§ 46.241

Product	Computation
Cigarette tubes 6½" or less in length.	Divide the number of cigarette tubes by 50, add 1 if there is a remainder, and multiply that number by the cigarette tube tax rate.
Cigarette tubes more than 6½" in length.	Mathematically adjust the number of cigarette tubes using the instructions below.* Divide the adjusted number of cigarette tubes by 50, add 1 if there is a remainder, and multiply that number by the cigarette tube tax rate.

*Large cigarettes, cigarette papers, and cigarette tubes more than 6½ inch in length are counted as multiple units. Each 2¾ inch or fraction of the length is counted as a separate taxable unit. For each different length of product in this category, divide the length by 2¾ inch and add 1 to the result if there is a remainder. Multiply the number of cigarettes, cigarette papers, or tubes of that length by the resulting number.

The dealer is allowed a credit of up to \$500 against the total floor stocks tax. However, controlled groups are eligible for only one credit for the entire group. The credit may be divided equally among the members or apportioned in any other manner agreeable to the members.
