financial institution as defined in §1.165–12(c)(1)(v). As an alternative to the certification required above, a financial institution may provide a blanket certificate to the issuer or distributor selling the obligation stating that the financial institution will comply with the requirements of section 165(j)(3)(A), (B) or (C) and the regulations thereunder. A blanket certificate must be received by the issuer or the distributor in the year of the issuance of the obligation or in either of the preceding two calendar years, and must be retained by the issuer or distributor for at least four years after the end of the last calendar year to which it relates.

(*7*) *Restricted period.* For purposes of this paragraph (c)(2)(i)(D), the restricted period with respect to an obligation begins on the earlier of the closing date (or the date on which the issuer receives the loan proceeds, if there is no closing with respect to the obligation), or the first date on which the obligation is offered to persons other than a distributor. The restricted period with respect to an obligation ends on the expiration of the forty day period beginning on the closing date (or the date on which the issuer receives the loan proceeds, if there is no closing with respect to the obligation). Notwithstanding the preceding sentence, any offer or sale of the obligation by the issuer or a distributor shall be deemed to be during the restricted period if the issuer or distributor holds the obligation as part of an unsold allotment or subscription.

(*8*) *Clearing organization.* For purposes of this paragraph (c)(2)(i)(D), a ''clearing organization'' is an entity which is in the business of holding obligations for member organizations and transferring obligations among such members by credit or debit to the account of a member without the necessity of physical delivery of the obligation.

(ii) *Special rules.* An obligation shall not be considered to be described in paragraph (c)(2)(i)(C) of this section if it is—

(A) Guaranteed by a United States shareholder of the issuer;

(B) Convertible into a debt or equity interest in a United States shareholder of the issuer; or

(C) Substantially identical to an obligation issued by a United States shareholder of the issuer.

For purposes of this paragraph (c)(2)(ii), the term ''United States shareholder'' is defined as it is defined in section 951 (b) and the regulations thereunder. For purposes of this paragraph (c)(2)(ii)(C), obligations are substantially identical if the face amount, interest rate, term of the issue, due dates for payments, and maturity date of each is substantially identical to the other.

(iii) *Interstate commerce.* For purposes of this paragraph, the term ''interstate commerce'' means trade or commerce in obligations or any transportation or communication relating thereto between any foreign country and the United States or its possessions.

(A) An issuer will not be considered to engage significantly in interstate commerce with respect to the issuance of an obligation if the only activities with respect to which the issuer uses the means or instrumentalities of interstate commerce are activities of a preparatory or auxiliary character that do not involve communication between a prospective purchaser and an issuer, its agent, an underwriter, or member of the selling group if either is inside the United States or its possessions. Activities of a preparatory or auxiliary character include, but are not limited to, the following activities:

(*1*) Establishment or participation in establishment of policies concerning the issuance of obligations and the allocation of funding by a United States shareholder with respect to obligations issued by a foreign corporation or by a United States office with respect to obligations issued by a foreign branch;

(*2*) Negotiation between the issuer and underwriters as to the terms and pricing of an issue;

(*3*) Transfer of funds to an office of an issuer in the United States or its possessions by a foreign branch or to a United States shareholder by a foreign corporation;

(*4*) Consultation by an issuer with accountants and lawyers or other financial advisors in the United States or its possessions regarding the issuance of an obligation;

(*5*) Document drafting and printing; and

(*6*) Provision of payment or delivery instructions to members of the selling group by an issuer's office or agent that is located in the United States or its possessions.

(B) Activities that will not be considered to be of a preparatory or auxiliary character include, but are not limited to, any of the following activities:

(*1*) Negotiation or communication between a prospective purchaser and an issuer, its agent, an underwriter, or a member of the selling group concerning the sale of an obligation if either is inside the United States or its possessions;

(*2*) Involvement of an issuer's office, its agent, an underwriter, or a member of the selling group in the United States or its possessions in the offer or sale of a particular obligation, either directly with the prospective purchaser, or through the issuer in a foreign country;

(*3*) Delivery of an obligation in the United States or its possessions; or

(*4*) Advertising or otherwise promoting an obligation in the United States or its possessions.

(C) The following examples illustrate the application of this subdivision (iii) of §1.163–5(c)(2).

Example 1. Foreign corporation A, a corporation organized in and doing business in foreign country Z, and not a controlled foreign corporation within the meaning of section 957(a) that is engaged in the conduct of a banking business within the meaning of section 954(c)(3)(B) as in effect before the Tax Reform Act of 1986, issues its debentures outside the United States. The debentures are not guaranteed by a United States shareholder of A, nor are they convertible into a debt or equity interest of a United States shareholder of A, nor are they substantially identical to an obligation issued by a United States shareholder of A. A consults its accountants and lawyers in the United States for certain securities and tax advice regarding the debt offering. The underwriting and selling group in respect to A's offering is composed entirely of foreign securities firms, some of which are foreign subsidiaries of United States securities firms. A U.S. affiliate of the foreign underwriter communicates payment and delivery instructions to the selling group. All offering circulars for the offering are mailed and delivered outside the United States and its possessions. All debentures are delivered and paid for outside the United States and its possessions. No office located in the United States or in a United States possession is involved in the sale of debentures. Interest on the debentures is payable only outside the United States and its possessions. A is not significantly engaged in interstate commerce with respect to the offering.

Example 2. B, a United States bank, does business in foreign country X through a branch located in X. The branch is a staffed and operating unit engaged in the active conduct of a banking business consisting of one or more of the activities set forth in § 1.954–2(d)(2)(ii). As part of its ongoing business, the branch in X issues negotiable certificates of deposit with a maturity in excess of one year to customers upon request. The certificates of deposit are not guaranteed by a United States shareholder of B, nor are they convertible into a debt or equity interest of a United States shareholder of B, nor are they substantially identical to an obligation issued by a United States shareholder of B. Policies regarding the issuance of negotiable certificates of deposit and funding allocations for foreign branches are set in the United States at B's main office. Branch personnel decide whether to issue a negotiable certificate of deposit based on the guidelines established by the United States offices of B, but without communicating with the United States offices of B with respect to the issuance of a particular obligation. Negotiable certificates of deposits are delivered and paid for outside the United States and its possessions. Interest on the negotiable certificates of deposit is payable only outside the United States and its possessions. B maintains documentary evidence described in § 1.163–5(c)(2)(i)(C)(*4*). After the issuance of negotiable certificates of deposit by the foreign branch of B, the foreign branch sends the funds to a United States branch of B for use in domestic operations. B is not significantly engaged in interstate commerce with respect to the issuance of such obligation.

Example 3. The facts in Example (2) apply except that the foreign branch of B consulted, by telephone, the main office in the United States to request approval of the issuance of the certificate of deposit at a particular rate of interest. The main office granted permission to issue the negotiable certificate of deposit to the customer by a telex sent from the main office of B to the branch in X. B is significantly engaged in interstate commerce with respect to the issuance of the obligation as a result of involvement of B's United States office in the issuance of the obligation.

Example 4. The facts in Example (2) apply with the additional fact that a customer contacted the foreign branch of B through a telex originating in the United States or its possessions. Subsequent to the telex, the foreign branch issued the negotiable certificate of deposit and recorded it on the books. B is significantly engaged in interstate commerce with respect to the issuance of the obligation as a result of its communication by telex with a customer in the United States.

(iv) *Possessions.* For purposes of this section, the term ''possessions'' includes Puerto Rico, the U.S. Virgin Islands, Guam, American Samoa, Wake Island, and Northern Mariana Islands.

(v) *Interest payable outside of the United States.* Interest will be considered payable only outside the United States and its possessions if payment of such interest can be made only upon presentation of a coupon, or upon making of any other demand for payment, outside of the United States and its possessions to the issuer or a paying agent. The fact that payment is made by a draft drawn on a United States bank account or by a wire or other electronic transfer from a United States account does not affect this result. Interest payments will be considered to be made within the United States if the payments are made by a transfer of funds into an account maintained by the payee in the United States or mailed to an address in the United States, if—

(A) The interest is paid on an obligation issued by either a United States person, a controlled foreign corporation as defined in section 957 (a), or a foreign corporation if 50 percent or more of the gross income of the foreign corporation from all sources of the 3-year period ending with the close of its taxable year preceding the original issuance of the obligation (or for such part of the period that the foreign corporation has been in existence) was effectively connected with the conduct of a trade or business within the United States; and

(B) The interest is paid to a person other than—

(*1*) A person who may satisfy the requirements of section 165 (j)(3) (A), (B), or (C) and the regulations thereunder; and

(*2*) A financial institution as a step in the clearance of funds and such interest is promptly credited to an account maintained outside the United States for such financial institution or for persons for which the financial institution has collected such interest.

Interest is considered to be paid within the United States and its possessions if a coupon is presented, or a demand for payment is otherwise made, to the issuer or a paying agent (whether a United States or foreign person) in the United States and its possessions even if the funds paid are credited to an account maintained by the payee outside the United States and its possessions. Interest will be considered payable only outside the United States and its possessions notwithstanding that such interest may become payable at the office of the issuer or its United States paying agent under the following conditions: the issuer has appointed paying agents located outside the United States and its possessions with the reasonable expectation that such paying agents will be able to pay the interest in United States dollars, and the full amount of such payment at the offices of all such paying agents is illegal or effectively precluded because of the imposition of exchange controls or other similar restrictions on the full payment or receipt of interest in United States dollars. A lawsuit brought in the United States or its possessions for payment of the obligation or interest thereon as a result of a default shall not be considered to be a demand for payment. For purposes of this subdivision (v), interest includes original issue discount as defined in section 1273(a). Therefore, an amount equal to the original issue discount as defined in section 1273(a) is payable only outside the United States and its possessions. The amount of market discount as defined in section 1278(a) does not affect the amount of interest to be considered payable only outside the United States and its possessions.

(vi) *Rules relating to obligations issued after December 31, 1982 and on or before September 21, 1984.* Whether an obligation originally issued after December 31, 1982 and on or before September 21, 1984, or an obligation originally issued after September 21, 1984 pursuant to the exercise of a warrant or the conversion of a convertible obligation, which warrant or obligation (including conversion privilege) was issued after December 31, 1982 and on or before September 21, 1984, is described in section 163(f)(2)(B) shall be determined under the rules provided in §5f.163–1(c) as in effect prior to its removal. Notwithstanding the preceding sentence, an issuer will be considered to satisfy the requirements of section 163(f)(2)(B) with respect to an obligation issued after December 31, 1982 and on or before September 21, 1984 or after September 21, 1984 pursuant to the exercise of a warrant or the conversion of a convertible obligation, which warrant or obligation (including conversion privilege) was issued after December 31, 1982 and on or before September 21, 1984, if the issuer substantially complied with the proposed regulations provided in §1.163–5(c), which were published in the FEDERAL REGISTER on September 2, 1983 (48 FR 39953) and superseded by temporary regulations published in the FEDERAL REGISTER on August 22, 1984 (49 FR 33228).

(3) *Effective date*—(i) *In general.* These regulations apply generally to obligations issued after January 20, 1987. A taxpayer may choose to apply the rules of §1.163–5(c) with respect to an obligation issued after December 31, 1982 and on or before January 20, 1987. If this choice is made, the rules of §1.163–5(c) will apply in lieu of §1.163–5T(c) except that the legend requirement under §1.163–5(c)(1)(ii)(B) does not apply with respect to a bearer obligation evidenced exclusively by a book entry and that the certification requirement under §1.163–5T(c)(2)(B)(*4*) applies in lieu of the certification under §1.163–5(c)(2)(i)(B)(4).

(ii) *Special rules.* If an obligation is originally issued after September 7, 1990 pursuant to the exercise of a warrant or the conversion of a convertible obligation, which warrant or obligation (including conversion privilege) was issued on or before May 10, 1990, then the issuer may choose to apply either the rules of §1.163–5(c)(2)(i)(A) or §1.163–5(c)(2)(i)(B), or the rules of §1.163–5(c)(2)(i)(D). The issuer of an obligation may choose to apply either the rules of §1.163–5(c)(2)(i) (A) or (B), or the rules of §1.163–5(c)(2)(i)(D), to an obligation that is originally issued after May 10, 1990, and on or before September 7, 1990. However, any issuer choosing to apply the rules of §1.163–5(c)(2)(i)(A) must apply the definition of United States person used for such purposes on December 31, 1989, and must obtain any certificates that would have been required under applicable law on December 31, 1989.

[T.D. 8110, 51 FR 45456, Dec. 19, 1986, as amended by T.D. 8203, 53 FR 17926, May 19, 1988; T.D. 8300, 55 FR 19624, May 10, 1990; T.D. 8734, 62 FR 53416, Oct. 14, 1997]

§ 1.163–5T Denial of interest deduction on certain obligations issued after December 31, 1982, unless issued in registered form (temporary).

(a)–(c) [Reserved]

(d) *Pass-through certificates.* (1) A pass-through or participation certificate evidencing an interest in a pool of mortgage loans which under subpart E of subchapter J of the Code is treated as a trust of which the grantor is the owner (or similar evidence of interest in a similar pooled fund or pooled trust treated as a grantor trust) (''pass-through certificate'') is considered to be a ''registration-required obligation'' under section 163(f)(2)(A) and § 1.163–5(c) if the pass-through certificate is described in section 163(f)(2)(A) and § 1.163–5(c) without regard to whether any obligation held by the fund or trust to which the pass-through certificate relates is described in section 163(f)(2)(A) and § 1.163–5(c). A pass-through certificate is considered to be described in section 163(f)(2)(B) and § 1.163–5(c) if the pass-through certificate is described in section 163(f)(2)(B) and § 1.163–5(c) without regard to whether any obligation held by the fund or trust to which the pass-through certificate relates is described in section 163(f)(2)(B) and § 1.163–5(c).

(2) An obligation held by a fund or trust in which ownership interests are represented by pass-through certificates is considered to be in registered form under section 149(a) and the regulations thereunder or to be described in section 163(f)(2) (A) or (B), if the obligation held by the fund or trust is in registered form under section 149(a) and the regulations thereunder or is described in section 163(f)(2) (A) or (B), respectively, without regard to whether the pass-through certificates are so considered.

(3) For purposes of section 4701, a pass-through certificate is considered to be issued solely by the recipient of the proceeds from the issuance of the pass-through certificate (hereinafter the ''sponsor''). The sponsor is therefore liable for any excise tax under section 4701 that may be imposed with reference to the principal amount of the pass-through certificate.

(4) In order to implement the purpose of section 163, § 1.163–5(c) and this section, the Commissioner may characterize a certificate or other evidence of interest in a fund or trust which under subpart E of subchapter J of the Code is treated as a trust of which the grantor is the owner and any obligation held by such fund or trust in accordance with the substance of the arrangement they represent and may impose the penalties provided under sections 163(f)(1) and 4701 in the appropriate amounts and on the appropriate persons. This provision may be applied, for example, where a corporation issues obligations purportedly in registered form, contributes them to a grantor trust as its only assets, and arranges for the sale to investors of bearer certificates of interest in the trust which do not meet the requirements of section 163(f)(2)(B). If this provision is applied, the obligations held by the fund or trust will not be considered to be issued in registered form or to meet the requirements of section 163(f)(2)(B). The corporation will not be allowed a deduction for the payment of interest on the obligations held by the trust, and the excise tax under section 4701, calculated with reference to the principal amount of the obligations held by the trust will be imposed on the corporation may be collected from the corporation and its agents. This paragraph (d)(4) will not be applied so as to alter the tax consequences of transactions as to which rulings have been issued by the Internal Revenue Service prior to September 19, 1985.

(5) The rules set forth in this paragraph (d) apply solely for purposes of sections 4701, 163(f)(2)(A), 163(f)(2)(B), § 1.163–5(c), and any other section that refers to this section for the definition of the term ''registration-required obligation'' (such as the regulations under sections 871(h) and 881(c)). The treatment of obligations described in this paragraph (d) for purposes of section 163(f)(2) (A) and (B) does not affect the

determination of whether bearer obligations that are issued or guaranteed by the United States Government, a United States Government-owned agency, a United States Government sponsored enterprise (within the meaning of §1.163–5(c)(1)) or that are backed (as described in the Treasury Department News Release R–2835 of September 10, 1984 and Treasury Department News Release R–2847 of September 14, 1984) by obligations issued by the United States Government, a United States Government-owned agency, or a United States Government sponsored enterprise comply with the requirements of section 163(f)(2)(B) and the regulations thereunder.

(6) The provisions of paragraphs (d) (1) through (5) may be illustrated by the following example:

Commercial Bank K forms a pool of 1000 residential mortgage loans, each made to a different individual homeowner, by assigning them to Commercial Bank L, an unrelated entity serving as trustee of the pool. Commercial Bank L immediately sells in a public offering certificates of interest in the trust of a maturity of 10 years in registered form. Commercial Bank L transfers the cash proceeds of the offering to Commercial Bank K. The certificates of interest in the trust are of a type offered to the public and are not described in section 163(f)(2)(B). Pursuant to paragraph (d)(1), the certificates of interest in the pool are registration-required obligations without regard to the fact that the obligations held by the trust are not registration-required obligations.

(e) *Regular interests in REMICS.* (1) A regular interest in a REMIC, as defined in sections 860D and 860G and the regulations thereunder, is considered to be a ''registration-required obligation'' under section 163(f)(2)(A) and §1.163–5(c) if the regular interest is described in section 163(f)(2)(A) and §1.163–5(c), without regard to whether any obligation held by the REMIC to which the regular interest relates is described in section 163(f)(2)(A) and §1.163–5(c). A regular interest in a REMIC is considered to be described in section 163(f)(2)(B) and §1.163–5(c), if the regular interest is described in section 163(f)(2)(B) and §1.163(c), without regard to whether any obligation held by the REMIC to which the regular interest relates is described in section 163(f)(2)(B) and §1.163–5(c).

(2) An obligation held by a REMIC is considered to be described in section 163(f)(2) (A) or (B) if such obligation is described in section 163(f)(2) (A) or (B), respectively, without regard to whether the regular interests in the REMIC are so considered.

(3) For purposes of section 4701, a regular interest is considered to be issued solely by the recipient of the proceeds from the issuance of the regular interest (hereinafter the ''sponsor''). The sponsor is therefore liable for any excise tax under section 4701 that may be imposed with reference to the principal amount of the regular interest.

(4) In order to implement the purpose of section 163, §1.163–5(c), and this section, the Commissioner may characterize a regular interest in a REMIC and any obligation held by such REMIC in accordance with the substance of the arrangement they represent and may impose the penalties provided under sections 163(f)(1) and 4701 in the appropriate amounts and on the appropriate persons. This provision may be applied, for example, where a corporation issues an obligation that is purportedly in registered form and that will qualify as a ''qualified mortgage'' within the meaning of section 860G(a)(3) in the hands of a REMIC, contributes the obligation to a REMIC as its only asset, and arranges for the sale to investors of regular interests in the REMIC in bearer form that do not meet the requirements of section 163(f)(2)(B). If this provision is applied, the obligation held by the REMIC will not be considered to be issued in registered form or to meet the requirements of section 163(f)(2)(B). The corporation will not be allowed a deduction for the payment of interest on the obligation held by the REMIC, and the excise tax under section 4701, calculated with reference to the principal amount of the obligation held by the REMIC, will be imposed on the corporation and may be collected from the corporation and its agents.

[T.D. 8202, 53 FR 17928, May 19, 1988, as amended by T.D. 8300, 55 FR 19626, May 10, 1990]

§ 1.163–6T Reduction of deduction where section 25 credit taken (temporary).

(a) *In general.* The amount of the deduction under section 163 for interest paid or accrued during any taxable year on a certified indebtedness amount with respect to a mortgage credit certificate which has been issued under section 25 shall be reduced by the amount of the credit allowable with respect to such interest under section 25 (determined without regard to section 26).

(b) *Cross reference.* See §§ 1.25–1T through 1.25–8T with respect to rules relating to mortgage credit certificates.

[T.D. 8023, 50 FR 19355, May 8, 1985]

§ 1.163–7 Deduction for OID on certain debt instruments.

(a) *General rule.* Except as otherwise provided in paragraph (b) of this section, an issuer (including a transferee) determines the amount of OID that is deductible each year under section 163(e)(1) by using the constant yield method described in § 1.1272–1(b). This determination, however, is made without regard to section 1272(a)(7) (relating to acquisition premium) and § 1.1273–1(d) (relating to de minimis OID). An issuer is permitted a deduction under section 163(e)(1) only to the extent the issuer is primarily liable on the debt instrument. For certain limitations on the deductibility of OID, see sections 163(e) and 1275(b)(2). To determine the amount of interest (OID) that is deductible each year on a debt instrument that provides for contingent payments, see § 1.1275–4.

(b) *Special rules for de minimis OID*—(1) *Stated interest.* If a debt instrument has a de minimis amount of OID (within the meaning of § 1.1273–1(d)), the issuer treats all stated interest on the debt instrument as qualified stated interest. See §§ 1.446–2(b) and 1.461–1 for the treatment of qualified stated interest.

(2) *Deduction of de minimis OID on other than a constant yield basis.* In lieu of deducting de minimis OID under the general rule of paragraph (a) of this section, an issuer of a debt instrument with a de minimis amount of OID (other than a de minimis amount treated as qualified stated interest under paragraph (b)(1) of this section) may choose to deduct the OID at maturity, on a straight-line basis over the term of the debt instrument, or in proportion to stated interest payments. The issuer makes this choice by reporting the de minimis OID in a manner consistent with the method chosen on the issuer's timely filed Federal income tax return for the taxable year in which the debt instrument is issued.

(c) *Deduction upon repurchase.* Except to the extent disallowed by any other section of the Internal Revenue Code (e.g., section 249) or this paragraph (c), if a debt instrument is repurchased by the issuer for a price in excess of its adjusted issue price (as defined in § 1.1275–1(b)), the excess (repurchase premium) is deductible as interest for the taxable year in which the repurchase occurs. If the issuer repurchases a debt instrument in a debt-for-debt exchange, the repurchase price is the issue price of the newly issued debt instrument (reduced by any unstated interest within the meaning of section 483). However, if the issue price of the newly issued debt instrument is determined under either section 1273(b)(4) or section 1274, any repurchase premium is not deductible in the year of the repurchase, but is amortized over the term of the newly issued debt instrument in the same manner as if it were OID.

(d) *Choice of accrual periods to determine whether a debt instrument is an applicable high yield discount obligation (AHYDO).* Section 163(e)(5) affects an issuer's OID deductions for certain high yield debt instruments that have significant OID. For purposes of section 163(i)(2), which defines significant OID, the issuer's choice of accrual periods to determine OID accruals is used to determine whether a debt instrument has significant OID. See § 1.1275–2(e) for rules relating to the issuer's obligation to disclose certain information to holders.

(e) *Qualified reopening*—(1) *In general.* In a qualified reopening of an issue of debt instruments, if a holder pays more or less than the adjusted issue price of the original debt instruments to acquire an additional debt instrument, the issuer treats this difference as an adjustment to the issuer's interest expense for the original and additional debt instruments. As provided by paragraphs (e)(2) through (5) of this section, the adjustment is taken into account over the term of the instrument using constant yield principles.

