

§ 3.359

training program. For example, a disability resulting from the use of an item of mechanical or other equipment is within the purview of the statute if training in its use is implicit within the prescribed program or course outlined or if its use is implicit in the performance of some task or operation the trainee must learn to perform, although such use may not be especially mentioned in the training program. In determining whether the element of direct or proximate causation is present, it remains necessary for a distinction to be made between an injury arising out of an act performed in pursuance of the course of training, that is, a required "learning activity", and one arising out of an activity which is incident to, related to, or coexistent with the pursuit of the program of training. For a case to fall within the statute there must have been sustained an injury which, but for the performance of a "learning activity" in the prescribed course of training, would not have been sustained. A meticulous examination into all the circumstances is required, including a consideration of the time and place of the incident producing the injury.

(6) Nursing home care furnished under section 1720 of title 38, United States Code is not hospitalization within the meaning of this section. Such a nursing home is an independent contractor and, accordingly, its agents and employees are not to be deemed agents and employees of the Department of Veterans Affairs. If additional disability results from medical or surgical treatment or examination through negligence or other wrongful acts or omissions on the part of such a nursing home, its employees, or its agents, entitlement does not exist under this section unless there was an act or omission on the part of the Department of Veterans Affairs independently giving rise to such entitlement and such acts on the part of both proximately caused the additional disability.
