U.S. GOVERNMENT OFFICIAL EDITION NOTICE

Legal Status and Use of Seals and Logos

The seal of the National Archives and Records Administration (NARA) authenticates the Code of Federal Regulations (CFR) as the official codification of Federal regulations established under the Federal Register Act. Under the provisions of 44 U.S.C. 1507, the contents of the CFR, a special edition of the Federal Register, shall be judicially noticed. The CFR is prima facie evidence of the original documents published in the Federal Register (44 U.S.C. 1510).

It is prohibited to use NARA’s official seal and the stylized Code of Federal Regulations logo on any republication of this material without the express, written permission of the Archivist of the United States or the Archivist’s designee. Any person using NARA’s official seals and logos in a manner inconsistent with the provisions of 36 CFR part 1200 is subject to the penalties specified in 18 U.S.C. 506, 701, and 1017.

Use of ISBN Prefix

This is the Official U.S. Government edition of this publication and is herein identified to certify its authenticity. Use of the 0–16 ISBN prefix is for U.S. Government Printing Office Official Editions only. The Superintendent of Documents of the U.S. Government Printing Office requests that any reprint edition clearly be labeled as a copy of the authentic work with a new ISBN.

Table of CFR Titles and Chapters ............................................... 379

Alphabetical List of Agencies Appearing in the CFR .................. 399

List of CFR Sections Affected .................................................... 409
Cite this Code: CFR

To cite the regulations in this volume use title, part and section number. Thus, 32 CFR 631.1 refers to title 32, part 631, section 1.
Explanation

The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the Federal Government. The Code is divided into 50 titles which represent broad areas subject to Federal regulation. Each title is divided into chapters which usually bear the name of the issuing agency. Each chapter is further subdivided into parts covering specific regulatory areas.

Each volume of the Code is revised at least once each calendar year and issued on a quarterly basis approximately as follows:

- Title 1 through Title 16: as of January 1
- Title 17 through Title 27: as of April 1
- Title 28 through Title 41: as of July 1
- Title 42 through Title 50: as of October 1

The appropriate revision date is printed on the cover of each volume.

LEGAL STATUS

The contents of the Federal Register are required to be judicially noticed (44 U.S.C. 1507). The Code of Federal Regulations is prima facie evidence of the text of the original documents (44 U.S.C. 1510).

HOW TO USE THE CODE OF FEDERAL REGULATIONS

The Code of Federal Regulations is kept up to date by the individual issues of the Federal Register. These two publications must be used together to determine the latest version of any given rule.

To determine whether a Code volume has been amended since its revision date (in this case, July 1, 2013), consult the “List of CFR Sections Affected (LSA),” which is issued monthly, and the “Cumulative List of Parts Affected,” which appears in the Reader Aids section of the daily Federal Register. These two lists will identify the Federal Register page number of the latest amendment of any given rule.

EFFECTIVE AND EXPIRATION DATES

Each volume of the Code contains amendments published in the Federal Register since the last revision of that volume of the Code. Source citations for the regulations are referred to by volume number and page number of the Federal Register and date of publication. Publication dates and effective dates are usually not the same and care must be exercised by the user in determining the actual effective date. In instances where the effective date is beyond the cut-off date for the Code a note has been inserted to reflect the future effective date. In those instances where a regulation published in the Federal Register states a date certain for expiration, an appropriate note will be inserted following the text.

OMB CONTROL NUMBERS

The Paperwork Reduction Act of 1980 (Pub. L. 96-511) requires Federal agencies to display an OMB control number with their information collection request.
Many agencies have begun publishing numerous OMB control numbers as amendments to existing regulations in the CFR. These OMB numbers are placed as close as possible to the applicable recordkeeping or reporting requirements.

PAST PROVISIONS OF THE CODE

Provisions of the Code that are no longer in force and effect as of the revision date stated on the cover of each volume are not carried. Code users may find the text of provisions in effect on any given date in the past by using the appropriate List of CFR Sections Affected (LSA). For the convenience of the reader, a “List of CFR Sections Affected” is published at the end of each CFR volume. For changes to the Code prior to the LSA listings at the end of the volume, consult previous annual editions of the LSA. For changes to the Code prior to 2001, consult the List of CFR Sections Affected compilations, published for 1949-1963, 1964-1972, 1973-1985, and 1986-2000.

"[RESERVED]" TERMINOLOGY

The term “[Reserved]” is used as a place holder within the Code of Federal Regulations. An agency may add regulatory information at a “[Reserved]” location at any time. Occasionally “[Reserved]” is used editorially to indicate that a portion of the CFR was left vacant and not accidentally dropped due to a printing or computer error.

INCORPORATION BY REFERENCE

What is incorporation by reference? Incorporation by reference was established by statute and allows Federal agencies to meet the requirement to publish regulations in the Federal Register by referring to materials already published elsewhere. For an incorporation to be valid, the Director of the Federal Register must approve it. The legal effect of incorporation by reference is that the material is treated as if it were published in full in the Federal Register (5 U.S.C. 552(a)). This material, like any other properly issued regulation, has the force of law.

What is a proper incorporation by reference? The Director of the Federal Register will approve an incorporation by reference only when the requirements of 1 CFR part 51 are met. Some of the elements on which approval is based are:

(a) The incorporation will substantially reduce the volume of material published in the Federal Register.

(b) The matter incorporated is in fact available to the extent necessary to afford fairness and uniformity in the administrative process.

(c) The incorporating document is drafted and submitted for publication in accordance with 1 CFR part 51.

What if the material incorporated by reference cannot be found? If you have any problem locating or obtaining a copy of material listed as an approved incorporation by reference, please contact the agency that issued the regulation containing that incorporation. If, after contacting the agency, you find the material is not available, please notify the Director of the Federal Register, National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001, or call 202-741-6010.

CFR INDEXES AND TABULAR GUIDES

A subject index to the Code of Federal Regulations is contained in a separate volume, revised annually as of January 1, entitled CFR INDEX AND FINDING AIDS. This volume contains the Parallel Table of Authorities and Rules. A list of CFR titles, chapters, subchapters, and parts and an alphabetical list of agencies publishing in the CFR are also included in this volume.
An index to the text of "Title 3—The President" is carried within that volume.

The Federal Register Index is issued monthly in cumulative form. This index is based on a consolidation of the "Contents" entries in the daily Federal Register.

A List of CFR Sections Affected (LSA) is published monthly, keyed to the revision dates of the 50 CFR titles.

REPUBLICATION OF MATERIAL

There are no restrictions on the republication of material appearing in the Code of Federal Regulations.

INQUIRIES

For a legal interpretation or explanation of any regulation in this volume, contact the issuing agency. The issuing agency's name appears at the top of odd-numbered pages.

For inquiries concerning CFR reference assistance, call 202-741-6000 or write to the Director, Office of the Federal Register, National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6901 or e-mail fedreg.info@nara.gov.

SALES

The Government Printing Office (GPO) processes all sales and distribution of the CFR. For payment by credit card, call toll-free, 866-512-1800, or DC area, 202-512-1800, M-F 8 a.m. to 4 p.m. e.s.t. or fax your order to 202-512-2104, 24 hours a day. For payment by check, write to: US Government Printing Office – New Orders, P.O. Box 979060, St. Louis, MO 63197-9000.

ELECTRONIC SERVICES

The full text of the Code of Federal Regulations, the LSA (List of CFR Sections Affected), The United States Government Manual, the Federal Register, Public Laws, Public Papers of the Presidents of the United States, Compilation of Presidential Documents and the Privacy Act Compilation are available in electronic format via www.ofr.gov. For more information, contact the GPO Customer Contact Center, U.S. Government Printing Office. Phone 202-512-1800, or 866-512-1800 (toll-free). E-mail, ContactCenter@gpo.gov.

CHARLES A. BARTH,
Director,
Office of the Federal Register.
July 1, 2013.
Title 32—NATIONAL DEFENSE is composed of six volumes. The parts in these volumes are arranged in the following order: Parts 1–190, parts 191–399, parts 400–629, parts 630–699, parts 700–799, and part 800 to end. The contents of these volumes represent all current regulations codified under this title of the CFR as of July 1, 2013.

The current regulations issued by the Department of Defense appear in the volumes containing parts 1–189 and parts 190–399; those issued by the Department of the Army appear in the volumes containing parts 400–629 and parts 630–699; those issued by the Department of the Navy appear in the volume containing parts 700–799, and those issued by the Department of the Air Force, Defense Logistics Agency, Selective Service System, National Counterintelligence Center, Central Intelligence Agency, Information Security Oversight Office, National Security Council, Office of Science and Technology Policy, Office for Micronesian Status Negotiations, and Office of the Vice President of the United States appear in the volume containing part 800 to end.

For this volume, Cheryl E. Sirofchuck was Chief Editor. The Code of Federal Regulations publication program is under the direction of Michael L. White, assisted by Ann Worley.

PART 631—ARMED FORCES DISCIPLINARY CONTROL BOARDS AND OFF-INSTALLATION LIAISON AND OPERATIONS

Subpart A—General

Sec.
631.1 Purpose.
631.2 Applicability.
631.3 Supervision.
631.4 Exceptions.

Subpart B—Armed Forces Disciplinary Control Boards

631.5 General.
631.6 Responsibilities.
631.7 Composition of boards.
631.8 Participation by civil agencies.
631.9 Duties and functions of boards.
631.10 Administration.
631.11 Off-limits establishments and areas.

Subpart C—Off-Installation Operations (Military Patrols and Investigative Activities) and Policy

631.12 Objectives.
631.13 Applicability.
631.14 Army policy.
631.15 Air Force policy.
631.16 Navy policy.
631.17 Marine Corps policy.
631.18 Operations.

APPENDIX A TO PART 631—ARMED FORCES DISCIPLINARY CONTROL BOARD PROCEDURES GUIDE

AUTHORITY: 10 U.S.C. 3012(b)(1)(g).

SOURCE: 70 FR 60729, Oct. 19, 2005, unless otherwise noted.

Subpart A—General

§ 631.1 Purpose.

This part prescribes uniform policies and procedures for the establishment, and operation of the following:
(a) Armed Forces Disciplinary Control Boards (AFDCB).
(b) Off-installation liaison and operations.

§ 631.2 Applicability.

This part applies to the following:
(a) Active U.S. Armed Forces personnel of the Army, Air Force, Navy, and Marine Corps, and the Coast Guard wherever they are stationed.
(b) U.S. Armed Forces Reserve personnel only when they are performing Federal duties or engaging in activities directly related to performing a Federal duty or function.
(c) National Guard personnel only when called or ordered to active duty in a Federal status within the meaning of Title 10, United States Code.

§ 631.3 Supervision.

The following will develop and have staff supervision over AFDCB and off-installation enforcement policies.
(a) The Office of the Provost Marshal General (OPMG), Headquarters, Department of the Army (HQDA). This official serves as the proponent for this part, and has primary responsibility for its content.
(b) U.S. Air Force Director of Security Forces and Force Protection, Department of the Air Force.
(c) Director, Naval Criminal Investigative Service.
(d) Commandant of the Marine Corps.
(e) Commandant of the Coast Guard.
(f) Installation commanders are authorized to convene joint service boards within their Army Regulation (AR) 5–9 area of responsibility.

§ 631.4 Exceptions.

Requests for exceptions to policies contained in this part will be forwarded to HQDA (DAPM–MPD–LE), Washington, DC 20310–2800.

Subpart B—Armed Forces Disciplinary Control Boards

§ 631.5 General.

AFDCBs may be established by installation, base, or station commanders to advise and make recommendations to commanders on matters concerning eliminating conditions, which adversely affect the health, safety, welfare, morale, and discipline of the Armed Forces.
§ 631.6 Responsibilities.

(a) Regional Directors of the Army Installation Management Agency, Air Force commanders, Navy regional commanders, Marine Corps commanders, and Coast Guard commanders will—

(1) Determine level and degree of participation by subordinate commanders in joint Service boards, when appropriate.

(2) Resolve differences among subordinate commanders regarding board areas of responsibility, and the designation of sponsoring commanders.

(3) Evaluate board recommendations, and actions from subordinate sponsoring commanders.

(4) Forward recommendations to HQDA, OPMG (DAPM-MPD-LE), WASH DC 20310–2800, regarding circumstances that require Service headquarters action or programs having widespread applicability.

(5) Ensure that subordinate commanders assess the availability of drug abuse paraphernalia in the vicinity of Department of Defense (DOD) installations through their AFDCBs, according to DOD Directive 1010.4. Coast Guard commanders should refer to COMDTINST M1000.6 series, chapter 20, for guidance on Coast Guard substance abuse policies.

(b) Military installation commanders for off-installation enforcement actions will—

(1) Conduct off-installation operations as authorized by law and Service policy.

(2) Coordinate off-installation operations with other Service commanders, as applicable, for uniformity of effort, and economy of resources.

(3) Assist Federal, State, and local law enforcement agencies within the limits imposed by law and DOD policy.

(c) Sponsoring commanders will provide administrative support for AFDCB programs to include the following—

(1) Promulgating implementing directives, and convening the board.

(2) Providing a recorder for the board.

(3) Providing copies of the minutes of board meetings to other Service commanders who are represented on the board, and to other AFDCBs as appropriate.

(4) Approving or disapproving the minutes, and recommendations of the board, and making appropriate distribution, as required.

(5) Publishing lists of “off-limits” establishments and areas.

(6) Ensuring that responsible individuals are notified of any unfavorable actions being contemplated or taken regarding their establishments per Annex A of appendix A of this part.

(7) Distributing pertinent information to the following—

(i) All units within their jurisdictional area.

(ii) Units stationed in other areas whose personnel frequent their area of jurisdiction.

(8) Ensuring that procedures are established to inform all Service personnel, including those who may be visiting or are in a travel status, of off-limits restrictions in effect within the respective AFDCB’s jurisdictional area.

§ 631.7 Composition of boards.

(a) Boards should be structured according to the needs of the command, with consideration given to including representatives from the following functional areas—

(1) Law enforcement.

(2) Legal counsel.

(3) Health.

(4) Environmental protection.

(5) Public affairs.

(6) Equal opportunity.

(7) Fire and safety.

(8) Chaplains’ service.

(9) Alcohol and drug abuse.

(10) Personnel and community activities.

(11) Consumer affairs.

(b) Sponsoring commanders will designate a board president, and determine by position which board members will be voting members. Such designations will be included in a written agreement establishing the board.
§ 631.8 Participation by civil agencies.
(a) Civil agencies or individuals may be invited to board meetings as observers, witnesses or to provide assistance where they possess knowledge or information pertaining to problem areas within the board’s jurisdiction.
(b) Announcements and summaries of board results may be provided to appropriate civil agencies.

§ 631.9 Duties and functions of boards.
The AFDCBs will—
(a) Meet as prescribed by appendix A of this part.
(b) Receive reports, and take appropriate action on conditions in their area of responsibility relating to any of the following—
(1) Disorders and lack of discipline.
(2) Prostitution.
(3) Sexually transmitted disease.
(4) Liquor violations.
(5) Racial and other discriminatory practices.
(6) Alcohol and drug abuse.
(7) Drug abuse paraphernalia.
(8) Criminal or illegal activities involving cults or hate groups.
(9) Illicit gambling.
(10) Areas susceptible to terrorist activity.
(11) Unfair commercial or consumer practices.
(12) Other undesirable conditions deemed unsafe which may adversely affect the health and well being of military personnel or their families.
(c) Report to all major commanders in the board’s area of responsibility—
(1) Conditions cited in paragraph (b) of this section.
(2) Recommended action as approved by the board’s sponsoring commander.
(d) Coordinate with appropriate civil authorities on problems or adverse conditions existing in the board’s area of jurisdiction.
(e) Make recommendations to commanders in the board’s area of jurisdiction concerning off-installation procedures to prevent or control undesirable conditions.

§ 631.10 Administration.
(a) Commanders are authorized to acquire, report, process, and store information concerning persons and organizations, whether or not affiliated with DOD, according to the applicable Service parts of the sponsoring commander, which—
(1) Adversely affect the health, safety, morale, welfare, or discipline of service members regardless of status.
(2) Describe crime conducive conditions where there is a direct Service interest.
(b) Boards will function under the supervision of a president (§ 631.7(b)).
(c) Certain expenses incurred by Service members in the course of an official board investigation or inspection may be reimbursable per appropriate Service finance parts or instructions. Requests for reimbursement will be submitted through the sponsoring commander.
(d) Records of board proceedings will be maintained as prescribed by records management policies, and procedures of the sponsoring commander’s Service.

§ 631.11 Off-limits establishments and areas.
(a) The establishment of off-limits areas is a function of Command. It may be used by commanders to help maintain good order and discipline, health, morale, safety, and welfare of service members. Off-limits action is also intended to prevent service members from being exposed to or victimized by crime-conducive conditions. Where sufficient cause exists, commanders retain substantial discretion to declare establishments or areas temporarily off-limits to personnel of their respective commands in emergency situations. Temporary off-limits restrictions issued by commanders in an emergency situation will be acted upon by the AFDCB as a first priority. As a matter of policy, a change in ownership, management, or name of any off-limits establishment does not, in and of itself, revoke the off-limits restriction.
(b) Service members are prohibited from entering establishments or areas declared off-limits according to this part. Violations may subject the member to disciplinary action per applicable Service parts, and the Uniform Code of Military Justice (UCMJ). Family members of service members and others associate with the Service or installation should be made aware of
§ 631.12 Off-limits restrictions. As a general policy, these establishments will not be visited by Service law enforcement personnel unless specifically determined by the installation commander that visits or surveillance are warranted.

(c) Prior to initiating AFDCB action, installation commanders will attempt to correct adverse conditions or situations through the assistance of civic leaders or officials.

(d) Prior to recommending an off-limits restriction, the AFDCB will send a written notice (certified mail-return receipt requested) to the individual or firm responsible for the alleged condition or situation. The AFDCB will specify in the notice a reasonable time for the condition or situation to be corrected, along with the opportunity to present any relevant information to the board. If subsequent investigation reveals that the responsible person has failed to take corrective action, the board will recommend the imposition of the off-limits restriction.

(e) A specified time limit will not be established when an off-limits restriction is invoked. The adequacy of the corrective action taken by the responsible individual will be the determining factor in removing an off-limits restriction.

(f) A person whose establishment or area has been declared off-limits may at any time petition the president of the board to remove the off-limits restriction. The petition will be in writing and will include a detailed report of action taken to eliminate the condition or situation that caused imposition of the restriction. The president of the AFDCB may direct an investigation to determine the status of corrective actions noted in the petition. The board will either recommend removal or continuation of the off-limits restriction to the local sponsoring commander based on the results of the investigation.

(g) Off-limits procedures to be followed by the boards are in appendix A of this part. In the United States, off-limits signs will not be posted on civilian establishments by U.S. military authorities.

(h) In areas Outside of the Continental United States (OCONUS), off-limits and other AFDCB procedures must be consistent with existing Status of Forces Agreements (SOFAs).

Subpart C—Off-installation Operations (Military Patrols and Investigative Activities) and Policy

§ 631.12 Objectives.

The primary objectives of off-installation operations are to—

(a) Render assistance and provide information to Service members.

(b) Preserve the safety, and security of service members.

(c) Preserve good order and discipline among Service members and reduce off-installation incidents and offenses.

(d) Maintain effective cooperation with civil authorities, and community leaders.

§ 631.13 Applicability.

This subpart is not applicable to the U.S. Coast Guard.

§ 631.14 Army policy.

(a) Soldiers, military and/or Department of the Army Civilian (DAC) police performing off-installation operations must be thoroughly familiar with applicable agreements, constraints of the Posse Comitatus Act (18 U.S.C. 1385) in the Continental United States (CONUS) and United States-host nation agreements in areas OCONUS.

(b) Military and/or DAC police assigned to off-installation operations have the sole purpose of enforcing parts, and orders pertaining to persons subject to their jurisdiction.

(c) Military and/or DAC police accompanying civilian law enforcement officers remain directly responsible to, and under the command of, U.S. Army superiors. Military and DAC police may come to the aid of civilian law enforcement officers to prevent the commission of a felony or injury to a civilian law enforcement officer.

(d) Regional Directors of the Army Installation Management Agency (IMA), Commander, Army Materiel Command (AMC), and Commander, Army Test and Evaluation Command (ATEC) may authorize subordinate
§ 631.15 Air Force policy.

(a) Airmen, military and/or Department of the Air Force Civilian (DAFC) police performing off-installation operations must be thoroughly familiar with applicable agreements, constraints of the Posse Comitatus Act (18 U.S.C. 1385) in CONUS and United States-host nation agreements in OCONUS areas.

(b) Military and/or DAFC police assigned to off-installation operations have the sole purpose of enforcing parts, and orders pertaining to persons subject to their jurisdiction.

(c) Military and/or DAFC police accompanying civilian law enforcement officers remain directly responsible to, and under the command of, U.S. Air Force superiors. Military and DAFC police may come to the aid of civilian law enforcement officers to prevent the commission of a felony or injury to a civilian law enforcement officer.

(d) Air Force commanders may authorize subordinate commanders to establish off-installation operations within the limits imposed by higher authority, the Posse Comitatus Act (18 U.S.C. 1385) in CONUS, and United States-host nation agreements in OCONUS areas—

(1) To assist Federal, State, and local law enforcement agencies.

(2) In conjunction with military activities.

(3) To safeguard the health and welfare of Airmen.

(4) When the type of offenses or the number of Airmen frequenting an area is large enough to warrant such operations.

(e) The constraints on the authority of Airmen and/or DAFC police to act off-installation, (Posse Comitatus Act (18 U.S.C. 1385) in CONUS and United States-host nation agreements in OCONUS areas) and the specific scope of off-installation operations will be clearly delineated in all authorizations for off-installation operations. Off-installation operations will be coordinated with the local installation commander through the Staff Judge Advocate (SJA), or higher authority, and appropriate civilian law enforcement agencies.

§ 631.16 Navy policy.

The following policies apply to off-installation operations—

(a) Article 1630–020, MILPERSMAN revised August 2002, and Navy Parts, Article 0922 concerning the establishment and operation of a shore patrol.

(b) In accordance with SECNAV 1620.7A, Navy Absentee Collection Units collect, and process apprehended absentees and deserters, escort apprehended absentees, and deserters to their parent commands or to designated processing activities, escort prisoners between confinement facilities, and provide liaison with civilian law enforcement authorities.

(c) Navy personnel will be thoroughly familiar with all applicable agreements and Implementing standard operating procedures, to include the constraints of the Posse Comitatus Act (18 U.S.C. 1385), in CONUS and United States-host nation agreements in OCONUS areas, as applicable.

(d) Within CONUS, (1) Installation Commanders may request authority
§ 631.17 Marine Corps policy.

(a) Within CONUS. (1) Commanders may request authority from Headquarters, Marine Corps (Code POS), to establish off-installation operations—

(i) To assist Federal, State, and local law enforcement agencies within the limits imposed by higher authority and the Posse Comitatus Act (18 U.S.C. 1385).

(ii) In conjunction with military operations.

(iii) To safeguard the health, and welfare of Marine personnel.

(iv) When the type of offenses or the number of service members frequenting an area is large enough to warrant such operation.

(2) Constraints on the authority of military personnel to act off-installation (Posse Comitatus Act (18 U.S.C. 1385)) and the specific scope of the authority will be clearly delineated in all authorizations for off-installation operations.

(b) Within OCONUS, off-installation operations will be kept at the minimum needed for mission accomplishment. Installation commanders may authorize off-installation operations as required by local conditions and customs, as long as they are conducted in accordance with applicable treaties and SOFAs.

(c) Off-installation operations will be coordinated with the local installation commander through the SJA, or higher authority, and local law enforcement authorities.

(d) Marines selected for off-installation operations must—

(1) Have mature judgment and law enforcement experience.

(2) Be thoroughly familiar with all applicable agreements and implementing standard operating procedures, to include the constraints of the Posse Comitatus Act (18 U.S.C. 1385), in CONUS and United States Host Nation agreements in OCONUS area, as applicable.

(h) Security personnel accompanying civilian police during off-installation operations do so only to enforce parts and orders pertaining to persons subject to their jurisdiction. Security personnel assigned off-installation operations remain directly responsible to, and under the command of their Navy superiors when accompanying civilian police. Security personnel performing such duties may come to the aid of civilian police in order to prevent the commission of a felony or injury to a civilian police officer.

(i) Civilian police and court liaison may be established with concurrence of the Naval Criminal Investigative Service and is encouraged particularly when the intent is to reduce mishaps.
agreements in OCONUS areas, as applicable.

(e) Marines accompanying civilian police during off-installation operations do so only to enforce parts and orders pertaining to persons subject to their jurisdiction. Marines assigned off-installation operations remain directly responsible to, and under the command of their Marine superiors when accompanying civilian police. Marines performing such duties may come to the aid of civilian police in order to prevent the commission of a felony or injury to a civilian police officer.

(f) Procedures for absentee and deserter collection units to accept an active-duty absentee or deserter from civilian authorities may be established.

(g) Civilian police and civil court liaison may be established.

§ 631.18 Operations.

When an incident of substantial interest to the Service, involving Service property or affiliated personnel, occurs off-installation, the Service law enforcement organization exercising area responsibility will—

(a) Obtain copies of civilian law enforcement reports for processing or forwarding according to applicable Service parts.

(b) Return apprehended persons to representatives of their Service as soon as practicable.

APPENDIX A TO PART 631—ARMED FORCES DISCIPLINARY CONTROL BOARD PROCEDURES GUIDE

A–1. Purpose. This guide prescribes procedures for the establishment, operation, and coordination of AFDCBs. AFDCB proceedings are not adversarial in nature.

a. The board will meet quarterly. The commander establishing the AFDCB may specify whether the meetings will be open or closed. If not specified, the decision is at the discretion of the president of the board. Normally proceedings are closed, but may be opened to the public when circumstances warrant.

b. Special meetings may be called by the president of the board. Except by unanimous consent of members present, final action will be taken only on the business for which the meeting was called.

c. A majority of voting members constitutes a quorum for board proceedings.

A–3. AFDCB composition. Voting members will be selected per section 631.7.

A–4. Attendance of observers or witnesses.

a. The board may invite individual persons or organization representatives as witnesses or observers if they are necessary or appropriate for the conduct of board proceedings. The below listed authorities may assist in addressing installation or command concerns or issues.

(1) Federal, State, and local judicial, legislative, and law enforcement officials.

(2) Housing part and enforcement authorities.

(3) Health, and social service authorities.

(4) Environmental protection authorities.

(5) Alcoholic beverage control authorities.

(6) Equal employment opportunity authorities.

(7) Consumer affairs advocates.

(8) Chamber of Commerce representatives.

(9) Public works or utility authorities.

(10) Local fire marshal, and public safety authorities.

(11) State and local school board or education officials.

(12) Any other representation deemed appropriate by the sponsoring command such as, news media, union representatives, and so forth.

b. Invited witnesses and observers will be listed in the minutes of the meeting.

A–5. Appropriate areas for board consideration.

a. Boards will study and take appropriate action on all reports of conditions considered detrimental to the good order and discipline, health, morale, welfare, safety, and morals of Armed Forces personnel. These adverse conditions include, but are not limited to, those identified in § 631.9.

b. The board will immediately forward to the local commander reported circumstances involving discrimination based on race, color, sex, religion, age, or national origin.

a. Off-limits restrictions should be invoked only when there is substantive information indicating that an establishment or area frequented by Armed Forces personnel presents conditions, which adversely affect their health, safety, welfare, morale, or morals. It is essential that boards do not act arbitrarily. Actions must not be of a punitive nature. Boards should work in close cooperation with local officials and proprietors of business establishments, and seek to accomplish their mission through mutually cooperative efforts. Boards should encourage personal visits by local military, and civilian enforcement or health officials to establishments considered below standard. AFDCBs should point out unhealthy conditions or undesirable practices to establishment owners or operators to produce the desired corrective action.
b. In cases involving discrimination, the board should not rely solely on letters written by the Equal Opportunity Office, and Military Affairs Committee or investigations of alleged racial discrimination.

c. If the board decides to attempt to investigate or inspect an establishment, the president or a designee will prepare, and submit a report of findings, and recommendations at the next meeting. This procedure will ensure complete, and documented information concerning questionable adverse conditions.

d. When the board concludes that conditions adverse to Armed Forces personnel do exist, the owner or manager will be sent a letter of notification (Annex A). This letter will advise him or her to raise standards by a specified date, and, if such conditions or practices continue, off-limits proceedings will be initiated. Any correspondence with the individuals responsible for adverse conditions, which may lead to off-limits action, will be by certified mail.

e. If a proprietor takes remedial action to correct undesirable conditions previously noted the board should send a letter of appreciation (Annex B) recognizing this cooperation.

f. If undesirable conditions are not corrected, the proprietor will be invited to appear before the AFDCB to explain why the establishment should not be placed off-limits (Annex C). Any proprietor may designate in writing a representative to appear before the board in his or her behalf.

g. In cases where proprietors have been invited to appear before the board, the president of the board will perform the following—

1. Prior to calling the proprietor—
   (a) Review the findings and decision of the previous meeting.
   (b) Call for inspection reports.
   (c) Allow those present to ask questions, and discuss the case.

2. When the proprietor or his or her representative is called before the board—
   (a) Present the proprietor with a brief summary of the complaint concerning the establishment.
   (b) Afford the proprietor an opportunity to present matters in defense.
   (c) Invite those present to question the proprietor. After the questioning period, provide the proprietor an opportunity to make a final statement before being dismissed.
   (d) Deliberations on recommended actions will be in closed session, attended only by board members.

h. The board should recommend an off-limits restriction only after the following:

1. The letter of notification (Annex A) has been sent.
2. An opportunity for the proprietor to appear before the board has been extended.
3. Further investigation indicates that improvements have not been made.

i. The minutes will indicate the AFDCB’s action in each case. When a recommendation is made to place an establishment off-limits, the minutes will show the procedural steps followed in reaching the decision.

j. Recommendations of the AFDCB will be submitted to the sponsoring commander for consideration. The recommendations will then be forwarded to other installation commanders who are represented on the board (Annex D). If no objection to the recommendations is received within 10 days, the sponsoring commander will approve or disapprove the recommendations and forward the decision to the AFDCB president.

k. Upon approval of the AFDCB’s recommendations, the president will write the proprietor that the off-limits restriction has been imposed (Annex E).

l. A time limit should not be specified when an off-limits restriction is revoked. The adequacy of the corrective action taken by the proprietor of the establishment must be the determining factor in removing the off-limits restriction.

m. Military authorities may not post off-limits signs or notices on private property.

n. In emergencies, commanders may temporarily declare establishments or areas off-limits to service members subject to their jurisdiction. The circumstances for the action will be reported as soon as possible to the commander sponsoring the board. Detailed justification for this emergency action will be provided to the board for its deliberations.

o. Appropriate installation commanders will publish a list of off-limits establishments and areas using command and media channels.

a. Removal of an off-limits restriction requires AFDCB action. Proprietors of establishments declared off-limits should be advised that they may appeal to the appropriate AFDCB at any time. In their appeal they should submit the reason why the restriction should be removed. A letter of notification for continuance of the off-limits restriction should be sent to the proprietor if the AFDCB does not remove the off-limits restriction (Annex F). The proprietor may appeal to the next higher commander if not satisfied with continuance after exhausting all appeals at the local sponsoring commander level. Boards should make at least quarterly inspections of off-limits establishments. A statement that an inspection has been completed should be included in AFDCB minutes.

b. When the board learns that the proprietor has taken adequate corrective measures, the AFDCB will take the following actions:

1. Discuss the matter at the next meeting and make an appropriate recommendation.
(2) Forward a recommendation for removal of the off-limits restriction to the sponsoring commander. If approved, a letter removing the restriction (Annexes G & H) will be sent to the proprietor.

(3) The minutes will reflect action taken.

A–8. Duties of the AFDCB president.
The president of the AFDCB will—

a. Schedule and preside at all AFDCB meetings.
b. Provide an agenda to each voting member at least 72 hours prior to the meeting.
c. Ensure records, minutes, and correspondence are prepared, distributed, and maintained per §631.10(d).

The installation commander, and commanders within an AFDCB’s area of responsibility must be thoroughly acquainted with the mission and services provided by AFDCBs. AFDCB members should keep their respective commanders informed of command responsibilities pertaining to AFDCB functions and actions.

a. Due to the sensitive nature of the subject matter, there will not be a media release in connection with AFDCB meetings. However, any AFDCB proceeding, which is open to the public, will also be open to representatives of the news media. Representatives of the news media will be considered observers, and will not participate in matters considered by the AFDCB. Members of the news media may be invited to participate in an advisory status in coordination with the public affairs office.
b. News media interviews and releases will be handled through the public affairs office according to applicable Service parts.

A–11. Minutes.
a. Minutes will be prepared in accordance with administrative formats for minutes of meetings prescribed by the Service of the sponsoring commander (Annex I). The written minutes of AFDCB meetings will constitute the official record of the AFDCB proceedings. Verbatim transcripts of board meetings are not required. The reasons for approving or removing an off-limits restriction, to include a complete address of the establishment or area involved, should be indicated in the order of business. In addition, the AFDCB’s action will be shown in the order or sequence of actions taken. A change in the name of an establishment or areas in an off-limits restriction will also be included.
b. Distribution of the minutes of AFDCB meetings will be limited to the following—
   1. Each voting member, sponsoring command, and commands and installations represented by the board.
   2. Each civilian and military advisory member, if deemed appropriate.
   3. Civilian and Government agencies within the State in which member installations are located having an interest in the functions of the board, if appropriate.
c. AFDCB minutes are subject to release and disclosure in accordance with applicable Service parts and directives.
d. Minutes and recommendations of the board will be forwarded to the sponsoring commander for approval.

ANNEX A—LETTER OF NOTIFICATION
(Letterhead)
(Proprietary AFDCB)

Proprietor
Dear Sir:
This letter is to inform you that it has come to the attention of the Armed Forces Disciplinary Control Board (AFDCB) that certain conditions reported at your establishment may adversely affect the (health, safety, or welfare) of members of the Armed Forces.
The AFDCB is initiating action to determine whether your establishment (area) should be placed off-limits to members of the Armed Forces if (cite conditions) are not corrected by (date).
A representative of the AFDCB will visit your establishment to determine if steps have been taken to correct the conditions outlined above.
Sincerely,
John J. Smith,
Colonel, U.S. Army, President, Armed Forces Disciplinary Control Board.

(NOTE: Use certified mail, return receipt requested if mailed.)

ANNEX B—LETTER OF APPRECIATION
(Letterhead)
(Proprietary AFDCB)

Proprietor
Dear Sir:
This is in reference to my letter of (date) concerning the condition(s) reported at your establishment which adversely affected the health and welfare of members of the Armed Forces.
The Board appreciates your action(s) to correct the condition(s) previously noted and does not contemplate further action with respect to this specific matter.
Your continued cooperation is solicited.
Sincerely,
John J. Smith,
Colonel, U.S. Army, President, Armed Forces Disciplinary Control Board.
ANNEX C—LETTER OF INVITATION

(Letterhead)

Proprietor

Dear Sir:

This is in reference to my letter of (date) concerning the condition reported at your establishment which adversely affects the (health, safety, or welfare) of members of the Armed Forces. Information has been received by the board which indicates you have not taken adequate corrective action to eliminate the reported condition.

Reports presented to the Armed Forces Disciplinary Control Board (AFDCB) indicate (list and describe conditions).

You are advised that the AFDCB will initiate action to determine whether your establishment should be declared off-limits to members of the Armed Forces.

You may appear in person, with or without counsel, before the AFDCB at its next scheduled meeting on (date, time, and place). At that time you will have the opportunity to refute the allegation(s), or to inform the board of any remedial action(s) you have taken or contemplate taking to correct the condition. It is requested that you inform the President, of the AFDCB if you plan to attend.

Any questions regarding this matter may be addressed to the President, Armed Forces Disciplinary Control Board, (address). Every effort will be made to clarify the matter for you.

Sincerely,

John J. Smith,
Colonel, U.S. Army, President, Armed Forces Disciplinary Control Board

(NOTE: Send certified mail, return receipt requested if mailed.)

ANNEX D—AFDCB OFF-LIMITS APPROVAL LETTER

(Letterhead)

Office Symbol

MEMORANDUM FOR (Commanders of Supported Installations)

SUBJECT: Establishments or Areas Recommended for Off-Limits Designation

1. On (date), the Armed Forces Disciplinary Control Board (AFDCB) recommended imposition of the following off-limits restrictions: (name and address of establishment)

2. Commanders furnishing AFDCB representatives are requested to provide any comments within 10 days as to whether (name of establishment or area) should be placed off-limits.

3. A copy of the AFDCB minutes and recommendation is enclosed.

FOR THE (SPONSORING) COMMANDER:

Encl

Sincerely,

John J. Smith,
Colonel, U.S. Army, President, Armed Forces Disciplinary Control Board

ANNEX E—LETTER OF DECLARATION OF OFF-LIMITS

(Letterhead)

Proprietor

Dear Sir:

This letter is to inform you that your establishment has been declared off-limits to members of the Armed Forces effective (date). Members of the Armed Forces are prohibited from entering your establishment (premises) as long as this order is in effect. This action is being taken because of (state the conditions) which are detrimental to the (health or welfare) of members of the Armed Forces.

This restriction will remain in effect indefinitely in accordance with established Armed Forces policy. Removal of the restriction will be considered by the Armed Forces Disciplinary Control Board upon presentation of information that satisfactory corrective action has been taken.

Correspondence appealing this action may be submitted to the President, Armed Forces Disciplinary Control Board, (cite address).

Sincerely,

John J. Smith,
Colonel, U.S. Army, President, Armed Forces Disciplinary Control Board

ANNEX F—AFDCB LETTER OF NOTIFICATION OF CONTINUANCE OF OFF-LIMITS RESTRICTIONS AFTER APPEARANCE BEFORE THE AFDCB

(Letterhead)

Proprietor

Dear Sir:

The Armed Forces Disciplinary Control Board (AFDCB) did not favorably consider your request for removal of the off-limits restriction now in effect at your establishment.

This decision does not preclude further appeals or appearances before the AFDCB at any of its scheduled meetings. Correspondence pertaining to this matter should be addressed to the President, Armed Forces Disciplinary Control Board, (cite address).

Sincerely,

John J. Smith,
Colonel, U.S. Army, President, Armed Forces Disciplinary Control Board

ANNEX G—AFDCB LETTER OF REMOVAL OF OFF-LIMITS RESTRICTION

(Letterhead)

Proprietor

Dear Sir:

This letter is to inform you that your restriction has been removed effective (date). Members of the Armed Forces are no longer prohibited from entering your establishment (premises). This action was taken after a review of information that satisfactory corrective action has been taken.

Sincerely,

John J. Smith,
Colonel, U.S. Army, President, Armed Forces Disciplinary Control Board

**Department of the Army, DoD**

§ 632.2

[301x66]17

**Dear Sir:**

This letter is to inform you that the off-limits restriction against (name of establishment) is removed effective (date). Members of the Armed Forces are permitted to patronize your establishment as of that date.

The corrective actions taken in response to the concerns of the Armed Forces Disciplinary Control Board are appreciated.

Sincerely,

John J. Smith,

Colonel, U.S. Army, President, Armed Forces Disciplinary Control Board

ANNEX I—FORMAT FOR AFDCB MEETING MINUTES

(Letterhead)

Proprietor

**Dear Sir:**

This letter is to inform you that your request for removal of the off-limits restriction now in effect at (name of establishment) was favorably considered by the Armed Forces Disciplinary Control Board (AFDCB). This restriction will be removed effective (date). Members of the Armed Forces will be permitted to patronize your establishment as of that date.

The corrective actions taken in response to the concerns of the AFDCB are appreciated.

Sincerely,

John J. Smith,

Colonel, U.S. Army, President, Armed Forces Disciplinary Control Board

ANNEX II—AFDCB NOTIFICATION OF REMOVAL OF OFF-LIMITS RESTRICTION

(Letterhead)

**Proper**

**Dear Sir:**

This letter is to inform you that the off-limits restriction against (name of establishment) is removed effective (date). Members of the Armed Forces are permitted to patronize your establishment as of that date.

The corrective actions taken in response to the concerns of the Armed Forces Disciplinary Control Board are appreciated.

Sincerely,

John J. Smith,

Colonel, U.S. Army, President, Armed Forces Disciplinary Control Board

PART 632—USE OF FORCE BY PERSONNEL ENGAGED IN LAW ENFORCEMENT AND SECURITY DUTIES

Sec. 632.1 Purpose.

632.2 Applicability.

632.3 Policy.

632.4 Deadly force.

632.5 Use of firearms.

632.6 Administrative instructions.

AUTHORITY: 10 U.S.C. 3012.

SOURCE: 48 FR 17074, Apr. 21, 1983, unless otherwise noted.

§ 632.1 Purpose.

This regulation implements DOD Directive 5210.65. It sets uniform policy for use of force by DA law enforcement and security personnel.

§ 632.2 Applicability.

(a) This regulation applies to all DA including Army National Guard and Army Reserve and civilian personnel engaged in law enforcement or security duties, and those civilian contract...
guard personnel performing security duties. These duties include guarding U.S. Military prisoners and interior guard duties.

(b) Except for personnel guarding U.S. military prisoners, this regulation does not apply to persons assigned to—

(1) A wartime combat zone.

(2) A non-wartime hostile fire area.

(3) Duties with the U.S. Secret Service.

(4) Civil disturbance control. (See para 4–12, FM 19–15.)

§ 632.3 Policy.

(a) Law enforcement and security personnel will use force only when they cannot fulfill their duties without it. They will use the minimum force needed; only as a last resort will they use deadly force. (See §§ 632.3(c), 632.4, and 632.5.)

(b) Commanders are encouraged to substitute nonlethal devices (such as night sticks) for firearms when adequate for law enforcement and security personnel to safely fulfill their duties.

(c) In evaluating the degree of force needed for specific law enforcement or security situations, consider these options:

(1) Verbal persuasion.

(2) Unarmed defense techniques.

(3) Chemical aerosol irritant projectors (M36). (May be subject to host nation or local restrictions.)

(4) MP club.

(5) MP working dogs.

(6) Deadly force. (§ 632.4)

(d) Entrapment, i.e., inducing someone to commit an offense in order to prosecute that person, is not permitted in law enforcement or security duties.

(e) Use MP working dogs in accordance with the provisions of AR 190–12. Release dogs only if a lesser measure of force would not be effective.

(1) Releasing a sentry dog to apprehend a suspect is a greater measure of force than releasing a patrol dog.

(2) Before releasing a military dog for attack, give a challenge or order to halt.

§ 632.4 Deadly force.

(a) Deadly force is destructive physical force directed against a person or persons (e.g., firing a lethal weapon). Use it only in extreme need, when all lesser means have failed or cannot reasonably be used. Use deadly force for one or more of the following reasons only:

(1) In self-defense, when in imminent danger of death or serious injury.

(2) To protect property related to national security, when reasonably necessary to prevent—

(i) Threatened theft, damage, or espionage aimed at property or information specified by a commander or other competent authority as vital to national security. (See paragraph (b) of this section.)

(ii) Actual theft, damage, or espionage aimed at property or information which, though not vital, is substantially important to national security. (See paragraph (b) of this section.)

(iii) Escape of an individual whose unauthorized presence near property or information vital to national security is a reasonable threat of theft, sabotage, or espionage.

(3) To prevent actual theft or sabotage of property (such as operable weapons or ammunition) which could cause deadly harm to others in the hands of an unauthorized person.

(4) To prevent serious offenses against a person or persons (e.g., armed robbery, rape, or violent destruction of property by arson, bombing).

(5) To apprehend a suspect believed to have committed any of the types of offenses named in paragraphs (a) (2), (3), and (4) of this section.

(6) To prevent the escape of a prisoner (when authorized by a commander or other competent authority and reasonably necessary).

(7) To obey lawful orders from higher authority governed by this regulation.

(b) A commander or other competent authority will specify that property or information is—

(1) Vital to national security only when its loss, damage, or compromise would seriously harm national security or an essential national defense mission.

(2) Substantially important to national security based on the mission and the material or information required to perform it.

(c) To comply with local law or international agreement or arrangements, a
commander may impose further restrictions on using deadly force. (Restrictions should not unduly compromise U.S. security interests).

(d) Security criteria and standards for protection of nuclear weapons (paragraph (c) of this section AR 50–6–1) and for chemical agents (paragraph (c) of this section AR 50–6–1) also apply.

§ 632.5 Use of firearms.
(a) If it becomes necessary to use a firearm in any of the circumstances described in § 632.4 of this part, observe the following precautions when possible:
   (1) Give an order to halt before firing.
   (2) Do not fire if shots are likely to harm innocent bystanders.
   (3) Since warning shots could harm innocent bystanders, avoid firing them. However, when lesser degrees of force have failed, the law enforcement or security person may judge that warning shots would help to control the situation without using deadly force. If able to avoid hazards to innocent persons in these cases, fire warning shots.
   (4) Aim to disable. At times it may be difficult to fire with enough precision to ensure disabling rather than killing. If the use of firearms are otherwise authorized by this regulation, such circumstances will not rule out their use.

§ 632.6 Administrative instructions.
(a) Commanders will ensure that all persons assigned to law enforcement, security, or US military prisoners’ guard duties will, before performing these duties—
   (1) Receive instructions on regulations regarding use of force.
   (2) Show knowledge and skill in the use of—
      (i) Unarmed defense techniques.
      (ii) MP club.
      (iii) Individual chemical aerosol irritant projectors.
      (iv) Their assigned firearms.
   (b) Commanders will also—
      (1) Provide periodic refresher training to ensure continued proficiency and updated knowledge in these skills. (Include applicable host nation requirements.)
      (2) Require MPs with law enforcement duties to qualify yearly with their assigned handguns.
      (3) Require interior guards to receive instructions regarding use of force. (Give periodic refresher training to ensure continued familiarity with regulations.)
   (c) Requirements concerning use of the MP club and chemical aerosol irritant projectors apply only when these weapons are issued items or are carried on duty.
   (d) FM 19–5 contains procedures and methods for using unarmed defense techniques and the MP club.

PART 633—INDIVIDUAL REQUESTS FOR ACCESS OR AMENDMENT OF CID REPORTS OF INVESTIGATION

§ 633.11 Access to CID reports.
All requests for access to CID reports made under the Privacy or Freedom of Information Acts will be processed in accordance with AR 340–21 and AR 25–55, respectively.

§ 633.12 Amendment to CID reports.
USACIDC reports of investigation (ROI) are exempt from the amendment provisions of the Privacy Act and AR 340–21. Requests for amendment will be considered only under the provisions of this regulation. Requests to amend USACIDC reports will be granted only if the individual submits new, relevant and material facts that are determined to warrant their inclusion in or revision of the ROI. The burden of proof is on the individual to substantiate the request. Requests to delete a person’s name from the title block will be granted only if it is determined that there is not probable cause to believe that the individual committed the offense for which he or she is listed as a subject. It is emphasized that the decision to list a person’s name in the title
§ 633.13 Submission of requests.

Requests for access to, or amendment of, USACIDC investigative reports will be forwarded to the Director, U.S. Army Crime Records Center (CICR–FP), 27130 Telegraph Road, Quantico, VA 22134.

Subpart A—Introduction

634.1 Purpose.
634.2 References.
634.3 Explanation of abbreviations and terms.
634.4 Responsibilities.
634.5 Program objectives.

Subpart B—Driving Privileges

634.6 Requirements for driving privileges.
634.7 Stopping and inspecting personnel or vehicles.
634.8 Implied consent.
634.9 Suspension or revocation of driving or privately owned vehicle registration privileges.
634.10 Remedial driver training programs.
634.11 Administrative due process for suspensions and revocations.
634.12 Army administrative actions against intoxicated drivers.
634.13 Alcohol and drug abuse programs.
634.14 Restoration of driving privileges upon acquittal of intoxicated driving.
634.15 Restricted driving privileges or probation.
634.16 Reciprocal state-military action.
634.17 Extensions of suspensions and revocations.
634.18 Reinstatement of driving privileges.

Subpart C—Motor Vehicle Registration

634.19 Registration policy.
Department of the Army, DoD

Source: 70 FR 18969, Apr. 12, 2005, unless otherwise noted.

Subpart A—Introduction

§ 634.1 Purpose.

(a) This subpart establishes policy, responsibilities, and procedures for motor vehicle traffic supervision on military installations in the continental United States (CONUS) and overseas areas. This includes but is not limited to the following:

(1) Granting, suspending, or revoking the privilege to operate a privately owned vehicle (POV).
(2) Registration of POVs.
(3) Administration of vehicle registration and driver performance records.
(4) Driver improvement programs.
(5) Police traffic supervision.
(6) Off-installation traffic activities.

(b) Commanders in overseas areas are authorized to modify these policies and procedures in the following instances:

(1) When dictated by host nation relationships, treaties, and agreements.
(2) When traffic operations under military supervision necessitate measures to safeguard and protect the morale, discipline, and good order in the Services.

§ 634.2 References.

Required and related publications along with prescribed and referenced forms are listed in Appendix A, AR 190–5.

§ 634.3 Explanation of abbreviations and terms.

Abbreviations and special terms used in this subpart are explained in the Glossary of AR 190–5. It is available on the internet at: www.usapa.army.mil.

§ 634.4 Responsibilities.

(a) Departmental. The Provost Marshal General, Headquarters, Department of the Army (HQDA); Director, Naval Criminal Investigative Service, U.S. Navy (USN); Headquarters, Air Force Security Forces Center; Headquarters, U.S. Marine Corps (USMC); Staff Director, Command Security Office, Headquarters, Defense Logistics Agency (DLA), and Chief, National Guard Bureau will—

(1) Exercise staff supervision over programs for motor vehicle traffic supervision.
(2) Develop standard policies and procedures that include establishing an automated records program on traffic supervision.
(3) Maintain liaison with interested staff agencies and other military departments on traffic supervision.
(4) Maintain liaison with departmental safety personnel on traffic safety and accident reporting systems.
(5) Coordinate with national, regional, and state traffic officials and agencies, and actively participate in conferences and workshops sponsored by the Government or private groups at the national level.
(6) Help organize and monitor police traffic supervision training.
(7) Maintain liaison with the Department of Transportation (DOT) and other Federal departments and agencies on the National Highway Safety Program Standards (NHSPS) and programs that apply to U.S. military traffic supervision.
(8) Participate in the national effort to reduce intoxicated driving.

(b) All major commanders. Major commanders of the Army, Navy, Air Force, Marine Corps, and DLA will—

(1) Manage traffic supervision in their commands.
(2) Cooperate with the support programs of state and regional highway traffic safety organizations.
(3) Coordinate regional traffic supervision activities with other major military commanders in assigned geographic areas of responsibility.
(4) Monitor agreements between installations and host state authorities for reciprocal reporting of suspension and revocation of driving privileges.
(5) Participate in state and host nation efforts to reduce intoxicated driving.
(6) Establish awards and recognition programs to recognize successful installation efforts to eliminate intoxicated driving. Ensure that criteria for these awards are positive in nature and include more than just apprehensions for intoxicated driving.
(7) Modify policies and procedures when required by host nation treaties or agreements.
§ 634.4  32 CFR Ch. V (7–1–13 Edition)

(c) Major Army commanders. Major Army commanders will ensure subordinate installations implement all provisions of this part.

(d) Commanding General, U.S. Army Training and Doctrine Command (CG, TRADOC). The CG, TRADOC will ensure that technical training for functional users is incorporated into service school instructional programs.

(e) Installation or activity commander, Director of Military Support and State Adjutant General. The installation or activity commander (for the Navy, the term installation shall refer to either the regional commander or installation commanding officer, whoever has ownership of the traffic program) will—

1. Establish an effective traffic supervision program.

2. Cooperate with civilian police agencies and other local, state, or federal government agencies concerned with traffic supervision.

3. Ensure that traffic supervision is properly integrated in the overall installation traffic safety program.

5. Ensure that active duty Army law enforcement personnel follow the provisions of AR 190–45 in reporting all criminal violations and utilize the Centralized Police Operations Suite (COPS) to support reporting requirements and procedures. Air Force personnel engaged in law enforcement and adjudication activities will follow the provisions of AFI 31–203 in reporting all criminal and traffic violations, and utilize the Security Forces Management Information Systems (SFMIS) to support reporting requirements and procedures.

6. Implement the terms of this part in accordance with the provisions of the Federal Service Labor-Management Relations Statute, 5 U.S.C. Chapter 71.

7. Revoke driving privileges in accordance with this part.

(f) Installation law enforcement officer. The installation law enforcement officer will—

1. Exercise overall staff responsibility for directing, regulating, and controlling traffic, and enforcing laws and regulations pertaining to traffic control.

2. Assist traffic engineering functions at installations by participating in traffic control studies designed to obtain information on traffic problems and usage patterns.

(g) Safety officer. Safety officers will participate in and develop traffic accident prevention initiatives in support of the installation traffic safety program.

(h) Facility engineer (public works officer at Navy installations). The facility engineer, engineer officer or civil engineer at Air Force installations, in close coordination with the law enforcement officer, will—

1. Perform that phase of engineering concerned with the planning, design, construction, and maintenance of streets, highways, and abutting lands.

2. Select, determine appropriate design, procure, construct, install, and maintain permanent traffic and parking control devices in coordination with the law enforcement officer and installation safety officer.

3. Ensure that traffic signs, signals, and pavement markings conform to the standards in the current Manual on Uniform Traffic Control Devices for Streets and Highways.

4. Ensure that planning, design, construction, and maintenance of streets and highways conform to the NHSPS as implemented by the Army.

(i) Traffic engineer. The traffic engineer, in close coordination with the law enforcement officer, will:

1. Conduct formal traffic engineering studies.

2. Apply traffic engineering measures, including traffic control devices, to reduce the number and severity of traffic accidents. (If there is no installation traffic engineer, installation commanders may request these services through channels from the Commander, Military Surface Deployment and Distribution Command, 200 Stovall Street, Alexandria, VA 22332).

(j) Army Alcohol and Drug Control Officer (ADCO). The ADCO will provide treatment and education services to personnel with alcohol or drug abuse problems.
(k) Navy Substance Abuse Rehabilitation Program (SARP) Directors. These directors will—
(1) Supervise the alcohol/drug rehabilitation services to personnel with alcohol or drug abuse problems.
(2) Provide remedial/motivational education for all persons identified as alcohol or drug abusers who are evaluated as not dependent on alcohol or drugs and who have been referred to level one rehabilitation by their commands.

(l) Marine Corps Substance Abuse Program Officer. This officer will provide alcohol/drug education, treatment, and rehabilitation services to personnel with alcohol/drug abuse problems.

(m) DLA Employee Assistance Program Officer. This officer will provide alcohol/drug counseling and referral services to identified personnel with alcohol/drug abuse problems in accordance with procedures prescribed by the Labor Relations Officer, Office of Human Resource, HQ DLA.

(n) Alcohol/Drug Abuse Prevention Treatment (ADAPT) program. Air Force Commanders will refer personnel identified with alcohol/drug abuse problems to this program in accordance with established procedures.

§ 634.5 Program objectives.

(a) The objectives of motor vehicle traffic supervision are to assure—
(1) Safe and efficient movement of personnel and vehicles.
(2) Reduction of traffic deaths, injuries, and property damage from traffic accidents. Most traffic accidents can be prevented. Investigation of motor vehicle accidents should examine all factors, operator status, vehicle condition, and supervisory control measures involved.
(3) Integration of installation safety, engineering, legal, medical, and law enforcement resources into the installation traffic planning process.
(4) Removal of intoxicated drivers from installation roadways.
(b) [Reserved]
§ 634.7 Stopping and inspecting personnel or vehicles.

(a) Government vehicles may be stopped by law enforcement personnel on military installations based on the installation commander’s policy.

(1) In overseas areas, Government vehicles may be stopped on or off installations as determined by host nation agreement and command policy.

(2) Stops and inspections of vehicles at installation gates or entry points and in restricted areas will be conducted according to command policy.

(b) Stops and inspections of POV within the military installation, other than at restricted areas or at an installation gate, are authorized only when there is a reasonable suspicion of criminal activity, or of a violation of a traffic regulation or of the installation commander’s policy. Marine Corps users will be guided by publication of Marine Corps order and Military Rules of Evidence 311–316 and local command regulations. DLA users, see DLAR 5700.7.

(c) At the time of stop, the driver and occupants may be required to display all pertinent documents, including but not limited to:

(1) DD Form 2A.
(2) Documents that establish the identity and status of civilians; for example, Common Access Card (CAC), DD Form 1173 (Uniformed Services Identification and Privilege Card), DA Form 1602 (Civilian Identification), DA Form 354 (Civilian Identification Card), DD Form 2 (Armed Forces of the United States Identification Card), post pass, national identity card, or other identification.
(3) Proper POV registration documents.
(4) Host nation vehicle registration documents, if applicable.
(5) Authorization to operate a Government vehicle, if applicable.
(6) Drivers license or OF 346 valid for the particular vehicle and area of operation.
(7) Proof of insurance.

§ 634.8 Implied consent.

(a) Implied consent to blood, breath, or urine tests. Persons who drive on the installation shall be deemed to have given their consent to evidential tests for alcohol or other drug content of their blood, breath, or urine when lawfully stopped, apprehended, or cited for any offense allegedly committed while driving or in physical control of a motor vehicle on military installations to determine the influence of intoxicants.

(b) Implied consent to impoundment. Any person granted the privilege to operate or register a motor vehicle on a military installation shall be deemed to have given his or her consent for the removal and temporary impoundment of the POV when it is parked illegally, or for unreasonable periods, as determined by the installation commander or applicable authority, interfering with military operations, creating a safety hazard, disabled by accident, left unattended in a restricted or controlled area, or abandonad. Such persons further agree to reimburse the United States for the cost of towing and storage should their motor vehicle be removed or impounded. Existence of these conditions will be determined by the installation commander or designee.

(c) Any person who operates, registers, or who is in control of a motor vehicle on a military installation involved in a motor vehicle or criminal infraction shall be informed that notice of the violation of law or regulation will be forwarded to the Department of Motor Vehicles (DMV) of the host state and/or home of record for the individual, and to the National Register, when applicable.

§ 634.9 Suspension or revocation of driving or privately owned vehicle registration privileges.

The installation commander or designee may for cause, or any lawful reason, administratively suspend or revoke driving privileges on the installation. The suspension or revocation of installation driving privileges or POV registrations, for lawful reasons unrelated to traffic violations or safe vehicle operation, is not limited or restricted by this part.
(a) 

Suspension. (1) Driving privileges are usually suspended when other measures fail to improve a driver’s performance. Measures should include counseling, remedial driving training, and rehabilitation programs if violator is entitled to the programs. Driving privileges may also be suspended for up to 6 months if a driver continually violates installation parking regulations. The commander will determine standards for suspension based on frequency of parking violations and publish those standards. Aboard Navy installations, any vehicle parked in a fire lane will be towed at the owner’s expense. Any vehicle parked without authorization in an area restricted due to force protection measures may subject the driver to immediate suspension by the installation commanding officer. Vehicle will be towed at the owner/operator’s expense.

(2) The installation commander has discretionary power to withdraw the authorization of active duty military personnel, DOD civilian employees, and nonappropriated funds (NAF) employees, contractors and subcontractors to operate Government vehicles.

(3) Immediate suspension of installation or overseas command POV driving privileges pending resolution of an intoxicated driving incident is authorized for active duty military personnel, family members, retired members of the military services, DOD civilian personnel, and others with installation or overseas command driving privileges, regardless of the geographic location of the intoxicated driving incident. Suspension is authorized for non-DOD affiliated civilians only with respect to incidents occurring on the installation or in areas subject to military traffic supervision. After a review of available information as specified in §634.11, installation driving privileges will be immediately suspended pending resolution of the intoxicated driving accident in the following circumstances:

(i) Refusal to take or complete a lawfully requested chemical test to determine contents of blood for alcohol or other drugs.

(ii) Operating a motor vehicle with a blood alcohol content (BAC) of .08 percent by volume (.08 grams per 100 milliliters) or higher or in violation of the law of the jurisdiction that is being assimilated on the military installation.

(iii) Operating a motor vehicle with a BAC of 0.05 percent by volume but less than 0.08 percent blood alcohol by volume in violation of the law of the jurisdiction in which the vehicle is being operated if the jurisdiction imposes a suspension solely on the basis of the BAC level (as measured in grams per 100 milliliters).

(iv) On an arrest report or other official documentation of the circumstances of an apprehension for intoxicated driving.

(b) Revocation. (1) The revocation of installation or overseas command POV driving privileges is a severe administrative measure to be exercised for serious moving violations or when other available corrective actions fail to produce the desired driver improvement. Revocation of the driving privilege will be for a specified period, but never less than 6 months, applies at all military installations, and remains in effect upon reassignment.

(2) Driving privileges are subject to revocation when an individual fails to comply with any of the conditions requisite to the granting privilege (see §634.6). Revocation of installation driving and registration privileges is authorized for military personnel, family members, civilian employees of DOD, contractors, and other individuals with installation driving privileges. For civilian guests, revocation is authorized only with respect to incidents occurring on the installation or in the areas subject to military traffic supervision.

(3) Driving privileges will be revoked for a mandatory period of not less than 1 year in the following circumstances:

(i) The installation commander or designee has determined that the person lawfully apprehended for driving under the influence refused to submit to or complete a test to measure the alcohol content in the blood, or detect the presence of any other drug, as required by the law of the jurisdiction, or installation traffic code, or by Service directive.
(ii) A conviction, nonjudicial punishment, or a military or civilian administrative action resulting in the suspension or revocation of driver’s license for intoxicated driving. Appropriate official documentation of such conviction is required as the basis for revocation.

(4) When temporary suspensions under paragraph (a)(3) of this section are followed by revocations, the period of revocation is computed beginning from the date the original suspension was imposed, exclusive of any period during which full driving privileges may have been restored pending resolution of charges. (Example: privileges were initially suspended on January 1, 2000 for a charge of intoxicated driving with a BAC of 0.14 percent. A hearing was held, extreme family hardship was substantiated, and privileges were restored on February 1 pending resolution of the charge. On March 1, 2000, the driver was convicted for intoxicated driving. The mandatory 1-year revocation period will consist of January 2000 plus March 2000 through January 2001, for a total of 12 months with no installation driving privileges).

(c) Army provost marshals will use the automated VRS to develop and maintain records showing that an individual’s driving privileges have been revoked.

§ 634.10 Remedial driver training programs.

(a) Navy activities will comply with OPNAVINST 5100.12 Series, and Marine Corps activities with current edition of MCO 5100.19C for establishment of remedial training programs.

(b) Installation commanders may establish a remedial driver-training program to instruct and educate personnel requiring additional training. Personnel may be referred to a remedial program on the basis of their individual driving history or incidents requiring additional training. The curriculum should provide instruction to improve driving performance and compliance with traffic laws.

(c) Installation commanders may schedule periodic courses, or if not practical, arrange for participation in courses conducted by local civil authorities.

(d) Civilian personnel employed on the installation, contractor employees, and family members of military personnel may attend remedial courses on the installation, or similar courses off the installation which incur no expense to the government.

§ 634.11 Administrative due process for suspensions and revocations.

(a) Individual Services will promulgate separate regulations establishing administrative due process procedures for suspension or revocation of driving privileges. The procedures in paragraphs (b) and (c) of this section apply to actions taken by Army commanders with respect to Army military personnel and family members and to civilian personnel operating motor vehicles on Army installations. For Marine Corps users, the provisions of this section apply. For Air Force users, a preliminary suspension for intoxicated driving remains in effect until the installation commander makes a final decision. Requested hearings must take place within a reasonable period, which is determined by the installation commander.

(b) For offenses other than intoxicated driving, suspension or revocation of the installation driving privilege will not become effective until the installation commander or designee notifies the affected person and offers that person an administrative hearing. Suspension or revocation will take place 14 calendar days after written notice is received unless the affected person makes an application for a hearing within this period. Such application will stay the pending suspension or revocation for a period of 14 calendar days.

(1) If, due to action by the government, a hearing is not held within 14 calendar days, the suspension will not take place until such time as the person is granted a hearing and is notified of the action of the installation commander or designee. However, if the affected person requests that the hearing be continued to a date beyond the 14-day period, the suspension or revocation will become effective immediately on receipt of notice that the request for continuance has been granted, and
remain in force pending a hearing at a scheduled hearing date.

(2) If it is determined as a result of a hearing to suspend or revoke the affected person's driving privilege, the suspension or revocation will become effective when the person receives the written notification of such action. In the event that written notification cannot be verified, either through a return receipt for mail or delivery through command channels, the hearing authority will determine the effective date on a case-by-case basis.

(3) If the revocation or suspension is imposed after such hearing, the person whose driving privilege has been suspended or revoked will have the right to appeal or request reconsideration. Such requests must be forwarded through command channels to the installation commander within 14 calendar days from the date the individual is notified of the suspension or revocation resulting from the administrative hearing. The suspension or revocation will remain in effect pending a final ruling on the request. Requests for restricted privileges will be considered per §634.15.

(4) If driving privileges are temporarily restored (i.e., for family hardship) pending resolution of charges, the period of revocation (after final authority determination) will still total the mandatory 12 months. The final date of the revocation will be adjusted to account for the period when the violator's privileges were temporarily restored, as this period does not count towards the revocation time.

(c) For drunk driving or driving under the influence offenses, reliable evidence readily available will be presented promptly to an individual designated by the installation commander for review and authorization for immediate suspension of installation driving privileges.

(1) The reviewer should be any officer to include GS-11 and above, designated in writing by the installation or garrison commander whose primary duties are not in the field of law enforcement.

(2) Reliable evidence includes witness statements, military or civilian police report of apprehension, chemical test results if completed, refusal to consent to complete chemical testing, videotapes, statements by the apprehended individual, field sobriety or preliminary breath tests results, and other pertinent evidence. Immediate suspension should not be based solely on published lists of arrested persons, statements by parties not witnessing the apprehension, or telephone conversations or other information not supported by documented and reliable evidence.

(3) Reviews normally will be accomplished within the first normal duty day following final assembly of evidence.

(4) Installation commanders may authorize the installation law enforcement officer to conduct reviews and authorize suspensions in cases where the designated reviewer is not reasonably available and, in the judgment of the installation law enforcement officer, such immediate action is warranted. Air Force Security Forces personnel act in an advisory capacity to installation commanders. Review by the designated officer will follow as soon as practical in such cases. When a suspension notice is based on the law enforcement officer's review, there is no requirement for confirmation notice following subsequent review by the designated officer.

(5) For active duty military personnel, final written notice of suspension for intoxicated driving will be provided to the individual's chain of command for immediate presentation to the individual. Air Force Security Forces provide a copy of the temporary suspension to the individual at the time of the incident or may provide a copy of the final determination at the time of the incident, as pre-determined by the final action authority.

(6) For civilian personnel, written notice of suspension for intoxicated driving will normally be provided without delay via certified mail. Air Force Security Forces personnel provide a copy of the temporary suspension to the individual at the time of the incident or may provide a copy of the final determination at the time of the incident, as pre-determined by the final action authority. If the person is employed on the installation, such notice will be forwarded through the military or civilian supervisor. When the notice of suspension is forwarded through the
supervisor, the person whose privileges are suspended will be required to provide written acknowledgment of receipt of the suspension notice.

(7) Notices of suspension for intoxicated driving will include the following:

(i) The fact that the suspension can be made a revocation under §634.9(b).

(ii) The right to request, in writing, a hearing before the installation commander or designee to determine if post driving privileges will be restored pending resolution of the charge; and that such request must be made within 14 calendar days of the final notice of suspension.

(iii) The right of military personnel to be represented by counsel at his or her own expense and to present evidence and witnesses at his or her own expense. Installation commanders will determine the availability of any local active duty representatives requested.

(iv) The right of Department of Defense civilian employees to have a personal representative present at the administrative hearing in accordance with applicable laws and regulations.

(v) Written acknowledgment of receipt to be signed by the individual whose privileges are to be suspended or revoked.

(8) If a hearing is requested, it must take place within 14 calendar days of receipt of the request. The suspension for intoxicated driving will remain in effect until a decision has been made by the installation commander or designee, but will not exceed 14 calendar days after the hearing while awaiting the decision. If no decision has been made by that time, full driving privileges will be restored until such time as the accused is notified of a decision to continue the suspension.

(9) Hearing on suspension actions under §634.9(a) for drunk or impaired driving pending resolution of charges will cover only the following pertinent issues of whether—

(i) The law enforcement official had reasonable grounds to believe the person was driving or in actual physical control of a motor vehicle under the influence of alcohol or other drugs.

(ii) The person was lawfully cited or apprehended for a driving under the influence offense.

(iii) The person was lawfully requested to submit his or her blood, breath, or urine in order to determine the content of alcohol or other drugs, and was informed of the implied consent policy (consequences of refusal to take or complete the test).

(iv) The person refused to submit to the test for alcohol or other drug content of blood, breath, or urine; failed to complete the test; submitted to the test and the result was .08 or higher blood alcohol content, or between .05 and .08 in violation of the law of the jurisdiction in which the vehicle is being operated if the jurisdiction imposes a suspension solely on the basis of the BAC level; or showed results indicating the presence of other drugs for an on-post apprehension or in violation of State laws for an off-post apprehension.

(v) The testing methods were valid and reliable and the results accurately evaluated.

(10) For revocation actions under §634.9(b) (3) for intoxicated driving, the revocation is mandatory on conviction or other findings that confirm the charge. (Pleas of nolo contendere are considered equivalent to guilty pleas).

(i) Revocations are effective as of the date of conviction or other findings that confirm the charges. Test refusal revocations will be in addition to any other revocation incurred during a hearing. Hearing authority will determine if revocations for multiple offenses will run consecutively or concurrently taking into consideration if offenses occurred on same occasion or different times, dates. The exception is that test refusal will be one year automatic revocation in addition to any other suspension.

(ii) The notice that revocation is automatic may be placed in the suspension letter. If it does not appear in the suspension letter, a separate letter must be sent and revocation is not effective until receipt of the written notice.

(iii) Revocations cancel any full or restricted driving privileges that may have been restored during suspension and the resolution of the charges. Requests for restoration of full driving privileges are not authorized.
The Army Vehicle Registration System will be utilized to maintain infractions by individuals on Army installations.

§ 634.12 Army administrative actions against intoxicated drivers.

Army commanders will take appropriate action against intoxicated drivers. These actions may include the following:

(a) A written reprimand, administrative in nature, will be issued to active duty Soldiers in the cases described in this paragraph (a). Any general officer, and any officer flocked to the grade of brigadier general, may issue this reprimand. Filing of the reprimand will be in accordance with the provisions of AR 600–37.

(1) Conviction by courts-martial or civilian court or imposition of nonjudicial punishment for an offense of drunk or impaired driving either on or off the installation.

(2) Refusal to take or failure to complete a lawfully requested test to measure alcohol or drug content of the blood, breath, or urine, either on or off the installation, when there is reasonable belief of driving under the influence of alcohol or drugs.

(3) Driving or being in physical control of a motor vehicle on post when the blood alcohol content is 0.08 percent or higher, irrespective of other charges, or off post when the blood alcohol content is in violation of the law of the State involved.

(4) Driving, or being in physical control of a motor vehicle, either on or off the installation, when lawfully conducted chemical tests reflect the presence of illegal drugs.

(b) Review by the commander of the service records of active duty soldiers apprehended for offenses described in paragraph (a) of this section to determine if the following action(s) should be taken—

(1) Administrative reduction per AR 600–9–19, or
(2) Bar to reenlistment per AR 601–280, or
(3) Administrative separation per AR 635–200.

§ 634.13 Alcohol and drug abuse programs.

(a) Commanders will refer military personnel suspected of drug or alcohol abuse for evaluation in the following circumstances:

(1) Behavior indicative of alcohol or drug abuse.

(2) Continued inability to drive a motor vehicle safely because of alcohol or drug abuse.

(b) The commander will ensure military personnel are referred to the installation alcohol and drug abuse program or other comparable facilities when they are convicted of, or receive an official administrative action for, any offense involving driving under the influence. A first offender may be referred to treatment if evidence of substance abuse exists in addition to the offense of intoxicated driving. The provisions of this paragraph do not limit the commander’s prerogatives concerning other actions that may be taken against an offender under separate Service/Agency polices (Army, see AR 600–85. Marine Corps, see MCO P1700.24B).

(c) Active duty Army personnel apprehended for drunk driving, on or off the installation, will be referred to the local Army Substance Abuse Program (ASAP) for evaluation within 14 calendar days to determine if the person is dependent on alcohol or other drugs which will result in enrollment in treatment in accordance with AR 600–85. A copy of all reports on military personnel and DOD civilian employees apprehended for intoxicated driving will be forwarded to the installation alcohol and drug abuse facility.

(d) Active duty Navy personnel apprehended for drunk driving on or off the installation will be screened by the respective SARP facility within 14 calendar days to determine if the individual is dependent on alcohol or other drugs. Active duty Marines apprehended for intoxicated driving, on or off the installation, will be referred to interview by a Level II substance abuse counselor within 14 calendar days for evaluation and determination of the appropriate level of treatment required. Subsequent to this evaluation,
§ 634.14 Restoration of driving privileges upon acquittal of intoxicated driving.

The suspension of driving privileges for military and civilian personnel shall be restored if a final disposition indicates a finding of not guilty, charges are dismissed or reduced to an offense not amounting to intoxicated driving, or where an equivalent determination is made in a nonjudicial proceeding. The following are exceptions to the rule in which suspensions will continue to be enforced.

(a) The preliminary suspension was based on refusal to take a BAC test.

(b) The preliminary suspension resulted from a valid BAC test, (unless disposition of the charges was based on invalidity of the BAC test). In the case of a valid BAC test, the suspension will continue, pending completion of a hearing as specified in § 634.11. In such instances, the individual will be notified in writing that the suspension will continue and of the opportunity to request a hearing within 14 calendar days.

(1) At the hearing, the arrest report, the commander’s report of official disposition, information presented by the individual, and such other information as the hearing officer may deem appropriate will be considered.

(2) If the hearing officer determines by a preponderance of evidence that the individual was engaged in intoxicated driving, the revocation will be for 1 year from the date of the original preliminary suspension.

(c) The person was driving or in physical control of a motor vehicle while under a preliminary suspension or revocation.
(d) An administrative determination has been made by the state or host nation licensing authority to suspend or revoke driving privileges.

(e) The individual has failed to complete a formally directed substance abuse or driver’s training program.

§ 634.15 Restricted driving privileges or probation.

(a) For the Navy, Air Force, Marine Corps, and DLA, the installation commander, or his or her designee may modify a suspension or revocation of driving privileges in certain cases per paragraph (d) of this section.

(b) Army requests for restricted driving privileges subsequent to suspension or revocation of installation driving privileges will be referred to the installation commander or designee, except for intoxicated driving cases, which must be referred to the General Court Martial Convening Authority. Withdrawal of restricted driving privileges is within the installation commander’s discretion.

(c) Probation or restricted driving privileges will not be granted to any person whose driver license or right to operate motor vehicles is under suspension or revocation by a state, Federal, or host nation licensing authority. Prior to application for probation or restricted driving privileges, a state, Federal, or host nation driver’s license or right to operate motor vehicles must be reinstated. The burden of proof for reinstatement of driving privileges lies with the person applying for probation or restricted driving privileges. Revocations for test refusals shall remain.

(d) The installation commander or designee may grant restricted driving privileges or probation on a case-by-case basis provided the person’s state or host nation driver’s license or right to operate motor vehicles remains valid to accommodate any of the following reasons:

(1) Mission requirements.

(2) Unusual personal or family hardships.

(3) Delays exceeding 90 days, not attributed to the person concerned, in the formal disposition of an apprehension or charges that are the basis for any type of suspension or revocation.

(4) When there is no reasonably available alternate means of transportation to officially assigned duties. In this instance, a limited exception can be granted for the sole purpose of driving directly to and from the place of duty.

(e) The terms and limitations on a restricted driving privilege (for example, authorization to drive to and from place of employment or duty, or selected installation facilities such as hospital, commissary, and other facilities) will be specified in writing and provided to the individual concerned. Persons found in violation of the restricted privilege are subject to revocation action as prescribed in § 634.9.

(f) The conditions and terms of probation will be specified in writing and provided to the individual concerned. The original suspension or revocation term in its entirety may be activated to commence from the date of the violation of probation. In addition, separate action may be initiated based on the commission of any traffic, criminal, or military offense that constitutes a probation violation.

(g) DOD employees and contractors, who can demonstrate that suspension or revocation of installation driving privileges would constructively remove them from employment, may be given a limiting suspension/revocation that restricts driving on the installation or activity (or in the overseas command) to the most direct route to and from their respective work sites (5 U.S.C. 2302(b)(10)). This is not to be construed as limiting the commander from suspension or revocation of on-duty driving privileges or seizure of OF 346, even if this action would constructively remove a person from employment in those instances in which the person’s duty requires driving from place to place on the installation.

§ 634.16 Reciprocal state-military action.

(a) Commanders will recognize the interests of the states in matters of POV administration and driver licensing. Statutory authority may exist within some states or host nations for reciprocal suspension and revocation of driving privileges. See subpart D of this part for additional information on exchanging and obtaining information.
with civilian law enforcement agencies concerning infractions by Armed Service personnel off post. Installation commanders will honor the reciprocal authority and direct the installation law enforcement officer to pursue reciprocity with state or host nation licensing authorities. Upon receipt of written or other official law enforcement communication relative to the suspension/revocation of driving privileges, the receiving installation will terminate driving privileges as if violations occurred within its own jurisdiction.

(b) When imposing a suspension or revocation for an off-installation offense, the effective date should be the same as civil disposition, or the date that state or host-nation driving privileges are suspended or revoked. This effective date can be retroactive.

(c) If statutory authority does not exist within the state or host nation for formal military reciprocity, the procedures below will be adopted:

(1) Commanders will recognize official documentation of suspensions/revocations imposed by state or host nation authorities. Administrative actions (suspension/revocations, or if recognized, point assessment) for moving traffic violations off the installation should not be less than required for similar offenses on the installation. When notified by state or host nation authorities of a suspension or revocation, the person's OF 346 may also be suspended.

(2) In CONUS, the host and issuing state licensing authority will be notified as soon as practical when a person's installation driving privileges are suspended or revoked for any period, and immediately for refusal to submit to a lawful BAC test. The notification will be sent to the appropriate state DMV(s) per reciprocal agreements. In the absence of electronic communication technology, the appropriate state DMV(s) will be notified by official certified mail. The notification will include the basis for the suspension/revocation and the BAC level if applicable.

(d) OCONUS installation commanders must follow provisions of the applicable Status of Forces Agreement (SOFA), the law of the host nation concerning reciprocal suspension and revocation, and other international agreements. To the extent an agreement concerning reciprocity may be permitted at a particular overseas installation, the commander must have prior authorization to negotiate and conclude such an international agreement in accordance with applicable international agreements, DODD 5530.3, International Agreements, June 87, and other individual Service instructions.

§ 634.17 Extensions of suspensions and revocations.

(a) Driving in violation of a suspension or revocation imposed under this part will result in the original period of suspension or revocation being increased by 2 years. In addition, administrative action may be initiated based on the commission of any traffic, criminal, or military offenses, for example, active duty military personnel driving on the installation in violation of a lawful order.

(b) For each subsequent determination within a 5-year period that revocation is authorized under §634.9, military personnel, DOD civilians, contractors and NAF employees will be prohibited from obtaining or using an OF 346 for 6 months for each such incident. A determination whether DOD civilian personnel should be prohibited from obtaining or using an OF 346 will be made in accordance with the laws and regulations applicable to civilian personnel. This does not preclude a commander from imposing such prohibition for a first offense, or for a longer period of time for a first or subsequent offense, or for such other reasons as may be authorized.

(c) Commanders may extend a suspension or revocation of driving privileges on personnel until completion of an approved remedial driver training course or alcohol or drug counseling programs after proof is provided.

(d) Commanders may extend a suspension or revocation of driving privileges on civilian personnel convicted of intoxicated driving on the installation until successful completion of a state or installation approved alcohol or drug rehabilitation program.

(e) For Navy personnel, for good cause, the appropriate authority may
withdraw the restricted driving privilege and continue the suspension or revocation period (for example, driver at fault in the traffic accident, or driver cited for a moving violation).

§ 634.18 Reinstatement of driving privileges.

Reinstatement of driving privileges shall be automatic, provided all revocations applicable have expired, proper proof of completion of remedial driving course and/or substance abuse counseling has been provided, and reinstatement requirements of individual’s home state and/or state the individual may have been suspended in, have been met.

Subpart C—Motor Vehicle Registration

§ 634.19 Registration policy.

(a) Motor vehicles will be registered according to guidance in this part and in policies of each Service and DLA. A person who lives or works on an Army, DLA, Air Force, Navy, or Marine Corps installation, or Army National Guard of the U.S. (ARNGUS) facility, or often uses the facilities is required to register his or her vehicle. Also, individuals who access the installation for regular activities such as use of medical facilities and regular recurring activities on the installation should register their vehicles according to a standard operating procedure established by the installation commander. The person need not own the vehicle to register it, but must have a lease agreement, power of attorney, or notarized statement from the owner of the vehicle specifying the inclusive dates for which permission to use the vehicle has been granted.

(b) Vehicles intended for construction and material handling, or used solely off the road, are usually not registered as motor vehicles. Installation commanders may require registration of off-road vehicles and bicycles under a separate local system.

(c) Commanders can grant limited temporary registration for up to 30 days, pending permanent registration, or in other circumstances for longer terms.

(d) Except for reasons of security, all installations and activities of the Services and DLA within the United States and its territories with a vehicle registration system will use and honor the DD Form 2220, (Department of Defense Registration Decal). Registration in overseas commands may be modified in accordance with international agreements or military necessity.

(e) Army Installation commanders will establish local visitor identification for individuals who will be on installation for less than 30 days. The local policy will provide for use of temporary passes that establish a start and end date for which the pass is valid. Army installation commanders must refer to AR 190–16 Chapter 2 for guidance concerning installation access control. (Air Force, see AFI 31–204). Other Armed Services and DLA may develop and issue visitor passes locally.

(f) The conditions in §634.20 must be met to operate a POV on an Army and DLA Installation. Other Armed Services that do not require registration will enforce §634.20 through traffic enforcement actions. Additionally, failure to comply with §634.20 may result in administrative suspension or revocation of driving privileges.

§ 634.20 Privately owned vehicle operation requirements.

Personnel seeking to register their POVs on military installations within the United States or its territories and in overseas areas will comply with the following requirements. (Registration in overseas commands may be modified in accordance with international agreements or military necessity.)

(a) Possess a valid state, overseas command, host nation or international drivers license (within appropriate classification), supported by DD Form 2, or other appropriate identification for DOD civilians, contractors and retirees. DA Form 1602, Civilian Identification Card, is limited for identification on Army installations only.

(b) Possess a certificate of state registration as required by the state in which the vehicle is registered.

(c) Comply with the minimum requirements of the automobile insurance laws or regulations of the state or host nation. In overseas commands
where host nation laws do not require minimum personal injury and property damage liability insurance, the major overseas commander will set reasonable liability insurance requirements for registration and/or operation of POVs within the confines of military installations and areas where the commander exercises jurisdiction. Prior to implementation, insurance requirements in host states or nations should be formally coordinated with the appropriate host agency.

(d) Satisfactorily complete a safety and mechanical vehicle inspection by the state or jurisdiction in which the vehicle is licensed. If neither state nor local jurisdiction requires a periodic safety inspection, installation commanders may require and conduct an annual POV safety inspection; however, inspection facilities must be reasonably accessible to those requiring use. Inspections will meet minimum standards established by the National Highway Traffic Safety Administration (NHTSA) in 49 CFR 570.1 through 570.10. Lights, turn signals, brake lights, horn, wipers, and pollution control devices and standards in areas where applicable, should be included in the inspection. Vehicles modified from factory standards and determined unsafe may be denied access and registration.

(e) Possess current proof of compliance with local vehicle emission inspection if required by the state, and maintenance requirements.

(f) Vehicles with elevated front or rear ends that have been modified in a mechanically unsafe manner are unsafe and will be denied registration. 49 CFR 570.8 states that springs shall not be extended above the vehicle manufacturer’s design height.

§ 634.21 Department of Defense Form 2220.

(a) Use. DD Form 2220 will be used to identify registered POVs on Army, Navy, Air Force, Marine Corps, and DLA installations or facilities. The form is produced in single copy for conspicuous placement on the front of the vehicle only (windshield or bumper). If allowed by state laws, the decal is placed in the center by the rear view mirror or the lower portion of the driver’s side windshield. The requirement to affix the DD Form 2220 to the front windshield or bumper of registered vehicles is waived for General Officers and Flag Officers of all Armed Services, Armed Service Secretaries, Political Appointees, Members of Congress, and the Diplomatic Corps.

(1) Each Service and DLA will procure its own forms and installation and expiration tabs. For the Army, the basic decal will be ordered through publications channels and remain on the vehicle until the registered owner disposes of the vehicle, separates from active duty or other conditions specified in paragraph (a)(2) of this section. Air Force, DLA, and Army retirees may retain DD Form 2220. Army retirees are required to follow the same registration and VRS procedures as active duty personnel. Upon termination of affiliation with the service, the registered owner or authorized operator is responsible for removing the DD Form 2220 from the vehicle and surrender of the decal to the issuing office. Army installation commanders are responsible for the costs of procuring decals with the name of their installation and related expiration tabs. Air Force installations will use the installation tag (4” by ½”) to identify the Air Force Installation where the vehicle is registered. Air Force personnel may retain the DD Form 2220 upon reassignment, retirement, or separation provided the individual is still eligible for continued registration, the registration is updated in SFMIS, and the installation tab is changed accordingly. Position the decal directly under the DD Form 2220.

(2) For other Armed Services and DLA, DD Form 2220 and installation and expiration tabs will be removed from POVs by the owner prior to departure from their current installation, retirement, or separation from military or government affiliation, termination of ownership, registration, liability insurance, or other conditions further identified by local policy.

(b) Specifications. (1) DD Form 2220 and installation and expiration tabs will consist of international blue borders and printing on a white background. Printer information will include the following:
§ 634.23 Specified consent to impoundment.

Personnel registering POVs on DOD installations must consent to the impoundment policy. POV registration forms will contain or have appended to them a certificate with the following statement: “I am aware that (insert number and title of separate Service or DLA directive) and the installation traffic code provide for the removal and temporary impoundment of privately owned motor vehicles that are either parked illegally, or for unreasonable periods, interfering with military operations, creating a safety hazard, disabled by accident, left unattended in a restricted or control area, or abandoned. I agree to reimburse the United States for the cost of towing and storage should my motor vehicle(s), because of such circumstances, be removed and impounded.”

§ 634.22 Termination or denial of registration.

Installation commanders or their designated representatives will terminate POV registration or deny initial registration under the following conditions (decal and tabs will be removed from the vehicle when registration is terminated):

(a) The owner fails to comply with the registration requirements.

(b) The owner sells or disposes of the POV, is released from active duty, separated from the Service, or terminates civilian employment with a military Service or DOD agency. Army and Air Force personnel on a permanent change of station will retain the DD Form 2220 if the vehicle is moved to their new duty station.

(c) The owner is other than an active duty military or civilian employee and discontinues regular operations of the POV on the installation.

(d) The owner’s state, overseas command, or host nation driver’s license is suspended or revoked, or the installation driving privilege is revoked. Air Force does not require removal of the DD Form 2220 when driving privileges are suspended for an individual. When vehicle registration is terminated in conjunction with the revocation of installation driving privileges, the affected person must apply to re-register the POV after the revocation expires. Registration should not be terminated if other family members having installation driving privileges require use of the vehicle.

§ 634.23 Specified consent to impoundment.

Personnel registering POVs on DOD installations must consent to the impoundment policy. POV registration forms will contain or have appended to them a certificate with the following statement: “I am aware that (insert number and title of separate Service or DLA directive) and the installation traffic code provide for the removal and temporary impoundment of privately owned motor vehicles that are either parked illegally, or for unreasonable periods, interfering with military operations, creating a safety hazard, disabled by accident, left unattended in a restricted or control area, or abandoned. I agree to reimburse the United States for the cost of towing and storage should my motor vehicle(s), because of such circumstances, be removed and impounded.”
§ 634.24 Traffic planning and codes.

(a) Safe and efficient movement of traffic on an installation requires traffic supervision. A traffic supervision program includes traffic circulation planning and control of motor vehicle traffic; publication and enforcement of traffic laws and regulations; and investigation of motor vehicle accidents.

(b) Installation commanders will develop traffic circulation plans that provide for the safest and most efficient use of primary and secondary roads. Circulation planning should be a major part of all long-range master planning at installations. The traffic circulation plan is developed by the installation law enforcement officer, engineer, safety officer, and other concerned staff agencies. Highway engineering representatives from adjacent civil communities must be consulted to ensure the installation plan is compatible with the current and future circulation plan of the community. The plan should include the following:

(1) Normal and peak load routing based on traffic control studies.
(2) Effective control of traffic using planned direction, including measures for special events and adverse road or weather conditions.
(3) Point control at congested locations by law enforcement personnel or designated traffic directors or wardens, including trained school-crossing guards.
(4) Use of traffic control signs and devices.
(5) Efficient use of available parking facilities.
(6) Efficient use of mass transportation.

(c) Traffic control studies will provide factual data on existing roads, traffic density and flow patterns, and points of congestion. The installation law enforcement officer and traffic engineer usually conduct coordinated traffic control studies to obtain the data. Accurate data will help determine major and minor routes, location of traffic control devices, and conditions requiring engineering or enforcement services.

(d) The (Military) Surface Deployment and Distribution Command Transportation Engineering Agency (SDDCTEA) will help installation commanders solve complex highway traffic engineering problems. SDDCTEA traffic engineering services include—

(1) Traffic studies of limited areas and situations.
(2) Complete studies of traffic operations of entire installations. (This can include long-range planning for future development of installation roads, public highways, and related facilities.)
(3) Assistance in complying with established traffic engineering standards.

(e) Installation commanders should submit requests for traffic engineering services in accordance with applicable service or agency directives.

§ 634.25 Installation traffic codes.

(a) Installation or activity commanders will establish a traffic code for operation of motor vehicles on the installation. Commanders in overseas areas will establish a traffic code, under provisions of this part, to the extent military authority is empowered to regulate traffic on the installation under the applicable SOFA. Traffic codes will contain the rules of the road (parking violations, towing instructions, safety equipment, and other key provisions). These codes will, where possible, conform to the code of the State or host nation in which the installation is located. In addition, the development and publication of installation traffic codes will be based on the following:

(2) Applicable portions of the Uniform Vehicle Code and Model Traffic Ordinance published by the National Committee on Uniform Traffic Laws and Ordinances.

(b) The installation traffic code will contain policy and procedures for the towing, searching, impounding, and inventorying of POVs. These provisions should be well publicized and contain the following:

(1) Specific violations and conditions under which the POV will be impounded and towed.
(2) Procedures to immediately notify the vehicle owner.
(3) Procedures for towing and storing impounded vehicles.
(4) Actions to dispose of the vehicle after lawful impoundment.

(5) Violators are responsible for all costs of towing, storage and impounding of vehicles for other than evidentiary reasons.

(c) Installation traffic codes will also contain the provisions discussed as follows: (Army users, see AR 385–55).

(1) Motorcycles and mopeds. For motorcycles and other self-propelled, open, two-wheel, three-wheel, and four-wheel vehicles powered by a motorcycle-type engine, the following traffic rules apply:

(i) Headlights will be on at all times when in operation.

(ii) A rear view mirror will be attached to each side of the handlebars.

(iii) Approved protective helmets, eye protection, hard-soled shoes, long trousers and brightly colored or reflective outer upper garment will be worn by operators and passengers when in operation.

(2) Restraint systems. (i) Restraint systems (seat belts) will be worn by all operators and passengers of U.S. Government vehicles on or off the installation.

(ii) Restraint systems will be worn by all civilian personnel (family members, guests, and visitors) driving or riding in a POV on the installation.

(iii) Restraint systems will be worn by all military service members and Reserve Component members on active Federal service driving or riding in a POV whether on or off the installation.

(iv) Infant/child restraint devices (car seats) will be required in POVs for children 4 years old or under and not exceeding 45 pounds in weight.

(v) Restraint systems are required only in vehicles manufactured after model year 1986.

(3) Driver distractions. Vehicle operators on a DoD Installation and operators of Government owned vehicles shall not use cell phones unless the vehicle is safely parked or unless they are using a hands-free device. The wearing of any other portable headphones, earphones, or other listening devices (except for hand-free cellular phones) while operating a motor vehicle is prohibited. Use of those devices impairs driving and masks or prevents recognition of emergency signals, alarms, announcements, the approach of vehicles, and human speech. DoD Component safety guidance should note the potential for driver distractions such as eating and drinking, operating radios, CD players, global positioning equipment, etc. Whenever possible this should only be done when the vehicle is safely parked.

(d) Only administrative actions (reprimand, assessment of points, loss of on-post driving privileges, or other actions) will be initiated against service members for off-post violations of the installation traffic code.

(e) In States where traffic law violations are State criminal offenses, such laws are made applicable under the provisions of 18 U.S.C. 13 to military installations having concurrent or exclusive Federal jurisdiction.

(f) In those States where violations of traffic law are not considered criminal offenses and cannot be assimilated under 18 U.S.C., DODD 5525.4, enclosure 1 expressly adopts the vehicular and pedestrian traffic laws of such States and makes these laws applicable to military installations having concurrent or exclusive Federal jurisdiction. It also delegates authority to installation commanders to establish additional vehicular and pedestrian traffic rules and regulations for their installations. Persons found guilty of violating the vehicular and pedestrian traffic laws made applicable on the installation under provisions of that directive are subject to a fine as determined by the local magistrate or imprisonment for not more than 30 days, or both, for each violation. In those States where traffic laws cannot be assimilated, an extract copy of this paragraph (f) and a copy of the delegation memorandum in DODD 5525.4, enclosure 1, will be posted in a prominent place accessible to persons assigned, living, or working on the installation.

(g) In those States where violations of traffic laws cannot be assimilated because the Federal Government’s jurisdictional authority on the installation or parts of the installation is only proprietary, neither 18 U.S.C. 13 nor the delegation memorandum in DoDD
§ 634.26 Traffic law enforcement principles.

(a) Traffic law enforcement should motivate drivers to operate vehicles safely within traffic laws and regulations and maintain an effective and efficient flow of traffic. Effective enforcement should emphasize voluntary compliance by drivers and can be achieved by the following actions:

1. Publishing a realistic traffic code well known by all personnel.
3. Ensuring enforcement personnel establish courteous, personal contact with drivers and act promptly when driving behavior is improper or a defective vehicle is observed in operation.
4. Maintaining an aggressive program to detect and apprehend persons who drive while privileges are suspended or revoked.
5. Using sound discretion and judgment in deciding when to apprehend, issue citations, or warn the offender.

(b) Selective enforcement will be used when practical. Selective enforcement deters traffic violations and reduces accidents by the presence or suggested presence of law enforcement personnel at places where violations, congestion, or accidents frequently occur. Selective enforcement applies proper enforcement measures to traffic congestion and focuses on selected time periods, conditions, and violations that cause accidents. Law enforcement personnel use selective enforcement because that practice is the most effective use of resources.

(c) Enforcement activities against intoxicated driving will include—

1. Detecting, apprehending, and testing persons suspected of driving under the influence of alcohol or drugs.
2. Training law enforcement personnel in special enforcement techniques.
3. Enforcing blood-alcohol concentration standards. (See §634.34).
4. Denying installation driving privileges to persons whose use of alcohol or other drugs prevents safe operation of a motor vehicle.

(d) Installation officials will formally evaluate traffic enforcement on a regular basis. That evaluation will examine procedures to determine if the following elements of the program are effective in reducing traffic accidents and deaths:

1. Selective enforcement measures;
2. Suspension and revocation actions; and
3. Chemical breath-testing programs.

§ 634.27 Speed-measuring devices.

Speed-measuring devices will be used in traffic control studies and enforcement programs. Signs may be posted to indicate speed-measuring devices are being used.

(a) Equipment purchases. Installations will ensure operators attend an appropriate training program for the equipment in use.

(b) Training and certification standards. (1) The commander of each installation using traffic radar will ensure that personnel selected as operators of such devices meet training and certification requirements prescribed by the State (or SOFA) in which the installation is located. Specific information on course dates, costs, and prerequisites for attending may be obtained by contacting the State agency responsible for police traffic radar training.

2. Installation commanders located in States or overseas areas where no formal training program exists, or where the military personnel are unable or ineligible to participate in police traffic radar training programs, may implement their own training program or use a selected civilian institution or manufacturer’s course.

3. The objective of the civilian or manufacturer-sponsored course is to improve the effectiveness of speed enforcement through the proper and efficient use of speed-measurement radar.
On successful completion, the course graduate must be able to—

(i) Describe the association between excessive speed and accidents, deaths, and injuries, and describe the traffic safety benefits of effective speed control.

(ii) Describe the basic principles of radar speed measurement.

(iii) Identify and describe the Service’s policy and procedures affecting radar speed measurement and speed enforcement.

(iv) Identify the specific radar instrument used and describe the instrument’s major components and functions.

(v) Demonstrate basic skills in checking calibration and operating the specific radar instrument(s).

(vi) Demonstrate basic skills in preparing and presenting records and courtroom testimony relating to radar speed measurement and enforcement.

(v) Recertification. Recertification of operators will occur every 3 years, or as prescribed by State law.

§ 634.29 Traffic accident investigation reports.

(a) Accidents requiring immediate reports. The driver or owner of any vehicle involved in an accident, as described in §634.28, on the installation, must immediately notify the installation law enforcement office. The operator of any Government vehicle involved in a similar accident off the installation must immediately notify the local civilian law enforcement agency having jurisdiction, as well as law enforcement personnel of the nearest military installation.

(b) Investigation records. Installation law enforcement officials will record traffic accident investigations on Service/DLA forms. Information will be released according to Service/DLA policy, the Privacy Act, and the Freedom of Information Act.

(c) Army law enforcement officers. These officers provide the local Safety Office copies of traffic accident investigation reports pertaining to accidents investigated by military police that resulted in a fatality, personal injury, or estimated damage to Government vehicles or property in excess of $1,000.

(d) POV accidents not addressed in §634.28. Guidance for reporting these cases is provided as follows:

(1) Drivers or owners of POVs will be required to submit a written report to the installation law enforcement office within 24 hours of an accident in the following cases, with all information listed in paragraph (d)(3) of this section:

(i) The accident occurs on the installation.

(ii) The accident involves no personal injury.

(iii) The accident involves only minor damage to the POV and the vehicle can be safely and normally driven from the scene under its own power.

(2) Information in the written report cannot be used in criminal proceedings against the person submitting it unless it was originally categorized a hit and run and the violator is the person submitting the report. Rights advisement will be given prior to any criminal traffic statements provided by violators.
Within the United States, the installation law enforcement official may require such reporting on Service forms or forms of the State jurisdiction.

(3) Reports required in paragraph (d) (1) of this section by the Army will include the following about the accident:
   (i) Location, date, and time.
   (ii) Identification of all drivers, pedestrians, and passengers involved.
   (iii) Identification of vehicles involved.
   (iv) Speed and direction of travel of each vehicle involved, including a sketch of the collision and roadway with street names and north arrow.
   (v) Property damage involved.
   (vi) Environmental conditions at the time of the incident (weather, visibility, road surface condition, and other factors).
   (vii) A narrative description of the events and circumstances concerning the accident.

§ 634.30 Use of traffic accident investigation report data.

(a) Data derived from traffic accident investigation reports and from vehicle owner accident reports will be analyzed to determine probable causes of accidents. When frequent accidents occur at a location, the conditions at the location and the types of accidents (collision diagram) will be examined.

(b) Law enforcement personnel and others who prepare traffic accident investigation reports will indicate whether or not seat restraint devices were being used at the time of the accident.

(c) When accidents warrant, an installation commander may establish a traffic accident review board. The board will consist of law enforcement, engineer, safety, medical, and legal personnel. The board will determine principal factors leading to the accident and recommend measures to reduce the number and severity of accidents on and off the installation. (The Air Force will use Traffic Safety Coordinating Groups. The Navy will use Traffic Safety Councils per OPNAVINST 5100.12 Series).

(d) Data will be shared with the installation legal, engineer, safety, and transportation officers. The data will be used to inform and educate drivers and to conduct traffic engineering studies.

(e) Armv traffic accident investigation reports will be provided to Army Centralized Accident Investigation of Ground Accidents (CAIG) boards on request. The CAIG boards are under the control of the Commander, U.S. Army Safety Center, Fort Rucker, AL 36362–5963. These boards investigate Class A on-duty, non-POV accidents and other selected accidents Army-wide (See AR 385–40). Local commanders provide additional board members as required to complete a timely and accurate investigation. Normally, additional board members are senior equipment operators, maintenance officer, and medical officers. However, specific qualifications of the additional board members may be dictated by the nature of the accident.

(f) The CAIG program is not intended to interfere with, impede, or delay law enforcement agencies in the execution of regulatory responsibilities that apply to the investigation of accidents for a determination of criminal intent or criminal acts. Criminal investigations have priority.

(g) Army law enforcement agencies will maintain close liaison and cooperation with CAIG boards. Such cooperation, particularly with respect to interviews of victims and witnesses and in collection and preservation of physical evidence, should support both the CAIG and law enforcement collateral investigations.

§ 634.31 Parking.

(a) The most efficient use of existing on- and off-street parking space should be stressed on a nonreserved (first-come, first-served) basis.

(b) Reserved parking facilities should be designated as parking by permit or numerically by category of eligible parkers. Designation of parking spaces by name, grade, rank, or title should be avoided.

(c) Illegal parking contributes to congestion and slows traffic flow on an installation. Strong enforcement of parking restrictions results in better use of available parking facilities and eliminates conditions causing traffic accidents.
(d) The “Denver boot” device is authorized for use as a technique to assist in the enforcement of parking violations where immobilization of the POV is necessary for safety. Under no circumstances should the device be used to punish or “teach a lesson” to violators. Booting should not be used if other reasonably effective but less restrictive means of enforcement (such as warnings, ticketing, reprimands, revocations, or suspensions of on-post driving privileges) are available. Procedures for booting must be developed as follows:

(1) Local standing operating procedures (SOPs) must be developed to control the discretion of enforcers and limit booting to specific offenses. SOPs should focus on specific reasons for booting, such as immobilization of unsafe, uninspected, or unregistered vehicles or compelling the presence of repeat offenders. All parking violations must be clearly outlined in the installation traffic code.

(2) Drivers should be placed on notice that particular violations or multiple violations may result in booting. Also, drivers must be provided with a prompt hearing and an opportunity to obtain the release of their property.

(3) To limit liability, drivers must be warned when a boot is attached to their vehicle and instructed how to have the boot removed without damaging the vehicle.

§ 634.32 Traffic violation reports.

(a) Most traffic violations occurring on DOD installations (within the UNITED STATES or its territories) should be referred to the proper U.S. Magistrate. (Army, see AR 190–29; DLA, see DLAI 5720.4; and Air Force, see AFI 51–905). However, violations are not referred when—

(1) The operator is driving a Government vehicle at the time of the violation.

(2) A Federal Magistrate is either not available or lacks jurisdiction to hear the matter because the violation occurred in an area where the Federal Government has only proprietary legislative jurisdiction.

(3) Mission requirements make referral of offenders impractical.

(b) Installation commanders will establish administrative procedures for booting.

(1) All traffic violators on military installations will be issued either a DD Form 1408 (Armed Forces Traffic Ticket) or a DD Form 1805 (United States District Court Violation Notice), as appropriate. Unless specified otherwise by separate Service/DLA policy, only on-duty law enforcement personnel (including game wardens) designated by the installation law enforcement officer may issue these forms. Air Force individuals certified under the Parking Traffic Warden Program may issue DD Form 1408 in areas under their control. A U.S. Magistrate is available but the accused refuses to consent to the jurisdiction of the court and the U.S. Attorney refuses to process the case before a U.S. District Court. For the Navy, DUI and driving under the influence of drugs cases will be referred to the Federal Magistrate.

(2) A copy of all reports on military personnel and DOD civilian employees apprehended for intoxicated driving will be forwarded to the installation alcohol and drug abuse facility.

(c) Installation commanders will establish procedures used for disposing of traffic violation cases through administrative or judicial action consistent with the Uniform Code of Military Justice (UCMJ) and Federal law.

(d) DD Form 1805 will be used to refer violations of State traffic laws made applicable to the installation (Assimilative Crimes Act (18 U.S.C. 13) and the delegation memorandum in DoDD 5525.4, enclosure 1, and other violations of Federal law) to the U.S. Magistrate. (Army users, see AR 190–29.)

(1) A copy of DD Form 1805 and any traffic violation reports on military personnel and DOD civilian employees will be forwarded to the commander or supervisor of the violator. DA Form 3975 may be used to forward the report.

(2) Detailed instructions for properly completing DD Form 1805 are contained in separate Service policy directives.

(3) The assimilation of State traffic laws as Federal offenses should be identified by a specific State code reference in the CODE SECTION block of the DD
§ 634.33 Training of law enforcement personnel.

(a) As a minimum, installation law enforcement personnel will be trained to do the following:

(1) Recognize signs of alcohol and other drug impairment in persons operating motor vehicles.

(2) Prepare DD Form 1920 (Alcohol Influence Report).

(3) Perform the three field tests of the improved sobriety testing techniques (§ 634.36 (b)).

(4) Determine when a person appears intoxicated but is actually physically or mentally ill and requires prompt medical attention.

(5) Understand the operation of breath-testing devices.

(b) Each installation using breath-testing devices will ensure that operators of these devices—

(1) Are chosen for integrity, maturity, and sound judgment.

(2) Meet certification requirements of the State where the installation is located.

(c) Installations located in States or overseas areas having a formal breath-testing and certification program should ensure operators attend that training.

(d) Installations located in States or overseas areas with no formal training program will train personnel at courses offered by selected civilian institutions or manufacturers of the equipment.

(e) Operators must maintain proficiency through refresher training every 18 months or as required by the State.

§ 634.34 Blood alcohol concentration standards.

(a) Administrative revocation of driving privileges and other enforcement measures will be applied uniformly to offenders driving under the influence of alcohol or drugs. When a person is tested under the implied consent provisions of § 634.8, the results of the test will be evaluated as follows:

(1) If the percentage of alcohol in the person’s blood is less than 0.05 percent, presume the person is not under the influence of alcohol.

(2) If the percentage is 0.05 but less than 0.08, presume the person may be impaired. This standard may be considered with other competent evidence in determining whether the person was under the influence of alcohol.

(3) If the percentage is 0.08 or more, or if tests reflect the presence of illegal drugs, the person was driving while intoxicated.

(b) Percentages in paragraph (a) of this section are percent of weight by volume of alcohol in the blood based on grams of alcohol per 100 milliliters of blood. These presumptions will be considered with other evidence in determining intoxication.
§ 634.35 Chemical testing policies and procedures.

(a) Validity of chemical testing. Results of chemical testing are valid under this part only under the following circumstances:

(1) Blood, urine, or other bodily substances are tested using generally accepted scientific and medical methods and standards.

(2) Breath tests are administered by qualified personnel (§ 634.33).

(3) An evidential breath-testing device approved by the State or host nation is used. For the Army, Air Force, and Marine Corps, the device must also be listed on the NHTSA conforming products list published in the “Conforming Products List for instruments that conform to the Model Specification for Evidential Breath Testing Devices (58 FR 48705), and amendments.”

(4) Procedures established by the State or host nation or as prescribed in paragraph (b) of this section are followed.

(b) Breath-testing device operational procedures. If the State or host nation has not established procedures for use of breath-testing devices, the following procedures will apply:

(1) Screening breath-testing devices will be used—

(i) During the initial traffic stop as a field sobriety testing technique, along with other field sobriety testing techniques, to determine if further testing is needed on an evidential breath-testing device.

(ii) According to manufacture operating instructions. (For the Army, Air Force and Marine Corps, the screening breath-testing device must also be listed on the NHTSA conforming products list published in the “Model Specifications for Evidential Breath Testers” (September 17, 1993, 58 FR 48705).

(2) Evidential breath-testing devices will be used as follows:

(i) Observe the person to be tested for at least 15 minutes before collecting the breath specimen. During this time, the person must not drink alcoholic beverages or other fluids, eat, smoke, chew tobacco, or ingest any substance.

(ii) Comply with operational procedures in the manufacturer’s current instruction manual.

(iii) Comply with operational procedures in the manufacturer’s current instruction manual.

(iv) Perform preventive maintenance as required by the instruction manual.

(c) Chemical tests of personnel involved in fatal accidents. (1) Installation medical authorities will immediately notify the installation law enforcement officer of—

(i) The death of any person involved in a motor vehicle accident.

(ii) The circumstances surrounding such an accident, based on information available at the time of admission or receipt of the body of the victim.

(2) Medical authorities will examine the bodies of those persons killed in a motor vehicle accident to include drivers, passengers, and pedestrians subject to military jurisdiction. They will also examine the bodies of dependents, who are 16 years of age or older, if the sponsors give their consent. Tests for the presence and concentration of alcohol or other drugs in the person’s blood, bodily fluids, or tissues will be made as soon as possible and where practical within 8 hours of death. The test results will be included in the medical reports.

(3) As provided by law and medical conditions permitting, a blood or breath sample will be obtained from any surviving operator whose vehicle is involved in a fatal accident.

§ 634.36 Detection, apprehension, and testing of intoxicated drivers.

(a) Law enforcement personnel usually detect drivers under the influence of alcohol or other drugs by observing unusual or abnormal driving behavior. Drivers showing such behavior will be stopped immediately. The cause of the unusual driving behavior will be determined, and proper enforcement action will be taken.

(b) When a law enforcement officer reasonably concludes that the individual driving or in control of the vehicle is impaired, field sobriety tests should be conducted on the individual. The DD Form 1920 may be used by law enforcement agencies in examining, interpreting, and recording results of such tests. Law enforcement personnel should use a standard field sobriety test (such as one-leg stand or walk and
§ 634.37 Voluntary breath and bodily fluid testing based on implied consent.

(a) Implied consent policy is explained in §634.8.

(b) Tests may be administered only if the following conditions are met:

(1) The person was lawfully stopped while driving, operating, or in actual physical control of a motor vehicle on the installation.

(2) Reasonable suspicion exists to believe that the person was driving under the influence of alcohol or drugs.

(3) A request was made to the person to consent to the tests combined with a warning that failure to voluntarily submit to or complete a chemical test of bodily fluids or breath will result in the revocation of driving privileges.

(c) As stated in paragraphs (a) and (b) of this section, the law enforcement official relying on implied consent will warn the person that driving privileges will be revoked if the person fails to voluntarily submit to or complete a requested chemical test of bodily fluids or breath will result in the revocation of driving privileges.

(d) Special rules exist for persons who have hemophilia, other blood-clotting disorders, or any medical or surgical disorder being treated with an anticoagulant. These persons—

(1) May refuse a blood extraction test without penalty.

(2) Will not be administered a blood extraction test to determine alcohol or other drug concentration or presence under this part.

(e) May be given breath or urine tests, or both.

(e) If a person suspected of intoxicated driving refuses to submit to a chemical test, a test will not be administered except as specified in §634.38.

§ 634.38 Involuntary extraction of bodily fluids in traffic cases.

(a) General. The procedures outlined in this section pertain only to the investigation of individuals stopped, apprehended, or cited on a military installation for any offense related to driving a motor vehicle and for whom probable cause exists to believe that such individual is intoxicated. Exactions of body fluids in furtherance of other kinds of investigations are governed by the Manual for Courts-Martial, United States, Military Rule of Evidence 315 (2002) (MRE 315), and regulatory rules concerning requesting and granting authorizations for searches.

(1) Air Force policy on nonconsensual extraction of blood samples is addressed in AFI 44–102.

(2) Army and Marine Corps personnel should not undertake the nonconsensual extraction of body fluids for reasons other than a valid medical purpose without first obtaining the advice and concurrence of the installation staff judge advocate or his or her designee.

(3) DLA policy on nonconsensual taking of blood samples is contained in DLAR 5700.1.

(b) Rule. Involuntary bodily fluid extraction must be based on valid search and seizure authorization. An individual subject to the UCMJ who does not consent to chemical testing, as described in §634.37, may nonetheless be subjected to an involuntary extraction of bodily fluids, including blood and urine, only in accordance with the following procedures:

(1) An individual subject to the UCMJ who was driving a motor vehicle and suspected of being under the influence of an intoxicant may be subjected to a nonconsensual bodily fluid extraction to test for the presence of intoxicants only when there is a probable cause to believe that such an individual was driving or in control of a vehicle while under the influence of an intoxicant.
A search authorization by an appropriate commander or military magistrate obtained pursuant to MRE 315, is required prior to such nonconsensual extraction.

A search authorization is not required under such circumstances when there is a clear indication that evidence of intoxication will be found and there is reason to believe that the delay necessary to obtain a search authorization would result in the loss or destruction of the evidence sought.

Because warrantless searches are subject to close scrutiny by the courts, obtaining an authorization is highly preferable. Warrantless searches generally should be conducted only after coordination with the servicing staff judge advocate or legal officer, and attempts to obtain authorization from an appropriate official prove unsuccessful due to the unavailability of a commander or military magistrate.

If authorization from the military magistrate or commander proves unsuccessful due to the unavailability of such officials, the commander of a medical facility is empowered by MRE 315 to authorize such extraction from an individual located in the facility at the time the authorization is sought.

Before authorizing the involuntary extraction, the commander of the medical facility should, if circumstances permit, coordinate with the servicing staff judge advocate or legal officer.

The medical facility commander authorizing the extraction under MRE 315 need not be on duty as the attending physician at the facility where the extraction is to be performed and the actual extraction may be accomplished by other qualified medical personnel.

The authorizing official may consider his or her own observations of the individual in determining probable cause.

Role of medical personnel. Authorization for the nonconsensual extraction of blood samples for evidentiary purposes by qualified medical personnel is independent of, and not limited by, provisions defining medical care, such as the provision for nonconsensual medical care pursuant to AR 600–20, section IV. Extraction of blood will be accomplished by qualified medical personnel. (See MRE 312(g)).

In performing this duty, medical personnel are expected to use only that amount of force that is reasonable and necessary to administer the extraction.

Any force necessary to overcome an individual’s resistance to the extraction normally will be provided by law enforcement personnel or by personnel acting under orders from the member’s unit commander.

Life endangering force will not be used in an attempt to effect nonconsensual extractions.

All law enforcement and medical personnel will keep in mind the possibility that the individual may require medical attention for possible disease or injury.

Nonconsensual extractions of blood will be done in a manner that will not interfere with or delay proper medical attention. Medical personnel will determine the priority to be given involuntary blood extractions when other medical treatment is required.

Use of Army medical treatment facilities and personnel for blood alcohol testing has no relevance to whether or not the suspect is eligible for military medical treatment. The medical effort in such instances is in support of a valid military mission (law enforcement), not related to providing medical treatment to an individual.

Testing at the request of the apprehended person.

A person subject to tests under §634.8 may request that an additional test be done privately. The person may choose a doctor, qualified technician, chemist, registered nurse, or other qualified person to do the test. The person must pay the cost of the test. The test must be a chemical test approved by the State or host nation in an overseas command. All tests will be completed as soon as possible, with any delay being noted on the results.

If the person requests this test, the suspect is responsible for making all arrangements. If the suspect fails to or cannot obtain any additional test, the results of the tests that were done at the direction of a law enforcement official are not invalid and may still be used to support actions under separate
§ 634.40 General off installation traffic activities.

In areas not under military control, civil authorities enforce traffic laws. Law enforcement authorities will establish a system to exchange information with civil authorities. Army and Air Force installation law enforcement authorities will establish a system to exchange information with civil authorities to enhance the chain of command’s visibility of a soldier’s and airman’s off post traffic violations. These agreements will provide for the assessment of traffic points based on reports from state licensing authorities involving Army military personnel. The provisions of subpart E of this part and the VRS automated system provide for the collection of off post traffic incident reports and data. As provided in AR 190–45, civilian law enforcement agencies are considered routine users of Army law enforcement data and will be granted access to data when available from Army law enforcement systems of records. Off-installation traffic activities in overseas areas are governed by formal agreements with the host nation government. Procedures should be established to process reports received from civil authorities on serious traffic violations, accidents, and intoxicated driving incidents involving persons subject to this part. The exchange of information is limited to Army and Air Force military personnel. Provost marshals will not collect and use data concerning civilian employees, family members, and contract personnel except as allowed by state and Federal laws.

§ 634.41 Compliance with State laws.

(a) Installation commanders will inform service members, contractors and DOD civilian employees to comply with State and local traffic laws when operating government motor vehicles.

(b) Commanders will coordinate with the proper civil law enforcement agency before moving Government vehicles that exceed legal limits or regulations or that may subject highway users to unusual hazards. (See AR 55–162/OPNAVINST 4600.11D/AFJI 24–216/MCO 4643.5C).

(c) Installation commanders will maintain liaison with civil enforcement agencies and encourage the following:

(1) Release of a Government vehicle operator to military authorities unless one of the following conditions exists.

(i) The offense warrants detention.

(ii) The person’s condition is such that further operation of a motor vehicle could result in injury to the person or others.

(2) Prompt notice to military authorities when military personnel or drivers of Government motor vehicles have—

(i) Committed serious violations of civil traffic laws.

(ii) Been involved in traffic accidents.

(3) Prompt notice of actions by a State or host nation to suspend, revoke, or restrict the State or host nation driver’s license (vehicle operation privilege) of persons who—

(i) Operate Government motor vehicles.

(ii) Regularly operate a POV on the installation. (See also §634.16).

§ 634.42 Civil-military cooperative programs.

(a) State-Armed Forces Traffic Workshop Program. This program is an organized effort to coordinate military and civil traffic safety activities throughout a State or area. Installation commanders will cooperate with State and local officials in this program and provide proper support and participation.

(b) Community-Installation Traffic Workshop Program. Installation commanders should establish a local workshop program to coordinate the installation traffic efforts with those of local communities. Sound and practical traffic planning depends on a balanced program of traffic enforcement, engineering, and education. Civilian and military legal and law enforcement officers, traffic engineers, safety officials, and public affairs officers should take part.
§ 634.43 Driving records.

Each Service and DLA will use its own form to record vehicle traffic accidents, moving violations, suspension or revocation actions, and traffic point assessments involving military and DOD civilian personnel, their family members, and other personnel operating motor vehicles on a military installation. Army installations will use DA Form 3626 (Vehicle Registration/Driver Record) for this purpose. Table 5–1 of Part 634 prescribes mandatory minimum or maximum suspension or revocation periods. Traffic points are not assessed for suspension or revocation actions.

| Table 5–1 of Part 634 Suspension/Revocation of Driving Privileges (See Notes 1 and 2) |
| Assessment 1: Two-year revocation is mandatory on determination of facts by installation commander. (For Army, 5-year revocation is mandatory.) Violation: Driving while driver’s license or installation driving privileges are under suspension or revocation. |
| Assessment 2: One-year revocation is mandatory on determination of facts by installation commander. Violation: Refusal to submit to or failure to complete chemical tests (implied consent). |
| Assessment 3: One-year revocation is mandatory on conviction. Violation: A. Manslaughter (or negligent homicide by vehicle) resulting from the operation of a motor vehicle. B. Driving or being in actual physical control of a motor vehicle while under the influence of intoxicating liquor (0.08% or greater) on DOD installations; violation of civil law off post. C. Driving a motor vehicle while under the influence of any narcotic, or while under the influence of any other drug (including alcohol) to the degree rendered incapable of safe vehicle operation. D. Use of a motor vehicle in the commission of a felony. Fleeing the scene of an accident involving death or personal injury (hit and run). E. Perjury or making a false statement or affidavit under oath to responsible officials relating to the ownership or operation of motor vehicles. F. Unauthorized use of a motor vehicle belonging to another, when the act does not amount to a felony. |
| Assessment 4: Suspension for a period of 6 months or less or revocation for a period not to exceed 1 year is discretionary. Violation: A. Mental or physical impairment (not including alcohol or other drug use) to the degree rendered incompetent to drive. B. Commission of an offense in another State which, if committed on the installation, would be grounds for suspension or revocation. C. Permitting an unlawful or fraudulent use of an official driver’s license. D. Conviction of fleeing, or attempting to elude, a police officer. E. Conviction of racing on the highway. |
| Assessment 5: Loss of OP 46 for minimum of 6 months is discretionary. Violation: Receiving a second 1-year suspension or revocation of driving privileges within 5 years. |

Notes

1. When imposing a suspension or revocation because of an off-installation offense, the effective date should be the same as the date of civil conviction, or the date that State or host-nation driving privileges are suspended or revoked. This effective date can be retroactive.

2. No points are assessed for revocation or suspension actions. Except for implied consent violations, revocations must be based on a conviction by a civilian court or courts-martial, nonjudicial punishment under Article 15, UCMJ, or a separate hearing as addressed in this part. If revocation for implied consent is combined with another revocation, such as 1 year for intoxicated driving, revocations may run consecutively (total of 24 months) or concurrently (total of 12 months). The installation commander’s policy should be applied systematically and not on a case-by-case basis.

§ 634.44 The traffic point system.

The traffic point system provides a uniform administrative device to impartially judge driving performance of Service and DLA personnel. This system is not a disciplinary measure or a substitute for punitive action. Further, this system is not intended to interfere in any way with the reasonable exercise of an installation commander’s prerogative to issue, suspend, revoke, deny, or reinstate installation driving privileges.

§ 634.45 Point system application.

(a) The Services and DLA are required to use the point system and procedures prescribed in this section without change.
(b) The point system in table 5-2 of this part applies to all operators of U.S. Government motor vehicles, on or off Federal property. The system also applies to violators reported to installation officials in accordance with §634.32.

(c) Points will be assessed when the person is found to have committed a violation and the finding is by either the unit commander, civilian supervisor, a military or civilian court (including a U.S. Magistrate), or by payment of fine, forfeiture of pay or allowances, or posted bond, or collateral.

**TABLE 5–2 OF PART 634 POINT ASSESSMENT FOR MOVING TRAFFIC VIOLATIONS (SEE NOTE 1)**

| A. Violation: Reckless driving (willful and wanton disregard for the safety of persons or property). | Points assessed: 6 |
| B. Violation: Owner knowingly and willfully permitting a physically impaired person to operate the owner’s motor vehicle. | Points assessed: 6 |
| C. Violation: Fleeing the scene (hit and run) - property damage only. | Points assessed: 6 |
| D. Violation: Driving vehicle while impaired (blood-alcohol content more than 0.05 percent and less than 0.08 percent). | Points assessed: 6 |
| E. Violation: Speed contests. | Points assessed: 6 |
| F. Violation: Speed too fast for conditions. | Points assessed: 2 |
| G. Violation: Speed too slow for traffic conditions, and/or impeding the flow of traffic, causing potential safety hazard. | Points assessed: 2 |
| H. Violation: Failure of operator or occupants to use available restraint system devices while moving (operator assessed points). | Points assessed: 2 |
| I. Violation: Failure to properly restrain children in a child restraint system while moving (when child is 4 years of age or younger or the weight of child does not exceed 45 pounds). | Points assessed: 2 |
| J. Violation: One to 10 miles per hour over posted speed limit. | Points assessed: 3 |
| K. Violation: Over 10 but not more than 15 miles per hour above posted speed limit. | Points assessed: 4 |
| L. Violation: Over 15 but not more than 20 miles per hour above posted speed limit. | Points assessed: 5 |
| M. Violation: Over 20 miles per hour above posted speed limit. | Points assessed: 6 |
| N. Violation: Following too close. | Points assessed: 4 |
| O. Violation: Failure to yield right of way to emergency vehicle. | Points assessed: 4 |
| P. Violation: Failure to stop for school bus or school-crossing signals. | Points assessed: 4 |
| Q. Violation: Failure to obey traffic signals or traffic instructions of an enforcement officer or traffic warden; or any official regulatory traffic sign or device requiring a full stop or yield of right of way; denying entry; or requiring direction of traffic. | Points assessed: 4 |
| R. Violation: Improper passing. | Points assessed: 4 |
| S. Violation: Failure to yield (no official sign involved). | Points assessed: 4 |
| T. Violation: Improper turning movements (no official sign involved). | Points assessed: 3 |
| U. Violation: Wearing of headphones/earphones while driving motor vehicles (two or more wheels). | Points assessed: 3 |
| V. Violation: Failure to wear an approved helmet and/or reflectorized vest while operating or riding on a motorcycle, MOPED, or a three or four-wheel vehicle powered by a motorcycle-like engine. | Points assessed: 3 |
| W. Violation: Improper overtaking. | Points assessed: 3 |
| X. Violation: Other moving violations (involving driver behavior only). | Points assessed: 3 |
| Y. Violation: Operating an unsafe vehicle. (See Note 2). | Points assessed: 2 |
| Z. Violation: Driver involved in accident is deemed responsible (only added to points assessed for specific offenses). | Points assessed: 1 |

**NOTES**

1. When two or more violations are committed on a single occasion, points may be assessed for each individual violation.
2. This measure should be used for other than minor vehicle safety defects or when a driver or registrant fails to correct a minor defect (for example, a burned out headlight not replaced within the grace period on a warning ticket).

§634.46 Point system procedures.

(a) Reports of moving traffic violations recorded on DD Form 1408 or DD Form 1805 will serve as a basis for determining point assessment. For DD Form 1408, return endorsements will be required from commanders or supervisors.
(b) On receipt of DD Form 1408 or other military law enforcement report of a moving violation, the unit commander, designated supervisor, or person otherwise designated by the installation commander will conduct an inquiry. The commander will take or recommend proper disciplinary or administrative action. If a case involves judicial or nonjudicial actions, the final report of action taken will not be forwarded until final adjudication.

(c) On receipt of the report of action taken (including action by a U.S. Magistrate Court on DD Form 1805), the installation law enforcement officer will assess the number of points appropriate for the offense, and record the traffic points or the suspension or revocation of driving privileges on the person’s driving record. Except as specified otherwise in this part and other Service/DLA regulations, points will not be assessed or driving privileges suspended or revoked when the report of action taken indicates that neither disciplinary nor administrative action was taken.

(d) Installation commanders may require the following driver improvement measures as appropriate:

1. Advisory letter through the unit commander or supervisor to any person who has acquired six traffic points within a 6-month period.
2. Counseling or driver improvement interview, by the unit commander, of any person who has acquired more than six but less than 12 traffic points within a 6-month period. This counseling or interview should produce recommendations to improve driver performance.
3. Referral for medical evaluation when a driver, based on reasonable belief, appears to have mental or physical limits that have had or may have an adverse effect on driving performance.
4. Attendance at remedial driver training to improve driving performance.
5. Referral to an alcohol or drug treatment or rehabilitation facility for evaluation, counseling, or treatment. This action is required for active military personnel in all cases in which alcohol or other drugs are a contributing factor to a traffic citation, incident, or accident.

(e) An individual’s driving privileges may be suspended or revoked as provided by this part regardless of whether these improvement measures are accomplished.

(f) Persons whose driving privileges are suspended or revoked (for one violation or an accumulation of 12 traffic points within 12 consecutive months, or 18 traffic points within 24 consecutive months) will be notified in writing through official channels (§634.11). Except for the mandatory minimum or maximum suspension or revocation periods prescribed by table 5–1 of this part, the installation commander will establish periods of suspension or revocation. Any revocation based on traffic points must be no less than 6 months. A longer period may be imposed on the basis of a person’s overall driving record considering the frequency, flagrancy, severity of moving violations, and the response to previous driver improvement measures. In all cases, military members must successfully complete a prescribed course in remedial driver training before driving privileges are reinstated.

(g) Points assessed against a person will remain in effect for point accumulation purposes for 24 consecutive months. The review of driver records to delete traffic points should be done routinely during records update while recording new offenses and forwarding records to new duty stations. Completion of a revocation based on points requires removal from the driver record of all points assessed before the revocation.

(h) Removal of points does not authorize removal of driving record entries for moving violations, chargeable accidents, suspensions, or revocations. Record entries will remain posted on individual driving records for the following periods of time:

1. Chargeable nonfatal traffic accidents or moving violations—3 years.
2. Nonmandatory suspensions or revocations—5 years.
3. Mandatory revocations—7 years.