(2) *Positive adjustment.* If the difference is positive (that is, the holder pays more than the adjusted issue price of the original debt instrument), then, with respect to the issuer but not the holder, the difference increases the aggregate adjusted issue prices of all of the debt instruments in the issue, both original and additional.

(3) *Negative adjustment.* If the difference is negative (that is, the holder pays less than the adjusted issue price of the original debt instrument), then, with respect to the issuer but not the holder, the difference reduces the aggregate adjusted issue prices of all of the debt instruments in the issue, both original and additional.

(4) *Determination of issuer's interest accruals.* As of the reopening date, the issuer must redetermine the yield of the debt instruments in the issue for purposes of applying the constant yield method described in §1.1272–1(b) to determine the issuer's accruals of interest expense over the remaining term of the debt instruments in the issue. This redetermined yield is based on the aggregate adjusted issue prices of the debt instruments in the issue (as determined under this paragraph (e)) and the remaining payment schedule of the debt instruments in the issue. If the aggregate adjusted issue prices of the debt instruments in the issue (as determined under this paragraph (e)) are less than the aggregate stated redemption price at maturity of the instruments (determined as of the reopening date) by a *de minimis* amount (within the meaning of §1.1273–1(d)), the issuer may use the rules in paragraph (b) of this section to determine the issuer's accruals of interest expense.

(5) *Effect of adjustments on issuer's adjusted issue price.* The adjustments made under this paragraph (e) are taken into account for purposes of determining the issuer's adjusted issue price under §1.1275–1(b).

(6) *Definitions.* The terms *additional debt instrument*, *original debt instrument*, *qualified reopening*, and *reopening date* have the same meanings as in §1.1275–2(k).

(f) *Effective dates.* This section (other than paragraph (e) of this section) applies to debt instruments issued on or after April 4, 1994. Taxpayers, however, may rely on this section (other than paragraph (e) of this section) for debt instruments issued after December 21, 1992, and before April 4, 1994. Paragraph (e) of this section applies to qualified reopenings where the reopening date is on or after March 13, 2001.

[T.D. 8517, 59 FR 4804, Feb. 2, 1994, as amended by T.D. 8674, 61 FR 30138, June 14, 1996; T.D. 8934, 66 FR 2815, Jan. 12, 2001]

§1.163–8T Allocation of interest expense among expenditures (temporary).

(a) *In general*—(1) *Application.* This section prescribes rules for allocating interest expense for purposes of applying sections 469 (the ''passive loss limitation'') and 163 (d) and (h) (the ''nonbusiness interest limitations'').

(2) *Cross-references.* This paragraph provides an overview of the manner in which interest expense is allocated for the purposes of applying the passive loss limitation and nonbusiness interest limitations and the manner in which interest expense allocated under this section is treated. See paragraph (b) of this section for definitions of certain terms, paragraph (c) for the rules for allocating debt and interest expense among expenditures, paragraphs (d) and (e) for the treatment of debt repayments and refinancings, paragraph (j) for the rules for reallocating debt upon the occurrence of certain events, paragraph (m) for the coordination of the rules in this section with other limitations on the deductibility of interest expense, and paragraph (n) of this section for effective date and transitional rules.

(3) *Manner of allocation.* In general, interest expense on a debt is allocated in the same manner as the debt to which such interest expense relates is allocated. Debt is allocated by tracing disbursements of the debt proceeds to specific expenditures. This section prescribes rules for tracing debt proceeds to specific expenditures.

(4) *Treatment of interest expenses*—(i) *General rule.* Except as otherwise provided in paragraph (m) of this section (relating to limitations on interest expense other than the passive loss and nonbusiness interest limitations), interest expense allocated under the rules of this section is treated in the following manner:

(A) Interest expense allocated to a trade or business expenditure (as defined in paragraph (b)(7) of this section) is taken into account under section 163 (h)(2)(A);

(B) Interest expense allocated to a passive activity expenditure (as defined in paragraph (b)(4) of this section) or a former passive activity expenditure (as defined in paragraph (b)(2) of this section) is taken into account for purposes of section 469 in determining the income or loss from the activity to which such expenditure relates;

(C) Interest expense allocated to an investment expenditure (as defined in paragraph (b)(3) of this section) is treated for purposes of section 163(d) as investment interest;

(D) Interest expense allocated to a personal expenditure (as defined in paragraph (b)(5) of this section) is treated for purposes of section 163(h) as personal interest; and

(E) Interest expense allocated to a portfolio expenditure (as defined in paragraph (b)(6) of this section) is treated for purposes of section 469(e)(2)(B)(ii) as interest expense described in section 469(e)(1)(A)(i)(III).

(ii) *Examples.* The following examples illustrate the application of this paragraph (a)(4):

Example 1. Taxpayer A, an individual, incurs interest expense allocated under the rules of this section to the following expenditures:

$6,000 Passive activity expenditure.
$4,000 Personal expenditure.

The $6,000 interest expense allocated to the passive activity expenditure is taken into account for purposes of section 469 in computing A's income or loss from the activity to which such interest relates. Pursuant to section 163(h), A may not deduct the $4,000 interest expense allocated to the personal expenditure (except to the extent such interest is qualified residence interest, within the meaning of section 163(h)(3)).

Example 2. (i) Corporation M, a closely held C corporation (within the meaning of section 469 (j)(1)) has $10,000 of interest expense for a taxable year. Under the rules of this section, M's interest expense is allocated to the following expenditures:

$2,000 Passive activity expenditure.
$3,000 Portfolio expenditure.
$5,000 Other expenditures.

(ii) Under section 163(d)(3)(D) and this paragraph (a)(4), the $2,000 interest expense allocated to the passive activity expenditure is taken into account in computing M's passive activity loss for the taxable year, but, pursuant to section 469(e)(1) and this paragraph (a)(4), the interest expense allocated to the portfolio expenditure and the other expenditures is not taken into account for such purposes.

(iii) Since M is a closely held C corporation, its passive activity loss is allowable under section 469(e)(2)(A) as a deduction from net active income. Under section 469(e)(2)(B) and this paragraph (a)(4), the $5,000 interest expense allocated to other expenditures is taken into account in computing M's net active income, but the interest expense allocated to the passive activity expenditure and the portfolio expenditure is not taken into account for such purposes.

(iv) Since M is a corporation, the $3,000 interest expense allocated to the portfolio expenditure is allowable without regard to section 163(d). If M were an individual, however, the interest expense allocated to the portfolio expenditure would be treated as investment interest for purposes of applying the limitation of section 163(d).

(b) *Definitions.* For purposes of this section—

(1) ''Former passive activity'' means an activity described in section 469(f)(3), but only if an unused deduction or credit (within the meaning of section 469(f)(1) (A) or (B)) is allocable to the activity under section 469(b) for the taxable year.

(2) ''Former passive activity expenditure'' means an expenditure that is taken into account under section 469 in computing the income or loss from a former passive activity of the taxpayer or an expenditure (including an expenditure properly chargeable to capital account) that would be so taken into account if such expenditure were otherwise deductible.

(3) ''Investment expenditure'' means an expenditure (other than a passive activity expenditure) properly chargeable to capital account with respect to property held for investment (within the meaning of section 163(d)(5)(A)) or

an expenditure in connection with the holding of such property.

(4) ''Passive activity expenditure'' means an expenditure that is taken into account under section 469 in computing income or loss from a passive activity of the taxpayer or an expenditure (including an expenditure properly chargeable to capital account) that would be so taken into account if such expenditure were otherwise deductible. For purposes of this section, the term ''passive activity expenditure'' does not include any expenditure with respect to any low-income housing project in any taxable year in which any benefit is allowed with respect to such project under section 502 of the Tax Reform Act of 1986.

(5) ''Personal expenditure'' means an expenditure that is not a trade or business expenditure, a passive activity expenditure, or an investment expenditure.

(6) ''Portfolio expenditure'' means an investment expenditure properly chargeable to capital account with respect to property producing income of a type described in section 469(e)(1)(A) or an investment expenditure for an expense clearly and directly allocable to such income.

(7) ''Trade or business expenditure'' means an expenditure (other than a passive activity expenditure or an investment expenditure) in connection with the conduct of any trade or business other than the trade or business of performing services as an employee.

(c) *Allocation of debt and interest expense*—(1) *Allocation in accordance with use of proceeds*. Debt is allocated to expenditures in accordance with the use of the debt proceeds and, except as provided in paragraph (m) of this section, interest expense accruing on a debt during any period is allocated to expenditures in the same manner as the debt is allocated from time to time during such period. Except as provided in paragraph (m) of this section, debt proceeds and related interest expense are allocated solely by reference to the use of such proceeds, and the allocation is not affected by the use of an interest in any property to secure the repayment of such debt or interest. The following example illustrates the principles of this paragraph (c)(1):

Example. Taxpayer A, an individual, pledges corporate stock held for investment as security for a loan and uses the debt proceeds to purchase an automobile for personal use. Interest expense accruing on the debt is allocated to the personal expenditure to purchase the automobile even though the debt is secured by investment property.

(2) *Allocation period*—(i) *Allocation of debt*. Debt is allocated to an expenditure for the period beginning on the date the proceeds of the debt are used or treated as used under the rules of this section to make the expenditure and ending on the earlier of—

(A) The date the debt is repaid; or

(B) The date the debt is reallocated in accordance with the rules in paragraphs (c)(4) and (j) of this section.

(ii) *Allocation of interest expense*—(A) *In general*. Except as otherwise provided in paragraph (m) of this section, interest expense accruing on a debt for any period is allocated in the same manner as the debt is allocated from time to time, regardless of when the interest is paid.

(B) *Effect of compounding*. Accrued interest is treated as a debt until it is paid and any interest accruing on unpaid interest is allocated in the same manner as the unpaid interest is allocated. For the taxable year in which a debt is reallocated under the rules in paragraphs (c)(4) and (j) of this section, however, compound interest accruing on such debt (other than compound interest accruing on interest that accrued before the beginning of the year) may be allocated between the original expenditure and the new expenditure on a straight-line basis (*i.e.*, by allocating an equal amount of such interest expense to each day during the taxable year). In addition, a taxpayer may treat a year as consisting of 12 30-day months for purposes of allocating interest on a straight-line basis.

(C) *Accrual of interest expense*. For purposes of this paragraph (c)(2)(ii), the amount of interest expense that accrues during any period is determined by taking into account relevant provisions of the loan agreement and any applicable law such as sections 163(e), 483, and 1271 through 1275.

(iii) *Examples*. The following examples illustrate the principles of this paragraph (c)(2):

Example 1. (i) On January 1, taxpayer B, a calendar year taxpayer, borrows $1,000 at an interest rate of 11 percent, compounded semiannually. B immediately uses the debt proceeds to purchase an investment security. On July 1, B sells the investment security for $1,000 and uses the sales proceeds to make a passive activity expenditure. On December 31, B pays accrued interest on the $1,000 debt for the entire year.

(ii) Under this paragraph (c)(2) and paragraph (j) of this section, the $1,000 debt is allocated to the investment expenditure for the period from January 1 through June 30, and to the passive activity expenditure from July 1 through December 31. Interest expense accruing on the $1,000 debt is allocated in accordance with the allocation of the debt from time to time during the year even though the debt was allocated to the passive activity expenditure on the date the interest was paid. Thus, the $55 interest expense for the period from January 1 through June 30 is allocated to the investment expenditure. In addition, during the period from July 1 through December 31, the interest expense allocated to the investment expenditure is a debt, the proceeds of which are treated as used to make an investment expenditure. Accordingly, an additional $3 of interest expense for the period from July 1 through December 31 ($55×.055) is allocated to the investment expenditure. The remaining $55 of interest expense for the period from July 1 through December 31 ($1,000×.055) is allocated to the passive activity expenditure.

(iii) Alternatively, under the rule in paragraph (c)(2)(ii)(B) of this section, B may allocate the interest expense on a straight-line basis and may also treat the year as consisting of 12 30-day months for this purpose. In that case, $56.50 of interest expense (180/360×$113) would be allocated to the investment expenditure and the remaining $56.50 of interest expense would be allocated to the passive activity expenditure.

Example 2. On January 1, 1988, taxpayer C borrows $10,000 at an interest rate of 11 percent, compounded annually. All interest and principal on the debt is payable in a lump sum on December 31, 1992. C immediately uses the debt proceeds to make a passive activity expenditure. C materially participates in the activity in 1990, 1991, and 1992. Therefore, under paragraphs (c)(2) (i) and (j) of this section, the debt is allocated to a passive activity expenditure from January 1, 1988, through December 31, 1989, and to a former passive activity expenditure from January 1, 1990, through December 31, 1992. In accordance with the loan agreement (and consistent with §1.1272–1(d)(1) of the proposed regulations, 51 FR 12022, April 8, 1986), interest expense accruing during any period is determined on the basis of annual compounding. Accordingly, the interest expense on the debt is allocated as follows:

Year	Amount		Expenditure
1988	$10,000 × .11	$1,100	Passive activity.
1989	11,100 × .11	1,221	Passive activity.
1990	12,321 × .11 = 1,355		
	1,355 × 2,321/12,321	255	Passive activity.
	1,355 × 10,000/12,321	1,100	Former passive activity.
		1,355	
1991	13,676 × .11 = 1,504		
	1,504 × 2,576/13,676	283	Passive activity.
	1,504 × 11,100/13,676	1,221	Former passive activity.
		1,504	
1992	15,180 × .11 = 1,670		
	1,670 × 2,859/15,180	315	Passive activity.
	1,670 × 12,321/15,180	1,355	Former passive activity.
		1,670	

(3) *Allocation of debt; proceeds not disbursed to borrower*—(i) *Third-party financing.* If a lender disburses debt proceeds to a person other than the borrower in consideration for the sale or use of property, for services, or for any other purpose, the debt is treated for purposes of this section as if the borrower used an amount of the debt proceeds equal to such disbursement to make an expenditure for such property, services, or other purpose.

(ii) *Debt assumptions not involving cash disbursements.* If a taxpayer incurs or assumes a debt in consideration for the sale or use of property, for services, or for any other purpose, or takes property subject to a debt, and no debt proceeds are disbursed to the taxpayer, the debt is treated for purposes of this section as if the taxpayer used an amount of the debt proceeds equal to the balance of the debt outstanding at such time to make an expenditure for such property, services, or other purpose.

(4) *Allocation of debt; proceeds deposited in borrower's account*—(i) *Treatment of deposit.* For purposes of this section, a deposit of debt proceeds in an account is treated as an investment expenditure, and amounts held in an account (whether or not interest bearing) are treated as property held for investment. Debt allocated to an account under this paragraph (c)(4)(i) must be reallocated as required by paragraph (j) of this section whenever debt proceeds held in the account are used for another expenditure. This paragraph (c)(4) provides rules for determining when debt proceeds are expended from the account. The following example illustrates the principles of this paragraph (c)(4)(i):

Example. Taxpayer C, a calendar year taxpayer, borrows $100,000 on January 1 and immediately uses the proceeds to open a noninterest-bearing checking account. No other amounts are deposited in the account during the year, and no portion of the principal amount of the debt is repaid during the year. On April 1, C uses $20,000 of the debt proceeds held in the account for a passive activity expenditure. On September 1, C uses an additional $40,000 of the debt proceeds held in the account for a personal expenditure. Under this paragraph (c)(4)(i), from January 1 through March 31 the entire $100,000 debt is allocated to an investment expenditure for the account. From April 1 through August 31, $20,000 of the debt is allocated to the passive activity expenditure, and $80,000 of the debt is allocated to the investment expenditure for the account. From September 1 through December 31, $40,000 of the debt is allocated to the personal expenditure, $20,000 is allocated to the passive activity expenditure, and $40,000 is allocated to an investment expenditure for the account.

(ii) *Expenditures from account; general ordering rule.* Except as provided in paragraph (c)(4)(iii) (B) or (C) of this section, debt proceeds deposited in an account are treated as expended before—

(A) Any unborrowed amounts held in the account at the time such debt proceeds are deposited; and

(B) Any amounts (borrowed or unborrowed) that are deposited in the account after such debt proceeds are deposited.

The following example illustrates the application of this paragraph (c)(4)(ii):

Example. On January 10, taxpayer E opens a checking account, depositing $500 of proceeds of Debt A and $1,000 of unborrowed funds. The following chart summarizes the transactions which occur during the year with respect to the account:

Date	Transaction
Jan. 10	$500 proceeds of Debt A and $1,000 unborowed funds deposited.
Jan. 11	$500 proceeds of Debt B deposited.
Feb. 17	$800 personal expenditure.
Feb. 26	$700 passive activity expenditure.
June 21	$1,000 proceeds of Debt C deposited.
Nov. 24	$800 investment expenditure.
Dec. 20	$600 personal expenditure.

The $800 personal expenditure is treated as made from the $500 proceeds of Debt A and $300 of the proceeds of Debt B. The $700 passive activity expenditure is treated as made from the remaining $200 proceeds of Debt B and $500 of unborrowed funds. The $800 investment expenditure is treated as made entirely from the proceeds of Debt C. The $600 personal expenditure is treated as made from the remaining $200 proceeds of Debt C and $400 of unborrowed funds. Under paragraph (c)(4)(i) of this section, debt is allocated to an investment expenditure for periods during which debt proceeds are held in the account.

(iii) *Expenditures from account; supplemental ordering rules*—(A) *Checking or similar accounts.* Except as otherwise provided in this paragraph (c)(4)(iii), an expenditure from a checking or similar account is treated as made at the time the check is written on the account, provided the check is delivered or mailed to the payee within a reasonable period after the writing of the check. For this purpose, the taxpayer may treat checks written on the same day as written in any order. In the absence of evidence to the contrary, a check is presumed to be written on the date appearing on the check and to be delivered or mailed to the payee within a reasonable period thereafter. Evidence to the contrary may include the fact that a check does not clear within a reasonable period after the date appearing on the check.

(B) *Expenditures within 15 days after deposit of borrowed funds.* The taxpayer may treat any expenditure made from an account within 15 days after debt proceeds are deposited in such account as made from such proceeds to the extent thereof even if under paragraph (c)(4)(ii) of this section the debt proceeds would be treated as used to make one or more other expenditures. Any such expenditures and the debt proceeds from which such expenditures are treated as made are disregarded in applying paragraph (c)(4)(ii) of this section. The following examples illustrate the application of this paragraph (c)(4)(iii)(B):

Example 1. Taxpayer D incurs a $1,000 debt on June 5 and immediately deposits the proceeds in an account (''Account A''). On June 17, D transfers $2,000 from Account A to another account (''Account B''). On June 30, D writes a $1,500 check on Account B for a passive activity expenditure. In addition, numerous deposits of borrowed and unborrowed amounts and expenditures occur with respect to both accounts throughout the month of June. Notwithstanding these other transactions, D may treat $1,000 of the deposit to Account B on June 17 as an expenditure from the debt proceeds deposited in Account A on June 5. In addition, D may similarly treat $1,000 of the passive activity expenditure on June 30 as made from debt proceeds treated as deposited in Account B on June 17.

Example 2. The facts are the same as in the example in paragraph (c)(4)(ii) of this section, except that the proceeds of Debt B are deposited on February 11 rather than on January 11. Since the $700 passive activity expenditure occurs within 15 days after the proceeds of Debt B are deposited in the account, E may treat such expenditure as being made from the proceeds of Debt B to the extent thereof. If E treats the passive activity expenditure in this manner, the expenditures from the account are treated as follows: The $800 personal expenditure is treated as made from the $500 proceeds of Debt A and $300 of unborrowed funds. The $700 passive activity expenditure is treated as made from the $500 proceeds of Debt B and $200 of unborrowed funds. The remaining expenditures are treated as in the example in paragraph (c)(4)(ii) of this section.

(C) *Interest on segregated account.* In the case of an account consisting solely of the proceeds of a debt and interest earned on such account, the taxpayer may treat any expenditure from such account as made first from amounts constituting interest (rather than debt proceeds) to the extent of the balance of such interest in the account at the time of the expenditure, determined by applying the rules in this paragraph (c)(4). To the extent any expenditure is treated as made from interest under this paragraph (c)(4)(iii)(C), the expenditure is disregarded in applying paragraph (c)(4)(ii) of this section.

(iv) *Optional method for determining date of reallocation.* Solely for the purpose of determining the date on which debt allocated to an account under paragraph (c)(4)(i) of this section is reallocated, the taxpayer may treat all expenditures made during any calendar month from debt proceeds in the account as occurring on the later of the first day of such month or the date on which such debt proceeds are deposited in the account. This paragraph (c)(4)(iv) applies only if all expenditures from an account during the same calendar month are similarly treated. The following example illustrates the application of this paragraph (c)(4)(iv):

Example. On January 10, taxpayer G opens a checking account, depositing $500 of proceeds of Debt A and $1,000 of unborrowed funds. The following chart summarizes the transactions which occur during the year with respect to the account (note that these facts are the same as the facts of the example in paragraph (c)(4)(ii) of this section):

Date	Transaction
Jan. 10	$500 proceeds of Debt A and $1,000 unborrowed funds deposited.
Jan. 11	$500 proceeds of Debt B deposited.
Feb. 17	$800 personal expenditure.
Feb. 26	$700 passive activity expenditure.
June 21	$1,000 proceeds of Debt C deposited.
Nov. 24	$800 investment expenditure.
Dec. 20	$600 personal expenditure.

Assume that G chooses to apply the optional rule of this paragraph (c)(4)(iv) to all expenditures. For purposes of determining the date on which debt is allocated to the $800 personal expenditure made on February 17, the $500 treated as made from the proceeds of Debt A and the $300 treated as made from the proceeds of Debt B are treated as expenditures occurring on February 1. Accordingly, Debt A is allocated to an investment expenditure for the account from January 10 through January 31 and to the personal expenditure from February 1 through December 31, and $300 of Debt B is allocated to an investment expenditure for the account from January 11 through January 31 and to the personal expenditure from February 1 through December 31. The remaining $200 of Debt B is allocated to an investment expenditure for the account from January 11 through January 31 and to the passive activity expenditure from February 1 through December 31. The $800 of Debt C used to make the investment expenditure on November 24 is allocated to an investment expenditure for the account from June 21 through October 31 and to an investment expenditure from November 1 through December 31. The remaining $200 of Debt C is allocated to an investment expenditure for the account from June 21 through November 30 and to a personal expenditure from December 1 through December 31.

(v) *Simultaneous deposits*—(A) *In general.* If the proceeds of two or more debts are deposited in an account simultaneously, such proceeds are treated for purposes of this paragraph (c)(4) as deposited in the order in which the debts were incurred.

(B) *Order in which debts incurred.* If two or more debts are incurred simultaneously or are treated under applicable law as incurred simultaneously, the debts are treated for purposes of this paragraph (c)(4)(v) as incurred in any order the taxpayer selects.

(C) *Borrowings on which interest accrues at different rates.* If interest does not accrue at the same fixed or variable rate on the entire amount of a borrowing, each portion of the borrowing on which interest accrues at a different fixed or variable rate is treated as a separate debt for purposes of this paragraph (c)(4)(v).

