Environmental Protection Agency

§ 86.1814–01

Emission standards for light-duty trucks 3.

This section applies to 2001 and later model year light-duty truck 3's fueled by gasoline, diesel, methanol, natural gas and liquefied petroleum gas fuels except as noted. Multi-fueled vehicles shall comply with all requirements established for each consumed fuel. For methanol fueled vehicles, references in this section to total hydrocarbons shall mean total hydrocarbon equivalents and references to non-methane hydrocarbons shall mean non-methane hydrocarbon equivalents.

(a) Exhaust emission standards. (1) Exhaust emissions shall not exceed the following standards at intermediate useful life:

(i) [Reserved]

(ii) Non-methane hydrocarbons: 0.32 grams per mile.

(iii) Carbon monoxide: 4.4 grams per mile.

(iv) Oxides of nitrogen: 0.7 grams per mile except diesel-fueled vehicles which have no standard.

(v) [Reserved]

(2) Exhaust emissions from 2001 and later model year light-duty truck 3's shall not exceed the following standards at full useful life:

(i) Total hydrocarbons: 0.80 grams per mile except natural gas fueled vehicles which has no total hydrocarbon standard.

(ii) Non-methane hydrocarbons: 0.46 grams per mile.

(iii) Carbon monoxide: 6.4 grams per mile.

(iv) Oxides of nitrogen: 0.98 grams per mile.

(v) Particulate matter: 0.10 grams per mile.

(b) [Reserved]

(c) Cold temperature emission standards. Exhaust emissions from gasoline-fueled light-duty truck 3's shall not exceed the cold temperature CO standard of 12.5 grams per mile for an intermediate useful life of 50,000 miles.

(d) Evaporative emissions. Evaporative emissions from gasoline-fueled, natural gas-fueled, liquefied petroleum gas-fueled, and methanol-fueled light-duty truck 3's shall not exceed the following standards. The standards apply equally to certification and in-use vehicles. The spitback standard also applies to newly assembled vehicles.

(1) Hydrocarbons for gasoline and methanol light-duty trucks with a nominal fuel tank capacity of 30 gallons or more shall not exceed the following standards:

(i) For the full three-diurnal test sequence, diurnal plus hot soak measurements: 2.5 grams per test.

(ii) Gasoline and methanol fuel only. For the supplemental two-diurnal test sequence, diurnal plus hot soak measurements: 3.0 grams per test.

(iii) Gasoline and methanol fuel only. Running loss test: 0.05 grams per mile.

(iv) Gasoline and methanol fuel only. Fuel dispensing spitback test: 1.0 grams per test.

(2) Hydrocarbons for gasoline and methanol light-duty trucks with a nominal fuel tank capacity of less than 30 gallons shall not exceed the following standards:
§ 86.1814–02 Emission standards for light-duty trucks 3.

This section applies to 2002 and later model year light-duty truck 3’s fueled by gasoline, diesel, methanol, natural gas and liquefied petroleum gas fuels except as noted. Multi-fueled vehicles shall comply with all requirements established for each consumed fuel. For methanol fueled vehicles, references in this section to total hydrocarbons shall mean total hydrocarbon equivalents and references to non-methane hydrocarbons shall mean non-methane hydrocarbon equivalents. This section does not apply to 2004 and later model year vehicles, except as specifically referenced by §86.1811–04.

(a) Exhaust emission standards. (1) Exhaust emissions shall not exceed the following standards at intermediate useful life:
   (i) [Reserved]
   (ii) Non-methane hydrocarbons: 0.32 grams per mile.
   (iii) Carbon monoxide: 4.4 grams per mile.
   (iv) Oxides of nitrogen: 0.7 grams per mile except diesel-fueled vehicles which have no standard.
   (v) [Reserved]
   (2) Exhaust emissions from 2001 and later model year light-duty truck 3’s shall not exceed the following standards at full useful life:
   (i) Total hydrocarbons: 0.80 grams per mile except natural gas fueled vehicles which have no total hydrocarbon standard.
   (ii) Non-methane hydrocarbons: 0.46 grams per mile.
   (iii) Carbon monoxide: 6.4 grams per mile.
   (iv) Oxides of nitrogen: 0.98 grams per mile.
   (v) Particulate matter: 0.10 grams per mile.

(b) Supplemental exhaust emissions. (1) Supplemental exhaust emissions for 2002 and later model year gasoline-fueled light-duty truck 3’s shall not exceed the following standards at intermediate useful life:
   (i) 3.9 grams per mile on the A/C test, not applicable to diesel fueled vehicles; and
   (ii) 11.6 grams per mile on the US06 test; or
   (B) Composite Carbon Monoxide Standard: 4.4 grams per mile.
   (2) Supplemental exhaust emissions from 2002 and later model year gasoline-fueled light-duty truck 3’s shall not exceed the following standards at full useful life:
   (i) Non-methane hydrocarbon and oxides of nitrogen composite: 1.02 grams per mile.

[64 FR 20225, May 4, 1999, as amended at 65 FR 59970, Oct. 6, 2000]