§ 634.47 Disposition of driving records.

Procedures will be established to ensure prompt notice to the installation law enforcement officer when a person
§ 634.48

Subpart F—Impounding Privately Owned Vehicles

§ 634.48 General.

This subpart provides the standards and procedures for law enforcement personnel when towing, inventorying, searching, impounding, and disposing of POVs. This policy is based on:

(a) The interests of the Services and DLA in crime prevention, traffic safety, and the orderly flow of vehicle traffic movement.

(b) The vehicle owner’s constitutional rights to due process, freedom from unreasonable search and seizure, and freedom from deprivation of private property.

§ 634.49 Standards for impoundment.

(a) POVs should not be impounded unless the vehicles clearly interfere with ongoing operations or movement of traffic, threaten public safety or convenience, are involved in criminal activity, contain evidence of criminal activity, or are stolen or abandoned.

(b) The impoundment of a POV would be inappropriate when reasonable alternatives to impoundment exist.

(1) Attempts should be made to locate the owner of the POV and have the vehicle removed.

(2) The vehicle may be moved a short distance to a legal parking area and temporarily secured until the owner is found.

(3) Another responsible person may be allowed to drive or tow the POV with permission from the owner, operator, or person empowered to control the vehicle. In this case, the owner, operator, or person empowered to control the vehicle will be informed that law enforcement personnel are not responsible for safeguarding the POV.

(c) Impounding of POVs is justified when any of the following conditions exist:

(1) The POV is illegally parked—

(i) On a street or bridge, in a tunnel, or is double parked, and interferes with the orderly flow of traffic.

(ii) On a sidewalk, within an intersection, on a cross-walk, on a railroad track, in a fire lane, or is blocking a driveway, so that the vehicle interferes
with operations or creates a safety hazard to other roadway users or the general public. An example would be a vehicle parked within 15 feet of a fire hydrant or blocking a properly marked driveway of a fire station or aircraft alert crew facility.

(iii) When blocking an emergency exit door of any public place (installation theater, club, dining hall, hospital, and other facility).

(iv) In a “tow-away” zone that is so marked with proper signs.

(2) The POV interferes with—

(i) Street cleaning or snow removal operations and attempts to contact the owner have been unsuccessful.

(ii) Emergency operations during a natural disaster or fire or must be removed from the disaster area during cleanup operations.

(3) The POV has been used in a crime or contains evidence of criminal activity.

(4) The owner or person in charge has been apprehended and is unable or unwilling to arrange for custody or removal.

(5) The POV is mechanically defective and is a menace to others using the public roadways.

(6) The POV is disabled by a traffic incident and the operator is either unavailable or physically incapable of having the vehicle towed to a place of safety for storage or safekeeping.

(7) Law enforcement personnel reasonably believe the vehicle is abandoned.

§ 634.51 Procedures for impoundment.

(a) Unattended POVs. (1) DD Form 2504 (Abandoned Vehicle Notice) will be conspicuously placed on POVs considered unattended. This action will be documented by an entry in the installation law enforcement desk journal or blotter.

(2) The owner will be allowed 3 days from the date the POV is tagged to remove the vehicle before impoundment action is initiated. If the vehicle has not been removed after 3 days, it will be removed by the installation towing service or the contracted wrecker service. If a contracted wrecker service is used, a DD Form 2505 (Abandoned Vehicle Removal Authorization) will be completed and issued to the contractor by the installation law enforcement office.

(3) After the vehicle has been removed, the installation law enforcement officer or the contractor will complete DD Form 2506 (Vehicle Impoundment Report) as a record of the actions taken.

(i) An inventory listing personal property will be done to protect the owner, law enforcement personnel, the contractor, and the commander.

(ii) The contents of a closed container such as a suitcase inside the vehicle need not be inventoried. Such articles should be opened only if necessary to identify the owner of the vehicle or if the container might contain explosives or otherwise present a danger to the public. Merely listing the container and sealing it with security tape will suffice.

(iii) Personal property must be placed in a secure area for safekeeping.

(4) DD Form 2507 (Notice of Vehicle Impoundment) will be forwarded by certified mail to the address of the last known owner of the vehicle to advise the owner of the impoundment action, and request information concerning
the owner’s intentions pertaining to the disposition of the vehicle.

(b) Stolen POVs or vehicles involved in criminal activity. (i) When the POV is to be held for evidentiary purposes, the vehicle should remain in the custody of the applicable Service or DLA until law enforcement purposes are served.

(2) Recovered stolen POVs will be released to the registered owner, unless held for evidentiary purposes, or to the law enforcement agency reporting the vehicle stolen, as appropriate.

(3) A POV held on request of other authorities will be retained in the custody of the applicable Service or DLA until the vehicle can be released to such authorities.

§ 634.52 Search incident to impoundment based on criminal activity.

Search of a POV in conjunction with impoundment based on criminal activity will likely occur in one of the following general situations:

(a) The owner or operator is not present. This situation could arise during traffic and crime-related impoundments and abandoned vehicle seizures. A property search related to an investigation of criminal activity should not be conducted without search authority unless the item to be seized is in plain view or is readily discernible on the outside as evidence of criminal activity. When in doubt, proper search authority should be obtained before searching.

(b) The owner or operator is present. This situation can occur during either a traffic or criminal incident, or if the operator is apprehended for a crime or serious traffic violation and sufficient probable cause exists to seize the vehicle. This situation could also arise during cases of intoxicated driving or traffic accidents in which the operator is present but incapacitated or otherwise unable to make adequate arrangements to safeguard the vehicle. If danger exists to the police or public or if there is risk of loss or destruction of evidence, an investigative type search of the vehicle may be conducted without search authority. (Air Force, see AFP 125–2).

§ 634.53 Disposition of vehicles after impoundment.

(a) If a POV is impounded for evidentiary purposes, the vehicle can be held for as long as the evidentiary or law enforcement purpose exists. The vehicle must then be returned to the owner without delay unless directed otherwise by competent authority.

(b) If the vehicle is unclaimed after 120 days from the date notification was mailed to the last known owner or the owner released the vehicle by properly completing DD Form 2505, the vehicle will be disposed of by one of the following procedures:

(1) Release to the lienholder, if known.

(2) Processed as abandoned property in accordance with DOD 4160.21–M.

(i) Property may not be disposed of until diligent effort has been made to find the owner; or the heirs, next of kin, or legal representative of the owner.

(ii) The diligent effort to find one of those mentioned in paragraph (a) of this section shall begin not later than 7 days after the date on which the property comes into custody or control of the law enforcement agency.

(iii) The period for which this effort is continued may not exceed 45 days.

(iv) If the owner or those mentioned in §634.52 are determined, but not found, the property may not be disposed of until the expiration of 45 days after the date when notice, giving the time and place of the intended sale or other disposition, has been sent by certified or registered mail to that person at his last known address.

(v) When diligent effort to determine those mentioned in paragraph (b)(2)(iv) of this section is unsuccessful, the property may be disposed of without delay, except that if it has a fair market value of more than $500, the law enforcement official may not dispose of the property until 45 days after the date it is received at the storage point.

(c) All contracts for the disposal of abandoned vehicles must comply with 10 U.S.C. 2575.
§ 634.54 List of State Driver's License Agencies.

Notification of State driver's license agencies. The installation commander will notify the State driver's license agency of those personnel whose installation driving privileges are revoked for 1 year or more, following final adjudication of the intoxicated driving offense or for refusing to submit to a lawful blood-alcohol content test in accordance with § 634.8. This notification will include the basis for the suspension and the blood alcohol level. The notification will be sent to the State in which the driver's license was issued. State driver's license agencies are listed as follows:

Alabama: Motor Vehicle Division, 2721 Gunter Park Drive, Montgomery, AL 36101, (205) 271-3250.
Alaska: Motor Vehicle Division, P.O. Box 100960, Anchorage, AK 99510, (907) 269-5572.
California: Department of Motor Vehicles, P.O. Box 92340, Sacramento, CA 94232, (916) 445-0898.
Colorado: Motor Vehicle Division, 140 West Sixth Avenue, Denver, CO 80204, (303) 866-3158.
Connecticut: Department of Motor Vehicles, 60 State Street, Wethersfield, CT 06109, (203) 566-5904.
Delaware: Motor Vehicle Director, State Highway Administration Bldg., P.O. Box 698, Dover, DE 19903, (302) 736-4421.
District of Columbia: Department of Transportation, Bureau of Motor Vehicles, 301 C Street, NW., Washington, DC 20001, (202) 727-5409.
Florida: Division of Motor Vehicles, Neil Kirkman Building, Tallahassee, FL 32301, (904) 488-6921.
Georgia: Motor Vehicle Division, Trinity-Washington Bldg., Room 114, Atlanta, GA 30334, (404) 656-4149.

Hawaii: Division of Motor Vehicle and Licensing, 1455 S. Benetania Street, Honolulu, HI 96814, (808) 943-3221.
Idaho: Transportation Department, 3311 State Street, P.O. Box 31, Boise, ID 83731, (208) 334-3650.
Illinois: Secretary of State, Centennial Building, Springfield, IL 62756, (217) 782-4815.
Indiana: Bureau of Motor Vehicles, State Office Building, Room 901, Indianapolis, IN 46204, (317) 232-2701.
Iowa: Department of Transportation Office of Operating Authority, Lucas Office Bldg., Des Moines, IA 50319, (515) 281-5664.
Kansas: Department of Revenue, Division of Vehicles, Interstate Registration Bureau, State Office Bldg., Topeka, KS 66612, (913) 296-3691.
Kentucky: Department of Transportation, New State Office Building, Frankfort, KY 40622, (502) 564-4540.
Louisiana: Motor Vehicle Administrator, S. Foster Drive, Baton Rouge, LA 70800, (225) 925-3661.
Louisiana: Motor Vehicle Administration, S. Foster Drive, Baton Rouge, LA 70800, (225) 925-3661.
Maine: Department of State, Motor Vehicle Division, Augusta, ME 04333, (207) 289-5440.
Maryland: Motor Vehicle Administration, 6601 Ritchie Highway, NE., Glen Burnie, MD 21062, (410) 782-7600.
Massachusetts: Registry of Motor Vehicles, 100 Nashua Street, Boston, MA 02114, (617) 727-3780.
Michigan: Department of State, Division of Driver Licenses and Vehicle Records, Lansing, MI 48901, (517) 322-1486.
Minnesota: Department of Public Safety, 108 Transportation Building, St. Paul, MN 55155, (612) 296-2138.
Mississippi: Office of State Tax Commission, Woolfolk Building, Jackson, MS 39205, (601) 982-1248.
Missouri: Department of Revenue, Motor Vehicles Bureau, Harry S. Truman Bldg., 301 W. High Street, Jefferson City, MO 65105, (314) 751-3234.
Montana: Highway Commission, Box 4639, Helena, MT 59604, (406) 449-2476.
Nebraska: Department of Motor Vehicles, P.O. Box 94789, Lincoln, NE 68509, (402) 471-3891.
Nevada: Department of Motor Vehicles, Carson City, NV 89711, (702) 687-5370.
New Hampshire: Department of Safety, Division of Motor Vehicles, James H.
Haynes Bldg., Concord, NH 03305, (603) 271–2764.

New Mexico: Motor Transportation Division, Joseph M. Montoya Building, Santa Fe, NM 87503, (505) 827–0392.

North Carolina: Division of Motor Vehicles, Motor Vehicles Bldg., Raleigh, NC 27697, (919) 733–2403.

North Dakota: Motor Vehicle Department, Capitol Grounds, Bismarck, ND 58505, (701) 224–2619.

Ohio: Bureau of Motor Vehicles, P.O. Box 16520, Columbus, OH 43216, (614) 466–4095.

Oregon: Motor Vehicle Division, 1905 Lana Avenue, NE., Salem, OR 97314, (503) 378–6903.

Rhode Island: Department of Motor Vehicles, State Office Building, Providence, RI 02903, (401) 277–6900.

South Carolina: Motor Vehicle Division, P.O. Drawer 1498, Columbia, SC 29216, (803) 758–5821.

South Dakota: Division of Motor Vehicles, 118 W. Capitol, Pierre, SD 57501, (605) 773–3501.

Tennessee: Department of Revenue, Motor Vehicle Division, 500 Deaderick Street, Nashville, TN 37242, (615) 741–1786.

Texas: Department of Highways and Public Transportation, Motor Vehicle Division, 40th and Jackson Avenue, Austin, TX 78779, (512) 475–7686.

Utah: Motor Vehicle Division State Fairgrounds, 1095 Motor Avenue, Salt Lake City, UT 84116, (801) 533–5311.

Vermont: Department of Motor Vehicles, State Street, Montpelier, VT 05603, (802) 828–2014.

Virginia: Department of Motor Vehicles, 2300 W. Broad Street, Richmond, VA 23220, (804) 257–1855.

West Virginia: Department of Motor Vehicles, 1800 Washington Street, East, Charleston, WV 25317, (304) 340–2719.

Wisconsin: Department of Transportation Reciprocity and Permits, P.O. Box 7908, Madison, WI 53707, (608) 266–2585.

Wyoming: Department of Revenue, Policy Division, 122 W. 25th Street, Cheyenne, WY 82002, (307) 777–5273.

Guam: Deputy Director, Revenue and Taxation, Government of Guam, Agana, Guam 96910, (no phone number available).

Puerto Rico: Department of Transportation and Public Works, Bureau of Motor Vehicles, P.O. Box 4243, Minillas Station, Santurce, Puerto Rico 00940, (809) 722–2823.

PART 635—LAW ENFORCEMENT REPORTING

Subpart A—Records Administration

Sec. 635.1 General.
635.2 Safeguarding official information.
635.3 Special requirements of the Privacy Act of 1974.
635.4 Administration of expelled or barred persons file.
635.5 Police Intelligence/Criminal Information.
635.6 Name checks.
635.7 Registration of sex offenders.

Subpart B—Release of Information

635.8 General.
635.9 Guidelines for disclosure within DOD.
635.10 Release of information.
635.11 Release of information under the Freedom of Information Act (FOIA).
635.12 Release of information under the Privacy Act of 1974.
635.13 Amendment of records.
635.14 Accounting for military police record disclosure.
635.15 Release of law enforcement information furnished by foreign governments or international organizations.

Subpart C—Offense Reporting

635.16 General.
635.17 Military Police Report.
635.18 Identifying criminal incidents and subjects of investigation.
635.19 Offense codes.
635.20 Military Police Codes (MPC).
Subpart A—Records Administration

§ 635.1 General.

(a) Military police records and files created under provisions of this part will be maintained and disposed of in accordance with instructions and standards prescribed by Army Regulation (AR) 25–400–2, AR 25–55, AR 340–21, and other applicable HQDA directives.

(b) Each Provost Marshal/Director of Emergency Services will appoint in writing two staff members, one primary and one alternate, to account for and safeguard all records containing personal information protected by law. Action will be taken to ensure that protected personal information is used and stored only where facilities and conditions will preclude unauthorized or unintentional disclosure.

(c) Personally identifying information includes, for example, information that is intimate or private to an individual, as distinguished from that which concerns a person’s official function or public life. Specific examples include the social security number (SSN), medical history, home address, and home telephone number.

(d) Access to areas in which military police records are prepared, processed and stored will be restricted to those personnel whose duties require their presence or to other personnel on official business. Military police records containing personal information will be stored in a locked room or locked filing cabinet when not under the personal control of authorized personnel. Alternate storage systems providing equal or greater protection may be used in accordance with AR 25–55.

(e) Only personnel on official business can have access to areas in which computers are used to store, process or retrieve military police records. When processing military police information, computer video display monitors will be positioned so that protected information cannot be viewed by unauthorized persons. Computer output from automated military police systems will be controlled as specified in paragraph (d) of this section.

(f) Output from any locally prepared data or automated systems containing personal information subject to the Privacy Act will be controlled per AR 340–21. All locally created, Army Commands (ACOM), Army Service Component Commands (ASCC) or Direct Reporting Units (DRU) unique automated systems of records containing law enforcement information must be reported to and approved by HQDA, Office of the Provost Marshal General prior to use. The request must clearly document why the COPS MPRS system cannot meet the requirements or objectives of the organization. After review and approval by HQDA, the installation, ACOM, ASCC and DRU will complete and process the systems notice for publication in the Federal Register per AR 340–21 and the Privacy Act.
§ 635.2 Safeguarding official information.

(a) Military police records are unclassified except when they contain national security information as defined in AR 380–5.

(b) When military police records containing personal information transmitted outside the installation law enforcement community to other departments and agencies within DOD, such records will be marked “For Official Use Only.” Records marked “For Official Use Only” will be transmitted as prescribed by AR 25–55. Use of an expanded marking is required for certain records transmitted outside DOD per AR 25–55.

(c) Military police records may also be released to Federal, state, local or foreign law enforcement agencies as prescribed by AR 340–21. Expanded markings will be applied to these records.

§ 635.3 Special requirements of the Privacy Act of 1974.

(a) Certain personal information is protected under the Privacy Act and AR 340–21.

(b) Individuals requested to furnish personal information must be advised of the purpose for which the information is collected and the disclosures by which it is routinely used.

(c) Army law enforcement personnel performing official duties often require an individual’s SSN for identification purposes. Personal information may be obtained from identification documents without violating an individual’s privacy and without providing a Privacy Act Statement. This personal information can be used to complete military police reports and records. The following procedures may be used to obtain SSNs:

(1) Active Army, U.S. Army Reserve (USAR), Army National Guard (ARNG) and retired military personnel are required to produce their Common Access Card, DD Form 2 (Act), DD Form 2 (Res), or DD Form 2 (Ret) (U.S. Armed Forces of the United States General Convention Identification Card), or other government issued identification, as appropriate.

(2) Family members of sponsors may be requested to produce their DD Form 1173 (Uniformed Services Identification and Privilege Card). Information contained thereon (for example, the sponsor’s SSN) may be used to verify and complete applicable sections of MPRs and related forms.
(3) DOD civilian personnel may be requested to produce their appropriate service identification. DA Form 1602 (Civilian Identification) may be requested from DA civilian employees. If unable to produce such identification, DOD civilians may be requested to provide other verifying documentation.

(4) Non-DOD civilians, including family members and those whose status is unknown, will be advised of the provisions of the Privacy Act Statement when requested to disclose their SSN.

(d) Requests for new systems of military police records, changes to existing systems, and continuation systems, not addressed in existing public notices will be processed as prescribed in AR 340–21, after approval is granted by HQDA, OPMG (DAPM–MPD–LE).

§635.4 Administration of expelled or barred persons file.

(a) When action is completed by an installation commander to bar an individual from the installation under 18 U.S.C. 1382 the installation Provost Marshal/Director of Emergency Services will be provided—

(1) A copy of the letter or order barring the individual.

(2) Reasons for the bar.

(3) Effective date of the bar and period covered.

(b) The Provost Marshal/Director of Emergency Services will maintain a list of barred or expelled persons. When the bar or expulsion action is predicated on information contained in military police investigative records, the bar or expulsion document will reference the appropriate military police record or MPR. When a MPR results in the issuance of a bar letter the Provost Marshal/Director of Emergency Services will forward a copy of the bar letter to Director, USACRC to be filed with the original MPR. The record of the bar will also be entered into COPS, in the Military Police Reporting System module, under Barrings.

§635.5 Police Intelligence/Criminal Information.

(a) The purpose of gathering police intelligence is to identify individuals or groups of individuals in an effort to anticipate, prevent, or monitor possible criminal activity. If police intelligence is developed to the point where it factually establishes a criminal offense, an investigation by the military police, U.S. Army Criminal Investigation Command (USACIDC) or other investigative agency will be initiated. The crimes in §§635.5b(2) and (3) will be reported to the nearest Army counterintelligence office as required by AR 381–12.

(b) Information on persons and organizations not affiliated with DOD may not normally be acquired, reported, processed or stored. Situations justifying acquisition of this information include, but are not limited to—

(1) Theft, destruction, or sabotage of weapons, ammunition, equipment facilities, or records belonging to DOD units or installations.

(2) Possible compromise of classified defense information by unauthorized disclosure or espionage.

(3) Subversion of loyalty, discipline, or morale of DA military or civilian personnel by actively encouraging violation of laws, disobedience of lawful orders and regulations, or disruption of military activities.

(4) Protection of Army installations and activities from potential threat.

(5) Information received from the FBI, state, local, or international law enforcement agencies which directly pertain to the law enforcement mission and activity of the installation Provost Marshal Office/Directorate of Emergency Services, ACOM, ASCC or DRU Provost Marshal Office Directorate of Emergency Services, or that has a clearly identifiable military purpose and connection. A determination that specific information may not be collected, retained or disseminated by intelligence activities does not indicate that the information is automatically eligible for collection, retention, or dissemination under the provisions of this part. The policies in this section are not intended and will not be used to circumvent any federal law that restricts gathering, retaining or dissemination of information on private individuals or organizations.

(c) Retention and disposition of information on non-DOD affiliated individuals and organizations are subject to the provisions of AR 390–13 and AR 25–400–2.
(d) Police intelligence such as TALON events will be captured by utilizing the TALON report format. These reports will be identified as “Pre-TALON” reports. The Provost Marshal Office/Directorate of Emergency Services will forward these reports to the counterintelligence activity which supports their installation/area. The counterintelligence activity will determine if the suspicious incident/activity should be entered into the DoD TALON reporting system. The counterintelligence activity will inform the submitting Army law enforcement agency as to whether or not the “Pre-Talon” report was submitted into the DoD TALON reporting system.

(e) In addition to Pre-TALON reporting, Installation Law Enforcement Agencies/Activities will also comply with their Combatant Command’s policies regarding the reporting of suspicious activities or events which meet established criteria.

(f) If a written extract from local police intelligence files is provided to an authorized investigative agency, the following will be included on the transmittal documents: “THIS DOCUMENT IS PROVIDED FOR INFORMATION AND USE. COPIES OF THIS DOCUMENT, ENCLOSURES THERETO, AND INFORMATION THEREFROM, WILL NOT BE FURTHER RELEASED WITHOUT THE PRIOR APPROVAL OF THE INSTALLATION PROVOST MARSHAL/DIRECTOR OF EMERGENCY SERVICES.”

(g) Local police intelligence files may be exempt from certain disclosure requirements by AR 25-55 and the Freedom of Information Act (FOIA).

§ 635.6 Name checks.

(a) Information contained in military police records may be released under the provisions of AR 340-21 to authorized personnel for valid background check purposes. Examples include child care/youth program providers, access control, unique or special duty assignments, and security clearance procedures. Any information released must be restricted to that necessary and relevant to the requester’s official purpose. Provost Marshals/Directors of Emergency Services will establish written procedures to ensure that release is accomplished in accordance with AR 340-21.

(b) Checks will be accomplished by a review of the COPS MPRS. Information will be disseminated according to subpart B of this part.

(c) In response to a request for local files or name checks, Provost Marshals/Directors of Emergency Services will release only founded offenses with final disposition. Offenses determined to be unfounded will not be released. These limitations do not apply to requests submitted by law enforcement agencies for law enforcement purposes, and counterintelligence investigative agencies for counterintelligence purposes.

(d) COPS MPRS is a database, which will contain all military police reports filed worldwide. Authorized users of COPS MPRS can conduct name checks for criminal justice purposes. To conduct a name check, users must have either the social security number/foreign national number, or the first and last name of the individual. If a search is done by name only, COPS MPRS will return a list of all matches to the data entered. Select the appropriate name from the list.

(e) A successful query of COPS MPRS would return the following information:

1. Military Police Report Number;
2. Report Date;
3. Social Security Number;
4. Last Name;
5. First Name;
6. Protected Identity (Y/N);
7. A link to view the military police report; and
8. Whether the individual is a subject, victim, or a person related to the report disposition.

(f) Name checks will include the criteria established in COPS MPRS and the USACRC. All of the policies and procedures for such checks will conform to the provisions of this part. Any exceptions to this policy must be coordinated with HQDA, Office of the Provost Marshal General before any name checks are conducted. The following are examples of appropriate uses of the name check feature of COPS MPRS:

1. Individuals named as the subjects of serious incident reports.

(2) Individuals named as subjects of investigations who must be reported to the USACRC.

(3) Employment as child care/youth program providers.

(4) Local checks of the COPS MPRS as part of placing an individual in the COPS MPRS system.

(5) Name checks for individuals employed in law enforcement positions.

(g) Provost Marshals/Directors of Emergency Services will ensure that an audit trail is established and maintained for all information released from military police records.

(h) Procedures for conduct of name checks with the USACRC are addressed in AR 195–2. The following information is required for USACRC name checks (when only the name is available, USACRC should be contacted telephonically for assistance):

(1) Full name, date of birth, SSN, and former service number of the individual concerned.

(2) The specific statute, directive, or regulation on which the request is based, when requested for other than criminal investigative purposes.

(i) Third party checks (first party asks second party to obtain information from third party on behalf of first party) will not be conducted.

§ 635.7 Registration of sex offenders.

Soldiers who are convicted by court-martial for certain sexual offenses must comply with all applicable state registration requirements in effect in the state in which they reside. See AR 190–47, Chapter 14 and AR 27–10, Chapter 24. This is a statutory requirement based on the Jacob Wetterling Act, and implemented by DOD Instruction 1325.7, and AR 27–10. Provost Marshals/Directors of Emergency Services should coordinate with their local Staff Judge Advocate to determine if an individual must register. The registration process will be completed utilizing the state registration form, which is available through state and local law enforcement agencies. A copy of the completed registration form will be maintained in the installation Provost Marshal Office/Directorate of Emergency Services. Additionally, a Military Police Report (DA Form 3975) will be completed as an information entry into COPS. Installation Provost Marshals/Directors of Emergency Services will provide written notice to state and local law enforcement agencies of the arrival of an offender to the local area so the registration process can be completed.

Subpart B—Release of Information

§ 635.8 General.

(a) The policy of HQDA is to conduct activities in an open manner and provide the public accurate and timely information. Accordingly, law enforcement information will be released to the degree permitted by law and Army regulations.

(b) Any release of military police records or information compiled for law enforcement purposes, whether to persons within or outside the Army, must be in accordance with the FOIA and Privacy Act.

(c) Requests by individuals for access to military police records about themselves will be processed in compliance with AR 25–55 and AR 340–21.

(d) Military police records in the temporary possession of another organization remain the property of the originating law enforcement agency. The following procedures apply to any organization authorized temporary use of military police records:

(1) Any request from an individual seeking access to military police records will be immediately referred to the originating law enforcement agency for processing.

(2) When the temporary purpose of the using organization has been satisfied, the military police records will be destroyed or returned to the originating law enforcement agency.

(3) A using organization may maintain information from military police records in their system of records, if approval is obtained from the originating law enforcement agency. This information may include reference to a military police record (for example, MPR number or date of offense), a summary of information contained in the record, or the entire military police record. When a user includes a military police record in its system of records, the originating law enforcement agency may delete portions from that
§ 635.9 Guidelines for disclosure within DOD.

(a) Criminal record information contained in military police documents will not be disseminated unless there is a clearly demonstrated official need to know. A demonstrated official need to know exists when the record is necessary to accomplish a function that is within the responsibility of the requesting activity or individual, is prescribed by statute, DOD directive, regulation, or instruction, or by Army regulation.

(1) Criminal record information may be disclosed to commanders or staff agencies to assist in executing criminal justice functions. Only that information reasonably required will be released. Such disclosure must clearly relate to a law enforcement function.

(2) Criminal record information related to subjects of criminal justice disposition will be released when required for security clearance procedures.

(3) Criminal record information may be released to an activity when matters of national security are involved.

(4) When an individual informs an activity of criminal record information pertaining to them, the receiving activity may seek verification of this information through the responsible law enforcement agency or may forward the request to that organization. The individual must be advised by the receiving agency of the action being pursued. Law enforcement agencies will respond to such requests in the same manner as FOIA and Privacy Act cases.

(b) Installation Provost Marshals/Directors of Emergency Services are the release authorities for military police records under their control. They may release criminal record information to other activities as prescribed in AR 25-55 and AR 340-21, and this part.

(c) Authority to deny access to criminal records information rests with the initial denial authority (IDA) for the FOIA and the access and amendment refusal authority (AARA) for Privacy Acts cases, as addressed in AR 25-55 and AR 340-21.

§ 635.10 Release of information.

(a) Release of information from Army records to agencies outside DOD will be governed by AR 25-55, AR 340-21, AR 600-37, and this part. Procedures for release of certain other records and information are contained in AR 20-1, AR 27-20, AR 27-40, AR 49-66, AR 195-2, AR 360-1, and AR 600-85. Installation drug and alcohol offices may be provided an extract of DA Form 3997 (Military Police Desk Blotter) for offenses involving the use of alcohol or drugs (for example, drunk driving, drunk and disorderly conduct, or positive urinalysis) or illegal use of drugs.

(b) FOIA requests from members of the press will be coordinated with the installation public affairs officer prior to release of records under the control of the installation Provost Marshal/Director of Emergency Services. When the record is on file at the USACRC the request must be forwarded to the Director, USACRC.

(c) Requests will be processed as prescribed in AR 25-55 and as follows:

(1) The Provost Marshal/Director of Emergency Services will review requested reports to determine if any portion is exempt from release. Any discretionary decision to disclose information under the FOIA should be made only after full and deliberate consideration of the institutional, commercial, and personal privacy interests that could be implicated by disclosure of the information.
Department of the Army, DoD § 635.13

§ 635.12 Release of information under the Privacy Act of 1974.

(a) Military police records may be released according to provisions of the Privacy Act of 1974, as implemented by AR 340–21 and this part.

(b) The release and denial authorities for all Privacy Act cases concerning military police records are provided in §635.10 of this part.

(c) Privacy Act requests for access to a record, when the requester is the subject of that record, will be processed as prescribed in AR 340–21.

§ 635.13 Amendment of records.

(a) Policy. An amendment of records is appropriate when such records are established as being inaccurate, irrelevant, untimely, or incomplete. Amendment procedures are not intended to permit challenging an event that actually occurred. For example, a request to remove an individual's name as the subject of an MPR would be proper providing credible evidence was presented to substantiate that a criminal offense was not committed or did not occur as reported. Expungement of a subject's name from a record because the commander took no action or the prosecutor elected not to prosecute normally will not be approved. In compliance with DOD policy, an individual will still remain entered in the Defense Clearance Investigations Index (DCII) to track all reports of investigation.

(b) Procedures. (1) Installation Provost Marshals/Directors of Emergency Services will review amendment requests. Upon receipt of a request for an amendment of a military police record that is five or less years old, the installation Provost Marshal/Director of Emergency Services will gather all relevant available records at their location. The request will simply be forwarded to the Director, USACRC for action.

(2) Statutory and policy questions will be coordinated with the local staff judge advocate.

(3) Coordination will be completed with the local USACIDC activity to ensure that the release will not interfere with a criminal investigation in progress or affect final disposition of an investigation.

(4) If it is determined that a portion of the report, or the report in its entirety will not be released, the request to include a copy of the MPR or other military police records will be forwarded to the Director, USACRC, ATTN: CICR–FP, 6010 6th Street, Fort Belvoir, VA 22060–5585. The requester will be informed that their request has been sent to the Director, USACRC, and provided the mailing address for the USACRC. When forwarding FOIA requests, the outside of the envelope will be clearly marked “FOIA REQUEST.”

(5) A partial release of information by a Provost Marshal/Director of Emergency Services is permissible when partial information is acceptable to the requester. (An example would be the deletion of a third party's social security number, home address, and telephone number, as permitted by law). If the requester agrees to the omission of exempt information, such cases do not constitute a denial. If the requester insists on the entire report, a copy of the report and the request for release will be forwarded to the Director, USACRC. There is no requirement to coordinate such referrals at the installation level. The request will simply be forwarded to the Director, USACRC for action.

(6) Requests for military police records that have been forwarded to USACRC and are no longer on file at the installation Provost Marshal Office/Director of Emergency Services will be forwarded to the Director, USACRC for processing.

(7) Requests concerning USACIDC reports of investigation or USACIDC files will be referred to the Director, USACRC. In each instance, the requester will be informed of the referral and provided the Director, USACRC address.

(8) Requests concerning records that are under the supervision of an Army activity, or other DOD agency, will be referred to the appropriate agency for response.

VerDate Mar<15>2010 12:48 Aug 21, 2013 Jkt 229130 PO 00000 Frm 00071 Fmt 8010 Sfmt 8010 Y:\SGML\229130.XXX 229130pmangrum on DSK3VPTVN1PROD with CFR
§ 635.14 Accounting for military police record disclosure.

(a) AR 340-21 prescribes accounting policies and procedures concerning the disclosure of military police records.

(b) Provost Marshals/Directors of Emergency Services will develop local procedures to ensure that disclosure data requirements by AR 340-21 are available on request.

§ 635.15 Release of law enforcement information furnished by foreign governments or international organizations.

(a) Information furnished by foreign governments or international organizations is subject to disclosure, unless exempted by AR 25–55, AR 340–21, federal statutes or executive orders.

(b) Information may be received from a foreign source under an express pledge of confidentiality as described in AR 25–55 and AR 340–21 (or under an implied pledge of confidentiality given prior to September 27, 1975).

(1) Foreign sources will be advised of the provisions of the Privacy Act of 1974, the FOIA, and the general and specific law enforcement exemptions available, as outlined in AR 340–21 and AR 25–55.

(2) Information received under an express promise of confidentiality will be annotated in the MPR or other applicable record.

(3) Information obtained under terms of confidentiality must clearly aid in furthering a criminal investigation.

(c) Denial recommendations concerning information obtained under a pledge of confidentiality, like other denial recommendations, will be forwarded by the records custodian to the appropriate IDA or AARA per AR 25–55 or AR 340–21.

(d) Release of U.S. information (classified military information or controlled unclassified information) to foreign governments is accomplished per AR 380–10.

Subpart C—Offense Reporting

§ 635.16 General.

(a) This subpart establishes policy for reporting founded criminal offenses by Installation Management Command (IMCOM), Army Materiel Command (AMC) and Medical Command (MEDCOM) installation and ACOM, ASCC and DRU Provost Marshal Offices/Directorates of Emergency Services.
(b) This subpart prescribes reporting procedures, which require the use of the COPS MPRS and a systems administrator to ensure that the system is properly functioning. Reporting requirements include—
(1) Reporting individual offenders to the USACRC, NCIC, CJIS, and the DOD.
(2) Crime reports to the DOD. DOD collects data from all the Services utilizing the Defense Incident-Based Reporting System (DIBRS). The Army inputs its data into DIBRS utilizing COPS. Any data reported to DIBRS is only as good as the data reported into COPS, so the need for accuracy in reporting incidents and utilizing proper offense codes is great. DIBRS data from DOD is eventually sent to the Department of Justice’s National Incident-Based Reporting System (NIBRS). The data is eventually incorporated into the Uniform Crime Report.
(c) A Provost Marshal Office/Directorate of Emergency Services initiating a DA Form 3975 or other military police investigation has reporting responsibility explained throughout this subpart and this part in general.
(d) In the event the Provost Marshal Office/Directorate of Emergency Services determines that their office does not have investigative responsibility or authority, the MPR will be terminated and the case cleared by exceptional clearance. A case cleared by exceptional clearance is closed by the Provost Marshal/Director of Emergency Services when no additional investigative activity will be performed or the case is referred to another agency. If a case is transferred to the Provost Marshal/Director of Emergency Services from another law enforcement investigation agency the Provost Marshal Office/Directorate of Emergency Services will have all reporting responsibility using the COPS MPRS system.

§ 635.17 Military Police Report.

(a) General Use. DA form 3975 is a multipurpose form used to—
(1) Record all information or complaints received or observed by military police.
(2) Serve as a record of all military police and military police investigator activity.
(3) Document entries made into the COPS MPRS system and other automated systems.
(4) Report information concerning investigations conducted by civilian law enforcement agencies related to matters of concern to the U.S. Army.
(5) Advise commanders and supervisors of offenses and incidents involving personnel or property associated with their command or functional responsibility.
(6) Report information developed by commanders investigating incidents or conducting inspections that result in the disclosure of evidence that a criminal offense has been committed.

(b) Special use. The DA Form 3975 will be used to—
(1) Transmit completed DA Form 3946 (Military Police Traffic Accident Report). This will include statements, sketches, or photographs that are sent to a commander or other authorized official.
(2) Transmit the DD Form 1805 (U.S District Court Violation Notice) when required by local installation or U.S. Magistrate Court policy. The DA Form 3975 is used to advise commanders or supervisors that military, civilian, or contract personnel have been cited on a DD Form 1805.
(3) Match individual subjects with individual victims or witnesses, and founded criminal offenses. This is a federal statutory requirement. This is done using the relationships tab within COPS MPRS.
(4) Document victim/witness liaison activity.

(c) Distribution. The DA Form 3975 will be prepared in three copies, signed by the Provost Marshal/Director of Emergency Services or a designated representative, and distributed as follows—
(1) Original to USACRC. Further information, arising or developed at a later time, will be forwarded to USACRC using a supplemental DA Form 3975. Reports submitted to USACRC will include a good, legible copy of all statements, photographs, sketches, laboratory reports, and other information that substantiates the offense or facilitates the understanding of the report. The USACRC control number must be recorded on every DA
§ 635.18 Identifying criminal incidents and subjects of investigation.

(a) An incident will not be reported as a founded offense unless adequately substantiated by police investigation. A person or entity will be reported as the subject of an offense on DA Form 3975 when credible information exists that the person or entity may have committed a criminal offense. The decision to title a person is an operational rather than a legal determination. The act of titling and indexing does not, in and of itself, connote any degree of guilt or innocence; but rather, ensures that information in a report of investigation can be retrieved at some future time for law enforcement and security purposes. Judicial or adverse administrative actions will not be based solely on the listing of an individual or legal entity as a subject on DA Form 3975.

(b) A known subject will be reported to the USACRC when the suspected offense is punishable by confinement of six months or more. The COPS MPRS will be used to track all other known subjects. A subject can be a person, corporation, or other legal entity, or organization about which credible information exists that would cause a trained law enforcement officer to presume that the person, corporation, other legal entity or organization may have committed a criminal offense.

(c) When investigative activity identifies a subject, all facts of the case must be considered. When a person, corporation, or other legal entity is entered in the subject block of the DA Form 3975, their identity is recorded in DA automated systems and the DCII. Once entered into the DCII, the record can only be removed in cases of mistaken identity or if an error was made in applying the credible information standard at the time of listing the entity as a subject of the report. It is emphasized that the credible information error must occur at the time of listing the entity as the subject of the MPR rather than subsequent investigation determining that the MPR is unfounded. This policy is consistent with DOD reporting requirements. The Director, USACRC enters individuals from DA Form 3975 into the DCII.

§ 635.19 Offense codes.

(a) The offense code describes, as nearly as possible, the complaint or offense by using an alphanumeric code. Appendix C of AR 190–45 lists the offense codes that are authorized for use within the Army. This list will be amended from time to time based on new reporting requirements mandated by legislation or administrative procedures. ACOM, ASCC, DRU commanders and installation Provost Marshals/Directors of Emergency Services will be notified by special letters of instruction issued in numerical order from HQDA, Office of the Provost Marshal General (DAPM–MPD–LE) when additions or deletions are made to the list. The COPS MPRS module will be used for all reporting requirements.

(b) ACOM, ASCC, DRU and installations may establish local offense codes in category 2 (ACOM, ASCC, DRU and installation codes) for any offense not otherwise reportable. Locally established offense codes will not duplicate, or be used as a substitute for any offense for which a code is contained for other reportable incidents. Category 2
incidents are not reported to the Director, USACRC or the DOJ. If an offense occurs meeting the reporting description contained in Appendix C of AR 190-45, that offense code takes precedence over the local offense code. Local offense codes may be included, but explained in the narrative of the report filed with the USACRC. Use the most descriptive offense code to report offenses.

(c) Whenever local policy requires the Provost Marshal/Director of Emergency Services to list the subject's previous offenses on DA Form 3975, entries will reflect a summary of disposition for each offense, if known.

§ 635.20 Military Police Codes (MPC).

(a) MPCs identify individual Provost Marshal Offices/Directorates of Emergency Services. The Director, USACRC will assign MPCs to Provost Marshal Offices/Directorates of Emergency Services.

(b) Requests for assignment of a MPC will be included in the planning phase of military operations, exercises, or missions when law enforcement operations are anticipated. The request for a MPC will be submitted as soon as circumstances permit, without jeopardizing the military operation to HQDA, Office of the Provost Marshal General (DAPM-MPD-LE). Consistent with security precautions, ACOM, ASCC and DRU will immediately inform HQDA, Office of the Provost Marshal General (DAPM-MPD-LE) when assigned or attached military police units are notified for mobilization, relocation, activation, or inactivation.

(c) When a military police unit is alerted for deployment to a location not in an existing Provost Marshal/Director of Emergency Services' operational area, the receiving ACOM, ASCC, DRU or combatant commander will request assignment of an MPC number from HQDA, Office of the Provost Marshal General (DAPM-MPD-LE) providing the area of operations does not have an existing MPC number. The receiving ACOM, ASCC, DRU or Unified Combatant Commander is further responsible for establishing an operational COPS system for the deployment.

§ 635.21 USACRC control numbers.

(a) Case numbers to support reporting requirements will be assigned directly to each installation via COPS. To ensure accuracy in reporting criminal incidents, USACRC control numbers will be used only one time and in sequence. Every MPR sent to the USACRC will have a USACRC control number reported. Violation of this policy could result in significant difficulties in tracing reports that require corrective action.

(b) If during the calendar year ACOM, ASCC or DRU reassigns control numbers from one installation to another, HQDA, Office of the Provost Marshal General (DAPM-MPD-LE) will be notified. The Director USACRC will receive an information copy of such notification from ACOM, ASCC or DRU's law enforcement operations office.

(c) USACRC control numbers will be issued along with each newly assigned MPC.

(d) When the deploying unit will be located in an area where there is an existing Provost Marshal/Director of Emergency Services activity, the deploying unit will use the MPC number and USACRC control numbers of the host Provost Marshal/Director of Emergency Services.

§ 635.22 Reserve component, U.S. Army Reserve, and Army National Guard personnel.

(a) When in a military duty status pursuant to official orders (Federal status for National Guard) Reserve and National Guard personnel will be reported as active duty. Otherwise they will be reported as civilians.

(b) The DA Form 3975 and DA Form 4833 will be forwarded directly to the appropriate Regional Readiness Command or the Soldier's division commander. A copy of the DA Form 3975 will also be forwarded to Chief, Army Reserve/Commander, United States Army Reserve Command, AFRC-JAM, 1404 Deshler Street, Fort McPherson, GA 30330. The forwarding correspondence will reflect this regulation as the authority to request disposition of the individual.
§ 635.23 DA Form 4833 (Commander's Report of Disciplinary or Administrative Action).

(a) Use. DA Form 4833 is used with DA Form 3975 to—

(1) Record actions taken against identified offenders.

(2) Report the disposition of offenses investigated by civilian law enforcement agencies.

(b) Preparation by the Provost Marshal/Director of Emergency Services. The installation Provost Marshal/Director of Emergency Services initiates this critical document and is responsible for its distribution and establishing a suspense system to ensure timely response by commanders. Disposition reports are part of the reporting requirements within DA, DOD, and DOJ.

(c) Completion by the unit commander. Company, troop, and battery level commanders are responsible and accountable for completing DA Form 4833 with supporting documentation in all cases investigated by MPI, civilian detectives employed by the Department of the Army, and the PMO. The Battalion Commander or the first Lieutenant Colonel in the chain of command is responsible and accountable for completing DA Form 4833 with support documentation (copies of Article 15s, court-martial orders, reprimands, etc) for all USACIDC investigations. The commander will complete the DA Form 4833 within 45 days of receipt.

(1) Appropriate blocks will be checked and blanks annotated to indicate the following:

(i) Action taken (for example, judicial, nonjudicial, or administrative). In the event the commander takes action against the soldier for an offense other than the one listed on the DA Form 3975, the revised charge or offense will be specified in the REMARKS section of the DA Form 4833.

(ii) Sentence, punishment, or administrative action imposed.

(iii) Should the commander take no action, the DA Form 4833 must be annotated to reflect that fact.

(2) If the commander cannot complete the DA Form 4833 within 45 days, a written memorandum is required to explain the circumstances. The delay will have an impact on other reporting requirements (e.g., submitting fingerprint cards to the FBI).

(d) Procedures when subjects are reassigned. When the subject of an offense is reassigned, the Provost Marshal/Director of Emergency Services will forward the DA Form 3975, DA Form 4833, and all pertinent attachments to the gaining installation Provost Marshal/Director of Emergency Services who must ensure that the new commander completes the document. Copies of the documents may be made and retained by the processing Provost Marshal Office/Directorate of Emergency Services before returning the documents to the losing installation Provost Marshal/Director of Emergency Services for completion of automated entries and required reports.

(e) Report on subjects assigned to other installations. When the DA Form 3975 involves a subject who is assigned to another installation, the initiating Provost Marshal/Director of Emergency Services will forward the original and two copies of DA Form 4833 to the Provost Marshal/Director of Emergency Services of the installation where the soldier is permanently assigned. The procedures in paragraph (d) of this section will be followed for soldiers assigned to other commands.

(f) Offenses not reportable to USACRC. When the offense is not within a category reportable to USACRC, the original DA Form 4833 is retained by the Provost Marshal/Director of Emergency Services. Otherwise, the original is sent to the Director, USACRC for filing with the MPR.

(g) Civilian court proceedings. If a soldier is tried in a civilian court, and the Provost Marshal/Director of Emergency Services has initiated a MPR, the Provost Marshal/Director of Emergency Services must track the civilian trial and report the disposition on DA Form 4833 as appropriate. That portion of the signature block of DA Form 4833 that contains the word “Commanding” will be deleted and the word “Reporting” substituted. The Provost Marshal/Director of Emergency Services or other designated person will sign DA Form 4833 before forwarding it to USACRC.
(h) Dissemination to other agencies. A copy of the completed DA Form 4833 reflecting offender disposition will also be provided to those agencies or offices that originally received a copy of DA Form 3975 when evidence is involved. The evidence custodian will also be informed of the disposition of the case. Action may then be initiated for final disposition of evidence retained for the case now completed.

(i) Review of offender disposition by the Provost Marshal/Director of Emergency Services. On receipt of DA Form 4833 reflecting no action taken, the Provost Marshal/Director of Emergency Services will review the MPR. The review will include, but is not limited to the following—

(1) Determination of the adequacy of supporting documentation.

(2) Whether or not coordination with the supporting Staff Judge Advocate should have been sought prior to dispatch of the report to the commander for action.

(3) Identification of functions that warrant additional training of military police or security personnel (for example, search and seizure, evidence handling, or rights warning).

(j) Offender disposition summary reports. Provost Marshals/Directors of Emergency Services will provide the supported commander (normally, the general courts-martial convening authority or other persons designated by such authority) summary data of offender disposition as required or appropriate. Offender disposition summary data will reflect identified offenders on whom final disposition has been reported. These data will be provided in the format and at the frequency specified by the supported commander.

§ 635.24 Updating the COPS MPRS.

Installation Provost Marshals/Directors of Emergency Services will establish standard operating procedures to ensure that every founded offense is reported into the COPS MPRS. Timely and accurate reporting is critical. If a case remains open, changes will be made as appropriate. This includes reporting additional witnesses and all aspects of the criminal report.

§ 635.25 Submission of criminal history data to the CJIS.

(a) General. This paragraph establishes procedures for submitting criminal history data (fingerprint cards) to CJIS when the Provost Marshal/Director of Emergency Services has completed a criminal inquiry or investigation. The policy only applies to members of the Armed Forces and will be followed when a military member has been read charges and the commander initiates proceedings for—

(1) Field Grade Article 15, Uniform Code of Military Justice. Initiation refers to a commander completing action to impose non-judicial punishment. Final disposition shall be action on appeal by the next superior authority, expiration of the time limit to file an appeal, or the date the military member indicates that an appeal will not be submitted.

(2) A special or general courts-martial. Initiation refers to the referral of court-martial charges to a specified court by the convening authority or receipt by the commander of an accused soldier’s request for discharge in lieu of court-martial. Final disposition of military judicial proceedings shall be action by the convening authority on the findings and sentence, or final approval of a discharge in lieu of court-martial. The procedures in this subpart meet administrative and technical requirements for submitting fingerprint cards and criminal history information to CJIS. No variances are authorized. Results of summary court-martial will not be reported to the FBI.

(3) DA Form 4833. In instances where final action is taken by a magistrate, the Provost Marshal/Director of Emergency Services will complete the DA Form 4833.

(4) Fingerprint cards. Provost Marshal Offices/Directorates of Emergency Services will submit fingerprint cards on subjects apprehended as a result of Drug Suppression Team investigations and operations unless the USACIDC is completing the investigative activity for a felony offense. In those cases, the USACIDC will complete the fingerprint report process.

(b) Procedures. The following procedures must be followed when submitting criminal history data to CJIS.
§ 635.26 Procedures for reporting Absence Without Leave (AWOL) and desertion offenses.

(a) AWOL reporting procedures. (1) The commander will notify the installation Provost Marshal/Director of Emergency Services in writing within 24 hours after a soldier has been reported AWOL.

(2) The Provost Marshal/Director of Emergency Services will initiate an information blotter entry.

(3) If the AWOL soldier surrenders to the parent unit or returns to military control at another installation, the provisions of AR 630–10 will be followed.

(4) On receipt of written notification of the AWOL soldier's return or upon apprehension, the Provost Marshal/Director of Emergency Services will initiate a reference blotter entry indicating the soldier's return to military control and will prepare an initial DA Form 3975, reflecting the total period of unauthorized absence, and the DA Form 4833. Both of these documents will be forwarded through the field grade commander to the unit commander.

(5) The unit commander will report action taken on the DA Form 4833 no later than the assigned suspense date or provide a written memorandum to
(6) An original DD Form 460 (Provisional Pass) is issued to the soldier to facilitate their return to the parent unit. DD Form 460 will not be required if the Provost Marshal/Director of Emergency Services elects to return the soldier through a different means.

(7) If the soldier is apprehended at or returns to an installation other than his or her parent installation DA Form 3975 and 4833 with a copy of DD Form 460 will be sent to the parent installation Provost Marshal/Director of Emergency Services. The parent installation Provost Marshal/Director of Emergency Services will initiate an information blotter entry reflecting the AWOL soldiers return to military control. A DA Form 3975 and 4833 with an appropriate suspense will be sent through the field grade commander to the unit commander. On return of the completed DA Form 4833 from the unit commander, the original and one copy will be sent to the apprehending Provost Marshal/Director of Emergency Services. The parent installation Provost Marshal/Director of Emergency Services may retain a copy of DA Form 3975 and DA Form 4833.

(b) Desertion reporting procedures. (1) The unit commander must comply with the provisions of AR 630–10 when reporting a soldier as a deserter.

(2) On receipt of the DD Form 553 (Deserter/Absentee Wanted by the Armed Forces), the Provost Marshal/Director of Emergency Services will—

(i) Initiate a DA Form 3975 and a blotter entry reflecting the soldier’s desertion status.

(ii) Complete portions of DD Form 553 concerning the soldier’s driver’s license and vehicle identification. In the remarks section, add other information known about the soldier such as confirmed or suspected drug abuse; history of violent acts; history of escapes; attempted escapes from custody; suicidal tendencies; suspicion of involvement in crimes of violence (for which a charge sheet has been prepared and forwarded); history of unauthorized absences; and any other information useful in the apprehension process or essential to protect the deserter or apprehending authorities.

(iii) An MPR number and a USACRC control number will be assigned to the case and be included in the remarks section of the DD Form 553.

(iv) The DD Form 553 must be returned to the unit commander within 24 hours.

(v) If the deserter surrenders to or is apprehended by the parent installation Provost Marshal/Director of Emergency Services, the Provost Marshal/ Director of Emergency Services will telephonically verify the deserter’s status with the U.S. Army Deserter Information Point (USADIP). A reference blotter entry will be completed changing the soldier’s status from desertion to return to military control.

(vi) If the deserter surrenders to or is apprehended by an installation not the parent installation, the Provost Marshal/Director of Emergency Services will telephonically verify the deserter’s status with USADIP. An information military police report will be prepared, utilizing the CRC number from the original military police report prepared by the parent installation. A blotter entry will also be prepared.

(vii) A DD Form 616 (Report of Return of Absentee) will be completed when deserters are apprehended or surrender to military authority. The USACRC control number assigned to the DD Form 553 will be included in the remarks section of the DD Form 616.

(viii) Upon return of the deserter to military control, DA Forms 3975, 2804 (Crime Records Data), fingerprint card and 4833 will be initiated. The MPR number and USACRC control number will be recorded on all four forms.

(ix) The original DA Form 3975 and other pertinent documents will be sent to the Director, USACRC. The DA Form 4833 must include the commander’s action taken, to include the Commander, Personnel Control Facility, or other commander who takes action based on the desertion charge.

§ 635.27 Vehicle Registration System.

The Vehicle Registration System (VRS) is a module within COPS. Use of VRS to register vehicles authorized access to Army installations is mandated in AR 190–5. Within VRS there are various tabs for registration of vehicles authorized access to an installation, to
include personal data on the owner of the vehicle. There are also tabs for registering weapons, bicycles, and pets. Information on individuals barred entry to an installation is also maintained within VRS.

§ 635.28 Procedures for restricted/unrestricted reporting in sexual assault cases.

Active duty Soldiers, and Army National Guard and U.S. Army Reserve Soldiers who are subject to military jurisdiction under the UCMJ, can elect either restricted or unrestricted reporting if they are the victim of a sexual assault.

(a) Unrestricted reporting. Unrestricted reporting requires normal law enforcement reporting and investigative procedures.

(b) Restricted reporting requires that law enforcement and criminal investigative organizations not be informed of a victim's identity and not initiate investigative procedures. The victim may allow Sexual Assault Response Coordinators (SARC), health care providers (HCP), or chaplains to collect specific items (clothing, bedding, etc.) that may be later used as evidence, should the victim later decide to report the incident to law enforcement. In sexual assault cases additional forensic evidence may be collected using the "Sexual Assault Evidence Collection Kit," NSN 6640–01–423–9132, or a suitable substitute (hereafter, "evidence kit"). The evidence kit, other items such as clothing or bedding sheets, and any other articles provided by the HCP, SARC, or chaplain will be stored in the installation Provost Marshal/Director of Emergency Services' evidence room separate from other evidence and property. Procedures for handling evidence specified in AR 195–5, Evidence Procedures, will be strictly followed.

(c) Installation Provost Marshals/Directors of Emergency Services will complete an information report in COPS for restricted reporting. Reports will be completed utilizing the offense code from the 6Z series. An entry will be made in the journal when the evidence kit or property (clothing, bedding, etc.) is received. The journal entry will be listed using non-identifying information, such as a generic identifier. An entry will not be made in the blotter. Restricted reporting incidents are not reportable as Serious Incident Reports. Property and the evidence kit will be stored for one year and then scheduled/suspended for destruction, unless earlier released to investigative authorities in accordance with the victim's decision to pursue unrestricted reporting. Thirty days prior to destruction of the property, a letter will be sent to the SARC by the Provost Marshal/Director of Emergency Services, advising the SARC that the property will be destroyed in thirty days, unless law enforcement personnel are notified by the SARC that the victim has elected unrestricted reporting. Clothing, the evidence kit, or other personal effects may be released to the SARC for return to the victim. The information report will be updated when the evidence is destroyed, or released to investigative authorities.

(d) In the event that information about a sexual assault that was made under restricted reporting is disclosed to the commander from a source independent of the restricted reporting avenues or to law enforcement from other sources, but from a source other than the SARC, HCP, chaplain, or Provost Marshal/Director of Emergency Services, the commander may report the matter to law enforcement and law enforcement remains authorized to initiate its own independent investigation of the matter presented. Additionally, a victim's disclosure of his/her sexual assault to persons outside the protective sphere of the persons covered by the restricted reporting policy may result in an investigation of the allegations.

§ 635.29 Domestic violence and protection orders.

(a) Responding to incidents of spouse abuse requires a coordinated effort by law enforcement, medical, and social work personnel, to include sharing information and records as permitted by law and regulation. AR 608–18 contains additional information about domestic violence and protective orders.
Appendix C of AR 190–45 includes specific offense codes for domestic violence. All domestic violence incidents will be reported to the local PMO. All reported domestic violence incidents will be entered into MPRS, utilizing DA Form 3975. These codes will be utilized in addition to any other offense code that may be appropriate for an incident. For example, a soldier strikes his or her spouse. When entering the offense data into MPRS, both the offense code for assault (i.e., 5C2B) and the offense code for spouse abuse (from the 5D6 series) will be entered.

A military Protection Order is a written lawful order issued by a commander that orders a soldier to avoid contact with his or her spouse or children. Violations of a military Protection Order must be reported on DA Form 3975, entered into COPS, and entered into NCIC. Violations of a military Protection Order may be violations of Article 92, UCMJ. The commander should provide a written copy of the order within 24 hours of its issuance to the person with whom the member is ordered not to have contact. A copy should be forwarded to the installation Family Advocacy Program Manager (FAPM), the Chief, Social Work Service, and the installation military police.

A civilian Protection Order is an order issued by a judge, magistrate or other authorized civilian official, ordering an individual to avoid contact with his or her spouse or children. Pursuant to the Armed Forces Domestic Security Act a civilian protection order has the same force and effect on a military installation as such order has within the jurisdiction of the court that issued the order. Violations of a civilian Protection Order must be reported on DA Form 3975, entered into COPS, and entered into NCIC.

Establishing domestic violence Memoranda of Understanding.

Coordination between military law enforcement personnel and local civilian law enforcement personnel is essential to improve information sharing, especially concerning domestic violence investigations, arrests, and prosecutions involving military personnel. Provost Marshals/Directors of Emergency Services or other law enforcement officials shall seek to establish formal Memoranda of Understanding (MOU) with their civilian counterparts to establish or improve the flow of information between their agencies, especially in instances of domestic violence involving military personnel. MOUs can be used to clarify jurisdictional issues for the investigation of incidents, to define the mechanism whereby local law enforcement reports involving active duty service members will be forwarded to the appropriate installation law enforcement office, to encourage the local law enforcement agency to refer victims of domestic violence to the installation Family Advocacy office or victim advocate, and to foster cooperation and collaboration between the installation law enforcement agency and local civilian agencies.

MOUs should address the following issues:

1. A general statement of the purpose of the MOU.
2. An explanation of jurisdictional issues that affect respective responsibilities to and investigating incidents occurring on and off the installation. This section should also address jurisdictional issues when a civilian order of protection is violated on military property (see 10 U.S.C. 1561a).
3. Procedures for responding to domestic violence incidents that occur on the installation involving a civilian alleged offender.
4. Procedures for transmitting incident/investigation reports and other law enforcement information on domestic violence involving active duty service members from local civilian law enforcement agencies to the installation law enforcement office.
5. Procedures for transmitting civilian protection orders (CPOs) issued by civilian courts or magistrates involving active duty service members from local law enforcement agencies to the installation law enforcement office.
6. Designation of the title of the installation law enforcement recipient of such information from the local law enforcement agency.
7. Procedures for transmitting military protection orders (MPOs) from the installation law enforcement office to
§ 635.31 Lost, abandoned, or unclaimed property.

This is personal property that comes into the possession, custody, or control of the Army and is unclaimed by the owner. Property is considered to be abandoned only after diligent effort has been made to determine and locate its owner, the heir, next of kin, or legal representative. A military person who is ordered overseas and is unable to dispose of their personal property should immediately notify their chain-of-command. The commander will appoint a board to rule on the disposition of the property. If a law enforcement agency takes custody of the property it will be tagged and a record made as shown in paragraph (a) of this section. A report will be made to the installation commander who will take action in accordance with DOD 4160.21-M, chapter 4, paragraph 40, Defense Materiel Disposition Manual. Pending board action under DOD 4160.21-M, the law enforcement agency having physical custody is responsible for the safekeeping of seized property. The following procedures should be used:

(a) Property will be tagged using DA Form 4002 (Evidence/Property Tag) or clearly identified by other means, inventoried, and made a matter of record. These records are kept by the custodian of the property.

(b) Lost, abandoned, or unclaimed property will be kept in a room or container separate from one used to store property held as evidence. Records or logs of property not held as evidence will be separated from those pertaining to evidence. However, all property will be tagged, accounted for, and receipted for in a similar manner as evidence.

(c) Property that has been properly identified through board action under DOD 4160.21-M as having an owner will be segregated and tagged with the name of that person.

(d) Abandoned or unclaimed property will be held until its status can be determined. In many instances, lost property can be returned to the owner upon presentation of proof of ownership.

(e) In all cases, a receipt should be obtained at time of release.

Subpart D—Army Quarterly Trends and Analysis Report

§ 635.32 General.

(a) This subpart prescribes policies and procedures for the coordination and standardization of crime statistics reporting with HQDA. Crime statistical reports and trends provided to HQDA and other agencies and those related to special interests inquiries, the media, and the public must reflect uniformity in terminology, methods of presentation, and statistical portrayal to preclude misinterpretation of information.

(b) Any report containing Army-wide aggregate crime data or statistics addressed to the Secretary of the Army, Chief of Staff of the Army, or Vice Chief of Staff of the Army will be coordinated and cleared with HQDA, Office of the Provost Marshal General (DAPM–MPD–LE). Correspondence and reports will be coordinated with HQDA, Office of the Provost Marshal General (DAPM–MPD–LE) prior to release to any agency, activity, or individual.

(c) HQDA staff agencies ACOM, ASCC and DRU authorized by regulation or statute to conduct independent investigations, audits, analyses, or inquiries need not coordinate reported information with HQDA, Office of the Provost
§ 635.35  Procedures.

(a) As required by Federal law, Army personnel involved in the detection, investigation, and prosecution of crimes must ensure that victims and witnesses rights are protected. Victim's rights include—

(1) The right to be treated with fairness, dignity, and a respect for privacy.

(2) The right to be reasonably protected from the accused offender.

(3) The right to be notified of court proceedings.

(4) The right to be present at all public court proceedings related to the offense, unless the court determines that testimony by the victim would be materially affected if the victim heard other testimony at trial, or for other good cause.

(5) The right to confer with the attorney for the Government in the case.

(6) The right to restitution, if appropriate.

(7) The right to information regarding conviction, sentencing, imprisonment, and release of the offender from custody.

(b) In keeping with the requirements listed in paragraph (a) of this section, Provost Marshals/Directors of Emergency Services must ensure that—
All law enforcement personnel are provided copies of DD Form 2701 (Initial Information for Victims and Witnesses of Crime).

A victim witness coordinator is appointed in writing.

Statistics are collected and reported into COPS.

Coordination with the installation staff judge advocate victim witness coordinator occurs to ensure that individuals are properly referred for information on restitution, administrative, and judicial proceedings.

Coordination with installation Family Advocacy Program’s Victim Advocate occurs to support victims of spouse abuse. Victim Advocacy services include crisis intervention, assistance in securing medical treatment for injuries, information on legal rights and proceedings, and referral to military and civilian shelters and other resources available to victims.

§ 635.36 Notification.

(a) In addition to providing crime victims and witnesses a DD Form 2701, law enforcement personnel must ensure that individuals are notified about—

(1) Available military and civilian emergency medical care.

(2) Social services, when necessary.

(3) Procedures to contact the staff judge advocate victim/witness liaison office for additional assistance.

(b) Investigating law enforcement personnel, such as military police investigators—

(1) Must ensure that victims and witnesses have been offered a DD Form 2701. If not, investigating personnel will give the individual a copy.

(2) In coordination with the Provost Marshal/Director of Emergency Services victim witness coordinator, provide status on investigation of the crime to the extent that releasing such information does not jeopardize the investigation.

(3) Will, if requested, inform all victims and witnesses of the apprehension of a suspected offender.

§ 635.37 Statistical reporting requirements.

(a) DOD policies on victim witness assistance require reporting of statistics on the number of individuals who are notified of their rights. The DA Form 3975 provides for the collection of statistical information.

(b) The COPS system supports automated reporting of statistics. HQDA, Office of the Provost Marshal General (DAPM-PD-LE) as the program manager may require periodic reports to meet unique requests for information.

(c) It is possible that a victim or witness may initially decline a DD Form 2701. As the case progresses, the individual may request information. If a case is still open in the Provost Marshal Office/Directorate of Emergency Services, the Provost Marshal/Director of Emergency Services victim witness coordinator shall provide the DA Form 2701 to the individual and update the records. Once the case is referred to the staff judge advocate or law enforcement activity ceases, COPS will not be updated without prior coordination with the installation Staff Judge Advocate office.

PART 636—MOTOR VEHICLE TRAFFIC SUPERVISION (SPECIFIC INSTALLATIONS)

Sec.

636.0 Scope of this part.

636.1 Responsibilities.

636.2 Program objectives.

636.3 Suspension or revocation of driving privileges.

636.4 Administrative due process for suspensions and revocations.

636.5 Army administrative actions against intoxicated drivers.

636.6 Remedial driver training program.

636.7 Extensions of suspensions and revocations.

636.8 Registration policy.

636.9 Registration requirement.

636.10 Hunter Army Airfield vehicle registration.

636.11 Installation traffic codes.

636.12 Traffic accident investigation.

§ 636.0 Scope of this part.

This part contains regulations which are in addition to the motor vehicle supervision regulations contained in 32 CFR part 634. Each subpart in this part contains additional regulations specific to the named installation.

Subpart A—Fort Stewart, Georgia

§ 636.1 Responsibilities.

In addition to the responsibilities described in §634.4 of this subchapter, Unit Commanders will:

(a) Monitor and control parking of military and privately owned vehicles within the unit’s area, to include motor pools and assigned training areas.

(b) Establish a program in accordance with 24th Infantry Division (Mechanized) and Fort Stewart Regulation 755–2 to identify abandoned privately owned vehicles in the unit’s area and coordinate with the Military Police for impoundment.

(c) In coordination with the Military Police, identify problem drivers in the unit and take appropriate action to improve their driving habits.

(d) Ensure that the contents of this part are explained to all newly assigned personnel, including personnel on temporary duty with their unit for 10 days or more.

(e) Identify unit member’s vehicles which have obvious safety defects (see §636.33) and take appropriate action to have the defect corrected. Commanders who cause a vehicle to be removed from the installation without the consent of the owner could be found liable for subsequent damage done to the vehicle provided that the damage was the result of negligence on the part of the government personnel.

(f) Identify those individuals required to attend the Defensive Driving Course (DDC) or Motorcycle Defensive Driving Course (MDDC) and ensure their attendance at the course.

§ 636.2 Program objectives.

In addition to the requirements of §634.5 of this subchapter:

(a) The entry of motor vehicles on the Fort Stewart/Hunter Army Airfield reservation is permitted by the Commanding General under the conditions prescribed by this part. Upon entering the military reservation, the driver subjects himself and his vehicle to reasonable search. The authority to search vehicles on post is subject to the provisions of AR 190–22 and AR 210–10. This part is not applicable to vehicle safety inspections and spot checks conducted primarily for purposes of safety.

(b) The Military Police may:

(1) Inspect any vehicle operated on the reservation for mechanical condition.

(2) Impound, exclude, or remove from the reservation any vehicle used as an instrument in a crime, suspected of being stolen, abandoned, inoperable, unregistered, or being operated by a person under the influence of intoxicants or drugs. No vehicle will be impounded unless the impoundment meets the requirements of AR 190–5, paragraph 6–2 (32 CFR 634.50) and §636.38 of this subpart. In the event a vehicle is impounded as an instrument of crime (particularly in the transport of illegal drugs or weapons), coordination will be made with the appropriate civilian law enforcement agencies.
§ 636.3 Suspension or revocation of driving privileges.

In addition to the requirements of §634.10 of this subchapter:

(a) Administrative suspension or revocation of installation driving privileges applies to the operation of a motor vehicle on Fort Stewart/Hunter Army Airfield.

(b) Installation driving privileges will be suspended for up to 6 months for drivers who accumulate 12 traffic points within 12 consecutive months, or 18 traffic points within 24 consecutive months.

(c) The Garrison Commander and Deputy Garrison Commander are designated as suspension/revocation authorities for:

1. Suspension of driving privileges should the evidence indicate that a charge of driving under the influence is warranted or:
2. The suspension/revocation for accumulation of 12 traffic points within 12 months or 18 points within 24 consecutive months.

§ 636.4 Administrative due process for suspensions and revocations.

In addition to the requirements of §634.11(a) of this subchapter:

(a) The Provost Marshal or his designee will provide the written notice of pending action and offer of an administrative hearing using AFZP Form Letter 316, Suspension of Installation Driving Privileges.

(b) The Garrison Commander and Deputy Garrison Commander are designated as reviewing authorities to conduct administrative hearings.

(c) Individuals who desire an administrative hearing to review a decision to impose immediate suspension, or to appeal the decision of the administrative hearing officer, will adhere to the following procedures. A request for an administrative hearing will be forwarded through their supervisory chain of command. Requests from family members or non-employee civilians can be forwarded to the Provost Marshal’s Administrative Section at Fort Stewart or Hunter Army Airfield and can either be delivered or post marked within ten days of notification of the suspension action.

(d) Individuals who were initially charged with driving under the influence (DUI) based in part on a blood alcohol content (BAC) test which has not subsequently been invalidated and who are found not guilty of DUI may request a hearing to determine if their driving privileges should be restored. Such requests shall be forwarded through their chain of command to arrive at the Provost Marshal’s Office (AFZP-PMA for Fort Stewart or AFZP-PM-H for Hunter Army Airfield) not later than ten working days after the date of court action.

§ 636.5 Army administrative actions against intoxicated drivers.

For this installation, in violation of State law referenced in §634.12(a)(3) of this subchapter, means a blood alcohol content of 0.10 percent or higher as set forth in Official Code of Georgia Annotated 40-6-392(b)(3).
§ 636.6 Remedial driver training program.

For this installation remedial driving training program referenced in §634.12(b) of this subchapter is operated by the Installation Safety Office. Driving privileges may be withheld beyond expiration of the sanction to complete periodical driving or alcohol and drug rehabilitation programs in accordance with AR 190–5, paragraphs 2–12c and d, and 5–4f (32 CFR 634.17(c) and (d) and 634.17(f)).

§ 636.7 Extensions of suspensions and revocations.

In addition to the requirements in §634.17(a) of this subchapter, for each subsequent violation of the suspension period, an additional five years will be added to the suspension period for this installation (see Table 634.46 in §634.46 of this subchapter).

§ 636.8 Registration policy.

In addition to the requirements of §634.19(a) of this subchapter, motor vehicles which are owned and/or operated by a person who resides, performs duty, is employed on, or "frequently uses" the facilities of Hunter Army Airfield will be registered in accordance with the requirements of §634.20 of this subchapter. Frequent users include but are not limited to family members, retirees, and civilians whose normal route of travel between home and work takes them through the installation.

§ 636.9 Registration requirement.

In addition to the requirements of §634.20 of this subchapter:

(a) The Military Police will cite violators on DD Form 1408 (Warning Citation) for observed safety defects. On a periodic basis, Military Police will conduct vehicle safety inspection operations using the criteria in §636.33.

(b) An individual possessing a valid USAREUR privately owned vehicle (POV) license may operate a motor vehicle in the State of Georgia for a period not to exceed 30 days. After the 30 day period the individual must obtain a valid license from the State of Georgia or another state to operate a motor vehicle in the State of Georgia.

(c) An individual returning a vehicle to Continental United States (CONUS) has 30 days from date of entry or 10 days after reporting for military duty to register that vehicle in the State of Georgia or another state. A temporary pass will be issued until this requirement has been met.

(d) Liability and no-fault insurance requirements. (1) All personnel operating vehicles on Fort Stewart/Hunter Army Airfield will obtain and maintain, at least, the minimum amount of liability and no-fault insurance required by the State of Georgia. The amounts are as follows:

(A) $15,000.00 per person per accident for bodily injury.

(B) $30,000.00 per incident for bodily injury.

(C) $10,000.00 per accident for property damage.

(ii) No-Fault—$5,000.00.

(2) Proof of this insurance will be required at the time of registration.

(e) Vehicle safety inspections are not required in the State of Georgia, however, vehicles operated on Fort Stewart/Hunter Army Airfield must be in safe operating condition and be able to pass spot vehicle safety equipment checks conducted by the Military Police. Safety criteria is set forth in §636.33 of this subpart.

§ 636.10 Hunter Army Airfield vehicle registration.

Personnel assigned or employed at Hunter Army Airfield are required to register their privately owned vehicles within five days after arrival to the installation. Requirements for registration are listed in AR 190–5 and this part.

(a) Temporary passes may be issued to personnel not assigned to the installation but requiring temporary access to the installation. These include personnel employed by construction and material handling vehicles requiring on post access. Personnel requesting temporary passes must meet the same requirements as do personnel requiring decals.

(b) Temporary passes will not exceed 45 days. Renewal of temporary passes is prohibited except upon approval of the Installation Commander or his/her designee.
§ 636.11

(2) Temporary passes will be conspicuously placed on the left side of the vehicle dashboard between the dashboard and the front windshield. Nothing will be placed so as to obscure the view of the temporary pass from the exterior of the vehicle. The pass will remain in this position during the entire time the vehicle is on the installation. Failure to conspicuously display the temporary pass could result in the vehicle being removed from the installation.

(3) Temporary passes will remain with the vehicle for which they were issued and not be transferred to other vehicles.

(4) Each person driving a vehicle on the installation must individually meet the drivers license requirement of the installation as well as sign the temporary pass.

(5) Temporary passes will be returned to the Vehicle Registration section when they have expired or are no longer needed.

(b) Decals are to be issued to all military and civilian employees of Hunter Army Airfield, military retirees, and contractors/vendors doing extended business on the installations. Requirements outlined in AR 190–5 (32 CFR part 634) and this part must be met before decals are issued.

(c) Personnel requiring permanent decals, who do not meet the requirements outlined in AR 190–5 (32 CFR part 634) and this part, will be issued temporary passes not to exceed 45 days. Registration requirements will be met as soon as possible after issuance of the temporary pass. A decal may then be issued.

(d) DOD decals (DD Form 2220) will be utilized for vehicle registration. Additional installation name and expiration month and year decals will be utilized with sizes and coloration as prescribed in AR 190–5 (32 CFR part 634).

(e) Decals will be permanently affixed to the vehicles for which they are registered in one of two places:

1. Exterior, front windshield lower left corner.
2. Front, left bumper of the vehicle, conspicuously displayed. Decals will not be affixed to the front spoilers or any other area which obscures the viewing of the decal.

(3) Installation decals will be placed directly beneath and centered on the DOD decal. Expiration decals will be placed on each side and level with the DOD decal with the month on the left and the year on the right.

(4) Decals will not be affixed to any other portion of the vehicle other than listed in § 636.10(e) (1) through (3).

§ 636.11 Installation traffic codes.

In addition to the requirements in § 634.25(d) of this subchapter, on-post violations offenders will be cited under the appropriate Georgia Traffic Code as assimilated by 18 U.S.C. 13 (for civilians) and Art 134c, Uniform Code of Military Justice (UCMJ) (for military). If no Georgia Code is appropriate for a specific offense, civilians will be cited under 40 U.S.C. 318a and military personnel will be cited under Art 92, UCMJ. The Fort Stewart/Hunter Army Airfield installation traffic code conforms to the State of Georgia Traffic Law.

§ 636.12 Traffic accident investigation.

In addition to the requirements in § 634.28 of this subchapter, Military Police at Fort Stewart/Hunter Army Airfield installation will investigate reportable motor vehicle accidents involving government owned or privately owned vehicles.

§ 636.13 Traffic accident investigation reports.

In addition to the requirements in § 634.29 of this subchapter:

(a) Military Police at Fort Stewart/Hunter Army Airfield installations will record traffic accident investigations on DA Form 3946 (Military Police Traffic Accident Report) and DA Form 3975 (Military Police Report).

(b) All privately owned motor vehicle accidents on Fort Stewart or Hunter Army Airfield will be immediately reported to the Military Police for investigation. Unless an emergency situation exists, vehicle(s) involved in an accident will only be moved on order of the Military Police.

§ 636.14 Parking.

In addition to the requirements in § 634.31 of this subchapter:
(a) Military Police will enforce parking in handicapped and Commanding General reserved parking spaces at Fort Stewart/Hunter Army Airfield soldier service facilities and assess points in accordance with Table 634.46 in §634.46 of this subchapter and Table 636.19 in §636.19. Vehicles may be towed for such violations as parking in handicapped parking spaces and parking on a yellow curb among others.

(b) Reserved parking spaces in areas under the control of units or staff sections may be designated by the commander or staff section chief who is also responsible to control the use of these spaces.

(c) Parking spaces for tactical vehicles at the Main Exchange/Commissary area will be designated at the end of rows, farthest from the facilities. Only those vehicles properly authorized by unit commanders will be parked at the Main Exchange/Commissary area.

§ 636.15 Traffic violation reports.

In addition to the requirements in §634.32 of this subchapter:

(a) The Provost Marshal in coordination with the Staff Judge Advocate will determine what traffic offenses will be referred to the U.S. Magistrate Court by means of DD Form 1805.

(b) Of the four available actions on the back of the DD Form 1408, supervisors of civilian employees may take one of the following two actions.

(c) No action taken: A finding of not guilty. There must be an explanation of the reason for no action taken.

(d) Administration: A finding of guilty. This includes, but is not limited to, such actions as a written warning, letter of reprimand, or suspension. Supervisors should coordinate with CPO, MER branch before taking adverse action.

(e) Reports of Commander’s action taken will be forwarded to the Provost Marshal Office through the appropriate major subordinate commander.

§ 636.16 Detection, apprehension, and testing of intoxicated drivers.

In addition to the requirements in §634.36 of this subchapter, the standard field sobriety test used by the Military Police may include the following tests:

(a) Horizontal gaze nystagmus.

(b) Walk and turn.

(c) One leg stand.

§ 636.17 Compliance with State laws.

In addition to the requirements of §634.42 of this subchapter, the Provost Marshal will conduct necessary coordination with civil enforcement agencies to ensure receipt of information and assistance as required. The Directorate of Logistics will secure any necessary permits for military movement on public roads and highways.

§ 636.18 Driving records.

In addition to the requirements in §634.44 of this subchapter, the Provost Marshal Office will maintain driver records.

§ 636.19 Point system application.

§ 636.20 Point system procedures.

In addition to the requirements of §634.47 of this subchapter:

(a) Reports of parking violations recorded on DD Form 1408 or DD Form 1805 will serve as a basis for determining point assessment.

(b) The instructions in paragraph (a) of this section also apply to the receipt of a DD Form 1408 (Armed Forces Traffic Ticket) for a parking violation.

§ 636.21 Obedience to official traffic control devices.

(a) All drivers will obey the instructions of official signs, unless directed to do otherwise by the Military Police.

(b) Official traffic control devices, such as traffic cones or barricades, are presumed to have been placed by proper authority.

§ 636.22 Speed regulations.

(a) Georgia state speed limits apply unless otherwise specified by this part.

(b) Drivers will operate their vehicles at a reasonable and prudent speed based on traffic and road conditions, regardless of posted speed limits.
§ 636.23 Turning movements.

(a) U-turns are prohibited on all streets in the cantonment area.

(b) Right-turns will be made from a position as close to the right edge or right curb of the roadway as possible.

(c) Left-turns will be made from a position as close to the center line as possible or from a left turn lane, if available.

(d) All turns will be signaled continuously beginning not less than 100 feet prior to the turn.

§ 636.24 Driving on right side of roadway; use of roadway.

(a) All drivers will use the right side of roadways, except:

(1) When passing a vehicle proceeding in the same direction.

(2) When an obstruction is blocking all or part of the right lane of the roadway.

(3) When driving on a one-way street.

(b) Drivers proceeding in opposite directions will pass to the right, each using one-half of the roadway.

(c) Drivers passing another vehicle traveling in the same direction will exercise the utmost caution and safety and will abide by all applicable traffic laws.

(d) Drivers of vehicles being passed will give way to the right and not increase their vehicle’s speed.

(e) Drivers will allow a sufficient distance between their vehicle and the vehicle in front to allow a safe stop under all conditions.

§ 636.25 Right-of-way.

(a) When two vehicles enter an intersection from different highways at the same time, the driver of the vehicle on the left will yield right-of-way. When entering an intersection without traffic control devices from a highway which terminates at the intersection, that driver will yield right-of-way.

(b) Drivers turning left within an intersection will yield right-of-way to vehicles approaching from the opposite direction.

(c) Drivers approaching a stop sign will stop at the marked stop line, if present, or before entering the crosswalk, if present, or at a point nearest the intersecting roadway where the driver will yield the right-of-way, if required.

(d) Drivers approaching yield signs will slow down to a speed not exceeding 10 miles per hour and yield the right-of-way to any approaching vehicles, coming to a stop if necessary.

(e) Drivers entering or crossing a roadway from any place other than another roadway will yield the right-of-way to vehicles on the roadway.

(f) Upon the immediate approach of an authorized emergency vehicle identified as such, all drivers will yield the right-of-way to the emergency vehicle.
§ 636.26 Pedestrian’s rights and duties.

(a) Pedestrians will obey all traffic control devices and regulations, unless directed to do otherwise by the Military Police.

(b) When traffic-control signals are not in place or not in operation, the driver of a vehicle will yield the right of way by slowing down or stopping, when a pedestrian is in a crosswalk on the same side of the road as the driver’s vehicle, or when the pedestrian is approaching so closely from the opposite half of the roadway as to be in danger.

(c) Pedestrians will not suddenly leave a curb or other place of safety and walk or run into the path of a vehicle which is so close to the crosswalk that it is impractical for the driver to stop.

(d) Pedestrians crossing a roadway, at a point other than a crosswalk, will yield the right-of-way.

(e) Pedestrians will not cross any intersection diagonally unless clearly authorized to do so.

(f) Every driver will exercise due care to avoid colliding with any pedestrian upon any roadway and will exercise proper precaution upon observing any child or any obviously confused, incapacitated, or intoxicated person.

(g) A person who is under the influence of intoxicating liquor or any drug to a degree which renders himself a hazard will not walk upon any roadway.

(h) Pedestrians will use sidewalks, where provided, rather than walking upon the roadway. When sidewalks are not provided, pedestrians will walk the shoulder of the roadway as far from the edge of the roadway as possible. When neither sidewalks nor a shoulder are available, pedestrians will walk on the extreme edge of the roadway, facing traffic, and will yield to all oncoming traffic.

(i) Individuals will not stand in or beside the roadway to solicit rides (hitch-hike).

(j) Individuals will not stand in or beside the roadway to solicit business, employment, or contributions from the occupant of any vehicle.

(k) Pedestrians will yield to all authorized emergency vehicles using an audible signal and/or a visual signal.

(l) The wearing of headphones or earphones by pedestrians or joggers while walking or jogging on roadways or on the shoulders of roadways is prohibited.

§ 636.27 Regulations for bicycles.

(a) Parents will not knowingly allow their children to violate any of the provisions of this section.

(b) Traffic laws and regulations in this part apply to persons riding bicycles. Bicycle riders are granted all the rights and are subject to all duties of motorized vehicle operators, except those which logically do not apply.

(c) Bicycles will be parked against the curb or in a rack, provided for that purpose, and will be secured.

(d) Bicycle riders will not attach the bicycle or themselves to any motorized vehicle operating upon the roadway.

(e) Bicycles will be ridden upon the roadway in single-file.

(f) Bicycles operated between dusk and dawn will utilize a headlight visible for a minimum of 300 feet and a rear reflector or red light visible for 300 feet to the rear.

(g) Bicycles will not be ridden without an operable brake system.

(h) Bicycles will not be ridden if the pedal, in its lowermost position, is more than 12 inches above the ground.

(i) If a bicycle/pedestrian path or sidewalk is present, bicyclists will use the patch or sidewalk instead of the roadway.

(j) Certain roadways have been designated and marked as being off-limits to bicyclists. Bicyclists will use an alternate roadway or a bicycle path rather than those roadways.

§ 636.28 Special rules for motorcycles/mopeds.

(a) Traffic laws and regulations in this part apply to persons riding motorcycles/mopeds. Motorcycle/moped operators are granted all the rights and are subject to all duties of motor vehicle operators, except those which logically do not apply.

(b) Motorcycles/moped operators will ride only while seated facing forward with one leg on either side of the vehicle. Passengers will not be carried unless the vehicle is designed
§ 636.29 Go-carts, minibikes, and all terrain vehicles (ATV’s).

(a) Operators of “go-carts,” “minibikes,” and ATV’s 16 years of age or older, must comply with applicable Georgia State Law and Fort Stewart traffic laws and regulations contained in this part.

(b) “Go-carts,” “minibikes,” and ATV’s operated on installation roadways are required to meet the requirements of this part and the Georgia Traffic Code.

(c) Off-road vehicles will only be operated in areas specified by the DPCA. The DPCA will specify conditions for off-road operation.

(d) “Go-carts,” “minibikes,” and ATV’s will only be operated during daylight hours and will not be operated during periods of inclement weather or reduced visibility.

(e) Operators and passengers of “go-carts,” “minibikes,” and ATV’s must wear approved protective helmets, eye protection, and footwear (open-toed footwear is prohibited).

(f) Soldiers or sponsors of persons operating “go-carts,” “minibikes,” and ATV’s are responsible for the safe operation of the vehicle.

§ 636.30 Stopping, standing and parking.

(a) Drivers will not stop, park, or leave standing their vehicle, whether attended or unattended, upon the roadway when it is possible to stop, park or leave their vehicle off the roadway. In any case, parking or standing the vehicle upon the roadway will only be done in an emergency.

(b) Vehicles, not clearly identified as operated by a handicapped individual, will not be parked in a handicapped parking space.
(c) Whenever Military Police find a vehicle parked or stopped in violation of this section, they may immediately move, or cause to be moved, the vehicle off the roadway. At the direction of the Provost Marshal, or his designee, vehicles parked in restricted or reserved parking spaces, may be moved.

(d) The Military Police may remove or cause to be removed, to a safe place, any unattended vehicle illegally left standing upon any highway or bridge or within 10 feet of any railroad track on the installation.

(e) As a crime prevention measure, the Military Police may pick up keys left in vehicles, secure the vehicle in place, and post a notice directing the owner to proceed to the MP station to claim his/her keys. The program will be adequately publicized and will only be invoked after a conscientious attempt to locate the owner.

(f) No driver will stop, stand, or park a vehicle:

(1) On the roadway side of any vehicle stopped or parked at the edge of a curb or a street.

(2) On a sidewalk.

(3) Within an intersection.

(4) On a crosswalk.

(5) Alongside or opposite any street excavation or obstruction when traffic would be obstructed.

(6) Upon a bridge or other elevated structure.

(7) On any railroad tracks or within 10 feet of any rail road track.

(8) On any controlled-access highway.

(9) Where prohibited by official signs.

(10) Alongside any roadway in any manner which obstructs traffic.

(g) No driver will stand or park a vehicle, whether occupied or not, except momentarily to pick up or discharge a passenger or passengers:

(1) In front of a public or private driveway.

(2) Within 10 feet of a fire hydrant.

(3) Within 20 feet of a crosswalk at an intersection.

(4) Within 20 feet upon the approach to any flashing signal, a stop sign, yield sign, or traffic control signal located at the side of a roadway.

(5) Within 20 feet of a driveway entrance to any fire station and on the side of a street opposite the entrance to any fire station within 75 feet of said entrance (when properly sign posted).

(6) At any place where official signs prohibit standing.

(7) Adjacent to any curb painted yellow or identified, by signs, as a “No Parking” area.

(8) Along a roadway against the flow of traffic.

(9) Within 20 feet of any building in what would reasonably be considered a “fire-lane” unless specified as a parking space.

(10) Parallel parking along the curb is authorized in housing areas unless otherwise posted.

(11) Parking is prohibited upon lawns or grassed (seeded) areas, unless specifically authorized by the Provost Marshal. This prohibition is not intended, however, to extend to those locations designated as bivouac sites, range areas, etc.

(12) No dual-wheeled or tandem-wheeled recreational vehicles and trailers will be stored at government quarters. All other recreational vehicles, to include campers, trailers, boats, pop-up campers, and camper shells may be parked in the driveway area or under the carport of individual quarters. To prevent injury to children playing on and around trailers, one tire on each side of the trailer will be chocked in front and back. Trailer tongues, without installed supports, will either be left on the ground or supported in such a manner as to preclude the support tipping over and allowing the trailer tongue to fall. If the vehicle creates a safety hazard or is an eyesore, personnel are encouraged to use the storage facilities available at the Outdoor Recreation Center, Holbrook Pond, Fort Stewart, or at the Private Vehicle Storage area at Hunter Army Airfield. House trailers are not authorized to be parked in the quarters area. Campers, camper trailers, and tents will not be approved for occupancy in the quarters area. Parking of recreational vehicles on the street will be limited to 24 hours for owners to load and unload the vehicle at the owner’s quarters.

(h) No driver will use a parking lot, sidewalk, fire lane, or vacant property to drive on in order to avoid a traffic control device or alter the traffic flow plan unless authorized to do so by the
§ 636.31 Abandoned vehicles.

(a) Any MP or DOD police officer who finds or has knowledge of a motor vehicle which has been left unattended or abandoned on a street, road, highway, parking lot, or any other real property of the installation for a period of at least 72 hours may be authorized by the Provost Marshal or his designee to cause said motor vehicle to be moved to an impoundment lot for storage.

(b) Any MP or DOD police officer who, under the provisions of this section, causes any motor vehicle to be moved to an impoundment lot or other temporary place of safety is acting with proper authority and within the scope of that officer’s employment, except that any wanton or intentional damage done to any motor vehicle by any MP or DOD police officer should not be within the scope of either that officer’s authority or employment.

(c) Unit commanders, with knowledge of an abandoned vehicle in their unit area, should attempt to identify the owner and have them remove the vehicle. When owners cannot be identified or are no longer assigned to this command, unit commanders will notify the MP’s to initiate impoundment procedures.

(d) Civilian vehicles left abandoned on the reservation will be towed to an impoundment lot for further disposition.

(e) Personnel experiencing motor vehicle trouble may authorize the MP desk to obtain the assistance of a civilian wrecker, but in doing so, the government assumes no liability of payment for such services or possible resulting damage.

§ 636.32 Miscellaneous instructions.

(a) All unattended motor vehicles will have the engine stopped and the ignition locked.

(b) Vehicles will not be operated when so loaded with passengers and/or goods that the driver’s view is blocked or control over the driving mechanism is interfered with.

(c) Drivers, other than on official business, will not follow any emergency vehicle, operating under emergency conditions, closer than 500 feet or park closer than 500 feet to any emergency vehicle stopped for an emergency.

(d) No vehicle will be driven over a fire hose unless directed to do so by a fire official, or the Military Police.

(e) Ground guides will be posted, during backing, at the left rear of any ¾ ton or larger vehicle.

(f) All vehicles carrying a load will have the load secured and/or covered to prevent the load from blowing or bouncing off the vehicle.

(g) A red flag or red light, visible for at least 100 feet from the rear will be attached to any load protruding beyond the rear of any vehicle.

(h) Troop marches, physical training runs, etc., will not be conducted in a manner that will interfere with motor vehicle traffic on the Fort Stewart/Hunter Army Airfield reservation.

(1) Units participating in parades and related practices, road marches, etc., will not conduct such marches upon any hard surface road or traffic way unless coordination has been made with the Provost Marshal Office.

(2) Physical training runs, exercises, or tests will not be conducted upon any hard surface road or traffic way unless such is specifically allowed in 24th Infantry Division (Mechanized) and Fort Stewart Regulation 350-1.

(i) Congested housing areas on the installation require special precaution on the part of drivers and persons living in those areas.

(1) Parents can assist drivers in this regard by reminding their children that housing area streets are extremely dangerous and that playing in the street is prohibited.

(2) Bus stops are sites particularly prone to large numbers of children playing immediately adjacent to or actually in the roadway while awaiting arrival of the school bus.

(3) Complaints received by the MP desk, concerning children playing in the streets, must be investigated in the interest of safety. Repeated violations could result in further action by the chain of command.

(j) Vehicles and/or trailers will not be towed with a chain or rope (vehicles may be towed by another privately
owned vehicle by use of a rigid tow bar).

(k) At entrances to Fort Stewart/Hunter Army Airfield where a gate guard is positioned, drivers are required to obey his/her instructions. During hours of darkness, headlights will be switched to parking lights upon approach to the gate.

(l) Motorists will drive with headlights illuminated at any time from a half hour after sunset to a half hour before sunrise and at any time when it is raining in the driving zone and at any other time when there is not sufficient visibility to render clearly discernible persons and vehicles on the highway at a distance of 500 feet ahead.

(m) Motor vehicles will not be operated if visibility to the front, rear, or side is rendered unsafe and improper from fogged or iced-over windows.

(n) Aircraft runways, taxiways, and aprons at Hunter Army Airfield and Wright Army Airfield and “OFF-LIMITS” to all privately owned vehicles.

(o) Extensive repairs to automobiles will not be undertaken in housing areas, parking lots, or other similar areas. Repairs extending over a 24 hour period will be considered extensive.

(p) Tactical vehicles will not be driven in housing areas. Post police or vehicles on similar details may drive in the housing areas as required.

(q) Active duty personnel residing on post are encouraged to have their privately owned bicycles, “go-carts,” and “minibikes” registered with the Provost Marshal’s Office (Registration Branch) in conjunction with the Installation Crime Prevention Program.

(r) All personnel operating a vehicle on Fort Stewart/Hunter Army Airfield will have proof of insurance for the vehicle, in the vehicle at all times.

§ 636.33 Vehicle safety inspection criteria.

(a) The vehicle safety inspection criteria listed in this paragraph (a) are general in nature; specific evaluation techniques for these criteria are contained in Georgia Traffic Law.

(1) Headlights—every vehicle, except motorcycles, will have at least two headlights, one on each side of the front of the vehicle, capable of illuminating 500 feet to the front. Motorcycles will have one headlight.

(2) Tail Lamps—every vehicle will have at least one red, self-illuminating lamp on the rear of the vehicle, visible from 500 feet to the rear.

(3) Registration Plate Lamp—every vehicle will have a lamp designed to illuminate the registration plate with white light making the plate legible from a distance of 50 feet.

(4) Rear Reflectors—every vehicle, except motorcycles, will have two red reflectors on the rear. Motorcycles will have one red reflector.

(5) Stop Lamp—every vehicle will have at least one red or yellow stop lamp on the rear which will be actuated upon application of the foot brake.

(6) Turn Signals—every vehicle will be equipped with electrical or mechanical turn signals capable of indicating any intention to turn either to the right or to the left, and visible from the front and rear. This requirement does not apply to any motorcycle or motor-driven cycle manufactured prior to 1 January 1972.

(7) Brakes—every vehicle will be equipped with brakes adequate to control the movement of and to stop and hold such vehicle.

(8) Horn—every vehicle will be equipped with an operable horn, capable of emitting sound audible for at least 200 feet.

(9) Muffler—every vehicle will have a muffler in good working order and in constant operation.

(10) Mirror—every vehicle, from which the driver’s view is obstructed, will be equipped with a mirror reflecting a view of the highway for a distance of at least 200 feet to the rear.

(11) Windows—the view through vehicle windows will not be obstructed by any sign, poster, or other transparent material. Windshields and rear windows will not have starburst or spider webbing effect greater than 3 inches by 3 inches. No opaque or solid material including, but not limited to cardboard, plastic, or taped glass will be employed in lieu of glass.

(12) Windshield Wipers—every vehicle, except motorcycles, will be equipped with operable windshield wipers.
$\S 636.34$ **Restraint systems.**
(a) Restraint systems (seat belts) will be worn by all operators and passengers of U.S. Government vehicles on or off the installations.
(b) Restraint systems will be worn by all civilian personnel (family members, guests, and visitors) driving or riding in a private owned vehicle on the Fort Stewart/Hunter Army Airfield installations.
(c) Restraint systems will be worn by all soldiers and Reserve Component members on active Federal service driving or riding in a private owned vehicle whether on or off the installations.
(d) Infant/child restraint devices (car seats) are required in private owned vehicles for children 4 years old or under and not exceeding 45 pounds in weight.
(e) Restraint systems are required only in cars manufactured after model year 1966.
(f) The operator of a vehicle is responsible for ensuring the use of seat belts, shoulder restraints, and child restraining systems when applicable and may be cited for failure to comply (40 U.S.C. 318a).
(g) Passengers (over the age of 16) are responsible for ensuring that their seat belts/shoulder restraints are used when applicable and may be cited for failure to comply (40 U.S.C. 318a).

$\S 636.35$ **Headphones and earphones.**
The wearing of headphones or earphones is prohibited while driving a U.S. Government vehicle, POV, motorcycle, or other self-propelled two-wheel, three-wheel, or four-wheel vehicle powered by a motorcycle type engine. This does not negate the requirement for wearing hearing protection when conditions or good judgment dictate use of such protection.

$\S 636.36$ **Alcoholic beverages.**
(a) Consuming alcoholic beverages as an operator or passenger in or on U.S. Government or privately owned vehicles is prohibited.
(b) Consuming alcoholic beverages on any roadway, parking lot, or where otherwise posted is prohibited.
(c) Having open containers of alcoholic beverages in vehicles or areas not designated for the consumption of alcohol is prohibited.

$\S 636.37$ **Use of “Denver Boot” device.**
The “Denver Boot” device will be used by Military Police as an additional technique to assist in the enforcement of parking violations when other reasonably effective but less restrictive means of enforcement (such as warnings, ticketing, reprimands, suspensions, or revocations of on-post driving privileges) have failed, or immobilization of the private owned vehicle is necessary for safety.
(a) The use of booting devices will be limited to application by the Military Police under the following conditions:
(1) Immobilization of unsafe, un inspected, or unregistered vehicles.
(2) Immobilization of vehicles involved in criminal activity.
(3) For repeat offenders of the parking violations outlined in this supplement. Three or more parking violations within 6 months constitutes grounds to boot the vehicle.
(4) At the discretion of the Provost Marshal or his designee, on a case-by-case basis.
(b) Booted vehicle will be marked, for driver notification, by placing an orange in color notice on the vehicle windshield. The notice will contain information on why the vehicle was boot ed and instructions on how to have the booting device properly removed by the Military Police (see figure 636.37).

**Figure 636.37. Driver Booting Device Notice**
1. Your vehicle is illegally parked and has been secured in place by the Military Police with a vehicle restraining device. Do not move this vehicle until the restra ining
device is properly removed by the Military Police.

2. Any movement, or attempted movement, of this vehicle could result in damage to the device and the vehicle. You will be responsible for any such damage to the vehicle and/or the restraining device.

3. Any removal, or attempted removal, of the device could result in you being charged with a criminal offense.

4. To have this device properly removed by the Military Police, contact the following:

   Mon-Fri, 7: a.m.–5: p.m., Bldg 292,
   Phone 767–2848/8659

   Non-Duty Hours, Bldg 285, Phone 767–2822

Notice

§ 636.38 Impounding privately owned vehicles (POVs).

This section provides the standards and procedures for towing, inventorying, searching, impounding, and disposing of private owned vehicles.

(a) Implied consent to vehicle impoundment. Any person granted the privilege of operating a motor vehicle on the Fort Stewart/Hunter Army Airfield installations shall be deemed to have given his or her consent for the removal and temporary impoundment of the privately owned vehicle when it is parked illegally for unreasonable periods, interfering with operations, creating a safety hazard, disabled by accident, left unattended in a restricted or controlled area, or abandoned. Such vehicles will be towed by a contracted civilian wrecker service and placed in that service’s storage lot. Such persons further agree to reimburse the civilian wrecker service for the cost of towing and storage should their vehicle be removed or impounded.

(b) Standards of impoundment. (1) Privately owned vehicles will not be impounded unless they clearly interfere with ongoing operations or movement of traffic, threaten public safety or convenience, are involved in criminal activity, contain evidence of criminal activity, or are stolen or abandoned.

(2) The impoundment of a privately owned vehicle is inappropriate when reasonable alternatives to impoundment exist.

(i) An attempt will be made to locate the owner of the privately owned vehicle and have the vehicle removed.

(ii) The vehicle may be moved a short distance to a legal parking area and temporarily secured until the owner is located.

(iii) Another responsible person may be allowed to drive or tow the privately owned vehicle with permission from the owner, operator, or person empowered to control the vehicle. In this case, the owner, operator, or person empowered to control the vehicle will be informed that the Military Police are not responsible for safeguarding the privately owned vehicle.

(3) Impounding of privately owned vehicle is justified when any of the following conditions exist:

   (i) The privately owned vehicle is illegally parked—

       (A) On a street or bridge, or is double parking and interferes with the orderly flow of traffic.

       (B) On a sidewalk, within an intersection, or a cross-walk, on a railroad track, in a fire lane, or is blocking a driveway, so that the vehicle interferes with the operations or creates a safety hazard to other roadway users or the general public. An example would be a vehicle parked within 15 feet of a fire hydrant or blocking a properly marked driveway of a fire station or aircraft alert crew facility.

       (C) When blocking an emergency exit door of any public place (installation theater, club, dining facility, hospital, or other facility).

       (D) In a “tow-away” zone that is so marked with proper signs.

   (ii) The privately owned vehicle interferes with—

       (A) Street cleaning operations and attempts to contact the owner have been unsuccessful.

       (B) Emergency operations during a natural disaster or fire or must be removed from the disaster area during cleanup operations.

       (iii) The privately owned vehicle has been used in a crime or contains evidence of criminal activity.

       (iv) The owner or person in charge has been apprehended and is unable or unwilling to arrange for custody or removal.
(v) The privately owned vehicle is mechanically defective and is a menace to others using the public roadways.

(vi) The privately owned vehicle is disabled by a traffic incident and the operator is either unavailable or physically incapable of having the vehicle towed to a place of safety for storage or safekeeping.

(vii) Military Police reasonably believe the vehicle is abandoned.

(c) Towing and storage. (1) Impounded privately owned vehicles will be towed and stored by a contracted wrecker service.

(2) An approved impoundment area belonging to the contracted worker service will be used for the storage of impounded vehicles. This area will assure adequate accountability and security of towed vehicles. One set of keys to the enclosed area will be maintained by the Military Police.

(3) Temporary impoundment and towing of privately owned vehicles for violations of this supplement or involvement in criminal activities will be accomplished under the direct supervision of the Military Police.

(d) Procedure for impoundment. (1) Unattended privately owned vehicles.

(i) DD Form 2504 (Abandoned Vehicle Notice) will be conspicuously placed on privately owned vehicles considered unattended. This action will be documented by an entry in the Military Police desk journal.

(ii) The owner will be allowed three days from the date the privately owned vehicle is tagged to remove the vehicle before impoundment action is initiated. If the vehicle has not been removed after three days, it will be removed by a contracted civilian wrecker service. A DD Form 2505 (Abandoned Vehicle Removal Authorization) will be completed and issued to the contractor by the Military Police.

(iii) After the vehicle has been removed, the Military Police will complete DD Form 2506 (Vehicle Impoundment Report) as a record of the actions taken.

(A) An inventory listing personal property will be done to protect the owner, Military Police, the Contractor, and the Commander.

(B) The contents of a closed container such as a suitcase inside the vehicle need not be inventoried. Such articles should be opened only if necessary to identify the owner of the vehicle or if the container might contain explosives or otherwise present a danger to the public. Merely listing the container and sealing it with security tape will suffice.

(C) Personal property will be placed in the Military Police found property room for safe keeping.

(iv) DD Form 2507 (Notice of Vehicle Impoundment) will be forwarded by certified mail to the address of the last known owner of the vehicle to advise the owner of the impoundment action, and request information concerning the owner’s intentions pertaining to the disposition of the vehicle.

(2) Stolen privately owned vehicles or vehicles involved in criminal activity. (i) When the privately owned vehicle is to be held for evidentiary purposes, the vehicle will remain in the custody of the Military Police or CID until law enforcement purposes are served.

(ii) Recovered stolen privately owned vehicles will be released to the registered owner, unless held for evidentiary purposes, or to the law enforcement agency reporting the vehicle stolen.

(iii) A privately owned vehicle held on request of other authorities will be retained in the custody of the Military Police or CID until the vehicle can be released to such authorities.

(e) Search incident to impoundment based on criminal activity. Search of a privately owned vehicle in conjunction with impoundment based on criminal activity will likely occur in one of the following general situations:

(1) The owner or operator is not present. This situation could arise during traffic and crime-related impoundments and abandoned vehicle seizures. A property search related to an investigation of criminal activity should not be conducted without search authority unless the item to be seized is in plain view or is readily discernible on the outside as evidence of criminal activity. When in doubt, proper search authority should be sought, during duty hours, through the Chief, Criminal Law Branch of the Office of Staff Judge Advocate and after duty hours from the
Duty Judge Advocate, before searching.

(2) The owner or operator is present. This situation can occur during either a traffic or criminal incident, or if the operator is apprehended for a crime or serious traffic violation and sufficient probable cause exists to seize the vehicle. This situation could also arise during cases of intoxicated driving or traffic accidents in which the operator is present but incapacitated or otherwise unable to make adequate arrangements to safeguard the vehicle. If danger exists to the Military Police or public or if there is risk of loss or destruction of evidence, an investigative type search of the vehicle may be conducted without search authority.

(f) Disposition of vehicles after impoundment. (1) If a privately owned vehicle is impounded for evidentiary purposes, the vehicle can be held for as long as the evidentiary or law enforcement purpose exists. The vehicle must then be returned to the owner without delay unless directed otherwise by competent authority.

(2) If the vehicle is unclaimed after 45 days from the date notification was mailed to the last known owner or the owner released the vehicle by properly completing DD Form 2505, the vehicle will be disposed of by one of the following procedures:

(i) Release to the lienholder, if known.

(ii) Processed as abandoned property in accordance with DOD 4160.21-M.

APPENDIX A TO PART 636—REFERENCES

Publications and forms referenced in this part may be viewed at the Office of the Provost Marshall on any major Army installation or may be obtained from the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, VA 22161.

In addition to the related publications listed in appendix A to part 634 of this subchapter, the following publications provide a source of additional information:

FS Reg 190-7, Emergency Vehicle Operation
FS Reg 350-1, Active Component Training
FS Reg 385-14, Post Range Regulation
FS Reg 755-2, Lost, Abandoned, or Unclaimed Privately Owned Personal Property

In addition to the prescribed forms used in appendix A to part 634 of this subchapter, the following forms should be used:

AFZP Form Letter 316, Suspension of Driving Privileges
DA Form 3946, Military Police Traffic Accident Report
DA Form 3975, Military Police Report
DD Form 1928, Alcohol Influence Report
DD Form 2226, DOD Registered Vehicle
DD Form 2504, Abandoned Vehicle Notice
DD Form 2505, Abandoned Vehicle Removal Authorization
DD Form 2506, Vehicle Impoundment Report
DD Form 2507, Notice of Vehicle Impoundment

PART 637—MILITARY POLICE INVESTIGATION

Subpart A—Investigations

Sec.

637.1 General.
637.2 Use of MPI and DAC Detectives/Investigators.
637.3 Installation Commander.
637.4 Military Police and the USACICD.
637.5 Off-post investigations.
637.6 Customs investigations.
637.7 Drug enforcement activities.
637.8 Identification of MPI.
637.9 Access to U.S. Army facilities and records.
637.10 Authority to apprehend or detain.
637.11 Authority to administer oaths.
637.12 Legal considerations.
637.13 Retention of property.
637.14 Use of National Crime Information Center (NCIC).
637.15 Polygraph activities.
Subpart A—Investigations

§ 637.1 General.

(a) Military Police Investigators (MPI) and Department of the Army Civilian (DAC) detectives/investigators fulfill a special need for an investigative element within the military police to investigate many incidents, complaints, and matters not within U.S. Army Criminal Investigation Command (USACIDC) jurisdiction, but which cannot be resolved immediately through routine military police operations. Investigative personnel are assets of the installation or activity commander, under the supervision of the local provost marshal, USACIDC elements will provide investigative assistance in the form of professional expertise, laboratory examinations, polygraph examinations, or any other assistance requested which does not distract from the USACIDC mission of investigating serious crimes. A spirit of cooperation and close working relationship is essential between USACIDC and the provost marshal office in order to accomplish the mission and project a professional police image.

(b) Creation of a formalized investigation program does not constitute the establishment of a dual “detective” force. The separation of investigative responsibilities is very distinct. The MPI Program is neither a career program nor a separate Military Occupational Specialty (MOS). Individuals in the MPI Program are specially selected, trained, and experienced military or civilian men and women performing traditional military police functions. Military personnel are identified by their additional skill identifiers (ASI V5) and may be employed in any assignment appropriate to their grade and MOS.

(c) The provost marshal may authorize wearing of civilian clothing for the MPI investigative mission.

(d) MPI and DAC detective/investigator personnel must be familiar with and meet the requirements of Army Regulation (AR) 190–14 (Carrying of Firearms and Use of Force for Law Enforcement and Security Duties).

§ 637.2 Use of MPI and DAC Detectives/Investigators.

Only those matters requiring investigative development will be referred to the MPI for investigation. Provost marshals will develop procedures to determine which incidents will be referred to the MPI for completion and which will be retained and completed by uniformed MP personnel. Except as otherwise provided, MPI and DAC detectives/investigators will normally be employed in the following investigations:

(a) Offenses for which the maximum punishment listed in the Table of Maximum Punishment, Manual for Courts-Martial, United States, 2002 is confinement for 1 year or less. Provisions of the Federal Assimilative Crimes Act will also be considered when assigning cases to MPI. The same punishment criteria apply.

(b) Property-related offenses when the value is less than $1,000 provided the property is not of a sensitive nature, such as government firearms, ammunition, night vision devices, or controlled substances.

(c) Offenses involving use and/or possession of non-narcotic controlled substances when the amounts are indicative of personal use only. Military police will coordinate with the local USACIDC element in making determinations of “personal use”. MPI and DAC detectives/investigators may be employed in joint MPI/USACIDC drug suppression teams; however, the conduct of such operations and activities remain the responsibility of USACIDC. When employed under USACIDC supervision, MPI and DAC detectives/investigators may also be utilized to make controlled buys of suspected controlled substances.

SOURCE: 70 FR 36029, June 22, 2005, unless otherwise noted.
§ 637.4 Military Police and the USACIDC.

(a) The military police or the USACIDC are authorized to investigate allegations of criminal activity occurring on the installation. Nothing in this paragraph is intended to conflict with or otherwise undermine the delineation of investigative responsibilities between the military police and the USACIDC as set forth in AR 195–2.

(b) When investigative responsibility is not clearly defined, and the matter cannot be resolved between military police investigations supervisors and USACIDC duty personnel, or between military police investigations supervisors and unit commanders, the provost marshal will be informed and will resolve the matter with the appropriate USACIDC activity commander/ Special Agent in Charge (SAC) or unit commander.

(c) The control and processing of a crime scene and the collection and preservation of the evidence are the exclusive responsibilities of the investigator or supervisor in charge of the crime scene when the military police have investigative responsibility. To prevent the possible loss or destruction of evidence, the investigator or supervisor in charge of the crime scene is authorized to exclude all personnel from the scene. The exercise of this authority in a particular case may be subject to the requirement to preserve human life and the requirement for continuing necessary operations and security. These should be determined in conjunction with the appropriate commander and, where applicable, local host country law enforcement authorities.

(d) Unit commanders should consult with the installation provost marshal concerning all serious incidents. Examples of incidents appropriate for investigation at the unit level include simple assaults not requiring hospitalization and not involving a firearm, or wrongful damage to property of a value under $1,000. Other incidents should be immediately referred to the installation provost marshal.

(e) The military police desk is the official point of contact for initial complaints and reports of offenses. The provisions of AR 190–45 are to be followed for all military police records, reports, and reporting.

(1) When incidents are reported directly to a USACIDC field element, USACIDC may either direct the reporting person to the MP desk or report the incident to the MP desk themselves.

(2) Upon receipt of the complaint or report of offense, the MP desk will dispatch an available patrol to the scene of the incident. The patrol will take appropriate measures to include locating the complainant; witnesses, suspects, and victims; apprehending offenders; securing the crime scene; rendering emergency assistance; determining and reporting to the MP desk, by the most expeditious means possible, the appropriate activity having investigative responsibility.

(f) In those cases in which the USACIDC has an ongoing investigation (typically fraud and narcotics matters), they may delay notification to the military police to avoid compromising their investigation.

(g) Procedures will be developed to ensure mutual cooperation and support
§ 637.5 Off-post investigations.

(a) In Continental United States (CONUS), civilian law enforcement agencies, including state, county, or municipal authorities, or a Federal investigative agency normally investigate incidents occurring off-post. When an incident of substantial interest to the U.S. Army occurs off-post, involving U.S. Army property or personnel, the military police exercising area responsibility will request copies of the civilian law enforcement report.

(b) In Overseas areas, off-post incidents will be investigated in accordance with Status of Forces Agreements and other appropriate U.S. host nation agreements.

§ 637.6 Customs investigations.

(a) Customs violations will be investigated as prescribed in AR 190–41. When customs authorities find unauthorized material such as contraband, explosives, ammunition, unauthorized or illegal weapons or property, which may be property of the U.S. Government, notification must be made via electronic message or facsimile to HQDA, Office of the Provost Marshal General (DAPM–MPD–LE). All such notifications will be made to the military police and investigated by CID or the military police, as appropriate.

(b) Military police will receipt for all seized or confiscated U.S. Government property and contraband shipped by U.S. Army personnel. Property received by the military police will be accounted for, and disposed of, in accordance with evidence procedures outlined in AR 190–5.

(c) When it has been determined that the subject of an MP customs investigation is no longer a member of the U.S. Army, the investigation will be terminated, a final report submitted indicating the subject was released from the U.S. Army, and an information copy of the report furnished to the appropriate civil investigative agency.

(d) Recovery of weapons and significant amounts of ammunition will be reported by the U.S. Army element receiving them from the U.S. Customs Service in accordance with AR 190–11 and AR 190–45.

§ 637.7 Drug enforcement activities.

Provost marshals and U.S. Army law enforcement supervisors at all levels will ensure that active drug enforcement programs are developed and maintained, and that priorities for resources reflect the critical and important nature of the drug enforcement effort.

(a) MPI and DAC detectives/investigators will conduct investigations of offenses involving use and possession of non-narcotic controlled substances. A copy of all initial, interim, and final military police reports concerning drug investigations will be provided to the USACIDC at the local level. Enforcement activities will be coordinated with the USACIDC at the local level.
(b) Any investigation of offenses involving possession/use of non-narcotic controlled substances generated as a result of another USACICD investigation may be transferred to MPI with the concurrence of both the supporting USACICD commander and provost marshal.

(c) Elements of USACICD will be provided the opportunity to interview subjects, suspects or witnesses in MPI or DAC detective investigations involving controlled substances without assuming responsibility for the investigation. MPI and DAC detectives/investigators may also interview subjects, suspects or witnesses of USACICD investigations.

§ 637.8 Identification of MPI.
(a) During the conduct of investigations, MPI will identify themselves by presenting their credentials and referring to themselves as “INVESTIGATOR.” When signing military police records the title “Military Police Investigator” may be used in lieu of military titles. Civilian personnel will refer to themselves as “INVESTIGATOR” if they are classified in the 1811 series, and as “DETECTIVE” if they are in the 083 series. Civilian personnel will use the title “DAC Investigator” or “DAC Detective”; corresponding to their classification series.

(b) The use of titles such as “Mr.,” “Mrs.,” “Miss” or “Ms.” in connection with an individual’s identification as an MPI is prohibited, except when employed in a covert investigative role. When MPI or DAC detectives/investigators are employed in covert roles, supervisors will ensure that coordination with USACICD or civilian law enforcement agencies is accomplished as appropriate.

§ 637.9 Access to U.S. Army facilities and records.
(a) MPI and DAC detectives/investigators will be granted access to all U.S. Army facilities, records or information when necessary for an ongoing investigation, consistent with the investigator’s clearance for access to classified national defense information, the requirements of medical confidentiality, and the provisions of applicable regulations.

(b) Upon presentation of proper identification when conducting an official investigation, MPI and DAC detectives/investigators will be authorized access to information contained in medical records and may request extracts or transcripts. Medical records will remain under the control of the records custodian who will make them available for courts-martial or other legal proceedings. Procedures for obtaining information from medical records are contained in AR 40–66.

§ 637.10 Authority to apprehend or detain.
MPI and DAC detectives/investigators have authority to make apprehensions in accordance with Article 7, Uniform Code of Military Justice (UCMJ); Rule for Courts-Martial 302 (b)(1), Manual for Courts-Martial, United States 2002 (Revised Edition). They may detain personnel for identification and remand custody of persons to appropriate civil or military authority as necessary. Civilians committing offenses on U.S. Army installations may be detained until they can be released to the appropriate Federal, state, or local law enforcement agency.

§ 637.11 Authority to administer oaths.
MPI and DAC detectives/investigators have authority pursuant to Article 136(b)(4), UCMJ to administer oaths to military personnel who are subject to the UCMJ. The authority to administer oaths to civilians who are not subject to the UCMJ is 5 U.S.C. 309(b).

§ 637.12 Legal considerations.
(a) Coordination between installation judge advocates and investigators must occur during the conduct of investigations.

(b) The use of the DA Form 3881 (Rights Warning Procedure/Waiver Certificate) to warn accused or suspected persons of their rights is encouraged.

(c) When necessary, investigators will coordinate with a judge advocate or civilian attorney employed in the Office of the Staff Judge Advocate for the purpose of establishing a legal opinion as to whether sufficient credible evidence has been established to title an individual in a report. Investigators should also coordinate with
§ 637.13 Retention of property.

Reports of investigation, photographs, exhibits, handwritten notes, sketches, and other materials pertinent to an investigation, including copies, negatives or reproductions, are the property of the U.S. Government, either as owner, or custodian.

§ 637.14 Use of National Crime Information Center (NCIC).

Provost marshals will make maximum use of NCIC terminals available to them, and will establish liaison with the U.S. Army Deserter Information Point (USADIP) as necessary to ensure timely exchange of information on matters concerning deserters. The USADIP will ensure replies to inquiries from provost marshals on subjects of MP investigations are transmitted by the most expeditious means. Use of NCIC will be in accordance with AR 190–27.

§ 637.15 Polygraph activities.

MPI and DAC detectives/investigators will utilize the polygraph to the full extent authorized. Requests for polygraph examination assistance will be forwarded to the supporting USACIDC element in accordance with provisions of AR 195–6. The investigative or intelligence element requesting approval to conduct a polygraph examination will submit a completed DA Form 2805 (Polygraph Examination Authorization) to the authorizing official. A request may also be sent via an electronic message or electronic mail or media provided all elements of the DA Form 2805 are included in the request. Approvals will be obtained prior to the conduct of an examination. Telephonic requests, followed with written requests, may be used in emergencies. The requesting official will include the following data on every polygraph examination request for criminal investigations:

(a) The offense, which formed the basis of the investigation, is punishable under Federal law or the UCMJ by death or confinement for a term of 1 year or more. Even though such an offense may be disposed of with a lesser penalty, the person may be given a polygraph examination to eliminate suspicion.

(b) The person to be examined has been interviewed and there is reasonable cause to believe that the person has knowledge of, or was involved in, the matter under investigation.

(c) Consistent with the circumstances, data to be obtained by polygraph examination are needed for further conduct of the investigation.

(d) Investigation by other means has been as thorough as circumstances permit.

(e) Examinee has been interviewed on all relevant subjects requested for testing and the polygraph examination is essential and timely.

§ 637.16 Evidence.

Military police are authorized to receive, process, safeguard and dispose of evidence, to include non-narcotic controlled substances, in accordance with AR 195–5. If no suitable facility is available for the establishment of a military police evidence depository or other operational circumstances so dictate, the evidence custodian of the appropriate USACIDC element may be requested to receipt for and assume responsibility for military police evidence. Personnel selected as military police evidence custodians need not be trained as MPI and should not be issued MPI credentials, unless they are also employed as operational MPI. Further information concerning evidence collection and examination procedures can be found in Field Manual (FM) 3–18.13, Law Enforcement Investigations.

§ 637.17 Police Intelligence.

(a) The purpose of gathering police intelligence is to identify individuals or groups of individuals in an effort to anticipate, prevent, or monitor possible criminal activity. If police intelligence is developed to the point where it factually establishes a criminal offense, an investigation by the military police, (USACIDC) or other investigative agency will be initiated.

(b) Police intelligence will be actively exchanged between Department of Defense (DOD) law enforcement
agencies, military police, USACIDC, local, state, federal, and international law enforcement agencies. One tool under development by DOD for sharing police intelligence is the Joint Protection Enterprise Network (JPEN). JPEN provides users with the ability to post, retrieve, filter, and analyze real-world events. There are seven reporting criteria for JPEN:

(1) Non-specific threats;
(2) Surveillance;
(3) Elicitation;
(4) Tests of Security;
(5) Repetitive Activities;
(6) Bomb Threats/Incidents; and
(7) Suspicious Activities/Incidents.

(c) If a written extract from local police intelligence files is provided to an authorized investigative agency, the following will be included on the transmittal documents: ‘This document is provided for information and use. Copies of this document, enclosures thereeto, and information therefrom, will not be further released without the prior approval of the installation Provost Marshal.

(d) Local police intelligence files may be exempt from certain disclosure requirements by AR 25–55 and the Freedom of Information Act (FOIA).

§ 637.18 Electronic equipment procedures.

(a) DOD Directive 5505.9 and AR 190–53 provide policy for the wiretap, investigative monitoring and eavesdrop activities by DA personnel. The recording of telephone communications at MP operations desks is considered to be a form of command center communications monitoring which may be conducted to provide an uncontroversial record of emergency communications. This includes reports of emergencies, analysis of reported information, records of instructions, such as commands issued, warnings received, requests for assistance, and instructions as to the location of serious incidents.

(b) The following procedures are applicable to the recording of emergency telephone and/or radio communications at MP operations desks within the 50 states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Panama, and Guam.

(1) All telephones connected to recording equipment will be conspicuously marked ‘For Official Use Only-connected to recording device’ and access to use will be restricted to MP operations desk personnel.

(2) The connection of voice-recording equipment or private-line service with the telecommunications network will be in accordance with applicable telephone company tariffs which permit direct electrical connection through telephone company recorder-connector equipment. An automatic audible-tone device is not required.

(3) Official emergency telephone numbers for MP desks will be listed in appropriate command, activity, or installation telephone directories with a statement that emergency conversations will be recorded for accuracy of record purposes. Other forms of prewarning are not required.

(4) Recordings, which contain conversations described in this section, will be retained for a period of 60 days. Transcripts may be made for permanent files, as appropriate.

(5) The recording of telephone communications or radio transmissions by MP personnel for other than emergency purposes is prohibited. If an investigator requires the use of electronic surveillance equipment, assistance must be requested from the USACIDC. This policy is established pursuant to Department of Defense directives that limit such activity to the criminal investigative organizations of the Services and DOD.

(6) Commanders having general courts-martial convening authority will issue written authorizations for the recording of emergency telephone communications at MP operations desks. The letter of authorization will contain specific authority for the type of equipment to be used, the phone numbers identified as emergency lines and instructions limiting recordings to calls received on the phones so designated. One copy of the authorization will be forwarded to the Office of the Provost Marshal General (OPMG), 2800 Army Pentagon, Washington, DC 20310–2800.
§ 637.19 Overseas MP desk.

The recording of telephone communications at MP operations desks outside the United States will be conducted within restrictions contained in international agreements between the U.S. and host nations.

§ 637.20 Security surveillance systems.

Closed circuit video recording systems, to include those with an audio capability, may be employed for security purposes in public places so long as notices are conspicuously displayed at all entrances, providing persons who enter with a clear warning that this type of monitoring is being conducted.

§ 637.21 Recording interviews and interrogations.

The recording of interviews and interrogations by military police personnel is authorized, provided the interviewee is on notice that the testimony or statement is being recorded. This procedure is a long-accepted law enforcement procedure, not precluded by DA policies pertaining to wiretap, investigative monitoring, and eavesdrop activities.

Subpart B [Reserved]
SUBCHAPTER J—REAL PROPERTY

PARTS 641–642 [RESERVED]

PART 643—REAL ESTATE

Subpart A—General

Sec.
643.1 Purpose.
643.2 Applicability.
643.3 Authority to grant use of real estate.
643.4 Responsibilities of the Chief of Engineers (COE).
643.5 Responsibilities of major commands (MACOMS) and special staff agencies.
643.6 Responsibilities of overseas commanders.
643.7 Preparation of report of availability.
643.8 Approval of report of availability.
643.9 Approval of availability outside the United States.
643.10 Reports to DOD and the congressional committees on Armed Services.
643.11 Rights of entry.
643.12 Preparation and signing of instruments.
643.13 Military requirement for real estate under grant.
643.14 Inspection to assure compliance with terms of outgrants.
643.15 Unauthorized use.

Subpart B—Policy

643.21 Policy—Surveillance.
643.23 Policy—Preference.
643.24 Policy—Competition.
643.25 Policy—Grants which may embarrass the Department of the Army.
643.26 Policy—Commercial advertising on reservations.
643.27 Policy—Environmental considerations.
643.28 Policy—Historic and cultural environment.
643.29 Policy—Archeological surveys.
643.30 Policy—Construction projects and activities; protection of historical and archeological data.
643.31 Policy—Flood hazards.
643.32 Policy—Endangered species.
643.33 Policy—Costal zone management.
643.34 Policy—Public utilities on installations.
643.35 Policy—Mineral leasing on lands controlled by the Department of the Army.
643.36 Policy—Interim leasing of excess properties to facilitate economic readjustment.
643.37 Policy—Requests to search for treasure trove.
643.38 Policy—Utility rates.
643.40 Policy—Young Men’s Christian Association (YMCA).
643.41 Policy—National Guard use.
643.42 Policy—Consents for crossing of rights-of-way and similar interests owned by the United States.

Subpart C—Leases

643.51 Additional items concerning leasing.
643.52 Term.
643.53 Consideration.
643.54 Receipts.
643.55 Mandatory revocation clause in lease.
643.56 Taxation of lessee’s interest.
643.57 Subleasing or assignment.

Subpart D—Licenses

643.71 Additional items concerning licenses.
643.72 License.
643.73 Term.
643.74 Consideration.

Subpart E—Easements

643.81 Additional items concerning easements.
643.82 Term.
643.83 Consideration.
643.84 Easement—Grantees relocate or replace needed facilities.
643.85 Easement grantees—Payment for removal or destruction of unneeded improvements.
643.86 Easements for various purposes with relinquishment of legislative jurisdiction.

Subpart F—Permits

643.101 Additional items concerning permits.
643.102 Permit.
643.103 Term.
643.104 Consideration.

Subpart G—Additional Authority of Commanders

643.111 Additional authority.
643.112 Army exchange activities.
643.113 Banks.
643.114 Civil disturbances.
643.115 Contractors—Permission to erect structures.
643.116 Credit unions.
643.117 Hunting, trapping, and fishing.
643.118 Nonappropriated funds—Authority to permit erection of structures.
§ 643.1 Purpose.
(a) This regulation sets forth the authority, policy, responsibility, and procedure for making military real estate, under the control of the Department of the Army, available for use by other military departments, Federal agencies, State and local governmental agencies, private organizations or individuals.
(b) This regulation implements Department of Defense Directives and Instructions (4165 series), which include policies and procedures concerning use of military real estate.

§ 643.2 Applicability.
This regulation is applicable to Army military real estate, which includes land and improvements thereon and is also referred to as real property.

§ 643.3 Authority to grant use of real estate.
(a) The United States Constitution (Article IV, Section 3), provides that the Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States.
(b) One of the principal authorities for the use of military real estate for commercial purposes is title 10 U.S.C., section 2667, which authorizes the Secretary of the Army (SA), whenever it is considered to be advantageous to the United States, to lease such real or personal property under Army control, which is not for the time needed for public use, upon such terms and conditions as the SA considers will promote the national defense or be in the public interest.
(c) Grants under statutory authorities cited in this regulation of real property pertaining to river and harbor, water resource development and flood control projects, will be under the policies and general guidelines set forth in this regulation.
(d) The SA may, under the general administrative powers vested in the office, authorize the use of real estate in the absence of statutory authority in unusual circumstances, provided the property is not for the time being required for public use, the grant conveys no interest in the real estate and the proposed use will be of a direct benefit to the United States. Under this authority, the right to use real estate may also be granted to other military departments or Federal agencies.
(e) Except as otherwise provided in this regulation, an interest in real estate will not be granted unless authorized by law.
(f) Other laws authorizing grants for non-Army use of real estate for various purposes and Table of Related Army Regulations are set forth in appendixes A and B, respectively.