(vi) *Multiple accounts.* The rules in this paragraph (c)(4) apply separately to each account of a taxpayer.

(5) *Allocation of debt; proceeds received in cash*—(i) *Expenditure within 15 days of receiving debt proceeds.* If a taxpayer receives the proceeds of a debt in cash, the taxpayer may treat any cash expenditure made within 15 days after receiving the cash as made from such debt proceeds to the extent thereof and may treat such expenditure as made on the date the taxpayer received the cash. The following example illustrates the rule in this paragraph (c)(5)(i):

Example. Taxpayer F incurs a $1,000 debt on August 4 and receives the debt proceeds in cash. F deposits $1,500 cash in an account on August 15 and on August 27 writes a check on the account for a passive activity expenditure. In addition, F engages in numerous other cash transactions throughout the month of August, and numerous deposits of borrowed and unborrowed amounts and expenditures occur with respect to the account during the same period. Notwithstanding these other transactions, F may treat $1,000 of the deposit on August 15 as an expenditure made from the debt proceeds on August 4. In addition, under the rule in paragraph (c)(4)(v)(B) of this section, F may treat the passive activity expenditure on August 27 as made from the $1,000 debt proceeds treated as deposited in the account.

(ii) *Other expenditures.* Except as provided in paragraphs (c)(5) (i) and (iii) of this section, any debt proceeds a taxpayer (other than a corporation) receives in cash are treated as used to make personal expenditures. For purposes of this paragraph (c)(5), debt proceeds are received in cash if, for example, a withdrawal of cash from an account is treated under the rules of this section as an expenditure of debt proceeds.

(iii) *Special rules for certain taxpayers.* [Reserved]

(6) *Special rules*—(i) *Qualified residence debt.* [Reserved]

(ii) *Debt used to pay interest.* To the extent proceeds of a debt are used to pay interest, such debt is allocated in the same manner as the debt on which such interest accrued is allocated from time to time. The following example illustrates the application of this paragraph (c)(6)(ii):

Example. On January 1, taxpayer H incurs a debt of $1,000, bearing interest at an annual rate of 10 percent, compounded annually, payable at the end of each year (''Debt A''). H immediately opens a checking account, in which H deposits the proceeds of Debt A. No other amounts are deposited in the account during the year. On April 1, H writes a check for a personal expenditure in the amount of $1,000. On December 31, H borrows $100 (''Debt B'') and immediately uses the proceeds of Debt B to pay the accrued interest of $100 on Debt A. From January 1 through March 31, Debt A is allocated, under the rule in paragraph (c)(4)(i) of this section, to the investment expenditure for the account. From April 1 through December 31, Debt A is allocated to the personal expenditure. Under the rule in paragraph (c)(2)(ii) of this section, $25 of the interest on Debt A for the year is allocated to the investment expenditure, and $75 of the interest on Debt A for the year is allocated to the personal expenditure. Accordingly, for the purpose of allocating the interest on Debt B for all periods until Debt B is repaid, $25 of Debt B is allocated to the investment expenditure, and $75 of Debt B is allocated to the personal expenditure.

(iii) *Debt used to pay borrowing costs*—(A) *Borrowing costs with respect to different debt.* To the extent the proceeds of a debt (the ''ancillary debt'') are used to pay borrowing costs (other than interest) with respect to another debt (the ''primary debt''), the ancillary debt is allocated in the same manner as the primary debt is allocated from time to time. To the extent the primary debt is repaid, the ancillary debt will continue to be allocated in the same manner as the primary debt was allocated immediately before its repayment. The following example illustrates the rule in this paragraph (c)(6)(iii)(A):

Example. Taxpayer I incurs debts of $60,000 (''Debt A'') and $10,000 (''Debt B''). I immediately uses $30,000 of the proceeds of Debt A to make a trade or business expenditure, $20,000 to make a passive activity expenditure, and $10,000 to make an investment expenditure. I immediately use $3,000 of the proceeds of Debt B to pay borrowing costs (other than interest) with respect to Debt A (such as loan origination, loan commitment, abstract, and recording fees) and deposits the remaining $7,000 in an account. Under the rule in this paragraph (c)(6)(iii)(A), the $3,000 of Debt B used to pay expenses of incurring Debt A is allocated $1,500 to the trade or business expenditure ($3,000 × $30,000/$60,000), $1,000 to the passive activity expenditure ($3,000 × $20,000/$60,000), and $500 ($3,000 × $10,000/$60,000) to the investment expenditure. The manner in which the $3,000 of Debt B used to pay expenses of incurring Debt A is allocated may change if the allocation of Debt A changes, but such allocation will be unaffected by any repayment of Debt A. The remaining $7,000 of Debt B is allocated to an investment expenditure for the account until such time, if any, as this amount is used for a different expenditure.

(B) *Borrowing costs with respect to same debt.* To the extent the proceeds of a debt are used to pay borrowing costs (other than interest) with respect to such debt, such debt is allocated in the same manner as the remaining debt is allocated from time to time. The remaining debt for this purpose is the portion of the debt that is not used to pay borrowing costs (other than interst) with respect to such debt. Any repayment of the debt is treated as a repayment of the debt allocated under this paragraph (c)(6)(iii)(B) and the remaining debt is the same proportion as such amount bear to each other. The following example illustrates the application of this paragraph (c)(6)(iii)(B):

Example. (i) Taxpayer J borrows $85,000. The lender disburses $80,000 of this amount to J, retaining $5,000 for borrowing costs (other than interest) with respect to the loan. J immediately uses $40,000 of the debt proceeds to make a personal expenditure, $20,000 to make a passive activity expenditure, and $20,000 to make an investment expenditure. Under the rule in this paragraph (c)(6)(iii)(B), the $5,000 used to pay borrowing costs is allocated $2,500 ($5,000 × $40,000/$80,000) to the personal expenditure, $1,250 ($5,000 × $20,000/$80,000) to the investment expenditure. The manner in which this $5,000 is allocated may change if the allocation of the remaining $80,000 of debt is changed.

(ii) Assume that J repays $50,000 of the debt. The repayment is treated as a repayment of $2,941 ($50,000 × $5,000/$85,000) of the debt used to pay borrowing costs and a repayment of $47,059 ($50,000 × $80,000/$85,000) of the remaining debt. Under paragraph (d) of this section, J is treated as repaying the $42,500 of debt allocated to the personal expenditure ($2,500 of debt used to pay borrowing costs and $40,000 of remaining debt). In addition, assuming that under paragraph (d)(2) J chooses to treat the allocation to the passive activity expenditure as having occurred before the allocation to the investment expenditure, J is treated as repaying $7,500 of debt allocated to the passive activity expenditure ($441 of debt used to pay borrowing costs and $7,059 of remaining debt).

(iv) *Allocation of debt before actual receipt of debt proceeds.* If interest properly accrues on a debt during any period before the debt proceeds are actually received or used to make an expenditure, the debt is allocated to an investment expenditure for such period.

(7) *Antiabuse rules.* [Reserved]

(d) *Debt repayments*—(1) *General ordering rule.* If, at the time any portion of a debt is repaid, such debt is allocated to more than one expenditure, the debt is treated for purposes of this section as repaid in the following order:

(i) Amounts allocated to personal expenditures;

(ii) Amounts allocated to investment expenditures and passive activity expenditures (other than passive activity expenditures described in paragraph (d)(1)(iii) of this section);

(iii) Amounts allocated to passive activity expenditures in connection with a rental real estate activity with respect to which the taxpayer actively participates (within the meaning of section 469(i));

(iv) Amounts allocated to former passive activity expenditures; and

(v) Amounts allocated to trade or business expenditures and to expenditures described in the last sentence of paragraph (b)(4) of this section.

(2) *Supplemental ordering rules for expenditures in same class.* Amounts allocated to two or more expenditures that are described in the subdivision of paragraph (d)(1) of this section (e.g., amounts allocated to different personal expenditures) are treated as repaid in the order in which the amounts were allocated (or reallocated) to such expenditures. For purposes of this paragraph (d)(2), the taxpayer may treat allocations and reallocations that occur on the same day as occurring in any order (without regard to the order in which expenditures are treated as made under paragraph (c)(4)(iii)(A) of this section).

(3) *Continuous borrowings.* In the case of borrowings pursuant to a line of credit or similar account or arrangement that allows a taxpayer to borrow funds periodically under a single loan agreement—

(i) All borrowings on which interest accrues at the same fixed or variable rate are treated as a single debt; and

(ii) Borrowings or portions of borrowings on which interest accrues at different fixed or variable rates are treated as different debts, and such debts are treated as repaid for purposes of this paragraph (d) in the order in which such borrowings are treated as repaid under the loan agreement.

(4) *Examples.* The following examples illustrate the application of this paragraph (d):

Example 1. Taxpayer B borrows $100,000 (''Debt A'') on July 12, immediately deposits the proceeds in an account, and uses the debt proceeds to make the following expenditures on the following dates:

August 31—$40,000 passive activity expenditure #1.

October 5—$20,000 passive activity expenditure #2.

December 24—$40,000 personal expenditure.

On January 19 of the following year, B repays $90,000 of Debt A (leaving $10,000 of Debt A outstanding). The $40,000 of Debt A allocated to the personal expenditure, the $40,000 allocated to passive activity expenditure #1, and $10,000 of the $20,000 allocated to passive activity expenditure #2 are treated as repaid.

Example 2. (i) Taxpayer A obtains a line of credit. Interest on any borrowing on the line of credit accrues at the lender's ''prime lending rate'' on the date of the borrowing plus two percentage points. The loan documents provide that borrowings on the line of credit are treated as repaid in the order the borrowings were made. A borrows $30,000 (''Borrowing #1'') on the line of credit and immediately uses $20,000 of the debt proceeds to make a personal expenditure (''personal expenditure #1'') and $10,000 to make a trade or business expenditure (''trade or business expenditure #1''). A subsequently borrows another $20,000 (''Borrowing #2'') on the line of credit and immediately uses $15,000 of the debt proceeds to make a personal expenditure (''personal expenditure #2'') and $5,000 to make a trade or business expenditure (''trade or business expenditure #2''). A then repays $40,000 of the borrowings.

(ii) If the prime lending rate plus two percentage points was the same on both the date of Borrowing #1 and the date of Borrowing #2, the borrowings are treated for purposes of this paragraph (d) as a single debt, and A is treated as having repaid $35,000 of debt allocated to personal expenditure #1 and personal expenditure #2, and $5,000 of debt allocated to trade or business expenditure #1.

(iii) If the prime lending rate plus two percentage points was different on the date of Borrowing #1 and Borrowing #2, the borrowings are treated as two debts, and, in accordance with the loan agreement, the $40,000 repaid amount is treated as a repayment of Borrowing #1 and $10,000 of Borrowing #2. Accordingly, A is treated as having repaid $20,000 of debt allocated to personal expenditure #1, $10,000 of debt allocated to trade or business expenditure #1, and $10,000 of debt allocated to personal expenditure #2.

(e) *Debt refinancings*—(1) *In general.* To the extent proceeds of any debt (the ''replacement debt'') are used to repay any portion of a debt, the replacement debt is allocated to the expenditures to which the repaid debt was allocated. The amount of replacement debt allocated to any such expenditure is equal to the amount of debt allocated to such expenditure that was repaid with proceeds of the replacement debt. To the extent proceeds of the replacement debt are used for expenditures other than repayment of a debt, the replacement debt is allocated to expenditures in accordance with the rules of this section.

(2) *Example.* The following example illustrates the application of this paragraph (e):

Example. Taxpayer C borrows $100,000 (''Debt A'') on July 12, immediately deposits the debt proceeds in an account, and uses the proceeds to make the following expenditures on the following dates (note that the facts of this example are the same as the facts of example (1) in paragraph (d)(4) of this section):

August 31—$40,000 passive activity expenditure #1.

October 5—$20,000 passive activity expenditure #2.

December 24—$40,000 personal expenditure #1.

On January 19 of the following year, C borrows $120,000 (''Debt B'') and uses $90,000 of the proceeds of repay $90,000 of Debt A (leaving $10,000 of Debt A outstanding). In addition, C uses $30,000 of the proceeds of Debt B to make a personal expenditure (''personal expenditure #2''). Debt B is allocated $40,000 to personal expenditure #1, $40,000 to passive activity expenditure #1, $10,000 to passive activity expenditure #2, and $30,000 to personal expenditure #2. Under paragraph (d)(1) of this section, Debt B will be treated as repaid in the following order: (1) amounts allocated to personal expenditure #1, (2) amounts allocated to personal expenditure #2, (3) amounts allocated to passive activity expenditure #1, and (4) amounts allocated to passive activity expenditure #2.

(f) *Debt allocated to distributions by passthrough entities.* [Reserved]

(g) *Repayment of passthrough entity debt.* [Reserved]

(h) *Debt allocated to expenditures for interests in passthrough entities.* [Reserved]

(i) *Allocation of debt to loans between passthrough entities and interest holders.* [Reserved]

(j) *Reallocation of debt*—(1) *Debt allocated to capital expenditures*—(i) *Time of reallocation.* Except as provided in paragraph (j)(2) of this section, debt allocated to an expenditure properly chargeable to capital account with respect to an asset (the ''first expenditure'') is reallocated to another expenditure on the earlier of—

(A) The date on which proceeds from a disposition of such asset are used for another expenditure; or

(B) The date on which the character of the first expenditure changes (e.g., from a passive activity expenditure to an expenditure that is not a passive activity expenditure) by reason of a change in the use of the asset with respect to which the first expenditure was capitalized.

(ii) *Limitation on amount reallocated.* The amount of debt reallocated under paragraph (j)(1)(i)(A) of this section may not exceed the proceeds from the disposition of the asset. The amount of debt reallocated under paragraph (j)(1)(i)(B) of this section may not exceed the fair market value of the asset on the date of the change in use. In applying this paragraph (j)(1)(ii) with respect to a debt in any case in which two or more debts are allocable to expenditures properly chargeable to capital account with respect to the same asset, only a ratable portion (determined with respect to any such debt by dividing the amount of such debt by the aggregate amount of all such debts) of the fair market value or proceeds from the disposition of such asset shall be taken into account.

(iii) *Treatment of loans made by the taxpayer.* Except as provided in paragraph (j)(1)(iv) of this section, an expenditure to make a loan is treated as an expenditure properly chargeable to capital account with respect to an asset, and for purposes of paragraph (j)(1)(i)(A) of this section any repayment of the loan is treated as a disposition of the asset. Paragraph (j)(3) of this section applies to any repayment of a loan in installments.

(iv) *Treatment of accounts.* Debt allocated to an account under paragraph (c)(4)(i) of this section is treated as allocated to an expenditure properly chargeable to capital account with respect to an asset, and any expenditure from the account is treated as a disposition of the asset. See paragraph (c)(4) of this section for rules under which debt proceeds allocated to an account are treated as used for another expenditure.

(2) *Disposition proceeds in excess of debt.* If the proceeds from the disposition of an asset exceed the amount of debt reallocated by reason of such disposition, or two or more debts are reallocated by reason of the disposition of an asset, the proceeds of the disposition are treated as an account to which the rules in paragraph (c)(4) of this section apply.

(3) *Special rule for deferred payment sales.* If any portion of the proceeds of a disposition of an asset are received subsequent to the disposition—

(i) The portion of the proceeds to be received subsequent to the disposition is treated for periods prior to the receipt as used to make an investment expenditure; and

(ii) Debt reallocated by reason of the disposition is allocated to such investment expenditure to the extent such debt exceeds the proceeds of the disposition previously received (other than proceeds used to repay such debt).

(4) *Examples.* The following examples illustrate the application of this paragraph (j):

Example 1. On January 1, 1988, taxpayer D sells an asset for $25,000. Immediately before the sale, the amount of debt allocated to expenditures properly chargeable to capital account with respect to the asset was $15,000. The proceeds of the disposition are treated as an account consisting of $15,000 of debt proceeds and $10,000 of unborrowed funds to which paragraph (c)(4) of this section applies. Thus, if D immediately makes a $10,000 personal expenditure from the proceeds and within 15 days deposits the remaining proceeds in an account, D may, pursuant to paragraph (c)(4)(iii)(B) of this section, treat the entire $15,000 deposited in the account as proceeds of a debt.

Example 2. The facts are the same as in example (1) except that, instead of receiving all $25,000 of the sale proceeds on January 1, 1988, D receives 5,000 on that date, $10,000 on January 1, 1989, and $10,000 on January 1, 1990. D does not use any portion of the sale proceeds to repay the debt. Between January 1, 1988, and December 31, 1988, D is treated under paragraph (j)(3) of this section as making an investment expenditure of $20,000 to which $10,000 of debt is allocated. In addition, the remaining $5,000 of debt is reallocated on January 1, 1988, in accordance with D's use of the sales proceeds received on that date. Between January 1, 1989, and December 31, 1989, D is treated as making an investment expenditure of $10,000 to which no debt is allocated. In addition, as of January 1, 1989, $10,000 of debt is reallocated in accordance with D's use of the sales proceeds received on that date.

Example 3. The facts are the same as in example (2), except that D immediately uses the $5,000 sale proceeds received on January 1, 1988, to repay $5,000 of the $15,000 debt. Between January 1, 1988, and December 31, 1988, D is treated as making an investment expenditure of $20,000 to which the remaining balance ($10,000) of the debt is reallocated. The results in 1989 are as described in example (2).

(k) *Modification of rules in the case of interest expense allocated to foreign source income.* [Reserved]

(l) [Reserved]

(m) *Coordination with other provisions*—(1) *Effect of other limitations*—(i) *In general.* All debt is allocated among expenditures pursuant to the rules in this section, without regard to any limitations on the deductibility of interest expense on such debt. The applicability of the passive loss and nonbusiness interest limitations to interest on such debt, however, may be affected by other limitations on the deductibility of interest expense.

(ii) *Disallowance provisions.* (Interest expense that is not allowable as a deduction by reason of a disallowance provision (within the meaning of paragraph (m)(7)(ii) of this section) is not taken into account for any taxable year for purposes of applying the passive loss and nonbusiness interest limitations.

(iii) *Deferral provisions.* Interest expense that is not allowable as a deduction for the taxable year in which paid or accrued by reason of a deferral provision (within the meaning of paragraph (m)(7)(iii) of this section) is allocated in the same manner as the debt giving rise to the interest expense is allocated for such taxable year. Such interest expense is taken into account for purposes of applying the passive loss and nonbusiness interest limitations for the taxable year in which such interest expense is allowable under such deferral provision.

(iv) *Capitalization provisions.* Interest expense that is capitalized pursuant to a capitalization provision (within the meaning of paragraph (m)(7)(i) of this section) is not taken into account as interest for any taxable year for purposes of applying the passive loss and nonbusiness interest limitations.

(2) *Effect on other limitations*—(i) *General rule.* Except as provided in paragraph (m)(2)(ii) of this section, any limitation on the deductibility of an item (other than the passive loss and nonbusiness interest limitations) applies without regard to the manner in which debt is allocated under this section. Thus, for example, interest expense treated under section 265(a)(2) as interest on indebtedness incurred or

continued to purchase or carry obligations the interest on which is wholly exempt from Federal income tax is not deductible regardless of the expenditure to which the underlying debt is allocated under this section.

(ii) *Exception*. Capitalization provisions (within the meaning of paragraph (m)(7)(i) of this section) do not apply to interest expense allocated to any personal expenditure under the rules of this section.

(3) *Qualified residence interest*. Qualified residence interest (within the meaning of section 163(h)(3)) is allowable as a deduction without regard to the manner in which such interest expense is allocated under the rules of this section. In addition, qualified residence interest is not taken into account in determining the income or loss from any activity for purposes of section 469 or in determining the amount of investment interest for purposes of section 163(d). The following example illustrates the rule in this paragraph (m)(3):

Example. Taxpayer E, an individual, incurs a $20,000 debt secured by a residence and immediately uses the proceeds to purchase an automobile exclusively for E's personal use. Under the rules in this section, the debt and interest expense on the debt are allocated to a personal expenditure. If, however, the interest on the debt is qualified residence interest within the meaning of section 163(h)(3), the interest is not treated as personal interest for purposes of section 163(h).

(4) *Interest described in section 163(h)(2)(E)*. Interest described in section 163(h)(2)(E) is allowable as a deduction without regard to the rules of this section.

(5) *Interest on deemed distributee debt*. [Reserved]

(6) *Examples*. The following examples illustrate the relationship between the passive loss and nonbusiness interest limitations and other limitations on the deductibility of interest expense:

Example 1. Debt is allocated pursuant to the rules in this section to an investment expenditure for the purchase of taxable investment securities. Pursuant to section 265(a)(2), the debt is treated as indebtedness incurred or continued to purchase or carry obligations the interest on which is wholly exempt from Federal income tax, and, accordingly, interest on the debt is disallowed. If section 265(a)(2) subsequently ceases to apply (because, for example, the taxpayer ceases to hold any tax-exempt obligations), and the debt at such time continues to be allocated to an investment expenditure, interest on the debt that accrues after such time is subject to section 163(d).

Example 2. An accrual method taxpayer incurs a debt payable to a cash method lender who is related to the taxpayer within the meaning of section 267(b). During the period in which interest on the debt is not deductible by reason of section 267(a)(2), the debt is allocated to a passive activity expenditure. Thus, interest that accrues on the debt for such period is also allocated to the passive activity expenditure. When such interest expense becomes deductible under section 267(a)(2), it will be allocated to the passive activity expenditure, regardless of how the debt is allocated at such time.

Example 3. A taxpayer incurs debt that is allocated under the rules of this section to an investment expenditure. Under section 263A(f), however, interest expense on such debt is capitalized during the production period (within the meaning of section 263A(f)(4)(B)) of property used in a passive activity of the taxpayer. The capitalized interest expense is not allocated to the investment expenditure, and depreciation deductions attributable to the capitalized interest expense are subject to the passive loss limitation as long as the property is used in a passive activity. However, interest expense on the debt for periods after the production period is allocated to the investment expenditure as long as the debt remains allocated to the investment expenditure.

(7) *Other limitations on interest expense*—(i) *Capitalization provisions*. A capitalization provision is any provision that requires or allows interest expense to be capitalized. Capitalization provisions include sections 263(g), 263A(f), and 266.

(ii) *Disallowance provisions*. A disallowance provision is any provision (other than the passive loss and nonbusiness interest limitations) that disallows a deduction for interest expense for all taxable years and is not a capitalization provision. Disallowance provisions include sections 163(f)(2), 264(a)(2), 264(a)(4), 265(a)(2), 265(b)(2), 279(a), 291(e)(1)(B)(ii), 805(b)(1), and 834(c)(5).

(iii) *Deferral provisions*. A deferral provision is any provision (other than the passive loss and nonbusiness interest limitations) that disallows a deduction for interest expense for any taxable year and is not a capitalization or disallowance provision. Deferral provisions include sections 267(a)(2), 465, 1277, and 1282.

(n) *Effective date*—(1) *In general.* This section applies to interest expense paid or accrued in taxable years beginning after December 31, 1986.

(2) *Transitional rule for certain expenditures.* For purposes of determining whether debt is allocated to expenditures made on or before August 3, 1987, paragraphs (c)(4)(iii)(B) and (c)(5)(i) of this section are applied by substituting ''90 days'' for ''15 days.''

