

§ 541.704

accounts to determine whether the credit limit would be exceeded by the shipment of a new order, removing credit reports from the files for analysis, and writing letters giving credit data and experience to other employers or credit agencies.

(8) A traffic manager in charge of planning a company's transportation, including the most economical and quickest routes for shipping merchandise to and from the plant, contracting for common-carrier and other transportation facilities, negotiating with carriers for adjustments for damages to merchandise, and making the necessary rearrangements resulting from delays, damages or irregularities in transit, is performing exempt work. If the employee also spends part of the day taking telephone orders for local deliveries, such order-taking is a routine function and is not directly and closely related to the exempt work.

(9) An example of work directly and closely related to exempt professional duties is a chemist performing menial tasks such as cleaning a test tube in the middle of an original experiment, even though such menial tasks can be assigned to laboratory assistants.

(10) A teacher performs work directly and closely related to exempt duties when, while taking students on a field trip, the teacher drives a school van or monitors the students' behavior in a restaurant.

§ 541.704 Use of manuals.

The use of manuals, guidelines or other established procedures containing or relating to highly technical, scientific, legal, financial or other similarly complex matters that can be understood or interpreted only by those with advanced or specialized knowledge or skills does not preclude exemption under section 13(a)(1) of the Act or the regulations in this part. Such manuals and procedures provide guidance in addressing difficult or novel circumstances and thus use of such reference material would not affect an employee's exempt status. The section 13(a)(1) exemptions are not available, however, for employees who simply apply well-established techniques or procedures described in manuals or other sources within close-

29 CFR Ch. V (7-1-13 Edition)

ly prescribed limits to determine the correct response to an inquiry or set of circumstances.

§ 541.705 Trainees.

The executive, administrative, professional, outside sales and computer employee exemptions do not apply to employees training for employment in an executive, administrative, professional, outside sales or computer employee capacity who are not actually performing the duties of an executive, administrative, professional, outside sales or computer employee.

§ 541.706 Emergencies.

(a) An exempt employee will not lose the exemption by performing work of a normally nonexempt nature because of the existence of an emergency. Thus, when emergencies arise that threaten the safety of employees, a cessation of operations or serious damage to the employer's property, any work performed in an effort to prevent such results is considered exempt work.

(b) An "emergency" does not include occurrences that are not beyond control or for which the employer can reasonably provide in the normal course of business. Emergencies generally occur only rarely, and are events that the employer cannot reasonably anticipate.

(c) The following examples illustrate the distinction between emergency work considered exempt work and routine work that is not exempt work:

(1) A mine superintendent who pitches in after an explosion and digs out workers who are trapped in the mine is still a bona fide executive.

(2) Assisting nonexempt employees with their work during periods of heavy workload or to handle rush orders is not exempt work.

(3) Replacing a nonexempt employee during the first day or partial day of an illness may be considered exempt emergency work depending on factors such as the size of the establishment and of the executive's department, the nature of the industry, the consequences that would flow from the failure to replace the ailing employee immediately, and the feasibility of filling the employee's place promptly.