§ 643.4 Responsibilities of the Chief of Engineers (COE).
(a) After it is determined that real estate located in the United States, Puerto Rico, American Virgin Islands and the Panama Canal Zone, is available for non-Army use, the COE, except as otherwise provided in this regulation, is charged with responsibility for arranging for the use of real estate within the scope of this regulation. In the performance of this function, the COE is authorized to obtain such technical assistance from the using service as may be deemed necessary.
(b) COE has staff responsibility over real estate matters in Guam, American Samoa, Trust Territory of the Pacific Islands (TTPI), and in foreign countries.
(c) Except as otherwise provided in this regulation, determinations that real estate is available for non-Army use must be approved by the COE.

(d) The authority of the COE to grant use of real estate will be delegated, to the extent feasible, to U.S. Army Division and District Engineers (DE).

(e) The COE is responsible for the granting of temporary use of real estate reported excess to the General Services Administration (GSA), to the extent authorized by regulations issued pursuant to the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 471, et seq.), and as provided in title 10 U.S.C., section 2667(f). The COE is also responsible for supervision and the issuance of instructions covering the granting of use of real estate within the scope of this regulation. Where Army or installation commanders are authorized to grant use of real estate, they are authorized to obtain technical assistance from the appropriate DE.

(f) In reviewing Army requirements for real estate (AR 405-10), the COE will consider the availability and adequacy of other military or federally-owned real estate to satisfy Army requirements before leasing privately-owned real estate, or renewing existing leases.

§ 643.7 Preparation of report of availability.

A report of availability will be prepared by the installation commander or head of the special staff agency, when it is determined that for the time being the real estate is not required for Army use and can be made available, either concurrently with the Army, or exclusively, for use by another military department, by other Federal agencies, by State or local governmental agencies, private organizations or individuals. The installation commander's recommendation will be made as far in advance as possible so as to minimize the time lapse between the determination of availability and the date of use of the property by the grantee. Where real estate suitable for agricultural or grazing purposes is involved, the normal season for planting and grazing should be taken into consideration so that the property may be advertised in a timely manner. A copy of each report will be furnished to the appropriate DE for information. The report of availability will contain the information outlined in appendix C.

§ 643.8 Approval of report of availability.

The recommendation that real estate is determined available for non-Army use will be submitted by the installation commander to the major commander for approval, through the echelon of command. The major commander will approve such recommendation and submit it to the appropriate DE for action, except recommendations involving the following actions will be forwarded to the COE:

(a) A lease or license, including licenses to States for National Guard purposes, if the estimated annual rental value exceeds $50,000.
§ 643.9 Approval of availability outside the United States.

Overseas commanders may authorize the use by another military department or a Federal agency of an installation or portion thereof located in designated overseas areas and in foreign countries when the real estate is not for the time needed for Army purposes or its concurrent use for other purposes will not interfere with the mission of the installation and such other use is not inconsistent with the agreement under which the property was acquired. Overseas commanders may also authorize any use of such property which is necessary in the accomplishment of the DA mission for which the property was acquired. All other proposed uses will be coordinated with the United States diplomatic mission in the country involved prior to submission to HQDA (DAEN-REM) WASH DC 20314, for approval. Where the overseas commander is authorized to approve such use, the commander or designee will prepare and execute the necessary grant.

§ 643.10 Reports to DOD and the congressional committees on Armed Services.

(a) The grants set forth in 1–8a. through f., with respect to real estate in the United States, Puerto Rico, American Virgin Islands, Guam, American Samoa, and the TTPI, require prior approval of the Assistant Secretary of Defense (I&L), and recommendations should contain information in justification thereof.

(b) The grants set forth in 1–8a., with respect to real estate in the United States and in designated overseas areas (excluding the Canal Zone), except leases for agricultural or grazing purposes, require a report to the Committees on Armed Services of the Senate and House of Representatives as provided in title 10 U.S.C., section 2662.

§ 643.11 Rights of entry.

Pending the signing of the formal instrument, no right of entry will be granted unless authorized by the office wherein the instrument will be signed, except where contrary instructions have previously been issued by the DA. When authorized, rights of entry will be granted by the DE, or overseas commander, as appropriate.

§ 643.12 Preparation and signing of instruments.

Instruments granting temporary use of real estate will be prepared as provided in this regulation. Except where authority has been otherwise granted, the COE or designee will approve, execute, and distribute instruments to the extent authorized by the SA; otherwise they will be prepared and submitted for execution by direction of the appropriate Assistant Secretary of the Army.

§ 643.13 Military requirement for real estate under grant.

When a military requirement arises for real estate which is being used under a grant of non-Army use, the
withdrawal of availability will be approved at the same level of command as that required for determining the property available for non-Army use. The office responsible for effecting temporary use of the property should be promptly notified of the withdrawal of availability for non-Army use and the latest date the property will be required for military purposes. Termination of the use will be in accordance with the provisions of the grant unless military necessity requires other action. In order to avoid possible claims for damages and in the interest of good community relations and in furtherance of the Army’s leasing program, the grantee will be allowed, when practicable, a reasonable time after notice of revocation, to vacate the premises, remove his property and, if required, restore the premises. In controversial cases, or where a claim for damages or litigation is anticipated, HQDA (DAEN-REM) Wash DC 20314, will be notified of the circumstances prior to sending notification of termination of the grant to the grantee.

§ 643.14 Inspection to assure compliance with terms of outgrants.

Commanders will provide general surveillance over areas made available for non-Army use and will advise the DE if and when there are any irregularities. Real estate which is being used for non-military purposes will be inspected at least once each year by the COE, or by his representative, to determine whether grantees or occupants are complying with the terms of the instruments authorizing use and occupancy, except with respect to easements and licenses for rights-of-way for roads, streets, power-lines, pipelines, underground communication lines and similar facilities. The COE will make compliance inspections for such easements and licenses at least once during each 5-year period. However, the DE will check with installation commanders annually to assure that there are no situations which might need correction prior to the inspection. The installation commander will make interim inspections of all real estate being used for non-military purposes as are necessary for timely observation of the extent of compliance with grant provisions designed to protect and preserve the real estate for military requirements, and will furnish the appropriate DE a copy of a written report of the inspection reflecting findings and recommendations. In order that the grantee’s operations not be unreasonably disrupted, the annual compliance inspection made by the DE will be coordinated with the installation commander so that, if feasible, only one inspection will be made. Where necessary, corrective action in accordance with applicable regulations will be taken for the enforcement of the terms of the grant by the responsible officer who granted the use. Overseas commanders are responsible for inspection of real estate under their jurisdiction and necessary corrective action.

§ 643.15 Unauthorized use.

Whenever it is observed that real estate under the control of the DA is being used and/or occupied by private parties without proper authority, corrective action will be taken to cause such unauthorized use to be discontinued or to formalize such use and occupancy by an appropriate grant-in accordance with this regulation. In either event, compensation will be obtained for the unauthorized use of such property.

Subpart B—Policy

§ 643.21 Policy—Surveillance.

Installation Commanders will maintain constant surveillance over real estate under their jurisdiction to determine whether any of it is excess to requirements, or may be made available for other than Army purposes and will process such determinations expeditiously in accordance with the provisions of this regulation. From time to time DOD, DA and GSA surveys will be made pursuant to Executive Order 11954, 7 January 1977, which enunciated a uniform policy for the Executive Branch of the Federal Government with respect to the identification of excess and under-utilized real estate (AR 405-70). Real estate for which is retained for future use will be a requirement which will be disposed of in accordance with AR 405-90. Real estate
which the Army does not currently need but which is retained for future use will be made available to others for use either exclusively or concurrently with the Army. When an installation is in an inactive status, the presumption is that it is available for other military or Federal use or for leasing unless there are cogent reasons that such action should not be taken. The purpose of this rule is to put to beneficial use Federal property, which is not for the time required for its basic use, for the benefit of other Federal agencies, the local economy, or for the benefits accruing to the United States from the income and/or savings of maintenance, protection, repair, or restoration.

§ 643.22 Policy—Public safety: Requirement for early identification of lands containing dangerous materials.

(a) DA will not make available to others any real estate which is contaminated with explosives or with toxic materials or other innately or potentially harmful elements until such elements have been removed or have been rendered harmless, unless the proposed user of the area is aware of the condition of the area and is technically qualified and certified to make use of the area in its contaminated state.

(b) It is imperative that commanders keep records on and have a continuing awareness of the state of contamination of lands by explosives, military chemical or other dangerous materials.

(c) Procedures with respect to action to neutralize or decontaminate the area are set forth in AR 405–90.

§ 643.23 Policy—Preference.

Army real estate under the control of DA which is made available for use for other than Army purposes will be made available for use by other military departments or DOD activities and agencies, other Federal departments, activities or agencies, State or local governmental bodies and other private parties, in that order.

§ 643.24 Policy—Competition.

The use of real estate under the control of DA for private purposes will be granted only after reasonable efforts have been made to obtain competition for its use, through advertising. Advertising is any method of public announcement intended to aid directly or indirectly in obtaining offers on a competitive basis. Advertising may be accomplished by circulating and posting notices and by paid advertising in newspapers and trade journals. The purpose of seeking competition is to afford all qualified persons equal opportunity to bid for the use of the property, to secure for the Government the benefits which flow from competition, and to prevent criticism that favoritism has been shown by officers or employees of the Government in making public property available for private use. Although the lease of Government real estate to civilians employed by the military departments or officers or enlisted personnel of the Armed Forces is not prohibited by law, it is essential that extreme care be exercised to avoid favoritism or the appearance of favoritism. Generally leases to Federal Government personnel will be granted only after competitive bid under the sealed bid method. The provisions of this paragraph do not affect the authority contained in AR 210–10 and 210–50 for furnishing quarters to civilian employees of DA. Also the provisions of this paragraph do not affect the use of Federal facilities by uniformed personnel as may be otherwise provided for. Other exceptions to the advertising policy are as follows:

(a) Granting easements, leases and licenses to public agencies and public utilities.

(b) Granting permits to other Federal agencies.

(c) Leasing cable pairs.

(d) Leases or licenses to utility companies having an exclusive franchise in the area, for space on Government-owned poles for attaching their electric transmission communication lines.

(e) COE is authorized to grant a waiver of competition upon a determination that it will promote the national defense or will be in the public interest or upon a determination that competition is impracticable.
§ 643.25 Policy—Grants which may embarrass the Department of the Army.

The use of property under DA control will not be authorized for any purpose when the proposed use or the revocation thereof might prove embarrassing to the DA.

§ 643.26 Policy—Commercial advertising on reservations.

DA will not authorize the posting of notices or erection of billboards or signs for commercial purposes on property under its control.

§ 643.27 Policy—Environmental considerations.

DA will not authorize the use of real estate, water and other natural resources when such use is not in harmony with the goals and intent of the following legislation and/or similar legislation which establishes a firm Federal policy and provides procedures to enhance the overall environmental quality.

(a) National Environmental Policy Act of 1969 (NEPA), (42 U.S.C. 4321), (AR 200–1, chapters 1 and 2).

(c) Federal Water Pollution control Act of 1972, as amended.

(h) Solid Waste Disposal Act, as amended (42 U.S.C. 3251), (AR 200–1, chapter 6).

§ 643.28 Policy—Historic and cultural environment.

(a) Executive Order 11593, 36 FEDERAL REGISTER 8921 (Appendix D) provides in part that the Federal Government shall provide leadership in preserving, restoring and maintaining the historic and cultural environment of the Nation; that Federal agencies shall:

(1) Administer the cultural properties under their control in a spirit of stewardship and trusteeship for future generations;

(2) Initiate measures necessary to direct their policies, plans and programs in such a way that federally owned sites, structures and objects of historical, architectural, or archeological significance are preserved, restored and maintained for the inspection and benefit of the people; and

(3) In consultation with the Advisory Council on Historic Preservation (16 U.S.C. 470i) institute procedures to assure that Federal plans and programs contribute to the preservation and enhancement of non-federally owned sites, structures and objects of historical, architectural, or archeological significance (AR 200–1, chapter 8 and App. A).

(b) Outgrants will include conditions to assure protection of real estate as contemplated in paragraph (a) of this section.

§ 643.29 Policy—Archeological surveys.

The SA under the authority of 16, 432, may allow the examination of ruins, the excavation of archeological sites, and the gathering of objects of antiquity upon Army lands by institutions which are deemed properly qualified to conduct such examinations, excavations, and gatherings (AR 200–1, chapter 8).

§ 643.30 Policy—Construction projects and activities; protection of historical and archeological data.

The Archeological and Historical Preservation Act of 1974 (16 U.S.C. 469 et seq.) provides for the preservation of historical and archeological data on all Federal or Federally-assisted construction projects or in connection with any federally licensed activities or programs.
§ 643.31 Policy—Flood hazards.

Each Determination of Availability Report will include an evaluation of the flood hazards, if any, relative to the property involved in the proposed outgrant action, pursuant to the provisions of Executive Order 11296, August 10, 1966. DA will not authorize the use of lands in flood plains for habitation purposes or any other use which may be uneconomical, hazardous, or unnecessary.

§ 643.32 Policy—Endangered species.

The Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.), declares the intention of Congress to conserve threatened and endangered species of fish, wildlife and plants, and the ecosystems on which those species depend. The Act provides that Federal agencies must utilize their authorities in furtherance of its purposes by carrying out programs for the conservation of endangered or threatened species, and by taking such necessary action to insure that any action authorized by that agency will not jeopardize the continued existence of such endangered or threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretaries of the Departments of Commerce or Interior, as appropriate, to be critical.

§ 643.33 Policy—Coastal zone management.

(a) The Coastal Zone Management Act of 1972 (16 U.S.C. 1456), directs all Federal agencies conducting or supporting activities directly affecting the coastal zone of a state, to conduct or support those activities in a manner which is, to the maximum extent practicable, consistent with approved state management programs. The opinion of the Attorney General of the United States is that Federal lands are excluded from mandatory compliance with the state’s coastal zone management program, regardless of the type of Federal jurisdiction exercised thereover. However, it is Army policy that its activities will comply, to the extent practicable, with a state’s approved coastal zone management program.

(b) Applications for grants for use of real estate affecting land or water uses in the coastal zone of a state will include a certification that the proposed activity complies with the state’s approved program and that applicant’s activity will be conducted in a manner consistent with the law.

(c) An activity affecting land or water uses in the coastal zone of a state which will not be conducted in a manner consistent with an approved state program will be exempted from this certification requirement only if the Secretary of Commerce, on his own initiative or upon appeal of the applicant, determines that the activity is consistent with the objectives of the Coastal Zone Management Act or is otherwise necessary in the interest of national security.

§ 643.34 Policy—Public utilities on installations.

(a) Contracting officers, with the approval of Installation Commanders, are authorized to permit the extension of public utilities upon installations, as part of the contract for furnishing to the Government electricity, water, and gas, where such extension is necessary solely to serve the installation and not in part to serve private consumers outside the installation. The above authorization is covered by the provisions of the contract for purchase of utilities services contained in Armed Services Procurement Regulations.

(b) Contracts or agreements for the sale of surplus utilities services as authorized by law or regulations will include similar authority for the purchaser to install and maintain such facilities on the installation as necessary in connection with the sale of such utilities services, in accordance with AR 420–41 and AR 105–23.

§ 643.35 Policy—Mineral leasing on lands controlled by the Department of the Army.

(a) Acquired lands—(1) General. The Coal Leasing Amendments Act of 1975, hereinafter referred to as the act, amended the Mineral Leasing Act for Acquired Lands (30 U.S.C. 352) and permits the Secretary of Interior (SI), with the consent of the Secretary of
105
Department of the Army, DoD
§ 643.39

Defence, to lease deposits of coal, phosphorus, oil, oil shale, gas, sodium, potassium and sulfur which are within acquired lands of the United States which have been set aside for military or naval purposes. The consent requirement is to insure the adequate utilization of the lands for the primary purposes for which they have been acquired or are being administered. Leasing is subject to the same conditions as contained in the leasing provisions of the mineral leasing laws (see 30 U.S.C. 351). Authority in this paragraph does not permit leasing of mineral deposits lying in tidelands, submerged lands, nor in certain coastal waters.

(2) Notwithstanding the generality of the foregoing, leasing of coal and lignite deposits is subject to special restrictions. The act permits such leasing, provided the Secretary of Defense concurs, only to a governmental entity (including any corporation primarily acting as an agency or instrumentality of a State) which provides electrical energy for sale to the public if such governmental entity is located in the State in which such lands are located.

(b) Public domain lands. Deposits of coal, phosphate, sodium, potassium, oil, oil shale, native asphalt, solid and semi-solid bitumen, bituminous rock and gas located on public domain lands under the jurisdiction of the Department of the Army may be leased by the SI pursuant to 30 U.S.C. 181 et seq. with the concurrence of the Secretary of the Army.

§ 643.36 Policy—Interim leasing of excess properties to facilitate economic readjustment.

Interim outleasing of excess real property is authorized to lessen the economic impact on the local community, caused by an installation inactivation, closure or realignment. These outleases may be granted to State or local governmental bodies in consideration for care, custody, management and routine maintenance. Income derived from the use of the property in excess of the cost of care, custody, management and routine maintenance will be covered into the Treasury as miscellaneous receipts. The outleasing will generally conform to an economic recovery plan outlined by the Office of Economic Adjustment, OASD (I&L), will require coordination with the DASD (I&H) and concurrence by the GSA. Leases are limited to one year and must be revocable by the Government on 30 days notice.

§ 643.37 Policy—Requests to search for treasure trove.

Section 3755 of the Revised Statutes (40 U.S.C. 310) authorizes the Administrator of the GSA to make such contracts and provisions as he deems necessary to protect the interests of the Government in searches for and sales of treasure trove. All searches and sales authorized by GSA under this statute are subject to the Act for the Preservation of American Antiquities (16 U.S.C. 432) and will only be permitted after consent of the Department of the Army has been obtained.

§ 643.38 Policy—Utility rates.

(a) Rates for utilities furnished by the Army will be in accordance with AR 420–41.

(b) Payments for utilities or services furnished will be deposited to the Treasurer of the United States to the credit of the appropriation from which the costs of furnishing them was paid. Collection for utilities and services furnished by the Army is the responsibility of the officer having immediate jurisdiction over the property in accordance with AR 37–19 and AR 37–27.

(a) Title 10 U.S.C. 2670, authorizes the SA to grant revocable licenses permitting the erection and maintenance by the American National Red Cross on military reservations, of buildings suitable for the storage of supplies for the aid of the civilian population in case of serious national disaster, or the occupation for that purpose of buildings erected by the United States.

(b) Installation Commanders will furnish office space and quarters for Red Cross activities and personnel when assigned to duty with the Armed Forces in accordance with AR 930–5.
§ 643.40 Policy—Young Men’s Christian Association (YMCA).

Title 10 U.S.C. 4778, authorizes the SA to grant revocable licenses permitting the erection and maintenance by the YMCA on military reservations, of such buildings as their work for the promotion of the social, physical, intellectual, and moral welfare of the garrisons may require.

§ 643.41 Policy—National Guard use.

Pursuant to the authority contained in 32 U.S.C. 503, the SA is authorized to grant revocable licenses to the States and territories for the use and occupancy of installations or portions thereof by the National Guard. A license may not be granted for the erection of a permanent National Guard Armory without specific congressional authority.

§ 643.42 Policy—Consents for crossing of rights-of-ways and similar interests owned by the United States.

Under the various easement authorities or under the administrative power in cases outside the purview of those authorities, the SA may consent to the granting of an easement by the owner of the servient estate, subject to such conditions as may be required to protect the Government’s interest.

Subpart C—Leases

§ 643.51 Additional items concerning leasing.

In addition to the general and policy matters covered in Chapters I and II of Title 32, the following also apply with respect to the leasing of Army real estate.

§ 643.52 Term.

Each lease will be for a period not exceeding five years unless the SA determines that a longer period will promote the national defense or will be in the public interest.

§ 643.53 Consideration.

(a) Unless otherwise authorized by this regulation or directed by the SA, the consideration for a lease of real estate will be the appraised fair market rental value. However, the value of the maintenance, protection, repair, or restoration by the lessee of the property leased, or of the entire unit or installation where a substantial part of it is leased, may be accepted as all or part of the consideration. The value of the maintenance, protection, repair or restoration, when added to the amount of the monetary payment to be made by the lessee, must equal the appraised fair market rental value of the property leased.

(b) Buildings and space may be leased to a State or political subdivision thereof for public school purposes, limited to use for classrooms and closely related academic instructions, through high school level, at no monetary consideration. Where bare land is leased for construction of a school through high school level, the acreage will not exceed criteria established by the appropriate State authority or the Department of Health, Education, and Welfare (HEW), the rental will be $1 for the term of the lease and any renewal thereof. Leases of bare land will be for a term of 25 years, with an option on tenant’s part to renew for another term of 25 years. Real estate may also be leased for educational purposes to public educational institutions at a reduced rental, after consultation with the HEW, and taking into account any benefits accruing to the United States through the use of such property. In any event, the lessee will be required to assume the cost of maintenance, protection, repair, or restoration of the property leased and the administrative costs incident thereto.

(c) Lease granted for agricultural, grazing, or haying purposes will have attached thereto the land-use regulations furnished by the installation commander specifying the items required to be performed by the lessee as part of the lease obligations. It is the policy of the DA that land leased for agricultural, grazing or haying purposes be returned to the Government in as good or better condition than when initially leased. The land-use regulations will include those activities of maintenance, protection, repair, or restoration of the property leased which the lessee will be required to perform as part or all of the consideration for
the lease. Generally, an activity will qualify as an offset from rental if it is:

(1) Performed on the leased premises, or when it constitutes a substantial part of the entire rental unit or installation,

(2) Of direct benefit to the installation in its authorized current or mobilization mission, as distinguished from desired programs, or in furtherance of the Army’s leasing program,

(3) Generally related to the lessee’s use of the leased property. Where all of the above criteria are met, the following activities may be authorized: Control of erosion, conservation of natural resources, and maintenance of the viability of the land for continuing leasing, such as mowing, weed control, seeding, fertilizing, mulching, crop rotation, selected cutting, and soil conservation measures such as terraces, check dams, wells, springs, ponds, title, or open channels or culverts for drainage, firebreaks, inside fencing and cattle guards. Maintenance, protection, repair or restoration of buildings, roads, perimeter fencing, and similar improvements are not authorized as offsets from rental unless the property is leased to and beneficially used by the lessee, or on a rental unit or installation in which the leased premises constitutes a substantial part or as otherwise approved by HQDA (DAEN-REM), Washington, DC 20314. Also, lessee may be required to perform activities in support of recreation and welfare, fish and wildlife, beautification, and esthetic programs and the cost of establishing and maintaining recreation, swimming and fishing areas, wildlife habitats, food plots, and similar activities when the following conditions have been met:

(1) The activities to be offset are in furtherance of the installation natural resources plan as approved by the MACOM.

(2) The overall plan for the term of the lease, has been approved by ASA (IL & FM).

(3) MACOM approval has been obtained for each lease when any activity to be offset exceeds $1,000.

Total of the offsets in any year will never exceed the annual rental.

§ 643.54 Receipts.
Receipts will be deposited into the Treasury as miscellaneous receipts.

§ 643.55 Mandatory revocation clause in lease.
Each lease will contain a provision permitting the SA to revoke the lease at any time, unless it is determined that the omission of such provision from the lease will promote the national defense or will be in the public interest. In any event, the lease will be revocable by the SA during a national emergency.

§ 643.56 Taxation of lessee’s interest.
The lessee’s interest in leased property may be taxed by State or local governments as provided in 10 U.S.C. 2667(e). Each lease will contain a provision that if and to the extent that the property owned by the Government and included in the lease, as opposed to the leasehold interest of the lessee therein, is later made taxable by State or local governments under an act of Congress, the lease will be renegotiated.

§ 643.57 Sublease or assignment.
A lease of real estate will not be subleased or assigned for direct or indirect use by another Federal agency. Except as specifically provided in the lease, a sublease or assignment of the lease will not be authorized without prior approval of HQDA (DAEN-REM), Washington, DC 20314.

Subpart D—Licenses

§ 643.71 Additional items concerning licenses.
In addition to the general and policy matters covered in subparts A and B, the following also apply with respect to the granting of licenses.

§ 643.72 License.
A license is a bare authority to do a specified act upon the property of the licensor without acquiring any estate therein. The principal effect of a license is to authorize an act which in the absence of the license would constitute a trespass.
§ 643.73 Term.

The term of a license will be limited to a period reasonably necessary to accomplish the purpose for which the license is being granted, but in no event will the term exceed five years, without the approval of COE.

§ 643.74 Consideration.

When a license is granted under the authority of an easement or leasing statute, the same rules will apply in regard to consideration as is applicable to the granting of an easement or lease under the statute. Since the administrative power may be relied upon for the grant of a license only when such grant is of direct benefit to the Government, such grants may be made without consideration.

Subpart E—Easements

§ 643.81 Additional items concerning easements.

In addition to the general and policy matters covered in subparts A and B, the following also apply with respect to the granting of easements.

§ 643.82 Term.

The term for which an easement is granted will be guided by the type of easement, the period for which the land can be made available and the limitations of the authorizing statute.

§ 643.83 Consideration.

Although the statutes authorizing grants of rights of way or easements do not make it mandatory that compensation be paid to the United States, such grants will reserve consideration in an amount equal to the fair market value as established by recognized appraisal practices. As an exception to this rule, grants to States, counties, municipalities, or political subdivisions thereof, will not require fair market value when the purpose of the easement is to serve the public interest or is to benefit the Federal Government.

§ 643.84 Easement—Grantees relocate or replace needed facilities.

In easement grants, grantees usually will be required to repair and restore damage done to Government land and improvements and to relocate or replace buildings and other needed facilities rendered useless or less useful by the exercise of the easement rights granted. DOD policy requires that in keeping the Army whole, the relocation or replacement of facilities will be limited to those for which there is a continuing requirement. By specific exclusion, establishment of a different category of facility is not authorized. (DODI 4165.12 III C)

§ 643.85 Easement grantees—Payment for removal or destruction of unneeded improvements.

Where a proposed right-of-way will require removal or destruction of improvements which are not required to be relocated or replaced to meet military needs, such improvements will be disposed of as excess property in accordance with AR 405–90, and a condition of the easement grant will be payment for such improvements as follows:

(a) Where the easement grant is to be made at fair market value to entities not entitled to grants of rights of way without charge, the charge for the grant will include the in-place fair market value of the improvements.

(b) Where the proposed grantee is a State or local Government agency normally granted a right of way without charge under Army policy and the grantee’s project is subsidized wholly by an agency of the Federal Government, no charge will be made for the improvements thus lost, since any charge made would not reflect a net return to the Government.

(c) Where the proposed grantee is a State or local Government agency normally granted a right of way without charge under Army policy, and the grantee’s project is not subsidized, or is subsidized only in part, the charge for such improvements removed or destroyed and not replaced will be the salvage value thereof.

§ 643.86 Easements for various purposes with relinquishment of legislative jurisdiction.

Title 40 U.S.C. 319, and delegation of authority thereunder from the Secretary of Defense authorizes the SA to grant easements and concurrently to
relinquish to the State in which the affected land is located such legislative jurisdiction as is deemed necessary or desirable. Ordinarily, 40 U.S.C. 319 will not be used for easement grants which may be accomplished pursuant to authorities set forth in preceding paragraphs except where retrocession of legislative jurisdiction is intended.

Subpart F—Permits

§ 643.101 Additional items concerning permits.
In addition to the general and policy matters covered in subparts A and B, the following also apply with respect to the granting of permits.

§ 643.102 Permit.
A permit is the temporary authority conferred on a Government agency to use real property under the jurisdiction of another Government agency.

§ 643.103 Term.
A permit may be granted to another military department, a DOD component, or Federal agency for a mutually agreeable period. If the permit is on a permanent or irrevocable basis, it is considered tantamount to a transfer and must be granted under special statutory authority. Where the real property involved is estimated to exceed $50,000 in value, a report must be made to the Congressional Committees on Armed Services, pursuant to title 10 U.S.C. 2662.

§ 643.104 Consideration.
(a) Permits are usually granted on a rent-free basis.
(b) The Army is authorized, however, to charge for space and space-related services provided non-DOD Federal agencies. Charges will be at rates established by GSA for the particular location pursuant to 40 U.S.C. 490 (j) and (k). Exceptions to this policy will be real property and related services provided to an organization which is solely in the support of the installation’s mission. (For example: Space assigned to a FAA air controller on an Army airfield; GAO activity auditing installation programs.) Proceeds which are in excess of the actual operating and maintenance costs of providing the service shall be credited to miscellaneous receipts unless otherwise authorized by law. Reimbursement for utilities and services furnished to the permittee is the responsibility of the officer having immediate jurisdiction over the real estate. Where the use of real estate by a Federal agency under permit is authorized and the correspondence does not include information regarding charges to be made for the real estate, clarifying information will be obtained from HQDA (DAEN-REM), Washington, DC 20314.
(c) Where real property is leased to or otherwise used by the Army and a rental or charge is paid therefor, any use of the real estate, for non-Army use, either under permit or other grant, will provide for reimbursement of a proportionate part of the rental or charge, unless otherwise approved by OCE. Reimbursement is the responsibility of the DE. Any other officer authorizing such use is responsible for notifying the DE of the non-Army use.

Subpart G—Additional Authority of Commanders

§ 643.111 Additional authority.
In addition to authorities and responsibilities set forth above, the following grants may be made by commanders as indicated.

§ 643.112 Army exchange activities.
Use of space and structures by the Army Exchange and its concessionaires is governed by AR 60–10.

§ 643.113 Banks.
(a) The establishment of banks, branch banks, and banking facilities on Army installations is governed by AR 210–135.
(b) The Treasury Department determines whether a banking facility is self-sustaining and notifies the Commander, U.S. Army Finance and Accounting Center.
(c) Banking facilities which are not self-sustaining will be furnished space, utilities and custodial services without charge by the Installation Commander, provided space and services are available from existing resources.
(d) Banking facilities which are self-sustaining will be granted a lease by
§ 643.114 Civil disturbances.

Without reference to higher authority, and when it is found to be in the public interest, MACOM and heads of agencies having command responsibility may grant, without consideration, revocable licenses for joint use of active Army and USAR facilities during civil disturbance for not more than 30 days to the National Guard and to municipal, county, and State officials and law enforcement agencies. Licensees must agree that the privileges granted will be without expense to the DA, that the use will be subject to the control of the officer having jurisdiction over the property, that it will remove its property from the premises when the license is terminated, that it will pay the cost of any services furnished to it by the DA, and, if a non-Federal agency, that it will hold the Government harmless from any damages or claims arising out of the use. Where it is proposed to allow such use beyond 30 days, the proposal must be submitted to HQDA (DAEN-REZ) Washington, DC 20314, for approval. Federal task force commanders, acting under instructions from the Chief of Staff, in a civil disturbance control operation may approve requests for the use of installations under their control (ref. AR 500-50).

§ 643.115 Contractors—Permission to erect structures.

Installation commanders are authorized to permit the erection of temporary structures for use solely in connection with a Government contract for construction and related work for the period of the contract and with provision for removal and restoration of the premises upon expiration of the contract; Provided, That, in the interest of the United States, any structure suitable for military use may, in lieu of removal, be relinquished to and become the property of the United States. If the structure is to be used for any purpose other than the fulfillment of the contract, application will be made to the DE for such use in order that a proper real estate instrument may be processed.

§ 643.116 Credit unions.

The establishment of credit unions on Army installations is governed by AR 210-24. Installation commanders are authorized to allot space in existing buildings, without charge for rent or services, to any credit union organized under State law or to any Federal credit union organized in accordance with the Federal Credit Union Act, (12 U.S.C. 1770), provided that, in either case, that 95 percent of the membership is composed of Federal employees, including former Federal employees who acquire membership while employed by the Federal Government and retained such membership.

§ 643.117 Hunting, trapping, and fishing.

Applications to hunt, trap, and fish on military reservations are governed by AR 420-74.

§ 643.118 Nonappropriated funds—Authority to permit erection of structures.

The authority of installation commanders to permit structures to be erected on military installations with nonappropriated funds, as well as the title status of each, is defined in AR 60-10 and AR 210-55. Use of existing space and structures for activities of a civilian nonappropriated fund is governed by AR 230-81.

§ 643.119 Licenses incidental to post administration.

Installation commanders may authorize the use of property incidental to post administration which in the absence of such authority would amount to a trespass, such as licenses to merchants to enter the reservation to make deliveries. The authority noted herein may not be used to grant licenses in situations otherwise covered by this regulation.

§ 643.120 Post offices.

Title 10 U.S.C. 4779b, provides that the SA shall assign suitable space for
post office purposes at military posts where post offices have been established. Space assignment will be accomplished by arrangement between the postmaster and installation commander.

§ 643.121 Private organizations on DA installations.

(a) AR 210–1 defines and classifies private organizations, such as thrift shops and child-care centers, located on Army installations and provides policy guidance for their authorization and operation. Installation commanders may authorize the use of available facilities or space to such private organizations, without monetary consideration, when the use is on a nonexclusive basis and subject to immediate termination when possession is required by the installation commander for another purpose.

(b) Where the private organization desires exclusive use of facilities or space, or for a specified period of time, the matter will be considered a leasing action, the lease will be granted by the DE and will provide for payment of a rental consideration. The installation commander will consult with the DE if there is a question whether a proposed use of facilities or space by a private organization should be authorized by the DE under lease or by the installation commander by the issuance of a license.

§ 643.122 Reserve facilities—Air Force and Navy use.

MACOM may approve local agreements with other Army, DoD, and Reserve elements covering temporary use of existing Army Reserve facilities, Provided, however, that the DA is reimbursed in proportionate share for the services furnished and that the cost of any alterations that may be desired will be borne by the military service concerned. Although no specific form is prescribed for those operational agreements, the agreements constitute interservice support agreements subject to joint AR 1–35/SECNAV INST 4000.20B/AFR 400.27. Nothing in such joint regulation disallows use of DE outgrants to supplement coverages of interservice support agreements when requested and approved in accordance with this regulation. The terms used in the interservice agreements and/or DE outgrants will be those acceptable to the commands concerned. Agreements, however, which provide for the exclusive use of such property by the Air Force or Navy Reserve, or which involve a transfer of funds between services for other than minor utility services, or which involve an increase in personnel strength, or other complications, will be routed to the appropriate DE for execution of a formal permit.

§ 643.123 Reserve facilities—Local civic organizations.

In order to promote community relations in areas where Army Reserve Centers have been constructed, local civic and similar nonprofit organizations may be permitted to use the armory facilities during such periods that will not cause any interference with the primary use thereof for the administration and training of the Reserve components of the Armed Services of the United States. Procedures and policy are outlined in AR 140–488.

§ 643.124 Rights-of-way for ferries and livestock.

Installation commanders are authorized to grant permits for the landing of ferries and driving of livestock over military reservations under authority of 10 U.S.C. 4777.

§ 643.125 Trailer sites.

(a) Installation commanders are authorized to grant revocable leases to military personnel and civilian personnel qualified to occupy public quarters for use and occupancy of individual trailer sites within approved trailer camp areas, and to revoke or renew such leases. (See AR 210–50.) Leases will be granted pursuant to 10 U.S.C. 2667. Necessary utilities will be provided on a reimbursable basis. In no event will the terms of the lease exceed a period of 2 years. DA Form 373 (Lease or Trailer Sites) will be used exclusively for this purpose.

(b) Leases may be revoked for nonpayment of rent, or breach of any condition of the lease or military necessity.
§ 643.126 Transportation licenses.

Installation commanders are authorized to grant revocable licenses and to revoke such licenses in the name of an army by authority of the SA, for bus and taxicab service on installations. The following policy will be observed in granting such licenses; however, if real estate is required to be leased in accordance with paragraph (e) of this section, no commitment will be made to grant licenses until approval is received for the lease.

(a) One or more licenses (revocable at will and for a period not to exceed 5 years) may be granted, based upon the free competitive proposals of all available companies or individuals.

(b) DD Form 694 (Transportation License Military Reservation) will be used for this purpose.

(c) Only duly licensed operators will be permitted to operate on installations.

(d) No distinction will be drawn between taxicab and bus transportation.

(e) If use of Government property is desired for such purposes as at bus station, waiting rooms, storage space, offices in connection with the proposed transportation service, application for a lease will be forwarded to the appropriate DE for processing.

(f) Licenses may be revoked by the installation commander for breach of any condition of the license and for military necessity.

(g) The installation commander will furnish a copy of each such license, through channels, to the MACOM or to the head of the agency having command responsibility.

§ 643.127 Quarters.

The assignment and rental of quarters to civilian employees and other nonmilitary personnel will be accomplished in accordance with AR 210–50. Responsibility of the Corps of Engineers for the establishment of rental rates for quarters rented to civilian and military personnel is set forth in AR 210–12.

§ 643.128 Veterans’ conventions.

Without reference to higher authority, MACOM may lend certain Army real property (including the use of unoccupied barracks) to national veterans’ organizations for use at State or national conventions or for national youth, athletic, or recreational tournaments sponsored by those organizations in accordance with AR 725–1.

§ 643.129 Youth groups.

(a) Installation commanders may grant revocable-at-will licenses for one-time use, or for intermittent or continuing use of available meeting room facilities, without monetary consideration, to on-post youth groups such as the Boy Scouts, Girl Scouts, and Little League.

(b) Installation commanders may grant revocable-at-will licenses for one-time use, or for intermittent or continuing use, to off-post youth groups such as the Boy Scouts, Girl Scouts, and the Little League for nonexclusive use of recreational areas or unimproved land areas within military reservations for recreational or camping purposes. Licenses will be granted for up to a period of 1 year without monetary consideration and will provide for a hold-harmless clause with respect to any and all claims against the Government and will require the repair of any damage or destruction resulting from such use.

§ 643.130 Joint Carrier Military Traffic Offices (JAMTO, JBMTO, JRMO, SAMTO).

Installation commanders will furnish office space without charge for JCMTO offices established in accordance with AR 55–355.

PART 644—REAL ESTATE HANDBOOK

Subpart A—Project Planning

Sec. 644.1 Preface.

CIVIL WORKS

644.2 General.
644.3 Navigation projects.
Department of the Army, DoD

644.4 Reservoir projects.
644.5 Mineral acquisition practices.
644.6 Feasibility Reports and Design Memoranda.
644.7 Acquisition lines.
644.8 Planning and scheduling real estate activities.

MILITARY (ARMY AND AIR FORCE) AND OTHER FEDERAL AGENCIES

644.21 General.
644.22 Site selection.
644.23 Real Estate Planning Documents.
644.24 Acquisition by Transfer from other Government Departments or Agencies (except Public Domain).
644.26 Required clearances.
644.27 Authority to issue Real Estate Directives.
644.28 Responsibility for acquisition.
644.29 Authority to proceed with acquisition.
644.30 Preliminary real estate work.

Subpart B—Appraisal

644.41 General.
644.42 Appraisal report.
644.43 Gross appraisals.
644.44 Fee appraisals.
644.45 Rental value.
644.46 Easements.
644.47 Appraisal of other interests.
644.48 Review and approval.
644.49 Contracts.

Subpart C—Acquisition

PROCUREMENT OF TITLE EVIDENCE, TITLE CLEARANCE, AND CLOSINGS

644.61 General.
644.62 Title evidence.
644.63 Contracting for title evidence.
644.64 Award of contracts.
644.65 Ordering title evidence.
644.66 Payment for title services.
644.67 Approval of Title by the Attorney General.
644.68 Title Clearance—Certificate of Title and Title Insurance.
644.69 Title Clearance—Easements.
644.70 Closing of cases.
644.71 Final title assembly.
644.72 Transfer to condemnation.

ACQUISITION BY PURCHASE, DONATION, AND TRANSFER

644.81 General.
644.82 Prerequisites to acquisition.
644.83 Negotiations.
644.84 Counteroffers.
644.85 General negotiation procedures.
644.86 Exceptions and reservations.
644.87 Preparation and execution of offers.
644.88 Other acquisition.

INVOLUNTARY ACQUISITION BY THE UNITED STATES

644.101 General.
644.102 Examples of involuntary acquisitions.
644.103 Litigation Reports.
644.104 Procurement of deed and title assembly.

ACQUISITION BY CONDEMNATION PROCEEDINGS

644.111 General.
644.112 Applicable statutes in condemnation proceedings.
644.113 Filing of complaint without declaration of taking.
644.114 Acquisition by declaration of taking.
644.115 Restorment of title by stipulation.
644.116 Distribution, reservations, and title evidence.
644.117 Procedure prior to trial.
644.118 Awards.
644.119 Procedure after final judgment.
644.120 Condemnation for local cooperation projects.
644.121 Leasehold condemnation requirements.

ACQUISITION BY LEASING

644.131 General.
644.132 Authority.
644.133 Responsibilities.
644.134 Definitions.
644.135 Lease authorization and approvals.
644.136 Leasing guidelines.
644.137 Maneuver agreements.
644.138 Family housing leasing program.
644.139 Leases for civil works purposes.
644.140 Physical protection.
644.141 Alterations and construction on leased real property.
644.142 Lease forms and instructions.

ACQUISITION OF RIGHTS-OF-ENTRY

644.155 General.
644.156 Definition.
644.157 Procedures.

PROCUREMENT OF OPTIONS PRIOR TO REAL ESTATE DIRECTIVES (MILITARY)

644.165 Purpose and scope.
644.166 Authority and applicability.
644.167 Implementation.
644.168 Exercise of options.

Subpart D—Relocation Assistance Program

644.175 Cross reference.

Subpart E [Reserved]

Subpart F—Disposal

644.311 General.
644.312 Applicability.

644.313 Authority.
644.314 Rules and regulations of the General Services Administration (GSA).
644.315 Disposal priorities.
644.316 Environmental considerations.
644.317 Preserving historic landmarks and properties.
644.318 Compliance with State coastal zone management programs.
644.319 Protection of wetlands.
644.320 Floodplain management.
644.321 Nondiscrimination covenant.
644.322 Disposition of proceeds from disposal.
644.323 Neutral language.
644.324–644.325 [Reserved]

PROCEDURE FOR PLACING REAL PROPERTY IN EXCESS STATUS

644.326 Army military real property.
644.327 Air Force military real property.
644.329 Army civil works real property.
644.330–644.332 [Reserved]

SCREENING, REASSIGNMENT, AND TRANSFER OF REAL PROPERTY

644.333 Screening for defense needs.
644.334 Reassignment and transfer procedures.
644.335 Screening of excess DOD property for nondefense Federal agency needs.
644.336 Notices to Departments of Interior (DI); Health and Human Resources (HHR); Education; and Housing and Urban Development (HUD).
644.337–644.339 [Reserved]

CLEARANCES—ARMY MILITARY REAL PROPERTY

644.340 Reports to the Armed Services committees.
644.341 Clearance with the Armed Services committees.
644.342 Prior approval of Department of Defense.
644.343 Additional data for clearance with the committees.
644.344 Coordination with GSA.
644.345–644.347 [Reserved]

REPORTS OF EXCESS REAL PROPERTY AND RELATED PERSONAL PROPERTY TO GENERAL SERVICES ADMINISTRATION (GSA)

644.348 Delegation of authority to division and district engineers.
644.349 Excess property reported for disposal.
644.350 Excess property reported for screening.
644.351 Excess property exempted from reporting.
644.352 Evaluation and reporting of flood hazards.
644.353 Determination of values for reporting.
644.354 Conditional reports of excess.
644.355 Preparation and submission of reports of excess.
644.357 Outgrant instruments, appraisals, and muniments of title.
644.358 Deposit of proceeds from disposal of family housing in the family housing management account.
644.359 Supplemental information.
644.360 Reports submitted for screening.
644.361 Distribution of report of excess.
644.362 Notice of receipt.
644.363 Withdrawals or corrections of reports of excess.
644.364 Supply of forms.
644.365–644.367 [Reserved]

CARE AND CUSTODY OF EXCESS AND SURPLUS PROPERTY

644.368 Procedures and responsibilities for care, custody, accountability, and maintenance.
644.369 Guidelines for protection and maintenance of excess and surplus real property.
644.370 Transfer of custody to General Services Administration (GSA).
644.371 Contracting for care and custody.
644.372 Care and custody through interim use.
644.373–644.375 [Reserved]

RETURN OF PUBLIC DOMAIN LANDS AND LANDS OBTAINED ON A TEMPORARY BASIS FROM ANOTHER FEDERAL AGENCY

644.376 Procedure for disposal of public domain land.
644.377 Formal revocation of public land withdrawals and reservations.
644.378 Cancellation of permits.
644.379 Procedure for cancellation of permits.
644.380 Restoration of lands made available by other government agencies.
644.381 Disposal of buildings and other improvements.
644.382–644.384 [Reserved]

PREDISPOSAL ACTION

644.385 Record of excess classification
644.386 Utilization for other needs.
644.387 Suspension of acquisition action on installations proposed for disposal.
644.388 Army Military—screening, clearance, preliminary report of excess, except where an EO 11954 survey has been made.
644.389 Army Military—modified predisposal procedures where EO 11954 surveys have been made.
644.390 Executive Order 11954 surveys of civil works properties.
644.391 Predisposal conference.

114
644.393 Final report of excess to GSA.
644.394 Protection of disposal information.
644.395 Coordination on disposal problems.
644.396 Assignment of personnel to administrator.
644.397–644.399 [Reserved]

DISPOSAL OF FEE-OWNED REAL PROPERTY AND EASEMENT INTERESTS

644.400 Authorities—general.
644.401 Transfers—general.
644.402 Transfers among the armed services.
644.403 Transfers to Tennessee Valley Authority.
644.404 Transfers to Federal Prison Industries, Inc.
644.405 Transfers to Veterans Administration.
644.406 Transfers to Secretary of Transportation and the National Weather Service.
644.407 Transfers to District of Columbia.
644.408 Interchange of national forest and military and civil works lands.
644.409 Procedures for Interchange of National Forest Lands.
644.410 Procedure for other transfers.
644.411 Form of inter-agency transfer instrument.
644.412 Transfer of custody and accountability.
644.413 Exchanges of fee-owned and easement interests.
644.414 MCA acts.
644.415 Army military and Air Force lands—$50,000 limitation.
644.416 Army civil works lands.
644.417 For MCA family housing.
644.418 Procedure for exchange.
644.419 Public Law 87–832 easements.
644.420 Disposal of property in which the military departments have a continuing interest under special acts of Congress.
644.421 Highway purposes.
644.422 Authorized widening of a public highway, street, or alley.
644.423 Airport development.
644.424 Development of public port or industrial facilities.
644.425 Authority and procedure for disposal of surplus property by DA to eligible public agencies.
644.426 Classification.
644.427 Notice to eligible public agencies.
644.428 Airport property.
644.429 Wildlife purposes.
644.430 Shrines, memorials, or religious purposes.
644.431 Power transmission lines.
644.432 Assignment to Department of Health, Education, and Welfare or successor agencies for health or educational purposes.
644.433 Surplus disposal to private parties.
644.434 Cottage site disposal.
644.435 Procedure.
644.436 Appraisal.
644.437 Disposal plan for fee-owned land.
644.438 Disposal plan for easements.
644.439 Sale and conveyance.
644.440 Application of antitrust laws.
644.441 Preparation and execution of deeds.
644.442–644.443 [Reserved]

DISPOSAL OF LEASEHOLDS AND LEASEHOLD IMPROVEMENTS

644.444 Authority.
644.445 Procedure for termination of leases.
644.446 Vacation and protection of premises.
644.447 Joint survey of premises.
644.448 Limits on government obligation to restore.
644.449 Requirement for notice by lessor.
644.450 Items excluded from usual restoration obligation.
644.451 Nature of required restoration.
644.452 Minor restoration cases—determining extent of restoration required.
644.453 Major restoration cases—determining extent of restoration required.
644.454 Negotiating restoration settlements.
644.455 Claims for loss or damage of personal property.
644.456 Rent during the period required for restoration.
644.457 Settlement where part of the premises is surrendered.
644.458 Documenting lease terminations and restoration settlements.
644.459 Preparation of supplemental agreements effecting settlement.
644.460 Supplemental agreement assembly.
644.461 Payment for restoration or settlement in lieu of restoration.
644.462 Performance of restoration work by district engineer—extension of time.
644.463 Termination and settlement of leasehold condemnation proceedings.
644.464 Negotiating stipulation where proposed settlement not acceptable.
644.465 Physical restoration where stipulation not obtained.
644.466 Release and record of physical restoration.
644.467 Condition reports.
644.468 Settlement of claims.
644.469–644.471 [Reserved]

DISPOSAL OF BUILDINGS AND OTHER IMPROVEMENTS (WITHOUT THE RELATED LAND)

644.472 Authority.
644.473 Methods of disposal.
644.474 Determining method of disposal.
644.475 Excessing Army military and Air Force property.
644.476 Excessing civil works property.
644.477 Civil works property—reimbursement of appropriations.
644.478 Demolition of buildings and other improvements for utilization of salvage material.
644.479 Authority for transfer of buildings and improvements to other Federal agencies.
644.480 Procedure for transfer.
644.481 Responsibility of transferee.
644.482 Assignment to Department of HEW or successor agencies.
644.483 Notification of Department of HEW or successor agencies.
644.484 Procedure for disposal through the Department of HEW or successor agencies.
644.485 Sale of buildings and other improvements.
644.486 Disposal of buildings and improvements constructed under emergency plant facilities (EPF) or similar contracts.
644.487 Procedure for disposal of surplus chapels.
644.488 Soliciting applications for purchase of chapels.
644.489 Conditions of sale of chapels.
644.490 Determining price and provisions of sale for chapels.
644.491 Coordination with the Chief of Chaplains.
644.492 Report on disposal of chapel.
644.493 Release of restrictions on chapels sold.
644.494 Donation, abandonment or destruction.
644.495 Donation to a public body.
644.496 Abandonment.
644.497 Destruction.
644.498-644.500 [Reserved]

644.501 Authority.
644.502 Determination of excess status.
644.503 Methods of disposal.
644.504 Disposal plan for timber.
644.505 Disposal plan for embedded gravel, sand or stone.
644.506 Procedure for transfer to another Federal agency.
644.507 Sales.
644.508 Agreement with Small Business Administration (SBA) on sale of timber.
644.509 Status as small business.
644.510 Information for SBA on timber sales.
644.511 Certificate of competency by SBA.
644.512 DA-SBA joint set-aside determinations.
644.513-644.515 [Reserved]

644.524 Reporting contaminated land to the General Services Administration.
644.525 Statement of clearance in reporting excess property to GSA.
644.526 Reporting target ranges.
644.527 Recording statements of clearance.
644.528 Return of contaminated leased land to owners.
644.529 Supplemental agreement with owner of contaminated leased land.
644.530 Conditions in conveying land suspected of contamination.
644.531 Warning to public of danger in handling explosive missiles.
644.532 Reporting accidents.
644.533 Contamination discovered after return of land to owner, or sale.
644.534 Return of public domain land.
644.536-644.539 [Reserved]

644.540 Advertising.
644.541 Award of contract.
644.542 Application of anti-trust laws.
644.543 Determination of acceptable offers after advertising.
644.544 Negotiated sales.
644.545 Form of invitation for bids and contract of sale.
644.546 Credit.
644.547 Extensions of time.
644.548 Abstract of bids.
644.549 Payments.
644.550 Sale to employees or military personnel.
644.551 Equal opportunity—sales of timber, embedded sand, gravel, stone and surplus structures.
644.552 Statement of contingent or other fees.
644.553 Preparation and distribution of sales documents and reports of sales.
644.554 Insurance against loss or damage to buildings and improvements by fire or acts of God.
644.555-644.557 [Reserved]

644.558 Properties requiring compliance inspections.
644.559 Civilian component training facilities.
644.560 Inspections of civilian component training facilities and other properties conveyed subject to conditions.
644.561 Inspections of civil works properties.

AUTHORITY: 5 U.S.C. 301; 10 U.S.C. 3012, unless otherwise noted.

SOURCE: 44 FR 3168, Jan. 15, 1979, unless otherwise noted.
Subpart A—Project Planning

§ 644.1 Preface.

Subpart A sets out basic procedures to be followed in planning and scheduling for the acquisition of lands in connection with Military and Civil Works projects. It is not intended to be taken as absolute, without modification, but more as a guide to insure all aspects involved and potential problems are fully considered in planning for the acquisition of additional lands. Proper planning in the initial stages of any project can and should eliminate unnecessary delays during the acquisition phase.

CIVIL WORKS

§ 644.2 General.

(a) Purpose. Sections 644.2 through 644.8 describe the authorities and procedures of the Corps of Engineers relating to real estate planning and project authorization for the acquisition of land and interests therein for all water resource projects.

(b) Applicability. These sections are applicable to all Division and District Engineers having civil works real estate responsibilities.

(c) River and harbor and flood control projects—(1) River and Harbor Projects. The Act of Congress approved April 24, 1888 (33 U.S.C. 591) authorizes acquisition of land for river and harbor purposes. These include the construction, operation, maintenance and improvement of both natural and artificial waterways, the construction of locks and dams, dikes, bulkheads, jetties, revetment and other bank protection works, and spoil disposal dikes and retaining structures for construction and maintenance. Unless otherwise specified by Congress, local interests furnish, free of cost to the United States, all lands, easements and rights-of-way required for initial construction, operation and subsequent maintenance. A cash contribution may also be required if enhancement of land values results from disposal of spoil dredged from project areas (ER 1150–2–301 and EM 1120–2–101).

(2) Flood control projects. The Act of Congress approved March 1, 1917 (33 U.S.C. 701) authorizes acquisition of land for flood control purposes, and section 2 of the Act of Congress approved June 28, 1938, as amended (33 U.S.C. 701c–1), authorizes the acquisition of land and interests therein for dam and reservoir projects, channel improvements, and rectification projects for flood control at Federal expense. Dam, reservoir and lake projects are generally constructed entirely at the expense of the United States and are maintained and operated with the use of Federal funds. Local interests are not required to furnish lands, easements and rights-of-way for dam and reservoir projects, unless specifically authorized by law for small reservoirs which provide localized flood protection (EM 1120–2–101). For local flood protection projects, except channel improvement or channel rectification projects authorized by the Flood Control Acts of 1936, 1937 and 1938, local interests must provide, without cost to the United States, all necessary lands, easements, and rights-of-way. They must also hold and save the United States free from damages due to the construction, operation and maintenance of the project, except where such damages are due to the fault or negligence of the United States or its contractors, and maintain and operate all the works after completion, in accordance with regulations prescribed by the Secretary of the Army. Channel improvement and channel rectification projects authorized by the Acts of 1936, 1937 and 1938 are built entirely at Federal expense and no local cooperation is required. Exceptions to these rules are provided by law in the case of certain specific projects such as hurricane protection, shore protection, beach erosion control or other purposes. As in river and harbor projects, a cash contribution may also be required if enhancement of land values results from disposal of spoil dredged from project areas (ER 1150–2–301 and EM 1120–2–101).

(d) The navigational servitude. As a general rule the United States does not acquire interests in real estate which it already possesses or over which jurisdiction is or can be legally exercised. Irrespective of the ownership of the banks and bed of a stream below ordinary high water mark, and irrespective of western water rights under the prior
appropriation doctrine, no further Federal interest is required for navigation projects in navigable streams below the ordinary high water limit. It is required, therefore, that the acquisition plan consider the extent of the navigational servitude.

(1) ER 1165–2–302 contains the practice and procedures regarding navigation.

(2) The navigational servitude affects abutting uplands, in that the special site value attributable to their location near a navigable stream is non-compensable. However, this has been partially changed by section 111 of Pub. L. 91–611. In all cases where real property is acquired by the United States for public use in connection with any improvements of rivers, harbors, canals or waterways of the United States, the compensation to be paid shall be the fair market value of such real property based upon all uses to which such real property may reasonably be put, including its highest and best use, any of which uses may be dependent upon access to or utilization of such navigable waters. In cases of partial acquisitions of real property, no depreciation in the value of any remaining real property shall be recognized, and no compensation shall be paid for any severance to the remaining real property which results from loss of or reduction of access from the remaining real property to the navigable waters because of the acquisition of real property or the purposes for which the real property is acquired.

(e) Buildings. Buildings for human occupancy, as well as other structures which would interfere with the operation of the project, or which would be substantially damaged by inundation, are prohibited below the guide acquisition line unless otherwise specifically approved by the Chief of Engineers.

(f) Estates. Standard estates for acquisition of land or interests therein are contained in subpart C. Non-standard estates should be submitted to HQDA (DAEN-REA-P) WASH DC 20314 for approval.

§ 644.3 Navigation projects.

(a) Land to be acquired in fee. All lands necessary for permanent structures, construction areas, public access areas and fish and wildlife purposes will be acquired in fee. No interests need be acquired in areas subject to the Government’s right of navigational servitude. Spoil disposal areas may be acquired in fee upon approval of HQDA (DAEN-REA-P).

(b) Lands over which easements are to be acquired. (1) Permanent easements are required for channel improvements, navigation pools, navigation aids, and spoil disposal areas for future maintenance. Requirements for navigation aids should be coordinated by the District Engineer with the local Coast Guard District Commander.

(2) Temporary easements may be acquired for temporary disposal of spoil, and temporary construction and borrow areas.

(3) In navigation-only projects, the right to permanently flood should be acquired in all lands located within the navigation pool and the right to occasionally flood should be acquired in lands above the pool. However, when the area to be occasionally flooded above the navigation pool consists of a narrow band of land, the right to permanently flood may be taken therein, to avoid acquisition of two different estates from the same ownership, and/or to reduce overall costs of acquisition.

§ 644.4 Reservoir projects.

(a) Joint land acquisition policy for reservoir projects. The joint policies of the Department of the Interior and the Department of the Army, governing the acquisition of land for reservoir projects, are published in the FEDERAL REGISTER, dated February 22, 1962, Volume 27, page 1734. On July 2, 1966, the Joint Policy was again published in 31 FR 9108 as follows:

A joint policy statement of the Department of the Interior and the Department of the Army was inadvertently issued as a Notice in 27 FR 1734. Publication should have been made as a final rule replacing regulations then appearing in 43 CFR part 8. The

118
policy as it appears in 27 FR 1734 has been the policy of the Department of the Interior and the Department of the Army since its publication as a Notice and is now codified as set forth below.

**JOINT POLICIES OF THE DEPARTMENTS OF THE INTERIOR AND OF THE ARMY RELATIVE TO RESERVOIR PROJECT LANDS**

Sec.

8.0 Acquisition of lands for reservoir projects.

8.1 Lands for reservoir construction and operation.

8.2 Additional lands for correlative purposes.

8.3 Easements.

8.4 Blocking out.

8.5 Mineral rights.

8.6 Buildings.

8.0 Acquisition of lands for reservoir projects.

Insofar as permitted by law, it is the policy of the Departments of the Interior and of the Army to acquire, as a part of reservoir project construction, adequate interest in lands necessary for the realization of optimum values for all purposes including additional land areas to assure full realization of optimum present and future outdoor recreational and fish and wildlife potentials of each reservoir.

8.1 Lands for reservoir construction and operation. The fee title will be acquired to the following:

(a) Lands necessary for permanent structures.

(b) Lands below the maximum flowage line of the reservoir including lands below a selected freeboard where necessary to safeguard against the effects of saturation, wave action, and bank erosion and to permit induced surcharge operation.

(c) Lands needed to provide for public access to the maximum flowage line as described in paragraph 1b, or for operation and maintenance of the project.

8.2 Additional lands for correlative purposes. The fee title will be acquired for the following:

(a) Such lands as are needed to meet present and future requirements for fish and wildlife as determined pursuant to the Fish and Wildlife Coordination Act.

(b) Such lands as are needed to meet present and future public requirements for outdoor recreation, as may be authorized by Congress.

8.3 Easements. Easements in lieu of fee title may be taken only for lands that meet all of the following conditions:

(a) Lands lying above the storage pool.

(b) Lands in remote portions of the project area.

(c) Lands determined to be of no substantial value for protection or enhancement of fish and wildlife resources, or for public outdoor recreation.

(d) It is to the financial advantage of the Government to take easements in lieu of fee title.

8.4 Blocking out. Blocking out will be accomplished in accordance with sound real estate practices, for example, on minor sectional subdivision lines; and normally, land will not be acquired to avoid severance damage if the owner will waive such damage.

8.5 Mineral rights. Mineral, oil and gas rights will not be acquired except where the development thereof would interfere with project purposes, but mineral rights not acquired will be subordinated to the Government’s right to regulate their development in a manner that will not interfere with the primary purposes of the project, including public access.

8.6 Buildings. Buildings for human occupancy as well as other structures which would interfere with the operation of the project for any project purpose will be prohibited on reservoir project lands.

(b) Application of joint policy by Corps of Engineers. In order to assure that the water and land areas of reservoirs constructed by the Corps are available to the public, the lands which provide access along the shore of the reservoir will be supplemented at selected locations for concentrated public use. Where projects have either recreation or fish and wildlife, or both, as project purposes, additional lands will be acquired as set out in the authorization and specified in design memoranda. The policy contemplates that the United States own in fee a continuous area of land around the reservoir above the water level to insure ready access along the shore. However, certain exceptions have been adopted, as set forth hereinafter. Under the Joint Policy the Corps will take an adequate interest in lands, including areas required for public access, to accomplish all of the authorized purposes of the project and thereby obtain maximum public benefits therefrom. The statements in the policy which define the land interests to be acquired in particular areas are guidelines in application of policy.

(1) **Land to be acquired in fee.** (i) Lands necessary for the dam site, construction areas and permanent structures.

(ii) The lands below a guide contour line (guide acquisition line) established...
with a reasonable freeboard allowance above the top pool elevation for storing water for flood control, navigation, power, irrigation, and other purposes, referred to in this paragraph as the “full pool” elevation. In nonurban areas generally, this freeboard allowance will be established to include allowances for induced surcharge operations plus a reasonable additional freeboard to provide for adverse effects of saturation, wave action and bank erosion. Factors such as estimated frequency of occurrence, probable accuracy of estimates, and relocation costs, will be taken into consideration. Where this freeboard does not provide a minimum of 300 feet horizontally from the conservation pool, defined as the top of all planned storage not devoted exclusively to flood control, then the guide acquisition line will be increased to that extent. In the vicinity of urban communities or other areas of highly concentrated developments, the total freeboard allowance between the full pool elevation and the acquisition line may be greater than prescribed for nonurban areas generally, and shall be sufficient to assure that major hazards to life or unusually severe property damages would not result from floods up to the magnitude of the standard project flood. In such circumstances, however, consideration may be given to easements rather than fee acquisition for select sections if found to be in the public interest. However, when the project design provides a high level spillway, the crest of which for economy of construction is substantially higher than the storage elevation required to regulate the reservoir design flood, the upper level of fee acquisition will normally be at least equal to the top elevation of spillway gates or crest elevation of ungated spillway, and may exceed this elevation if necessary to conform with other criteria prescribed herein.

(iii) Lands to be acquired for public use, being those reflected in the Recreation Resources Appendix of the Phase I General Design Memorandum (ER 1120–2–400). The Phase I General Design Memorandum is required to be prepared and submitted for approval prior to submission of the Real Estate Design Memorandum.

(iv) Lands required for operation and maintenance of the project for:
(A) Frequently used operational areas.
(B) Clearing and disposition of debris.
(C) Maintenance, repair, and restoration.
(D) Anticipated erosion.
(E) Safeguarding public health, and malaria and mosquito control.
(F) Sanitation.

(A) All lands to be acquired for fish and wildlife purposes, either mitigation enhancement lands or estates therein required for other project purposes, will be presented in such a way as to distinguish clearly all such lands under each of the separate authorities involved. Specific guidance on fish and wildlife resources is contained in ER 1120–2–400 and ER 1120–2–404.

(B) The purpose of Pub. L. 89–72 is to provide a uniform policy with respect to recreation and fish and wildlife benefits and costs of Federal multiple-purpose water resource projects, and for other purposes.

(1) Pub. L. 89–72, as amended by section 77 of Pub. L. 93–251, does, however, create a unique provision relating to local participation in the recreation and fish and wildlife developments in water resource projects. Provisions of that Act, as amended, must be adhered to and contracts for administration of project lands and cost-sharing shall follow the amendments contained in section 77 of Pub. L. 93–251.

(2) Section 3(b) of Pub. L. 89–72 further provides that, notwithstanding the absence of an indication of intent as specified above, lands may be provided in project planning which would preserve the recreation and fish and wildlife potential of the project for subsequent development by local interests. The act prescribes that local interests must within 10 years after initial operation of the project enter into agreements specified above. In the event such agreements are not obtained, the
proposed facilities cannot be constructed and the Corps may utilize the lands acquired for any lawful purpose within the Corps' jurisdiction or may offer said land for sale to its immediate prior owner or his immediate heirs at its appraised fair market value at the time of disposal. In the event that an agreement with the prior owner or his heirs cannot be reached in 90 days, disposal of the property will ensue pursuant to usual disposal procedures.

(3) The provisions of Pub. L. 89–72, as amended, are construed to apply to planning for projects authorized in 1965 or thereafter. Accordingly, all planning for future projects must be coordinated with local interests as defined in the law and all design memoranda relating to land acquisition or development of recreation or fish and wildlife areas must clearly set forth the potential of the project for such development and the intent of local interests in fulfilling the requirements of this law.

(4) Public Law 89–72, as amended, does not impose a requirement for local participation in all recreation and fish and wildlife areas. Development of recreation areas and planning for fish and wildlife areas will be in accordance with the guidelines set forth in this Chapter and related regulations.

(vi) Lands for resource preservation and/or enhancement in fulfillment of the National Environmental Policy Act of 1969 (Pub. L. 91–190, 83 Stat. 852) and Executive Order 11514 will be those approved in the authorizing document and/or those approved in the Recreation Resources Appendix of the General Design memorandum.

(vii) Uneconomic remnants required to be purchased in fee under section 301(9) of Pub. L. 91–646.

(viii) Recommendations may be made in the Real Estate Design Memorandum to eliminate lands from acquisition located within the approved guide acquisition line but above the guide contour line which are highly developed or devoted to public uses such as parks, golf courses, cemeteries, etc. Also, where for reasons of steep terrain, presence of highways and railroads, severe severance, or for other reasons, sound real estate practice indicates requirement for some adjustments in the area above the guide contour line, recommendations for such adjustments will be included in the real estate design memorandum, or will be subsequently submitted with proposed final real property acquisition lines, for approval of the Division Engineer in accordance with §644.7.

(ix) Lands which will be covered by any sediment delta that is expected to form as the result of aggradation of streams draining into the reservoir. The estimate of this area shall be based upon the probable sediment inflow for a period at least equal to the economic life of the project.

(2) Lands over which easements are to be Acquired. (i) Lands in reservoir areas of flood-control-only projects, which do not provide conservation pools, except as required for public access.

(ii) Lands required for a relatively short time for temporary structures or for use during the construction period only.

(iii) The Joint Policy of 1962 provides that flowage easements may be acquired in reservoir projects if all four conditions of Section 8–3 of the Joint Policy are met. For the purposes of land acquisition, to distinguish between fee and flowage easement “remote portions of the project area” as referred to in Section 8–3 of the Joint Policy are defined as those lands lying upstream from the conservation pool (the top elevation of all storage other than that devoted exclusively to flood control use) on the main stream and all significant tributaries thereof.

(iv) Lands downstream from the dam and required only for operational purposes.

(v) In flood control projects which do not have conservation pools, the right to occasionally flood should be acquired in all lands, except that the right to permanently flood should be acquired in those lands which may be subjected to permanent flooding, as in the case of a trash pool.

(3) Levees in lieu of acquisition. Where construction of levees or flood walls and necessary associated facilities for protection of lands and properties located within potential flowage limits of a reservoir is proposed in lieu of acquisition of fee title or easements over
such properties, the protective structures shall meet the minimum functional requirements:

(i) In urban communities or other areas of highly concentrated developments where overtopping of levees would result in major hazards to life or unusually severe property damage under anticipated future conditions, levee grades and designs shall be adequate to withstand without failure the occurrence of the standard project flood, assuming the reservoir is filled to highest level that is reasonably likely to prevail at the beginning of such a flood.

(ii) Under circumstances where it can be reasonably shown that possible overtopping of protective levees or flood walls as proposed would not result in unusual hazards to life or major property damage, levee grades shall be as high as economically practicable in consideration of apparent risks and costs involved, and flowage easements or other appropriate assurances from local interests shall be obtained insofar as necessary to protect the Government in the event the protective structures are overtopped.

§ 644.5 Mineral acquisition practices.

(a) Procedure. The procedure of the Corps of Engineers in acquiring the necessary land or interests therein to accommodate projects authorized by the Congress is to permit the reservation of the minerals in the land, unless the reservation is inimical to the operation of the project. In all cases where a reservation is permitted, the mineral interests are subordinated to the primary project purposes, including public access and preservation of environmental quality.

(b) General. (1) The multiplicity of ownerships in mineral interests, the variety of minerals and the different methods of mineral exploration, recovery and production make it impracticable to define in advance specific guidelines concerning the reservation of mineral interests and their subordination to primary project purposes in any given project. The initial planning documents, real estate design memoranda, and master plans will fully discuss and consider the extent of acquisition and/or reservation of mineral interests.

(2) Generally fee title to all subsurface interests will be acquired in areas required for all structures, areas required for project operations and public use including access, and in areas where the value of the subsurface interests is nominal. Reservation of coal, oil, gas and other minerals will be permitted whenever any aspect of mineral development will not interfere with project purposes. The reservation of mineral rights will be predicated upon the Government’s right to so regulate their development as to eliminate any interference with project purposes and to minimize any adverse impact on the environment including aesthetic values.

(c) Reservation of minerals. (1) When it has been determined that the reservation of minerals will not interfere with the purposes of the project, the minerals will be subordinated in accordance with the following guidelines:

(i) The estate providing for the subordination will not be utilized unless approved by HQDA (DAEN-REA).

(ii) Any subordination agreement, together with additional regulations incorporated by reference, must clearly define:

(A) The rights and obligations of the Government and the mineral owner, operator, and/or lessee.

(B) The control to be exercised over site development for mining purposes.

(C) Required land reclamation or restoration.

(D) Restrictions against pollution and degradation of project environment and aesthetics.

(E) Provisions for compliance inspection by the Government of all site development and mining activities over which the Government has control under paragraph (c)(1)(ii)(B) of this section.

(2) After execution of a subordination agreement as provided above, the District Engineer will develop a program for the surveillance of mineral activities at each project.

(3) The representatives of the Division and District Engineers are to be fully informed concerning the rights and responsibilities of the Government and the mineral owner and/or operator.
under the terms of the estates acquired for the subordination of minerals, and will periodically inspect all mining activities to insure compliance with the terms of the subordination agreement and any plan incorporated by reference into such agreement.

(d) Off-project mineral activity. In connection with all drainage basins, where there is present or potential mineral activity upstream from a project or nearby lands outside the project limits, the District Engineer will:

(1) Establish and maintain liaison with Federal and State agencies having responsibility for the regulation of mineral activities and the control of environment in order to prevent adverse effects of mining on the project.

(2) Institute a system for monitoring adverse effects on the project such as sedimentation and acid drainage.

(3) Take steps to insure that Corps personnel in charge of the project are familiar with State and Federal laws governing the control of mineral recovery and the environment, as well as the Federal or State agencies responsible for the enforcement of such laws.

(4) Division and District Engineers are requested to use the Refuse Act of 1899 and any other legal remedies that may be appropriate in a particular situation in order to protect the interests of the United States and preserve the integrity of the project.

§ 644.6 Feasibility Reports and Design Memoranda.

(a) Feasibility investigations and reports. Survey investigations and reports are the studies and reports, specifically authorized by Congress and made by Division and District Engineers as assigned by the Chief of Engineers, to determine the scope, justification, and degree of Federal interest in protection and development of harbors, waterways, shores and beaches, and river basins. For water resource projects the reports include determination of needs of alternative plans of protection and development to be considered for recommendation to Congress for authorization as Federal projects. Survey reports should clearly specify real estate requirements, both immediate and prospective, and the responsibilities of Federal and non-Federal agencies relative thereto. The real estate estimates in the reports should be recent enough to be meaningful for the purpose intended. Documentation regarding the estimates, such as when and by whom made, nature and extent of field investigation, search for comparable sales and similar factual material, shall be maintained.

(b) Phase I and Phase II General Design Memoranda. (1) The General Design Memorandum (GDM) is a report on an authorized project. Its form and content are set forth in ER 1110–2–1150. It includes a real estate section, which consists of a general discussion of real estate requirements for the project, recommendations as to estates to be acquired, a gross appraisal of the necessary land and interests therein, and other features considered desirable to present all major real estate problems and to recommend solutions. Subject to the availability of data, minerals in the project area should be covered in the manner set forth in § 644.5. Detailed sales data are not necessary, but may be included if it is anticipated that recommendations will be made for early acquisition of interior tracts.

(2) Real Estate personnel will prepare the real estate section of the GDM. The requirements for current real estate estimates and necessary documentation thereof contained in § 644.6(a) are also applicable to this paragraph.

(c) Real Estate Design Memoranda. (1) Following approval of the Phase I GDM, a Real Estate Design Memorandum (REDM) will be prepared by the Division or District Engineer. Approval of the REDM shall be in accordance with ER 1110–2–1150, para 21b(2)(j). No land shall be acquired for the project without approval of the initial REDM except (i) in the case of an advance land acquisition situation, (ii) acquisition for local cooperation project, or (iii) when a letter-type REDM has been submitted. The REDM will include the following in the order set forth below:

(A) A statement that this REDM is tentative in nature for planning purposes only and that both the final real property acquisition lines and the estimate of value are subject to change even after approval of this REDM.
(B) Project authorization, designation, location and date of approval of GDM Phase I, including the Recreation Resources Appendix (App A, ER 1110–2–1150).

(C) General description of the area and estimated total acreage. The total acreage will be broken down as to fee and easement areas. The fee will be further broken down to indicate, separately, the estimated acreage required for the various authorized project purposes.

(D) If any Government-owned land is within the area, indicate the Government’s estate, degree of interest required for project purposes, and views of the local representative of the controlling agency as to use for project purposes (see Act of July 26, 1956 (70 Stat. 656) with respect to national forest land).

(E) Appraisal information containing a general statement as to character, present use and highest and best use of the land, local economic conditions which may affect the trend of real estate values in the community and the gross estimate of value for the area to be acquired under the REDM. The gross appraisal on which this estimate is based should be forwarded concurrently to HQDA (DAEN-REE) WASH DC 20314.

(F) Information necessary to ascertain responsibility under Pub. L. 91–646 including but not limited to the following:

(1) The number of persons, farms and businesses to be displaced.

(2) An estimate of all costs, including contingencies to be incurred as a result of compliance with Pub. L. 91–646. Part 641 of this subchapter sets out the items to be considered in estimating these costs.

(3) Information regarding the availability of replacement housing.

(G) Estimated cost to the United States of lands, easements, and rights-of-way necessary for acquisition by the United States for:

(1) Access roads to project area. A statement will be included as to whether existing public roads will be utilized within the purview of 33 U.S.C. 701r–1 or new rights-of-way for access roads will be acquired, with the estimated cost of such new rights-of-way. The proposed plan of access during construction will be fully described.

(2) Relocation of highways, roads, railroads, pipelines, and utilities (ER 1180–1–1, Section 73). Statement will be included as to whether the Government or the owner(s) will acquire new rights-of-way, if any, necessary for the various relocations.

(H) Number of structures and facilities which will come within the purview of section 111 of the Act of Congress approved July 3, 1958 (Pub. L. 85–500), and a preliminary estimate of Government costs (ER 1180–1–1, Section 73).

(I) A study, in accordance with §644.5, of present or anticipated mineral activity in the vicinity of the project which may affect the operation thereof. A recommendation including cost estimate, if applicable, regarding the acquisition of the minerals should also be included in this section of the REDM.

(J) A discussion of standing timber and other vegetative cover in proposed recreation areas and other areas above the conservation pool which have recreation or scenic value. Recommendations should be made as to the significance of such timber and cover and as to whether reservation of standing timber should be permitted in the various parts of the fee area.

(K) A map(s) showing the area which is the subject of the REDM, indicating the acquisition guide line, contour line, the tentative blocked out fee line, multipurpose pool, and lands in which the acquisition of easements is recommended. The map(s) will show, where appropriate, the dam site, construction area, borrow areas, spoil areas, public access areas, fish and wildlife areas, and recreation areas. In addition, the appropriate map(s) will have outlined thereon the items of construction or major project features. Access roads and railroad rights-of-way required for these areas will also be shown. Chapter 3 of ER 405–1–12 relates to the preparation of maps. With respect to a project where it is planned to submit several REDMs covering portions of the project, the initial REDM will contain a map showing the entire project, with the information shown thereon as indicated above, insofar as this information covering the entire project.
project is then available. All subsequent REDMs will contain the same type of map, on which will be shown the area(s) on which REDMs have been previously submitted with each such area keyed to the number of its REDM. Maps shall be of sufficient scale to be legible and to permit ready interpretation of pertinent features.

(L) An aerial mosaic, if available, to provide a pictorial support to the rest of the report concerning involved problems.

(M) Discussion relating to the acquisition or relocation of towns and cemeteries within the project area (ER 1180–1–1, Section 73).

(N) A realistic estimate of administrative costs, giving due recognition to existing and foreseeable conditions. To assure direct relationship between costs and estimates, the breakdown of these estimates will conform to the prescribed acquisition activity cost items as set forth under Real Estate Schedule/Cost and Performance, ENG Form 4564, or any further breakdown which the District Engineer may consider desirable. Included as a minimum requirement will be: Estimated administrative costs for mapping, surveying, and boundary monumentation, appraising, title evidence, negotiating and closing direct purchases, condemnation, and relocation assistance.

(O) Summary of project real estate costs, total all project real estate costs by category, i.e., land cost, improvements, severance, Pub. L. 91–646 costs, relocations, minerals, contingencies, administrative costs, etc.

(P) Schedule of acquisition.

(Q) Discussion and recommendations concerning the nonstandard estates proposed for acquisition and the real property boundary lines.

(R) The extent of the existing navigational servitude (ER 1165–2–302).

(S) The REDMs will be assigned a single basic number for each project; succeeding REDMs will be given alphabetical suffixes to the basic assigned number—for example, REDM Nos. 5, 5A, 5B, etc. Copies of the letter of transmittal and indorsements thereon will be inserted in the front of each copy of the REDM. A cover sheet will list chronologically all REDMs (including supplements thereto and brief letter-type memoranda) previously submitted, and will show dates submitted by the District Engineer and, if approved, dates of approval thereof.

(2) Upon approval of each REDM, the Division or District Engineer may, subject to the availability of funds, proceed with the acquisition of land and/or interests therein. The REDM, as approved, will constitute the overall real estate plan for acquisition of the area covered by the REDM. Whenever changes in the approved REDM are required, a supplementary REDM describing the proposed changes and setting forth the reasons therefor will be submitted. Approval of a supplemental REDM is required before acquisition can proceed in the area in which the changes are proposed.

(3) Prior to the approval of the REDM, Division and District Engineers should, subject to the availability of funds, proceed with preliminary real estate work, in the same manner as set out in §644.30. No action will be taken to solicit an offer from a landowner for the purchase of his land until the acquisition has been approved and subject to availability of funds and compliance with the applicable provisions of Pub. L. 91–646.

(4) An REDM is not required for projects authorized by the Congress subject to the condition that local interests furnish without cost to the United States the necessary lands, easements, and rights-of-way. However, the GDM should include a statement enumerating the requirements of local cooperation, the name of the local interests proposing to fulfill said requirements, an estimate of land costs, and any other information pertinent therefor.

(5) Number and content of Real Estate Design Memorandum.

(i) With respect to reservoir projects involving an extensive real estate program, it is considered preferable that more than one REDM be prepared so that each will cover a segment or group of segments, making up the total project, consistent with the planned schedule of acquisition.

(ii) For those projects, requiring two or more REDMs to cover the project area, each REDM will include all contiguous lands for each public access.
§ 644.7 Acquisition lines.

(a) Tentative acquisition lines. As indicated in §644.6(c)(1)(iii)(K), tentative acquisition lines are shown on maps which are part of the REDM. However, at that time, the lines will, to some extent, be irregular and located without full regard to their effect upon fringe tracts. It will, therefore, be necessary to establish final acquisition lines, in accordance with sound real estate practices. Accordingly, fringe tracts will not be acquired until the final acquisition lines are approved by the Division Engineer.

(b) Submission. As soon as possible after authority has been granted to acquire the land and/or interest therein, the District Engineer will complete appraisals covering the fringe tracts. Thereupon, a map showing proposed final acquisition lines will be submitted to the Division Engineer, accompanied by justification and reasons therefor. This submission may be for an entire project or by segments or units. However, if the final map is submitted on a segment or unit basis, each segment or unit must be complete in itself and not be dependent on another segment or unit not submitted for approval.

(c) Approval. The Division Engineer is authorized to approve final acquisition lines, but shall not delegate this responsibility to District Engineers. This authority is subject to the following:

(1) Except for the addition or deletion of individual ownerships, or portions thereof, on the basis of the criteria contained in §644.6(d), approval of any changes in the overall plan will be in compliance with ER 1110–2–1150.
§644.8 Planning and scheduling real estate activities.

(a) Normal scheduling. (1) The objective of a planned program is to provide for the early acquisition of land to avoid enhancement in land prices and a minimum of inconvenience to the property owners. Also, it is essential that there be adequate planning of the land acquisition program to insure that there is no interference with unacquired properties as a result of construction activities.

(2) It is essential that adequate funds be programmed on ENG Form 2213, Advance Engineering and Design Planning Schedule (PB-2B), to proceed with real estate planning; preparation of Real Estate Design Memoranda; determination of final project boundaries; and preliminary real estate work to the point where land acquisition can be started as soon as construction funds become available.

(3) Surveys and boundary monumentation and/or marking shall be completed prior to acquisition.

(4) Funds will be programmed for acquisition of lands for the construction area and/or other areas initially required within the first year, and for acquisition of lands for the other features of the project as rapidly as necessary so that total real estate requirements can be assembled. For projects with major impoundment features and with scheduled construction periods of more than two years, funds will be programmed at a uniform level so that total real estate requirements will be covered by accepted offers to sell or declarations of taking filed in court by the end of two-thirds of the overall construction period.

(b) Public information. (1) The real estate activities of the Corps are extremely sensitive, since they disrupt the lives of individuals and take their homes, farms and businesses. Therefore, the importance of keeping landowners and others having an interest in the land informed of the land acquisition program is emphasized. In order to avoid false rumors and to permit the affected owners to formulate plans for the future, information concerning the land acquisition program, procedures with respect thereto, and the specific effect on the individual properties, will be furnished to the affected owners at the outset of the project.

(2) Section 302 of Pub. L. 86-645 (33 U.S.C. 597) is quoted, in part, for guidance:

Within six months after the date that Congress authorizes construction of a water resource development project under the jurisdiction of the Secretary of the Army, the Corps of Engineers shall make reasonable effort to advise owners and occupants in and adjacent to the project area as to the probable timing for the acquisition of lands for the project and for incidental rights-of-way, relocations, and any other requirements affecting owners and occupants. Within a reasonable time after initial appropriations are made for land acquisition or construction, including relocations, the Corps of Engineers shall conduct public meetings at locations convenient to owners and tenants to be displaced by the project in order to advise them of the proposed plans for acquisition and to afford them an opportunity to comment. To carry out the provisions of this section, the Chief of Engineers shall issue regulations to provide, among other things, dissemination of the following information to those affected: (1) Factors considered in making the apraisals; (2) desire to purchase property without going to court; (3) legal right to submit to condemnation proceedings; (4) Payments for moving expenses or other losses not covered by appraised market value; (5) occupancy during construction; (6) removal of improvements; (7) payments required from occupants of Government-acquired land; (8) withdrawals by owners of deposits made in court by Government; and (9) use of land by owner when easement is acquired.

(3) Within a reasonable time after initial appropriations are made for land acquisition or construction, including relocations, Division and District Engineers will conduct meetings with landowners. The United States Senators of the state or states and Members of the House of Representatives of the district or districts in which the project is located should be invited to attend. Normally, the public meetings should be scheduled prior to the commencement of the land acquisition program. The agenda for the meetings will include not only the nine specific items listed in section 302, Pub. L. 86-645, but all other items of a nature
that will assist landowners and tenants in understanding all of the Corps’ real estate procedures such as, but not limited to: Acquisition schedules, the type of land interests to be acquired under the Joint Policy, approximate acquisition lines, management of the project, etc. In addition to the foregoing, pamphlets containing this information and the information brochure explaining the benefits to landowners under Pub. L. 91–646 will be given wide distribution at approximately the same time the landowners meeting program is initiated, and copies will be furnished to the appropriate United States Senators and Members of the House of Representatives.

(4) Inquiries, comments of landowners and tenants, and problems developed at the landowners meetings should be recorded or, at least, a detailed written resume made. HQDA (DAEN-REA-P) should be informed as to the outcome of these meetings. Effective follow-up to supply any information not available at the meeting, or to consider any particular problems presented, is essential to realize the full advantage of the public relations program.

(5) The provisions of this paragraph are applicable to all water resource development projects, including all local cooperation projects for which real estate is to be acquired in whole or in part by local interests. Initial information as to such projects for which real estate acquisition is exclusively a local interest responsibility may be given, within six months after project authorization, by either the local interest or Federal Government, through the media best adaptable under the circumstances. Advice should be given as to the timing of acquisition of the lands and lesser interests, and also as to the extent to which acquisition will be accomplished by the local interests. After appropriations, the local interests should be encouraged to sponsor and conduct a landowners meeting with attendance by Corps of Engineers representatives. If there is a joint responsibility for real estate acquisition, the local interests should explain the scheduled requirement for possession of the lands involved and their acquisition procedures, and the Corps of Engineers representatives should explain the procedures followed when lands are condemned by the Federal Government on behalf of local interests, and the authority for each action.

(6) If local interests refuse to call a landowners meeting, the District Engineer should call such a meeting, to explain the general construction features of the project, to inform the landowners and tenants that local interests are obligated to acquire the necessary lands, to state that we cannot explain the exact procedures which will be followed by local interests, but to explain the procedures followed when lands are condemned by the Federal Government on behalf of local interests. If only a very few landowners and tenants are involved, local interests may hold their meeting in the District Engineer’s office or at a location more convenient to the landowners and tenants. While this would not be a formal meeting, the same type of information would be furnished. Here, also, the District Engineer should call such a meeting if local interests refuse to do so.

(7) To summarize, public (landowners) meetings are required by section 302 of Pub. L. 86–645. This requirement applies to local cooperation projects as well as to the large Federal water resources development projects. The meetings will be held by Division/District Engineers, to comply with the law, if local interests refuse to call meetings at which information would normally be furnished jointly by the local interests and by the Corps of Engineers representatives.

(8) Real Estate personnel and the Public Affairs Officers of the Division and District Engineers should cooperate closely in planning vigorous public relations programs as contemplated in this paragraph and through the press, radio, and television.

(c) Land acquisition funds for land acquisition in advance of project construction. (1) A Land Acquisition Fund in the amount of $2 million was established as a part of the appropriations contained in the Public Works for Water, Pollution Control, and Power Development and Atomic Energy Commission Appropriation Act, 1971 (Pub. L. 91–439). Comments of the House Appropriations Committee in establishing
New land acquisition fund. The committee has approved the budget proposal to allocate $2 million to establish a fund for land acquisition, in advance of project construction, to alleviate severe hardship cases and to avoid price escalation. The proposal has been approved with the understanding that prior committee approval will be obtained for initial purchases in each project area and that use of the fund shall be confined to those projects on which planning has progressed to the point that the damsite has been finalized, and it is known with certainty the lands to be acquired for the project.

This fund was increased to $3 million by the Public Works for Water and Power Development and Atomic Energy Commission Appropriation Act of 1973 (Pub. L. 92–405).

(2) Applicability. Expenditures from the Fund are applicable to authorized water resource development projects for which land acquisition is a Federal responsibility.

(3) Guidelines for utilization of the Fund for Advance Land Acquisitions. (i) The Fund will be used to acquire private and non-Federal publicly-owned properties at authorized water resource development projects on which planning has progressed to the point that the damsite has been finalized and it is established with certainty that the individual properties will be required for the project.

(ii) Only those individual properties will be considered for acquisition where it can be shown that advance acquisition of the properties will alleviate severe hardship to the landowner and/or will avoid unusual land price escalation. Unusual price escalation cases involve those individually owned properties where it can be demonstrated that the land value will materially escalate, prior to commencement of the land acquisition program for the project from future appropriations for land acquisition or construction, because of imminent actions which will change the highest and best use of land, such as zoning actions, planned construction on the land and other changes in real estate market factors which will materially escalate land values. Normal land escalation occurring to all properties in general within a project will not be considered as a basis for acquisition. Hardship cases include, but are not necessarily limited to, cases involving the following:

(A) The landowner has a valid contract to purchase a replacement property and failure to dispose of his property inside the project will force him to default the contract, forfeit his deposit, or otherwise lose the benefits of the contract, and other replacement property is not available within the same area under similar terms;

(B) The property owner is forced to relocate from the area due to his employment or other circumstances beyond his control, and the Government’s project has so affected the sale of properties within the project area as to make a sale to another private party at a fair and reasonable price extremely difficult; and

(C) Illness of the owner or other members of his family, or other personal hardship makes his relocation from the area necessary and the Government’s project has so affected the sale of properties within the project area as to make a sale to another private party at a fair and reasonable price extremely difficult.

(D) As indicated above, these examples are not intended to exclude other cases where, in the exercise of sound judgment, actual hardship is found to exist.

(iii) Individual tract ownerships recommended for advance acquisition by Division and District Engineers and approved by OCE will be acquired by direct purchase or through the filing of condemnation proceedings, in accordance with normal procedures.

(4) Procedures. Individual tract ownerships which Division and District Engineers consider are hardship cases or involve unusual price escalation, within the guidelines set forth in paragraph (c)(3) of this section should be recommended to OCE for acquisition.

(i) Full justification must be submitted to HQDA (DAEN-CWB) WASH DC 20314 in support of the recommendation to acquire the individual ownerships.

(ii) If the recommendation is approved, action will be taken by OCE to
§ 644.8 32 CFR Ch. V (7–1–13 Edition)

obtain approval of the House and Senate Committees on Appropriations. Upon receipt of Committee approvals, the Division Engineer will be authorized to proceed with the acquisition action if sufficient funds are available from the Land Acquisition Fund.

(iii) Appropriate records will be maintained by District or Division Engineers of allocations made from the Fund which are used for approved acquisition cases. These funds will be accounted for under a designated account number.

(iv) When appropriations for land acquisition or construction of the Federal project are specifically made by the Congress, the initial allowance of funds to the project will be reduced by the amount previously allotted from the Land Acquisition Fund in order to replenish the Fund for use at other projects.

(d) Acquisition for State or local interests—Resettlement sites.

(1) Section 209 of Pub. L. 90–483 (82 Stat. 745) enacted August 13, 1968, provides that the Secretary of the Army may, prior to the approval of title by the Attorney General, acquire, enter upon, and take possession of lands or interests in lands by purchase, donation, condemnation or otherwise, whenever any State, or any agency or instrumentality of a State or local Government, or any nonprofit incorporated body organized or chartered under the law of the State, or any State agency, or any nonprofit association, shall undertake to secure any lands or interests therein as a site for the resettlement of families, individuals, and business concerns displaced by a river and harbor improvement, flood control or other duly authorized water resource project, and

(i) It is determined by the Secretary of the Army that the State or local interest is unable to acquire the necessary land, or unable to acquire it with sufficient promptness, and

(ii) The Governor of the State in which the site is located has requested such acquisition.

(2) Cost of acquisition. The Act also provides that:

(i) All expenses of acquisition accomplished under the authority of the Act, including any award that may be made in a condemnation proceeding, the cost of title evidence, appraisals and any other costs incident to such acquisition, shall be paid by the State, agency, instrumentality or nonprofit body.

(ii) The State, agency, instrumentality or nonprofit body may repay such amount from any funds made available to it by any Federal department, agency, or instrumentality, other than the Department of the Army.

(iii) Pending such payment, the Secretary of the Army may expend from any funds appropriated for the project such sums as may be necessary to carry out section 209, Pub. L. 90–483.

(iv) To secure such payment, the State, agency, instrumentality or nonprofit body may be required to execute a proper bond before acquisition is commenced.

(v) Any sums paid by a State, agency, instrumentality or nonprofit body under section 209 shall be credited to the appropriation for the project.

(3) Determinations required before application of section 209.

No acquisition by the Department of the Army may be undertaken under this section until the Secretary of the Army has determined, after consultation with appropriate Federal, State and local government agencies, that:

(i) The development of a site is necessary in order to alleviate hardships to displaced persons;

(ii) The location of the site is suitable for development in relation to present or potential sources of employment; and

(iii) A plan for development of the site has been approved by appropriate local government authorities in the area or community in which the site is located.

(4) Action by District or Division Engineer. When the District Engineer is of the opinion that section 209 may be applicable to a given situation, after consultation with State and State agency officials, the Governor of the State should be advised of the pertinent provisions of the law and the assistance that can be rendered by the Secretary of the Army under the terms and conditions of the law at the request of the Governor. If planning towards resettlement is undertaken by a State, agency, instrumentality or nonprofit body, the District Engineer will keep advised of
§ 644.21 General.

(a) Purpose. Sections 644.21 through 644.30 describe the procedures of the Corps of Engineers relating to real estate planning and project authorization for the acquisition of land and interests therein for military projects, for the Department of Energy (DOE), and for other Federal agencies as required.

(b) Applicability. Provisions of these sections are applicable to the Office of the Chief of Engineers and all Division and District Engineers having real estate responsibilities.

(c) General procedures. (1) AR 405–10 and AFR 87–1 outline the policies of the Department of the Army and the Department of the Air Force, respectively, with respect to real estate acquisitions.

(2) The policies of the Department of Energy (DOE) with respect to acquisition of real estate are generally set forth in requests of that agency for preparation of real estate design memorandums.

(3) The purpose of the planning function is to establish a sound basis for the acquisition of land and interests therein in accordance with existing law and broad procedures of higher authority; to collect all necessary real estate data; to correlate and evaluate these data from the standpoint of establishing the necessity for the proposed acquisition; to establish that no Government-owned or Government-controlled lands are available for the intended use; to determine the required estate, in accordance with existing policies, sufficient to protect the interests of the Government; and in general, to prepare each project for submission
§ 644.22 Site selection.

When a requirement develops for a new installation or the extension of an existing installation, site selection will be the primary responsibility of the using service. A representative of the appropriate Division or District Engineer will participate in selection of sites for the Department of the Army and, upon request, in Department of the Air Force site selection and preliminary investigations. Commanders and site boards should be informed of any available lands, including marginal lands in civil works projects and available lands under the control of other departments and agencies, suitable for the desired purpose. The using service will request the Chief of Engineers or the appropriate Division or District Engineer to prepare a Real Estate Planning Report or Real Estate Summary, making reference to the prior Site Selection Report if one was prepared.

§ 644.23 Real Estate Planning Documents.

(a) Real Estate Planning Reports. (1) A Real Estate Planning Report (REPR), as shown in Figure 2–1 in ER 405–1–12, will be prepared by the Division or District Engineer for all major fee and easement projects other than Reserve Component projects and extinguishment of grazing privileges on Federal lands. The request for such REPR may be initiated by any command or echelon of the Army or Air Force (or by the Washington Headquarters or field operations offices of DOE for a Real Estate Design Memorandum). Certain items contained in Figure 2–1 (ER 405–1–12) relate only to Department of the Air Force land acquisition programs for runways and approach zones and are not applicable to other projects. Such items will be omitted from REPRs where not applicable. When forwarding the REPR, a copy of the Reviewing Appraiser Comment, concerning the estimated land values assigned therein, should be included as an inclosure to the transmittal letter.

(2) On Department of the Air Force projects where estimated cost is not in excess of $25,000, brief REPRs are to be prepared for issuance of directives by the appropriate Air Force Regional Civil Engineer (AFRCE). Such reports need not be submitted to the Chief of Engineers except in those cases in which the major command submits a copy to Headquarters, USAF. This report should contain adequate information on the items listed in the following outline but need not be limited thereto:

(i) Requirement for the property.

(ii) Cost estimate of the property with indication of the method used in arriving at the estimate.

(iii) Summary sheet showing the acreages, interests to be acquired, improvements and estimated costs, including the administrative costs of acquiring the real property and all costs in connection with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Pub. L. 91–646).

(iv) Map showing property to be acquired, ownerships, and relation to existing installation, where appropriate.

(v) In reports covering the acquisition of runway clearance easements, a profile, topographic, and obstruction drawing should be furnished.

(vi) Discussions of any peculiar or unusual problems anticipated in connection with the proposed acquisition including relocation assistance required by Pub. L. 91–646.

(vii) Recommendations of the office preparing the report.

(b) Planning Documents for Reserve Component Acquisitions. Figure 2–2 in ER 405–1–12 is a sample of an REPR for use in acquisition of land for the U.S. Army Reserve Program. This report omits some items which appear in the usual planning report but includes other items particularly applicable to U.S. Army Reserve sites.
(1) Real Estate Planning Report. The REPR for Reserve Component acquisitions should contain the following:

(i) A list of all sites inspected with reasons for rejection of the other sites.

(ii) Description of physical characteristics of the site.

(iii) Type and extent of grading and drainage required.

(iv) Soil and foundation conditions with classification of overburden materials (to be determined by test borings only if conditions indicate this necessity).

(v) Availability of adequate access, water supply, electricity, gas for space heating, sewage disposal, drainage conditions, and telephone services. Where it is necessary to construct or extend streets, water, sewer, or other utility facilities to serve the selected site, a written commitment will be obtained from the municipal authorities assuring the United States that the municipality will perform such work without cost to the United States, or indicating the proportionate share of the costs the municipality will bear. This commitment will be made a part of the REPR.

(vi) Cost estimates of supporting facilities and any unusual building foundations, itemized to the degree practicable to indicate items, quantities, sizes, unit prices and totals.

(vii) A preliminary site plan, showing existing conditions and proposed layout, to insure adequacy of the site for its intended ultimate use.

(viii) A formal legal commitment in the form of a resolution or other instrument authorizing a long-term, nominal-rental lease or a donation, together with a reference to the authority to grant the lease or make the donation, in instances where land is owned by a State, county, city or other political subdivision.

(ix) A draft of the proposed lease in terms acceptable to the lessor, taking into consideration the requirements in DOD Directive 4165.16.

(2) Agreements for Joint National Guard-Army Reserve Center. Title 10, U.S.C., 2231 through 2238, DOD Directives 1225.2 and 1225.5, and AR 140-478 contain policy and directions for the establishment of this type of training facility. The Division or District Engineer will participate in negotiation of the joint-use agreement and preparation of the necessary instruments, in coordination with local Army Reserve and National Guard representatives. A copy of the agreement so negotiated will be attached to each copy of the REPR prior to its distribution for review. DOD Directive 1225.2 provides in part: “The agreement shall remain in full force and effect for the fixed term of years which represents the estimated useful life of the facility.” This provision has generally been interpreted as fixing the use term at 25 years, although the probably useful life of a well-maintained armory type structure is much longer. The DOD provision states a minimum requirement; however, it does not preclude the Army from securing a longer period of use. In order to secure a use term more commensurate with the Government investment, joint-use agreements, at a minimum, will be set up on a 25-year basis, with the option on the part of the Government to renew for an additional 25-year period under the same terms and conditions.

(3) Real Estate Summary. Considerable time, effort and funds can be saved if REPRs are foregone in those cases involving acquisition of property for U.S. Army Reserve and Army National Guard use by transfer from another military department or the General Services Administration. The Real Estate document in support of such proposed acquisitions will be a Real Estate Summary which will contain the following elements only:

(i) Authority for request.

(ii) Acreage and estate.

(iii) Estimated gross fair market value.

(iv) Map.

(v) Excess status of land.

(vi) Description of improvements (including building numbers and square feet).

(vii) Justification for use of the property as provided by the Command. Proposed construction (if any) should be included.

(viii) Engineering Feasibility Study (if construction is planned).

(ix) Draft Acquisition Report is required for clearance under title 10
§ 644.24 Acquisition by Transfer from other Government Departments or Agencies (except Public Domain).

When a requirement develops for the acquisition of Government-owned real property and an appropriate request is received for the acquisition, the District Engineer will prepare and submit, through the Division Engineer, to HQDA (DAEN-REA-L) WASH DC 20314 a Real Estate Planning Report (Figure 2-1 in ER 405–1–12) (or a brief report, if it is determined this would be insufficient) setting forth the requirements.
for the property, the market value thereof, the ‘‘in place’’ value of existing improvements, the estimated cost of the proposed construction, attitude of the local representative of the department or agency having control, and such other items as are necessary to give full discussion of the real estate implications, for consideration and the obtaining of a real estate directive for the acquisition by transfer.

(a) The Act of Congress approved February 28, 1958 (Pub. L. 85–337, 72 Stat. 27) provides that all withdrawals and reservations of public domain land, water, or land and water, or restrictions on use of areas in the Continental Shelf, aggregating an area of more than 5,000 acres for any one defense project, shall be by Act of Congress. Upon receipt of a request for withdrawal or reservation of lands of the public domain or for restrictions on exploration and exploitation in the Continental Shelf, and in order that the Chief of Engineers may present the project to higher authority for approval and submission to the Congress, if approved, the District Engineer will prepare and submit, through the Division Engineer, to HQDA (DAEN-REAL) WASH DC 20314 a Real Estate Planning Report, including the following items.

(1) A copy of the request from the Army or the using service.

(2) Complete information relative to the eight items specified in section 3 of Pub. L. 85–337 (43 U.S.C. 156).

(3) If the proposed withdrawal constitutes an expansion of an existing installation, pertinent data relative to the lands constituting the existing installation.

(4) Information relative to outstanding mineral, grazing, water and other rights.

(5) A statement as to the estimated cost:

(i) Of extinguishing such rights; and

(ii) Of suspending the exercise of such rights on a leasehold (annual rental) basis.

(6) Map(s) indicating the exterior boundaries of the project; excepted areas, if any; location of mineral rights, water rights, and other resources discussed in the report.

(b) The District Engineer will also prepare and include a draft of application for withdrawal covering the eight items specified in section 3 of Pub. L. 85–337.

(c) Upon receipt of the REPR and draft of application for withdrawal, the Chief of Engineers will prepare a Real Estate Directive.

(d) The REPR, draft of application for withdrawal, and Real Estate Directive will be transmitted through the Chief of Staff and the appropriate Assistant Secretary of the Army to the Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics) for approval of the acquisition and for coordination with the Department of the Interior (Bureau of Land Management). Upon receipt of approval from the ASD (MRA&L), the Chief of Engineers will dispatch the application to the Department of the Interior and will draft the necessary legislation for processing through normal legislative channels.

(e) It has been determined that the words ‘‘in the aggregate’’ in section 2 of Pub. L. 85–337 shall be interpreted as applying only to withdrawals of land since enactment of Pub. L. 85–337. For example, if 4,500 acres of public land had been withdrawn prior to enactment of Pub. L. 85–337 and the new application for withdrawal covers 1,000 acres, the requirements of Pub. L. 85–337 do not have to be satisfied. If the new application covering 1,000 acres is honored and the withdrawal completed and a later requirement for 4,500 acres of public lands developed, the requirements of Pub. L. 85–337 would have to be satisfied.

(f) Pub. L. 85–337 and the above instructions do not relate to the use of public lands under permit.

(g) In Department of Air Force cases, the District Engineer will continue to prepare such REPR’s and to furnish such other services as are requested by the Major Air Commands.

(h) When the REPR contains a proposal for the acquisition of minerals, the local office of the Bureau of Land Management, Department of the Interior, will be furnished with a copy of
§ 644.26 Required clearances.

(a) As stated in AR 405–10 and AFR 87–1, no real estate or interests therein will be acquired until there is legislative authorization for the acquisition (41 U.S.C. 14) and an appropriation available for the purpose.

(b) AR 405–10 and AFR 87–1 also outline the clearances which must be made within the Departments of the Army and the Air Force, with the Department of Defense, and with the Committees on Armed Services of the Senate and the House of Representatives before acquisition may proceed. The Chief of Engineers is responsible for initiating all clearance actions as to Army acquisitions. The Director of Engineering and Services (AF/PRE) and the Director of Planning, Programming and Analysis (AF/RDXI), as to industrial installations, of Headquarters, USAF, are responsible for initiating all clearance actions as to Air Force acquisitions.

§ 644.27 Authority to issue Real Estate Directives.

Where there is legislative authorization, an appropriation is available, and necessary clearances have been obtained, the formal Real Estate Directive (designating the land to be acquired, the estate to be acquired, and the amount of funds available for the acquisition) will be issued by the head of the interested department or agency, or his designee.

(a) Authority to issue all Department of the Army Real Estate Directives is vested in the Chief of Engineers. The Chief of Engineers has been delegated authority from the Secretary of the Army, and has redelegated to Division and District Engineers authority, to approve:

(1) Acquisition of permits from other Government departments and agencies, excepting the use of space in the National Capital Region.

(2) The making of minor boundary changes in approved projects to avoid severance damages, by including or excluding small tracts of land which will not decrease the usefulness of the project for the purpose for which being acquired.

(b) The delegated authority referred to in paragraph (a) of this section was redelegated to Division and District Engineers, provided it can be accomplished without the allotment of additional funds: And provided, That there is an existing Real Estate Directive. When there is a change in scope (area and/or funds), recommendation will be made to the Chief of Engineers for amendment of the directive.

(c) The Chief of Engineers has been delegated authority to approve for the Secretary of the Army leasehold acquisitions, including renewals and extensions, and space assignments from the General Services Administration, where the estimated annual rental for any single project is not in excess of $50,000 and the acquisition is not controversial, unusual, or inconsistent with Department of the Army policies, excepting the acquisition by lease of industrial and commercial facilities; projects requiring a certificate of necessity in accordance with the Act of Congress approved June 30, 1932, as amended (40 U.S.C. 278a); and space in the National Capital Region. This authority has been redelegated to the Division Engineer where the annual rental does not exceed $25,000.

(d) Authority to issue all Department of the Air Force Real Estate Directives is vested in the Real Property Division, Directorate of Engineering and Services, HQ, USAF. Major Air Commands and Air Force Regional Civil Engineers may issue Real Estate Directives for acquisitions not exceeding $50,000 in cost.

(1) Division Engineers will assign numbers to Real Estate Directives
issued by Air Force Regional Civil Engineers. The numbers will be in a consecutive series for each Division and will be preceded by a symbol identifying the Division to which the directive is issued.

(2) All revisions to Real Estate Directives will be designated as amendments to the basic Real Estate Directive and will be appropriately numbered.

(3) Division Engineers will forward the original and one copy of each Directive, and each amendment thereto to HQDA (DAEN-REA-L) WASH DC 20314.

(4) Commanders of Major Air Commands will approve requests for leases, lease renewals, and space assignments from the General Services Administration, where the estimated cost of the project does not exceed $50,000 per annum, and subject to any necessary clearances, excepting, however, the leasehold acquisitions listed in AFR 87–1.

(e) Authority to issue DOE Real Estate Directives has been delegated by the General Manager to the Directors of Operating Divisions, DOE.

§ 644.28 Responsibility for acquisition.

HQDA (DAEN-REA-L) is responsible for acquiring real estate for the Departments of the Army (military) and Air Force. HQDA (DAEN-REA-P) is responsible for acquiring real estate for the Department of the Army (civil works), DOE, and other Federal agencies as required.

§ 644.29 Authority to proceed with acquisition.

(a) Upon receipt of the formal Real Estate Directive by the Chief of Engineers, with necessary clearances made and an allotment of funds to the District Engineer, the Division Engineer will be authorized to proceed with acquisition in accordance with the directive and the procedures outlined in subpart C and Pub. L. 91-646 instructions. Where authority has been delegated, the Division or District Engineer may proceed with the acquisition upon receipt of proper directive, any necessary clearances, and allotment of funds.

(b) Under no circumstances will offers be made to landowners or construction initiated prior to the issuance of instructions from the Chief of Engineers to proceed with the acquisition.

(c) The Division or District Engineer will maintain liaison with the local commander and advise him when possession of the land is available.

§ 644.30 Preliminary real estate work.

(a) Preliminary real estate work is defined as that action taken with regard to the individual ownerships leading up to, but not including, solicitation of offers from landowners. It includes preparation or procurement of tract ownership data (ENG Form 900—Tract Ownership Data, where its use is considered desirable), legal descriptions and mapping, title evidence, and individual tract appraisals. At this stage of the acquisition program, it will be necessary to make some contact with landowners, tenants, or other interested persons; for example, the appraiser’s discussion of the property with the owner, his agent, or other representative (Pub. L. 91-646, sec. 301(2)). In any such contacts, information should be confined to the fact that acquisition of the real property is being considered; no acquisition action can be taken until funds are made available; and, after acquisition is approved, as much advance notice as possible will be given to all interested parties. Supply of ENG Form 900 may be requisitioned from the OCE Publications Depot in the prescribed manner.

(b) Preliminary real estate work on Army projects will be conducted as soon as design has progressed to the point at which the exact land needed has been firmly determined, or as soon as the District Engineer has determined that it is practicable to proceed.

(c) Preliminary real estate work on Air Force projects will be conducted upon request of Headquarters, USAF, or Major Air Command installations, and at the request of any of those persons designated for industrial acquisitions.

Subpart B—Appraisal

§ 644.41 General.

(a) Purpose. (1) Subpart B describes the general procedures and standards
§ 644.41 32 CFR Ch. V (7–1–13 Edition)

governing all appraisal work undertaken in connection with the real estate responsibilities of the Corps of Engineers.

(2) These guidelines are to promote and encourage the utilization of uniform appraisal methods, standards, and techniques. Their use should result in the most effective solutions to the many appraisal problems with which the Corps of Engineers is confronted in the implementation of its real estate programs involving acquisition, disposal, and management of all kinds of real property. They are to encourage the appraiser to include in his appraisal process sufficient factual data and other supporting information to develop sound, unbiased, and independent market value estimates; promote appraisal reporting techniques that reflect acceptable judicial concepts, intelligent and convincing reasoning; and provide a sound basis for negotiations and valid testimony in court.

(b) Applicability. Provisions of this subpart are applicable to the Office of the Chief of Engineers and all field operating agencies having real estate responsibilities.

(c) Procedures and standards. (1) In acquiring, disposing, and managing real estate, or any interest therein, it is the practice of the Department of the Army to impartially protect the interests of all concerned.

(2) The fair market value of the pertinent real estate interest in each parcel or tract of real property being acquired, disposed of or managed will be developed by a competent appraiser preparing an adequate appraisal report indicating sound estimates of values of each estate required. The appraisal may be prepared by either a staff employee or by a self-employed contract appraiser; however, each must have demonstrated the ability to exercise good judgment and must have had adequate experience in estimating the market value of the particular type of property involved. The qualifications and selection of staff appraisers will be based on the Civil Service Standards for the GS–1171 Series. A contract appraiser must also meet the experience requirements set forth in the Civil Service Standards.

(3) It is the practice of the Chief of Engineers to engage the services of competent appraisers and consultants to augment staff capabilities in the appraisal of various real estate interests to be acquired, disposed of or managed by the Corps. Preference will be given to local appraisers and consultants, if qualified, and the costs of their services will be paid by the Government. Any appraiser having an interest in the property being appraised or any relationship, family or business, to the owner thereof, will be disqualified from appraising that particular tract.

(4) Normally, only one appraisal per ownership or tract will be obtained. However, in cases involving controversial appraisal problems or precedent setting patterns of value in first priority areas of large projects, more than one appraisal of the same property may be obtained if considered necessary by the Division or District Engineer. If negotiations with the owners have reached an impasse and it appears that the filing of condemnation proceedings will be necessary to acquire the land or interest therein, the joint Corps of Engineers-Department of Justice policy provides that in fee takings, where the value of the property is between $50,000 and $100,000 only one appraisal need be provided to the Department of Justice so long as it is a contract appraisal; two appraisals will be provided for values exceeding $100,000. In the filing of condemnation proceedings for easement takings in excess of $50,000 two appraisals will be required. At least one of the two appraisals must be made by a contract appraiser. More often than not, both will be by contract appraisers.

(5) Each appraisal report will be carefully reviewed and acted upon by a qualified reviewing appraiser.

(6) It is essential that negotiations for any required real estate interests be conducted on the basis of an approved appraisal that reflects current fair market value. Any appraisal report with an effective date of six months or more prior to initiation of negotiations with the landowner or the date of filing of a condemnation action is considered outdated and should be reviewed and brought up to date to reflect current market conditions.
(7) The appraiser may be called upon, in condemnation proceedings or otherwise, to establish the validity and competence of his estimates. He must familiarize himself with basic rules of trial evidence so that his testimony will be admissible and of probative value. Since, as a witness, he must be prepared to offer convincing testimony, his report should contain an analysis of all factual data upon which his estimates are based.

(8) Local representatives of the Department of Justice are available for consultation in matters pertaining to acquisitions and legal principles involved in valuation problems.

(9) Appraised valuations and the supporting appraisal reports, for acquisition or disposal purposes, are privileged information and the appraiser should not divulge his findings and opinions to anyone except authorized officials of the Government. Section 301(3), Pub. L. 91–646, January 2, 1971, dictates that written statement of, and summary of the basis for, the amount of the estimate of just compensation, shall be furnished the property owner. This does not mean that the appraisal report or any part of it should be given to the landowner, but only a summary of the amount and methods of appraisal.

(10) The appraiser is usually the first personal contact the owner has with a representative of the Government. The owner is generally the prime source of information pertaining to the history, condition, management, and operation of the property. It has always been the Corps’ practice for the appraiser to contact and consult with the owner of a property prior to and during the inspection of the tract. Section 301(2), Pub. L. 91–646, January 2, 1971, dictates that “* * * the owner shall be given an opportunity to accompany the appraiser during his inspection of the property.” Before the appraiser makes his first visit to the property, he must make every effort to contact the owner and invite him or his designated agent or representative to accompany him on his actual field inspection. If personal contact is not possible, a registered letter should be sent to the owner. The appraisal report should reflect when and how the owner or his representative was contacted, whether or not he accompanied the appraiser, and any other pertinent comments.

(d) Definition of market value. “Under established law the criterion for just compensation is the fair market value of the property at the time of the taking. ‘Fair market value’ is defined as the amount in cash, or on terms reasonably equivalent to cash, for which in all probability the property would be sold by a knowledgeable owner willing but not obligated to sell to a knowledgeable purchaser who desired but is not obligated to buy. In ascertaining that figure, consideration should be given to all matters that might be brought forward and reasonably be given substantial weight in bargaining by persons of ordinary prudence, but no consideration whatever should be given to matters not affecting market value. The cash or on terms reasonably equivalent to cash, requirement is important and numerous courts have noted this factor.” (Source: “Uniform Appraisal Standards For Federal Land Acquisitions,” Interagency Land Acquisition Conference, Washington, DC, 1973.) This definition is considered to be consistent with another definition approved by the American Institute of Real Estate Appraisers which sets out market value “as the highest price estimated in terms of money which a property will bring if exposed for sale in the open market, allowing a reasonable time to find a purchaser who buys with knowledge of all the uses to which it is adapted and for which it is capable of being used.”

(e) Use of appraisal procedures. (1) The appraisal of real estate is the estimation of the fair market value of a specified interest in a particular ownership of property, and the appraisal profession has developed certain basic appraisal techniques and procedures. There are three approaches to value which have become standardized—the cost approach; the market approach; and the income approach.

(2) In the COST APPROACH, the appraiser estimates the cost of reproduction of the buildings and land improvements. A deduction is made for depreciation due to physical deterioration, and also for functional and economic obsolescence. The value of the land is
then estimated by comparison with sales of similar unimproved tracts and added to the depreciated value of the improvements. This procedure is also referred to as the Summation Approach. This approach is always applicable in the valuation of publicly owned structures such as schools, fire houses, etc.

(3) In the MARKET APPROACH, the appraiser compares the subject property on an overall basis with similar properties which have recently sold. Adjustments are made for all factors of dissimilarity. All known sales are considered, but the appraiser selects only those which are verified to be good “arms length transactions” and considered to be most similar to the property appraised. After these sales are analyzed and adjusted to the subject, this data is then correlated into a final estimate of value as indicated by the market.

(4) In the INCOME APPROACH, the appraiser estimates the probable gross and net income to be expected from the rental of the property, adjusts for the quality and durability of this income stream, and processes this income into a value estimate by use of an appropriate capitalization rate.

(5) The appraiser then correlates the indicated value estimates from the three approaches into a final estimated market value. Consideration is given to the relative strengths and weaknesses of each approach. Normally, the most weight is given to the approach commonly used by the typical purchasers of the type of property appraised. In almost all routine appraisals the market approach is most applicable.

(6) Importance of the appraisal function. The measure of success or failure in any real estate transaction is inseparably bound up in the matter of price. The heart of the real estate business is the price estimate or appraisal. The importance of sound appraisals for the Department of the Army cannot be over-emphasized. The courts have established basic rules governing exercise of the power of eminent domain.

(g) Appraisal is an “Estimate.” The market value of any real estate interest is not a matter of exact determination, and the appraiser does not “establish” or “determine” the value. An appraisal is an “estimate” of current value based upon and supported by an analysis of all the factors, physical, economic, and social which influence the present and future benefits to be derived from the ownership of the property appraised.

(b) The appraisal format. In order to establish a degree of uniformity throughout the Corps as to an appraisal format, all staff appraisers and contract appraisers will follow the outline as set forth in the “Uniform Appraisal Standards For Federal Land Acquisitions” and §644.42.

§ 644.42 Appraisal report.

(a) Preface. The appraisal report is an important document which serves as a material aid in the acquisition of required real estate interests. It is also an indispensable factor in justifying expenditures of public funds. It is essential that the report indicates conclusively that the appraiser has considered and analyzed all available data and used logical reasoning and judgment in developing his value conclusions.

(b) Scope of reports. (1) It is the Corps’ practice that all appraisal reports will be prepared in narrative form. The report will include, as a minimum, all essential data which will disclose the purpose, the scope of the problem and the principal techniques and approaches employed. The report should contain all the pertinent supporting data required to sustain the appraiser’s final conclusion of market value.

(2) The use of preprinted narrative sales data sheets is authorized. Care should be exercised to properly relate each sale to subject in the narrative. Use of individual forms is also authorized for tabular exercises, such as the “cost approach.” In every instance the narrative should reflect the appraiser’s reasoning.

B-1. Contents of appraisal report: The text of the appraisal report shall be divided into four parts as outlined below:

140
PART I—INTRODUCTION

1. TITLE PAGE. This shall include (a) the name and street address of the property, (b) the name of the individual making the report, and (c) the effective date of the appraisal.

2. TABLE OF CONTENTS.

3. LETTER OF TRANSMITTAL.

4. PHOTOGRAPHS. Pictures shall show at least the front elevation of the major improvements, plus any unusual features. There should also be views of the abutting properties on either side and that property directly opposite. When a large number of buildings are involved, including duplicates, one picture may be used for each type. Views of the best comparables should be included whenever possible. Except for the overall view, photographs may be bound as pages facing the discussion or description which the photographs concern. All graphic material shall include captions.

5. STATEMENT OF LIMITING CONDITIONS AND ASSUMPTIONS.

6. REFERENCES. If preferred, may be shown with applicable approach.

PART II—FACTUAL DATA

7. PURPOSE OF THE APPRAISAL. This shall include the reason for the appraisal, and a definition of all values required, and property rights appraised.

8. LEGAL DESCRIPTION. This description shall be so complete as to properly identify the property appraised. If lengthy, it should be referenced and included in Part IV. If furnished by the Government and would require lengthy reproduction, incorporate by reference only.

9. AREA, CITY AND NEIGHBORHOOD DATA. This data (mostly social and economic) should be kept to a minimum and should include only such information as directly affects the appraised property together with the appraiser’s conclusions as to significant trends.

10. PROPERTY DATA:
   a. Site. Describe the soil, topography, mineral deposits, easements, etc. A statement must be made concerning the existence or nonexistence of mineral deposits having a commercial value. In case of a partial taking, discuss access both before and after to remaining tract. Also discuss the detrimental and hazardous factors inherent in the location of the property.
   b. Improvements. This description may be by narrative or schedule form and shall include dimensions, cubic and/or square foot measurements, and where appropriate, a statement of the method of measurement used in determining rentable areas such as full floor, multitencancy, etc.
   c. Equipment. This shall be described by narrative or schedule form and shall include all items of equipment, including a statement of the type and purpose of the equipment and its state of cannibalization. The current physical condition and relative use and obsolescence shall be stated for each item or group appraised, and, whenever applicable, the repair or replacement requirements to bring the property to usable condition.
   d. History. State briefly the purpose for which the improvements were designed, dates of original construction and/or additions; include, for privately owned property, a ten-year record as to each parcel, of all sales and, if possible, offers to buy or sell, and recent lease(s); if no sale in the past ten years, include a report of the last sale.
   e. Assessed value and annual tax load. If the property is not taxed, the appraiser shall estimate the assessment in case it is placed upon the tax roll, state the rate, and give the dollar amount of the tax estimate.
   f. Zoning. Describe the zoning for subject and comparable properties (where Government owned, state what the zoning probably will be under private ownership), and if zoning is imminent, discuss further under item 11.

PART III—ANALYSES AND CONCLUSIONS

11. ANALYSIS OF HIGHEST AND BEST USE. The report shall state the highest and best use that can be made of the property (land and improvements and where applicable, machinery and equipment) for which there is a current market. The valuation shall be based on this use.

12. LAND VALUE. The appraiser’s opinion of the value of the land shall be supported by confirmed sales of comparable, or nearly comparable lands having like optimum uses. Differences shall be weighed and explained to show how they indicate the value of the land being appraised.

13. VALUE ESTIMATE BY COMPARATIVE (MARKET) APPROACH. All comparable sales used shall be confirmed by the buyer, seller, broker, or other person having knowledge of the price, terms and conditions of sale. Each comparable shall be weighed and explained in relation to the subject property to indicate the reasoning behind the appraiser’s final value estimate from this approach.

14. VALUE ESTIMATE BY COST APPROACH, IF APPLICABLE. This section shall be in the form of computative data, arranged in sequence, beginning with reproduction or replacement cost, and shall state the source (book and page if a national service) of all figures used. The dollar amounts of physical deterioration and functional and
§ 644.43 Gross appraisals.

(a) Preparation. (1) The gross appraisal sections of real estate design memoranda and planning reports are subject to minute scrutiny by higher authority in the Department of Defense and by Congressional Committees. It is essential that they be meticulously prepared to reflect actual market conditions and unit prices.

(2) Each gross appraisal will be supported by detailed analyses of an adequate number of typical comparable sales. Each index sale will be analyzed and compared to the subject property within the narrative of the report.

(b) Brief appraisals. (1) Brief narrative appraisal reports, of a one-to-four page composition, are authorized for use in many instances wherein the evaluation or per annum rental value does not exceed $3,600. The use of this type of report is encouraged and authorized for:

(i) Family housing appraisals,

(ii) Inleasing of privately-owned quarters and outleasing of government-owned quarters to civilian tenants,

(iii) The purchasing or leasing of undeveloped land,

(iv) Rentals of small office-type space (example: Recruiting facilities),

(v) Rights of way for utility lines and roadways,

(vi) Leases; easements, and

(vii) Other minor interests in real property.

(2) Appraisals exceeding $2,000 per annum rental are subject to the Economy Act, and the fee value must be shown if improvements are included. A brief or short form-type of appraisal is adequate.

(3) All appraisals will be supported by at least three comparable sales or rentals of similar properties. A narrative discussion of each will be included. In bulk acquisition projects the use of prepared sales data sheets is authorized and encouraged. Each sale or rental must be discussed and compared to the subject property within the narrative of the report.

(4) Brief narrative appraisals will be reviewed under the same requirements as normal appraisal reports.

PART IV—EXHIBITS AND ADDENDA

18. LOCATION MAP. (Within the city or area)

19. COMPARATIVE MAP DATA. Show geographic location of the appraised property and the comparative parcels analyzed.

20. DETAIL OF THE COMPARATIVE DATA.

21. PLOT PLAN.

22. FLOOR PLANS. (When needed to explain the value estimate.)

23. OTHER PERTINENT EXHIBITS.

24. QUALIFICATIONS. (Of all Appraisers and/or Technicians contributing to the report.)

(2) The following exceptions are made to the above format:

(i) Estate, either a copy of the estate appraisal should be included in the report or by reference in the report to the appropriate estate.

(ii) Legal description must be included in the appraisal report, either in the body or as an exhibit.

(iii) Photographs of important buildings and unusual land conditions are considered an integral part of each appraisal report. Judgment should be exercised in conserving time and expense, and several small buildings can often be covered in one photograph. The use of color film and photographs is encouraged, especially wherein development cost either “in-house” or by outside firms is reasonable.
and values, building contribution estimates and other relevant information. The sales prices should be verified by someone having knowledge of the transaction.

(3) Where letter-type or brief real estate design memoranda on civil works projects are submitted, comparable sales data will be presented in one of the following methods:

(i) Be submitted within the report in a brief manner, with at least three truly comparable sales discussed in narrative form and comparisons shown to the subject lands covered by the memorandum.

(ii) Be referenced to the last real estate design memorandum issued on the same project and if values have changed in the interim, additional sales data submitted to support the changes. If the last design memorandum is over a year old, new supporting data must be submitted.

§ 644.44 Fee appraisals.

(a) Definitions and procedures. (1) The complete and unrestricted ownership of all the rights to the full use and enjoyment of a parcel of real estate is called the “fee simple estate.” An appraisal of this interest is referred to as “Fee Value.”

(2) Most fee appraisals require the use of all three of the standard appraisal approaches.

(b) Applicability. Appraisals of the fair market value of the free and clear fee title to the subject property is necessary in the greatest majority of the Corps of Engineers’ real estate responsibilities be it acquisition (full or partial), disposal, inleasing, outleasing, rentals, etc. In almost every case the monetary value of the required estate and interest is based on the fee value of the property; therefore, the Corps’ greatest appraisal requirement is for fee appraisals.

(c) Approaches. (1) It is recommended that whenever possible all three of the standard appraisal approaches, Cost-Market-Income, be used in a fee appraisal. However, if due to the type of property, is is not practical, beneficial, or necessary to use a particular approach, the appraiser is required to indicate in his report that consideration was given to its use and discuss why it was not used.

(2) In the Cost Approach it is extremely important that the appraiser document all items of costs for development, construction, utilities, etc. It also is extremely important that he fully consider all forms of depreciation such as physical deterioration, functional obsolescence, economic obsolescence, etc., and justify his methods and factors used in developing his depreciation factors.

(3) The Market Approach or Comparative method of appraisal is the most direct approach to a market value estimate and is preferred above all others. It is basically an application of the principle of substitution wherein the sales of similar type properties are analyzed to develop a price at which an equally desirable and similar property can be obtained. It involves the collection and analyzing of current sales of comparable properties and comparing these sales to the subject property. Since no two properties are identical, the appraiser must make adjustments for differences between the two. Adjustments may be by a dollar amount (per unit, per acre, or lump sum) or on a percentage basis. Full support and justification must be given for each amount. Adjustments may be shown either by a tabular analysis or by a narrative discussion.

(4) The market value of an income-producing property is quite often governed by the net income it will produce. The fair market value may be estimated by developing the expected net income and processing it into a value estimate by use of an appropriate capitalization rate. The keynote of this approach lies in the sound development of a proper rate. The appraiser must have a basic knowledge of the principle and techniques involved and must be certain that he has adequate data to develop this rate and properly process the income into a fair market value.