(3) *Transitional rule for certain debt*—(i) *General rule.* Except as provided in paragraph (n)(3)(ii) of this section, any debt outstanding on December 31, 1986, that is properly attributable to a business or rental activity is treated for purposes of this section as debt allocated to expenditures properly chargeable to capital account with respect to the assets held for use or for sale to customers in such business or rental activity. Debt is properly attributable to a business or rental activity for purposes of this section (regardless of whether such debt otherwise would be allocable under this section to expenditures in connection with such activity) if the taxpayer has properly and consistently deducted interest expense (including interest subject to limitation under section 163(d) as in effect prior to the Tax Reform Act of 1986) on such debt on Schedule C, E, or F of Form 1040 in computing income or loss from such business or rental activity for taxable years beginning before January 1, 1987. For purposes of this paragraph (n)(3), amended returns filed after July 2, 1987 are disregarded in determining whether a taxpayer has consistently deducted interest expense on Schedule C, E, or F of Form 1040 in computing income or loss from a business or rental activity.

(ii) *Exceptions*—(A) *Debt financed distributions by passthrough entities.* [Reserved]

(B) *Election out.* This paragraph (n)(3) does not apply with respect to debt of a taxpayer who elects under paragraph (n)(3) (viii) of this section to allocate debt outstanding on December 31, 1986, in accordance with the provisions of this section other than this paragraph (n)(3) (*i.e.*, in accordance with the use of the debt proceeds).

(iii) *Business or rental activity.* For purposes of this paragraph (n)(3), a business or rental activity is any trade or business or rental activity of the taxpayer. For this purpose—

(A) A trade or business includes a business or profession the income and deductions of which (or, in the case of a partner or S corporation shareholder, the taxpayer's share thereof) are properly reported on Schedule C, E, or F of Form 1040; and

(B) A rental activity includes an activity of renting property the income and deductions of which (or, in the case of a partner or S corporation shareholder, the taxpayer's share thereof) are properly reported on Schedule E of Form 1040.

(iv) *Example.* The following example illustrates the circumstances in which debt is properly attributable to a business or rental activity:

Example. Taxpayer H incurred a debt in 1979 and properly deducted the interest expense on the debt on Schedule C of Form 1040 for each year from 1979 through 1986. Under this paragraph (n) (3), the debt is properly attributable to the business the results of which are reported on Schedule C.

(v) *Allocation requirement*—(A) *In general.* Debt outstanding on December 31, 1986, that is properly attributable (within the meaning of paragraph (n)(3)(i) of this section) to a business or rental activity must be allocated in a reasonable and consistent manner among the assets held for use or for sale to customers in such activity on the last day of the taxable year that includes December 31, 1986. The taxpayer shall specify the manner in which such debt is allocated by filing a statement in accordance with paragraph (n)(3)(vii) of this section. If the taxpayer does not file such a statement or fails to allocate such debt in a reasonable and consistent manner, the Commissioner shall allocate the debt.

(B) *Reasonable and consistent manner—examples of improper allocation.* For purposes of this paragraph (n)(3)(v), debt is not treated as allocated in a reasonable and consistent manner if—

(*1*) The amount of debt allocated to goodwill exceeds the basis of the goodwill; or

(*2*) The amount of debt allocated to an asset exceeds the fair market value of the asset, and the amount of debt allocated to any other asset is less than the fair market value (lesser of basis or fair market value in the case of goodwill) of such other asset.

(vi) *Coordination with other provisions.* The effect of any events occurring after the last day of the taxable year that includes December 31, 1986, shall be determined under the rules of this section, applied by treating the debt allocated to an asset under paragraph (n)(3)(v) of this section as if proceeds of such debt were used to make an expenditure properly chargeable to capital account with respect to such asset on the last day of the taxable year that includes December 31, 1986. Thus, debt that is allocated to an asset in accordance with this paragraph (n)(3) must be reallocated in accordance with paragraph (j) of this section upon the occurrence with respect to such asset of any event described in such paragraph (j). Similarly, such debt is treated as repaid in the order prescribed in paragraph (d) of this section. In addition, a replacement debt (within the meaning of paragraph (e) of this section) is allocated to an expenditure properly chargeable to capital account with respect to an asset to the extent the proceeds of such debt are used to repay the portion of a debt allocated to such asset under this paragraph (n)(3).

(vii) *Form for allocation of debt.* A taxpayer shall allocate debt for purposes of this paragraph (n)(3) by attaching to the taxpayer's return for the first taxable year beginning after December 31, 1986, a statement that is prominently identified as a transitional allocation statement under §1.163–8T(n)(3) and includes the following information:

(A) A description of the business or rental activity to which the debt is properly attributable;

(B) The amount of debt allocated;

(C) The assets among which the debt is allocated;

(D) The manner in which the debt is allocated;

(E) The amount of debt allocated to each asset; and

(F) Such other information as the Commissioner may require.

(viii) *Form for election out.* A taxpayer shall elect to allocate debt outstanding on December 31, 1986, in accordance with the provisions of this section other than this paragraph (n)(3) by attaching to the taxpayer's return (or amended return) for the first taxable year beginning after December 31, 1986, a statement to that effect, prominently identified as as election out under §1.163–8T(n)(3).

(ix) *Special rule for partnerships and S corporations.* For purposes of paragraph (n)(3)(ii)(B), (v), (vii) and (viii) of this section (relating to the allocation of debt and election out), a partnership or S corporation shall be treated as the taxpayer with respect to the debt of the partnership or S corporation.

(x) *Irrevocability.* An allocation or election filed in accordance with paragraph (n)(3) (vii) or (viii) of this section may not be revoked or modified except with the consent of the Commissioner.

[T.D. 8145, 52 FR 24999, July 2, 1987, as amended by T.D. 8145, 62 FR 40270, July 28, 1997]

§ 1.163–9T Personal interest (temporary).

(a) *In general.* No deduction under any provision of Chapter 1 of the Internal Revenue Code shall be allowed for personal interest paid or accrued during the taxable year by a taxpayer other than a corporation.

(b) *Personal interest*—(1) *Definition.* For purposes of this section, personal interest is any interest expense other than—

(i) Interest paid or accrued on indebtedness properly allocable (within the meaning of §1.163–8T) to the conduct of trade or business (other than the trade or business of performing services as an employee),

(ii) Any investment interest (within the meaning of section 163(d)(3)),

(iii) Any interest that is taken into account under section 469 in computing income or loss from a passive activity of the taxpayer,

(iv) Any qualified residence interest (within the meaning of section 163(h)(3) and §1.163–10T), and

(v) Any interest payable under section 6601 with respect to the unpaid portion of the tax imposed by section 2001 for the period during which an extension of time for payment of such tax is in effect under section 6163, 6166, or 6166A (as in effect before its repeal by the Economic Recovery Tax Act of 1981).

(2) *Interest relating to taxes*—(i) *In general*. Except as provided in paragraph (b)(2)(iii) of this section, personal interest includes interest—

(A) Paid on underpayments of individual Federal, State or local income taxes and on indebtedness used to pay such taxes (within the meaning of §1.163–8T), regardless of the source of the income generating the tax liability;

(B) Paid under section 453(e)(4)(B) (interest on deferred tax resulting from certain installment sales) and section 1291(c) (interest on deferred tax attributable to passive foreign investment companies); or

(C) Paid by a trust, S corporation, or other pass-through entity on underpayments of State or local income taxes and on indebtedness used to pay such taxes.

(ii) *Example*. A, an individual, owns stock of an S corporation. On its return for 1987, the corporation underreports its taxable income. Consequently, A underreports A's share of that income on A's tax return. In 1989, A pays the resulting deficiency plus interest to the Internal Revenue Service. The interest paid by A in 1989 on the tax deficiency is personal interest, notwithstanding the fact that the additional tax liability may have arisen out of income from a trade or business. The result would be the same if A's business had been operated as a sole proprietorship.

(iii) *Certain other taxes*. Personal interest does not include interest—

(A) Paid with respect to sales, excise and similar taxes that are incurred in connection with a trade or business or an investment activity;

(B) Paid by an S corporation with respect to an underpayment of income tax from a year in which the S corporation was a C corporation or with respect to an underpayment of the taxes imposed by sections 1374 or 1375, or similar provision of State law; or

(C) Paid by a transferee under section 6901 (tax liability resulting from transferred assets), or a similar provision of State law, with respect to a C corporation's underpayment of income tax.

(3) *Cross references*. See §1.163–8T for rules for determining the allocation of interest expense to various activities. See §1.163–10T for rules concerning qualified residence interest.

(c) *Effective date*—(1) *In general*. The provisions of this section are effective for taxable years beginning after December 31, 1986. In the case of any taxable year beginning in calendar years 1987 through 1990, the amount of personal interest that is nondeductible under this section is limited to the applicable percentage of such amount.

(2) *Applicable percentages*. The applicable percentage for taxable years beginning in 1987 through 1990 are as follows:

1987: 35 percent
1988: 60 percent
1989: 80 percent
1990: 90 percent

[T.D. 8168, 52 FR 48409, Dec. 22, 1987; 68 FR 13226, Mar. 19, 2003]

§1.163–10T Qualified residence interest (temporary).

(a) *Table of contents*. This paragraph (a) lists the major paragraphs that appear in this §1.163–10T.

(3) Treatment of interest expense of the cooperative described in section 216(a)(2).

(4) Special rule to prevent tax avoidance.

(5) Other definitions.

(r) Effective date.

(b) *Treatment of qualified residence interest.* Except as provided below, qualified residence interest is deductible under section 163(a). Qualified residence interest is not subject to limitation or otherwise taken into account under section 163(d) (limitation on investment interest), section 163(h)(1) (disallowance of deduction for personal interest), section 263A (capitalization and inclusion in inventory costs of certain expenses) or section 469 (limitations on losses from passive activities). Qualified residence interest is subject to the limitation imposed by section 263(g) (certain interest in the case of straddles), section 264(a) (2) and (4) (interest paid in connection with certain insurance), section 265(a)(2) (interest relating to tax-exempt income), section 266 (carrying charges), section 267(a)(2) (interest with respect to transactions between related taxpayers) section 465 (deductions limited to amount at risk), section 1277 (deferral of interest deduction allocable to accrued market discount), and section 1282 (deferral of interest deduction allocable to accrued discount).

(c) *Determination of qualified residence interest when secured debt does not exceed adjusted purchase price*—(1) *In general.* If the sum of the average balances for the taxable year of all secured debts on a qualified residence does not exceed the adjusted purchase price (determined as of the end of the taxable year) of the qualified residence, all of the interest paid or accrued during the taxable year with respect to the secured debts is qualified residence interest. If the sum of the average balances for the taxable year of all secured debts exceeds the adjusted purchase price of the qualified residences (determined as of the end of the taxable year), the taxpayer must use either the simplified method (see paragraph (d) of this section) or the exact method (see paragraph (e) of this section) to determine the amount of interest that is qualified residence interest.

(2) *Examples.*

Example 1. T purchases a qualified residence in 1987 for $65,000. T pays $6,500 in cash and finances the remainder of the purchase with a mortgage of $58,500. In 1988, the average balance of the mortgage is $58,000. Because the average balance of the mortgage is less than the adjusted purchase price of the residence ($65,000), all of the interest paid or accrued during 1988 on the mortgage is qualified residence interest.

Example 2. The facts are the same as in example (1), except that T incurs a second mortgage on January 1, 1988, with an initial principal balance of $2,000. The average balance of the second mortgage in 1988 is $1,900. Because the sum of the average balance of the first and second mortgages ($59,900) is less than the adjusted purchase price of the residence ($65,000), all of the interest paid or accrued during 1988 on both the first and second mortgages is qualified residence interest.

Example 3. P borrows $50,000 on January 1, 1988 and secures the debt by a qualified residence. P pays the interest on the debt monthly, but makes no principal payments in 1988. There are no other debts secured by the residence during 1988. On December 31, 1988, the adjusted purchase price of the residence is $40,000. The average balance of the debt in 1988 is $50,000. Because the average balance of the debt exceeds the adjusted purchase price ($10,000), some of the interest on the debt is not qualified residence interest. The portion of the total interest that is qualified residence interest must be determined in accordance with the rules of paragraph (d) or paragraph (e) of this section.

(d) *Determination of qualified residence interest when secured debt exceeds adjusted purchase price—Simplified method*—(1) *In general.* Under the simplified method, the amount of qualified residence interest for the taxable year is equal to the total interest paid or accrued during the taxable year with respect to all secured debts multiplied by a fraction (not in excess of one), the numerator of which is the adjusted purchase price (determined as of the end of the taxable year) of the qualified residence and the denominator of which is the sum of the average balances of all secured debts.

(2) *Treatment of interest paid or accrued on secured debt that is not qualified residence interest.* Under the simplified method, the excess of the total interest paid or accrued during the taxable year with respect to all secured debts over the amount of qualified residence interest is personal interest.

(3) *Example.*

Example. R's principal residence has an adjusted purchase price on December 31, 1988, of $105,000. R has two debts secured by the residence, with the following average balances and interest payments:

Debt	Date secured	Average balance	Interest
Debt 1	June 1983	$80,000	$8,000
Debt 2	May 1987	40,000	4,800
Total	....	120,000	12,800

The amount of qualified residence interest is determined under the simplified method by multiplying the total interest ($12,800) by a fraction (expressed as a decimal amount) equal to the adjusted purchase price ($105,000) of the residence divided by the combined average balances ($120,000). For 1988, this fraction is equal to 0.875 ($105,000/$120,000). Therefore, $11,200 ($12,800×0.875) of the total interest is qualified residence interest. The remaining $1,600 in interest ($12,800–$11,200) is personal interest, even if (under the rules of §1.163–8T) such remaining interest would be allocated to some other category of interest.

(e) *Determination of qualified residence interest when secured debt exceeds adjusted purchase price—Exact method*—(1) *In general.* Under the exact method, the amount of qualified residence interest for the taxable year is determined on a debt-by-debt basis by computing the applicable debt limit for each secured debt and comparing each such applicable debt limit to the average balance of the corresponding debt. If, for the taxable year, the average balance of a secured debt does not exceed the applicable debt limit for that debt, all of the interest paid or accrued during the taxable year with respect to the debt is qualified residence interest. If the average balance of the secured debt exceeds the applicable debt limit for that debt, the amount of qualified residence interest with respect to the debt is determined by multiplying the interest paid or accrued with respect to the debt by a fraction, the numerator of which is the applicable debt limit for that debt and the denominator of which is the average balance of the debt.

(2) *Determination of applicable debt limit.* For each secured debt, the applicable debt limit for the taxable year is equal to

(i) The lesser of—

(A) The fair market value of the qualified residence as of the date the debt is first secured, and

(B) The adjusted purchase price of the qualified residence as of the end of the taxable year,

(ii) Reduced by the average balance of each debt previously secured by the qualified residence.

For purposes of paragraph (e)(2)(ii) of this section, the average balance of a debt shall be treated as not exceeding the applicable debt limit of such debt. See paragraph (n)(1)(i) of this section for the rule that increases the adjusted purchase price in paragraph (e)(2)(i)(B) of this section by the amount of any qualified indebtedness (certain medical and educational debt). See paragraph (f) of this section for special rules relating to the determination of the fair market value of the qualified residence.

(3) *Example.* (i) R's principal residence has an adjusted purchase price on December 31, 1988, of $105,000. R has two debts secured by the residence. The average balances and interest payments on each debt during 1988 and fair market value of the residence on the date each debt was secured are as follows:

Debt	Date secured	Fair market value	Average balance	Interest
Debt 1	June 1983	$100,000	$80,000	$8,000
Debt 2	May 1987	140,000	40,000	4,800
Total	....	....	120,000	12,800

(ii) The amount of qualified residence interest for 1988 under the exact method is determined as follows. Because there are no debts previously secured by the residence, the applicable debt limit for Debt 1 is $100,000 (the lesser of the adjusted purchase price as of the end of the taxable year and the fair market value of the residence at the time the debt was secured). Because the average balance of Debt 1 ($80,000) does not exceed its applicable debt limit ($100,000), all of the interest paid on the debt during 1988 ($8,000) is qualified residence interest.

(iii) The applicable debt limit for Debt 2 is $25,000 ($105,000 (the lesser of $140,000 fair market value and $105,000 adjusted purchase price) reduced by $80,000 (the average balance of Debt 1)). Because the average balance of Debt 2 ($40,000) exceeds its applicable debt limit, the amount of qualified residence interest on Debt 2 is determined by multiplying the amount of interest paid on the debt during the year ($4,800) by a fraction equal to its applicable debt limit divided by its average balance ($25,000/$40,000 = 0.625). Accordingly, $3,000 ($4,800 × 0.625) of the interest paid in 1988 on Debt 2 is qualified residence interest. The character of the remaining $1,800 of interest paid on Debt 2 is determined under the rules of paragraph (e)(4) of this section.

(4) *Treatment of interest paid or accrued with respect to secured debt that is not qualified residence interest*—(i) *In general.* Under the exact method, the excess of the interest paid or accrued during the taxable year with respect to a secured debt over the amount of qualified residence interest with respect to the debt is allocated under the rules of §1.163–8T.

(ii) *Example.* T borrows $20,000 and the entire proceeds of the debt are disbursed by the lender to T's broker to purchase securities held for investment. T secures the debt with T's principal residence. In 1990, T pays $2,000 of interest on the debt. Assume that under the rules of paragraph (e) of this section, $1,500 of the interest is qualified residence interest. The remaining $500 in interest expense would be allocated under the rules of §1.163–8T. Section 1.163–8T generally allocates debt (and the associated interest expense) by tracing disbursements of the debt proceeds to specific expenditures. Accordingly, the $500 interest expense on the debt that is not qualified residence interest is investment interest subject to section 163(d).

(iii) *Special rule if debt is allocated to more than one expenditure.* If—

(A) The average balance of a secured debt exceeds the applicable debt limit for that debt, and

(B) Under the rules of §1.163–8T, interest paid or accrued with respect to such debt is allocated to more than one expenditure,

the interest expense that is not qualified residence interest may be allocated among such expenditures, to the extent of such expenditures, in any manner selected by the taxpayer.

(iv) *Example.* (*i*) C borrows $60,000 secured by a qualified residence. C uses (within the meaning of §1.163–8T) $20,000 of the proceeds in C's trade or business, $20,000 to purchase stock held for investment and $20,000 for personal purposes. In 1990, C pays $6,000 in interest on the debt and, under the rules of §1.163–8T, $2,000 in interest is allocable to trade or business expenses, $2,000 to investment expenses and $2,000 to personal expenses. Assume that under paragraph (e) of this section, $2,500 of the interest is qualified residence interest and $3,500 of the interest is not qualified residence interest.

(*ii*) Under paragraph (e)(4)(iii) of this section, C may allocate up to $2,000 of the interest that is not qualified residence interest to any of the three categories of expenditures up to a total of $3,500 for all three categories. Therefore, for example, C may allocate $2,000 of such interest to C's trade or business and $1,500 of such interest to the purchase of stock.

(f) *Special rules*—(1) *Special rules for personal property*—(i) *In general.* If a qualified residence is personal property under State law (e.g., a boat or motorized vehicle)—

(A) For purposes of paragraphs (c)(1) and (d)(1) of this section, if the fair market value of the residence as of the date that any secured debt (outstanding during the taxable year) is first secured by the residence is less than the adjusted purchase price as of the end of the taxable year, the lowest such fair market value shall be substituted for the adjusted purchase price.

(B) For purposes of paragraphs (e)(2)(i)(A) and (f)(1)(i)(A) of this section, the fair market value of the residence as of the date the debt is first secured by the residence shall not exceed the fair market value as of any date on which the taxpayer borrows any additional amount with respect to the debt.

(ii) *Example.* D owns a recreational vehicle that is a qualified residence under paragraph (p)(4) of this section. The adjusted purchase price and fair market value of the recreational vehicle is $20,000 in 1989. In 1989, D establishes a line of credit secured by the recreational vehicle. As of June 1, 1992, the fair market value of the vehicle has decreased to $10,000. On that day, D borrows an additional amount on the debt by using the line of credit. Although under paragraphs (e)(2)(i) and (f)(1)(i)(A) of this section, fair market value is determined at the time the debt is first secured, under paragraph (f)(1)(i)(B) of this section, the fair market value is the lesser of that amount or the fair market value on the most recent date that D borrows any additional amount with respect to the line of credit. Therefore, the fair market value with respect to the debt is $10,000.

(2) *Special rule for real property*—(i) *In general.* For purposes of paragraph (e)(2)(i)(A) of this section, the fair market value of a qualified residence that is real property under State law is presumed irrebuttably to be not less than the adjusted purchase price of the residence as of the last day of the taxable year.

(ii) *Example.* (*i*) C purchases a residence on August 11, 1987, for $50,000, incurring a first mortgage. The residence is real property under State law. During 1987, C makes $10,000 in home improvements. Accordingly, the adjusted purchase price of the residence as of December 31, 1988, is $60,000. C incurs a second mortgage on May 19, 1988, as of which time the fair market value of the residence is $55,000.

(*ii*) For purposes of determining the applicable debt limit for each debt, the fair market value of the residence is generally determined as of the time the debt is first secured. Accordingly, the fair market value would be $50,000 and $55,000 with respect to the first and second mortgage, respectively. Under the special rule of paragraph (f)(2)(i) of this section, however, the fair market value with respect to both debts in 1988 is $60,000, the adjusted purchase price on December 31, 1988.

(g) *Selection of method.* For any taxable year, a taxpayer may use the simplified method (described in paragraph (d) of this section) or the exact method (described in paragraph (e) of this section) by completing the appropriate portion of Form 8598. A taxpayer with two qualified residences may use the simplified method for one residence and the exact method for the other residence.

(h) *Average balance*—(1) *Average balance defined.* For purposes of this section, the term "average balance" means the amount determined under this paragraph (h). A taxpayer is not required to use the same method to determine the average balance of all secured debts during a taxable year or of any particular secured debt from one year to the next.

(2) *Average balance reported by lender.* If a lender that is subject to section 6050H (returns relating to mortgage interest received in trade or business from individuals) reports the average balance of a secured debt on Form 1098, the taxpayer may use the average balance so reported.

(3) *Average balance computed on a daily basis*—(i) *In general.* The average balance may be determined by—

(A) Adding the outstanding balance of a debt on each day during the taxable year that the debt is secured by a qualified residence, and

(B) Dividing the sum by the number of days during the taxable year that the residence is a qualified residence.

(ii) *Example.* Taxpayer A incurs a debt of $10,000 on September 1, 1989, securing the debt with A's principal residence. The residence is A's principal residence during the entire taxable year. A pays current interest on the debt monthly, but makes no principal payments. The debt is, therefore, outstanding for 122 days with a balance each day of $10,000. The residence is a qualified residence for 365 days. The average balance of the debt for 1989 is $3,342 ($122 \times \$10{,}000/365$).

(4) *Average balance computed using the interest rate*—(i) *In general.* If all accrued interest on a secured debt is paid at least monthly, the average balance of the secured debt may be determined

by dividing the interest paid or accrued during the taxable year while the debt is secured by a qualified residence by the annual interest rate on the debt. If the interest rate on a debt varies during the taxable year, the lowest annual interest rate that applies to the debt during the taxable year must be used for purposes of this paragraph (h)(4). If the residence securing the debt is a qualified residence for less than the entire taxable year, the average balance of any secured debt may be determined by dividing the average balance determined under the preceding sentence by the percentage of the taxable year that the debt is secured by a qualified residence.

(ii) *Points and prepaid interest.* For purposes of paragraph (h)(4)(i) of this section, the amount of interest paid during the taxable year does not include any amount paid as points and includes prepaid interest only in the year accrued.

(iii) *Examples.*

Example 1. B has a line of credit secured by a qualified residence for the entire taxable year. The interest rate on the debt is 10 percent throughout the taxable year. The principal balance on the debt changes throughout the year. B pays the accrued interest on the debt monthly. B pays $2,500 in interest on the debt during the taxable year. The average balance of the debt ($25,000) may be computed by dividing the total interest paid by the interest rate ($25,000 = $2,500/0.10).

Example 2. Assume the same facts as in example 1, except that the residence is a qualified residence, and the debt is outstanding, for only one-half of the taxable year and B pays only $1,250 in interest on the debt during the taxable year. The average balance of the debt may be computed by first dividing the total interest paid by the interest rate ($12,500 = $1,250/0.10). Second, because the residence is not a qualified residence for the entire taxable year, the average balance must be determined by dividing this amount ($12,500) by the portion of the year that the residence is qualified (0.50). The average balance is therefore $25,000 ($12,500/0.50).

(5) *Average balance computed using average of beginning and ending balances*—(i) *In general.* If—

(A) A debt requires level payments at fixed equal intervals (e.g., monthly, quarterly) no less often than semi-annually during the taxable year,

(B) The taxpayer prepays no more than one month's principal on the debt during the taxable year, and

(C) No new amounts are borrowed on the debt during the taxable year,

the average balance of the debt may be determined by adding the principal balance as of the first day of the taxable year that the debt is secured by the qualified residence and the principal balance as of the last day of the taxable year that the debt is secured by the qualified residence and dividing the sum by 2. If the debt is secured by a qualified residence for less than the entire period during the taxable year that the residence is a qualified residence, the average balance may be determined by multiplying the average balance determined under the preceding sentence by a fraction, the numerator of which is the number of days during the taxable year that the debt is secured by the qualified residence and the denominator of which is the number of days during the taxable year that the residence is a qualified residence. For purposes of this paragraph (h)(5)(i), the determination of whether payments are level shall disregard the fact that the amount of the payments may be adjusted from time to time to take into account changes in the applicable interest rate.

(ii) *Example.* C borrows $10,000 in 1988, securing the debt with a second mortgage on a principal residence. The terms of the loan require C to make equal monthly payments of principal and interest so as to amortize the entire loan balance over 20 years. The balance of the debt is $9,652 on January 1, 1990, and is $9,450 on December 31, 1990. The average balance of the debt during 1990 may be computed as follows:

Balance on first day of the year: $9,652
Balance on last day of the year: $9,450

$$\text{Average balance:} \frac{\$9{,}652 + \$9{,}450}{2} = \$9{,}551$$

(6) *Highest principal balance.* The average balance of a debt may be determined by taking the highest principal balance of the debt during the taxable year.

(7) *Other methods provided by the Commissioner.* The average balance may be

determined using any other method provided by the Commissioner by form, publication, revenue ruling, or revenue procedure. Such methods may include methods similar to (but with restrictions different from) those provided in paragraph (h) of this section.

(8) *Anti-abuse rule.* If, as a result of the determination of the average balance of a debt using any of the methods specified in paragraphs (h) (4), (5), or (6) of this section, there is a significant overstatement of the amount of qualified residence interest and a principal purpose of the pattern of payments and borrowing on the debt is to cause the amount of such qualified residence interest to be overstated, the district director may redetermine the average balance using the method specified under paragraph (h)(3) of this section.

(i) [Reserved]

(j) *Determination of interest paid or accrued during the taxable year*—(1) *In general.* For purposes of determining the amount of qualified residence interest with respect to a secured debt, the amount of interest paid or accrued during the taxable year includes only interest paid or accrued while the debt is secured by a qualified residence.

(2) *Special rules for cash-basis taxpayers*—(i) *Points deductible in year paid under section 461(g)(2).* If points described in section 461(g)(2) (certain points paid in respect of debt incurred in connection with the purchase or improvement of a principal residence) are paid with respect to a debt, the amount of such points is qualified residence interest.

(ii) *Points and other prepaid interest described in section 461(g)(1).* The amount of points or other prepaid interest charged to capital account under section 461(g)(1) (prepaid interest) that is qualified residence interest shall be determined under the rules of paragraphs (c) through (e) of this section in the same manner as any other interest paid with respect to the debt in the taxable year to which such payments are allocable under section 461(g)(1).

(3) *Examples.*

Example 1. T designates a vacation home as a qualified residence as of October 1, 1987. The home is encumbered by a mortgage during the entire taxable year. For purposes of determining the amount of qualified residence interest for 1987, T may take into account the interest paid or accrued on the secured debt from October 1, 1987, through December 31, 1987.

Example 2. R purchases a principal residence on June 17, 1987. As part of the purchase price, R obtains a conventional 30-year mortgage, secured by the residence. At closing, R pays 2½ points on the mortgage and interest on the mortgage for the period June 17, 1987 through June 30, 1987. The points are actually paid by R and are not merely withheld from the loan proceeds. R incurs no additional secured debt during 1987. Assuming that the points satisfy the requirements of section 461(g) (2), the entire amount of points and the interest paid at closing are qualified residence interest.

Example 3. (*i*) On July 1, 1987, W borrows $120,000 to purchase a residence to use as a vacation home. W secures the debt with the residence. W pays 2 points, or $2,400. The debt has a term of 10 years and requires monthly payments of principal and interest. W is permitted to amortize the points at the rate of $20 per month over 120 months. W elects to treat the residence as a second residence. W has no other debt secured by the residence. The average balance of the debt in each taxable year is less than the adjusted purchase price of the residence. W sells the residence on June 30, 1990, and pays off the remaining balance of the debt.

(*ii*) W is entitled to treat the following amounts of the points as interest paid on a debt secured by a qualified residence—

1987	$120 = $20×6 months;
1988	$240 = $20×12 months;
1989	$120 = $20×6 months.
Total	$480

All of the interest paid on the debt, including the allocable points, is qualified residence interest. Upon repaying the debt, the remaining $1,920 ($2,400 − $480) in unamortized points is treated as interest paid in 1990 and, because the average balance of the secured debt in 1990 is less than the adjusted purchase price, is also qualified residence interest.

(k) *Determination of adjusted purchase price and fair market value*—(1) *Adjusted purchase price*—(i) *In general.* For purposes of this section, the adjusted purchase price of a qualified residence is equal to the taxpayer's basis in the residence as initially determined under section 1012 or other applicable sections of the Internal Revenue Code, increased by the cost of any improvements to the residence that have been added to the taxpayer's basis in the residence under section 1016(a)(1). Any other adjustments to basis, including those required under section 1033(b) (involuntary conversions), and 1034(e) (rollover of gain or sale of principal residence) are disregarded in determining the taxpayer's adjusted purchase price. If, for example, a taxpayer's second residence is rented for a portion of the year and its basis is reduced by depreciation allowed in connection with the rental use of the property, the amount of the taxpayer's adjusted purchase price in the residence is not reduced. See paragraph (m) of this section for a rule that treats the sum of the grandfathered amounts of all secured debts as the adjusted purchase price of the residence.

(ii) *Adjusted purchase price of a qualified residence acquired incident to divorce.* [Reserved]

(iii) *Examples.*

Example 1. X purchases a residence for $120,000. X's basis, as determined under section 1012, is the cost of the property, or $120,000. Accordingly, the adjusted purchase price of the residence is initially $120,000.

Example 2. Y owns a principal residence that has a basis of $30,000. Y sells the residence for $100,000 and purchases a new principal residence for $120,000. Under section 1034, Y does not recognize gain on the sale of the former residence. Under section 1034(e), Y's basis in the new residence is reduced by the amount of gain not recognized. Therefore, under section 1034(e), Y's basis in the new residence is $50,000 ($120,000 − $70,000). For purposes of section 163(h), however, the adjusted purchase price of the residence is not adjusted under section 1034(e). Therefore, the adjusted purchase price of the residence is initially $120,000.

Example 3. Z acquires a residence by gift. The donor's basis in the residence was $30,000. Z's basis in the residence, determined under section 1015, is $30,000. Accordingly, the adjusted purchase price of the residence is initially $30,000.

(2) *Fair market value*—(i) *In general.* For purposes of this section, the fair market value of a qualified residence on any date is the fair market value of the taxpayer's interest in the residence on such date. In addition, the fair market value determined under this paragraph (k)(2)(i) shall be determined by taking into account the cost of improvements to the residence reasonably expected to be made with the proceeds of the debt.

(ii) *Example.* In 1988, the adjusted purchase price of P's second residence is $65,000 and the fair market value of the residence is $70,000. At that time, P incurs an additional debt of $10,000, the proceeds of which P reasonably expects to use to add two bedrooms to the residence. Because the fair market value is determined by taking into account the cost of improvements to the residence that are reasonably expected to be made with the proceeds of the debt, the fair market value of the residence with respect to the debt incurred in 1988 is $80,000 ($70,000+$10,000).

(3) *Allocation of adjusted purchase price and fair market value.* If a property includes both a qualified residence and other property, the adjusted purchase price and the fair market value of such property must be allocated between the qualified residence and the other property. See paragraph (p)(4) of this section for rules governing such an allocation.

(l) [Reserved]

(m) *Grandfathered amount*—(1) *Substitution for adjusted purchase price.* If, for the taxable year, the sum of the grandfathered amounts, if any, of all secured debts exceeds the adjusted purchase price of the qualified residence, such sum may be treated as the adjusted purchase price of the residence under paragraphs (c), (d) and (e) of this section.

(2) *Determination of grandfathered amount*—(i) *In general.* For any taxable year, the grandfathered amount of any secured debt that was incurred on or before August 16, 1986, and was secured by the residence continuously from August 16, 1986, through the end of the taxable year, is the average balance of the debt for the taxable year. A secured debt that was not incurred and secured on or before August 16, 1986, has no grandfathered amount.

(ii) *Special rule for lines of credit and certain other debt.* If, with respect to a debt described in paragraph (m)(2)(i) of this section, a taxpayer has borrowed any additional amounts after August 16, 1986, the grandfathered amount of such debt is equal to the lesser of—

(A) The average balance of the debt for the taxable year, or

(B) The principal balance of the debt as of August 16, 1986, reduced (but not below zero) by all principal payments after August 16, 1986, and before the first day of the current taxable year.

For purposes of this paragraph (m)(2)(ii), a taxpayer shall not be considered to have borrowed any additional amount with respect to a debt merely because accrued interest is added to the principal balance of the debt, so long as such accrued interest is paid by the taxpayer no less often than quarterly.

(iii) *Fair market value limitation.* The grandfathered amount of any debt for any taxable year may not exceed the fair market value of the residence on August 16, 1986, reduced by the principal balance on that day of all previously secured debt.

(iv) *Examples.*

Example 1. As of August 16, 1986, T has one debt secured by T's principal residence. The debt is a conventional self-amortizing mortgage and, on August 16, 1986, it has an outstanding principal balance of $75,000. In 1987, the average balance of the mortgage is $73,000. The adjusted purchase price of the residence as of the end of 1987 is $50,000. Because the mortgage was incurred and secured on or before August 16, 1986 and T has not borrowed any additional amounts with respect to the mortgage, the grandfathered amount is the average balance, $73,000. Because the grandfathered amount exceeds the adjusted purchase price ($50,000), T may treat the grandfathered amount as the adjusted purchase price in determining the amount of qualified residence interest.

Example 2. (i) The facts are the same as in example (1), except that in May 1986, T also obtains a home equity line of credit that, on August 16, 1986, has a principal balance of $40,000. In November 1986, T borrows an additional $10,000 on the home equity line, increasing the balance to $50,000. In December 1986, T repays $5,000 of principal on the home equity line. The average balance of the home equity line in 1987 is $45,000.

(ii) Because T has borrowed additional amounts on the line of credit after August 16, 1986, the grandfathered amount for that debt must be determined under the rules of paragraph (m)(2)(ii) of this section. Accordingly, the grandfathered amount for the line of credit is equal to the lesser of $45,000, the average balance of the debt in 1987, and $35,000, the principal balance on August 16, 1986, reduced by all principal payments between August 17, 1986, and December 31, 1986 ($40,000–$5,000). The sum of the grandfathered amounts with respect to the residence is $108,000 ($73,000+$35,000). Because the sum of the grandfathered amounts exceeds the adjusted purchase price ($50,000), T may treat the sum as the adjusted purchase price in determining the qualified residence interest for 1987.

(3) *Refinancing of grandfathered debt*—(i) *In general.* A debt incurred and secured on or before August 16, 1986, is refinanced if some or all of the outstanding balance of such a debt (the "original debt") is repaid out of the proceeds of a second debt secured by the same qualified residence (the "replacement debt"). In the case of a refinancing, the replacement debt is treated as a debt incurred and secured on or before August 16, 1986, and the grandfathered amount of such debt is the amount (but not less than zero) determined pursuant to paragraph (m)(3)(ii) of this section.

(ii) *Determination of grandfathered amount*—(A) *Exact refinancing.* If—

(*1*) The entire proceeds of a replacement debt are used to refinance one or more original debts, and

(*2*) The taxpayer has not borrowed any additional amounts after August 16, 1986, with respect to the original debt or debts,

the grandfathered amount of the replacement debt is the average balance of the replacement debt. For purposes of the preceding sentence, the fact that proceeds of a replacement debt are used to pay costs of obtaining the replacement debt (including points or other closing costs) shall be disregarded in determining whether the entire proceeds of the replacement debt have been used to refinance one or more original debts.

(B) *Refinancing other than exact refinancings*—(*1*) *Year of refinancing.* In the taxable year in which an original debt is refinanced, the grandfathered amount of the original and replacement debts is equal to the lesser of—

(*i*) The sum of the average balances of the original debt and the replacement debt, and

(*ii*) The principal balance of the original debt as of August 16, 1986, reduced by all principal payments on the original debt after August 16, 1986, and before the first day of the current taxable year.

(*2*) *In subsequent years.* In any taxable year after the taxable year in which an original debt is refinanced, the grandfathered amount of the replacement debt is equal to the least of—

(*i*) The average balance of the replacement debt for the taxable year,

(*ii*) The amount of the replacement debt used to repay the principal balance of the original debt, reduced by all principal payments on the replacement debt after the date of the refinancing and before the first day of the current taxable year, or

(*iii*) The principal balance of the original debt on August 16, 1986, reduced by all principal payments on the original debt after August 16, 1986, and before the date of the refinancing, and further reduced by all principal payments on the replacement debt after the date of the refinancing and before the first day of the current taxable year.

(C) *Example*. (*i*) *Facts*. On August 16, 1986, T has a single debt secured by a principal residence with a balance of $150,000. On July 1, 1988, T refinances the debt, which still has a principal balance of $150,000, with a new secured debt. The principal balance of the replacement debt throughout 1988 and 1989 is $150,000. The adjusted purchase price of the residence is $100,000 throughout 1987, 1988 and 1989. The average balance of the original debt was $150,000 in 1987 and $75,000 in 1988. The average balance of the replacement debt is $75,000 in 1988 and $150,000 in 1989.

(*ii*) *Grandfathered amount in 1987*. The original debt was incurred and secured on or before August 16, 1986 and T has not borrowed any additional amounts with respect to the debt. Therefore, its grandfathered amount in 1987 is its average balance ($150,000). This amount is treated as the adjusted purchase price for 1987 and all of the interest paid on the debt is qualified residence interest.

(*iii*) *Grandfathered amount in 1988*. Because the replacement debt was used to refinance a debt incurred and secured on or before August 16, 1986, the replacement debt is treated as a grandfathered debt. Because all of the proceeds of the replacement debt were used in the refinancing and because no amounts have been borrowed after August 16, 1986, on the original debt, the grandfathered amount for the original debt is its average balance ($75,000) and the grandfathered amount for the replacement debt is its average balance ($75,000). Since the sum of the grandfathered amounts ($150,000) exceeds the adjusted purchase price of the residence, the sum of the grandfathered amounts may be substituted for the adjusted purchase price for 1988 and all of the interest paid on the debt is qualified residence interest.

(*iv*) *Grandfathered amount in 1989*. The grandfathered amount for the placement debt is its average balance ($150,000). This amount is treated as the adjusted purchase price for 1989 and all of the interest paid on the mortgage is qualified residence interest.

(4) *Limitation on term of grandfathered debt*—(i) *In general*. An original debt or replacement debt shall not have any grandfathered amount in any taxable year that begins after the date, as determined on August 16, 1986, that the original debt was required to be repaid in full (the ''maturity date''). If a replacement debt is used to refinance more than one original debt, the maturity date is determined by reference to the original debt that, as of August 16, 1986, had the latest maturity date.

(ii) *Special rule for nonamortizing debt*. If an original debt was actually incurred and secured on or before August 16, 1986, and if as of such date the terms of such debt did not require the amortization of its principal over its original term, the maturity date of the replacement debt is the earlier of the maturity date of the replacement debt or the date 30 years after the date the original debt is first refinanced.

(iii) *Example*. C incurs a debt on May 10, 1986, the final payment of which is due May 1, 2006. C incurs a second debt on August 11, 1990, with a term of 20 years and uses the proceeds of the second debt to refinance the first debt. Because, under paragraph (m)(4)(i) of this section, a replacement debt will not have any grandfathered amount in any taxable year that begins after the maturity date of the original debt (May 1, 2006), the second debt has no grandfathered amount in any taxable year after 2006.

(n) *Qualified indebtedness (secured debt used for medical and educational purposes)*—(1) *In general*—(i) *Treatment of* *qualified indebtedness.* The amount of any qualified indebtedness resulting from a secured debt may be added to the adjusted purchase price under paragraph (e)(2)(i)(B) of this section to determine the applicable debt limit for that secured debt and any other debt subsequently secured by the qualified residence.

(ii) *Determination of amount of qualified indebtedness.* If, as of the end of the taxable year (or the last day in the taxable year that the debt is secured), at least 90 percent of the proceeds of a secured debt are used (within the meaning of paragraph (n)(2) of this section) to pay for qualified medical and educational expenses (within the meaning of paragraphs (n)(3) and (n)(4) of this section), the amount of qualified indebtedness resulting from that debt for the taxable year is equal to the average balance of such debt for the taxable year.

(iii) *Determination of amount of qualified indebtedness for mixed-use debt.* If, as of the end of the taxable year (or the last day in the taxable year that the debt is secured), more than ten percent of the proceeds of a secured debt are used to pay for expenses other than qualified medical and educational expenses, the amount of qualified indebtedness resulting from that debt for the taxable year shall equal the lesser of—

(A) The average balance of the debt, or

(B) The amount of the proceeds of the debt used to pay for qualified medical and educational expenses through the end of the taxable year, reduced by any principal payments on the debt before the first day of the current taxable year.

(iv) *Example.* (*i*) C incurs a $10,000 debt on April 20, 1987, which is secured on that date by C's principal residence. C immediately uses (within the meaning of paragraph (n)(2) of this section) $4,000 of the proceeds of the debt to pay for a qualified medical expense. C makes no principal payments on the debt during 1987. During 1988 and 1989, C makes principal payments of $1,000 per year. The average balance of the debt during 1988 is $9,500 and the average balance during 1989 is $8,500.

(*ii*) Under paragraph (n)(1)(iii) of this section, C determines the amount of qualified indebtedness for 1988 as follows:

Average balance		$9,500
Amount of debt used to pay for qualified medical expenses	$4,000	
Less payments of principal before 1988	$0	
Net qualified expenses		$4,000

The amount of qualified indebtedness for 1988 is, therefore, $4,000 (lesser of $9,500 average balance or $4,000 net qualified expenses). This amount may be added to the adjusted purchase price of C's principal residence under paragraph (e)(2)(i)(B) of this section for purposes of computing the applicable debt limit for this debt and any other debt subsequently secured by the principal residence.

(*iii*) C determines the amount of qualified indebtedness for 1989 as follows:

Average balance		$8,500
Amount of debt used to pay for qualified medical expenses	$4,000	
Less payments of principal before 1988	$1,000	
Net qualified expenses		$3,000

The amount of qualified indebtedness for 1989 is, therefore, $3,000 (lesser of $8,500 average balance or $3,000 net qualified expenses).

(v) *Prevention of double counting in year of refinancing*—(A) *In general.* A debt used to pay for qualified medical or educational expenses is refinanced if some or all of the outstanding balance of the debt (the ''original debt'') is repaid out of the proceeds of a second debt (the ''replacement debt''). If, in the year of a refinancing, the combined qualified indebtedness of the original debt and the replacement debt exceeds the combined qualified expenses of such debts, the amount of qualified indebtedness for each such debt shall be determined by multiplying the amount of qualified indebtedness for each such debt by a fraction, the numerator of which is the combined qualified expenses and the denominator of which is the combined qualified indebtedness.

(B) *Definitions.* For purposes of paragraph (n)(1)(v)(A) of this section—

(*1*) The term ''combined qualified indebtedness'' means the sum of the qualified indebtedness (determined without regard to paragraph (n)(1)(v) of this section) for the original debt and the replacement debt.

(*2*) The term ''combined qualified expenses'' means the amount of the proceeds of the original debt used to pay for qualified medical and educational expenses through the end of the current taxable year, reduced by any principal payments on the debt before the first day of the current taxable year, and increased by the amount, if any, of the proceeds of the replacement debt used to pay such expenses through the end of the current taxable year other than as part of the refinancing.

(C) *Example*. (*i*) On August 11, 1987, C incurs a $8,000 debt secured by a principal residence. C uses (within the meaning of paragraph (n)(2)(i) of this section) $5,000 of the proceeds of the debt to pay for qualified educational expenses. C makes no principal payments on the debt. On July 1, 1988, C incurs a new debt in the amount of $8,000 secured by C's principal residence and uses all of the proceeds of the new debt to repay the original debt. Under paragraph (n)(2)(ii) of this section $5,000 of the new debt is treated as being used to pay for qualified educational expenses. C makes no principal payments (other than the refinancing) during 1987 or 1988 on either debt and pays all accrued interest monthly. The average balance of each debt in 1988 is $4,000.