(5) It is most important that the valuation estimates developed by all of the approaches used are correlated into one conclusive value. In those cases where there is a substantial spread among values, the appraiser is cautioned to recheck all his data and figures for accuracy. The cost figures and
depreciation factors should be checked in the Cost Approach; the sales data should be further documented and analyzed in the Market Approach; and the Income Method may require a recheck of the soundness of the capitalization rate.

(d) Partial takings. (1) A substantial number of acquisitions require only portions of an ownership necessitating a “partial taking.” In these cases the appraiser is required to estimate the value of the whole ownership before the taking; the value of the remainder—the difference being the value of the part taken. Many times the remainder is of less value after the taking, indicating a “severance damage.” The appraiser is usually required to allocate the total taking value between the value of the part acquired and the severance damage to the remainder by reason of the taking.

(2) In order to promote uniformity in the reporting format, the following example of the “before” and “after” method is presented for guidance:

A 220-acre parcel of land is to be acquired from a 420-acre farm:

<table>
<thead>
<tr>
<th>Description</th>
<th>Value ($)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value “before” the taking ($300 p/acre)</td>
<td>$126,000</td>
</tr>
<tr>
<td>Value of remainder “after” taking ($200 p/acre)</td>
<td>40,000</td>
</tr>
<tr>
<td>Total Value of part taken, including severance</td>
<td></td>
</tr>
<tr>
<td>damage to remainder</td>
<td>$86,000</td>
</tr>
<tr>
<td>Value of 220 acres taken ($300 p/acre)</td>
<td>66,000</td>
</tr>
<tr>
<td>Severance Damage to Remainder</td>
<td>20,000</td>
</tr>
</tbody>
</table>

(3) The appraisal of the property before the taking must be a complete narrative-type appraisal containing adequate market data to support the total value. The report then must also include a full appraisal on the remainder portion of the property consisting of a full description of the residue immediately after the taking and a complete set of market data and sales other than those used in the “before” evaluation. If the remainder parcel has diminished in value as a result of the taking, the appraiser must have adequate support and justification for the reduction in value.

(4) In the case of partial takings, consideration must also be given to offsetting benefits applicable to the remaining property. A combination of legal interpretation of the law and judicial decisions with regard to such benefits must be used in determining whether offsetting benefits are applicable. Reference is made to paragraph A-9 and A-10 in the “Uniform Appraisal Standards For Federal Land Acquisitions.”

(5) Paragraph A-13 of the “Uniform Appraisal Standards” is also referenced in connection with guidance regarding “navigation servitude.”

(e) Appraisal Certificate. (1) No appraisal report will be considered acceptable without appropriate certification by the appraiser responsible for the contents of the report and the conclusion of values. The certification can be in the front or the back of the report, consistent with Division or District policy.

(2) An appropriate certification shall be substantially in accordance with the following: I certify that I have carefully examined the property described herein and that the estimates as developed in the report represent my unbiased opinion and judgment. I further certify that I have no interest, past, present or prospective, in the subject property which would affect my opinion and that the present fair market value of the (insert estate appraisal) is subject only to all the assumptions and limitations as specifically set forth. (Date and signature of appraiser.)

§ 644.45 Rental value.

(a) Definition. (1) The fair rental value of the property is the amount which, in a competitive market, a well-informed and willing lessee would pay and which a well-informed and willing lessor would accept for the temporary use and enjoyment of the property.

(2) Appraisals to establish fair rental values will be made in accordance with acceptable standards of appraisal applicable to the particular type of property and in accordance with general appraisal practices and procedures here-tofore described in relating to all appraisal work. The preparation of time-consuming and lengthy appraisal reports should be kept to a minimum, particularly with regard to rental properties of low value. A brief summary of the essential facts will be sufficient to support leases by the Government of building space or unimproved land where the net rental value is not in excess of $3,600 per annum.

(b) Applicability. All provisions of this subpart are applicable to “inleasing” of
real property for use of the Government, and equally applicable to "outleasing" of Government-owned real property. Section 644.45(l) Government Quarters, is normally applicable only to "outleasing" of quarters to civilian employees. The provisions are, however, also considered valid considerations in appraising "inleases," wherein privately-owned housing is being rented for occupancy by military personnel in lieu of quarters allowances.

(c) Services. In the absence of an agreement or contract, a lessor is not bound to furnish any utilities or building services of any kind, and such services may not be acquired under the power of eminent domain. It is, therefore, necessary for the appraiser to include in his report as separate items the estimated cost of all customary services that may be required to permit the normal use and occupancy of the property.

(d) Market value of fee. (1) Where temporary use of an entire building or other independent unit of an ownership is proposed, the appraiser will ordinarily report both the market value of the fee title and the fair annual rental value. However, no appraisal of fair market value of fee title is required in any case where assessed value, supported by statement of the assessor and ENG Form 869–R (15% Valuation Certificate), can be used for compliance with existing law, Section 322 of the Act of June 30, 1932 (40 U.S.C. 278a), known as the "Economy Act." Fee value is not required for land only leases, as the Economy Act is not applicable.

(2) An exception to the above procedure is in regard to the appraisal of family housing units. As an alternative, the appraiser can support his rental valuation by use of comparable rentals and a statement that the lease value does not exceed 15% of the fair market value.

(e) Lease of minor portions of buildings. Where appraisals are required to establish rental value of a minor portion of a building, it will not be necessary to estimate the fee value of the entire property, provided that the net annual rental does not exceed $2,000. A sound rental value can ordinarily be estimated by comparison with established rentals in subject property and in adjacent similar properties in the community. However, care should be exercised to insure the reasonableness of the reported comparable rental values. The appraiser's report must include sufficient data on these current rentals to support adequately the rental estimate for the subject space.

(f) Unexpired lease. Where the premises to be acquired are occupied by tenants under leases which cannot be terminated at will by the landlord, the appraiser's report will set forth in detail the terms of the existing leases and will show the value of the tenant's interest. The value of the tenant's interest is based on the fair rental value (economic rent) of the part of the property occupied by the tenant for the unexpired term of the lease, or for the term condemned, whichever is shorter, less the rent which the tenant is obligated to pay (contract rent) under the existing lease. The difference between the economic and contract rent is known as "bonus rent."

(g) Bonus value. Wherein a "bonus rent" is reflected as being the difference between economic and contract rent, a full narrative discussion will be included in the report. It is of paramount importance that the present economic rental be supported by the rental market data. The "bonus value" is the present worth of the discounted bonus rent.

(h) Rental appraisal report. The appraisal report will contain adequate facts and discussions relative to the following:

(1) Land description, showing street frontages and lot depths.

(2) Adequate description of improvements and furnishings, including type of construction, total floor space, floor load for storage space, number of rentable rooms, or income-producing space, nonproductive or public space, total cubic content, and reproduction cost of improvements less depreciation.

(3) Assessed valuation and lawful ratio to market value, if the annual rental value exceeds $2,000.

(4) Analysis and discussions of current rentals of similar properties and rental history of the property appraised.
§ 644.45 32 CFR Ch. V (7–1–13 Edition)

(5) Discussion of the appraisal process and rental rates applicable to the terms of the proposed lease, particularly as to any differential in the rate of return applicable to customary long term rentals.

(6) Statement showing distribution of appraised annual rental as allocated to fixed charges and fair rate of return on land, buildings, and any furnishings or equipment that are included in the proposed taking.

(i) Special purpose properties. Appraisals to estimate the rental value of hotels, clubs, hospitals, and other highly specialized properties will include full information on the income capacity of the property under average competent management and under accepted standards of operation for the particular type of property involved. The appraisal reports will, among other things, contain an analysis and discussion of the following items:

(1) Financial history of property, including indebtedness, the actual past income or earnings of the property based upon audit reports for the past five years or longer, and any unaudited current months of the fiscal year. In the absence of audits, corporate statements may be furnished if properly certified.

(2) Discussion of the past operation and management methods with comments relative to any excessive or insufficient charges appearing in the financial statements obtained.

(3) Appraiser’s estimate of the stabilized income of the property.

(4) Appraiser’s estimate of profits available for typical lessee-operator.

(5) Recommendations of the appraiser as to the relative merits of acquiring fee title to the property as against acquiring a leasehold interest.

(j) Farms and rural properties. Appraisals to estimate the rental value of farms and other types of rural properties will report the present market value of the fee title, the fair annual rental value, and any direct damage to growing crops, standing timber, or improvements to be removed or destroyed. The damage will be reported separately from the rental value in order to permit the reflection of the damage in the primary rental term.

(k) Industrial installations. (1) Appraisal reports will be obtained to support all leases of industrial installations or portions thereof. It is important that appraisals of operating industrial installations be prepared by specially qualified appraisers or consultants intimately familiar with the particular processes and production capabilities and related factors having any bearing on the value of a particular plant.

(2) The appraisers selected to estimate the rental value should be fully informed as to all known prospective lessees and the amount of any bids, or offers made for the use of the property, and as to all terms, conditions, and limitations under which the property will be made available for use or operation.

(3) The appraisal reports will include a detailed inventory setting forth all physical factors pertaining to the land, buildings, machinery, and equipment and an adequate discussion of all local factors influencing the profitable use of the facility. Data pertinent to the prevailing rentals for other Government and privately-owned industrial plants and warehouses considered reasonably similar to the facilities to be leased will also be included. The conclusions of the appraiser as to other matters of importance to the Department of the Army in its leasing operations will likewise be presented. The appraiser should bear in mind that idle manufacturing plants, and all industrial properties, as a general rule, are valuable only to the extent and degree that they are usable in actual production. It is also a generally accepted economic fact that the plant and fixed equipment (real estate) is the production factor for which a return can ordinarily be realized after the cost of all other factors in production has been provided. Military necessity has required the construction of many plants which are designed for special purposes and which may tend to defeat the ordinary approaches to the market rental value problem. In the absence of comparable rentals of similar properties or other reliable comparative guides to value for temporary use, market rental
value should be estimated with particular consideration to the following methods:

(i) *Reasonable return on estimated fair value.* For this purpose "fair value" is defined as the prudent cost of reproduction less depreciation of only that portion of the property that is readily adaptable or capable of competition with alternative properties which may be available to or constructed by the proposed lessees. Items of equipment and any portions of a plant that do not directly contribute to the specific use may be eliminated from consideration and the rental return estimated only on items and space actually adaptable for use in the proposed enterprise. The appraiser is particularly concerned with any competitive disadvantages or penalties accruing to subject property by comparison with the alternatives available to prospective users. The rental estimate should therefore be appropriately modified with respect to adequate allowances for amortization of necessary alterations to be made by the lessee. Other operating disadvantages that might tend, from the competitive viewpoint, to result in increased operating cost or other penalties that might in any way be brought forward in negotiations to establish an acceptable rental price must also be considered.

(ii) *Ratio of plant costs to productive capacity.* In many lines of industrial enterprise, it may be possible to obtain comparable operating experience ratios with reference to relation of average annual real estate costs or plant investment charges to the gross annual production. The difficulties of estimating production levels and obtaining sufficiently accurate data as to actual operating experience are fully appreciated. Suggested sources of such information are annual statements of prospective lessees or other competent authority.

(iii) *Taxes.* The appraiser will not be influenced by the fact that the Government is not presently required to pay taxes on the property.

(iv) *Savings.* When appropriate, the estimated savings in maintenance, protection, repair and restoration, if any, will be obtained by the Management and Disposal Branch from the using service or other competent authority and furnished to the appraiser preparing the appraisal report.

(l) *Government quarters.* (1) Rental schedules for Government quarters furnished to civilian employees will be supported by written appraisal reports reflecting adequate coverage of the following items:

(i) *Construction details.* Physical description of quarters will include the general grade of construction work, materials and decorations, number of rooms, floor space, porches, garages, general appearance and condition.

(ii) *Equipment and accessories:* Refrigeration, Cooking facilities, Kitchen cabinets, Closet space, Built-in conveniences, Screening, Elevators, Telephone service, Utilities, Plumbing.

(iii) *Furniture and furnishings.*

(iv) *Site conditions:* Lot size, Lot size per living unit, Access (street and road frontage), Restrictions, Land improvements (walks, driveways, shrubbery, lawns, topography, etc.), Hazards and/or amenities.

(v) *Neighborhood development and data:* Local zoning regulation, Public transportation, Schools, Shopping facilities, Recreational facilities, Supply and demand for housing, Population statistics, General trends.

(vi) *Comparable rental data.* Data will include results of a comprehensive survey of current rental rates applicable
to the most similar privately-owned housing in the nearest competitive or comparable neighborhood or community. Typical rental rates will be compiled, analyzed and tabulated, and subject properties identified and described in the same manner as prescribed above for Government quarters. The appraisal report should include a vicinity map showing location of rental units listed for comparison in relation to the location of the quarters being appraised.

(vii) Comparative relationships. The appraisal report will include a discussion of relative merits of Government quarters by comparison with private housing units. Rental rates of housing controlled by governmental agencies or subsidized by private industry will not be used as a basis for comparison.

(viii) Correlation of rental units. A discussion of basic reasoning supporting the final rental value unit for each distinctive rental bracket is imperative.

(ix) Photographs. Photographs of typical views of the quarters appraised and typical private housing units cited as comparable rentals will be included in each report.

(x) Appraisal certificate. Rental appraisal reports will not be considered acceptable without appropriate certification substantially in accordance with: “I certify that the above rental values represent my unbiased opinion of the present fair market rental value of the quarters described. I am not now a tenant residing in such quarters nor do I have any intention of becoming a tenant therein.”

(2) Reapraisals of rental quarters are required every fifth year subsequent to previous appraisal. Rental rates will be adjusted annually between appraisals by application of the Consumer Price Index (CPI) maintained by the Bureau of Labor Statistics, Department of Labor, and as further required in accordance with Transmittal Memorandum No. 2, OMB Circular A-45, revised October 30, 1974.

§ 644.46 Easements.

(a) Definition. An easement is a property right of specified use and enjoyment falling short of fee ownership. It follows that the value of an easement is less than the market value of fee title to the same portion of property (exclusive of severance damages to residual portions).

(b) Measure of value. The measure of compensation for an easement is the amount by which market value of the ownership is diminished by the imposition of the easement. This should be developed by use of the “before” and “after” method of appraisal, the difference being the value of the taking.

(c) Flowage easements. (1) The appraisal of flowage easements will not be undertaken until flood frequency surveys have been completed and approved by proper authority. The flood frequency data will be made available to the appraisers with the definite understanding that it is to be accepted as one of the controlling factors in estimating the market value of the easements. The appraiser’s certificate should be qualified to include the assumption that the frequency data is correct and that he has no responsibility therefore.

(2) The market value of fee simple title to each property over which a flowage easement is required will first be appraised in the usual manner. This estimate will be followed by appraisal of the market value of the property after imposition of the easement. The market value of the easement is then computed on the basis of the amount the market value of fee title is reduced by imposition of the easement. The appraiser will give full consideration to all factors having a bearing on the reduction in value of the parcel on which the easement is to be imposed. Each appraisal report will include complete information as to estimated flood frequency pertaining to each parcel appraised.

(3) The appraiser’s major problem in appraising tracts having considerable value is the development of his value estimate after the imposition of the easement. The market data approach to value is limited in this phase of the appraisal to index sales of land reflecting the “use adaptability” of lands to a less profitable purpose. Typical of such change in highest and best use are the conversion of row crop land and orchard land to pasture and forestry. Likewise, the cost approach to value is applicable only to land improvements
and structures to be removed or destroyed. It is, therefore, considered essential that flowage easement appraisals reflect, in adequate detail, changes in utility by the development and use of the earnings approach to value before and after imposition in all cases involving lands capable of producing income. The ratios thus developed in “before” and “after” values for income producing lands should prove to be helpful in developing appropriate ratios for nonproductive lands.

(4) In those instances where the type of land, topography, flood frequency and duration data clearly indicate that a minimal change in value (not to exceed $100) will result from exercise of the required rights, a brief appraisal is authorized. The appraisal report will contain as a minimum a complete statement of pertinent facts, including information regarding flood frequency and duration data pertaining to the property appraised. In the event condemnation is required to acquire the necessary rights, an acceptable “before” and “after” appraisal will be prepared prior to the institution of condemnation proceedings.

(5) A tract map showing each contour level of varying flood frequency will be made a part of each appraisal report. This map should facilitate review of the appraisals and serve as an aid to the negotiator in his contacts.

(d) Other easements. It is recognized that many other types of easements, i.e., road, pipeline, restrictive, borrow, transmission line, flight, spoil, etc. are to be appraised. In all instances, the measure of value is still the same, the amount by which the market value of the ownership is diminished by the imposition.

§ 644.47 Appraisal of other interests.

(a) Minerals. (1) In all cases, the value of the subsurface will be included or accounted for in the appraisal report in such manner that negotiations may be readily conducted to acquire or extinguish subsurface rights if they are outstanding in third parties or if it develops that the vendors desire to reserve them. In those instances where minerals are held separately in large blocks underlying several individual surface tracts, a statement to this effect should be included and the plan for appraising the mineral estate identified. Unless the person who is appraising the surface has had training and experience in appraising minerals, the subsurface appraisal should be made separately by an appraiser qualified to perform this service. Since the removal of certain minerals may destroy the usefulness of the surface, care should be exercised to avoid duplication of value.

(2) In the event that subsurface valuation is unfamiliar to the Division or District requiring same, HQDA (DAEN-REE) WASH DC 20314 should be contacted for advice and recommendations. Mineral valuation engineers within the Corps may be utilized on a cost reimbursable basis for furnishing gross or tract appraisals.

(b) Timber. (1) Where the land being appraised has only young trees or timber not of merchantable size, the value thereof will be included with the value of the land. If the timber is of merchantable size, a timber cruise will be made by a professional forester and the timber classified in the appraisal according to species, type, range of size, quantity, unit value, and total value. A discussion of logging, haulage, and market conditions will be given. The total value of timber shall be the amount by which the timber enhances the market value of the bare land.

(2) Extreme care must be exercised in the use of separate timber estimates for appraising timber land, so as to avoid “doubling up.” Where a timber cruise or estimate is used, comparable sales of recently timbered land should be used to support the remaining land value. Where such sales are not available, care must be utilized to extract the timber value from sales of timber land. The optimum situation would be to have sales that were also cruised; however, this does not often happen.

(c) Growing crops. (1) Crop appraisals will not ordinarily be necessary except in those cases where the Division or District has determined that possession of the cropland is necessary prior to the normal harvest period. Where the Division or District Engineer has determined that the landowner or his tenant cannot be permitted to harvest
§ 644.48  32 CFR Ch. V (7–1–13 Edition)

the crops, they will be appraised as separate property items.

(2) The crop appraisal will identify the crops by type, number of acres, estimated yield per acre taking into account all hazards, the unit value, gross market value at maturity based upon current local prices for the commodities less cost of bringing to maturity, harvest, and delivering to available markets. The expected harvest period will be reported, together with other pertinent information, in order to indicate an approximate date when the cropland may be available for construction purposes.

(d) Use of Government-owned property. (1) An appraisal will be made, when required, to justify the consideration reserved in all leases, licenses and easements, except those specifically mentioned in paragraph (d)(3) of this section. The appraisal will be made in accordance with acceptable standards applicable to the particular type of property and the use to be made thereof in the proposed grant, and in accordance with the general appraisal practices and standards heretofore outlined in this chapter. Ordinarily the appraisals of property involving substantial improvements will include, in addition to complete coverage of all factors influencing the use of the property appraised, complete information as to the following:

(i) Data of acquisition and completion of Government construction.

(ii) Complete cost data as to original purchase price and Government construction.

(iii) Detailed discussion of the predominant uses to which the property is adaptable.

(iv) Competitive position of the property with respect to availability of privately-owned properties for similar use.

(v) Estimate of market value of fee title.

(vi) Estimate of annual rental value assuming unrestricted use over a reasonable period of time.

(vii) Estimate of annual rental value under proposed Government restrictions.

(2) Time consuming and lengthy appraisal reports should be avoided in the case of low value grants involving Government-owned property. The consideration in such cases may be substantiated by a simplified appraisal report by a qualified appraiser setting forth only such facts as are required to validate his conclusions as to value. In such instances, a physical inspection of the property may be waived where the appraiser is sufficiently familiar with the property under appraisals and local market conditions to prepare a reasonable value estimate of the estate to be appraised. When a property is not physically inspected, it will be so noted in the appraisal report. The decision concerning the necessity for a physical inspection of the property and analyzing local market conditions will rest with the appraiser signing the appraisal certificate since he is personally responsible for the value conclusion developed in the appraisal report. A low value grant for the purpose of this paragraph is defined as any grant for which the fair market rental value (before applying any offset in rental for estimated savings in maintenance, protection, repair and restoration) does not exceed the following:

Easement—$500 for the term.

Lease or License—$500 per annum if granted for not more than a five-year period and is granted after advertising.

(3) The following are exempt from the above requirements:

(i) Leases for land on which to construct new credit union facilities, under long-term leases. See DOD Directive No. 1000.10 for formula.

(ii) Concession leases under Graduated Rental System.

§ 644.48  Review and approval.

(a) Procedure. (1) Upon completion of an appraisal, the signed report is to be reviewed by a reviewing appraiser to assure that the information and data developed by the appraiser substantiates the estimated valuation. The review function also serves as a means of resolving differences that might be found in two or more individual appraisals of a single property. The reviewing appraiser is also responsible for maintaining consistency in appraisals for the various properties in a project.

(2) A review of all real estate appraisals is considered of vital importance to
the successful operation of the real estate mission of the Corps of Engineers. It is essential that each and every appraisal be given an independent review and check by a thoroughly qualified reviewing appraiser. This will insure that the appraisal represents relative concurrence as to value of not less than two real estate appraisers professionally qualified by previous experience in appraising the particular type of property involved. The reviewing appraiser should familiarize himself with the property to the extent that he can adequately present and support his opinion when called upon to do so.

(3) The review action will be documented by a separate narrative memorandum signed and dated by the authorized reviewing appraiser. Such review memorandum will indicate, but not be limited to, the following:

(i) Date and nature of physical inspection of the subject property.
(ii) Statement relative to reviewer's knowledge of comparable sales used.
(iii) Reviewer's opinion as to the appraiser's valuation.
(iv) Other pertinent data, if any, relative to the property or comparable sales that the reviewer feels would lend additional credence to value estimate.
(v) Reviewer's certification of approval, disapproval, or recommendation.

(4) If more than one appraisal is obtained for an ownership, all should be reviewed by the same reviewing appraiser. The reviewer can cover all appraisals in one review memorandum, or write individual reviews.

(5) No alterations or additions will be made to a signed appraisal report by anyone other than the appraiser who signed the report. A reviewer cannot change the value reflected or approve an amount other than the appraiser's final conclusion of value. His alternative is disapproval.

(6) A reviewing appraiser may not review other appraisal reports covering a property that he has himself previously appraised. In this instance the reports must be assigned to another reviewer or be forwarded to the next level of review for appropriate action.

(7) Appraisal reports obtained by the Department of Justice and submitted for Corps review are to be treated in the same manner as those obtained by the Corps.

(b) Delegation. (1) Division Engineers have been authorized to approve or take action as appropriate on all real estate appraisal reports made for the purpose of purchase, disposal, or any use of real property in which the estimated fair market value (of the part to be acquired, if a partial taking) does not exceed $250,000, or the estimated fair market rental value does not exceed $150,000 per annum.

(2) Division Engineers have been authorized further, at their discretion, to redelegate any part of this authority, up to $150,000, to District Engineers.

(3) All appraisals exceeding $250,000 will be forwarded to HQDA (DAEN-REE) WASH DC 20314 for final review, approval, and/or appropriate action. Each report will be thoroughly reviewed at all levels, including the Project, District and Division.

(4) A copy of all those reports between $100,000 and $250,000 will be forwarded to DAEN-REE for post review and retention.

(5) In addition to those reports which exceed the delegated authority, DAEN-REE will review and take appropriate action on complex, difficult and controversial appraisals. Where more than one appraisal has been made within either of these categories, a copy of each appraisal report should be submitted for review regardless of variances in opinions of value. At times, the Division Engineers may receive specific instructions as to appraisals which may require final approval of DAEN-REE. Also, from time to time, DAEN-REE may call for and review typical appraisals prepared by individual appraisers.

(c) Reconciliation of appraisal reports. In the event that a reviewing appraiser does not agree with the value conclusion of the appraiser, the following steps should be taken:

(1) Attempt to reconcile differences with the appraiser in a face-to-face meeting. The reviewing appraiser should present his additional evidence of value to the appraiser and discuss the report weaknesses, if any.

(2) In the event reconciliation and approval are not possible, the reviewer
must then forward the report and review certificate to higher authority for resolution and request that another appraisal be obtained.

(d) Qualifications of reviewing appraisers. (1) A reviewing appraiser should have a minimum of five years experience in the field of real estate appraising. He should also have taken and successfully completed two or more appraisal courses offered by professional appraisal organizations. His experience record should indicate that he has thorough knowledge of all the standard appraisal techniques and approaches and has the ability to analyze the market and all pertinent data which affects value.

(2) Upon selection and appointment by the District Engineer of qualified staff personnel to act as reviewing appraisers, a copy of their qualifications and experience records, along with a copy of the appointing orders, will be forwarded to HQDA (DAEN-REE) WASH DC 20314.

(e) Code of ethics. Under no circumstances will an appraiser be directed to make an appraisal at any predetermined amount or to change his opinion of value on any property appraised. It is recognized that the review function will develop some differences of opinion. However, where those differences cannot be resolved on a higher ethical basis, predicated upon sound reasoning and adequate data properly analyzed and applied, an additional appraisal will be obtained.

§ 644.49 Contracts.

(a) Appraisal reports. (1) Within their contract authority, Division and District Engineers may contract with recognized appraisal firms, corporations and individuals for necessary appraisal reports on a lump sum basis. Following the award of any appraisal contract in excess of $5,000 a copy of such contract will be forwarded by the issuing office direct to HQDA (DAEN-REE) WASH DC 20314, immediately upon execution.

(2) Requests from Division and District Engineers to the Chief of Engineers for names of appraisers qualified to make particularly complex appraisals are invited.

(3) Division and District Engineers will develop and maintain current lists of qualified appraisal firms, corporations and individuals, from which contractor selection will be made. These lists should be appropriately grouped or rated in accordance with special qualifications and experience in connection with various and specific types of appraisal problems.

(4) Prior to receipt of proposals and negotiations with appraisers, a target fee (Government estimate) will be developed with due consideration to the relative skill and ability required in solving the appraisal problem, and the appraiser’s time and expense required for preparing the desired reports.

(5) In the negotiation of appraisal contracts the following items are to be considered:

(i) The appraisal of real estate is a recognized profession governed by a code of ethics prohibiting competition in obtaining appraisal assignments. All negotiations for proposals will be conducted on an individual basis, with adequately qualified appraisal firms, corporations or individuals competent to deliver the required appraisal reports on schedule.

(ii) In view of the technical nature of appraisals, Division and District Engineers shall give consideration to designating qualified member(s) of their real estate staffs as contracting officer’s representative(s) with full responsibility for all cost estimates involved in contracting for appraisal services and reports. Such contracting officer’s representative(s) may also, in the designation of the contracting officer, be utilized to conduct negotiations with the prospective contractors, serve as ordering officer pursuant to the contracts, certify invoices and act in any other capacity within their authority as contracting officer’s representative(s).

(6) A copy of the narrative, detailed record of contract negotiations will be forwarded to DAEN-REE, along with the contract as specified above.

(7) In contracting for appraisal reports, contract forms as set forth in Armed Services Procurement Regulations (ASPR) (chapter I of this title) and ER 1180–1–1 (Engineer Contract Instructions) will be used. An outline of the qualifications of the appraiser employed to perform the contemplated
services shall be included in the contract assembly.

(b) Expert appraisal services. Employment of qualified real estate appraisers and consultants may be effected utilizing the pertinent provisions of ASPR and ER 1180–1–1.

(c) Obtaining appraisal reports by purchase order. (1) Division and District Engineers are urged to utilize an authorized type of purchase order, such as DD Form 1155, in lieu of long-form contract, provided that:

(i) It is in the best interest of the Government, cost wise, not to issue the long-form contract.

(ii) The contractor has performed satisfactorily on at least one contract within the prior three fiscal years.

(iii) The total order, by such purchase orders, from the contractor does not exceed $10,000 for the project during the current fiscal year.

(iv) The order is accompanied by a brief history of negotiation signed by both the contractor and the contracting officer’s representative(s).

(2) Care should be exercised to insure that the above provisions are used only to order supplementary reports, single appraisals, and other “one-time” reports needed.

(d) Department of Justice consultation. Authorized local representatives of the Department of Justice will be consulted concerning the acceptability of the appraiser(s) prior to negotiating any appraisal contract covering tracts proposed for acquisition. The local representative must also approve the per diem fee to be utilized in the appraisal contract. Where agreement cannot be reached between the Division or District Engineer and the local representative of the Department of Justice as to the selection of the appraiser(s), a complete report will be submitted to DAEN-REE, for resolution with the Attorney General.

(e) Interdepartmental services. Division Engineers are authorized to arrange for interdepartmental services of qualified specialists in the regular employ of other Government agencies in connection with special problems concerning mineral deposits, water rights, timber cruises, etc. Division Engineers are further authorized, in their discretion, to redelegate this authority or any part thereof to District Engineers.

Subpart C—Acquisition

PROCUREMENT OF TITLE EVIDENCE, TITLE CLEARANCE, AND CLOSINGS

§ 644.61 General.

(a) Purpose. Sections 644.61 through 644.72 describe the procedures relating to the procurement of title evidence, title clearance, and closings for the acquisition of real estate and interests therein for all land acquisition programs administered by the Chief of Engineers. Exceptions in connection with the acquisition of properties under the Homeowners Assistance Program are set forth in subpart E.

(b) Applicability. These sections are applicable to all Division and District Engineers having real estate responsibility.

(c) Guidelines. (1) The satisfactory progress of land acquisition programs necessitates the prompt procurement of title evidence and prompt title clearance. One of the following types of title evidence should be obtained, after considering the cost of the several types and other factors mentioned below. To effect these objectives, careful planning is essential, including a determination of the most acceptable and available type of title evidence and the source from which such title evidence may be procured. The Chief of Engineers is responsible for procuring all title evidence, including title evidence needed for lands which are acquired by condemnation proceedings. The early procurement and examination of the title evidence and title clearance will expedite payment to landowners from whom offers are obtained or against whom condemnation proceedings are filed.

(2) Insured certificates of title or policies of title insurance shall be obtained wherever possible. This is on the theory that the Government is buying title searching service as well as the title evidence itself and is avoiding the time and cost of examining abstracts of title, generally voluminous in nature.

(3) Where it is not possible to obtain certificates of title or title insurance,
abstracts of title may be obtained, as a last resort.

(4) As used in these sections, an abstract of title is a synopsis or digest of all instruments of record affecting the title to a specific parcel of land. It neither guarantees nor insures the title. A certificate of title is a contract whereby a title company certifies that title to a specific parcel of land is good and unencumbered of record in a named person excepting only such defects and encumbrances as are shown therein. The liability of the company is limited to an amount specified in the certificate. A title insurance policy is a contract which insures that the owner or mortgagee will not suffer any loss or damage by reason of defects in the title to the property, or liens or encumbrances thereon existing at the date of the policy, except those defects, liens, or encumbrances which the policy specifically excepts. Liability thereunder is not limited to matters of record but extends to matters beyond the record.

(5) The Directory of the American Land Title Association may be obtained upon request to the Association at 1828 L Street, NW., Washington, DC 20036, or to any major title insurance company. This Directory lists, by States, the abstract and title companies which provide title insurance. These companies are acceptable to the Attorney General. Requests for furnishing title certificates or title insurance should be made to the major title insurance companies in addition to local abstractors and title companies.

(6) From past experience, it is considered that the procurement of certificates of title or title insurance is more economical than abstracts of title and the use of these types of title evidence expedites payment to landowners. In the majority of the States either certificates of title or title insurance are obtainable and the premium for issuance of such certificates or policies is based on a schedule of fees approved by the State Insurance Commission or some similar State agency. The premium fixed by such schedules, in most cases, includes the charge for title examination (preliminary certificate of title or preliminary binders) and the charge for insurance (final certificates of title or title guarantee policy) and any variance from the prescribed fees is considered a violation of the State law or regulation. Most State Insurance Commissions have recognized and approved the forms of certificates of title and title insurance policies prescribed by the Attorney General and have authorized their use in lieu of owners’ policies. Division and District Engineers should familiarize themselves with the State title insurance laws and regulations. If prices quoted by all possible sources seem exorbitant, the matter should be referred to HQDA (DAEN-REA-P) WASH DC 20314 for action.

§ 644.62 Title evidence.

(a) Acceptable Types of Title Evidence.

(1) Certificates of title are acceptable title evidence. Certificates of title must be in a form acceptable to the Attorney General. An acceptable form of certificate of title which has been approved by the Attorney General has been issued by the Chief of Engineers as ENG Form 903, Certificate of Title.

(i) In contracting for certificates of title, ENG Form 1016, Specifications for Furnishing and Delivering Certificates of Title Owner’s Title Guarantee (Insurance) Policies and Continuations Thereof, will be used.

(ii) Any title or abstract company approved by the Department of Justice and authorized and qualified to issue certificates of title in the State where the land is located will be acceptable to furnish certificates of title (Department of Justice “Standards for the Preparation of Title Evidence in Land Acquisitions by the United States, 1970.”) In those few jurisdictions where bar associations or other public or professional bodies hold that the issuance of certificates of title is the issuance of title opinions and therefore the practice of law and where title companies as corporations cannot engage in the practice of law, insured certificates of title may be procured from attorneys, acceptable to the Lands Division of the Department of Justice, acting as agents for title companies. The procedure for the selection of attorneys is set forth in §644.63(b).

(iii) Certificates of title will be based on a search of all records affecting the title to the land and be unqualified as
Department of the Army, DoD § 644.62

§ 644.62

to the period of search. In the event that it is not practicable to obtain certificates of title, unqualified as to the period of search, all pertinent facts will be referred to the Department of Justice for consideration and approval.

(iv) Certificates of title or title insurance policies shall not limit the liability of the title company to a sum less than 50 percent of the reasonable value of the property. If property is acquired by donation or exchange, the value will be determined by the Corps of Engineers. However, as to acquisitions valued at more than $50,000, the liability of the title company may be limited to 50 percent of the first $50,000 and 25 percent of that portion of the value in excess of that amount. This limitation on the general rule has been approved by the Department of Justice. The appropriate ENG Forms for specifications for supplying title evidence may be amended, if that limited liability can be obtained. A certificate of title or title insurance policy by one title company for a single acquisition valued at more than 25 percent of the admitted assets (after deducting existing liabilities secured or unsecured and excluding any trust or escrow funds) of the issuing company is not acceptable.

(v) Generally, it is not necessary to obtain a final certificate of title when land is acquired by condemnation proceedings. However, it may be necessary that an intermediate certificate of title be obtained setting forth the limitation of liability of the title company. Division and District Engineers will be governed by the requirements of the local United States Attorney as to the necessity of obtaining an intermediate or final certificate of title.

(vi) Certificates of title, whether preliminary, intermediate, or final, will be procured in sufficient numbers to satisfy the needs of the District involved. Normally an original and two signed copies of each certificate of title will suffice.

(vii) The specifications may be supplemented to require the title company to have a local representative available to perform preclosing interim title searches on request of the Contracting Officer.

(viii) The title company’s local representative must be authorized to pass on the sufficiency of the proposed deed to the United States; to give final approval of curative material furnished to satisfy title objections set forth in certificates of title; and to testify in court relative to the status of title, if called upon to do so.

(2) Title guarantee or title insurance policies are acceptable title evidence.

(i) Interim binders on owner’s title guarantee or title insurance policies supplemented by an owner’s title guarantee policy or title insurance policy in the forms approved by the Attorney General (ENG Form 1014), Interim Binder on Owner’s Title Guarantee (Insurance) Policy, and ENG Form 1015, Owner’s Title Guarantee (Insurance) Policy will be acceptable as evidence of title only in acquisition in those States where certificates of title may not be issued. ENG Form 3893–R is the form of endorsement for use with the title insurance policies when changes or corrections become necessary. No other substantial variation in the form of interim binder or the form of title guarantee or title insurance policy will be acceptable without prior approval of the Attorney General.

(ii) Companies contracting to issue such interim binders or preliminary reports and title guarantee or title insurance policies must have authority under the laws of the State of their incorporation and their charter to issue the same. They must also be financially sound and be willing and able to issue such binders and policies for all tracts for the amount of liability as set forth above.

(iii) In contracting for title guarantee or title insurance policies, ENG Form 1016, Specifications for Furnishing and Delivering Certificate of Title Owner’s Title Guarantee (Insurance) Policies and Continuations Thereof, will be used.

(iv) The interim binder or preliminary report must disclose the title holders of record and contain full information on all matters set forth in the binder as affecting the title. This data
must be in sufficient detail to enable an attorney examining the report to determine the nature and extent of such matters and their effect on the validity of the title of the land described therein. The contents of the report must meet the requirements of ENG Form 1016.

(v) The provisions of paragraphs (a)(1) (iv), (v), (vi), (vii) and (viii) of this section also apply to title guarantee or title insurance policies.

(3) Abstracts of title may be acceptable title evidence.

(i) Abstracts if title complying with the rules for abstracts in “Standards for the Preparation of Title Evidence in Land Acquisitions by the United States” issued by the Department of Justice, 1970, are acceptable title evidence if prepared by abstractors acceptable to the Attorney General. These may include abstractors employed by a department or agency of the Government. Corps of Engineers personnel generally will not prepare abstracts of title. However, where there is a comparatively small amount of abstract work to be performed, it may be desirable to have the abstracts prepared by qualified Government personnel. In such cases, the prior approval of the Chief of Engineers will be obtained. The request should justify the preparation of abstracts by Government personnel.

(ii) The form and contents of abstracts of title will meet the requirements in the “Standards for the Preparation of Title Evidence in Land Acquisitions by the United States” (Department of Justice, 1970) and ENG Form 1012, Specifications for Furnishing and Delivering Abstracts of Title.

(iii) The period of search of an abstract of title to be acceptable to the Attorney General will, wherever possible, begin with some undisputed source of title such as an original grant or patent from the sovereign. Where it is impossible or impracticable to begin with such grant or patent, refer to “Standards for the Preparation of Title Evidence in Land Acquisitions by the United States” (Department of Justice, 1970) and ENG Form 1012 for guidance.

(iv) In contracting for abstracts of title, ENG Form 1012 will be used. ENG Form 1012 provides for an unlimited period of search. For the purpose of conserving Government funds and in applicable easement acquisitions, Division and District Engineers are authorized to modify ENG Form 1012 to provide for the minimum period of search allowable under the regulations of the Department of Justice, when deemed to be to the best interest of the Government.

(4) Where the consideration to be paid by the Government is $1,000 or less, acquisition in fee may be based upon a title search by a staff attorney when it is deemed to be in the best interest of the Government. The Preliminary Certificate of Title, ENG Form 909, shall be based upon a search of the local land records beginning with a deed or other instrument transferring title recorded at least 40 years prior to the date of the preliminary certificate. The Final Certificate of Title on ENG Form 1013, shall be executed by a qualified Corps of Engineers’ attorney, preferably the same attorney who executed the preliminary certificate, and shall be based on a further search of the local land records from the date of the preliminary certificate to and including the date and time of recordation of the deed to the United States or to the date title passes in a condemnation proceeding. The attorney preparing such preliminary or final certificate of title shall also prepare an Abstract of Title evidencing the results of his search of the records. The Certificate of Title will set forth in detail all liens, encumbrances, outstanding interests and other estates adversely affecting the title.

(b) Easements. The standards and requirements as to title evidence for fee acquisition, set forth above, will be observed in the acquisition of all easements, except as follows:

(1) Preliminary certificates of title of approved title companies for easement acquisitions will be in the same form approved by the Attorney General for fee acquisitions and issued by the Chief of Engineers as ENG Form 903. Final certificates of title in easement acquisitions, however, must show title to the easement vested in the United States in the same land described in the certificate and the deed to the
United States. A form of final certificate of title for easements approved by the Attorney General and issued by the Chief of Engineers as ENG Form 1017, Final Certificate of Title for Easements, will be used in easement acquisitions.

(2) In contracting for certificates of title to easements, ENG Form 1016, Specifications for Furnishing and Delivering Certificates of Title, Owner’s Title Guarantee (Insurance) Policies and Continuations Thereof, may be used provided the following paragraph is substituted in the detailed specifications: “Each certificate of title shall be executed in triplicate on legal size paper. Preliminary certificates of title shall be in the form attached hereto, ENG Form 903, and final certificates of title for easements, showing title vested in the United States, shall be in the form attached hereto, ENG Form 1017.”

(3) In jurisdictions where it is not possible to obtain certificates of title commercially, title guarantee (insurance) policies may be obtained. In such cases, appropriate adjustment in forms and specifications will be made, comparable to those prescribed for certificates of title to easements above.

(4) For easements costing more than $100 but not in excess of $5,000, the requirements of the Attorney General have been waived. In such cases, it is acceptable to use certificates of title prepared and executed by a qualified Corps of Engineers’ attorney. The Preliminary Certificate of Title, ENG Form 909, shall be based upon a search of the local land records beginning with a deed or other instrument transferring title recorded at least 25 years prior to the date of the preliminary certificate. The Final Certificate of Title on ENG Form 1013, shall be executed by a qualified Corps of Engineers’ attorney, preferably the same attorney who executed the preliminary certificate, and shall be based on a further search of the local land records from the date of the preliminary certificate to and including the date and time of recordation of the deed to the United States or to the date title passes in a condemnation proceeding. The attorney preparing such preliminary or final certificate of title shall also prepare an Abstract of Title evidencing the results of his search of the records. The Certificate of Title will set forth in detail all liens, encumbrances, outstanding interests and other estates adversely affecting the title.

(5) As to easements which cost $100 or less, acquisition shall be in accordance with the provisions of paragraph (5) on page 5 of “Standards for the Preparation of Title Evidence in Land Acquisitions by the United States” (Department of Justice, 1970) which permit such acquisition to be based on a last owner search. Any search authorized by these provisions may be conducted by a qualified attorney employed by the Corps of Engineers.

§ 644.63 Contracting for title evidence.

(a) Survey of area and source of title evidence. Contemporaneously with the preparation of the real estate design memorandum, or real estate planning report, the Division or District Engineer is requested to:

(1) Give careful consideration to the problems involved to determine the most acceptable type of title evidence, its source, availability of title plants, costs, and time of procurement, so that the most advantageous bid(s) may be received and accepted and the acquisition schedule maintained. In considering costs of abstracts of title versus certificates of title or title insurance, the workhours involved in the examination of abstracts of title by both Corps and Department of Justice personnel should be considered.

(2) Determine the total number of tracks in the project area. In major projects, it may be desirable to invite bids for title evidence for each county or other specified areas, in addition to the entire project, in order to maintain the acquisition schedule.

(3) Determine the names and addresses of title companies and abstractors available to furnish title evidence and whether such companies or abstractors have been approved by the Attorney General as acceptable companies or abstractors. Current information on approved title companies and abstractors may be obtained direct from the Land and Natural Resources Division, Department of Justice, WASH DC 20530.
§644.63
32 CFR Ch. V (7–1–13 Edition)

title evidence services will be based upon formal advertising in accordance with the Armed Services Procurement Regulation (ASPR) (chapter I of this title).

(2) In those States where the furnishing of title evidence is held to constitute the practice of law and the State canons of legal ethics prohibit attorneys from engaging in competitive bidding for such services, contracts for title evidence services must necessarily be negotiated. In such cases, negotiations shall be conducted with attorneys or law firms duly authorized to practice law in the jurisdiction within which the real property is located. Division and District Engineers shall notify HQDA (DAEN-REA-P) WASH DC 20314 before negotiating for title evidence, and submit the list of attorneys with whom negotiations may be conducted. Selections shall be in accordance with the procedures set forth below:

(i) A contract for title services shall be based upon, but not limited to, consideration of the following professional qualifications necessary for the satisfactory performance of the services required:

(A) Professionally trained for type of work;
(B) Specialized experience in the type of work required;
(C) Capacity to accomplish the work in the required time;
(D) Past experience, if any, with respect to performance on Corps of Engineers contracts;
(E) Location in the general geographical area of the project to which the services relate: Provided, That there is an appropriate number of qualified attorneys or law firms therein for consideration; and
(F) Volume of work previously awarded, with the objective of effecting an equitable distribution of title evidence contracts among qualified attorneys and law firms.

(ii) A preselection list of qualified attorneys and law firms shall be prepared by a preselection board from data submitted by interested attorneys and law firms and from other pertinent information which may be available. The list shall be approved by the District Engineer or his designee.

(iii) A selection board shall review the qualifications of each of the attorneys or law firms on the preselection list, in accordance with the procedure established in paragraph (b)(2)(i) of this section and shall recommend to the District Engineer, in order of preference, a minimum of three for approval for contract negotiations.

(iv) Upon approval of the selections by the District Engineer and such approval as may be required by paragraph (b)(2)(vi) of this section, negotiations shall be initiated with the first selected attorney or law firm. If the negotiations result in a price which exceeds the Government estimate, revised to correct errors of fact or judgment, if any, by more than ten percent, the Contracting Officer shall terminate the negotiations and request a proposal from the attorney or law firm next in order of preference.

(v) Preparation of preselection lists and selections for contracts estimated to cost more than $10,000, shall be accomplished by formally constituted boards consisting of at least three members, one of whom shall be the District Counsel or an attorney on his staff, and one of whom shall be the Chief, Real Estate Division, or a member of his staff.

(vi) Special approval shall be required for certain selections as indicated below:

(A) When the estimated cost of a contract to be negotiated exceeds $100,000, the selection shall require the approval of the Division Engineer.
(B) When an attorney or law firm, to which the District has awarded contracts totalling over $100,000 during the current fiscal year, has been selected by the District for additional negotiations, the selection shall require the approval of the Division Engineer.
(C) When the estimated cost of a contract to be negotiated exceeds $200,000, the selection shall require the approval of the Director of Real Estate, OCE, or his designee, with the concurrence of the Chief Counsel or his designee.

(c) Forms to be used. When purchasing title evidence, Standard Form 33, Solicitation, Offer, and Award, which form embraces an invitation, bid, and acceptance, should be used with copies of ENG Form 1012 or ENG Form 1016.
depending upon the type of title evidence to be obtained. Standard Form 33 will state that time is of the essence; that ability to comply with delivery requirements is mandatory; that the specifications attached thereto constitute a part of the proposed contract; the quantity and description of the supplies by item to be furnished; the time, place, and method of delivery; and the primary period of contract and extensions. Bids must be submitted in the form required by the invitations for the bids, so that the successful bid can be accepted on Standard Form 33 and a formal contract consummated thereby. The contract must incorporate all the covenants, terms, and conditions which are contemplated.

(d) Base price vs. per-item basis. The invitation will call for the furnishing of an approximate number of certificates of title, abstracts of title, or preliminary binders and title guarantee (insurance) policies, as the case may be, at a stated price per certificate of title, abstract, or preliminary binder and title guarantee (insurance) policy. If this basis of payment is not possible, payment for abstracts may be made on a per-item or per-page basis and certificates of title and interim binders and title guarantee (insurance) policies may be paid for in accordance with an established rate schedule based on the cost of the property. Where necessary, alterations in the payment paragraphs of the specifications may be made in order to comply with local practices, State statutes, or other special requirements.

(e) Specifications. The specifications for title service will follow ENG Form 1012 for abstracts, ENG Form 1016 for certificates of title and ENG Form 1014 for interim binders on owner’s title guarantee (insurance) policies. Additional provisions may be added as circumstances require, but basic requirements will not be changed.

(f) Several contracts for title evidence. To meet the acquisition schedule, it may be necessary to enter into several contracts for title evidence to lands within a designated project area. In such cases, the portions of the projects to be covered by each contract will be defined according to established political subdivisions, such as districts, townships, counties, or any specified part thereof.

§ 644.64 Award of contracts.

(a) Contract awards. Contract awards will be made only by duly qualified contracting officers in accordance with applicable procurement regulations.

(b) Review of title evidence contracts. The Contracting Officer, if an employee of the Real Estate Division, or otherwise the Real Estate representative designated by the Division or District Engineer, will review contracts for title evidence. If this review is made by a Real Estate employee other than a Contracting Officer, he will advise the Contracting Officer relative thereto. The Contracting Officer or the Real Estate representative will ascertain that the Department of Justice has approved the bidder, and the contract will not be awarded to any bidder not so approved. The Contracting Officer or the Real Estate representative who is to advise him, will familiarize himself with “Standards for the Preparation of Title Evidence in Land Acquisitions by the United States,” issued by the Department of Justice, 1970.

(c) Distribution. Upon acceptance, copies of title evidence contracts will be distributed in the same manner as other contracts.

§ 644.65 Ordering title evidence.

(a) Placing orders. Where the contract does not specify the order in which title evidence for particular tracts will be furnished, orders will be submitted to the abstractor or title company on ENG Form 1011, Order for Title Evidence. An accurate legal description of the tract of land involved will be attached to the order or will be typed thereon.

(b) Orders based on contiguous areas. If the contract does not contain a list of tracts for which title evidence is to be furnished, orders will be based on contiguous areas of land in identical ownership and will be deemed to be contiguous even though crossed by roads, railroads, rights-of-way, or streams. In such event the variation in quantity shall not exceed plus or minus ten percent as prescribed by ASPR. If there has been a severance of surface and subsurface estates, determination of
what constitutes a tract will be based on ownership of the surface. However, in unusual cases where such a contiguous area is composed of several parcels derived through separate chains of title and requiring separate searches of each chain of title down to a comparatively recent date or where such contiguous area lies in more than one section, the Contracting Officer may contract to pay a specified reasonable additional charge for each such additional chain or section if such additional charge is customary in the locality where the land lies.

(c) Type of title evidence. The order will set forth the type of evidence to be furnished. When abstracts are contracted for, the following rules will be observed:

1. If an abstract of title in satisfactory form cannot be procured from the landowner, a new abstract will be ordered.
2. If an abstract in satisfactory form is procured from a landowner, the abstract will be transmitted to the abstractor with an order for a continuation of the old abstract.

§ 644.66 Payment for title services.

(a) Approval. The Contracting Officer will approve payment for all title evidence obtained in connection with the acquisition of land from funds available to the Division or District Engineer for that purpose, whether the land is acquired by purchase or condemnation.

(b) Review. When abstracts are furnished on a per-item or per-page basis, the contents must be carefully reviewed by a qualified representative of the Division or District Engineer, to insure that bills are not excessive and that abstracts do not include superfluous material. Where erroneous or superfluous material is included in abstract, the bills involved will be corrected so that payment for such material is not made. All title evidence will be examined to determine that there has been full compliance with the specifications.

(c) Payment for title evidence. Payments for title evidence will be made by the Contracting Officer from available funds for the project to which the title evidence pertains, upon receipt of certified and approved vouchers.

(d) Preparation of Invoices for Title Services. The abstractor or title company will submit a certified invoice for services rendered, to the office to which the title evidence was delivered for review. The invoice must specify the particular type of title evidence furnished, the tract number, name of owner, name of project, and contract number. Invoices found to be correct will be certified as to receipt of the services by the receiving office and will be transmitted to the Division or District Engineer for further action and payment.

§ 644.67 Approval of Title by the Attorney General.

(a) General. Section 355 of the Revised Statutes of the United States, as amended (40 U.S.C. 255), formerly required the written opinion of the Attorney General in favor of the validity of the title to lands as a prerequisite to the expenditure of public funds thereon.

(b) Delegation. Pursuant to the provisions of Pub. L. 91–393, approved September 1, 1970, authority to approve title to lands being acquired for the use of the Department of the Army, or of any other department or agency for which the Department of the Army is authorized to acquire land, has been delegated to the Department of the Army, subject to the supervision and review of the Attorney General. Generally, military authorization and/or appropriation legislation expressly authorizes construction on the land prior to approval of title.

(c) Redelegation. The authority delegated to the Department of the Army pursuant to Pub. L. 91–393 has been redelegated to Division and District Engineers with real estate responsibility.

(d) Issuance of title opinions. Division and District Engineers are authorized to designate staff attorneys to give written approval of the sufficiency of title to land for the purposes for which the property is being acquired. Such attorneys shall issue preliminary and/or final opinions of title.

1. Attorneys designated for such purposes will have as a minimum five years legal experience, from the date of
admission to a State bar, including three years experience in the law of real property. Real estate attorneys on the staffs of Division and District Engineers, who possess these qualifications, will be designated by the Division and District Engineers, in writing, to pass on the sufficiency of title to lands pursuant to the said delegation. The names of such attorneys shall be furnished to HQDA (DAEN-REA-P) WASH DC 20314 as soon as possible.

(2) A final opinion of title shall be issued in all acquisitions, except for easement acquisitions not in excess of $1,000 which are governed by § 644.69(b).

(3) Division and District Engineers are authorized to waive the issuance of written preliminary opinions of title where the closing of the case is based upon a certificate of title or title insurance issued by an acceptable and approved title company, in either fee or easement acquisitions.

(4) A preliminary and a final opinion of title shall be issued in all acquisitions involving abstracts of title, except for easement acquisitions not in excess of $1,000 which are governed by § 644.69(b).

(5) Any final title opinion issued pursuant to the delegated authority shall substantially follow the format of the Attorney’s Final Title Opinion (Figure 5–3 of ER 405–1–12).

(e) Opinion of Attorney General. Whenever the District or Division Engineer determines that a title defect is of such character that a possibility exists that it may be waived, the case shall be submitted to HQDA (DAEN-REA-P) WASH DC 20314 for review and transmittal to the Attorney General for a title opinion. The letter of submittal shall contain or be accompanied by the information and data required by §644.72(b).

(f) Rejection opinion. If it is obvious that no possibility of waiver of a title defect exists, a title opinion shall be issued according to the procedure set forth in §644.67(d). Copies of such opinion shall be submitted with the condemnation assembly.

§ 644.68 Title Clearance—Certificate of Title and Title Insurance.

(a) Curative action. Upon receipt of an acceptable certificate of title, ENG Form 903 or an interim binder on an owner’s title guarantee or insurance policy, ENG Form 1014, the title evidence will be reviewed by a qualified real estate attorney of the Corps of Engineers. Where the title evidence indicates that the acquisition of the land or interest therein by purchase is feasible, and a satisfactory ENG Form 42, Offer to Sell Real Property, or ENG Form 2970, Offer to Sell Easement, is received from the landowner and accepted by the Government, curative action will be conducted and curative material will be processed as follows:

1. With regard to the title objections set forth in Schedule “B” of certificates of title or interim binders, it will be necessary to take such curative action as will insure the issuance of a final certificate of title or title guarantee or insurance policy showing title vested in the United States of America, subject only to those objections, if any, which have been administratively waived.

2. As set forth in the title contract, the title company will authorize its local representative to give final approval of curative material furnished to satisfy such objections and insure their elimination from the final certificate of title or title guarantee or insurance policy. As such curative material is approved, the local representative of the title company will:

(i) Initial, or otherwise indicate, on the margin of the preliminary certificate or interim binder, the fact that the objection has been eliminated through the procurement of satisfactory curative material.

(ii) Determine whether or not he wishes the curative instrument recorded and if the instrument is to be recorded, so indicate on the margin of the certificate or interim binder. By the express terms of the offer to sell, the vendor is responsible for payment of recording fees on such curative material.

(iii) Where curative material is not recorded, the title company will be permitted to retain such material if they wish it for their files; otherwise, it will be placed with the title assembly. If the original curative instruments are retained by the title company, true copies will be transmitted with the
Final Title Assembly to HQDA (DAEN-REA-P) WASH DC 20314.

(b) Intermediate certificates or interim binders. In the following types of cases, it may be necessary, after examination of the preliminary certificates of title or interim binder, to obtain intermediate certificates of title or interim binders in order to perfect title prior to closing the transaction:

(1) When the signer of the offer is not the record title holder but is the holder of a contract for purchase, recorded or unrecorded, the preliminary certificate of title or interim binder will show title in the record title holder. In such cases, the certificate or binder will make appropriate reference to the contract. It will recite the action necessary to complete the contract and effect transfer of title from the record holder to the contract purchaser. When the deed to the contract purchaser is recorded, an intermediate certificate of title or interim binder, in proper form, will be obtained.

(2) In those cases in which record title is vested in a deceased person, the preliminary certificate of title or interim binder may be issued in the name of the deceased record owner, followed by the word “deceased,” and will be accompanied by a letter from the title company stating whether a judicial proceeding will be required, or whether affidavits of heirship, or other forms of proof, will suffice to permit the issuance of intermediate certificate or binder showing title vested in the heirs of the deceased.

(i) Where a judicial proceeding is required, action will immediately be taken by the owners to perfect title by such proceeding, and, upon completion, an intermediate certificate of title or interim binder should be obtained. If such action cannot be completed within 60 days, action will be taken to acquire the tract by condemnation, §644.72(a).

(ii) Where a judicial proceeding is not required, it will be necessary to effect the necessary curative action and obtain an intermediate certificate or interim binder showing title in the heirs of the deceased record owners.

(3) In those cases in which conveyance to the United States is to be made by a fiduciary, a corporation, a political subdivision, or an unincorporated association, the certificate of title or interim binder will state whether the proposed grantor has legal authority to convey valid title to the United States, and, if so, will cite the source of the authority. If the preliminary certificate of title or interim binder does not so indicate, it will be returned to the title company for correction or for issuance of an intermediate certificate of title or interim binder.

(4) Where the certificate of title or interim binder contains any objection, or reference to liens of taxes, assessments, bonds, or other indebtedness of a road improvement, school, drainage, or other type of special improvement district, the specifications provide that the certificate or interim binder will also contain reference to the statute or statutes, under which the district was created, its bonds issued, and its taxes levied; the amount of taxes and assessments levied and bonds issued; and other additional pertinent information. If the preliminary certificate or interim binder does not contain sufficient information to enable an examining attorney to determine the nature and extent of the lien, if any, on the land, of such taxes, assessments and bonds, it will be returned to the title company for correction or for issuance of an intermediate certificate of title or interim binder. If the preliminary certificate or interim binder does not clearly indicate that the bonds or taxes of such district become a lien annually at the same time as the lien of ad valorem taxes attaches to land in the State and that the lien is of the same nature as the lien of ad valorem taxes, the information specified above must be obtained and a determination must be made as to the nature and extent of the liens of such bonds and taxes.

(5) Where the certificate of title or interim binder discloses a covenant or condition restricting the use of the land, the certificate or interim binder will set forth the restriction, will quote the provision imposing the restriction or creating the right of reverter for a breach thereof, and will state whether a release will eliminate the objection. If such information is not contained in the preliminary certificate of title or interim binder, it will be returned to
the title company for correction or for issuance of an intermediate certificate of title or interim binder. If a release will eliminate the objection, action will be taken to obtain an appropriate release from the person or persons holding the right of reverter. Should the title company hold that the title cannot be perfected by a release or if an acceptable release cannot be obtained, action will be taken to acquire the tract by condemnation.

(6) When the specifications require the title company to include any of the above information in the preliminary certificate of title or interim binder and it is necessary to obtain an intermediate certificate of title or interim binder due to the omission of such information from the preliminary report by the title company, the intermediate certificate of title or interim binder will be furnished without cost to the United States.

(c) Question of law. Any difficult or complicated question of law raised by an objection or exception in a preliminary or intermediate certificate of title or interim binder should be submitted to HQDA (DAEN-REA-P) WASH DC 20314 for review and transmittal to the Attorney General for an opinion. The letter of submittal shall contain a full statement of the facts and references to the provisions of applicable statutes and pertinent decisions of state courts on the question involved. This action should be taken before closing. This action should also be taken on questions involving the nature and extent of the liens of bonded indebtedness, assessments, or taxes to meet the bonded indebtedness of special Improvement districts, or relating to restrictive covenants.

§ 644.69 Title Clearance—Easements.

(a) Easements Costing in Excess of $1,000. Curative action and clearance of title to easements costing in excess of $1,000 will be the same as in fee acquisitions, as outlined above, except as follows:

(1) Under an agreement with the Department of Justice, title to easements will be approved subject to outstanding encumbrances, such as mortgages, deeds of trust, judgments, and vendors’ liens, where the tract is not encumbered in excess of 50 percent of the reasonable value of the remaining property, and the consideration being paid for the easement does not represent a sum in excess of ten percent of the value of the remaining property. (As to taxes, see §644.70(k)(6).)

(2) For the purpose of making the determinations necessary to apply the formula set forth in paragraph (a)(1) of this section, resort may be had to the tract appraisal, provided it is based on a “before and after” approach, in which the amount of the “after” appraisal will be used as the reasonable value of the remaining property. In the event no such appraisal has been made, a memorandum estimate by a qualified appraiser (staff or contract) will be obtained. Determination of the total encumbrances may be made on the basis of the face of the encumbering instruments. However, if it is necessary to determine that the total amount of the outstanding liens as of the date of closing has been reduced to an amount less than 50 percent of the reasonable value of the remaining property, such reduction must be evidenced by signed statements from the lienees or their authorized representatives. The appraisal or memorandum estimate and the lienee statements will be placed in the tract file.

(3) On the basis of the determinations described in paragraph (a)(2) of this section, the appropriate information will be inserted on ENG Form 3536, Statement Concerning Outstanding Encumbrances, which will be signed by the closing agent. The original will appear as a separate document in the Final Title Assembly submitted to HQDA (DAEN-REA-P) WASH DC 20314.

(b) Easements Costing Not in Excess of $1,000. (1) Requirements for the release or subordination to such easements of mortgages, deeds of trust, judgments, vendors’ liens, taxes which are a lien, whether or not presently due and payable, and similar encumbrances will ordinarily be the same as for easements costing in excess of $1,000.

(2) In unusual circumstances, these requirements need not be applied if the purchase price of the easement is insufficient to satisfy the liens and interest, or the amount of such liens or interest is small in comparison with the value
§ 644.70 Closing of cases.

(a) Closing and Settlement Officers. Payment and closing of cases will be initiated immediately upon completion of curative action, by qualified Closing Officers employed by the Corps of Engineers. To be qualified, a Closing Officer must be employed in the Real Estate Division of a Division or District Office, or in a Real Estate Project or Suboffice, in an Attorney-Advisor position, or in a Realty Officer position if he is a member in good standing of the Bar of a State, Possession, or the District of Columbia, and has been instructed in Federal procedure and in the requirements for closing land acquisition transactions by a Division or District Closing Officer and has been approved by the Division or District Engineer to close land acquisition transactions independently. It is no longer necessary for Closing Officers to be individually bonded. Contracting for closing services will require prior approval of HQDA (DAEN-REA-P).

(b) Payment. Payment for land, or interests therein, will be made from funds available to the Division or District Engineer.

(c) General. The details of the closing necessarily differ according to the number of vendors and the outstanding interests, the number and variety of the encumbrances and title objections to be met, and miscellaneous other details resulting from complications in the particular title. Upon receipt of the check and title papers, the Closing Officer will review the entire file relating to the acquisition, fully acquaint himself with the terms and conditions of the sale, and with the condition of the title, and will ascertain whether there are any special conditions to be performed, or requirements to be met, on the part of the landowner or the Government and what objections to the title are to be eliminated before valid title may vest in the United States.

(d) Curative data. The Closing Officer will determine the character and amount of all outstanding interests in, liens on, or claims against the land, which are to be satisfied out of the purchase price, and see that necessary curative action has been taken and curative data obtained to cure all defects in and meet all objections to the title. If the title evidence consists of a certificate of title of a title company, or a title guarantee policy, approval of the curative material, obtained to eliminate the title objections, must be obtained from the title company.
Continuation of title search. The Closing Officer will satisfy himself that no change has occurred in the land records from the date of the prior certification which will adversely affect the title to the real estate interest being acquired by the United States. Where deemed appropriate because of the complexities of the title, the amount of the purchase price, or other reason, the local representative of the title company or the abstracter will be requested to examine the title records for the purpose of making this determination, and a continuation of the title evidence should be obtained, if considered necessary. Otherwise, the interim title search may be made by the Closing Officer.

(1) If no adverse change in the status of title has occurred since the date of the preliminary or the latest certification of the title by the abstracter or the title company, as the case may be, the Closing Officer will proceed to close the case.

(2) In case of change in ownership during the period, the Closing Officer will order a continuation of the abstract or an intermediate certificate of title or interim binder, as the case may be, and take such action as necessary to cure the title.

Payment and Closing Sheet. ENG Form 1566, Payment and Closing Sheet and Receipt for United States Treasurer’s Check, covering all charges to be eliminated by payment of money to be deducted from the purchase money check, will be prepared in advance of closing. This sheet will show, in detail, all disbursements of the purchase money, including all amounts to be expended for satisfaction of:

(1) Taxes and assessments.

Outstanding judgments—State and Federal.

Mortgages, deeds of trust, and other liens.

Amounts received under any contract or bond.

Landowner’s balance after all charges are deducted from the purchase price.

Division or District inspection of premises. The Closing Officer or other authorized Division or District employee will personally make an inspection of the premises to ascertain whether any person is occupying the property in whole or in part.

(1) The Closing Officer or an authorized Division or District employee will prepare ENG Form 798, Certificate of Inspection and Possession.

(2) If any person other than the vendor is found in possession, the Closing Officer will secure a disclaimer on ENG Form 1290, Disclaimer. The disclaimer will be modified to make allowance of any provision in the offer to sell permitting possession after closing.

(3) The Closing Officer or an authorized Division or District employee will check to determine that the buildings, improvements, and crops listed on the appraisal report are still on the land being conveyed. Where buildings, improvements, and crops have been reserved by the landowner, it will be determined that only the items reserved have been removed. Whenever possession of land is surrendered to the Government before the time of payment and closing, and immediate inspection and report ENG Form 1567, Report on Vacation of Property, will have been made. The Closing Officer may rely upon this report for the inspection required in the first part of this paragraph unless he is aware of circumstances which would make a supplemental inspection and report proper. If no such inspection and report have been made and possession has been surrendered to the Government, the inspection and report must be made at this time.

(4) The Closing Officer or an authorized Division or District employee will determine whether there have been repairs or improvements to or construction on the premises which might give rise to mechanics liens.

(5) The ENG Form 798 will be executed and placed with the title papers. If executed by an employee other than the Project Manager or Closing Officer, it must be approved by the Project Manager or Closing Officer, to indicate that the Project Manager or Closing Officer has authorized the employee signing the certificate to make the inspection and is satisfied it has been properly done.

Deed to the United States. (1) The deed to the United States will be drafted in accordance with the “Standards
§ 644.70  

32 CFR Ch. V (7–1–13 Edition)  

for the Preparation of Title Evidence in Land Acquisition by the United States,” issued by the Department of Justice in 1970.

(2) Where the landowner’s name appears in various forms among the title papers, full use will be made of the “also known as” clause in identifying the grantor in the deed to the United States.

(3) The deed shall contain a quitclaim clause by which the grantor quitclaims to the United States all right, title, and interest which the grantor may have in the banks, beds, and waters of any streams bordering the said land to be conveyed, and also all interest in alleys, roads, streets, ways, stripes, gores, or railroad rights-of-way abutting or adjoining said land and in any means of ingress or egress appurtenant thereto.

(4) Recording fees, transfer taxes, and similar expenses incidental to conveying real property to the United States; penalty costs for prepayment of any preexisting recorded mortgage entered into in good faith encumbering such real property; and the pro rata portion of real property taxes paid which are allocable to a period subsequent to the date of vesting title in the United States, or the effective date of possession of such real property by the United States, whichever is the earlier, shall be paid by the Government pursuant to authority of section 303, Pub. L. 91–646, approved January 2, 1971.

(i) Satisfaction of liens and encumbrances. All mortgages, deeds of trust, judgments, mechanics liens, and similar encumbrances will be satisfied and released or discharged of record. In the acquisition of easements, liens and encumbrances should be satisfied, released or subordinated to the Government’s easement, except as provided in §644.69(a) or unless administratively waived under §644.69(c).

(j) Payments to tenants and lessees. Amounts due lessees, or other tenants, under ENG Form 1564, Consent to Offer to Sell, will be paid from the purchase price or by the landowner direct. In either case, proper receipts and releases will be obtained.

(k) Satisfaction and release of liens of taxes and assessments. Except as provided in §644.69(b) and paragraph (k)(6) of this section, all taxes and assessments which, under the law of the State where the land is located, are a lien on the property as of the date of the delivery and recordation of the deed to the United States must be paid at or before closing, unless provision for their payment is made as follows:

(i) Where closing takes place before the completion of the assessment and levy of the taxes necessary to the determination of the amount of the taxes, or before the taxes are due and payable, a sufficient sum will be withheld from the purchase price to satisfy such taxes when the amount is later determined or they later become due and payable. In cases where the amount of taxes has not been determined, an estimate will be made, after consultation with the assessor and consideration of the amount of taxes paid on the land for the preceding year. The amount withheld should be at least 20 percent in excess of the amount of taxes assessed against the property for the preceding year.

(ii) If the taxes are not due and payable under State law, though the amount has been determined at the time of closing, payment will not be made to the collector or other official charged with the collection of taxes, unless he has authority to accept payment and receipt for them in advance of the due date.

(2) Funds withheld for the payment of taxes will be transmitted promptly to the Division or District Engineer in the form of cashier’s check or money order payable to the Treasurer of the United States, unless the taxes are paid or held in escrow by the title company. The Closing Officer, in transmitting such payments, must clearly identify, by name, the vendor from whom the tax money was withheld, and must identify the land for which the taxes were withheld by its tract number in the project. He must also identify the type of taxes, such as county, city, or school. He will set forth the year each became or becomes due and fully explain the manner in which payment or withholding has been handled in order that proper payment will be effected by the Division or District Engineer when
the taxes are due and payable. Any balance of the amount withheld and not needed to satisfy the taxes will be refunded to the grantor.

(3) Where payment of the taxes is not possible at the time of closing and funds are withheld for this purpose, the Closing Officer will immediately notify the local tax official that title to the particular tract has been conveyed to the United States and that funds have been withheld for the payment of taxes, specifying the taxes for which an amount has been withheld and stating that such funds are in the custody of the Division or District Engineer. In giving such notice, he will use ENG Form 894, Notice to Tax Official.

(4) When the taxes become due and payable, the Division or District Engineer will pay such taxes from the funds withheld from the purchase price. Any excess between the amount of taxes actually paid and the amount withheld will be refunded to the grantor by the Division or District Engineer. Refund checks will be transmitted to the grantor only after it has been definitely determined that all taxes which were liens on the tract are shown as satisfied on the books of the tax collector. This is necessary to avoid the possibility of a refund being made before satisfaction of all tax liens. The tax receipt should be forwarded to HQDA (DAEN-REP-S) WASH DC 20314 for filing with the original title papers.

(5) Where the evidence of title consists of certificates of title or title insurance, and funds are withheld for payment of taxes, the amount so withheld may be turned over to the title company, provided:

(i) The title company is financially responsible and will agree to issue a final certificate of title or title insurance, and funds are withheld for payment of taxes, the amount so withheld may be turned over to the title company.

(ii) The title company will enter into an escrow agreement with the grantor to hold such sum for the satisfaction of the taxes when they become due, and to return to the grantor any excess remaining after their payment.

(6) Agreements have been reached with the Department of Justice that, in the acquisition of easements, the following will apply:

(i) No provision need be made for the payment of taxes which are a lien but are not due and payable, provided that the purchase price of the easement, including severance damage, is not in excess of 50 percent of the reasonable value of the entire contiguous property of the vendor. In the event the value of the easement has been determined by a "before and after" appraisal, the amount of the "after" appraisal will be utilized in making the necessary determination. In the event no such appraisal has been made, it will not be necessary to prepare a complete appraisal of the value of the contiguous property. In lieu thereof, a memorandum estimate by a qualified appraiser (staff or contract) will be obtained and placed in the tract file. In either case, the appropriate information will be inserted on ENG Form 3536, Statement Concerning Outstanding Encumbrances.

(ii) It will not be necessary to withhold funds for payment of current taxes which are due and payable, if the purchase price of the easement is insufficient to pay such taxes. In such case, Item 4 of ENG Form 3536 and the third block of that form will be completed.

(iii) ENG Form 3536 will be signed by the Closing Officer and the original will appear as a separate document in the Final Title Assembly.

(1) Payment and Recordation of Deed.

(1) No disbursement of the purchase price shall be made until:

(i) A duly executed deed has been accepted;

(ii) All outstanding charges, liens, or encumbrances on the land have been satisfied and discharged, or a sufficient sum has been withheld from the purchase price to satisfy and discharge such charges, liens and encumbrances; and

(iii) The title is sufficient for the purposes for which it is being acquired, and all objections thereto have been eliminated or administratively waived in writing.

(2) When the requirements of paragraph (1)(i) of this section have been satisfied, the balance of the purchase
price shall be delivered to the landowners.

(3) The deed and all instruments which release liens or encumbrances on the property shall be promptly recorded.

(m) Closing of easements acquisitions—

(1) Easements costing in excess of $1,000. Closing requirements and procedures with respect to easements costing in excess of $1,000 are the same as in fee acquisitions, except as to mortgages, deeds of trust, judgments, vendors’ liens, and similar title infirmities (§644.69(a)), and as to taxes which are liens but which are not due and payable (paragraph (k)(6) of this section).

(2) Easements costing not in excess of $1,000. Closing requirements and procedures with respect to easements costing not in excess of $1,000 are the same as a fee acquisition except that title infirmities may be waived as provided in §644.69(b).

(n) Payment and closing under power of attorney. Where the landowner is unable or unwilling to be present personally or to pay from his own funds the amount necessary to satisfy all encumbrances and expenses, the following steps may be taken:

(1) Obtain a power of attorney from the landowner. Standard Form 232, Power of Attorney by Individual for the Collection of a Specified Check Drawn on the United States Treasury, will be used. If the landowner is a corporation, Standard Form 236, Power of Attorney by a Corporation for the Collection of a Specified Check Drawn on the Treasurer of the United States, and Standard Form 237, Resolution by Corporation Conferring Authority Upon an Officer to Execute a Power of Attorney for the Collection of Checks Drawn on the Treasurer of the United States, will be used. The power of attorney will be drawn in favor of the Closing Officer. It will be noted that this form specifically recites types of indebtedness or expense, the names of the persons to be paid under the power of attorney, and the estimated, but not necessarily the exact, amounts thereof. It is important that all items (including cost of revenue stamps, recordation fees for curative material, and bank service charges) be itemized on the form.

(2) Obtain from the landowner ENG Form 1569, Order to Disburse Under Power of Attorney. Where the landowner is unable or unwilling to pay from his own funds the amount necessary to satisfy all encumbrances and expenses, the following steps may be taken:

(3) The Closing Officer then will take the necessary action for and on behalf of the landowner to discharge the indebtedness and pay expenses under the ENG Form 1569.

(4) If it is possible to have all interested parties, other than the landowner, present at one time and to make all payments simultaneously, a round table closing will be conducted. The Closing Officer, under the power of attorney and order to disburse, will endorse and cash the Treasurer’s check and will make the individual disbursements in actual cash.

(5) If it is possible to determine definitely all items of payment simultaneously, but it is not possible to have all interested parties present at one time, the Closing Officer will, under the power of attorney and order to disburse, endorse and cash the Treasurer’s check, obtain separate cashier’s checks for all items of payment (including the bank services charge for the issuance of such checks), and deliver the checks.

(6) Where it is not possible to determine definitely all items of payment simultaneously, the Closing Officer, under power of attorney and order to disburse, will endorse and cash the Treasurer’s check and will obtain separate cashier’s checks for all items of payment for which disbursements may be properly made and for any balance representing the total of any items, the amounts of which cannot be definitely determined; in other words, for the residue of the amount of the United States Treasurer’s check. In every instance, the cashier’s checks will be drawn to provide for endorsement by the Closing Officer or landowner as later determined to be appropriate.

(7) Curative material which requires recordation will be recorded for and on behalf of the landowner and will then be placed with the title papers.
(8) The usual tax receipts, mortgage releases, judgment satisfactions, etc., will be obtained for each monetary encumbrance which has been discharged. These instruments will be placed with the title papers, unless the landowner wishes to retain them.

(9) Separate receipts on ENG Form 1571, Receipt for Payment Under Power of Attorney, must be obtained for each disbursement made under the power of attorney and order to disburse, including a receipt for the balance of the purchase price paid to the landowner. One copy of such receipt will be placed in the project files.

(10) The Closing Officer will prepare an original and two copies of ENG Form 1570, Report of Disbursement Under Power of Attorney, showing the exact amount of each disbursement made under the power of attorney and order to disburse. The Closing Officer will prepare an original and two copies of appropriate certification thereon. The original and two copies will be signed by the landowner, who will retain one copy. The Closing Officer will place one copy in the files of the project office and will place the original with the title papers. The separate receipts on ENG Form 1571 for each disbursement made will be attached to the original ENG Form 1570.

(p) Procedure after payment. When the above closing requirements have been met, the Closing Officer will:

(1) Immediately order a final continuation of the type of title evidence which has been contracted for. The final title evidence must be dated as of the date of recordation of the deed to the United States, or a subsequent date, to show a valid title vested in the United States of America subject only to those title defects which have been administratively waived or to those liens and encumbrances for which sufficient funds were withheld from the purchase price to satisfy and discharge them.

(2) Check carefully ENG Form 1566, Payment and Closing Sheet and Receipt for United States Treasurer’s Check, to see that funds have been properly disbursed.

(3) Review the continued abstract, final certificate of title, or title insurance policy, as soon as they are prepared and determine that the proper preliminary and final title evidence and related papers on the case have been completed in proper order. Thereupon a Final Title Opinion will be prepared.

(4) Transmit as the Final Title Assembly to HQDA (DAEN-REA-P) WASH DC 20314, the Final Title Opinion, title...
§ 644.71 Final title assembly.

(a) Disposition of final title assemblies. The final title opinion and related papers will be forwarded to HQDA (DAEN-REA-P) WASH DC 20331 for review and disposition. In addition, copies of deeds and related papers in acquisitions for the Strategic Petroleum Reserve Program of the Department of Energy will be forwarded to: Department of Energy, Strategic Petroleum Reserve Project Management Office, 900 Commerce Road East, New Orleans, Louisiana 70123.

(b) Division/District files. True copies will be retained for Division or District files.

§ 644.72 Transfer to condemnation.

(a) Transfer of tracts from purchase to condemnation. If at any time, in the course of acquisition by purchase, it becomes apparent that title clearance and closing cannot be completed within 60 days of the offer to sell, action will immediately be taken to acquire the land by condemnation in order to make funds available to the landowner.

(b) Contents of letter of submittal. In such cases the letter of submittal will contain or be accompanied by:

(1) All title evidence.

(2) An analysis of the title defects and a statement of the attempts which have been made to cure the defects.

(3) A statement of the attempts to have the title infirmities waived by the title company and the reasons for refusal; or

(4) The curative material which has been obtained to remedy the infirmities; and

(5) Two copies of the offer to sell from the apparent owners.

ACQUISITION BY PURCHASE, DONATION, AND TRANSFER

§ 644.81 General.

Sections 644.81 through 644.88 describe the procedures of the Corps of Engineers relating to the acquisition of land and interests therein for both military and civil works projects by purchase, donation and transfer.

(a) Applicability. These sections are applicable to all Division and District Engineers having real estate responsibilities.

(2) Military. Title 10 U.S.C. 2571 authorizes transfer of real property between Defense elements without compensation if the Secretaries approve.

Title 10 U.S.C. 2602 provides that acquisition of fee title or transfer of real
property owned by the United States to another Federal agency, military department or a state must be reported to the Committees on Armed Services of the Senate and House of Representatives if the estimated value is more than $50,000 and the transaction may not be consummated until after 30 days have expired from the date the report is submitted to the Committees. Title 10 U.S.C. 2663 provides for acquisition by the Secretary of a military department during time of war or when war is imminent of any interest in land, including temporary use, required for a Defense installation, munitions plant or power plant for production of munitions, through negotiation and purchase, by condemnation or by gift. Title 10 U.S.C. 2672 provides that the Secretary of a military department may acquire any interest in land, including temporary use, by gift, purchase, exchange of United States owned land or otherwise, that he or his designee determines is needed in the interest of national defense and does not cost more than $50,000 exclusive of administrative costs or the amounts of deficiency judgments.

(3) Civil works. Acquisition of real property for civil works projects for which provision has been made by law is authorized in 33 U.S.C. 591–595a and 701. As in the case of military projects, the Secretary of the Army is also authorized to accept donations of lands and materials required for civil works projects.

(c) Rights-of-entry. Rights-of-entry for construction may be obtained by the Division or District Engineer, after he has been authorized by the Chief of Engineers to acquire the land, pending completion of acquisition by purchase or the filing of condemnation proceedings with declaration of taking. In the event the landowner will not voluntarily grant a right-of-entry, an appraisal of the required interest should be made and negotiations conducted on the basis thereof. If the negotiations are not successful, a declaration of taking should be submitted to acquire the necessary rights. The same procedure will be used for acquiring rights-of-entry for other purposes, such as survey and exploration.

§ 644.82 Prerequisites to acquisition.

(a) Authority to begin acquisition. Action to acquire a tract of land will not be initiated until the Real Estate Design Memorandum (for all projects except military) or Real Estate Planning Report (for Army, other than Civil Works, and Air Force projects) is approved and specific authorization of the Chief of Engineers, or the appropriate Air Force Regional Civil Engineer (AFRCE), to proceed with the acquisition of the project is received by the Division and District Engineer and funds have been made available. Upon such approval, the Division or District Engineer is authorized to initiate action for the acquisition of the estate approved for the particular project in accordance with the procedures hereinafter set forth.

(b) Tract description. Authority to initiate engineering planning of a project will state the mapping procedures provided for in Chapter 3, ER 405–1–12. It is necessary that land requirements be determined, that the various tracts be identified by ownership, and that accurate tract descriptions be developed. Tract ownership data may be developed by Division or District personnel from the local land records or procured by contract from a qualified local Government official, abstractor or title company representative.

(c) Title evidence. With approval to proceed with acquisition, title evidence contracts can be initiated. The procedures for obtaining title evidence are covered in §§644.61 through 644.72. Preliminary title evidence to confirm ownership and status of the title is prerequisite to negotiating for acquisition of the land or interests therein.

(d) Appraisals. Concurrently with the procurement of title evidence, the appraisal of the land should begin. The appraisal, when approved, forms the basis for the determination of fair market value which will not be less than the approved appraised value. The appraisal procedures are covered in subpart B. Normally, one appraisal per tract (ownership) will be obtained; however, in unusual cases such as those which involve novel, unique or controversial appraisal concepts, there is no objection to obtaining more than one appraisal covering the same tract.
§ 644.83

if considered advisable by the Division or District Engineer. When fee tracts are acquired by eminent domain procedures, where the value of the property is between $50,000 and $100,000, only one appraisal need be provided to the Department of Justice so long as it is a contract appraisal; two appraisals will be provided for values exceeding $100,000. Easement tracts acquired by eminent domain procedures, in excess of $50,000, will require two appraisals. At least one of the two appraisals must be made by a contract appraiser. Generally, in these cases, the second appraisal is procured only after negotiations indicate that agreement on price cannot be reached and that acquisition by condemnation will be required. The second appraisal will be procured in order that the Corps can take advantage of any negotiating flexibility that the second appraisal may afford in order to preclude court action. It is also necessary that the appraisals be relatively current in point of time (not to exceed six months) since dependent upon the real estate activity and degree of stability of the local economy, significant changes may take place in relatively short periods of time.

(e) Environmental considerations. Paragraph D3, Attachment 1 to Enclosure 1, DOD Directive 6050.1, dated March 19, 1974, subject: “Environmental Considerations in DOD Actions,” requires close environmental scrutiny of real estate acquisitions, disposals and outgrants to determine if said actions constitute a “Major Action Significantly Affecting the Quality of the Human Environment (MASAQHE).” If the action is determined to be a MASAQHE, then an environmental impact statement is required. Paragraph D3 is quoted here for ready reference:

D. Certain types of actions require close environmental scrutiny because of the possibility that they may either affect the quality of the environment or create environmental controversy. It may be desirable in such cases to have a complete presentation of the environmental aspects of the proposed action available for any interested party. For these reasons, consideration shall be given to documenting the environmental effect of the following types of actions in writing: (The written environmental assessment need not be elaborate for actions in which it is readily determinable that the impact would not be significant; however, negative declarations must be supported by written environmental assessments which generally meet the EIS format requirements.)

§ 644.83 Negotiations.

(a) Acquisition objectives. The objective of a land acquisition program is to acquire land at a price that will afford each landowner his constitutional guarantee of “just compensation” as that term has been defined by Federal judicial decisions. The Government must never pay less than just compensation unless a gift is intended. In eminent domain proceedings, the just compensation due a landowner is determined judicially by court award or by settlement prior to trial; in a purchase case, it is determined by negotiations leading to a satisfactory price and agreement with the landowner. While it is recognized that an appraisal is only an informed opinion and does not establish or determine just compensation, it is also recognized that, in negotiating for the purchase of land, an appraisal is the best and sometimes the only reliable opinion of the market value of the land which is supported by a thorough, acceptable analysis of market conditions at the time of purchase. Therefore, in the negotiation for the purchase of land, an approved current appraisal shall establish the minimum price to be paid for the land being acquired by the Corps of Engineers. Negotiations or offers below this price are prohibited except where the property is being acquired on a competitive basis and condemnation is not authorized.

(b) Negotiating objectives. In all cases, it is important that the negotiator receives adequate guidelines and explicit instructions. Promptly, after the amount of the estimated just compensation is established, the negotiator shall make an initial offer in the full amount of the fair market value, shall advise the landowner that the land was appraised for such amount, and shall furnish the landowner a written statement of, and summary of the basis for,
said amount. A concentrated effort will be made to acquire the land for that amount. This written statement will be in the form of a letter which may be delivered personally or by first class mail. Such summary will include, as a minimum, the following items:

(1) Definition of the term “fair market value.”

(2) An accurate legal description and location identification of the real property and the interest(s) therein to be acquired (legal description and estate may be attached).

(3) The amount of the offer and a statement that such amount:
   (i) Is the amount believed by the agency to be just compensation for the property;
   (ii) Is not less than the approved appraisal of the fair market value of the property;
   (iii) Disregards any increase or decrease in the fair market value caused by the project for which the property is to be acquired, or by the likelihood that the property would be acquired for such project, other than that due to physical deterioration within the reasonable control of the owner;
   (iv) Does not reflect any consideration of or allowance for any relocation assistance and payments which the owner is entitled to receive.

(4) An inventory identifying the buildings, structures, fixtures, and other improvements, including appurtenant removable building equipment, which are considered to be part of the real property for which the offer of just compensation is made. The inventory shall include a statement of the utility and condition of said buildings, structures, fixtures, and other improvements.

(5) A description of the appraisal technique used, i.e., market approach, income approach, or cost approach, in sufficient detail to explain clearly to the landowner the process by which his property was valued. Thus, as an illustration, where the market approach was used, the explanation should include the number of comparable sales used, their general location and type, the factors considered in adjusting sales of subject property, and any other information which would help the landowner understand what was done to value his property. A statement that comparable sales of similar properties were examined without more explanation is not sufficient. Similar information should be given when any other appraisal technique is used. Unusual cases will require a more detailed explanation.

(6) An identification of land classification categories (do not show acreage breakdown).

(7) If only a portion of a property is to be acquired, an apportionment of the total estimated just compensation for the partial acquisition between:
   (i) The amount representing the just compensation for the real property to be acquired;
   (ii) The amount, if any, representing severance damages to the remainder, together with a brief narrative description of the cause thereof; and
   (iii) In the event “off-setting benefits” are involved, these must be shown, along with a narrative explanation and the landowner shall be given a “person-to-person” explanation by the negotiator.

(8) If the property contain a dwelling, the value of said dwelling and homesite shall be set forth separately, with the statement that this figure will be used in calculating housing relocation benefits under title II of Pub. L. 91-646.

(9) If any building, structure, fixture, or other improvement, comprising part of the real property, has been identified as being owned by a tenant who has the right or obligation to remove it at the expiration of his term, the amount of the value of such building, structure, fixture, or other improvement, being the greater of:
   (i) The amount which the tenant’s improvement contributes to the fair market value of the real property to be acquired; or
   (ii) The fair market value of the tenant’s improvement for removal from the real property. The basis of such amount shall be included.

(c) Appraisal reports or the appraiser’s analysis (complete breakdown of principal value elements) will not be revealed by the negotiator unless specifically authorized. Cases involving property for which the highest and best use cannot be definitely established, and to which the exceptions mentioned
(d) Exceptions—(1) Corps Employees. If an employee of the Corps of Engineers has a direct interest in a tract of land being acquired by the Corps for public use, the tract will be acquired by condemnation. In cases of this nature, appraisal reports should be prepared, reviewed and forwarded together with a declaration of taking, with the condemnation assembly. The negotiator’s report, of course, will not be included. The Department of Justice will be requested to handle all further matters pertaining to settlement or trial of the case. The Department of Justice has agreed to accept full responsibility for negotiations and approval of settlements or awards in such cases, without contacting any Corps personnel other than the owner of the interests being acquired.

(2) Members of Congress. Since, under 18 U.S.C. 431 and 432, members of Congress who hold interests in land that is required for project purposes cannot contract for sale of such interests to the Government, these interests will also be acquired by condemnation. Negotiations for acquisition by purchase or for settlement without trial cannot be conducted by officers or agents of the United States. The determination of just compensation must be made by judicial proceedings. Appraisal reports and the condemnation assembly should be prepared and forwarded as set forth in paragraph (d)(1) of this section.

(e) Negotiating guidelines. (1) The negotiator should be thoroughly familiar with the Division and District negotiating guidelines and should study the background data of the project, consisting of the authorizing act, survey report, project document, design memoranda, etc.; the applicable appraisal reports; tract ownership data; preliminary title certificates; and other related material. He should be entirely familiar with the project and the owner’s individual property before initiating negotiations.

(2) The owner shall be provided with available brochures which explain the project and the Pub. L. 91–646 benefits, together with the written statement and summary required by §644.83(b). The negotiator should explain to the landowner the Government’s requirement for the land, the amount of land required, the estate(s) to be acquired, the terms and conditions of the Government’s contract form, and the fact that relocation assistance benefits may be available. He should furnish the landowner a copy of a map indicating the boundaries of that portion of his land to be acquired, where the entire ownership is not being acquired or where different estates are being acquired in the same ownership, specifying the estate in each area.

(3) Negotiations will be continued in an effort to obtain acceptance of the Government’s offer or a reasonable counteroffer from the landowner, or until it is definitely determined that such a counteroffer will not be forthcoming. It is not intended that negotiations be continued until an unacceptable counteroffer is finally obtained. However, in an effort to obtain a reasonable counteroffer above the Government’s estimate, the negotiator will, if necessary, take the initiative in suggesting a series of prices within a range which, in accord with the guidelines discussed in §644.84, has been predetermined to be reasonable.

(4) The interest of both owners and tenants must be considered and protected. The tenant is a proper party to the transaction, and every effort must be made to obtain the consent of the landowner and tenant as to the price to be paid to the tenant for his leasehold interest. This can be accomplished by
§ 644.83

(1) Discussions With Landowners. In order to avoid the creation of negotiating patterns, and keeping in mind that counteroffers must be justified as being just and reasonable, discussions with landowners should be conducted without disclosing the extent of the delegations and redelegations of authority to accept counteroffers. However, during negotiations on individual tracts, the landowners must be advised that, in the event of condemnation, the deposit will be in an amount no less than the approved appraised value, since the question of value cannot be resolved by negotiations. It must further be made clear that this advice is not in the nature of a threat, but is an explanation of the statement of policy directed by the Congress and the law. The negotiator will also inform each owner that offers and counteroffers made during negotiations are made without prejudice in the event of condemnation. The negotiator will make a notation on the Negotiator’s Report to the effect that he has so informed the owner.

(2) Obtaining the written counteroffer; preparation of negotiator’s report. If the negotiator considers that a counteroffer in excess of the approved appraised value is in the amount which should be considered for acceptance, the counteroffer will be reduced to writing on ENG Form 42, Offer to Sell Real Property, or on ENG Form 2970, Offer to Sell Easement, and be properly executed by the landowner. In such cases, a complete written record of negotiations with respect to each tract or ownership, as appropriate, will be maintained by means of ENG Form 3423, Negotiator’s Report, Part I. This record will state the chronological history of negotiations, all elements considered in evaluating the landowner’s final counteroffer, and the justification for such recommendation in accordance with §644.84. The justification will be fully recorded in ENG Form 3423A, Negotiator’s Report, Part II, which is a separate page of this report, and which will be removed in the Office of the Chief of Engineers prior to submitting the counteroffer assembly to higher authority for approval. Final action on

the tenant’s execution of ENG Form 1564, Consent to Offer to Sell Real Property, which shall then accompany the owner’s offer to sell. In cases where the tenant executes this form, payment for the tenant’s interest can be made to him in the closing of the purchase transaction. This procedure will be followed whenever possible. An exception is permitted in those cases where the landowner and tenant prefer to handle the matter as a private transaction between themselves. In such cases, it should be determined that a satisfactory agreement has been made by the landowner and tenant. Consideration should be given to any interest which the tenant may have in growing crops. This procedure is also applicable to any third party having an interest in the property, except through severance of a subsurface estate.

(5) Negotiations with landowners will be conducted in a fair and courteous manner. The negotiator must not, under any circumstances, resort to coercion or threats of condemnation.

(6) The negotiator has no authority to obligate the Government in any manner beyond the contract form. He must refrain from oral promises or understandings and include all terms and conditions in the contract form.

(7) Although appraisal reports cannot be made available for inspection by a landowner, the various elements of value considered by the appraisers may, and should, be discussed with the landowner to satisfy him that all elements of compensable values and damages have been considered in arriving at an overall value for the property being acquired. Care will be exercised during any discussion not to reveal specific amounts related to any elements considered in the appraisal, except the acquisition cost assigned to the dwelling for purpose of calculating replacement housing payment under section 203, Pub. L. 91–646.

(8) Any interest in a tract of land sought to be acquired, or any type of relationship with the owner, disqualifies the negotiator from participating in negotiations for the acquisition of that particular tract.

(9) An appraiser is not, under any circumstances, permitted to negotiate for the acquisition of a tract of land for which he has prepared the appraisal or reviewed it as reviewing appraiser.
§ 644.84 Counteroffers. 

(a) Consideration of counteroffers. In negotiations with landowners, if agreement cannot be reached with a landowner as to the purchase price established by the appraisal, the lowest price demanded by the landowner may be considered by the Division and District Engineer, and the Chief of the Real Estate Division, on the basis of the following factors:

(1) Variations in appraisals. In the usual case, the Corps will have the opinion of only one appraiser with respect to the market value of the particular tract of land. It must be recognized that the opinion of a second equally competent appraiser might be higher or lower than that of the appraiser who appraised the property. Hence in considering counteroffers of landowners, Division and District Engineers should keep in mind that two equally competent appraisals may reflect reasonably divergent opinions of value as to the same property. Instances requiring two appraisals are covered in § 644.82(d).

(2) Built-in costs, prior counteroffers, settlements and liability risks of proceeding to trial. It is recognized that there are certain Government administrative costs and liability risks involved when property is condemned by the United States and the land value is judicially determined. These items are definite in character but the attendant costs will vary. “Built-in” costs of proceeding to trial include, but are not limited to, the following items: Salaries of all Government personnel participating in trial preparation, pre-trial hearings, and the actual trial; cost of an additional appraisal(s); witness fees of contract appraisers employed by the Corps of Engineers or the Department of Justice; travel costs of all Government personnel and consultants participating in trial preparation, pre-trial hearings, and the actual trial; and cost of preparing trial documents and exhibits. Consideration should also be given to prior counteroffers which have been accepted and settlements approved prior to trial. “Liability risks” of proceeding to trial are the amount of the anticipated award over and above the appraised value, taking into consideration probable testimony on behalf of the Government and the landowners, as well as the history of condemnation awards in the Federal court jurisdiction in which the lands are located, and the amount of interest on a deficiency judgment which would result from the anticipated award. Serious consideration of the above factors may justify a recommendation for authority to accept a counteroffer which otherwise would appear to liberal.

(3) Non-compensable elements of value. Elements of value based on consequential damages or speculative values, as defined by the Federal courts, may not be recognized in considering a landowner’s counteroffer. However, even though a landowner’s counteroffer might include non-compensable items of value, favorable consideration of the counteroffer may be given if it can be justified on the basis of variances in appraisals, built-in costs, and liability risks of proceeding to trial.

(4) Value of reserved items. The salvage value of improvements and the value of crops and/or timber reserved by the landowners, as provided in § 644.86 (g), (h), and (i), will not be included in the amount of the counteroffer in determining the excess of counteroffers over appraised values when applying the dollar and percentage limitations in the delegations of authority to Division and District Engineers for acceptance of counteroffers. The determination of the excess will be made on the basis of the appraised value of the interests being acquired (including the value of the reserved items) compared to the cash payment which will be made to the landowner if the Government accepts his counteroffer. However, this method of analyzing the counteroffer is intended for use only in determining the limitations of authority. The overall transaction must be in the interest of the United States and not afford an unwarranted windfall to the vendor.

(b) Application and Limits of Delegated Authority. The negotiating procedures
outlined herein will apply to all acquisitions by the Corps of Engineers for the Army (military and civil), Air Force, Department of Energy (DOE), National Aeronautics and Space Administration (NASA), and other Federal agencies which utilize the services of the Corps for acquisition of real estate. Delegations of authority to Division and District Engineers and to the Chiefs of their Real Estate Divisions to accept offers in excess of the appraised valuation have been made. Offers which do not exceed the approved appraised value may be accepted by authorized Division and District personnel regardless of the amount. Other offers will be handled as outlined in the paragraphs which follow.

(c) Exercise of Delegated Authority. The approval of a counteroffer over the appraised value, but within the authority redelegated to Divisions and Districts, will be evidenced by the Division Engineer, the District Engineer, the Chief of the Real Estate Division, or the incumbent of the position to which redelegations have been made, in one of the following manners:

(1) Manually accepting, on behalf of the United States, the offer to sell, as provided in §644.87; or
(2) Manually executing a dated notation of approval of the purchase price, to be placed in the tract file, preferably on the original of the Negotiator’s Report (§644.83(g)).

(d) Submission of Counteroffers to the Chief of Engineers. Recommendations for the grant of authority to accept counteroffers which are considered reasonable, but which cannot be accepted by the Division Engineer, the District Engineer, or the Chief of the Real Estate Division, within the limitations of delegated authority, will be submitted to HQDA (DAEN-REA) WASH DC 20314 for consideration. Negotiator’s Reports, prepared in accordance with §644.83(g) will accompany this submission; the contents thereof need not be repeated in the transmittal letter or in forwarding indorsements. The assembly will consist of the forwarding correspondence and the Negotiator’s Report, with any additional material needed to support the recommendation of the Division and District Engineer. An analysis should be made of this offer as compared with other counteroffers accepted for the project, as well as with results in condemnation cases settled before trial. Signed offers will not be forwarded unless they contain deviations requiring approval by the Chief of Engineers. Appraisal reports are helpful and may be necessary reference for proper consideration of the recommendation. In the event the appraisal report was approved by HQDA (DAEN-REA), the forwarding letter should refer to the approval correspondence and data. It will not be necessary to enclose copies of the appraisal report. Where only a portion of an ownership is required, information should be furnished in the Negotiator’s Report or in the transmittal correspondence (1) as to whether or not the remainder portion is considered to be an uneconomic remnant and (2) if so, as to whether or not an offer was made to acquire the entire property. Further, a statement is required as to whether or not it is considered that the acquisition will have any adverse effect on the acquisition of the remaining land required for the project.

§644.85 General negotiation procedures.

(a) Provisions of Military Construction Appropriation Act. (1) Section 108 of the Military Construction Appropriation (MCA) Act of 1978 (Pub. L. 95–101) provides that no part of the funds provided in the Act shall be used for purchase of land or easements in excess of the value as determined by the Corps of Engineers, except:

(i) Where there is a determination of value by a Federal Court; or
(ii) Purchases negotiated by the Attorney General or his designee; or
(iii) Where the estimated value is less than $25,000; or
(iv) As otherwise determined by the Secretary of Defense to be in the public interest.

(2) The above wording, except for paragraph (a)(1)(iv) of this section, constitutes a limitation on accepting or submitting a recommendation for approval of a counteroffer in excess of the appraised value. Paragraph (a)(1)(iv) brings military acquisition within the general acquisition policy required under Pub. L. 91–646. Future MCA Acts
§ 644.86 Exceptions and reservations.

(a) General. Prior to the enactment of Pub. L. 91–646, the Corps encompassed a very generous policy of priority leasing with respect to former owners and tenants, in order to ease the burden of people who had to relocate because of the Corps’ projects. Recognizing the inadequacies of the well-intentioned attempts by acquiring agencies to make whole the former landowner or tenant, the Congress enacted Pub. L. 91–646 which was approved on January 2, 1971. It would appear that the Congress intended that such law provide for the fair and equitable treatment of persons who are displaced, without having to rely on interim measures, such as priority leasing, to ease the inevitable relocation. In House Report 91–1656, the Committee on Public Works of the House of Representatives noted the likelihood that adequate housing may not be available readily and indicated this as its reason for including the provision in the law that satisfactory replacement housing must be available before displacement. In view of this, it is incumbent on the District Engineer to be opportune in seeking out replacement housing and to be judicious in the early relocation of owners and tenants before market changes eliminate any available supply of replacement homes. It is also essential that the District Engineer be diligent in providing the required relocation assistance advisory services and benefits authorized by the law.

(b) Possession by Government. It will be the objective of the District Engineer to have the premises vacated and
to cause unneeded improvements to be removed at the earliest practicable date and conform to the Congressional intention expressed above. In addition to the above, reasons for this objective are:

(1) To provide for the expeditious payment of benefits to former owners and tenants;
(2) To complete administration of the actual relocation of owners and tenants in a timely manner;
(3) To avoid maintenance and security problems with respect to acquired improvements;
(4) To prevent vandalism, trespassing and poaching with respect to acquired improvements;
(5) To avoid any implication that former owners or tenants may be permitted to remain indefinitely on the federally acquired property;
(6) To cause land to be leased on the basis of the most practicable size and configuration rather than on the basis of the size of the units acquired;
(7) To permit the general public to bid for the lease of federally owned land rather than restricting the privilege of leasing to the former owner or tenant;
(8) To avoid a backlog of incomplete actions when construction or flooding is imminent or the land is otherwise required.

c Possession reserved to former owners and tenants. It is considered that the policy of granting priority leases to former owners and tenants has been overridden by the enactment of Pub. L. 91–646. Accordingly, this policy is being phased out, and where applicable, the acquisition agreement will set forth the dates agreed upon for the vacation of the premises by the owner and tenant without commitments, express or implied, as to the leasing of the premises after such dates. Procedure for providing for vendor’s continued possession after the Government’s acquisition is covered in paragraph (1) of this section.

d Outstanding rights. (1) When the United States is acquiring title subject to outstanding rights, the offer will differentiate between:

(i) Property which the vendor is excepting or rights which he is reserving and which are created for the first time; and
(ii) Rights which third parties have acquired in the past, generally referred to as outstanding rights in third parties.
(2) Exceptions or reservations of rights which the vendor may retain, without interfering with the construction or operation of the project, will be set forth in the offer and deed by a clause following the description, beginning with the words: “Excepting * * *” or “Reserving * * *.” Any other outstanding rights, subject to which the United States is acquiring title, held by third parties will be set forth in the offer and deed by a clause, following the description, beginning with words, “Said premises are conveyed subject to * * *.” Negotiations with the surface owner will include the owner’s interest in the subsurface, unless acquisition of a lesser interest has been authorized by directive or specific approvals. These negotiations will not include interest severed and outstanding in third parties by purchase or lease, unless the surface owner agrees to remove the outstanding interest or agrees to obtain a subordination from the holder of the outstanding interest if that is consistent with the acquisition plan. If negotiations with the surface owner are successful, an Offer to Sell will be obtained, reciting the outstanding interest in the “Subject to” paragraph of the form, unless the surface owner agrees to remove the outstanding interest or agrees to obtain a subordination from the holder of the outstanding interest without commitments, express or implied, as to the leasing of the premises after such dates. Procedure for providing for vendor’s continued possession after the Government’s acquisition is covered in paragraph (1) of this section.

e Right to repurchase prohibited. In no case will an offer be obtained in which the vendor reserves the right to repurchase the property. Such a reservation would be contrary to the Federal Property and Administrative Services Act of June 30, 1949, 63 Stat. 377, 40 U.S.C. 471, et seq.
(f) General reservation guidelines. (1) Reservations of the right to remove
§ 644.86  Reservation of buildings and improvements.

The reservation by vendors of the right to remove buildings and improvements will be permitted under the following conditions:

(1) Where the Division or District Engineer, in civil works projects, the using service in Army and Air Force projects, or the Federal agency, if other than the Army or Air Force, for which the land is being acquired, has determined that they will not be needed for the purpose of the project;

(2) The consideration to the Government for the reservation will be an amount negotiated at not less than the appraised salvage value of the building and improvements which are reserved, and such amount will be deducted from the negotiated price at the time of negotiation prior to execution of the offer;

(3) Where a reservation is permitted, the following clause will be inserted in the offer, following the description of the land:

Excepting and reserving to the Vendor the right to remove (enter description of buildings) on or before __________, which the Vendor agrees not to relocate on other land to be acquired for the project, provided, however, that, in the event that the said buildings and improvements are not completely removed on or before said date, the right of removal shall terminate automatically, and the United States shall have a good and indefeasible title to said buildings and improvements which remain without notice to the Vendor; and provided further that, in the

(crops, timber, buildings, and improvements during a specified period will not be permitted without express approval of the Division or District Engineer on civil works projects, the Army or Air Force using service on military projects, or the Federal agency, if other than the Army or Air Force, for which the land is being acquired.

(2) At the time of the approval of the acquisition by the Chief of Engineers, a determination will generally have been made as to whether subsurface rights and/or water rights will be acquired or left outstanding. Acquisition will be on the basis of such determination and as outlined below. Lands will be acquired subject to minerals, oil and gas rights or other similar interests severed and outstanding in third parties by purchase or lease and as approved by the Chief of Engineers.

(3) Where it is not possible to acquire or subordinate an outstanding interest by negotiation and the interest will not interfere with the operation of the project, consideration may be given to obtaining a waiver from the Office of the Chief of Engineers on the basis of taking a calculated risk rather than resorting to condemnation (paragraph (k) of this section). Waivers will be considered on a tract-by-tract basis or on a project segment basis. Since such waivers involve several elements of the Office of the Chief of Engineers (Civil Works or Military Construction as well as Real Estate), the basis for the calculated risk must be fully explained.

(4) Concurrently with the negotiations to acquire from the surface owner, negotiations should be opened with the owner of the subsurface rights or other interests severed and outstanding in third parties by purchase or lease and required for the project, unless these interests are held in “block ownership.” Block ownership exists where a person, corporation, or other entity owns subsurface or other interests in connection with more than one surface tract and in sufficient amount for the entire interest holding to have added value, for operational or other reasons, because it is in a block ownership. In other words, block ownership exists when the acquisition of a part of the block would require the assessment of severance damage, even if the value of the interest or the amount of the severance damage would be in a nominal amount. On this basis, subsurface or other interests need not be contiguous to constitute a block ownership. Block ownership interests will not be acquired (or subordinated) piecemeal.

(5) Acquisition of the required interests, including subordination, held in block ownership should be started as soon as the extent of an operational unit is determined. As stated in paragraph (f)(4) of this section, all interests in a tract of land should be acquired at one time or as close in time as possible. Dual acquisitions of entire areas, one for surface rights and then for subsurface interests, should be avoided and acquisition of separate interests should be scheduled to coincide.
event said buildings and improvements are relocated on other land to be acquired for the project, the United States shall have good and indefeasible title to said buildings and improvements without notice or further compensation to the Vendor.

The date on which the buildings or improvements must be removed must be fixed so that there is no interference with construction or carrying out the mission of the project. The date for the removal should allow a reasonable time for removal of the improvements, usually not more than 90 days, except that for valid reasons the Division or District Engineer may grant an extension of time for removal. The right to remove such buildings cannot be prolonged indefinitely and certainly such right cannot survive the limited right of possession reserved to former owners and tenants as provided in paragraph (c) of this section.

(h) Reservation of growing crops. (1) The reservation by the owners of the right to harvest and remove growing crops should be encouraged in order to conserve land acquisition funds and to avoid the costs incident to disposal of crops by the Government, whenever there is a probability that possession of the land will not be required prior to the harvest season.

(2) Where a reservation is permitted, the following clause will be inserted in the offer, following the description of the land:

Reserving to the vendor the right to harvest all of the growing crops located on the above described land on or before ______. In the event the crops are not harvested on or before said date, the right of removal shall terminate automatically, and the United States shall have a good and indefeasible title to said crops, without notice to the vendor.

The date on which the crops must be removed must be fixed so that there is no interference with construction or carrying out the mission of the project.

(3) The consideration to the Government for the reservation will be an amount not less than the appraised value of the crops as of the date of surrender of possession as disclosed by an approved appraisal report, and such amount will be deducted from the purchase price at the time of preparation and execution of the offer.

(4) Where a tenant has an interest in growing crops, the value of his interest must be fixed by use of ENG Form 1564, Consent to Offer to Sell Real Property, which provides that the value of the tenant’s interest, as agreed upon by the landowner and tenant, will be paid from the purchase price for the land. The use of this form not only protects the tenant but, in addition, provides a simple method for extinguishing rights which the United States is legally bound to recognize. Where a tenant wishes to reserve the right to remove crops, it must be done in the name of the landowner, and in like manner. To accomplish the foregoing, any other form is satisfactory, in lieu of ENG Form 1564, as long as closing requirements are satisfied.

(i) Reservation of timber. (1) The reservation of the right to remove timber by vendors will be permitted only with the express approval of the Division or District Engineer, with the concurrence of the using service in cases other than civil works projects of the Corps of Engineers.

(2) Reservation of the right to remove timber will be handled in substantially the same manner as that described for the reservation of buildings and improvements. If owned by a third party, ENG Form 1564 will be used in the same manner as for crops unless the timber interests are held in block ownerships. The consideration to the Government for the reservation will be an amount not less than the appraised value of the timber, giving full weight to any unusual difficulty in harvesting and transporting which are caused by the size, shape and location of the stand reserved, time limitations for removal, clearing requirements over the above those normally involved in prudent harvesting, and similar factors. If necessary, the stand reserved will be re-appraised on this basis. An amount not less than this appraised value will be deducted from the purchase price at the time of preparation and execution of the offer.

(3) Where a reservation is permitted, the following clause will be inserted in the offer following the description of the land:

Reserving to the vendor the right to cut and remove on or before ______, all trees...
in excess of 111 inches in diameter at breast height (DBH) located on the above-described land. In the event the timber is not removed on or before said date, the right of removal shall terminate automatically, and the United States shall have a good and indefeasible title to said timber, without notice to the vendor.

(j) Coal, oil, gas or other minerals. Acquisition of land or interests therein for project purposes will usually include the subsurface as well as the surface, except in areas where minerals have more than a nominal value. When the mineral, oil and gas rights have an identifiable value or are the subject of separate estates in the land, such mineral, oil and gas rights will not be acquired except where the development thereof would interfere with project purposes, but mineral rights not acquired will be subordinated to the Government’s right to regulate their development in a manner that will not interfere with the primary purposes of the project, including public access, and not be inimicable to the environment. This is covered in more detail in subpart A. It is essential, however, in many acquisitions that the subsurface rights be acquired. In others, where these rights need not be extinguished, provision must be made in the offer to subordinate such rights to project requirements, by excluding the owners of such rights from the area, or limiting exercise of such rights so that they will not interfere with the primary purposes of the project, including public access. The following guidelines are applicable in these cases:

(1) Where it has been determined that subsurface rights in the vendor, or outstanding in third parties, must be acquired, extinguished or subordinated, such arrangements will be made in the course of obtaining an offer for the surface or subsurface interests. Where the negotiations for acquisition, extinguishment or subordination of subsurface rights will be delayed, and it is considered advisable to proceed with surface acquisition to keep pace with project requirements, appropriate recommendations and justification will be submitted to HQDA (DAEN-REA) WASH DC 20314 for approval.

(2) If the owners of the surface and subsurface rights are agreeable, the separate interests can be acquired in a single transaction by use of ENG Form 1564, Consent to Offer to Sell Real Property. This method is the most desirable one, and, if used, the purchase price in the offer will cover both the surface and subsurface interests and the offer will not be taken “subject to” the subsurface rights.

(3) Subordination of the subsurface interest based upon the value of the minerals in place and which will allow continued production by the mineral owner or lessee must be pursuant to such terms as will safeguard the Government’s interest and preclude a windfall to the mineral owner or lessee. Value of the minerals in place will not exceed the recoverable portion of said minerals using agreed upon production methods. See subpart A for detailed treatment in the section pertaining primarily to Real Estate Design Memoranda.

(4) When the third-party owner of subsurface rights refuses to enter into an agreement as contemplated in paragraph (j)(2) of this section, the title to the surface estate may be acquired separately, and the subsurface rights outstanding in third parties acquired as a separate transaction. The offer for the acquisition of the surface estate will provide for the conveyance of all interests of the surface owner in and to the subsurface estate, as well as all surface rights, and provide for taking “subject to” the subsurface rights outstanding in third parties. In such cases, the negotiations described in §644.83 will be conducted on the basis of the approved appraisal, less the appraised value of the outstanding subsurface rights.

(5) Where it has been determined that the subsurface rights and interests therein need not be acquired, but the owners of such rights must be excluded from the area, and the owner of the surface is the owner of the subsurface estate, the offer will contain a clause providing that he relinquish, for the period that title to the tract is vested in the Government, all rights to enter upon the lands covered by the offer or that he will limit entry and exploitation in a named manner so as not to interfere with the operation of the project. If third parties own subsurface rights or interests, a similar waiver of
the exercise of such rights must be pro-
cured from all third parties having any
interest in the subsurface estate,
whether as lessees or assignees. The
waiver by third parties must be ob-
tained at the time the offer is procured
for the surface estate, unless these sub-
surface interests are held in block own-

(k) Title exceptions—Administrative
waivers. (1) A distinction should be
made between those title defects, ob-
jections, liens or encumbrances which,
if not eliminated, might possibly de-
feat or adversely affect the Govern-
ment's title, and those interests in the
property owned by parties other than
the grantor. All encumbrances, defects,
and outstanding interests which can-
not be waived under paragraphs (k) (2),
(3), and (4) of this section must be
eliminated or a waiver of the defect se-
cured from the Attorney General.
(2) Title may be taken subject to an
outstanding third party interest which
has been administratively waived. Re-
quests for administrative waivers shall
be submitted to HQDA (DAEN-REA)
WASH DC 20314 for consideration, to-
gether with recommendations from Di-
vision and District Engineers. The rec-
ommendation for waiver should be co-
ordinated with the using agency, if
other than Department of the Army
land (military or civil works), and
should be accompanied by a certificate
signed by the Chief, Real Estate Divi-
sion or the Chief Appraiser, certifying
that the outstanding interest has no
contributory value to the estate being
acquired and will not interfere with the
purpose for which the property is being
acquired.
(3) It has previously been administra-
tively determined that all lands for De-
partment of the Army (military or
civil works) or Air Force projects may
be acquired “subject to existing ease-
ments for public roads, public high-
ways, public utilities, railroads and
pipelines,” and “to the reservations,
extceptions and any other outstanding
rights contained in or referred to in
patents issued by the United States,”
and also “to water rights, claims or
title to water, if any, or other similar
title exceptions.” A decision as to
whether any of these exceptions should
be eliminated is the responsibility of
the Division or District Engineer, after
coordination with the using service if
other than the Department of the
Army. If such interests are to be left
outstanding, they should be included in
the “subject to” clause of the Offer to
Sell.
(4) Offers to Sell may be accepted
subject to subsurface mineral interests
owned by third parties in accordance
with §644.86(d). In such case, the “sub-
ject to” clause of the Offer to Sell
should recite the specific interest
which is being left outstanding. Where
it is not possible to acquire or subordi-
nate an outstanding subsurface inter-
est by negotiations and the out-
standing interest will not interfere
with construction, operation or main-
tenance of the project, consideration
may be given to obtaining a waiver
from HQDA (DAEN-REA) WASH DC
20314 on the basis of taking a cal-
culated risk rather than resorting to
condemnation. Such waivers may be
considered on a tract-by-tract, seg-
ment-by-segment, or project basis.
Where a number of small mineral in-
terests in a project are to be rec-
ommended for waiver, it is preferable
that the recommendation be submitted
on an entire project or group of seg-
ments at one time. Such a rec-
ommendation should specifically iden-
tify the subsurface mineral interests
which are to be left outstanding, to-
gether with the estimated value of
each interest, and should be accom-
panied by a map(s) on which the areas
affected by the outstanding interests
have been outlined. The basis for the
calculated risk should be explained
fully.

(l) Possession reserved to vendor. (1)
The objective in acquisition is to ob-
tain possession for project purposes at
the earliest practicable time. It is rec-
ognized, however, that there are occa-
sions when possession by the Govern-
ment may be delayed and provision
must be made for continued possession
by the former owner in order to meet
the requirements of the Government’s
acquisition policy and to further soften
the impact of the Government’s acqui-
sition. The retention of possession will
enable the owner-occupant of farm
land, or residential property, to receive
his purchase money and remove improvements reserved by him, and permit occupants who may be former owners or tenants the privilege of harvesting growing crops and sufficient time to relocate to other locations. Accordingly, the Division or District Engineer may make provision for the former owner, occupant, and/or his tenant(s) to remain in possession of the land under the terms and conditions as follows:

(i) If the tract is to be acquired by direct purchase, the provision for retention will be written into the offer (ENG Form 42, ENG Form 2970, or ENG Form 1564) and will read substantially as follows:

Notwithstanding the provisions of paragraph (ii) of this offer, the occupant (vendor and/or his tenant) now in possession of the property, in consideration of the protection and maintenance of the land, buildings, and structures, and protection of the property against loss by fire, waste, or other causes, to which the occupant hereby agrees, reserves the right to occupy the property until ... Such occupancy is subject to revocation by the (Division) (District) Engineer at any time by giving ___ days notice in writing to the occupant if possession of the property is required by the United States; and provided further that the vendor-occupant or his tenant will remove no improvements or timber unless otherwise provided herein.

(ii) When the tract is to be acquired by condemnation, the circumstances of the right to remain in possession, which has been established as herein-after set forth, will be fully described in the correspondence forwarding the condemnation assembly to HQDA (DAEN-REA-C) WASH DC 20314. The retention of possession without payment of rent is directed to the benefit of the occupant of the property with some property maintenance consideration to the Government. This procedure will not be used to permit non-occupant owners a means of retaining possession without payment of rent and at the same time collect cash rents or unreserved crop rents from tenants.

(iii) When the land being acquired is utilized by the owner and/or tenant for agricultural or related purposes, a period of possession may be allowed, if consistent with project requirements, to permit the crop owner to harvest growing crops, and to avoid abrupt dislocations. The period of possession reserved in the offer, or for which request for the order of the court is deferred in declaration of taking cases, should generally be co-extensive with the crop season or the date that, by custom in the community, leases of such properties ordinarily expire: Provided, however, That such period does not exceed 12 months from the date title vests in the Government. Reservation of possession or delay in entry of order of possession that will interfere with the Government's requirements for use of the land will not be allowed.

(iv) In the case of owner-occupied residential property other than farm residences, possession may be permitted for a sufficient time to allow orderly relocation, but no longer than 12 months after title vests in the Government.

(v) In connection with the acquisition of commercial, industrial, tenant-occupied residential property other than residences occupied by farm tenants, and special use properties, ordinarily the procedures of reserving possession to the vendor by a clause in the offer, or deferring the right to possession under a declaration of taking proceeding, should not be utilized. In such cases, after title vests in the United States, the continued possession of the property by vendor or tenant should be formalized by an outlease from the Government. However, if in the opinion of the Division and District Engineer a reservation for possession in the offer or deferral of order of possession is desirable in certain instances from a public relations standpoint or for other compelling reasons, such cases will be forwarded to HQDA (DAEN-REA) WASH DC 20314 for consideration.

(vi) The reservation of use and occupancy in the vendor and/or tenant under the terms of the offer or deferment of possession must be based on adequate consideration to the Government. It is anticipated, however, that items such as the vendor's maintenance of the land, buildings, and structures, his protection of the property against loss by fire, waste, or other causes, and the fact that his possession can be revoked within a short period of time, will, in most instances,
offset any rental for the period of the reserved occupancy or deferred possession which might otherwise be due. However, if possession is reserved by the vendor in the acquisition of commercial, industrial, and special use properties, or other type of property having a potentially high income factor, the fair rental value for the period of reserved use or deferred possession must be deducted from the agreed purchase price.

(vii) Special provisions for protection of the Government, such as those appearing in ENG Form 1306, Department of the Army Lease—River and Harbor or Flood Control Property, will be added to the reservation clause in the offer in cases where, in the opinion of the Division or District Engineer, they are necessary or desirable. If the case is not to be closed by direct purchase, the letter to the vendor notifying him of the Government’s intention to file a declaration of taking will set forth the fact that possession is to be deferred and for what period, and will contain a statement as to the Government’s expectation that the vendor will properly maintain and protect the premises, and perform such other acts (or refrain from such acts) as deemed advisable by the Division or District Engineer. Both the letter of notice and the reservation clause in the offer will provide that the right to possession may be revoked on 30 days notice to the vendor.

(2) It is recognized that farmers may experience difficulty in finding substitute farms needed for their livelihood within one year, and other owners and tenants may encounter difficulty in relocating within one year. Therefore, the District Engineer, as an exception to the procedure in paragraph (l)(1) of this section may lease properties to former owners or tenants at the fair market rental value for up to one additional year where the circumstances justify such action, and, in such event, the record will contain the reasons justifying the action. Any occupancy by the former owner or tenant beyond 12 months from the date the property was acquired by the Government will be covered by a lease and will provide payment of the fair market rental value of the property leased.

(3) The District Engineer, through channels, may request the Chief of Engineers to grant exceptions to this policy where unusual circumstances warrant such consideration. In keeping with the intent of this action, it is hoped that such cases will be minimal in number.

(4) The following will apply with respect to advance land acquisition projects. Former owners and tenants whose properties were acquired prior to August 1, 1972 will be allowed to remain on the property by lease on a year-to-year basis until the establishment of a land management use plan and thereafter, if the property is available for leasing, for a single five-year term. Former owners and tenants whose properties are acquired after August 1, 1972 will be allowed to remain on the property by lease on a year-to-year basis until construction commences: Provided, The property is available for leasing. After construction commences, if the property is not immediately required for project purposes, such former owners or tenants will be allowed to remain on the property by lease for an additional two years. Continued possession of properties acquired after the date construction commences will be governed by the procedure outlined in paragraph (l)(1) of this section.

(m) Schools, cemeteries, and facilities of State and local governments. ER 1180–1–1, Section 73, provides for the discretionary relocation by the Chief of Engineers of schools and other local governmental facilities, and acquisition of the sites under section 111 of Pub. L. 85–500. Section 73 will be followed in the acquisition and relocation of cemeteries. Where the school was formerly a part of an abutting tract, offers for the abutting tracts will contain a clause whereby the vendor or vendors agree to quitclaim all right, title, and interest whether vested or reversionary, in and to the school site in executing the deed to the United States.

(n) Reservations prior to completion of offer. Where immediate possession of areas is necessary and is obtained by right-of-entry or the filing of condemnation proceedings, owners often
§ 644.86  32 CFR Ch. V (7–1–13 Edition)

wish to move, taking with them buildings and improvements, or wish to harvest timber or crops, prior to any offer by the Government for the sale of their land. This action is authorized only under the following conditions:

(1) Appraisals of all the land, buildings, improvements, timber, and crops of the particular tract are completed and approved.

(2) A determination is made by the Division or District Engineer that the buildings, improvements, and timber will not be needed, and the harvesting of timber or crops will not interfere with construction or operation of the project.

(3) ENG Form 1565, Agreement for Removal of Property, will be obtained from all persons having an interest in the property to be removed. This agreement will recite the amount which the owner is willing to have deducted from the value of the tract as a whole for the right of removal, which may not be less than the appraised salvage value of the buildings, improvements and timber, and the appraised value of the crops, as set out in paragraphs (g), (h), and (i) of this section.

(4) ENG Form 1565 will be obtained and accepted by the Division or District Engineer, or the Chief of the Real Estate Division.

(5) If an offer is obtained later, an appropriate reservation must be inserted in the Offer to Sell to reflect the prior agreement relative to reservations and removals of property and the agreed value of same.

(6) If it is necessary later to file a declaration of taking on the particular tract, a copy of the agreement (ENG Form 1565) will be forwarded with the correspondence transmitting the declaration of taking assembly for use of the Department of Justice in the court action. The agreement by its own terms will serve as a stipulation as to the amount to be deducted from the ultimate award for the right of removing buildings, improvements, timber or crops.

(o) Loss or damage to improvements, timber, or crops—(1) Insurance protection against risks. The Government does not carry property insurance of any nature. Vendors, however, may be advised as to their liability for certain losses, and that insurance protection against such risks is optional. When buildings, improvements, timber, or crops on land being acquired by the United States are protected by insurance in effect when acquisition activities are initiated, the time and method of cancellation and negotiation for refund on premiums paid will be the responsibilities of the vendor. In order to avoid double payments to vendors, any amounts actually collected by vendors under the terms of the insurance policies for damage or loss occurring after acceptance of the offer by the Government will be deducted from the purchase price, regardless of when title is vested in the United States or the right to possession is exercised.

(2) Fixing liability—(i) Prior to vesting title in Government. Buildings, improvements, timber, or crops on land acquired by the United States by purchase or condemnation remain the property of the vendor until title has been vested in the United States by delivery of a deed of conveyance or filing of a declaration of taking, and loss or damage thereto caused by fire, acts of God, theft or vandalism, before such vesting of title, will be borne by the vendor, except as provided below.

(ii) Possession by Government. When the right to possession has been exercised by the United States under an accepted Offer to Sell, condemnation proceeding, or possession has otherwise been surrendered to and accepted by the United States, losses arising from damage to buildings, improvements, timber, or crops by fire, acts of God, theft, or vandalism will be borne by the United States. If, however, prior to vesting of title, the right to possession has been exercised, or surrender has been made and accepted only to part of the property, and the vendor continues to use buildings and/or to cultivate or harvest crops or timber, such loss will be borne by the vendor as to buildings, timber or crops retained.

(iii) Title in Government. After title has vested, losses to buildings, timber or crops not caused by the willful act or gross negligence of vendor will be borne by the United States; provided, however, that if the vendor continues in possession of buildings, timber or crops, after title has vested, and the
deed, stipulation or order of court has reserved to the vendor the right to remove such buildings, timber or crops, loss or damage thereto, both before and after removal, caused by fire, act of God, theft, or vandalism will be borne by the vendor, only to the extent of the amount deducted from the purchase price, as provided in the deed, stipulation or order of court, for the right to remove.

(p) Other reservations. The following rights may be reserved to the owner wherever such reservation will be to the financial advantage of the Government and it has been determined by the Division or District Engineer that the reservation of the rights will not interfere with the operation of the project. These rights may be reserved in the Offer to Sell and in the condemnation estate but only whenever mutual agreement between the owner and the Government concerning all phases of the acquisition except just compensation has been reached, or by stipulation for settlement of condemnation cases, subject to approval of revestment, if any, by DAEN-REA.

(1) Rights-of-way for stock to water. Reservations of rights-of-way will be permitted for watering livestock, in the case of bona fide livestock operations, such as dairymen and ranchers. Such rights-of-way will be limited to a reasonable width and will not be permitted in public access and use areas. The reservations will be so worded as not to require the owners to fence the rights-of-way, but to provide that if they elect to do so, they must provide gates at satisfactory intervals to permit crossing of the rights-of-way.

(2) Rights-of-way for water pipeline for domestic use. Reservations of rights-of-way for water pipelines for domestic use (household, stock watering, garden, farm yard, but excluding irrigation) may be permitted by providing for the reservation of a temporary or permanent easement.

(3) Rights-of-way for water pipeline for irrigation use. (i) In areas where irrigation is commonly practiced, or is of paramount importance, owners of remainder or contiguous lands will be permitted to reserve a sufficient real estate interest to place water pipelines across Government-owned lands, in order to obtain financing for irrigation development and/or in order to be assured of being able to carry on irrigation operations. In “water rights” States (prior appropriation of water rights), the reservation of such interests will be permitted only to those owners who have established water rights from the State, or who may in the future obtain such rights. When irrigation is a project purpose, such reservation must be coordinated with the Bureau of Reclamation.

(ii) Under these circumstances, a landowner may be permitted to reserve an easement and right-of-way for a water pipeline and pumping unit across the land he conveys, by appropriate provisions in the offer to sell and in the deed to the United States. In “water rights” States, this reservation will be “for the exercise of established water rights, although no right to use water is created hereby.” (This phraseology is to be incorporated in the reservation.) The reservation will also include any pertinent provisions considered essential by the Division or District Engineer, such as requirement to install the pipeline underground and at a specified depth.

(iii) Reservations of this nature will also be permitted in those cases where acquisition is by condemnation. In these acquisitions, the reservation may be recited in the complaint and declaration of taking, whenever full agreement except as to just compensation has been reached, or it may be permitted later by stipulation.

(iv) When the project is located in an area in which the Bureau of Reclamation is developing, or planning to develop, irrigation districts or systems, prior coordination with the Bureau will provide that copies of all deeds and final condemnation judgments which recite reservations under this paragraph will be furnished to the local office of the Bureau. Thereafter, the Bureau of Reclamation will be responsible for supervising the exercise of the easements to insure compliance with Reclamation laws.

(v) Plans to provide for irrigation will be fully covered in the Real Estate Design Memorandum.

(4) Acquisitions in which these rights are to be reserved must, of course, be
based on an appraisal of the fair market value of the estate to be acquired. Since the appraisal would probably be made originally on the basis that there would be no reservation, revision must be prepared whenever the reservation appears to be appropriate, to reflect the reduction in severance damages or other financial advantage accruing to the Government. Consideration of counteroffers which include proposals for these reservations by the landowner will be based on and compared with the appraised fair market value of the estate proposed to be acquired. Deposits with a declaration of taking will be based on the appraised fair market value of the estate to be acquired by the condemnation action.

§ 644.87 Preparation and execution of offers.

(a) Fee acquisition offer form. The use of the latest revision of ENG Form 42, Offer to Sell Real Property, is required in all authorized projects, except in those cases where agreements with the landowners can be fully reflected in an executed deed, and where the provisions of §§ 644.81(c), 644.82(a), and 644.86 are not applicable or can be fully complied with without the use of an Offer to Sell. When an agreement as to terms has been reached with the owner, or a counteroffer has been received which will be considered for acceptance or submitted for consideration by higher authority, a draft of the offer will be prepared, with particular attention to the following instructions:

(1) No changes or interlineations in the printed portions of the offer form will be permitted, unless authorized by the Chief of Engineers, except where the words “general warranty deed” are changed to another form of deed.

(2) Insert legal land description of property to be acquired, or attach description by Exhibits to be identified on page 1.

(3) The word “none” should be inserted in the blank spaces following the first and third lines, respectively, on page 2 of the offer form when title is being acquired free and clear of all rights outstanding in third parties and the vendor is not permitted to except or reserve any right or interest in the property to be conveyed to the Government.

(4) Particular attention is directed to § 644.86, regarding exceptions and reservations and outstanding rights in third parties. No exceptions or reservations of crops, timber, buildings and improvements, subsurface rights, or any other interest will be incorporated in any offer to sell unless the required approvals have first been obtained.

(5) In any case where the offer form deviates from the standard approved forms or contains any conditions, exception, or reservation contrary to these instructions, the assembly will be forwarded to HQDA (DAEN-REA) WASH DC 20314 for consideration with the recommendations of the Division and District Engineer. This may be done at the same time a counteroffer is submitted to DAEN-REA in accordance with § 644.84(d).

(6) The landowner’s name will be set forth in the offer in the exact way in which it appears on record.

(7) When it is necessary for a corporate agent, fiduciary, or any person other than an individual owner to execute the offer, satisfactory evidence of the authority to act for the owner must be attached to each of the copies of the Offer to Sell.

(8) Where it is necessary to attach sheets to the offer in order to fully set forth the terms of reservations, exceptions, or outstanding rights in third parties, such additional sheets must be securely attached and initialed by all parties signing the Offer to Sell.

(b) Submission, acceptance, and distribution of offers to sell. (1) For each purchase transaction, the original offer and four copies will be signed by the landowner and spouse, if any. A copy (5th) will be left with the landowner when the offer is obtained.

(2) Division and District Engineers, the Chiefs of the Real Estate Divisions, and the incumbents of the position to
which authority is delegated as provided in §644.84(d) are authorized to accept offers to sell for the acquisition of land or interests in land and easements, licenses, permits, or similar acquisition instruments: Provided, The price set forth in the instrument is within their authority to approve or has been approved in writing by higher authority. The Division or District Engineer may also delegate to Project Managers (including the heads of any field offices with responsibility for real estate acquisition) authority to execute real estate instruments by which land or interests in land are acquired by agreement with landowners, provided the consideration set forth in the instrument is within the approved appraised value or has been approved as provided in §644.84(c). Upon approval of the offer or other instrument requiring payment to the landowner, a determination that necessary funds are available, and acceptance of the instrument under the authority contained in this subparagraph, the instrument will be distributed in accordance with regulations governing such cases.

(c) Easement acquisition offer form. (1) The use of ENG Form 2970, Offer to Sell Easement, is required for the acquisition of all types of easement estates, such as flowage, spoil, drainage, road, railroad, utility, restrictive or safety (Army and Air Force), clearance (Air Force), and other required easement acquisitions, except in those cases where agreements with landowners can be fully reflected in an executed deed, and where the provisions of §§644.84(b) and 644.86(d) are applicable or can be fully complied with without the use of an Offer to Sell. Pages 1 and 2 of ENG Form 2970, containing the terms and conditions of the acquisition, are standard and need no modification. The tract of land in which the particular easement will be acquired will be described in Exhibit “A,” and the easement estate will be set forth in Exhibit “B” to ENG Form 2970. Division Engineers are authorized to approve deviations in ENG Form 2970 in all cases where the easement does not cost more than $500: Provided, That any deviation from the estates listed in Figure 5–6 of ER 405–1–12, must have the prior approval of DAEN-REA. When easements are being acquired from a vendor from whom fee is also being acquired, ENG Forms 42 and 2970 may be combined into one instrument in order to complete the entire acquisition as one transaction.

(2) In the acquisition of easements for rights-of-way for access roads, utility lines, etc., which cross or encroach upon rights-of-way or property of railroad companies, public utility companies, cities, counties and States, ENG Form 893, License for Installations Upon Right-of-Way, may be accepted, at the discretion of the Division or District Engineer, provided it is determined that such companies, municipalities, counties, or States are not vested with authority to convey a perpetual easement and the granting of a license under the conditions recited in ENG Form 893 will protect the interests of the United States and grant sufficient use of the right-of-way or land for project purposes. Normally a license of this nature should be obtained
for a nominal consideration. Occasionally it will be necessary to provide for the payment of a small fee to cover the licensor’s engineering and administrative expenses. In such cases, the consideration for the granting of a license will not exceed $100. In cases where the licensor demands a consideration equal to the appraised value of the right to be acquired, consideration will be given to the acquisition of a perpetual easement by condemnation, if the licensor is not vested with authority to grant such an easement.

(3) The description of the tract over which an easement is being acquired should be prefixed by terminology similar to that of ENG Form 42 which makes the tract inclusive of the abutting owner’s interest in contiguous roads and other easements, if any.

(4) Offer assemblies will be prepared, accepted, and distributed in the same manner as provided for fee acquisition, except that ENG Form 3422, Notice of Acceptance of Offer to Sell Easement, will be used.

(d) Payment. After acceptance and distribution of the offer assembly and the acquisition is ready for closing, payment will be made.

(e) Cancellation of contracts. If, for any reason, it is necessary to cancel a contract for acceptance by the Government of the Offer to Sell, the cancellation will be effected by using ENG Form 1572, Agreement for Mutual Cancellation of Contract. Upon execution of this agreement by the landowner and the Division or District Engineer, or the Chief of the Real Estate Division, distribution of the original and copies of the agreement will be the same as for the accepted Offer to Sell.

(f) Transfer of tracts from purchase to condemnation. If, at any time in the course of acquisition by purchase, it becomes apparent that acquisition by purchase will involve substantial delay or cannot be accomplished, action will be taken to acquire the land by condemnation.

(g) Acquisition of land by donation. (1) In cases where the acquisition of real property has been authorized and approved by donation, ENG Form 42, Offer to Sell Real Property, or ENG Form 2970, Offer to Sell Easement, will be entered into setting forth the terms and conditions of the donation and conveyance to the United States.

(2) The offer, when approved and accepted, will be distributed in accordance with paragraph (b)(2) of this section.

(3) Title clearance and closing of donation cases are processed in the same manner as any other fee or easement acquisition.

(h) Vacation of property by landowners and tenants—(1) Notice to landowners. From the inception of the project, landowners and tenants will be instructed to notify the Division or District Engineer or Real Estate Project Manager, in writing, as soon as they vacate their property; to turn in their keys whenever possible in order that the buildings may be kept under lock; and to keep the Division or District Engineer or Real Estate Project Office advised of any changes in address in order to expedite title clearance, payment, closing action, and the distribution of funds in condemnation proceedings. Landowners and tenants will be informed that, in order to protect their interests, they should not move from their property and that the Government will not require them to surrender possession until:

(i) They have received notice of acceptance of an offer granting the Government the right of immediate possession; or

(ii) They have been served notice of the filing of a condemnation proceeding by which the Government has obtained the right of possession.

(2) Complete appraisals prior to vacation. Where an offer is accepted or a declaration of taking is filed, the individual tracts will have been surveyed and appraised. In condemnation proceedings for possession, there may be cases in which individual tract surveys and appraisals will not have been completed at the time the condemnation proceeding is filed. In such cases, landowners and tenants will not be required to surrender possession, and buildings and improvements will not be removed or destroyed in the conduct of construction work, until individual appraisals have been completed and photographs have been procured.
(3) Inspection of property. (i) As soon as a landowner or tenant gives notification that he is vacating his property, or as soon as this information is obtained from any other source, the District Engineer will immediately have a member of his staff make a personal inspection of the property and execute ENG Form 1567, Report on Vacation of Property. The inspection will be made with a view of determining whether all buildings, improvements, and crops on the land to be acquired, as listed in the appraisal report, are still on the land and in substantially the same condition as they were on the date of the appraisal.

(ii) Where buildings, improvements, and crops have been removed under a reservation in the offer, an appropriate entry will be made in paragraph (3) of ENG Form 1567.

(iii) Where buildings, improvements, and crops have been removed or destroyed in the conduct of construction work on the project, an appropriate entry will be made in paragraph (3) of ENG Form 1567.

(iv) It will be determined whether or not the land is wholly unoccupied and vacant and whether there is evidence of present use thereof for farming and other operations.

(v) The original report will be retained in the real estate project files. The second copy will be held for the use of the closing attorneys on purchase cases, or for the use of the local representative of the Department of Justice in condemnation cases.

(i) Public relations. One of the most difficult problems encountered in the real estate activities of the Department of the Army, particularly from a public relations standpoint, is that of the sudden dislocation of families, tenants as well as owners, and the relocation of these families. Special attention, therefore, will be given to their problems.

(ii) Payment of relocation assistance and acquisition. Public Law 91–666 provides for reimbursement of certain expenses incurred by owners and tenants who are displaced as the result of Federal and federally-assisted programs. Payment of relocation assistance benefits and certain costs incurred by the vendor in transfer of title to the Government and certain litigation expenses incurred by the owner is provided for under that Act.

§ 644.88 Other acquisition.

(a) Acquisition from other Federal departments and agencies—(1) Transfers. Transfers will be obtained from other Government agencies after issuance of real estate directives. Muniments of title will be obtained from the transferring agency, if possible, and be forwarded to HQDA (DAEN-REP) WASH DC 20314, with the original transfer letter or document. Title 10 U.S.C. 2571 authorizes transfer of real property within the Department of Defense (10 U.S.C. 2662).

(2) Permits. Upon receipt of a proper request from an authorized command, service or agency, Division or District Engineers and the Chiefs of the Real Estate Divisions are authorized to obtain, accept, and renew permits from other Government departments or agencies for the temporary (five years) use of land (except public domain for Air Force) and buildings. The use of over 500 acres of public domain land must have prior approval by the Assistant Secretary of Defense (MRA&L) pursuant to Department of Defense Directive 4165.12.

(b) Withdrawal of public domain lands and right-of-entry permits for temporary use. (1) Withdrawal of public domain lands will be necessary if a site is selected for construction and/or there is a continuing military use. Except in time of war, withdrawals in excess of 5,000 acres for military use must be by authority of an Act of Congress (Pub. L. 85–337, 43 U.S.C. 156).

(2) Requests for withdrawal of public domain land will be made to the appropriate State or Regional Supervisor of the Bureau of Land Management (BLM), Department of the Interior, by the Division or District Engineer, pursuant to 43 CFR part 295, as soon as a real estate directive is issued.

(i) If use of land is needed promptly to meet a construction deadline or for other use, the request for withdrawal will contain this information, and the BLM supervisor will be requested to expedite submission of his report to BLM in Washington, and to
publish the proposed withdrawal in the \textit{Federal Register} as soon as possible.

(ii) A copy of the request will be forwarded to HQDA (DAEN-REA) WASH DC 20314 (with a copy to HQ, USAF (PRER), WASH DC 20330, on Air Force projects), with request for assistance in obtaining issuance of the Public Land Order in time to meet construction or military use deadline.

(3) Pursuant to authority of 43 U.S.C. 416, requests for withdrawal of public domain lands may also be made to the appropriate State or Regional BLM Supervisor by the Division or District Engineer for the reservation of those public domain lands which will eventually be required for authorized Civil Works projects, in order to proceed with planning phase work and to prevent adverse private entry thereon. Such action will permit administrative jurisdiction to remain with the present Government agency for continued utilization not in conflict with the eventual purpose of the project. A copy of the request will be furnished to DAEN-REA.

(4) If a withdrawal is requested, the BLM supervisor cannot grant a permit to use the area; however, permits can be obtained for survey and exploration purposes, since these do not involve construction or military use of the land.

(5) Necessary rights-of-way will be obtained under the authority of section 507, Pub. L. 94–579, approved October 21, 1976.

(c) Acquisition of outstanding rights on public domain—(1) Acquisition of possessory rights to mining claims. (i) Upon issuance of a real estate directive to extinguish outstanding mining interests in the public domain, and notification that the Bureau of Reclamation (BLM) has withdrawn the public domain from appropriation under the public land laws and the public mining and leasing laws, the Division or District Engineer will, if necessary to obtain possession for construction or other project purposes, recommend to the Chief of Engineers the filing of a complaint in an eminent domain proceeding, based on a perimeter description of the project, and the obtaining of an order of immediate possession. Thereafter, the Division or District Engineer will promptly determine the possessory mining claims within the area withdrawn, and he is authorized to acquire such claims for either a nominal sum or an amount not to exceed the combined estimated costs of obtaining a detailed appraisal report and having the validity of the claim investigated by the BLM. The authority is limited to $1,000 per claim.

(ii) If an offer to settle is made on the basis provided in paragraph (c)(1)(i) of this section, and is not satisfactory to the possessor mineral owner, the Division or District Engineer will request the BLM to investigate the validity of the claim. In such case, under Controller General Decision B-143921, the District Engineer is authorized to make an agreement with the BLM for reimbursement of the following:

(A) Examination of the claim itself and assembling of the evidence to support the claim of invalidity.

(B) The presentation of the evidence, the cross-examination of witnesses for the mining claimant and other related expenses (subpart A).

(iii) The Corps of Engineers is not authorized to reimburse the BLM for hearing of the evidence and the rendering of the decision as to the validity of the mining claim.

(iv) If determined to be valid, claims will be appraised and an offer will be made to the owner at the approved appraisal value. BLM is authorized to determine value of the claims and the Division or District Engineer may wish to arrange with BLM to perform this service on a reimbursable basis. In the event the offer based on the approved appraisal is not acceptable to the owner, and a reasonable settlement cannot be effected by negotiation, the Division or District Engineer will forward a report to HQDA (DAEN-REA) WASH DC 20314 with recommendation as to whether the claim should be acquired by declaration of taking or be left outstanding. Those cases in which occupants were dispossessed under the order of immediate possession, referred to in paragraph (c)(1)(i) of this section, will be given priority attention in all phases of the procedure set out herein, including preparation and submission of declaration of taking assemblies in appropriate instances.
Acquisition of grazing rights. (i) Grazing rights in the public domain are granted pursuant to the provisions of a series of Congressional acts commonly referred to as the Taylor Grazing Act, 43 U.S.C. 315 et seq. Section 315q of this Act provides as follows:

Whenever use for war or national defense purposes of the public domain or other property owned by or under the control of the United States prevents its use for grazing, persons holding grazing permits or licenses and persons whose grazing permits or licenses have been or will be cancelled because of such use shall be paid out of the funds appropriated or allocated for such project such amounts as the head of the department or agency so using the lands shall determine to be fair and reasonable for the losses suffered by such persons as a result of the use of such lands for war or national defense purposes. Such payments shall be deemed payment in full for such losses. Nothing contained in this section shall be construed to create any liability not now existing against the United States.

It is emphasized that payments under this section are administrative; further that this section applies only to military projects.

(ii) Upon issuance of a real estate directive to acquire or terminate grazing rights in the public domain or other property owned or controlled by the United States and notification that the Government department controlling such lands has granted a right-of-entry or transferred the lands to the Departments of Army or Air Force, the Division or District Engineer will initiate action to acquire or terminate such grazing rights as authorized by the real estate directive.

(iii) Appraisals will be prepared in accordance with subpart B and the guidelines set forth in Comptroller General Decision No. B-132774, dated October 9, 1957.

(iv) Discussions with landowners concerning acquisition of a ranch unit will be conducted in accordance with the procedures for fee acquisition.

(v) Offers will be prepared, accepted, and distributed as provided in §644.87.

(vi) Title procurement and title clearance relating to the acquisition of title to any fee lands within the ranch unit will be the same as in any other fee acquisition. In preparing title evidence covering leasehold interests, a search of the records will be made by the Division or District Engineer Office and ENG Form 909, Attorney’s Preliminary Certificate of Title, will be prepared. In connection with the search of the records, it should be noted that Federal grazing privileges may be pledged or encumbered with mortgages.

(d) Acquisitions under provisions of relocation contracts. (1) When land or interests therein, including subordination of minerals, required for project purposes are acquired under the provisions of relocation agreements negotiated in accord with Section 73, ER 1180–1–1, it will be necessary to procure title evidence covering such land and interests. If the value of interests so acquired is not otherwise determinable for compliance with §664.84, said value will be determined by the Division or District Engineer by means of a memorandum appraisal to be retained in the tract file. While this type of acquisition does not involve the closing procedure set forth in §644.70, so much of the title assembly described as is applicable, plus an executed or certified true copy of the relocation contract, will be used in the examination and approval of the title. The disposition of final title assemblies will be governed by §644.71.

(2) The procedures described in §§644.81 through 644.88 do not apply to the extinguishment of outstanding rights, including subordination of easements and similar interests, under the provisions of relocation contracts, as differentiated from the acquisition of land or easements, or the subordination of oil, gas, and other mineral rights, to be utilized for project purposes.

(e) Acquisition by exchange—(1) Military. The authority to acquire land by exchange for military projects is provided in 10 U.S.C. 2672, and in the Military Construction Authorization Act passed each year. As an example sections 601 and 702, Pub. L. 95–82, August 1, 1977, the Military Construction Authorization Act, 1978, provides in part, that “the authority to acquire real estate or land includes authority to make surveys and to acquire land, and interests in land (including temporary use), by gift, purchase, exchange of
Government-owned land, or otherwise.” Title 10 U.S.C. 2662a–4 provides that a transfer of real property owned by the United States to another Federal agency or another military department or to a state must be reported to the Committees on Armed Services if the estimated value of the property is more than $50,000. A prerequisite to any acquisition by exchange is authority for the acquisition.

(2) Civil works. The authority to exchange land or other Government property for private lands or property in execution of an authorized river and harbor or flood control work or improvement is found in 33 U.S.C. 558b and 558b–1.

(3) Coordination with the Office of Management and Budget (OMB). OMB requests that each proposal to use Government-owned property in a land acquisition exchange be cleared with the appropriate Associate Director of OMB. Disposal actions where exchange through the authority of the General Services Administration or specific legislation is envisioned will be cleared with OMB prior to filing a disposal report pursuant to 10 U.S.C. 2662. A draft letter to the Associate Director, Office of Management and Budget will be submitted to HQDA (DAEN-REA) WASH DC 20314 stating the requirement for the new acquisition, the description of the property to be excessed, its estimated fair market value, and a justification for the exchange of that property as constituting its highest and best use. OMB clearance will be required before disposal reports outlining exchange proposals are filed with the Congress.

Involuntary Acquisition by the United States

§ 644.101 General.

This Section describes procedures of the Corps of Engineers relating to the involuntary acquisition of land and interests in land on the basis of a physical appropriation or use by the United States. It is applicable to all Division and District Engineers having real estate responsibilities.

§ 644.102 Examples of involuntary acquisitions.

While the Secretary of the Army and Secretary of the Air Force have no authority to acquire interests in real property except under express authorization and appropriation made by Congress, the Government may, nevertheless, in the performance of an authorized act involuntarily acquire an interest in real property, for which the owner is entitled to just compensation. Whenever a plaintiff successfully prosecutes litigation which establishes that an interest in real property has been taken, the interest so taken should be confirmed in the form of a grant, wherever possible. The instrument should be recorded in the public land records and permanently retained in the real estate files, as evidence of the interest taken and as a protection against possible future claims of purchasers for value without notice. No employee or representative of the Corps of Engineers shall intentionally make it necessary for an owner to institute legal proceedings to prove the fact of the taking of his property, as prescribed by Pub. L. 91–646. Examples of involuntary acquisition are:

(a) Damage to real property caused by flooding, saturation, seepage, erosion, or other causes arising out of the construction, operation, or maintenance of an authorized project.

(b) Damage as a result of overflights of aircraft.

(c) Other instances where Government actions result in a restriction of the use of property.

§ 644.103 Litigation Reports.

In those cases where a landowner files suit alleging that the Government took his property or an interest therein, a litigation report should be furnished in accordance with ER 1180–1–1. Litigation reports will be submitted in quadruplicate in cases involving military installations, and in triplicate in cases involving civil works. District and Division Engineers will furnish an additional copy direct to the local United States Attorney in actions in a United States District Court. In addition to the information required by ER
195

Department of the Army, DoD

§ 644.104

In any case in which the Court determines that the United States has taken an interest in real property, the Department of Justice will attempt to have included in the findings and in the judgment a precise description of the interests taken. An attempt will also be made to provide in the judgment that payment by the United States will not be required until the plaintiff has delivered a deed or other acceptable conveyance of the interest taken.

(a) Preparation of instrument. Upon receipt from the Department of Justice of information as to the nature of the settlement which has been reached, a deed will be prepared, drafted in accordance with § 644.70, covering the estate provided in the judgment.

(b) Execution and recording of deed. The Division or District Engineer will obtain proper execution of the deed,

(1) Details of any prior acquisition of clearance easements over the same property;

(2) Statement as to any outstanding clearance easement directives, including criteria for approach and transition zones, status of negotiations, and copies of appraisal reports;

(3) Statement that all acquisition of clearance easements has been stopped, unless their prompt acquisition is necessary to provide for current flight operation; and

(4) Recommendation that there be included in the estate, in the event of settlement, provisions for the clearance of existing obstructions and prohibition against future obstructions, provided that circumstances will permit a delay in the acquisition of a clearance easement until completion of the litigation.

(c) Appraisal reports. Appraisal reports will be submitted to HQDA (DAEN-REE) WASH DC 20314 after the Department of Justice has determined the date (or dates) of taking. These reports will reflect the “before” and “after” values of the property, based on the assumption that the United States acquired an easement on that date (or dates).

§ 644.104 Procurement of deed and title assembly.

In any case in which the Court determines that the United States has taken an interest in real property, the Department of Justice will attempt to have included in the findings and in the judgment a precise description of the interests taken. An attempt will also be made to provide in the judgment that payment by the United States will not be required until the plaintiff has delivered a deed or other acceptable conveyance of the interest taken.

(a) Preparation of instrument. Upon receipt from the Department of Justice of information as to the nature of the settlement which has been reached, a deed will be prepared, drafted in accordance with § 644.70, covering the estate provided in the judgment.

(b) Execution and recording of deed. The Division or District Engineer will obtain proper execution of the deed,

(1) Details of any prior acquisition of clearance easements over the same property;

(2) Statement as to any outstanding clearance easement directives, including criteria for approach and transition zones, status of negotiations, and copies of appraisal reports;

(3) Statement that all acquisition of clearance easements has been stopped, unless their prompt acquisition is necessary to provide for current flight operation; and

(4) Recommendation that there be included in the estate, in the event of settlement, provisions for the clearance of existing obstructions and prohibition against future obstructions, provided that circumstances will permit a delay in the acquisition of a clearance easement until completion of the litigation.

(c) Appraisal reports. Appraisal reports will be submitted to HQDA (DAEN-REE) WASH DC 20314 after the Department of Justice has determined the date (or dates) of taking. These reports will reflect the “before” and “after” values of the property, based on the assumption that the United States acquired an easement on that date (or dates).

§ 644.104 Procurement of deed and title assembly.

In any case in which the Court determines that the United States has taken an interest in real property, the Department of Justice will attempt to have included in the findings and in the judgment a precise description of the interests taken. An attempt will also be made to provide in the judgment that payment by the United States will not be required until the plaintiff has delivered a deed or other acceptable conveyance of the interest taken.

(a) Preparation of instrument. Upon receipt from the Department of Justice of information as to the nature of the settlement which has been reached, a deed will be prepared, drafted in accordance with § 644.70, covering the estate provided in the judgment.

(b) Execution and recording of deed. The Division or District Engineer will obtain proper execution of the deed,
record the same, procure a final certificate of title of a commercial title company or a staff attorney, and obtain a final title opinion pursuant to the provisions of the Delegation to the Department of the Army for the Approval of the Title to Lands Being Acquired for Federal Public Purposes, dated December 4, 1970, and issued by the Assistant Attorney General, Land and Natural Resources Division, Department of Justice. The title assembly and final title opinion should be forwarded to HQDA (DAEN-REA-P) WASH DC 20314, with information copy of transmittal letter to Division Engineer.

(c) Notification to the Department of Justice. If the recorded deed and the final certificate of title are not readily available, the Division or District Engineer will notify the Land and Natural Resources Division of the Department of Justice by letter, with a copy to the appropriate United States Attorney, that the deed has been properly executed and delivered by the plaintiff and has been entered for record in order that settlement will not be delayed.

(d) Disposition of final title assembly, mapping, and audit. When a final title opinion has been obtained, the Division or District Engineer will assign a tract number to the areas in which the interest has been acquired, will add the tract to the project map, and will transmit the final title opinion and related papers to HQDA (DAEN-REA-P) WASH DC 20314. The tract will be included in the audit of the installation to which it pertains. Audits will be revised for this purpose, if necessary. The amount of the judgment received by the plaintiff will be shown in the audit assembly, with a proper notation that it represents the amount of the judgment entered in the litigation, which will be identified in the audit by its civil number, and by designation of the Court in which it was rendered. A copy or abstract of the judgment will be inserted in the District Office audit assembly, identified as follows:

Directive by judicial decree for the acquisition of Tract No. containing ____ acres.

(e) Action in lieu of confirmatory deed. Where a confirmatory deed cannot be obtained, the Division or District Engineer will obtain from the Clerk of the Court a copy of the final judgment (or an appropriately excerpted copy of the final judgment), acknowledged or properly certified to permit recordation in the local land records. The Division or District Engineer will record same and later transmit the appropriate title assembly to HQDA (DAEN-REA-P) WASH DC 20314. If the final judgment does not contain language which clearly vests title in the United States of the interest in land for which compensation was paid, request should be made of the United States Attorney to move the Court to amend the judgment to show that such title has vested.

ACQUISITION BY CONDEMNATION PROCEEDINGS

SOURCE: Sections 644.111 through 644.121 appear at 44 FR 8184, Feb. 8, 1979, unless otherwise noted.

§ 644.111 General.

Sections 644.111 through 644.121 describe the procedures of the Corps of Engineers relating to the acquisition of real estate and interests therein by condemnation proceedings. It is applicable to the Office of the Chief of Engineers (OCE) and to all Division and District Engineers having real estate responsibilities.

§ 644.112 Applicable statutes in condemnation proceedings.

A complaint in condemnation, and any declaration of taking filed in conjunction therewith, will contain a citation of the congressional authorization and appropriation acts for the particular project, and any other applicable acts of Congress. Existing acts of Congress authorizing the acquisition of land and interests therein are outlined in AR 405–10 and subpart A. Acts of Congress applicable, generally, to condemnation proceedings are outlined below.

(a) Military projects. (1) Act of Congress approved August 1, 1888 (25 Stat. 357, 40 U.S.C. 257) authorizes the head of any Government department or agency to acquire real estate, otherwise authorized for acquisition, by condemnation proceedings.

(2) Section 2633 of title 10, United States Code, authorizes the Secretary
of a military department to acquire by condemnation any interest in land, including temporary use of the site, construction, or operation of fortifications, coast defenses, or military training camps.

(3) Section 9773 of title 10, United States Code, authorizes the Secretary of the Air Force to acquire by condemnation additional permanent air bases and depots, enlarge existing air bases and depots, bombing and machine gun ranges, and areas for the training of tactical units.

(4) Section 2233 of title 10, United States Code, authorizes the Secretary of Defense (with authority to delegate) to acquire by purchase, lease, or transfer, facilities necessary for the Reserve Components. The authority to acquire by purchase has been held to include the authority to condemn. Therefore, this section authorizes condemnation for both Army and Air Force Reserve Training Sites.

(b) Civil works projects—(1) Rivers and harbors. (i) Act of Congress approved April 24, 1888 (25 Stat. 94, 33 U.S.C. 591) authorizes the Secretary of the Army to cause proceedings to be instituted for the acquisition by condemnation of any land, right of way, or material needed to maintain, operate, or prosecute works for the improvement of rivers and harbors for which provision has been made by law.

(ii) Section 5 of the Act of Congress approved July 18, 1918 (40 Stat. 911, 33 U.S.C. 594) provides that possession of lands being acquired by condemnation proceedings for river and harbor works may be taken, provided adequate provision shall have been made for payment of just compensation.

(2) Flood control. (i) Act of Congress approved August 18, 1941 (55 Stat. 650, 33 U.S.C. 701c-2) makes the provisions of section 5 of the Act of Congress approved July 18, 1918 (paragraph (b)(1)(ii) of this section) applicable to flood control works.

(c) Other pertinent statutes. (1) Act of Congress approved July 18, 1918 (40 Stat. 911, 33 U.S.C. 594) provides that the United States shall have the right to take immediate possession of land to the extent of the interest condemned. The exercise of this right is subject, however, to the policy considerations set forth in the Act of Congress approved January 2, 1971, Pub. L. 91–646 (84 Stat. 1894).

(2) Act of Congress approved February 26, 1931 (46 Stat. 1421, 40 U.S.C. 258a) makes provision for the filing of a declaration of taking in conjunction with condemnation proceedings and provides that title to the land or interests in land included in the declaration of taking vests in the United States upon filing with the court and deposit of the estimated compensation in the registry of the court.

§ 644.113 Filing of complaint without declaration of taking.

(a) Only in exceptional cases will the Chief of Engineers give favorable consideration to the filing of a complaint in condemnation, and the request for an order of possession, without the concurrent filing of a declaration of taking and deposit of estimated compensation in the registry of the court. Examples of situations in which complaints may be used are as follows:

(1) Immediate possession is required for some essential military need and time does not permit preparation of an appraisal, title work, or negotiations.

(2) Condemnation proceedings are necessary in connection with a cemetery, in order to secure court approval
32 CFR Ch. V (7-1-13 Edition) § 644.113

of the relocation and reinterment plan in accordance with the procedure outlined in ER 1180-1-1.

(3) Where right of entry for survey and exploration, appraisal purposes, or other similar need is required, and there is no material interference with the owner’s possession. However, where there is material interference with the owner’s possession, or it is considered there will be significant damage to the land, a deposit of estimated compensation may be necessary.

(b) Approval required. Prior to submission of a complaint assembly, except in cemetery cases, all pertinent facts justifying the need for such action will be submitted to the Division Engineer for approval. If the proposed action is approved, the Division or District Engineer will inform all affected landowners and tenants of the action being taken, the necessity therefor, and the subsequent procedure to be followed by the Government in conducting negotiations to acquire the land after the filing of the complaint.

(c) Complaint assembly. The following assembly will be submitted to HQDA (DAEN-REA-C) WASH DC 20314 where only a complaint is to be filed:

1. Five copies of individual tract descriptions identified as Exhibit “A”.
   (Reproduced copies will be accepted if clear and legible.)

2. Five copies of segment or project maps, showing each tract or area to be acquired shaded or outlined in red and identified as Exhibit “B”.

3. Five copies of a list of the names and addresses of the persons purporting to own the tracts or having an interest therein, identified as Exhibit “C”.

4. Five copies of the exact estate or interest to be acquired, identified as Exhibit “D”.

5. In Air Force projects and acquisitions for other agencies, one additional copy of each exhibit will be required.

6. In Air Force project acquisitions, the additional information set out in §644.114(f) will be submitted, in duplicate.

7. In those jurisdictions that adopt the alternate form declaration of taking, complaint assemblies should be similar to the schedule submitted for the declaration of taking assembly.

(d) Letter of transmittal. Where a complaint assembly is submitted, the letter of transmittal should include the following information:

1. A statement indicating the date of approval of the Real Estate Design Memorandum in civil works projects or the date of the Real Estate Directive for other projects, and whether the land included in the complaint assembly is within the approved project boundary line, together with the citations of the authorization and appropriation acts which cover the acquisition.

2. The approved appraised valuation and date of appraisal of the interest to be acquired or, if appraisals have not been prepared, the estimated value with a statement indicating the basis of the estimate.

3. Information as to whether the land included in the complaint assembly is vacant or occupied, together with the date any occupants will be required to vacate the premises.

4. If possession is required, an explanation of the need therefor and the reasons why the normal land acquisition schedule was not met.

5. Results of contacts with the landowners and tenants and their views with respect to the filing of condemnation proceedings.

6. A statement as to the plan and schedule to acquire such land after filing of the complaint in order to make funds available to the landowners and tenants.

7. In assemblies concerning land for other than civil works projects, a statement indicating whether all of the land authorized in the Real Estate Directive is included in the assembly. Any variance between the area or estate authorized in the directive and those in the assembly should be fully explained.

8. In military assemblies, a statement of expected local resistance to the proposed acquisition and efforts made to adjust military requirements to the local situation.

9. Whether there have been any Congressional inquiries regarding the acquisition.

(e) Action after filing complaint. After filing of a complaint proceeding, action to acquire the land involved, either by
direct purchase or by the filing of a declaration of taking, will be completed as soon as possible.

(1) Where a satisfactory Offer to Sell is obtained and accepted, the transaction will proceed through the stages of title clearance, payment and closing. Upon final approval of title, the Division or District Engineer will recommend to the Chief of Engineers that the Department of Justice be requested to dismiss the tract from the proceeding.

(2) Where a satisfactory lease of the premises included in a leasehold condemnation proceeding is obtained and accepted, the Division or District Engineer will recommend to the Chief of Engineers that the Department of Justice be requested to dismiss the tract from the proceeding.

(3) The recommendation of the Division or District Engineer for dismissal of a tract from condemnation will include the following information:
   (i) Name of project.
   (ii) Caption of the complaint and civil action number assigned thereto.
   (iii) The date the final title approval was rendered; on lease cases, the date the lease was accepted.
   (iv) A statement as to whether the particular deed or lease includes the same land described in the complaint under the same tract number.
   (v) A statement as to whether the particular deed or lease includes all outstanding interests involved in the complaint insofar as the specific parcel of land is concerned. If all outstanding interests are not covered by the deed or lease instrument, a statement of the proposed method of acquiring those interests which remain outstanding, either by filing a declaration of taking or by direct purchase, or a recommendation that they be left outstanding permanently.

§ 644.114 Acquisition by declaration of taking.

If it has been determined that acquisition of a tract cannot be accomplished by purchase due to failure to reach an agreement with the owners as to value, inability to contact the owners, title defects, or for other reasons, acquisition will be completed by the filing of a declaration of taking in a condemnation proceeding and the concurrent deposit of the estimated compensation in the registry of the court. The requirements for a declaration of taking are set forth in 40 U.S.C. 258a.

(a) Declaration of taking assembly. The assembly to be submitted by the Division or District Engineer to the Chief of Engineers, with a recommendation for the filing of a declaration of taking, will contain the following:
   (1) Seven copies of the declaration of taking. (Reproduced copies will be accepted if clear and legible). The copy to be executed and filed in court must be free of errors and erasures.
   (2) Seven copies of tract descriptions and names and addresses of purported owners, identified as Schedule “A” to the declaration of taking.
   (3) Seven copies of a segment or project map, showing the individual tracts outlined in red, or shaded in such a way as to identify them, constituting Schedule “B” to the declaration of taking.
   (4) In acquisitions for Air Force and other agencies, one additional copy of each of the above is required.
   (5) As to tracts which are appraised at $50,000 or more, it is necessary to have at least two appraisals for each such tract in condemnation. One copy of each appraisal will be forwarded with the assembly for those tracts valued less than $100,000, and two copies where the value is $100,000 or more. Also, a copy of the appraisal should be forwarded when there is a counteroffer of $50,000 or more, no matter what the appraisal is. In all cases where two appraisals are necessary, at least one will be by a contract appraiser approved in advance by the United States Attorney in whose jurisdiction the case will be filed.
   (6) Appraisals must be on a current basis so that at the time of submission of the assembly, the review certificates should indicate that the review has been made within thirty days prior to submission of the assembly.
   (7) Guides in preparing declarations of taking for acquisitions for the Departments of the Army (Military and Civil) and Air Force are contained in Figure 5–5 in ER 405–1–12.
   (8) Each case where there is an accepted Offer to Sell on which we will
ask the Department of Justice to obtain judgment should be submitted as a separate Declaration of Taking.

(b) **Negotiator’s report.** Each declaration of taking assembly should be accompanied by a separate Negotiator’s Report, ENG Form 3423 (Parts I and II), in duplicate, for each tract of land included in the assembly. The Negotiator’s Report should be current, i.e., it should indicate a contact with the landowner, or his representative, at a time reasonably close to the date of submittal of the assembly, and should reflect that actual, practical and realistic negotiations were conducted in accordance with the procedure set forth in §644.83. The Negotiator’s Report should be complete, but should be concise and not made unduly lengthy by extraneous material. It should contain so much of the following information as may be pertinent:

1. A brief physical description of the property, including its present use and highest and best use claimed by both the Government and the landowner.

2. Number of discussions and date and place of each discussion, and a statement that the landowner was furnished a summary of the basis for the Government’s valuation prior to negotiations.

3. Statement of each offer made by the negotiator, any counteroffer received from the landowner, and any figures suggested by the negotiator in an effort to obtain a reasonable counteroffer above the Government’s estimate of value.

4. Where the discussions reveal that further negotiations would not be productive, a statement that the real estate representative explained that it was necessary that the interests be obtained through condemnation, not in the sense of a threat, but as an effort on behalf of the Government to secure an impartial determination by the court of the differences of opinion as to value, and in order to make funds available to the landowner.

5. If the owner cannot be contacted for the purpose of conducting negotiations, a full explanation of the circumstances and the efforts made to contact the owner should be set forth in the Negotiator’s Report.

6. A statement that any remaining property of the owner enjoys access and is an economic unit, or if it is an uneconomic remainder, that the Government has offered to acquire the remainder.

(c) **Letter of transmittal.** The letter of transmittal to be submitted with a declaration of taking assembly will contain the following:

1. The date of the real estate directive or the date of approval of the real estate design memorandum which includes the land to be condemned, a statement that the land is within the approved project boundary line, and the date of approval of the boundary line.

2. A statement concerning the availability of funds.

3. A list of the dates of the appraisals of the tracts in the assembly and the dates of the last review thereof. If more than one approved appraisal exists for any tract, the deposit will be in the amount of the highest approved appraisal. If the value of growing crops has been included in the appraisal, a statement concerning same is required in the transmittal letter pursuant to paragraph (h)(3) of this section.

4. A statement that all owners of land included in the assembly, whose addresses are known, have been notified in writing that condemnation will be recommended and the reason therefore. The information furnished to the owners should include the name and address of the United States Attorney who will advise and assist them in applying for withdrawal of the funds deposited in the registry of the court. The notice to the owners should also state the date on which possession of their property will be required.

5. A statement concerning the date when possession of each tract included in the assembly should be obtained. This should include information as to when the 90-day notice was given, as
required by section 301(5) of Pub. L. 91–646 (84 Stat. 1894), or if not required, an explanation as to why not.

(6) In assemblies involving other than civil works projects, a statement as to whether or not all of the land authorized in the real estate directive is included in the proposed declaration of taking. Any variance that may exist between the acreage in the directive and the acreage in the declaration of taking should be fully explained.

(7) For military projects, a statement of the expected local resistance to the proposed acquisition by condemnation, and the efforts which have been made to adjust requirements to the local situation.

(8) For those assemblies involving the first case in a particular project, information as to:

(i) When the initial land acquisition for the project took place.
(ii) The total acreage for the project and the estimate of the cost thereof; if available, two copies of the project brochure furnished to landowners should be forwarded.
(iii) Whether or not an environmental impact statement has been filed, and, if not, when it is expected to be filed.

(9) Two copies of each accepted Offer to Sell covering any of the tracts included in the declaration of taking will be submitted with the assembly.

(10) A statement as to whether there have been any Congressional inquiries regarding the acquisition.

(d) Title defects. If a tract is recommended for condemnation due to title defects, three copies of the title opinion will be submitted with the assembly.

(e) Deposit of funds. Two copies of the declaration of taking, as finally approved and signed, will be transmitted by the Chief of Engineers to the Division and District Engineer. Procurement and delivery of a check to the United States Attorney for deposit in the registry of the court will be authorized, subject to the availability of funds.

(f) Additional information to accompany Air Force acquisitions. Each condemnation assembly (complaint or declaration of taking) covering the acquisition of land for an Air Force project will include the following information and material, in duplicate:

(1) A map showing the base boundaries, outlining in red all land included in the applicable real estate directive, and showing the land included in the condemnation assembly hachured in red. In the case of an off-base facility, the map will show the nearest boundary of the main base with relation to the off-base facility, outlining in red all land in the applicable real estate directive, with the land covered by the condemnation assembly hachured in red.

(2) On the same map or a larger scale map, the following information on each tract in the applicable real estate directive:

(i) Tract number.
(ii) Acreage.
(iii) Ownership.
(iv) Contours.
(v) Existing improvements.

(vi) Proposed improvements, including utilities, drainage ditches, and other supporting facilities.

(3) Summary of status of acquisition of all land included in the applicable real estate directive. ENG Form 3905–R will be used for this purpose. All discrepancies in figures for acreages and costs should be fully explained.

(4) If any of the land included in the applicable real estate directive is held under voluntary lease or leasehold condemnation, report for each such tract the annual rental, the period of time the leasehold interest has been held, and whether it is a voluntary lease or a condemnation leasehold. If the land is not under lease, this fact should be reported.

(5) If the United States has previously acquired an easement interest (clearance easement, safety area easement, etc.) in any of the land included in the condemnation assembly, identify the real estate directive which authorized the previous acquisition by number, date, interest acquired, acres, cost and method of acquisition (including lease number, tract number, caption with civil action number as applicable). A negative report is required.

(6) If severance damage is involved in any of the land included in the condemnation assembly, include a detailed statement of the facts and justification.
for the severance allowed, unless the severance damage has been adequately explained in a Real Estate Planning Report or a Real Estate Requirements Estimate, in which case such Report or Estimate should be identified for reference.

(7) A copy of the appraisal report on which the deposit in a declaration of taking is based, irrespective of value.

(g) Interests included in declaration of taking. (1) The estate recommended for use in a declaration of taking should conform to the estate approved by the Chief of Engineers in Civil Works projects and to the applicable directive in military and other agency projects. Any deviation should be fully explained and justified in the transmittal letter. Examples of estates which have been approved for use in declarations of taking are contained in Figure 5–6 in ER 405–1–12. A condemnation proceeding is an in rem action. The definition of “property” and what constitutes property is generally determined by reference to State law. Therefore, full consideration should be given to the applicable State law in connection with requests for deviations from the standard approved estates.

(2) Normally, under the “unit” rule a condemnation proceeding should include all interests in a given tract authorized for acquisition even though an Offer to Sell may have been obtained and accepted from the surface owner with an outstanding interest in the subsurface estate recited in the “Subject to” paragraph. In such a case, if it is necessary to condemn due to title difficulties or failure of the owner to carry out the terms of the Offer to Sell, the deposit will be increased by the appraised value of the outstanding subsurface interest. The only exception to including subsurface interests outstanding in third parties is in the case of block ownership of subsurface interests; i.e., where a person, corporation, or other entity owns subsurface interests under more than one surface tract and in sufficient amount for the entire interest holding to have added value, for operational or other reasons, because it is in a block ownership. In other words, block ownership exists when the acquisition of a part of the block would require the assessment of severance damage, even if the value of the interest or the amount of the severance damage would be in a nominal amount. On this basis, subsurface interests need not be contiguous to constitute a block ownership.

(3) If future negotiations to acquire or subordinate the subsurface interests left outstanding under paragraph (g)(2) of this section (or any non-block subsurface interests “excepted” from direct purchase cases) are unsuccessful, and the outstanding interest cannot be waived under the provisions of §644.86, then acquisition or subordination of the outstanding interest should be accomplished by condemnation proceedings. In so doing, block ownerships should be condemned as a unit rather than on a piecemeal basis. Full information should be submitted with such assemblies as to the method of acquisition of each surface ownership affected by the subsurface acquisition.

(h) Payment for crops. At the time the declaration of taking assembly is prepared, it will be necessary that a determination be made as to whether the value of growing crops should be added to the value of the land improvements in determining the amount to be deposited as estimated compensation. The determination will be made as follows:

(1) If the crops have been harvested, or it is known or highly probable that the crops will be harvested by the landowner or tenant, no deposit will be made for the crops.

(2) The approved appraised value of crops will be included in the amounts to be deposited in all other cases.

(3) The letter forwarding the declaration of taking to the Chief of Engineers will state whether the value of growing crops has been included in the amount recommended for deposit, and will set forth a statement of the facts upon which the action is based.

(i) Filing and possession. Upon the filing of a complaint, accompanied by a declaration of taking, the court has the power to fix the time within which and the terms upon which the parties in possession shall be required to surrender possession to the United States (40 U.S.C. 258a). Requests for orders of possession should be made only after all requirements of Pub. L. 91–646 (84
§ 644.115

Revestment of title by stipulation.

When fee title or an interest in property has been acquired by the United States by declaration of taking in a condemnation proceeding and it is determined to be in the best interest of the Government to wholly or partially exclude said property or interests therein, or to acquire a lesser estate, such exclusion or diminution in the estate can be accomplished by stipulation with the former owner under the provisions of the Act of Congress approved October 21, 1942 (40 U.S.C. 258f). (a) Required approval. All stipulations involving a revestment of title must be forwarded to DAEN-REA-C for approval with a full statement of the

(1) Amendments. (1) If at any time it becomes necessary to amend a complaint or declaration of taking previously filed, an amendment assembly will be submitted to DAEN-REA-C together with a full statement of the facts requiring the amendment. The letter of transmittal should certify that the tracts affected by the amendment have not been adjudicated.

(2) No amendment should be submitted which will result in a revestment of an interest in property, unless a stipulation for revestment has been obtained from the former owner in accordance with § 644.115.

(3) The United States Attorney should be requested to have judgment entered in accordance with the terms of any accepted Offers to Sell immediately after the filing of the case, since delay in taking such action works to the disadvantage of the Government. Any difficulty in securing prompt action by the United States Attorney in this matter should be reported to DAEN-REA-C.

(4) The United States Attorney in this matter should be reported to DAEN-REA-C.

(k) Alternate form declaration of taking. An alternate form of Declaration of Taking has been approved by the Judicial Conference on an optional basis, and must be used where the local District Court requires. Under this form a Declaration of Taking may have up to 15 ownerships, but each ownership will be set up separately so that it may be included in a separate civil action. In other words, there may be up to 15 separate civil actions which are keyed in to one Declaration of Taking. An example of this type of Declaration is included in Figure 5–5 in ER 405–1–12. In this form, Schedule “A” will include the authority and public uses. Schedule “B” will include the description, the estimated compensation, and the estate to be acquired. Schedule “C” will be the plan showing the land to be acquired. It will be noted that there will be a separate Schedule “A”, “B”, and “C” for each ownership. The schedules may include more than one tract where the ownership is unified and is an economic unit. All of the civil actions will be keyed in to the Declaration of Taking by a Master File number. The Master File number must be used on all correspondence pertaining to tracts in this type of an assembly.

§ 644.115 Revestment of title by stipulation.

When fee title or an interest in property has been acquired by the United States by declaration of taking in a condemnation proceeding and it is determined to be in the best interest of the Government to wholly or partially exclude said property or interests therein, or to acquire a lesser estate, such exclusion or diminution in the estate can be accomplished by stipulation with the former owner under the provisions of the Act of Congress approved October 21, 1942 (40 U.S.C. 258f). (a) Required approval. All stipulations involving a revestment of title must be forwarded to DAEN-REA-C for approval with a full statement of the

(1) The Division or District Engineer will ascertain from the United States Attorney the date on which the condemnation proceeding with declaration of taking is filed and the date on which possession is available. The using service of the Army and Air Force or the local representative of other agencies will be informed of the date on which possession of the land is available.

(2) The above information, together with the civil number assigned to the case, and a copy of the complaint and order of possession will be furnished to HQDA (DAEN-REA-C) WASH DC 20314 within six weeks after the date the case was forwarded by the Chief of Engineers to the Department of Justice. If this cannot be accomplished, an explanation will be furnished by such date.

(3) Where an Order of Possession is obtained but the landowner refuses to comply, it may be necessary to obtain a Writ of Assistance from the court. Prior to requesting the United States Attorney to obtain such a Writ, all pertinent facts should be reported to DAEN-REA-C.

(4) The United States Attorney should be requested to have judgment entered in accordance with the terms of any accepted Offers to Sell immediately after the filing of the case, since delay in taking such action works to the disadvantage of the Government. Any difficulty in securing prompt action by the United States Attorney in this matter should be reported to DAEN-REA-C.

Amendments. (1) If at any time it becomes necessary to amend a complaint or declaration of taking previously filed, an amendment assembly will be submitted to DAEN-REA-C together with a full statement of the facts requiring the amendment. The letter of transmittal should certify that the tracts affected by the amendment have not been adjudicated.

(2) No amendment should be submitted which will result in a revestment of an interest in property, unless a stipulation for revestment has been obtained from the former owner in accordance with § 644.115.

(3) If, after the filing of a declaration of taking, a substantially higher appraisal is approved for any reason, and a settlement does not appear imminent, an amendment will be submitted promptly to increase the amount of the deposit.

(k) Alternate form declaration of taking. An alternate form of Declaration of Taking has been approved by the Judicial Conference on an optional basis, and must be used where the local District Court requires. Under this form a Declaration of Taking may have up to 15 ownerships, but each ownership will be set up separately so that it may be included in a separate civil action. In other words, there may be up to 15 separate civil actions which are keyed in to one Declaration of Taking. An example of this type of Declaration is included in Figure 5–5 in ER 405–1–12. In this form, Schedule “A” will include the authority and public uses. Schedule “B” will include the description, the estimated compensation, and the estate to be acquired. Schedule “C” will be the plan showing the land to be acquired. It will be noted that there will be a separate Schedule “A”, “B”, and “C” for each ownership. The schedules may include more than one tract where the ownership is unified and is an economic unit. All of the civil actions will be keyed in to the Declaration of Taking by a Master File number. The Master File number must be used on all correspondence pertaining to tracts in this type of an assembly.

§ 644.115 Revestment of title by stipulation.

When fee title or an interest in property has been acquired by the United States by declaration of taking in a condemnation proceeding and it is determined to be in the best interest of the Government to wholly or partially exclude said property or interests therein, or to acquire a lesser estate, such exclusion or diminution in the estate can be accomplished by stipulation with the former owner under the provisions of the Act of Congress approved October 21, 1942 (40 U.S.C. 258f). (a) Required approval. All stipulations involving a revestment of title must be forwarded to DAEN-REA-C for approval with a full statement of the

(1) The Division or District Engineer will ascertain from the United States Attorney the date on which the condemnation proceeding with declaration of taking is filed and the date on which possession is available. The using service of the Army and Air Force or the local representative of other agencies will be informed of the date on which possession of the land is available.

(2) The above information, together with the civil number assigned to the case, and a copy of the complaint and order of possession will be furnished to HQDA (DAEN-REA-C) WASH DC 20314 within six weeks after the date the case was forwarded by the Chief of Engineers to the Department of Justice. If this cannot be accomplished, an explanation will be furnished by such date.

(3) Where an Order of Possession is obtained but the landowner refuses to comply, it may be necessary to obtain a Writ of Assistance from the court. Prior to requesting the United States Attorney to obtain such a Writ, all pertinent facts should be reported to DAEN-REA-C.

(4) The United States Attorney should be requested to have judgment entered in accordance with the terms of any accepted Offers to Sell immediately after the filing of the case, since delay in taking such action works to the disadvantage of the Government. Any difficulty in securing prompt action by the United States Attorney in this matter should be reported to DAEN-REA-C.

Amendments. (1) If at any time it becomes necessary to amend a complaint or declaration of taking previously filed, an amendment assembly will be submitted to DAEN-REA-C together with a full statement of the facts requiring the amendment. The letter of transmittal should certify that the tracts affected by the amendment have not been adjudicated.

(2) No amendment should be submitted which will result in a revestment of an interest in property, unless a stipulation for revestment has been obtained from the former owner in accordance with § 644.115.
§ 644.116 Distribution, reservations, and title evidence.

Distribution of the estimated compensation deposited in the registry of the court is the responsibility of the United States District Court. However, the Division or District Engineer will assist the United States Attorney in arranging for the distribution of funds.
§ 644.117 Procedure prior to trial.

(a) General. After filing of condemnation proceedings, the Division or District Engineer will maintain close liaison with the United States Attorneys and will render all possible assistance to the United States Attorneys in negotiating settlements, preparing cases for trial, and in conducting such trials. When the Division or District Engineer is informed that a case has been set for trial involving an unusual or novel issue of fact or law, or where the Government testimony will be $100,000 or more, he will promptly furnish this information to DAEN-REA-C. In addition, the Division or District Engineer should:

(1) In coordination with the United States Attorney, conduct discussions for settlement with landowners and other interested parties defendant. When a satisfactory agreement has been reached, an executed stipulation in a form satisfactory to the United States Attorney will be obtained. A suggested form of stipulation as to just compensation is contained in Figure 5–8 in ER 405–1–12. In this connection, the closest cooperation and collaboration must exist between representatives of the Department of the Army and the Department of Justice; no settlement negotiations should be conducted by Corps personnel without the knowledge deposited with a declaration of taking in order that landowners may receive either partial or total payment as soon as possible.

(a) Distribution. Partial or total distribution may be made upon a showing to the court that the claimant is the proper person to receive the money on deposit (40 U.S.C. 258a). An examination of the title evidence by the United States Attorney, together with a physical inspection of the premises, is usually sufficient to enable the United States Attorney to ascertain the proper claimants so that he may consent to the entry of an order of distribution. Distribution may be made without prejudice to the owner’s right to contest for a higher award than the sum deposited by the United States.

(b) Inspection and title evidence. As soon as a condemnation proceeding is filed, a physical inspection of the premises will be made and the United States Attorney will be furnished the following:

(1) ENG Form 798, Certificate of Inspection and Possession, or such other similar form as may be requested.

(2) ENG Form 1567, Report on Vacation of Property.

(3) Title evidence and all available curative material covering the tracts of land included in the declaration of taking.

(4) Copies of all offers to Sell, leases, relocation agreements, etc., which are pertinent to the case and would be useful in making distribution.

(c) Reservations. If the landowners are to be permitted to remove crops, timber, buildings or other improvements from land acquired in the declaration of taking, a stipulation for reservation of these items may be obtained at this time. The stipulation should be in a form acceptable to the United States Attorney, should specify the date on or before which the reserved items are to be removed, and should provide that if the reserved items are not removed on or before said date, the right of removal shall terminate automatically and the United States shall have a good and indefeasible title to these items without further notice. The consideration to the Government for the reservation will be in an amount not less than the appraised value of the crops, or not less than the appraised salvage value of the timber, buildings or other improvements which are reserved, and the stipulation should provide that such amount shall be deducted from the amount of the final award.

(d) Continuation of title evidence. A continuation of the existing title evidence will be obtained to include a search of the records to a date subsequent to the date of filing of the Notice of Lis Pendens, the Judgment on Declaration of Taking, or the filing of the complaint in those states where such filing constitutes notice. The additional title evidence will be furnished to the United States Attorney as soon as possible after filing of the case.
and consent of the United States Attorney. If the property owner is unwilling to execute a stipulation until assured that the amount of the settlement will be accepted by the Government, formal execution of the stipulation may, in such instances, be delayed. However, the offer will be processed in accordance with the applicable provisions of paragraph (b) of this section.

(2) Furnish maps, photographs and other necessary exhibits for trial.

(3) Assist in preparing expert witnesses for trial.

(4) Take necessary action to assure the presence of witnesses at the trial. District personnel who qualify as expert witnesses will be made available.

(5) Be represented at the trial by an attorney thoroughly familiar with Federal court procedures, condemnation law, and the details of the project affected by the condemnation proceedings.

(b) Stipulated settlements.

(1) Where the amount of the stipulation obtained in accordance with paragraph (a)(1) of this section does not exceed the high, approved appraisal prepared by an appraiser employed by, or under contract with, the Corps of Engineers, and the proposed settlement will completely dispose of the issue of compensation for all interests acquired in the tract in the proceeding, approval of the settlement will be recommended by the Division or District Engineer or the Chief of the Real Estate Division directly to the United States Attorney. The Division or District Engineer will inform DAEN-REA-C of the action taken, either by sending a copy of the letter addressed to the United States Attorney or by separate correspondence.

(2) Where the total settlement for all interests acquired in a given tract does not exceed $40,000 and the proposed settlement will completely dispose of the issue of compensation for all interests acquired in the tract in the proceeding, approval of the settlement will be recommended by the Division or District Engineer or the Chief of the Real Estate Division directly to the United States Attorney. In leasehold condemnation cases the monetary limitation includes the full lease term and not merely the per annum rental.

DAEN-REA-C will be informed of the action taken in the same manner as in paragraph (b)(1) of this section. Even though the total settlement for all interests acquired in a given tract does not exceed $40,000, the proposed settlement will be submitted to DAEN-REA-C for consideration in the following instances:

(i) If the United States Attorney and the Division or District Engineer cannot agree as to whether a particular settlement should be consummated.

(ii) If the stipulation involves a novel issue of law or question of policy which would adversely affect the disposition of other tracts in a project.

(iii) If revestment of any land or interests therein or change in estate is involved.

(3) All proposed settlements not covered by paragraphs (b)(1) and (2) of this section will be forwarded to DAEN-REA-C, together with specific recommendations of the Division and District Engineers and a full statement of the facts. Three copies of the signed stipulation will be forwarded to DAEN-REA-C with the report in those situations where the stipulation contains any unusual conditions or terms. The report should contain the following:

(i) The amount of the deposit and the amount of the proposed settlement.

(ii) The amounts and dates of all Government appraisals. Where the Department of Justice appraisal is substantially above or below the Corps of Engineers’ appraisals, the Division and District reviewing appraisers should carefully examine the appraisals and ascertain whether the facts in the case and the appraisal techniques have been consistently applied, and should prepare a comparative analysis.

(iii) The appraisal valuations by the property owners, their appraisers, or other witnesses who may testify for the owners, if such can be ascertained.

(iv) A statement of the recommendation of the United States Attorney as to the proposed settlement.

(v) Such other matters as should be considered by the Chief of Engineers in determining whether the proposed settlement is satisfactory; e.g., any pattern of awards which has been established as the result of other trials concerning land at the same project, or in
the same Federal judicial district, disposition of any accepted Offer to Sell, any unusual legal or factual issues involved, any unusual factors which would increase the hazard of proceeding to trial, or the anticipated effect of the settlement on remaining acquisition in the project.

(vi) Whether or not funds are available to satisfy any deficiency.

(vii) The report should contain the required information in tabulated form. For each item the statement should be short and concise; lengthy reports are not required.

(4) A copy of the report and recommendation sent to the Chief of Engineers will be immediately transmitted to the United States Attorney. If the settlement is satisfactory, the Chief of Engineers will forward a letter of approval to the Department of Justice, recommending that the stipulation be approved, filed and judgment entered thereon. A copy of the letter of approval will be sent to the Division or District Engineer. Receipt of such copy is authority to satisfy the judgment when entered, provided funds are available.

(5) If a stipulation is obtained by a United States Attorney in excess of their authority, they will forward the proposed settlement to the Department of Justice. Simultaneously, in accordance with procedures agreed upon by the Chief of Engineers and the Department of Justice, the United States Attorney will transmit copies of the transmittal letter and of the proposed stipulation to the Division or District Engineer. The Division or District Engineer will immediately forward the letter outlined in paragraph (b)(3) of this section to the Chief of Engineers.

(6) All settlements negotiated for interests acquired in condemnation proceedings will be inclusive of interest and will include all claims of any nature arising as a result of the taking of the estate recited in the complaint or declaration of taking, with the exception of benefits to which the landowner may be entitled under Pub. L. 91-646 (84 Stat. 1894). In lease-hold condemnation cases, all proposed settlements should include not only an agreement as to compensation for the period of the leasehold but also an agreement as to any and all claims arising from restoration of the premises, if known (§644.121(b)).

(7) Where surface and subsurface interests are acquired in a single condemnation proceeding, it is desirable to settle by stipulation, or to go to trial, on the “unit” basis. Many United States Attorneys insist on this course of action. However, Division or District Engineer should cooperate with United States Attorneys who wish to negotiate for stipulated settlements which may not include all of the interests acquired in a given proceeding as to a specific tract or tracts, provided appraisal reports have been prepared in such a manner as to make the appraised value of the several interests ascertainable.

(8) If an offer of settlement is not intended to include the full interest which was condemned in a particular tract, the letter transmitting the settlement offer will specifically identify the interests included in the settlement, the interests which remain unsettled, and the amount of estimated compensation remaining on deposit for the unsettled interests. The amounts remaining on deposit for the unsettled interests should be the appraised valuation of such interests.

(9) Landowners will be advised during negotiations for settlement that offers to settle are not binding on the United States until accepted by a duly authorized representative of the Department of Justice.

(10) In cases where tracts which are covered by accepted Offers to Sell are acquired by declaration of taking because of title defects or the failure of the landowner to carry out the terms of the Offer to Sell, the United States Attorney will be informed by letter and furnished copies of the Offer to Sell. The consideration contained in the Offer to Sell is considered binding upon the landowner despite the fact that condemnation is used to acquire title to the land. No settlement will be approved by the Division or District Engineer in an amount exceeding the amount contained in the Offer to Sell unless the Offer has been set aside by court order. Reports submitted in accordance with paragraph (b)(3) of this section will contain a statement as to
the status of any Offer to Sell which may have been accepted.

(c) Appraisal review. Land and Natural Resources Division Directive No. 11–68, dated 22 November 1968, provides that where two or more appraisals for a particular property have a valuation spread in excess of 10 percent of the high appraisal figure, the United States Attorney should submit such appraisals to the local representative of the Corps for approval. Every effort should be taken to see that this policy is followed so that the Corps has full knowledge of the appraisal reports on which settlement negotiations or trial preparation is based. In those instances where the United States Attorney and the Division or District Engineer cannot agree as to whether an appraisal or appraiser should be used at trial or in connection with settlement negotiations, copies of all appraisals, together with the analysis of the reviewing appraiser, should be submitted to HQDA (DAEN-REE) WASH DC 20314 for further consideration and possible discussion with the Department of Justice.

§ 644.118 Awards.

(a) Approval by Division or District. Division or District Engineers and the Chiefs of the Real Estate Divisions have been authorized to approve court awards (including jury or commission awards) where such awards do not exceed the highest testimony presented at the trial by a qualified appraiser employed by the Government. In such cases, the United States Attorney will be notified that the award is approved and the Chief of Engineers will be notified of such action.

(b) Approval by Chief of Engineers. (1) If the award is in excess of the highest testimony presented at the trial by a qualified appraiser employed by the Government, or involves a matter of a doubtful or controversial nature, a report concerning the trial will be forwarded by the Division or District Engineer to DAEN-REA-C. The report should contain, but not be limited to, the following information:

(i) The amount of the verdict or award.

(ii) The appraisal valuations given in testimony by all witnesses, including any pertinent comments on the effectiveness of the witnesses, as appropriate.

(iii) A statement of the recommendations of the United States Attorney as to the acceptance of the verdict or award, if available without causing a delay in submittal of the report.

(iv) Where the trial concerned less than all interests acquired in a given tract, the report should state the precise interests adjudicated at the trial, the other interests which remain unadjudicated, the proposed disposition of the unadjudicated interests and the amount of the deposit allocated to the unadjudicated interests.

(v) Whether or not funds are available to satisfy any deficiency plus interest.

(2) Long narrative reports of the events at the trial or hearing are not necessary except in unusual cases. A brief, but complete, statement of the pertinent facts will be adequate in most cases. A form for use in connection with submission of trial reports is included in Figure 5–9 in ER 405–1–12; however, it is not intended that this form constitute the entire report. Where the case was tried by a Commission, copies of the Commissioners’ Report will be submitted with each copy of the trial report. Close liaison must be maintained with the United States Attorney’s Office in order that these reports will be received promptly after they are filed in the case.

(3) The report outlined above should be accompanied by the recommendation of the Division or District Engineer as to what action should be taken with respect to the Commissioner’s Report, court award or jury verdict. This recommendation should include a discussion of any matters which should be considered by the Chief of Engineers in determining whether the award is satisfactory, e.g., the history of past awards at this project or in the same judicial district, the basis used by the commission in arriving at its determination of value, whether enhancement from the project or a second taking was an issue, the disposition of any accepted Offer to Sell on any tract involved in the trial, etc. (The basis of findings of value to be included in the report of a commission appointed under Rule 71A(h) was considered by
§ 644.119 Procedure after final judgment.

Generally, it is not necessary to obtain a final certificate of title or title insurance policy in condemnation cases where the intermediate or continuation certificate of title is continued to a date subsequent to the date of filing of the Notice of Lis Pendens, and the liability of the title company is not limited to an amount less than 50 percent of the total consideration paid for the land by the United States.

(a) Final title opinion. After entry of final judgment, the title assembly will be examined and a final title opinion issued. The title opinion and related papers on Army and Air Force projects will be forwarded to HQDA (DAEN-REP) WASH DC 20314 for permanent filing.

(b) Report required to close case. When all interests in a proceeding have been disposed of by final judgment, the Division or District Engineer will so advise the Chief of Engineers in order that the case may be closed. This report should not be made until the time for appeal has expired or any pending appeals have been resolved. The report should include a copy of the final judgment or other order of the court disposing of the case, and a statement that all monies deposited in the registry of the court have been disbursed.

§ 644.120 Condemnation for local cooperation projects.

Under the provisions of the River and Harbor Acts approved June 29, 1906 (33 U.S.C. 592) and August 8, 1917 (33 U.S.C. 593), and the Flood Control Acts approved March 1, 1917 (39 Stat. 950) and August 18, 1941 (33 U.S.C. 701c–2), respectively, the Secretary of the Army may cause proceedings to be instituted in the name of the United States for acquisition by condemnation of lands, easements or rights-of-way which local interests undertake to furnish free of cost to the United States. Requests for the institution of proceedings in the name of the United States will be addressed by the local parties to the Secretary of the Army and submitted to the Division or District Engineer. No land will be acquired on behalf of local interests by the filing of condemnation proceedings until local interests have
furnished the Division or District Engineer with satisfactory assurances in accordance with the authorization act, and sufficient funds have been deposited with the Division or District Engineer to pay the expenses of the proceedings and any awards that may be made in the proceedings.

(a) General. The Corps of Engineers will institute condemnation proceedings on behalf of a local interest only when the local interest:

(1) Lacks authority to acquire the necessary real estate interests by eminent domain; or

(2) Cannot obtain possession by local eminent domain proceedings in time to meet the construction schedule; or

(3) Unusual circumstances exist so that acquisition by local interests would not be in the best interest of the United States.

(b) Information to accompany assembly. Upon request of the local interests that the real estate interest be acquired by condemnation proceeding in the name of the United States, the Division or District Engineer will transmit to HQDA (DAEN-REA-C) WASH DC 20314 an appropriate condemnation assembly, prepared in accordance with §644.114, with recommendations and the following information:

(1) Citation of authorizing act.

(2) Whether valid assurances have been accepted, giving date of acceptance.

(3) That the estate or estates to be acquired conform to the requirements set forth in subpart J (to be published).

(4) Appraisal values of the interest proposed for acquisition.

(5) That sufficient funds to cover court awards and expenses of the proceedings have been deposited by local interests with the Division or District Engineer.

(6) Efforts made by local interests to acquire the real estate interests and reasons for requesting the United States to file condemnation proceedings.

§644.121 Leasehold condemnation requirements.

(a) Requirements for extension. The interest acquired in land by a leasehold condemnation proceeding terminates after a one-year term, unless notice to extend the term is filed in the appropriate United States District Court. In all leasehold cases, the Division or District Engineer will ascertain from the using service whether the premises included in such condemnation proceedings will be required for an additional term. This should be done sufficiently in advance of the end of the term to allow adequate time for the action necessary to extend the term. These instructions apply to civil works projects as well as military projects.

(1) The Department of the Air Force will ascertain and advise the Chief of Engineers concerning the future requirements for the land in Air Force leasehold cases. Where the Department of the Air Force has a continuing requirement for land included in condemnation leasehold cases which are not extendible, the appropriate Division and District Engineers will be informed at the earliest practicable date.

(2) Extension of the term in a leasehold condemnation case must be accomplished through the Department of Justice which, upon request of the Chief of Engineers, will issue instructions to its field representatives to prepare a notice of election to extend the term and file it in the appropriate United States District Court. The Chief of Engineers should be advised of requirements of using services for extension of leasehold condemnation cases five months prior to the time that filing notice of extension with the court is due. The majority of pending leasehold condemnation cases require that notice to extend the term be filed with the court 30 days prior to the end of the term, although a few cases require the notice of extension to be filed at least 60 days prior to the end of the term. Negative reports are required.

(3) Since the General Services Administration is the disposal agency for excess and surplus airport property, all condemnation leaseholds forming an integral part of an airport should be extended and kept in force with the concurrence of the Department of the Air Force unless and until contrary instructions are received from the General Services Administration. In the event a bombing range or other installation in which leasehold interests have been acquired by condemnation is
§ 644.131 General.

Sections 644.131 through 644.142 outline the procedures of the Corps of Engineers for the leasing of real estate and interests therein for military and civil works purposes. They are applicable to all division and District Engineers having real estate responsibilities. To the extent practicable, these procedures will be followed by overseas commanders, in conjunction with the provisions of AR 405–10, Chapter 3. In general, these procedures also apply to the leasing of land and improvements for other Government agencies which authorize the Corps to acquire leasehold interests.

§ 644.132 Authority.

(a) Authority to lease real property interests for the Department of the Army in the United States, the Commonwealth of Puerto Rico, and the Virgin Islands is derived from annual appropriation acts.

(b) Title 10 U.S.C. 2675 authorizes the acquisition by lease, in any foreign country, of structures and real property relating thereto that are needed for military purposes. Leases under section 2675 may not be for a period of more than five years, except that a lease under this section for military family housing facilities and real property relating thereto may be for a period of more than five years but may not be for a period of more than ten years.

§ 644.133 Responsibilities.

(a) The Corps is responsible for acquiring space in buildings, or land, or both land and buildings, under its own authority or through the General Services Administration (GSA) in designated urban centers, for the Departments of the Army and Air Force; Department of the Navy, including the Marine Corps, for recruiting and main stations; Department of Energy and the Nuclear Regulatory Commission, excluding space in GSA urban centers; National Aeronautics and Space Administration, as requested; and other agencies, such as the Department of Defense, upon request. In carrying out these responsibilities, Division and District Engineers will:
(1) Furnish staff supervision to using services on all leasing matters, as well as technical assistance and guidance.

(2) Develop plans and studies, usually in the form of Lease Planning Reports, for commanders of using services when appropriate.

(3) Make recommendations to the using services and/or the Chief of Engineers on important lease and lease planning matters.

(4) Report controversial or unusual leasing matters to HQDA (DAEN-REA-L) WASH DC 20314 by the submission of a summary of the facts, copies or proposed lease documents, and other data, together with recommendations thereon.

(b) In accordance with Reorganization Plan No. 18 of 1950 (40 U.S.C. 304c) and under the provisions of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471), the Public Buildings Service of GSA assumed all functions with respect to the acquisition by lease of general-purpose space; the assignment and reassignment of such leased space and of Government-owned space; and the operation, maintenance, and custody thereof in selected urban centers. The Administrator, GSA, is authorized to assign and reassign office space in the United States upon his determination that such assignments or reassignments are advantageous to the Government in terms of economy, efficiency, or national security after consulting with the heads of the executive agencies concerned.

(c) Reorganization Plan No. 18 also provided that the Administrator may delegate any function transferred to him to the head of any agency of the executive branch of the Government.

(d) Reorganization Plan No. 18 did not transfer to the Administrator any function with respect to:

(1) Buildings or space in buildings located on a military installation, or similar facility of the Department of Defense unless a permit for its use shall have been issued by the Secretary of Defense, or his duly authorized representative; or

(2) Space in Government-owned or leased buildings utilized for special purposes and not generally suitable for use by other agencies.

§ 644.134 Definitions.

(a) General-purpose space is space in buildings, including land incidental thereto, suitable for the general use of Government agencies, including but not limited to office space, general storage space, inside parking space, and warehouse space.

(b) Special-purpose space is space in buildings, including land incidental thereto, wholly or predominantly utilized for the special purposes of an agency, and not generally suitable for general-purpose use, including but not limited to hospitals, housing, and laboratories.

(c) Initial alterations are any improvements, additions, repairs or structural changes which are necessary to adapt leased premises or facilities to needs of the using service and which are approved prior to occupancy.

(d) Subsequent alterations or upgrades are any improvements, additions, repairs or structural changes which are found to be necessary to further adapt leased property to the needs of the using service after occupancy.

(e) Temporary improvements are those which can be removed without damage either to the property installed or the leased property, and to which the Government retains title.

§ 644.135 Lease authorization and approvals.

(a) Title 10 Reports. Under the provisions of 10 U.S.C. 2662, a lease proposal or renewal with an estimated annual rental in excess of $50,000 (gross rent as recited in the lease or for each project covered by one or more leases) must be reported to the Armed Services Committees of Congress. The General Services Administration (GSA) charges a Standard Level User Charge (SLUC) for furnishing space. For title 10 reporting purposes, where GSA leases space at Corps request, the SLUC figure, if greater than the gross contract rental figure, shall control. For all leases which require title 10 clearance, the Division/District Engineers will prepare and submit an Acquisition Report to HODA (DAEN-REA-L), WASH DC 20314 in the format shown in Figure 5-10 in ER 405-1-12. The report will support an
action to obtain approvals from the Assistant Secretary of the Army (Installations, Logistics and Financial Management) and the Deputy Assistant Secretary of Defense (Installations and Housing) for the proposed lease prior to its submission to the Committees, and will serve as a basis for a hearing before the Real Estate Subcommittee of the House Armed Services Committee. Draft acquisition report pursuant to title 10 for a lease renewal should be submitted at least 12 months in advance of the termination date of the lease. An explanation for any delay in forwarding the draft acquisition report is required in the transmittal letter if lease terminates prior to one year. Supporting data for this report will include the following:

(1) The geographical area in which the availability of Government-owned space was surveyed, together with reasons for limiting the area. The mission is to be set forth in detail, along with the reason(s) why space in this particular geographical area is essential to the performance of the mission.

(2) Current and required space (including parking) for each using service. For GSA leases the square feet should be the same as reported on the SLUC. Corrected square feet may be reported if a letter of concurrence from the appropriate GSA Region is provided.

(3) Statement covering all Government-owned buildings and facilities under the control of the military departments in that area, together with the reasons why each was rejected. Even though no space is available, a list of the installations in the area will be furnished.

(4) Statement from (GSA) indicating that no space is available to that agency and other Federal agencies in the area or, in the alternative, a list of space that is available, together with reasons why the space is not acceptable to the using service.

(5) Identification of the headquarters and personnel making the determination that any available Government-owned space is not suitable.

(6) Original request, signed by the responsible head of the using agency that action be taken to obtain required clearances under 10 U.S.C. 2662. The using service shall advise whether or not a long-range use is contemplated.

(7) A statement of the current and anticipated contract rentals and current and anticipated SLUC for GSA leases. The SLUC should be as reported by GSA, unless an explanation is provided.

(b) The Economy Act. Section 322 of the Act of Congress approved 30 June 1932, as amended (40 U.S.C. 278a) provides that no appropriation shall be obligated or expended for the rent of any building or part of a building to be occupied for Government purposes at a rental in excess of the per annum rate of 15 percent of the fair market value of the rented premises at date of the lease under which the premises are to be occupied by the Government, nor for alterations, improvements, and/or repairs of the rented premises in excess of 25 percent of the amount of the rent for the first year of the rental term, or for the entire rental if the full term is less than one year. The provisions of section 322, as applicable to rentals, shall apply only where the rental to be paid shall exceed $2,000 per annum.

(c) Exception to Economy Act. The Act of Congress approved 28 April 1942 (40 U.S.C. 278b) provides that 40 U.S.C. 278a shall not apply during war or a national emergency declared by Congress or by the President to such leases or renewals of existing leases of privately-owned or publicly-owned property as are certified by the Secretary of the Army or the Secretary of the Navy or by such person or persons as he may designate, as covering premises for military or civilian purposes necessary for the prosecution of the war or vital in the national emergency. The provisions of the National Emergencies Act, Pub. L. 94–412 (90 Stat. 1255), 14 September 1976, shall not apply to the powers and authorities conferred by 40 U.S.C. 278b and actions taken thereunder.

(d) Federal Property and Administrative Services Act. The Administrator, GSA is authorized by 40 U.S.C. 490a(8) to alter and improve rented premises without regard to the 25 percent limitation of 40 U.S.C. 278a upon a determination by the Administrator that the alterations and improvements are advantageous to the Government in terms of economy.
efficiency, or national security, and that the total cost of the proposed work to the Government for the expected life of the lease shall be less than the cost of alternative space which needs no such improvements.

(e) Certificates of Necessity. Department of the Army requests for Certificates of Necessity pursuant to 40 U.S.C. 278b will be forwarded to the Assistant Secretary of the Army through DAEN-REA-L. In any case requiring the issuance of a Certificate of Necessity, the amount requested will be sufficient to provide for all improvements which can be foreseen and that will be required during the term of the lease. Should unforeseen, essential requirements arise at a later date, an additional Certificate of Necessity to cover such work will be necessary. It is required that the using service furnish Division or District Engineers with a request for a Certificate of Necessity, explaining the circumstances, followed by a statement that the continued use of the leased premises, or the work to be performed, as the case may be, is vital in the national emergency. All requests by Division and District Engineers will include a completed ENG Form 869–R, 15 percent Valuation Certificate.

(f) Approval—Chief of Engineers. (1) The Chief of Engineers is authorized to approve leases where proposed temporary construction to be placed on land by the Government has an estimated cost equal to or in excess of the current market value of the property, or where the estimated rentals to be paid in the future, plus the cost of restoration, would exceed 50 percent of the current market value of the property.

(2) Leases, renewals, or lease extensions, which are controversial, unusual, or inconsistent with existing policies, require the approval of the Chief of Engineers.

(3) Any lease involving clearances by higher authority will be submitted to HQDA (DAEN-REA-L) WASH DC 20314.

(4) Leases, renewals, or lease extensions of industrial properties, other than for bakeries, laundries, and dry-cleaning facilities, are to be submitted to DEAN-REA-L for prior approval.

(5) Division and District Engineers, and Chiefs of the Real Estate Divisions, are authorized to perform emergency maintenance and repairs to leased premises not in excess of $500 where lessors refuse to perform, or under such circumstances that the lessor cannot perform. Where the cost exceeds $500, approval by DAEN-REA-L is required. The Comptroller General has ruled that where the lessor is obligated to perform maintenance and repairs under the lease as soon as possible after work is completed (15 Comp. Gen. 1064). However, no rental payments will be withheld and no repairs made after demand and a refusal by the lessor, without prior approval of DAEN-REA-L.

(g) Division and District Engineer Authorization. (1) Division Engineers and their Chiefs of the Real Estate Division have been delegated, without authority to delegate, leasing authority to approve leases wherein the annual rent, excluding services and utilities, unless said services and utilities are included in the recited rental consideration, is in excess of $25,000, but not in excess of $50,000. The $50,000 limitation will be strictly observed because of the reporting requirements under the provisions of 10 U.S.C. 2662.

(2) District Engineers and their Chiefs of the Real Estate Divisions are authorized to approve leases wherein the rental excluding utilities and services, unless included in the recited rental consideration, does not exceed $25,000 per annum.

(3) Except for space in the National Capital Region, Division and District Engineers are authorized to process all requests for the assignment of space in Government-owned buildings or leased space in the GSA urban centers to the regional GSA office having jurisdiction.

§ 644.136  Leasing guidelines.

Division and District Engineers, and the Chiefs of the Real Estate Divisions,
are authorized to execute leases, or renewals of leases, negotiated in accordance with the procedures expressed herein, upon receipt of a proper request from an authorized command, service, or agency, subject to any required approvals or clearances. When there is no Real Estate Division, as such, but the Division or District Engineer has responsibility for leasing activities, he may delegate this authority to the officer or civilian in charge or real estate activities.

(a) Leasing requests. Requests for space or land will be received by the Chief of Engineers, or the appropriate Division or District Engineer. Requests will include the data outlined in AR 405-10 (para 2–2c). Division and District Engineers will coordinate space or land requirements with appropriate commanders to assure responsive lease processing. If required, a Lease Planning Report, or narrative report covering essential information, will be furnished the using service for review and recommendations. Funding requirements, usually in the form of fund citations, will have been met by the using service prior to lease execution. If approvals by higher authority are required, the Division or District Engineer will initiate appropriate action to obtain the necessary clearances.

(1) Army Commands. Upon receipt of a request from an Army Command, negotiations for obtaining acceptable leases will be carried to completion in accordance with present procedures for military leases.

(2) Air Force. Upon receipt of a lease request approved by Headquarters, U.S. Air Force, or an Air Force major command, the appropriate Division or District Engineer will negotiate and lease the required property. The provisions of AFR 87-1 prescribe the Department of the Air Force policies and procedures that are to be followed.

(3) National Guard. All requests for the leasing of facilities for National Guard purposes will emanate from the Chief, National Guard Bureau. Army National Guard leasing requirements will be transmitted through DAEN-REZ-R to DAEN-REA-L. Air National Guard requirements will be transmitted to DAEN-REA-L through Headquarters, U.S. Air Force.

(i) Upon receipt of authority from the Chief of Engineers, negotiations will be conducted for obtaining an acceptable lease, in accordance with the approved lease request. The appropriate United States Property and Fiscal Officer generally makes separate service contracts for utilities, except sewage disposal, and services, and is responsible for the maintenance of all buildings used exclusively by the Air National Guard. Representatives of the Corps of Engineers do not participate in obtaining contracts for utilities and services. In cases where such a contract is impracticable, the lease may include any and all utilities and services as part of the rental consideration, with the cost of the various services and utilities to be itemized. The "use clause" in the lease will provide for occupancy of the premises for "Government purposes". The wording, "For use by the Air National Guard and/or United States Air Force, and, in time of war or national emergency, by other units of the Armed Forces of the United States or for any other use by the Federal Government," will be acceptable if it is not possible to insert the for "Government purposes" provision.

(ii) Leases made by representatives of a State with private parties for use of premises by the National Guard of the State involved, under which State funds are used for rental payments, are not the responsibility of the Division or District Engineer.

(4) Department of Energy/Nuclear Regulatory Commission. Space is acquired by these agencies direct from GSA in the designated urban centers pursuant to Reorganization Plan No. 18. In instances where general purpose space is not obtained through GSA and instances involving the leasing of special-purpose space, managers of field offices of subject agencies are authorized to initiate requests to Division or District Engineers for the leasing of properties where the net per annum rental does not exceed $50,000. Leasing of properties where the net per annum exceeds $50,000 requires the prior approval of the appropriate agency head, i.e., the Secretary of Energy, the Chairman of the Nuclear Regulatory Commission, or their designees.
(5) Metropolitan Washington, DC. All requests for leased space in the National Capital Region will be processed in accordance with DOD Instruction 5305.5.

(b) Requirements survey. The availability, use, and adaptability of property owned by the Government, whether under control of the GSA or other agencies, shall be thoroughly explored before additional space is leased, or existing leases are renewed, or construction commenced. Particular attention is to be given to the availability of space, or land, at military reservations, camps, posts, or stations.

(1) A statement covering the non-availability of Government-owned space, or if such is available and not suitable, reasons why it is not suitable, for occupancy by the requesting using service, should be made for each lease executed by the Corps of Engineers, excluding family housing leases.

(2) Suitable privately-owned space shall be acquired only when satisfactory Government-owned space is not available. Rental charges will be consistent with prevailing rates in the community for comparable facilities.

(3) The quality of office space for Government occupancy shall be appropriate for the efficient and economical performance of required operations, affording employees safe, healthful and convenient facilities.

(4) Full consideration shall be given to the efficient performance of the mission and programs of the using service.

(c) Government-owned and General Services Administration furnished space. If Government-owned space is available, the Division or District Engineer will inform the using agency, and details of occupancy will be developed. If it is necessary for GSA to lease space, the Division or District Engineer will make a careful review to determine if there are any statutory or regulatory limitations involved. If so, appropriate action will be taken to satisfy the limitations. During the processing of all GSA space assignments and leases, the Division or District Engineer is the only official contact representative with GSA. This procedure is to be emphasized at all time with the using service.

(1) The Division of District Engineer will submit a Standard Form 81, Request for Space, to the appropriate GSA Regional Office for space assignment in urban centers under the jurisdiction of GSA. The requirement to this form applies to lease renewals or lease supplements, and for space assignments in Federal office buildings. Excluded from this procedure is a proposed space assignment in the National Capitol Region.

(2) Except for the acquisition of general-purpose space of 2,500 square feet or less, outside the designated urban centers, and special-purpose space of 2,500 square feet or less, irrespective of the location, the need for any type of building space will be made known to the appropriate GSA Regional Office by filing Standard Form 81, Request for Space.

(3) The designated urban centers are listed in Figure 5–11 in ER 405–1–12.

(d) Advertising. As a general rule, procurement of space will be by formal advertising. However, in leasing certain types of premises where only one location will serve the Government’s purpose, such as municipal airports, recruiting stations, and similar facilities, negotiations without advertising are permissible. In instances where building space is needed and the requirement cannot be met through the use of existing buildings, there must be advertising to solicit bids for the furnishing of the space. In every instance, it is essential that efforts be made to seek competition. For each lease, a statement will be prepared concerning competition in the solicitation for space or land and Standard Form 1036, Statement and Certificate of Award, will be used. Where specific space or land is needed, and competition is therefore not involved, the facts and circumstances will be fully explained and such explanation will be made a part of the lease file for future reference.

(e) Appraisals. Appraisals are required as a basis for making rental determinations in all leases except those for a nominal consideration. At the discretion of the Division and District Engineers, and the Chiefs of the Real Estate Divisions, formal or detailed appraisals
can be dispensed with for leases wherein the annual rent does not exceed $5,000. Where the rental of a building or part of a building, or family housing unit, exceeds $3,600 per annum, excluding services and utilities, it may be necessary to estimate the fee value of the property contemplated for leasing to determine whether or not the rental rate is in excess of 15 percent of the fee value of the property. For family housing leases, the opinion of fee value will be in short summary form and will be supported by general evidence of comparable values of the unit to be leased. If the proposed annual rental, excluding services and utilities, of a family housing unit exceeds 15 percent of the estimated fee value, the unit will not be leased.

(f) Determination of valid interest. Persons executing leases for and on behalf of the United States of America will satisfy themselves, before executing leases, that the prospective lessors have an interest in the real estate which will assure the validity of the lease. Where leased lands are used as a site for construction, the land records of the county will be examined by a staff attorney familiar with land title records, who will execute a certificate that he has examined the said records and that title is vested in the lessor, subject to the infirmities, liens and encumbrances noted in the certificate. In lieu of such examination, a certificate from the Register of Deeds, County Recorder or other qualified officer is acceptable. If considered advisable in unusual cases, title evidence may be obtained from commercial sources.

(g) Outstanding rights and damages. (1) Where the land is subject to outstanding oil, gas, mineral, or similar interests, the Division or District Engineer will determine, from the appropriate command, in advance of the consummation of the lease, whether the continued exercise of the mineral or outstanding rights will interfere with the contemplated use of the premises.

(2) Where buildings, structures, or growing crops are located on land to be leased, a determination will be made by the Division or District Engineer, in coordination with the appropriate command, as to whether they will interfere with the use of the premises.

(3) Where the lessor will not be permitted to harvest crops or remove improvements and timber which will be destroyed by the Government, the appraised value thereof will be determined, and such amount will be included in the rental for the initial term of the lease, together with an express provision relieving the Government of restoration.

(4) Leases of land for bombing, artillery, rifle ranges, and other extraordinary usage will specify that the leased premises are to be used for such purpose, and an effort will be made to include in the lease a provision waiving restoration and claims for damages, particularly where the premises are wastelands or unproductive.

(5) Where the lessor will not consent to a waiver of restoration, the estimated value of such damage, if it can be determined in advance, will be included in the rental for the initial term of the lease, and the lease will contain an express provision relieving the Government from responsibility for restoration.

(6) If restoration is not waived, and the damages cannot be determined in advance, a provision may be included in the lease to the effect that the rental payments do not include compensation for damages arising from the use of the premises for the purpose leased and that, upon termination of the lease, the damages, mutually determined, will be paid by supplemental agreement to the lease. In event the amount of the loss or damage cannot be mutually determined, the lessor may file a claim for the alleged loss or damage in accordance with subpart H.

(h) Services and utilities. Services, such as janitorial, heat, air conditioning, light and water, should be included in leases for building space wherever possible. Whether services are paid for as part of the rent or by a service contract, the time period for furnishing heat, air conditioning and light, i.e., usual business hours, 24-hour basis, Saturdays and Sundays, should be clearly stated.

(i) Other contracts. The negotiation and execution of contracts not involving an interest in real estate are the responsibility of the services concerned.
(j) Condition surveys. (1) Whenever possession of any premises is acquired by lease or other agreement, or by condemnation for a term of years, the Division or District Engineer will cause a survey and inspection of the condition of the real and personal property to be made as of the time the Government takes possession.

(2) The survey and inspection required above will be made jointly with the lessor or his duly authorized representative. The report will be signed by both parties.

(3) The initial survey report must be made with great care since it is the basis for future restoration claims by a lessor. The use of photographs is encouraged. Full explanatory data covering condition of the premises will be added to the report if, in the opinion of the Chief, Real Estate Division, a useful purpose will be served thereby. The survey report of real property, and the inventory and condition report of personal property, will be made with care, as the condition reflected as of the date of initial occupancy will be compared with the condition shown by the terminal reports made upon vacation of premises.

(4) A survey is not required of unimproved land where an appraisal has been made and the condition of the land is set forth by the appraiser and made a part of the record.

(5) A survey will be made wherever property of another Federal agency is used, with the exception of post offices and Federal buildings. In the event privately-owned buildings, crops, or other property, are on the Federal property, a report will be made outlining the terms and conditions under which they were placed thereon, and the value thereof will be appraised as of the date of possession.

(6) Normally, ENG Forms 3143 and 3143A, Joint Survey and Inspection of Condition of Government Leased Property, are adequate for the joint survey and inspection. In certain cases, narrative reports may, at the discretion of the Division or District Engineer, be considered preferable; however, local forms will not be developed for this purpose.

(k) Possession. Possession of real property will not be taken until required approvals and clearances are obtained and a lease is executed. When requested by an appropriate command, rights-of-entry for exploration and survey, or construction, will be obtained in accordance with instructions in §§644.155 through 644.157.

(l) Condemnation of leaseholds. Where the required leasehold interest cannot be acquired by a negotiated lease, the recommendation of the Division or District Engineer for the institution of condemnation proceedings will be submitted to HQDA (DAEN-REA-C) WASH DC 20314, in accordance with §644.121, setting forth the negotiations that have been conducted with the property owner(s) and all other factors supporting the recommendation.

(m) Decease of lessor. (1) Any claim on account of death of a lessor (except uncurrend depository check claims) may be settled without submission to the Chief of Engineers where no doubt exists as to the amount and validity of the claim or as to whom payment may be made under the laws of the domicile of the decedent.

(2) Any claim for rent or services due a deceased lessor which is considered doubtful will be forwarded to HQDA (DAEN-REM) WASH DC 20314 in accordance with subpart H.

(n) Recording leases. If the property is located in a State requiring the recording of leases, all statutory requirements will be met. Leases, and supplemental agreements prior to termination, involving property upon which substantial Government improvements are to be constructed, will be recorded in all cases.

(o) Change in ownership. (1) When the title to premises leased to the Government is transferred, the contracting officer shall satisfy himself that the new owner has a valid interest in the premises covered by the lease, and thereafter enter into a supplemental agreement between the old and new owners and the Government, for distribution in the same manner as the original lease.

(2) Upon being notified or otherwise determining that a foreclosure proceeding has been filed against the leased premises, or that the enforcement of a deed of trust or mortgage is
imminent, the Division or District Engineer will take such action as is appropriate under State laws for protection of the United States. This would consist of filing by the United States Attorney with the court, or with the trustee, receiver, or commissioner, as the case might be under local law, of a notice of the Government’s lease on the property, with request that the foreclosure proceedings be made subject thereto. If the proceeding is made subject to the lease, an abstract of such proceeding will be made, certified by a staff attorney, and distributed in the same manner as the original lease. If considered advisable, a supplemental agreement to the old lease will be made with the new owner; or a superseding lease may be executed and distributed. If the proceeding results in vesting title in a new owner, free and clear of the Government’s lease, attempt will be made to negotiate a new lease; if this fails, condemnation action will be taken sufficiently early to protect the interests of the United States. Negotiation and condemnation in this latter type of situation must be based on a current appraisal.

(p) Supplemental agreements. Modification of existing leases will be in the form of supplemental agreements and will be prepared, executed, and distributed in the manner prescribed for the original lease. Where a supplemental agreement provides for an increase in space at an increased rental, the supplemental agreement should contain appropriate recitals of this fact, and provide that the Government, thereafter, may, upon 30 days notice, partially reduce, or discontinue, the use of the space covered by either the supplemental agreement, the basic lease, or both. Supplemental agreements enlarging or reducing space will show the total area and rental comprising the basic lease and preceding supplemental agreements.

(q) Annual review of leases. Annual review of leasing requirements and space assignments from GSA are to be initiated by the Division or District Engineer not later than one year before the end of the lease term for each lease.

(1) Special attention will be given by Division and District Engineers to leases which expire by their own terms and continued occupancy is required at annual rentals of $50,000 or more. These leases require approval by the Department of Defense and reporting to the Armed Services Committees of the Congress by the Chief of Engineers. An Acquisition Report together with full justification, as set forth in §644.155(a), in support of each lease (or project covered by more than one lease) must be furnished. For leases in which it is not clear whether Title 10 reporting is required, DAEN-REA-L will be informed of the facts for decision. Attention will be given also to existing leases having annual rentals between $30,000 and $50,000. It is probable that current appraisals will indicate annual rental rates in excess of $50,000 and, therefore, require a title 10 report.

(2) If the using command anticipates that there will be further need for the leased property, and the total estimated rentals to be paid by the Government, excluding utilities and services, for the additional period, plus the cost of restoration, will exceed 50 percent of the estimated current market value of the property, DAEN-REA-L will be informed of all details in order that the review required by paragraph 1–8, AR 405–10, may be made. Only estimated future rent payment is to be considered and not the rental paid in the past for the property. In applying this formula, if the period of future use cannot be ascertained but it is likely that a property will be used for a long period of time, use a period of five years for calculations.

(r) Lease renewals and extensions. (1) Lease entered into under authority of the annual appropriation acts may include a provision for automatic renewal after expiration of the initial term subject to the availability of appropriated funds. However, if the property is still needed after lease expiration, a new lease is required and the old lease will not be extended by supplemental agreement for the new term. Where the lease requires notice in writing to be given to the lessor to exercise the option of renewal, notice will be served by the use of ENG Form 221, Notice of Renewal of Contract or Lease, in accordance with the terms of the lease. The notice, properly addressed,
§ 644.137 Maneuver agreements.

Joint training exercises or maneuvers are conducted by elements of the Department of Defense. Land use requirements vary with the exercise objectives and the force elements which participate. The Corps participates in the planning and acquires rights to use land and other facilities for Department of the Army exercises. The current Memorandum of Understanding by Department of the Army, United States Readiness Command (USCINCRED), and United States Army Forces, Readiness Command (USCINCARRED) on acquisition of maneuver rights for United States Readiness Command (USREDCOM) Joint Training exercises is included as Figure 5–13 in ER 405–1–12. This Memorandum covers timing of requests for preliminary surveys, real estate studies, funding and acquisition of maneuver rights. The Corps also responds to requests from other Department of Defense commands for maneuver rights, and the same procedure is envisioned although no Memoranda of Understanding have been entered into. Upon receipt of a request for real estate services, an estimate of the funds required for the report should be forwarded to the using command.

(a) Procedures. The appropriate Division or District Engineer will be responsible for negotiating maneuver agreements and short-term leases and, after the maneuver is completed, will be responsible for negotiating restoration settlements and/or releases, as appropriate. Real estate acquisition will be in the form of agreements with landowners, granting the right to conduct maneuvers at a given time, or periodically. Short-term leases for exclusive use may also be acquired for special areas (such as headquarters areas, radio relay sites, base camp sites, field hospital sites and supply dumps), and buildings needed for warehouses, ordnance shops and similar purposes directly related to the maneuver. Permits will be obtained to cover the use of lands under the jurisdiction of another Government department or agency.
(b) Claims and restoration. Notwithstanding the assignment of restoration responsibility, understanding may be reached with the maneuver director at field level whereby the command will assume responsibility for settlement of real estate damages using claim funds. However, in instances where the damage exceeds the monetary claims jurisdiction of the Army Commander pursuant to AR 27–20 and is cognizable as a contractual obligation under the maneuver permit, settlement will be accomplished by the Division or District Engineer either by supplement to the permit or by processing a claim under AR 405–15 (see §552.16 of this chapter) since the Division or District Engineer can usually accomplish settlements more quickly for claims in excess of that amount. Therefore, it should be suggested to the maneuver director that all claims, cognizable as a contractual obligation, in excess of his monetary claims jurisdiction be handled by the Division or District Engineer. Funds appropriated for field exercises and maneuvers are allotted to Army Commanders and include administrative costs. The reporting requirements included in Figure 5–13 in ER 405–1–12 will be established by the Chief of Engineers upon receipt of a specific request from the using command to acquire maneuver rights.

§ 644.138 Family housing leasing program.

Section 515 of Pub. L. 84–161 (69 Stat. 324), as amended by Pub. L. 95–82, approved 1 Aug 1977, authorizes the expenditure of an average of $280 per month for each military department for housing facilities in the United States (other than Alaska and Hawaii) and in the Commonwealth of Puerto Rico, and an average of $350 per month for each military department for housing facilities in Alaska, Hawaii and Guam. In both cases the maximum rental rate per unit per month including utilities, operations and maintenance is $450. These rental figures are subject to change each year in the annual Military Construction Authorization Acts. Updated rental figures should be obtained from the current MCA Act. The Department of Defense allocates to each department of the military the number of units it can acquire pursuant to the authorization, and each year Division and District Engineers are informed of the unit allocations by the Chief of Engineers.

(a) Leasing requests. The Departments of the Army and Air Force direct their requests for the leasing of family housing units to the Division or District Engineer. Each military element involved has the responsibility of maintaining the national rental average. Each command prescribes the procedures to be followed in acquiring family housing units. Such procedures which include size of accommodations and maximum rental rate will be followed by the Division or District Engineer.

(b) Use of available housing. Priority shall be given to the leasing of adequate Federal Housing Administration (FHA) and Veterans Administration (VA) held units to the extent that such units may be available at locations which are granted lease allocations. FHA Form 2372A, as modified, will be used in leasing FHA housing for use as public quarters by military personnel. A similar form, modified as needed, will be used for VA held housing units.

(c) Nondiscrimination provision. All leases for family housing units which are executed on behalf of the United States shall contain the following nondiscrimination clause:

It is understood and agreed that the Government will assign the demised premises to military personnel in accordance with Executive Order 11063, dated 20 November 1962, which provides that housing and related facilities shall be available without discrimination among tenants because of race, color, creed, sex or national origin.

(d) Pest control. In agreement with the lessor, whenever possible, the lessor will affirmatively assume responsibility for pest control in family housing units. The following clause will be included in family housing leases:

It is understood and agreed that the lessor will be responsible to provide pest control measures and pesticides, which conform to local health department regulations, to keep the premises free from pests and in a tenantable condition.

It is intended that the occupant will maintain the leased premises in a clean and sanitary condition in conformance
with normal standards of good housekeeping, and that the lessor will furnish leased housing in pest-free condition and maintain the premises free of pest infestation.

(e) Leasing actions. (1) Division and District Engineers will proceed with acquiring the family housing units within the framework of the leasing requests. Care is to be taken to assure that there are no violations of the Economy Act, i.e., the net rental will not exceed 15 percent of the estimated fee value of the space or building contemplated for leasing.

(2) At the discretion of the Division or District Engineer and the Chief of the Real Estate Division, Standard Form 2B may be used for family housing leases, regardless of the rental rate.

(3) Emergency repairs may be accomplished in accordance with §644.135(f)(5).

(f) Supplemental payments. All leases for family housing units which are executed on behalf of the United States shall contain the following clause prohibiting supplemental payments: "The Lessor hereby agrees that the rental consideration specified herein is the only consideration to be received for the demised premises and includes payment for all utilities, maintenance and services specified herein. No other remuneration will be paid by the Government's occupant, members of his family, or any other person on their behalf."

§644.139 Leases for civil works purposes.

Division and District Engineers and the Chiefs of the Real Estate Division are authorized to execute leases, and renewals of leases, for river and harbor or flood control purposes, subject to necessary approvals and clearances. The provisions of 10 U.S.C. 2662, which require reporting of certain leases proposals to the Armed Services Committees of the Congress, do not apply to leases for civil works.

(a) Approvals required. The following lease actions for civil works projects will be referred to DAEN-REA-L for consideration:

(1) Where the annual rental is in excess of $50,000.

(2) Where the leasing involved is for space for both military and civil functions, and the rental for the portion used for military purposes is in excess of $50,000. The report required is covered in §644.135(a).

(b) Records. The originals of leases for civil works purposes, together with supporting data, will be retained at the Division or District Engineer offices for site audit in accordance with Section 7530, "General Accounting Office Policy and Procedures Manual for Guidance of Federal Agencies."

§644.140 Physical protection.

It is essential that the Division or District Engineer make provision for the physical protection for all facilities under Corps control. Coordination with state, county, and city law enforcement officials as well as the U.S. Attorney’s Office is required. These officials should be alerted at the first indication of possible disturbances. The U.S. Attorney’s Office should be provided with an up-to-date list of the locations of such facilities.

(a) Self-protection plan. Space or property controlled by GSA is the responsibility of GSA for physical protection. In accordance with 41 CFR 101–20.504, a Facility Self-Protection Plan is to be established by agencies in GSA-controlled space. This requirement should be coordinated with appropriate GSA Regional personnel. A similar plan should be made operational, where feasible, in other space over which the Corps has responsibility.

(b) Funding. Space under GSA control may require protection and the GSA Regional Offices may not have funds. In these situations, the facts will be made known to DAEN-REA-L, accompanied by a request for funds. Likewise, for Corps leases, funds for physical protection shall be requested from DAEN-REP if they are not already available to the Division or District Engineer.

§644.141 Alterations and construction on leased real property.

(a) General. Division and District Engineers will be available to the military elements for consultation and review of requirements involving construction on leased land or in leased
space. Detailed instructions are furnished in DOD Directives 4165.12, 4165.16, 4165.20, 4270.24, 5160.58, 7040.2; DOD Instruction 5305.5; Army Regulations 140-485, 405-10, 415-25, 415-35, 420-10. Section 644.135(b) covers the requirements of the Economy Act which are applicable to alterations and construction on leased real property. The work to be performed must be essential. Guidelines are furnished as follows:

(1) The proposed alterations and improvements must be advantageous to the Government in terms of economy, efficiency, and, where applicable, to national security.

(2) For office space, the cost should be less than the cost of other space that is available and which does not require alterations or improvements to any appreciable extent.

(3) Due regard is to be given to the convenience of the public that is served and the maintenance and improvement of safe and healthful working conditions of employees.

(4) Where the proposed temporary construction at a leased facility has an estimated cost equal to or in excess of the current market value of the property, the facts will be reported promptly to DAEN-REA-L.

(b) Initial and subsequent alterations.

(1) Initial alterations to facilities leased by the Corps are the responsibility of the appropriate Division or District Engineer.

(2) Effort will be made to include all required alterations in the rental package with the lessor performing all of the work. Careful attention will be given to possible violations of the Economy Act. Payment for initial alterations may be in a lump sum or by the month with the rent, provided the provisions of the Economy Act are complied with and the alterations costs are stated separately in the file or in the voucher.

(3) Alterations or improvements of any nature in GSA furnished space are the responsibility of GSA. Under certain circumstances, GSA may require a Certificate of Necessity in order to perform the required construction.

(4) Although alterations and improvements subsequent to occupancy are not the responsibility of the Corps, the Division or District Engineer should always review subsequent alteration projects to determine whether or not the limitations of the Economy Act are applicable. See AR 415-34, AR 415-35, and AR 420-10 for procedures and instructions.

(c) Army National Guard. No initial alterations regardless of cost will be made to properties leased for the Army National Guard without prior approval of the Chief, National Guard Bureau. (Funds will be made available by the National Guard Bureau.)

(d) Air Force. All alterations to premises leased for the Department of the Air Force, including Air Force Reserve and Air National Guard Units, are the responsibility of that Department including the issuance of any Certificate of Necessity for Department of Air Force elements. The only exception is the leasing and modification of leased premises for recruiting facilities.

(e) Recruiting facilities. The Chief of Engineers, as the Department of Defense Executive Agent for recruiting facilities, is responsible for initial alterations for all recruiting facilities located on military reservations or leased by the Corps. This responsibility includes recruiting offices and recruiting main stations and detachments, whether single-service or collocated. However, as to recruiting facilities acquired by GSA, all alterations are the responsibility of GSA and processing is accomplished through the Division or District Engineer.

(f) Permanent construction requirements. If permanent construction is to be placed on land, the Government must have fee title or acquire title to the land or a permanent easement must be secured, with the following exceptions:

(1) Real property, including land or buildings, which the Government currently holds the right to reuse by exercise of the National Security Clause.

(2) Real property, including land or buildings, which the Government holds the right to reuse by exercise of a National Emergency Use Provision.

Since such rights apply only during the period or periods of national emergency and are extinguished by the termination thereof, every effort will be made to negotiate a lease covering

223
such property under terms that would provide the Government the right of continuous possession for a minimum of 25 years.

(3) Real property required for installation of utility lines and necessary appurtenances thereto, provided a long-term easement or lease can be secured at a consideration of $1.00 per term or per annum.

(4) Real property required for air bases, provided such property can be acquired by lease containing provisions for:
   (i) Right of continuous use by the Government under firm term or right of renewal for a minimum of 50 years.
   (ii) A rental consideration of $1.00 per term or per annum.
   (iii) Reserving to the Government, title to all improvements to be placed on the land and the right to dispose of such improvements by sale or abandonment.
   (iv) Waiver by the lessor of any and all claims for restoration of the leased premises.
   (v) Use of the property for "Government purposes" rather than for a specific military purpose.

(5) Property required for facilities for the Reserve Components of the Armed Forces, provided such property can be acquired by lease containing provisions detailed in paragraph (f)(4) of this section. Whenever possible, the insertion in a lease of a provision restricting the use of land to a specific purpose will be avoided; use a term such as "Government purposes".

(6) Property required for air defense sites, provided such property can be acquired by lease containing provisions in paragraphs (f)(4)(i), (ii), and (iv) of this section and the right of continuous use by the Government under a firm term or right of renewal for as long as required for defense purposes.

(7) Assistant Secretary of Defense (MRA&L) approval is required when leases for air bases, Reserve Components facilities, or air defense sites can be obtained containing some but not all of the above listed provisions. Such approval is also required for leases for all other types of installations upon which permanent construction is to be placed by the Government when leases can be obtained containing similar provisions. In all cases, it must be in the best interest of the Government to acquire a lesser interest than fee title.

(8) Construction projects estimated to cost less than $25,000 will not be considered a permanent construction for purposes of the above policy.

(g) GSA reimbursement. Reimbursement to GSA for Standard Level User Charges (SLUC) and other costs incident to leasing will be in accordance with the applicable provisions of the Federal Property Management Regulation.

(h) Nominal rent leases. (1) Where premises are occupied by the Government at a nominal rent or rent-free basis, any alterations, improvements, and repairs necessary for occupancy may be considered as a cost of occupancy, i.e., in lieu of rent, for each year of the rental term. However, the total cost of such alterations, improvements, and repairs, plus the nominal rental, during any year of the rental term may not exceed 15 percent of the fair market value at the date of the lease, unless the total cost plus nominal rental does not exceed $2,000 per annum.

(2) When rental plus amounts to be spent by the Government for alterations, improvements, and repairs total more than $2,000 and more than 15 percent of the fair market value of the premises at the date of the lease, a Certificate of Necessity is required.

(3) A Certificate of Necessity is not required for the cost of installing equipment, apparatus, appliances, machinery, fixtures, movable partitions, etc., which are not intended to become an integral part of the building and which may be removed without injuring or defacing the item or the building. Such property is considered to be the property of the Government. The lease or a supplement thereto should provide for the installation and removal of such equipment, etc.

(4) Under the limitations in 40 U.S.C. 278a, not more than 25 percent of the net rental for the original lease period, if less than one year, may be expended before a lease is actually renewed. If the whole period, including renewals, is less than a year, not more than 25 percent of the rent for such whole period may be expended for alterations, repairs, and improvements (20 Comp.
Gen. 30; 29 Comp. Gen. 299). Where a lease, entered into by the Government for an original term of less than a year, is renewed for the following fiscal year, the net rental for the first year of the rental term, as distinguished from the original term, is for consideration in the computation of the amount that may be paid under the 25 percent limitation, after the lease is actually renewed.

(i) Items not within the purview of the Economy Act. (1) The limitations in 40 U.S.C. 278a are not applicable to leases of unimproved land (38 Comp. Gen. 143).

(2) Where fixtures, alterations, and improvements are of such characters to be of a temporary nature, and are not permanently attached to the reality so as to prevent removal thereof without destroying their usefulness or damaging them or the reality, they do not constitute alterations or improvements of the leased premises within the meaning of 40 U.S.C. 278a and therefore do not fall within the 25 percent limitation of that Act. Title to such temporary fixtures, alterations, and improvements remains in the Government (18 Comp. Gen. 144; 20 Comp. Gen. 105).

(3) Upon termination of leases, restoration of leased premises to the original condition is not considered an alteration within the purview of 40 U.S.C. 278a.

(4) When the Government is required by the terms of the lease to maintain the leased premises, such maintenance, together with the cost of such improvements and alterations as may be made by the Government, may not exceed the 25 percent restriction of the Act.

(5) Leaseholds acquired through condemnation proceedings are excluded from the purview of the Act of 30 June 1932, as amended (40 U.S.C. 278a).

(j) Architectural Barriers Act. The Architectural Barriers Act of 1968 (Pub. L. 90–480), 82 Stat. 718, 142 U.S.C. 4151, et seq., as amended, requires that when Federal funding is used in the design, construction, or alteration of certain buildings or facilities, the buildings or facilities must be designed, constructed or altered to insure that physically handicapped persons will have ready access to, and use of, such buildings. In the Corps' leasing program, when Federal funds are used to make improvements to leased premises, it is necessary that the plans and specifications for the construction or alteration work be approved in accordance with guidelines published by the American National Standards Institute (ANSI), as implemented by DOD Construction Criteria Manual 4270.1-M, Section 5–1.6.

§ 644.142 Lease forms and instructions.

ENG Form 856 will be used for Corps of Engineers leases in the United States and possessions, and overseas, for the leasing of unimproved land. ENG Form 527 is recommended for leases of improved property in overseas areas. Standard Forms 2, 2A, or 2B (short form) will be used for all Corps of Engineers leases of improved property in the United States and possessions. Standard Form 2B is limited to rentals not exceeding $3,600 per annum. The General Provisions are on the reverse side of the short form lease.

(a) Mandatory clauses. The following clauses must be included in all Corps of Engineers leases:

(1) Officials Not to Benefit clause (para 15 of ENG Form 527) is required by 18 U.S.C. 431.

(2) Gratuities clause (para 16a of ENG Form 527) is required by 5 U.S.C. 174d.

(3) Covenant against Contingent Fees clause (para 14, ENG Form 527) is required by 10 U.S.C. 2306(b).

(4) An Examination of Records clause (para 17, ENG Form 527) is required by 10 U.S.C. 2313(b). Exceptions to the use of this clause in 10 U.S.C. 2313(c) are permitted when the contractor is a foreign Government or agency thereof, or when the laws of the country involved preclude it. Also, if the Head of the Agency determines, with the concurrence of the Comptroller General, that the use of the clause would not be in the public interest, it may be omitted in leases covering land in foreign countries.

(5) The Nondiscrimination clause (Executive Order 11063, dated 20 November 1962) is required in all leases in the United States. It is desirable, but is not considered mandatory in overseas leases.

(b) Hold harmless clauses. “Hold harmless” clause will not normally be added to the lease forms. Where lessors insist
upon such a clause, however, the following is suggested for use: “The Lessors (licensors) shall not be responsible or liable for injuries to persons or damage to property when such injuries or damage are caused by or result from the Government’s use of the premises under the terms of this agreement and are not due to the negligence of the Lessors.”

(c) Escalator clauses. In those cases where a lessor expresses an unwillingness to enter into a lease, extending for a number of years, with a rental consideration that includes a fixed amount for utilities, the following clause may be inserted in the standard lease:

After the first term of the lease, the Lessor or the Government may, by giving notice at lease 90 days prior to the anniversary date of the lease, request an adjustment in rental payments based on an increase or decrease in the cost of utilities. The request must be supported with full justification to include documentary evidence of actual utility costs incurred by the Lessor which are in excess of the amounts estimated at the beginning of the lease term. The requested adjustment in rent will be subject to negotiation, and if granted, will be provided by a Supplemental Agreement to this lease.

ACQUISITION OF RIGHTS-OF-ENTRY

SOURCE: Sections 644.155 through 644.157 appear at 44 FR 31125, May 30, 1979, unless otherwise noted.

§ 644.155 General.

Sections 644.155 through 644.157 describe the procedures of the Corps of Engineers relative to obtaining rights-of-entry on lands for both military and civil works projects and in the Corps’ acquisition programs for other Federal Government agencies. These procedures are applicable to all Division and district Engineers having real estate responsibilities.

§ 644.156 Definition.

A right-of-entry is a bare authority to do a specified act or series of acts upon non-Government-owned property or non-Government-controlled property without acquiring any estate or interest therein. The principal effect of a right-of-entry is to authorize an act which, in the absence of the right-of-entry, would constitute a trespass. The written instrument furnishes evidence of the permission granted to the government and the obligations, responsibilities, and liabilities assumed by the Government. It does not authorize any uses of the property by the Government other than those specified in the instrument.

§ 644.157 Procedures.

(a) ENG Form 1258, Right-of-Entry for Survey and Exploration, will be used to obtain authority from the owner of lands to be used for the purpose of making surveys, test borings, and other exploratory work as may be necessary to complete the particular investigation.

(b) ENG Form 2803, Right-of-Entry for Construction, will be used to obtain authority from the owner of lands to be used for construction purposes when all of the following conditions apply:

1. A Real Estate Directive has been issued on an Army (military) or Air Force project, or the Chief of Engineers has approved acquisition in connection with a civil works project or for another Government agency.

2. The construction schedule does not allow sufficient time to secure the right of possession by normal acquisition procedures.

(c) Upon execution of an ENG Form 2803, a copy thereof shall be forwarded to HQDA (DAEN-REA-L) WASH DC 20314 on Army Military and Air Force acquisitions, and in all other cases to HQDA (DAEN-REA-P) WASH DC 20314, together with a proposed schedule of final acquisition of the necessary interests in real estate. If final acquisition is not contemplated within six months from the date of the right-of-entry, an explanation should also be furnished as to the reason for the delay.

(d) Division and District Engineers may modify ENG Forms 1258 and 2803, where necessary, to meet requirements of landowners, provided such modifications do not increase the scope of the liability or responsibility of the Government over that contained in the standard forms.

(e) It is necessary to recognize not only the effects of entry upon a particular parcel of land, but also the effects of the passage of any vehicle
(land, air, or water) on the area traversed. All possibilities of disturbing effects on the countryside shall be considered and routes selected to eliminate or minimize such disturbances.

(f) Any cash settlements in lieu of restoration for damages, incurred under ENG Forms 1258 and 2803, will be consummated by supplemental agreement in accordance with subpart I.

PROCUREMENT OF OPTIONS PRIOR TO REAL ESTATE DIRECTIVES (MILITARY)

SOURCE: Sections 644.165 through 644.168 appear at 44 FR 31125, May 30, 1979, unless otherwise noted.

§ 644.165 Purpose and scope.

Sections 644.165 through 644.168 describe the procedures relating to the procurement of options to purchase real estate interests for Army or Air Force military requirements prior to the issuance of a real estate directive. These procedures are applicable to all Division and District Engineers having military real estate responsibility.

§ 644.166 Authority and applicability.

(a) Authority. Subsections (a) and (b) of section 2677 of title 10, United States Code, as amended by section 707 of the Act of Congress approved October 27, 1971 (85 Stat. 412), provide that:

(1) The Secretary of a military department may acquire an option on a parcel of real property before or after its acquisition is authorized by law, if he considers it suitable and likely to be needed for a military project of his department.

(2) As consideration for an option so acquired, the Secretary may pay from funds available to his department for real property activities, an amount that is not more than five percent of the appraised fair market value of the property.

(b) Applicability. (1) Where land is needed for proposed construction and the siting of said construction is firm.

(2) When there is a definite indication of material enhancement in value due to change, or proposed change, in use by the land owner, price increase due to publicity given to contemplated Government acquisition, or abnormal increases in market value.

(3) Where there is a definite possibility of private construction which would constitute obstructions in existing or proposed glide angle planes and transitional planes at air bases.

§ 644.167 Implementation.

When a District or Division Engineer determines that any of the conditions described in §644.166(b) exist in connection with any proposed land acquisition project for military purposes not yet authorized by law, or if authorized, not yet covered by a real estate directive, he will initiate the following actions:

(a) Planning report. A planning report will be developed and submitted in accordance with subpart A. The report will include the purpose for which the property is “likely to be needed”; the estimated probable increase in value, if applicable; and the justification for negotiating for options under the authority cited in §644.166. The report will identify any real estate planning reports previously prepared which included the land in question. Any future planning reports relating to the same land will contain appropriate references to this report.

(b) Property identification. Upon receipt of authority to acquire options and determination that funds are available, the District or Division Engineer will obtain and verify ownership data. If it is deemed necessary, title evidence may be obtained in accordance with §§644.61 through 644.72.

(c) Appraisal. Detailed tract appraisals will be prepared in accordance with subpart B.

(d) Procurement of options. (1) Negotiations for the option will be in accordance with procedures outlined in §§644.83 through 644.85, except that ENG Form 2926, Option to Purchase
§ 644.168 Exercise of options.

Upon issuance of a real estate directive for acquisition of the optioned real property, the District or Division Engineer will exercise the option and proceed with the acquisition in accordance with the procedures outlined in §§ 644.61 through 644.88.

Subpart D—Relocation Assistance Program

§ 644.175 Cross Reference.

See part 641 of this chapter for the regulations on the relocation assistance program.

Subpart E [Reserved]

Subpart F—Disposal

SOURCE: 45 FR 71266, Oct. 27, 1980, unless otherwise noted.

§ 644.311 General.

Subpart F sets forth general authority, responsibilities, procedures, methods, and guidance for the performance of real property disposal functions.

§ 644.312 Applicability.

Subpart F is applicable to Division and District Engineers having real estate responsibilities.

§ 644.313 Authority.

The major portion of real property disposal actions performed by the Corps of Engineers is predicated on authority derived from the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 471, et seq.), hereinafter referred to as the Federal Property Act, and the rules, regulations and delegations of authority issued by the General Services Administration (GSA) thereunder. Other authorities relating to the disposal of military real property are found in AR 405–90. The Army and Air Force Basic
Real Estate Agreements covering disposal of Air Force real estate are found in AR 405–5 and AFR 87–15.

§ 644.314 Rules and regulations of the General Services Administration (GSA).

Under the rules, regulations and delegations of authority issued by GSA under the Federal Property Act, the military departments are authorized to dispose of the following:

(a) Real property under its control (except land withdrawn or reserved from the public domain), together with the improvements thereon and related personal property, which has a value of less than $1,000.

(b) Leases, permits, licenses, easements, or similar interests, including Government-owned improvements on the premises, unless it is determined that the interest should be included with the disposal of other property being reported to GSA for disposal.

(c) Fixtures, structures, and improvements of any kind to be disposed of without the underlying land.

(d) Standing timber and embedded gravel, sand, and stone to be disposed of without the underlying land.

§ 644.315 Disposal priorities.

Consistent with the best interest of the United States and with applicable laws and regulations, the following priorities should be followed in disposing of real property no longer needed by the Departments of the Army and Air Force:

(a) Transfer to other Department of Defense agencies and the U.S. Coast Guard.

(b) Transfer to other Federal agencies.

(c) Conveyance to eligible non-Federal agencies.

(d) Sale to the public.

§ 644.316 Environmental considerations.

The National Environmental Policy Act of 1969 (NEPA), as amended, (42 U.S.C. 4321 et seq.) directs that a five point Environmental Impact Statement (EIS) be prepared, circulated among interested Federal, State and local agencies, and filed with the Environmental Protection Agency (EPA) before a major Federal action is taken which affects the quality of the human environment. This may include some disposals. No major disposal action will be undertaken where the Corps of Engineers is the disposal agency, or is acting for the disposal agency, until the required EIS has been submitted to the EPA unless a “Finding of No Significant Impact” (FONSI) has been prepared for the action, or if the action is classified as a “categorically excluded” item because it has no significant effect on the environment. The Environmental Assessment is subject to review and approval in accordance with instructions found in AR 200–1 and AR 200–2 (to be printed) for military real property disposal, and the forthcoming Engineer Regulation for civil works real property disposal. Where property is reported to GSA for disposal, GSA is responsible for compliance with NEPA.

§ 644.317 Preserving historic landmarks and properties.

Purposes of the National Historic Preservation Act of 1966, as amended, (16 U.S.C. 470) and Executive Order 11593, Protection and Enhancement of the Cultural Environment (13 May 1971) will be set forth in subpart H (to be published) and the authorities cited also apply to the disposal of real property. Specific policy guidance in connection with disposals having historic significance is published in AR 200–1 and AR 405–90 for military real properties and in ER 1105–2–460 for civil works real properties.

(a) The Criteria of Adverse Effect on eligible properties may occur under conditions which include but are not limited to:

(1) Destruction or alteration of all or part of a property.

(2) Isolation from or alteration of the property’s surrounding environment.

(3) Transfer or sale of a property without adequate conditions or restrictions regarding preservation, maintenance, or use.

(b) It is normally intended that the agency responsibilities under Section 106 of the National Historical Preservation Act of 1966 and Executive Order 11593 run concurrently with the NEPA review process. However, obligations pursuant thereto are independent from
§ 644.318 Compliance with State Coastal Zone Management Programs.

Subpart H will outline the provisions of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. 1451 et seq.). These provisions also apply to the disposal of land or water resources when the action is subject to the Federal consistency requirements of the Act and when the disposal is consistent with an approved state management program.

§ 644.319 Protection of wetlands.

The requirements of Executive Order 11990, Protection of Wetlands, 42 FR 26961, (24 May 1977) are applicable to the disposal of Federal lands and facilities, and the policy and procedures implementing the Order will be set forth in subpart H (to be published).

§ 644.320 Floodplain management.

The requirements of Executive Order 11988, Floodplain Management, 42 FR 26951, (24 May 1977) and its implementation will be outlined in subpart H (to be published). In accordance with ER 1165–2–26, paragraph 13., when civil works property in floodplains is proposed for disposal to non-Federal public or private parties, the Corps of Engineers shall reference in the conveyance those uses that are restricted under Federal, State and local floodplain regulations and attach other restrictions to uses of the property as may be deemed appropriate.

§ 644.321 Nondiscrimination covenant.

As required by Section 101–47.307–2 of the Federal Property Management Regulations (FPMR), substantially the following covenant will be included in all deeds or other disposal instruments to public bodies when the sale is negotiated under section 101–47.304.9(4) of the FPMR:

The grantee covenants for itself, its heirs, successors, and assigns and every successor in interest to the property hereby conveyed, or any part thereof, that said grantee and such heirs, successors, and assigns shall not discriminate upon the basis of race, color, religion, age, sex, handicap, or national origin in the use, occupancy, sale, or lease of the property, or in their employment practices conducted thereon. The covenant shall not apply, however, to the lease or rental of a room or rooms within a family dwelling unit; nor shall it apply with respect to religion to premises used primarily for religious purposes. The United States of America shall be deemed a beneficiary of this covenant without regard to whether it remains the owner of any land or interest therein in the locality of the property hereby conveyed and shall have the sole right to enforce this covenant in any court of competent jurisdiction.

§ 644.322 Disposition of proceeds from disposal.

(a) Land and Water Conservation Fund. Except as provided in paragraphs (b) and (c) of this section and unless otherwise obligated by existing or future acts of Congress, all proceeds received from any civil works project disposal of surplus real property or related personal property under the Federal Property Act, shall be covered into the land and water conservation fund in the Treasury of the United States (16 U.S.C. 460L–5(a), FPMR Section 101–47.307–6). This includes the net proceeds from the sale of timber and structures. (b) Department of Defense Family Housing Management Account. Section 501(b) of Pub. L. 87–554, as amended, 42 U.S.C. 1594a–1, provides that the proceeds from the disposal of family housing of the Department of Defense, including related land and improvements, shall be transferred to Family Housing Management Account, Defense. This does not include civil works housing, or houses on land acquired for military purposes unless the housing was specifically acquired to house military personnel. This means that excess military family housing and related land and improvements should be reported to GSA on Standard Form 118 separate and apart from Reports of Excess for other portions of an excess installation. Particular care should be taken to ensure that the following statement be included in each such report of excess to GSA:

Net proceeds from the sale of family housing, including related land and improvements, shall be remitted to the Department of Defense for deposit to Family Housing Management Account, Defense (97 X 0700).
(c) **Proceeds from sale or transfer of property acquired.** Under section 5 of the Act of 13 June 1902, as amended (33 U.S.C. 558), the proceeds from a sale or transfer of buildings or other improvements on river and harbor improvement projects may be credited to the appropriation for the work for which the property was acquired. Buildings or other improvements, including timber, which are on nonexcess land come within the purview of this law. Where both land and buildings or other improvements are excess, proceeds from the sale of land and buildings, or either one, will be deposited in the land and water conservation fund as provided in paragraph (a) of this section.