(*ii*) Under paragraph (n)(1)(iii) of this section, the amount of qualified indebtedness for 1988 with respect to the original debt is $4,000 (the lesser of its average balance ($4,000) and the amount of the debt used to pay for qualified medical and educational expenses ($5,000)). Similarly, the amount of qualified indebtedness for 1988 with respect to the replacement debt is also $4,000. Both debts, however, are subject in 1988 to the limitation in paragraph (n)(1)(v)(A) of this section. The combined qualified indebtedness, determined without regard to the limitation, is $8,000 ($4,000 of qualified indebtedness from each debt). The combined qualified expenses are $5,000 ($5,000 from the original debt and $0 from the replacement debt). The amount of qualified indebtedness from each debt must, therefore, be reduced by a fraction, the numerator of which is $5,000 (the combined qualified expenses) and the denominator of which is $8,000 (the combined qualified indebtedness). After application of the limitation, the amount of qualified indebtedness for the original debt is $2,500 ($4,000 × × 5⁄8). Similarly, the amount of qualified indebtedness for the replacement debt is $2,500. Note that the total qualified indebtedness for both the original and the replacement debt is $5,000 ($2,500 + $2,500). Therefore, C is entitled to the same amount of qualified indebtedness as C would have been entitled to if C had not refinanced the debt.

(vi) *Special rule for principal payments in excess of qualified expenses*. For purposes of paragraph (n)(1)(iii)(B), (n)(1)(v)(B)(*2*) and (n)(2)(ii) of this section, a principal payment is taken into account only to the extent that the payment, when added to all prior payments, does not exceed the amount used on or before the date of the payment to pay for qualified medical and educational expenses.

(2) *Debt used to pay for qualified medical or educational expenses*—(i) *In general*. For purposes of this section, the proceeds of a debt are used to pay for qualified medical or educational expenses to the extent that—

(A) The taxpayer pays qualified medical or educational expenses within 90 days before or after the date that amounts are actually borrowed with respect to the debt, the proceeds of the debt are not directly allocable to another expense under §1.163–8T(c)(3) (allocation of debt; proceeds not disbursed to borrower) and the proceeds of any other debt are not allocable to the medical or educational expenses under §1.163–8T(c)(3), or

(B) The proceeds of the debt are otherwise allocated to such expenditures under §1.163–8T.

(ii) *Special rule for refinancings*. For purposes of this section, the proceeds of a debt are used to pay for qualified medical and educational expenses to the extent that the proceeds of the debt are allocated under §1.163–8T to the repayment of another debt (the ''original debt''), but only to the extent of the amount of the original debt used to pay for qualified medical and educational expenses, reduced by any principal payments on such debt up to the time of the refinancing.

(iii) *Other special rules.* The following special rules apply for purposes of this section.

(A) Proceeds of a debt are used to pay for qualified medical or educational expenses as of the later of the taxable year in which such proceeds are borrowed or the taxable year in which such expenses are paid.

(B) The amount of debt which may be treated as being used to pay for qualified medical or educational expenses may not exceed the amount of such expenses.

(C) Proceeds of a debt may not be treated as being used to pay for qualified medical or educational expenses to the extent that:

(*1*) The proceeds have been repaid as of the time the expense is paid;

(*2*) The proceeds are actually borrowed before August 17, 1986; or

(*3*) The medical or educational expenses are paid before August 17, 1986.

(iv) *Examples*—

Example 1. A pays a $5,000 qualified educational expense from a checking account that A maintains at Bank 1 on November 9, 1987. On January 1, 1988, A incurs a $20,000 debt that is secured by A's residence and places the proceeds of the debt in a savings account that A also maintains at Bank 1. A pays another $5,000 qualified educations expense on March 15 from a checking account that A maintains at Bank 2. Under paragraph (n)(2) of this section, the debt proceeds are used to pay for both educational expenses, regardless of other deposits to, or expenditures from, the accounts, because both expenditures are made within 90 days before or after the debt was incurred.

Example 2. B pays a $5,000 qualified educational expense from a checking account on November 1, 1987. On November 30, 1987, B incurs a debt secured by B's residence, and the lender disburses the debt proceeds directly to a person who sells B a new car. Although the educational expense is paid within 90 days of the date the debt is incurred, the proceeds of the debt are not used to pay for the educational expense because the proceeds are directly allocable to the purchase of the new car under §1.163–8T(c)(3).

Example 3. On November 1, 1987, C borrows $5,000 from C's college. The proceeds of this debt are not disbursed to C, but rather are used to pay tuition fees for C's attendance at the college. On November 30, 1987, C incurs a second debt and secures the debt by C's residence. Although the $5,000 educational expense is paid within 90 days before the second debt is incurred, the proceeds of the second debt are not used to pay for the educational expense, because the proceeds of the first debt are directly allocable to the educational expense under §1.163–8T(c)(3).

Example 4. On January 1, 1988, D incurs a $20,000 debt secured by a qualified residence. D places the proceeds of the debt in a separate account (*i.e.*, the proceeds of the debt are the only deposit in the account). D makes payments of $5,000 each for qualified educational expenses on September 1, 1988, September 1, 1989, September 1, 1990, and September 1, 1991. Because the debt proceeds are allocated to educational expenses as of the date the expenses are paid, under the rules of §1.163–8T(c)(4), the following amounts of the debt proceeds are used to pay for qualified educational expenses as of the end of each year:

1988: $5,000
1989: $10,000
1990: $15,000
1991: $20,000

Example 5. During 1987 E incurs a $10,000 debt secured by a principal residence. E uses (within the meaning of paragraph (n)(2)(i) of this section) all of the proceeds of the debt to pay for qualified educational expenses. On August 20, 1988, at which time the balance of the debt is $9,500, E incurs a new debt in the amount of $9,500 secured by E's principal residence and uses all of the proceeds of the new debt to repay the original debt. Under paragraph (n)(2)(ii) of this section, all of the proceeds of the new debt are used to pay for qualified educational expenses.

(3) *Qualified medical expenses.* Qualified medical expenses are amounts that are paid for medical care (within the meaning of section 213(d)(1) (A) and (B)) for the taxpayer, the taxpayer's spouse, or a dependent of the taxpayer (within the meaning of section 152), and that are not compensated for by insurance or otherwise.

(4) *Qualified educational expenses.* Qualified educational expenses are amounts that are paid for tuition, fees, books, supplies and equipment required for enrollment, attendance or courses of instruction at an educational organization described in section 170(b)(1)(A)(ii) and for any reasonable living expenses while away from home while in attendance at such an institution, for the taxpayer, the taxpayer's spouse or a dependent of the taxpayer (within the meaning of section 152) and that are not reimbursed by scholarship or otherwise.

(o) *Secured debt*—(1) *In general.* For purposes of this section, the term ''secured debt'' means a debt that is on the security of any instrument (such as a mortgage, deed of trust, or land contract)—

(i) That makes the interest of the debtor in the qualified residence specific security for the payment of the debt,

(ii) Under which, in the event of default, the residence could be subjected to the satisfaction of the debt with the same priority as a mortgage or deed of trust in the jurisdiction in which the property is situated, and

(iii) That is recorded, where permitted, or is otherwise perfected in accordance with applicable State law.

A debt will not be considered to be secured by a qualified residence if it is secured solely by virtue of a lien upon the general assets of the taxpayer or by a security interest, such as a mechanic's lien or judgment lien, that attaches to the property without the consent of the debtor.

(2) *Special rule for debt in certain States.* Debt will not fail to be treated as secured solely because, under an applicable State or local homestead law or other debtor protection law in effect on August 16, 1986, the security interest is ineffective or the enforceability of the security interest is restricted.

(3) *Times at which debt is treated as secured.* For purposes of this section, a debt is treated as secured as of the date on which each of the requirements of paragraph (o)(1) of this section are satisfied, regardless of when amounts are actually borrowed with respect to the debt. For purposes of this paragraph (o)(3), if the instrument is recorded within a commercially reasonable time after the security interest is granted, the instrument will be treated as recorded on the date that the security interest was granted.

(4) *Partially secured debt*—(i) *In general.* If the security interest is limited to a prescribed maximum amount or portion of the residence, and the average balance of the debt exceeds such amount or the value of such portion, such excess shall not be treated as secured debt for purposes of this section.

(ii) *Example.* T borrows $80,000 on January 1, 1991. T secures the debt with a principal residence. The security in the residence for the debt, however, is limited to $20,000. T pays $8,000 in interest on the debt in 1991 and the average balance of the debt in that year is $80,000. Because the average balance of the debt exceeds the maximum amount of the security interest, such excess is not treated as secured debt. Therefore, for purposes of applying the limitation on qualified residence interest, the average balance of the secured debt is $20,000 (the maximum amount of the security interest) and the interest paid or accrued on the secured debt is $2,000 (the total interest paid on the debt multiplied by the ratio of the average balance of the secured debt ($20,000) and the average balance of the total debt ($80,000)).

(5) *Election to treat debt as not secured by a qualified residence*—(i) *In general.* For purposes of this section, a taxpayer may elect to treat any debt that is secured by a qualified residence as not secured by the qualified residence. An election made under this paragraph shall be effective for the taxable year for which the election is made and for all subsequent taxable years unless revoked with the consent of the Commissioner.

(ii) *Example.* T owns a principal residence with a fair market value of $75,000 and an adjusted purchase price of $40,000. In 1988, debt A, the proceeds of which were used to purchase the residence, has an average balance of $15,000. The proceeds of debt B, which is secured by a second mortgage on the property, are allocable to T's trade or business under §1.163–8T and has an average balance of $25,000. In 1988, T incurs debt C, which is also secured by T's principal residence and which has an average balance in 1988 of $5,000. In the absence of an election to treat debt B as unsecured, the applicable debt limit for debt C in 1988 under paragraph (e) of this section would be zero dollars ($40,000 − $15,000 − $25,000) and none of the interest paid on debt C would be qualified residence interest. If, however, T makes or has previously made an election pursuant to paragraph (o)(5)(i) of this section to treat debt B as not secured by the residence, the applicable debt limit for debt C would be $25,000 ($40,000 − $15,000), and all of the interest paid on debt C during the taxable year would be qualified residence interest. Since the proceeds of debt B are allocable to T's trade or business under § 1.163–8T, interest on debt B may be deductible under other sections of the Internal Revenue Code.

(iii) *Allocation of debt secured by two qualified residences.* [Reserved]

(p) *Definition of qualified residence*—(1) *In general.* The term ''qualified residence'' means the taxpayer's principal residence (as defined in paragraph (p)(2) of this section), or the taxpayer's second residence (as defined in paragraph (p)(3) of this section).

(2) *Principal residence.* The term ''principal residence'' means the taxpayer's principal residence within the meaning of section 1034. For purposes of this section, a taxpayer cannot have more than one principal residence at any one time.

(3) *Second residence*—(i) *In general.* The term ''second residence'' means—

(A) A residence within the meaning of paragraph (p)(3)(ii) of this section,

(B) That the taxpayer uses as a residence within the meaning of paragraph (p)(3)(iii) of this section, and

(C) That the taxpayer elects to treat as a second residence pursuant to paragraph (p)(3)(iv) of this section.

A taxpayer cannot have more than one second residence at any time.

(ii) *Definition of residence.* Whether property is a residence shall be determined based on all the facts and circumstances, including the good faith of the taxpayer. A residence generally includes a house, condominium, mobile home, boat, or house trailer, that contains sleeping space and toilet and cooking facilities. A residence does not include personal property, such as furniture or a television, that, in accordance with the applicable local law, is not a fixture.

(iii) *Use as a residence.* If a residence is rented at any time during the taxable year, it is considered to be used as a residence only if the taxpayer uses it during the taxable year as a residence within the meaning of section 280A(d). If a residence is not rented at any time during the taxable year, it shall be considered to be used as a residence. For purposes of the preceding sentence, a residence will be deemed to be rented during any period that the taxpayer holds the residence out for rental or resale or repairs or renovates the residence with the intention of holding it out for rental or resale.

(iv) *Election of second residence.* A taxpayer may elect a different residence (other than the taxpayer's principal residence) to be the taxpayer's second residence for each taxable year. A taxpayer may not elect different residences as second residences at different times of the same taxable year except as provided below—

(A) If the taxpayer acquires a new residence during the taxable year, the taxpayer may elect the new residence as a taxpayer's second residence as of the date acquired;

(B) If property that was the taxpayer's principal residence during the taxable year ceases to qualify as the taxpayer's principal residence, the taxpayer may elect that property as the taxpayer's second residence as of the date that the property ceases to be the taxpayer's principal residence; or

(C) If property that was the taxpayer's second residence is sold during the taxable year or becomes the taxpayer's principal residence, the taxpayer may elect a new second residence as of such day.

(4) *Allocations between residence and other property*—(i) *In general.* For purposes of this section, the adjusted purchase price and fair market value of property must be allocated between the portion of the property that is a qualified residence and the portion that is not a qualified residence. Neither the average balance of the secured debt nor the interest paid or accrued on secured debt is so allocated. Property that is not used for residential purposes does not qualify as a residence. For example, if a portion of the property is used as an office in the taxpayer's trade or business, that portion of the property does not qualify as a residence.

(ii) *Special rule for rental of residence.* If a taxpayer rents a portion of his or her principal or second residence to another person (a ''tenant''), such portion may be treated as used by the taxpayer for residential purposes if, but only if—

(A) Such rented portion is used by the tenant primarily for residential purposes,

(B) The rented portion is not a self-contained residential unit containing separate sleeping space and toilet and cooking facilities, and

(C) The total number of tenants renting (directly or by sublease) the same or different portions of the residence at any time during the taxable year does not exceed two. For this purpose, if two persons (and the dependents, as defined by section 152, of either of them) share the same sleeping quarters, they shall be treated as a single tenant.

(iii) *Examples.*

Example 1. D, a dentist, uses a room in D's principal residence as an office which qualifies under section 280A(c)(1)(B) as a portion of the dwelling unit used exclusively on a regular basis as a place of business for meeting with patients in the normal course of D's trade or business. D's adjusted purchase price of the property is $65,000; $10,000 of which is allocable under paragraph (o)(4)(i) of this section to the room used as an office. For purposes of this section, D's residence does not include the room used as an office. The adjusted purchase price of the residence is, accordingly, $55,000. Similarly, the fair market value of D's residence must be allocated between the office and the remainder of the property.

Example 2. J rents out the basement of property that is otherwise used as J's principal residence. The basement is a self-contained residential unit, with sleeping space and toilet and cooking facilities. The adjusted purchase price of the property is $100,000; $15,000 of which is allocable under paragraph (o)(4)(i) of this section to the basement. For purposes of this section, J's residence does not include the basement and the adjusted purchase price of the residence is $85,000. Similarly, the fair market value of the residence must be allocated between the basement unit and the remainder of the property.

(5) *Residence under construction*—(i) *In general.* A taxpayer may treat a residence under construction as a qualified residence for a period of up to 24 months, but only if the residence becomes a qualified residence, without regard to this paragraph (p)(5)(i), as of the time that the residence is ready for occupancy.

(ii) *Example.* X owns a residential lot suitable for the construction of a vacation home. On April 20, 1987, X obtains a mortgage secured by the lot and any property to be constructed on the lot. On August 9, 1987, X begins construction of a residence on the lot. The residence is ready for occupancy on November 9, 1989. The residence is used as a residence within the meaning of paragraph (p)(3)(iii) of this section during 1989 and X elects to treat the residence as his second residence for the period November 9, 1989, through December 31, 1989. Since the residence under construction is a qualified residence as of the first day that the residence is ready for occupancy (November 9, 1987), X may treat the residence as his second residence under paragraph (p)(5)(i) of this section for up to 24 months of the period during which the residence is under construction, commencing on or after the date that construction is begun (August 9, 1987). If X treats the residence under construction as X's second residence beginning on August 9, 1987, the residence under construction would cease to qualify as a qualified residence under paragraph (p)(5)(i) on August 8, 1989. The residence's status as a qualified residence for future periods would be determined without regard to paragraph (p)(5)(i) of this section.

(6) *Special rule for time-sharing arrangements.* Property that is otherwise a qualified residence will not fail to qualify as such solely because the taxpayer's interest in or right to use the property is restricted by an arrangement whereby two or more persons with interests in the property agree to exercise control over the property for different periods during the taxable year. For purposes of determining the use of a residence under paragraph (p)(3)(iii) of this section, a taxpayer will not be considered to have used or rented a residence during any period that the taxpayer does not have the right to use the property or to receive any benefits from the rental of the property.

(q) *Special rules for tenant-stockholders in cooperative housing corporations*—(1) *In general.* For purposes of this section, a residence includes stock in a cooperative housing corporation owned by a tenant-stockholder if the house or apartment which the tenant-stockholder is entitled to occupy by virtue of owning such stock is a residence within the meaning of paragraph (p)(3)(ii) of this section.

(2) *Special rule where stock may not be used to secure debt.* For purposes of this section, if stock described in paragraph (q)(1) of this section may not be used to secure debt because of restrictions under local or State law or because of restrictions in the cooperative agreement (other than restrictions the principal purpose of which is to permit the tenant-stockholder to treat unsecured debt as secured debt under this paragraph (q)(2)), debt may be treated as secured by such stock to the extent that the proceeds of the debt are allocated to the purchase of the stock under the rules of §1.163–8T. For purposes of this paragraph (q)(2), proceeds of debt incurred prior to January 1, 1987, may be treated as allocated to the purchase of such stock to the extent that the tenant-stockholder has properly and consistently deducted interest expense on such debt as home mortgage interest attributable to such stock on Schedule A of Form 1040 in determining his taxable income for taxable years beginning before January 1, 1987. For purposes of this paragraph (q)(2), amended returns filed after December 22, 1987, are disregarded.

(3) *Treatment of interest expense of the cooperative described in section 216(a)(2).* For purposes of section 163(h) and §1.163–9T (disallowance of deduction for personal interest) and section 163(d) (limitation on investment interest), any amount allowable as a deduction to a tenant-stockholder under section 216(a)(2) shall be treated as interest paid or accrued by the tenant-stockholder. If a tenant-stockholder's stock in a cooperative housing corporation is a qualified residence of the tenant-shareholder, any amount allowable as a deduction to the tenant-stockholder under section 216(a)(2) is qualified residence interest.

(4) *Special rule to prevent tax avoidance.* If the amount treated as qualified residence interest under this section exceeds the amount which would be so treated if the tenant-stockholder were treated as directly owning his proportionate share of the assets and liabilities of the cooperative and one of the principal purposes of the cooperative arrangement is to permit the tenant-stockholder to increase the amount of qualified residence interest, the district director may determine that such excess is not qualified residence interest.

(5) *Other definitions.* For purposes of this section, the terms "tenant-stockholder," "cooperative housing corporation" and "proportionate share" shall have the meaning given by section 216 and the regulations thereunder.

(r) *Effective date.* The provisions of this section are effective for taxable years beginning after December 31, 1986.

[T.D. 8168, 52 FR 48410, Dec. 22, 1987]

§ 1.163–11 Allocation of certain prepaid qualified mortgage insurance premiums.

(a) *Allocation*—(1) *In general.* As provided in section 163(h)(3)(E), premiums paid or accrued for qualified mortgage insurance during the taxable year in connection with acquisition indebtedness with respect to a qualified residence (as defined in section 163(h)(4)(A)) of the taxpayer shall be treated as qualified residence interest (as defined in section 163(h)(3)(A)). If an individual taxpayer pays such a premium that is properly allocable to a mortgage the payment of which extends to periods beyond the close of the taxable year in which the premium is paid, the taxpayer must allocate the premium to determine the amount treated as qualified residence interest for each taxable year. The premium must be allocated ratably over the shorter of—

(i) The stated term of the mortgage; or

(ii) A period of 84 months, beginning with the month in which the insurance was obtained.

(2) *Limitation.* If a mortgage is satisfied before the end of its stated term, no deduction as qualified residence interest shall be allowed for any amount of the premium that is allocable to periods after the mortgage is satisfied.

(b) *Scope.* The allocation requirement in paragraph (a) of this section applies only to mortgage insurance provided by the Federal Housing Administration or private mortgage insurance (as defined by section 2 of the Homeowners Protection Act of 1998 (12 U.S.C. 4901) as in effect on December 20, 2006). It does not apply to mortgage insurance provided by the Department of Veterans Affairs or the Rural Housing Service. Paragraph (a) of this section applies whether the qualified mortgage insurance premiums are paid in cash or are financed, without regard to source.

(c) *Limitation on the treatment of mortgage insurance premiums as interest.* This section applies to prepaid qualified mortgage insurance premiums described in paragraph (a) of this section that are paid or accrued on or after January 1, 2011, and during periods to which section 163(h)(3)(E) is applicable. This section does not apply to any amount of prepaid qualified mortgage insurance premiums that are allocable to any periods to which section 163(h)(3)(E) is not applicable.

(d) *Effective/applicability date.* This section is applicable on and after January 1, 2011. For regulations applicable before January 1, 2011, see §1.163–11T in effect prior to January 1, 2011 (§1.163–11T as contained in 26 CFR part 1 edition revised as of April 1, 2011).

[T.D. 9588, 77 FR 26699, May 7, 2012]

§1.163–12 Deduction of original issue discount on instrument held by related foreign person.

(a) *General rules*—(1) *Deferral of deduction.* Except as provided in paragraph (b) of this section, section 163(e)(3) requires a taxpayer to use the cash method of accounting with respect to the deduction of original issue discount owed to a related foreign person. A deduction for an otherwise deductible portion of original issue discount with respect to a debt instrument will not be allowable as a deduction to the issuer until paid if, at the close of the issuer's taxable year in which such amount would otherwise be deductible, the person holding the debt instrument is a related foreign person. For purposes of this section, a related foreign person is any person that is not a United States person within the meaning of section 7701(a)(30), and that is related (within the meaning of section 267(b)) to the issuer at the close of the taxable year in which the amount incurred by the taxpayer would otherwise be deductible. Section 267(f) defines "controlled group" for purposes of section 267(b) without regard to the limitations of section 1563(b). An amount is treated as paid for purposes of this section if the amount is considered paid for purposes of section 1441 or section 1442 (including an amount taken into account pursuant to section 871(a)(1)(C), section 881(a)(3), or section 884(f)). The rules of this paragraph (a) apply even if the original issue discount is not subject to United States tax, or is subject to a reduced rate of tax, pursuant to a provision of the Internal Revenue Code or a treaty obligation of the United States. For purposes of this section, original issue discount is an amount described in section 1273, whether from sources inside or outside the United States.

(2) *Change in method of accounting.* A taxpayer that uses a method of accounting other than that required by the rules of this section must change its method of accounting to conform its method to the rules of this section. The taxpayer's change in method must be made pursuant to the rules of section 446(e), the regulations thereunder, and any applicable administrative procedures prescribed by the Commissioner. Because the rules of this section prescribe a method of accounting, these rules apply in the determination of a taxpayer's earnings and profits pursuant to §1.312–6(a).

(b) *Exceptions and special rules*—(1) *Effectively connected income.* The provisions of section 267(a)(2) and the regulations thereunder, and not the provisions of paragraph (a) of this section, apply to an amount of original issue discount that is income of the related foreign person that is effectively connected with the conduct of a United States trade or business of such related foreign person. An amount described in this paragraph (b)(1) thus is allowable as a deduction as of the day on which the amount is includible in the gross income of the related foreign person as effectively connected income under sections 872(a)(2) or 882(b) (or, if later, as of the day on which the deduction would be so allowable but for section 267(a)(2)). However, this paragraph (b)(1) does not apply if the related foreign person is exempt from United States income tax on the amount owed, or is subject to a reduced rate of tax, pursuant to a treaty obligation of the United States (such as under an article relating to the taxation of business profits).