§ 644.323 Neutral language.

Wherever the words “man”, “men”, or their related pronouns appear in this subpart, either as words or as parts of words (other than when referring to a specific individual), they have been used for literary purposes and are meant to include both female and male sexes.

§§ 644.324–644.325 [Reserved]

PROCEDURE FOR PLACING REAL PROPERTY IN EXCESS STATUS

§ 644.326 Army military real property.

Military real property, including industrial real property, under the control of the Department of the Army will be placed in excess status as outlined in AR 405–90.

§ 644.327 Air Force military real property.

Military real property under the control of the Department of the Air Force will be placed in excess status as outlined in AFR 87–4.

§ 644.328 Army military leased property.

(a) Department of the Army command installations or parts thereof held by lease, permit, or other similar right of occupancy, excess to the needs of the using service will be reported direct to the Division of District Engineer for disposition wherever essential continuing operations of the installation will not be adversely affected, and the annual rental does not exceed $50,000.

(b) Division Engineers are authorized to make the finding that leased real estate of the Corps of Engineers, where essential continuing operations of the installation are not adversely affected, and the annual rental does not exceed $100,000, is excess and to take necessary action to cancel or otherwise dispose of leases.

(c) Any leased command real estate not coming within the category outlined in paragraphs (a) and (b) of this section will not be considered by the Division Engineer as excess until notice is received from the Chief of Engineers (COE) that the property has been placed in excess status in accordance with AR 405–90.

§ 644.329 Army civil works real property.

(a) Fee-owned land and easements. (1) Action by Division/District Engineer (DE). When the DE is of the opinion that real property acquired in fee or easement for a civil works project is no longer required for such purpose, he will submit a report and recommendation to HQDA (DAEN-REM) WASH DC 20314, accompanied by:

(i) A brief description of the character or nature of the land with an appropriately marked map showing the approximate acreage considered to be excess. Detailed perimeter descriptions need not be procured or furnished with the report and recommendation for excessing.

(ii) Description of buildings and improvements.

(iii) Information as to circumstances that might hinder or prevent disposition, e.g. remoteness of location, unfavorable topography, and lack of legal access.

(iv) Information as to when and how the property was acquired.

(v) Information as to the estate which the Government has in the land, reservations and exceptions in and to the Government’s title, and outstanding interests granted by the Government or reserved or excepted in the acquisition of the land, will be stated with particularity. The map or plat will delineate any grant, exception or

reservation, such as telephone, telegraph, electric transmission, oil, gas, and water lines.

(vi) Purchase price of lands (estimate if only a portion of original tract), buildings and improvements acquired with the lands, and the cost of buildings and improvements, if any, constructed by the United States.

(2) Action by the Office of the Chief of Engineers. When the value of an easement interest reported pursuant to (a)(1) of this section does not exceed $1,500, OCE will make the final determination of excess and authorize action accordingly. In the case of fee-owned land regardless of value, or easement interests having a value in excess of $1,500, when OCE finds that no requirement for the property exists, a recommendation will be made to the Secretary of the Army that authority be granted for disposal of the property.

(b) Leaseholds. When the DE is of the opinion that real property acquired by lease for a civil works project is no longer required for such purpose, and after screening the property for other Federal requirements in accordance with §§ 644.333 through 644.339, he will take necessary action to terminate the lease in accordance with the procedure outlined in §§ 644.444 through 644.471.

§§ 644.330–644.332 [Reserved]

Screening, Reassignment and Transfer of Real Property

§ 644.333 Screening for defense needs.

Real property which becomes excess to the needs of any element of the Army or Air Force will be screened against requirements of other Department of Defense (DOD) agencies and the U.S. Coast Guard in order to promote and obtain the most efficient and complete utilization of real property before disposing of it.

(a) Procedure for screening Army military property. Screening for defense requirements with respect to base closures publicly announced by the Secretary of Defense or Secretary of the Army which result in excessing of real property will not be accomplished unless directed by HQDA (DAEN-ZCI) Washington DC 20314. Instructions to screen will be included in the disposal directive transmitted to the DE when such action is desired. In the absence of such instructions, it is presumed that DOD has negatively evaluated all possible requirements of DOD agencies before making the public announcement.

(1) Fee-owned land. Screening is required in all other cases unless specifically directed otherwise. Property will be screened simultaneously against other Army requirements, and for Navy, Air Force, Coast Guard, and Defense agency requirements. The property should also be screened against known Department of the Army Civil Works requirements.

(i) The DE will dispatch a screening message promptly upon receipt of an excess directive or recommendation pursuant to AR 405–90. The sample screening message in ER 405–1–12 at Figure 11–1, or a letter similar in form and content will be used without substantial deviation.

(ii) All action addressees and parties listed for information on Figure 11–1 in ER 405–1–12 will be included, except that Air Force real property in Hawaii will be screened with the Commander-in-Chief, Pacific Air Forces, in lieu of HQ, USAF. The appropriate major Army command, when not the using command, will be listed as an action addressee.

(iii) In no case will screening be deferred unless authorized by DAEN-REM. At the expiration of the screening period (normally 30 days) a report of results will be forwarded and subsequent action initiated as provided in paragraph (e) of this section.

(iv) For certain cases, most frequently in connection with base realignments or Executive Order 11954 surveys, accelerated screening procedures are set out in AR 405–90.

(2) Capehart and Wherry Housing Projects. Due to the complicated financial arrangements under which such projects are constructed and operated, the disposal thereof, whether separately or as a part of a larger installation, requires careful study. In order to assure maximum time in which to discover and evaluate problems arising in each of such cases, the DE will notify HQDA (DAEN-REM) Washington DC 20314, by teletype, immediately upon receipt of information of an installation commander’s recommendation of
excess involving Capehart and acquired Wherry housing projects. Included with this notice will be advice on the source of utilities and any problems of which the DE may be aware.

(b) Leaseholds, buildings and improvements. Leaseholds, buildings, and other improvements will not be screened formally within the Department of the Army (DA). When such property is made available or disposal under AR 405–90 and §§ 644.326 through 644.329, it will be screened by the responsible DE with the Air Force, Coast Guard, and Navy and against known Army military and civil works requirements within the Division. Screening with the Air Force of leaseholds having an annual rental in excess of $50,000 will be addressed to HQ, USAF. Other Air Force screening under this subparagraph will be with local Air Force installations. Screening with the Navy will be addressed to the appropriate naval district. Screening with the Coast Guard and Defense agencies will be with the local representatives of those agencies. Property under the jurisdiction of GSA which has been assigned to the DA or Department of the Air Force (DAF) for use is not subject to formal screening hereunder but will be screened against known acquisition directives or requirements in the DE office. Except to the extent that DEs determine they are inappropriate, screening procedures for civil works property will be the same as for Army military property.

(c) Procedure for screening civil works property. Buildings and improvements, leaseholds, and fee-owned land that have been determined excess to civil works requirements in accordance with this part will be screened with the appropriate major Army and local service commanders, and with the Navy, Air Force, Coast Guard, and Defense agencies. (GSA property assigned to the Army for use is not subject to formal screening hereunder but will be screened against known acquisition directives or requirements in the DE office.) Except to the extent that DEs determine they are inappropriate, screening procedures for civil works property will be the same as for Army military property.

(d) Screening of Air Force property. HQ, USAF and the major Air Force commands screen Air Force real property before authorizing disposal action by the Corps of Engineers in accordance with AFR 87–4. DEs will act on requests for disposal action on buildings and improvements and leased property received directly from major Air Force commands which conform with AFR 87–4. Disposal directives on fee-owned land and easements will be issued by HQ, USAF and referred through DAENREM.

(e) Report on screening and related actions. Immediately following the screening of fee-owned land, the DE will forward to DAENREM a report of the results of the screening (with comments and recommendations where a further Army or other Defense requirement is indicated). This report will serve as one of the basis of a determination whether the property is excess to the requirements of the DOD. Upon dispatch of the screening report, the DE will proceed with further action pursuant to §§ 644.340 through 644.347 and §§ 644.385 through 644.389. No report on screening of civil works property is
required unless there is a request for transfer or reassignment of the property screened.

(f) Property with an estimated value of $50,000 or less. If the property has an estimated value of $50,000 or less, the determination that the property is excess to Army requirements will be made by the Department of the Army without referral to DOD, and the Chief of Engineers will direct the DE accordingly. Upon receipt of this disposal directive, prompt action will be taken to report the property to GSA or take other disposal action as appropriate.

(g) Estimated value in excess of $50,000. If military property has an estimated value in excess of $50,000, it must be reported to the Armed Services Committees of Congress pursuant to title 10, United States Code, section 2662. The final Army determination of excess and recommendations to the Assistant Secretary of Defense (MRA&L) to approve the proposed disposal report to the Armed Services Committees by the Chief of Engineers, utilizing Real Estate Disposal Report, ENG Form 2187R, are combined in a single action. The Chief of Engineers will advise of DOD approval of the proposed disposal when made. Upon receipt of this information responsible Division and District Engineers will furnish GSA a preliminary report of excess. The preliminary report of excess will be finalized, upon receipt of instructions from the Chief of Engineers. This procedure is also applicable to Air Force disposals. If the preliminary report of excess is sufficiently complete and accurate, it may be finalized by letter or simple statement on Standard Form 118, Report of Excess Real Property.

(h) Date of excess for reporting purposes. From the above, it will be noted that where property has an estimated value in excess of $100,000, the determination that the property is excess to the requirements of the Department of the Army is, in effect, made concurrently with the determination that the property is excess to the requirements of the DOD, or is approved for transfer to another military department. For all practical purposes, these determinations are best evidenced by the Assistant Secretary of Defense’s approval of the proposed disposal. The date of approval may be used as the date the property was determined excess to Army requirements for reporting purposes.

§ 644.334 Reassignment and transfer procedures.

Reassignment refers to the changing of the administrative or command jurisdiction of real property from one command to another within the same military department. Reassignments may be accomplished by the Secretary or the staff without prior approval of the DOD or the Armed Services Committees of the Congress. Transfer refers to changing the jurisdiction for using and administering real property from one military department to another.

(a) Reassignment Procedures—Army—

(1) Military. Reassignments of military real property are accomplished pursuant to a directive from DAEN-REM. These are not real estate disposal actions.

(2) Civil works. Reassignments from civil works to military jurisdiction, and vice versa, are accomplished pursuant to directive or approval of the Secretary of the Army based on the recommendations of the Chief of Engineers.

(3) Information required. Information to support recommendation for reassignments of military or civil real property to another using service of the Army, or to change the military or civil accountability within the Corps, will be furnished by the DE to DAEN-REM as follows:

(i) Reference to excess directive, if any.

(ii) Description and map of lands.

(iii) Date, manner, and cost of acquisition of land and improvements.

(iv) Reference to any encumbrances which might affect the reassignment and use.

(v) Proposed effective date of reassignment.

(vi) Proposed new use.

(b) Reassignment of Air Force property. The Air Force Staff reassigns real property within the Department of the Air Force.

(c) Transfer of military property. Procedure for transfer among military departments is substantially the same as for transfer to other Federal agencies,
and is set forth in §§ 644.400 through 644.443 and §§ 644.472 through 644.500.

§ 644.335 Screening of excess DOD property for nondefense Federal agency needs.

(a) Screening by GSA. (1) GSA will screen all excess real property reported to it for disposal, to determine whether the property is surplus to all Federal agencies. (2) GSA will screen certain classes of excess real property which must be reported to it for screening, even though the Department of the Army will act as the disposal agency (§§ 644.348 through 644.367). (3) Under the FPMR, Federal agencies are allowed 30 days to advise whether there is a tentative or firm requirement and another 30 days to determine and advise whether the tentative requirement is firm. Where there is a firm requirement, agencies are allowed an additional 60 days to prepare and submit a formal request for transfer pursuant to FPMR Section 101–47.203–7. The DE should obtain from GSA information on the status of screening if advice is not furnished promptly after expiration of the screening period.

(b) Screening by Corps of Engineers. Properties which are not reported to GSA for disposal or screening will be screened by the DE with nondefense Federal agencies at the same time they are screened with Defense agencies. Screening of such properties will be limited to agencies that maintain local offices and may be done on an informal basis. The DE may waive screening of nonassignable and short term interests in real property when they determine such screening will serve no useful purpose. When screening discloses no requirement, the property will be determined surplus and disposed of.

§ 644.336 Notices to Departments of Interior (DI); Health and Human Resources (HHR); Education; and Housing and Urban Development (HUD).

Simultaneously with screening under §§ 644.335 notices of availability will be given to DI of land suitable for public park and recreation or an historical monument site; to HHR and/or Department of Education property suitable for educational purposes or to protect the public health, and to HUD of property for housing and related facilities (Section 101–47.203.5 FPMR). Where such notice is given, these departments will be notified promptly, if screening discloses another Federal requirement for the property. They will also be notified if there is no other Federal requirement and the property is determined surplus.

§§ 644.337–644.339 [Reserved]

CLEARANCES—ARMY MILITARY REAL PROPERTY

§ 644.340 Reports to the Armed Services committees.

(a) Sections 644.340 through 644.347 describe the responsibilities of the Chief of Engineers in, and prescribes procedures for, clearing proposals for certain leasing and for disposals of Army real property with the Department of Defense and the Armed Services Committees of the Senate and House of Representatives. (The Air Force obtains its own clearance.) It is applicable to Division and District Engineers having military real estate responsibility. Clearance is not required for civil works properties.

(b) Title 10 U.S.C. 2662 as amended by Pub. L. 96–418, dated 10 Oct. 1980, provides, in part that:

(a) The Secretary of a military department, or his designee, may not enter into any of the following listed transactions by or for the use of that department until after the expiration of 30 days from the date upon which a report of the facts concerning the proposed transaction is submitted to the Committees on Armed Services of the Senate and of the House of Representatives:

* * *

(3) A lease or license of real property owned by the United States, if the estimated annual fair market rental value of the property is more than $100,000.

(4) A transfer of real property owned by the United States to another Federal agency or another military department or to a State, if the estimated value is more than $100,000.

(5) A report of excess real property owned by the United States to a disposal agency, if the estimated value is more than $100,000.

(6) Any termination of modification by either the grantor or grantee of an existing license or permit of real property owned by
the United States to a military department, under which substantial investments have been or are proposed to be made in connection with the property by the military department.

* * * * *

(c) This section applies only to real property in the United States, Puerto Rico, Guam, the American Virgin Islands, American Samoa, and the Trust Territory of the Pacific Islands. It does not apply to real property for river and harbor projects or flood control projects, or to leases of Government-owned real property for agricultural or grazing purposes or to any real property acquisition specifically authorized in a Military Construction Authorization Act.

(d) A statement in an instrument of conveyance, including a lease, that the requirements of this section have been met, or that the conveyance is not subject to this section, is conclusive.

(c) While not specifically required by 10 U.S.C. 2662, DOD has directed that all proposed relinquishments of public domain land will be reported to the Armed Services Committees where (1) the area exceeds 500 acres or (2) the estimated fair market value of the property exceeds $100,000.

§ 644.341 Clearance with the Armed Services committees.

(a) Prior to a final report of excess, or transfer to another Federal agency or a State, of any Government-owned military real property with an estimated value, including the value of existing improvements, in excess of $100,000, the proposed disposal must be reported to the Committees. Also, proposals to outlease military real property for other than agricultural or grazing purposes must be reported if the estimated annual rental consideration is more than $100,000. A formal appraisal for estimating value need not be made. Reports to the Committees pertaining to Army military real property are made by the Chief of Engineers, and copies of reports are furnished the two senators of the State, and the congressman of the district where the property is located. Reports pertaining to Air Force property are made by that department. DEs, upon request, will assist Air Force commands in assembling the required data.

(b) For Army property, data will be furnished in the format shown in Figure 11–2 (ENG Form 2187–R, Real Estate Disposal Report) in ER 405–1–12, and three copies forwarded to HQDA (DAEN-REM) WASH DC 20314. The information should be submitted within three weeks after dispatch of the screening message, or within three weeks after receipt of the disposal directive when screening is not required.

(c) Clearance for transfer to another military department is obtained by the acquiring department. However, HQDA (DAEN-REZ-L) obtains clearance for transfer of Army property to a non-defense Federal agency where authorized by law.

§ 644.342 Prior approval of Department of Defense.

(a) DOD Instruction 4165.12 requires advance approval by the Assistant Secretary of Defense (MRA&L) of disposal actions requiring congressional committee clearance. DOD approval is also required for withdrawal from excess of real estate, or an interest in real estate, which has an estimated fair market value in excess of $100,000.

(b) The data submitted pursuant to § 644.341 will be used to obtain DOD approval of projects to be submitted to the Armed Services Committees. Appropriate information will be furnished to obtain required DOD approval of withdrawals from excess.

§ 644.343 Additional data for clearance with the committees.

To support Army witnesses appearing before the Armed Services Committees, and to satisfy other information requirements, include the following data when forwarding the ENG Form 2187-R:

(a) Four copies of a site plan of the installation, clearly depicting the property involved, and four copies of a real estate map, color coded with legend, showing the area and acreage to be exceeded.

(1) Segment-size maps and plans should be of excellent quality, current, show accurate acreages, and current name of installation. They must be clearly visible at a distance of 30 feet or more.

(2) Basic color codes for maps are:

Red—Excess Area(a)
Green—Retained Area
Yellow—Previously Excessed Area(s)
Black or Dark Blue—Installation Boundary, heavy definition
Other Colors—for other purposes

(b) Copy of last utilization inspection report, plus information as to when and how the excess property was last used by the Army.

(c) Basis for disposal: Base closure announcement; E. O. Survey; Command Report of Excess; Report of Availability; etc.

(d) A list of and general terms of any outgrants in effect on the excess area.

(e) Whether continuing military activities are housed on the property proposed for disposal; arrangements which have been made to provide space for these activities; estimated cost of leasing or converting space for that purpose; and any other costs of closing or severing the installation and relocating the activities.

(f) Whether civilian employees will lose their employment, number of employees involved, and to what extent they can be employed elsewhere.

(g) Details of significant history of acquisition, development, and disposal, if not included in ENG Form 2187–R. Include official name of installation and former designations.

(h) Description of any related or off-post family housing, giving number of units, type (MCA-Capehart, etc.) acreage of site, land and construction costs, and distance from installations served.

(i) Probable impact on local economy, if any.

(j) Estimate of any annual savings in operating and maintenance costs.

(k) Statement as to exchange potential of excess area.

(l) Estimate of value, including any restrictions or limitations on prospective use of the land by subsequent users.

(m) Character and use of area in vicinity of excess area.

(n) Care and custody costs for excess area.

(o) Staff/MACOM coordination.

(p) Environmental Assessment.

(q) Any other pertinent information, e.g., any adverse factors severance or undesirable impact on utility systems, and local interest in acquiring the property.

(r) Congressional district in which the property is located.

§ 644.344 Coordination with GSA.
At the time of formal submission of the Disposal Report to the Armed Services Committees, DAEN-REM will furnish copies to the DEs and to the central and regional offices of GSA as advance information to permit preliminary disposal planning.

§§ 644.345–644.347 [Reserved]

REPORTS OF EXCESS REAL PROPERTY AND RELATED PERSONAL PROPERTY TO GENERAL SERVICES ADMINISTRATION (GSA)

§ 644.348 Delegation of authority to division and district engineers.
Much of the authority and responsibility of the COE as real estate agent for the Departments of the Army and Air Force to report excess real and related personal property to GSA in accordance with the provisions of the Federal Property Act, and the Federal Property Management Regulations (FPMR), subpart 101–47.3, has been delegated to Division and District Engineers having responsibility for real estate operations. Final reports will be made only after the property has been determined excess to the needs of the Department of Defense, in accordance with §§644.333 through 644.339, and has been cleared with congressional committees, if required, in accordance with §§644.340 through 644.347.

§ 644.349 Excess property reported for disposal.
The following types of excess real property must be reported to GSA for disposal, utilizing Standard Form 118 (SF 118), Report of Excess Real Property, as set forth in §644.355:

(a) Fee-owned. All fee-owned property, with improvements and related personal property, which has, in the opinion of the DE, an estimated fair market value of $1,000 or more, together with such incidental, related, or appurtenant lesser interests, with or without Government-owned improvements and related personal property.
§ 644.350 Excess property reported for screening.

The types of property described in paragraphs (a), (b), and (c) of this section must be reported to GSA for screening purposes notwithstanding the fact that the military departments have been delegated authority to dispose of such property. SF 118 will be utilized for reporting these types of property without attaching the usual Schedules A, B, and C and supporting documents. A notice should be included on the face sheet that “This report is made for screening purposes only. Disposal will be accomplished by the Corps of Engineers.” Distribution of copies of such reports within the departments is not required.

(a) Land held under lease, permit, license, easement, or similar instrument, other than listed in §644.351.
(b) Improvements located on non-excess Government-owned lands (including improvements on land held under permit from another Government agency; see §§644.376 through 644.384, for preliminary procedure in these cases), which improvements, with related personal property, in the opinion of the responsible DE, have an estimated net salvage value of $1,000 or more.
(c) Improvements located on excess land held under lease or other temporary right of occupancy (even though a report of excess is not required for the leasehold itself or other right of occupancy interest under the criteria set forth in §644.351) when, in the opinion of the DE, the improvements have a net salvage or market value of $1,000 or more, and it is proposed to dispose of such improvements by sale for removal from site. The report of excess will contain an estimate of the cost of restoration necessary under the lease that a prospective transferee agency will be required to assume.
(d) Fee-owned property which, with improvements and related personal property, in the opinion of the responsible Division or District engineer, have a fair market value of $1,000 or more, and is not reported to the General Services Administration for disposal as a result of the exception contained in §644.349(a) (because of outstanding options to purchase, etc., or because of rights retained by the Government grantor).

§ 644.351 Excess property exempted from reporting.

No reports to GSA are required for the following types of excess property:
(a) Fee-owned land, including withdrawn or reserved public domain land which BLM made available for disposal under Federal Property Act, together with the Government-owned improvements and related personal property, having an estimated fair market value of less than $1,000 in the opinion of the responsible DE;
(b) Excess non-Government-owned property held under lease, license, easement, or similar instrument, when
Government-owned improvements with related personal property have a net salvage value of less than $1,000 or are to be transferred to the owner of the land in restoration settlement, and:

(1) The lease or similar instrument is subject to termination by the grantor of the premises within nine months; or

(2) The remaining term of the lease or similar instrument, including renewal rights, will provide for less than nine months of use and occupancy; or

(3) A provision of the lease or similar instrument would preclude transfer to another Federal agency or disposal to a third party; or

(4) The lease or similar instrument provides for use and occupancy of space for office, storage, and related facilities, which does not exceed a total of 2,500 square feet; or

(5) Where additional rental would be incurred.

(c) Excess Government-owned improvements on nonexcess land, which improvements, in the opinion of the responsible DE, have a net salvage value of less that $1,000.

(d) Leased space assigned by GSA, and land and improvements owned by and permitted from other Government agencies.

(e) Excess timber, sand, gravel and stone-quarried products, and growing crops on nonexcess land regardless of value.

(f) Excess withdrawn or reserved public domain lands, regardless of value, which are offered to and accepted by the Department of the Interior for return to the public domain pursuant to §§644.376 through 644.384.

(g) Prefabricated movable structures, such as Butler-type storage warehouses and quonset huts, and house trailers (with or without undercarriages), which are located on nonexcess land for off-site use. These types of structures shall be reported as personal property in accordance with FPMR, part 101–43, Utilization of Personal Property. However, when such structures are located on leased or permitted land subjecting the Department to any restoration obligations, the property will be treated as real property for the purpose of satisfying such obligations to the maximum extent feasible.

§ 644.352 Evaluation and reporting of flood hazards.

Pursuant to Executive Order 11296, 10 August 1966, the DE having civil works responsibility for the area where property proposed for disposal is located will evaluate the property (civil or military) for the presence of flood hazards. If such hazards are found, a report will be forwarded to HQDA (DAENREM) recommending appropriate restrictions with respect to future uses of the property, or that the property be withheld from disposal. If decision is made to proceed with disposal, detailed information regarding the flood hazard will be reported to GSA on SF 118 as required by FPMR, 101–7.202–2, with the appropriate restrictions with respect to use of the property by a purchaser and his successors. (See ER 1105–2–40 for information on the Flood Plain Management Services Program.)

§ 644.353 Determination of values for reporting.

Where more than one parcel or item of excess property is involved at the same project or installation, the total value of all such parcels or items will be included in determining whether the property has an estimated value of $1,000 or more for the purpose of making reports of excess. Estimates of value should be made by qualified real estate employees, but not necessarily by a professional appraiser.

§ 644.354 Conditional reports of excess.

As an exception to its general policy, GSA has agreed with the Department of Defense to accept reports of excess on some facilities with instructions on their disposal, specifically:

(a) Defense Industrial Reserve (DIR). The Defense Industrial Reserve Act 50 U.S.C. 451 et seq., authorizes the Secretary of Defense to determine which excess industrial properties should become a part of DIR and to formulate a national security clause or recapture provisions to preserve the production capacity of the plants for use in the event of a national emergency. Excess DIR plants are reported to GSA for disposal subject to the national security clause or the recapture provisions. (See FPMR Subsection 101–47.306–2 for procedures where GSA is unable to dispose
§ 644.355 Preparation and submission of reports of excess.

(a) Preparation—(1) General. Reports of excess will be prepared on SF 118, with schedules, in accordance with the instructions contained in FPMR section 101–47.4902, and §644.349 herein. However, since the type of information called for a Block 9 of standard form (SF) 118 and Columns f, g, h, and i of schedule A is not generally applicable to camps, airfields, etc., such information will be furnished only when it is available and can be furnished without additional cost. Reports of excess will include all related or appurtenant easements, licenses, and related personal property. Decontamination data will be included as prescribed in §§644.516 through 644.539. Information on flood hazard will be included as required by §644.352.

(2) GSA regulations. Pursuant to GSA regulations, all final reports of excess will be made only after the property has been determined excess to the needs of the Department of Defense and will bear the statement: “This property has been screened against the known defense needs of the Department of Defense.” Report of excess will indicate that the provisions of title 10, United States Code, section 2662, requiring reports to the Armed Services Committees of Congress, have been met, or that the report of excess is not subject to this section.

In all cases where Government-owned land is reported, there shall be attached to and made a part of SF 118 (original and copies thereof), a report prepared by a qualified employee of the holding agency on the Government’s title to the property, based upon his review of the records of the agency. The report shall recite:

(a) The description of the property.
(b) The date title vested in the United States.
(c) All exceptions, reservations, conditions and restrictions relating to the title acquired.
(d) Detailed information concerning any action, thing or circumstance that occurred from the date of the acquisition of the property by the United States to the date of the report which in any way affected, or may have affected, the right, title, and interest of the United States in and to the real property (together with copies of such
legal comments or opinions as may be contained in the file concerning the manner in which and the extent to which such right, title or interest may have been affected. In the absence of any such action, thing or circumstance, a statement to that effect shall be made a part of the report.

(e) The status of legislative civil and criminal jurisdiction over the land peculiar to the property by reason of it being Government-owned land. If the United States does not hold such legislative jurisdiction, the report on government title should so state.

(f) All exceptions, reservations, conditions and restrictions imposed by higher authority on the property at time of disposal. No additions or substantive changes to these will be made without prior approval from HQDA (DAEN-REM), WASH, DC 20314.

(g) If the property, or any portion of it, has been listed in the National Register of Historic Places, or has been nominated for listing or nomination, this should be included in the SF 118. Specific fixtures and related personal property having possible historic or artistic value should also be included. (See §644.317 for information on historic preservation.)

§644.357 Outgrant instruments, appraisals and muniments of title.

There shall be transmitted with the SF 118 copies of outgrants involving the property reported, all conveyances, encumbrances and other instruments affecting the use and operation of the property, including deeds, mortgages, and agreements covering and licenses to use any patents, processes, techniques, or inventions. Where there is more than one like instrument as, for example, agricultural leases, it may be preferable to list them, locate them on the land use map, and furnish a sample copy. FPMR contemplates that muniments of title will be transmitted with the report of excess. The title report (§644.356 of this part) will state that HQDA (DAEN-REP) WASH DC 20314 is the custodian of title papers and has been requested by the DE to transmit applicable title papers direct to the GSA Regional Office. Accordingly, as soon as practicable after receipt of an information copy of the declaration of excess by the using service, and a disposal directive, the DE will assign a disposal report number and advise DAEN-REP to transmit the pertinent title papers directly to the appropriate GSA Regional Office, citing the disposal report number as a reference. Simultaneous action by DAEN-REP and the DE to assemble necessary reporting data is important to avoid delay of acceptance by GSA of the Report of Excess. If experience should demonstrate that such simultaneous preparation and transmittal of data is not practical in saving time and effort, the DE will arrange in advance for transmittal of the necessary title data from DAEN-REP for incorporation in the Report of Excess before transmittal by the DE to the GSA Regional Office.

§644.358 Deposit of proceeds from disposal of family housing in the family housing management account.

(a) Title 42 U.S.C. 1594a–1(b) provides that the proceeds from the disposition of Department of Defense Housing, including related land and improvements, shall be transferred to the DOD Family Housing Management Account for the purpose of debt service. Arrangements have been made between DOD and GSA to implement this law and apply it to excess MCA housing as well as to housing encumbered by mortgage debts such as Capehart and Wherry Housing projects. (See §644.322(b).)

(b) The agreement with GSA calls for separate identification and description in the Report of Excess (SF 118) of those improvements which are considered family housing within the purview of the law and a request in the report that proceeds from disposal be transferred to the DOD Family Housing Management Account. (The actual transfer of funds will be accomplished at Washington level.)

(c) Where the Report of Excess includes both housing and property not related to housing, separate schedules (SF 118 a and b) will be prepared to cover the housing involved, including related land and other improvements. The housing schedules should be annotated and arranged categorically to show:
§ 644.359 Supplemental information.

The DE will cooperate to the greatest extent practicable in furnishing further information and assistance requested by GSA Regional Offices. However, requests for engineering surveys should be carefully monitored in the interest of economy. When such requests appear excessive or other requests for services appear to require unnecessary expenditures, DAEN-REM will be fully informed, with recommendations, in order that the matter may be resolved through appropriate coordination with the GSA central office.

§ 644.360 Reports submitted for screening.

Excess leaseholds and buildings and improvements to be disposed of separately from the land which, pursuant to §644.350, must be reported to GSA for screening purposes only, will be reported immediately when the property is determined to be excess to the particular military department having jurisdiction. The report will contain the statement: “This property is reported for screening with civilian agencies by GSA prior to its disposal by the Corps of Engineers. The property is being screened within DOD and when the screening has been completed, appropriate certification will be submitted to GSA.” Screening against defense requirements, pursuant to §§644.333 through 644.339, will then be completed and GSA notified of the result. If such screening results in the development of a requirement by one of the other military services, the Report of Excess will be withdrawn and the transfer of the property to the requesting military service effected. This specialized procedure for this type of property is adopted to allow screening for defense requirements by the Corps of Engineers to be accomplished simultaneously with the screening of civilian agencies by GSA. Where circumstances require that this type of property be screened within a limited period of time, the period should be specified and an explanation set forth on the face of the Report of Excess, as, for example: “Buildings are in the way of planned new construction and must be removed or demolished not later than (date). Accordingly, advice must be received on or before (date) as to whether a requirement exists for the property, or whether it is to be transferred or assigned to another Federal agency for removal within the time specified.” If such advice is not received by the time specified, the property should be disposed of without further delay and GSA notified of the action.

§ 644.361 Distribution of report of excess.

Copies of the final Report of Excess (SF 118) will be distributed simultaneously as follows:
(a) Complete copies to: (1) Regional Office, GSA—original and four copies.
(2) District Engineer—one copy.
(b) Division Engineer—one copy of the cover sheet (SF 118), and transmittal letter.
(c) A complete copy, except Schedule C (SF 118c), to HQDA (DAEN-REP) WASH DC 20314 and one copy of the cover sheet to HQDA (DAEN-REM) WASH DC 20314.
(d) Where family housing is involved, one copy of the cover sheet and the pertinent schedules A and B to the Deputy Assistant Secretary of Defense (Installations and Housing), Washington, DC 20301.

§ 644.362 Notice of receipt.

GSA should promptly notify the holding agency of the date of acceptance of each Report of Excess (SF 118). The date GSA will assume the expense of cost and custody as provided in
§ 644.363 Withdrawals or corrections of reports of excess.

(a) Subject to the approval of GSA, and to such conditions as GSA considers appropriate, Reports of Excess may be withdrawn or corrected at any time prior to disposition of the property, by filing a corrected SF 118 with the regional office of GSA. Corrections and withdrawals will bear the same number as the report of excess to which they pertain, but will bear a letter suffix beginning with “A” for the first correction or withdrawal and continuing in alphabetical sequence for succeeding corrections or withdrawals. “Correction” will be conspicuously stamped on the face of the SF 118 for both withdrawals and corrections. Distribution of requests for withdrawal or correction will be the same as that made of the Report of Excess to which the withdrawal or correction pertains.

(b) Property which is reported to GSA for disposal will not be withdrawn without the prior approval of HQDA (DAEN-REM) WASH DC 20314, nor will return of the SF 118 be accepted without the approval of DAEN-REM. (See §§ 644.340 through 644.347, concerning prior approval of DoD for withdrawals from excess of real property having an estimated fair market value in excess of $50,000.)

§ 644.364 Supply of forms.

Standard forms 118, 118a, 118b, and 118c, are not available in normal Army Adjutant General supply channels. The forms should be procured from GSA.

§§ 644.365–644.367 [Reserved]

CARE AND CUSTODY OF EXCESS AND SURPLUS PROPERTY

§ 644.368 Procedures and responsibilities for care, custody, accountability, and maintenance.

(a) Department of the Army military property. Care, custody, accountability, and maintenance of excess Army military real property will be as prescribed in AR 405–90.

(b) Department of the Army Civil Works Property. DEs will retain custody and accountability of all excess civil works real property under their jurisdiction until final disposition is effected.

(c) Department of the Air Force property. Pursuant to AFR 87–4, the Department of the Air Force is responsible for care and custody of excess Air Force real property. However, upon request by the Air Force DEs may assume custody if no costs are involved, or where cost is involved if funds therefor are furnished upon request by the DE.

(d) Department of Energy (DOE), National Aeronautics and Space Administration (NASA), and other Federal agencies. Where the Corps of Engineers is acting as real estate agent for other Federal agencies, DEs, at the request of the agency, may assume care and custody of excess real property on a reimbursable basis.

§ 644.369 Guidelines for protection and maintenance of excess and surplus real property.

Detailed guidelines are provided in FPMR Subsection 101–47.4913.

(a) Calculated risk. These guidelines, which are binding on holding agencies, embody the principle of calculated risk. In applying this principle, the anticipated losses and deteriorations, including pilferage and vandalism, in terms of realizable values are expected to be less than expenditures to minimize the risks. Normally, where property is of little value, only periodic surveillance is necessary and care and custody forces will not be maintained. However, where property, regardless of realizable value, is potentially an attractive nuisance to children and curiosity seekers, or is inherently dangerous, the public should be protected by guards stationed on the property or by other satisfactory means. Every effort should be made to minimize the cost of care, protection and maintenance consistent with these principles.

(b) Improvements or alterations. FPMR Subsection 101–47.401–5, provides that improvements and alterations to excess and surplus real property may be considered, with the prior approval of GSA, where disposal cannot be made. However, where property, regardless of realizable value, is potentially an attractive nuisance to children and curiosity seekers, or is inherently dangerous, the public should be protected by guards stationed on the property or by other satisfactory means. Every effort should be made to minimize the cost of care, protection and maintenance consistent with these principles.
and maintenance of marketable property will not be undertaken except to prevent serious loss to the Government. Excess equipment or facilities should not be updated or improved. At predisposal conferences, or earlier where practicable, the DE, in coordination with GSA representatives, will furnish specific guidance to the using command as to the minimum acceptable GSA requirement for care and custody. The requirement for minimum maintenance does not extend to historic places. Historic places in excess or surplus status will be maintained in accordance with the letter and spirit of approved Department of the Army criteria for protection, preservation and maintenance of historic places.

§ 644.370 Transfer of custody to General Services Administration (GSA).

(a) Custody of an excess installation reported to the GSA for disposal will continue to be held until GSA transfers to its purchaser or other designee. All expenses pertaining to care, custody and maintenance will be borne by the holding department or agency, except that such expense for property reported to GSA for disposal and not disposed of within 12 months from the date the formal report of excess was received by GSA, shall be assumed by GSA as of the first day of the succeeding quarter of the fiscal year. GSA will give notice of the receipt of the report of excess and will, within 15 days, furnish advice on the acceptability of the report. (See FPMR as amended, Subsection 101–47.202–10.) Any request made to the disposal agency to defer disposal action, or failure to submit an acceptable report, will extend the obligation of the department with respect to expenses for care and custody caused by such deferment. In the event the department is not relieved of custody within the period for which it is obligated to stand the expense thereof, the retention of care and custody thereafter will be reimbursed by the disposal agency. Because of the magnitude of custodial expense for larger installations and the longer periods of time often consumed in effecting their disposal, it is imperative that reports of excess be made as promptly as possible in order that the 12-month period may commence and terminate as soon as possible and the department’s expense minimized.

(b) The DE will maintain close liaison with GSA with a view to obtaining prompt transfer of custody and accountability from the department to that agency, and will coordinate transfers between the using service and GSA. However, DEs will not take over custody of an installation or coordinate the transfer of custody until a statement of clearance or a statement that such clearance is not necessary because of the use of the installation has been furnished. Under GSA procedures, the department generally retains the responsibility for care, custody, and accountability of its excess facilities until final disposition is made by GSA. Until that time, the property is to be carried on the real property inventory of the department.

§ 644.371 Contracting for care and custody.

Care and custody of excess and surplus installations should be performed by contract whenever it is legally possible and more economical to do so. Due to the temporary nature of such services and the extreme variations in kind and fluctuations in quality of such services required from time to time, contracting for custodial service will often prove to be more economical and efficient. In contracting for such services which include watchman, patrol and protective services, attention is invited to the prohibition against hiring detective agencies pursuant to the following Act of Congress: "* * * An individual employed by the Pinkerton Detective Agency, or similar organization, may not be employed by the Government of the United States or the Government of the District of Columbia." (5 U.S.C. 3108). This has been construed to apply to employees of organizations which provide services of a detective agency, but not to organizations which are organizations to render watchman, patrol or protective services and do not include detective services as one of their functions (26 Comp. Gen. 303). Custodial and protective services referred to herein are the type ordinarily procured by contract by GSA and other Government agencies charged with the responsibility for
§ 644.372 Care and custody through interim use.

(a) General. Upon receipt of initial information that real property is excess, the DE should promptly initiate planning for interim productive use. Interim use should be planned to save care and custody expense but must not interfere with, delay, or retard transfer of the property to another Federal agency or its disposal otherwise. Any permit or lease must have the prior approval of GSA, and shall be for a period not exceeding one year and shall be revocable on 30 days' notice (FPMR Sections 101–47.203–9 and 101–47.312).

(b) Permits to other Federal agencies. Interested Federal agencies will be afforded a priority in the interim use of excess and surplus real property. The permit will require the Federal agency to perform care and custody and perform routine maintenance. 41 CFR 101–47.203–8, provides for temporary assignment, conditional transfers, and rental or user charges for use of excess property by Federal agencies.

(c) Leases for non-Federal use. Leases of excess and surplus property are made under authority of the Federal Property and Administrative Services Act of 1949, as amended and AR 406–80. Such leases are subject to the Economy Act (40 U.S.C. 303b), and must be for a money consideration only. The lessee can and should, however, be made responsible for ordinary maintenance and restoration as required by standard Corps of Engineers lease forms. Where a portion of an excess or surplus installation is leased, it may be advantageous to enter into an agreement with the lessee for care and custody of the remainder. The agreement cannot provide for a reduction of rental for the portion leased. The Economy Act may not apply in some cases where industrial plants are determined excess subject to the National Security Clause or similar recapture conditions. Such cases should be coordinated with DAEN-REM on an individual basis.

§§ 644.373–644.375 [Reserved]

§ 644.376 Procedure for disposal of public domain land.

(a) Lands withdrawn or reserved from the public domain, together with Government-owned improvements, which have been determined to be excess to the department, after screening with other DOD agencies and the U.S. Coast Guard in accordance with §§644.333 through 644.339, will be processed for disposal in accordance with 43 CFR 2370–2374 and §644.381 of this part. The DE will file a Notice of Intention to Relinquish as provided by 43 CFR 2372.1. The notice will be filed in the Bureau of Land Management (BLM) Land Office having jurisdiction. Excess buildings and improvements on the property should be left in place and no disposal action taken thereon pending further instructions from BLM, unless it is determined that they should be abandoned in accordance with the procedures set forth in §§644.472 through 644.500. A copy of the Notice of Intention to Relinquish submitted to the appropriate BLM Land Office will be transmitted to HQDA (DAEN-REM) Washington, DC 20314 and to the appropriate GSA regional office.

(b) If any restoration, or other work, is proposed to be performed on the land, the matter will be forwarded to DAEN-REM for prior approval. Where the DE recommends disposition of the land by GSA as excess property rather than return to the public domain, no restoration of the property will be proposed (see 43 CFR 2372.1). Generally, lands which are unimproved, or contain only minor improvements, will be recommended to BLM for disposal as excess property.
§ 644.377 Formal revocation of public land withdrawals and reservations.

When the authorized officer of BLM determines that the land is suitable for return to the public domain, the BLM Land Office will transmit to the DE a draft of public land order (PLO) designed to formally revoke the order or reservation which withdrew or reserved the land. The DE will review the draft PLO for accuracy and return it unsigned. The draft PLO will be transmitted through BLM channels to DAEN-REM for signature of the Secretary of the Army or Air Force and return to the Washington office of BLM.

§ 644.378 Cancellation of permits.

(a) Land obtained by permit, or some other form of instrument, from another Federal agency on a temporary basis which has not been substantially improved while being utilized by the Department, when determined to be excess in accordance with the procedure set forth in §§ 644.326 through 644.332, will be returned to the Federal agency from which it was obtained.

(b) When it is determined by the DE that land obtained by permit, or other form of instrument, from another Federal agency on a temporary basis has been substantially improved while being utilized by the Department, the DE will request DAEN-REM to determine whether the land is excess, or is expected to become excess, to the requirements of the agency from which it was obtained.

(1) If the agency from which the land was obtained advises that the land is excess, or is expected to become excess, to its requirements, the improvements will be reported to GSA on SF 118 in accordance with the procedure described in §§ 644.348 through 644.347, with a statement that the agency from which the land was obtained has advised that the land is excess, or is expected to become excess to its requirements, and that the agency will be or has been requested to reassume administrative control over the land. Coincident with the report of excess, action will be initiated to return the land to the agency from which it was obtained.

(2) If the agency from which the land was obtained advises that the land is not excess, and is not expected to become excess to its requirements, improvements constructed thereon while the property was being utilized by the Department will be disposed of in accordance with the provisions of § 644.381. Where the improvements are substantial, and cannot be utilized effectively by the agency from which the land was obtained, and it appears that the best interests of the Government may not be served by disposal of the improvements for removal from the site, a report, with recommendations, should be forwarded to DAEN-REM for a determination whether the permit and improvements should be reported to GSA for disposal, or whether other action would be appropriate.

(c) The Chief of Engineers, or his duly authorized representatives, will execute and deliver necessary papers effecting the relinquishment of permits and the transfer of real property to other Federal agencies when the installations to which such real property or permits pertain have been determined
to be excess. However, where permits were obtained at local level, DEs will effect relinquishment in the same manner. Unless otherwise instructed, no action will be taken by the DE to restore or return the lands pertaining to an industrial installation to the agency which granted the permit. DEs will, however, submit the report required in §644.379.

(d) Where an installation embraces lands acquired in fee by a military department and lands acquired for temporary use from other departments or agencies, and if return of the latter type of lands to the department or agency which granted the permit would destroy the integrity of the installation or affect its ultimate disposal as a unit, a report will be made to DAENREM with recommendations that they will provide disposition instructions.

§ 644.379 Procedure for cancellation of permits.

(a) When permitted land is excess and the permit is to be executed, the DE will submit the following information with his recommendations to DAENREM:

1. Description and location of the property;
2. Date use was acquired;
3. Department or agency from which acquired;
4. Manner of acquisition; that is, by permit or other means, with copy of document;
5. ENG Form 1440–R, Cost of Restoration (Engineer Estimate and Appraisal), which includes a statement of cost and value of improvements or structures placed on the lands by the department;
6. Statement of restoration work performed by the department if any;
7. Statement of local representative of owning agency as to whether restoration will be required, or, where restoration work has been performed, whether such restoration is satisfactory; and
8. Statement that no clearance of explosives or other harmful elements is necessary because of the manner in which the land was used, or, if otherwise, statement of clearance action taken or necessary.

(b) Upon receipt of the foregoing information, the Chief of Engineers will effect relinquishment of the land by letter. Where the DE has authority to relinquish the land as outlined in §644.378(c), he will effect relinquishment by letter addressed to the permitor, with a copy to DAENREM.

§ 644.380 Restoration of lands made available by other Government agencies.

(a) Requirement. Where the Department retransfers real property, the use of which has been obtained from other Federal agencies (including withdrawals from the public domain recommended for return to the public domain) by means of use permits, public land orders, or other methods, the property should be restored to a condition as good as that which existed at the time the department took possession, damages by the elements or by circumstances over which the Department has no control excepted, unless the agency from which the property was obtained expressly waives restoration. Restoration of public domain land will not be initiated until the determination is made that the land is suitable for return to the public domain. Public domain land that is to be reported excess to GSA will not be restored. The procedure enunciated in §§644.516 through 644.539 relative to neutralization of unexploded bombs or artillery projectiles located on leased premises applies with equal force to Government-owned lands returned to other Federal agencies and to public domain land that is to be reported as excess for disposal by GSA.

(b) Authority. The report of the Senate Appropriations Committee on the DOD Appropriation Bill, 1966 (Senate Report 625, 89th Congress, dated 18 August 1965), contained the following language:

Such funds as may be required may be used to restore lands under jurisdiction of other Government agencies, damaged while being used for military training purposes under agreement with such agencies.

The Comptroller General considers the foregoing to be a clear expression of Congressional intent, and that authority exists for the Department of the Army to restore (or make payment in
§ 644.381 Disposal of buildings and other improvements.

Where improvements have a net salvage value and are not to be reported to GSA for disposal with the land, the permitting agency, or Department of the Interior in the case of public domain land, will be required to reimburse the Army for their net salvage value, or the buildings or improvements will be disposed of in accordance with §§ 644.472 through 644.500.

§§ 644.382–644.384 [Reserved]

PREDISPOSAL ACTION

§ 644.385 Record of excess classification.

The DE will establish a record on ENG Form 836A, Real Property Disposal Report, of the excess classification of each Army property and each Air Force property for which a preliminary or final real estate directive has been issued.

§ 644.386 Utilization for other needs.

The DE will determine the feasibility of utilizing each installation classified as excess to fulfill current directives for acquisition of real estate or known or foreseen potential needs of the Army or Air Force, which may have been generated since the screening process. If redistribution for this purpose is deemed advantageous, recommendations will be submitted to HQDA (DAEN-REM) WASH DC 20314 on the proposed action, indicating when excess status was determined and by which element of the Departments of the Army or Air Force.

§ 644.387 Suspension of acquisition action on installations proposed for disposal.

When a fee-owned installation is recommended for excess by the installation commander, or a preliminary or final real estate disposal directive is issued by the Air Force, any pending acquisition in connection with the installation will be suspended, unless the directive provides otherwise. A recommended plan for curtailment of uncompleted acquisition will be submitted to HQDA (DAEN-REA-L) WASH DC 20314. The plan will include the following information: Identification by tract numbers, names of owners, and area of each tract for which an option has been accepted or a declaration of taking filed, but as to which it is considered practicable and economical to obtain cancellation of the option or a stipulation for dismissal of the condemnation proceeding and revestment of title. Specific information as to the extent and nature of demolition of improvements, new construction, or other damages or changes made by the Government to the premises, and the probable cost of restoration in case of such cancellation or stipulation, will be included. Pertinent public relations aspects should also be covered. Generally, tracts on which a declaration of taking has been filed will not be returned to the owners by stipulation for amendment or dismissal of the condemnation proceedings. Exceptions to
this may be recommended when shown to be in the best of interest of the United States.

§ 644.388 Army military—screening, clearance, preliminary report of excess, except where an E.O. 11954 survey has been made.

Upon receipt of a copy of the installation commander’s recommendation of excess, the DE will take the following actions:

(a) Immediately notify DAEN-REM by teletype, furnishing a brief statement of the real estate included in the recommendation.

(b) Promptly screen the property against Army and other defense requirements if required by and in accordance with §§ 644.333 through 644.339, and advise DAEN-REM of the results.

(c) As soon as the screening message is dispatched under § 644.388(b), or immediately upon receipt of a disposal directive from DAEN-REM when screening is not required by §§ 644.333 through 644.339, DEs will prepare and forward:

(1) SF 118, Report of Excess Real Property and other documentation required in reporting the excess property to GSA.

(2) ENG Form 2187–R, Disposal Report, for clearance with DOD and the Armed Services Committees (ASC) of Congress where required in accordance with §§ 644.340 through 644.347. This should be forwarded to DAEN-REZ-L within three weeks of dispatch of the screening message, or receipt of the disposal directive. This schedule will allow the Chief of Engineers to process the disposal assembly through the DA and DOD secretariats and to obtain necessary clearances from the ASC. DAEN-REM will furnish the DE copies of the DOD approval and the report to the ASC. This office will also furnish copies of the ASC report to the Washington and regional offices of GSA, to permit screening with other Government agencies.

(d) DOD approval of the disposal (property having estimated value in excess of $100,000) signifies the property is excess to Defense requirements. Upon receipt of this approval, the DE will forward a preliminary Report of Excess to GSA by transmitting necessary copies of the completed SF 118, with attachments, carefully identified as preliminary. Where screening is negative for property having an estimated value of $100,000 or less, the property is considered excess to Defense requirements and a final report of excess should be forwarded promptly to GSA.

§ 644.389 Army military—modified predisposal procedures where E.O. 11954 surveys have been made.

(a) DEs will be advised of military installations to be surveyed under E.O. 11954 by a DOD or GSA survey team.

(b) If property is to be declared excess as a result of a decision by the Department of the Army, appropriate commanders and DEs will be advised. The major commander will be requested to submit a Report of Excess pursuant to AR 405–90 to HQDA (DAEN-REM) Washington, DC 20314 within 15 days. DEs will be furnished a copy of the report.

(c) Upon receipt of advice that property will be excessed, the DE, in coordination with the installation commander concerned, will commence preparation of ENG Form 2187–R, if required, for submission to DAEN-REZ-L.

(d) When the Report of Excess is approved, DAEN-REM will advise the DE and will request that screening be initiated. The approved report will be promptly referred through channels to the DE for further appropriate action.

(e) The ENG Form 2187–R will be forwarded to DAEN-REM not later than 15 days after receipt of the approved Report of Excess.

(f) As soon as the areas to be excessed are clearly defined, action will be initiated to assemble all necessary data so that the final SF 118 may be submitted to GSA within 30 days after necessary Congressional clearance is obtained under 10 U.S.C. 2662.

(g) When the estimated value of the property does not exceed $100,000 and preparation of an ENG Form 2187–R is not required, the DE, upon being notified of the approval of the Report of Excess, will notify DAEN-REM of the date the SF 118 will be submitted to GSA.
§ 644.390 Executive Order 11954 surveys of civil works properties.

Procedures to be followed by DEs when civil works properties are surveyed by GSA under E.O. 11954 are contained in chapter 8 of ER 405–1–12.

§ 644.391 Predisposal conference.

(a) Where a substantial Army installation, or portion thereof, is involved, the DE will convene a predisposal conference with representatives of the using command, GSA, and other interested parties. Where an Air Force installation is involved, the Major Air Command will take the initiative in convening the conference. In any cases involving flying facilities, Federal Aviation Administration representatives will be invited. The agenda of the predisposal conference should provide for:

1. Determinations on maintenance guidelines based on probable future uses of the property with emphasis on agreements concerning responsibility for assumption of care and custody, in accordance with AR 405–90, AFR 87–4, and §§ 644.368 through 644.375.

2. Review of the SF 118 to assure its acceptability to GSA.

3. Review with GSA, when appropriate, of the advisability of transferring custody and maintenance responsibilities to GSA at an early date.

4. Planning for and, to the extent possible, making definite determinations on interim utilization pending disposal by GSA.

(b) It is of utmost importance that excess installations be put to productive use as military operations are phased out. This will do much to lessen the impact of the installation’s closing on the economy of the local community. For this purpose, installations, in many cases, will be reported to GSA prior to phase out of military operations. In these cases, the DE has responsibility to insure, to the extent practicable, that other productive use is phased in as military operations are phased out. This can be accomplished only by careful planning and continuous coordination by the DE with using command and GSA. The using command will plan and execute the military phase out. However, the DE will assure that the Report of Excess to GSA specifically identifies and excludes the real and personal property to be retained by the military department. This information is required by GSA for disposal purposes.

(c) A report on the predisposal conference will be forwarded to DAENREM. Any difficulties indicated by GSA will be summarized in the report, along with any other problems encountered or foreseen.

(d) When requested, and on an individual project basis, the DE will prepare a real estate disposal study concerning the transfer of custody and maintenance responsibilities to GSA prior to final disposal. This study will be developed in conjunction with appropriate using command and GSA representatives. Its purpose will be to determine whether the transfer of the excess property to GSA would be more economical and in the best interest of the Government. Important benefits to DOD agencies would be reduction in expenditures and personnel of the military departments for such functions. Copies of the study will be furnished the using command concerned for timely review and recommendations.

The DAF will issue a preliminary real estate disposal directive when a disposal project is forwarded to the Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics) for clearance. (Air Force screens its own properties for other defense requirements and clears the disposal with DOD and the Armed Services Committees of the Congress.) When the preliminary real estate disposal directive is received, the DE, unless directed otherwise, will proceed to perform all necessary actions in coordination with the installation commander concerned, for submission of a preliminary Report of Excess to GSA.

§ 644.393 Final report of excess to GSA.

Where a preliminary Report of Excess is made to GSA, the DE will promptly finalize the report upon receipt to the final Air Force disposal directive. In all cases where a disposal is reported to the Armed Services Committee, the DE will furnish HQDA
(DAEN-REM) advice when the final report is made to GSA. Where the report is finalized by statement confirming a preliminary report as final, copies of the preliminary report and confirming statement should be distributed in accordance with §§644.348 through 644.367. Distribution of preliminary Reports of Excess, except to GSA, will not be made in other cases.

§ 644.394 Protection of disposal information.

To prevent premature disclosure to the public, information on plans for disposal of all or a portion of an installation should be protected (AR 340–16), until such time as the property is determined excess to Army or Air Force requirements. (The Air Force preliminary real estate disposal directive is not issued until a determination has been made that the property is excess to Air Force requirements.) After determinations of excess are made, it is desirable that information on the availability of the property for disposal be widely disseminated. “FOR OFFICIAL USE ONLY” marking on plans and correspondence pertaining to the excess action may be cancelled by any recipient or holder. Where the classification “CONFIDENTIAL” or higher has been used, documents must be declassified in accordance with AR 380–5.

§ 644.395 Coordination on disposal problems.

If any major change or problem requires a significant revision in the time schedule for disposal, prompt action will be taken to advise offices concerned. HQDA (DAEN-REM) should be promptly informed of any problem adversely affecting a specific disposal project or the overall program for disposal or property.

§ 644.396 Assignment of personnel to administer.

To extent appropriate according to the circumstances and nature of the property, the DE will assign a responsible representative to each installation, or group of installations, to act under his staff supervision in performance of the following functions:

(a) Monitoring and expediting the actions described in §§644.385 through 644.399 and maintaining close liaison with GSA on disposal problems and actions.

(b) Monitoring and expediting performance of such demolition, dismantling or other construction work as may be authorized.

(c) Administration, operation and maintenance of the excess installation until final disposal, making every effort by consolidation of activities and otherwise to reduce the costs consistent with economic management of the facilities.

(d) Coordination of ultimate transfer of assumed custodial responsibility to other agencies or persons as directed.

§§ 644.397–644.399 [Reserved]

DISPOSAL OF FEE-OWNED REAL PROPERTY AND EASEMENT INTERESTS

§ 644.400 Authorities—general.

(a) Statutory authorities. Power to dispose of real estate belonging to the United States is vested in Congress (paragraph 2, Section 3, Article IV, Constitution of the United States), and no real estate of the Department will be sold or otherwise disposed of without authority of Congress. By the Federal Property and Administrative Services Act of 1949 (Federal Property Act), (Pub. L. 152, 81st Congress; 63 Stat. 377) as amended, (40 U.S.C. 471 et seq.), Congress provided authority for utilization of excess property and the disposal of surplus Federal property, and established the General Services Administration (GSA) to administer the provisions of that Act. All excess and surplus Federal real estate and real property components will be disposed of under authority of the Federal Property Act, as amended, unless other statutory authority for such disposal is specifically withheld under the provisions of the Act or enacted subsequent thereto. In connection with disposals made under statutory authority other than the Federal Property Act, attention should be given to the purposes of the legislation and in so far as practicable, disposal of property should be in accordance with the provisions of the Act and the regulations issued thereunder, in order that the greatest overall efficiency and economy be effected.
§ 644.401 Transfers—general.

Résumés of the principal legislative acts authorizing transfer of Army and Air Force real property to other Federal departments are contained in §§644.402 through 644.408. The authorities in these acts are exercised independently of GSA regulations. Transfers under these authorities are made without reimbursement. Real property can also be transferred under the Federal Property Act within the scope of disposal authority delegated by GSA. Transfers under the Federal Property Act are subject to reimbursement as prescribed by FPMR, section 101–47.203–7. Property reported to GSA for disposal will be transferred only at the direction of GSA. Excess property excepted from reporting may be transferred by the DE under GSA regulations. Transfers to the Department of the Interior of surplus lands chiefly valuable for migratory bird management are subject to GSA regulations but are made without reimbursement (§644.429).

§ 644.402 Transfers among the armed services.

10 U.S.C. 2571(a) authorizes the interchange without reimbursement of military stores, supplies, and equipment of every character, including real estate owned by the Government, between the Army, Navy, Air Force and Coast Guard upon request by the head of one service and with the approval of the head of the other service.
§ 644.403 Transfers to Tennessee Valley Authority.

10 U.S.C. 831f(b) authorizes the President of the United States to provide for the transfer to the Tennessee Valley Authority of the use, possession and control of such real or personal property of the United States as he may from time to time deem necessary and proper for its purposes. This authority is applicable to property under the jurisdiction or control of the Secretaries of the Army and the Air Force. The authority vested in the President by this law has been delegated to the Office of Management and Budget by Executive Order No. 10530 dated 11 May 1954, as amended (see footnote to 3 U.S.C. 301).

§ 644.404 Transfers to Federal Prison Industries, Inc.

18 U.S.C. 4122 authorizes any department or agency of the Department of Defense to transfer without exchange of funds, to Federal Prison Industries, Inc., any property or equipment suitable for use in performing the functions and duties covered by agreement entered into under subsection (d) of this Act. The provisions include the industrial employment and training of prisoners convicted by general courts-martial and confined in any institution under the jurisdiction of any DOD agency or department.

§ 644.405 Transfers to Veterans Administration.

38 U.S.C. 5003 authorizes the Secretaries of the military departments to transfer, without reimbursement, to the Veterans Administration, facilities, supplies, equipment, or material necessary and proper for the authorized care of veterans. The word “facilities,” as used in this Act, has been construed to include buildings and grounds.

§ 644.406 Transfers to Secretary of Transportation and the National Weather Service.

49 U.S.C. 1157 authorizes the Department of Defense to transfer, without charge, to the Secretary of Transportation, airport property and airway property, exclusive of meteorological facilities in territory outside the continental limits of the United States (including Alaska). Section (b) of this Act similarly authorizes transfer of meteorological facilities, without charge, to the National Weather Service.

§ 644.407 Transfers to District of Columbia.

40 U.S.C. 122 authorizes Federal and District authorities administering properties within the District of Columbia, owned by the United States or by the District, to transfer jurisdiction over parts or all of such property among or between themselves for purposes of administration and maintenance under such conditions as may be mutually agreed upon, provided that, prior to the consummation of any such transfer, the proposed transfer shall be recommended by the National Capital Planning Commission. All such transfers and agreements shall be reported to Congress by the District authorities concerned.

§ 644.408 Interchange of national forest and military and civil works lands.

16 U.S.C. 505a, 505b authorizes the Secretary of Agriculture, with respect to national forest lands, and the Secretary of a military department, with respect to lands under the control of the military department which lie within or adjacent to the exterior boundaries of a national forest, to interchange such lands, or parts thereof, without reimbursement or transfer of funds whenever they shall determine that such interchange will facilitate land management and provide maximum use thereof, for authorized purposes. This law further provides that no transfer thereunder shall become effective until 45 days after the submission to the Congress by the respective Secretaries of notice of intention to make the interchange. The law also provides, in effect, that lands so transferred shall thereafter be subject only to the laws applicable to the lands of which the transferred lands become a part. Lands under the administrative control of the Congress, both military and civil, and that of the Air Force are within the scope of this law.
§ 644.409 Procedures for Interchange of National Forest Lands.

(a) General. The interchange of national forest lands is accomplished in three steps: first, agreement must be reached between the two departments involved as to which lands will be interchanged; second, the two departments will jointly notify the Speaker of the House of Representatives and the President of the Senate, by letter, of the intention of the two departments to make the interchange agreed upon; third, upon the expiration of 45 days from the date of submission of the notice of intention (counting only days occurring during any regular or special session of the Congress) the two secretaries will execute jointly and cause to be published in the FEDERAL REGISTER an order transferring the respective lands of each department to the other.

(b) Initiation of requests for interchange. Requests for interchange of lands may be originated by either the military department involved or the Department of Agriculture. Those originated by the Department of the Army may result from land requirements generated by newly authorized civil works or military construction projects or from authorized expansion of existing projects or as a result of property utilization surveys. Department of the Air Force requirements may develop similarly. When a request originates with the Department of the Air Force requirements may develop similarly. When a request originates with the Department of Agriculture pertaining to a civil works project or a military installation, it will be analyzed and coordinated by the DE with local representatives of the Department of Agriculture and the using service, as appropriate, to determine the feasibility of and need for the acquisition of any forest land to improve administration of the Army project or installation and the availability of Army lands for transfer to the Department of Agriculture. When coordinated analysis indicates the propriety of an interchange, an interchange planning report will be developed by the DE, in coordination with interested local elements of the two departments and submitted to HQDA (DAEN-REM) WASH DC 20314, with appropriate recommendations.

(c) Contents of interchange planning report. The planning report should include the following information:

1. Location of the areas proposed for interchange, including the county or municipality, names of the forest, project or installation, and number of acres to be interchanged by each department.

2. If the areas involved include public domain lands, the number and date of the Executive Order or Public Land Order by which withdrawn or established.

3. If the areas include acquired lands:
   i. Approximate dates, methods and cost of acquisition of Department of the Army lands proposed for interchange.
   ii. Interest, restrictions and reservations currently outstanding, to which the lands were subject when acquired, together with such rights subsequently granted by the Government and presently in force.

4. Any additional reservations, conditions or restrictions under which the interchange is to be made.

5. A map, in triplicate, indicating by appropriate color scheme the lands of each department which are to be transferred to the other.

6. An informal estimate of the current values of the areas to be interchanged.

7. Information upon which to base a determination by the two Secretaries that the interchange will facilitate land management and provide maximum use thereof for authorized purposes.

8. Any other information or data that might be helpful to representatives of the Department of the Army in answering pertinent questions that may be raised by the committees of Congress.

9. A draft of order of interchange prepared, in sextuplicate, in coordination with representatives of the Forest Service for execution jointly by the two Secretaries.

10. Recommendations of the District and Division Engineers.
(d) Relinquishment and assumption of possession. Upon notification by the Chief of Engineers that an order of interchange has been published, the DE will coordinate with local representatives of the Forest Service, and the using service if appropriate, the exchange of custody and accountability of the respective areas.

§ 644.410 Procedure for other transfers.

(a) Applicability—Exceptions. Sections 644.410 through 644.412 are applicable to all transfers of real and related personal property to other Federal agencies by the Army and Air Force except as provided above.

(b) Authority to execute—(1) Secretaries of the Army and Air Force. Instruments effecting the transfer of fee-owned land (except fee-owned land that has been reported to GSA and is transferred at the direction of GSA) will be executed at Secretarial level. The Secretary of the Army, or his designee, will execute instruments transferring Air Force land to other Federal agencies.

(2) Division and District Engineers will execute instruments transferring real property and related personal property to other Federal agencies: (i) Which has been reported to GSA and which is transferred at the direction of GSA; (ii) leaseholds, easements, and other lesser interests in lands; and (iii) buildings, fixtures, and other improvements.

§ 644.411 Form of inter-agency transfer instrument.

(a) Inter-agency transfer instruments will be prepared by the Chief of Engineers in either memorandum or letter form. The instruments will be prepared for signature of the Secretary of the transferring department and will be addressed to the Secretary of head of the receiving department or agency. The instrument will provide, as a minimum, the following: citation of statutory authority for the transfer; statement as to whether the transfer is made with or without reimbursement; statement of the reimbursement amount, if applicable; statement as to whether the requirements of 10 U.S.C. 2662 have been met or that the transfer is not subject thereto; statement as to the acreage of land involved; and, by means of an inclosure, a description of the property being transferred. Based on the circumstances and nature of the property, other appropriate data outlined below will be included in the instrument.

(1) Effective date of transfer (where right-of-entry has been granted or custody transferred, this date will be used.)

(2) Restrictions, conditions, reservations and exceptions, as necessary.

(3) When, where, how and by whom transfer of physical possession and accountability for the property will be accomplished.

(4) Location and proposed disposition of title papers pertaining to the property.

(5) Instructions concerning payment of rent where a lease is involved. The transfer will be conditioned upon assumption of all obligations incurred in connection with the leasehold, including obligations to restore the premises.

(6) Instructions concerning removal and site restoration where buildings or timber, or sand and gravel, or other separable property is involved.

(7) Statement of source of title and cost of acquisition where land is involved. Reservations and exceptions in and to the Government’s title and easements and other rights in the property granted by the Government will be stated with particularity.

(8) List and description of buildings and improvements and cost of buildings and improvements not acquired with the land.

(9) A reference to excess or other directive making the property available for transfer when instrument is executed by District Engineer.

(10) Statement of responsibility and reimbursement for utility services.

(11) Reference to Report of Excess, Standard Form 118, where property has been reported to GSA.

(12) Other appropriate information.

(b) The DE will provide the data outlined in paragraph (a) of this section to HQDA (DAEN-REM) WASH DC 20314 for
use in preparing transfers to be executed at the Secretariat level. The forwarding correspondence will contain sufficient information for a full and complete understanding of the proposed transfer action, including an appraisal when reimbursement is required, together with other appropriate comments and recommendations.

§ 644.412 Transfer of custody and accountability.

The DE will transfer custody and accountability or will coordinate the transfer, as appropriate. The DE will collect any reimbursement and obtain any releases required. Where a leasehold is involved, the DE will furnish the transferee a copy of the lease and advice of the last rental paid and when the next rent is due. Upon completion of the transfer, proper notice will be given to the General Accounting Office, the lessor, and the Finance Officer as to the responsibility of the transferee for future rental payments. This action will be initiated or completed promptly upon receipt of a copy of the executed instrument, and a conformed copy thereof will be furnished to HQDA (DAEN-REP) WASH DC 20314.

§ 644.413 Exchanges of fee-owned land and easement interests.

The statutes identified in §§ 644.414 through 644.417 authorize the exchange of Government-owned lands and interests therein at specified installations or for specified military purposes. The annual acts must be examined to determine that specific authority exists to acquire land by exchange, unless a contemplated exchange falls within the scope of one of the special laws mentioned in §§ 644.415 through 644.419.

§ 644.415 Army military and Air Force lands—$50,000 limitation.

(a) 10 U.S.C. 2672 authorizes the Secretary of a military department to acquire land and interests in land, by gift, purchase, exchange of Government-owned land, or otherwise, that:

(1) The Secretary or his designee determines is needed in the interest of national defense, and

(2) Does not cost more than $50,000.

(b) 10 U.S.C. 2672a authorizes the Secretary of a military department to acquire any interest in land, including by exchange of Government-owned land, that:

(1) The Secretary or his designee determines is needed in the interest of national defense;

(2) Is required to maintain the operations integrity of a military installation; and

(3) Considerations of urgency do not permit the delay necessary to include the required acquisition in an annual Military Construction Authorization Act.

§ 644.416 Army civil works lands.

The Secretary of the Army is authorized to exchange lands acquired for river and harbor and flood control projects for privately-owned lands required for such purposes (33 U.S.C. 558b and 558b–1).

§ 644.417 For MCA family housing.

§ 644.418 Procedure for exchange.

(a) Each agreement for the exchange of real property should be formalized by written contract specifying the terms and conditions of the exchange, including, by reference to exhibits incorporated therein or otherwise, the form and terms of the conveyance of the title to the property to and from the Government. The agreement, in the case of relocation contracts, will be developed in accordance with ER 1180–1–1. Where an exchange of land or interests therein is considered desirable in the course of a condemnation proceeding, the agreement can be incorporated in a stipulation therein (§§ 644.111 through 644.121).

(b) Submission to the Chief of Engineers of draft of conveyance.

(1) Conveyance will usually be executed by the Secretary or head of the agency involved § 644.441. To avoid impinging on his discretionary powers, the execution of any contract or agreement involving an exchange of real property interests must be approved in advance, be deferred pending execution of the conveyance, or provide that the terms and conditions of any grant to be made pursuant to the contract will be subject to approval by the Secretary or agency head. It is considered preferable that the contract contain a draft of conveyance as an exhibit thereto and, where time will permit, be submitted to DAEN-REM for review prior to final execution of the contract in order to avoid possible difficulties arising from subsequent disagreement over terms acceptable to the signatory of the Government’s conveyance.

(2) In submitting for final approval and execution the conveyance of the Government’s interest in land pursuant to a contract for exchange, the following data should included to support the proposed action:

(i) Description and map of the property to be conveyed.

(ii) Statements as to how and when the Government acquired title to the property, the nature and extent of its interest therein, and a statement of any encumbrance to which the property is subject and the nature thereof, such as easements for road rights-of-way, utility lines, etc.

(iii) A sufficient number of drafts or the conveyance to permit distribution thereof to interested agencies and the grantee.

(iv) Two copies of the contract, option, stipulation in condemnation or other agreement which provides for the proposed conveyance, or, in lieu thereof, pertinent excerpts therefrom sufficient to clearly show the nature and extent of the Government’s obligation to execute the conveyance.

(v) A citation of the statutory authority on which the execution of the conveyance is to be predicated.

(vi) Any additional information necessary to a proper understanding of the proposed transaction.

(vii) When the exchange agreement is other than a relocation contract, an appraisal report showing the relative fair values of the properties to be exchanged.

(viii) A copy of the conveyance to be made to the United States, or a statement by the Attorney General that an acceptable conveyance has been executed and delivered to the United States, and that an opinion of good title has been made or is not required by regulation to be made.

(ix) Recommendations of the Division and District Engineers.

§ 644.419 Public Law 87–852 easements.

Public Law 87–852, approved 23 October 1962 (76 Stat. 1129), authorizes executive agencies to grant easements on real property of the United States for rights-of-way or other purposes on terms and considerations deemed necessary to protect the interest of the United States, with or without monetary consideration, or other consideration, including any interest in real property. The Act also authorizes the relinquishment of legislative jurisdiction to the State.

§ 644.420 Disposal of property in which the military departments have a continuing interest under special acts of Congress.

General. Because of the continuing interest of the departments in the following properties and in view of the determinations under the Acts on which the disposals are premised, properties
that can be conveyed under authorities discussed in §§644.421 through 644.424 are not considered surplus or excess within the meaning of these terms as defined in the Federal Property Act.

§ 644.421 Highway purposes.

Title 23 U.S.C. 317 provides that upon application of the Secretary of Transportation, land or materials may be transferred to a state for the construction or maintenance of a right-of-way for any highway adjacent to a Government installation. If, within a period of four months after such application by the Secretary of Transportation, the Secretary of the Department shall not have certified to the Secretary of Transportation that the proposed appropriation of such land or material is contrary to the public interest or inconsistent with the purpose for which such land or materials have been reserved, they may be appropriated and transferred to the state for such purposes. When the need for such land or material ceases to exist, they shall revert to the control of the department. This section applies only to projects constructed on a Federal-aid system, or under the provisions of chapter 2 of title 23 U.S.C. Usually applications for highway rights-of-way or the use of borrow material made under this Act by the Federal Highway Administration, Department of Transportation, on behalf of a particular state can be and are more simply satisfied by the issuance of a road easement or a license to take borrow material. This latter procedure is also desirable in that controls necessary to satisfy military requirements may be retained. Title 23 U.S.C. 107(d) directs Federal agencies to cooperate with the Secretary of Transportation in providing rights-of-way, including control of access, for the interstate highway system over lands and interests in lands owned by the United States.

§ 644.422 Authorized widening of a public highway, street, or alley.

40 U.S.C. 345c authorizes the conveyance, upon application, of such interest in real property as is determined will not be adverse to the interests of the United States, to the states or political subdivisions for authorized widening of a public highway, street, or alley. The conveyance may be made with or without consideration, and subject to terms and conditions deemed necessary to protect the interests of the United States. Excepted from this authority is the conveyance of any interest in real property that can be transferred under title 23 of the United States Code (see §644.421), and to public lands in the National Forest System.

§ 644.423 Airport development.

(a) Authority. 49 U.S.C. 1723 provides that

(a) . . . whenever the Secretary of Transportation determines that use of any lands owned or controlled by the United States is reasonably necessary for carrying out a project for airport development under this subchapter, or for the operation of any public airport, including lands reasonably necessary to meet future development of an airport in accordance with the national airport system plan, he shall file with the head of the department or agency having control of the lands a request that the necessary property interests therein be conveyed to the public agency sponsoring the project in question or owning or controlling the airport. The property interest may consist of the title to, or any other interest in, lands or easement through or other interest in airspace. (b) Upon receipt of a request from the Secretary under this section, the head of the department or agency having control of the lands in question shall determine whether the requested conveyance is inconsistent with the needs of the department or agency, and shall notify the Secretary of his determination within a period of four months after receipt of the Secretary’s request. If the department or agency head determines that the requested conveyance is not inconsistent with the needs of that department or agency, the department, or agency head is hereby authorized and directed, with the approval of the President and the Attorney General of the United States, and without any expense to the United States, to perform any acts and to execute any instruments necessary to make the conveyance requested. A conveyance may be made only on the condition that, at the option of the Secretary, the property interest conveyed shall revert to the United States in the event that the lands in question are not developed for airport purposes or used in a manner consistent with the terms of the conveyance. If only a part of the property interest conveyed is not developed for airport purposes, or used in a manner consistent with the terms of the conveyance, only that particular part shall
at the option of the Secretary, revert to the United States.

(b) Approval. The requirement for approval by the President was waived by Executive Order 12079 dated 18 September 1978. The Attorney General delegated his authority to approve to the Assistant Attorney General, Land and Natural Resources Division, by §0.67 of title 28 of the Code of Federal Regulations (Order No. 468.71 of the Attorney General, October 22, 1971; 36 FR 20428). The instrument of conveyance must cite authority for the waiver and the delegation as shown in the suggested format of deed in ER 405–1–12.

(c) Requirements for conveyance instrument. Under authority delegated by the Secretary of Transportation to the Federal Aviation Administration (FAA), when the Administrator of the FAA requests a conveyance from a military department, the instrument of conveyance requires the following provisions as covenants running with the land, binding the grantee, its successors and assigns.

1. That the grantee will use the property interest for airport purposes, and will develop that interest for airport purposes within one year after the date of this conveyance, except that if the property interest is necessary to meet future development of an airport in accordance with the National Airport System Plan the grantee will develop that interest for airport purposes on or before the period provided in the plan or within a period satisfactory to the Administrator and any interim use of that interest for other than airport purposes will be subject to such terms and conditions as the Administrator may prescribe.

2. That the airport, and its appurtenant areas and its buildings and facilities, whether or not the land is conveyed, will be operated as a public airport on fair and reasonable terms, without discrimination on the basis of race, color, religion, age, sex, handicap or national origin, to as to airport employment practices, and as to accommodations, services, facilities, and other public uses of the airport.

3. That the grantee will not grant or permit any exclusive right forbidden by section 308(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1349(a)) at the airport, or at any other airport now owned or controlled by it.

4. That the grantee agrees that no person shall be excluded from any participation, be denied any benefits or be otherwise subjected to any discrimination, on the grounds of race, color, religion, age, sex, handicap or national origin.

5. That the grantee agrees to comply with all requirements imposed by or pursuant to part 21 of the Regulations of the Office of the Secretary of Transportation (49 CFR part 21)—non-discrimination in federally assisted programs of the Department of Transportation—effectuation of title IV of the Civil Rights Act of 1964.

6. That in furtherance of the policy of the FAA under this covenant, the grantee:

(i) Agrees that, unless authorized by the Administrator, it will not, either directly or indirectly, grant or permit any person, firm or corporation the exclusive right at the airport, or at any other airport now owned or controlled by it, to conduct any aeronautical activities, including, but not limited to, charter flights, pilot training, aircraft rental and sightseeing, aerial photography, crop dusting, aerial advertising and surveying, air carrier operations, aircraft sales and services, sale of aviation petroleum products whether or not conducted in conjunction with other aeronautical activity, repair and maintenance of aircraft, sale of aircraft parts, and any other activities which because of their direct relationship to the operation of aircraft can be regarded as an aeronautical activity;

(ii) Agrees that it will terminate any existing exclusive right to engage in the sale of gasoline or oil, or both, granted before 17 July 1962 at such an airport, at the earliest renewal, cancellation, or expiration date applicable to the agreement that established the exclusive right; and

(iii) Agrees that it will terminate forthwith any other exclusive right to conduct any aeronautical activity now existing at such an airport.

7. That any later transfer of the property interest conveyed will be subject to the covenants and conditions in the instrument of conveyance.
§ 644.424 Development of public port or industrial facilities.

(a) Authority. Section 108 of Pub. L. 86–645 approved 14 July 1960 (33 U.S.C. 578) authorizes the Secretary of the Army, after certain determinations are made, to convey land which is a part of a water resource development project to a state, political subdivision thereof, port district, port authority, or other body created by the State or through a compact between two or more States for the purpose of developing or encouraging the development of public port or industrial facilities.

(b) Limitation. Only lands within a navigation project will be made available for conveyance for these purposes.

(c) Delegations, rules, and regulations. Pursuant to rules and regulations published in the Federal Register 11 March 1961 (26 FR 2117–2118; 33 CFR 211.141 through 211.147),
(1) The Chief of Engineers or the Director of Civil Works has been delegated authority to determine:
   (i) That the development of public port or industrial facilities on land within a project will be in the public interest;
   (ii) That such development will not interfere with the operation and maintenance of the project;
   (iii) That the disposition of the land for these purposes under this Act will serve the objectives of the project;
   (iv) If two or more agencies file applications for the same land, which agency’s intended use of the land will best promote the purpose for which the project was authorized; and
   (v) The conditions, reservations and restrictions to be included in a conveyance under the Act.

(2) The District Engineer has been delegated authority to:
   (i) Give notice of any proposed conveyance under the Act and afford an opportunity to interested eligible agencies in the general vicinity of the land to apply for its purchase; and
   (ii) Determine the period of time in which applications for conveyances may be filed.

(3) Notice. The District Engineer shall give notice of the availability of any land for conveyance under this Act and afford an opportunity to eligible agencies in the general vicinity of the land to apply for its purchase by publication at least twice at not less than 15-day intervals in two newspapers having general circulation within the state in which the available land is located, and, if any agency of an adjoining state or states may have an interest in the development of public port or industrial facilities on the available land.

(4) Filing of application. Any agency interested in the development of public ports or industrial facilities upon the available land shall file a written application with the District Engineer within the time designated in the public notice. The application shall state fully the purposes for which the land is desired and the scope of proposed development.

(5) Price. No conveyance shall be made for a price less than the fair market value of the land.

(6) Conveyance. Any conveyance of land under this Act for public port or industrial facilities will be by quitclaim deed in the form of Figure 11–5 in ER 405–1–12 executed by the Secretary of the Army.

(d) Procedure. (1) Proposals to convey land included in navigation projects for development of public port or industrial facilities will be forwarded by the District Engineer, through the Division Engineer, to HQDA (DAEN-REM), with recommendations, and with the information required by §644.329, and such additional information as will enable the Chief of Engineers to make the determinations required under paragraph (c)(1)(iv) of this section.

(2) Upon receipt of notification from the Chief of Engineers that the property is available for sale for development of public port or industrial facilities, the District Engineer shall give notice of such availability in accordance with paragraph (c)(3) of this section. The public notice will follow substantially the guide format in Figure 11–4 of ER 405–1–12.

(3) If two or more applications are received from eligible agencies, all applications, with recommendations, will be forwarded, through the Division Engineer, to DAEN-REM for the determination referred to in paragraph (c)(1)(iv) of this section.

(4) Upon determination of the actual property to be included in a conveyance, the fair market value thereof will be established by an appraisal.

(5) Upon the acceptance of an application, negotiations will be conducted at the price established by the appraisal. However, the applicant will be advised that the price is subject to approval by the Secretary of the Army. This is necessary since the Secretary of the Army has not delegated his authority to determine the fair market value for conveyances under this Act. If public port facilities that can be used in connection with proposed industrial facilities have not been constructed in
§ 644.425 Authority and procedure for disposal of surplus property by DA to eligible public agencies.

FPMR 101–47.303–2 provides that the disposal agency shall allow a reasonable period of time for states, municipalities, and their instrumentalities, to perfect a comprehensive and coordinated plan of use and procurement of surplus property in which they may be interested. This provision applies to surplus property that can be disposed of by negotiated sale under the special acts listed in §§ 644.428 through 644.432 for public highways, streets, and alleys under the Act listed in §§ 644.421 and 644.422, by transfer to the District of Columbia under § 644.407, and under the individual agency negotiating authority of the Federal Property Act, (40 U.S.C. 484(e)(3)). A listing of the special acts, with the eligible public agencies, and some guides for classification of property for disposal are contained in FPMR, 101–47.4905.

§ 644.426 Classification.

Pursuant to FPMR, 101–47.303–1, any item of surplus land not reported to GSA for disposal in accordance with §§ 644.348 through 644.367 will be classified according to its highest and best use, e.g., industrial, commercial, agricultural, or for disposal under the special acts referred to above. Where required by the special acts, classification will be coordinated with the interested Federal agency. The classification will be recorded on ENG Form 1825 (Real Property Classification), with sufficient information to justify the classification. Surplus property may be reclassified from time to time whenever such action is deemed appropriate. Based on its classification, notice of the availability of surplus land for disposal will be given to public agencies eligible to procure such property as provided in § 644.427.

§ 644.427 Notice to eligible public agencies.

FPMR, 101–47.303–2 and 101–47.308–1, et seq., provide a procedure of formal notice to eligible public agencies of the availability of surplus land for disposal. Notices are not required for property having an estimated fair market value of less than $1,000, except where the disposal agency has reason to believe that an eligible public agency may be interested in the property. Notices as provided in this section will be given for all surplus airport property and surplus fee-owned land for which the Army is the disposal agency, that is classified for disposal under a special act, or if there is reason to believe that a public agency may be interested in acquiring the land by negotiation at its appraised fair market value under the Federal Property Act (40 U.S.C. 484(e)(3)(H)).

§ 644.428 Airport property.

(a) Eligible transferees. The right to acquire surplus property without monetary consideration for airport purposes, under 50 U.S.C. 1622(g), with the approval of the Administrator of GSA, is limited to states, political subdivisions, municipalities and tax-supported institutions. This is the proper statutory provision governing transfers of entire military airports to state or local agencies for their use as public airports. The right of such transferees is subordinate to the priority of Federal agencies to acquire the property for their own use. Airport property will not be disposed of for any other non-Federal use until every reasonable effort has been made to dispose of it for airport purposes.

(b) Preliminary procedures. (1) Request a determination by the Administrator of the FAA that the surplus land is essential, suitable or desirable for the development, improvement, operation or maintenance of a public airport as required by 50 U.S.C. 1622(g)(1).

(2) Upon receipt of a determination by the Administrator of FAA, furnish
the FAA Regional Office with a description of the property, or a copy of the Standard Form 118 if the property has been reported to GSA for screening, together with a list of the operating and maintenance equipment available for disposal with the airfield, and request that a survey under the Surplus Property Act be made and that, based thereon, recommendations for classification of the property under the Act be furnished.

(c) Classification. District Engineers are authorized to approve ENG Form 1825, Real Property Classification, based on FAA recommendations. Generally, the recommendations of FAA in regard to classification of property, will be followed, except the following will be forwarded to DAEN-REM without final classification action: cases involving reduction in land areas, runways, taxiways, etc.; controversial cases; and cases where changes in the reservations, restrictions, or conditions specified in the Act are recommended by FAA. District Engineers will not classify as airport property, property in excess of that recommended by FAA or property of which the highest and best use is determined to be industrial. Where the District Engineer does not agree with the report of FAA, he will immediately submit complete data setting forth all objections to the report, together with his recommendations, to DAEN-REM.

(d) Notice of availability. Upon classification of the property as airport property, notice of the proposed disposal will be sent by certified mail to the political subdivisions, or municipalities in which the property is located, and also to any other state, political subdivision, municipality, or tax-supported institution which the District Engineer has reason to believe may be interested in the property. A reasonable time will be allowed eligible agencies to submit an acceptable application.

(e) Advertising. The proposed disposal of airport property will be advertised in at least two newspapers of general circulation within the state in which the airport is located. This advertising will include notification to political subdivisions, tax-supported institutions, and others that the property is available. Property not classified as airport property will be advertised in accordance with the applicable requirements for the type of property. However, the first advertising of non-airport property adjacent to an airport will contain a statement that the property may be acquired under section 13(g) of the Surplus Property Act of 1944, as amended, for airport purposes, provided FAA approves such acquisition.

(f) Form of application. Public agencies desiring to acquire surplus airport property will be required to submit an Application For Airport Property (Figure 11–7 in ER 405–1–12). The application includes the provisions of section 13(g) of the Surplus Property Act of 1944, as amended. If the applicant desires to enter and use the property prior to conveyance, such other terms and conditions considered desirable and necessary governing interim use of the property by the applicant will be included. The application will be signed by the applicant and forwarded to DAEN-REM for acceptance by proper authority in the Department. Evidence of the applicant’s legal and financial ability to maintain and operate the property, as proposed, will also be submitted with the application.

(g) Request for modifications in the provisions of section 13(g) of the Surplus Property Act of 1944, as Amended. Should an applicant request modifications in the restrictions and conditions imposed by section 13(g) of the Surplus Property Act of 1944, as amended, the application and all pertinent data, including the FAA report, will be forwarded to DAEN-REM. If the requested modification is approved, the case will again be referred to FAA for its recommendation. If FAA does not concur in the modification, the fact will be reported to DAEN-REM for further necessary action.

(h) Personal property. Non-industrial personal property of any other nature or description made available for disposal with an airport and located on it may be transferred with the airport on recommendation by FAA.

(i) Meetings with public bodies. Close cooperation will be maintained with
§ 644.429 Wildlife purposes.

(a) Authority. The military departments, when acting as a disposal agency, are authorized under the provisions of 16 U.S.C. 667b-d, in connection with the transfer of airport property, a survey will be provided by the prospective transferee without cost to the Government.

(b) Notice of availability. If property is considered by the District Engineer to be valuable for wildlife conservation purposes, or if interest has been shown in acquiring the property for that purpose, notice of availability should be given to the agency administering state wildlife resources and to the Federal Fish and Wildlife Service if the property has particular value in carrying out the national migratory bird program.

(c) Classification—Factors to be considered and determinations to be made by disposal agency. Should the property be classified as being chiefly valuable for purposes other than wildlife conservation purposes, such as agricultural, commercial, etc., the property may not be transferred to any State or to the Department of the Interior, under the authority cited in paragraph (a) of this section. However, should an application be received for conveyance of the property for wildlife conservation purposes, and the classification of the property indicates that it is chiefly valuable for other purposes, the classification, all pertinent papers and the
application, together with the Division Engineer’s recommendation, will be forwarded to HQDA (DAEN-REM), Washington, DC 20314. In addition to the determination that the property is chiefly valuable for wildlife conservation purposes and is available for such use, the Division Engineer will determine, when recommending that property be conveyed for such use, that the applicant has the legal and financial ability to acquire, operate and maintain the property as proposed, and will furnish information to DAEN-REM to support his opinion. With proper safeguards, contaminated property can be made available for use in the wildlife conservation program.

(d) Application. Any state desiring to make application for property for wildlife conservation will be furnished copies of Application For Real Property For the Conservation of Wildlife with accompanying instructions for preparation. In evaluating the application, the responsible District Engineer will request review of the application by the Regional Office of the Fish and Wildlife Service, Department of the Interior, and will obtain that Service’s recommendation as to the value of the property for wildlife conservation purposes.

(e) Instrument of conveyance. Any instrument of conveyance of property for wildlife conservation will contain the restrictions and conditions required by 16 U.S.C. 667b, c, d. A Sample Deed for Conveyance of Land and Improvements For Conservation of Wildlife, with the statutory restrictions and conditions is provided as Figure 11–10 in ER 405–1–12.

(f) Publication of order. The order required to be published in the FEDERAL REGISTER after disposal of the property under this authority will be processed for publication by the Chief of Engineers.

§ 644.430 Shrines, memorials, or religious purposes.

Pursuant to the provisions of FPMR 101–47.308–5, when the Department, acting as a disposal agency, determines that a chapel may properly be used in place, a suitable area of land may be sold with the chapel for use as a shrine, memorial, or for religious purposes. The sale price of land for this purpose will be its fair market value based on its highest and best use as established by an appraisal. Deeds conveying lands for such purposes will contain no restriction on the use of the land. Sale of the chapel building will be subject to the procedure and terms and conditions provided in §§644.472 through 644.500.

§ 644.431 Power transmission lines.

(a) Authority. Pursuant to the provisions of section 13(d) of the Surplus Property Act of 1944, as amended (50 U.S.C., App. 1622(d)), any state, or political subdivision thereof, or any state or Government agency or instrumentality may certify to the disposal agency that a surplus power transmission line and the right of way acquired for its construction is needed for or adaptable to the requirements of a public or cooperative power project. Whenever any property is reported to GSA for screening, it will be assumed that GSA has screened Federal agencies for such purpose and no further screening with such agencies is necessary. Property not reported to GSA for screening will be screened in accordance with §§644.333 through 644.339. Screening with the appropriate state agencies will be conducted in all cases.

(b) Procedure. Whenever a State, or political subdivision thereof, or state or Federal agency or instrumentality certifies that such property is needed for or adaptable to the requirements of a public or cooperative power project, the property may be sold for such utilization at its appraised fair market value. In the event that a sale cannot be consummated and the certification is not withdrawn, such facts will be reported to DAEN-REM in order that a determination of the action to be taken may be obtained from the Administrator, GSA. If no certification from a state or Federal instrumentality as outlined above is received after proper notice is given, the property may be disposed of in the same manner as other excess or surplus real property.
§ 644.432 Assignment to Department of Health, Education, and Welfare (HEW) or successor agencies for health or educational purposes.

(a) Authority. Under section 203(k)(1) of the Federal Property Act of 1949, as amended (40 U.S.C. 484(k)(1)) the Administrator, GSA is authorized, under such regulations as he may prescribe and in his discretion, to assign to the Secretary of HEW for disposal, such surplus real property as is recommended by the Secretary of HEW as being needed for school, classroom, or other educational use, or for use in the protection of public health, including research. The Secretary of HEW is authorized under section 203(k)(1), subject to disapproval by the Administrator, GSA after notice to him from the Department of Health, Education, and Welfare (HEW), to sell or lease surplus real property for such purposes. Pursuant to FPMR 101–47.308–4, a military department, when acting as disposal agency is authorized to assign property to HEW for disposal for education or health purposes and to disapprove, within 30 days after notice, any transfer of property proposed to be made by HEW for such purposes.

(b) Notice to Department of Health, Education, and Welfare or Successor Agencies. When real property is reported to GSA for screening prior to disposal by the military department, notification will be given HEW by the GSA Regional Office simultaneously with notification to the District Engineer that the property has been determined surplus to Federal requirements. The District Engineer will furnish such notification directly to the appropriate regional representative of the Department of HEW in the case of nonreportable real property immediately after he determines that the property is surplus to Federal requirements. Such notification will include the following information:

(1) A brief description of the property in sufficient detail to enable a determination of its probable suitability for uses authorized in section 203(k)(1) of the Act.

(2) When the property may be inspected and where and how arrangements may be made for inspection of the property.

(3) That the property will be withheld from advertisement for bids for a period of 20 days from the time of the notification unless the office submitting the notification is sooner informed in writing as to whether the property is needed for school, classroom, or other educational use, or for use in the protection of public health, including research. If within that time notice is received of a known potential need, the property will be held for an additional 45 days or until a certification of need or request for assignment is received, whichever occurs first.

(4) The District Engineer shall not give such notification to HEW on surplus buildings and improvements located on surplus leaseholds where their removal from the site will increase the Government’s restoration obligations under the lease. Where such a situation exists and GSA is to screen the property prior to disposal by the Department, GSA should be advised to this effect. Where any surplus buildings and improvements (on leaseholds or fee-owned land) are available for off-site disposal, notification will be given HEW (unless time restrictions prohibit as set out in §§ 644.333 through 644.339 and §§ 644.348 through 644.367) but the notification will include the same restoration obligations as would be placed in a sale of the property to a private party.

(5) During the 20-day period, action will be taken preparatory to advertising the property for sale. All inquiries received concerning acquisition of the property for such purposes from the state, or local agencies, or qualified organizations seeking the purchase of available real property for health or educational purposes will be referred to the appropriate field representatives of HEW.

(6) Upon receipt from HEW of a certification that the property is needed for educational or public health purposes and a request from HEW for assignment of the property, if the property is available for such purposes, it
will be assigned by the responsible District Engineer by letter addressed to the HEW office from which the request for assignment was received, citing the Act and GSA regulations as authority therefor. A copy of such letter of assignment will be furnished to the Regional Office of GSA.

(7) When notification of the proposed disposal is received from HEW, subsequent to assignment, if there is no reason for disapproval of the proposed disposition, notice from the responsible District Engineer to HEW of approval thereof is not necessary. Under section 203(k)(1), approval is automatically given in the absence of notice of disapproval within 30 days from the date of notification of the proposed disposal. If in the request for assignment HEW furnishes the name of the proposed transferee and states that an application from the transferee is on file and that the proposed use by the transferee is one authorized under section 203(k)(1), the District Engineer, in making the assignment to HEW, may state that no objection is interposed to the proposed transfer of the property.

(8) GSA has advised that it is not anticipated that the Corps of Engineers, in acting as the disposal agency, would investigate each request to it by the Department of HEW, because to make such investigations in each case would clearly duplicate the function assigned to the Department of HEW, because to make such investigations in each case would clearly duplicate the function assigned to the Department of HEW. Doubtful cases would only arise in connection with property for which the highest and best use is industrial or commercial, or where further study may be required by the Federal Government concerning future requirements for the property. In accordance with a further suggestion by GSA, where there is a reasonable doubt as to the propriety of an assignment to HEW or a proposed disposal by it, the request will be referred to GSA for final decision. Such referrals will be made through DAEN-RAIR.

(9) The District Engineer making the assignment of the property will request HEW to furnish two copies of the sales contract. Upon receipt of these copies, together with a request from HEW that the property be transferred, custody will be given to the grantee or transferee named in the sales contract.

§ 644.433 Surplus disposal to private parties.

General. Sections 644.435(b) through 644.440 cover general procedures for the sale of surplus fee-owned land and easement interests and includes actions to be taken preliminary to proceeding with the appropriate sale procedures set forth in §§ 644.540 through 644.557.

§ 644.434 Cottage site disposal.

Disposal of lots for cottage site development and use is authorized by Pub. L. 84–999 (16 U.S.C. 460e). No new allocations of land for private cottage use will be made. The policy concerning phasing out of existing cottage site areas is set out in ER 1130–2–400. The DE has delegated authority to sell or lease cottage sites. Contract of Sale, ENG Form 3297–R, will be used.

§ 644.435 Procedure.

(a) Fee-owned land. When fee-owned land for which the department is acting as disposal agency has been found to be surplus to requirements of the Federal Government, has been classified under § 644.426 and disposal is not made to a state, political subdivision, etc., the property will be offered for sale to the highest responsible bidder, except under special circumstances provided in §§ 644.540 through 644.557.

(b) Easements. Easements that are readily assignable will be disposed of in the same manner as fee-owned land. Easements may be disposed of with land to which they are appurtenant. Easements may be disposed of to the owner of land which is subject to the easement (the servient estate). A determination should be made as to whether the disposal should be with or without reimbursement to the Government on the basis of all the circumstances and factors involved and with due regard to the acquisition cost to the Government. The amount of such reimbursement should be the appraised fair market value of the easement acquired for the deposit of spoil material a minimum charge of $225.00 will be imposed where relinquishment is being accomplished for the benefit of the owner of the servient estate and where no direct benefit will inure to the Government. A statement as to the
§ 644.436 Appraisal.  
Under the usual circumstances prompt action will be taken to appraise surplus property concurrently with its classification. Appraisals will not be undertaken for property which has been or is likely to be classified for disposal for any of the following purposes: airport; wildlife conservation; public highways, streets and alleys; disposal to the District of Columbia; and property assigned to HEW for disposal. Property that is to be disposed of for other than the above listed purposes will be appraised.

§ 644.437 Disposal plan for fee-owned land.  
A disposal plan will be made for each surplus property. It will include the District Engineer’s recommendation of the method or methods of disposal and the reasons therefor; for example, whether improvements or minerals and lands should be sold separately; improvements cannibalized; whether the property should be subdivided; the media for advertising; and other pertinent factors. In addition, the following will be included as part of the disposal plan:  
(a) Description and map of the lands.  
(b) Description of buildings and other improvements.  
(c) Appraisal made in accordance with §§ 644.41 through 644.49, unless exempted by § 644.436.  
(d) Information as to when, from whom, and how the property was acquired.  
(e) Information as to the estate which the Government has in the land, and reservations and exceptions in and to the Government’s title. Outstanding interests granted by the Government or reserved or excepted in the acquisition of the lands will be stated with particularity. The map or plat will delineate any grant, exception, or reservation, such as telephone and telegraph, electric transmission, oil, gas and water lines.

§ 644.438 Disposal plan for easements.  
When recommending disposal of a surplus easement the District Engineer will submit the following:  
(a) Information as to when and from whom the easement was acquired.  
(b) The consideration paid therefor.  
(c) Identification of the installation to which it is appurtenant.  
(d) If the easement has no commercial value, the amount that should be paid by the owner of the servient estate, representing a rebate on the purchase price, or the amount paid for severance damages will be specified. (For example, if the easement was acquired for a 15-year period and the price paid therefor was substantial and one year after acquisition it is returned to the owner of the servient estate, an effort should be made to obtain a rebate on the purchase price although the easement has no commercial value. The same would be applicable to the payment for severance damages).  
(e) If the owner of the servient estate, or other prospective grantee, is not willing to pay the appraised value in consideration of the release of an easement acquired for a substantial consideration, all action to release the easement will be held in abeyance until such time as an adequate consideration can be obtained for the release. Note the minimum payment for release of spoil easements discussed in paragraph (b) of § 644.435.

§ 644.439 Sale and conveyance.  
Sales procedure, including advertising, will be in accordance with §§ 644.540 through 644.557. Normally, conveyance will be by deed, prepared and executed as provided in § 644.441.
§ 644.440 Application of antitrust laws.

Section 207 of the Federal Property Act provides that real property and related personal property with an aggregate total cost of $1,000,000 or more, or patents, processes, techniques, or inventions, regardless of costs, shall not be disposed of until the advice of the Attorney General has been received as to whether the proposed disposal would tend to create or maintain a situation inconsistent with the antitrust laws. Prior to obligating the Government on any such disposal, the District Engineer will furnish DAEN-REM information on the probable terms or conditions. DAEN-REM will use this information as the basis for a request to the Attorney General for advice (FPMR 101–47.301–2).

§ 644.441 Preparation and execution of deeds.

(a) Authority to execute. All conveyances of fee ownership and other permanent interests in land which the Army and Air Force have authority to convey under the statutory authorities and delegations set forth in §§ 644.400 through 644.443 will be executed by the Secretary of the Army, for Army land, and by direction of the Secretary of the Air Force, for Air Force land. Conveyances of surplus property that have been assigned to HEW for disposal will be executed by officers of that department.

(b) Form of deed or instrument. Conveyances of fee-owned land and easements shall be by quitclaim deed prepared in conformance with local law and practice except where it is found that another form of conveyance is necessary or desirable to obtain a reasonable price for the property, or to render the title marketable, or for other reasons. Appropriate recommendations will be forwarded to DAEN-REM. Forwarding correspondence should contain information as to the requirements of local law for witnesses, acknowledgment, authentication of acknowledgment, and other special requirements. The instrument of conveyance should contain a statement that the requirements of 10 U.S.C. 2662 have been met, or that the conveyance is not subject to these requirements.

(c) Authority for conveyance. Authority for conveyance will be recited in the granting clause. Conveyances under the Federal Property Act will recite:

* * * under and pursuant to the Federal Property and Administrative Services Act of 1949 (63 Stat. 377), as amended, and the delegation of authority to the Secretary of Defense from the Administrator of General Services Administration (41 CFR 101–47.601) and the redelegation of authority from the Secretary of Defense to the Secretary of the Army (Air Force) (20 FR 7113).

Conveyances to states and their instrumentalities under the special statutes, listed in §§ 644.425 through 644.432, will recite the special statute, as continued in effect by the Federal Property Act and the delegations. Conveyances to states for wildlife conservation purposes under Pub. L. 537, 80th Congress (§ 644.429) will cite the special act and recite that the property has been determined surplus under the Federal Property Act and delegations thereunder. Conveyances releasing the restrictions contained in a flowage easement prohibiting the construction and maintenance of structures for human habitation should cite as authority for the conveyance the Federal Property Act and the delegations.

(d) Conditions in the conveyance. The deed will contain the reservations, restrictions, or conditions, required by: (1) The directive which authorized the disposal; (2) any special acts under which the property is conveyed; and (3) by any contract of sale, agreement to extend credit, or relocation contract, pursuant to which conveyance is made.

(e) Acceptance by grantee. Where the instrument of conveyance imposes obligations on the grantee, the instrument will be executed and accepted by or on behalf of the grantee prior to forwarding for execution. If the grantee is a corporation or body politic, the instrument will contain a certificate attesting to the authority of the officer executing the instrument to act for and bind the corporation or body politic, and that his signature is genuine. Where a resolution or other special action is necessary to legally bind the
grantee, a copy will be attached to the instrument.

(f) Execution of deed. (1) The Division Engineer will forward to DAEN-REM a draft of the deed, prepared in final form, together with copies of as many of the items listed below as are appropriate depending on the nature and purpose of the conveyance, any other information necessary for a complete understanding of the case, and the remarks and recommendations of the Division and District Engineer. Upon approval of the proposed disposal by DAEN-REM, the deed will be forwarded to higher authority for execution and returned to the District Engineer for delivery and distribution.

(2) Items to be forwarded with draft of deed proposed for execution, as appropriate:
   (i) Real Property Classification, ENG Form 1825.
   (ii) Application or plan for use and procurement with recommendations and determinations of other interested Federal agencies when the conveyance is under one of the special acts listed in §§644.425 through 644.432.
   (iii) Disposal plans.
   (iv) Appraisal where not included in paragraph (f)(2)(iii) of this section.
   (v) Statement on advertising conducted.
   (vi) Abstract of bids.
   (vii) Relocation contract or change agreement.

(g) Distribution of deeds. Deeds will be delivered by the District Engineer and recorded by or at the expense of the grantee. Upon delivery and recordation of any deed conveying Army, Air Force, or nondefense property, the District Engineer will conform two copies by endorsing thereon the date and manner of delivery, and the date, time and place of recordation in the public land records. One conform copy will be forwarded to HQDA (DAEN-REM) WASH DC 20314, and the other conform copy to HQDA (DAEN-FP) WASH DC 20314. This requirement extends to copies of deeds executed by other disposal agencies and furnished District Engineers pursuant to FPMR 101–47.307–3(b). Two additional copies of deeds delivered by District Engineers will be conformed and furnished any other Federal agency charged with compliance enforcement of any reservations, restrictions, or conditions in the deed.

§§ 644.442–644.443 [Reserved]

DISPOSAL OF LEASEHOLDS AND LEASEHOLD IMPROVEMENTS

§ 644.444 Authority.

Surplus leasehold interests in real property are disposed of under authority delegated by the General Services Administration (GSA) to the Department of Defense (DOD). DOD has re-delegated this authority to the military departments. DEs, within the limits of the authority delegated, have been authorized to terminate leases, execute agreements in settlement of restoration obligations, and perform necessary restoration work required by lease terms, directly or by contract, in accordance with the provisions stated in §§644.444 through 644.471. Exceptions are where: (a) Under the terms of the lease the leasehold is transferable to third parties or Government-owned improvements on leased airport or other special types of leased property have an in-place value to the lessor for airport or other special purposes; or (b) the leasehold or Government-owned improvements may be disposed of to eligible public agencies under special statutes (FPMR 101–47.4905), in which cases the procedures provided in §§644.400 through 644.443 will be applied to the extent applicable. Disposals within the scope of the above exceptions require the prior approval of DAEN-REM.

§ 644.445 Procedure for termination of leases.

When leased premises are no longer required for use by the Government, a notice of termination will be given to the lessor in accordance with the terms of the lease, effective as of the date of vacation. The termination notice will be served sufficiently in advance to allow time for compliance by the Government with terms of leases providing for removal of improvements and restoration of premises. Where a lease does not contain provision for continuing renewal without notice and will automatically expire, the Government is not required to give notice.
when it intends to surrender the premises at the expiration of the lease. However, the lessor should be informed, as far in advance as possible, of the Department’s intention to vacate, in order that he may plan for a new tenant or for other use of the premises. Where a lease provides for a continuing renewal without notice, the DE will ascertain in advance of the beginning of each fiscal year whether the using service has need during the next fiscal year for the premises. When the premises are no longer required, a notice of termination will be served in accordance with the terms of the lease. In the event the lease does not provide for termination by the Government, but the lessor will consent to termination, either in its entirety or partially, a supplemental agreement should be entered into to terminate or amend the lease as of the date the premises will be vacated, Government improvements removed, and restoration completed.

(a) Forms of Notice of Termination. Where leases provide for restoration, Notice of Cancellation (Restoration) will be prepared in sextuplet in accordance with Figure 11–11 in ER 405–1–12. Notice of Cancellation, Figure 11–12 in ER 405–1–12, will be used for leases which do not provide for restoration or for leases where written notice requiring restoration has been submitted by the lessor prior to termination. Notice of termination will be prepared on the letterhead of the DE concerned, who will assign his own form-letter number. The Notice of Termination must conform to requirements of state law, and will, whenever possible, be served personally upon the lessor. In some states, to be legally effective personal service is mandatory, unless expressly waived. The lessor will be requested to execute the acknowledgment of receipt of notice on the form. Where the service is effected by registered or certified mail, a return receipt will be requested and a sufficient number of days (in addition to the stipulated period of notice) will be allowed for transmission and receipt of notice. The return receipt properly signed will be evidence that full notice required by the lease has been given. Should the owner refuse or fail to acknowledge receipt of the notice, the officer serving the notice will so certify thereon, giving the date and method of service. In the case of an absentee lessor, where time will not permit use of certified or registered mail for effecting service, notice will be given by telegram to be delivered, not telephoned, to the addressee. In the case of notice by personal service, any available Army facility or personnel in the lessor’s locality may be used.

(c) Distribution of Notice of Termination. The original notice of termination will be delivered to the lessor; one copy to the finance and accounting officer who pays the rental; one copy to the using service; and one copy to the DE office files.

§ 644.446 Vacation and protection of premises.

The DE will take action to insure that the premises are vacated by the using service on or before the date specified in the termination notice (or the date of expiration of the lease where formal notice is not required), and will assure provision is made by either the using service or the DE, as appropriate, for proper protection of the property pending the transfer of custody to the lessor pursuant to §§ 644.368 through 644.375 and AR 405–90.

§ 644.447 Joint survey of premises.

(a) When required. As soon as practical after restoration is requested by the lessor, a terminal condition report to reflect the condition of the leased property as of the termination of the lease, and a terminal survey to determine the extent of restoration required, if any, will be prepared. The lessor will be invited to have his estimators accompany the survey party. The lessor’s estimates of restoration costs should be obtained promptly, and included in the terminal survey for purposes of comparison in accordance with paragraph (c) of § 644.454. Survey and condition reports will not be limited to items for which the lessor specifically requests restoration, but will include all items which the DE determines should be restored in order to fulfill the Government’s obligation under the lease.

(b) **Contents.** The report will show, in detail, the work items necessary to place the premises in as good a condition as they were at the time they were taken over by the Government, as disclosed by the survey and condition report made at that time, reasonable and ordinary wear and tear, damages by the elements, or circumstances over which the Government has no control, excepted.

(c) **Housing leases.** The tenant of leased housing is personally responsible for damage to the property, beyond reasonable and ordinary wear and tear, resulting from his acts, the acts of members of his family, his invitees and licensees. Restoration of leased housing therefor should be coordinated with the using service to minimize payments for repairs which are the obligation of the Government’s tenant.

§ 644.448 **Limits on government obligation to restore.**

The standard lease forms may provide that the Government will, if stipulated notice is given by the lessor, restore the premises to as good a condition as they were in at the time of entering into possession, reasonable and ordinary wear and tear, and damages by the elements, or circumstances over which the Government has no control, excepted. This requirement is subject to certain limitations.

(a) **Restoration not to exceed fee simple value.** The cost of restoration, or settlement in lieu thereof, will not exceed the fee simple value of the property restored to the condition that existed at time of entering into possession, reasonable and ordinary wear and tear, and damages by the elements, or circumstances over which the Government has no control, excepted. The valuation should be fixed as of the time of termination of the lease.

(b) **Where estimated cost of restoration exceeds diminution in value.** When it appears that the estimated cost of restoration substantially exceeds the diminution in the value of the premises, occasioned by the Government’s use and the damage therefrom, an appraisal will be made of the present value of the property in its unrestored condition and a separate appraisal will be made of the present value of the property, assuming restoration is accomplished as provided in the lease. The difference between the unrestored and restored value, as determined by comparison of the appraisals will be the amount of diminution in the value of the lessor’s property and will be the maximum amount of the restoration obligation. As to the measure of damages to be used in establishing the Government’s restoration obligation under leases which contain the standard restoration provision, the Comptroller General decided that,

This office would not be warranted in concluding that any greater amount could be legally expended for restoration or paid to the lessor in lieu thereof than the amount by which the market value of the premises has been diminished (28 Comp. Gen 206). As a corollary, restoration, or payment in lieu thereof, is not authorized where Government improvements enhance the value of the property. Representatives of the General Accounting Office have advised informally that it is not the intention to have appraisals made of the before and after value in each instance and that the lack of such appraisals will not be the cause for questioning a restoration settlement. It is considered, however, that where the estimated cost of restoration is a substantial amount in comparison with the value of the property covered by the lease, such appraisals should be made. Obviously, however, it would not be to the Government’s advantage to make appraisals where the estimated restoration cost is small.

§ 644.449 **Requirement for notice by lessor.**

Ordinarily, notification by the lessor of his intention to require restoration of the premises is, when required by the terms of the lease, a condition precedent to any obligation on the part of the Government to restore and is a vested contract right which no part of the Government has authority to give away or surrender (16 Comp. Gen 92; Simpson vs. United States, 172 U.S. 372; United States vs. American Sales Corp., 27 F. 2d 389, affirmed in 32 F. 2d 141, certiorari denied, 280 U.S. 574; Pac. Hardware Co. vs. United States, 49 Ct. CL 327, 335). However, it has been held
in the case of Smith vs. United States, 96 Ct. CL 326, that a formal written notice of demand for restoration might be waived, provided knowledge of the lessor’s intention to require restoration was conveyed to the Government orally or by implication at, or prior to, the time required under the terms of the lease. In opinion B-48678, 10 April 1945, the Comptroller General expressed the following views along this line:

(a) In leases pertaining to provisions for termination by the Government prior to the end of the term, and which require 60 days written notice of demand for restoration, a supplemental agreement relinquishing space prior to the end of the term, which contains a stipulation excepting restoration from the provisions of the release may be regarded as notice to the Government of the lessor’s intention to require restoration and an otherwise proper claim for restoration may be considered where the entire transaction is in the interest of the United States.

(b) In leases which require 30 days written notice of termination and 30 days notice of demand for restoration, waiver of termination notice by the lessor would constitute sufficient consideration to support a waiver of restoration notice by the Government where the effect of waiving the notices would be to protect more adequately the Government’s interest through immediate termination of the lease.

(c) Generally, in leases which require 90 days written notice of demand for restoration and 30 days written notice of termination, if it is determined administratively under the particular facts, that the failure to give restoration notice until receipt of termination notice does not affect the merits of the claim for restoration, or operate to the prejudice of the United States, an otherwise proper claim for restoration may be considered.

(d) As a general rule, in leases which require 30 days written notice of termination and 30 days written notice of demand for restoration, notice of demand for restoration given within a reasonable time after receipt of termination notice would be sufficient and, in this connection, a few days delay would not be regarded as unreasonable. Where restoration is predicated on other than strict compliance by the lessor with requirements of the lease relative to notice requiring restoration, the facts will be clearly stated in the restoration assembly.

§ 644.450 Items excluded from usual restoration obligation.

Damage to the following items will not ordinarily be restored as under the standard provisions of the lease it will be attributable to reasonable and ordinary wear and tear, damage by the elements, or damages by circumstances over which the Government has no control. (However, where the lease requires the Government to maintain the interior or exterior, or both, such of the items as the Government is obligated to repair during the term of the lease should be included in the restoration if they have not been maintained adequately by the Government and are not in the required condition upon the termination of the lease.)

(a) Foundation work.
(b) Waterproofing or membraning.
(c) Exterior tuck pointing.
(d) Cleaning or repair of catch basins, cesspools, or manholes.
(e) Repair of: (1) Interior unfinished walls.
(2) Unfinished hollow tile, concrete block, or gypsum block walls.
(3) Floor joints, roof trusses (including roof boards and roofing), and framing timbers (including studs, sheathings, and exterior surface).
(4) Insulating materials in walls necessitated by leakage in walls or roofs.
(5) Damage to plaster caused by leakage in wall or roof.
(6) Windows and floors, where the damage is caused by elements or inadequate hinging, counterweighting, caulking or sealing.
(7) Sheet metal such as eaves, gutters, downspouts, flashings, hips, valleys, skylights, ventilators, and metal ceilings.
(8) Structural steel or iron.
(9) Fire escapes.
(10) Heating systems.
(11) Plumbing systems.
(12) Ventilating systems and air conditioning systems.
(13) Power plants.
(14) Electric wiring.
§ 644.451 Nature of required restoration.

Restoration by the Government will ordinarily include the following:
(a) Wear and tear beyond that which is reasonable and ordinary.
(b) Damage due to negligence by Government personnel.
(c) Restoration or reinstallations necessitated by alterations or removals by the Government.
(d) Neutralization of unexploded bombs or artillery projectiles, disposition of military scrap, and decontamination of chemically contaminated lands or improvements. (See §§ 644.516 through 644.539).

§ 644.452 Minor restoration cases—determining extent of restoration required.

(a) In minor restoration cases, ENG Form 1440A-R, Joint Terminal Condition Survey, will be used. The Government representative, in these cases, will also make a detailed investigation as to the extent of damages, cost of repairs, and other factors sufficient to properly complete and sign ENG Form 1440B-R, Cost of Restoration. In order to effect economies, the DE may arrange for the utilization of the services of the Facilities Engineer or the using service to perform joint terminal condition surveys. Such use, however, should be coupled with issuance of proper instructions for guidance of the respective personnel. A restoration case is considered to be minor under the following conditions:
(1) The initial cost of Government improvements or alterations did not exceed $5,000; and
(2) The net salvage value of Government improvements remaining does not exceed $1,000; and
(3) The cash payment to the lessor in lieu of restoration does not exceed $1,000; and
(4) The lessor has agreed to accept a cash settlement in lieu of physical restoration.

(b) Preparation of ENG Form 1440–R. Use of ENG Form 1440B-R is premised upon the ability of the field investigator to adequately analyze conditions and develop sufficient supporting data as to the cost of the items of restoration involved. While this form is considered self-explanatory, the following is to be noted:
(1) The procedure hereunder envisions the use of both ENG Form 1440A-R and ENG Form 1440B-R, which complement each other.
(2) The use of ENG Form 1440B-R for estimating restoration costs does not waive the requirements for a proper evaluation of the Government’s restoration obligations either as to the legal principles or as to the proper measure of damages.
(3) Distribution of these forms, together with any supporting exhibits, will be accomplished in the same manner as set forth in paragraph (b) of § 644.460.

§ 644.453 Major restoration cases—determining extent of restoration required.

(a) Engineer estimate and appraisal. Any restoration case not covered by the definitions of minor restoration case in paragraph (a) of § 644.452 is a major restoration case. A complete engineer estimate and appraisal will be prepared by the DE for use in negotiating a cash settlement, or to determine the cost of restoration, if the work is to be performed by the Government. ENG Form 1440–R, Cost of Restoration, will be used for this purpose. A copy of this form will be transmitted to the General Accounting Office in support of settlements made with landowners in the case of military property and contains the minimum data required by that office. Such transmittal is not required when civil works property is involved. In order to afford a measure of flexibility, ENG Form 1440–R is divided into five parts, each relating to specific factors, to be used as conditions may require.

(b) Preparation of ENG Form 1440–R. Comments and instructions for preparation of ENG Form 1440–R are contained in the following paragraphs which are keyed to the item numbers
on the Recapitulation sheet, part I of the form:

(1) “1” to “6” Self-explanatory.

(2) “7. Original Cost (Actual or Estimated) of Government-owned improvements, fixtures and alterations: (part 4).” The General Accounting Office requires that, in all cases involving the relinquishment of Government-owned improvements to lessors in lieu of restoration, and in any other cases where a contract is entered into between the Government and another party to transfer improvements, the original cost of the improvements be given. If not ascertainable, an estimate should be submitted. In exceptional cases, where, because of the circumstances or expense of the work involved, neither the original cost nor a reasonably accurate estimate can be given, an explanation of the facts and circumstances is required. Where structures have been built under contract, or improvements made under contract, a citation to the contract under which the work was performed should be submitted with the original cost statement, estimate, or explanation.

(3) “8. Estimated Market Value, (Value in place of Government-owned improvements, fixtures, and alterations): (part 4).” An estimate will be made of the current market value of the buildings or improvements in place. In those cases where it is indicated that the Government-owned buildings or improvements located on leased lands may materially enhance the value of the leased site, an appraiser will estimate the market value of the fee title to the leased area in its unrestored condition. He will also separately estimate the market value of the site, assuming restoration as provided in the existing lease. The difference between the fee title value and restored land value will be reported as the “value in place” of the improvements to be sold or otherwise disposed of. “Value in place” is defined as the amount by which the improvements involved enhance the market value of the leased site. This value will serve to establish the top sales price expectancy in negotiations with the landowner.

(4) “9. Gross Salvage Value of Government-owned property: (part 4).” The “gross salvage value” is the highest price obtainable in the open market for Government-owned improvements when sold for use elsewhere than on the leased premises, assuming that no expense to the buyer is involved in the dismantling and/or removal of the improvements from the leased property to the nearest probable market or location of future use. The estimate of gross salvage value should be made in accordance with established property appraisal procedures. Because market demand usually determines the highest and best use to which the components of a group of improvements will be put (e.g., whether a building will be worth more on the market for moving intact to a new site for continued use as a building, or worth more as a stockpile of used construction material), it is important to consider not only prevailing market prices and demand for used construction materials in the vicinity by contacting sources such as local building trades, wrecking companies, used material dealers, etc., but to also give consideration to possible interest by house moving and construction companies and individuals who might utilize improvements intact. Due consideration should also be given in making the estimate to the effect that such facts as the original cost of the improvements, the original cost of the materials therein, and the deterioration or depreciation of the materials in place might have upon the market value.

(5) “10. Estimated Cost of Dismantling and/or Removal of Government-owned Property: (part 4).” The estimated dismantling cost and/or cost of removal will be itemized in the appropriate column opposite the itemized listing of improvements on the ENG Form 1440–R (part 4), and the total will be reflected on the recapitulation sheet (part 1). The dismantling cost is the amount of expenditure necessary to accomplish dismantlement in a manner providing the greatest net return to the Government. Net return is the value of the improvements when detached or dismantled, less the cost of dismantling or detaching, and less the cost of removal. The cost of removal is the cost of moving the detached or dismantled improvements to the nearest

275
§ 644.454 Negotiating restoration settlements.

Negotiated settlements in lieu of performance of actual restoration work by the Government are ordinarily favored because they most satisfactorily achieve the objectives of fulfilling the Government’s obligations under the lease in the most efficient and economical manner, recouping the greatest amount of the Government’s investment in improvements to leased property and maintaining good public relations in the acquisition and disposal of leaseholds. However, because of variable circumstances, this principle cannot be stated as an inflexible rule applicable to every case. It is the responsibility of the DE to carefully consider all possible approaches within

probable market or the nearest installation of the Department having adequate storage space. In cases of frame buildings having concrete or similar permanent-type floors or foundations, the cost of removal of such floors or foundations will not be included as an item of dismantling and/or removal cost. Instead, it will be treated as an item in the estimated “Cost of Restoration other than Cost of Dismantling and Removal” (Item 10). In developing estimates of gross salvage value and costs of dismantling and/or removal, inquiry should be made of experienced tradesmen, used material dealers, wrecking contractors, etc., familiar with the local market for the types of materials and services involving the current costs of loading, hauling, unloading, cleaning, stockpiling and other economic factors contributing to the current local market value of similar materials in useable form.

(6) “11. Estimated Net Salvage Value of Government-owned Property: (part 4)” This amount is obtained by subtracting the estimated cost of dismantling and/or removal (Item 10) from the estimated gross salvage value (Item 9).

(7) “12. Cost of Restoration other than Cost of Dismantling and Removal: (part 3)” From information developed by the joint survey of the property, §644.447 of this part, it is the responsibility of the real estate officer, or his representative, to advise the personnel responsible for preparing the restoration cost estimate of the items which will require restoration, repair or replacement under the terms of the lease. A brief statement as to the probable cause of damage, in excess of ordinary wear and tear, or resulting from other than circumstances over which the Government has no control, will be included in the supporting data.

(8) “13. Total Cost of Restoration: (Item 10 plus Item 12)” The estimates of cost under Items 10 and 12 will be based on sound estimating practices generally employed for the type of work involved. The estimates will be predicated on performance of the work by contract and, therefore, consideration will be given to justifiable allowances for contractor’s profits, insurance, employees compensation payments, and overhead.

(9) “14. Net Cost of Restoration: (Item 9 minus Item 13)” In those cases where the cost of dismantling and/or removal of Government-owned improvements (as defined in Item 10), and the other costs of restoration (as defined in Item 12), exceed the gross salvage value (as defined in Item 9), the difference is a minus quantity and constitutes the maximum amount of money which the Government can pay the lessor, in addition to transferring all improvements to him in lieu of restoration and paying rent during the estimated period of restoration (provided such improvements are not considered to have an “in place” value). If this is a plus quantity, it represents the minimum amount of cash that the Government can accept from the lessor after transferring to him all items of property or equipment shown in the report, less the allowance for rental during the estimated period of restoration.

(10) “15. Approximate Time Required for Actual Salvaging and Restoration Operations”. So long as the owner is deprived of use of his property he is entitled to rental stipulated in the lease. A fair allowance will be made in a settlement with the lessor to cover a reasonable time required to fit the premises for use. If all improvements are to be left in place, it may well be that no allowance for rental will be required by the lessor for time required for salvaging.

§ 644.454 Negotiating restoration settlements.

Negotiated settlements in lieu of performance of actual restoration work by the Government are ordinarily favored because they most satisfactorily achieve the objectives of fulfilling the Government’s obligations under the lease in the most efficient and economical manner, recouping the greatest amount of the Government’s investment in improvements to leased property and maintaining good public relations in the acquisition and disposal of leaseholds. However, because of variable circumstances, this principle cannot be stated as an inflexible rule applicable to every case. It is the responsibility of the DE to carefully consider all possible approaches within
the scope of this chapter and select the best course of procedure in each case.

(a) Financial limitations which preclude actual restoration. In view of the limitations of the Government’s restoration obligations to amounts not in excess of the fee value of the leased property, or the difference in values of the leased property with and without restoration, actual performance of restoration work is precluded where these amounts would be exceeded, and a settlement in lieu of restoration is in order in amounts not to exceed the limitations indicated.

(b) Settlement where property enhanced in value by improvements. Where the leased property has been enhanced in value by the Government’s improvements, no restoration should be performed nor payment by the Government made in lieu thereof. Instead, effort should first be made to obtain from the lessor a cash payment to the Government equal to the in place value of the improvements, together with a full release of the Government from any restoration obligations. If the lessor is not willing to pay the in place value, but will offer a lesser amount in excess of the estimated net salvage value, settlement may be reached on that basis. If the lessor will not agree to make payment of any amount, or will offer only an amount which is less than the net salvage value of the improvements, consideration should be given to selling the improvements for removal and accomplishing any remaining restoration by payment in lieu thereof or by actual performance of the work. If it becomes necessary or advisable to arrange for separate sale of any or all of the improvements, the sale should be accomplished in accordance with §§ 644.540 through 644.557. The terms of sale in such case will require the removal of the improvements on or before the expiration or termination of the lease and contains any other special requirements applicable to the particular case, including site restoration. Bids received should be compared with the highest price offered by the lessor, due consideration being given to the cost of restoration, if any, which would remain after removal of the improvements. It must always be borne in mind that the disposition of public property to private parties must be at prices which can be shown to be in the best interests of the Government.

(c) Reaching agreement on estimates of cost. The terminal survey and condition reports specify the items to be restored and the lessor’s estimate of cost. Those items reflected on the ENG Form 1440-R (part 3) afford comparison between the lessor’s and the Government’s estimates. Where there is a variance in the estimates and the lessor’s total estimate is lower, effort will be made to settle on the basis of his estimate. If the lessor’s overall estimate is higher than the Government’s, effort will be made to reach agreement on acceptance of the Government’s total estimate. If the lessor’s estimate is substantially higher on specific items, it may be desirable to disclose the basis on which the Government’s estimate is predicated in order to demonstrate its reasonableness. The Government’s estimate of cost for items of restoration may be made available to the lessor upon request. When the lessor requests items of work not shown on the Government’s estimate, careful consideration will be given to his request, further inspection of the premises made, when necessary, and a determination made as to whether the Government is obligated under the lease to perform the work. If no liability is determined to exist, the lessor will be fully informed as to the reasons for noninclusion in the estimate. If liability is determined to exist, the estimate will be adjusted accordingly. In any case where the existence or extent of the legal obligation of the Government to restore is questionable, the DE will submit the facts, in writing, to DAEN-REM together with his recommendation. No lease restoration settlement will be allowed to become involved in litigation or formal claims procedure without the matter having been submitted to DAEN-REM for review. When a satisfactory cash settlement by the Government cannot be negotiated, the DE is authorized to perform the actual restoration work.

§ 644.455 Claims for loss or damage of personal property.

In some cases, owners have been allowed to store personal property,
§ 644.456 Rent during the period required for restoration.

A sufficient period of time for performance of the restoration, commencing on the date premises are vacated by the Government, will be specified in the Government’s estimate, and rent allowed in the settlement during such period to the extent that the lessor is actually deprived of beneficial use. If there is an outstanding maintenance and operation contract with the lessor, contained in either the lease or in an independent instrument, which fixes compensation in addition to the rent, the settlement agreement with the lessor will include the rent and such part of the compensation for maintenance and operation as will be necessarily incurred by the lessor during the performance of restoration.

§ 644.457 Settlement where part of the premises is surrendered.

Where there is a partial reduction of area in a lease requiring restoration, the supplemental agreement may contain a settlement in lieu of restoration of the area surrendered. A waiver of further claims covering the space released will be contained in the supplemental agreement.

§ 644.458 Documenting lease terminations and restoration settlements.

In the case of leases in which there is no obligation to restore, and in all cases of leases where terminal survey discloses no damage to the premises for which the Government is liable, an effort will be made to obtain an unqualified release from the lessor as of the date the premises are vacated and Government improvements removed. Releasess will also be obtained as indicated in § 644.462.

(a) Form to be used. Releases shall be executed, in triplicate, on ENG Form 232–R, Release (Corporation), or ENG Form 231, Release (Partnership), according to whether the lessor is a corporation or partnership. If signed by an attorney or agent, evidence of authority should be attached to the release. If the lessor is an individual, a letter incorporating a Notice of Termination and a Release Clause will be sent. The letter will substantially follow the form shown in Figure 11–16 in ER 405–1–12. Distribution of releases will be accomplished in the same manner as set forth in § 644.460.

(b) Qualified release. In case the lessor declines to sign an unqualified release, he should be requested to execute an appropriate release subject to exceptions. The exceptions may be enumerated on the reverse side of the form.

§ 644.459 Preparation of supplemental agreements effecting settlement.

The terms of settlement in lieu of restoration, negotiated with the lessor, will be embodied in a supplemental agreement to the lease, antedating termination, substantially in accordance with ENG Form 341, Supplemental Agreement Transferring Improvements to Lessor. Supplemental agreements may be used to effect restoration settlements of obligations incurred under permits, trespass right agreements, and other unnumbered contracts for the temporary use of land. Restoration settlements may also be effected even though the premises were occupied rent free and without formal contract, provided use of the premises was authorized properly by the Government (Decision of the Comptroller General B-63340, February 1947). Care should be exercised in determining the existence
and extent of the legal obligation of the Government to restore. Payment will not be made for doubtful items; instead, the other party to the agreement will be advised of his right to submit a claim. On the other hand, every effort will be made to agree upon a reasonable settlement as to items for which the Government is legally responsible.

§ 644.460 Supplemental agreement assembly.

(a) Composition. Supplemental agreement assembly, covering agreement for settlement in lieu of restoration, will be composed of the following:

(1) Completed Notice of Termination.
(2) ENG Form 340 (Supplemental Agreement Accepting Proposed Restoration) or ENG Form 341 (Supplemental Agreement Transferring Improvements to Lessor).
(3) Lessor's notice requiring restoration, unless the lessor has signified that restoration is not required.
(4) Joint terminal survey and condition report.
(5) ENG Form 1440–R, or 1440A–R and 1440B–R.
(6) Estimated cost of restoration of leased personal property if not otherwise included.
(7) Statement of cost of any restoration actually performed by the Government.

(b) Distribution. An executed copy of the assembly will be retained by the DE. An executed copy of the supplemental agreement will be furnished the lessor. Conformed copies will be transmitted to the major command, the installation commander and, when monetary consideration is involved, to the appropriate finance and accounting office.

§ 644.461 Payment for restoration or settlement in lieu of restoration.

Voucher forms, appropriate to the circumstances, will be used in making payment of the settlement. Reference should be made on the voucher to the lease and supplemental agreement. The cost of restoration work performed directly by the Government, or by contract, or compensation in any settlement agreement in lieu of restoration, will be paid from funds available for the payment of rental. The limitations of section 322 of the Economy Act of 1932, as amended (40 U.S.C. 278a and b), on the expenditure of funds for the alteration, improvement, or repair of leased premises to 25 percent of rent for the first year, are not applicable to costs of performing restoration work pursuant to obligations of the lease nor for payments of settlements in lieu thereof (20 Comp. Gen. 165).

§ 644.462 Performance of restoration work by district engineer—extension of time.

Where the lessor will not accept a cash settlement in lieu of restoration, or desires the work to be done by the Government, the restoration will be performed, without delay, directly or by contract, within the limitations outlined in this subpart. Any contract entered into for such work should provide for required restoration work to be performed on or before the determined effective date of termination of the lease. A complete record of the items of work performed and the costs thereof will be kept. If the lessor, prior to commencement of the work, is not agreeable to executing ENG Form 340, DA Supplemental Agreement Accepting Proposed Restoration, efforts will be made, upon completion of the work, to obtain a release on ENG Forms 232–R, or 231, or on ENG Form 341 in the event of a cash settlement for that part of the restoration not performed. Where the Government is obligated to perform restoration and remove improvements, and it cannot be accomplished by the Government prior to the effective date of termination, a supplemental agreement will be prepared, antedating the effective date of termination, for such periods as may be required to effect restoration and remove improvements, and it cannot be accomplished by the Government prior to the effective date of termination, a supplemental agreement will be prepared, antedating the effective date of termination, for such periods as may be required to effect restoration and to remove improvements, if the lessor is unwilling to terminate the lease and rental thereunder, with the reservation that the Government will have a right upon the premises for the purpose of performing restoration, conducting sales of improvements thereon, or doing similar acts related to restoration.
§ 644.463 Termination and settlement of leasehold condemnation proceedings.

(a) Leasehold condemnation termination assembly. When leasehold estates in land, or other similar limited estates or terms for years, acquired or in the process of acquisition, have been determined surplus a prompt report will be made to DAEN-REM containing the following items of information as appropriate and necessary to a full understanding of the proposed disposition action:

1. Name of project and using service.
2. Style and civil number of the condemnation proceedings in which the land is involved.
3. Particular tract or tracts involved.
4. A citation of the authority pursuant to which the surplus status has been determined.
5. Three copies of ENG Form 1440-R, or 1440A-R and 1440B-R.
6. The proposed date of vacation of premises by Government.
7. The term condemned and rights of the Government as to extension and cancellation thereof.
8. Whether a declaration of taking, or supplement thereto, has been filed and the amount of deposit, if any.
9. Whether an award or order for payment has been made, and the amount of the owner’s withdrawal, if any.
10. The estimated rental cost through the end of the term acquired in the condemnation proceeding.
11. The estimated fair rental value of the land for the period of occupancy by the Government, including time for restoration.
12. Recommendation as to the advisability of abandoning the proceeding.
13. Request for termination of condemnation proceeding.

(b) Action by Chief of Engineers. DAEN-REM will review the termination assembly and settlement proposal recommended and, if approved, recommend to the Department of Justice a basis for settlement at the same time requesting the Department of Justice to move for termination or conclusion of the proceedings.

§ 644.464 Negotiating stipulation where proposed settlement not acceptable.

Should the court overrule the motion for abandonment, or should it appear that claims for damages will be interposed by the property owner, the responsible DE and the Department of Justice representative will negotiate with the owner for the purpose of obtaining his consent to the abandonment of the condemnation action. The Government will agree to pay the owner a sum representing the rental value of the premises for the period of occupancy by the Government, plus the cost of restoration as determined under §§ 644.452 and 644.453. Such estimate will include the value of personal property, buildings, crops, and other property damaged, destroyed or lost by the Government. DAEN-REM upon recommendation of the DE will request the amendment of the proceeding to include the taking of any property for which compensation is to be paid. The same criteria for settlement with lessors as under a negotiated lease will govern. In the event the landowner will not agree to settle, his best offer will be submitted to DAEN-REM, with the DE’s recommendation, for consideration. If a tentative settlement is reached, the terms will be included in a stipulation to be filed in the condemnation proceedings, after approval by DAEN-REM and the Department of Justice, which stipulation will specifically provide:

(a) That the property owner releases and relinquishes all claims of any nature whatsoever which have arisen, or may arise, out of the Government’s occupancy of the property; and

(b) That the owner consents to the abandonment and dismissal of the condemnation proceedings. Where the settlement amount is to be paid directly to the owner by the DE in lieu of deposit in the proceedings, the stipulation will so provide.

§ 644.465 Physical restoration where stipulation not obtained.

If such stipulation is not obtainable, then, whether or not a declaration of taking has been filed, the owner will be requested to designate, in writing, the restoration for which he believes the...
Government is liable. The Government will restore the property to the condition existing at the time of first entry by the Government, except for reasonable and ordinary wear and tear, damage due to acts of God, or circumstances over which the Government has no control. The cost of restoration or settlement in lieu thereof will be limited as outlined in this subpart.

§ 644.466 Release and record of physical restoration.
The responsible DE, upon completion of restoration, will make every effort to obtain a release of further claims for damages. A complete record of all items of restoration and the cost will be kept for use at the final hearing in condemnation or in any collateral proceedings, in the event a release is not obtained. Where litigation is anticipated, photographic evidence of work performed will be obtained.

§ 644.467 Condition reports.
Survey and inspection reports covering the real estate, and inventory and condition reports covering the personal property located therein, made prior to first entry by the Government under condemnation proceeding, will be compared with the condition shown by similar reports made when the using service vacates the property.

§ 644.468 Settlement of claims.
Claims for damages or restoration filed in condemnation cases, when practicable, will be settled in the condemnation proceeding to avoid separate suit by the owner to recover compensation to which he may be entitled. In such cases request will be made of DAEN-REA-C to have the proceeding amended to enlarge the issues to include restoration.

§§ 644.469-644.471 [Reserved]

Disposal of Buildings and Other Improvements (Without the Related Land)

§ 644.472 Authority.
Under authority vested in the GSA by the Federal Property Act, and the delegation of such authority made by GSA in FPMR 101–47.302–2, the Department of the Army is designated as the disposal agency for the following property:

(a) Leases, permits, licenses, easements, and similar real estate interests held by the government in non-Government-owned property (including Government-owned improvements located on the premises), except when it is determined by either the holding agency or GSA that the Government’s interest will be best served by the disposal of such real estate interests together with other property owned or controlled by the Government, that has been or is being reported to GSA as excess; and

(b) Fixtures, structures, and improvements of any kind to be disposed of without the underlying land.

§ 644.473 Methods of disposal.
Excess buildings and other improvements may be disposed of by the following methods:

(a) By demolition for utilization of salvage materials in the overall Army or Air Force construction or maintenance program. Screening with other military departments is not necessary for this purpose.

(b) By transfer to another Federal agency.

(c) By assignment to the Department of HEW for disposal for health or educational purposes pursuant to section 203k(1) of the Federal Property Act (FPMR 101–47.308–4).

(d) By sale intact for removal from site to the most appropriate of the following, according to the circumstances:

(1) Eligible public agencies (§§ 644.400 through 644.443 and §§ 644.540 through 644.557).

(2) Boy Scouts of America (§§ 644.540 through 644.557).

(3) Military chapel buildings and chapel equipment to nonprofit organizations for use, first as a shrine or memorial and, second as a denominational house of worship.

(4) Owner of the underlying land as a part of restoration settlement where disposal of a leasehold is involved.

(5) An emergency plant facilities contractor.
§ 644.474 Determining method of disposal.

DE’s are designees of the Chief of Engineers under AR 405–90 to determine the method of disposal authorized by law or regulations which is most advantageous to the Government. Where alternatives are presented, there will be an affirmative finding that the method of disposal approved is most advantageous. In the exercise of this authority, due consideration will be given to the effect of particular methods of disposal on safety and sanitation in the area, the proposed or probable future utilization of Government-owned sites by the Government, or in the case of leased lands, the restoration obligations of the Government under the lease. In order to assure consideration of these factors, disposals by transfer to other Government agencies or by sale intact will be brought to the attention of the installation commander or his representative prior to initiation of disposal action. Reasonable requirements for site clearance consistent with the foregoing criteria should be favorably considered and disposal conditioned accordingly, notwithstanding the fact that such action may result in greater burden to transferee agencies or, in the case of disposal by sale intact, may result in a reduction in the monetary return which might be reasonably expected in a sale involving less stringent site clearance requirements. DAEN-REM will be informed of any instances of excessive or unreasonable requirements with respect to site clearance. The DE will determine by inspection and survey the method to be used in disposal of buildings and improvements.

§ 644.475 Excessing Army military and Air Force property.

The procedures for placing buildings and improvements in excess status are set forth in AR 405–90 and AFR 87–4. In instances of land acquisition where buildings and improvements were acquired incident thereto, DEs are designated by the Chief of Engineers under AR 405–90 to make disposition of this property. Coordination with the installation commander concerned is required. When, under AFR 87–4, the responsible DE is called upon by the Air Force Command to furnish an estimate of the value of buildings and improvements for the purpose of determining the approval authority for excessing the property, no formal appraisal will be made. If, in his opinion, the total property exceeds a value of $50,000, he will furnish only a rough estimate of its value in round figures. If the property is, in his opinion, of a value of $50,000 or less, he will limit his statement to this fact and will not specify an estimated valuation.

§ 644.476 Excessing civil works property.

The DE are authorized to approve the disposal of buildings and improvements acquired incidental to the acquisition of land in reservoir areas, regardless of the original cost thereof, when they are in the way of authorized construction or when the land upon which they are located is to be permanently or frequently inundated. DEs may authorize the disposal of buildings and other improvements in any one or more of the following categories, which are located on lands which are not excess and which are not expected to become excess, and the sale is to be made after advertising:

(a) Buildings or improvements on land acquired by the Government determined to be available for disposal pursuant to ER 735–2–1 (Property Accounting Procedures-Civil).

(b) Buildings or improvements which cannot be kept in repair at a reasonable cost.

(c) Buildings or improvements which are dangerous to life or likely to damage adjoining structures or have become hazardous or nuisances.

(d) Buildings or improvements which are damaged or unsuitable for public service.

(e) Buildings or improvements constructed by the Federal Government which occupy or interfere with sites for new construction or for other civil works purposes.
(f) Temporary buildings or improvements which have served the purpose for which they were constructed.

§ 644.477 Civil works property—reimbursement of appropriation.

Under title 33, United States Code, section 558, the proceeds from a sale or transfer of buildings or improvements may be credited to the appropriation for the work for which the property was acquired. Buildings or other improvements, including timber, on non-excess land come within the purview of this law. For further instructions on disposition of proceeds, see § 644.322.

§ 644.478 Demolition of buildings and other improvements for utilization of salvage material.

With respect to DA property, demolition may be undertaken by the DE of buildings on non-excess land made available for disposal, when the salvage is to be used in construction or maintenance work by the Corps of Engineers or upon specific request from another service where funds for the purpose are made available. Real Estate funds will not be used for such demolition. Determination of practicability for use of buildings or improvements in authorized new construction at other sites or for salvage of materials will be made by the DE in accordance with existing instructions relating to use of materials in new construction. Where restoration of leased premises is being performed, it is the responsibility of the Corps of Engineers to perform the necessary demolition work as part of the restoration obligation, as set forth in §§ 644.444 through 644.471. Demolition may be accomplished under contract when special or expert services are required for removal of certain types of structures and funds are available therefor. Unused salvage materials will be turned over to redistribution and salvage officers for redistribution or disposal in accordance with existing regulations pertaining to personal property. The relocation of buildings or improvements on the same installation or for re-erection at another installation or for re-erection at another installation is not to be accomplished as a real estate function (AR 420–70). Further, it is provided in AR 420–70 that demolition of buildings or improvements where retention of the salvage for use at the installation is approved, or where no requirement or market is found for buildings or improvements approved for disposal by the Corps of Engineers, is a facilities engineering responsibility. Pursuant to APR 67–4, disposal of AF buildings and improvements by sale will be accomplished by the Corps of Engineers, but all disposal of such property by salvage will be accomplished by the base commander.

§ 644.479 Authority for transfer of buildings and improvements to other Federal agencies.

Buildings and other improvements which have been screened for defense requirements, as outlined in §§ 644.333 through 644.339, may be transferred to another Federal agency as hereinafter outlined. The authority for the transfer of such property to other Federal agencies is outlined in §§ 644.400 through 644.443. The responsible DE is authorized to transfer buildings or structures for removal from the site, which have been made available for disposal by proper authority, upon receipt of a request signed by an official of another Federal agency.

§ 644.480 Procedure for transfer.

Transfer of buildings to other Federal agencies will be accomplished by DD Form 1354. An estimate of value will be shown on DD Form 1354, Transfer and Acceptance of Military Real Property, or other forms used and, in the case of transfer without reimbursement, the following footnote will be made: “Transfer to (Department or Agency), adjustment of funds not required.” When the transfer is made at the direction of GSA, an explanation therefor will also be made on the form. Buildings and other improvements which are reported to GSA for screening against requirements of other Federal agencies (§§ 644.348 through 644.367) will be transferred to another Federal agency only at the direction of GSA and for the amount of reimbursement, if any, determined by GSA. Buildings and improvements which are not required to be reported to GSA will be screened against requirements of other Federal agencies by the responsible DE as provided in §§ 644.333 through 644.339.
Upon request by a Federal agency for transfer of such property, the responsible DE will determine the amount of reimbursement, if any, in accordance with the criteria outlined in §§644.400 through 644.443.

§ 644.481 Responsibility of transferee.
Where buildings or other improvements are on lands leased to the United States, the agency requesting the buildings will be expected to remove the building and restore the premises, as required by the terms of the lease, or to accept an assignment of the lease together with all obligations thereunder. Where the buildings or other improvements are to be removed from non-excess land, the transferee agency will be expected to perform reasonable site clearance as may be required by the commanding officer.

§ 644.482 Assignment to Department of HEW or successor agencies.
Pursuant to delegation of authority contained in FPMR 101–47.308–4, as set forth in §§644.400 through 644.443, the responsible DE may assign buildings or other improvements made available for disposal and not required for Federal purposes to HEW upon receipt of request therefrom from the appropriate regional representative of that department for disposal for public health or educational purposes. Assignments will be effected by letter addressed as indicated in §644.483. Further, pursuant to delegation of authority the Department may disapprove within 30 days after notice from HEW, any transfer of property proposed to be made by that agency for such purpose. The DE will be guided by the policy set forth in §§644.400 through 644.443 in regard to the delegation to disapprove transfers by HEW.

§ 644.483 Notification of Department of HEW or successor agencies.
When buildings or other structures are reported to GSA for screening pursuant to §§644.348 through 644.367, the Reports of Excess are available to HEW by the Regional Office of GSA, and no notice of the proposed disposal need be given by the DEs. Where buildings and other structures are not reported to GSA simultaneously with circularization of other Federal agencies, HEW will be notified in writing of the availability of such structures. Such notification will be addressed to the appropriate field representative of HEW, and will include the following information:
(a) A brief description of the buildings and improvements, including dimensions of buildings, types of construction, and demountable characteristics, if any.
(b) The extent of building site clearance expected.
(c) That the improvements must be removed and site clearance completed within a specified definite period from the date of assignment to HEW (usually 60 to 90 days, depending upon the size of the removal operation).
(d) When improvements may be inspected.
(e) That the improvements will be withheld from advertisement for bids for a period of 20 days from the date of the notification, unless the office submitting the notification is sooner informed in writing that such property is not needed for school, classroom, or other educational use or for use in the protection of public health, including research. If within the 20-day period, notice is received of a potential need, the property may be held an additional 45 days until a certification of need or request for assignment is received.

§ 644.484 Procedure for disposal through the Department of HEW or successor agencies.
During the period held, action preparatory to the publication of Invitations for Bids and Specifications of Sale of Buildings and Improvements will be taken in order to minimize the time lapse between the expiration of the 20-day period and the beginning of the sale procedure. Inquiries received prior to the expiration of the holding period from state or local agencies or qualified organizations seeking the purchase of available improvements for health or educational purposes, will be referred to the appropriate field representatives of HEW.
(a) Final disposal is not effected until the improvements have been transferred by HEW to an eligible recipient. Therefore, in the letter of assignment, HEW will be requested to furnish to the
§ 644.485 Sale of buildings and other improvements.

Buildings and other improvements made available for disposal by competent authority and not needed for further Federal utilization, or assigned to HEW, will be disposed of by sale by the responsible DE. Sales will be accomplished in the following manner:

(a) Sale to lessor where restoration is not required. Where the terms of a lease do not require restoration by the Government, it may nevertheless be in the best interest of the Government to negotiate a sale of the improvements to the lessor. In such cases, the DE is authorized to negotiate such sale where the net salvage value of all improvements located on the premises involved in any one lease is less than $1,000, and the sales price is determined to be as high as can be expected under the circumstances and compares favorably with the Government estimate prepared in accordance with paragraph (d) of this section.

(b) Sale under options. All leases or other rights of occupancy will be examined to determine whether the owner of the land has an option to purchase buildings or other improvements. See §644.486 for sale of improvements constructed under Emergency Plant Facilities or similar contracts.

(c) Sale to eligible public agencies, the Boy Scouts, and the public. The sales procedure, including notice to eligible public agencies and advertising, set forth in §§644.540 through 644.557 will be followed in the sale of buildings or other improvements.

(d) Appraisal. Except as otherwise provided in §§644.484 through 644.557 buildings and other improvements will be appraised prior to sale. Except as provided in §644.490, appraisal will be based on the highest and best use which may be for (1) removal and use intact; or (2) for dismantling, and removal and stockpiling the salvageable material for reuse or sale.

§ 644.486 Disposal of buildings and improvements constructed under emergency plant facilities (EPF) or similar contracts.

Procedure for the disposal of property constructed under a facilities contract on lands neither owned by nor leased to the Department is set forth as follows:

(a) By using service. Disposal of structural components as well as equipment may be accomplished by the using service. The term “structure” is defined to mean plant equipment which:

(1) Is held under a facilities contract of the Department;
(2) Is not readily severable;
(3) Is a separate building or a complete structural addition to a building in which the Government otherwise has no interest, such as a wing, and in which a defense contractor carries on part or all of his defense production.

(b) By the Corps of Engineers. Where disposal of structures, as well as other plant equipment located within such structure, is to be accomplished by the Corps of Engineers, instructions will be issued as to the extent to which the Corps of Engineers will participate in such action. Subject to special instructions by DAEN-REM, the following coordinated actions will be taken:

(1) The using service will report to the Corps of Engineers the property which is excess to the Department’s needs.

(2) The excess directive report will include the designation by name and address of a responsible officer of the using service to join with the DE concerned as a representative of the Chief
of Engineers. These two representatives will meet with the contractor within seven days of their appointment to determine his interest in acquiring all or any part of the facilities. This determination will be made in the shortest possible time.

(3) The meeting with the contractor will promptly establish those facilities to be retained by the contractor and those to be declared excess. Waiver of existing options will be obtained where necessary.

(4) Equipment that is of no interest to the contractor will be disposed of by using service in accordance with applicable regulations.

(5) Custody of and accountability for the entire facility remains with the using service until other arrangements have been completed.

(6) The Corps of Engineers will complete negotiations for property to be retained by the contractor as rapidly as possible.

(7) When an agreement has been reached with the contractor, the DE or his contracting officer may execute the supplemental agreement to the lease or facilities contract transferring improvements, including machinery and equipment as a unit. Authority for the transfer should be recited in the supplemental agreement. In the case of a supplemental agreement to a facilities contract, authority will be obtained from the using service through its local representative for the DE or his contracting officer to sign the supplemental agreement transferring the improvements, including machinery and equipment to the contractor. (Figure 11–18 in ER 405–1–12 is the suggested format for Supplemental Agreement to Emergency Plant Facilities Contract.)

(8) Upon completion of negotiations, the responsible DE will issue instructions to the using service to dispose of equipment not included in the final negotiations in accordance with applicable regulations. Accountability for the property will be transferred at this time to the new owner or, in the case of real property retained by the Department, to the Corps of Engineers.

§ 644.487 Procedure for disposal of surplus chapels.

By direction of the President and pursuant to GSA and Army regulations, special procedures have been established for disposal of chapels. Surplus chapels must be segregated from other buildings for sale intact, separate and apart from the land, for use as shrines, memorials, or for religious purposes. Where the chapel is located on surplus land and it is determined the chapel may properly be used in place, a suitable area of land may be set aside for such purposes and sold with the chapel (§644.430).

§ 644.488 Soliciting applications for purchase of chapels.

Promptly upon receipt of an approved DA Form 337 (Request for Approval of Disposal of Building and Improvements) or AF Form 300, the DE will solicit applications by public advertising. Advertising will consist of publication of notice in newspapers, paid advertising when necessary, posting of notices in public places, and mailing of invitations to all known local churches. A period of thirty (30) days will be allowed in which to file written applications. Instructions will provide that the applicant will give his name, address, and denomination if applicable. The advertisement will describe the chapel, give its location, terms and conditions of sale, and the time and place where application must be filed. The advertisement will also state that the sale price will be made available upon request of interested parties, and that the Chief of Chaplains will select the purchaser. To assist that office in making a recommendation, the following information should be included in applications for the purchase of chapels:

(a) Purpose and intent of the use of the chapel.

(b) Facilities currently being used by the church/organization applying.

(c) Membership size of the church/organization.

(d) History of the church/organization and when established locally.

(e) Denomination and/or organization.
§ 644.492  Report on disposal of chapel.

As soon as practicable after the sale has been consummated, notification of disposal of chapels will be made by the DE direct to the Chief of Chaplains, with a copy to HQDA (DAEN-REM) WASH DC 20314, by letter, which will contain the following information: will be made to purchasers for the continued use of utilities and services (sewer, water, electric, fire protection, guarding). Arrangements may be made between the lessor of the premises and the purchaser to leave the chapels in place, provided the lessor releases the Government from any and all obligations to restore the premises occupied by the chapel.

(2) Care will be exercised that, prior to the disposal of the chapel, equipment such as organs, hymn books, and other ecclesiastical furnishings have been removed or shipped in accordance with applicable regulations.

(3) All copies of the contract evidencing the sale of chapels will be accompanied by copies of the instructions, if any, received from the Chief of Chaplains authorizing the disposal. If no such instructions have been received, the DE will attach a statement that in the absence of instructions, all known interested parties have been contacted and that the disposal has been made after due consideration of applications, the uses to be made of the chapel building and the need therefor.

§ 644.491  Coordination with the Chief of Chaplains.

The DE will submit applications for the purchase of chapels to DAEN-REM, who will request the Chief of Chaplains to select the purchaser and advise DAEN-REM of his selection. Where no applications are obtained as a result of the advertising, the DE will so advise the Chief of Chaplains, reporting steps taken to obtain a purchaser, and recommending that the chapel be sold without conditions, in the same manner as provided for disposal of other buildings. If the Chief of Chaplains does not approve this recommendation or issue other appropriate disposal instructions within a period of 60 days, DAEN-REM will be informed.

§ 644.490  Determining price and provisions of sale for chapels.

(a) Price. The sale price of the chapel structure in the case of sale for use as a shrine, or memorial, or denominational house of worship, will be at its fair value in the light of the conditions imposed relating to its future use, and the estimated cost of removal from the site. Appraisals made to establish the price of specific chapels will be predicated on:

(1) The fair value of the material in place, less the cost of dismantling, removal of the material to the outside limits of the installation, and the cost of restoring the site.

(2) The restrictions imposed on the future use of the chapel with due regard to the difference between the fair value price obtainable in the open market and that which might be obtainable in the limited market to which sale is restricted.

(3) In addition to the criteria set forth in paragraphs (a)(1) and (2) of this section cognizance will be taken of the prevailing prices of chapels being sold by other disposal agencies within the general area in which chapels are being disposed of by the Corps of Engineers.

(b) Provisions of sale. (1) Disposal of chapels which are not excess or surplus will be conditioned on the removal of the chapels from the premises. In the disposal of chapels located on excess or surplus leased land, no commitments

§ 644.499  Conditions of sale of chapels.

When sold under the provisions of § 644.490, chapels shall be sold subject to the condition that during their useful life they will be maintained and used as shrines or memorials, or for religious purposes, and not for any commercial, industrial, or other similar use. The contract or deed of sale will provide further that in the event the purchaser fails to maintain and use the chapel for such purposes there shall become due and payable to the Government the difference, if any, between the appraised fair market value of the chapel, as of the date of the sale, without restriction on its use, and the price actually paid. This difference should be figured at the time of sale and included in the contract of sale or deed of conveyance.

§ 644.489  Conditions of sale of chapels.

When sold under the provisions of § 644.490, chapels shall be sold subject to the condition that during their useful life they will be maintained and used as shrines or memorials, or for religious purposes, and not for any commercial, industrial, or other similar use. The contract or deed of sale will provide further that in the event the purchaser fails to maintain and use the chapel for such purposes there shall become due and payable to the Government the difference, if any, between the appraised fair market value of the chapel, as of the date of the sale, without restriction on its use, and the price actually paid. This difference should be figured at the time of sale and included in the contract of sale or deed of conveyance.

§ 644.489  Conditions of sale of chapels.

When sold under the provisions of § 644.490, chapels shall be sold subject to the condition that during their useful life they will be maintained and used as shrines or memorials, or for religious purposes, and not for any commercial, industrial, or other similar use. The contract or deed of sale will provide further that in the event the purchaser fails to maintain and use the chapel for such purposes there shall become due and payable to the Government the difference, if any, between the appraised fair market value of the chapel, as of the date of the sale, without restriction on its use, and the price actually paid. This difference should be figured at the time of sale and included in the contract of sale or deed of conveyance.

§ 644.489  Conditions of sale of chapels.

When sold under the provisions of § 644.490, chapels shall be sold subject to the condition that during their useful life they will be maintained and used as shrines or memorials, or for religious purposes, and not for any commercial, industrial, or other similar use. The contract or deed of sale will provide further that in the event the purchaser fails to maintain and use the chapel for such purposes there shall become due and payable to the Government the difference, if any, between the appraised fair market value of the chapel, as of the date of the sale, without restriction on its use, and the price actually paid. This difference should be figured at the time of sale and included in the contract of sale or deed of conveyance.
§ 644.493 Release of restrictions on chapels sold.

Where the purchaser fails to maintain and use the chapel in accordance with the conditions of sale, or the purchaser requests release of the conditions, the facts will be reported to DAEN-REM with appropriate recommendations. DAEN-REM may release the purchaser from the conditions of sale without payment of a monetary consideration upon a determination that the property no longer serves the purpose for which it was sold, or that such release will not prevent accomplishment of the purpose for which the property was sold.

§ 644.494 Donation, abandonment or destruction.

(a) General. Improvements may be abandoned, destroyed or donated to a public body, upon a finding in writing by the DE (but in no event shall such finding be made by the official directly accountable for the property) that the property has no commercial value or that the estimated cost of its continued care and handling would exceed the estimated proceeds from its sale, or that abandonment or destruction is required by military necessity, or by considerations of health, safety or security.

(b) Finding of Fact. The finding will be prepared as a separate document headed: Finding of Fact for ______. The finding will be sufficiently complete within itself to justify the decision to donate, abandon, or destroy the property proposed, without outside reference. It will be drafted to provide, where the finding is made by the District Engineer, for approval by the Division Engineer. Finding of fact concerning property which had an original cost in excess of $500,000 requires the approval of DAEN-REM. A copy of each such finding, so approved, will be forwarded by the DE to the regional office of GSA.

§ 644.495 Donation to a public body.

A public body, as defined by GSA for this purpose, means any State, territory or possession of the United States, any political subdivision thereof, the District of Columbia, any agency or instrumentality of any of the foregoing, or any agency of the Federal Government. Property as to which findings of fact have been made, may be donated to a public body.

§ 644.496 Abandonment.

Abandonment, as used herein, has reference to cases where the lessor or a permittor Government agency is unwilling to accept transfer of buildings or improvements in lieu of restoration, but is willing to permit the Department to leave buildings or improvements having no net salvage value on their premises. It is desirable to transfer title of or accountability for improvements having no net salvage value to lessors or permittors instead of obtaining their consent to abandon such improvements. Abandonment as authorized herein will not be a means for dropping accountability or responsibility for maintenance of improvements on non-excess land.

§ 644.497 Destruction.

Disposal by the Corps of Engineers, as authorized in AR 405–90, does not contemplate expenditure of funds for destruction of improvements which have no sale or salvage value. Accordingly, where such improvement have been approved for disposal by the Corps of Engineers, they will be referred back to the appropriate Army of Air Force command for disposal action under AR 405–90 or AFR 87–4 as appropriate. However, improvements with little or no salvage value may be included in the same item with other improvements being offered for sale which are more attractive improvements without an expenditure of Government funds.
§ 644.501 Authority.

(a) Crops. Crops are defined as personal property in FPMR 101–47.103–12 and are disposed of under FPMR 101–45.309–1 (Sale, Abandonment, or Destruction of Personal Property). The Corps of Engineers does not dispose of crops on military lands. However, when lands are in the custody of the Corps for construction purposes, the Corps will dispose of crops thereon.

(b) Standing timber, embedded gravel, sand or stone. These are defined as real property (FPMR 101–47.103–12(c)). The holding agency is designated as disposal agency for standing timber and embedded gravel, sand, and stone to be disposed of without the underlying land. (FPMR § 101–47.302–2).

(c) Small lots of standing timber. In accordance with AR 405–90, installation commanders are authorized to sell small lots of standing timber with a value not more than $1,000 that are in conformity with the installation Forest Management Plan. Public notice is required of the availability of the timber for sale. The total of such sales in any one calendar year will not exceed $10,000.

(d) Restriction on removal of sand, clay, gravel, stone and similar material. The Army is without authority to remove such products from public domain land located within the military installation where the material is to be used off the installation. With permission of the Secretary of the Interior, such material may be removed pursuant to 30 U.S.C. 601. In such cases, DAEN-REM will obtain the necessary permission.

§ 644.502 Determination of excess status.

(a) Military. The procedure for excessing and disposal of standing timber and embedded gravel, sand and stone is outlined in AR 405–90. The procedure for the determination of availability of timber for disposal is outlined in AR 420–74.

(b) Civil works. (1) When the DE believes that standing timber, embedded gravel, sand or stone (whether designated for disposition with the land or by severance and removal from the land) is excess to requirements, he will submit a recommendation to DAEN-REM for approval. The DE is authorized, however, to dispose of standing timber or other forest products required to be removed incident to construction and operational requirements of the project; that which is generated incident to recreational development or the management of public park and recreational areas or wildlife management areas; or that which is generated in accordance with approved forest management supplements to the approved Master Plan (ER 1130–2–400). As far as practicable, high grade species in short supply will not be disposed of, but will be retained for possible defense requirements. When the amount for sawtimber under the above criteria available for disposal exceeds 5,000,000 board feet, request will be made to DAEN-REM, for determination of whether there are any defense requirements for the timber. The request will include an estimate of the amounts by species and the range in sizes. All timber disposals, except those involving timber below the project clearing line or in construction sites, will be compatible with the planned use of the areas for the purpose to which they are allocated in approved Master Plans and such disposals will be incidental to that use. The DE may authorize the disposal of growing crops when their disposal is deemed necessary to prevent waste.

(2) Under the provisions of section 5 of the act of 13 June 1902, as amended, (33 U.S.C. 538), proceeds from disposal of these items on civil works property may be returned to the appropriation.

§ 644.503 Methods of disposal.

Standing timber, crops, sand, gravel, or stone- quarried products, authorized for disposal in accordance with the foregoing, will be disposed of by transfer to another Federal agency or by sale.

§ 644.504 Disposal plan for timber.

The DE take appropriate action to assure that construction contractors are not authorized, in the clearance of
construction sites, to burn or otherwise destroy merchantable timber unless circumstances exist which preclude sale or salvage. In preparing for disposal of timber, a disposal plan will be prepared which will include the following:

(a) Live timber and merchantable dead timber will be marked for cutting in accordance with the land management plan, Master Plan, or forestry supplement thereto, and cutting will be limited to the timber so marked. The disposal plan will contain sufficient information in this respect to permit preparation of specifications for inclusion in the invitation for bids.

(b) Utilization of existing roadways and construction of new roads and saw mills should be limited to the minimum necessary.

(c) Requirement that the customary practices in elimination of fire hazards be observed with necessary specifications therefor.

(d) The installation commander will be consulted to obtain his desires in connection with security measures, and other matters affecting the installations, and the requirements of such measures will be set forth specifically.

(e) Any measures considered necessary to protect timber and young growth not marked for cutting will be specified.

(f) Where an appraisal is required, the appraisal report will be prepared by a competent forester. The report will indicate the number and size of each species and classification of trees to be cut; the estimated board feet in log scale measurement; linear estimates of pole timber, and amount of cord wood. The appraiser should indicate in the appraisal report what, in his opinion, should be acceptable as a minimum price for different types of timber, as well as a total or lump sum estimate for the whole. Methods of administration and sale of timber by the Army or Air Force should follow the same general rules employed by the U.S. Forest Service in its sales and forestry practices. U.S. Forest Service personnel may be available for this work, if desired, on a reimbursable basis, provided the size of the area in question and the location render such arrangements feasible.

(g) Minor sales, involving lots with an estimated value of $1,000 or less, may be accomplished by the reservoir manager on civil works projects under general guidance issued by the DE Real Estate Branch. In such minor sales, two or more informal bids, in writing, will be obtained, if possible. If only one bid can be obtained, the proposed sale will be posted for a period of ten (10) days.

§ 644.505 Disposal plan for embedded gravel, sand or stone.

Prior to offering sand, gravel, or stone for disposal, a disposal plan will be prepared, which will include the following:

(a) Control of transportation facilities which will limit use of roads and construction of new roads to the minimum necessary.

(b) Security measures established by consultation with the installation commander to properly protect Government property and other interests of the Government.

(c) Where applicable, the depth or level to which the material may be removed, and any restoration of the site after removal.

(d) Specifications as to methods to establish amount of material removed for the purpose of payment.

(e) With certain exceptions as discussed in paragraph (d) of §644.544 an appraisal report will be prepared by a person familiar with the material involved and the operations for mining, quarrying or otherwise removing it, giving the type or grade of material involved and an opinion as to the minimum price that should be acceptable.

§ 644.506 Procedure for transfer to another Federal agency.

As soon as possible after standing timber, embedded sand, gravel, or stone are made available for disposal, other Federal agencies having activities within the vicinity of the location of the property and which, in the opinion to the responsible DE, may desire transfer of the property will, to the extent practicable or economical, be notified of the availability of the property for disposal. Such notification should include the following information concerning how arrangements can
be made to inspect the property; information concerning conditions governing cutting, harvesting, mining, or removal of the property and a statement that the property will be advertised for sale upon the expiration of fifteen (15) calendar days from the date of the notification, unless a request for transfer of the property, or a statement that a request for transfer of the property, or a statement that a request therefor may be made, is received within the fifteen (15) day period. Should a Federal agency request within the fifteen (15) day period, that disposal of the property be withheld pending determination of a requirement, disposal will be withheld not longer than sixty (60) days from the date of notice of availability, unless DAEN-REM approves withholding disposal for a longer period. Disposal will not be withheld for such sixty (60) day period, extended if applicable, if to do so would interfere with construction or other necessary operations. Should a request be received from a Federal agency for transfer of the property, the property will be transferred in accordance with existing procedures without reimbursement, unless DAEN-REM approves withholding disposal for a longer period. Disposal will not be withheld for such sixty (60) day period, extended if applicable, if to do so would interfere with construction or other necessary operations.

§ 644.507 Sales.

DEs will be governed by the general procedure set forth in §§644.540 through 644.557 in selling standing timber, growing crops, embedded sand or gravel or stone products.

§ 644.508 Agreement with Small Business Administration (SBA) on sale of timber.

The Department of Defense has entered into an agreement with the SBA for the development of a program of assistance for small concerns operating in the timber business. This agreement is published for compliance as Figure 11–19 in ER 405–1–12. In the implementation of this agreement, the DE will cooperate with field representatives of SBA to the fullest extent compatible with efficient administration of the Army’s timber disposal program.

§ 644.509 Status as small business.

(a) Definition. Each invitation for bids for the sale of timber with an estimated value of $2,000 or more will contain a definition of small business and provision for self-certification of the bidder’s status within its terms. A definition for use in invitations for bids on Army timber is provided in the “Certificate as to Small Business Status” (Figure 11–20 in ER 405–1–12).

(b) Self-certification. 13 CFR 121.3–9(c) provides:

In the absence of a written protest or other information which would cause him to question the veracity of the self-certification, the contracting officer shall accept the self-certification at face value for the particular sale involved.

(c) Definition for set-asides. The definition of small business provided in Figure 11–20 in ER 405–1–12 omits portions of the definition prescribed by SBA regulations which are not presently applicable to sales of Army timber. The omitted portions relate to sales of timber reserved for or involving preferential treatment of small business §644.512. These portions of the definition are subject to frequent revision by SBA.

§ 644.510 Information for SBA on timber sales.

Representatives of SBA will visit District offices from time to time for purposes of coordination and assistance; to furnish names and information on prospective bidders from the SBA facilities list; and to obtain information on programmed sales of Army timber. In addition to the information which may be furnished during the course of these visits, the following items of information will be furnished to appropriate SBA field offices on each sale of timber products with an estimated value of $2,000 or more:

(a) Advice on proposed or prospective timber sales of Army timber.

(b) Copies of invitation for bids.

(c) Name of successful bidder, his status as a small business, the bid price,
and an estimate of the amount of timber sold.

§ 644.511 Certificate of competency by SBA.

Section 8(b)(7) of the Small Business Act (15 U.S.C. 637(b)(7)) authorizes the SBA to certify the competency of a small business concern as to capacity and credit. In any case where timber is being sold on a credit basis, if the bid is being questioned solely on the financial ability of the bidder and the bidder is a small business concern, the DE will notify the appropriate SBA field office immediately and follow the other procedures provided by Section III of the DOD-SBA Agreement. A certificate of competency issued by SBA will be honored in such cases.

§ 644.512 DA-SBA joint set-aside determination.

Section 15 of the Small Business Act (15 U.S.C. 644), provides that where certain joint determinations are made by the SBA and a disposal agency, the award of a contract for the sale of Government property shall be made to a small business concern. Section IV, Joint Set-Aside Determination of the DOD-SBA Agreement implements Section 15 of the Small Business Act. It is not anticipated that SBA will recommend that Army timber be reserved or set aside for sale to small business concerns on an exclusive or preferential basis. In the event recommendations on set asides of Army timber are received from SBA field offices, the SBA recommendations will be forwarded promptly to HQDA (DAEN-REM) WASH DC 20314 with DE comments and recommendation.

§§ 644.513–644.515 [Reserved]

CLEARANCE OF EXPLOSIVE HAZARDS AND OTHER CONTAMINATION FROM PROPOSED EXCESS LAND AND IMPROVEMENTS

§ 644.516 Clearance of Air Force lands.

The Chief of Engineers has no responsibility for inspecting or clearing excess Air Force land of explosives or chemical/biological contaminants. When a target or bombing range, or other land under the control of the Department of the Air Force, which might be contaminated with explosives or other harmful or dangerous substances, becomes excess to Defense requirements, the appropriate DE will obtain a certificate as to the extent of contamination and clearance thereof from the Commander, Air Force Logistics Command (AFLC), Wright-Patterson Air Force Base, Ohio 45433. The Corps of Engineers will continue to be the agency with which the disposal agencies, purchasers, and former lessees will communicate when explosives or objects resembling explosives, are discovered on the land after disposition has been effected. The AFLC, upon request of the DE, will neutralize or remove such objects or substances and make a report to the requesting agency or person. See §644.535 for support required of the Corps.

§ 644.517 Clearance of Army lands.

The responsibility for performing clearance of ordnance contaminated excess Army military real property is placed upon and remains with the using command. That command, after completion of the clearance work, will furnish the DE a “Statement of Clearance” (Appendix E, AR 405-90) and a record of the clearance work performed. In addition to the Statement of Clearance, the following information will be furnished to the DE upon completion of the neutralization:

(a) Records of the neutralization work performed, including statement of methods employed.

(b) List of dangerous and explosive materials removed.

(c) Number and names of demolition technicians employed.

(d) Other data that may be pertinent in the defense of any suit or claim that might subsequently arise as a result of civilian occupancy.

§ 644.518 Determination of categories.

Prior to making a recommendation for excess, the state of contamination of the property must be determined by the installation commander as either of the following:

(a) Category One. Those lands such as ammunition plants, storage, test, impact and training areas, bombing or target ranges, which may contain explosives or unexploded ordnance. The
§ 644.520 Contaminated industrial property.

(a) GSA may arrange to sell contaminated chemical or other industrial plants to a purchaser whose operations
will result in the same type of contamination, or who agrees to perform the necessary decontamination. Any decontamination work required will be monitored by USATHAMA who will also review the completed program for adequacy of decontamination. If these arrangements cannot be worked out, USATHAMA will decontaminate the property at the request of the Office, Chief of Engineers (OCE), or the property may be withdrawn from excess and returned to the using command for care and custody.

(b) A Statement of Clearance is required for industrial property to be declared excess in order to establish a qualitative and quantitative baseline for the contaminants present. In the Statement, USATHAMA will provide an adequate description of the nature and extent of the contamination. The description furnished to the DE should include the following information:

(1) Name and location of installation.
(2) Date of final clearance.
(3) Reference to attached real estate map showing locations of contaminated, cleared and restricted areas. The map(s) will be attached to the description of contamination.
(4) Statement that the area has been cleared of toxic and hazardous materials reasonably possible to detect either by present state-of-the-art methodology or by a visual inspection.
(5) Recommendation as to whether the land or structures may be used for any purpose for which it is suited, clearly identifying any areas recommended for restricted use and listing restricted tract and building numbers.

§ 644.521 Limitations on clearance cost.

The following principles are established for determination of the financial limit of clearance operations at excess installations:

(a) Government-owned land. Clearance work will not be undertaken where the estimated cost thereof exceeds the value of the land after decontamination plus the estimated cost of keeping it security-fenced and posted for a period of 25 years.

(b) Leased land. Clearance will not be undertaken where the estimated cost, plus the cost of any other required land restoration work, exceeds the value of the land after clearance and restoration plus the estimated cost of keeping it security-fenced and posted for a period of 25 years.

§ 644.522 Clearance of military scrap.

Military scrap can contain or be contaminated with explosives, chemicals, and other hazardous materials. The primary consideration in determining whether scrap metal will be removed should be the safety of persons coming on the land in question and, secondarily, the prevention of accidents resulting from the sale and/or use of the scrap metal subsequent to the land passing from the jurisdiction of the Department. The DE will insure the removal or destruction, by using command, of all military scrap and scrap metal from lands suitable for cultivation or other subsurface operations. In the case of land unsuitable for cultivation or other subsurface operations, all military scrap will be removed or destroyed and scrap metal removed, if it is reasonably possible to do so. Cases where it is considered impracticable to remove the scrap metal, will be reported to DAEN-REM for final decision. In such instances, pertinent data and the recommendation of the DE will be furnished. Disposition of military scrap or scrap metal by dumping into inland waters or by land burial in other than an approved landfill is prohibited.

§ 644.523 Restricting future of artillery and other ranges.

Experience indicates that, on ranges where high explosive projectiles have been fired or dropped, such as artillery, bombs, mortars, rockets, grenades, and the like, it is impossible to make certain that land in impact areas is absolutely safe for unrestricted use. Such impact areas receive a high concentration of fire, and the properties of these projectiles are such that many duds are deeply buried. Depth of burial, as well as the concentration of fragments or components, will affect the dependability of mine detectors. Since there is no known definite period within which such projectiles will become inert through weathering and corrosion, such contaminated areas can be
safely released for restricted use only, even after decontamination work has been carried to its practicable limit. Such restrictions will usually be in the form of a recommendation that the land be restricted to surface use only. Restrictions will be based solely on the type and/or extent of contamination. If land is contaminated to such a degree that it is considered it cannot be rendered safe for any use, disposal action will be suspended and the facts will be reported to DAEN-REM-C with the DE recommendations.

§ 644.524 Reporting contaminated land to the General Services Administration.

Contaminated areas, except industrial properties as covered by § 644.520 will not be included in a Report of Excess to GSA until such time as the affected areas have been cleared by the using command to the satisfaction of the DE and a Statement of Clearance has been received. If an exception is granted and the Department of the Army, with the concurrence of GSA, reports contaminated nonindustrial property excess, the report of excess will include statements concerning:

(a) The extent and type of such contamination;
(b) Plans for decontamination, if any; and
(c) The extent to which the property may be excessed without future decontamination.

§ 644.525 Statement of clearance in reporting excess property to GSA.

The Report of Excess will include the Statement of Clearance furnished by the using command (§ 644.517). The record of the clearance work performed by the using command will not be included in the Report of Excess but will be preserved in the permanent records of the DE. It is anticipated in these cases that the disposal agency (GSA) will, at the time the land is offered for sale of lease, give public notice of the circumstances surrounding its past and future restricted use. Included in such notice will be the statement that the Department of the Army is willing to remove or destroy any potentially dangerous materials discovered at any time in the future, subject to the availability of funds for this purpose.

§ 644.526 Reporting target ranges.

All Reports of Excess to GSA covering lands which have been used as target ranges of any kind will contain an affirmative or negative statement in regard to contamination. This will be by appropriate schedule and reference thereto in the following manner:

(a) If the statement is negative, it will declare that no explosive or other contaminating materials were used or stored on any portion of the installation.
(b) If the statement is affirmative, reference will be made to appropriate schedules of the Report of Excess containing statements of clearance on the installation, or portions thereof.

§ 644.527 Recording Statements of Clearance.

On property disposals for which the Corps of Engineers is the disposal agency, the DE will have the Statement of Clearance recorded, if possible, as part of the permanent history of the property involved, with the proper county land record office. A copy of the report of clearance work performed will be furnished DAEN-REM and DAEN-REP.

§ 644.528 Return of contaminated leased land to owners.

Where leased land has been contaminated, whether excess to military requirements or being used, it may often prove advisable and economical to acquire the fee to such properties. Prior to considering the return of contaminated leased land to owners, District Engineers will assist installation commanders in preparing an analysis as a basis for recommendation to acquire or not acquire such areas. In the case of recommended restriction of use, notice should be given the lessor as described in § 644.525.

(a) Where such a restriction reduces the value of the land, the Department will, if consistent with the terms of the lease, pay damages equal to the reduction in value as of the effective date of termination.
(b) As stated in § 644.525, the owner should be advised that the Department
§ 644.529 Supplemental agreement with owner of contaminated leased land.

In the event that it becomes necessary to pay damages to a lessor in lieu of restoration i.e., decontamination, the following clause, appropriately modified to fit the circumstances, will be made a part of the supplemental agreement terminating the lease and effecting monetary settlement in lieu of restoration. Additionally, in order to protect the Government from possible claims for damages from future purchasers, the executed supplemental agreement will, in those jurisdictions permitting recording, be recorded by the DE thus providing legal notice to subsequent purchasers of the condition of the premises.

SUGGESTED CLAUSES FOR USE IN SUPPLEMENTAL AGREEMENT

Whereas, by reason of the use made of the premises by the Government it is impossible to ascertain after completion of decontamination operations by the Government that the following described portion of land is safe for unrestricted use by the lessor (or state because of use made by Government that use of land must be restricted to grazing, etc.):

(legal description; utilize hachured/annotated map(s) as attachment plus legal description.)

Now, therefore, in consideration of the payment by the Government of the United States to the lessor, (Name of Lessor), of dollars ($), representing the estimated compensation to which the lessor is entitled by reason of the loss of the unrestricted use of the above described property, the lessor hereby releases the Government from all claims for damages to property and/or injury to persons which may arise out of the existence on the premises of unexploded ammunition or chemical/biological agents. It is mutually understood, however, that for a period of 25 years from the date hereof, the Government shall, upon request of the lessor, remove or destroy any potentially dangerous materials that may be discovered on the land, provided that adequate appropriations are available to cover the cost of such service. (If use of the land is restricted to surface use, the lessor should agree and covenant, in consideration of the payment, to use the land for such purposes only.)

§ 644.530 Conditions in conveying land suspected of contamination.

The following conditions, appropriately modified to conform to local law, will be included in deeds conveying land which is, or is suspected of being, contaminated with explosive or toxic materials and is restricted to surface use: (GSA should be requested to include these conditions in deeds that they prepare.)

Whereas, said property was a part of (Name of Installation), a military installation used for , and portions of this property were subject to contamination by the introduction into the said installation of bombs, shells and other charges (insert reference to toxic chemical/biological agents, if applicable) either below or upon the surface thereof; and

Whereas, the grantor has caused the property to be inspected and has decontaminated the said property to the extent deemed reasonably necessary, and, to the extent deemed consistent with sound economic limitations, has cleared the property of all dangerous and explosive materials and/or chemical/biological agents, reasonably possible to detect, and has made certain recommendations pertaining to the use to which the land may be devoted, and the said recommendations are contained in a statement, a copy of which is attached hereto and made a part hereof; and

Whereas, the grantor, by attaching such statement, does not intend to make, nor shall it be construed to have made, any representations or warranties pertaining to the condition of the land; and

Whereas, the hereinafter-designated grantee has entered into a contract to purchase said property with full knowledge of, and notwithstanding the foregoing recitals which are incorporated for the purpose of disclosing the former use made of the property hereinbefore described; and

Whereas, by acceptance of this instrument, the grantee admits and confesses to full knowledge with respect to the facts contained in the foregoing recitals as to possible contaminated condition of the property:

Now, therefore, by acceptance of this instrument, and as a further consideration for this conveyance, the grantee here covenants and agrees for himself, his heirs, successors, or assigns, to assume all risk for all personal injuries and property damages arising out of ownership, maintenance, use, and occupation of the foregoing property; and further covenants and agrees to indemnify and save harmless the United States of America, its servants, agents, officers, and employees, against any and all liability.
claims, causes of action, or suits, due to, arising out of, or resulting from, immediately or remotely, the possible contaminated condition, ownership, use, occupation, or presence of the grantee, or any other person, upon the property, lawfully or otherwise.

§ 644.531 Warning to public of danger in handling explosive missiles.

When any land which has been contaminated with explosive objects, or chemical/biological agents, is released for disposal to, or use by, the general public in addition to the clearance statement furnished to the disposal agency, the DE will publicize, to the fullest extent practicable, the possibility of contaminants remaining on the land and the inherent danger of handling explosives or other contaminants. Such publication should be in the form of articles in official news media, or posting of the premises whenever the later is considered most feasible. Such publicity should include instructions that, in the event of the discovery of an explosive missile, or an object resembling an explosive missile, or other contaminant, or in the event of an injury caused by an explosion or exposure to toxic agents, such discovery or injury should be reported immediately to the DE. An effort should be made to obtain the cooperation of local law enforcing agencies to insure the prompt reporting of an accident, or the discovery of an explosive missile. The majority of accidents are the result of the removal of explosive missiles by individuals for sale to scrap dealers. Scrap dealers in the vicinity of contaminated lands should be informed of the inherent dangers and asked to cooperate by refusing to buy military scrap from private parties.

§ 644.532 Reporting accidents.

Immediately upon receipt of information of an accident involving, or appearing to involve, explosive or chemical/biological elements remaining on, or carried from an excess or surplus installation, whether under the jurisdiction of the Corps of Engineers, other Government agency, or sold or returned to public or private owners, the DE will institute an investigation and prepare a report prescribed by AR 385–40 and OCE Supplement thereto. Further, upon determination that an accident has occurred, the former using command should be requested to send qualified explosive, chemical or biological specialists to the scene of the accident immediately, in order that proper corrective measures to eliminate future accidents may be instituted. HQDA (DAEN-REM) will be immediately informed, by teletype, of any accidents due to explosives on lands which have been used by the Department involving injuries to persons and/or animals, or damages to private property.

§ 644.533 Contamination discovered after return of land to owner, or sale.

When land has been previously declared clear of explosives or other dangerous material so as to be safe for all uses and disposed of, but is later found to have been contaminated to such an extent that, in his opinion, it is dangerous to the public, the DE will request the former using command to reexamine the land for the purpose of determining the extent to which the original Statement of Clearance should be revised and to determine the kind and cost of any further clearance work by the using command which would be required to place the property in the condition set forth in the original Statement of Clearance. If further clearance work is necessary and considered economically justified, the DE will request the using command to perform such work and furnish a new Statement of Clearance and record of the further clearance effected. If further clearance work is not considered economically justified, he will make a report thereof to DAEN-REM with his recommendations and pertinent supporting data. Recommendation for reacquisition of contaminated lands will be limited to those which involve full restrictions of both surface and subsurface uses. Where subsurface use of lands only is to be restricted, it is preferable to make compensation to the owners through claim procedure, when and if instituted by the owner on his own initiative.
§ 644.534 Return of public domain land.

(a) General. The procedures described elsewhere in §§ 644.516 through 644.539 to carry out the continuing responsibility of the Department of the Army to assist and advise the land holder and protect the public from dangerous substances on or in the land after release are equally applicable to public domain lands. Air Force policy and procedures are generally comparable.

(b) Congressional. A provision has been added to several laws enacted by Congress that upon request of the Secretary of the Interior at the time of final termination of the reservation effected by the Act, the Department of the Army shall make safe for non-military uses the land withdrawn and reserved, or such portions thereof as may be specified by the Secretary of the Interior, by neutralizing unexploded ammunition, bombs, artillery projectiles, or other explosive objects and chemical agents. The intent of the provision is explained by a statement of the Committee on Interior and Insular Affairs, House of Representatives, in Report No. 279, 87th Congress, 1st Session: The committee concluded that it would be appropriate to amend the bill to designate the Secretary of the Interior to act on behalf of the Federal Government in delineating the areas to be made safe for nonmilitary use when the lands are no longer required for defense purposes. “It is expected that the Secretary of the Interior will not require the Department of the Army to proceed with expensive cleanup work in areas where there would be no direct benefit. On the other hand, it is anticipated that when potential resources or use values are such as to make degrading or decontamination advisable, the Secretary of the Interior will identify those resources and values for the Secretary of the Army. This will permit a full and complete justification in the event that a separate appropriation therefor is required.” Report No. 279 also quoted the following policy statement by the then Bureau of the Budget:

... requirement for decontamination should be related to a standard not only of practicability, but also to one of economic feasibility that takes into account the desired future use and value of the land to be decontaminated.

(c) Army. The congressional policy outlined above does not change the existing Army policy. Its principal effect is to make it clear that the Secretary of the Interior has an equal interest with the Secretary of the Army in the final decision on whether it is practicable or feasible to clear lands for return to the public domain, and the extent of clearance. No difficulties in reaching agreement with Interior in these matters are anticipated. Where large expenditures are involved it will usually be necessary to request a special appropriation, leaving the final decision to Congress. In any instance, if difficulty in reaching agreement with officials of the Bureau of Land Management (or the Secretary of the Interior) should occur, it will be reported promptly to DAEN-REM with complete background data for review and instructions.

Where Air Force range lands are proposed for disposal, the AFLC, in most cases, will make an economic study to determine the extent of clearance that is justified by the relative values of the property before and after decontamination. For this purpose, AF commands declaring range lands excess will submit a copy of the excess recommendation to the AFLC. Upon request, the DE will prepare and furnish a disposal planning report to the AF Logistics Command for assistance in making the economic study. The disposal planning report will include, but need not be limited to, the following:

(a) A map which depicts and annotates differing areas according to their estimated highest and best use.

(b) An appraisal report reflecting the fair market value of each of the differing areas based on their highest and best use, and based on the assumption that the lands are entirely free of dangerous materials or other contamination. AFLC will compare such evaluation with cost of decontamination work. While needed primarily in connection with the return of AF range lands to the public domain, economic
§ 644.536–644.539 [Reserved]

§ 644.540 Advertising.

(a) Definition and purposes. GSA regulations require that disposal agencies shall widely publicize all surplus real property which becomes available for sale. Sales will be made to the highest responsible bidder after advertising. Advertising consists of the preparation of Invitation for Bids, the posting of copies thereof in public places, their distribution to interested persons or prospective bidders, and publication of notice of sale in newspapers where such publication is deemed advisable or is required by this subpart F. The purpose of advertising and obtaining competition in selling Government property is:

(1) To give all qualified persons equal opportunity to bid for the property.

(2) To secure for the Government the benefits which flow from competition.

(3) To prevent criticism that favoritism has been shown by officers or employees of the Government in making sales of public property.

(b) Notice to Department of Commerce. A condensed statement of proposed sales of surplus real property by advertising for competitive bids, except where the estimated fair market value of all the property included in the advertisement is less than $5,000, shall be prepared for publication in the U.S. Department of Commerce publications, "Commerce Business Daily." Guideline is contained in the Defense Acquisition Regulation (DAR) 1–1005.1, (formerly the Armed Services Procurement Regulation). Forward statement to: U.S. Department of Commerce, Commerce Business Daily, P.O. Box 5999, Chicago, Illinois 60680.

(c) Procedure. Whether newspaper advertising in addition to distribution and posting of Invitation for Bids is desirable will depend upon the value of the property and in some instances the anticipated interest in the property. The ever-changing market requires different methods or efforts to obtain the best price for the Government. The time allowed for submission of bids will depend upon the time available, usually 30 days. If available, a longer period may be desirable based on value and other factors. A shorter period may be necessary and, in an emergency, a period of less than 10 days may be allowed. However, the contracting officer should make a record of written findings to support such a decision. If the emergency is based on requirements of the using command that appear questionable, a report with recommendations should be forwarded to DAEN-REM by the most expeditious means.

(d) Bidders mailing lists. Instructions contained in procurement regulations are applicable generally for establishing, maintaining, and controlling bidders mailing lists (DAR 2–205). Generally, all proposed sales should be preceded by an advance notice, to eliminate disinterested bidders and as a measure of economy in printing and distributing voluminous Invitation for Bids. Notice to bidders will provide that their failure to respond to two successive sales offerings will result in the removal of their names from the bidders list. When time does not permit an advance notice, one copy of the Invitation may be sent to the potential bidder, which contains the following notice: "Attention Bidders. If interested in bidding on any or all items, three (3) additional copies will be furnished on request." The advance notice will describe the property offered and ordinarily provide that Invitation for Bids will be mailed on request or may be picked up at the installation or project at the time the property is inspected.

§ 644.541 Award of contract.

(a) Opening of bids. All bids shall be opened and publicly disclosed by a duly authorized representative of the responsible DE at the time and place
§ 644.542 Application of anti-trust laws.

The Federal Property Act provides that real property and related personal property with an aggregate total cost of $1,000,000 or more (or personal property with an acquisition cost of $3,000,000 or more) or patents, processes, techniques, or inventions, regardless of cost, shall not be disposed of to any private interest until the advice of the Attorney General has been received as to whether the proposed disposal would tend to create or maintain a situation inconsistent with the anti-trust laws. Prior to obligating the Government on any such disposal, Division Engineers will furnish DAEN-REM information on the probable terms and conditions of the sale. DAEN-REM will use the information as the basis for a request to the Attorney General for advice. Under the provision cited, the Attorney General is allowed up to 60 days to furnish the advice requested. The Federal Property Management Regulation, §101–47.301.2 provides guidance on the information to be furnished. Where identical bids in excess of the $2,500 are received, FPMR 101–47.304–8 provides for a report to the Department of Justice. Section 101–47.304–8 provides guidance for such reports to be addressed to the Attorney General, WASH, DC, 20530.

§ 644.543 Determination of acceptable offers after advertising.

(a) Generally an acceptable offer is one which:
   (1) Is submitted by a responsible bidder.
   (2) Conforms to the Invitation for Bids.
   (3) Equals or exceeds the appraised fair market value of the property.
   (4) Was independently arrived at in open competition.

(b) A formal appraisal is not required where real property components:
   (1) Are to be offered on a competitive sale basis that will adequately test the market.
   (2) Are at the same location and are to be sold under a single advertisement.
   (3) Have a total estimated fair market value of $10,000 or less for all property to be sold.

The determination as to necessity for a formal appraisal because of the $10,000 limitation may be made by an experienced real estate employee who need not be a real estate appraiser. This determination may be in the form of a simple written statement that in the judgment of the signer the property is not considered to exceed $10,000 in value. In these cases, awards will be supported by a determination by the DE that the market was adequately tested, and the price bid reasonable. For the purpose of records and reports, the sale price will be recorded as the fair market value. If it appears the market was not adequately tested, bids
§ 644.544 Negotiated sales.

(a) To private parties. Negotiated sales to private parties are not viewed with favor. Generally, such negotiated sales will be approved only where an emergency exists that will not permit advertising, where advertising would serve no useful purpose, or where a negotiated sale is in the best interest of the Government. Emergencies which justify sales without advertising do not ordinarily justify sales without competition. Instances are rare where the emergency is such that time does not permit the oral solicitation of quotations from more than one source. In any sales which are made without benefit of advertising, competition by informal solicitation and quotation will be obtained to the maximum extent feasible under the circumstances. Such sales should be negotiated at the best terms obtainable and at not less than the appraised fair market value.

(b) To eligible agencies. (1) Acts of Congress listed in the Federal Property Management Regulation, §101–47.4905 (Illustrations), authorize negotiated sales of surplus real property to states and other eligible public agencies listed therein. The Acts listed, except section 203(c)(3)(H) of the Federal Property Act (40 U.S.C. 484(c)(3)(H)), cover special classifications of property for specialized use, the most important of which is disposal of airport property. The section of the Act cited authorizes negotiated sales of surplus property to states, territories, possessions, political subdivisions thereof, or tax-supported agencies thereof, provided the appraised fair market value of the property and other satisfactory terms of disposal are obtained. (The other Acts listed in §101–47.4905 provide for disposal subject to conditions of use but without consideration, or at reduced consideration, except power transmission lines which are sold without conditions but at the appraised fair

will be rejected and the property re-advertised, or, if time does not permit readvertising, a sale may be consummated using the procedure provided in paragraphs (d) and (e) of this section.

(c) All land, irrespective of estimated value, and all other real property and components with an estimated value in excess of $10,000 will be appraised. Where an acceptable offer, as defined in paragraphs (a) and (b) of this section, is not received for such property as a result of public advertising, it will be re-advertised unless the responsible DE determines, based upon written findings which shall be preserved as part of the permanent file, that further public advertising will serve no useful purpose.

(d) Where no acceptable bid is received as a result of the second advertising, or a determination was made that further advertising would serve no useful purpose or is not feasible, the DE may negotiate a sale at the highest price obtainable, provided:

(1) All bids are first rejected.

(2) The total of the appraised value for all property included in any single sales contract does not exceed $1,000.

(3) All past bidders, on any of the items, and any other known interested parties are afforded a fair opportunity to participate in the negotiations.

(4) The sale price is in excess of the highest bid received as a result of advertising.

(5) In his opinion the price is reasonable.

(e) Where the appraised or estimated value of all items to be included in a single sales contract exceeds $1,000, and no acceptable bid is received, the high bidder may at the discretion of the DE be given a reasonable period, not to exceed five working days, to increase his bid. At the same time all other bids shall be rejected and bid deposits returned. If the high bidder increases his offer to an amount equal to the total appraised or estimated value of the items involved, the DE may consummate the sale. All other cases will be forwarded to DAEN-REM together with an opinion as to whether the market was adequately tested and the highest price offered is reasonable, and with recommendations as to the course of action to be followed. If a negotiated sale to other than the highest bidder is recommended, information for preparation of a report to the Government Operations Committees of Congress will be included, as required in paragraph (c)(2) of §644.544.
§ 644.545  32 CFR Ch. V (7–1–13 Edition)

market value.) Notification that surplus property is available for disposal will be given to eligible public agencies for all airport property and for any other property where there is reason to believe that an eligible public agency may be interested in the property or that the property may be adaptable to the agency’s use (§§ 644.400 through 644.443).

(2) Title 10, United States Code, Section 4682, authorizes the Secretary of the Army to sell obsolete or excess material at fair value to the National Council of the Boy Scouts of America. The Judge Advocate General has held that buildings and other improvements no longer required by the Department be sold to that organization at the appraised fair market value.

(c) Authority to negotiate. (1) The DE is authorized to dispose of land, improvements, related personal property and real property components (including standing timber and embedded sand, gravel, and stone-quarried products in their unmined or natural state) with an estimated fair market value of $1,000 or less by negotiated sale without advertising, provided that such action is within the purview of paragraphs (a) and (b) of this section, and satisfactory terms of disposal can be obtained. Except as provided in § 644.543 and paragraph (b) of § 644.544 all sales are not less than the appraised fair market value. See paragraph (d) of this section for requirement for appraisal by contract.

(2) All other proposals to negotiate sales without advertising will be submitted to DAEN-REM for advance approval. In submitting such proposals, the nature of the emergency or other situation justifying the waiver of advertising will be clearly stated. The property involved will be adequately defined, and the appraised fair market value and proposed price will be set forth. Negotiated sales of surplus property with an appraised value in excess of $1,000 under provisions of the Federal Property Act cited in paragraph (b)(1) of this section, require submission of an explanatory statement to the Government Operations Committees of Congress. Under the FPMA, a statement must be submitted at least 35 days in advance of each such negotiated disposal. When required, the DE will forward a draft of statement to HQDA (DAEN-REM) for transmittal to GSA for submission to the Committees.

(d) Appraisal by contract. Pursuant to Federal Property Management Regulation, § 101–47.304–9(b), where sales are to be negotiated under the authority provided by paragraphs (a) and (b) of this section, a contract appraisal should be obtained provided that the cost of such a contract would not be out of proportion to the recoverable value of the property and is in the best interest of the Government. If such is not the case, the head of the disposal agency, or his designee, may authorize any other appropriate method to obtain an estimate of fair market value. Requests for waiver will be forwarded to DAEN-REM.

(e) Record to justify waiver of advertising. (1) A written justification for negotiated sales made under the authority of these instructions will be prepared and filed by the DE with the record of disposal in each case. A copy of Standard Form 1036 may be used for this purpose.

(2) Except for those cases covered by paragraph (b) of this section, the nature of the emergency compelling waiver of advertising, the reason why it was considered that advertising would serve no useful purpose, or why the negotiated sale was considered to be in the best interest of the Government, will be clearly stated. In cases where an explanatory statement is transmitted to the Committees on Government Operations, a copy of that statement will be furnished the appropriate GSA Regional Office and filed with the record of the case as the required documentation of justification for waiver of advertising. DAEN-REM will make available to the DE necessary copies of such statements for filing or distribution.

§ 644.545 Form of invitation for bids and contract of sale.

Sale contract forms will be prepared by the DE conducting the sale. ENG Form 571–R, Invitation for Bids, Bid and Acceptance, Sale of Surplus Real Property will be used as a guide in sales of bare land or improved land and related personal property. ENG Form
1038–R, Invitation for Bids, Bid and Acceptance, Sale and Removal of Buildings (or other Real Estate Improvements), will be used as a guide in sales of buildings and other improvements for removal from the site. These forms are designed for use in normal sales of land and real estate improvements pursuant to existing delegations of authority. The DE is authorized to change the formats, to rearrange the sequence of paragraphs, and to add or to delete paragraphs in whole or part, as local circumstances require, but no substantive departure from the forms is authorized without prior specific approval of DAEN-REM. Whenever a sale is to be conducted pursuant to a special delegation of authority, and whenever the circumstances of a sale are such as to render use of these forms inappropriate, a form will be devised by the DE to meet the requirements of the particular sale involved, and forwarded to DAEN-REM for approval. Suggested additional provisions and conditions for use in the sale of standing timber are contained in ENG Form 2140–R, Supplement to Standard Form 114 for use in Timber Sales Contract. In preparing sale contract forms, the following instructions will be followed:

(a) A definite date and time will be set for the opening of bids.

(b) Bids will be prepared in quadruplicate, all copies to be signed by the bidder.

(c) The Invitation for Bids will require each bidder to submit with his bid a certified check, cashier’s check, traveler’s check, or United States postal money order drawn to the order of the “Treasurer of the United States” for at least 20 percent of the bid. When the cash bid is a small part of the total consideration (where such dismantling and restoration is involved), the DE should set a definite higher amount as a bid deposit. Also, in such cases a performance bond, adequate to discourage breach of contract after only partial performance, may be required.

(d) For real property components the Invitation for Bids will require payment in full within seven days after the successful bidder is notified that his bid is accepted and, in any event, prior to removal of the property. The time specified for completion of payment for land will depend upon the sum of money involved.

(e) Bids may be submitted for one or any number of items. Items or lots of real property will be offered in such reasonable quantities as to permit all bidders, small as well as large, to compete on equal terms. Land, however, will not be subdivided solely for this purpose, and in the case of timber sales or sales of embedded sand, gravel and stone, it may not be feasible to have more than one purchaser operating in the same area. Further, it may not be to the Government’s interest. Buildings will be offered for sale as single items whenever practicable but submission of bids covering specified groups as an item or all of the buildings may be permitted if the DE considers such a procedure is in the best interest of the Government. It may sometimes be advantageous to divide the buildings into appropriate groups and to permit bidding on individual buildings or on specified groups of buildings or on the entire lot. When such bids are permitted, the Invitation for Bids, ENG Form 1038–R, will be flagged to inform bidders that lump sum bids on the entire lot (and specified groupings, if this procedure is appropriate) may be made but will not be accepted unless the lump sum bid exceeds the total of the highest bids received on each item (or on the groupings).

§ 644.546 Credit.

Payment of the purchase price over an extended period of time should be considered only when the price is a considerable amount, and it may be to the Government’s interest to extend credit. Prior to offering property for sale on an extended payment plan basis, approval from DAEN-REM will be obtained. Extension of credit will be within the limitations of FPMR 101–47.304–4. Credit cannot be extended, except to state or local governments, nor can any other special condition be applied, unless provision was made for it in the Invitation for Bids.
§ 644.547 Extensions of time.

Granting an extension of time, where unusual or unforeseeable circumstances are not present, is contrary to the form of the Invitation for Bids, and amounts to the application of special conditions not provided for therein. This violates GSA regulations and the principles of fair competition. Adoption of the following guides in the development and administration of sales programs will help to avoid unjustified requests for extensions of time:

(a) Establishment of realistic periods for completion of the sales contract.

(b) Necessary and justified extensions to be authorized subject to posting additional bond to insure performance and payment of adequate consideration where use of Government land is involved.

(c) Reasonable restrictions on resale of improvements at the site.

(d) Prohibition against posting advertising signs and storage of salvaged material on the installation pending sale to other customers.

§ 644.548 Abstract of bids.

At the opening of bids, DD Form 1501 or 1501–1 (Abstract of Bids) will be prepared showing all bids received, the amount for each item, and the total. The successful bid will be encircled in red or typed in red.

§ 644.549 Payments.

All payments should be in the form of cash, cashier’s check, money order, traveler’s check, draft, or any other form of payment not subject to stoppage or revocation. All such checks, money orders, or drafts should be drawn to the order of the “Treasurer of the United States.”

§ 644.550 Sale to employees or military personnel.

The sale of Government real property will not be made to civilian employees or military members of the Department of Defense (including an agent, employee or member of the immediate family of such personnel) whose duties include any functional or supervisory responsibility for the disposal of real property under Army control.

§ 644.551 Equal opportunity—sales of timber, embedded sand, gravel, stone, and surplus structures.

Consistent with Executive Order 11246 as amended by Executive Order No. 11375, every Government contract involving employment shall include provisions for equal opportunity in employment, in connection with the performance of work under the contract. The equal employment opportunity clause in DAR 7–103.18 will be included in all contracts and first-tier sub-contracts over $10,000 pertaining to the following real estate actions in the United States and its possessions, unless exempted under the provisions of DAR 12–805:

(a) Sale of standing timber.

(b) Sale of embedded sand, gravel, and stone in their natural state.

(c) Sale of surplus structures where an appreciable amount of dismantling and site restoration is involved.

§ 644.552 Statement of contingent or other fees.

The instructions and procedures contained in section I, part 5, DAR, are applicable to the sale of Government-owned real property and will be followed. Where applicable the statement set forth in DAR 1–506 will be included in Invitation for Bids and Contracts of Sale and an identical signed statement will be secured from the prospective purchaser where the property is to be sold without advertising for competitive bids. In addition to the statement, Standard Form 119 (Contractor's Statement of Contingent or Other Fees for Soliciting or Securing, or Resulting From Award of Contract) will be completed where either part of the statement is answered in the affirmative. The exceptions to the use of the statement and Standard Form 119 are set forth in DAR 1–506–3 and may apply generally to real property sales of the Army, Air Force and non-defense agencies except that the monetary limitation prescribed by DAR 1–506.3 is $1,000 insofar as sales or property of the Department of Energy are concerned.
§ 644.553 Preparation and distribution of sales documents and reports of sales.

(a) Report of funds received. As funds are collected from sales, reports will be prepared promptly. Sales may be allowed to accumulate to permit the making of fewer reports, but in no case will they go unreported longer than 48 hours. DD Form 1131 and supporting papers will be signed by the DE conducting the sale.

(b) Numbering of contracts. The numbering of contracts involving the receipt or expenditure of funds will be in accordance with ER 1180–1–1 (ECI 30–203).

(c) Documentation and reports of sale. The DE responsible for the sale will prepare and retain copies of documents pertaining to the sale, and will make required distribution of the following (see paragraph (d) of this section).

(1) Contract—one signed and two authenticated copies.

(2) DD Form 1501 or 1501C (Abstract of Bids)—one copy (not required for negotiated sales).

(3) DD Form 1131—four copies. All sales will be listed on DD Form 1131, extended if necessary. Separate forms are not required for each contract. When receipts from more than one contract are reported on one DD Form 1131, all related contracts will be attached to and transmitted with the form.

(4) Standard Form 1036, Statement and Certificate of Award, attached to the original signed contract and the DE’s copy of each contract, or separate statement justifying negotiation (paragraph (e) of §644.544).

(5) Advertisement, if any—two copies.

(6) Bond, if any—two signed copies.

(d) Distribution of reports of sale—(1) Military property. The finance officer will be furnished one authenticated copy of each contract, Standard Form 1036 or a statement justifying negotiation, copy of advertisement, if any, and original signed bond, if any. Three copies of DD Form 1131 (Cash Collection Voucher) will be receipted and returned to the DE.

§ 644.554 Insurance against loss or damages to buildings and improvements by fire or acts of God.

The Department does not carry property insurance of any nature. Vendees, however, may be advised as to their liability for certain losses and that insurance protection against such risks is optional. Under the FPMR, the vendee must provide insurance to protect the United States when credit is extended (§101–47.304–4(f)).

§§ 644.555–644.557 [Reserved]

INSPECTIONS TO INSURE COMPLIANCE WITH DISPOSAL CONDITIONS

§ 644.558 Properties requiring compliance inspections.

The principal properties conveyed which require inspections are for the training of civilian components of the Armed Forces. However, other properties are sometimes conveyed under special acts of Congress subject to conditions required by the authorizing act. These properties will also be inspected for compliance with such conditions.

§ 644.559 Civilian component training facilities.

(a) Authority. Under the provisions of the Surplus Property Act of 1944, as amended, a number of surplus real properties of the United States certified by the Governor of the state in which located and by the Secretary of the Army, Navy or Air Force as the case was, as being suitable and needed for use in training and maintaining civilian components of the Armed Forces under their respective jurisdictions, were conveyed by the Administrator of the War Assets Administration or by the General Services Administration to states, their political subdivisions or tax-supported instrumentalities for
such purposes. These conveyances contained a number of covenants, conditions, restrictions and reservations, designed to insure the use and maintenance of the property and appurtenances for the purpose for which conveyed and otherwise to protect the interest of the United States. The Secretary of Defense is authorized by (40 U.S.C. 484(k)(4)(d)) to:

(1) Determine and enforce compliance with the terms, conditions, reservations and restrictions contained in any instrument by which such transfer was made;

(2) Reform, correct, or amend any such instrument by the execution of a corrective, reformative, or amendatory instrument where necessary to correct such instrument or to conform such transfer to the requirements of applicable law; and

(3) Grant releases from any of the terms, conditions, reservations and restrictions contained in, and convey, quitclaim, or release to the transferee or other eligible user any right or interest reserved to the United States by any instrument by which such transfer was made, if he determines that the property so transferred no longer serves the purpose for which it was transferred, or that such release, conveyance, or quitclaim deed will not prevent accomplishment of the purpose for which such property was transferred: Provided, that any such release, conveyance, or quitclaim deed may be granted on, or made subject to, such terms and conditions as he shall deem necessary to protect or advance the interest of the United States.

(b) Authority delegated. The authority vested in the Secretary of Defense under the Act cited in paragraph (a) of this section has been redelegated to the Secretary of the Army and the Secretary of the Air Force, respectively (Department of Defense Directive 5100.10, dated 16 March 1972).

§ 644.560 Inspections of civilian component training facilities and other properties conveyed subject to conditions.

The DE, within whose areas of military real estate operations are located the facilities conveyed under the authority mentioned in §644.559, will make physical inspections thereof for the purpose of determining compliance with the terms of the conveyance. Any evidence of noncompliance should be reported to DAEN-REM in order that appropriate recommendations may be made to the respective Secretary for corrective action. A detailed statement of the facts and recommendations of the DE should be included in the report. Inspections should be scheduled and integrated with outlease compliance inspection itineraries in the interest of economy. This requirement for inspections extends to properties conveyed by the Secretary of the Army or Air Force under special legislation, where the deed of conveyance imposes conditions on future use of the land. These inspections need not be made annually but frequently enough so that the DE is assured that the conditions are being observed, and at least every three years. Compliance with conditions in deeds for property conveyed for airport purposes under 49 U.S.C. 1723 and 50 App. U.S.C. 1622g is the responsibility of the Secretary of Transportation; for property conveyed for purposes of health and education, the Secretary of Health, Education, and Welfare or its successor agencies (40 U.S.C. 484(k)(4)). The Commander, U.S. Army Materiel Development and Readiness Command, is responsible for compliance with the National Security Clause, and similar conditions, in deeds conveying industrial properties.

§ 644.561 Inspections of civil works properties.

Disposal of real estate interests which impose restrictions on the use of the land, or reserve an estate in the land, will be inspected for compliance on an annual or other reasonable basis to assure compliance.
SUBCHAPTER K—ENVIRONMENTAL QUALITY

PART 651—ENVIRONMENTAL ANALYSIS OF ARMY ACTIONS (AR 200–2)

Subpart A—Introduction

§ 651.1 Purpose.
(a) This part implements the National Environmental Policy Act of 1969 (NEPA), setting forth the Army's policies and responsibilities for the early integration of environmental considerations into planning and decision-making.

651.2 References.
651.3 Explanation of abbreviations and terms.
651.4 Responsibilities.
651.5 Army policies.
651.6 NEPA analysis staffing.
651.7 Delegation of authority for non-acquisition systems.
651.8 Disposition of final documents.

Subpart B—National Environmental Policy Act and the Decision Process

§ 651.9 Introduction.

Subpart C—Records and Documents

§ 651.18 Introduction.

Subpart D—Categorical Exclusions

§ 651.28 Introduction.

Subpart E—Environmental Assessment

§ 651.32 Introduction.

651.37 Public availability.
651.38 Existing environmental assessments.
651.39 Significance.

Subpart F—Environmental Impact Statement

§ 651.40 Introduction.

651.41 Conditions requiring an EIS.
651.42 Actions normally requiring an EIS.
651.43 Format of the EIS.
651.44 Incomplete information.
651.45 Steps in preparing and processing an EIS.
651.46 Existing EISs.

Subpart G—Public Involvement and the Scoping Process

§ 651.47 Public involvement.

651.48 Scoping process.
651.49 Preliminary phase.
651.50 Public interaction phase.
651.51 The final phase.
651.52 Aids to information gathering.
651.53 Modifications of the scoping process.

Subpart H—Environmental Effects of Major Army Action Abroad

651.54 Introduction.
651.55 Categorical exclusions.
651.56 Responsibilities.

APPENDIX B TO PART 651—CATEGORICAL EXCLUSIONS
APPENDIX C TO PART 651—MITIGATION AND MONITORING
APPENDIX D TO PART 651—PUBLIC PARTICIPATION PLAN
APPENDIX E TO PART 651—CONTENT OF THE ENVIRONMENTAL IMPACT STATEMENT
APPENDIX F TO PART 651—GLOSSARY

SOURCE: 67 FR 15291, Mar. 29, 2002, unless otherwise noted.
(b) This part requires environmental analysis of Army actions affecting human health and the environment; providing criteria and guidance on actions normally requiring Environmental Assessments (EAs) or Environmental Impact Statements (EISs), and listing Army actions that are categorically excluded from such requirements, provided specific criteria are met.

(c) This part supplements the regulations of the Council on Environmental Quality (CEQ) in the Code of Federal Regulations (CFR) (40 CFR parts 1500-1508) for Army actions, and must be read in conjunction with them.

(d) All Army acquisition programs must use this part in conjunction with Department of Defense (DOD) 5000.2-R (Mandatory Procedures for Major Defense Acquisition Programs and Major Automated Information Systems).

(e) This part applies to actions of the Active Army and Army Reserve, to functions of the Army National Guard (ARNG) involving federal funding, and to functions for which the Army is the DOD executive agent. It does not apply to Civil Works functions of the US Army Corps of Engineers (USACE) or to combat or combat-related activities in a combat or hostile fire zone. Operations Other Than War (OOTW) or Stability and Support Operations (SASO) are subject to the provisions of this part as specified in subpart H of this part. This part applies to relevant actions within the United States, which is defined as all States; the District of Columbia; territories and possessions of the United States; and all waters and airspace subject to the territorial jurisdiction of the United States. The territories and possessions of the United States include the Virgin Islands, American Samoa, Wake Island, Midway Island, Guam, Palmyra Island, Johnston Atoll, Navassa Island, and Kingman Reef. This regulation also applies to actions in the Commonwealths of Puerto Rico and the Northern Marianas, the Republic of the Marshall Islands, and the Federated States of Micronesia and Palau (Republic of Belau). In addition, this part addresses the responsibility of the Army for the assessment and consideration of environmental effects for peacetime SASO operations worldwide. Throughout this part, emphasis is placed upon quality analysis of environmental effects, not the production of documents. Documentation is necessary to present and staff results of the analyses, but the objective of NEPA and Army NEPA policy is quality analysis in support of the Army decision maker. The term “analysis” also includes any required documentation to support the analysis, coordinate NEPA requirements, and inform the public and the decision maker.

§ 651.2 References.

Required and related publications and referenced forms are listed in Appendix A of this part.

§ 651.3 Explanation of abbreviations and terms.

Abbreviations and special terms used in this part are explained in the glossary in Appendix F of this part.

§ 651.4 Responsibilities.

(a) The Assistant Secretary of the Army (Installations and Environment) (ASA(I&E)). ASA(I&E) is designated by the Secretary of the Army (SA) as the Army’s responsible official for NEPA policy, guidance, and oversight. In meeting these responsibilities, ASA(I&E) will:

1. Maintain liaison with the Office of the Secretary of Defense (OSD), Office of Management and Budget (OMB), Council on Environmental Quality (CEQ), Environmental Protection Agency (EPA), Congressional oversight committees, and other federal, state, and local agencies on Army environmental policies.

2. Review NEPA training at all levels of the Army, including curricula at Army, DOD, other service, other agency, and private institutions; and ensure adequacy of NEPA training of Army personnel at all levels.

3. Establish an Army library for EAs and EISs, which will serve as:

   (i) A means to ascertain adherence to the policies set forth in this part, as well as potential process improvements; and

   (ii) A technical resource for proponents and preparers of NEPA documentation.
(b) The Assistant Secretary of the Army (Acquisition, Logistics, and Technology) (ASA(AL&T)). ASA(AL&T) will:

(1) Under oversight of the ASA(I&E), execute those NEPA policy provisions contained herein that pertain to the ASA(AL&T) responsibilities in the Army materiel development process, as described in Army Regulation (AR) 70–1, Army Acquisition Policy.

(2) Prepare policy for the Army Acquisition Executive (AAE) to develop and administer a process of review and approval of environmental analyses during the Army materiel development process.

(3) Prepare research, development, test, and evaluation (RDT&E) and procurement budget justifications to support Materiel Developer (MATDEV) implementation of NEPA provisions.

(c) The Army Acquisition Executive (AAE). The AAE will, under the Army oversight responsibilities assigned to ASA(I&E):

(1) Administer a process to:

(i) Execute all those NEPA policy provisions contained herein that pertain to all acquisition category (ACAT) programs, projects, and products;

(ii) Ensure that Milestone Decision Authorities (MDAs), at all levels, access the effectiveness of environmental analysis in all phases of the system acquisition process, including legal review of these requirements;

(iii) Establish resource requirements and program, plan, and budget exhibits for inclusion in annual budget decisions;

(iv) Review and approve NEPA documentation at appropriate times during materiel development, in conjunction with acquisition phases and milestone reviews as established in the Acquisition Strategy; and

(v) Establish NEPA responsibility and awareness training requirements for Army Acquisition Corps personnel.

(2) Ensure Program Executive Officers (PEOs), Deputies for Systems Acquisition (DSAs), and direct-reporting Program Managers (PMs) will:

(i) Supervise assigned programs, projects, and products to ensure that each environmental analysis addresses all applicable environmental laws, executive orders, and regulations;

(ii) Ensure that environmental considerations are integrated into system acquisition plans/strategies, Test and Evaluation Master Plans (TEMPS) and Materiel Fielding Plans, Demilitarization/Disposal Plans, system engineering reviews/Integrated Process Team (IPT) processes, and Overarching Integrated Process Team (OIPT) milestone review processes.

(iii) Coordinate environmental analysis with appropriate organizations to include environmental offices such as Army Acquisition Pollution Prevention Support Office (AAPPSO) and U.S. Army Environmental Center (USAEC) and operational offices and organizations such as testers (developmental/operational), producers, users, and disposal offices.

(3) Ensure Program, Project, Product Managers, and other MATDEVS will:

(i) Initiate the environmental analysis process prescribed herein upon receiving the project office charter to commence the materiel development process, and designate a NEPA point of contact (POC) to the Director of Environmental Programs (DEP).

(ii) Integrate the system's environmental analysis (including NEPA) into the system acquisition strategy, milestone review planning, system engineering, and preliminary design, critical design, and production readiness reviews.

(iii) Apply policies and procedures set forth in this part to programs and actions within their organizational and staff responsibility.

(iv) Coordinate with installation managers and incorporate comments and positions of others (such as the Assistant Chief of Staff for Installation Management (ACSIM) and environmental offices of the development or operational testers, producers, users, and disposers) into the decision-making process.

(v) Initiate the analysis of environmental considerations, assess the environmental consequences of proposed programs and projects, and undergo environmental analysis, as appropriate.

(vi) Maintain the administrative record of the program's environmental analysis in accordance with this part.
(vii) Coordinate with local citizens and other affected parties, and incorporate appropriate comments into NEPA analyses.

(viii) Coordinate with ASA(I&E) when NEPA analyses for actions under AAE purview require publication in the Federal Register (FR).

(d) The Deputy Chief of Staff for Operations and Plans (DCSOPS). DCSOPS is the proponent for Training and Operations activities. DCSOPS will ensure that Major Army Commands (MACOMs) support and/or perform, as appropriate, NEPA analysis of fielding issues related to specific local or regional concerns when reviewing Materiel Fielding Plans prepared by Combat Developers (CBTDEVs) or MATDEVs. This duty will include the coordination of CBTDEV and MATDEV information with appropriate MACOMs and Deputy Chief of Staff for Logistics (DCSLOG).

(e) The Assistant Chief of Staff for Installation Management (ACSIM). ACSIM is responsible for coordinating, monitoring, and evaluating NEPA activities within the Army. The Environmental Programs Directorate is the Army Staff (ARSTAF) POC for environmental matters and serves as the Army staff advocate for the Army NEPA requirements contained in this part. The ACSIM will:

1. Encourage environmental responsibility and awareness among Army personnel to most effectively implement the spirit of NEPA.
2. Establish and maintain the capability (personnel and other resources) to comply with the requirements of this part. This responsibility includes the provision of an adequately trained and educated staff to ensure adherence to the policies and procedures specified by this part.

(f) The Director of Environmental Programs. The director, with support of the U.S. Army Environmental Center, and under the ACSIM, will:

1. Advise Army agencies in the preparation of NEPA analyses, upon request.
2. Review, as requested, NEPA analyses submitted by the Army, other DOD components, and other federal agencies.
3. Monitor proposed Army policy and program documents that have environmental implications to determine compliance with NEPA requirements and ensure integration of environmental considerations into decision-making and adaptive management processes.
4. Propose and develop Army NEPA guidance pursuant to policies formulated by ASA(I&E).
5. Advise project proponents regarding support and defense of Army NEPA requirements through the budgeting process.
6. Provide NEPA process oversight, in support of ASA(I&E), and, as appropriate, technical review of NEPA documentation.
7. Oversee program implementation and execution of NEPA requirements, and develop and execute programs and initiatives to address problem areas.
8. Assist the ASA(I&E) in the evaluation of formal requests for the delegation of NEPA responsibilities on a case-by-case basis. This assistance will include:
   1. Determination of technical sufficiency of the description of proposed action and alternatives (DOPAA) when submitted as part of the formal delegation request (§651.7).
   2. Coordination of the action with the MACOM requesting the delegation.
9. Periodically provide ASA(I&E) with a summary analysis and recommendations on needed improvements in policy and guidance to Army activities concerning NEPA implementation, in support of ASA(I&E) oversight responsibilities.
10. Advise headquarters proponents on how to secure funding and develop programmatic NEPA analyses to address actions that are Army-wide, where a programmatic approach would be appropriate to address the action.
11. Designate a NEPA PM to coordinate the Army NEPA program and notify ASA(I&E) of the designation.
12. Maintain manuals and guidance for NEPA analyses for major Army programs in hard copy and make this guidance available on the World Wide Web (WWW) and other electronic means.
13. Maintain a record of NEPA POCs in the Army, as provided by the MACOMs and other Army agencies.
(14) Forward electronic copies of all EAs, and EISs to AEC to ensure inclusion in the Army NEPA library; and ensure those same documents are forwarded to the Defense Technical Information Center (DTIC).

(g) **Heads of Headquarters, Army agencies.** The heads of headquarters, Army agencies will:

1. Apply policies and procedures herein to programs and actions within their staff responsibility except for state-funded operations of the Army National Guard (ARNG).
2. Task the appropriate component with preparation of NEPA analyses and documentation.
3. Initiate the preparation of necessary NEPA analyses, assess proposed programs and projects to determine their environmental consequences, and initiate NEPA documentation for circulation and review along with other planning or decision-making documents. These other documents include, as appropriate, completed DD Form 1391 (Military Construction Project Data), Case Study and Justification Folders, Acquisition Strategies, and other documents proposing or supporting proposed programs or projects.
4. Coordinate appropriate NEPA analyses with ARSTAF agencies.
5. Designate, record, and report to the DEP the identity of the agency’s single POC for NEPA considerations.
6. Assist in the review of NEPA documentation prepared by DOD and other Army or federal agencies, as requested.
7. Coordinate proposed directives, instructions, regulations, and major policy publications that have environmental implications with the DEP.
8. Maintain the capability (personnel and other resources) to comply with the requirements of this part and include provisions for NEPA requirements through the Program Planning and Budget Execution System (PPBES) process.

(h) **The Assistant Secretary of the Army for Financial Management (ASA(FM)).** ASA(FM) will establish procedures to support in annual authorization requests.

(i) **The Judge Advocate General (TJAG).** TJAG will provide legal advice to the Army Staff and assistance in NEPA interpretation, federal implementing regulations, and other applicable legal authority; determine the legal sufficiency for Army NEPA documentation; and interface with the Army General Counsel (GC) and the Department of Justice on NEPA-related litigation.

(j) **The Army General Counsel.** The Army General Counsel will provide legal advice to the Secretary of the Army on all environmental matters, to include interpretation and compliance with NEPA and federal implementing regulations and other applicable legal authority.

(k) **The Surgeon General.** The Surgeon General will provide technical expertise and guidance to NEPA proponents in the Army, as requested, in order to assess public health, industrial hygiene, and other health aspects of proposed programs and projects.

1. **The Chief, Public Affairs.** The Chief, Public Affairs will:
   1. Provide guidance on issuing public announcements such as Findings of No Significant Impact (FNSIs), Notices of Intent (NOIs), scoping procedures, Notices of Availability (NOAs), and other public involvement activities; and establish Army procedures for issuing/announcing releases in the FR.
   2. Review and coordinate planned announcements on actions of national interest with appropriate ARSTAF elements and the Office of the Assistant Secretary of Defense for Public Affairs (OASD(PA)).
   3. Assist in the issuance of appropriate press releases to coincide with the publication of notices in the FR.
   4. Provide assistance to MACOM and installation Public Affairs Officers (PAOs) regarding the development and release of public involvement materials.

(m) **The Chief of Legislative Liaison.** The Chief of Legislative Liaison will notify Members of Congress of impending proposed actions of national concern or interest. The Chief will:

1. Provide guidance to proponents at all levels on issuing Congressional notifications on actions of national concern or interest.
2. Review planned congressional notifications on actions of national concern or interest.
(3) Prior to (and in concert with) the issuance of press releases and publications in the FR, assist in the issuance of congressional notifications on actions of national concern or interest.

(n) Commanders of MACOMs, the Director of the Army National Guard, and the U.S. Army Reserve Commander. Commanders of MACOMs, the Director of the Army National Guard, and the U.S. Army Reserve Commander will:

(1) Monitor proposed actions and programs within their commands to ensure compliance with this part, including mitigation monitoring, utilizing Environmental Compliance Assessment System (ECAS), Installation Status Report (ISR), or other mechanisms.

(2) Task the proponent of the proposed action with funding and preparation of NEPA documentation and involvement of the public.

(3) Ensure that any proponent at the MACOM level initiates the required environmental analysis early in the planning process, plans the preparation of necessary NEPA documentation, and uses the analysis to aid in the final decision.

(4) Assist in the review of NEPA documentation prepared by DOD and other Army or federal agencies, as requested.

(5) Maintain official record copies of all NEPA documentation for which they are the proponent, and file electronic copies of those EAs, and final EISs with AEC.

(6) Provide coordination with Headquarters, Department of the Army (HQDA) for proposed actions that have either significant impacts requiring an EIS or are of national interest. This process will require defining the purpose and need for the action, alternatives to be considered, and other information, as requested by HQDA. It also must occur early in the process and prior to an irretrievable commitment of resources that will prejudice the ultimate decision or selection of alternatives (40 CFR 1506.1). When delegated signature authority by HQDA, this process also includes the responsibility for complying with this part and associated Army environmental policy.

(7) Approve and forward NEPA documentation, as appropriate, for actions under their purview.

(8) In the case of the Director, ARNG, or his designee, approve all federal NEPA documentation prepared by all ARNG activities.

(9) Ensure environmental information received from MATDEVs is provided to appropriate field sites to support site-specific environmental analysis and NEPA requirements.

(10) Designate a NEPA PM to coordinate the MACOM NEPA program and maintain quality control of NEPA analyses and documentation that are processed through the command.

(11) Budget for resources to maintain oversight of NEPA and this part.

(o) Installation Commanders; Commanders of U.S. Army Reserve Support Commands; and The Adjutant Generals of the Army National Guard will:

(1) Establish an installation (command organization) NEPA program and evaluate its performance through the Environmental Quality Control Committee (EQCC) as required by AR 200–1, Environmental Protection and Enhancement.

(2) Designate a NEPA POC to coordinate and manage the installation’s (command organization’s) NEPA program, integrating it into all activities and programs at the installation. The installation commander will notify the MACOM of the designation.

(3) Establish a process that ensures coordination with the MACOM, other installation staff elements (to include PAOs and tenants) and others to incorporate NEPA requirements early in the planning of projects and activities.

(4) Ensure that actions subject to NEPA are coordinated with appropriate installation organizations responsible for such activities as master planning, natural and cultural resources management, or other installation activities and programs.

(5) Ensure that funding for environmental analysis is prioritized and planned, or otherwise arranged by the proponent, and that preparation of NEPA analyses, including the involvement of the public, is consistent with the requirements of this part.
(6) Approve NEPA analyses for actions under their purview. The Adjutant General will review and endorse documents and forward to the NGB for final approval.

(7) Ensure the proponent initiates the NEPA analysis of environmental consequences and assesses the environmental consequences of proposed programs and projects early in the planning process.

(8) Assist in the review of NEPA analyses affecting the installation or activity, and those prepared by DOD and other Army or federal agencies, as requested.

(9) Provide information through the chain of command on proposed actions of national interest to higher headquarters prior to initiation of NEPA documentation.

(10) Maintain official record copies of all NEPA documentation for which they are the proponent and forward electronic copies of those final EISs and EAs through the MACOM to AEC.

(11) Ensure that the installation proponents initiate required environmental analyses early in the planning process and plan the preparation of necessary NEPA documentation.

(12) Ensure NEPA awareness and/or training is provided for professional staff, installation-level proponents, and document reviewers (for example, master planning, range control, etc.).

(13) Solicit support from MACOMs, CBTDEVs, and MATDEVs, as appropriate, in preparing site-specific environmental analysis.

(14) Ensure that local citizens are aware of and, where appropriate, involved in NEPA analyses, and that public comments are obtained and considered in decisions regarding proposals.

(15) Use environmental impact analyses to determine the best alternatives from an environmental perspective, and to ensure that these determinations are part of the Army decision process.

(p) Environmental Officers. Environmental officers (at the Installation, MACOM, and Army activity level) shall, under the authority of the Installation Commander: Commanders of U.S. Army Reserves Regional Support Commands; and Director NGB-ARE (Installation Commanders):

(1) Represent the Installation, MACOM, or activity Commander on NEPA matters.

(2) Advise the proponent on the selection, preparation, and completion of NEPA analyses and documentation. This approach will include oversight on behalf of the proponent to ensure adequacy and support for the proposed action, including mitigation monitoring.

(3) Develop and publish local guidance and procedures for use by NEPA proponents to ensure that NEPA documentation is procedurally and technically correct. (This includes approval of Records of Environmental Consideration (RECs).)

(4) Identify any additional environmental information needed to support informed Army decision-making.

(5) Budget for resources to maintain oversight with NEPA and this part.

(6) Assist proponents, as necessary, to identify issues, impacts, and possible alternatives and/or mitigations relevant to specific proposed actions.

(7) Assist, as required, in monitoring to ensure that specified mitigation measures in NEPA analyses are accomplished. This monitoring includes assessing the effectiveness of the mitigations.

(8) Ensure completion of agency and community coordination.

(q) Proponents. Proponents at all levels will:

(1) Identify the proposed action, the purpose and need, and reasonable alternatives for accomplishing the action.

(2) Fund and prepare NEPA analyses and documentation for their proposed actions. This responsibility will include negotiation for matrix support and services outside the chain of command when additional expertise is needed to prepare, review, or otherwise support the development and approval of NEPA analyses and documentation. These NEPA costs may be borne by successful contract offerors.

(3) Ensure accuracy and adequacy of NEPA analyses, regardless of the author. This work includes incorporation of comments from appropriate servicing Army environmental and legal staffs.
(4) Ensure adequate opportunities for public review and comment on proposed NEPA actions, in accordance with applicable laws and EOs as discussed in §651.14(e). This step includes the incorporation of public and agency input into the decision-making process.

(5) Ensure that NEPA analysis is prepared and staffed sufficiently to comply with the intent and requirements of federal laws and Army policy. These documents will provide enough information to ensure that Army decision makers (at all levels) are informed in the performance of their duties (40 CFR 1501.2, 1505.1). This result requires coordination and resolution of important issues developed during the environmental analysis process, especially when the proposed action may involve significant environmental impacts, and includes the incorporation of comments from an affected installation’s environmental office in recommendations made to decision makers.

(6) Adequately fund and implement the decision including all mitigation actions and effectiveness monitoring.

(7) Prepare and maintain the official record copy of all NEPA analyses and documentation for which they are the proponent. This step will include the provision of electronic copies of all EAs, final EISs, and Records of Decision (RODs), through their chain of command, to AEC, and forwarding of those same documents to the Defense Technical Information Center (DTIC) as part of their public distribution procedures. In addition, copies of all EAs and FNSIs (in electronic copy) will be provided to ODEP. A copy of the documentation should be maintained for six years after signature of the FNSI/ROD.

(8) Maintain the administrative record for the environmental analysis performed. The administrative record shall be retained by the proponent for a period of six years after completion of the action, unless the action is controversial or of a nature that warrants keeping it longer. The administrative record includes all documents and information used to make the decision. This administrative record should contain, but is not limited to, the following types of records:

(i) Technical information used to develop the description of the proposed action, purpose and need, and the range of alternatives.

(ii) Studies and inventories of affected environmental baselines.

(iii) Correspondence with regulatory agencies.

(iv) Correspondence with, and comments from, private citizens, Native American tribes, Alaskan Natives, local governments, and other individuals and agencies contacted during public involvement.

(v) Maps used in baseline studies.

(vi) Maps and graphics prepared for use in the analysis.

(vii) Affidavits of publications and transcripts of any public participation.

(viii) Other written records that document the preparation of the NEPA analysis.

(ix) An index or table of contents for the administrative record.

(9) Identify other requirements that can be integrated and coordinated within the NEPA process. After doing so, the proponent should establish a strategy for concurrent, not sequential, compliance; sharing similar data, studies, and analyses; and consolidating opportunities for public participation. Examples of relevant statutory and regulatory processes are given in §651.14(e).

(10) Identify and coordinate with public agencies, private organizations, and individuals that may have an interest in or jurisdiction over a resource that might be impacted. Coordination should be accomplished in cooperation with the Installation Environmental Offices in order to maintain contact and continuity with the regulatory and environmental communities. Applicable agencies include, but are not limited to:

(i) State Historic Preservation Officer.

(ii) Tribal Historic Preservation Officer.

(iii) U.S. Fish and Wildlife Service.

(iv) Regional offices of the EPA.

(v) State agencies charged with protection of the environment, natural resources, and fish and wildlife.

(vi) USACE Civil Works regulatory functions, including Clean Water Act, Section 404, permitting and wetland protection.
Department of the Army, DoD

§ 651.5 Army policies.

(a) NEPA establishes broad federal policies and goals for the protection of the environment and provides a flexible framework for balancing the need for environmental quality with other essential societal functions, including national defense. The Army is expected to manage those aspects of the environment affected by Army activities; comprehensively integrating environmental policy objectives into planning and decision-making. Meaningful integration of environmental considerations is accomplished by efficiently and effectively informing Army planners and decision makers. The Army will use the flexibility of NEPA to ensure implementation in the most cost-efficient and effective manner. The

(vii) National Marine Fisheries Service.

(viii) Local agencies and/or governing bodies.

(ix) Environmental interest groups.

(x) Minority, low-income, and disabled populations.

(xi) Tribal governments.

(xii) Existing advisory groups (for example, Restoration Advisory Boards, Citizens Advisory Commissions, etc.).

(11) Identify and coordinate, in concert with environmental offices, proposed actions and supporting environmental analyses with local and/or regional ecosystem management initiatives such as the Mojave Desert Ecosystem Management Initiative or the Chesapeake Bay Initiative.

(12) Review Army policies, including AR 200–1 (Environmental Protection and Enhancement), AR 200–3 (Natural Resources—Land, Forest, and Wildlife Management), and AR 200–4 (Cultural Resources Management) to ensure that the proposed action is coordinated with appropriate resource managers, operators, and planners, and is consistent with existing Army plans and their supporting NEPA analyses.

(13) Identify potential impacts to (and consult with as appropriate) American Indian, Alaskan Native, or Native Hawaiian lands, resources, or cultures (for example, sacred sites, traditional cultural properties, treaty rights, subsistence hunting or fishing rights, or cultural items subject to the Native American Graves Protection and Repatriation Act (NAGPRA)). All consultation shall be conducted on a Government-to-Government basis in accordance with the Presidential Memorandum on Government-to-Government Relations with Tribal Governments (April 29, 1994) (3 CFR, 1994 Comp., p. 1007) and AR 200–4 (Cultural Resources Management). Proponents shall consider, as appropriate, executing Memoranda of Agreements (MOAs) with interested Native American groups and tribes to facilitate timely and effective participation in the NEPA process. These agreements should be accomplished in cooperation with Installation Environmental Offices in order to maintain contact and continuity with the regulatory and environmental communities.

(14) Review NEPA documentation that relies upon mitigations that were not accomplished to determine if the NEPA analysis needs to be rewritten or updated. Such an update is required if the unaccomplished mitigation was used to support a FNSI. Additional public notice/involvement must accompany any rewrites.

(r) The Commander, U.S. Army Training and Doctrine Command (TRADOC). The Commander, TRADOC will:

(1) Ensure that NEPA requirements are understood and options incorporated in the Officer Foundation Standards (OFS).

(2) Integrate environmental considerations into doctrine, training, leader development, organization, materiel, and soldier (DTLOMS) processes.

(3) Include environmental expert representation on all Integrated Concept Teams (ICTs) involved in requirements determinations.

(4) Ensure that TRADOC CBTDEVs retain and transfer any environmental analysis or related data (such as alternatives analysis) to the MATDEV upon approval of a materiel need. This information and data will serve as the basis for the MATDEV’s Acquisition Strategy and subsequent NEPA analyses.

(5) Ensure that environmental considerations are incorporated into the Mission Needs Statements (MNSs) and Operational Requirements Documents (ORDs).

§ 651.5 Army policies.

(a) NEPA establishes broad federal policies and goals for the protection of the environment and provides a flexible framework for balancing the need for environmental quality with other essential societal functions, including national defense. The Army is expected to manage those aspects of the environment affected by Army activities; comprehensively integrating environmental policy objectives into planning and decision-making. Meaningful integration of environmental considerations is accomplished by efficiently and effectively informing Army planners and decision makers. The Army will use the flexibility of NEPA to ensure implementation in the most cost-efficient and effective manner. The
§ 651.5  
32 CFR Ch. V (7–1–13 Edition)

(depth of analyses and length of documents will be proportionate to the nature and scope of the action, the complexity and level of anticipated effects on important environmental resources, and the capacity of Army decisions to influence those effects in a productive, meaningful way from the standpoint of environmental quality.

(b) The Army will actively incorporate environmental considerations into informed decision-making, in a manner consistent with NEPA. Communication, cooperation, and, as appropriate, collaboration between government and extra-government entities is an integral part of the NEPA process. Army proponents, participants, reviewers, and approvers will balance environmental concerns with mission requirements, technical requirements, economic feasibility, and long-term sustainability of Army operations. While carrying out its mission, the Army will also encourage the wise stewardship of natural and cultural resources for future generations. Decision makers will be cognizant of the impacts of their decisions on cultural resources, soils, forests, rangelands, water and air quality, fish and wildlife, and other natural resources under their stewardship, and, as appropriate, in the context of regional ecosystems.

(c) Environmental analyses will reflect appropriate consideration of non-statutory environmental issues identified by federal and DOD orders, directives, and policy guidance. Some examples are in § 651.14 (e). Potential issues will be discussed and critically evaluated during scoping and other public involvement processes.

(d) The Army will continually take steps to ensure that the NEPA program is effective and efficient. Effectiveness of the program will be determined by the degree to which environmental considerations are included on a par with the military mission in project planning and decision-making. Efficiency will be promoted through the following:

(1) Awareness and involvement of the proponent in the NEPA process.

(2) NEPA technical and awareness training, as appropriate, at all decision levels of the Army.

(3) Where appropriate, the use of programmatic analyses and tiering to ensure consideration at the appropriate decision levels, elimination of repetitive discussion, consideration of cumulative effects, and focus on issues that are important and appropriate for discussion at each level.

(4) Use of the scoping and public involvement processes to limit the analysis of issues to those which are of interest to the public and/or important to the decision-making at hand.

(5) Elimination of needless paperwork by focusing documents on the major environmental issues affecting those decisions.

(6) Early integration of the NEPA process into all aspects of Army planning, so as to prevent disruption in the decision-making process; ensuring that NEPA personnel function as team members, supporting the Army planning process and sound Army decision-making. All NEPA analyses will be prepared by an interdisciplinary team.

(7) Partnering or coordinating with agencies, organizations, and individuals whose specialized expertise will improve the NEPA process.

(8) Oversight of the NEPA program to ensure continuous process improvement. NEPA requirements will be integrated into other environmental reporting requirements, such as the ISR.

(9) Clear and concise communication of data, documentation, and information relevant to NEPA analysis and documentation.

(10) Environmental analysis of strategic plans based on:

(i) Scoping thoroughly with agencies, organizations, and the public;

(ii) Setting specific goals for important environmental resources;

(iii) Monitoring of impacts to these resources;

(iv) Reporting of monitoring results to the public; and

(v) Adaptive management of Army operations to stay on course with the strategic plan’s specific resource goals.

(11) Responsive staffing through HQDA and the Secretariat. To the extent possible, documents and transmittal packages will be acted upon within 30 calendar days of receipt by each office through which they are staffed. These actions will be approved
and transmitted, if the subject material is adequate; or returned with comment in those cases where additional work is required. Cases where these policies are violated should be identified to ASA (I&E) for resolution.

(e) Army leadership and commanders at all levels are required to:

(1) Establish and maintain the capability (personnel and other resources) to ensure adherence to the policies and procedures specified by this part. This should include the use of the PPBEs, EPR, and other established resourcing processes. This capability can be provided through the use of a given mechanism or mix of mechanisms (contracts, matrix support, and full-time permanent (FTP) staff), but sufficient FTP staff involvement is required to ensure:

(i) Army cognizance of the analyses and decisions being made; and

(ii) Sufficient institutional knowledge of the NEPA analysis to ensure that Army NEPA responsibilities (pre- and post-decision) are met. Every person preparing, implementing, supervising, and managing projects involving NEPA analysis must be familiar with the requirements of NEPA and the provisions of this part.

(2) Ensure environmental responsibility and awareness among personnel to most effectively implement the spirit of NEPA. All personnel who are engaged in any activity or combination of activities that significantly affect the quality of the human environment will be aware of their NEPA responsibility. Only through alertness, foresight, notification through the chain of command, and training and education will NEPA goals be realized.

(f) The worldwide, transboundary, and long-range character of environmental problems will be recognized, and, where consistent with national security requirements and U.S. foreign policy, appropriate support will be given to initiatives, resolutions, and programs designed to maximize international cooperation in protecting the quality of the world human and natural environment. Consideration of the environment for Army decisions involving activities outside the United States (see §651.1(e)) will be accomplished pursuant to Executive Order 12114 (Environmental Effects Abroad of Major Federal Actions, 4 January 1979), host country final governing standards, DOD Directive (DODD) 6050.7 (Environmental Effects Abroad of Major DOD Actions), DOD Instructions (DODIs), and the requirements of this part. An environmental planning and evaluation process will be incorporated into Army actions that may substantially affect the global commons, environments of other nations, or any protected natural or ecological resources of global importance.

(g) Army NEPA documentation must be periodically reviewed for adequacy and completeness in light of changes in project conditions.

(1) Supplemental NEPA documentation is required when:

(i) The Army makes substantial changes in the proposed action that are relevant to environmental concerns; or

(ii) There are significant new circumstances or information relevant to environmental concerns and bearing on the proposed action or its impact.

(2) This review requires that the proponent merely initiate another “hard look” to ascertain the adequacy of the previous analyses and documentation in light of the conditions listed in paragraph (g)(1) of this section. If this review indicates no need for new or supplemental documentation, a REC can be produced in accordance with this part. Proponents are required to periodically review relevant existing NEPA analyses to ascertain the need for supplemental documentation and document this review in a REC format.

(h) Contractors frequently prepare EISs and EAs. To obtain unbiased analyses, contractors must be selected in a manner avoiding any conflict of interest. Therefore, contractors will execute disclosure statements specifying that they have no financial or other interest in the outcome of the project. The contractor’s efforts should be closely monitored throughout the contract to ensure an adequate assessment/statement and also avoid extensive, time-consuming, and costly analyses or revisions. Project proponents and NEPA program managers must be continuously informed and involved.
§651.5  32 CFR Ch. V (7–1–13 Edition)

(i) When appropriate, NEPA analyses will reflect review for operations security principles and procedures, described in AR 530–1 (Operations Security (OPSEC)), on the cover sheet or signature page.

(j) Environmental analyses and associated investigations are advanced project planning, and will be funded from sources other than military construction (MILCON) funds. Operations and Maintenance Army (OMA), Operations and Maintenance, Army Reserve (OMAR), and Operations and Maintenance, Army National Guard (OMANG), RDT&E, or other operating funds are the proper sources of funds for such analysis and documentation. Alternative Environmental Compliance Achievement Program (non-ECAP) funds will be identified for NEPA documentation, monitoring, and other required studies as part of the MILCON approval process.

(k) Costs of design and construction mitigation measures required as a direct result of MILCON projects will be paid from MILCON funds, which will be included in the cost estimate and description of work on DD Form 1391, Military Construction Project Data.

(l) Response actions implemented in accordance with the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) or the Resource Conservation and Recovery Act (RCRA) are not legally subject to NEPA and do not require separate NEPA analysis. As a matter of Army policy, CERCLA and RCRA analysis and documentation should incorporate the values of NEPA and:

(1) Establish the scope of the analysis through full and open public participation;

(2) Analyze all reasonable alternative remedies, evaluating the significance of impacts resulting from the alternatives examined; and

(3) Consider public comments in the selection of the remedy. The decision maker shall ensure that issues involving substantive environmental impacts are addressed by an interdisciplinary team.

(m) MATDEVs, scientists and technologists, and CBTDEVs are responsible for ensuring that their programs comply with NEPA as directed in this part.

(1) Prior to assignment of a MATDEV to plan, execute, and manage a potential acquisition program, CBTDEVs will retain environmental analyses and data from requirements determination activities, and Science and Technology (S&T) organizations will develop and retain data for their technologies. These data will transition to the MATDEV upon assignment to plan, execute, and manage an acquisition program. These data (collected and produced), as well as the decisions made by the CBTDEVs, will serve as a foundation for the environment, safety, and health (ESH) evaluation of the program and the incorporation of program-specific NEPA requirements into the Acquisition Strategy. Programmatic ESH evaluation is considered during the development of the Acquisition Strategy as required by DOD 5000.2–R for all ACAT programs. Programmatic ESH evaluation is not a NEPA document. It is a planning, programming, and budgeting strategy into which the requirements of this part are integrated. Environmental analysis must be a continuous process throughout the materiel development program. During this continuous process, NEPA analysis and documentation may be required to support decision-making prior to any decision that will prejudice the ultimate decision or selection of alternatives (40 CFR 1506.1). In accordance with DOD 5000.2.R, the MATDEV is responsible for environmental analysis of acquisition lifecycle activities (including disposal). Planning to accomplish these responsibilities will be included in the appropriate section of the Acquisition Strategy.

(2) MATDEVs are responsible for the documentation regarding general environmental effects of all aspects of the system (including operation, fielding, and disposal) and the specific effects for all activities for which he/she is the proponent.

(3) MATDEVs will include, in their Acquisition Strategy, provisions for developing and supplementing their NEPA analyses and documentation,
§ 651.6 NEPA analysis staffing.

(a) NEPA analyses will be prepared by the proponent using appropriate resources (funds and manpower). The proponent, in coordination with the appropriate NEPA program manager, shall determine what proposal requires NEPA analysis, when to initiate NEPA analysis, and what level of NEPA analysis is initially appropriate. The proponent shall remain intimately involved in determining appropriate milestones, timelines, and inputs required for the successful conduct of the NEPA process, including the use of scoping to define the breadth and depth of analysis required. In cases where the document addresses impacts to an environment whose management is not in the proponents’ chain of command (for example, installation management of a range for MATDEV testing or installation management of a fielding location), the proponent shall coordinate the analysis and preparation of the document and identify the resources needed for its preparation and staffing through the command structure of that affected activity.

(b) The approving official is responsible for approving NEPA documentation and ensuring completion of the action, including any mitigation actions needed. The approving official may be an installation commander; or, in the case of combat/materiel development, the MATDEV, MDA, or AAE.

(c) Approving officials may select a lead reviewer for NEPA analysis before approving it. The lead reviewer will determine and assemble the personnel needed for the review process. Funding needed to accomplish the review shall be negotiated with the proponent, if required. Lead reviewer may be an installation EC or a NEPA POC designated by an MDA for a combat/materiel development program.

(d) The most important document is the initial NEPA document (draft EA or draft EIS) being processed. Army reviewers are accountable for ensuring thorough early review of draft NEPA analyses. Any organization that raises new concerns or comments during final staffing will explain why issues were not raised earlier. NEPA analyses requiring public release in the FR will be forwarded to ASA(I&E), through the
§ 651.7 Delegation of authority for non-acquisition systems.

(a) MACOMs can request delegation authority and responsibility for an EA of national concern or an EIS from ASA(I&E). The proponent, through the appropriate chain of command, and with the concurrence of environmental offices, forwards to HQDA (ODEP) the request to propose, prepare, and finalize an EA and FNSI or EIS through the ROD stage. The request must include, at a minimum, the following:

(1) A description of the purpose and need for the action.
(2) A description of the proposed action and a preliminary list of alternatives to that proposed action, including the "no action" alternative. This constitutes the DOPAA.
(3) An explanation of funding requirements, including cost estimates, and how they will be met.
(4) A brief description of potential issues of concern or controversy, including any issues of potential Army-wide impact.
(5) A plan for scoping and public participation.
(6) A timeline, with milestones for the EIS action.
(b) If granted, a formal letter will be provided by ASA(I&E) outlining extent, conditions, and requirements for the NEPA action. Only the ASA(I&E) can delegate this authority and responsibility. When delegated signature authority by HQDA, the MACOM will be responsible for complying with this part and associated Army environmental policy. This delegation, at the discretion of ASA(I&E), can include specific authority and responsibility for coordination and staffing of:
(1) EAs and FNSIs, and associated transmittal packages, as specified in §651.35(c).
(2) NOIs, Preliminary Draft EISs (PDEISs), Draft EISs (DEISs), Final EISs (FEISs), RODs and all associated transmittal packages as specified in §651.45. Such delegation will specify requirements for coordination with ODEP and ASA (I&E).

§ 651.8 Disposition of final documents.

All NEPA documentation and supporting administrative records shall be retained by the proponent’s office for a minimum of six years after signature of the FNSI/ROD or the completion of the action, whichever is greater. Copies of EAs, and final EISs will be forwarded to AEC for cataloging and retention in the Army NEPA library. The DEIS and FEIS will be retained until the proposed action and any mitigation program is complete or the information therein is no longer valid. The ACSIM shall forward copies of all FEISs to DTIC, the National Archives, and Records Administration.
§ 651.9 Introduction.

(a) The NEPA process is the systematic examination of possible and probable environmental consequences of implementing a proposed action. Integration of the NEPA process with other Army projects and program planning must occur at the earliest possible time to ensure that:

(1) Planning and decision-making reflect Army environmental values, such as compliance with environmental policy, laws, and regulations; and that these values are evident in Army decisions. In addition, Army decisions must reflect consideration of other requirements such as Executive Orders and other non-statutory requirements, examples of which are enumerated in §651.14(e).

(2) Army and DOD environmental policies and directives are implemented.

(3) Delays and potential conflicts in the process are minimized. The public should be involved as early as possible to avoid potential delays.

(b) All Army decision-making that may impact the human environment will use a systematic, interdisciplinary approach that ensures the integrated use of the natural and social sciences, planning, and the environmental design arts (section 102(2)(a), Public Law 91–190, 83 Stat. 852, National Environmental Policy Act of 1969 (NEPA)). This approach allows timely identification of environmental effects and values in sufficient detail for concurrent evaluation with economic, technical, and mission-related analyses, early in the decision process.

(c) The proponent of an action or project must identify and describe the range of reasonable alternatives to accomplish the purpose and need for the proposed action or project, taking a “hard look” at the magnitude of potential impacts of implementing the reasonable alternatives, and evaluating their significance. To assist in identifying reasonable alternatives, the proponent should consult with the installation environmental office and appropriate federal, tribal, state, and local agencies, and the general public.

§ 651.10 Actions requiring environmental analysis.

The general types of proposed actions requiring environmental impact analysis under NEPA, unless categorically excluded or otherwise included in existing NEPA documentation, include:

(a) Policies, regulations, and procedures (for example, Army and installation regulations).

(b) New management and operational concepts and programs, including logistics; RDT&E; procurement; personnel assignment; real property and facility management (such as master plans); and environmental programs such as Integrated Natural Resource Management Plan (INRMP), Integrated Cultural Resources Management Plan (ICRMP), and Integrated Pest Management Plan. NEPA requirements may be incorporated into other Army plans in accordance with 40 CFR 1506.4.

(c) Projects involving facilities construction.

(d) Operations and activities including individual and unit training, flight operations, overall operation of installations, or facility test and evaluation programs.

(e) Actions that require licenses for operations or special material use, including a Nuclear Regulatory Commission (NRC) license, an Army radiation authorization, or Federal Aviation Administration air space request (new, renewal, or amendment), in accordance with AR 95–50.

(f) Materiel development, operation and support, disposal, and/or modification as required by DOD 5000.2–R.

(g) Transfer of significant equipment or property to the ARNG or Army Reserve.

(h) Research and development including areas such as genetic engineering, laser testing, and electromagnetic pulse generation.

(i) Leases, easements, permits, licenses, or other entitlement for use, to include donation, exchange, barter, or Memorandum of Understanding (MOU). Examples include grazing leases, grants of easement for highway right-of-way, and requests by the public to
use land for special events such as air shows or carnivals.

(j) Federal contracts, grants, subsidies, loans, or other forms of funding such as Government-Owned, Contractor-Operated (GOCO) industrial plants or housing and construction via third-party contracting.

(k) Request for approval to use or store materials, radiation sources, hazardous and toxic material, or wastes on Army land. If the requester is non-Army, the responsibility to prepare proper environmental documentation may rest with the non-Army requester, who will provide needed information for Army review. The Army must review and adopt all NEPA documentation before approving such requests.

(l) Projects involving chemical weapons/munitions.

§ 651.11 Environmental review categories.

The following are the five broad categories into which a proposed action may fall for environmental review:

(a) Exemption by law. The law must apply to DOD and/or the Army and must prohibit, exempt, or make impossible full compliance with the procedures of NEPA (40 CFR 1506.11). While some aspects of Army decision-making may be exempted from NEPA, other aspects of an action are still subject to NEPA analysis and documentation. The fact that Congress has directed the Army to take an action does not constitute an exemption.

(b) Emergencies. In the event of an emergency, the Army will, as necessary, take immediate actions that have environmental impacts, such as those to promote national defense or security or to protect life or property, without the specific documentation and procedural requirements of other sections of this part. In such cases, at the earliest practicable time, the HQDA proponent will notify the ODEP, which in turn will notify the ASA(I&E). ASA(I&E) will coordinate with the Deputy Under Secretary of Defense for Installations and Environment (DUSD(IE)) and the CEQ regarding the emergency and subsequent NEPA compliance after the emergency action has been completed. These notifications apply only to actions necessary to control the immediate effects of the emergency. Other actions remain subject to NEPA review (40 CFR 1506.11). A public affairs plan should be developed to ensure open communication among the media, the public, and the installation. The Army will not delay an emergency action necessary for national defense, security, or preservation of human life or property in order to comply with this part or the CEQ regulations. However, the Army’s on-site commander dealing with the emergency will consider the probable environmental consequences of proposed actions, and will minimize environmental damage to the maximum degree practicable, consistent with protecting human life, property, and national security. State call-ups of ARNG during a natural disaster or other state emergency are excluded from this notification requirement. After action reports may be required at the discretion of the ASA(I&E).

(c) Categorical Exclusions (CXs). These are categories of actions that normally do not require an EA or an EIS. The Army has determined that they do not individually or cumulatively have a substantial effect on the human environment. Qualification for a CX is further described in subpart D and appendix B of this part. In accordance with §651.29, actions that degrade the existing environment or are environmentally controversial or adversely affect environmentally sensitive resources will require an EA.