(2) *Certain obligations issued by natural persons.* This section does not apply to any debt instrument described in section 163(e)(4) (relating to obligations issued by natural persons before March 2, 1984, and to loans between natural persons).

(3) *Amounts owed to a foreign personal holding company, controlled foreign corporation, or passive foreign investment company*—(i) *Foreign personal holding companies.* If an amount to which paragraph (a) of this section otherwise applies is owed to a related foreign person that is a foreign personal holding company within the meaning of section 552, then the amount is allowable as a deduction as of the day on which the amount is includible in the income of the foreign personal holding company. The day on which the amount is includible in income is determined with reference to the method of accounting under which the foreign personal holding company computes its taxable income and earnings and profits for purposes of sections 551 through 558. See section 551(c) and the regulations thereunder for the reporting requirements of the foreign personal holding company provisions (sections 551 through 558).

(ii) *Controlled foreign corporations.* If an amount to which paragraph (a) of this section otherwise applies is owed to a related foreign person that is a controlled foreign corporation within the meaning of section 957, then the amount is allowable as a deduction as of the day on which the amount is includible in the income of the controlled foreign corporation. The day on which the amount is includible in income is determined with reference to the method of accounting under which the controlled foreign corporation computes its taxable income and earnings and profits for purposes of sections 951 through 964. See section 6038 and the regulations thereunder for the reporting requirements of the controlled foreign corporation provisions (sections 951 through 964).

(iii) *Passive foreign investment companies.* If an amount to which paragraph (a) of this section otherwise applies is owed to a related foreign person that is a passive foreign investment company within the meaning of section 1296, then the amount is allowable as a deduction as of the day on which amount is includible in the income of the passive foreign investment company. The day on which the amount is includible in income is determined with reference to the method of accounting under which the earnings and profits of the passive foreign investment company are computed for purposes of sections 1291 through 1297. See sections 1291 through 1297 and the regulations thereunder for the reporting requirements of the passive foreign investment company provisions. This exception shall apply, however, only if the person that owes the amount at issue has made and has in effect an election pursuant to section 1295 with respect to the passive foreign investment company to which the amount at issue is owed.

(c) *Application of section 267.* Except as limited in paragraph (b)(1) of this section, the provisions of section 267 and the regulations thereunder shall apply to any amount of original issue discount to which the provisions of this section do not apply.

(d) *Effective date.* The rules of this section are effective with respect to all original issue discount on debt instruments issued after June 9, 1984.

[T.D. 8465, 58 FR 236, Jan. 5, 1993; 58 FR 8098, Feb. 11, 1993]

§ 1.163–13 Treatment of bond issuance premium.

(a) *General rule.* If a debt instrument is issued with bond issuance premium, this section limits the amount of the issuer's interest deduction otherwise allowable under section 163(a). In general, the issuer determines its interest deduction by offsetting the interest allocable to an accrual period with the bond issuance premium allocable to that period. Bond issuance premium is allocable to an accrual period based on a constant yield. The use of a constant yield to amortize bond issuance premium is intended to generally conform the treatment of debt instruments having bond issuance premium with those having original issue discount. Unless otherwise provided, the terms used in this section have the same meaning as those terms in section 163(e), sections

1271 through 1275, and the corresponding regulations. Moreover, unless otherwise provided, the provisions of this section apply in a manner consistent with those of section 163(e), sections 1271 through 1275, and the corresponding regulations. In addition, the anti-abuse rule in §1.1275–2(g) applies for purposes of this section. For rules dealing with the treatment of bond premium by a holder, see §§1.171–1 through 1.171–5.

(b) *Exceptions.* This section does not apply to—

(1) A debt instrument described in section 1272(a)(6)(C) (regular interests in a REMIC, qualified mortgages held by a REMIC, and certain other debt instruments, or pools of debt instruments, with payments subject to acceleration); or

(2) A debt instrument to which §1.1275–4 applies (relating to certain debt instruments that provide for contingent payments).

(c) *Bond issuance premium.* Bond issuance premium is the excess, if any, of the issue price of a debt instrument over its stated redemption price at maturity. For purposes of this section, the issue price of a convertible bond (as defined in §1.171–1(e)(1)(iii)(C)) does not include an amount equal to the value of the conversion option (as determined under §1.171–1(e)(1)(iii)(A)).

(d) *Offsetting qualified stated interest with bond issuance premium*—(1) *In general.* An issuer amortizes bond issuance premium by offsetting the qualified stated interest allocable to an accrual period with the bond issuance premium allocable to the accrual period. This offset occurs when the issuer takes the qualified stated interest into account under its regular method of accounting.

(2) *Qualified stated interest allocable to an accrual period.* See §1.446–2(b) to determine the accrual period to which qualified stated interest is allocable and to determine the accrual of qualified stated interest within an accrual period.

(3) *Bond issuance premium allocable to an accrual period.* The bond issuance premium allocable to an accrual period is determined under this paragraph (d)(3). Within an accrual period, the bond issuance premium allocable to the period accrues ratably.

(i) *Step one: Determine the debt instrument's yield to maturity.* The yield to maturity of a debt instrument is determined under the rules of §1.1272–1(b)(1)(i).

(ii) *Step two: Determine the accrual periods.* The accrual periods are determined under the rules of §1.1272–1(b)(1)(ii).

(iii) *Step three: Determine the bond issuance premium allocable to the accrual period.* The bond issuance premium allocable to an accrual period is the excess of the qualified stated interest allocable to the accrual period over the product of the adjusted issue price at the beginning of the accrual period and the yield. In performing this calculation, the yield must be stated appropriately taking into account the length of the particular accrual period. Principles similar to those in §1.1272–1(b)(4) apply in determining the bond issuance premium allocable to an accrual period.

(4) *Bond issuance premium in excess of qualified stated interest*—(i) *Ordinary income.* If the bond issuance premium allocable to an accrual period exceeds the qualified stated interest allocable to the accrual period, the excess is treated as ordinary income by the issuer for the accrual period. However, the amount treated as ordinary income is limited to the amount by which the issuer's total interest deductions on the debt instrument in prior accrual periods exceed the total amount treated by the issuer as ordinary income on the debt instrument in prior accrual periods.

(ii) *Carryforward.* If the bond issuance premium allocable to an accrual period exceeds the sum of the qualified stated interest allocable to the accrual period and the amount treated as ordinary income for the accrual period under paragraph (d)(4)(i) of this section, the excess is carried forward to the next accrual period and is treated as bond issuance premium allocable to that period. If a carryforward exists on the date the debt instrument is retired, the carryforward is treated as ordinary income on that date.

(e) *Special rules*—(1) *Variable rate debt instruments.* An issuer determines bond issuance premium on a variable rate debt instrument by reference to the stated redemption price at maturity of the equivalent fixed rate debt instrument constructed for the variable rate debt instrument. The issuer also allocates any bond issuance premium among the accrual periods by reference to the equivalent fixed rate debt instrument. The issuer constructs the equivalent fixed rate debt instrument, as of the issue date, by using the principles of § 1.1275–5(e).

(2) *Inflation-indexed debt instruments.* An issuer determines bond issuance premium on an inflation-indexed debt instrument by assuming that there will be no inflation or deflation over the term of the instrument. The issuer also allocates any bond issuance premium among the accrual periods by assuming that there will be no inflation or deflation over the term of the instrument. The bond issuance premium allocable to an accrual period offsets qualified stated interest allocable to the period. Notwithstanding paragraph (d)(4) of this section, if the bond issuance premium allocable to an accrual period exceeds the qualified stated interest allocable to the period, the excess is treated as a deflation adjustment under § 1.1275–7(f)(1)(ii). See § 1.1275–7 for other rules relating to inflation-indexed debt instruments.

(3) *Certain debt instruments subject to contingencies*—(i) *In general.* Except as provided in paragraph (e)(3)(ii) of this section, the rules of § 1.1272–1(c) apply to determine a debt instrument's payment schedule for purposes of this section. For example, an issuer uses the payment schedule determined under § 1.1272–1(c) to determine the amount, if any, of bond issuance premium on the debt instrument, the yield and maturity of the debt instrument, and the allocation of bond issuance premium to an accrual period.

(ii) *Mandatory sinking fund provision.* Notwithstanding paragraph (e)(3)(i) of this section, if a debt instrument is subject to a mandatory sinking fund provision described in § 1.1272–1(c)(3), the issuer must determine the payment schedule by assuming that a pro rata portion of the debt instrument will be called under the sinking fund provision.

(4) *Remote and incidental contingencies.* For purposes of determining the amount of bond issuance premium and allocating bond issuance premium among accrual periods, if a bond provides for a contingency that is remote or incidental (within the meaning of § 1.1275–2(h)), the issuer takes the contingency into account under the rules for remote and incidental contingencies in § 1.1275–2(h).

(f) *Example.* The following example illustrates the rules of this section:

Example. (i) *Facts.* On February 1, 1999, X issues for $110,000 a debt instrument maturing on February 1, 2006, with a stated principal amount of $100,000, payable at maturity. The debt instrument provides for unconditional payments of interest of $10,000, payable on February 1 of each year. X uses the calendar year as its taxable year, X uses the cash receipts and disbursements method of accounting, and X decides to use annual accrual periods ending on February 1 of each year. X's calculations assume a 30-day month and 360-day year.

(ii) *Amount of bond issuance premium.* The issue price of the debt instrument is $110,000. Because the interest payments on the debt instrument are qualified stated interest, the stated redemption price at maturity of the debt instrument is $100,000. Therefore, the amount of bond issuance premium is $10,000 ($110,000 − $100,000).

(iii) *Bond issuance premium allocable to the first accrual period.* Based on the payment schedule and the issue price of the debt instrument, the yield of the debt instrument is 8.07 percent, compounded annually. (Although, for purposes of simplicity, the yield as stated is rounded to two decimal places, the computations do not reflect this rounding convention.) The bond issuance premium allocable to the accrual period ending on February 1, 2000, is the excess of the qualified stated interest allocable to the period ($10,000) over the product of the adjusted issue price at the beginning of the period ($110,000) and the yield (8.07 percent, compounded annually). Therefore, the bond issuance premium allocable to the accrual period is $1,118.17 ($10,000 − $8,881.83).

(iv) *Premium used to offset interest.* Although X makes an interest payment of $10,000 on February 1, 2000, X only deducts interest of $8,881.83, the qualified stated interest allocable to the period ($10,000) offset with the bond issuance premium allocable to the period ($1,118.17).

(g) *Effective date.* This section applies to debt instruments issued on or after March 2, 1998.

(h) *Accounting method changes*—(1) *Consent to change*. An issuer required to change its method of accounting for bond issuance premium to comply with this section must secure the consent of the Commissioner in accordance with the requirements of §1.446–1(e). Paragraph (h)(2) of this section provides the Commissioner's automatic consent for certain changes.

(2) *Automatic consent*. The Commissioner grants consent for an issuer to change its method of accounting for bond issuance premium on debt instruments issued on or after March 2, 1998. Because this change is made on a cut-off basis, no items of income or deduction are omitted or duplicated and, therefore, no adjustment under section 481 is allowed. The consent granted by this paragraph (h)(2) applies provided—

(i) The change is made to comply with this section;

(ii) The change is made for the first taxable year for which the issuer must account for a debt instrument under this section; and

(iii) The issuer attaches to its federal income tax return for the taxable year containing the change a statement that it has changed its method of accounting under this section.

[T.D. 8746, 62 FR 68176, Dec. 31, 1997, as amended by T.D. 8838, 64 FR 48547, Sept. 7, 1999]

§ 1.163(d)–1 Time and manner for making elections under the Omnibus Budget Reconciliation Act of 1993 and the Jobs and Growth Tax Relief Reconciliation Act of 2003.

(a) *Description*. Section 163(d)(4)(B)(iii), as added by section 13206(d) of the Omnibus Budget Reconciliation Act of 1993 (Pub. L. 103–66, 107 Stat. 467), allows an electing taxpayer to take all or a portion of certain net capital gain attributable to dispositions of property held for investment into account as investment income. Section 163(d)(4)(B), as amended by section 302(b) of the Jobs and Growth Tax Relief Reconciliation Act of 2003 (Pub. L. 108–27, 117 Stat. 762), allows an electing taxpayer to take all or a portion of qualified dividend income, as defined in section 1(h)(11)(B), into account as investment income. As a consequence, the net capital gain and qualified dividend income taken into account as investment income under these elections are not eligible to be taxed at the capital gains rates. An election may be made for net capital gain recognized by noncorporate taxpayers during any taxable year beginning after December 31, 1992. An election may be made for qualified dividend income received by noncorporate taxpayers during any taxable year beginning after December 31, 2002, but before January 1, 2009.

(b) *Time and manner for making the elections*. The elections for net capital gain and qualified dividend income must be made on or before the due date (including extensions) of the income tax return for the taxable year in which the net capital gain is recognized or the qualified dividend income is received. The elections are to be made on Form 4952, ''Investment Interest Expense Deduction,'' in accordance with the form and its instructions.

(c) *Revocability of elections*. The elections described in this section are revocable with the consent of the Commissioner.

(d) *Effective date*. The rules set forth in this section regarding the net capital gain election apply beginning December 12, 1996. The rules set forth in this section regarding the qualified dividend income election apply to any taxable year beginning after December 31, 2002, but before January 1, 2009.

[T.D. 9191, 70 FR 13100, Mar. 18, 2005]

§ 1.164–1 Deduction for taxes.

(a) *In general*. Only the following taxes shall be allowed as a deduction under this section for the taxable year within which paid or accrued, according to the method of accounting used in computing taxable income:

(1) State and local, and foreign, real property taxes.

(2) State and local personal property taxes.

(3) State and local, and foreign, income, war profits, and excess profits taxes.

(4) State and local general sales taxes.

(5) State and local taxes on the sale of gasoline, diesel fuel, and other motor fuels.

In addition, there shall be allowed as a deduction under this section State and local and foreign taxes not described in subparagraphs (1) through (5) of this paragraph which are paid or accrued within the taxable year in carrying on a trade or business or an activity described in section 212 (relating to expenses for production of income). For example, dealers or investors in securities and dealers or investors in real estate may deduct State stock transfer and real estate transfer taxes, respectively, under section 164, to the extent they are expenses incurred in carrying on a trade or business or an activity for the production of income. In general, taxes are deductible only by the person upon whom they are imposed. However, see §1.164–5 in the case of certain taxes paid by the consumer. Also, in the case of a qualified State individual income tax (as defined in section 6362 and the regulations thereunder) which is determined by reference to a percentage of the Federal income tax (pursuant to section 6362 (c)), an accrual method taxpayer shall use the cash receipts and disbursements method to compute the amount of his deduction therefor. Thus, the deduction under section 164 is in the amount actually paid with respect to the qualified tax, rather than the amount accrued with respect thereto, during the taxable year even though the taxpayer uses the accrual method of accounting for other purposes. In addition, see paragraph (f)(1) of §301.6361–1 of this chapter (Regulations on Procedure and Administration) with respect to rules relating to allocation and reallocation of amounts collected on account of the Federal income tax and qualified taxes.

(b) *Taxable years beginning before January 1, 1964*. For taxable years beginning before January 1, 1964, except as otherwise provided in §§1.164–2 through 1.164–8, inclusive, taxes imposed by the United States, any State, territory, possession of the United States, or a political subdivision of any of the foregoing, or by any foreign country, are deductible from gross income for the taxable year in which paid or accrued, according to the method of accounting used in computing taxable income. For this purpose, postage is not a tax and automobile license or registration fees are ordinarily taxes.

(c) *Cross references*. For the definition of the term ''real property taxes'', see paragraph (d) of §1.164–3. For the definition of the term ''foreign taxes'', see paragraph (d) of §1.164–3. For the definition of the term ''general sales taxes'', see paragraph (f) of §1.164–3. For the treatment of gasoline, diesel fuel, and other motor fuel taxes, see §1.164–5. For apportionment of taxes on real property between seller and purchaser, see section 164(d) and §1.164–6. For the general rule for taxable year of deduction, see section 461. For provisions disallowing any deduction for the tax paid at the source on interest from tax-free covenant bonds, see section 1451(f).

[T.D. 6780, 29 FR 18145, Dec. 22, 1964, as amended by T.D. 7577, 43 FR 59357, Dec. 20, 1978]

§ 1.164–2 Deduction denied in case of certain taxes.

This section and §1.275 describe certain taxes for which no deduction is allowed. In the case of taxable years beginning before January 1, 1964, the denial is provided for by section 164(b) (prior to being amended by section 207 of the Revenue Act of 1964 (78 Stat. 40)). In the case of taxable years beginning after December 31, 1963, the denial is governed by sections 164 and 275. No deduction is allowed for the following taxes:

(a) *Federal income taxes*. Federal income taxes, including the taxes imposed by section 3101, relating to the tax on employees under the Federal Insurance Contributions Act (chapter 21 of the Code); sections 3201 and 3211, relating to the taxes on railroad employees and railroad employee representatives; section 3402, relating to the tax withheld at source on wages; and by corresponding provisions of prior internal revenue laws.

(b) *Federal war profits and excess profits taxes*. Federal war profits and excess profits taxes including those imposed by title II of the Revenue Act of 1917 (39 Stat. 1000), title III of the Revenue Act of 1918 (40 Stat. 1088), title III of the Revenue Act of 1921 (42 Stat. 271), section 216 of the National Industrial Recovery Act (48 Stat. 208), section 702 of the Revenue Act of 1934 (48 Stat. 770), Subchapter D, Chapter 1 of the Internal Revenue Code of 1939, and Subchapter E, Chapter 2 of the Internal Revenue Code of 1939.

(c) *Estate and gift taxes.* Estate, inheritance, legacy, succession, and gift taxes.

(d) *Foreign income, war profits, and excess profits taxes.* Income, war profits, and excess profits taxes imposed by the authority of any foreign country or possession of the United States, if the taxpayer chooses to take to any extent the benefits of section 901, relating to the credit for taxes of foreign countries and possessions of the United States.

(e) *Real property taxes.* Taxes on real property, to the extent that section 164(d) and §1.164–6 require such taxes to be treated as imposed on another taxpayer.

(f) *Federal duties and excise taxes.* Federal import or tariff duties, business, license, privilege, excise, and stamp taxes (not described in paragraphs (a), (b), (c), or (h) of this section, or §1.164–4) paid or accrued within the taxable year. The fact that any such tax is not deductible as a tax under section 164 does not prevent (1) its deduction under section 162 or section 212, provided it represents an ordinary and necessary expense paid or incurred during the taxable year by a corporation or an individual in the conduct of any trade or business or, in the case of an individual for the production or collection of income, for the management, conservation, or maintenance of property held for the production of income, or in connection with the determination, collection, or refund of any tax, or (2) its being taken into account during the taxable year by a corporation or an individual as a part of the cost of acquiring or producing property in the trade or business or, in the case of an individual, as a part of the cost of property held for the production of income with respect to which it relates.

(g) *Taxes for local benefits.* Except as provided in §1.164–4, taxes assessed against local benefits of a kind tending to increase the value of the property assessed.

(h) *Excise tax on real estate investment trusts.* The excise tax imposed on certain real estate investment trusts by section 4981.

[T.D. 6780, 29 FR 18145, Dec. 22, 1964, as amended by T.D. 7767, 46 FR 11263, Feb. 6, 1981]

§1.164–3 Definitions and special rules.

For purposes of section 164 and §1.164–1 to §1.164–8, inclusive—

(a) *State or local taxes.* A State or local tax includes only a tax imposed by a State, a possession of the United States, or a political subdivision of any of the foregoing, or by the District of Columbia.

(b) *Real property taxes.* The term ''real property taxes'' means taxes imposed on interests in real property and levied for the general public welfare, but it does not include taxes assessed against local benefits. See §1.164–4.

(c) *Personal property taxes.* The term ''personal property tax'' means an ad valorem tax which is imposed on an annual basis in respect of personal property. To qualify as a personal property tax, a tax must meet the following three tests:

(1) The tax must be ad valorem—that is, substantially in proportion to the value of the personal property. A tax which is based on criteria other than value does not qualify as ad valorem. For example, a motor vehicle tax based on weight, model year, and horsepower, or any of these characteristics is not an ad valorem tax. However, a tax which is partly based on value and partly based on other criteria may qualify in part. For example, in the case of a motor vehicle tax of 1 percent of value plus 40 cents per hundredweight, the part of the tax equal to 1 percent of value qualifies as an ad valorem tax and the balance does not qualify.

(2) The tax must be imposed on an annual basis, even if collected more frequently or less frequently.

(3) The tax must be imposed in respect of personal property. A tax may be considered to be imposed in respect of personal property even if in form it is imposed on the exercise of a privilege. Thus, for taxable years beginning after December 31, 1963, State and local taxes on the registration or licensing

of highway motor vehicles are not deductible as personal property taxes unless and to the extent that the tests prescribed in this subparagraph are met. For example, an annual ad valorem tax qualifies as a personal property tax although it is denominated a registration fee imposed for the privilege of registering motor vehicles or of using them on the highways.

(d) *Foreign taxes.* The term ''foreign tax'' includes only a tax imposed by the authority of a foreign country. A tax-imposed by a political subdivision of a foreign country is considered to be imposed by the authority of that foreign country.

(e) *Sales tax.* (1) The term ''sales tax'' means a tax imposed upon persons engaged in selling tangible personal property, or upon the consumers of such property, including persons selling gasoline or other motor vehicle fuels at wholesale or retail, which is a stated sum per unit of property sold or which is measured by the gross sales price or the gross receipts from the sale. The term also includes a tax imposed upon persons engaged in furnishing services which is measured by the gross receipts for furnishing such services.

(2) In general, the term ''consumer'' means the ultimate user or purchaser; it does not include a purchaser such as a retailer, who acquires the property for resale.

(f) *General sales tax.* A ''general sales tax'' is a sales tax which is imposed at one rate in respect of the sale at retail of a broad range of classes of items. No foreign sales tax is deductible under section 164(a) and paragraph (a)(4) of §1.164–1. To qualify as a general sales tax, a tax must meet the following two tests:

(1) The tax must be a tax in respect of sales at retail. This may include a tax imposed on persons engaged in selling property at retail or furnishing services at retail, for example, if the tax is measured by gross sales price or by gross receipts from sales or services. Rentals qualify as sales at retail if so treated under applicable State sales tax laws.

(2) The tax must be general—that is, it must be imposed at one rate in respect of the retail sales of a broad range of classes of items. A sales tax is considered to be general although imposed on sales of various classes of items at more than one rate provided that one rate applies to the retail sales of a broad range of classes of items. The term ''items'' includes both commodities and services.