(d) Environmental Assessment. Proposed Army actions not covered in the first three categories (paragraphs (a) through (c) of this section) must be analyzed to determine if they could cause significant impacts to the human or natural environment (see §651.39). The EA determines whether possible impacts are significant, thereby warranting an EIS. This requires a “hard look” at the magnitude of potential impacts, evaluation of their significance, and documentation in the form of either an NOI to prepare an EIS or a FNSI. The format (§651.34) and requirements for this analysis are addressed in subpart E of this part (see §651.33 for actions normally requiring an EA).
EA is a valuable planning tool to discuss and document environmental impacts, alternatives, and controversial actions, providing public and agency participation, and identifying mitigation measures.

(e) EIS. When an action clearly has significant impacts or when an EA cannot be concluded by a FNSI, an EIS must be prepared. An EIS is initiated by the NOI (§651.22), and will examine the significant environmental effects of the proposed action as well as accompanying measures to mitigate those impacts. This process requires formal interaction with the public, a formal “scoping” process, and specified timelines for public review of the documentation and the incorporation of public comments. The format and requirements for the EIS are addressed in subpart F of this part (see §651.42 for actions normally requiring an EIS).

§ 651.12 Determining appropriate level of NEPA analysis.
(a) The flow chart shown in Figure 1 summarizes the process for determining documentation requirements, as follows:
(1) If the proposed action qualifies as a CX (subpart D of this part), and the screening criteria are met (§651.29), the action can proceed. Some CXs require a REC.

(2) If the proposed action is adequately covered within an existing EA or EIS, a REC is prepared to that effect. The REC should state the applicable EA or EIS title and date, and identify where it may be reviewed (§651.19, Figure 3). The REC is then attached to the proponent’s record copy of that EA or EIS.

(3) If the proposed action is within the general scope of an existing EA or EIS, a REC is prepared to that effect. The REC should state the applicable EA or EIS title and date, and identify where it may be reviewed (§651.19, Figure 3). The REC is then attached to the proponent’s record copy of that EA or EIS.
EIS, but requires additional information, a supplement is prepared, considering the new, modified, or missing information. Existing documents are incorporated by reference and conclusions are published as either a FNSI or NOI to supplement the EIS.

(4) If the proposed action is not covered adequately in any existing EA or EIS, or if is of a significantly larger scope than that described in the existing document, an EA is prepared, followed by either a FNSI or NOI to prepare an EIS. Initiation of an EIS may proceed without first preparing an EA, if deemed appropriate by the proponent.

(5) If the proposed action is not within the scope of any existing EA or EIS, then the proponent must begin the preparation of a new EA or EIS, as appropriate.

(b) The proponent of a proposed action may adopt appropriate environmental documents (EAs or EISs) prepared by another agency (40 CFR 1500.4(n) and 1506.3). In such cases, the proponent will document their use in a REC FNSI, or ROD.

§ 651.13 Classified actions.

(a) For proposed actions and NEPA analyses involving classified information, AR 380–5 (Department of the Army Information Security Program) will be followed.

(b) Classification does not relieve a proponent of the requirement to assess and document the environmental effects of a proposed action.

(c) When classified information can be reasonably separated from other information and a meaningful environmental analysis produced, unclassified documents will be prepared and processed in accordance with this part. Classified portions will be kept separate and provided to reviewers and decision makers in accordance with AR 380–5.

(d) When classified information is such an integral part of the analysis of a proposal that a meaningful unclassified NEPA analysis cannot be produced, the proponent, in consultation with the appropriate security and environmental offices, will form a team to review classified NEPA analysis. This interdisciplinary team will include environmental professionals to ensure that the consideration of environmental effects will be consistent with the letter and intent of NEPA, including public participation requirements for those aspects which are not classified.

§ 651.14 Integration with Army planning.

(a) Early integration. The Army goal is to concurrently integrate environmental reviews with other Army planning and decision-making actions, thereby avoiding delays in mission accomplishment. To achieve this goal, proponents shall complete NEPA analysis as part of any recommendation or report to decision makers prior to the decision (subject to 40 CFR 1506.1). Early planning (inclusion in Installation Master Plans, INRMPs, ICRMPs, Acquisition Strategies, strategic plans, etc.) will allow efficient program or project execution later in the process.

(1) The planning process will identify issues that are likely to have an effect on the environment, or to be controversial. In most cases, local citizens and/or existing advisory groups should assist in identifying potentially controversial issues during the planning process. The planning process also identifies minor issues that have little or no measurable environmental effect, and it is sound NEPA practice to reduce or eliminate discussion of minor issues to help focus analyses. Such an approach will minimize unnecessary analysis and discussion in the NEPA process and documents.

(2) Decision makers will be informed of and consider the environmental consequences at the same time as other factors such as mission requirements, schedule, and cost. If permits or coordination are required (for example, Section 404 of the Clean Water Act, Endangered Species Act consultation, Section 106 of the National Historic Preservation Act (NHPA), etc.), they should be initiated no later than the scoping phase of the process and should run parallel to the NEPA process, not sequential to it. This practice is in accordance with the recommendations.
For example, a well-executed EA or EIS on an Installation Master Plan can eliminate the need for many case-by-case analyses and documentation for construction projects. After the approval of an adequate comprehensive plan (which adequately addresses the potential for environmental effects), subsequent projects can tier off of the Master Plan NEPA analysis (AR 210–20). Other integration of the NEPA process and broad-level planning can lead to the "tiering" of NEPA, allowing the proponent to minimize the effort spent on individual projects, and "incorporating by reference" the broader level environmental considerations. This tiering allows the development of program level (programmatic) EAs and EISs, which can introduce greater economies of scale. These assessments are addressed in more detail in paragraph (c) of this section.

Presented in the CEQ publication entitled "The National Environmental Policy Act: A Study of Its Effectiveness After Twenty-five Years."

(3) NEPA documentation will accompany the proposal through the Army review and decision-making processes. These documents will be forwarded to the planners, designers, and/or implementers, ensuring that the recommendations and mitigations upon which the decision was based are being carried out. The implementation process will provide necessary feedback for adaptive environmental management; responding to inaccuracies or uncertainties in the Army’s ability to accurately predict impacts, changing field conditions, or unexpected results from monitoring. The integration of NEPA into the ongoing planning activities of the Army can produce considerable savings to the Army.1

(b) Time limits. The timing of the preparation, circulation, submission, and public availability of NEPA documentation is important to ensure that environmental values are integrated into Army planning and decisions.

(1) Categorical exclusions. When a proposed action is categorically excluded from further environmental review (subpart D and appendix B of this part), the proponent may proceed immediately with that action upon receipt of all necessary approvals, (including local environmental office confirmation that the CX applies to the proposal) and the preparation of a REC, if required.

(2) Findings of no significant impact. (i) A proponent will make an EA and draft FNSI available to the public for review and comment for a minimum of 30 days prior to making a final decision and proceeding with an action. If the proposed action is one of national concern, is unprecedented, or normally requires an EIS (§ 651.42), the FNSI must be published in the FR. Otherwise, the FNSI must be published in local newspapers and be made widely available. The FNSI must articulate the deadline for receipt of comments, availability of the EA for review, and steps required to obtain the EA. This can include a POC, address, and phone number; a location; a reference to a website; or some equivalent mechanism. (In no cases will the only coordination mechanism be a website.) At the conclusion of the appropriate comment period, as specified in Figure 2, the decision maker may sign the FNSI and take immediate action, unless sufficient public comments are received to warrant more time for their resolution. Figure 2 follows:

1 For example, a well-executed EA or EIS on an Installation Master Plan can eliminate the need for many case-by-case analyses and documentation for construction projects. After the approval of an adequate comprehensive plan (which adequately addresses the potential for environmental effects), subsequent projects can tier off of the Master Plan NEPA analysis (AR 210–20). Other integration of the NEPA process and broad-level planning can lead to the "tiering" of NEPA, allowing the proponent to minimize the effort spent on individual projects, and "incorporating by reference" the broader level environmental considerations. This tiering allows the development of program level (programmatic) EAs and EISs, which can introduce greater economies of scale. These assessments are addressed in more detail in paragraph (c) of this section.
(ii) A news release is required to publicize the availability of the EA and draft FNSI, and a simultaneous announcement that includes publication in the FR must be made by HQDA, if warranted (see §651.35 (e)). The 30-day waiting period begins at the time that the draft FNSI is publicized (40 CFR 1506.6(b)).

(iii) In cases where the 30-day comment period jeopardizes the project and the full comment period would provide no public benefit, the period may be shortened with appropriate approval by a higher decision authority (such as a MACOM). In no circumstances should the public comment period for an EA/draft FNSI be less than 15 days. A deadline and POC for receipt of comments must be included in the draft FNSI and the news release.

(3) EIS. The EPA publishes a weekly notice in the FR of the EISs filed during the preceding week. This notice usually occurs each Friday. An NOA reaching EPA on a Friday will be published in the following Friday issue of the FR. Failure to deliver an NOA to EPA by close of business on Friday will result in an additional one-week delay. A news release publicizing the action will be made in conjunction with the notice in the FR. The following time periods, calculated from the publication date of the EPA notice, will be observed:

(i) Not less than 45 days for public comment on DEISs (40 CFR 1506.10(c)).

(ii) Not less than 15 days for public availability of DEISs prior to any public hearing on the DEIS (40 CFR 1506(c)(2)).

(iii) Not less than 90 days from filing the DEIS prior to any decision on the proposed action. These periods may run concurrently (40 CFR 1506.10(b) and (c)).

(iv) The time periods prescribed here may be extended or reduced in accordance with 40 CFR 1506.10(b)(2) and (d).

(v) When variations to these time limits are set, the Army agency should consider the factors in 40 CFR 1501.8(b)(1).

(vi) The proponent may also set time limits for other procedures or decisions related to DEISs and FEISs as listed in 40 CFR 1501.8(b)(2).

(vii) Because the entire EIS process could require more than one year (Figure 2 in paragraph (b)(2)(i) of this section), the process must begin as soon as the project is sufficiently mature to allow analysis of alternatives and the proponent must coordinate with all staff elements with a role to play in the NEPA process. DEIS preparation and response to comments constitute the largest portion of time to prepare an FEIS.
(vii) A public affairs plan should be developed that provides for periodic interaction with the community. There is a minimum public review time of 90 days between the publication of the DEIS and the announcement of the ROD. After the availability of the ROD is announced, the action may proceed. This announcement must be made through the FR for those EISs for which HQDA signs the ROD. For other EISs, announcements in the local press are adequate. Figure 2 in paragraph (b)(2)(i) of this section indicates typical and required time periods for EISs.

(c) Programmatic environmental review (tiering). (1) Army agencies are encouraged to analyze actions at a programmatic level for those programs that are similar in nature or broad in scope (40 CFR 1502.4(c), 1502.20, and 1508.23). This level of analysis will eliminate repetitive discussions of the same issues and focus on the key issues at each appropriate level of project review. When a broad programmatic EA or EIS has been prepared, any subsequent EIS or EA on an action included within the entire program or policy (particularly a site-specific action) need only summarize issues discussed in the broader statement and concentrate on the issues specific to the subsequent action. This subsequent document will state where the earlier document is available.

(2) Army proponents are normally required to prepare many types of management plans that must include or be accompanied by appropriate NEPA analysis. NEPA analysis for these types of plans can often be accomplished with a programmatic approach, creating an analysis that covers a number of smaller projects or activities. In cases where such activities are adequately assessed as part of these normal planning activities, a REC can be prepared for smaller actions that cite the document in which the activities were previously assessed. Care must be taken to ensure that site-specific or case-specific conditions are adequately addressed in the existing programmatic document before a REC can be used, and the REC must reflect this consideration. If additional analyses are required, they can “tier” off the original analyses, eliminating duplication. Tiering, in this manner, is often applicable to Army actions that are long-term, multi-faceted, or multisite.

(d) Scoping. (1) When the planning for an Army project or action indicates a need for an EIS, the proponent initiates the scoping process (see subpart G of this part for procedures and actions). This process determines the scope of issues to address in the EIS and identifies the significant issues related to the proposed action. During the scoping process, participants identify the range of actions, alternatives, and impacts to consider in the EIS (40 CFR 1508.25). For an individual action, the scope may depend on the relationship of the proposed action to other NEPA documents. The scoping phase of the NEPA process, as part of project planning, will identify aspects of the proposal that are likely to have an effect or be controversial; and will ensure that the NEPA analyses are useful for a decision maker. For example, the early identification and initiation of permit or coordination actions can facilitate problem resolution, and, similarly, cumulative effects can be addressed early in the process and at the appropriate spatial and temporal scales.

(2) The extent of the scoping process, including public involvement, will depend on several factors. These factors include:

(i) The size and type of the proposed action.

(ii) Whether the proposed action is of regional or national interest.

(iii) Degree of any associated environmental controversy.

(iv) Size of any associated environmental parameters.

(v) Significance of any effects on them.

(vi) Extent of prior environmental review.

(vii) Involvement of any substantive time limits.

---

2 As an example, an appropriate way to address diverse weapon system deployments would be to produce site-specific EAs or EISs for each major deployment installation, using the generic environmental effects of the weapon system identified in a programmatic EA or EIS prepared by the MATDEV.
(viii) Requirements by other laws for environmental review.
(ix) Cumulative impacts.
(3) Through scoping, many future controversies can be eliminated, and public involvement can be used to narrow the scope of the study, concentrating on those aspects of the analysis that are truly important.
(4) The proponent may incorporate scoping as part of the EA process, as well. If the proponent chooses a public involvement strategy, the extent of scoping incorporated is at the proponent’s discretion.

(e) Analyses and documentation. Several statutes, regulations, and Executive Orders require analyses, consultation, documentation, and coordination, which duplicate various elements and/or analyses required by NEPA and the CEQ regulations; often leading to confusion, duplication of effort, omission, and, ultimately, unnecessary cost and delay. Therefore, Army proponents are encouraged to identify, early in the NEPA process, opportunities for integrating those requirements into proposed Army programs, policies, and projects. Environmental analyses required by this part will be integrated as much as practicable with other environmental reviews, laws, and Executive Orders (40 CFR 1502.25). Incorporation of these processes must ensure that the individual requirements are met, in addition to those required by NEPA. The NEPA process does not replace the procedural or substantive requirements of other environmental statutes and regulations. Rather, it addresses them in one place so the decision maker has a concise and comprehensive view of the major environmental issues and understands the interrelationships and potential conflicts among the environmental components. NEPA is the “umbrella” that facilitates such coordination by integrating processes that might otherwise proceed independently. Prime candidates for such integration include, but are not limited to, the following:

(1) Clean Air Act, as amended (General Conformity Rule, 40 CFR parts 51 and 93).
(2) Endangered Species Act.
(3) NHPA, sections 106 and 110.
(5) Clean Water Act, including Section 404(b)(1).
(7) Fish and Wildlife Coordination Act.
(10) Pollution Prevention Act.
(17) Floodplain Management (Executive Order 11988, 3 CFR, 1977 Comp., p. 117).
(20) Invasive Species (Executive Order 13112, 3 CFR, 1999 Comp., p. 159).
(21) AR 200–3, Natural Resources—Land, Forest, and Wildlife Management.
(22) Environmental analysis and documentation required by various state laws.
(23) Any cost-benefit analyses prepared in relation to a proposed action (40 CFR 1502.23).
(24) Any permitting and licensing procedures required by federal and state law.
(25) Any installation and Army master planning functions and plans.
(26) Any installation management plans, particularly those that deal directly with the environment.
(27) Any stationing and installation planning, force development planning, and materiel acquisition planning.
(28) Environmental Noise Management Program.
(29) Hazardous waste management plans.
(31) Asbestos Management Plans.
(33) Environmental Baseline Surveys.
(34) Programmatic Environment, Safety, and Health Evaluation (PESHE) as required by DOD 5000.2-R and DA Pamphlet 70–3, Army Acquisition Procedures, supporting AR 70–1, Acquisition Policy.
(35) The DOD MOU to Foster the Ecosystem Approach signed by CEQ, and DOD, on 15 December 1995; establishing the importance of “non-listed,” “non-game,” and “non-protected” species.
(36) Other requirements (such as health risk assessments), when efficiencies in the overall Army environmental program will result.

(f) Integration into Army acquisition. The Army acquisition community will integrate environmental analyses into decision-making, as required in this part ensuring that environmental considerations become an integral part of total program planning and budgeting. PEOs, and Program, Product, and Project Managers integrate the NEPA process early, and acquisition planning and decisions reflect national and Army environmental values and considerations. By integrating pollution prevention and other aspects of any environmental analysis early into the materiel acquisition process, the PEO and PM facilitate the identification of environmental cost drivers at a time when they can be most effectively controlled. NEPA program coordinators should refer to DA Pamphlet 70–3, Army Acquisition Procedures, and the Defense Acquisition Deskbook (DAD) for current specific implementation guidance, procedures, and POCs.

(g) Relations with local, state, regional, and tribal agencies. (1) Army installation, agency, or activity environmental officers or planners should establish a continuing relationship with other agencies, including the staffs of adjacent local, state, regional, and tribal governments and agencies. This relationship will promote cooperation and resolution of mutual land use and environment-related problems, and promote the concept of regional ecosystem management as well as general cooperative problem solving. Many of these “partners” will have specialized expertise and access to environmental baseline data, which will assist the Army in day-to-day planning as well as NEPA-related issues. MOUs are encouraged to identify areas of mutual interest, establish POCs, identify lines of communication between agencies, and specify procedures to follow in conflict resolution. Additional coordination is available from state and area-wide planning and development agencies. Through this process, the proponent may gain insights on other agencies’ approaches to EAs, surveys, and studies applicable to the current proposal. These other agencies would also be able to assist in identifying possible participants in scoping procedures for projects requiring an EIS.
(2) In some cases, local, state, regional, or tribal governments or agencies will have sufficient jurisdiction by law or special expertise with respect to reasonable alternatives or significant environmental, social, or economic impacts associated with a proposed action. When appropriate, proponents of an action should determine whether these entities have an interest in becoming a cooperating agency (§651.45 (b) and 40 CFR 1501.6). If cooperating agency status is established, a memorandum of agreement is required to document specific expectations, roles, and responsibilities, including analyses to be performed, time schedules, availability of pre-decisional information, and other issues. Cooperating agencies may use their own funds, and the designation of cooperating agency status
neither enlarges nor diminishes the decision-making status of any federal or non-federal entities (see CEQ Memorandum for Heads of Federal Agencies entitled “Designation of Non-Federal Agencies to be Cooperating Agencies in Implementing the Procedural Requirements of the National Environmental Policy Act” dated 28 July 1999, available from the President’s Council on Environmental Quality (CEQ), Executive Office of the President of the U.S.). In determining sufficient jurisdiction or expertise, CEQ regulations can be used as guidance.

(h) The Army as a cooperating agency. Often, other agencies take actions that can negatively impact the Army mission. In such cases, the Army may have some special or unique expertise or jurisdiction.

(1) The Army may be a cooperating agency (40 CFR 1501.6) in order to:
   (i) Provide information or technical expertise to a lead agency.
   (ii) Approve portions of a proposed action.
   (iii) Ensure the Army has an opportunity to be involved in an action of another federal agency that will affect the Army.
   (iv) Provide review and approval of the portions of EISs and RODs that affect the Army.

(2) Adequacy of an EIS is primarily the responsibility of the lead agency. However, as a cooperating agency with approval authority over portions of a proposal, the Army may adopt an EIS if review concludes the EIS adequately satisfies the Army’s comments and suggestions.

(3) If the Army is a major approval authority for the proposed action, the appropriate Army official may sign the ROD prepared by the lead agency, or prepare a separate, more focused ROD. If the Army’s approval authority is only a minor aspect of the overall proposal, such as issuing a temporary use permit, the Army need not sign the lead agency’s ROD or prepare a separate ROD.

(4) The magnitude of the Army’s involvement in the proposal will determine the appropriate level and scope of Army review of NEPA documents. If the Army is a major approval authority or may be severely impacted by the proposal or an alternative, the Army should undertake the same level of review as if it were the lead agency. If the involvement is limited, the review may be substantially less. The lead agency is responsible for overall supervision of the EIS, and the Army will attempt to meet all reasonable time frames imposed by the lead agency.

(5) If an installation (or other Army organization) should become aware of an EIS being prepared by another federal agency in which they may be involved within the discussion of the document, they should notify ASA(I&E) through the chain of command. ASA(I&E) will advise regarding appropriate Army participation as a cooperating agency, which may simply involve local coordination.

§ 651.15 Mitigation and monitoring.

(a) Throughout the environmental analysis process, the proponent will consider mitigation measures to avoid or minimize environmental harm. Mitigation measures include:
   (1) Avoiding the impact altogether, by eliminating the action or parts of the action.
   (2) Minimizing impacts by limiting the degree or magnitude of the action and its implementation.
   (3) Rectifying the impact; by repairing, rehabilitating, or restoring the adverse effect on the environment.
   (4) Reducing or eliminating the impact over time, by preservation and maintenance operations during the life of the action.
   (5) Compensating for the impact, by replacing or providing substitute resources or environments. (Examples and further clarification are presented in appendix C of this part.)

(b) When the analysis proceeds to an EA or EIS, mitigation measures will be clearly assessed and those selected for implementation will be identified in the FNSI or the ROD. The proponent must implement those identified mitigations, because they are commitments made as part of the Army decision. The proponent is responsible for responding to inquiries from the public or other agencies regarding the status of mitigation measures adopted in the NEPA process. The mitigation shall become a line item in the proponent’s
§651.15 32 CFR Ch. V (7–1–13 Edition)

budget or other funding document, if appropriate, or included in the legal document implementing the action (for example, contracts, leases, or grants). Only those practical mitigation measures that can reasonably be accomplished as part of a proposed alternative will be identified. Any mitigation measures selected by the proponent will be clearly outlined in the NEPA decision document, will be budgeted and funded (or funding arranged) by the proponent, and will be identified, with the appropriate fund code, in the EPR (AR 200–1). Mitigations will be monitored through environmental compliance reporting, such as the ISR (AR 200–1) or the Environmental Quality Report. Mitigation measures are identified and funded in accordance with applicable laws, regulations, or other media area requirements.

(c) Based upon the analysis and selection of mitigation measures that reduce environmental impacts until they are no longer significant, an EA may result in a FNSI. If a proponent uses mitigation measures in such a manner, the FNSI must identify these mitigating measures, and they become legally binding and must be accomplished as the project is implemented. If any of these identified mitigation measures do not occur, so that significant adverse environmental effects could reasonably be expected to result, the proponent must publish an NOI and prepare an EIS.

(d) Potential mitigation measures that appear practical, and are unobtainable within expected Army resources, or that some other agency (including non-Army agencies) should perform, will be identified in the NEPA analysis to the maximum extent practical. A number of factors determine what is practical, including military mission, manpower restrictions, cost, institutional barriers, technical feasibility, and public acceptance. Practicality does not necessarily ensure resolution of conflicts among these items, rather it is the degree of conflict that determines practicality. Although mission conflicts are inevitable, they are not necessarily insurmountable; and the proponent should be cautious about declaring all mitigations impractical and carefully consider any manpower requirements. The key point concerning both the manpower and cost constraints is that, unless money is actually budgeted and manpower assigned, the mitigation does not exist. Coordination by the proponent early in the process will be required to allow ample time to get the mitigation activities into the budget cycle. The project cannot be undertaken until all required mitigation efforts are fully resourced, or until the lack of funding and resultant effects, are fully addressed in the NEPA analysis.

(e) Mitigation measures that were considered but rejected, including those that can be accomplished by other agencies, must be discussed, along with the reason for the rejection, within the EA or EIS. If they occur in an EA, their rejection may lead to an EIS, if the resultant unmitigated impacts are significant.

(f) Proponents may request assistance with mitigation from cooperating non-Army agencies, when appropriate. Such assistance is appropriate when the requested agency was a cooperating agency during preparation of a NEPA document, or has the technology, expertise, time, funds, or familiarity with the project or the local ecology necessary to implement the mitigation measure more effectively than the lead agency.

(g) The proponent agency or other appropriate cooperating agency will implement mitigations and other conditions established in the EA or EIS, or commitments made in the FNSI or ROD. Legal documents implementing the action (such as contracts, permits, grants) will specify mitigation measures to be performed. Penalties against a contractor for noncompliance may also be specified as appropriate. Specification of penalties should be fully coordinated with the appropriate legal advisor.

(h) A monitoring and enforcement program for any mitigation will be adopted and summarized in the NEPA documentation (see appendix C of this part for guidelines on implementing such a program). Whether adoption of a monitoring and enforcement program is applicable (40 CFR 1505.2(c)) and
whether the specific adopted action requires monitoring (40 CFR 1505.3) may depend on the following:

(1) A change in environmental conditions or project activities assumed in the EIS (such that original predictions of the extent of adverse environmental impacts may be too limited);

(2) The outcome of the mitigation measure is uncertain (for example, new technology);

(3) Major environmental controversy remains associated with the selected alternative; or

(4) Failure of a mitigation measure, or other unforeseen circumstances, could result in a failure to meet achievement of requirements (such as adverse effects on federal or state listed endangered or threatened species, important historic or archaeological sites that are either listed or eligible for nomination to the National Register of Historic Places, wilderness areas, wild and scenic rivers, or other public or private protected resources).

Proponents must follow local installation environmental office procedures to coordinate with appropriate federal, tribal, state, or local agencies responsible for a particular program to determine what would constitute “adverse effects.”

(j) Monitoring is an integral part of any mitigation system.

(1) Enforcement monitoring ensures that mitigation is being performed as described in the NEPA documentation, mitigation requirements and penalty clauses are written into any contracts, and required provisions are enforced. The development of an enforcement monitoring program is governed by who will actually perform the mitigation: a contractor, a cooperating agency, or an in-house (Army) lead agency. Detailed guidance is contained in Appendix C of this part. Proponents must coordinate the monitoring with the Environmental Office.

(l) Environmental monitoring report. An environmental monitoring report is prepared at one or more points after program or action execution. Its purpose is to determine the accuracy of impact predictions. It can serve as the basis for adjustments in mitigation programs and to adjust impact predictions in future projects. Further

While quantitative measurements are desired, qualitative measures may be required. The objective is to obtain enough information to judge the effect of the mitigation. In establishing the monitoring system, the responsible agent should coordinate the monitoring with the Environmental Office. Specific steps and guidelines are included in appendix C of this part.

(j) The monitoring program, in most cases, should be established well before the action begins, particularly when biological variables are being measured and investigated. At this stage, any necessary contracts, funding, and manpower assignments must be initiated. Technical results from the analysis should be summarized by the proponent and coordinated with the installation Environmental Office. Subsequent coordination with the concerned public and other agencies, as arranged through development of the mitigation plan, will be handled through the Environmental Office.

(k) If the mitigations are effective, the monitoring should be continued as long as the mitigations are needed to address impacts of the initial action. If the mitigations are ineffective, the proponent and the responsible group should re-examine the mitigation measures, in consultation with the Environmental Office and appropriate experts, and resolve the inadequacies of the mitigation or monitoring. Professionals with specialized and recognized expertise in the topic or issue, as well as concerned citizens, are essential to the credibility of this review. If a different program is required, then a new system must be established. If ineffective mitigations are identified which were required to reduce impact below significance levels (§ 651.35 (g)), the proponent may be required to publish an NOI and prepare an EIS (paragraph (c) of this section).

(l) Environmental monitoring report. An environmental monitoring report is prepared at one or more points after program or action execution. Its purpose is to determine the accuracy of impact predictions. It can serve as the basis for adjustments in mitigation programs and to adjust impact predictions in future projects. Further
guidance and clarification are included in appendix C of this part.

§ 651.16 Cumulative impacts.

(a) NEPA analyses must assess cumulative effects, which are the impact on the environment resulting from the incremental impact of the action when added to other past, present, and reasonably foreseeable future actions. Actions by federal, non-federal agencies, and private parties must be considered (40 CFR 1508.7).

(b) The scoping process should be used to identify possible cumulative impacts. The proponent should also contact appropriate off-post officials, such as tribal, state, county, or local planning officials, to identify other actions that should be considered in the cumulative effects analysis.

(c) A suggested cumulative effects approach is as follows:

1. Identify the boundary of each resource category. Boundaries may be geographic or temporal. For example, the Air Quality Control Region (AQCR) might be the appropriate boundary for the air quality analysis, while a watershed could be the boundary for the water quality analysis. Depending upon the circumstances, these boundaries could be different and could extend off the installation.

2. Describe the threshold level of significance for that resource category. For example, a violation of air quality standards within the AQCR would be an appropriate threshold level.

3. Determine the environmental consequence of the action. The analysis should identify the cause and effect relationships, determine the magnitude and significance of cumulative effects, and identify possible mitigation measures.

§ 651.17 Environmental justice.

Executive Order 12898 (Federal Actions to Address Environmental Justice in Minority and Low-Income Populations, 11 February 1994, 3 CFR, 1994 Comp., p. 859) requires the proponent to determine whether the proposed action will have a disproportionate impact on minority or low-income communities, both off-post and on-post.

Subpart C—Records and Documents

§ 651.18 Introduction.

NEPA documentation will be prepared and published double-sided on recycled paper. The recycled paper symbol should be presented on the inside of document covers.

§ 651.19 Record of environmental consideration.

A Record of Environmental Consideration (REC) is a signed statement submitted with project documentation that briefly documents that an Army action has received environmental review. RECs are prepared for CXs that require them, and for actions covered by existing or previous NEPA documentation. A REC briefly describes the proposed action and timeframe, identifies the proponent and approving official(s), and clearly shows how an action qualifies for a CX, or is already covered in an existing EA or EIS. When used to support a CX, the REC must address the use of screening criteria to ensure that no extraordinary circumstances or situations exist. A REC has no prescribed format, as long as the above information is included. To reduce paperwork, a REC can reference such documents as real estate Environmental Baseline Studies (EBSs) and other documents, as long as they are readily available for review. While a REC may document compliance with the requirements of NEPA, it does not fulfill the requirements of other environmental laws and regulations. Figure 3 illustrates a possible format for the REC as follows:
§ 651.20 Environmental assessment.

An EA is intended to assist agency planning and decision-making. While required to assess environmental impacts and evaluate their significance, it is routinely used as a planning document to evaluate environmental impacts, develop alternatives and mitigation measures, and allow for agency and public participation. It:

(a) Briefly provides the decision maker with sufficient evidence and analysis for determining whether a FNSI or an EIS should be prepared.

(b) Assures compliance with NEPA, if an EIS is not required and a CX is inappropriate.

(c) Facilitates preparation of an EIS, if required.

(d) Includes brief discussions of the need for the proposed action, alternatives to the proposed action (NEPA, section 102(2)(e)), environmental impacts, and a listing of persons and agencies consulted (see subpart E of this part for requirements).

(e) The EA provides the proponent, the public, and the decision maker with sufficient evidence and analysis for determining whether environmental impacts of a proposed action are potentially significant. An EA is substantially less rigorous and costly than an EIS, but requires sufficient detail to identify and ascertain the significance of expected impacts associated with the proposed action and its alternatives. The EA can often provide the required "hard look" at the potential environmental effects of an action, program, or policy within 1 to 25 pages, depending upon the nature of the action and project-specific conditions.

§ 651.21 Finding of no significant impact.

A Finding of No Significant Impact (FNSI) is a document that briefly states why an action (not otherwise excluded) will not significantly affect the environment, and, therefore, that an EIS will not be prepared. The FNSI includes a summary of the EA and notes any related NEPA documentation. If the EA is attached, the FNSI need not repeat any of the EA discussion, but may incorporate it by reference. The draft FNSI will be made available to the public for review and comment for
§ 651.22 Notice of intent.

A Notice of Intent (NOI) is a public notice that an EIS will be prepared. The NOI will briefly:

(a) Describe the proposed and alternative actions.

(b) Describe the proposed scoping process, including when and where any public meetings will be held.

(c) State the name and address of the POC who can answer questions on the proposed action and the EIS (see § 651.45(a) and § 651.49 for application).

§ 651.23 Environmental impact statement.

An Environmental Impact statement (EIS) is a detailed written statement required by NEPA for major federal actions significantly affecting the quality of the human environment (42 U.S.C. 4321). A more complete discussion of EIS requirements is presented in subpart F of this part.

§ 651.24 Supplemental EAs and supplemental EISs.

As detailed in §651.5(g) and in 40 CFR 1502.9(c), proposed actions may require review of existing NEPA documentation. If conditions warrant a supplemental document, these documents are processed in the same way as an original EA or EIS. No new scoping is required for a supplemental EIS filed within one year of the filing of the original ROD. If the review indicates no need for a supplement, that determination will be documented in a REC.

§ 651.25 Notice of availability.

The Notice of Availability (NOA) is published by the Army to inform the public and others that a NEPA document is available for review. A NOA will be published in the FR, coordinating with EPA for draft and final EISs (including supplements), for RODs, and for EAs and FNSIs which are of national concern, are unprecedented, or normally require an EIS. EAs and FNSIs of local concern will be made available in accordance with §651.36. This agency NOA should not be confused with the EPA’s notice of availability of weekly receipts (NWR) of EISs.

§ 651.26 Record of decision.

The Record of Decision (ROD) is a concise public document summarizing the findings in the EIS and the basis for the decision. A public ROD is required under the provisions of 40 CFR 1505.2 after completion of an EIS (see § 651.45(j) for application). The ROD must identify mitigations which were important in supporting decisions, such as those mitigations which reduce otherwise significant impacts, and ensure that appropriate monitoring procedures are implemented (see §651.15 for application).

§ 651.27 Programmatic NEPA analyses.

These analyses, in the form of an EA or EIS, are useful to examine impacts of actions that are similar in nature or broad in scope. These documents allow the “tiering” of future NEPA documentation in cases where future decisions or unknown future conditions preclude complete NEPA analyses in one step. These documents are discussed further in §651.14(c).

Subpart D—Categorical Exclusions

§ 651.28 Introduction.

Categorical Exclusions (CXs) are categories of actions with no individual or  

3This notice is published by the EPA and officially begins the public review period. The NWR is published each Friday, and lists the EISs that were filed the previous week.
cumulative effect on the human or natural environment, and for which neither an EA nor an EIS is required. The use of a CX is intended to reduce paperwork and eliminate delays in the initiation and completion of proposed actions that have no significant impact.

§ 651.29 Determining when to use a CX (screening criteria).

(a) To use a CX, the proponent must satisfy the following three screening conditions:

(1) The action has not been segmented. Determine that the action has not been segmented to meet the definition of a CX. Segmentation can occur when an action is broken down into small parts in order to avoid the appearance of significance of the total action. An action can be too narrowly defined, minimizing potential impacts in an effort to avoid a higher level of NEPA documentation. The scope of an action must include the consideration of connected, cumulative, and similar actions (see §651.51(a)).

(2) No exceptional circumstances exist. Determine if the action involves extraordinary circumstances that would preclude the use of a CX (see paragraphs (b) (1) through (14) of this section).

(3) One (or more) CX encompasses the proposed action. Identify a CX (or multiple CXs) that potentially encompasses the proposed action (Appendix B of this part). If no CX is appropriate, and the project is not exempted by statute or emergency provisions, an EA or an EIS must be prepared, before a proposed action may proceed.

(b) Extraordinary circumstances that preclude the use of a CX are:

(1) Reasonable likelihood of significant effects on public health, safety, or the environment.

(2) Reasonable likelihood of significant environmental effects (direct, indirect, and cumulative).

(3) Imposition of uncertain or unique environmental risks.

(4) Greater scope or size than is normal for this category of action.

(5) Reportable releases of hazardous or toxic substances as specified in 40 CFR part 302. Designation, Reportable Quantities, and Notification.

(6) Releases of petroleum, oils, and lubricants (POL) except from a properly functioning engine or vehicle, application of pesticides and herbicides, or where the proposed action results in the requirement to develop or amend a Spill Prevention, Control, or Countermeasures Plan.

(7) When a review of an action that might otherwise qualify for a Record of Non-applicability (RONA) reveals that air emissions exceed de minimis levels or otherwise that a formal Clean Air Act conformity determination is required.

(8) Reasonable likelihood of violating any federal, state, or local law or requirements imposed for the protection of the environment.

(9) Unresolved effect on environmentally sensitive resources, as defined in paragraph (c) of this section.

(10) Involving effects on the quality of the environment that are highly likely to be highly controversial.

(11) Involving effects on the environment that are highly uncertain, involve unique or unknown risks, or are scientifically controversial.

(12) Establishes a precedent (or makes decisions in principle) for future or subsequent actions that are reasonably likely to have a future significant effect.

(13) Potential for degradation of already existing poor environmental conditions. Also, initiation of a degrading influence, activity, or effect in areas not already significantly modified from their natural condition.

(14) Introduction/employment of unproven technology.

(c) If a proposed action would adversely affect “environmentally sensitive” resources, unless the impact has been resolved through another environmental process (e.g., CZMA, NHPA, CWA, etc.) a CX cannot be used (see paragraph (e) of this section). Environmentally sensitive resources include:

(1) Proposed federally listed, threatened, or endangered species or their designated critical habitats.

(2) Properties listed or eligible for listing on the National Register of Historic Places (AR 200–4).

(3) Areas having special designation or recognition such as prime or unique
§ 651.30 CX actions.

Types of actions that normally qualify for CX are listed in Appendix B of this part.

§ 651.31 Modification of the CX list.

The Army list of CXs is subject to continual review and modification, in consultation with CEQ. Additional modifications can be implemented through submission, through channels, to ASA (I&E) for consideration and consultation. Subordinate Army headquarters may not modify the CX list through supplements to this part. Upon approval, proposed modifications to the list of CXs will be published in the FEDERAL REGISTER, providing an opportunity for public review and comment.

Subpart E—Environmental Assessment

§ 651.32 Introduction.

(a) An EA is intended to facilitate agency planning and informed decision-making, helping proponents and other decision makers understand the potential extent of environmental impacts of a proposed action and its alternatives, and whether those impacts (or cumulative impacts) are significant. The EA can aid in Army compliance with NEPA when no EIS is necessary. An EA will be prepared if a proposed action:

1. Is not an emergency (§651.11(b)).
2. Is not exempt from (or an exception to) NEPA (§651.11(a)).
3. Does not qualify as a CX (§651.11(c)).
4. Is not adequately covered by existing NEPA analysis and documentation (§651.19).
5. Does not normally require an EIS (§651.42).

(b) An EA can be 1 to 25 pages in length and be adequate to meet the requirements of this part, depending upon site-specific circumstances and conditions. Any analysis that exceeds 25 pages in length should be evaluated to consider whether the action and its effects are significant and thus warrant an EIS.

§ 651.33 Actions normally requiring an EA.

The following Army actions normally require an EA, unless they qualify for the use of a CX:

(a) Special field training exercises or test activities in excess of five acres on Army land of a nature or magnitude not within the annual installation training cycle or installation master plan.

(b) Military construction that exceeds five contiguous acres, including contracts for off-post construction.
(c) Changes to established installation land use that generate impacts on the environment.
(d) Alteration projects affecting historically significant structures, archaeological sites, or places listed or eligible for listing on the National Register of Historic Places.
(e) Actions that could cause significant increase in soil erosion, or affect prime or unique farmland (off Army property), wetlands, floodplains, coastal zones, wilderness areas, aquifers or other water supplies, prime or unique wildlife habitat, or wild and scenic rivers.
(f) Actions proposed during the life cycle of a weapon system if the action produces a new hazardous or toxic material or results in a new hazardous or toxic waste, and the action is not adequately addressed by existing NEPA documentation. Examples of actions normally requiring an EA during the life cycle include, but are not limited to, testing, production, fielding, and training involving natural resources, and disposal/demilitarization. System design, development, and production actions may require an EA, if such decisions establish precedent (or make decisions, in principle) for future actions with potential environmental effects. Such actions should be carefully considered in cooperation with the development or production contractor or government agency, and NEPA analysis may be required.
(g) Development and approval of installation master plans.
(h) Development and implementation of Integrated Natural Resources Management Plans (INRMPs) (land, forest, fish, and wildlife) and Integrated Cultural Resources Management Plans (ICRMPs).
(i) Actions that take place in, or adversely affect, important wildlife habitats, including wildlife refuges.
(j) Field activities on land not controlled by the military, except those that do not alter land use to substantially change the environment (for example, patrolling activities in a forest). This includes firing of weapons, missiles, or lasers over navigable waters of the United States, or extending 45 meters or more above ground level into the national airspace. It also includes joint air attack training that may require participating aircraft to exceed 250 knots at altitudes below 3000 feet above ground level, and helicopters, at any speed, below 500 feet above ground level.
(k) An action with substantial adverse local or regional effects on energy or water availability. Such impacts can only be adequately identified with input from local agencies and/or citizens.
(l) Production of hazardous or toxic materials.
(m) Changes to established airspace use that generate impacts on the environment or socioeconomic systems, or create a hazard to non-participants.
(n) An installation pesticide, fungicide, herbicide, insecticide, and rodenticide-use program/plan.
(o) Acquisition, construction, or alteration of (or space for) a laboratory that will use hazardous chemicals, drugs, or biological or radioactive materials.
(p) An activity that affects a federally listed threatened or endangered plant or animal species, a federal candidate species, a species proposed for federal listing, or critical habitat.
(q) Substantial proposed changes in Army-wide doctrine or policy that potentially have an adverse effect on the environment (40 CFR 1508.18 (b)(1)).
(r) An action that may threaten a violation of federal, state, or local law or requirements imposed for the protection of the environment.
(s) The construction and operation of major new fixed facilities or the substantial commitment of installation natural resources supporting new materiel at the installation.

§ 651.34 EA components.

EAs should be 1 to 25 pages in length, and will include:
(a) Signature (Review and Approval) page.
(b) Purpose and need for the action.
(c) Description of the proposed action.
(d) Alternatives considered. The alternatives considered, including appropriate consideration of the “No Action” alternative, the “Proposed Action,” and all other appropriate and
reasonable alternatives that can be realistically accomplished. In the discussion of alternatives, any criteria for screening alternatives from full consideration should be presented, and the final disposition of any alternatives that were initially identified should be discussed.

(e) Affected environment. This section must address the general conditions and nature of the affected environment and establish the environmental setting against which environmental effects are evaluated. This should include any relevant general baseline conditions focusing on specific aspects of the environment that may be impacted by the alternatives. EBSSs and similar real estate or construction environmental baseline documents, or their equivalent, may be incorporated and/or referenced.

(f) Environmental consequences. Environmental consequences of the proposed action and the alternatives. The document must state and assess the effects (direct, indirect, and cumulative) of the proposed action and its alternatives on the environment, and what practical mitigation is available to minimize these impacts. Discussion and comparison of impacts should provide sufficient analysis to reach a conclusion regarding the significance of the impacts, and is not merely a quantification of facts.

(g) Conclusions regarding the impacts of the proposed action. A clear statement will be provided regarding whether or not the described impacts are significant. If the EA identifies potential significant impacts associated with the proposed action, the conclusion should clearly state that an EIS will be prepared before the proposed action is implemented. If no significant impacts are associated with the project, the conclusion should state that a FNSI will be prepared. Any mitigations that reduce adverse impacts must be clearly presented. If the EA depends upon mitigations to support a resultant FNSI, these mitigations must be clearly identified as a subsection of the Conclusions.

(h) Listing of preparers, and agencies and persons consulted. Copies of correspondence to and from agencies and persons contacted during the preparation of the EA will be available in the administrative record and may be included in the EA as appendices. In addition, the list of analysts/preparers will be presented.

(i) References. These provide bibliographic information for cited sources. Draft documents should not be cited as references without the expressed permission of the proponent of the draft material.

§ 651.35 Decision process.

(a) An EA results in either a FNSI or an NOI to prepare an EIS. Initiation of an NOI to prepare an EIS should occur at any time in the decision process when it is determined that significant effects may occur as a result of the proposed action. The proponent should notify the decision maker of any such determination as soon as possible.

(b) The FNSI is a document (40 CFR 1508.13) that briefly states why an action (not otherwise excluded) will not significantly affect the environment, and, therefore, an EIS will not be prepared. It summarizes the EA, noting any NEPA documents that are related to, but are not part of, the scope of the EA under consideration. If the EA is attached, the FNSI may incorporate the EA’s discussion by reference. The draft FNSI will be made available to the public for review and comment for 30 days prior to the initiation of an action (see §651.14(b)(2)(iii) for an exception). Following the comment period, the decision maker signs the FNSI, and the action can proceed. It is important that the final FNSI reflect the decision made, the response to public comments, and the basis for the final decision.

The FNSI must contain the following:

1. The name of the action.
2. A brief description of the action (including any alternatives considered).
3. A short discussion of the anticipated environmental effects.
4. The facts and conclusions that have led to the FNSI.
5. A deadline and POC for further information or receipt of public comments (see §651.47).

(d) The FNSI is normally no more than two typewritten pages in length.
(e) The draft FNSI will be made available to the public prior to initiation of the proposed action, unless it is a classified action (see §651.13 for security exclusions). Draft FNSIs that have national interest should be submitted with the proposed press release, along with a Questions and Answers (Q&A) package, through command channels to ASA(I&E) for approval and subsequent publication in the FR. Draft FNSIs having national interest will be coordinated with OCPA. Local publication of the FNSI will not precede the FR publication. The text of the publication should be identical to the FR publication.

(f) For actions of only regional or local interest, the draft FNSI will be publicized in accordance with §651.14(b)(2). Distribution of the draft FNSI should include any agencies, organizations, and individuals that have expressed interest in the project, those who may be affected, and others deemed appropriate.

(g) Some FNSIs will require the implementation of mitigation measures to reduce potential impacts below significance levels, thereby eliminating the requirement for an EIS. In such instances, the following steps must be taken:

1. The EA must be made readily available to the public for review through traditional publication and distribution, and through the World Wide Web (WWW) or similar technology. This distribution must be planned to ensure that all appropriate entities and stakeholders have easy access to the material. Ensuring this availability may necessitate the distribution of printed information at locations that are readily accessible and frequented by those who are affected or interested.
2. Any identified mitigations must be tracked to ensure implementation, similar to those specified in an EIS and ROD.
3. The EA analysis procedures must be sufficiently rigorous to identify and analyze impacts that are individually or cumulatively significant.

(h) The proponent is responsible for funding the preparation, staffing, and distribution of the draft FNSI and EA package, and the incorporation of public/agency review and comment. The proponent shall also ensure appropriate public and agency meetings, which may be required to facilitate the NEPA process in completing the EA. The decision maker will approve and sign the EA and FNSI documents. Proponents will ensure that the EA and FNSI, to include drafts, are provided in electronic format to allow for maximum information flow throughout the process.

(i) The proponent should ensure that the decision maker is continuously informed of key findings during the EA process, particularly with respect to potential impacts and controversy related to the proposed action.

§ 651.36 Public involvement.

(a) The involvement of other agencies, organizations, and individuals in the development of EAs and EISs enhances collaborative issue identification and problem solving. Such involvement demonstrates that the Army is committed to open decision-making and builds the necessary community trust that sustains the Army in the long term. Public involvement is mandatory for EISs (see §651.47 and Appendix D of this part for information on public involvement requirements).

(b) Environmental agencies and the public will be involved to the extent practicable in the preparation of an EA. If the proponent elects to involve the public in the development of an EA, §651.47 and Appendix D of this part may be used as guidance. When considering the extent practicable of public interaction (40 CFR 1501.4(b)), factors to be weighed include:

1. Magnitude of the proposed project/action.
2. Extent of anticipated public interest, based on experience with similar proposals.
3. Urgency of the proposal.
5. The presence of minority or economically-disadvantaged populations.

(c) Public involvement must begin early in the proposal development stage, and during preparation of an EA. The direct involvement of agencies with jurisdiction or special expertise is an integral part of impact analysis,
and provides information and conclusions for incorporation into EAs. Unclassified documents incorporated by reference into the EA or FNSI are public documents.

(d) Copies of public notices, “scoping” letters, EAs, draft FNSIs, FNSIs, and other documents routinely sent to the public will be sent directly to appropriate congressional, state, and district offices.

(e) To ensure early incorporation of the public into the process, a plan to include all interested or affected parties should be developed at the beginning of the analysis and documentation process. Open communication with the public is encouraged as a matter of Army policy, and the degree of public involvement varies. Appropriate public notice of the availability of the completed EA/draft FNSI shall be made (see §651.35) (see also AR 360-5 (Public Information)). The plan will include the following:

1. Dissemination of information to local and installation communities.
2. Invitation and incorporation of public comments on Army actions.
3. Consultation with appropriate persons and agencies.

(f) Further guidance on public participation requirements (to potentially be used for EAs and EISs, depending on circumstances) is presented in Appendix D of this part.

§ 651.37 Public availability.

Documents incorporated into the EA or FNSI by reference will be available for public review. Where possible, use of public libraries and a list of POCs for supportive documents is encouraged. A depository should be chosen which is open beyond normal business hours. To the extent possible, the WWW should also be used to increase public availability of documents.

§ 651.38 Existing environmental assessments.

EAs are dynamic documents. To ensure that the described setting, actions, and effects remain substantially accurate, the proponent or installation Environmental Officer is encouraged to periodically review existing documentation that is still relevant or supporting current action. If an action is not yet completed, substantial changes in the proposed action may require supplementation, as specified in §651.5 (g).

§ 651.39 Significance.

(a) If the proposed action may or will result in significant impacts to the environment, an EIS is prepared to provide more comprehensive analyses and conclusions about the impacts. Significant impacts of socioeconomic consequence alone do not merit an EIS.

(b) Significance of impacts is determined by examining both the context and intensity of the proposed action (40 CFR 1508.27). The analysis should establish, by resource category, the threshold at which significance is reached. For example, an action that would violate existing pollution standards; cause water, air, noise, soil, or underground pollution; impair visibility for substantial periods; or cause irreparable harm to animal or plant life could be determined significant. Significant beneficial effects also occur and must be addressed, if applicable.

(c) The proponent should use appropriate methods to identify and ascertain the “significance” of impacts. The use of simple analytical tools, which are subject to independent peer review, fully documented, and available to the public, is encouraged.4 In particular, where impacts are unknown or are suspected to be of public interest, public involvement should be initiated early in the EA (scoping) process.

Subpart F—Environmental Impact Statement

§ 651.40 Introduction.

(a) An EIS is a public document designed to ensure that NEPA policies and goals are incorporated early into the programs and actions of federal agencies. An EIS is intended to provide a full, open, and balanced discussion of significant environmental impacts that

---

4EIFS is one such Army system for evaluating regional economic impacts under NEPA. This system is mandated, as Army policy, for use in NEPA analyses. Other similar tools may be mandated for use in the Army, and will be documented in guidance published pursuant to this part.
may result from a proposed action and alternatives, allowing public review and comment on the proposal and providing a basis for informed decision-making.

(b) The NEPA process should support sound, informed, and timely (early) decision-making; not produce encyclopedic documents. CEQ guidance (40 CFR 1502.7) should be followed, establishing a page limit of 150 pages (300 pages for complex projects). To the extent practicable, EISs will “incorporate by reference” any material that is reasonably available for inspection by potentially interested persons within the time allowed for comment. The incorporated material shall be cited in the EIS and its content will be briefly described. Material based on proprietary data, that is itself not available for review and comment, shall not be incorporated by reference.

§ 651.41 Conditions requiring an EIS.

An EIS is required when a proponent, preparer, or approving authority determines that the proposed action has the potential to:

(a) Significantly affect environmental quality, or public health or safety.

(b) Significantly affect historic (listed or eligible for listing in the National Register of Historic Places, maintained by the National Park Service, Department of Interior), or cultural, archaeological, or scientific resources, public parks and recreation areas, wildlife refuge or wilderness areas, wild and scenic rivers, or aquifers.

(c) Significantly impact prime and unique farmlands located off-post, wetlands, floodplains, coastal zones, or ecologically important areas, or other areas of unique or critical environmental sensitivity.

(d) Result in significant or uncertain environmental effects, or unique or unknown environmental risks.

(e) Significantly affect a federally listed threatened or endangered plant or animal species, a federal candidate species, a species proposed for federal listing, or critical habitat.

(f) Either establish a precedent for future action or represent a decision in principle about a future consideration with significant environmental effects.

(g) Adversely interact with other actions with individually insignificant effects so that cumulatively significant environmental effects result.

(h) Involve the production, storage, transportation, use, treatment, and disposal of hazardous or toxic materials that may have significant environmental impact.

(i) Be highly controversial from an environmental standpoint.

(j) Cause loss or destruction of significant scientific, cultural, or historical resources.

§ 651.42 Actions normally requiring an EIS.

The following actions normally require an EIS:

(a) Significant expansion of a military facility or installation.

(b) Construction of facilities that have a significant effect on wetlands, coastal zones, or other areas of critical environmental concern.

(c) The disposal of nuclear materials, munitions, explosives, industrial and military chemicals, and other hazardous or toxic substances that have the potential to cause significant environmental impact.

(d) Land acquisition, leasing, or other actions that may lead to significant changes in land use.

(e) Realignment or stationing of a brigade or larger table of organization equipment (TOE) unit during peacetime (except where the only significant impacts are socioeconomic, with no significant biophysical environmental impact).

(f) Training exercises conducted outside the boundaries of an existing military reservation where significant environmental damage might occur.

(g) Major changes in the mission or facilities either affecting environmentally sensitive resources (see §651.29(c)) or causing significant environmental impact (see §651.39).

§ 651.43 Format of the EIS.

The EIS should not exceed 150 pages in length (300 pages for very complex proposals), and must contain the following (detailed content is discussed in appendix E of this part):

(a) Cover sheet.

(b) Summary.
§ 651.44 Incomplete information.

When the proposed action will have significant adverse effects on the human environment, and there is incomplete or unavailable information, the proponent will ensure that the EIS addresses the issue as follows:

(a) If the incomplete information relevant to reasonably foreseeable significant adverse impacts is essential to a reasoned choice among alternatives and the overall costs of obtaining it are not exorbitant, the Army will include the information in the EIS.

(b) If the information relevant to reasonably foreseeable significant adverse impacts cannot be obtained because the overall costs of obtaining it are exorbitant or the means to obtain it are not known (for example, the means for obtaining it are beyond the state of the art), the proponent will include in the EIS:

(1) A statement that such information is incomplete or unavailable.

(2) A statement of the relevance of the incomplete or unavailable information to evaluating the reasonably foreseeable significant adverse impacts on the human environment.

(3) A summary of existing credible scientific evidence that is relevant to evaluating the reasonably foreseeable significant adverse impacts on the human environment.

(4) An evaluation of such impacts based upon theoretical approaches or research methods generally accepted in the scientific community.

§ 651.45 Steps in preparing and processing an EIS.

(a) NOI. The NOI initiates the formal scoping process and is prepared by the proponent.

(1) Prior to preparing an EIS, an NOI will be published in the FR and in newspapers with appropriate or general circulation in the areas potentially affected by the proposed action. The OCLL will be notified by the ARSTAF proponent of pending EISs so that congressional coordination may be effected. After the NOI is published in the FR, copies of the notice may also be distributed to agencies, organizations, and individuals, as the responsible official deems appropriate.

(2) The NOI transmittal package includes the NOI, the press release, information for Members of Congress, memorandum for correspondents, and a “questions and answers” (Q&A) package. The NOI shall clearly state the proposed action and alternatives, and state why the action may have unknown and/or significant environmental impacts.

(b) Lead and cooperating agency determination. As soon as possible after the decision is made to prepare an EIS, the proponent will coordinate the NOI with HQDA (ARSTAF) proponent for coordination and staffing prior to publication. The ARSTAF proponent will coordinate the NOI with HQDA (ODEP), OCLL, TJAG, OGC, OCPA, relevant MACOMs, and others. Only the Deputy Assistant Secretary of the Army for Environment, Safety, and Occupational Health (DASA(ESOH)) can authorize release of an NOI to the FR for publication, unless that authority has been delegated. A cover letter (similar to Figure 5 in § 651.46) will accompany the NOI. An example NOI is shown in Figure 6 in § 651.46.

(b) Lead and cooperating agency determination. As soon as possible after the decision is made to prepare an EIS, the proponent will contact appropriate federal, tribal, state, and local agencies to identify lead or cooperating agency responsibilities concerning EIS preparation. At this point, a public affairs plan must be developed. In the case of State ARNG actions that have federal funding, the NGB will be the lead agency for the purpose of federal compliance with NEPA. The State may be either a
(c) Scoping. The proponent will begin the scoping process described in §651.48. Portions of the scoping process may take place prior to publication of the NOI.

(d) DEIS preparation and processing. Prior to publication of a DEIS, the proponent can prepare a PDEIS, allowing for internal organization and the resolution of internal Army consideration, prior to a formal request for comments.

(1) PDEIS. Based on information obtained and decisions made during the scoping process, the proponent may prepare the PDEIS. To expedite headquarters review, a summary document is also required to present the purpose and need for the action, DOPAA, major issues, unresolved issues, major potential controversies, and required mitigations or monitoring. This summary will be forwarded, through the chain of command, to ODEP, the DASA(ESOH), and other interested offices for review and comment. If requested by these offices, a draft PDEIS can be provided following review of the summary. The PDEIS is not normally made available to the public and should be stamped “For Internal Use Only-Deliberative Process.”

(2) DEIS. The Army proponent will advise the DEIS preparer of the number of copies to be forwarded for final HQDA review and those for filing with the EPA. Distribution may include interested congressional delegations and committees, governors, national environmental organizations, the DOD and federal agency headquarters, and other selected entities. The Army proponent will finalize the FR NOA, the proposed news release, and the EPA filing letter for signature of the DASA(ESOH). A revised process summary of the contents (purpose and need for the action, DOPAA, major issues, unresolved issues, major potential controversies, and required mitigations or monitoring) will accompany the DEIS to HQDA for review and comment. If the action has been delegated by the ASA(I&E), only the process summary is required, unless the DEIS is requested by HQDA.

(i) When the DEIS has been formally approved, the preparer can distribute the DEIS to the remainder of the distribution list. The DEIS must be distributed prior to, or simultaneously with, filing with EPA. The list includes federal, state, regional, and local agencies, private citizens, and local organizations. The EPA will publish the NOA in the FR. The 45-day comment period begins on the date of the EPA notice in the FR.

(ii) Following approval, the proponent will forward five copies of the DEIS to EPA for filing and notice in the FR; publication of EPA’s NWR commences the public comment period. The proponent will distribute the DEIS prior to, or simultaneously with, filing with EPA. Distribution will include appropriate federal, state, regional, and local agencies; Native American tribes; and organizations and private citizens who have expressed interest in the proposed action.

(iii) For proposed actions that are environmentally controversial, or of national interest, the OCLL shall be notified of the pending action so that appropriate congressional coordination may be effected. The OCPA will coordinate public announcements through its chain of command. Proponents will ensure that the DEIS and subsequent NEPA documents are provided in electronic format to allow for maximum information flow throughout the process.

(e) Public review of DEIS. The DEIS public comment period will be no less than 45 days. If the statement is unusually long, a summary of the DEIS may be circulated, with an attached list of locations where the entire DEIS may be reviewed (for example, local public libraries). Distribution of the complete DEIS should be accompanied by the announcement of availability in established newspapers of major circulation, and must include the following:

(1) Any federal agency that has jurisdiction by law or special expertise with respect to any environmental impact involved and any appropriate federal, state, or local agency authorized to develop and enforce environmental standards.
(2) The applicant, if the proposed action involves any application of proposal for the use of Army resources.

(3) Any person, organization, or agency requesting the entire DEIS.

(4) Any Indian tribes, Native Alaskan organizations, or Native Hawaiian organizations potentially impacted by the proposed action.

(5) Chairs/co-chairs of any existing citizen advisory groups (for example, Restoration Advisory Boards).

(f) Public meetings or hearings. Public meetings or hearings on the DEIS will be held in accordance with the criteria established in 40 CFR 1506.6(c) and (d) or for any other reason the proponent deems appropriate. News releases should be prepared and issued to publicize the meetings or hearings at least 15 days prior to the meeting.

(g) Response to comments. Comments will be incorporated in the DEIS by modification of the text and/or written explanation. Where possible, similar comments will be grouped for a common response. The preparer or a higher authority may make individual response, if considered desirable.

(h) The FEIS. If the changes to the DEIS are exclusively clarifications or minor factual corrections, a document consisting of only the DEIS comments, responses to the comments, and errata sheets may be prepared and circulated. If such an abbreviated FEIS is anticipated, the DEIS should contain a statement advising reviewers to keep the document so they will have a complete set of "final" documents. The final EIS to be filed with EPA will consist of a complete document containing a new cover sheet, the errata sheets, comments and responses, and the text of the draft EIS. Coordination, approval, filing, and public notice of an abbreviated FEIS are the same as for a draft DEIS. If extensive modifications are warranted, the proponent will prepare a new, complete FEIS. Preparation, coordination, approval, filing, and public notice of the FEIS are the same as the process outlined for the DEIS. The FEIS distribution must include any person, organization, or agency that submitted substantive comments on the DEIS. One copy (electronic) of the FEIS will be forwarded to ODEP. The FEIS will clearly identify the Army's preferred alternative unless prohibited by law.

(i) Decision. No decision will be made on a proposed action until 30 days after EPA has published the NWR of the FEIS in the FR, or 90 days after the NWR of the DEIS, whichever is later. EPA publishes NWRs weekly. Those NWRs ready for EPA by close of business Friday are published in the next Friday's issue of the FR.

(j) ROD. The ROD documents the decision made and the basis for that decision.

(1) The proponent will prepare a ROD for the decision maker’s signature, which will:

(i) Clearly state the decision by describing it in sufficient detail to address the significant issues and ensure necessary long-term monitoring and execution.

(ii) Identify all alternatives considered by the Army in reaching its decision, specifying the environmentally preferred alternative(s). The Army will discuss preferences among alternatives based on relevant factors including environmental, economic, and technical considerations and agency statutory missions.

(iii) Identify and discuss all such factors, including any essential considerations of national policy that were balanced by the Army in making its decision. Because economic and technical analyses are balanced with environmental analysis, the agency preferred alternative will not necessarily be the environmentally preferred alternative.

(iv) Discuss how those considerations entered into the final decision.

(v) State whether all practicable means to avoid or minimize environmental harm from the selected alternative have been adopted, and if not, why they were not.

(vi) Identify or incorporate by reference the mitigation measures that were incorporated into the decision.

(2) Implementation of the decision may begin immediately after approval of the ROD.

(3) The proponent will prepare an NOA to be published in the FR by the HQDA proponent, following congressional notification. Processing and approval of the NOA is the same as for an NOI.
(4) RODs will be distributed to agencies with authority or oversight over aspects of the proposal, cooperating agencies, appropriate congressional, state, and district offices, all parties that are directly affected, and others upon request.

(5) One electronic copy of the ROD will be forwarded to ODEP.

(6) A monitoring and enforcement program will be adopted and summarized for any mitigation (see Appendix C of this part).

(k) Pre-decision referrals. 40 CFR part 1504 specifies procedures to resolve federal agency disagreements on the environmental effects of a proposed action. Pre-decision referrals apply to interagency disagreement on a proposed action’s potential unsatisfactory effects.

(l) Changes during preparation. If there are substantial changes in the proposed action, or significant new information relevant to environmental concerns during the proposed action’s planning process, the proponent will prepare revisions or a supplement to any environmental document or prepare new documentation as necessary.

(m) Mitigation. All measures planned to minimize or mitigate expected significant environmental impacts will be identified in the EIS and the ROD. Implementation of the mitigation plan is the responsibility of the proponent (see Appendix C of this part). The proponent will make available to the public, upon request, the status and results of mitigation measures associated with the proposed action. For weapon system acquisition programs, the proponent will coordinate with the appropriate responsible parties before identifying potential mitigations in the EIS/ROD.

(n) Implementing the decision. The proponent will provide for monitoring to assure that decisions are carried out, particularly in controversial cases or environmentally sensitive areas (Appendix C of this part). Mitigation and other conditions that have been identified in the EIS, or during its review and comment period, and made part of the decision (and ROD), will be implemented by the lead agency or other appropriate consenting agency. The proponent will:

(1) Include appropriate conditions in grants, permits, or other approvals.

(2) Ensure that the proponent’s project budget includes provisions for mitigations.

(3) Upon request, inform cooperating or commenting agencies on the progress in carrying out adopted mitigation measures that they have proposed and that were adopted by the agency making the decision.

(4) Upon request, make the results of relevant monitoring available to the public and Congress.

(5) Make results of relevant monitoring available to citizens advisory groups, and others that expressed such interest during the EIS process.

§ 651.46 Existing EISs.

A newly proposed action must be the subject of a separate EIS. The proponent may extract and revise the existing environmental documents in such a way as to bring them completely up to date, in light of the new proposals. Such a revised EIS will be prepared and processed entirely under the provisions of this part. If an EIS of another agency is adopted, it must be processed in accordance with 40 CFR 1506.3. Figures 4 through 8 to Subpart F of part 651 follow:
Figure 4. Steps in preparing and processing an environmental impact statement.
January 14, 1999

Director
Office of the Federal Register
National Archives and Records Administration
Washington, D.C. 20408

Dear Sir:

The enclosed notice of intent (NOI) to prepare an Environmental Impact Statement for the Fort Sill Real Property Master Plan is submitted for publication in the Notice section of the Federal Register.

Please publish this NOI in the earliest possible edition of the Federal Register. This notice is required for the Department of the Army to perform its military mission and to comply with the National Environmental Policy Act and the President's Council on Environmental Quality regulations.

To confirm publication date of this notice or for further information, please contact Mr. Greg Brewer at (703) 692-9220.

Please bill this to charge code 3710-08-M.

Sincerely,

Raymond J. Palitz
Deputy Assistant Secretary of the Army
(Enviro, Safety and Occupational Health)
OASA(L&E)

Enclosure

Figure 5. Sample Notice of Intent Transmittal Letter.
Pt. 651, Subpt. F, Figs.

DEPARTMENT OF DEFENSE
Department of the Army

Notice of Intent to Prepare a Programmatic Environmental Impact Statement for the Real Property Master Plan, Fort Sill, Okla.

AGENCY: Department of the Army, DoD

ACTION: Notice of Intent

SUMMARY: This announced the intention of the U.S. Army Field Artillery Center and Fort Sill, Fort Sill, Okla., to prepare an Environmental Impact Statement (EIS) in support of revisions to the installations’ Real Property Master Plan (RMP). The purpose is to evaluate the environmental impacts associated with the RMP’s implementation.

ADDRESSES: Written comments may be forwarded to the U.S. Army Corps of Engineers, ATTN: CEMT-PF-E (J. Randolph), P.O. Box 61, Tulsa, Okla. 74121-0061.

FOR FURTHER INFORMATION CONTACT: Mr. Bob Kerr, Directorate of Environmental Quality, U.S. Army Field Artillery Center and Fort Sill, at (580) 442-3409.

SUPPLEMENTARY INFORMATION: The Fort Sill RMP has the potential to significantly impact certain natural, economic, social, and cultural resources of the Fort Sill community. The study area for environmental analysis will be the entire Fort Sill installation. The objective is to provide a comprehensive and programmatic EIS that will serve as a planning tool, a public information source, and a reference for mitigation tracking.

Alternatives may consist of alternative locations for specific projects, partial implementation of the specific project, or other modifications of the specific project. The alternatives will be developed during preparation of the Draft EIS (DEIS) as a result of public input and of environmental analysis of the proposals within the plan.

SIGNIFICANT ISSUES: The Fort Sill reservation contains approximately 94,221 acres of land. Some of this land serves as potential habitat for protected species of wildlife. Of the areas within the installation that have been surveyed to date for cultural resources, 892 properties have been identified and recorded. Nearly all of the current and proposed RMP projects are sited with the 6,015 acre cantonment area, where the majority of the installation’s historic buildings are located.

The significant issues the EIS will analyze will include the following:

1. Development of a large deployment marshaling area near an existing railhead facility; whereby, new railroad tracks, loading docks, switching facilities, hardstand areas, and fencing would be developed.

2. Redesignation of land use: whereby, land use zoning would be redesignated to provide for the construction of new and expansion of existing motor pool areas.

3. Probably construction projects: whereby, the following projects would be complete: (1) new multiple launch rocket system (MLRS) range firing points in the training areas; (2) a liquid fuel facility; (3) a unit movements facility; and (4) a contingency warehouse.

Public scoping meetings will be held in the vicinity of Fort Sill to facilitate input to the EIS process by citizens and organizations. The date and time of these meetings will be announced in general media and will be at times and locations convenient to the public. To be considered in the Draft EIS, comments and suggestions should be received no later than 15 days following the public scoping meeting.

DATED: January 14, 1999

Figure 6. Sample of Notice of Intent.
March 25, 1999

Director
Office of Federal Activities
U. S. Environmental Protection Agency
1200 Pennsylvania Avenue, NW
Washington, D. C. 20044

Dear Sir:

Enclosed are five copies of the Draft Environmental Impact Statement for the Disposal and Reuse of the Military Ocean Terminal, Bayonne, New Jersey.

These copies are forwarded for filing in accordance with the President's Council on Environmental Quality regulations for implementing the provisions of the national Environmental Policy Act (40 CFR, Parts 1500-1508).

The point of contact for this action is Ms. Theresa Persick-Arnold at (703) 697-0216.

Sincerely,

Raymond J. Fritz
Deputy Assistant Secretary of the Army
(Environment, Safety and Occupational Health)
OASA(I&E)

Enclosures

Figure 7. Sample Letter of Transmittal of Draft Environmental Impact Statement to the Environmental Protection Agency.
Subpart G—Public Involvement and the Scoping Process

§ 651.47 Public involvement.

(a) As a matter of Army policy, public involvement is required for all EISs, and is strongly encouraged for all Army actions, including EAs. The requirement (40 CFR 1506.6) for public involvement recognizes that all potentially interested or affected parties will be involved, when practicable, whenever analyzing environmental considerations. This requirement can be met at the very beginning of the process by developing a plan to include all affected parties and implementing the plan with appropriate adjustments as it proceeds (AR 360–5). The plan will include the following:

1. Information dissemination to local and installation communities through such means as news releases to local media, announcements to local citizens groups, and Commander’s letters at each phase or milestone (more frequently if needed) of the project. The dissemination of this information will be based on the needs and desires of the local communities.

2. Each phase or milestone (more frequently if needed) of the project will be coordinated with representatives of local, state, tribal, and federal government agencies.

3. Public comments will be invited and two-way communication channels
will be kept open through various means as stated above. These two-way channels will be dynamic in nature, and should be updated regularly to reflect the needs of the local community.

(d) Public affairs officers at all levels will be kept informed.

(b) When an EIS is being prepared, public involvement is a requisite element of the scoping process (40 CFR 1501.7(a)(1)).

(c) Proponents will invite public involvement in the review and comment of EAs and draft FNISs (40 CFR 1506.6).

(d) Persons and agencies to be consulted include the following:

(1) Municipal, township, and county elected and appointed officials.

(2) Tribal, state, county, and local government officials and administrative personnel whose official duties include responsibility for activities or components of the affected environment related to the proposed Army action.

(3) Local and regional administrators of other federal agencies or commissions that may either control resources potentially affected by the proposed action (for example, the U.S. Fish and Wildlife Service); or who may be aware of other actions by different federal agencies whose effects must be considered with the proposed Army action (for example, the GSA).

(4) Members of existing citizen advisory groups, such as Restoration Advisory Boards and Citizen Advisory Commissions.

(5) Members of identifiable population segments within the potentially affected environments, whether or not they have clearly identifiable leaders or an established organization, such as farmers and ranchers, homeowners, small business owners, minority communities and disadvantaged communities, and tribal governments in accordance with White House Memorandum on Government to Government Relations with Native American Tribal Governments (April 29, 1994).

(6) Members and officials of those identifiable interest groups of local or national scope that may have interest in the environmental effects of the proposed action or activity (for example, hunters and fishermen, Izaak Walton League, Sierra Club, and the Audubon Society).

(7) Any person or group that has specifically requested involvement in the specific action or similar actions.

(e) The public involvement processes and procedures through which participation may be solicited include the following:

(1) Direct individual contact. Such interaction can identify persons and their opinions and initial positions, affecting the scope of issues that the EIS must address. Such limited contact may satisfy public involvement requirements when the expected significance and controversy of environmental effects is very limited.

(2) Small workshops or discussion groups.

(3) Larger public gatherings that are held after some formulation of the potential issues. The public is invited to express its views on the proposed courses of action. Public suggestions or alternative courses of action not already identified may be expressed at these gatherings that need not be formal public hearings.

(4) Identifying and applying other processes and procedures to accomplish the appropriate level of public involvement.

(f) The meetings described in paragraph (e) of this section should not be public hearings in the early stages of evaluating a proposed action. Public hearings do not substitute for the full range of public involvement procedures under the purposes and intent, as described in paragraph (e) of this section.

(g) Public surveys or polls may be performed to identify public opinion of a proposed action, as appropriate (AR 355–15).

§ 651.48 Scoping process.

(a) The scoping process (40 CFR 1501.7) is intended to aid in determining the scope of the analyses and significant issues related to the proposed action. The process requires appropriate public participation immediately following publication of the NOI in the FR. It is important to note that scoping is not synonymous with a public meeting. The Army policy is that EISs for legislative proposals significantly affecting the environment will
go through scoping unless extenuating circumstances make it impractical. In some cases, the scoping process may be useful in the preparation of EAs and should be employed when it is useful.

(b) The scoping process identifies relevant issues related to a proposed action through the involvement of all potentially interested or affected parties (affected federal, state, and local agencies; recognized Indian tribes; interest groups, and other interested persons) in the environmental analysis and documentation. This process should:

(1) Eliminate issues from detailed consideration which are not significant, or which have been covered by prior environmental review; and

(2) Make the analysis and documentation more efficient by providing focus to the effort. Proper scoping identifies reasonable alternatives and the information needed for their evaluation, thereby increasing public confidence in the Army decisionmaking process.

(c) Proper scoping will reduce both costs and time required for an EA or EIS. This is done through the documentation of all potential impacts and the focus of detailed consideration on those aspects of the action which are potentially significant or controversial. To assist in this process the Army will use the Environmental Impact Computer System (EICS) starting in Fiscal Year (FY) 04, as appropriate. This system will serve to structure all three stages of the scoping process (§§651.49, 651.50, and 651.51) and provide focus on those actions that are important and of interest to the public. While these discussions focus on EIS preparation and documents to support that process, the three phases also apply if scoping is used for an EA. If used in the preparation of an EA, scoping, and documents to support that process, can be modified and adopted to ensure efficient public iteration and input to the decision-making process.

(d) When the planning for a project or action indicates the need for an EIS, the proponent initiates the scoping process to identify the range of actions, alternatives, and impacts for consideration in the EIS (40 CFR 1508.25). The extent of the scoping process (including public involvement) will depend upon:

(1) The size and type of the proposed action.

(2) Whether the proposed action is of regional or national interest.

(3) Degree of any associated environmental controversy.

(4) Importance of the affected environmental parameters.

(5) Significance of any effects on them.

(6) Extent of prior environmental review.

(7) Involvement of any substantive time limits.

(8) Requirements by other laws for environmental review.

(e) The proponent may incorporate scoping in the public involvement (or environmental review) process of other requirements, such as an EA. In such cases, the extent of incorporation is at the discretion of the proponent, working with the affected Army organization or installation. Such integration is encouraged.

(f) Scoping procedures fall into preliminary, public interaction, and final phases. These phases are discussed in §§651.49, 651.50, and 651.51, respectively.

§ 651.49 Preliminary phase.

In the preliminary phase, the proponent agency or office identifies, as early as possible, how it will accomplish scoping and with whose involvement. Key points will be identified or briefly summarized by the proponent, as appropriate, in the NOI, which will:

(a) Identify the significant issues to be analyzed in the EIS.

(b) Identify the office or person responsible for matters related to the scoping process. If they are not the same as the proponent of the action, that distinction will be made.

(c) Identify the lead and cooperating agency, if already determined (40 CFR 1501.5 and 1501.6).

(d) Identify the method by which the agency will invite participation of affected parties, and identify a tentative list of the affected parties to be notified. A key part of this preliminary identification is to solicit input regarding other parties who would be interested in the proposed project or affected by it.
(e) Identify the proposed method for accomplishing the scoping procedure.

(f) Indicate the relationship between the timing of the preparation of environmental analyses and the tentative planning and decisionmaking schedule including:

(1) The scoping process itself.
(2) Collection or analysis of environmental data, including required studies.
(3) Preparation of draft and final EISs (DEISs and FEISs), and associated review periods.
(4) Filing of the ROD.
(5) Taking the action.
(6) For a programmatic EIS, preparation of a general expected schedule for future specific implementing (tiered) actions that will involve separate environmental analysis.

(g) If applicable, identify the extent to which the EIS preparation process is exempt from any of the normal procedural requirements of this part, including scoping.

§ 651.50 Public interaction phase.

(a) During this portion of the process, the proponent will invite comments from all affected parties and respondents to the NOI to assist in developing issues for detailed discussion in the EIS. Assistance in identifying possible participants is available from the ODEP.

(b) In addition to the affected parties identified in paragraph (a) of this section, participants should include the following:

(1) Technical representatives of the proponent. Such persons must be able to describe the technical aspects of the proposed action and alternatives to other participants.
(2) One or more representatives of any Army-contracted consulting firm, if one has been retained to participate in writing the EIS or providing reports that the Army will use to create substantial portions of the EIS.

(3) Experts in various environmental disciplines, in any technical area where foreseen impacts are not already represented among the other scoping participants.

(c) In all cases, the participants will be provided with information developed during the preliminary phase and with as much of the following information that may be available:

(1) A brief description of the environment at the affected location. When descriptions for a specific location are not available, general descriptions of the probable environmental effects will be provided. This will also address the extent to which the environment has been modified or affected in the past.

(2) A description of the proposed alternatives. The description will be sufficiently detailed to enable evaluation of the range of impacts that may be caused by the proposed action and alternatives. The amount of detail that is sufficient will depend on the stage of the development of the proposal, its magnitude, and its similarity to other actions with which participants may be familiar.

(3) A tentative identification of “any public environmental assessments and other environmental impact statements that are being or will be prepared that are related to but are not part of the scope of the impact statement under consideration” (40 CFR 1501.7(a)(5)).

(4) Any additional scoping issues or limitations on the EIS, if not already described during the preliminary phase.

(d) The public involvement should begin with the NOI to publish an EIS. The NOI may indicate when and where a scoping meeting will take place and who to contact to receive preliminary information. The scoping meeting is an informal public meeting, and initiates a continuous scoping process, allowing the Army to scope the action and the impacts of alternatives. It is a working session where the gathering and evaluation of information relating to potential environmental impacts can be initiated.

(e) Starting with this information (paragraph (d) of this section), the person conducting the scoping process will use input from any of the involved or affected parties. This will aid in developing the conclusions. The proponent determines the final scope of the EIS. If the proponent chooses not to require detailed treatment of significant issues or factors in the EIS, in spite of relevant technical or scientific objections by any participant, the proponent will
clearly identify (in the environmental consequences section of the EIS) the criteria that were used to eliminate such factors.

§ 651.51 The final phase.

(a) The initial scope of the DEIS is determined by the proponent during and after the public interaction phase of the process. Detailed analysis should focus on significant issues (40 CFR 1501.7(a)(2)). To determine the appropriate scope, the proponent must consider three categories of actions, alternatives, and impacts.

(i) The three categories of actions (other than unconnected single actions) are as follows:

(ii) Connected actions are those that are closely related and should be discussed in the same impact statement. Actions are connected if they automatically trigger other actions that may require EISs, cannot or will not proceed unless other actions are previously or simultaneously taken, are interdependent parts of a larger action, and depend on the larger action for their justification.

(iii) Cumulative actions are those that, when viewed with other past and proposed actions, have cumulatively significant impacts and should be discussed in the same impact statement.

(iv) Similar actions are those that have similarities which provide a basis for evaluating their environmental consequences together, such as common timing or geography, and may be analyzed in the EIS. Agencies should do so when the best way to assess such actions is to treat them in a single EIS.

(b) The identification and elimination of issues that are insignificant, non-controversial, or covered by prior environmental review can narrow the analysis to remaining issues and their significance through reference to their coverage elsewhere (40 CFR 1501.7(a)(3)).

(c) As part of the scoping process, the lead agency may:

(1) Set time limits, as provided in §651.14(b), if they were not already indicated in the preliminary phase.

(2) Prescribe overall page limits for the EIS in accordance with the CEQ regulations that emphasize conciseness.

(d) All determinations reached by the proponent during the scoping process will be clearly conveyed to the preparers of the EIS in a Scope of Statement. The Scope of Statement will be made available to participants in the scoping process and to other interested parties upon request. Any scientific or technical conflicts that arise between the proponent and scoping participants, cooperating agencies, other federal agencies, or preparers will be identified during the scoping process and resolved or discussed by the proponent in the DEIS.

§ 651.52 Aids to information gathering.

The proponent may use or develop graphic or other innovative methods to aid information gathering, presentation, and transfer during the three scoping phases. These include methods for presenting preliminary information to scoping participants, obtaining and consolidating input from participants, and organizing determinations on scope for use during preparation of the DEIS. The use of the World Wide Web
(WWW) for these purposes is encouraged. Suggested uses include the implementation of a continuous scoping process, facilitating “virtual” public participation, as well as the dissemination of analyses and information as they evolve.

§ 651.53 Modifications of the scoping process.

(a) If a lengthy period exists between a decision to prepare an EIS and the time of preparation, the proponent will initiate the NOI at a reasonable time in advance of preparation of the DEIS. The NOI will state any tentative conclusions regarding the scope of the EIS made prior to publication of the NOI. Reasonable time for public participation will be allowed before the proponent makes any final decisions or commitments on the EIS.

(b) The proponent of a proposed action may use scoping during preparation of environmental review documents other than an EIS, if desired. In such cases, the proponent may use these procedures or may develop modified procedures, as needed.

Subpart H—Environmental Effects of Major Army Action Abroad

§ 651.54 Introduction.

(a) Protection of the environment is an Army priority, no matter where the Army actions are undertaken. The Army is committed to pursuing an active role in addressing environmental quality issues in Army relations with neighboring communities and assuring that consideration of the environment is an integral part of all decisions. This section assigns responsibilities for review of environmental effects abroad of major Army actions, as required by Executive Order 12114, Environmental Effects Abroad of Major Federal Actions, dated January 4, 1979, 3 CFR, 1979 Comp., p. 356. This section applies to HQDA and Army agencies’ actions that would significantly affect the quality of the human environment outside the United States.

(b) Executive Order 12114 and DODD 6050.7, Environmental Effects Abroad of Major Department of Defense Actions (planned currently to be replaced by a DODI, Analyzing Defense Actions With the Potential for Significant Impacts Outside the United States) provide guidance for analyzing the environmental impacts of Army actions abroad and in the global commons. Army components will, consistent with diplomatic factors (including applicable Status of Forces Agreements (SOFAs) and stationing agreements), national security considerations, and difficulties of obtaining information, document the review of potential environmental impacts of Army actions abroad and in the global commons as set forth in DODD 6050.7 (or DODI upon publication). The analysis and documentation of potential environmental impacts of Army actions abroad and in the global commons should, to the maximum extent possible, be incorporated into existing decision-making processes; planning for military exercises, training plans, and military operations.

§ 651.55 Categorical exclusions.

The list of CXs in Appendix B of this part may be used in reviewing potential environmental impacts of major actions abroad and in the global commons, in accordance with DODD 6050.7 (or DODI upon publication) and Executive Order 12114, section 2–5(c).

§ 651.56 Responsibilities.

(a) The ASA(I&E) will:

(1) Serve as the Secretary of the Army’s responsible official for environmental matters abroad.

(2) Maintain liaison with the DUSD(IE) on matters concerning Executive Order 12114, DODD 6050.7, and this part.

(3) Coordinate actions with other Secretariat offices as appropriate.

(b) The DEP will:

(1) Serve as ARSTAF proponent for implementation of Executive Order 12114, DODD 6050.7, and this part.

(2) Apply this part when planning and executing overseas actions, where appropriate in light of applicable statutes and SOFAs.

(c) The DCSOPS will:

(1) Serve as the focal point on the ARSTAF for integrating environmental considerations required by Executive Order 12114 into Army plans and activities. Emphasis will be placed
on those actions reasonably expected to have widespread, long-term, and severe impacts on the global commons or the territories of foreign nations.

(2) Consult with the Office of Foreign Military Rights Affairs of the Assistant Secretary of Defense (International Security Affairs) (ASD(ISA)) on significant or sensitive actions affecting relations with another nation.

(d) TJAG, in coordination with the OGC, will provide advice and assistance concerning the requirements of Executive Order 12114 and DODD 6050.7.

(e) The Chief of Public Affairs will provide advice and assistance on public affairs as necessary.

APPENDIX A TO PART 651—REFERENCES

Military publications and forms are accessible from a variety of sources through the use of electronic media or paper products. In most cases, electronic publications and forms that are associated with military organizations can be accessed at various addresses or web sites on the Internet. Since electronic addresses can frequently change, or similar web links can also be modified at several locations on the Internet, it’s advisable to access those sites using a search engine that is most accommodative, yet beneficial to the user. Additionally, in an effort to facilitate the public right to information, certain publications can also be purchased through the National Technical Information Service (NTIS). Persons interested in obtaining certain types of publications can write to the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161.

Section I—Required Publications

AR 360–5
Army Public Affairs, Public Information.

Section II—Related Publications

A related publication is merely a source of additional information. The user does not have to read it to understand this part.

APPENDIX B TO PART 651—CATEGORICAL EXCLUSIONS

Section I—Screening Criteria
Before any CXs can be used, Screening Criteria as referenced in §651.29 must be met.

Section II—List of CXs
(a) For convenience only, the CXs are grouped under common types of activities
(for example, administration/ operation, construction/demolition, and repair and maintenance). Certain CXs require a REC, which will be completed and signed by the proponent. Concurrence on the use of a CX is required from the appropriate environmental officer (EO), and that signature is required on the REC. The list of CXs is subject to continual review and modification. Requests for additions or changes to the CXs (along with justification) should be sent, through channels, to the ASA (I&E). Subordinate Army headquarters may not modify the CX list through supplements to this part. Proposed modifications to the list of CXs will be published in the FR by HQDA, to provide opportunity for public comment.

(b) Administration/operation activities:

(1) Routine law and order activities performed by military/military police and physical plant protection and security personnel, and civilian natural resources and environmental law officers.

(2) Emergency or disaster assistance provided to federal, state, or local entities (REC required).

(3) Preparation of regulations, procedures, manuals, and other guidance documents that implement, without substantive change, the applicable HQDA or other federal agency regulations, procedures, manuals, and other guidance documents that have been environmentally evaluated (subject to previous NEPA review).

(4) Proposed activities and operations to be conducted in an existing non-historic structure which are within the scope and compatibility of the present functional use of the building, will not result in a substantial increase in waste discharged to the environment, will not result in substantially different waste discharges from current or previous activities, and emissions will remain within established permit limits, if any (REC required).

(5) Normal personnel, fiscal, and administrative activities involving military and civilian personnel (recruiting, processing, paying, and records keeping).

(6) Routinely conducted recreation and welfare activities not involving off-road recreational vehicles.

(7) Deployment of military units on a temporary duty (TDY) or training basis where the capacity of the supporting road network to accommodate such an increase is an example of substantial change (REC required).

(8) Preparation of administrative or personnel-related studies, reports, or investigations.

(9) Approval of asbestos or lead-based paint management plans drafted in accordance with applicable laws and regulations (REC required).

(10) Non-construction activities in support of other agencies/organizations involving community participation projects and law enforcement activities.

(11) Ceremonies, funerals, and concerts. This includes events such as state funerals, to include flyovers.

(12) Reductions and realignments of civilian and/or military personnel that: fall below the thresholds for reportable actions as prescribed by statute (10 U.S.C. 2887) and do not involve related activities such as construction, renovation, or demolition activities that would otherwise require an EA or an EIS to implement (REC required). This includes reorganizations and reassignments with no changes in force structure, unit redesignations, and routine administrative reorganizations and consolidations (REC required).

(13) Actions affecting Army property that fall under another federal agency’s list of categorical exclusions when the other federal agency is the lead agency (decision maker), or joint actions on another federal agency’s property that fall under that agency’s list of categorical exclusions (REC required).

(14) Relocation of personnel into existing federally-owned (or state-owned in the case of ARNG) or commercially-leased space, which does not involve a substantial change in the supporting infrastructure (for example, an increase in vehicular traffic beyond the capacity of the supporting road network to accommodate such an increase is an example of substantial change) (REC required).

(c) Construction and demolition:

(1) Construction of an addition to an existing structure or new construction on a previously undisturbed site if the area to be disturbed has no more than 5.0 cumulative acres of new surface disturbance. This does not include construction of facilities for the transportation, distribution, use, storage, treatment, and disposal of solid waste, medical waste, and hazardous waste (REC required).

(2) Demolition of non-historic buildings, structures, or other improvements and disposal of debris therefrom, or removal of a part thereof for disposal, in accordance with applicable regulations, including those regulations applying to removal of asbestos, polychlorinated biphenyls (PCBs), lead-based paint, and other special hazard items (REC required).

(3) Road or trail construction and repair on existing rights-of-ways or on previously disturbed areas.

(4) Cultural and natural resource management activities:

(1) Land regeneration activities using only native trees and vegetation, including site preparation. This does not include forestry operations (REC required).
(2) Routine maintenance of streams and ditches or other rainwater conveyance structures (in accordance with USACE permit authority under Section 404 of the Clean Water Act and applicable state and local permits), and erosion control and stormwater control structures (REC required).

(d) Implementation of hunting and fishing policies or regulations that are consistent with state and local regulations.

(4) Studies, data collection, monitoring and information gathering that do not involve major surface disturbance. Examples include topographic surveys, bird counts, wetland mapping, and other resources inventories (REC required).

(5) Maintenance of archaeological, historical, and endangered/threatened species avoidance markers, fencing, and signs.

(e) Procurement and contract activities:

(1) Routine procurement of goods and services (complying with applicable procedures for sustainable or "green" procurement) to support operations and infrastructure, including routine utility services and contracts.

(2) Acquisition, installation, and operation of utility and communication systems, mobile antennas, data processing cable and similar electronic equipment that use existing right-of-way, easement, distribution systems, and/or facilities (REC required).

(3) Conversion of commercial activities under the provisions of AR 5-20. This includes only those actions that do not change the actions or the missions of the organization or alter the existing land-use patterns.

(4) Modification, product improvement, or configuration engineering design change to materiel, structure, or item that does not change the original impact of the materiel, structure, or item on the environment (REC required).

(5) Procurement, testing, use, and/or conversion of a commercially available product (for example, forklift, generator, chain saw, etc.) which does not meet the definition of a weapon system (Title 10, U.S.C., Section 2403, "Major weapon systems: Contractor guarantees"), and does not result in any unusual disposal requirements.

(6) Acquisition or contracting for spares and spare parts, consistent with the approved Technical Data Package (TDP).

(7) Modification and adaptation of commercially available items and products for military application (for example, sportsman’s products and wear such as holsters, shotguns, sidearms, protective shields, etc.), as long as modifications do not alter the normal impact to the environment (REC required).

(8) Adaptation of non-lethal munitions and restraints from law enforcement suppliers and industry (such as rubber bullets, stun grenades, smoke bombs, etc.) for military police and crowd control activities where there is no change from the original product design and there are no unusual disposal requirements. The development and use by the military of non-lethal munitions and restraints which are similar to those used by local police forces and in which there are no unusual disposal requirements (REC required).

(f) Real estate activities:

(1) Grants or acquisitions of leases, licenses, easements, and permits for use of real property or facilities in which there is no significant change in land or facility use. Examples include, but are not limited to, Army controlled property and Army leases of civilian property to include leases of training, administrative, general use, special purpose, or warehouse space (REC required).

(2) Disposal of excess easement areas to the underlying fee owner (REC required).

(3) Transfer of real property administrative control within the Army, to another military department, or to other federal agency, including the return of public domain lands to the Department of Interior, and reporting of property as excess and surplus to the GSA for disposal (REC required).

(4) Transfer of active installation utilities to a commercial or governmental utility provider, except for those systems on property that has been declared excess and proposed for disposal (REC required).

(5) Acquisition of real property (including facilities) where the land use will not change substantially or where the land acquired will not exceed 40 acres and the use will be similar to current or ongoing Army activities on adjacent land (REC required).

(6) Disposal of real property (including facilities) by the Army where the reasonably foreseeable use will not change significantly (REC required).

(g) Repair and maintenance activities:

(1) Routine repair and maintenance of buildings, airfields, grounds, equipment, and other facilities. Examples include, but are not limited to: Removal and disposal of asbestos-containing material (for example, roof material and floor tile) or lead-based paint in accordance with applicable regulations; removal of dead, diseased, or damaged trees; and repair of roofs, doors, windows, or fixtures (REC required for removal and disposal of asbestos-containing material and lead-based paint or work on historic structures).

(2) Routine repairs and maintenance of roads, trails, and firebreaks. Examples include, but are not limited to: grading and clearing the roadside of brush with or without the use of herbicides; resurfacing a road to its original conditions; pruning vegetation, removal of dead, diseased, or damaged trees and cleaning culverts; and minor soil stabilization activities.

(3) Routine repair and maintenance of equipment and vehicles (for example, autos,
tractor, lawn equipment, military vehicles, etc.) which is substantially the same as that routinely performed by private sector owners and operators of similar equipment and vehicles. This does not include depot maintenance of unique military equipment.

(h) Hazardous materials/hazardous waste management and operations:

(1) Use of gauging devices, analytical instruments, and other devices containing sealed radiological sources; use of industrial radiography; use of radioactive material in medical and veterinary practices; possession of radioactive material incident to performing services such as installation, maintenance, leak tests, and calibration; use of uranium as shielding material in containers or devices; and radioactive tracers (REC required).

(2) Immediate responses in accordance with emergency response plans (for example, Spill Prevention Control and Countermeasure Plan (SPCC)/Installation Spill Contingency Plan (ISCP), and Chemical Accident and Incident Response Plan) for release or discharge of oil or hazardous materials/substances; or emergency actions taken by Explosive Ordnance Demolition (EOD) detachment or Technical Escort Unit.

(3) Sampling, surveying, well drilling and installation, analytical testing, site preparation, and intrusive testing to determine if hazardous wastes, contaminants, pollutants, or special hazards (for example, asbestos, PCBs, lead-based paint, or unexploded ordnance) are present (REC required).

(4) Routine management, to include transportation, distribution, use, storage, treatment, and disposal of solid waste, medical waste, radiological and special hazards (for example, asbestos, PCBs, lead-based paint, or unexploded ordnance) are present (REC required).

(5) Research, testing, and operations conducted at existing enclosed facilities consistent with previously established safety levels and in compliance with applicable federal, state, and local standards. For facilities without existing NEPA analysis, including contractor-operated facilities, if the operation will substantially increase the extent of potential environmental impacts or is controversial, an EA (and possibly an EIS) is required.

(6) Reutilization, marketing, distribution, donation, and resale of items, equipment, or materiel; normal transfer of items to the Defense Logistics Agency. Items, equipment, or materiel that have been contaminated with hazardous materials or wastes will be adequately cleaned and will conform to the applicable regulatory agency’s requirements.

1 Training and testing:

(1) Simulated war games (classroom setting) and on-post tactical and logistical exercises involving units of battalion size or smaller, and where tracked vehicles will not be used (REC required to demonstrate coordination with installation range control and environmental office).

(2) Training entirely of an administrative or classroom nature.

(3) Intermittent on-post training activities (or off-post training covered by an ARNG land use agreement) that involve no live fire or vehicles off established roads or trails. Uses include, but are not limited to, land navigation, physical training, Federal Aviation Administration (FAA) approved aerial overflights, and small unit level training.

(4) Aircraft and airfield activities:

(a) The CEQ regulations (40 CFR parts 1500–1508) recognize the following five means of mitigating an environmental impact. These five approaches to mitigation are presented in order of desirability.

(1) Avoiding the impact altogether by not taking a certain action or parts of an action. This method avoids environmental impact by eliminating certain activities in certain areas. As an example, the Army’s Integrated Training Area Management (ITAM) program accounts for training requirements and activities while considering natural and cultural resource conditions on ranges and training land. This program allows informed management decisions associated with the use of these lands, and has mitigated potential impacts by limiting activities to areas that are compatible with Army training needs. Sensitive habitats and other resources are thus protected, while the mission requirements are still met.

(2) Minimizing impacts by limiting the degree or magnitude of the action and its implementation. Limiting the degree or magnitude of the action can reduce the extent of
an impact. For example, changing the firing time or the number of rounds fired on artillery ranges will reduce the noise impact on nearby residents. Using the previous ITAM example, the conditions of ranges can be monitored, and, when the conditions on the land warrant, the intensity or magnitude of the training on that parcel can be modified through a variety of decisions.

(3) Rectifying the impact by repairing, re-habitatting, or restoring the effect on the environment. This method restores the environment to its previous condition or better. Movement of troops and vehicles across vegetated areas often destroys vegetation. Either reseeding or replanting the areas with native plants after the exercise can mitigate this impact.

(4) Reducing or eliminating the impact over time by preservation and maintenance operations during the life of the action. This method designs the action so as to reduce adverse environmental effects. Examples include maintaining erosion control structures, using air pollution control devices, and encouraging car pools in order to reduce transportation effects such as air pollution, energy consumption, and traffic congestion.

(5) Compensating for the impact by replacing or providing substitute resources or environments (40 CFR 1508.20). This method replaces the resource or environment that will be impacted by the action. Replacement can occur in-kind or otherwise; for example, deer habitat in the project area can be replaced with deer habitat in another area; an in-kind replacement at a different location. This replacement can occur either on the impact site or at another location. This type of mitigation is often used in water resources projects.

(b) The identification and evaluation of mitigations involves the use of experts familiar with the predicted environmental impacts. Many potential sources of information are available for assistance. These include sources within the Army such as the USACHPPM, the USARC, the MACOM environmental office, the ODEP, COE research laboratories, COE districts and divisions, and DoD Regional Support Centers. State agencies are another potential source of information, and the appropriate POC within these agencies may be obtained from the installation environmental office. Local interest groups may also be able to help identify potential mitigation measures. Other suggested sources of assistance include:

(1) Aesthetics:
   (i) Installation Landscape Architect.
   (ii) COE District Landscape Architect.
(2) Air Quality:
   (i) Installation Environmental Specialist.
   (ii) Installation Preventive Medicine Officer.
(3) Airspace:
   (i) Installation Air Traffic and Airspace Officers.
   (ii) DA Regional Representative to the FAA.
   (iii) DA Aeronautical Services.
   (iv) Military Airspace Management System Office.
(4) Earth Science:
   (i) Installation Environmental Specialist.
   (ii) USACE District Geotechnical Staff.
(5) Ecology:
   (i) Installation Environmental Specialist.
   (ii) Installation Wildlife Officer.
   (iii) Installation Forester.
   (iv) Installation Natural Resource Committee.
(6) USACE District Environmental Staff.
(8) Health and Safety:
   (i) Installation Preventive Medicine Officer.
   (ii) Installation Safety Officer.
   (iii) Installation Hospital.
   (iv) Installation Mental Hygiene or Psychiatry Officer.
   (v) Chaplain’s Office.
(9) Historic/Archaeological Resources:
   (i) Installation Environmental Specialist.
   (ii) Installation Historian or Architect.
   (iii) USACE District Archaeologist.
(10) Land Use Impacts:
   (i) Installation Master Planner.
   (ii) USACE District Community Planners.
(11) Socioeconomics:
   (i) Personnel Office.
   (ii) Public Information Officer.
   (iii) USACE District Economic Planning Staff.
(12) Water Quality:
   (i) Installation Environmental Specialist.
   (ii) Installation Preventive Medicine Officer.
   (iii) USACE District Environmental Staff.
(13) Noise:
   (i) Preventive Medicine Officer.
   (ii) Directorate of Public Works.
   (iii) Installation Master Planner.
(14) Training Impacts:
   (i) Installation Director of Plans, Training, and Mobilization
   (ii) Installation Environmental Specialist.
   (iii) Installation Range Control Officer.
   (iv) Military Airspace Management System Office.
(15) Transportation Effects:
   (i) Installation Range Control Officer.
   (ii) DA Aeronautical Services.
   (iii) Military Airspace Management System Office.
(16) Training Impacts:
   (i) Installation Environmental Specialist.
   (ii) Installation Preventive Medicine Officer.
   (iii) Installation Master Planner.
   (iv) Installation Range Control Officer.
   (v) Installation Natural Resource Committee.

(c) Several different mitigation techniques have been used on military installations for a number of years. The following examples illustrate the variety of possible measures:

(1) There are maneuver restrictions in areas used extensively for tracked vehicle training. These restrictions are not designed to infringe on the military mission, but rather to reduce the amount of damage to the training area.

(2) Aerial seeding has been done on some installations to reduce erosion problems.

(3) Changing the time and/or frequency of operations has been used. This may involve changing the season of the year, the time of
day, or even day of the week for various activities. These changes avoid noise impacts as well as aesthetic, transportation, and some ecological problems.

(4) Reducing environmental impacts. The effects of construction has involved using techniques that keep heavy equipment away from protected trees and quickly re-seeding areas after construction.

(5) Monitoring. The effectiveness and enforcement monitoring programs are applicable (40 CFR 1505.3(c)) and the specific adopted action is an important case (40 CFR 1505.3) if:

(1) There is a change in environmental conditions or project activities that were assumed in the EIS, such that original predictions of the extent of adverse environmental impacts may be too limited.

(2) The outcome of the mitigation measure is uncertain, such as in the case of the application of new technology.

(3) Major environmental controversy remains associated with the selected alternative.

(4) Failure of a mitigation measure, or other unforeseen circumstances, could result in serious harm to federal- or state-listed endangered or threatened species; important historic or archaeological sites that are either on, or meet eligibility requirements for nomination to the National Register of Historic Places; wilderness areas, wild and scenic rivers, or other public or private protected resources. Evaluation and determination of what constitutes serious harm must be made in coordination with the appropriate federal, state, or local agency responsible for each particular program.

(6) Five basic considerations affect the establishment of monitoring programs:

(1) Legal requirements. Permits for some actions will require that a monitoring system be established (for example, dredge and fill permits from the USACE). These permits will generally require both enforcement and effectiveness monitoring programs.

(2) Protected resources. These include federal- or state-listed endangered or threatened species, important historic or archaeological sites (whether or not these are listed or eligible for listing on the National Register of Historic Places), wilderness areas, wild and scenic rivers, and other public or private protected resources. Private protected resources include areas such as Audubon Society Refuges, Nature Conservancy lands, or any other land that would be protected by law if it were under government ownership, but is privately owned. If any of these resources are affected, an effectiveness and enforcement-monitoring program must be undertaken in conjunction with the federal, state, or local agency that manages the type of resource.

(3) Major environmental controversy. If a controversy remains regarding the effect of an action or the effectiveness of a mitigation, an enforcement and effectiveness monitoring program must be undertaken. Controversy includes not only scientific disagreement about the mitigation’s effectiveness, but also public interest or debate.

(4) Mitigation outcome. The probability of the mitigation’s success must be carefully considered. The proponent must know if the mitigation has been successful elsewhere. The validity of the outcome should be confirmed by expert opinion. However, the proponent should note that a certain technique, such as artificial seeding with the natural vegetation, which may have worked successfully in one area, may not work in another.

(5) Changed conditions. The final consideration is whether any condition, such as the environmental setting, has changed (for example, a change in local land use around the area, or a change in project activities, such as increased amount of acreage being used or an increased movement of troops). Such changes will require preparation of a supplemental document (see §§651.5(g) and 651.24) and additional monitoring. If none of these conditions are met (that is, requirement by law, protected resources, no major controversy is involved, effectiveness of the mitigation is known, and the environmental or project conditions have not changed), then only an enforcement monitoring program is needed. Otherwise, both an enforcement and effectiveness monitoring program will be required.

(f) Enforcement monitoring program. The development of an enforcement monitoring program is governed by who will actually perform the mitigation; a contractor, a cooperating agency, or an in-house (Army) lead agency. The lead agency is ultimately responsible for performing any mitigation activities.

(1) Contract performance. Several provisions must be made in work to be performed by contract. The lead agency must ensure that contract provisions include the performance of the mitigation activity and that penalty clauses are written into the contracts. It must provide for timely inspection of the mitigation activity and is responsible for enforcing all contract provisions.

(2) Cooperating agency performance. The lead agency must ensure that, if a cooperating agency performs the work, it understands its role in the mitigation. The lead agency must determine and agree upon how the mitigation measures will be funded. It must also ensure that any necessary formal paperwork such as cooperating agreements is complete.

(3) Lead agency performance. If the lead agency performs the mitigation, the proponent must ensure that needed tasks are performed, provide appropriate funding in the project budget, arrange for necessary manpower allocations, and make any necessary changes in the agency (installation) regulations (such as environmental or range regulations).
(g) Effectiveness monitoring. Effectiveness monitoring is often difficult to establish. The first step is to determine what must be monitored, based on criteria discussed during the establishment of the system; for example, the legal requirements, protected resources, area of controversy, known effectiveness, or changed conditions. Initially, this can be a very broad statement, such as reduction of impacts on a particular stream by a combination of replanting, erosion control devices, and range regulations. The next step is finding the expertise necessary to establish the monitoring system. The expertise may be available on-post or may be obtained from an outside source. After a source of expertise is located, the program can be established using the following criteria:

1. Any technical parameters used must be measurable; for example, the monitoring program must be quantitative and statistically sound.
2. A baseline study must be completed before the monitoring begins in order to identify the actual state of the system prior to any disturbance.
3. The monitoring system must have a control, so that it can isolate the effects of the mitigation procedures from effects originating outside the action.
4. The system’s parameters and means of measuring them must be replicable.
5. Parameter results must be available in a timely manner so that the decision maker can take any necessary corrective action before the effects are irreversible.
6. Not every mitigation has to be monitored separately. The effectiveness of several mitigation actions can be determined by one measurable parameter. For example, the turbidity measurement from a stream can include the combined effectiveness of mitigation actions such as reseeding, maneuver restrictions, and erosion control devices. However, if a method combines several parameters and a critical change is noted, each mitigation measurement must be examined to determine the problem.

APPENDIX D TO PART 651—PUBLIC PARTICIPATION PLAN

The objective of the plan will be to encourage the full and open discussion of issues related to Army actions. Some NEPA actions will be very limited in scope, and may not require full public participation and involvement. Other NEPA actions will obviously be of interest, not only to the local community, but to others across the country as well.

(a) To accomplish this objective, the plan will require:
1. Dissemination of information to local and installation communities through such means as news releases to local media, announcements to local citizens groups, and Commander’s letters. Such information may be subject to Freedom of Information Act and operations security review.
2. The invitation of public comments through two-way communication channels that will be kept open through various means.
3. The use of fully informed public affairs officers at all levels.
4. Preparation of EAs which incorporate public involvement processes whenever appropriate (40 CFR 1506.6).
5. Consultation of persons and agencies such as:
   (i) Municipal, township, and county elected and appointed officials.
   (ii) Tribal, state, county, and local government officials and administrative personnel whose official duties include responsibility for activities or components of the affected environment related to the proposed Army action.
   (iii) Local and regional administrators of other federal agencies or commissions that may either control resources potentially affected by the proposed action (for example, the U.S. Fish and Wildlife Service) or who may be aware of other actions by different federal agencies whose effects must be considered with the proposed Army action (for example, the GSA).
   (iv) Members of identifiable population segments within the potentially affected environments, whether or not they have clearly identifiable leaders or an established organization such as farmers and ranchers, homeowners, small business owners, and Native Americans.
   (v) Members and officials of those identifiable interest groups of local or national scope that may have an interest in the environmental effects of the proposed action or activity (for example, hunters and fishermen, Isaak Walton League, Sierra Club, and the Audubon Society).
   (vi) Any person or group that has specifically requested involvement in the specific action or similar actions.
(b) Public involvement should be solicited using the following processes and procedures:
1. Direct individual contact. Such limited contact may suffice for all required public involvement, when the expected environmental effect is of a very limited scope. This contact should identify:
   (i) Persons expected to express an opinion and later participate.
   (ii) Preliminary positions of such persons on the scope of issues that the analysis must address.
2. Small workshops or discussion groups.
3. Larger public gatherings that are held after some formulation of the potential issues, inviting the public to express views on the proposed courses of action. Public suggestions or additional alternative courses
of action may be expressed at these gatherings which need not be formal public hearings.

(4) Any other processes and procedures to accomplish the appropriate level of public involvement.

(c) Scoping Guidance. All affected parties must be included in the scoping process (AR 306–5). The planning process includes the following:

(1) Information disseminated to local and installation communities through such means as news releases to local media, announcements to local citizens groups, and Commander’s letters at each phase or milestone (more frequently if needed) of the project. Such information may be subject to Freedom of Information Act and operations security review.

(2) Each phase or milestone (more frequently if needed) of the project will be coordinated with representatives of local, state, and federal government agencies.

(3) Public comments will be invited and two-way communication channels will be kept open through various means as stated above.

(4) Public affairs officers at all levels will be kept informed.

(5) When an EIS is being prepared, public involvement is a requisite element of the scoping process (40 CFR 1501.7(a)(1)).

(6) Preparation of EAs will incorporate public involvement processes whenever appropriate (40 CFR 1506.6).

(7) Persons and agencies to be consulted include the following:

(i) Municipal, township, and county elected and appointed officials.

(ii) Tribal, state, county, and local government officials and administrative personnel whose official duties include responsibility for activities or components of the affected environment related to the proposed Army action.

(iii) Local and regional administrators of other federal agencies or commissions that may either control resources potentially affected by the proposed action (for example, the U.S. Fish and Wildlife Service); or who may be aware of other actions by different federal agencies whose effects must be considered with the proposed Army action, (for example, the GSA).

(iv) Members of identifiable population segments within the potentially affected environments, whether or not they have clearly identifiable leaders or an established organization such as farmers and ranchers, homeowners, small business owners, and Indian tribes.

(v) Members and officials of those identifiable interest groups of local or national scope that may have interest in the environmental effects of the proposed action or activity (for example, hunters and fishermen, Isaak Walton League, Sierra Club, and the Audubon Society).

(vi) Any person or group that has specifically requested involvement in the specific action or similar actions.

(8) The public involvement processes and procedures by which participation may be solicited include the following:

(i) The direct individual contact process identifies persons expected to express an opinion and participate in later public meetings. Direct contact may also identify the preliminary positions of such persons on the scope of issues that the EIS will address. Such limited contact may suffice for all required public involvement, when the expected environmental effect is of very limited scope.

(ii) Small workshops or discussion groups.

(iii) Larger public gatherings that are held after some formulation of the potential issues. The public is invited to express its views on the proposed courses of action. Public suggestions or alternative courses of action not already identified may be expressed at these gatherings that need not be formal public hearings.

(iv) Identifying and applying other processes and procedures to accomplish the appropriate level of public involvement.

(9) The meetings described above should not be public hearings in the early stages of evaluating a proposed action. Public hearings do not substitute for the full range of public involvement procedures under the purposes and intent of (a) of this appendix.

(10) Public surveys or polls to identify public opinion of a proposed action will be performed (AR 355–13, chapter 10).

(d) Preparing the Notice of Intent. In preparing the NOI, the proponent will:

(1) In the NOI, identify the significant issues to be analyzed in the EIS.

(2) In the NOI, identify the office or person responsible for matters related to the scoping process. If they are not the same as the proponent of the action, make that distinction.

(3) Identify the lead and cooperating agency, if already determined (40 CFR 1501.5 and 1501.6).

(4) Identify the method by which the agency will invite participation of affected parties; and identify a tentative list of the affected parties to be notified.

(5) Identify the proposed method for accomplishing the scoping procedure.

(6) Indicate the relationship between the timing of the preparation of environmental analyses and the tentative planning and decision-making schedule including:

(i) The scoping process itself.

(ii) Collecting or analyzing environmental data, including studies required of cooperating agencies.

(iii) Preparation of DEISs and FEISs.

(iv) Filing of the ROD.

(v) Taking the action.
(7) For a programmatic EIS, preparing a general expected schedule for future specific implementing actions that will involve separate environmental analysis.

(8) If applicable, in the NOI, identify the extent to which the EIS preparation process is exempt from any of the normal procedural requirements of this part, including scoping.

APPENDIX E TO PART 651—CONTENT OF THE ENVIRONMENTAL IMPACT STATEMENT

(a) EISes will:

(1) Be analytic rather than encyclopedic. Impacts will be discussed in proportion to their significance and insignificant impacts will only be briefly discussed, sufficient to show why more analysis is not warranted.

(2) Be kept concise and no longer than absolutely necessary to comply with NEPA, CEQ regulations, and this part. Length should be determined by potential environmental issues, not project size. The EIS should be no longer than 300 pages.

(3) Describe the criteria for selecting alternatives, and discuss those alternatives, including the “no action” alternative, to be considered by the ultimate decision maker.

(4) Serve as a means to assess environmental impacts of proposed military actions, rather than justifying decisions.

(b) The EIS will consist of the following:

(1) Cover sheet. The cover sheet will not exceed one page (40 CFR 1502.11) and will be accompanied by a signature page for the proponent, designated as preparer; the installation environmental office (or other source of NEPA expertise), designated as reviewer; and the Installation Commander (or other Activity Commander), designated as approver. It will include:

(i) The following statement: “The material contained in the attached (final or draft) EIS is for internal coordination use only and may not be released to non-Department of Defense agencies or individuals until coordination has been completed and the material has been cleared for public release by appropriate authority.” This sheet will be removed prior to filing the document with the EPA.

(ii) A list of responsible agencies including the lead agency and any cooperating agency.

(iii) The title of the proposed action that is the subject of the statement and, if appropriate, the titles of related cooperating agency actions, together with state and county (or other jurisdiction as applicable) where the action is located.

(iv) The name, address, and telephone number of the person at the agency who can supply further information, and, as appropriate, the name and title of the major approval authority in the command channel through HQDA staff proponent.

(v) A designation of the statement as a draft, final, or draft or final supplement.

(vi) A one-paragraph abstract of the statement that describes only the need for the proposed action, alternative actions, and the significant environmental consequences of the proposed action and alternatives.

(vii) The date by which comments must be received, computed in cooperation with the EPA.

(2) Summary. The summary will stress the major conclusions of environmental analysis, areas of controversy, and issues yet to be resolved. The summary presentation will focus on the scope of the EIS, including issues that will not be evaluated in detail. It should list all federal permits, licenses, other entitlements that must be obtained prior to proposal implementation. Further, a statement of compliance with the requirements of other federal environmental protection laws will be included (40 CFR 1502.25).

To simplify consideration of complex relationships, every effort will be made to present the summary of alternatives and their impacts in a graphic format with the narrative. The EIS summary should be written at the standard middle school reading level. This summary should not exceed 15 pages. An additional summary document will be prepared for separate submission to the DEP and the ASA(I&E). This will identify progress “to the date,” in addition to the standard EIS summary which:

(i) Summarizes the content of the document (from an oversight perspective).

(ii) Outlines mitigation requirements (to improve mitigation tracking and the programming of funds).

(iii) Identifies major and unresolved issues and potential controversies. For EIS actions that have been delegated by the ASA(I&E), this document will also include status of requirements and conditions established by the delegation letter.

(3) Table of contents. This section will provide for the table of contents, list of figures and tables, and a list of all referenced documents, including a bibliography of references within the body of the EIS. The table of contents should have enough detail so that searching for sections of text is not difficult.

(4) Purpose of and need for the action. This section should clearly state the nature of the problem and discuss how the proposed action or range of alternatives would solve the problem. This section will briefly give the relevant background information on the proposed action and summarize its operational, social, economic, and environmental objectives. This section is designed specifically to call attention to the benefits of the proposed action. If a cost-benefit analysis has been prepared for the proposed action, it may be included here, or attached as an appendix and referenced here.
(5) Alternatives considered, including proposed action and no action alternative. This section presents all reasonable alternatives and their likely environmental impacts, written in simple, nontechnical language for the lay reader. A no action alternative must be included (40 CFR 1502.14(d)). A preferred alternative need not be identified in the DEIS; although a preferred alternative generally must be included in the FEIS (40 CFR 1502.14(e)). The environmental impacts of the alternatives should be presented in comparative form, thus sharply defining the issues and providing a clear basis for choice among the options that are provided the decision maker and the public (40 CFR 1502.14). The information should be summarized in a brief, concise manner. The use of graphics and tabular or matrix format is encouraged to provide the reviewer with an at-a-glance review. In summary, the following points are required:

(i) A description of all reasonable alternatives, including the proposed action, alternatives beyond DA jurisdiction (40 CFR 1502.14(c)), and the no action alternative.

(ii) A comparative presentation of the environmental consequences of all reasonable alternative actions, including the preferred alternative.

(iii) A description of the mitigation measures and/or monitoring procedures (§651.15) nominated for incorporation into the proposed action and alternatives, as well as mitigation measures that are available but not incorporated and/or monitoring procedures (§651.15).

(iv) Listing of any alternatives that were eliminated from detailed study. A brief discussion of the reasons for which each alternative was eliminated.

(6) Affected environment (baseline conditions) that may be impacted. This section will contain information about existing conditions in the affected areas in sufficient detail to understand the potential effects of the alternatives under consideration (40 CFR 1502.15). Affected elements could include, for example, biophysical characteristics (ecology and water quality); land use and land use plans; architectural, historical, and cultural amenities; utilities and services; and transportation. This section will not be encyclopedic. It will be written clearly and the degree of detail for points covered will be related to the significance and magnitude of expected impacts. Elements not impacted by any of the alternatives need only be presented in summary form, or referenced.

(7) Environmental and socioeconomic consequences. This section forms the scientific and analytic basis for the comparison of impacts. It should discuss:

(i) Direct effects and their significance.

(ii) Indirect effects and their significance.

(iii) Possible conflicts between the proposed action and existing land use plans, policies, and controls.

(iv) Environmental effects of the alternatives, including the proposed action and the no action alternative.

(v) Energy requirements and conservation potential of various alternatives and mitigation measures.

(vi) Irreversible and irretrievable commitments of resources associated with the proposed action.

(vii) Relationship between short-term use of the environment and maintenance and enhancement of long-term productivity.

(viii) Urban quality, historic, and cultural resources, and design of the built environment, including the reuse and conservation potential of various alternatives and mitigation measures.

(ix) Cumulative effects of the proposed action in light of other past, present, and foreseeable actions.

(x) Means to mitigate or monitor adverse environmental impacts.

(xi) Any probable adverse environmental effects that cannot be avoided.

(8) List of preparers. The EIS will list the names of its preparers, together with their qualifications (expertise, experience, and professional disciplines) (40 CFR 1502.17), including those people who were primarily responsible for preparing (research, data collection, and writing) the EIS or significant background or support papers, and basic components of the statement. When possible, the people who are responsible for a particular analysis, as well as an analysis of background papers, will be identified. If some or all of the preparers are contractors' employees, they must be identified as such. Identification of the firm that prepared the EIS is not, by itself, adequate to meet the requirements of this point. Normally, this list will not exceed two pages. Contractors will execute disclosure statements specifying that they have no financial or other interest in the outcome of the project. These statements will be referenced in this section of the EIS.

(9) Distribution list. For the DEIS, a list will be prepared indicating from whom review and comment is requested. The list will include public agencies and private parties or organizations. The distribution of the DEIS and FEIS will include the CBTDEVs from whom comments were requested, irrespective of whether they provided comments.

(10) Index. The index will be an alphabetical list of topics in the EIS, especially of the types of effects induced by the various alternative actions. Reference may be made to either page number or paragraph number.

(11) Appendices (as appropriate). If an agency prepares an appendix to an EIS, the appendix will consist of material prepared in
connection with an EIS (distinct from material not so prepared and incorporated by reference), consist only of material that substantiates any analysis fundamental to an impact statement, be analytic and relevant to the decision to be made, and be circulated with the EIS or readily available.

APPENDIX F TO PART 651—GLOSSARY

Section I—Abbreviations

AAE
Army Acquisition Executive.

AAPPSO
Army Acquisition Pollution Prevention Support Office.

ACAT
Acquisition Category.

ACSIM
Assistant Chief of Staff for Installation Management.

ADNL
A-weighted day-night levels.

AQCR
Air Quality Control Region.

AR
Army Regulation.

ARNG
Army National Guard.

ARSTAF
Army Staff.

ASA(AL&T)
Assistant Secretary of the Army (Acquisition, Logistics, and Technology).

ASA(FM)
Assistant Secretary of the Army for Financial Management.

ASA(I&E)
Assistant Secretary of the Army (Installations and Environment).

ASD(ISA)
Assistant Secretary of Defense (International Security Affairs).

CARD
Cost Analysis Requirements Description.

CBTDEV
Combat Developer.

Categorical Exclusion

A category of actions that do not require an EA or an EIS because Department of the Army (DA) has determined that the actions do not have an individual or cumulative impact on the environment.

Environmental (or National Environmental Policy Act) Analysis

This term, as used in this part, will include all documentation necessary to coordinate and staff analyses or present the results of the analyses to the public or decision maker.

Foreign Government

A government, regardless of recognition by the United States, political factions, and organizations, that exercises governmental power outside the United States.

Foreign Nations

Any geographic area (land, water, and airspace) that is under the jurisdiction of one or more foreign governments. It also refers to any area under military occupation by the United States alone or jointly with any other foreign government. Includes any area that is the responsibility of an international organization of governments; also includes contiguous zones and fisheries zones of foreign nations.

Global Commons

Geographical areas outside the jurisdiction of any nation. They include the oceans outside territorial limits and Antarctica. They do not include contiguous zones and fisheries zones of foreign nations.

Headquarters, Department of the Army proponent

As the principal planner, implementer, and decision authority for a proposed action, the HQDA proponent is responsible for the substantive review of the environmental documentation and its thorough consideration in the decision-making process.

Major Federal Action

Reinforces, but does not have a meaning independent of, “significantly affecting the environment,” and will be interpreted in that context. A federal proposal with “significant effects” requires an EIS, whether it is “major” or not. Conversely, a “major federal action” without “significant effects” does not necessarily require an EIS.
Preparers

Personnel from a variety of disciplines who write environmental documentation in clear and analytical prose. They are primarily responsible for the accuracy of the document.

Proponent

Proponent identification depends on the nature and scope of a proposed action as follows:

(1) Any Army structure may be a proponent. For instance, the installation/activity Facility Engineer (FE)/Director of Public Works becomes the proponent of installation-wide Military Construction Army (MCA) and Operations and Maintenance (O&M) Activity; Commanding General, TRADOC becomes the proponent of a change in initial entry training; and the Program Manager becomes the proponent for a major acquisition program. The proponent may or may not be the preparer.

(2) In general, the proponent is the unit, element, or organization that is responsible for initiating and/or carrying out the proposed action. The proponent has the responsibility to prepare and/or secure funding for preparation of the environmental documentation.

Significantly Affecting the Environment

The significance of an action’s, program’s, or project’s effects must be evaluated in light of its context and intensity, as defined in 40 CFR 1508.27.

Section III—Special Abbreviations and Terms

This part uses the following abbreviations, brevity codes or acronyms not contained in AR 310–50. These include use for electronic publishing media and computer terminology, as follows:

WWW World Wide Web.

PARTS 652–654 [RESERVED]

PART 655—RADIATION SOURCES ON ARMY LAND

AUTHORITY: 10 U.S.C. 3013.

SOURCE: 76 FR 6690, Feb. 8, 2011, unless otherwise noted.

§ 655.10 Oversight of radiation sources brought on Army land by non-Army entities (AR 385–10).

(a) As used in this section:

Agreement State has the same meaning as provided in 10 CFR 30.4.

Byproduct material has the same meaning as provided in 10 CFR 20.1003.

Radiation has the same meaning as provided in 10 CFR 20.1003.

Radioactive material includes byproduct material, source material, and special nuclear material.

Source material has the same meaning as provided in 10 CFR 20.1003.

Special nuclear material has the same meaning as provided in 10 CFR 20.1003.

(b) Army radiation permits are required for use, storage, or possession of ionizing radiation sources by non-Army entities (including their civilian contractors) on an Army installation. Such use, storage, or possession of ionizing radiation sources must be in connection with an activity of the Department of Defense or in connection with a service to be performed on the installation for the benefit of the Department of Defense, in accordance with 10 U.S.C. 2692(b)(1). Approval by the garrison commander is required to obtain an Army radiation permit. For the purposes of this section, an ionizing radiation source is:

(1) Radioactive material used, stored, or possessed under the authority of a specific license issued by the Nuclear Regulatory Commission (NRC) or an Agreement State (10 CFR parts 30, 40, and 70 or the equivalent regulations of an Agreement State); or

(2) A machine-produced ionizing radiation source capable of producing an area, accessible to individuals, in which radiation levels could result in an individual receiving a dose equivalent in excess of 0.1 rem (1 mSv) in 1 hour at 30 centimeters from the ionizing radiation source or from any surface that the radiation penetrates.

(c) A permit is not required for non-Army entities (including their civilian contractors) that use Army licensed radioactive material on an Army installation in coordination with the Army NRC licensee. The non-Army entity must obtain permission from the Army NRC licensee to use the radioactive materials and be in compliance with all of the Army NRC license conditions prior to beginning work on Army land.

(d) Other Military Departments are exempt from the requirement of paragraph (b) of this section to obtain an Army radiation permit; however, the garrison Radiation Safety Officer
(RSO) must be notified prior to ionizing radiation sources being brought onto the installation.

(e) Applicants will apply for an Army radiation permit by letter with supporting documentation (paragraph (f) of this section) to the garrison commander through the appropriate tenant commander or garrison director. Submit the letter so that the garrison commander receives the application at least 30 calendar days before the requested effective date of the permit.

(f) The Army radiation permit application will include a proposed effective date and duration (not to exceed 12 months) for the Army radiation permit and describe the purposes for which the ionizing radiation source will be used. The application will include: Identification of the trained operating personnel who will be responsible for implementation of the activities authorized by the permit and a summary of their professional qualifications; the applicant’s point-of-contact name and phone number; the applicant’s radiation safety Standing Operating Procedures (SOPs); storage provisions when the ionizing radiation source is not in use; and procedures for notifying the garrison of reportable incidents/accidents.

(g) The garrison commander may approve the application only if the applicant provides evidence to show that one of the following is true:

(1) The applicant possesses a valid NRC license or Department of Energy (DOE) radiological work permit that allows the applicant to use the ionizing radiation source in the manner requested in the Army radiation permit application;

(2) The applicant possesses a valid Agreement State license that allows the applicant to use the ionizing radiation source in the manner requested in the Army radiation permit application;

(h) Applicants and permit holders shall comply with all applicable Federal, state, interstate, and local laws and regulations, status-of-forces agreements (SOFAs), and other international agreements.

(i) Each Army radiation permit will require the permit holder to remove its permitted ionizing radiation sources from Army property prior to the expiration of the permit and restore all real or personal property of the Army that was modified, altered, or otherwise changed as a result of the permit holder’s activities to the condition such property was in prior to the effective date of the permit.

(j) An Army radiation permit issued pursuant to this section shall be valid for no more than 12 months.

(k) Disposal of radioactive material by non-Army entities on Army property is prohibited. However, the garrison commander may give written authorization for releases of radioactive material to the atmosphere or to the sanitary sewerage system if such releases are in compliance with all applicable Federal, State, interstate, and local laws and regulations, including but not limited to, the NRC regulations at 10 CFR part 20, Subpart K, or the equivalent requirements of an Agreement State, and regulations issued by the Army or the Department of Defense, to include compliance with any applicable requirement to obtain a permit, license, or other authorization, or to submit any information, notification, or report for such release.
§ 655.10

SUBCHAPTER L—ARMY CONTRACTING [RESERVED]

PARTS 668–699 [RESERVED]
FINDING AIDS

A list of CFR titles, subtitles, chapters, subchapters and parts and an alphabetical list of agencies publishing in the CFR are included in the CFR Index and Finding Aids volume to the Code of Federal Regulations which is published separately and revised annually.

Table of CFR Titles and Chapters