(g) *Special rules relating to general sales taxes.* (1) A sales tax which is general is usually imposed at one rate in respect of the retail sales of all tangible personal property (with exceptions and additions). However, a sales tax which is selective—that is, a tax which applies at one rate with respect to retail sales of specified classes of items also qualifies as general if the specified classes represent a broad range of classes of items. A selective sales tax which does not apply at one rate to the retail sales of a broad range of classes of items is not general. For example, a tax which applies only to sales of alcoholic beverages, tobacco, admissions, luxury items, and a few other items is not general. Similarly, a tax imposed solely on services is not general. However, a selective sales tax may be deemed to be part of the general sales tax and hence may be deductible, even if imposed by a separate title, etc., of the State or local law, if imposed at the same rate as the general rate of tax (as defined in subparagraph (4) of this paragraph) which qualifies a tax in the taxing jurisdiction as a general sales tax. For example, if a State has a 5 percent general sales tax and a separate selective sales tax of 5 percent on transient accommodations, the tax on transient accommodations is deductible.

(2) A tax is imposed at one rate only if it is imposed at that rate on generally the same base for all items subject to tax. For example, a sales tax imposed at a 3 percent rate on 100 percent of the sales price of some classes of items and at a 3 percent rate on 50 percent of the sales price of other classes of items would not be imposed at one rate with respect to all such classes. However, a tax is considered to be imposed at one rate although it allows dollar exemptions, if the exemptions are designed to exclude all sales under a certain dollar amount. For example, a tax may be imposed at one rate although it applies to all sales of

tangible personal property but applies only to sales amounting to more than 10 cents.

(3) The fact that a sales tax exempts food, clothing, medical supplies, and motor vehicles, or any of them, shall not be taken into account in determining whether the tax applies to a broad range of classes of items. The fact that a sales tax applies to food, clothing, medical supplies, and motor vehicles, or any of them, at a rate which is lower than the general rate of tax (as defined in subparagraph (4) of this paragraph) is not taken into account in determining whether the tax is imposed at one rate on the retail sales of a broad range of classes of items. For purposes of this section, the term ''food'' means food for human consumption off the premises where sold, and the term ''medical supplies'' includes drugs, medicines, and medical devices.

(4) Except in the case of a lower rate of tax applicable in respect of food, clothing, medical supplies, and motor vehicles, or any of them, no deduction is allowed for a general sales tax in respect of any item if the tax is imposed on such item at a rate other than the general rate of tax. The general rate of tax is the one rate which qualifies a tax in a taxing jurisdiction as a general sales tax because the tax is imposed at such one rate on a broad range of classes of items. There can be only one general rate of tax in any one taxing jurisdiction. However, a general sales tax imposed at a lower rate or rates on food, clothing, motor vehicles, and medical supplies, or any of them, may nonetheless be deductible with respect to such items. For example, a sales tax which is imposed at 1 percent with respect to food, imposed at 3 percent with respect to a broad range of classes of tangible personal property, and imposed at 4 percent with respect to transient accommodations would qualify as a general sales tax. Taxes paid at the 1 percent and the 3 percent rates are deductible, but tax paid at the 4 percent rate is not deductible. The fact that a sales tax provides for the adjustment of the general rate of tax to reflect the sales tax rate in another taxing jurisdiction shall not be taken into account in determining whether the tax is imposed at one rate on the retail sales of a broad range of classes of items. Moreover, a general sales tax imposed at a lower rate with respect to an item in order to reflect the tax rate in another jurisdiction is also deductible at such lower rate. For example, State E imposes a general sales tax whose general rate is 3 percent. The State E sales tax law provides that in areas bordering on States with general sales taxes, selective sales taxes, or special excise taxes, the rate applied in the adjoining State will be used if such rate is under 3 percent. State F imposes a 2 percent sales tax. The 2 percent sales tax paid by residents of State E in areas bordering on State F is deductible.

(h) *Compensating use taxes.* A compensating use tax in respect of any item is treated as a general sales tax. The term ''compensating use tax'' means, in respect of any item, a tax which is imposed on the use, storage, or consumption of such item and which is complementary to a general sales tax which is deductible with respect to sales of similar items.

(i) *Special rules relating to compensating use taxes.* (1) In general, a use tax on an item is complementary to a general sales tax on similar items if the use tax is imposed on an item which was not subject to such general sales tax but which would have been subject to such general sales tax if the sale of the item had taken place within the jurisdiction imposing the use tax. For example, a tax imposed by State A on the use of a motor vehicle purchased in State B is complementary to the general sales tax of State A on similar items, if the latter tax applies to motor vehicles sold in State A.

(2) Since a compensating use tax is treated as a general sales tax, it is subject to the rule of subparagraph (C) of section 164(b)(2) and paragraph (g)(4) of this section that no deduction is allowed for a general sales tax imposed in respect of an item at a rate other than the general rate of tax (except in the case of lower rates on the sale of food, clothing, medical supplies, and motor vehicles). The fact that a compensating use tax in respect of any item provides for an adjustment in the rate of the compensating use tax or the

amount of such tax to be paid on account of a sales tax on such item imposed by another taxing jurisdiction is not taken into account in determining whether the compensating use tax is imposed in respect of the item at a rate other than the general rate of tax. For example, a compensating use tax imposed by State C on the use of an item purchased in State D is considered to be imposed at the general rate of tax even though the tax imposed by State C allows a credit for any sales tax paid on such item in State D, or the rate of such compensating use tax is adjusted to reflect the rate of sales tax imposed by State D.

[T.D. 6780, 29 FR 18146, Dec. 22, 1964]

§ 1.164–4 Taxes for local benefits.

(a) So-called taxes for local benefits referred to in paragraph (g) of § 1.164–2, more properly assessments, paid for local benefits such as street, sidewalk, and other like improvements, imposed because of and measured by some benefit inuring directly to the property against which the assessment is levied are not deductible as taxes. A tax is considered assessed against local benefits when the property subject to the tax is limited to property benefited. Special assessments are not deductible, even though an incidental benefit may inure to the public welfare. The real property taxes deductible are those levied for the general public welfare by the proper taxing authorities at a like rate against all property in the territory over which such authorities have jurisdiction. Assessments under the statutes of California relating to irrigation, and of Iowa relating to drainage, and under certain statutes of Tennessee relating to levees, are limited to property benefited, and if the assessments are so limited, the amounts paid thereunder are not deductible as taxes. For treatment of assessments for local benefits as adjustments to the basis of property, see section 1016(a)(1) and the regulations thereunder.

(b)(1) Insofar as assessments against local benefits are made for the purpose of maintenance or repair or for the purpose of meeting interest charges with respect to such benefits, they are deductible. In such cases, the burden is on the taxpayer to show the allocation of the amounts assessed to the different purposes. If the allocation cannot be made, none of the amount so paid is deductible.

(2) Taxes levied by a special taxing district which was in existence on December 31, 1963, for the purpose of retiring indebtedness existing on such date, are deductible, to the extent levied for such purpose, if (i) the district covers the whole of at least one county, (ii) if at least 1,000 persons are subject to the taxes levied by the district, and (iii) if the district levies its assessments annually at a uniform rate on the same assessed value of real property, including improvements, as is used for purposes of the real property tax generally.

[T.D. 6780, 29 FR 18147, Dec. 22, 1964]

§ 1.164–5 Certain retail sales taxes and gasoline taxes.

For taxable years beginning before January 1, 1964, any amount representing a State or local sales tax paid by a consumer of services or tangible personal property is deductible by such consumer as a tax, provided it is separately stated and not paid in connection with his trade or business. For taxable years beginning after December 31, 1963, only the amount of any separately stated State and local general sales tax (as defined in paragraph (g) of § 1.164–3) and tax on the sale of gasoline, diesel fuel or other motor fuel paid by the consumer (other than in connection with his trade or business) is deductible by the consumer as tax. The fact that, under the law imposing it, the incidence of such State or local tax does not fall on the consumer is immaterial. The requirement that the amount of tax must be separately stated will be deemed complied with where it clearly appears that at the time of sale to the consumer, the tax was added to the sales price and collected or charged as a separate item. It is not necessary, for the purpose of this section, that the consumer be furnished with a sales slip, bill, invoice, or other statement on which the tax is separately stated. For example, where the law imposing the State or local tax for which the taxpayer seeks a deduction contains a prohibition against the seller absorbing the tax, or a provision requiring a posted notice stating that the tax will be added to the quoted price, or a requirement that the tax be separately shown in advertisements or separately stated on all bills and invoices, it is presumed that the amount of the State or local tax was separately stated at the time paid by the consumer; except that such presumption shall have no application to a tax on the sale of gasoline, diesel fuel or other motor fuel imposed upon a wholesaler unless such provisions of law apply with respect to both the sale at wholesale and the sale at retail.

[T.D. 6780, 29 FR 18147, Dec. 22, 1964]

§ 1.164–6 Apportionment of taxes on real property between seller and purchaser.

(a) *Scope.* Except as provided otherwise in section 164(f) and § 1.164–8, when real property is sold, section 164(d)(1) governs the deduction by the seller and the purchaser of current real property taxes. Section 164(d)(1) performs two functions: (1) It provides a method by which a portion of the taxes for the real property tax year in which the property is sold may be deducted by the seller and a portion by the purchaser; and (2) it limits the deduction of the seller and the purchaser to the portion of the taxes corresponding to the part of the real property tax year during which each was the owner of the property. These functions are accomplished by treating a portion of the taxes for the real property tax year in which the property is sold as imposed on the seller and a portion as imposed on the purchaser. To the extent that the taxes are treated as imposed on the seller and the purchaser, each shall be allowed a deduction, under section 164(a), in the taxable year such tax is paid or accrued, or treated as paid or accrued under section 164(d)(2) (A) or (D) and this section. No deduction is allowed for taxes on real property to the extent that they are imposed on another taxpayer, or are treated as imposed on another taxpayer under section 164(d). For the election to accrue real property taxes ratably see section 461(c) and the regulations thereunder.

(b) *Application of rule of apportionment.* (1)(i) For purposes of the deduction provided by section 164(a), if real property is sold during any real property tax year, the portion of the real property tax properly allocable to that part of the real property tax year which ends on the day before the date of the sale shall be treated as a tax imposed on the seller, and the portion of such tax properly allocable to that part of such real property tax year which begins on the date of the sale shall be treated as a tax imposed on the purchased. For definition of ''real property tax year'' see paragraph (c) of this section. This rule shall apply whether or not the seller and the purchaser apportion such tax. The rule of apportionment contained in section 164(d)(1) applies even though the same real property is sold more than once during the real property tax year. (See paragraph (d)(5) of this section for rule requiring inclusion in gross income of excess deductions.)

(ii) Where the real property tax becomes a personal liability or a lien before the beginning of the real property tax year to which it relates and the real property is sold subsequent to the time the tax becomes a personal liability or a lien but prior to the beginning of the related real property tax year—

(*a*) The seller may not deduct any amount for real property taxes for the related real property tax year, and

(*b*) To the extent that he holds the property for such real property tax year, the purchaser may deduct the amount of such taxes for the taxable year they are paid (or amounts representing such taxes are paid to the seller, mortgagee, trustee or other person having an interest in the property as security) or accrued by him according to his method of accounting.

(iii) Similarly, where the real property tax becomes a personal liability or a lien after the end of the real property tax year to which it relates and the real property is sold prior to the time the tax becomes a personal liability or a lien but after the end of the related real property tax year—

(*a*) The purchaser may not deduct any amount for real property taxes for the related real property tax year, and (*b*) To the extent that he holds the property for such real property tax year, the seller may deduct the amount of such taxes for the taxable year they are paid (or amounts representing such taxes are paid to the purchaser, mortgagee, trustee, or other person having an interest in the property as security) or accrued by him according to his method of accounting.

(iv) Where the real property is sold (or purchased) during the related real property tax year the real property taxes for such year are apportioned between the parties to such sale and may be deducted by such parties in accordance with the provisions of paragraph (d) of this section.

(2) Section 164(d) does not apply to delinquent real property taxes for any real property tax year prior to the real property tax year in which the property is sold.

(3) The provisions of this paragraph may be illustrated by the following examples:

Example 1. The real property tax year in County R is April 1 to March 31. A, the owner on April 1, 1954, of real property located in County R sells the real property to B on June 30, 1954. B owns the real property from June 30, 1954, through March 31, 1955. The real property tax for the real property tax year April 1, 1954–March 31, 1955 is $365. For purposes of section 164(a), $90 (90/365×$365, April 1, 1954–June 29, 1954) of the real property tax is treated as imposed on A, the seller, and $275 (275/365× $365, June 30, 1954–March 31, 1955) of such real property tax is treated as imposed on B, the purchaser.

Example 2. In County S the real property tax year is the calendar year. The real property tax becomes a lien on June 1 and is payable on July 1 of the current real property tax year, but there is no personal liability for such tax. On April 30, 1955, C, the owner of real property in County S on January 1, 1955, sells the real property to D. On July 1, 1955, D pays the 1955 real property tax. On August 31, 1955, D sells the same real property to E. C, D, and E use the cash receipts and disbursements method of accounting. Under the provisions of section 164(d)(1), 119/365 (January 1–April 29, 1955) of the real property tax payable on July 1, 1955, for the 1955 real property tax year is treated as imposed on C, and, under the provisions of section 164(d)(2)(A), such portion is treated as having been paid by him on the date of sale. Under the provisions of section 164(d)(1), 123/365 (April 30–August 30, 1955) of the real property tax paid July 1, 1955, for the 1955 real property tax year is treated as imposed on D and may be deducted by him. Under the provisions of section 164(d)(1), 123/365 (August 31–December 31, 1955) of the real property tax due and paid on July 1, 1955, for the 1955 real property tax year is treated as imposed on E and, under the provisions of section 164(d)(2)(A) such portion is treated as having been paid by him on the date of sale.

Example 3. In State X the real property tax year is the calendar year. The real property tax becomes a lien on November 1 of the preceding calendar year. On November 15, 1955, F sells real property in State X to G. G owns the real property through December 31, 1956. Under section 164(d)(1), the real property tax (which became a lien on November 1, 1954) for the 1955 real property tax year is apportioned between F and G. No part of the real property tax for the 1956 real property tax year may be deducted by F. The entire real property tax for the 1956 real property tax year may be deducted by G when paid or accrued, depending upon the method of accounting used by him. See subparagraph (6) of paragraph (d) and section 461(c) and the regulations thereunder.

(c) *Real property tax year.* As used in section 164(d), the term ''real property tax year'' refers to the period which, under the law imposing the tax, is regarded as the period to which the tax imposed relates. Where the State and one or more local governmental units each imposes a tax on real property, the real property tax year for each tax must be determined for purposes of applying the rule of apportionment of section 164(d)(1) to each tax. The time when the tax rate is determined, the time when the assessment is made, the time when the tax becomes a lien, or the time when the tax becomes due or delinquent does not necessarily determine the real property tax year. The real property tax year may or may not correspond to the fiscal year of the governmental unit imposing the tax. In each case the State or local law determines what constitutes the real property tax year. Although the seller and the purchaser may or may not make an allocation of real property taxes, the meaning of ''real property tax year'' in section 164(d) and the application of section 164(d) do not depend upon what real property taxes were allocated nor the method of allocation used by the parties.

(d) *Special rules*—(1) *Seller using cash receipts and disbursements method of accounting.* Under the provisions of section 164(d), if the seller by reason of his method of accounting may not deduct any amount for taxes unless paid, and—

(i) The purchaser (under the law imposing the real property tax) is liable for the real property tax for the real property tax year, or

(ii) The seller (under the law imposing the real property tax) is liable for the real property tax for the real property tax year and the tax is not payable until after the date of sale,

then the portion of the tax treated under section 164(d)(1) as imposed upon the seller (whether or not actually paid by him in the taxable year in which the sale occurs) shall be considered as having been paid by him in such taxable year. Such portion may be deducted by him for the taxable year in which the sale occurs, or, if at a later time, for the taxable year (which would be proper under the taxpayer's method of accounting) in which the tax is actually paid, or an amount representing such tax is paid to the purchaser, mortgagee, trustee, or other person having an interest in the property as security.

(2) *Purchasers using the cash receipts and disbursements method of accounting.* Under the provisions of section 164(d), if the purchaser by reason of his method of accounting may not deduct any amount for taxes unless paid and the seller (under the law imposing the real property tax) is liable for the real property tax for the real property tax year, the portion of the tax treated under section 164(d)(1) as imposed upon the purchaser (whether or not actually paid by him in the taxable year in which the sale occurs) shall be considered as having been paid by him in such taxable year. Such portion may be deducted by him for the taxable year in which the sale occurs, or, if at a later time, for the taxable year (which would be proper under the taxpayer's method of accounting) in which the tax is actually paid, or an amount representing such tax is paid to the seller, mortgagee, trustee, or other person having an interest in the property as security.

(3) *Persons considered liable for tax.* Where the tax is not a liability of any person, the person who holds the property at the time the tax becomes a lien on the property shall be considered liable for the tax. As to a particular sale, in determining:

(i) Whether the other party to the sale is liable for the tax or,

(ii) The person who holds the property at the time the tax becomes a lien on the property (where the tax is not a liability of any person),

prior or subsequent sales of the property during the real property tax year shall be disregarded.

(4) *Examples.* The provisions of subparagraphs (1), (2), and (3) of this paragraph may be illustrated as follows:

Example 1. In County X the real property tax year is the calendar year. The real property tax is a personal liability of the owner of the real property on June 30 of the current real property tax year, but is not payable until February 28 of the following real property tax year. A, the owner of real property in County X on January 1, 1955, uses the cash receipts and disbursements method of accounting. On May 30, 1955, A sells the real property to B, who also uses the cash receipts and disbursements method of accounting. B retains ownership of the real property for the balance of the 1955 calendar year. Under the provisions of section 164(d)(1), 149/365 (January 1–May 29, 1955) of the real property tax payable on February 28, 1956, for the 1955 real property tax year is treated as imposed on A, the seller, and under the provisions of section 164(d)(2)(A) such portion is treated as having been paid by him on the date of sale and may be deducted by him for his taxable year in which the sale occurs (whether or not such portion is actually paid by him in that year) or for his taxable year in which the tax is actually paid or an amount representing such tax is paid. Under the provisions of section 164(d)(1), 216/365 (May 30–December 31, 1955) of the real property tax payable on February 28, 1956, for the 1955 real property tax year is treated as imposed on B, the purchaser, and may be deducted by him for his taxable year in which the tax is actually paid, or an amount representing such tax is paid.

Example 2. In County Y, the real property tax year is the calendar year. The real property tax becomes a lien on January 1, 1955, and is payable on April 30, 1955. There is no personal liability for the real property tax imposed by County Y. On April 30, 1955, C, the owner of real property in County Y on January 1, 1955, pays the real property tax for the 1955 real property tax year. On May 1, 1955, C sells the real property to D. On September 1, 1955, D sells the real property to E. C, D, and E use the cash receipts and disbursements method of accounting. Under the provisions of section 164(d)(1), 120/365 (January 1–April 30, 1955) of the real property tax is treated as imposed upon C and may be deducted by him for his taxable year in which the tax is actually paid. Under section 164(d)(1), 123/365 (May 1–August 31, 1955) of the real property tax is treated as imposed upon D and, under the provisions of section 164(d)(2)(A), is treated as having been paid by him on May 1, 1955, and may be deducted by D for his taxable year in which the sale from C to him occurs (whether or not such portion is actually paid by him in that year), or for his taxable year in which an amount representing such tax is paid. Since, according to paragraph (d)(3) of this section, the prior sale by C to D is disregarded, under the provisions of section 164(d)(1), 122/365 (September 1–December 31, 1955) of the real property tax is treated as imposed on E and, under the provisions of section 164(d)(2)(A), is treated as having been paid by him on September 1, 1955, and may be deducted by E for his taxable year in which the sale from D to him occurs (whether or not such portion is actually paid by him in that year), or for his taxable year in which an amount representing such tax is paid.

Example 3. In County X the real property tax year is the calendar year and the real property taxes are assessed and become a lien on June 30 of the current real property tax year, but are not payable until September 1 of that year. There is no personal liability for the real property tax imposed by County X. A, the owner on January 1, 1955, of real property in County X, uses the cash receipts and disbursements method of accounting. On July 15, 1955, A sells the real property to B. Under the provisions of section 164(d)(1), 195/365 (January 1–July 14, 1955) of the real property tax payable on September 1, 1955, for the 1955 real property tax year is treated as imposed on A, and may be deducted by him for his taxable year in which the sale occurs (whether or not such portion is actually paid by him in that year) or for his taxable year in which the tax is actually paid or an amount representing such tax is paid. Under the provisions of section 164(d)(1), 170/365 (July 15–December 31, 1955) of the real property tax is treated as imposed on B and may be deducted by him for his taxable year in which the sale occurs (whether or not such portion is actually paid by him in that year), or for his taxable year in which the tax is actually paid or an amount representing such tax is paid.

(5) *Treatment of excess deduction.* If, for a taxable year prior to the taxable year of sale of real property, a taxpayer has deducted an amount for real property tax in excess of the portion of such real property tax treated as imposed on him under the provisions of section 164(d), the excess of the amount deducted over the portion treated as imposed on him shall be included in his gross income for the taxable year of the sale, subject to the provisions of section 111, relating to the recovery of bad debts, prior taxes, and delinquency amounts. The provisions of this subparagraph may be illustrated as follows:

Example 1. In Borough Y the real property tax is due and payable on November 30 for the succeeding calendar year, which is also the real property tax year. On November 30, 1954, taxpayer A, who reports his income on a calendar year under the cash receipts and disbursements method of accounting, pays the real property tax on real property owned by him in Borough Y for the 1955 real property tax year. On June 30, 1955, A sells the real property. Under the provisions of section 164(d), only 180/365 (January 1–June 29, 1955) of the real property tax for the 1955 real property tax year is treated as imposed on A, and the excess of the amount of real property tax for 1955 deducted by A, on his 1954 income tax return, over the 180/365 portion of such tax treated as imposed on him under section 164(d), must be included in gross income in A's 1955 income tax return, subject to the provisions of section 111.

Example 2. In County Z the real property tax year is the calendar year. The real property tax becomes a personal liability of the owner of real property on January 1 of the current real property tax year, and is payable on July 1 of the current real property tax year. On May 1, 1955, A, the owner of real property in County Z on January 1, 1955, sells the real property to B. On November 1, 1955, B sells the same real property to C. B uses the cash receipts and disbursements method of accounting and reports his income on the basis of a fiscal year ending July 31. B, on July 1, 1955, pays the entire real property tax for the real property tax year ending December 31, 1955. Under the provisions of section 164(d), only 184/365 (May 1–October 31, 1955) of the real property tax for the 1955 real property tax year is treated as imposed on B, and the excess of the amount of real property tax for 1955 deducted by B on his income tax return for the fiscal year ending July 31, 1955, over the 184/365 portion of such tax treated as imposed on him under section 164(d), must be included in gross income in B's income tax return for his fiscal year ending July 31, 1956, subject to the provisions of section 111.

(6) *Persons using an accrual method of accounting.* Where real property is sold and the seller or the purchaser computes his taxable income (for the taxable year during which the sale occurs) on an accrual method of accounting then, if the seller or the purchaser has

not made the election provided in section 461(c) (relating to the accrual of real property taxes), the portion of any real property tax which is treated as imposed on him and which may not be deducted by him for any taxable year by reason of his method of accounting shall be treated as having accrued on the date of sale. The provisions of this subparagraph may be illustrated as follows:
